Decolonizing Jewishness
On Jewish Liberation in the 21st Century
Benjamin Steinhardt Case

I am indebted to many comrades and colleagues for their discussions and inspiration. Special thanks to Lisa Brush, Mohammed Bamyeh, Dan Lainer-Vos, Rachel Kranson, George Weddington, Eric Eingold, and Yotam Marom for their comments and edits, to Danielle Moeser for her help in translation, and to Belinda Rodriguez for her support during this process.

Seven decades on, Israel is geopolitically embattled and the Jewish community is increasingly polarized around the issue of occupation. The occupation – Israeli military control over the Palestinian West Bank and the borders of Gaza Strip – is five decades old. Entire generations of people have grown up without political or civil rights, under the military jurisdiction of a “democratic” state. Some trace the problem to the very existence of the State of Israel. How did the Jewish struggle to free ourselves from antisemitism lead to this point?

Following the trauma of centuries of persecution culminating in the Shoah (Holocaust), many Jews looked to the Political Zionist goal of founding a Jewish State of Israel, in what was then British Palestine, as a guiding star in a time of profound darkness. Defending their new state against Arab Palestinians and neighboring countries in the 1948 “War of Independence,” what Palestinians refer to as the Nakba (Catastrophe), gave the new Israelis a powerful founding myth after millennia of diasporic marginalization. To many Zionists, the State of Israel represented a historic milestone in the effort to combat antisemitism, having carved out territory to defend the Jewish people from a world that had rejected and nearly annihilated them. For many Palestinians and others, Zionism itself represents a new front in the historic expansion of European colonialism, with the 1967 occupation, or the State of Israel itself, representing a crime against humanity. Israel, the Jewish Question, and the occupation continue to play a central role in global political discussions to a degree that is vastly disproportionate to the amount of people directly affected by them, placing these

“If you have come here to help me, you are wasting your time. But if you have come because your liberation is bound up with mine, then let us work together.”
– Aboriginal activist saying, attributed to Lilla Watson
issues, as Hannah Arendt once put it, at the “storm center” of national and geopolitical contention.

Meanwhile, amid the impending rise of fascism with the election of Donald Trump in the US and popular surges of far right parties in Europe and elsewhere, antisemitism has reemerged as a legitimate, if uncomfortable, issue for social movements. This subject has led to renewed discussions and arguments on the Left over the scope, nature, and reality of antisemitism, as well as the role Jews play in the dominant identity politics framework of movement communities.

According to anti-colonial thinker Frantz Fanon, there are two main characters in the process of global imperialism: colonizer and colonized. Many around the world have resonated with Fanon’s analysis of colonial power dynamics and have drawn from his framework to pursue decolonization, or the process of destroying colonial power structures and remaking oneself in a liberated image. Considering the occupation as it stands, it is not difficult to view the current state of the region through an anti-colonial lens with Israeli Jews playing the part of the (settler) colonizers and Palestinians playing the part of the colonized (e.g., Pappé 2015, Said 1979). In this framework, Jewish activists who oppose the Occupation play the part of “ally,” or conscientiously subordinate supporter, to Palestinian activists (and others) who are fighting for their liberation.

However, the Zionist project itself can also be understood as an attempt at Jewish decolonization. Viewing Zionism and its subjects through this lens can potentially clarify a great deal about contemporary Jewish identities, and perhaps open a new path forward in one of the defining conflicts of our time. Ultimately, this approach helps us to understand, as I argue, that the Zionist project creates a social condition in which the liberation of the Jewish people has become fundamentally intertwined with the liberation of the Palestinian people.

ness (1903), where we are not forced to see through the eyes of the oppressor as well as the oppressed for survival, but we actually are simultaneously both as part of the same identity.

According to Fanon, an act of violence was required for the colonized to overcome their inferiority complex and decolonize. For Jews, who have become both colonizers and colonized, the first act of symbolic violence must be against ourselves. This violence is both symbolic and internal, but is no less painful. We must rebel against the internalized colonizer in ourselves, embedded in our very subjectivities, and we must rebel against the part of our community that pursues literal colonization of others, trapping the Jewish people in the global middle position. This generation of Jews must discover if we will play the 21st century parvenu or find our place in the grand struggle for people’s liberation by waking to the contradictions within, standing in solidarity with other oppressed peoples without, and seeking to take an active role in our ongoing history.

Emma Lazarus said: “Until we are all free, we are none of us free.” I am inclined to believe this is true, but it is unavoidably true that Jews today cannot be free anywhere until Palestinians are free in Palestine. In and of itself, this is not a political solution. But if we as Jews take the projects of Jewish liberation and human liberation seriously, it is a value, indeed an identity, upon which any political solution must be built. As Jacob had to wrestle with and defeat G-d for our Biblical people to transcend, so must we wrestle with and defeat our colonial selves to transcend. Like Jacob, we will be injured in the process, but the fight itself is required in order to open the door to a new covenant – one between Jews and our cousins.

The Complex Jewish Position

To Fanon, there is the colonizer and there is the colonized; there is white and Black. While he explores some complexity in the psychology and social positions of the two, to Fanon the colonizer (white) and the colonized (Black) remain the primary categories of analysis. The forms of racism that are attached to this colonialism place the target group at the bottom of a racial hierarchy for the purposes of the social, political, economic, and interpersonal power of those at the top. Considering the influence of Fanon on Black Liberation and other antiracist thinkers in the US, it is no coincidence that the contemporary framework for understanding race and privilege in this country follows the same logic. In the “identity politics” paradigm of today’s social movements, the characters in the dichotomous picture are white people and “people of color” (POC). This picture can leave out a great deal of nuance, but nevertheless it captures a wide view of the politicized racial hierarchy. Importantly, it focuses on the foundational antagonisms of the racially constructed system by identifying whiteness as applying to the category of people who broadly benefit from the existence of the system itself.

Fanon’s work is foundational for anti-colonial thought, so it is a sensible place to begin an analysis of decolonization for any group. At the same time, Fanon’s position on antisemitism is not without controversy. Notably, afro-pessimist theorist Frank Wilderson claims that Fanon characterizes the Holocaust as merely one of many “little family quarrels” between groups of white Europeans, using this phrase to explain the incomparability between white-white antisemitism and the white-Black legacy of slavery (2010:37–38). However, Wilderson mischaracterizes Fanon’s view, possibly due to an early English edition’s translation. In fact, Fanon writes: “Bien entendu, les Juifs sont brimés, que dis-je, ils sont poursuivis, exterminés, enfournés, mais ce sont là petites histoires
familiales” (1952b:93), which translates literally as: “Of course, Jews are bullied, nay, they are hunted, exterminated, put in the oven, but these are small family stories,” or in another translation, “minor episodes in the family history” (1952a:95). This difference in wording is subtle but not at all trivial, and it gets at a crucial point for understanding Jewish subjectivity from the perspective of decolonization. The “family stories” Fanon refers to are the Jewish family’s stories of oppression, not intra-white family quarrels between white non-Jews and white Jews. In other words, Fanon is saying that the Jews have suffered greatly under the antisemitic system, but the violences done to them have been episodic and do not subsume their entire history. The Jewish family has stories of oppression, of death, but they also have stories of thriving, of living. Fanon is contrasting this with the African experience of European colonization and slavery, which he understood as subsuming the category of Black within a totalizing history of oppression.

For Fanon, Jews are undoubtedly among the ranks of the oppressed, and in his 1952 work Black Skin, White Masks, he makes great use of the Jewish experience to develop his understanding of the colonized Black condition. Black people and Jews pose different existential threats to whiteness, but their connection is that both are perceived as having the potential to overwhelm and appropriate white society. At the same time, the two are not equivalent. Fanon also describes Jews as white, or at least as white-passing in today’s terms, and articulates important differences between anti-Jewish and anti-Black racisms. Crucially, to Fanon, the Black experience of oppression is overdetermined by corporeality, by skin color. Jews, on the other hand, become oppressed when they are discovered to be Jews, and since there is no definite way of identifying

Zionism with this quote but, incredibly, he left out the second question! For the thinkers of Political Zionism, being “for others” was so antithetical to their project they did not want the revered Talmudic rabbi’s second question to be considered at all.

Unfortunately, many Jewish activists in Palestinian or other liberation work today metaphorically omit Hillel’s first question instead; they focus on being for Palestinian liberation, or for the liberation of other oppressed groups without considering the implications of not also being for ourselves as Jews. While important, countering false claims of antisemitism against pro-Palestinian organizing levied by the Jewish right and protesting Zionist organizations in allyship with Palestinians should not, as some suggest, be the sole purpose of Jewish voices in the struggle. The work of decolonizing Jewishness, which is a personally and culturally constructive as well as destructive process, is a prerequisite for any liberated future that involves us as a people, and is a vital element in the broader political struggle against the forces of the far right. Jewish liberation requires the Jewish fight against antisemitism for our liberation and autonomy, and also solidarity with the struggles of other oppressed groups – in particular the Palestinian struggle – for their liberation and autonomy.

Herzlian Zionism failed; it created a catastrophe for Palestinians while failing to liberate the Jewish people from antisemitism. There is every reason to believe we can yet create a truly decolonized Jewishness in the continuation of the liberatory movement against antisemitism, but this can only be done if it is melded with the struggle against the colonialism entrenched in our previous attempt at decolonization. Our struggle for our liberation is now inexorably bound up in the liberation of those we disenfranchised and continue to oppress in the attempt to gain liberation in Israel. Our position imposes a Jewish version of what W.E.B. Du Bois called double conscious-

1 Fanon’s categories are essentialized; he does not deal with the fact that some Jews are Black and some Black people, Jewish.
play the parvenu” (1978:68). As the Israeli State, marketed as a liberator, actively oppresses an entire population under its control, Arendt’s critique stands today. Perhaps not ironically, the tzabar cactus for which the Sabra Jew was named is not native to Palestine, but was imported as a desert-friendly crop in the early 19th century (Griffith 2004). From the beginning, the new identity was not based on decolonizing, but on recolonizing. The route Zionism took re-enacted rather than healed Jewish cultural trauma, and projected it onto another people.

The struggle for Jewish recognition cannot be won from within a parvenu mentality. So long as Jews as a people consent to the middle role in the service of the oppressor, we will be perpetual strangers, whether or not we have a temple, or capital, or a state. The belonging we truly seek cannot emanate from the castle, but can only come from the village. Rabbi Steinlauf was therefore on the right track when he wrote his controversial 2015 essay advocating for Jews to renounce whiteness. He was heavily criticized, often fairly, for glossing over what it would actually mean to “renounce privilege,” for ignoring Jews of color, and of course, for not mentioning the Occupation. All of these problems have a simple and powerful, though admittedly painful, solution: the decisive step out of the colonial mindset is removing the white mask in all of its forms and confronting the colonizer within.

Confronting the colonizer within is an integral part of confronting the colonizer without. Rabbi Hillel’s famous set of questions – “If I am not for myself, who will be for me? If I am only for myself, what am I? And if not now, when?” – continues to stand as a beautiful summation of what is required of the Jewish people. All three questions can be understood in this context as rhetorical; the first implies the need to fight for ourselves as Jews, the second implies the need to fight for others in solidarity, and the third implies a sense of urgency. Pinsker began his seminal 1882 pamphlet on Jews in the racial sense, their oppression is contingent on their detection as Jews.

Prodigious attempts have been made on the part of anti-semites to develop a system for physically identifying Jews at first sight, but apart from “some debatable features,” Fanon is correct that Jews often pass as not-Jews. It was this physical ambiguity that led to the infamous yellow patches the Nazi government mandated for Jews’ clothing. This element of Jewish racial covertness, which is the case for Jews of all colors, is critical to understanding anti-Semitism and how it has shaped Jewish identity. We might say that Jews are underdetermined by corporeality; from the perspective of the anti-semitic, in a sense Jews only become Jews when they are discovered to be so. That which makes us objectionable resides within and is not always immediately visible from without. In other words, if the essence of Black oppression is embedded in visibility, the essence of Jewish oppression revolves around invisibility.

Finally, while Fanon explores the real historical and experiential differences between constructed social categories of Jew and Black (and Arab), he also notes that the separation and hierarchicalization of these categories is itself a tool of the oppressor (1952a:83). If each group of people views the others as the primary or most immediate threat, then the oppressor class, being insulated from attack and scrutiny, is able to maintain not only material but also hegemonic power.

To sum up, from Fanon we learn that: (1) Jews are an oppressed people; (2) they are oppressed by the same colonial forces that dominate other oppressed peoples; (3) Jews as a group are in many ways closer to the colonizer than other oppressed peoples are; (4) that proximity is itself used by the oppressor to maintain the colonial situation. Fanon gives us a great deal to work with, but despite his extensive discussion of Jews as a comparison group, his final analysis leaves us out. Ultimately, Fanon constructs a dichotomous world – colonizer
and colonized – in which it is unclear where the complexities
he discusses around the Jewish position fit in. If Jews are some-
times in one category and sometimes in the other, or if Jews si-
multaneously experience elements of both, then how can Jews
pursue decolonization?

Systemic Antisemitism

Like anti-Black racism, antisemitism can be treated as a sys-
temic racism. According to race theorist Joe Feagin, systemic
racism can be understood as: “an organized societal whole with
many interconnected elements” involving “long term relation-
ships of racialized groups with substantially different material
and political-economic interests,” based in “the material reality
and social history” of colonial societies (2006: 6–9). To say that
antisemitism is a systemic racism is not to discount the eth-
nic and racial differences between Jews, nor is it to ignore the
system’s religious origins. It allows us to analyze anti-Jewish
oppression beyond individual prejudice and understand it in
terms of historical legacies of differential treatment that are
imbedded in institutions and in our experiences of the world.

As a system, antisemitism has developed differently from
other racisms. It should not be surprising therefore that
attempts to equate antisemitism to anti-Black racism feel un-
comfortable and forced. The efforts of liberal Jewish pluralists
at analogizing the Black experience in the US with the Jewish
experience in Europe are at best misguided and ahistorical
(Greenberg 1998). Discussing antisemitism in the terms of
other racisms is awkward precisely because it does not fit well
within the dichotomous construction those forms of racism
are based upon.

The roots of antisemitism date to antiquity, but its contempo-
rary terms first emerged with the racialization of Jews in 15th
century Spain and were popularized in reference to the 19th

Herzl prided himself on his deep understanding of the anti-
semite. To Arendt, Herzl’s understanding of antisemites ran so
deep that he not only trusted them in allyship with the Zionist
mission, but maybe began to think like them too. From this
perspective it should not be surprising that the entire Zionist
project has transformed in the image of the oppressor, not only
externally but internally too. Envisioned as a place of safety for
all Jews worldwide, Israel has in fact codified, racialized, and
hierarchicalized previously fluid categories of Jew and Arab as
well as “white” Ashkenazi Jews and Sephardi, Mizrahi, Beta Is-
rael, and other Jews of color (Domínguez 1989, Motzafi-Haller
2008). But neither a state, nor cooperation with European pow-
ers, nor the adoption of oppressive systems in the European im-
age were able to liberate the Jewish people from the antisemitic
system. As Arendt anticipated: “The antisemitism of tomorrow
will assert that Jews not only profited from the presence of the
foreign big powers in that region but actually plotted it and
hence are guilty of the consequences” (1978:133). We can see
this phenomenon playing out in the discourse on the left to-
day, where the US and Israel are held up as the prime agents
of imperialism – and not necessarily in that order.

With the State of Israel claiming to be the true home of all
Jews, Jewish communities worldwide have foundered in the ef-
fort to think and act outside the parvenu paradigm. Until today
we have been unable to build a movement for Jewish liberation
in solidarity with the liberation of all oppressed peoples, and
all humanity. With the formal end of the exile in 1948, this is
now the Jewish Question.

Decolonizing Jewishness

To Arendt, the emancipation of the Jews ought to have been an
“admission of Jews as Jews into the ranks of humanity,
rather than a permit to ape the gentiles or an opportunity to
handsome, hardworking, daring, brave, and self-sacrificing (Zerubavel 2002). This was the idealized anti-diaspora Jew; the sort of "Man" Jewish people would become in a country of their own.

In seeking to overcome European antisemitic stereotypes, the new Israelis in fact adopted many of the standards of their (former) oppressors, including Orientalist views of Arabs (Sela 2005). The Sabra Jews walked an awkward line, attempting to become natives who, as Ella Shohat puts it, "live in the 'East' without being of it" (2006:331). Though they struggled against the colonizers in one way, they embodied them in another. This unintentional but nevertheless close association between the New Jew and the old antisemite went beyond image – it actually required marginalizing and silencing the voices and identities of Holocaust survivors, upon whose experience their movement was being justified, in favor of an invented narrative of purity and strength (Almog 2000:82–84).

To Fanon, decolonization involved violence against the colonizer as a mode of production of the new man, as it helped the colonized to defeat and transcend their inferiority complex, specifically as opposed to violence against themselves and their oppressed neighbor, which would perpetuate it.3 The Sabra Jews in their most iconic form, the soldiers of the palmach (Jewish militias in the War of Independence), epitomize the tragic embodiment of this failure, bitterly fighting their "cousins" for the sake of a system that ultimately exploits them. Today, agents of a state that claims to exist for the representation and protection of a historically oppressed people inflict traumatic violence upon their Palestinian neighbors, and, ironically, deny them access to a state with which to represent and protect themselves.

3 Fanon used the term "new men" to refer to decolonized subjects who have remade themselves (1961:2), following both Freud’s emphasis on the pathology of men and linguistically androcentric norms. Its patriarchal implication in this case should not go unnoticed.

century European “Aryan myth,” a form of racism in which humans are divided into a biologically and culturally determined racial hierarchy. Antisemitism, or anti-Jewish oppression, existed in other regions as well, and although there were at times similarities to European antisemitism, the Jewish experiences in these regions cannot be rolled into a single, universal account. However, the racialization of Jews and the creation of the modern discourse of antisemitism occurred in the context of the production of whiteness in Europe. Without ignoring the historical and contemporary experiences of Jews of varying identities (see Ben Daniel 2016 and Shohat 2006), the European system of racialized antisemitism is the dominant model, having been exported to the world via European colonialism. Though it might seem paradoxical from the perspective of de-colonization, it is therefore necessary to begin by unpacking European antisemitism and its impact on Jewish identities.

In order to understand the points inherited from Fanon, there are two significant particularities to antisemitism as a system that we must confront. First, the target group is not placed at the bottom of the social hierarchy but in the middle. Second, outbreaks of widespread violent oppression are episodic and cyclical as opposed to constant.

The first particularity of antisemitism has to do with social position. Antisemitic depictions of Jews have often projected their image in the vilest forms, but systemically it has also afforded many Jews considerable social and economic privilege. While most forms of racism place the target group at the bottom of the hierarchy, antisemitism locates its target in the middle. Jews have often played the social role of merchants, traders, and moneylenders, and at times (such as today’s US) Jews have been admitted into the higher ranks of professional classes and social milieus. Interpreted through the lens of other forms of racism, this privilege appears to be connected to a linear reduction of anti-Jewish oppression and integration of Jews into whiteness. Put simply, the popular notion is that Jews were
once oppressed, but now they are not. In the common identity politics of the left today, this privilege is evidence of Jews’ complicity with whiteness and with systemic racism, prompting the role of white allyship with other oppressed racial and ethnic groups. However, historically this privilege is been a double-edged sword, and in fact has been a fundamental aspect of the antisemitic system. As Fanon reminds us, the Jewish threat is a stealthy, intellectual one, so the presence of Jews in prestigious fields, while economically and socially advantageous for a time, also plays directly into the narrative that Jews are covertly dangerous.

The middle position alienates Jews as a group from other groups above and below them in the social hierarchy. From above, they are viewed with suspicion, while from below they often appear as the most visible oppressor – for example as landlords, store owners, and bosses in low-income communities. Georg Simmel famously described the status of Jews as that of the perpetual Stranger (1950). Kafka articulated the condition as being told: “You are not from the castle, you are not from the village, you are nothing.” (1926:46). The presence of this neither-nor population helped to build and maintain modern state structures, and in Europe, white supremacy, essentially by acting as a cushion in between elites and the most acutely oppressed. As Aurora Levins-Morales puts it:

As an identifiable group, Jews accrue limited but real privileges from above, resentment from below, and mistrust from both, until a moment of crisis in which an outburst of violence

modern middle position as stranger-merchants back to their ancient middle position as stranger-mercenaries.

Though the Zionist movement’s goal was liberation from antisemitism, the identity of the Jewish people as scapegoats in service of rulers has survived the founding of the State of Israel unchecked. Worse still, the material advantages of colonial exploitation (Shafir 1989) combined with the parvenu impulse to “ape the gentiles” (Arendt 1978:68) resulted in the Israeli government molding itself in the image of the Western imperial power, including all of the barbarity that comes with it, and pitching Jews to the world as racially white. The founding of the State of Israel in this way – that is, in lock step with systemic antisemitism – perpetuated a paradox from which Jews as a people have yet been unable to escape. The State of Israel as it currently exists traps the Jewish people in liberation limbo, keeping it at odds with its neighbors and reliant upon ultimate salvation by neo-imperial powers.

Re-Colonizing Jewishness

Decolonization “sets out to change the order of the world” (Fanon 1961:2). This process involves momentous historical events, but the project begins and ends with human subjects. In the attempt to liberate Jews via state power in Israel, Zionist philosophy created an image of a “decolonized subject,” a Jewish New Man. This Zionist version of the Haskalachic “New Jew” was dubbed the Sabra, after the Hebrew name of the prickly pear cactus that grew in Palestine: hard and thorny on the outside but soft and sweet on the inside. The Sabra Jew was born in Palestine, spoke Hebrew as a first language, and fiercely defended the "homeland." The Sabra was the photo negative of the shtetl Jew; whereas antisemitic propaganda had made the diaspora Jew out to be weak, sickly, pale, ugly, cowardly, and greedy, the Sabra was strong, healthy,
Jewish people through a backdoor into the very same position they sought deliverance from, only on a global scale.

Since the Political Zionists’ success, statehood has provided a measure of protection for individual Jews who live in Israel, but it has also created a lightning rod for material attacks by neighbors and political attacks by anti-imperialist forces. The Israeli government’s preoccupation with validation of its right to exist and the panic surrounding the recent “nuclear deal” between the US and Iran are but two examples demonstrating just how ineffective statehood has been in alleviating Jewish insecurity on any level.

This pathological insecurity (which Fanon notes in all colonized peoples) combined with the material benefits of being a colonizer, has led Israelis to perpetually alienate themselves from and abuse their neighbors, as Israel maintains a military occupation of the West Bank and blockade of Gaza, neither granting Palestinians citizenship nor allowing them to secede. To say nothing of the abhorrent violence of the occupation, a militarily controlled territory under which people live with different sets of rights and laws depending on geography, ethnicity, and religion should be viscerally repugnant to any sense of justice, and is a status quo that is patently unacceptable in the norms of the 21st century world.

The Zionist project as Herzl articulated it set the Jewish State on this trajectory. Before, during, and following its founding, Zionist and Israeli leaders allied with colonial forces, playing the middle position in between the imperial “center” of the US and British Empires and the “periphery” of the Arab and Persian Middle East and North Africa. Perhaps it is not a coincidence that early Hebrew tribes were often used by pharaohs as mercenaries, forces, positioned on borderlands to buffer the Egyptian Empire with the Assyrians and the Nubians, where they took both casualties and national blame during warfare (Hull 2009). In a sense, Herzl’s movement led Jews out of their

opens a pressure relief valve for popular discontent over economic or political conditions, directed at the stranger.

The second particularity of antisemitism has to do with its cyclical, episodic nature. In between moments of acute violence, such as pogroms, or most iconically, the Holocaust, there are lengthy periods of calm. The late 1800s were a time of integratedness and relative prosperity for Jews in Western and Central Europe, with many feeling as though antisemitism was a thing of the past. Nineteenth century anarchist Bernard Lazare’s personal transformation on the matter of antisemitism is instructive. Lazare was the first Jew to pen a comprehensive sociological volume on antisemitism, published in 1894. He had been convinced that the persistence of antisemitism was at least in part the fault of Jews themselves, and that it would inevitably disappear as both Jews and non-Jews moved away from the prejudices of the past into a revolutionary future – a position that is startlingly similar to that of many Jewish activists on the left today. The Dreyfus Affair of 1894 – the scandal in France surrounding the arrest and (false) conviction of a Jewish military officer who had been accused of collaborating with the Germans – drastically changed Lazare’s mind. After witnessing the widespread surge of public and state-sanctioned mistrust and hatred of Jews that followed Dreyfus’ arrest, Lazare committed himself to the fight against antisemitism. Lazare’s earlier position was partially attributable to the era in which he wrote. Jews in Western Europe appeared to be assimilating into white Christian and even bourgeois society. Anti-Jewish prejudices persisted, but the violence that had been attached to it in previous eras had all but disappeared, making these sentiments appear as a vestige of a bygone age that would surely fade into nonexistence. In Arendt’s words:

After thirty years of a mild, purely social form of anti-Jewish discrimination, it had become a little difficult to remember that the cry, ‘Death to the Jews’ had echoed through the length and
breadth of a modern state once before when its domestic policy was crystalized in the issue of antisemitism. (1951:94)

The crystallization of domestic policy around antisemitism that Arendt refers to is not random; it has been central to the development and enactment of systems of oppression by diverting the anger of a portion of the aggrieved population away from the power source of their economic and political grievances. Though we have been in a lull of pogromic antisemitic violence since the Holocaust, this cycle may be becoming ominously visible again with the prospect of rising fascism, first in Europe and now in the US. Karen Brodkin’s reversal on Jews having become “white folks” following Donald Trump’s election is a poignant contemporary demonstration of what Lazare may have gone through. Brodkin’s influential work How Jews Became White Folks (1998) articulated the now popular position that Jews had moved from an oppressed people to a white people, albeit with some differences, through a process of assimilation in the US. But the evident widespread resonance of violent antisemitic tropes in the Trump campaign along with attacks on Jewish sites and persons prompted the question: can Jews become nonwhite again? According to Brodkin (2016), this question itself was the answer – whiteness is by definition non-revocable. Part of its constructed social power is protection from such insecurity. In other words, if Jews’ whiteness can be abruptly revoked, then they were never really white in the first place. Of course, even when speaking of Ashkenazi Jews, the question should never have been “are Jews actually white?” because whiteness is an invented and socially constructed category. The question should have been: in what ways do some Jews experience and enact whiteness beyond this context, Herzl and other Political Zionists misjudged several crucial elements. Herzl’s nationalism, combined with his belief that all Gentile nations were inherently antisemitic, led to a realpolitik obsessed with achieving statehood above all else. Herzl correctly identified the antisemitic trap Jews had been caught in, where all Jews were conflated with upper class Jews, who were pushed into professional and financial roles then blamed for systemic failures. However, the assumption that all non-Jewish nations were inherently antisemitic foreclosed the possibility of solidarity with other oppressed groups, namely Arab Palestinians, who also sought liberation from foreign rule, only leaving space for cynical bargaining over self-interest.

Despite internal debates (for example, some argued for an Arab-majority state with minority ethnic rights for Jews and some pushed for alliance with the Soviet sphere of influence), this avenue ultimately brought Zionist leaders to the negotiating table of global imperial powers that were able to produce the results they sought – a sovereign state carved from the waning British Empire. The British in particular were adept at defining the terms of their colonies’ identities and territories, imposing both borders and colonial subjectivities that would survive local national liberation movements (Mamdani 2012). “The real anti-Semites… wanted to preserve the availability of the Jews as a scapegoat in case of domestic difficulties” (Arendt 1978:172) and the creation of an Israeli state did just that on an international scale. Arendt was part of a dissenting wing of the Zionist movement that sought a “national homeland without a national state,” and following their political defeat, she presciently articulated the implications of allying with European powers, saying that the autoemancipation project was ending not only in national but in “chauvinist claims – not against the foes of the Jewish people, but against its possible friends and present neighbors” (ibid:140). In short, Herzl’s Zionism led the

---

2 Some Jewish scholars disagree fervently with this proposition, and argue that at least Ashkenazi Jews have indeed become fully white in the US context (see Biale, Galchinsky, and Heschel 1998 for some of these debates), while others see the claim to whiteness as itself an aspect of internalized antisemitism (see Lerner 1992).
For the Political Zionist movement, Jews were perpetual strangers precisely because they possessed no sovereign homeland. Pinsker’s reference to his era, when other groups were fighting for national sovereignty, cannot be ignored. This Zionist vision emerged in the context of 19th century European nationalism, which, like socialism, provided a cognitive framework with which to interpret the problems of the world.

As a social group in this nationalistic framework, the Jews’ problems were seen to arise not from their alienation from other people but from land. According to Pinsker, Jews could not even dignify themselves to ask for hospitality as foreigners because they had no place from which to collectively offer to repay it. A state would provide physical security, but more importantly it would provide the existential foundation for recognition of the Jewish people. For Herzl too, recognition in the modern world was bound to statehood and sovereignty – Jews would only be able to achieve the recognition required for liberation from antisemitism if they controlled a state. Whereas Judaism had required Jews to look to G-d for protection and guidance in the diaspora, Zionists, who emerged from the Haskalah (Jewish Enlightenment), now encouraged Jews to look to the State.

Among many dilemmas for this agenda, one stands out. The Jews were a diasporic community; many felt native to nowhere but Palestine, but relatively few of them actually lived there. In the 19th century, Zionists (mainly from Europe) began urging Jews to move to Ottoman Palestine and establish land rights. Whether or not its adherents knew it, the Zionist project was at a crossroads: How would their communities relate to non-Jewish Palestinians?

While their desire and initiative to liberate their people from oppression is admirable, the Zionist movement emerged from a European nationalist zeitgeist in which few were considering the rights of non-European peoples, and the leaders of the dominant model of Zionism did not break from that mindset. Be-
cal, episodic nature of antisemitism are what give this racial system its specific, time-tested character.

In order to talk about decolonization for Jews, therefore, we cannot directly import the categories of colonizer and colonized from an analysis that focuses on a different type of racism. If we are to understand Jewish decolonization we must do so in the context of the particular historical development of the Jewish subject in relationship to the antisemitic system.

The Colonized Jewish Subject

The long history of antisemitism has had a significant impact on Jewish subjectivity. In Fanon’s psychological analysis, being colonized is not simply a matter of material relationship to power, it is also a personality. The experience of life under a colonial system generates specific inferiority complexes among subjects, which, when these become internalized, in a sense create colonized people. It has been well argued that Jews have inherited a culture characterized by precarity and trauma associated with the extreme violence experienced by previous generations, with Jewish psychological and cultural responses to this violence dating back well before the Holocaust. Here Fanon’s observation of “minor episodes in the family history” is both accurate and insufficient. It is not only the moments of violence but the constant threat of them, the precarity, the perpetual lack of belonging laced with fears of betrayal, that have impacted Jewish identity at the deepest level. That Jews were neither of the castle nor of the village had the material effect of making them a vulnerable population, acutely aware that they are exposed to exploitation as scapegoats in moments of crisis. In short, the culture of antisemitism has created barriers to the establishing of solidaristic networks between Jews and non-Jews. Deeper than the objective condition of the stranger is the
Acknowledging the antisemitic system in which Jewish identities have evolved is a critical preliminary step to pursuing liberation and decolonization. This is in part because it exposes a particular vantage point that the Jewish position creates. Albert Memmi prefaces his 1957 work The Colonizer and the Colonized with an acknowledgement of his social position as a Tunisian Jew. The middle social position of Jews, being among the colonized but with unique proximity to the colonizer (a Jewish status Memmi identifies in both North Africa and in Europe) is, according to Memmi, what allows him to write a book analyzing the personalities of both sides of the colonial relationship: “I was a sort of half-breed of colonization, understanding everyone because I belonged to no one” (1957: xvi). Memmi is able to see through the eyes of the colonizer and the colonized, he says, because his experience and identity simultaneously contain aspects of, and alienate him from, both. From this standpoint Memmi effectively describes both the colonizer and the colonized in ways that align closely with the descriptions in Fanon’s clinical work. Importantly, Memmi’s perspective was colored not only by his social-ethnic positionality, but also by his anticolonial ideology.

The reality of antisemitism and its centrality in the ideology of historical and contemporary fascist movements necessitates a Jewish liberation movement. But anti-Jewish oppression and Jewish positionality are unlike that of many other oppressive systems and oppressed ethnicities and nationalities. It should be no surprise then that any Jewish national liberation project that fails to account for the particular dynamics of this positionality will be doomed to failure.

**Zionism as (Failed) National Liberation**

To Fanon, an oppressed people start with those demands that are most basic and most promising: “Bread and land: how
self-determination in favor of dealing with individual Jews. As French aristocrat Clermont-Tonnerre articulated it, arguing in favor of civil rights for Jews during the French Revolution: “The Jews should be denied everything as a nation but granted everything as individuals” (Judaken 2006:9). Historically, the parvenu accepts and in fact embraces this dynamic, either discarding connections to their Jewish community or tailoring them so as to make them least obnoxious to elite society. Jews’ material proximity to whiteness and upward mobility in the West, most notably in the US, has enabled the parvenu to reinforce liberal capitalism and white supremacy by positioning Jews as success stories of pluralism, with the “right to embrace difference and yet enjoy access to power” (Greenberg 1998).

The parvenu Arendt wrote of is the Jew imitating and striving for whiteness, yet unwittingly playing into the antisemitic system, but in fact there are two parvenu versions. Today, the other version is that of the left Jewish activist who denies the reality of antisemitism either striving to be the “good ally” to the oppressed, a group to which this parvenu denies membership (as a Jew, though not necessarily on other bases) in a bid to gain acceptance.

Marx (1844) famously contributed to debates over the “Jewish Question,” in which Jews struggle between their identity as a distinct people and the identities of the nation-states in which they live as others. In the 19th century, alongside nationalism (from which Zionism grew), and liberalism (from which assimilationism in the US grew), socialism offered an alternative solution to the Jewish question: for the working class of one nation to ally with the working class of other nations on the basis of their shared economic class. To many Jews, the workaround required a prerequisite – to negate the legitimacy of membership in one’s own oppressed community. Indeed, many Jews were active in building 19th century communist and anarchist movements in part as a solution to the Jewish Question, where Jews might gain acceptance not through legitimizing their group but by delegitimizing all national groups. Accordingly, Jews have often sought validation in their participation in social movements of the oppressed as individuals or on the basis of membership in some other legitimized group of claimants (e.g., workers, women, etc.).

This Left-wing Jewish self-denial has survived the transition from class-based to identity-based politics. In the identity politics framework, Jews are nowhere to be found on the racial spectrum. Jews as a group are not exactly white, but Jews as a group are also not acknowledged as POC. Individual Jews can be viewed as white or as POC on other bases (e.g., skin color, national background), but they are not recognized in the white-POC framework as a group. Jewish participants in Left-wing movements are assumed to identify as white unless they have another legitimate claim to POC status (i.e., Jews of color), and there is little room for affiliation in the struggle for liberation outside of POC status or allyship. Jews are thus disaffirmed as a legitimate people, which is to say as Jews, in terms of the oppressed as well as in terms of the oppressor.

The role of allyship, especially when oriented around criticizing the State of Israel, fits snugly into internalized discomfort and self-loathing that comes with Jewishness in an era when antisemitism is at its least overtly violent (see Lerner 1992). The pursuit of liberation for others alone is a perfect example of this alternative version of Arendt’s parvenu, essentially aping white guilt. Like the elite version, this might appear to be the only path for participation in social-political life alongside other groups, but nevertheless it has grave consequences. Antisemitism has been and continues to be a linchpin of far right ideology (Arendt 1951, Ward 2017), a political force that is a grave resurgent threat to society. By shirking the responsibility to pursue Jewish liberation alongside and in solidarity with other groups’ liberation struggles, this parvenu, like the other, not only facilitates the perpetuation of antisemitism, but hinders the prospects for collective human liberation as well.
