This zine examines the frequent overlap between punk culture and animal rights\textsuperscript{1} activism/vegan consumption habits. It is argued that this relationship is most strongly and consistently expressed, and most sensibly understood, in connection with anarchism.

Examining this relationship is important in several ways. Firstly, it is under-researched and overlooked – as environmental journalist Will Potter argues, given the importance that punk plays in the political development of individual activists, it is surprising that ‘there is a shortage of research into punk’s impact on animal rights and environmental activism.’\textsuperscript{2} This zine, which brings together material from numerous bands, zines, patches, leaflets, and newly researched interview material, addresses this absence by considering the relationship between animal rights/veganism and punk. Secondly, the themes raised in this zine resonate far beyond the punk scenes from which material is collected: diversity and difference within activist communities, how these differences are managed (even ‘policed’), the prioritisation of certain forms of activism over others, and the role of culture are all issues which cut right to the heart of contemporary activist and community organising. Thirdly, the topic is of personal importance to the authors, both of whom are writing the zine from the impetus of their own life experiences.

In the first part of the zine the ways in which punk culture and veganism/animal rights coincide will be laid out, to stress the connection’s existence and to explore the different ways in which this connection is expressed. Next, the theme of

\textsuperscript{1}It is recognised that the term ‘rights’ often sits at odds with anarchist engagements with animal advocacy/activism, which favour terms such as ‘animal liberation.’ ‘Animal rights’ is employed here as a catch-all term, and to reflect its common usage in the activist and punk movements themselves.

politicisation will be raised, examining the link between people’s exposure to animal rights/veganism through punk, and the adoption of vegan consumption habits or involvement in animal rights activism. Thirdly, the tension between individual choice and subcultural expectation will be explored, followed by an examination of the supposed dichotomy between consumption and activist politics in animal rights. The zine will conclude by examining how anarchist perspectives cut across and inform these debates in an *intersectional* manner.

This zine is concerned with the contemporary UK punk scene, so new primary information collected from interviews by both authors forms the main basis for analysis. Grounded theory informs the interview method, and is a fruitful approach for anarchist-associated themes in general for several reasons. Interviewees, and the data they offer, are given primacy over imposed theoretical abstractions, ‘it means openness, a willingness to listen and to “give voice” to respondents...’ and ‘the need to get out into the field to discover what is really going on...’ Grounded theory also acknowledges that ‘[t]he touchstone of one’s own experience might be a more valuable indicator of a potentially successful research endeavour than another more abstract source’ which is important for two authors writing this zine from the impetus of their own life experiences. The immersion in the data that this suggests is also upheld in grounded theory as a useful research position: ‘by the end of inquiry, the researcher is shaped by the data, just as the data are shaped by the researcher. (This does not imply

G. Kuhn (ed.), *Sober Living for the Revolution. Hardcore punk, straight edge, and radical politics*, (Oakland: PM Press, 2010)

Films

Edgar Wright (dir.), *Scott Pilgrim vs. the World*, (2010)

that the researcher has “gone native”; rather, he or she is sensitive to the issues and problems of the persons or places being investigated.) This approach, then, mitigates against the foisting of ideological preconceptions onto a research topic, or the warping and misrepresentation of interviewees’ testimony to suit particular biases, while valuing the critical analyses generated from immersed and insider perspectives. The research also draws on the principles of Critical Animal Studies (CAS) which promotes collaborative work that rejects ‘pseudo-objective academic analysis’ and instead aims to produce work that links theory to practice and the university to the community, whilst advancing a ‘holistic understanding of the commonality of oppressions’ and championing a politics of total liberation. This commitment to avoid exploitation of interviewees and an emphasis on bottom-up theory construction makes this approach highly compatible with an anarchist studies position. Most of the names of interview respondents have been changed to protect anonymity, and the interviewees have been extended a pre-publication opportunity to veto or amend any of the comments attributed to them. This ensures that respondents feel fairly represented, helps to prevent any basic errors, and is also important from a basic respect for individual privacy, particularly because of the sensitive nature of some of the activism discussed, and the background of harsh repression meted out against the animal rights movement over recent years. All the interviews were carried out in the UK from August 2013 to January 2014.

7 Ibid., p. 42.
Animal rights and veganism in punk

UK hardcore and animal rights went hand-in-hand.9 Interview respondent George.10

Punk and veganism/animal rights are undoubtedly connected. This is expressed through the lyrics and imagery of punk bands, the editorial and interview content of zines, numerous benefit gigs and record releases for animal activist causes, and in the overlap between punk and veganism in cafés, social centres, Food Not Bombs chapters, and hunt saboteur (hunt sab) groups. This is not to say that all punks are vegan, or that all vegans are punks – but the prevalence of this connection cannot be ignored and is particularly striking when considered in conjunction with anarchist and intersectional politics.

Literature dealing with punk pays scant attention to vegan/animal rights issues in general. The majority of books written about punk follow very narrow, singular narratives which consider punk as a brief moment of the late 1970s, and even within that time period only focus on commercially successful bands. There is some truth in a view of early punk as a rhetorically anti-hippie, leather jacket wearing scene, but such a focus ignores the emergence of animal rights in punk, which Alastair Gordon identifies:

...on the Stations of The Crass record [1979] with the track ‘Time Out’ where comparisons are made to human and animal flesh. Animal rights became a central ethical theme over the next decade... there were numerous anarcho records voicing animal rights issues such as the promotion of vegetarianism, anti hunting and anti vivisection themes.11

There is, then, a deep and strongly expressed connection between animal rights/veganism and punk culture. This relationship is best understood in conjunction with anarchism and an intersectional opposition to all forms of domination. As Canadian anarchist punk band Propagandhi convey in the song that gives this zine its title: ‘I have recognised one form of oppression; now I recognise the rest.’128 The complications and tensions discussed here ensure that these issues will continue to be debated and discussed within punk scenes (the more the better!). It is hoped that this analysis can be a useful contribution to those debates, as well as introducing outsiders to this important subject area, and indeed, to the importance of veganism and animal rights more widely.

Life’s too short to make others’ shorter.

9Interview conducted 24/11/2013.
10George grew up in/around the Liverpool punk scene in the 1980s, and now resides in Manchester where he is editor of a widely read zine.

127Interview conducted 28/08/2013.
Some anarchists reject veganism as a consumer activity whilst others believe that 'anarchism is a life without structure or authority, therefore my diet follows neither of these' or that an emphasis on a seemingly restrictive diet makes it difficult to organise with community groups outside of the anarchist movement. Some anarchists reject the concept of 'rights' whilst others deny that non-human animals are suitable candidates for liberation because they can less clearly engage in their own liberation struggle. Interview respondent Adam, who was exposed to anarchism in the late 1980s Belfast punk scene, is now involved in anarcho-syndicalist activism, and who was vegetarian for a large part of his life, now doesn’t consider animal rights as ‘necessarily intrinsic to anarchist politics.’ However, he is critical of the polarisation that often occurs in the anarchist movement over the animal rights issue. ‘In my experience the people that argue about this are, on one side, people that only give a fuck about wee fluffy animals, and don’t really care about exploitation of people... there’s something about them that’s misanthropic. Uh, and on the other extreme you have people who have come through that sorta thing, who are fucking overly embarrassed about it, who think “aw, we have to be so materialist about everything.”’ In Adam’s opinion this lifestyle/workerist dichotomy is based on ‘stupid fucking arguments.’

If you join an anarcho-syndicalist organisation, or an anarcho-communist organisation for that matter, I don’t think there is any contradiction in having a debate and putting for-

---

126 Interview conducted 28/08/2013.

The anarcho-punk scene held animal rights as a central theme, so those accounts of punk that get beyond 1979 do frequently mention veganism and animal rights, but even here it is often as a brief mention within a list of other political engagements. The blurb to Roy Wallace’s *The Day the Country Died* documentary is typical: ‘Many anarcho-punks are supporters of issues such as animal rights, feminism, the anti-war movement, the antiglobalization movement, and many other social movements.’ Likewise, Mike Dines’ thesis discusses a “‘punk rock” resistance that accompanied the expansion of protest into areas such as animal rights, feminism and environmental issues,’ and Tolga Güldallı writes of punk’s ‘anti-fascist, anti-capitalist, anti-militarist, anti-authoritarian, anti-sexist, anti-homophobic, deeply ecological, pro-animal rights “ideology.”’ This understanding of veganism and ani-
mal rights in conjunction with other radical politics is valid and useful. However, it is worthwhile to examine punk’s adoption of veganism and animal rights positions in isolation as well – especially because, for many, animal rights is an issue of prime concern. Interview respondent Ryan, who has been involved in the Belfast anarchist and punk scenes since the early 1980s, recognises that ‘animal rights was always a very very key type of thing. But it was one of the things that, for me, it became almost too exclusive… it came at the top of all the people’s chains.’

When Last Hours zine attempted to compile a ‘Punk Rock Census’ in 2006 they found that 54.6 percent of respondents were either vegan or vegetarian, compared with less than 3 percent of the general population. That the survey even asked about dietary practice reveals that some connection is presumed, and the high number of respondents who did not eat meat further demonstrates the connection. The musical and artistic output of bands adds more weight to the evidence of the connection between punk and animal rights. There are far too many examples to cover exhaustively here, but a few selections will serve to illustrate some typical approaches. Among the numerous anarcho-punk bands to embrace animal rights and veganism in the 1980s, Conflict stood as a totem. To supple-

---

16 Interview conducted 08/10/2013 (emphasis added).
17 Last Hours, #13, Summer 2006, ‘punk rock census’ received 306 replies. This census obviously carries substantial limitations, but the figures presented by Last Hours massively exceed the figures for vegetarians and vegans in the general public. ‘2% of both adults and children reported that they were vegetarian’ and ‘[l]ess than 1% reported following a vegan diet’ according to the 2012 Department of Health and Food Standards Agency (FSA) • National Diet and Nutrition Survey, available on https://www.vegsoc.org/sslpage.aspx?pid=753 [accessed 11th August 2014].
18 One should not presume that the relationship is static; one interviewee believes that ‘veganism holds less sway now in the punk scene [than in the mid-2000s]... the punk pizza party actually usually involves cheese and ham’.
19 The selections here are necessarily biased by personal taste.

As mentioned above, veganism and animal rights are generally included among a list of other political engagements connected to punk scenes. Megan echoes Ryan when she says ‘everything’s kinda like interlocked, and these whole overarching systems of oppression, and they kind of intersect, and intersectionality’s great as a theory.’ This intersectional understanding is underpinned by an anarchist political philosophy, and as repeatedly suggested throughout the zine, it is from this understanding that the relationships between veganism/animal rights and punk culture make sense. Jon Active recalls the practical implications of this struggle against a wide range of oppressions. ‘It wasn’t just hunt sabbing… there was going to the... nuclear bases, going to Upper Hayford, and goin’ to Greenham Common... And of course the anti-fascist stuff, and then there was the um... Public Order Act, whenever that was... Those kind of demos, and then the... anti-McDonald’s stuff.’

However, the relationship between anarchism and animal advocacy fluctuates and there are anarchists who deny that animal rights has anything to do with their politics. Although the Class War Federation once believed that ‘animals are the lowest class imaginable’ and ‘abolition of Class Slavery means freedom for all animals,’ a later pronouncement in their book Unfinished Business states that they do ‘not think that music, drugs or fashion will change the world. The Federation has no
punk veganism might be considered as merely part of the rising global consumer trend for vegan diets. Some vegan activists, who have often emerged from the punk scene, even consider that their actions do not amount to a political activity. For instance, the Pogo Café was run ‘as a workers collective where everyone involved has a joint say’, the collective ‘started as Emmaz… the origins are in the punk rock community, who then joined with people from the animal rights community and the group got bigger.'\textsuperscript{116} Despite this, some Pogo Café volunteers believed that the collective ‘don’t really have any politics.'\textsuperscript{117} Subversive Energy, a group influenced by Max Stirner, promote stealing or ‘freeganism’ ‘in an attempt to subvert the consumer-product relationship... [And] undermine the transfer of resources’ of the capitalist system.\textsuperscript{118} Indeed, punks frequently engage in skipping (known as dumpster diving in the US) to provide for mass catering and Food Not Bombs initiatives. The fact that punks have so often combined activism with their dietary practice disproves any claim that they are merely engaged in consumerism. This link between dietary habits and activism separates veganism in the punk scene from the growing international trend. Another key difference is the tendency of punks to combine veganism with a critique of capitalism and – most significantly – with an anarchist engagement. Punk animal advocacy most readily and consistently emerges in connection to anarchism.

\section*{Conclusion}

This is only one issue, it’s a big issue, it’s an important issue. But it’s a single issue or several is-

the Wall/(Liquid) Meat is still Murder.\textsuperscript{25} Their position is typified in lines such as ‘…consider someone else: stop consuming animals,’\textsuperscript{26} and in the thrust of the song Human(e) Meat (the Flensing of Sandor Katz). In this song Propagandhi singer Chris Hanna turns the arguments for humane ritual slaughter of non-human animals back on Katz\textsuperscript{27} himself, with cutting sarcastic wit:

With gratitude and tenderness I seared every single hair from his body. Gently placed his decapitated head in a stock pot, boiled off his flesh and made a spreadable head cheese. Because I believe that one can only relate with another living creature by completely destroying it. I’m sure Sandor’s friends and family will appreciate this.

Zines are another excellent organ through which punks express opinions and political ideas. Many of the sources referenced throughout this zine are drawn from other zines, and many people’s first in-depth discussion of animal rights is found within their pages. In addition to the material cited in this zine, a brief survey of some other UK-based zines reveals a variety of veganism/animal rights content: Vegan recipes are common-place (in One Way Ticket To Cubesville scream, but only as an unthinking response, not a real expression of pain as a human would experience it. P. A. B Clarke, A. Linzey, (eds.), Political Theory & Animal Rights, (London: Pluto Press, 1990), pp. 14-17.

Beyonce was also reported to have entered a vegan restaurant wearing a fur coat, demonstrating the depth of her engagement in animal rights, and indeed, insensitivity to the movement generally.
as a key tenet. In London, punks were involved in London Animal Action’s vegan fayre, although perhaps this does not rule out the charge of veganism being a mere consumer activity.\textsuperscript{107}

Of course there are some punks who are simply not interested in animal rights. Even at the Barry Horne Memorial Gig, put on to honour the memory of the ALF hunger striker and to raise funds for animal liberation magazine Arkangel and other animal rights causes, some audience members ‘were there to see Conflict and the Subhumans and probably got a big Mac after the gig.’\textsuperscript{108} This perceived attitude has led some activists to question the sincerity of the punk scene’s commitment to animal advocacy, dismissing it as empty posturing at worst, and vegan consumerism at best. Some members of South Coast hardcore punk band Pilger, whose lyrics encouraged listeners to ‘think about what you eat,’ believed that ‘what we buy and where we buy it shapes the world’ – they commended the fact that there were no longer ‘animal fats in Mr. Kipling’s cakes.’\textsuperscript{109} But taken in isolation, such an attitude amounts to little more than supporting cruelty-free capitalism.

Ryan Gunderson believes the animal rights movement, and it would seem this could apply to certain punk scenes, have allowed themselves to be co-opted by cruelty-free capitalism, to the extent that activists ‘consume’ their identities as pseudo-political achievement.\textsuperscript{110} Rather than questioning structures of society and making links between varying forms of oppression, vegan consumers are willing to accept the ‘chocolate laxative’ offered by capitalism.\textsuperscript{110} For Gunderson, individualist ethical consumerism is not just limited and ineffective, it also ‘halts social justice movements from pursuing radical means of alter-

one about the involvement of martial arts in Hunts Sabs. So as well as veganism/animal rights being a frequent theme in punk zines, they also cover a wide variety of associated issues, and involve an impressive degree of nuanced analysis and critique.

Benefit gigs and record releases provide a poignantly material connection between punk and animal rights. Here, the everyday cultural production processes of punk are turned towards activist causes. The 2013 North London punx picnic was a benefit for the FRIEND animal sanctuary in Kent, and was organised by an active animal liberationist and hunt saboteur. This individual had in fact been recently incarcerated for his animal liberation activities as part of SHAC (Stop Huntingdon Animal Cruelty). A benefit CD was released called *Prisoners of War*, and the songs included cover a range of political themes, pointing again to the interconnectedness of activist struggles associated with punk. One former punk rock hunt sabber, Jon of Active Distribution, started a tape distribution called ‘Lively Tapes’ which he ’made... a benefit for the Swansea hunt sabs.’

In all these cases the role of the benefit is two-fold: as a material fund-raiser for activist causes; and as propaganda and information (and even as entertainment too).

Punk-engaged social centres are overwhelmingly vegan, and also anarchist. Examples include the Warzone Centre in Belfast, the Cowley Club in Brighton, the Sumac Centre in Nottingham, the 1in12 Club in Bradford, Seomra Spraoi in Dublin, Kebele in Bristol, etc. Interview respondent Liam, a current member of the Warzone Collective in Belfast commented ‘we do operate a vegan café, which obviously results in discussion and opportunities for anyone who maybe wouldn’t have eaten anything vegan before to come and eat it and realise it’s fucking nice [and] a lot better for ye than the crap that people eat.’

practical examples of anarchy in action’ and surges of political activity including involvement in anti-fascist action and hunt sabotage. Anarchist punks often attended national animal rights demonstrations, contributing significantly to the anarchist presence.

There are numerous examples of punks putting animal rights theory into action. As well as promoting veganism/animal rights within DIY shows, and writing proselytising animal rights lyrics, members of punk bands regularly work with local animal rights groups. Discussing the situation in the 1980s, interview respondent George considers that ‘if punk was affiliated with anything politically, it was animal rights... The Animal Liberation Front were kind of very active, and it was a time of... very little surveillance. So you’d get grubby punks throwing bricks through... butcher-shop windows and things like that, and punk was far more aligned to that I think.’

Kismet HC regularly ran ‘street stalls collecting money for animal aid & petitions against fur trades, circuses, HLS [Huntington Life Sciences],’ and Leeds hardcore band Indictor regularly protested outside Covance Laboratories in Harrogate and Harvey Nichols, who sold fur, in Leeds. In Brighton, punks supported the Anarchist Teapot, which began life as a ‘string of squatted cafes’ and soon turned into a vegan mobile kitchen for mass catering at demonstrations. The Cowley Club, also in Brighton, took inspiration from the social centres of the Spanish revolution, and work to provide a ‘community-focused space with resources’ and also hold veganism/animal rights
I’ve never been like that. I’d have no fuckin’ friends if I did, y’know.99

One of Oisín’s bandmates eats meat, and he says ‘yeh I’ll wind him up about it, but it’s nothing serious.’100 Even though both of these interview respondents are vegan, and have both been vegetarian since a very young age prior to their joining in the punk scene, they don’t want to alienate people by preaching. This tension is not easily resolved – and indeed, there is nothing to suggest that it should be resolved. As well as this internal critical dialogue, there are also criticisms levelled at punk’s engagement with veganism/animal rights from outside the culture.

Consumption and Activism

Tied in with the accusation that veganism is a subcultural expectation is the question of whether some punks’ concern with animal issues is ‘proper’ activism or ‘mere’ consumerism. Moreover, when capitalist companies can happily produce vegan alternatives, and big-brand celebrities willingly endorse a version of veganism, it may be argued that this dietary habit is unconnected from any political critique whatsoever.

Certainly, some anarchists involved in animal rights treat punks with suspicion, viewing it as a secondary, ill-informed activism. Urban myths of inebriated punks eating ham sandwiches on hunt sabs abound. One activist, who founded Re-Pressed anarchist distro, often saw ‘the punk scene being no use at all, just a load of pissed up knackers... or over obsessive straight edge vegan fascists.'101 However, even with this qualification, it is difficult to deny that punk produces ‘great

The connection between punk and animal rights is also recognised by animal rights activists who are not punks. Simon, the current chair of the Hunt Saboteurs Association, acknowledges that ‘there’s always been that push within the punk movement to support animal rights, and because the punk movement is by its very nature anarchist – they push towards organisations like us and not the more [mainstream] organising groups’. This connection persists to the present, emerging at the end of the 1970s when there were ‘anarchists coming out of the punk movement, so there’s always been that sort of angle within hunt sabs, because it doesn’t involve any authority, it doesn’t involve anyone telling you what to do, anybody can get out and do it.’45 Hunt sab groups and Food Not Bombs chapters are frequently populated by punks: at least three of Gordon’s interview respondents were involved as a direct result of being in a punk scene,50 and interview respondent Jon Active remembered ‘it was, hunt sabbing during the day and then punk rock at night.’ ‘We used to go hunt sabbing... and then we’d [find out] “right, where’s the gig”... ’cause the van was hired for 24 hours, so we [would] go to a gig anywhere we could potentially drive to, get to the gig, drive back that fuckin’ night, wow jesus, and then take the van back the next morning.’51 Ryan, discussing the make-up of political groups during the 1980s in Belfast, commented that ‘in terms of animal rights [it was] almost exclusively punks.’52 This connection continues today, and even where personal involvement in the punk scene has lessened, animal rights activism continues. Tommy, who organises punk gigs in London and has been heavily involved in the animal liberation movement, notes ‘in a group, an animal rights group, you’re thinking “what kinda music are they

101Cargo Cult, #4, p. 13. The straight edge movement’s adoption of veganism is often attributed to a morally puritan stance, rather than a political/ethical consideration. However, G. Kuhn’s edited collection Sober Living for
into?” And suddenly you’re talking to ‘em about Crass and... they know all the old bands... so yeh, in the animal rights scene there are a lot of so-called "ex-punks”.”

There is, then, an undeniable connection between animal rights/veganism and punk. As already intimated above, this relationship is not straight-forward, so attention must be paid to the complications that are thrown-up, looking particularly at politicisation through punk, the tensions between subcultural expectations and individual choice, and the supposed dichotomy between activist engagement and ‘mere’ consumption habits.

**Politicisation through punk**

It’s just what you did, which sounds horrible and trendy, but it’s true. You became punk, you found out about animal rights and you quit meat.

Interview respondent Phil Chokeword.

One of the key assertions here, and a main explanation of their relationship, is that an exposure to punk culture encourages people towards veganism/animal rights. Paul Gravett describes this consciousness raising effect, going from growing up ‘in a right wing Tory working class family’ to involvement in campaign groups such as London Animal Action through ‘the influence of punk music.’ Isy Morgenmuffel, who was active in the Cowley Club, believes that ‘punk rock is a great entry point to lots of rebellious ideas,’ but this does not mean that all ideas will be meaningfully adopted by participants.

For Phil Chokeword involvement in the South Coast hardcore

55Interview conducted 07/12/2013.
56Interview conducted 17/12/2013.

Ryan spoke about the serious implications this ‘policing’ attitude could have:

People who were involved in the original anarcho-punk movement will tell you it became so rigid with people who were thinking that you *had* to be vegan... there was like all these kinda rulebooks... from people that hadn’t read too much, or hadn’t really looked at any details about... the bigger picture.... Anarcho-punk bands were doing this as well... so they were getting this em, half-baked anarchism from bands who obviously didn’t know what they were talking about.... A lot of people will say that *they left the anarcho-punk scene because of this rigidity* that kind of formed in it.

Gordon describes this focus as 'a symbolic site for the politics of cultural elitism,' and he quotes Jello Biafra in a *MaximumRocknRoll* interview in echo of Ryan’s point. ‘You take one step out of line and they bite your head off. Young people who are curious about the politics spend ten minutes with people like that and they decide that they would rather be apathetic. This is what has turned a lot of people off punk politics.’ So by enforcing the scene’s vegan norm, possibly from an urge to protect the scene’s identity or in a ham-fisted attempt to encourage somebody to become vegan, this ‘policing’ in fact pushes people away from scenes and communities where they might be exposed to useful ideas and cultures. Conscious of this dynamic, interview respondent Megan tries to 'live and let live' around vegan issues. Oisin, follows a similar logic:

I’m pretty much like live and let live, I’m not gona start going up and [saying] ‘you fucking cunt, you’re eating meat.’

---

94Interview conducted 17/12/2013.
97No pun intended.
98Interview conducted 17/12/2013.
others of their correctness. Inevitably, in trying to attract new people to animals rights and veganism, it is essential to talk to non-vegans and people who are not familiar with animal rights issues. This means welcoming them into your scene in order to expose them to alternatives, and open them up to the cultural norms practiced by punk scenes. As ‘best practice’ this might achieved with calmly weighted discussion, support and encouragement (as suggested by safer spaces policies), but is often played out as shunning, aggression, and even violence. ‘Vegan police’ is a pejorative term for those individuals who aggressively chastise others for not adhering to the scene norm of veganism. ‘The ostensible purpose of [“calling someone out”] is to raise consciousness among one’s fellow anarchists [or vegans] and to encourage each other to stay committed to their shared political project.’

Jack identified this issue: ‘they would have like frowned upon [mere] vegetarianism, right? Same as if you were like wearing like leather boots and stuff, y’know?’ Again, Gordon’s respondent Mr C echoes these views:

... there has been a vegan police element which I’ve remembered. I remember from the days doing hunt sabbing that people would be like fucking going into people’s kitchens and looking in people’s cupboards and going “what the fuck is this in your cupboard?” That is just ridiculous like.

89 L. Portwood-Stacer, *Lifestyle Politics and Radical Activism*, (New York/London: Bloomsbury, 2013), p. 41. Portwood-Stacer also identifies a ‘propaganda by the deed’ here, but this is a contentious identification.

90 For an anthropological discussion of sanctions in a non-state society see H. Barclay, *Culture and Anarchism*, (London: Freedom Press, 1997), pp. 61-62. Barclay identifies ‘religious sanctions’ which inspire obedience through metaphysical fear, and also ‘diffuse sanctions’ which correlate strongly with the type of scene policing discussed here.

92 Interview conducted 14/08/2013.

93 A. Gordon, ‘The Authentic Punk: An Ethnography of DiY Music Ethics,’
munity organising’, and it was only through this process that Isy became involved with DIY punk. Interview respondents Tommy, Megan, Oisín, and Sonia were all also already vegetarian before becoming involved in punk. Tommy describes the relationship between animal rights and punk in his own politicisation as ‘a bit like a circle. I was already into animal rights... and then I discovered these bands who were as well... like a lot of other people it got me more involved into animal rights... both fed off each other really with me, um both things been a big part of my life.’ Those who are already vegetarians or interested in animal advocacy when they become involved in punk are encouraged to become vegan, get more active in direct action politics, and feel a sense of cohesion within punk scenes that is lacking in mainstream society. The politicising relationship between veganism/animal rights and punk, then, operates in both directions – suggesting a very strong, if complicated, relationship.

Politicisation through punk typically involves an awareness of animal liberation. Since the growth of anarcho-punk in the late 1970s and early 1980s, bands would often ‘include in their records information and images of the horrors of animal use and abuse.’ Gordon, in his study of the Leeds and Bradford DIY scenes, found that one of the most ‘salient demonstrations of commitment’ to the punk lifestyle was a vegetarian diet. Indeed, ‘the most striking similarity... was that all of them were, or had at some time in their subcultural careers, been either vegetarian or vegan.’ But the politics of punk are not confined to animal issues, and as such punk has acted as a site

and being ‘welcoming, engaging and supportive’ are key elements of a safer spaces policy that punk scenes might take into consideration when thinking about how to maintain a vegan norm, without resorting to alienating behaviour to police this. As the CrimethInc. ex-Workers Collective puts it ‘a big YES! to do-it-yourself punk rock and all other expressions of rebellion and independence, and a little no to subcultural isolation and provincialism.’ This dynamic is recognised by Gordon as well:

DIY [and vegan] purists have been accused of being inward-looking, preaching to the converted and being subculturally elitist with little chance of ever reaching to the broader body of people whose support would make DIY a significant political tool of empowerment. The purists in turn accuse those who defect of intellectual slack-mindedness, political populism and ethical bankruptcy. The dilemmas strike deep.

This insular, or ghettoised, perspective is problematic – especially if propaganda, information, and politicisation are considered to be of importance. Portwood-Stacer emphasises the communicative motivation of veganism, and its prefigurative potential, which ‘rests on implicit assumptions about the capacity of small-scale actions to work as theatrical spectacles which publically represent political ideologies and convince

you have other people to orient yourself around, other compass points. Further, veganism is considered as ‘other’ in mainstream society, so adopting this as a normative value helps to site the counter-culture outside of that cultural hegemony. It is a statement of identity, and a statement of resistance.

It is clear that this sense of cultural identity and belonging are important to participants in punk scenes, particularly where vegan consumption choices are concerned. Phil directly contrasts the role of this cultural identity with the importance placed on personal freedom, believing a sense of cohesion to be more important:

I don’t feel like it’s realistic to build a community based on people who are all doing and believing different things. There has to be shared values at least so that people can hang out and co-exist. One of the shared values could be a belief that exploitation of animals is wrong. If you go strongly against that value, is there a place for you in that community? Go off and find somewhere that is more to your liking, don’t hang around antagonising me. I don’t have a problem with taking that stance on individualism to be honest.

It might be expected that this subcultural identity will be defended against normative transgressions (‘policed’). However, the idea of creating some kind of rule or law by which members of these scenes should abide directly infringes on the ideas of personal freedom held by participants in these scenes, and is likely to generate conflict. Nonetheless, when compared with something like a safer spaces policy, a shared commitment to challenge mainstream relations to non-human animals appears consistent. Indeed the emphasis on conflict resolution

85Safer spaces establish ‘guidelines for conditions that are not acceptable in a space, and action plan(s) for what one will do if those conditions arise, is part of being proactive in creating a safer space. Issues like hurt-

of discourse between anarchism and animal liberation. Craig O’Hara suggests that the connection between punk and vegan dietary habits relates to ‘wasted resources, health issues, and the acceptance of a deeper or more human ecology.’ The connection could also relate to an awareness of anarchist literature and practice within punk. From the writings of Peter Kropotkin and Élisée Reclus to the more recent polemics of Brian Dominick and Bob Torres, strands of anarchism have always embraced a concern for non-human animals. Interview respondent Liam said ‘personally speaking, for me, it definitely comes from... an anarchist viewpoint, because it was lot of the early bands I listened to... that sort of got me into that way of thinking, of vegetarianism.’ He continues, ‘it was definitely started by punk bands’ but thereafter ‘it’s something I just continued on myself because I realised that my veganism was more about poverty than actual... rights for animals, where I realised that like vegetarianism just wasn’t enough... To be totally honest I think protest politics is kinda flawed but I can see no other way around like making myself feel OK about my diet. Like I can’t partake in that, so that includes like ethical eating, like not just what I’m eating, but where it comes from.’

Liam’s initial exposure to animal rights through punk was augmented by his exposure to, and involvement in, anarchist politics, and

became part of an overarching critique of oppression, combining veganism with an economic critique.

Punk has a clear politicising role, and many people exposed to animal rights and veganism continue their activism after ending their involvement in punk scenes. This suggests that whilst punk has a politicising role for young activists, working as their first point of contact with radical activism, it is not regarded as a significant end in itself. Former ALF activist Roger Yates argues that whereas some animal rights activists ‘seemed to have a deep and informed commitment to anarchism,’ ‘others simply liked the symbolism and anti-authoritarianism involved.’68 For Roger ‘punk music and the lyrics were probably more influential than the written anarchist texts.’ Clearly, punk is significant for radicalising young anarchists and familiarising them with animal rights arguments, but this seems to suggest that punk is merely concerned with ‘symbolism’ rather than a ‘deep and informed commitment.’ Contrary to this, many punks see themselves as involved in ‘a counter culture that has strong anti-capitalist values’ and believe punk is more than just a gateway for people to pass through before entering more serious political activism.69

Of course, there is a degree of difficulty in gauging the commitment and reasoning of those who adhere to the norms of any scene or movement. If a person desires to become a member of a scene, then they will adopt the norms of that scene. This may be understood as politicisation, and exposure to a valuable culture – but it may just be, as interview respondent George suggests, that ‘people in life just go with the flow, y’know, so, a lot of people in life go with what their... social group do,’ resulting in empty rhetoric, ‘punks around the time [the ‘80s]... used very political language while not themselves being committed

the genres of punk he was investigating.’80 Interview respondent Megan, who puts on feminist punk gigs in Brighton, revealed a very similar motivation: ‘I’d wanted to go vegan for many years but had always relied heavily on processed foods so I thought it would be too difficult, but when I was forced into a position where I had to learn how to cook [as part of a vegan household] I saw how easy it would be and then the transition to full veganism was easy.’81 Laura Portwood-Stacer, in her investigation into the contemporary anarchist movement in the US, identifies the performative and ‘identificatory motivations’82 in this dynamic. Her interview respondent, Aaron, describes the importance of subcultural community:

‘You literally live with other people who call themselves anarchists, who have a similar frugal punk-y lifestyle, and you put a lot of time into creative projects, and into discussions about what it means to live out your politics etc. You’re in close proximity, and if anybody suddenly stops being vegan it’s a big deal. And I think the same is true as far as political identity. It’s easier to maintain a very abstract identity like “anarchist” when

81Interview conducted 17/12/13. Although examples of both male and female punks adapting their diet to impress or cook for their partners or social circle are presented here, one should not presume that punks transcend gendered cultural norms in which cooking, and animal welfare, are seen as women’s issues. One interviewee highlighted the fact that vegan cooking zines were often made by female scenesters. Perhaps it is no surprise that anarcha-feminist punks are likely to adopt veganism. As Peggy Kornegger explains these feminists work together ‘to expand our empathy and understanding of other living things and to identify with these entities outside of ourselves, rather than objectifying and manipulating them’. P. Kornegger, ‘Anarchism: The Feminist Connection’, in. Dark Star (ed.), Quiet Rumours: An Anarcha-Feminist Reader, (Edinburgh: Dark Star/ AK Press, 2002), p. 30.
A picture has emerged of punk scenes as spaces or communities where veganism is normative, in contrast with mainstream social situations where veganism is seen as ‘other.’ As a norm, then, there is a degree of expectation for members of a punk scene to adhere to a vegan diet. This raises issues of how this norm is upheld or ‘policed’, and also the implications of people ‘going with the flow’ and adopting a vegan diet without any real deep-seated commitment to animal rights. This essentially boils down to a tension between subcultural expectations and individual choice, and this tension is felt particularly sharply in punk because of the importance attached to personal freedom.

Jack, who grew up in the midlands, but is now involved in anarcho-syndicalist activism in Glasgow, recalls ‘a big emphasis on moralism, and a big emphasis on lifestyle [in the 1980s anarcho-punk scene]. I wouldn’t say lifestylism, but just having an alternative lifestyle. ’[A]lmost like developing a new genre of hippie-punk, right?79 This points to the sense in which veganism came to be part of the normative values and lifestyle practices of many punk scenes. These scenes nurture vegan consumption choices and offer a space for vegans to socialise with other vegans, and have some reprieve from the stresses of having to remain ever-vigilant in an animal consuming society. Punk scenes reinforce the vegan norm through the cultural reproduction of everyday practices (serving vegan food, beer etc.), and can also (re)inspire the commitment to this consumption choice. Gordon’s research uncovers the importance of subcultural community in this regard. His interview respondent, Mr C, ‘was explicit how his choice to become a vegetarian was both a combination of the need to impress his girlfriend at the time and his investigation of the anarcho-punk genre.... Mr. C shows how the level of commitment is both a combination of peer pressure and the input of the political statements of to the politics.’70 The important thing was to belong to ‘the culture.’ Even Oisin, who plays in a London-based band, and who is vegan, suggests that hard-wrought political consciousness isn’t always the driving factor: We’ve played benefits for everything. Half the time we don’t even know what we’re playing benefits for. The fucking transsexual badgers in fucking Somerset or something like that, y’know.71

This can result in a superficial engagement with a scene’s underlying political motivations. George talks about ‘quite conservative kids who were into way-out music, y’know. And then grew up, grew out of it.’72 Once their involvement in the scene ends, so too does their adherence to the norms of that scene. Ex-punks can become ex-vegans, but as Tommy and Roger mentioned above, this isn’t always the case – many ‘ex-punks’ carry on with meaningful political engagement after they exit a scene.

It seems overly ambitious to demand that all the members of a particular community must arrive at a thoroughly considered position of every issue of their everyday lives. It is true that in the case of veganism and punk this usually involves a change of diet and lifestyle, where one might expect some thought to have gone into the transition. But adhering to a cultural norm can be played out as praxis without much hand-wringing reflection. Consider the myriad behaviours that are culturally specific to contemporary capitalism, behaviours that, for many, are simply accepted as ways of life – as normal. If veganism were to become a normative value in a mainstream hegemonic society, then people would just be vegan – they might not ever agonise over the ethics of consuming another living creature, but the suggestion to do so would seem preposterous. If some

72Interview conducted 24/11/2013.
people in punk scenes fail to make an ethical, deep-seated commitment to veganism, but only play it out as a cultural norm, this does not necessarily undermine the value of that action entirely. It is also frequently the case that those who initially stop eating meat for purely cultural reasons later develop a more considered commitment to animal rights in general. A cultural motivation need not be considered void.

Nor is it the case that all activists who are focused on ‘more radical’ activism have ceased their engagement with punk culture – many remain involved. Punk does not just have an initial politicising effect, it also provides the intellectual and cultural support to ensure that activists remain politicised, motivated and undefeated. In Adam’s case ‘the more political stuff probably came through Conflict. Eh, and I remember getting albums that had contact addresses for different sorts anarchist groups and organisations. That, I suppose, was maybe, the first step in terms of looking at anarchism more politically. Y’know, as opposed to just listening to music that I liked and I identified with, and I agreed with a lot of.’

Jon Active was on the supply-side end of this propagandising relationship: ‘I did [the distro] for the same reason I mentioned before basically. I knew that I really wanted to communicate all that stuff, those ideas, and I wanted to make some money for the hunt sabs selling the tapes, and I wanted to, y’know get more people interested in going hunt sabbing... and all the other stuff which we were doing.’ Punk commodities, in addition to being entertainment and offering inspiring invective against any number of oppressions, actually facilitate engagement in the anarchist movement by providing opportunities for listeners to get involved. As Elizabeth Cherry discovered, those involved in punk are more likely to remain politically active as vegans than those outside punk who lack the support structures that are entrenched within punk culture:

...there are both relational and cultural differences in the social networks of these punk and non-punk vegans. While the punks found support for veganism in their everyday lives through friends or music, the non-punks did not have such support, or had support that did not encourage them to maintain a strict vegan lifestyle.

Even if participants no longer believe that ‘punk rockers would be at the vanguard of a peaceful anarcho revolution,’ they may remain active partly to encourage those newly interested in the scene to consider radical environmental and animal rights politics, and also because punk is a prefigurative example of the society they wish to see in action - cooperative, non-hierarchical, and internationalist. Punk has often met the charge of merely preaching to the converted, of singing about animal issues to those who are already vegan, but as Kismet HC explain: ‘animal exploitation never goes away... yet there are new faces emerging into the scene every day and maybe “this song” will touch them and make them think.’

Subcultural expectations and Individual Choice

No vegan diet, no vegan powers.

The Vegan Police.
