For Leninists, if the workers’ act in ways opposed to by the party, then the party has the right to ignore, even repress, the workers — they simply do not (indeed, cannot) understand what is required of them. They cannot reach “socialist consciousness”’ by their own efforts — indeed, their opinions can be dismissed as “there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement the only choice is: either bourgeois or socialist ideology … to belittle socialist ideology in any way, to deviate from it in the slightest degree means strengthening bourgeois ideology … the spontaneous development of the labour movement leads to it becoming subordinated to bourgeois ideology.” [Op. Cit., p. 82] Given that the socialist ideology cannot be communicated without the vanguard party, this means that the party can ignore the wishes of the masses simply because such wishes must be influenced by “bourgeois” ideology. Thus Leninism contains within itself the justification for elimin-
14. Is the Leninist tradition actually as democratic as the SWP like to claim?

While the SWP attack anarchism for being undemocratic for being against “centralism” the truth is that the Leninist tradition is fundamentally undemocratic. Those, like the SWP, who are part of the Bolshevik tradition have no problem with minorities ignoring majority decisions — as long as the minority in question is the leadership of the vanguard party. We discussed the example of the “battle of Prague” in the last section, now we turn to Bolshevism in power during the Russian Revolution.

For example, the Bolsheviks usually overthrew the results of provincial soviet elections that went against them [Samuel Farber, Before Stalinism, pp 22–24]. It was in the spring of 1918 that the Bolsheviks showed how little they really supported the soviets. As discontent grew soviet after soviet fell to Menshevik-SR blocs. To stay in power they had to destroy the soviets and they did. Opposition victories were followed by disbanding of the soviets and often martial law. [Vladimir Brovkin, “The Menshevik’s Political Comeback: The elections to the provincial soviets in spring 1918”, Russian Review no. 42 (1983), pp. 1–50]

In addition, the Bolsheviks abolished by decree soldiers’ councils and the election of officers in the Red Army in favour of officers appointed from above (see section 11 of the appendix “Marxism and Spanish Anarchism” for details). They replaced self-managed factory committees with appointed, autocratic managers (see M. Brin-ton’s The Bolsheviks and Workers Control or section 17 of the appendix “Marxism and Spanish Anarchism” for details). All this before the start of the Russian Civil War. Similarly, Lenin and Trotsky happily replaced the democratically elected leaders of trade unions with their followers when it suited them.

As Trotsky argued in 1921, you cannot place “the workers’ right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the
Mitchinson urges us to build (see M. Brinton’s classic work *The Bolsheviks and Workers’ Control* for more details). Those who do not study history are doomed to repeat it.

He goes on:

“*The economic power we have created can be compared to the destructive force of lightning, untamed and anarchic under the market, yet organised into cables and wires electricity transforms our lives. Industry is not the enemy, nor are machines. The state is, but it is a symptom not the disease. It is capitalism and its ownership of the economy, its stewardship of society that we have to replace.*”

However, unlike electricity, “economic power” requires people to operate it. The question is not whether “machines” are the enemy (often they are, as machines are used by capitalists to weaken the power of workers and control them). The question is whether the future society we aim at is one based on workers’ and community self-management or whether it is based on an authoritarian system of delegated power. It is clear that Marxists like Mitchinson desire the latter — indeed, as is clear from his diatribe, he cannot comprehend an alternative to hierarchical organisation.

Given that one of the things capitalism and the state have in common is a hierarchical, top-down structure, it is clear that any revolutionary movement must fight both — at the same time.

25. Do anarchists ignore the “strength of the working class”?

Mitchinson argues that:

“The task of our time is to combine the strength and experience of the working class and its mighty organisations with the power and energy of the youth internationally, irrelevant when they conflict with the party. The implications for the SWP’s proclaimed support for democracy is clear.

So it appears that minorities can and should ignore agreements — as long as the minority in question are the leaders of the SWP and its sister parties. They have exposed themselves as being hypocrites. Like their heroes, Lenin and Trotsky, they will ignore democratic decisions when it suits them (see next section). This is sickening for numerous reasons — it placed the rest of the demonstrators in danger, it weakened the demonstration itself and it shows that the SWP say one thing and do the exact opposite. They, and the political tradition they are part of, clearly are not to be trusted. The bulk of the membership went along with this betrayal like sheep. Hardly a good example of revolutionary consciousness. In fact it shows that the “revolutionary” discipline of the SWP is like that of the cops or army) and that SWP’s centralised system is based on typically bourgeois notions. In other words, the organisational structure desired by the SWP does not encourage the autonomy, initiative or critical thinking of its members (as anarchists have long argued).

Prague shows that their arguments for “centralisation” as necessary for “democracy” are hypocrisy and amount to little more than a call for domination by the SWP’s leadership over the anti-capitalist movement — a call hidden begin the rhetoric of “democracy.” As can be seen, in practice the SWP happily ignores democracy when it suits them. The party always comes first, regardless of what the people it claims to represent actually want. In this they follow the actions of the Bolsheviks in power (see next section). Little wonder Marxism-Leninism is dying — the difference between what they claim and what they do is becoming increasingly well know.
Therefore, to summarise. Ten days after denouncing anarchism for refusing to accept majority decisions and for being against “centralisation” (i.e. making and keeping agreements), the SWP ignore majority decisions, break agreements and do their own thing. Not only that, they weaken the demonstration and place their fellow protestors in difficulties simply so they could do nothing someplace else as, unsurprisingly enough, their way was blocked by riot cops. An amazing example of “democratic centralism” in practice and sure to inspire us all to follow the path of Marxism-Leninism!

The hypocrisy of their actions and arguments are clear. The question now arises, what do anarchists think of their action. As we argued in the last section, while anarchists favour direct democracy (self-management) when making decisions we also accept that minorities can and should ignore a majority decision if that decision is considered to be truly disastrous. However, any such decision must be made based on evaluating the damage caused by so making it and whether it would be a violation of solidarity to do so. This is what the SWP clearly failed to do. Their decision not only made a mockery of their own argument, it failed to take into account solidarity with the rest of the demonstration.

From an anarchist perspective, therefore, the SWP’s decision and actions cannot be justified. They violated the basic principles of a revolutionary movement, the principles of liberty, equality and solidarity. They ignored the liberty of others by violating their agreements with them, they violated their equality by acting as if the other groups ideas and decisions did not matter and they violated solidarity by ignoring the needs of the common struggle and so placing their fellow demonstrators in danger. While anarchists do respect the rights of minorities to act as they see fit, we also recognise the importance of solidarity with our fellow workers and protestors. The SWP by failing to consider the needs of the common struggle sabotaged the demonstration and should be condemned not only as hypocrites but also as elitists — the party is not subject to the same rules as other demonstrators, whose wishes are on the basis of a clear understanding of what capitalism is, what the state is, and a programme for changing society. That requires a combination of theory and action. In that combination lies the strength of Marxism.”

The first question is surely what “mighty organisations” of the working class is he talking about. Is it the Labour Party? Or is it the trade unions? Probably the latter — if so, the question is how effective have these “mighty organisations” been recently? The answer must, surely, be “not very.” Why is that? In union there is strength, as anarchists have long been aware. Why has this strength been so lacking? Simply because the unions are centralised, bureaucratic and run from the top down. They have placed numerous barriers in front of their members when they have taken militant action. That is why anarchists urge workers to form rank-and-file controlled organisations to manage their own struggles and take back the power they have delegated to their so-called leaders. Only in this way, by building truly revolutionary organisations like workers’ councils (soviets), factory committees, community assemblies and so on can they really create a “mighty” force. In other words, anarchists are well aware of the strength of working class people and their power to change society — indeed, as proven above, anarchism is based on that awareness and organise appropriately!

The second question is surely to ask whether Mitchinson is aware that Reclaim the Streets have been building links with rank and file trade union militants for years — long before Mitchinson decided to enlighten them with “the strength of Marxism.” In other words, “the strength of Marxism” seems to rest in telling radical working class people to do what they have already doing! Such strength is truly amazing and must explain the prominent role Leninists have had in the numerous anti-capitalist demonstrations and organisations recently.

Needless to say, anarchism provides “a clear understanding of what capitalism is, what the state is, and a programme for changing
society. That requires a combination of theory and action.” This has been proven above when we corrected Mitchinson’s numerous errors regarding anarchist theory. Moreover, as far as combining theory and action goes, it is clear that anarchism has been doing that of late, not Marxism. While anarchists have been at the forefront of the anti-capitalist demonstrations, working with others as equals, Marxists have been noticeable by their absence. Combining theory and practice, non-hierarchically organised direct action closed down the WTO and presented a clear message to the oppressed around the world — resistance is fertile. What have Marxists achieved? Apparently producing articles such as these, distorting the politics and activities of those who actually are changing the world rather than just interpreting it. That they cannot produce an honest critique of anarchism indicates the uselessness of their politics.

26. What does Mitchinson’s article tell about the nature of Trotskyism?

He finishes his diatribe as follows:

“If you want to fight against capitalism, do so fully armed with a socialist programme and perspective. Join with us in the struggle for the socialist transformation of the planet.”

It is clear that to be “fully armed with a socialist programme” means to critique that which you know nothing about, spread slanders and lie about what your opponents actually think. There is much to be critical of in the recent anti-capitalist demonstrations and the various groups that have helped organise and take part in them. Anarchists have been the first to point these out. However, we have a lot to learn from them as well — they are struggling against capitalism and, as Kropotkin argues, “Anarchism

And the net effect of their defection? As the Weekly Worker pathetically comments:

“Of course, it was blocked by ranks of riot police ...”

As the bridge was a very narrow front this resulted in a huge amount of people stuck behind “Ya Basta!” with nothing to do except sit around. So the “International Socialists” and other Leninists who undertook the act of sabotage with them were stuck doing nothing behind “Ya Basta” at the bottom of the bridge (as would be expected — indeed, this exposes another failing of centralism, its inability to know local circumstances, adapt to them and plan taking them into account). The tiny number of anarchists who marched around to cover their gate on the other hand, took the police by surprise and broke through to the conference centre until driven back by hundreds of riot police. Worse, there were some problems in the “Yellow Block” as the Leninists were pushing from behind and it took some serious explaining to get them to understand that they should stop it because otherwise people in the front line could be crushed to death. Moreover, they demanded to be allowed up alongside “Ya Basta” at the front, next to the riot cops, but when “Ya Basta” did pull out and invited the SWP to take their place in the front they refused to do so.

Moreover, the actual result of the SWP’s disgraceful actions in Prague also indicates the weakness of centralism. Having centrally decided to have one big march (regardless of what the others thought or the majority wished or agreed to) the decision was made with clearly no idea of the local geography otherwise they would have known that the front at the bridge would have been small. The net result of the “efficient” centralisation of the SWP? A mass of protestors stuck doing nothing due to a lack of understanding of local geography and the plan to blockade the conference seriously weakened. A federal organisation, on the other hand, would have had information from the local activists who would have been organising the protests and made their plans accordingly.
Obviously “proper democracy” and a council of group spokespeople discussing the protests were not good enough for the SWP and other Leninist groups. Nor, of course, making an agreement and sticking to it.

The *Weekly Worker* complements the SWP’s decision:

> “Come the march itself, the damage was partially repaired by the decision of a majority of the ‘pink’ contingent (with the SWP and its international sections to the fore) to simply veer off the agreed route. This pink section then partially merged with the yellow to advance on the conference.”

We must point out that the International Socialists appear to have lied about the numbers they were bringing to Prague. The day before the demonstration they claimed they said they would contribute 2,500 to the Pink section — since then their own press has reported 1,000 in their delegation (*Socialist Worker* no. 1716 stated that the “day began when over 1,000 marched from the Florenc bus station...led by supporters of Socialist Worker and its sister papers elsewhere in Europe”). This would have left the Pink block seriously under strength even if they had not unilaterally left their block.

Their defection from the agreed plan had very serious repercussions on the day — one gate in the Pink sector was never covered. In the Blue sector, where the anarchists were concentrated, this meant that at the height of a battle with hundreds of riot police, a water cannon and two Armoured Personnel Carriers they were forced to send 300 people on a 2 km hike to attempt to close this gate. Shortly after they left a police charge broke the Blue Block lines leading to arrests and injuries.

Thus, by ignoring the plan and doing their own thing, they not only made a mockery of their own arguments and the decision making process of the demonstration, weakened the protest and placed others in danger.

... originated in everyday struggles” and “the Anarchist movement was renewed each time it received an impression from some great practical lesson: it derived its origin from the teachings of life itself.” [*Evolution and Environment*, p. 58 and p. 57]

Thus we must critique these movements honestly and as equals — Mitchinson, as can be seen, does neither. He slanders those involved and dismisses out of hand their experiences and the reasons that have brought them to struggle in a specific way against the dominant society. In this he follows Lenin, who argued in *Left-Wing Communism: An Infantile Disorder* that western revolutionaries ignore their own experiences in their own — and similar — countries and instead follow the “lessons” of experiences gained in a near pre-capitalist, absolutist state. The stupidity of such an approach is clear.

Mitchinson presents those in struggle with the ultimatum “subscribe to our platform or be denounced.” Little wonder that Leninists are non-existent in the groups that have taken part and organised the anti-capitalist demonstrations — not willing to learn from those involved in the class struggle, all they can do is act as petty sectarians. Sectarians expect working class people to relate to their predetermined political positions, whereas revolutionaries apply our politics to the conditions we face as members of the working class. For Leninists revolutionary consciousness is not generated by working class self-activity, but is embodied in the party. The important issues facing the working class — and how to fight — are to be determined not by the workers ourselves, but by the leadership of the party, who are the “vanguard of the working class”. Hence Mitchinson’s dismissal (in a particularly dishonest manner, we must stress) of those involved in struggle and their experiences. True “revolution” obviously lies in the unchanging ideas generated at the start of the twentieth century in a monarchy developing towards capitalism, not in the experiences and desires of living people fighting for freedom in the here and now. Yes, these ideas and movements can be confused and unclear — but they are living and
subject to change by the influence of revolutionaries who act in a libertarian manner (i.e. as equals, willing to learn as well as teach).

The Italian Marxist Antonio Gramsci once wrote that “to tell the truth is a communist and revolutionary act.” However, even he did not apply this when discussing anarchism and the activities of anarchists (see Gwyn Williams’ *Proletarian Order*, pp. 193–4). Be that as it may, Gramsci’s point is correct. Telling the truth is a revolutionary act. If we judge Mitchinson’s article by this standard then we can only conclude that neither he nor the politics he defends are revolutionary or communist.

Thus we find his ending comment truly a “flight of fancy” — after reading our comments above, we hope you agree with us. If you seek a *true* socialist transformation of this planet rather than its degeneration into centralised state capitalism, discover more about anarchism.

**Reply to errors and distortions in the SWP’s “Marxism and Anarchism”**

In issue no. 1714 of *Socialist Worker* (dated 16th September 2000) the British Socialist Workers Party (SWP) decided to expose anarchism in an article entitled “Marxism and Anarchism.” However, their article is little more than a series of errors and distortions. We shall indicate how the SWP lies about anarchist ideas and discuss the real differences between anarchism and Marxism. Moreover, we will indicate that the bulk of the SWP’s article just recycles common Leninist slanders about anarchism, slanders that have been refuted many times over.

From the splitting points to the centre the marches were unaccompanied by both police and media. A clear victory. Indeed, what would have been “truly stupid” was doing what the police had expected (and SWP wanted) — to have one big march.

How was the demonstration’s organised? According to eyewitness Katharine Viner (writing in *The Guardian* on Friday September 29, 2000):

“In the run-up to Tuesday’s demonstration I attended the convergence centre, where ‘spokes council’ meetings took place, and found the sense of community and organisation there astonishing and moving. Every ‘affinity group’ — NGO or group of friends — sent a spokesperson to meetings to make decisions and work out strategy. It sounds impossible to contain, and it was laborious, but it worked and consensus was found. It felt like proper democracy in a way that the ballot box does not.”

Julie Light, of Corporate Watch, indicates the same process at work in her account entitled *Spirits, Tensions Run High in Prague* (dated September 25, 2000):

“the activist coalition called the Initiative Against Economic Globalisation (INPEG) is training hundreds of people in civil disobedience at the Convergence Centre. The Centre, a converted warehouse space located under Prague’s Libensky Bridge, serves as an information and strategy clearinghouse for the protesters. A ‘spokes council’ made up of representatives of dozens of groups makes decisions by consensus for this international ad-hoc coalition that has never worked together before. They have an elaborate system of hand signals to indicate their views as they discuss the details of the protests. Given the logistical obstacles, things seem to be running remarkably smoothly.”
March and so offered the best media coverage for their placards and banners. Similarly, they joined the Yellow Section because it was marching directly to the conference centre and not, like Pink, going round to the rear and so, again, offered the best media coverage. In other words, they “did their own thing”, ignored the agreements they made and weakened the protests simply to look the dominant group in the press. Ironically, the Czech media made sure that the Leninist parties got onto their front pages simply because many of them chose to march in Prague with red flags emblazoned with hammer and sickles. Flags associated with the Soviet occupation and the old regime are hardly “popular” and so useful to smear the protests.

The decision of the SWP to ignore the agreed plan was applauded by other Leninists. According to the post-Prague issue of the Communist Party of Great Britain’s paper *Weekly Worker*:

>“Farcically, the organisers had decided to split the march into three, each with its own route and composition — blue (anarchist), pink (trade unions and left organisations) and yellow (NGOs and Jubilee 2000). Ostensibly, this started as a tactic designed to facilitate forming a human chain around the conference centre, although by the day of the action this aim had, apparently, been abandoned. Whether these truly stupid arrangements had been accepted beforehand by all on the INPEG (Initiative Against Economic Globalisation) remains hazy, given the paucity of information about the debates and differences on this self-appointed body.”

The splitting of the march into three, as a matter of fact, was a great success. It allowed the demonstrators to encircle the conference centre. The marches splitting off from the back working beautifully, catching the police and media by surprise who were clustered at the front of the march (indeed, the police later admitted that they had been caught off guard by the splitting of the

1. What does the anti-globalisation movement tell us about the effectiveness of the “vanguard” parties like the SWP?

The inspiration for their diatribe is clear — they are worried about anarchist influence in the various anti-capitalist and anti-globalisation movements and demonstrations which are currently occurring across the world. As they put it:

>“The great revolt against capitalism in Seattle last year, and similar demonstrations since, have attracted diverse groups of protesters. Anarchists, amongst others, have taken part in all of those protests.”

Yes, indeed, anarchists have been involved in these demonstrations from the start, unlike “vanguard” parties like the SWP who only became aware of the significance of these movements once they exploded in the streets. That in itself should tell us something about the effectiveness of the Bolshevik inspired politics the SWP raise as an alternative to anarchism. Rather than being at the vanguard of these demonstrations and movements, parties like the SWP have been, post-Seattle, busy trying to catch up with them. Nor is this the only time this has happened.

In Russia, in February 1917, for example, the Bolshevik party opposed the actions that produced the revolution which overthrew the Tsar. After weeks of strikes with police attacks on factories, the most oppressed part of the working class, the women textile workers, took the initiative. Demands for bread and attacks on bakeries were superseded by a massive demonstration of women workers on International Women’s Day. The women had ignored a local Bolshevik directive to wait until May Day! The early slogan of “Bread!” was quickly followed by “Down with the autocracy! Down with the war!” By February 24th, half of Petrograd was on strike. The workers did go to their factories, not to work, but to hold meetings, pass resolutions and then go out to demonstrate. The Vyborg committee
of the Bolsheviks opposed the strikes. Luckily for the Russian workers, and unfortunately for the Tsar, the Bolsheviks were ignored. If they had followed the Bolsheviks, the February Revolution would not have occurred!

The backward nature of the Bolshevik style of party can also be seen from events 12 years earlier. In 1905, workers spontaneously organised councils of workers’ delegates (“soviets” in Russian). The soviets were based on workplaces electing recallable delegates to co-ordinate strikes and were created by the Russian workers themselves, independently of political parties.

Far from being at the vanguard of these developments the Bolsheviks were, in fact, deeply hostile to them. The Bolshevik Central Committee members in Petersburg were uneasy at the thought of a “non-Party” mass organisation existing side by side with their party. Instead of seeing the Soviet as a form of workers’ self-organisation and self-activity (and so a key area for activity), they regarded it with hostility. They saw it as a rival to the party.

The St. Petersburg Bolsheviks organised a campaign against the Soviet due to its “non-Party” nature. They presented an ultimatum to the Soviet that it must place itself under the leadership of their party. On 24 October they had moved a resolution along the same lines in meetings at the various factories, demanding that the Soviet accept the Social Democratic programme and tactics and demanding that it must define its political stance.

The Bolshevik Central Committee then published a resolution, that was binding upon all Bolsheviks throughout Russia, insisting that the soviets must accept the party programme. Agitation against the soviet continued. On 29 October, the Bolshevik’s Nevsky district committee declared inadmissible for Social Democrats to participate in any kind of “workers’ parliament” like the Soviet.

The Bolshevik argument was that the Soviet of Workers’ Deputies should not have existed as a political organisation and that the social democrats must withdraw from it, since its

Let us recall that on September 16th, the SWP had argued as follows:

“It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place.”

They stressed that importance of “centralisation” which they defined as “arriving at decisions which everyone acts on. Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions.”

In practice, the International Socialist (IS) section of the Prague demonstration (the SWP and its sister parties) totally ignored their own arguments. Instead of ending up in the Pink sector (for which they had put themselves down) they somehow ended up behind “Ya Basta” in the yellow sector. As they were at the front of the march this should have been impossible. It turns out they deliberately entered the wrong sector because they refused to accept the agreed plan to split the march in three.

The protests had been co-ordinated by INPEG. INPEG was established as a democratic implement of communication and coordination among individuals and groups which want to protest against the annual summit of IMF in Prague on September 2000. It included a variety groups — for instance reformists (e.g. NESEHNUTI), anarchists (e.g. CSAF or Solidarity) and Leninists (i.e. Socialist Solidarity, sister organisation of the British SWP). The IS group had argued at INPEG committee meetings earlier in the year for a single march on the centre (which of course could not have shut the conference down). They failed to win this argument and so had betrayed the rest of the protesters on the day by simply marching directly onto the bridge themselves (in the yellow sector) instead of continuing into the Pink sector as they were supposed to.

Why did the SWP do what they did? Presumably they put themselves down for the Pink section because it was at the front of the
do not make a fetish of it. We recognise that we must use our own judgement in evaluating each decision reached simply because the majority is not always right. We must balance the need for solidarity in the common struggle and needs of common life with critical analysis and judgement.

Needless to say, our arguments apply with even more force to the decisions of the representatives of the majority, who are in practice a very small minority. Leninists usually try and confuse these two distinct forms of decision making. When groups like the SWP discuss majority decision making they almost always mean the decisions of those elected by the majority — the central committee or the government — rather than the majority of the masses or an organisation.

So, in practice the SWP argue that the majority of an organisation cannot be consulted on every issue and so what they actually mean is that the decisions of the central committee (or government) should be followed at all times. In other words, the decisions of a minority (the leaders) should be obeyed by the majority. A minority owns and controls the “revolutionary” organisation and “democracy” is quickly turned into its opposite. Very “democratic.”

As we shall indicate in the next two sections, the SWP do not, in fact, actually follow their own arguments. They are quite happy for minorities to ignore majority decisions — as long as the minority in question is the leadership of their own parties. As we argue in section 14, such activities flow naturally from the vanguardist politics of Leninism and should not come as a surprise.

13. How does the Battle of Prague expose the SWP as hypocrites?

To evaluate the sincerity of the SWP’s proclaimed commitment to “democracy” and “centralism” we just have to look at the actions of their contingent at the demonstration against the WTO and IMF in Prague on September 26th, 2000.
warrant sales by direct action, the attempts to create links with rank-and-file trade unionists and so on. Indeed, the SWP’s strategy meant mobilising fewer people in collective struggle as trade union members were a minority of those affected by the tax as well as automatically excluding those workers not in unions, people who were unemployed, housewives, students and so on. Little wonder the SWP failed to make much of an impact in the campaign.

However, once non-payment began in earnest and showed hundreds of thousands involved and refusing to pay, overnight the SWP became passionate believers in the collective class power of community based non-payment. They argued, in direct contradiction to their earlier analysis, that the state was “shaken by the continuing huge scale of non-payment.” [quoted by Trotwatch, Carry on Recruiting, pp. 29–31]

The SWP proved to be totally unresponsive to new forms of struggle and organisation produced by working class people when resisting the government. In this they followed the Bolshevik tradition closely — the Bolsheviks initially ignored the soviets created during the 1905 Russian Revolution and then asked them to disband. They only recognised their importance in 1917, 12 years after that revolution was defeated and the soviets had re-appeared.

Therefore, the fact that the self-proclaimed “vanguard of the proletarian” is actually miles behind the struggle comes as no surprise. Nor are their slanders against those, like anarchists, who are at the front of the struggle unsurprising. They produced similar articles during the poll tax rebellion as well, to counter anarchist influence by smearing our ideas.

2. What does the SWP miss out in its definition of anarchism?

The SWP continue:

the decision. We cannot accept majority decisions without question simply because the majority can be wrong. Unless the minority can judge the decisions of the majority and can reject them then they are slaves of the majority and the equality essential for a socialist society is eliminated in favour of mere obedience.

However, if the actions of the majority are simply considered to be disastrous but breaking the agreement would weaken the actions of the majority, then solidarity should be the overwhelming consideration. As Malatesta argued, “[t]here are matters over which it is worth accepting the will of the majority because the damage caused by a split would be greater than that caused by error; there are circumstances in which discipline becomes a duty because to fail in it would be to fail in the solidarity between the oppressed and would mean betrayal in face of the enemy … What is essential is that individuals should develop a sense of organisation and solidarity, and the conviction that fraternal co-operation is necessary to fight oppression and to achieve a society in which everyone will be able to enjoy his [or her] own life.” [Life and Ideas, pp. 132–3]

He stresses the point:

“But such an adaptation [of the minority to the decisions of the majority] on the one hand by one group must be reciprocal, voluntary and must stem from an awareness of need and of goodwill to prevent the running of social affairs from being paralysed by obstinacy. It cannot be imposed as a principle and statutory norm…

“So … anarchists deny the right of the majority to govern in human society in general … how is it possible … to declare that anarchists should submit to the decisions of the majority before they have even heard what those might be?” [The Anarchist Revolution, pp. 100–1]

Therefore, while accepting majority decision making as a key aspect of a revolutionary movement and a free society, anarchists
individual, moving on through the Commune, to the Federation and right on up finally to the Confederation.”
[quoted by Jose Pierats, The C.N.T. in the Spanish Revolution, pp. 68–9]

Therefore, as a general rule-of-thumb, anarchists have little problem with the minority accepting the decisions of the majority after a process of free debate and discussion. As we argue in section A.2.11, such collective decision making is compatible with anarchist principles — indeed, is based on them. By governing ourselves directly, we exclude others governing us. However, we do not make a fetish of this, recognising that, in certain circumstances, the minority must and should ignore majority decisions. For example, if the majority of an organisation decide on a policy which the minority thinks is disastrous then why should they follow the majority? In 1914, the representatives of the German Social Democratic Party voted for war credits. The anti-war minority of that group went along with the majority in the name of “democracy,” “unity” and “discipline.” Would the SWP argue that they were right to do so? Similarly, if a majority of a community decided, say, that homosexuals were to be arrested, would the SWP argue that minorities must not ignore that decision? We hope not.

In general, anarchists would argue that a minority should ignore the majority when their decisions violate the fundamental ideas which the organisation or association are built on. In other words, if the majority violates the ideals of liberty, equality and solidarity then the minority can and should reject the decisions of the majority. So, a decision of the majority that violates the liberty of a non-oppressive minority — say, restricting their freedom of association — then minorities can and should ignore the decisions and practice civil disobedience to change that decision. Similarly, if a decision violates the solidarity and the feelings of equality which should inform decisions, then, again, the minority should reject

“One question immediately arises. What do anarchists mean by the term “authority”? Without knowing that, it will be difficult to evaluate the SWP’s arguments.

Kropotkin provides the answer. He argued that “the origin of the anarchist inception of society … [lies in] the criticism … of the hierarchical organisations and the authoritarian conceptions of society; and … the analysis of the tendencies that are seen in the progressive movements of mankind.” He stresses that anarchism “refuses all hierarchical organisation.” [Kropotkin’s Revolutionary Pamphlets, p. 158 and p. 137]

Thus anarchism rejects authority in the sense, to use Malatesta’s words, of “the delegation of power, that is the abdication of initiative and sovereignty of all into the hands a few.” [Anarchy, p. 40] Once this is clearly understood, it will quickly been seen that the SWP create a straw man to defeat in argument.

Moreover, by concentrating on what anarchism is against the SWP can ignore what anarchism is for. This is important as to discuss the positive ideas of anarchism would mean having to discuss anarchists ideas on organisation, why we oppose centralisation, favour federalism as a means of co-ordinating decisions, why we propose self-management in place of government, and so on. To do this would mean accurately presenting libertarian theory rather than a just series of slanders, which, of course, the SWP would hate to do.

So what is anarchism for?

Anarchism derives from the Greek for “without authority” or “without rulers” and this informs anarchist theory and visions of a better world. This means that anarchism is against the “domination of man by man” (and woman by woman, woman by man, and so on). However, “[a]s knowledge has penetrated the gov-
erned masses… the people have revolted against the form of authority then felt most intolerable. This spirit of revolt in the individual and the masses, is the natural and necessary fruit of the spirit of domination; the vindication of human dignity, and the saviour of social life.” Thus “freedom is the necessary preliminary to any true and equal human association.” [Charlotte Wilson, Anarchist Essays, p. 54 and p. 40] In other words, anarchist comes from the struggle of the oppressed against their rulers and is an expression of individual and social freedom. Anarchism was born from the class struggle.

This means, positively, that anarchists stress the need for self-government (often called self-management) of both individuals and groups. Self-management within free associations and decision making from the bottom-up is the only way domination can be eliminated. This is because, by making our own decisions ourselves, we automatically end the division of society into governors and governed (i.e. end hierarchy). In other words, those affected by a decision make that decision. Anarchism clearly means support for freedom and equality and so all forms of hierarchical organisation (such as the state and the capitalist workplace) and authoritarian social relationship (such as sexism, racism, homophobia and wage labour) must be abolished. This means that anarchist organisations must be self-managed, decentralised and based on federalism. Only this form of organisation can end the division of society into rulers and ruled, oppressor and oppressed, exploiter and exploited and create a society of free and equal individuals.

This is why anarchists stress such things as decision making by mass assemblies and the co-ordination of decisions by mandated and recallable delegates. The federal structure which unites these basic assemblies would allow local affairs to be decided upon locally and directly, with wider issues discussed and decided upon at their appropriate level and by all involved. This would allow those affected by a decision to have a say in it, so allowing them to manage their own affairs directly and without hierarchy. This, in turn, would encourage the self-reliance, self-confidence and initiative of

“Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions.”

Anarchists are in favour of free agreement and so argue that minorities should, in general, go along with the majority decisions of the groups and federations they are members of. That is, after all, the point behind federalism — to co-ordinate activity. Minorities can, after all, leave an association. As Malatesta argued, “anarchists recognise that where life is lived in common it is often necessary for the minority to come to accept the opinion of the majority. When there is an obvious need or usefulness in doing something and, to do it requires the agreement of all, the few should feel the need adapt to the wishes of the many.” [The Anarchist Revolution, p. 100] The Spanish C.N.T. argued in its vision of Libertarian Communism that:

“Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. … communes … will undertake to adhere to whatever general norms [that] may be majority vote after free debate… The inhabitants of a Commune are to debate their internal problems … among themselves. Whenever problems affecting an entire comarca [district] or province are involved, it must be the Federations [of communes] who deliberate and at every reunion or assembly these may hold all of the Communes are to be represented and their delegates will relay the viewpoints previously approved in their respective Communes … On matters of a regional nature, it will be up to the Regional Federation to put agreements into practice and these agreements will represent the sovereign will of all the region’s inhabitants. So the starting point is the
kind of discipline, not automatic but voluntary and intelligently understood is, and will ever be, necessary whenever a greater number of individuals undertake any kind of collective work or action. Under these circumstances, discipline is simply the voluntary and considered co-ordination of all individual efforts for a common purpose. At the moment of revolution, in the midst of the struggle, there is a natural division of functions according to the aptitude of each, assessed and judged by the collective whole...

“In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and sincere realisation of the will of all ... this is the only true discipline, the discipline necessary for the organisation of freedom. This is not the kind of discipline preached by the State ... which wants the old, routine-like, automatic blind discipline. Passive discipline is the foundation of every despotism.” [Bakunin on Anarchism, pp. 414–5]

Therefore, anarchists see the need to make agreements, to stick by them and to show discipline but we argue that this must be to the agreements we helped to make and subject to our judgement. We reject “centralisation” as it confuses the necessity of agreement with hierarchical power, of solidarity and agreement from below with unity imposed from above as well as the need for discipline with following orders.

12. Why do the SWP make a polemical fetish of “unity” and “democracy” to the expense of common sense and freedom?

The SWP argue that “unity” is essential: those involved. As a necessary complement of our opposition to authority is support for

“direct action.” This means that people, rather than looking to leaders or politicians to act for them, look to themselves and the own individual and collective strength to solve their own problems. This also encourages self-liberation, self-reliance and self-confidence as the prevailing culture would be “if we want something sorted out, we have to do it ourselves” — in other words, a “do it yourself” mentality.

Therefore, the positive side of anarchism (which naturally flows from its opposition to authority) results in a political theory which argues that people must control their own struggles, organisations and affairs directly. This means we support mass assemblies and their federation via councils of mandated delegates subject to recall if they break their mandates (i.e. they act as they see fit, i.e. as politicians or bureaucrats, and not as the people who elected them desire). This way people directly govern themselves and control their own lives. It means we oppose the state and support free federations of self-governing associations and communes. It means we oppose capitalism and support workers’ self-management. It means we reject hierarchy, centralism and authoritarian structures and argue for self-managed organisations, built from the bottom up and always accountable to the base. It means we consider the direct control of struggles and movements by those involved as not only essential in the here and now but also essential training for living in a free, libertarian socialist society (for example, workers direct and total control of their strikes and unions trains them to control their workplaces and communities during and after the revolution). It means we oppose hierarchy in all its forms and support free association of equals. In other words, anarchism can generally be taken to mean support for self-government or self-management.

By discussing only the negative side of anarchism, by missing out what kinds of authority anarchists oppose, the SWP ensure that
these aspects of our ideas are not mentioned in their article. For good reason as it puts Marxism in a bad light.

3. Why does mentioning the history of anarchism weaken the SWP’s argument?

The SWP correctly argue that we “live in a world of bullying line managers, petty school rules, oppressive police, and governments that serve the rich and powerful.” However, they trivialise anarchism (and the natural feelings that result from such domination) by stating “[e]veryone who hates that has, at least at times, felt a streak of ‘anarchist’ revolt against authority.” Thus anarchism is presented as an emotional response rather than as valid, coherent intellectual opposition to the state, wage labour, inequality and hierarchical authority in general. But, of course, anarchism is more than this, as the SWP acknowledge:

“Anarchism, however, is more than a personal reaction against the tyrannies of capitalism. It is a set of political beliefs which have been held up as an alternative to the revolutionary socialist ideas of Karl Marx. Anarchist ideas have, on occasion, had a mass influence on movements against capitalism.”

Given that the “revolutionary socialist ideas” of Marx have been proven wrong on numerous occasions while Bakunin’s predictions were proven right, anarchists humbly suggest that anarchism is a valid alternative to Marxism. For example, Bakunin correctly predicted that when “the workers ... send common workers ... to Legislative Assemblies ... The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois ... For men do not make their situations; on the contrary, men are made by them.” [The Basic Bakunin, p. 108] The history
members in turn.” He considered “such a conception of democracy” as “absurd” and saw it as historical necessity that it was replaced by “representative institutions” and “full-time officials.” [Essential Works of Lenin, pp. 162–3] In other words, the Leninist tradition rejects self-management in favour of hierarchical structures in which power is centralised in the hands of “full-time officials” and “representative institutions.”

In contrast, Bakunin argued that trade unions which ended “primitive democracy” and replaced it with representative institutions became bureaucratic and “simply left all decision-making to their committees ... In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership.” The membership become subject to “the arbitrary power” of the committees and “ruled by oligarchs.” In other words, bureaucracy set in and democracy as such was eliminated and while “very good for the committees ... [it was] not at all favourable for the social, intellectual, and moral progress of the collective power” of the workers’ movement. [Bakunin on Anarchism, pp. 246–7] Who was correct can quickly be seen from the radical and pro-active nature of the British trade union leadership. Ironically, the SWP always bemoan trade union bureaucracies betraying workers in struggle yet promote an organisational structure that ensures that power flows to the centre and into the hands of bureaucrats.

At best, Leninism reduces “democracy” to mean that the majority designates its rulers, copied from the model of bourgeois parliamentary democracy. In practice it is drained of any real meaning and quickly becomes a veil thrown over the unlimited power of the rulers. The base does not run the organisation just because once a year it elects delegates who designate the central committee, no more than the people are sovereign in a parliamentary-type republic because they periodically elect deputies who designate the government. That the central committee is designated by a “demo-

of the Marxist Social Democratic Parties across the world proved him right.

Similarly, Bakunin predicted that Marx’s “dictatorship of the proletariat” would become the “dictatorship over the proletariat.” The experience of the Russian Revolution proved him correct — once the Bolshevik party had become the government power became centralised at the top, the workers’ soviets quickly became a cog in the state machinery rubber-stamping the decrees of the Bolshevik government, workers’ control of production by factory committees was replaced by state appointed managers and so on. The “socialist” state quickly became a bureaucratic monster without real control from below (indeed, the Bolsheviks actually disbanded soviets when opposition parties won a majority in them at the start of 1918). The start of the Civil War in May 1918 just made things worse.

The SWP continue by arguing:

“Socialists and anarchists share a hatred of capitalism. They have often fought alongside each other in major battles against the capitalist system. They struggled together in the Europe-wide mass strikes at the end of the First World War and the inspiring Spanish Revolution in 1936, as well as in countless smaller battles today.”

Which is true. They also fail to mention that the mass-strikes at the end of the First World War were defeated by the actions of the Social-Democratic Parties and trade unions. These parties were self-proclaimed revolutionary Marxist organisations, utilising (as Marx had argued) the ballot box and centralised organisations. Unsurprisingly, given the tactics and structure, reformism and bureaucracy had developed within them. When workers took strike action, even occupying their factories in Italy, the bureaucracy of the Social Democratic Parties and trade unions acted to undermine the struggle, isolating workers and supporting capitalism. Indeed, the
German Social Democratic Party (which was, pre-1914, considered the jewel in the crown of Marxism and the best means to refute the anarchist critique of Marxist tactics) actually organised an alliance with the right-wing para-military Freikorps to violently suppress the revolution. The Marxist movement had degenerated into bourgeois parties, as Bakunin predicted.

It is also strange that the SWP mention the “inspiring Spanish Revolution in 1936” as this revolution was mainly anarchist in its “inspiring” features. Workers took over workplaces and the land, organising them under workers’ self-management. Direct democracy was practised by hundreds of thousands of workers in line with the organisational structures of the anarchist union the C.N.T. In contrast, the Russian Revolution saw power become centralised into the hands of the Bolshevik party leadership and workers’ self-management of production was eliminated in favour of one-man management imposed from above (see M. Brinton’s *The Bolsheviks and Workers’ Control* for details).

4. How is the SWP wrong about centralisation?

The SWP continue by arguing that “there are differences between revolutionary socialism and anarchism. Both understand the need for organisation but disagree over what form that organisation takes.” This is a vast step forward in the usual Marxist slander that anarchists reject the need for organisation and so should be welcomed. Unfortunately the rest of the discussion on this issue falls back into the usual swamp of slander.

They argue that “[e]very struggle, from a local campaign against housing privatisation to a mass strike of millions of workers, raises the need for organisation. People come together and need mechanisms for deciding what to do and how to do it.” They continue by arguing that “Anarchism says that organisation has nothing to do with centralisation. For anarchism, any form of centralisation is a type of authority, which is oppressive.”

However, anarchists also argue that the revolutionary organisation must also reflect the type of society we want. Hence an anarchist federation must be self-organised from below, rejecting hierarchy and embracing self-management. For anarchists an organisation is not democratic because it debates, as the SWP claims. It is democratic only if the membership actually decides the policy of the organisation. That the SWP fail to mention this is significant and places doubt on whether their organisation is democratic in fact (as we indicate in section 22, the SWP may debate but it is not democratic). The reason why democracy in the SWP may not be all that it should be can be found in their comment that:

“It is also centralised, as it arrives at decisions which everyone acts on.”

However, this is not centralisation. Centralisation is when the centre decides everything and the membership follow those orders. That the membership may be in a position to elect those at the centre does not change the fact that the membership is simply expected to follow orders. It is the organisational principle of the army or police, not of a free society. That this is the principle of Leninism can be seen from Trotsky’s comment that the “statues [of the party] should express the leadership’s organised distrust of the members, a distrust manifesting itself in vigilant control from above over the Party.” [quoted by M. Brinton, *The Bolsheviks and Workers’ Control*, p. xi] Thus the centre controls the membership, not vice versa.

In *What is to be Done?* Lenin discussed “the confusion of ideas concerning the meaning of democracy.” He dismisses the idea of self-management as “Primitive Democracy.” He uses the example of the early British unions, where workers “thought that it was an indispensable sign of democracy for all the members to do all the work of managing the unions; not only were all questions decided by the vote of all the members, but all the official duties were fulfilled by all the
olutions and so on. In Britain there are three national anarchist federations (the Anarchist Federation, the Solidarity Federation and the Class War Federation) as well as numerous local groups and regional federations. The aim of these organisations is to try and influence the class struggle towards anarchist ideas (and, equally important, learn from that struggle as well — the “program of the Alliance [Bakunin’s anarchist group], expanded to keep pace with developing situations.” [Bakunin, *Bakunin on Anarchism*, p. 406]).

The need for a specific political organisation is one most anarchists would agree with.

Thus few anarchists are believers in spontaneous revolution and see the need for anarchists to organise as anarchists to spread anarchist ideas and push the struggle towards anarchist ends (smashing the state and capitalism and the creation of a free federation of workers’ councils and communes) via anarchist tactics (direct action, solidarity, general strikes, insurrection and encouraging working class self-organisation and self-management).

Hence the need for specific anarchist organisations:

> “The Alliance [Bakunin’s anarchist group] is the necessary complement to the International [the revolutionary workers’ movement]. But the International and the Alliance, while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses ... regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance ... tries to give these masses a really revolutionary direction. The programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International.” [Bakunin on Anarchism, p. 157]

This is true, anarchists do argue that centralisation places power at the centre, so disempowering the people at the base of an organisation. In order to co-ordinate activity anarchists propose federal structures, made up on mandated delegates from autonomous assemblies. In this way, co-ordination is achieved while ensuring that power remains at the bottom of the organisation, in the hands of those actually fighting or doing the work. Federalism does not deny the need to make agreements and to co-ordinate decisions. Far from it — it was put forward by anarchists precisely to ensure co-ordination of joint activity and to make agreements in such a way as to involve those subject to those decisions in the process of making them. Federalism involves people in managing their own affairs and so they develop their initiative, self-reliance, judgement and spirit of revolt so that they can act intelligently, quickly and autonomously during a crisis or revolutionary moment and show solidarity as and when required instead of waiting for commands from above as occurs with centralised movements. In other words, federalism is the means to combine participation and co-ordination and to create an organisation run from the bottom up rather than the top-down. As can be seen, anarchists do not oppose co-ordination and co-operation, making agreements and implementing them together.

After mentioning centralisation, the SWP make a massive jump of logic and assert:

> “But arguing with someone to join a struggle, and trying to put forward tactics and ideas that can take it forward are attempts to lead.

> “It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place. We always need to take the best ideas and act on them in a united way.”
Placing ideas before a group of people is a “lead” but it is not centralisation. Moreover, anarchists are not against making agreements! Far from it. The aim of federal organisation is to make agreements, to co-ordinate struggles and activities. This does not mean ignoring agreements. As Kropotkin argued, the commune “cannot any longer acknowledge any superior; that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with other Communes.” [No Gods, No Masters, vol. 1, p. 259] This vision was stressed in the C.N.T.’s resolution on Libertarian Communism made in May, 1936, which stated that “the foundation of this administration will be the Commune. These Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. The right of autonomy is not to preclude the duty of implementation of agreements regarding collective benefits.” [quoted by Jose Piersats, The C.N.T. in the Spanish Revolution, p. 68] In the words of Malatesta:

“But an organisation, it is argued, presupposes an obligation to co-ordinate one’s own activities with those of others; thus it violates liberty and fetters initiative. As we see it, what really takes away liberty and makes initiative impossible is the isolation which renders one powerless. Freedom is not an abstract right but the possibility of acting … it is by co-operation with his fellows that man finds the means to express his activity and his power of initiative.” [Life and Ideas, pp. 86–7]

Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory and principles. Rather, we see such cooperation and co-ordination, generated from below upwards, as an essential means of exercising and protecting freedom.

The SWP’s comment against anarchism is a typical Marxist position. The assumption seems to be that “centralisation” or “cen-

collective struggle of the workers against the bosses …
As soon as he begins to take an active part in this wholly material struggle, … Socialism replaces religion in his mind… through practice and collective experience … the progressive and development of the economic struggle will bring him more and more to recognise his true enemies … The workers thus enlisted in the struggle will necessarily ... recognise himself to be a revolutionary socialist, and he will act as one.” [The Basic Bakunin, p. 102–3]

Therefore anarchists are well aware of the importance of struggle and propaganda in winning people to anarchist ideas. No anarchist has ever argued otherwise.

11. Why do anarchists oppose the Leninist “revolutionary party”?

The SWP argue that:

“So there is always a battle of ideas within the working class. That is why political organisation is crucial. Socialists seek to build a revolutionary party not only to try to spread the lessons from one struggle to another.

“They also want to organise those people who most clearly reject capitalism into a force that can fight for their ideas inside the working class as a whole. Such a party is democratic because its members constantly debate what is happening in today’s struggles and the lessons that can be applied from past ones.”

That, in itself, is something most anarchists would agree with. That is why they build specific anarchist organisations which discuss and debate politics, current struggles, past struggles and revo-
“These two pressures mean workers’ ideas are uneven. Some see through the bosses’ lies. Others can be largely taken in. Most part accept and part reject capitalist ideas. The overall consciousness of the working class is always shifting. People become involved in struggles which lead them to break with pro-capitalist ideas.”

That is very true and anarchists are well aware of it. That is why anarchists organise groups, produce propaganda, argue their ideas with others and encourage direct action and solidarity. We do so because we are aware that the ideas within society are mixed and that struggle leads people to break with pro-capitalist ideas. To quote Bakunin:

“the germs of [socialist thought] … [are to] be found in the instinct of every earnest worker. The goal … is to make the worker fully aware of what he wants, to unjam within him a stream of thought corresponding to his instinct … What impedes the swifter development of this salutary though among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? … they are insufficient … [and] who will conduct this propaganda? … [The] workers’ world … is left with but a single path, that of emancipation through practical action … It means workers’ solidarity in their struggle against the bosses. It means trade-unions, organisation … To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the
would be “freely organised from the bottom up.” ["Letters to a Frenchman", Bakunin on Anarchism, p. 196, p. 206 and p. 207] In this he repeated his earlier arguments concerning social revolution — claims Engels was well aware of, just as he was well aware of the statements by Bakunin in his "Letters to a Frenchman." In other words, Engels deliberately lied about Bakunin’s political ideas. It appears that the SWP is simply following the Marxist tradition in their article.

5. Why does the SWP’s “picket line is ‘authoritarian’” argument totally miss the point?

They continue by arguing:

"Not all authority is bad. A picket line is ‘authoritarian.’ It tries to impose the will of the striking workers on the boss, the police and on any workers who may be conned into scabbing on the strike."

What should strike the reader about this example is its total lack of class analysis. In this the SWP follow Engels. In his essay On Authority, Engels argues that a “revolution is certainly the most authoritarian thing there is; it is the act whereby one part of the population imposes its will upon the other part by means of rifles, bayonets and cannon—authoritarian means, if such there be at all; and if the victorious party does not want to have fought in vain, it must maintain this rule by means of the terror its arms inspire in the reactionaries.” [The Marx-Engels Reader, p. 733]

However, such an analysis is without a class basis and so will, by necessity, mislead the writer and the reader. Engels argues that revolution is the imposition by “one part of the population” on another. Very true — but Engels fails to indicate the nature of class society and, therefore, of a social revolution. In a class society “one part of the population” constantly “imposes its will upon the other part” centralised movement inevitably produces bureaucracy and a tendency for leaders to become conservative and compromised.

All in all, rather than refute anarchism the experience of the Spanish Revolution confirms it. The state needs to be destroyed, not ignored or collaborated with, and replaced by a federation of workers’ councils organised from the bottom-up. By failing to do this, the CNT did ensure the defeat of the revolution but it hardly indicates a failure of anarchism. Rather it indicates a failure of anarchists who made the wrong decision in extremely difficult circumstances.

Obviously it is impossible to discuss the question of the C.N.T. during the Spanish Revolution in depth here. We address the issue of Marxist interpretations of Spanish Anarchist history in the appendix "Marxism and Spanish Anarchism." Section 20 of that appendix discusses the C.N.T.’s decision to collaborate with the Republican State against Franco as well as its implications for anarchism.

10. Do anarchists ignore the fact that ideas change through struggle?

The SWP try and generalise from these experiences:

“In different ways, the lessons of Russia and Spain are the same. The organisational questions thrown up in particular struggles are critical when it comes to the working class challenging capitalism.

“Workers face conflicting pressures. On the one hand, they are forced to compete in the labour market. They feel powerless, as an individual, against the boss.

“That is why workers can accept the bosses’ view of the world. At the same time constant attacks on workers’ conditions create a need for workers to unite and fight back together.
itics in favour of collaborating with other anti-fascist unions and parties against Franco.

Simply put, either the workers’ have the power or the leaders do. To confuse the rule of the party with workers’ self-management of society lays the basis for party dictatorship (as happened in Russia). Sadly, the SWP do exactly this and fail to learn the lessons of the Russian Revolution.

Therefore, the SWP’s argument against anarchism is logically flawed. Yes, the CNT did not take state power. However, neither did it destroy the state, as anarchist theory argues. Rather it ignored the state and this was its undoing. Thus the SWP attacks anarchism for anarchists failing to act in an anarchist manner! How strange.

One last point. The events of the Spanish Revolution are important in another way for evaluating anarchism and Marxism. Faced with the military coup, the Spanish government did nothing, even refusing to distribute arms to the workers. The workers, however, took the initiative, seized arms by direct action and took to the streets to confront the army. Indeed, the dynamic response of the CNT members to Franco’s coup compared to the inaction of the Marxist inspired German workers movement faced with Hitler’s taking of power presents us with another example of the benefits of federalism against centralism, of anarchism against Marxism. The federal structure of the CNT had accustomed its members to act for themselves, to show initiative and act without waiting for orders from the centre. The centralised German system did the opposite.

The SWP will argue, of course, that the workers were mislead by their leaders (“who were only Marxists in name only”). The question then becomes: why did they not act for themselves? Perhaps because the centralised German workers’ movement had eroded their members initiative, self-reliance and spirit of revolt to such a degree that they could no longer act without their leaders’ instructions? It may be argued that with better leaders the German workers would have stopped the Nazis, but such a plea fails to understand why better leaders did not exist in the first place. A

all the time. In other words, the ruling class imposes its will on the working class everyday in work by the hierarchical structure of the workplace and in society by the state. Discussing the “population” as if it was not divided by classes, and so subject to specific forms of authoritarian social relationships, is liberal nonsense. Once we recognise that the “population” in question is divided into classes we can easily see the fallacy of Engels argument. In a social revolution, the act of revolution is the overthrow of the power and authority of an oppressing and exploiting class by those subject to that oppression and exploitation. In other words, it is an act of liberation in which the hierarchical power of the few over the many is eliminated and replaced by the freedom of the many to control their own lives. It is hardly authoritarian to destroy authority! Thus a social revolution is, fundamentally, an act of liberation for the oppressed who act in their own interests to end the system in which "one part of population imposes its will upon the other" everyday.

This applies equally to the SWP’s example of a picket line. Is a picket line really authoritarian because it tries to impose its will on the boss, police or scabs? Rather, is it not defending the workers’ freedom against the authoritarian power of the boss and their lackeys (the police and scabs)? Is it “authoritarian” to resist authority and create a structure — a strike assembly and picket line — which allows the formally subordinated workers to manage their own affairs directly and without bosses? Is it “authoritarian” to combat the authority of the boss, to proclaim your freedom and exercise it? Of course not. The SWP are playing with words.

Needless to say, it is a large jump from the “authority” of a strikers’ assembly to that of a highly centralised “workers’ state” but that, of course, is what the SWP wish the reader to do. Comparing a strikers’ assembly and picket line — which is a form of self-managed association — with a state cannot be done. It fails to recognise the fundamental difference. In the strikers’ assembly and picket line the strikers themselves decide policy and do not delegate power away. In a state, power is delegated into the hands
of a few who then use that power as they see fit. This by necessity disempowers those at the base, who are turned into mere electors and order takers. Such a situation can only spell death of a social revolution, which requires the active participation of all if it is to succeed. It also exposes the central fallacy of Marxism, namely that it claims to desire a society based on the participation of everyone yet favours a form of organisation — centralisation — that precludes that participation.

6. Why are the SWP’s examples of “state functions” wrong?

The SWP continue their diatribe against anarchism:

“Big workers’ struggles throw up an alternative form of authority to the capitalist state. Militant mass strikes throw up workers’ councils. These are democratic bodies, like strike committees. But they take on organising ‘state functions’ — transport, food distribution, defence of picket lines and workers’ areas from the police and army, and so on.”

To state the obvious, transportation and food distribution are not “state functions.” They are economic functions. Similarly, defence is not a “state function” as such — after all, individuals can and do defend themselves against aggression, strikers organise themselves to defend themselves against cops and hired strike breakers, and so on. This means that defence can be organised in a libertarian fashion, directly by those involved and based on self-managed workers’ militias and federations of free communes. It need not be the work of a state nor need it be organised in a statist (i.e. hierarchical) fashion like, for example, the current bourgeois state and military or the Bolshevik Red Army (where the election of officers, soldiers’ councils and self-governing assemblies were abolished by

Thirdly, yes, the Catalan government did offer to stand aside for the C.N.T. and the C.N.T. rejected the offer. Why? The SWP claim that “the C.N.T. believed that any form of state was wrong” and that is why it did not take power. That is true, but what the SWP fail to mention is more important. The C.N.T. refused to implement libertarian communism after the defeat of the army uprising in July 1936 simply because it did not want to be isolated nor have to fight the republican government as well as the fascists (needless to say, such a decision, while understandable, was wrong). But such historical information would confuse the reader with facts and make their case against anarchism less clear-cut.

Ironically the SWP’s attack on the CNT indicates well the authoritarian basis of its politics and its support of soviets simply as a means for the party leaders to take power. After all, they obviously consider it a mistake for the “leaders of the CNT” to refuse power. Trotsky made the same point, arguing that:

“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.” [Stalinism and Bolshevism]

Yet the SWP say they, and their political tradition, are for “workers’ power” yet, in practice, they clearly mean that power will be seized, held and exercised by the workers’ leaders. A strange definition of “workers’ power,” we must admit but one that indicates well the differences between anarchists and Marxists. The former aim for a society based on workers’ self-management. The latter desire a society in which workers’ delegate their power to control society (i.e. their own lives) to the “leaders,” to the “workers’ party” who will govern on their behalf. The “leaders” of the CNT quite rightly rejected such this position — unfortunately they also rejected the anarchist position at the same time and decided to ignore their pol-
Firstly, we have to point out that the C.N.T. did lead a workers’ uprising in 1936 but in was in response to a military coup and occurred all across Spain. The army was not “fighting against Franco’s fascist forces” but rather had been the means by which Franco had tried to impose his version of fascism. Indeed, as the SWP know fine well, one of the first acts the CNT did in the Spanish Revolution was to organise workers’ militias to go fight the army in those parts of Spain in which the unions (particularly the CNT which lead the fighting) did not defeat it by street fighting. Thus the C.N.T. faced the might of the Spanish army rising in a fascist coup. That, as we shall see, influenced its decisions.

By not mentioning (indeed, lying about) the actual conditions the CNT faced in July 1936, the SWP ensure the reader cannot understand what happened and why the CNT made the decisions it did. Instead the reader is encouraged to think it was purely a result of anarchist theory. Needless to say, the SWP have a fit when it is suggested the actions of the Bolsheviks during the Russian Civil War were simply the result of Leninist ideology and unaffected by the circumstances they were made in. The logic is simple: the mistakes of Marxists are never their fault, never derive from Marxist politics and are always attributable to circumstances (regardless of the facts); the mistakes of anarchists, however, always derive from their politics and can never be explained by circumstances (regardless of counter-examples and those circumstances). Once this is understood, the reason why the SWP distorted the history of the Spanish Revolution becomes clear.

Secondly, anarchism does not think that the “capitalist state machine” will “simply disappear.” Rather, anarchists think that (to quote Kropotkin) the revolution “must smash the State and replace it with the Federation [of workers’ associations and communes] and it will act accordingly.” [No Gods, No Masters, vol. 1, p. 259] In other words, the state does not disappear, it is destroyed and replaced with a new, libertarian, form of social structure. Thus the SWP misrepresents anarchist theory.

Trotsky in favour of officers appointed from above). So “defence” is not a state function.

What is a “state function” is imposing the will of a minority — the government, the boss, the bureaucrat — onto the population via professional bodies such as the police and military. This is what the Bolshevik state did, with workers’ councils turned into state bodies executing the decrees of the government and using a specialised and hierarchical army and police force to do so. The difference is important. Luigi Fabbri sums up it well:

“The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists ... as the foes of all organisation and all co-ordinated struggle. We, on the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders.

“Any governing body is an impediment to the real organisation of the broad masses, the majority. Where a government exists, then the only really organised people are the minority who make up the government; and ... if the masses do organise, they do so against it, outside it, or at the very least, independently of it. In ossifying into a government, the revolution as such would fall apart, on account of its awarding that government the monopoly of organisation and of the means of struggle.” [“Anarchy and ‘Scientific’ Communism”, in The Poverty of Statism, pp. 13–49, Albert Meltzer (ed.), p. 27]
Thus the difference between anarchists and Leninists is not whether the organisations workers’ create in struggle will be the framework of a free society (or the basis of the Commune). Indeed, anarchists have been arguing this for longer than Marxists have. The difference is whether these organisations remain self-managed or whether they become part of a centralised state. In the words of Camillo Berneri:

“The Marxists ... foresee the natural disappearance of the State as a consequence of the destruction of classes by the means of ‘the dictatorship of the proletariat,’ that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but the propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration-corporate organisations [i.e. industrial unions], communal institutions, both regional and national-freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrational centralisation.”

[“Dictatorship of the Proletariat and State Socialism”, Cienfuegos Press Anarchist Review, no. 4, p. 52]

So, anarchists agree, in “big workers’ struggles” organisation is essential and can form an alternative to the capitalist state. However, such a framework only becomes an “authority” when power is transferred from the base into the hands of an executive committee at the top. Strike and community assemblies, by being organs of state capitalism and any appropriation of popular slogans was always under the firm understanding that the Bolshevik interpretation of these ideas is what will be introduced.

Therefore the SWP’s attempt to re-write Russian History. The actual events of the Russian Revolution indicate well the authoritarian and state-capitalist nature of Leninist politics.

9. How do the SWP re-write the history of the Spanish Revolution?

The SWP, after re-writing Russian history, move onto Spanish history:

“It did not happen in Spain in 1936. The C.N.T., a trade union heavily influenced by anarchist ideas, led a workers’ uprising in the city of Barcelona that year. Workers’ councils effectively ran the city.

“But the capitalist state machine did not simply disappear. The government and its army, which was fighting against Franco’s fascist forces, remained, although it had no authority in Barcelona.

“The government even offered to hand power over to the leaders of the C.N.T. But the C.N.T. believed that any form of state was wrong. It turned down the possibility of forming a workers’ state, which could have broken the fascists’ coup and the capitalist state.

“Worse, it accepted positions in a government that was dominated by pro-capitalist forces.

“That government crushed workers’ power in Barcelona, and in doing so fatally undermined the fight against fascism.”

It is hard to know where to start with this distortion of history.
1918 along with granting “individual executives dictatorial power (or 'unlimited' powers)” and that “the appointment of individuals, dictators with unlimited powers” was, in fact, “in general compatible with the fundamental principles of Soviet government” simply because “the history of revolutionary movements” had “shown” that “the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes.” He notes that “[u]ndoubtedly, the dictatorship of individuals was compatible with bourgeois democracy.” [The Immediate Tasks of the Soviet Government, p. 34 and p. 32]

He confused state capitalism with socialism. “State capitalism,” he wrote, “is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps.” [Collected Works, vol. 24, p. 259] He argued that socialism “is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.” [The Threatening Catastrophe and how to avoid it, p. 37]

As Peter Arshinov argued, a “fundamental fact” of the Bolshevik revolution was “that the workers and the peasant labourers remained within the earlier situation of ‘working classes’ — producers managed by authority from above.” He stressed that Bolshevik political and economic ideas may have “remov[ed] the workers from the hands of individual capitalists” but they “delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital ... Wage labour has remained what it was before, expect that it has taken on the character of an obligation to the State. ... It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism.” [The History of the Makhnovist Movement, p. 35 and p. 71] Therefore, looking at Bolshevism in power and in theory it is clear that it is not, in fact, “anti-capitalist” but rather in favour of self-management, are not an “authority” in the same sense that the state is or the boss is. Rather, they are the means by which people can manage their own struggles (and so affairs) directly, to govern themselves and so do without the need for hierarchical authority.

The SWP, in other words, confuse two very different things.

7. What is ironic about the SWP’s comment that workers’ councils must “break up” the capitalist state?

After misunderstanding basic concepts, the SWP treat us to a history lesson:

“Such councils were a feature of the Russian revolutions of 1905 and 1917, the German Revolution after the First World War, the Spanish Revolution of 1936, and many other great struggles. Socialists argue that these democratic workers’ organisations need to take power from the capitalists and break up their state.”

Anarchists agree. Indeed, they argued that workers’ organisations should “break up” and replace the state long before Lenin discovered this in 1917. For example, Bakunin argued in the late 1860s that the International Workers’ Association, an “international organisation of workers’ associations from all countries”, would “be able to take the revolution into its own hands” and be “capable of replacing this departing political world of States and bourgeoisie.” The “natural organisation of the masses” was “organisation by trade association,” in other words, by unions, “from the bottom up.” The means of creating socialism would be “emancipation through practical action ... workers’ solidarity in their struggle against the bosses. It means trades unions, organisation” The very process of struggle would create the framework of a new society, a federation of workers’ councils, as “strikes indicate a certain collective strength already, a certain understanding among the workers ... each strike
becomes the point of departure for the formation of new groups.” He stresses the International was a product of the class war as it “has not created the war between the exploiter and the exploited; rather, the requirements of that war have created the International.” Thus the seeds of the future society are created by the class struggle, by the needs of workers to organise themselves to resist the boss and the state. [The Basic Bakunin, p. 110, p. 139, p. 103 and p. 150]

He stressed that the revolution would be based on federations of workers’ associations, in other words, workers’ councils:

“the federative alliance of all working men’s associations … [will] constitute the Commune … [the] Communal Council [will be] composed of … delegates … vested with plenary but accountable and removable mandates… all provinces, communes and associations … by first reorganising on revolutionary lines … [will] constitute the federation of insurgent associations, communes and provinces … [and] organise a revolutionary force capable defeating reaction … [and for] self-defence … [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations … organised from the bottom upwards by means of revolutionary delegation…” [Michael Bakunin: Selected Writings, pp. 170–2]

And:

“The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.” [Op. Cit., p. 206]

Thus it is somewhat ironic to have Leninists present basic anarchist ideas as if they had thought of them first!

by the state). This process is documented in Maurice Brinton’s The Bolsheviks and Workers’ Control, who also indicates the clear links between Bolshevik practice and Bolshevik ideology as well as how both differed from popular activity and ideas. Hence the comments by Russian Anarchist Peter Arshinov:

“Another no less important peculiarity is that [the] October [revolution of 1917] has two meanings — that which the working’ masses who participated in the social revolution gave it, and with them the Anarchist-Communists, and that which was given it by the political party [the Marxist-Communists] that captured power from this aspiration to social revolution, and which betrayed and stifled all further development. An enormous gulf exists between these two interpretations of October. The October of the workers and peasants is the suppression of the power of the parasite classes in the name of equality and self-management. The Bolshevik October is the conquest of power by the party of the revolutionary intelligentsia, the installation of its ‘State Socialism’ and of its ‘socialist’ methods of governing the masses.” [The Two Octobers]

The members of the “anti-capitalist” movements should bear that in mind when the SWP uses the same rhetoric as they do. Appearances are always deceptive when it comes to Leninists. The history of the Russian Revolution indicates that while Leninists like the SWP can use the same words as popular movements, their interpretation of them can differ drastically.

Take, for example, the expression “anti-capitalist.” The SWP will claim that they, too, are “anti-capitalist” but, in fact, they are only opposed to “free market” capitalism and actually support state capitalism. Lenin, for example, argued that workers’ must “unquestioningly obey the single will of the leaders of labour” in April
not the Bolshevik Party, which raised the issue of workers’ self-management and control during the Russian Revolution. As historian S.A. Smith correctly summarises, the “factory committees launched the slogan of workers’ control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up.” [Red Petrograd, p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers’ raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a “trade union conscious” in this and so many other cases.

Therefore, rather than being at the forefront of struggle and ideas, the Bolsheviks were, in fact, busy trying to catch up. History has repeated itself in the anti-capitalist demonstrations. We should point out that anarchists have supported the idea of workers’ self-management of production since 1840 and, unsurprisingly enough, were extremely active in the factory committee movement in 1917.

The second lesson to be gained from the Russian Revolution is that while the Bolsheviks happily (and opportunistically) took over popular slogans and introduced them into their rhetoric, they rarely meant the same thing to the Bolsheviks as they did to the masses. For example, as noted above, the Bolsheviks took up the slogan “All Power to the Soviets” but rather than mean that the Soviets would manage society directly they actually meant the Soviets would delegate their power to a Bolshevik government which would govern society in their name. Similarly with the term “workers’ control of production.” As S.A. Smith correctly notes, Lenin used “the term ['workers' control'] in a very different sense from that of the factory committees.” In fact Lenin’s “proposals ... [were] thoroughly statist and centralist in character, whereas the practice of the factory committees was essentially local and autonomous.” [Op. Cit., p. 154] Once in power, the Bolsheviks systematically undermined the popular meaning of workers’ control and replaced it with their own, statist conception. This ultimately resulted in the introduction of “one-man management” (with the manager appointed from above

Then again, the ability of the Marxists to steal anarchist ideas and claim them as their own is well know. They even rewrite history to do so. For example, the SWP’s John Rees in the essay “In Defence of October” argues that “since Marx’s writings on the Paris Commune” a “cornerstone of revolutionary theory” was “that the soviet is a superior form of democracy because it unifies political and economic power.” [International Socialism, no. 52, p. 25] Nothing could be further from the truth, as Marx’s writings on the Paris Commune prove.

The Paris Commune, as Marx himself argued, was “formed of the municipal councillors, chosen by universal suffrage in the various wards of the town.” [“The Civil War in France”, Selected Works, p. 287] As Marx made clear, it was definitely not based on delegates from workplaces and so could not unify political and economic power. Indeed, to state that the Paris Commune was a soviet is simply a joke, as is the claim that Marxists supported soviets as revolutionary organs to smash and replace the state from 1871. In fact Marxists did not subscribe to this “cornerstone of revolutionary theory” until 1917 when Lenin argued that the Soviets would be the best means of ensuring a Bolshevik government.

Indeed the only political movement which took the position Rees falsely ascribes to Marxism was anarchism. This can be clearly seen from Bakunin’s works, a few representative quotes we have provided above. Moreover, Bakunin’s position dates, we must stress, from before the Paris Commune. This position has been argued by revolutionary anarchists ever since — decades before Marxists did.

Similarly, Rees argues that “the socialist revolution must counterpose the soviet to parliament ... because it needs an organ which combines economic power — the power to strike and take control of the workplaces — with an insurrectionary bid for political power, breaking the old state.” [Ibid.] However, he is just repeating anarchist arguments made decades before Lenin’s temporary conversion to
the soviets. In the words of the anarchist Jura Federation (written
in 1880):

“The bourgeoisie’s power over the popular masses springs
from economic privileges, political domination and the
enshrining of such privileges in the laws. So we must
strike at the wellsprings of bourgeois power, as well as
its various manifestations.

“The following measures strike us as essential to the wel-
fare of the revolution, every bit as much as armed strug-
gle against its enemies:

“The insurgents must confiscate social capital, landed es-
tates, mines, housing, religious and public buildings, in-
struments of labour, raw materials, gems and precious
stones and manufactured products:

“All political, administrative and judicial authorities are
to be abolished.

“… What should the organisational measures of the rev-
olution be?

“Immediate and spontaneous establishment of trade
bodies: provisional assumption by those of ... social
capital ...: local federation of a trades bodies and
labour organisation:

“Establishment of neighbourhood groups and federa-
tions of same ...

[...]

“[T]he federation of all the revolutionary forces of the in-
surgent Communes ... Federation of Communes and or-
ganisation of the masses, with an eye to the revolution’s
enduring until such time as all reactionary activity has
been completely eradicated.

and that soviet was not even in permanent session). As Russian
Anarchist Voline made clear “for, the anarchists declared, if ‘power’
really should belong to the soviets, it could not belong to the Bolshevik
Party, and if it should belong to that Party, as the Bolsheviks envis-
gaged, it could not belong to the soviets.” [The Unknown Revolu-
tion, p. 213] In the words of Kropotkin:

“The idea of soviets ... councils of workers and peas-
ants ... controlling the economic and political life of
the country is a great idea. All the more so, since it is
necessarily follows that these councils should be com-
posed of all who take part in the real production of
national wealth by their own efforts.

“But as long as the country is governed by a party dicta-
torship, the workers’ and peasants’ councils evidently
lose their entire significance. They are reduced to the
passive rule formerly played by the ‘States General,’
when they were convoked by the king and had to com-
bat an all-powerful royal council.” [Kropotkin’s Rev-
olutionary Pamphlets, pp. 254–5]

In other words, the workers’ councils took power in name only.
Real power rested with the central government and the workers’
councils become little more than a means to elect the government.
Rather than manage society directly, the soviets simply became a
transmission belt for the decrees and orders of the Bolshevik party.
Hardly a system to inspire anyone.

However, the history of the Russian Revolution has two im-
portant lessons for members of the various anti-globalisation and
anti-capitalist groups. Firstly, as we noted in section 1, is usually
miles behind the class struggle and the ideas developed in it. As an-
other example, we can point to the movement for workers’ control
and self-management that developed around the factory commit-
tees during the summer of 1917. It was the workers themselves,
just provided “the legal cover” for the Bolshevik plans rather than a desire to see the Soviets actually start managing society. [The Lessons of October]

In 1920, he argued that “[w]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only be means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class these is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Terrorism and Communism, p. 109]

In 1937 he continued this theme by arguing that “the proletariat can take power only through its vanguard.” Thus, rather than the working class as a whole “seizing power”, it is the “vanguard” which takes power — “a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society.” He mocked the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Stalinism and Bolshevism]

As can be seen, over a 17 year period Trotsky argued that it was the party which ruled, not the councils. The workers’ councils became little more than rubber-stamps for the Bolshevik government (and not even that, as the central government only submitted a fraction of its decrees to the Central Executive of the national soviet,

[...]

“Once trade bodies have been established, the next step is to organise local life. The organ of this life is to be the federation of trades bodies and it is this local federation which is to constitute the future Commune.” [No Gods, No Masters, vol. 1, pp. 246–7]

As can be seen, long before Lenin’s turn towards the soviets as a means of the Bolsheviks taking power, anarchists, not Marxists, had argued that we must counterpose the council of workers’ delegates (by trade in the case of the Jura federation, by workplace in the case of the later anarcho-syndicalist unions, anarchist theory and the soviets). Anarchists clearly saw that, to quote Bakunin, “[n]o revolution could succeed ... today unless it was simultaneously a political and a social revolution.” [Op. Cit., p. 141] Unlike Marx, who clearly saw a political revolution (the conquest of state power) coming before the economic transformation of society (“The political rule of the producer cannot coexist with the perpetuation of his social slavery. The Commune was therefore to serve as a lever for uprooting the economical foundations upon which rests the existence of classes and therefore of class-rule.” [Marx, Op. Cit., p. 290]). This is why anarchists saw the social revolution in terms of economic and social organisation and action as its first steps were to eliminate both capitalism and the state.

Rees, in other words, is simply stating anarchist theory as if Marxists have been arguing the same thing since 1871!

Moreover, anarchists predicted other ideas that Marx took from the experience of the Paris Commune. Marx praised the fact that each delegate to the Commune was “at any time revocable and bound by the mandat imperatif (formal instructions) of his constituents ... [and so] strictly responsible agents.” [Op. Cit., p. 288] Anarchists had held this position a number of years before the Commune introduced it. Proudhon was arguing in 1848 for “universal suffrage and as a consequence of universal suffrage, we want
implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.” [No Gods, No Masters, vol. 1, p. 63] We find Bakunin arguing exactly the same. For example, in 1868 he wrote that the “Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times.” (Op. Cit., p. 155). In addition, the similarities with the Commune’s political ideas and Proudhon’s are clear, as are the similarities between the Russian Soviets and Bakunin’s views on revolution.

So, as well as predicting the degeneration of social democracy and the Russian revolution, anarchists have also predicted such key aspects of revolutionary situations as organising on the basis of workplace and having delegates mandated and subject to instant recall. Such predictions flow from taking part in social movements and analysing their tendencies. Moreover, a revolution is the resisting of current authorities and an act of self-liberation and so its parallels with anarchism are clear. As such the class struggle, revolutionary movements and revolutions have a libertarian basis and tendencies and, therefore, it is unsurprising that anarchist ideas have spontaneously developed in them. Thus we have a two way interaction between ideas and action. Anarchist ideas have been produced spontaneously by the class struggle due to its inherent nature as a force confronting authority and its need for self-activity and self-organisation. Anarchism has learned from that struggle and influenced it by its generalisations of previous experiences and its basis in opposing hierarchy. Anarchist predictions, therefore, come as no surprise.

Therefore, Marxists have not only been behind the class struggle itself, they have also been behind anarchism in terms of practical ideas on a social revolution and how to organise to transform society. While anarchist ideas have been confirmed by the class struggle, Marxist ones have had to be revised to bring them closer to the actual state of the struggle and to the theoretical ideas of anarchism. And the SWP have the cheek to present these ideas as if their tradition had thought of them!

Little wonder the SWP fail to present an honest account of anarchism.

8. How do the SWP re-write the history of the Russian Revolution?

Their history lesson continues:

“This happened in Russia in October 1917 in a revolution led by the Bolshevik Party.”

In reality, this did not happen. In October 1917, the Bolshevik Party took power in the name of the workers’ councils, the councils themselves did not take power. This is confirmed by Trotsky, who notes that the Bolshevik Party conference of April 1917 “was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? ... Lenin’s position was this: ... the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through the soviets.” Note, through the soviets not by the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers’ delegates. Moreover, he states that “to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us.” He continued by noting that it was “one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets.” The Soviet Congress
will come about without us trying to create it. As such, Grant’s comments misrepresent the anarchist position.

This can be seen from Bakunin, who argued that the 1848 revolutions failed “for a quite a simple reason: it was rich in instinct and in negative theoretical ideas … but it was still totally devoid of the positive and practical ideas which would have been necessary to build a new system … on the ruins of the bourgeois world. The workers who fought for the emancipation of the people in June were united by instinct, not ideas … This was the principal cause of their defeat.” [Michael Bakunin: Selected Writings, p. 104]

Given that “instinct as a weapon is not sufficient to safeguard the proletariat against the reactionary machinations of the privileged classes,” instinct “left to itself, and inasmuch as it has not been transformed into consciously reflected, clearly determined thought, lends itself easily to falsification, distortion and deceit.” [The Political Philosophy of Bakunin, p. 215] Therefore, the “goal, then, is to make the worker fully aware of what he [or she] wants, to unjam within him [or her] a steam of thought corresponding to his [or her] instinct.” This is done by “a single path, that of emancipation through practical action,” by “workers’ solidarity in their struggle against the bosses,” of “collective struggle of the workers against the bosses.” This would be complemented by socialist organisations “propagandising] its principles.” [The Basic Bakunin, p. 102, p. 103 and p. 109]

Hence the need for anarchists to organise as anarchists:

“The Alliance [Bakunin’s anarchist group] is the necessary complement to the International [the revolutionary workers’ movement]. But the International and the Alliance, while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses … regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance … tries to give these masses a really revolutionary direction. The
deal of flexibility as well. There were several flying columns that moved from intersection to intersection reinforcing barricades and increasing numbers where it looked like police might charge. The largest of these was the Revolutionary Anti-Capitalist Bloc ("the Black Bloc") made up mostly of class-struggle anarchists but included a number of other left libertarians (such as council communists and autonomists). The RACB officially maintained its autonomy within the demonstration and worked with others when and where it could. The affinity groups of the RACB would come to quick decisions on what to do. Often, they would quickly respond to the situation; usually their appearance was enough for the cops to fall back after a few tense moments.

By early afternoon, the various affinity groups manning the blockades were informed that the blockades had failed, and enough delegates had made it inside that the meeting was continuing inside with only a short delay. So the question came of what to do next? There were varying opinions. Some affinity groups favoured maintaining their blockades symbolically as an act of defiance and hoping to slow the dispersion of World Bank/IMF representatives as they left the meeting. Others wished to have a victory march around the area. Others wanted to join the rally. Some wanted to march on the World Bank and try for an occupation. There was no consensus. After much discussion between the affinity groups, a decision was reached.

The RACB was divided between two choices — either join with the rally or march on the Bank. There was a lot of negotiation back and forth between affinity groups. A compromise was reached. The RACB would move to each blockade in order and provide cover for those locked down to unlock and safely merge with the growing march so that attempts could be made the next day do blockade. The march continued to swell as it made its way along the route, eventually merging with the crowd at the permitted demonstration.

Needless to say, the argument for “a revolutionary leadership” with “the perspective of taking power” is hard to combine with his later argument that “the Russian workers, basing themselves on their own strength and organisation, [must] take power into their own hands.” As Grant has argued throughout this excerpt, the idea that the workers should take power themselves is utopian as a Bolshevik style leadership is required to seize power. As Trotsky and Lenin made clear, the working class as a whole cannot exercise the “proletariat dictatorship” — only party dictatorship can ensure the transition from capitalism to communism. In summary, Grant is simply using the old Bolshevik technique of confusing the party with the proletariat.

However, this is besides the point. Grant asserts that anarchists think a revolution can occur spontaneously, without the need for anarchists to organise as anarchists and argue their politics. Needless to say, anarchists do not hold such a position and never have. If we did then anarchists would not write books, pamphlets and leaflets, they would not produce papers and take part in struggles and they would not organise anarchist groups and federations. As we do all that, clearly we do not think that an anarchist society
“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.” [“Stalinism and Bolshevism”]

Clearly, rather than the masses taking power, Trotskyism sees the party (the leaders) having the real power in society. Trotsky stressed this fact elsewhere when he argued that "because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship." [Writings 1936–7, p. 514]

The “anarchist leaders” quite rightly rejected this position, but they also rejected the anarchist one as well. Let us not forget that the anarchist position is the destruction of the state by means of federations of workers associations (see section 3). The CNT refused to do this. Which, of course, means that Grant is attacking anarchist theory in spite of the fact that the CNT ignored that theory!

As we have discussed this issue in depth elsewhere (namely sections I.8.10, I.8.11 and section 20 of the appendix “Marxists and Spanish Anarchism”) we will leave our discussion of the Spanish Revolution to this short summary.

12. Does anarchism believe in spontaneous revolution?

Grant now asserts another erroneous position to anarchism, namely the believe that anarchists believe in spontaneous revolution. He presents the case of the Albanian revolution:

“However, the most crushing answer to anarchism is the fate of the Albanian revolution. The Albanian masses, as the result of the nightmare brought about by the collapse

A decision was made. Perhaps it wasn’t the most militant. Perhaps it did not foresee that the next day would lack the numbers to even attempt a successful blockade. But arrests on the demonstration were kept to a minimum, a large show of strength was put on and strong feelings of solidarity and camaraderie grew. The cops could only control a few square blocks, the rest of the city was ours. And it was a decision that everyone had a part in making, and one that everyone could live with. It’s called self-management, perhaps it isn’t always the fastest method of making decisions, but it is the best one if you desire freedom.

Of course, the last thing the SWP would want to admit is that anarchists led the victory march around Washington D.C. without a permit, without marshals, without many arrests and a minimal amount of violence! Of all the recent demonstrations in the U.S. the black bloc was the largest and most well received at Washington. Moreover, that demonstration showed that decentralised, federal organisation worked in practice. Each affinity group participated in the decision making process and an agreement reached between all involved. Centralisation was not required, no centre imposed the decision. Rather than weaken the protests, decentralisation strengthened it by involving all in the decision making process. Little wonder the SWP re-wrote history.

17. Why does the SWP’s Washington example refute the SWP’s own argument and not anarchism?

However, let us assume that the SWP’s fictional account of the A16 demonstration (see last section) was, in fact, true. What does it actually mean? We must point out its interesting logic. They argue that the protests had a “key organiser” which means they were centralised. They argue that the protestors looked to that person for direction. Unfortunately that person could not come to a “clear decision” and instead handed back decision making to each roadblock. In other words, centralisation failed, not federalism. Moreover, the
state would have had a simple means to destroy the demonstration — arrest the “key organiser.” In a centralised system, without a centre, the whole structure collapses — without someone giving orders, nothing is done.

In a federal structure each roadblock would have sent a delegate to a council to co-ordinate struggle (which, we stress, was what actually did happen). To quote Bakunin, “there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times.” [No Gods, No Masters, vol. 1, p. 155] In the SWP’s version of history, the blockades did not do this and so, unsurprisingly, without organisation, there was confusion. As an argument against anarchism it is useless. So the SWP’s fictional example is an argument against centralisation — of placing decision-making power at the centre. In their story, faced with the task of co-ordinating actions which they had no knowledge of, the “key organiser” could not act and by not having a federal structure, the roadblocks were weakened due to lack of co-ordination. In reality, a federal structure existed within the demonstration, each roadblock and affinity group could take effective action instantly to counter the police, without waiting for instructions from the centre, as well as communicate what has happening to other roadblocks and come to common agreements on what action to take. The Washington demonstration — like the other anti-capitalist demonstrations — showed the effectiveness of anarchist principles, of decentralisation and federalism from the bottom up.

So the SWP’s analysis of the Washington demonstration is faulty on two levels. Firstly, their account is not accurate. The demonstration was organised in a decentralised manner and worked extremely well. Secondly, even if their account was not fiction, it proves the failure of centralisation, not federalism.

They draw a lesson from their fictional account:

“The anarchist workers of the CNT played a heroic role in the struggle against fascism. In July 1936, they rose up and stormed the barracks armed with just sticks and knives and a few old hunting rifles, and beat the fascists. They set up soviets and established a workers’ militia and workers’ control in the factories. The CNT and the POUM (a centrist party led by ex-Trotskyists) were the only power in Barcelona. Soon the whole of Catalonia was in the hands of the workers. The bourgeois President of Catalonia, LLuis Companys, actually invited the CNT to take power! But the anarchist leaders refused to take power, and the opportunity was lost.”

Needless to say, this summary leaves much to be desired. Firstly, there are the factual errors. The offer to the CNT from Companys occurred on July 20th, immediately after the uprising had been defeated in Barcelona. The situation in the rest of Catalonia, never mind Spain, was unknown. This fact is essential to understanding the decisions made by the CNT. Faced with a military coup across the whole of Spain intent on introducing fascism, the outcome of which was unknown, the CNT in Barcelona was in a difficult situation. If it tried to implement libertarian communism then it would have had to fight both the fascist army and the Republican state. Faced with this possibility, the CNT leaders decided to ignore their politics and collaborate with other anti-fascists within the bourgeois state. Needless to say, to fail to indicate the rationale for the CNT’s decision and the circumstances it was made in means to misinform the reader. This does not mean the CNT’s decision was correct, it is just to indicate the extremely difficult circumstances in which it was made.

Secondly, Grant lets the cat out of the bag by admitted that he sees the Spanish Revolution in terms of the anarchist “leaders” taking power. In this he followed Trotsky, who had argued that:
In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.”

Therefore, while anarchists stress the need to organise as anarchists (i.e. into political associations) they reject the need for a “revolutionary party” in the Marxist or Leninist mold. Rather than seeking power on behalf of the masses, anarchist groups work within the mass organisations of the working class and urge them to take and exercise power directly, without governments and without hierarchy. We seek to win people over to our ideas and, as such, we work with others as equals using debate and discussion to influence the class struggle (see section J.3.6 for fuller details and a discussion of how this differs from the Trotskyist position).

Therefore, Grant’s whole argument is flawed. Anarchists do not reject “leadership,” they reject hierarchical leadership. We clearly see the need to organise politically to influence the class struggle but do so as equals, by the strength of our ideas. We do not seek to create or seize positions of “leadership” (i.e. power) but rather seek to ensure that the masses manage their own affairs and are influenced by political tendencies only in-so-far as they can convinced of the validity of the politics and ideas of those tendencies.

11. Does the Spanish Revolution show anarchism is flawed?

As usual, Grant brings up the question of the Spanish Revolution:

“The police, needless to say, did not ‘decentralise’ their decision making. They co-ordinated across the city to break the protests.”

Such an analogy indicates the bourgeois and authoritarian nature of the SWP’s politics. They do not understand that the capitalist state and workplace is centralised for a reason. It is to concentrate power into the hands of a few, with the many reduced to mere order takers. It is the means by which bourgeois rule is enforced.

Moreover, they seem to be arguing that if we followed the example of the bourgeois state, of the organisational structure of the police or the army, then we would be as “effective” as they are. They are, in effect, arguing that the anti-capitalist movement should reproduce the regulated docility of the police force into its ranks, reproduce the domination of a few bosses at the top over a mass of unquestioning automations at the bottom. As Murray Bookchin argued, the Leninist “has always had a grudging admiration and respect for that most inhuman of all hierarchical institutions, the military.” [Toward an Ecological Society, p. 254f] The SWP prove him right.

18. Why is a “revolutionary party” a contradiction in terms?

They continue by arguing that “Anarchists say a revolutionary party is at best unnecessary and at worst another form of authoritarianism. But they cannot avoid the problems that a revolutionary party addresses.” In reality, while anarchists reject the “revolutionary” party, they do not reject the need for an anarchist federation to spread anarchist ideas, convince others of our ideas and to give a lead during struggles. We reject the Bolshevik style “revolutionary party” simply because it is organised in a centralised, bourgeois, fashion and so produces all the problems of capitalist society
within so-called revolutionary organisations. As the anarchists of Trotwatch explain, such a party leaves much to be desired:

“In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.”

[Carry on Recruiting!, p. 41]

Such an organisation can never create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create. To build organisations which are statist/capitalistic in structure cannot do other than reproduce the very problems of capitalism/statism into them and so undermine their liberatory potential. As Murray Bookchin puts it:

“The ‘glorious party,’ when there is one, almost invariably lags behind the events ... In the beginning ... it tends to have an inhibitory function, not a ‘vanguard’ role. Where it exercises influence, it tends to slow down the flow of events, not ‘co-ordinate’ the revolutionary forced. This is not accidental. The party is structured along hierarchical lines that reflect the very society it professes to oppose ... Its membership is schooled in obedience ... The party’s leadership, in turn, is schooled in habits born of command, authority, manipulation ... Its leaders ... lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, “It is possible to direct [“lead”] through advice and example, leaving the people — provided with the opportunities and means of supplying their own needs themselves — to adopt our methods and solutions if these are, or seem to be, better than those suggested and carried out by others. But it is also possible to direct by taking over command, that is by becoming a government and imposing one’s own ideas and interests through police methods.” [The Anarchist Revolution, p. 108]

Unsurprisingly, anarchists favour the first way of “leading” people and utterly reject the second.

Clearly, then, anarchists do not reject being “leaders” in the sense of arguing our ideas and combating the influence and power of bureaucratic leaderships. However, this “lead” is based on the influence of our ideas and, as such, is a non-hierarchical relationship between anarchist activists and other workers. Thus Grant’s argument is a straw man.

Finally, his comment that “whole history of the international workers’ movement shows the absolute need for a revolutionary party” is simply false. Every example of a “revolutionary party” has been a failure. They have never created a socialist society which, let us not forget, was their aim. The first “revolutionary” party was Social Democracy. That quickly became reformist and, in Germany, crushed the revolution that broke out there after the end of the First World War.

The Bolshevik party was no better. It soon transformed itself for being the masses servant to being its master (see section 4). It justified its repression against the working class in terms of its “vanguard” position. When it degenerated into Stalinism, Communist Parties across the world followed it — no matter how insane its policies became.

This is unsurprising. As the anarchists of Trotwatch explain, such a “revolutionary” party leaves much to be desired:
and directive power” and it “will promote the Revolution only through the natural but never official influence of all members of the Alliance.” [Op. Cit., p. 154 and p. 387] This influence would be exerted in the basic assemblies of the organisation, which would retain the power to decide their own fates: “In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and sincere realisation of the will of all.” [Op. Cit., p. 415]

Only in this way can the bad effects of having institutionalised “leadership” positions be avoided. Instead of ignoring “bad” leadership, anarchists encourage workers to rely on their own initiative and power. They do not “refuse” to combat bureaucratic leaderships, rather they combat them from below by ensuring that workers manage their own affairs directly. As such, anarchists are well aware of the need “to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency.”

As Malatesta argued, we “do not want to emancipate the people; we want the people to emancipate themselves.” Thus anarchists “advocate and practise direct action, decentralisation, autonomy and individual initiative; they should make special efforts to help members [of popular organisations] learn to participate directly in the life of the organisation and to dispense with leaders and full-time functionaries.” However, “[w]e must not wait to achieve anarchy, in the meantime limiting ourselves to simple propaganda … We must seek to get all people … to make demands, and impose itself and take for itself all the improvements and freedoms that it desires as and when it reaches the state of wanting them, and the power to demand them: and in always propagating all aspects of our programme, and always struggling for its complete realisation, we must push people to want always more and to increase its pressures, until it has reached complete emancipation.” [Life and Ideas, p. 90, p. 125 and p. 189]

He, like all anarchists, stressed there were different kinds of “leadership”:

lacking any direct knowledge of local problems, responds sluggishly and prudently. .

“The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns—as they do in all revolutions. The party is efficient in only one respect—in moulding society in its own hierarchical imagine if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of ‘withering away,’ the state controlled by the ‘glorious party’ preserves the very conditions which ‘necessitate’ the existence of a state — and a party to ‘guard’ it.

“On the other hand, this kind of party is extremely vulnerable in periods of repression. The bourgeoisie has only to grab its leadership to destroy virtually the entire movement. With its leaders in prison or in hiding, the party becomes paralysed; the obedient membership had no one to obey and tends to flounder . .

‘T’he Bolshevik leadership was ordinarily extremely conservative, a trait that Lenin had to fight throughout 1917 — first in his efforts to reorient the Central Committee against the provisional government (the famous conflict over the ‘April Theses’), later in driving the Central Committee toward insurrection in October. In both cases he threatened to resign from the Central Committee and bring his views to ‘the lower ranks of the party.’” [Post-Scarcity Anarchism, pp. 194–9]
Thus the example of the “successful” Russian Revolution indicates the weakness of Leninism — Lenin had to fight the party machine he helped create in order to get it do anything revolutionary. Hardly a good example of a “revolutionary” party.

But, then again, the SWP know that anarchists do not reject the need for anarchists to organise as anarchists to influence the class struggle. As they argue, “Anarchism’s attempts to deal with them have been far less effective and less democratic.” The question is not of one of whether revolutionaries should organise together but how they do this. And as we shall see in the next four sections, the SWP’s examples of revolutionary anarchist organisations are either unique and so cannot be generalised from (Bakunin’s ideas on revolutionary organisation), or false (the F.A.I. was not organised in the way the SWP claim). Indeed, the simple fact is that the SWP ignore the usual ways anarchists organise as anarchists and yet try and draw conclusions about anarchism from their faulty examples.

**19. Do anarchists operate “in secret”?**

They continue:

“All the major anarchist organisations in history have been centralised but have operated in secret.”

It is just as well they say “all the major anarchist organisations,” it allows them to ignore counter-examples. We can point to hundreds of anarchist organisations that are/were not secret. For example, the Italian Anarchist Union (IAU) was a non-secret organisation. Given that the IAU had around 20 000 members in 1920, we wonder by what criteria the SWP excludes it from being a “major anarchist organisation”? After all, estimates of the membership of the F.A.I. (one of the SWP’s two “major” anarchist organisations) vary from around 6 000 to around 30 000. Bakunin’s “Alliance” (the leaderships did not develop by chance. Rather they are a product of both the tactics (such as electioneering, in the case of political parties) and structures used in these organisations.

Looking at structures, we can clearly see that hierarchy is key. By having leadership positions separate from the mass of workers (i.e. having hierarchical structures), an inevitable division develops between the leaders and the rank and file. The “leaders” are insulated from the life, interests and needs of the membership. Their views adjust to their position, not vice versa, and so “leadership” becomes institutionalised and quickly becomes bureaucratic. As Bakunin argued, the only way to avoid bureaucracy is to empower the rank and file.

Taking the Geneva section of the IWMA, Bakunin noted that the construction workers’ section “simply left all decision-making to their committees ... In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership.” [Bakunin on Anarchism, p. 246] To combat this bureaucracy, “the construction workers ... sections could only defend their rights and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies... In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed...” [Op. Cit., p. 247]

This did not mean the end of organisations and committees, but rather a change in power. Any committees would be made up of “delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statues,” “reporting regularly to the membership the proposals made and how they voted” and “asking for further instructions (plus instant recall of unsatisfactory delegates).” [Ibid.] Power would be in the hands of the rank and file, not the committees.

It is in this context that anarchists try and give a lead. Anarchist organisation “rules out any idea of dictatorship and of a controlling
There are so many fallacies in this argument it is hard to know where to start.

Firstly, we should note that anarchists do not deny the need for “leaders” nor for the need for revolutionaries to organise together to influence the class struggle. To claim so indicates a failure to present the anarchist case honestly.

In the words of Kropotkin:

“The idea of anarchist communism, today represented by ... minorities, but increasingly finding popular expression, will make its way among the mass of the people. Spreading everywhere, the anarchist groups ... will take strength from the support they find among the people.” [Words of a Rebel, p. 75]

Bakunin considered it essential that revolutionaries organise and influence the masses. As he put it, “the chief aim and purpose of this organisation” is to “help the people towards self-determination on the lines of the most complete equality.” [Michael Bakunin: Selected Writings, p. 191]

Therefore, to claim that anarchists deny the need for political organisation and “leaders” is a misrepresentation. As we argue in more depth in section J.3, this is not the case. However, we must stress that anarchists do not seek positions of power (“leadership”) in organisations. Rather, they aim to influence by the power of our ideas, “through the natural, personal influence of its members, who have not the slightest power.” [Bakunin, Op. Cit., p. 193] This is because “leadership” positions in hierarchical organisations are a source of corruption, which is the second major fallacy in Grant’s argument.

While acknowledging that the existing leadership of working class organisations and unions are “bureaucratic and class collaborationist,” he does not indicate why this is so. He argued that we need a “new” leadership, with the correct ideas, to replace the current ones. However, the “policy of class collaboration” within these other SWP example) amounted to, at most, under 100. In terms of size, the IAU was equal to the F.A.I. and outnumbered the “Al- liance” considerably. Why was the UAI not a “major anarchist organisation”?

Another, more up to date, example is the French Anarchist Federation which organises today. It as a weekly paper and groups all across France as well as in Belgium. That is not secret and is one of the largest anarchist organisations existing today (and so, by anyone’s standards “a major anarchist organisation”). We wonder why the SWP excludes it? Simply because they know their generalisation is false?

Therefore, as can be seen, the SWP’s claim is simply a lie. Few anarchist organisations have been secret. Those that have been secret have done so when conditions demanded it (for example, during periods of repression and when operating in countries with authoritarian governments). Just as Marxist organisations have done. For example, the Bolsheviks were secret for great periods of time under Tsarism and, ironically enough, the Trotskyist-Zinovievist United Opposition had to resort to secret and conspiratorial organisation to reach the Russian Communist Party rank and file in the 1920s. Therefore, to claim that anarchists have some sort of monopoly of secret organising is simply a lie — Marxists, like anarchists, have sometimes organised in secret when they have been forced to by state repression or likelihood of state repression. It is not a principle but, rather, sometimes a necessity. As anyone with even a basic grasp of anarchist history would know.

Similarly for the SWP’s claims that “all the major anarchist organisations in history have been centralised.” Such a claim is also a lie, as we shall prove in the sections 20 and 22.
20. Why is the SWP wrong about Bakunin’s organisation?

As an example of a “major anarchist organisation” the SWP point to Bakunin and the organisations he created:

“The 19th century theorist of anarchism Mikhail Bakunin’s organisation had a hierarchy of committees, with half a dozen people at the top, which were not under the democratic control of its members.”

Firstly, we have to wonder why anyone would have wanted to join Bakunin’s group if they had no say in the organisation. Also, given that communication in the 19th century was extremely slow, such an organisation would have spent most of its time waiting for instructions from above. Why would anyone want to join such a group? Simple logic undermines the SWP’s argument.

Secondly, we should also point out that the Bolshevik party itself was a secret organisation for most of its life in Tsarist Russia. Bakunin, an exile from that society, would have been aware, like the Bolsheviks, of the necessity of secret organising. Moreover, having spent a number of years imprisoned by the Tsar, Bakunin would not have desired to end up back in prison after escaping from Siberia to the West. In addition, given that the countries in which anarchists were operating at the time were not democracies, in the main, a secret organisation would have been considered essential. As Murray Bookchin argues, “Bakunin’s emphasis on conspiracy and secrecy can be understood only against the social background of Italy, Spain, and Russia the three countries in Europe where conspiracy and secrecy were matters of sheer survival.” [The Spanish Anarchists, p. 24] The SWP ignore the historical context.

Thirdly, the reality of Bakunin’s organisation is slightly different from the SWP’s claims. We have discussed this issue in great detail in section J.3.7 of the FAQ. However, it is useful to indicate the type of organisation Bakunin thought was necessary to aid the

10. Do anarchists reject “leadership”?

Grant continues by asserting the need for leaders:

“Some say that such a party is not necessary, that the workers do not need a party, that it leads to bureaucracy, and so on. That is a fatal error. The whole history of the international workers’ movement shows the absolute need for a revolutionary party. Anarchism is an expression of impotence, which can offer no way out. Of course, the reason why some honest workers and young people turn towards anarchism is because of their revulsion against Stalinism and the bureaucratic and class collaborationist policies of the existing leaderships, both on the political and trade union field. This is understandable, but profoundly mistaken. The answer to a bad leadership is not no leadership, but to create a leadership that is worthy of the workers’ cause. To refuse to do this, to abstain from the political struggle ... amounts to handing over the workers to the existing leaders without a struggle. In order to combat the policy of class collaboration, it is necessary to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency.”

viets but not to the parties” (or “free soviets”). From this incorrect assertion, Trotsky argued as follows:

“to free the soviets from the leadership [!] of the Bolshevists would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the ‘ideas’ of their participants. The Kronstadt uprising thus had a counterrevolutionary character.” [Op. Cit., p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik “leadership” (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would “only serve as a bridge from the proletarian dictatorship”!

This argument was made (in 1938) as a general point and is not phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. As he put it elsewhere, the “revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution.” [Writings 1936–7, pp. 513–4] So much for “All Power to the Soviets” or “workers’ power”!

Clearly, Grant’s and Trotsky’s arguments contain a deeply undemocratic core. The logic of their position — namely that party rule is essential to ensure soviet rule — in practice means that soviet rule is replaced by party dictatorship. To include the masses into the decision making process by soviet democracy means loos-
“This Committee is elected for an indefinite term. If the society ... the People’s Fraternity is satisfied with the actions of the Committee, it will be left as such; and while it remains a Committee each member ... and each regional group have to obey it unconditionally, except in such cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them...

“In such a case members of the group must halt the execution of the Committee’s orders and call the Committee to judgement before the general meeting ... If the general meeting is discontented with the Committee, it can always substitute another one for it...

“Any member or any group is subject to judgement by the general meeting ...

“No new Brother can be accepted without the consent of all or at the very least three-quarters of all the members...

“The Committee divides the members ... among the Regions and constitutes Regional groups of leaderships from them ... Regional leadership is charged with organising the second tier of the society — the Regional Fraternity, on the basis of the same programme, the same rules, and the same revolutionary plan...

“All members of the Regional Fraternity know each other, but do not know of the existence of the People’s Fraternity. They only know that there exists a Central Committee which hands down to them their orders for execution through Regional Committee which has been set up by it, i.e. by the Central Committee ...
at all. The Communists express the fundamental interests of the working class. It is quite natural that, in the period in which history brings up those interests, in all their magnitude, on to the order of the day, the Communists have become the recognised representatives of the working class as a whole.

Needless to say, this is incredulous. How can the replacement of soviet power by party power mean the “supremacy of labour”? It means the supremacy of the Bolshevik party, not “labour.” The transformation of the soviets from genuine democratic organs of working class self-government (“shapeless parliaments of labour”) into an instrument of Bolshevik party rule (“the apparatus of the supremacy of labour”) cannot be seen as a victory of democracy, quite the reverse. The dictatorship of the Bolshevik party marginalised the soviets just as much as the events of the German Revolution. The only difference is that under the Bolsheviks they maintained a symbolic existence.

Therefore, rather than the “leadership” of the Bolshevik party ensuring soviet rule it meant, in practice, party dictatorship. The soviets played no role in the decision making process as power rested firmly in the hands of the party.

This position was repeated in 1937, in his essay “Bolshevism and Stalinism.” There he argued that a “revolutionary party, even having seized power ... is still by no means the sovereign ruler of society.” He stressed that “the proletariat can take power only through its vanguard” and that “[t]hose who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.”

As can be seen, while there is much in Bakunin’s ideas that few anarchists would agree to, it cannot be said that it was not under the “democratic control of its members.” The system of committees is hardly libertarian but neither is it the top-down dictatorship the SWP argue it was. For example, the central committee was chosen by the “general meeting” of the members, which also decided upon the “programme of the society and the progress of the cause.” Its “decision” was “absolute law” and the central committee could be replaced by it. Moreover, the membership could ignore the decisions of the central committee if it “contradict[ed] either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have
participated equally in the discussion of them.” Each tier of the organisation had the same “programme and regulations.” Anarchists today would agree that Bakunin’s plan was extremely flawed. The appointment of committees from above is hardly libertarian, even given that each tier had the same “regulations” and so general meetings of each Fraternity, for example. However, the SWP’s summary of Bakunin’s ideas, as can be seen, is flawed.

Given that no other anarchist group or federation operated in this way, it is hard to generalise from Bakunin’s flawed ideas on organisation to a conclusion about anarchism. But, of course, this is what the SWP do — and such a generalisation is simply a lie. The example of the F.A.I., the SWP’s other example, indicates how most anarchist organisations work in practice — namely, a decentralised federation of autonomous groups (see section 22).

Moreover, as we will indicate in the next section, the SWP have little reason to attack Bakunin’s ideas. This is because Lenin had similar (although not identical) ones on the question of organising revolutionaries in Tsarist Russia and because the SWP are renowned for their leadership being secretive, centralised, bureaucratic and top-down.

In summary, anarchists agree with the SWP that Bakunin’s ideas are not to be recommended while pointing out that the likes of the SWP fail to provide an accurate account of their internal workings (i.e. they were more democratic than the SWP suggest), the role Bakunin saw for them in the labour movement and revolution or the historical context in which they were shaped. Moreover, we also argue that their comments against Bakunin, ironically, apply with equal force to their own party which is renowned, like all Bolshevik-style parties, as being undemocratic, top-down and authoritarian. We turn to this issue in the next section.

Grant is, of course, just paraphrasing Trotsky in his analysis. Moreover, like Trotsky’s, his comments indicate the fundamentally dictatorial nature of Trotskyism.

Simply put, if the “leadership” of the party is the key to soviet power, then if the workers’ reject that leadership via soviet elections then the Trotskyist is on the horns of a dilemma. Without party “leadership” then the soviets will be “reduced to impotence” and be “merely transient phenomena.” To maintain this party “leadership” (and ensure the soviet power) then the democratic nature of the soviets must be undermined. Therefore the Trotskyist is in the ironic situation of thinking that soviet democracy will undermine soviet power.

This dilemma was solved, in practice, by Trotsky during the Russian Revolution — he simply placed party “leadership” above soviet democracy. In other words, he maintained soviet power by turning the soviets into “nothing.” He argued this position numerous times in his life, when he was in power and after he had been expelled from Russia by Stalin.

In 1920, we find Trotsky’s thoughts on this subject in his infamous work **Terrorism and Communism**. In this work he defended the fact of Communist Party dictatorship:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution
Catholicism. Thirdly, the only rocks around are in the heads of Trotskyists if they really think this nonsense about anarchism.

Simply put, a science involves investigating the facts of what is being investigated and generating theories based on those facts. Clearly, our Trotskyist has not bothered to discover the facts about anarchism. He has made numerous assertions about anarchism which are contradicted by the works of anarchism. He has, as such, ignored the fundamental nature of science and has, instead, embraced the approach of the fiction writer.

As such, if Fisher’s article is an example of the “science” of Marxism then we can safely state that Marxism is not a science. Rather it is based on invention and slander.

9. What does the Russian Revolution tell us about Trotskyism?

Our Trotskyist decides to quote another Trotskyist, Ted Grant, on the dangers of anarchism:

“However, the setting up of soviets and strike committees — important as it is — does not solve the fundamental problem facing the Russian workers. In and of themselves, soviets solve nothing. What is decisive is the party that leads them. In February 1917, the workers and soldiers set up soviets — a step of enormous importance to the revolution. But in the hands of the Mensheviks and SRs they were reduced to impotence... In Germany in November 1918, the soviets were in the hands of the Social Democratic leaders who betrayed the revolution and handed power back to the bourgeoisie. Under these conditions the soviets soon dissolved, and were merely transient phenomena. The same would have happened in Russia, if it had not been for the Bolshevik Party and the leadership of Lenin and Trotsky.”

21. Why is the SWP’s attack on Bakunin’s organisation ironic?

That the SWP attack Bakunin’s organisational schema (see last section) is somewhat ironic. After all, the Bolshevik party system had many of the features of Bakunin’s organisational plan. If Bakunin, quite rightly, should be attacked for certain aspects of these ideas, then so must Bolshevik parties like the SWP.

For example, Lenin argued in favour of centralisation and secrecy in his work *What is to be Done?*. In this work he argued as follows:

“The active and widespread participation of the masses will not suffer; on the contrary, it will benefit by the fact that a ‘dozen’ experienced revolutionaries, no less professionally trained than the police, will centralise all the secret side of the work — prepare leaflets, work out approximate plans and *appoint bodies of leaders* for each urban district, for each factory district and for each educational institution, etc. [our emphasis] (I know that exception will be taken to my ‘undemocratic’ views, but I shall reply to this altogether unintelligent objection later on.) The centralisation of the most secret functions in an organisation of revolutionaries will not diminish, but rather increase the extent and the quality of the activity of a large number of other organisations that are intended for wide membership and which, therefore, can be as loose and as public as possible, such as trade unions; workers’ circles for self-education and the reading illegal literature, and socialist and also democratic, circles for *all other sections of the population*, etc., etc. We must have as large a number as possible of such organisations having the widest possible variety of functions, but it would be absurd and dangerous to confuse them with the organisation of revolutionaries, to
erase the line of demarcation between them, to make still more the masses’ already incredibly hazy appreciation of the fact that in order to ‘serve’ the mass movement we must have people who will devote themselves exclusively to Social-Democratic activities, and that such people must **train** themselves patiently and steadfastly to be professional revolutionaries.” [The Essential Lenin, p. 149]

And:

“The only serious organisational principle the active workers of our movement can accept is **strict secrecy, strict selection of members**, and the training of professional revolutionaries. If we possessed these qualities, something even more than ‘democratism’ would be guaranteed to us, namely, complete, comradely, mutual confidence among revolutionaries. And this is absolutely essential for us, because in Russia it is useless thinking that democratic control can substitute for it.” [our emphasis, Op. Cit., p. 162]

Thus we have Lenin advocating “**strict secrecy, strict selection of members**” as well as a centralised party which will “**appoint bodies of leaders for each urban district, for each factory district and for each educational institution**.” The parallels with Bakunin’s system are clear and are predominately the result of the identical political conditions both revolutionaries experienced. While anarchists are happy to indicate and oppose the non-libertarian aspects of Bakunin’s ideas, it is hard for the likes of the SWP to attack Bakunin while embracing Lenin’s ideas on the party, justifying their more “un-democratic” aspects as a result of the objective conditions of Tsarism.

Similar top-down perspectives can be seen from Bolshevism in Power. The 1918 constitution of the Soviet Union argued that a real state simply because it was the Bolshevik party leaders who were telling the armed forces of the state what to do and who to repress (including striking workers, anarchists and rebelling peasants). These forces, we must note, were organised from the top-down, with the government appointing officers. It was an “armed proletariat” only in the same sense that the bourgeois army is an “armed proletariat” (i.e. working class people made by the rank and file, fought the battles and followed the orders decided upon by a handful of people at the top).

So, if defence of a revolution by the armed proletariat makes you a Marxist then Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Makhno and Durruti were all “Marxists”! As is every revolutionary anarchist. Needless to say, this is impossible and, as such, Fisher’s “little loop hole” in anarchism does not exist.

Clearly, Fisher has no understanding of anarchist thought and prefers invention rather than research.

Our Trotskyist then states that:

“It is our job, as Marxists to explain these ideas to them!”

In other words, the Marxist job is to explain anarchist ideas to anarchists and call them Marxism. How impressive!

**8. Is Marxism scientific?**

Fisher finishes by arguing that:

“As Lenin states, ‘the ideas of Marx are all powerful, because they are true’! We have the science of dialectics on our side, not idealism, mysticism or theology. Our philosophy is solid as a rock.”

Firstly, dialectics is not a science. Secondly, quoting Lenin on the wonders of Marxism is like quoting the Pope on the joys of
to all the world’s exploited so that these may free themselves forever from the monstrous control of capitalism and the State.” [quoted by Jose Peirats, The CNT in the Spanish Revolution, vol. 1, p. 110]

If it was simply a question of consolidating a revolution and its self-defence then there would be no argument. Rather the question is one of power — will power be centralised, held by a handful of leaders and exercised from the top downwards or will it be decentralised and society run from the bottom-up by working people themselves?

Fisher distorts the real issue and instead invents a straw man which has no bearing at all on the real anarchist position (for further discussion, see sections H.2.1 and J.7.6).

7. Are Anarchists simply “potential Marxists”?

After creating the straw man argument that anarchists have not thought about counter-revolution, Fisher asserts:

“The majority of our ‘Anarchist’ friends never thought about this little loop hole, and as for the rest of them they shrug it off, or say something to the effect of the armed proletariat themselves will stop capitalist reaction, which, an armed proletariat in reality, is a proletarian ‘state!’ In conclusion our ‘Anarchists’ are simply potential Marxists who need access to genuinely revolutionary ideas.”

Of course, anarchists have thought about this and have come up with, as Fisher puts it, “the armed proletariat.” Indeed, anarchists have held this position since the days of Bakunin, as we proved in the last section.

Moreover, from an anarchist perspective, an “armed proletariat” is not a “state” as there is not minority of rulers telling the proletariat what to do (see section 5). The “proletariat” state of Lenin was local soviets were to “carry out all orders of the respective higher organs of the soviet power.” In 1919, the Bolshevik’s Eighth Party Congress strengthened party discipline. As Maurice Brinton notes, the “Congress ruled that each decision must above all be fulfilled. Only after this is an appeal to the corresponding Party organ permissible.” [The Bolsheviks and Workers’ Control, p. 55] He quotes the resolution:

This perspective was echoed in the forerunner of the SWP, the International Socialists. In September 1968, the Political Committee of International Socialism submitted the “Perspectives for I.S.” Point 4 said:

“Branches must accept directives from the Centre, unless they fundamentally disagree with them, in which case they should try to accord with them, while demanding an open debate on the matter.” [quoted by Brinton, Op. Cit., p. 55f]

The parallels with Bakunin’s ideas are clear (see last section). However, it is to Bakunin’s credit that he argued that while “each regional group have to obey it [the central committee] unconditionally” he recognised that there existed “cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all … have participated equally in the discussion of them.” when this happened, “members of the group must halt the execution of the Committee’s orders and call the Committee to judgement before the general meeting … If the general meeting is discontented with the Committee, it can always substitute another one for it.” Thus, rather than the unquestioning obedience of the Bolshevik
party, who have to obey, then complain, the members of Bakunin’s group did not negate their judgement and could refuse to carry out orders.

Therefore, the SWP have a problem. On the one hand, they denounce Bakunin’s ideas of a centralised, secret top-down organisation of revolutionaries. On the other, the party structure that Lenin recommends is also a tightly disciplined, centralised, top-down structure with a membership limited to those who are willing to be professional revolutionaries. They obviously want to have their cake and eat it too. Unfortunately for them, they cannot. If they attack Bakunin, they must attack Lenin, not to do so is hypocrisy.

The simple fact is that the parallels between Bakunin’s and Lenin’s organisational ideas cannot be understood without recognising that both revolutionaries were operating in an autocratic state under conditions of complete illegality, with a highly organised political police trying to infiltrate and destroy any attempt to change the regime. Once this is recognised, the SWP’s comments can be seen to be hypocritical in the extreme. Nor can their feeble attempt to use Bakunin to generalise about all anarchist organisations be taken seriously as Bakunin’s organisations were not “major” nor were his ideas on secret organisation and organising followed after his death. They were a product of Bakunin’s experiences in Tsarist Russian and not generic to anarchism (as the SWP know fine well).

Moreover, many people leave the SWP due to its undemocratic, authoritarian and bureaucratic nature. The comments by one group of ex-SWP dissidents indicate the hypocrisy of the SWP’s attack on Bakunin:

“The SWP is not democratic centralist but bureaucratic centralist. The leadership’s control of the party is unchecked by the members. New perspectives are initiated exclusively by the central committee (CC),

common defence.” [No Gods, No Masters, vol. 1, p. 142]

Similarly, the Spanish anarcho-syndicalist CNT union recognised the need for defending a revolution in its 1936 resolution on Libertarian Communism:

“We acknowledge the necessity to defend the advances made through the revolution … So … the necessary steps will be taken to defend the new regime, whether against the perils of a foreign capitalist invasion … or against counter-revolution at home. It must be remembered that a standing army constitutes the greatest danger for the revolution, since its influence could lead to dictatorship, which would necessarily kill off the revolution...

“The people armed will be the best assurance against any attempt to restore the system destroyed from either within or without...

“Let each Commune have its weapons and means of defence … the people will mobilise rapidly to stand up to the enemy, returning to their workplaces as soon as they may have accomplished their mission of defence….

“1. The disarming of capitalism implies the surrender of weaponry to the communes which be responsible for ensuring defensive means are effectively organised nationwide.

“2. In the international context, we shall have to mount an intensive propaganda drive among the proletariat of every country so that it may take an energetic protest, calling for sympathetic action against any attempted invasion by its respective government. At the same time, our Iberian Confederation of Autonomous Libertarian Communes will render material and moral assistance
ations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Michael Bakunin: Selected Writings, pp. 170–1]

And:

"[L]et us suppose ... it is Paris that starts [the revolution] ... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and quartiers, they will form the revolutionary federation of all the quartiers, the federative commune... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services ... and to organise common defence against the enemies of the Revolution.” [Op. Cit., p. 178–9]

He stressed the need to organise and co-ordinate the defence of the revolution by armed workers:

“Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines ... In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation. So it will be necessary for each of them to radiate outwards, to raise all its neighbouring communes in revolt ... and to federate with them for who then implement their perspective against all party opposition, implicit or explicit, legitimate or otherwise.

“Once a new perspective is declared, a new cadre is selected from the top down. The CC select the organisers, who select the district and branch committees — any elections that take place are carried out on the basis of ‘slates’ so that it is virtually impossible for members to vote against the slate proposed by the leadership. Any members who have doubts or disagreements are written off as 'burnt out' and, depending on their reaction to this, may be marginalised within the party and even expelled. [...] The outcome is a party whose conferences have no democratic function, but serve only to orientate party activists to carry out perspectives drawn up before the delegates even set out from their branches. At every level of the party, strategy and tactics are presented from the top down, as pre-digested instructions for action. At every level, the comrades ‘below’ are seen only as a passive mass to be shifted into action, rather than as a source of new initiatives.” [ISG, Discussion Document of Ex-SWP Comrades]

They argue that a “democratic” party would involve the "[r]egular election of all party full-timers, branch and district leadership, conference delegates, etc. with the right of recall,” which means that in the SWP appointment of full-timers, leaders and so on is the norm. They argue for the “right of branches to propose motions to the party conference” and for the “right for members to communicate horizontally in the party, to produce and distribute their own documents.” They stress the need for “an independent Control Commission to review all disciplinary cases (independent of the leadership bodies that exercise discipline), and the right of any
disciplined comrades to appeal directly to party conference.” They argue that in a democratic party “no section of the party would have a monopoly of information” which indicates that the SWP’s leadership is essentially secretive, withholding information from the party membership. [Op. Cit.] As can be seen, the SWP have little grounds on which to attack Bakunin given this damning account of its internal workings.

Other dissidents argue the same point. In 1991 members in Southampton SWP asked “When was the last time a motion or slate to conference was opposed?” and pointed out:

“The CC usually stays the same or changes by one member. Most of the changes to its composition are made between Conferences. None of the CC’s numerous decisions made over the preceding year are challenged or brought to account. Even the Pre-Conference bulletins contain little disagreements.”

They stress that:

“There is real debate within the SWP, but the framework for discussion is set by the Central Committee. The agenda’s national events ... are set by the CC or its appointees and are never challenged ... Members can only express their views through Conference and Council to the whole party indirectly.” [quoted by Trotwatch, Carry On Recruiting!, p. 39 and pp. 40–1]

Therefore, the SWP does not really have a leg to stand on. While Bakunin’s ideas on organisation are far from perfect, the actual practice of the SWP places their comments in context. They attack Bakunin while acting in similar ways while claiming they do not. Anarchists do not hold up Bakunin’s ideas on how anarchists should organise themselves as examples to be followed nor as particularly democratic (in contrast to his ideas on how the labour movement and revolution should be organised, which we do recommend) — as the SWP know. However, the SWP claim they are once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear... [Some people] seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!” [Anarchy, pp. 40–1]

Elsewhere he argued that a revolution would “reorganise things in such a way that it will be impossible for bourgeois society to be reconstituted. And all this, and whatever else would be required to satisfy public needs and the development of the revolution would be the task of ... al kinds of committees, local, inter-communal, regional and national congresses which would attend to the co-ordination of social activity ... The creation of voluntary militia ... to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution.” [Life and Ideas, pp. 165–6]

He was not alone in this position. Every revolutionary anarchist argued along these lines. Bakunin, for example, clearly saw the need to defend a revolution:

“Commune will be organised by the standing federation of the Barricades... [T]he federation of insurgent associ-
Therefore, from an anarchist perspective, the so-called “workers’ state” is still a state in “the proper sense of the word” as it is based on centralised, top-down power. It is based on the tiny minority (the party leaders) governing everyone else and suppressing anyone who disagreed with them — the vast majority.

If the vast majority did have real power then the state would not exist. As the “proletarian” state is based on delegated power, it is still a state and, as such, an instrument of minority class rule. In this case, the minority is the party leaders who will use their new powers to consolidate their position over the masses (while claiming that their rule equals that of the masses).

6. Do anarchists “hope the capitalists do not make any attempts of counterrevolution”?

Fisher continues his inventions:

“Instead of organising an instrument for the coercion of the bourgeois by the proletariat, the Anarchists wish to simply abolish the state overnight and hope that the capitalists do not make any attempts of counterrevolution, an absurd and unrealistic idea.”

Yes, it would be, if anarchists actually believed that. Sadly for Fisher, we do not and have stated so on many, many occasions. Indeed, to make an assertion like this is to show either a total ignorance of anarchist theory or a desire to deceive.

So do anarchists “hope that the capitalists do not make any attempts of counterrevolution”? Of course not. We have long argued that a revolution would need to defend itself. In the words of Malatesta:

“But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery a revolutionary party and yet their organisational practices are deeply anti-democratic with a veneer of (bourgeois) democracy. The hypocrisy is clear.

Ironically, the ISG dissidents who attack the SWP for being “bureaucratic centralist” note that “[a]nybody who has spent time involved in ‘Leninist’ organisations will have come across workers who agree with Marxist politics but refuse to join the party because they believe it to be undemocratic and authoritarian. Many draw the conclusion that Leninism itself is at fault, as every organisation that proclaims itself Leninist appears to follow the same pattern.” [Lenin vs. the SWP: Bureaucratic Centralism Or Democratic Centralism?] This is a common refrain with Leninists — when reality says one thing and the theory another, it must be reality that is at fault. Yes, every Leninist organisation may be bureaucratic and authoritarian but it is not the theory’s fault that those who apply it are not capable of actually doing it. Such an application of scientific principles by the followers of “scientific socialism” is worthy of note — obviously the usual scientific method of generalising from facts to produce a theory is inapplicable when evaluating “scientific socialism” itself.

One last point. While some may argue that the obvious parallels between Bakunin’s ideas and Lenin’s should embarrass anarchists, most anarchists disagree. This is for four reasons.

Firstly, anarchists are not “Bakuninists” or followers of “Bakuninism.” This means that we do not blindly follow the ideas of individuals, rather we take what we find useful and reject the flawed and non-libertarian aspects of their ideas. Therefore, if we think Bakunin’s specific ideas on how revolutionaries should organise are flawed and not libertarian then we reject them while keeping the bulk of Bakunin’s useful and libertarian ideas as inspiration. We do not slavishly follow individuals or their ideas but apply critical judgement and embrace what we find useful and reject what we consider nonsense.
Secondly, anarchism did not spring fully formed out of Bakunin’s (or Proudhon’s or Kropotkin’s or whoever’s) mind. We expect individuals to make mistakes, not to be totally consistent, not totally break with their background. Bakunin clearly did not manage to break completely with his background as a political exile and an escapee from Tsarist Russia. Hence his arguments and support for secret organisation — his experiences, like Lenin’s, pushed him in that direction. Moreover, we should also remember that Russia was not the only country which the anarchist and labour movements were repressed during this time. In France, after the defeat of the Paris Commune, the International was made illegal. The Spanish section of the International had been proscribed in 1872 and the central and regional authorities repressed it systematically from the summer of 1873, forcing the organisation to remain underground between 1874 and 1881. As can be seen, the SWP forget the historical context when attacking Bakunin’s secrecy.

Thirdly, Bakunin did not, like Lenin, think that “socialist consciousness” had to be introduced into the working class. He argued that due to the “economic struggle of labour and capital” a worker who joined the International Workers’ Association “would inevitably discover, through the very force of circumstances and through the develop of this struggle, the political, socialist, and philosophical principles of the International.” He thought that working class people were “socialists without knowing it” as “their most basic instinct and their social situation makes them ... earnestly and truly socialist ... They are socialist because of all the conditions of their material existence and all the needs of their being... The workers lack neither the potential for socialist aspirations nor their actuality; they lack socialist thought.” Thus the “germs” of “socialist thought” are to “be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants.” The method? The class struggle itself — “the International relies on the collective experience he gains in its bosom, especially on the progress of the indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves.” [The Moralists and Sycophants, p. 59]

Thus the party (a minority) holds power and uses that power against the masses themselves. Little wonder, given that, once in power, the Bolsheviks quickly forgot their arguments in favour of representative democracy and argued for party dictatorship (see section 4).

Such a transformation of representative democracy into minority class rule was predicted by anarchists:

"[I]t is not true that once the social conditions are changed the nature and role of government would change. Organ and function are inseparable terms. Take away from an organ its function and either the organ dies or the function is re-established ... A government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put into a privileged position, the government is already at odds with the people whose strength it disposes of.” [Malatesta, Anarchy, pp. 33–4]

Which, of course, is what happened in Russia. As we indicated in section 4, both Lenin and Trotsky defended the imposition of party rule, its need to be beyond public control, by the necessities generated by the revolution (the “vacillations” within the masses meant that democracy, public control, had to be eliminated in favour of party dictatorship).
within the class which the state claims to represent. In the words of Lenin:

“Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves.” [Collected Works, vol. 42, p. 170]

And who exercises this “revolutionary coercion”? The majority? No, the vanguard. As Lenin argued, “the correct understanding of a Communist of his tasks” lies in “correctly gauging the conditions and the moment when the vanguard of the proletariat can successfully seize power, when it will be able during and after this seizure of power to obtain support from sufficiently broad strata of the working class and of the non-proletarian toiling masses, and when, thereafter, it will be able to maintain, consolidate, and extend its rule, educating, training and attracting ever broader masses of the toilers.” He stressed that “to go so far … as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.” [Left-Wing Communism: An Infantile Disorder, pp. 35, p. 27]

In other words, for Lenin, if the leaders exercised their dictatorship, then so did the masses. Such a position is pure and utter nonsense. If the party leaders govern, then the masses do not. And so the “workers’ state” is a state in the normal sense of the word, with the “minority suppressing the majority.” This was made clear by Trotsky in 1939:

“The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is collective struggle of the workers against the bosses.” [The Basic Bakunin, p. 100 and pp. 101–3]

Bakunin did not deny the importance of those who already are socialists to organise themselves and “influence” those who were not socialists so that in “critical moments [they will] … follow the International’s lead.” However, this influence was not to inject socialist ideas into the working class but rather to aid their development by the “propagation of its [the International] ideas and … the organisation of its members’ natural effect on the masses.” As can be seen, Bakunin’s ideas on this subject differ considerably from Lenin’s. [Op. Cit., p. 139 and p. 140]

Unsurprisingly, the programme of the revolutionary organisation had to reflect the instincts and needs of the working population and must never be imposed on them. As he argued, the working masses were “not a blank page on which any secret society can write whatever it wishes … It has worked out, partly consciously, probably three-quarters unconsciously, its own programme which the secret society must get to know or guess and to which it must adapt itself.” He stresses that once the state “is destroyed … the people will rise … for their own [ideal]” and anyone “who tries to foist his own programme on the people will be left holding the baby.” [quoted in Daughter of a Revolutionary, Michael Confino (ed.), p. 252, p. 254 and p. 256] As he stresses, libertarian socialist ideas come from the masses and not from outside them:

"In opposition to … oppressive statist orientations … an entirely new orientation finally arose from the depths of the proletariat itself … It proceeds directly to the abolition of all exploitation and all political or juridical as well as governmental and bureaucratic oppression, in other words, to the abolition of all classes … and the abolition of their last buttress, the state.

“That is the program of social revolution.” [Statism and Anarchy, pp. 48–9]
Therefore, for Bakunin, the revolutionary organisation did not play the same role as for Lenin. It existed to aid the development of socialist consciousness within the working class, not inject that consciousness into a mass who cannot develop it by their own efforts. The difference is important as Lenin’s theory justified the substitution of party power for workers power, the elimination of democracy and the domination of the party over the class it claimed to represent. Bakunin, recognising that socialist ideas are “instinctive” in the working class due to their position in society and their everyday experiences, could not do this as the organisation existed to clarify these tendencies, not create them in the first place and inject them into the masses.

Lastly, the role the organisation plays in the workers’ movement and revolution are distinctly different. As Bakunin constantly stressed, the secret organisation must never take state power. As he put it, the “main purpose and task of the organisation” would be to “help the people to achieve self-determination.” It would “not threaten the liberty of the people because it is free from all official character” and “not placed above the people like state power.” Its programme “consists of the fullest realisation of the liberty of the people” and its influence is “not contrary to the free development and self-determination of the people, or its organisation from below according to its own customs and instincts because it acts on the people only by the natural personal influence of its members who are not invested with any power.” Thus the revolutionary group would be the “helper” of the masses, with an “organisation within the people itself.” [quoted by Michael Confino, Op. Cit., p. 259, p. 261, p. 256 and p. 261] The revolution itself would see “an end to all masters and to domination of every kind, and the free construction of popular life in accordance with popular needs, not from above downward, as in the state, but from below upward, by the people themselves, dispensing with all governments and parliaments — a voluntary alliance of agricultural and factory worker associations, communes, provinces, and

“To attack the central power, to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more...” [Kropotkin, Words of a Rebel, p. 143]

This means that to use the structure of the state (i.e. centralised, hierarchical power in the hands of a few) would soon mean the creation of a new minority class of rulers as the state “could not survive without creating about it a new privileged class.” [Malatesta, Anarchy, p. 35]

Therefore, for a given social organisation to be a state it must be based on delegated power. A state is marked by the centralisation of power into a few hands at the top of the structure, in other words, it is hierarchical in nature. This is, of course, essential for a minority class to remain control over it. Thus a social system which places power at the base, into the hands of the masses, is not a state as anarchists understand it. As Bakunin argued, “where all rule, there are no more ruled, and there is no State.” [The Political Philosophy of Bakunin, p. 223] Therefore, real workers democracy — i.e. self-management — existed, then the state would no longer exist.

The question now arises, does the Marxist “workers’ state” meet this definition? As indicated in section 4, the answer is a clear yes. In The State and Revolution, Lenin argued that the workers’ state would be based on representative democracy. This meant, according to Bakunin, that political power would be “exercised by proxy, which means entrusting it to a group of men elected to represent and govern them, which in turn will unfailingly return them to all the deceit and subservience of representative or bourgeois rule.” [Michael Bakunin: Selected Writings, p. 255]

Rather than “the vast majority suppressing a tiny minority” we have a tiny minority, elected by the majority, suppressing those who disagree with what the government decrees, including those
political instrument of power to maintain their economic and social privileges over the masses of their own people ... Thus arose the appropriate social conditions for the evolution of the modern state, as the organ of political power of privileged castes and classes for the forcible subjugation and oppression of the non-possessing classes ... Its external forms have altered in the course of its historical development, but its functions have always been the same ... And just as the functions of the bodily organs of ... animals cannot be arbitrarily altered, so that, for example, one cannot at will hear with his eyes and see with his ears, so also one cannot at pleasure transform an organ of social oppression into an instrument for the liberation of the oppressed. The state can only be what it is: the defender of mass-exploitation and social privileges, and creator of privileged classes.” [Anarcho-Syndicalism, p. 20]

This means that the structure of the state has evolved to ensure its function. Organ and role are interwoven. Keep one and the other will develop. And what is the structure (or organ) of the state? For anarchists, the state means “the sum total of the political, legislative, judiciary, military and financial institutions through which the management of their own affairs ... are taken away from the people and entrusted to others who ... are vested with the powers to make the laws for everything and everybody, and to oblige the people to observe them, if need be, by the use of collective force.” In summary, it “means the delegation of power, that is the abdication of initiative and sovereignty of all into the hands of a few.” [Anarchy, p. 13 and p. 40]

This structure has not evolved by chance. It is required by its function as the defender of minority class power. As Kropotkin stressed, the bourgeois needed the state: nations; and, finally, ... universal human brotherhood triumphing on the ruins of all the states.” [Statism and Anarchy, p. 33]

As can be seen, instead of seeking state power, as Lenin’s party desired, Bakunin’s would seek “natural influence” rather than “official influence.” As we argued in section J.3.7, this meant influencing the class struggle and revolution within the mass assemblies of workers’ associations and communes and in their federations. Rather than seek state power and official leadership positions, as the Leninist party does, Bakunin’s organisation rejected the taking of hierarchical positions in favour of working at the base of the organisation and providing a “leadership of ideas” rather than of people (see section J.3.6). While Bakunin’s organisational structures are flawed from a libertarian perspective (although more democratic than Marxists claim) the way it works within popular organisations is libertarian and in stark contrast with the Leninist position which sees these bodies as stepping stones for party power.

Therefore, Bakunin rejected key Leninist ideas and so cannot be considered as a forefather of Bolshevism in spite of similar organisational suggestions. The similarity in structure is due to a similarity in political conditions in Russia and not similarities in political ideas. If we look at Bakunin’s ideas on social revolution and the workers’ movement we see a fully libertarian perspective — of a movement from the bottom-up, based on the principles of direct action, self-management and federalism. Anarchists since his death have applied these ideas to the specific anarchist organisation as well, rejecting the non-libertarian elements of Bakunin’s ideas which the SWP correctly (if somewhat hypocritically and dishonestly) denounce.

22. Was the F.A.I. a “centralised and secret” organisation that shunned “open debate and common struggle”?

They move onto Spanish Anarchism:
“The anarchist organisation inside the Spanish C.N.T., the F.A.I., was centralised and secret. A revolutionary party thrives on open debate and common struggle with wider groups of workers.”

We discuss this Marxist myth in more detail in section 3 of the appendix on “Marxists and Spanish Anarchism”. However a few points are worth making. The F.A.I., regardless of what the SWPasserts, was not centralised. It was a federation of autonomous affinity groups. As one member put it:

“It was never its aim to act as a leadership or anything of the sort — to begin with they had no slogans, nor was any line laid down, let alone any adherence to any hierarchical structure ... This is what outside historians ought to grasp once and for all: that neither Durruti, nor Ascaso, nor Garcia Oliver — to name only the great C.N.T. spokesmen — issued any watchwords to the ‘masses,’ let alone delivered any operational plan or conspiratorial scheme to the bulk of the C.N.T. membership.”

He stresses that:

“Each F.A.I. group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding ... they had no ... opportunity or jurisdiction ... to foist a party line upon the grass-roots.” [Francisco Carrasquer, quoted by Stuart Christie, We, the Anarchists!, p. 25 and p. 28]

Murray Bookchin paints a similar picture:

“The F.A.I... was more loosely jointed as an organisation than many of its admirers and critics seem to recognise. It has no bureaucratic apparatus, no membership cards... Clearly, Fisher’s account of Trotskyism, like his account of anarchism, leaves a lot to be desired.

5. Is the “proletarian ‘state’” really a new kind of state?

Fisher, after keeping his readers ignorant of Lenin and Trotsky real position on workers’ democracy, argues that:

“The proletariat ‘state’ is no longer a state in the proper sense of the word, Lenin explains, because it is no longer the minority suppressing the majority, but the vast majority suppressing a tiny minority! The Proletariat suppressing the Bourgeoisie.”

If it is not a state “in the proper sense of the word” then why use the term state at all? Marxists argue because its function remains the same — namely the suppression of one class by another. However, every state that has ever existed has been the organ by which a minority ruling class suppresses the majority. As such, the Marxist definition is a-historic in the extreme and extracts a metaphysical essence of the state rather than producing a definition based on empirical evidence.

In order to show the fallacy of Fisher’s argument, it is necessary to explain what anarchists think the state is.

The assumption underlying Fisher’s argument is that anarchists and Marxists share identical definitions of what a state is. This is not true. Marxists, as Fisher notes, think of a state as simply as an instrument of class rule and so concentrate solely on this function. Anarchists disagree. While we agree that the main function of the state is to defend class society, we also stress the structure of the state has evolved to ensure that role. In the words of Rudolf Rocker:

"[S]ocial institutions ... do not arise arbitrarily, but are called into being by special needs to serve definite purposes ... The newly arisen possessing classes had need of a
representatives above the Party. As if the Party were not
entitled to assert its dictatorship even if that dictator-
ship temporarily clashed with the passing moods of the
worker’s democracy!”

He spoke of the “revolutionary historic birthright of the Party”
and that it “is obliged to maintain its dictatorship …. regardless of
temporary vacillations even in the working class ... The dictatorship
does not base itself at every given moment on the formal principle
of a workers’ democracy.” [quoted by M. Brinton, The Bolsheviks
and Workers’ Control, p. 78]

Needless to say, they did not explain how these lessons and
arguments are compatible with Lenin’s State and Revolution
where he had argued that “[a]ll officials, without exception,” must
be “elected and subject to recall at any time.” [The Essential
Lenin, p. 302] If they are subject to election and recall at any time,
then they will reflect the “passing moods” (the “vacillations”) of the
workers’ democracy. Therefore, to combat this, soviet democracy
must be replaced by party dictatorship and neither Lenin nor
Trotsky were shy in both applying and arguing this position.

It is a shame, then, for Fisher’s argument that both Lenin and
Trotsky also explained why party dictatorship was more important
than workers’ democracy. It is doubly harmful for his argument as
both argued that this “lesson” was of a general nature and appli-
cable for all revolutions.

It is also a shame for Fisher’s argument that the Leninists,
once in power, overthrew every soviet that was elected with a
non-Bolshevik majority (see section 6 of the appendix on “What
happened during the Russian Revolution?”). They also repressed
those who demanded real workers’ democracy (as, for example, in
Kronstadt in 1921 — see the appendix on “What was the Kronstadt
Rebellion?” — or during the numerous strikes under Lenin’s rule
— see sections 3 and 5 of the appendix on “What caused the
degeneration of the Russian Revolution?”).

or dues, and no headquarters with paid officials, secre-
taries, and clerks... They jealously guarded the auton-
omy of their affinity groups from the authority of higher
organisational bodies—a state of mind hardly conducive
to the development of a tightly knit, vanguard organisa-
tion.

“The F.A.I., moreover, was not a politically homogeneous
organisation which followed a fixed ‘line’ like the Com-
munists and many Socialists. It had no official program
by which all faistas could mechanically guide their ac-
tions.” [The Spanish Anarchists, p. 224]

Stuart Christie argues that the decentralised nature of the F.A.I.
helped it survive the frequent repression directed against it and the
C.N.T:

“The basic units of the F.A.I. were ... small autonomous
affinity groups of anarchist militants. This cohesive
quasi-cellular form of association had evolved, gradu-
ally, over the period of time it takes for relationships
to be established and for mutual trust to grow. The
affinity groups consisted, usually, of between three and
10 members bound by ties of friendship, and who shared
well defined aims and agreed methods of struggle. Once
such a group had come into existence it could, if it
so wished, solicit affiliation to the F.A.I... The affinity
groups were also highly resistant to police infiltration.
Even if filtration did occur, or police agents did manage
to set up their own ‘affinity’ groups it would not have
been a particularly efficient means of intelligence gath-
ering; the atomic structure of the F.A.I. meant there was
no central body to provide an overview of the movement
as a whole.” [We, the Anarchists!, p. 28]

He stresses its decentralised nature:
“Above all, it was not a representative body and involved no delegation of power either within the affinity groups or in the regional or national administrative bodies to empower those bodies to make decisions on behalf of the collectivity. Drawing on many years of revolutionary experience the F.A.I. was firmly rooted in federal principles and structured in such a way that its co-ordinating function did not deprive its constituent members of their autonomous power... In situations where it was necessary for delegates to take decisions, e.g. at plenary meetings during times of crisis or clandestinity, those decisions were required to be ratified by the whole membership who, in effect, constituted the administration... The groups in a city or town constituted a Local Federation while the rural groups, combined, formed a District Federation. These were administered by a secretariat and a committee composed of one mandated delegate from each affinity group. The Local and District Federations were obliged to convene regular assemblies of all groups in its area... Local and District Federations constituted a Regional Federation. These, in turn, were co-ordinated by a Peninsular Committee. None of these committees, local, district, regional or national, could be described as having a bureaucratic apparatus. Nor did they wield executive power of any description. Their function was purely administrative.” [Op. Cit., pp. 29–30]

Therefore, the claim that the F.A.I. was a centralised organisation is simply false. Rather it was a federation of autonomous groups, as can be seen (see also section 3 of the appendix on “Marxists and Spanish Anarchism” for more discussion on this topic).

Was the F.A.I. a “secret” organisation? When it was founded in 1927, Spain was under the dictatorship of Primo de Rivera and so it was illegal and secret by necessity. As Stuart Christie correctly

own dictatorship surrenders the masses to the counter-revolution... Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [Writings 1936–37, pp. 513–4]

Lenin and Trotsky are clearly explaining the need for party dictatorship over the working class. This was seen as a general lesson of the Russian Revolution. How many Marxists “explain” this to anarchists?

Clearly, then, Fisher is not being totally honest when he argues that Trotskyism is based on “workers’ democracy.” Lenin, for example, argued that “Marxism teaches — and this tenet has not only been formally endorsed by the whole of the Communist International in the decisions of the second Congress... but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat and of the whole working people that alone will be capable of withstanding the inevitable petty-bourgeois vacillations of this mass.” [Op. Cit., vol. 32, p. 246]

Lenin is, of course, rejecting what democracy is all about, namely the right and duty of representative bodies to carry out the wishes of the electors (i.e. their “vacillations”). Instead of workers’ democracy, he is clearly arguing for the right of the party to ignore it and impose its own wishes on the working class.

Trotsky argued along the same lines (again in 1921):

“They [the dissent Bolsheviks of the Workers’ Opposition] have placed the workers’ right to elect
of the proletariat, and this vanguard exercises the dictatorship of the proletariat.” [Collected Works, vol. 21, p. 20]

He stressed that this was an inevitable aspect of revolution, applicable in all countries:

“the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard... Such is the basic mechanism of the dictatorship of the dictatorship of the proletariat, and the essentials of transitions from capitalism to communism... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [Op. Cit., vol. 32, p. 21]

Trotsky agreed with this lesson and argued it to the end of his life:

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we cannot jump over this chapter, which can open (not at one stroke) genuine human history... The revolutionary party (vanguard) which renounces its

notes, “[a]s an organisation publicly committed to the overthrow of the dictatorship, the F.A.I. functioned, from 1927 to 1931, as an illegal rather than a secret organisation. From the birth of the Republic in 1931 onwards, the F.A.I. was simply an organisation which, until 1937, refused to register as an organisation as required by Republican Law.” [We, the Anarchists!, p. 24] Thus it was illegal rather than secret. As one anarchist militant asked, “[i]f it was secret, how come I was able to attend F.A.I. meetings without ever having joined or paid dues to the ‘specific’ organisation?” [Francesco Carrasquer, quoted by Christie, Op. Cit., p. 24]

Moreover, given the periods of repression suffered by the Spanish libertarian movement throughout its history (including being banned and forced underground) being an illegal organisation made perfect sense. The anarchist movement was made illegal a number of times. Nor did the repression end during the Republic of 1931–6. This means that for the F.A.I. to be illegal was a sensible thing to do, particularly after failed revolutionary attempts resulted in massive arrests and the closing of union halls. Again, the SWP ignore historical context and so mislead the reader.

Did the F.A.I. ignore “open debate and common struggle.” No, of course not. The members of the F.A.I. were also members of the C.N.T. The C.N.T. was based around mass assemblies in which all members could speak. It was here that members of the F.A.I. took part in forming C.N.T. policy along with other C.N.T. members. Anarchists in the C.N.T. who were not members of the F.A.I. indicate this. Jose Borras Cassarosa notes that “[o]ne has to recognise that the F.A.I. did not intervene in the C.N.T. from above or in an authoritarian manner as did other political parties in the unions. It did so from the base through militants... the decisions which determined the course taken by the C.N.T. were taken under constant pressure from these militants.” Jose Campos notes that F.A.I. militants “tended to reject control of confederal committees and only accepted them on specific occasions... if someone proposed a motion in assembly, the
other F.A.I. members would support it, usually successfully. It was the individual standing of the faista in open assembly.” [quoted by Stuart Christie, Op. Cit., p. 62] As Francisco Ascaso (friend of Durruti and an influential anarchist militant in the C.N.T. and F.A.I. in his own right) put it:

“There is not a single militant who as a ‘F.A.Ista’ intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers’ union and when I intervene at union meetings I do it as someone who us exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the F.A.I. or not.” [cited by Abel Paz, Durruti: The People Armed, p. 137]

This meant that it was at union meetings and congresses where policies and the program for the movement were argued out:

“[D]elegates, whether or not they were members of the F.A.I., were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions.” [Juan Gomez Casas, Anarchist Organisation: The History of the F.A.I., p. 121]

As can be seen, open debate with their fellow workers in the union assemblies. In this they followed Bakunin’s arguments that anarchist organisation “rules out any idea of dictatorship and of a controlling and directive power” and it “will promote the Revolution only through the natural but never official influence of all members of the Alliance.” This influence would be exerted in the union assemblies, as the union members “could only defend their rights saw “democracy” in the normal, bourgeois, sense of electing a government who will make the decisions for the electors. Indeed, the “dictatorship of the proletariat” is described as “the organisation of the vanguard of the oppressed as the ruling class.” [Op. Cit., p. 337] This “vanguard” is the party:

“By educating the workers’ party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of leading the whole people to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie.” [Op. Cit., p. 288]

So the vanguard of the oppressed would become the “ruling class”, not the oppressed. This means that “workers’ democracy” is simply reduced to meaning the majority designates its rulers but does not rule itself. As such, the “workers’ state” is just the same as any other state (see next section).

Thus, before taking power Lenin argued for party power, not workers’ power. The workers can elect representatives who govern on their behalf, but they do not actually manage society themselves. This is the key contradiction for Bolshevism — it confuses workers’ power with party power.

Post-October, the ideas of Lenin and Trotsky changed. If their works are consulted, it is soon discovered what they thought should “replace” the bourgeois state: party dictatorship.

In the words of Lenin (from 1920):

“In the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers ... What happens is that the Party, shall we say, absorbs the vanguard
Therefore, Fisher’s comments are totally untrue. Anarchists have been pretty clear on this issue from Proudhon onwards (see section I.2.3 for a further discussion of this issue).

4. What did Trotsky and Lenin think must replace the bourgeois state?

Fisher continues his inaccurate attack:

“What we as Marxists explain is what must replace the smashed bourgeois state machine. Engels explains that the state is a ‘special coercive force’. So what must come after the bourgeoisie is overthrown to keep it down? As Lenin explains in the State and Revolution: the bourgeois state ‘must be replaced by a “special coercive force” for the suppression of the bourgeoisie by the proletariat (the dictatorship of the proletariat)’ (pg 397 vol. 25 collected works) that is workers’ democracy.”

There are numerous issues here. Firstly, of course, is the question of how to define the state. Fisher implicitly assumes that anarchists and Marxists share the same definition of what marks a “state.” Secondly, there is the question of whether quoting Lenin’s State and Revolution without relating it to Bolshevik practice is very convincing. Thirdly, there is the question of the defence of the revolution. We will discuss the second question here, the first in the next section and the third in section 6.

There is a well-known difference between Lenin’s work The State and Revolution and actual Bolsheviki practice. In the former, Lenin promised the widest democracy, although he also argued that “[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions.” [“The State and Revolution”, Essential Works of Lenin, p. 306] Clearly, he and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies... In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed...” This would ensure that the assemblies had “real autonomy” and actually were the real power in the organisation. Any committees would be made up of “delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statutes,” “reporting regularly to the membership the proposals made and how they voted” and “asking for further instructions (plus instant recall of unsatisfactory delegates)” [Bakunin on Anarchism, p. 154, p. 387 and p. 247]

The anarchist revolution would be organised in an identical fashion, and, in Bakunin’s words, “must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations... organised from the bottom upwards by means of revolutionary delegations... [who] will set out to administer public services, not to rule over peoples.” [Michael Bakunin: Selected Writings, p. 172]

As can be seen, the F.A.I. (like all anarchists) influenced the class struggle and revolution via their natural influence in winning debates with their fellow workers in union assemblies. They did not seek power but rather influence for their ideas. To claim otherwise, to claim that anarchists reject open debate with their fellow workers is false. Instead of seeking to power — and so limiting debates to during elections — anarchists argue that people must control their own organisations (and so the revolution) directly and all the time. This means, as can be seen, we encourage open debate and discussion far more than those, like the SWP, who seek centralised political power for themselves. In such a system, the only people who debate regularly are the members of the government — everyone else is just a voter and an order taker.
23. Do anarchists wait for “spontaneous upsurges by workers”?

After lying about the F.A.I., they move on to lying about anarchist theory:

“Anarchists instead look to spontaneous upsurges by workers. In the struggle anarchists will declare themselves and urge the workers on. They hope this will lead to the toppling of capitalism. History is full of mass struggles which have been able to win significant gains, but which have not had a clear leadership that can carry the struggle over to victory against capitalism.”

Nothing could be further from the truth. Their own article exposes their lies. They mention the C.N.T., which was organised in an anarchist way and in which anarchists were heavily involved. Anarchists from Bakunin onward have all argued in favour of organising as anarchists as well as organising workers and fighting for reforms in the here and now. For Bakunin, “the natural organisation of the masses … is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association.” [The Basic Bakunin, p. 139] He stressed the importance of anarchists being involved in unions as well as union struggle for reforms by direct action:

“What policy should the International [Workers’ Association] follow during the somewhat extended time period that separates us from this terrible social revolution … the International will give labour unrest in all countries an essentially economic character, with the aim of reducing working hours and increasing salary, by means of the association of the working masses … It will [also] propagandise its principles.” [Op. Cit., p. 109]

Thus “independent Communes for the territorial organisation, and of federations of Trade Unions [i.e. workplace associations] for the organisation of men [and women] in accordance with their different functions, gave a concrete conception of society regenerated by a social revolution.” [Peter Kropotkin, Evolution and Environment, p. 79] In his classic history of the French Revolution he pointed to “the popular Commune” as an example of the “something new” required to turn an uprising into a revolution. He argued that “the Revolution began by creating the Commune … and through this institution it gained … immense power.” He stressed that it was “by means of the ‘districts’ [of the Communes] that … the masses, accustomed themselves to act without receiving orders from the national representatives, were practising what was to be described later as Direct Self-Government.” Such a system did not imply isolation, for while “the districts strove to maintain their own independence” they also “sought for unity of action, not in subjection to a Central Committee, but in a federative union.” The Commune “was thus made from below upward, by the federation of the district organisations; it spring up in a revolutionary way, from popular initiative.” [The Great French Revolution, vol. 1, p. 200 and p. 203]

During the 1905 and 1917 revolutions, Kropotkin expressed his support for the soviets created by the workers in struggle. He argued that anarchists should “enter the Soviets, but certainly only as far as the Soviets are organs of the struggle against the bourgeoisie and the state, and not organs of authority.” [quoted by Graham Purchase, Evolution and Revolution, p. 30] After the 1917 revolution, he re-iterated this point, arguing that “idea of soviets … of councils of workers and peasants … controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural wealth by their own efforts.” [Kropotkin's Revolutionary Pamphlets, p. 254]
the federation of insurgent associations, communes
and provinces … [and] organise a revolutionary force
capable defeating reaction … [and for] self-defence …
[The] revolution everywhere must be created by the
people, and supreme control must always belong to the
people organised into a free federation of agricultural
and industrial associations … organised from the bot-
tom upwards by means of revolutionary delegation…”

[Michael Bakunin: Selected Writings, pp. 170–2]

Similarly, Proudhon argued federations of workers associations
and communes to replace the state. While seeing such activity as
essentially reformist in nature, he saw the germs of anarchy as be-
ing the result of “generating from the bowels of the people, from the
depths of labour, a greater authority, a more potent fact, which shall
envelop capital and the State and subjugate them” as “it is of no use
to change the holders of power or introduce some variation into its
workings: an agricultural and industrial combination must be found
by means of which power, today the ruler of society, shall become
398] What, decades later, Proudhon called an “agro-industrial fed-
eration” in his Principle of Federation.

Kropotkin, unsurprisingly enough, had similar ideas. He saw
the revolution as the “expropriation of the whole of social wealth”
by the workers, who “will organise the workshops so that they con-
tinue production” once “the governments are swept out by the people.”
The “coming social revolution” would see “the complete abolition of
States, and reorganisation from the simple to the complex through
the free federation of the popular forces of producers and consumers,”
the “federation of workers’ corporations and groups of consumers.”
The “Commune will know that it must break the State and replace it
by the Federation” (which is “freely accepted by itself as well as the
other communes”). [Words of a Rebel, p. 99, p. 91, p. 92 and p. 83]

Indeed, he saw the labour movement as the means to create a
socialist society:

“The masses are a force, or at least the essential elements
of a force. What do they lack? They lack two things which
up till now constituted the power of all government: organi-
sation and knowledge.

“The organisation of the International [Workers’ As-
sociation], having for its objective not the creation of
new despotisms but the uprooting of all domination,
will take on an essentially different character from the
organisation of the State… But what is the organisation
of the masses? … It is the organisation by professions
and trades …

“The organisation of the trade sections and their represen-
tation in the Chambers of Labour … bear in themselves
the living seeds of the new society which is to replace the
old world. They are creating not only the ideas, but also
the facts of the future itself.” [Bakunin on Anarchism,
pp. 254–5]

All anarchists have stressed the importance of working in and
outside the labour movement to gain influence for anarchist ideas
of direct action, solidarity, self-management and federalism in the
here and now, rather than waiting for a “spontaneous uprising” to
occur. As Kropotkin argued, “Revolutionary Anarchist Communist
propaganda with Labour Unions had always been a favourite mode
of action in the Federalist [or libertarian] … section of the Interna-
tional Working Men’s Association.” [Act For Yourselves, p. 119]
Malatesta makes the same point:

“anarchists, convinced of the validity of our programme,
must strive to acquire overwhelming influence in order
to draw the movement towards the realisation of our
ideas. But such influence must be won by doing more and better than others, and will only be useful if won in that way.

“Today we must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement to prevent it being limited to and corrupted by the exclusive pursuit of small improvements compatible with the capitalist system; and we must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised, and perhaps unorganisable, masses to awaken a spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces of the State and of capitalism and to raise the mental and material conditions of the workers. We must, in short, prepare, and prepare ourselves, morally and materially, for the revolutionary act which will open the way to the future.” [The Anarchist Revolution, p. 109]

Therefore, as can be seen, the SWP’s assertions are totally at odds with the actual ideas of anarchists, as would be known by anyone with even a basic understanding of anarchist theory. After all, if spontaneous uprisings were sufficient in themselves we would be living in an anarchist society. As Bakunin argued “if instinct alone had been sufficient for the liberation of peoples, they would have long since freed themselves.” [Bakunin on Anarchism, p. 254] This explains why anarchists organise as anarchists in groups and federations to influence the class struggle. We are aware of the need for revolutionaries to organise to influence the class struggle, spread anarchist ideas and tactics and present the case for revolutionary change. An anarchist society will not come about by accident, it

Rebel, p. 175] He stressed that “[t]o make a revolution it is not ... enough that there should be ... [popular] risings ... It is necessary that after the risings there should be something new in the institutions [that make up society], which would permit new forms of life to be elaborated and established.” [The Great French Revolution, vol. 1, p. 200]

Thus the framework of a free society would be created by the process of the revolution itself. As such, as Kropotkin put it, “[d]uring a revolution new forms of life will always germinate on the ruins of the old forms ... It is impossible to legislate for the future. All we can do is vaguely guess its essential tendencies and clear the road for it.” [Evolution and Environment, pp. 101–2] So while the specific forms these organisations would take cannot be predicted, their general nature can be.

So what is the general nature of these new organisations? Anarchists have consistently argued that the state would be replaced by a free federation of workers’ associations and communes, self-managed and organised from the bottom-up. In Malatesta’s words, anarchy is the “free organisation from below upwards, from the simple to the complex, through free agreement and the federation of associations of production and consumption.” In particular, he argued anarchists aim to “push the workers to take possession of the factories, to federate among themselves and work for the community” while the peasants “should take over the land and produced usurped by the landlords, and come to an agreement with the industrial workers.” [Life and Ideas, p. 147 and p. 165]

This vision of revolution followed Bakunin’s:

“the federative alliance of all working men’s associations ... [will] constitute the Commune ... [the] Communal Council [will be] composed of ... delegates ... vested with plenary but accountable and removable mandates... all provinces, communes and associations ... by first reorganising on revolutionary lines ... [will] constitute
ordinate to the central authorities, and formed by them.” [Thomas F. Remington, Building Socialism in Bolshevik Russia, p. 38]

Lenin himself quickly supported “one-man management” invested with “dictatorial powers” after “control over the capitalists” failed. By 1920, Trotsky was advocating the “militarisation of labour” and implemented his ideas on the railway workers.

They learn that Leninism is just another form of capitalism (state capitalism). As Lenin put it, socialism “is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.” [The Threatening Catastrophe and how to avoid it, p. 37]

They learn that Lenin and Trotsky argued for party dictatorship and centralised, top-down rule (see section 4).

They also learn that this should not come as a surprise. Anarchism argues that the state is a tool to allow minorities to rule and has been designed to ensure minority power. They learn that it cannot, by its very nature, be a tool for liberation — no matter who is in charge of it.

3. What do anarchists think will “replace the smashed state machine”?

Fisher now makes a common Marxist assertion. He states:

“But what they do not learn, and never will from an Anarchist perspective is what is to replace the smashed state machine?”

In reality, if you read anarchist thinkers you will soon discover what anarchists think will “replace” the state: namely the various working class organisations created by the class struggle and revolution. In the words of Kropotkin, the “elaboration of new social forms can only be the collective work of the masses.” [Words of a must be consciously desired and created by the mass of the population. As Kropotkin argued:

“Communist organisations ... must be the work of all, a natural growth, a product of the constructive genius of the great mass. Communism cannot be imposed from above; it could not live even for a few months if the constant and daily co-operation of all did not uphold it. It must be free.” [Kropotkin’s Revolutionary Pamphlets, p. 140]

So, clearly, anarchists see the importance of working class organisation and struggle in the here and now. Anarchists are active in industrial disputes and (as the SWP note) the anti-globalisation movement and were heavily involved in the anti-poll-tax and anti-Criminal Justice Act struggles in the UK, for example. The role of anarchists is not to wait for “upsurges” but rather to encourage them by spreading our ideas and encouraging workers to organise and fight their bosses and the state. It is for this reason anarchists form groups and federations, to influence workers today rather than waiting for a “spontaneous uprising” to occur. Moreover, it is quite ironic that the SWP say that anarchists wait for upsurges before declaring themselves to the masses. After all, that is what the SWP do. They turn up at picket lines and try and sell their paper and party to the strikers. Obviously, if anarchists do this, it is bad, if the SWP do it, then it is “revolutionary.”

Therefore, rather than believing in or waiting for “spontaneous upsurges” anarchists, like the SWP, spread their message, try and convince people to become revolutionaries. That is why there are numerous anarchist federations across the world, involved in numerous struggles and working class organisations, with magazines, papers and leaflets being produced and distributed. Anarchists stress the importance of winning people over to anarchist ideas and of giving a “lead” in struggle rather than as
a “leadership” (which implies a hierarchical relationship between the mass of people and a group of leaders). To state otherwise, to argue we wait for spontaneous uprisings, is simply a lie.

Anarchist organisations see themselves in the role of aiders, not leaders. As Voline argued, the politically aware minority “should intervene. But, in every place and under all circumstances, ... [they] should freely participate in the common work, as true collaborators, not as dictators. It is necessary that they especially create an example, and employ themselves... without dominating, subjugating, or oppressing anyone... Accordingly to the libertarian thesis, it is the labouring masses themselves, who, by means of the various class organisations, factory committees, industrial and agricultural unions, co-operatives, et cetera, federated... should apply themselves everywhere, to solving the problems of waging the Revolution... As for the ‘elite’ [i.e. the politically aware], their role, according to the libertarians, is to help the masses, enlighten them, teach them, give them necessary advice, impel them to take initiative, provide them with an example, and support them in their action — but not to direct them governmentally.” [The Unknown Revolution, pp. 177–8]

Sadly, Leninists like the SWP confuse giving a lead with taking power themselves. They seek to take over positions of responsibility in a movement and turn them into positions of power which they can use to tell the others what to do. Instead of being the servants of the organisation, they become its masters. For this reason anarchist organisations try to influence movements from below, in the mass assemblies which make it up, rather than seek power.

24. Do anarchists blame workers “for being insufficiently revolutionary”?

After creating a straw man about anarchist theory, they draw some thoughts from it:

Form the early 1890s, Social Democracy was racked by arguments between reformists (the “revisionist” wing) and revolutionaries. The former wanted to adapt the party and its rhetoric to what it was doing. As one of the most distinguished historians of this period put it, the “distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action.” [C. Schorske, German Social Democracy, p. 38]

In 1914, the majority of social democrats in Germany and across the world supported their state in the imperialist slaughter of the First World. This disgraceful end would not have surprised Bakunin.

Anarchists also learn about the Russian Revolution. They learn how Lenin and Trotsky eliminated democracy in the armed forces, in the workplace and in the soviets.

They learn, for example, that the Bolsheviks had disbanded soviets which had been elected with non-Bolshevik majorities in the spring and summer of 1918. [Samuel Farber, Op. Cit., p. 24]

They learn that at the end of March, 1918, Trotsky reported to the Communist Party that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree” in the Red Army. [quoted by M. Brinton, The Bolsheviks and Workers’ Control, pp. 37–8]

They learn that Lenin opposed workers’ management of production. Before the October Revolution he saw “workers’ control” purely in terms of the “universal, all-embracing workers’ control over the capitalists.” [Will the Bolsheviks Maintain Power?, p. 52]

He did not see it in terms of workers’ management of production itself (i.e. the abolition of wage labour) via federations of factory committees. Anarchists and the workers’ factory committees did. “On three occasions in the first months of Soviet power, the [factory] committee leaders sought to bring their model into being. At each point the party leadership overruled them. The result was to vest both managerial and control powers in organs of the state which were sub-
2. What else do people learn about when they discover anarchism is not “utter rebellion”?

Fisher continues:

“In some cases, ‘Anarchist’ youth begin to try to learn about what Anarchism truly is instead of seeing it merely as utter rebellion. They learn Anarchism is a form of Socialism, they learn they have much in common with Marxists, they learn the state must be smashed, they learn the state is a tool of suppression used by one class against another.”

They learn much more than this. They learn, for example, about the history of Marxism and how anarchism differs from it. They learn, for example, about the history of Marxist Social Democracy. Many forget that Social Democracy was the first major Marxist movement. It was formed initially in Germany in 1875 when the followers of Lassalle and Marx united to form the Social Democratic Party of Germany (SPD). This party followed Marx and Engels recommendations that workers should form a distinct political party and conquer political power. It rejected the anarchist argument that workers should “abstain from politics” (i.e. elections) and instead, to use an expression from Marx’s preamble of the French Workers’ Party, turn the franchise “from a means of deception ... into an instrument of emancipation.” [Marx and Engels Reader, p. 566]

Rather than confirm Marx’s politics, Social Democracy confirmed Bakunin’s. It quickly degenerated into reformism. As Bakunin predicted, when “the workers ... send common workers ... to Legislative Assemblies ... The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois ... For men do not make their situations; on the contrary, men are made by them.” [The Basic Bakunin, p. 108]

“When struggles have not spontaneously broken capitalism, anarchists have tended to end up blaming workers for being insufficiently revolutionary. So 19th century French anarchist Pierre-Joseph Proudhon started off talking of his ‘love of the people’ but ended up saying he ‘despised’ humanity because they had not overthrown capitalism.”

Strange that they picked Proudhon as he was not a revolutionary anarchist. Rather he favoured the reform of capitalism via mutual credit and workers’ co-operatives and rejected the idea of “uprisings” and/or revolution (spontaneous or not). Anyone with even a limited knowledge of Proudhon’s work would know this. In addition, Proudhon’s last book (The Political Capacity of the Working Classes), finished on his deathbed, was an attempt to influence the workers’ movement towards his ideas of mutualism and federalism. Hardly to be expected from someone who “despised” humanity for not overthrowing capitalism. As examples go, the SWP is clearly clutching at straws.

Moreover, as we argued in the last section, revolutionary anarchists like Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Rocker, etc., all placed a great deal of time and energy in trying to work within and influence workers’ struggles and the labour movement in the here and now. They did not think that workers struggles would necessarily “spontaneously” break capitalism. While recognising, as we indicated in section 10, that the class struggle changed the ideas of those involved, they recognised the need for anarchist groups, papers, pamphlets to influence the class struggle in a libertarian way and towards a revolution. They were well aware that “spontaneous” uprisings occurred but were not enough in themselves — anarchists would need to organise as anarchists to influence the class struggle, particularly when “uprisings” were not occurring and the daily struggle between governed and governor, exploited and exploiter was taking less spectacular forms (hence
anarchist support and involvement in the labour movement and unions like the C.N.T.).

The SWP then move onto an even greater factual error. They claim that the “biggest anarchist groups today, the ‘autonomists’ in Europe, treat workers who have not fully broken with capitalist ideas as an enemy rather than a potential ally.” Unfortunately for them, the “autonomists” are not generally anarchists (the name should have given the SWP some clue, as anarchists are quite proud of their name and generally use it, or libertarian, to describe themselves). Rather the “autonomists” are non-Leninist Marxists whose ideas (and name) originally came from the Marxist left in Italy during the 1960s. It is also probable that the various European anarchist federations (such as the French and Italian) and anarcho-syndicalist unions are bigger than the autonomists. However, without any examples of the groups meant it is hard to evaluate the accuracy of the SWP’s claims as regards their size or opinions. Suffice it to say, the leading theorists of “autonomism” such as Toni Negri and Harry Cleaver do not express the opinions the SWP claim “autonomists” have.

25. Why does the history of centralised parties refute the SWP’s arguments?

The SWP admit that their analysis leaves much to be desired by mentioning that “[m]any anarchists understand the way that capitalism works and organise to change the world.” In other words, if an anarchist points out the flaws in their argument or a reader knows an anarchist who does not match the SWP’s distorted picture, then the SWP can say that they are part of the “many.” Extremely handy, if dishonest, comment to make.

The SWP continue by arguing that our “rejection of centralisation means that at critical moments their intervention in the struggle is fatally flawed.” This is ironic. Given that their example of the benefits of centralisation showed the flaws in that method of

Unsurprisingly, when the libertarian delegates to the congress reported back on conditions in Russia to their unions, they withdrew from the Trade-Union International.

In the Ukraine, the anarchist influenced Makhnovist movement also became an “ally” with the Bolsheviks in the common struggle against the counter-revolutionary White armies. The Bolsheviks betrayed their allies each time they formed an alliance.

The first alliance was in March 1919 during the struggle against Denikin, In May of that year, two Cheka agents sent to assassinate Makhno (the main leader of the movement) were caught and executed. The following month Trotsky, the commander of the Red Army, outlawed the Makhnovists and Communist troops attacked their headquarters at Gulyai-Polye.

Deninik’s massive attack on Moscow in September 1919 saw the shaky alliance resumed in the face of a greater threat. Once Denikin had been defeated, the Bolsheviks ordered the Makhnovists to the Polish front. This was obviously designed to draw them away from their home territory, so leaving it defenceless against Bolshevik rule. The Makhnovists refused and Trotsky, again, outlawed and attacked them.

Hostilities were again broken off when the White General Wrangel launched a major offensive in the summer of 1920. Again the Bolsheviks signed a pact with Makhno. This promised amnesty for all anarchists in Bolshevik prisons, freedom for anarchist propaganda, free participation to the Soviets and “in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management.” [quoted by Peter Arshinov, The History of the Makhnovist Movement, pp. 177–9] Once Wrangel had been defeated, the Bolsheviks ripped up the agreement and turned their forces, once again, against their “ally” and finally drove them out of the Soviet Union in 1921.

These events should be remembered when the authoritarian left argue that we aim for the same thing and are allies.
This changed once the Bolsheviks had taken power. On the night of April 11th, 1918, the Cheka surrounded 26 Anarchist clubs in Moscow, in the insuring fighting Anarchists suffered 40 casualties and 500 were taken prisoner. The Petrograd anarchists protested this attack:

“The Bolsheviks have lost their senses. They have betrayed the proletariat and attacked the anarchists. They have joined ... the counter-revolutionary bourgeoisie. They have declared war on revolutionary anarchism... We regarded you [Bolsheviks] as our revolutionary brothers. But you have proved to be traitors. You are Cains — you have killed your brothers ... There can be no peace with the traitors to the working class. The executioners of the revolution wish to become the executioners of anarchism.” [quoted by Paul Avrich, *The Anarchists in the Russian Revolution*, p. 113]

Fifteen days later similar raids were carried out in Petrograd. This repression, we must note, took place months before the outbreak of the Russian Civil War (in late May 1918). In May of that year, leading anarchist periodicals (including *Burevestnik*, *Anarkhia* and *Golos Truda*) were closed down by the government. The repression continued during the war and afterwards. Many imprisoned anarchists were deported from the “workers’ state” in 1921 after they went on hunger strike and their plight was raised by libertarian delegates to the founding congress of the Red International of Labour Unions held that year.

Unsurprisingly, the Bolsheviks denied they held anarchists. French anarchist Gaston Leval accounted how Lenin had “reiterated the charges made by Dzerzhinsky [founder of the Bolsheviks secret police, the Cheka] ... Those in prison were not true anarchists nor idealists — just bandits abusing our good intentions.” Leval, having gathered the facts, indicated this was not true, making Lenin backtrack. [*No Gods, No Masters*, vol. 2, p. 213]
the two main examples of Marxism in action, and presented coherent reasons why this would happen. Marxists have had to generate theories to explain these events after they have occurred, theories which conveniently ignore the role of Marxist politics in historical events.

This, we suggest, provides the explanation of why they have spent so much time re-writing history and smearing anarchism. Not being able to discuss our ideas honestly — for that would expose the authoritarian ideas of Bolshevism and its role in the degeneration of the Russian Revolution — the SWP invent a straw man they call anarchism and beat him to death. Unfortunately for them, anarchists are still around and can expose their lies for what they are.

Reply to errors and distortions in John Fisher’s “Why we must further Marxism and not Anarchism”

On the Trotskyist “New Youth” webpage there is an article entitled “Why we must further Marxism and not Anarchism” by John Fisher. This article contains numerous distortions of anarchist ideas and positions. Indeed, he makes so many basic errors that only two possible explanations are possible: either he knows nothing about anarchism or he does and is consciously lying.

We will compare his assertions to what anarchist theory actually argues in order to show that this is the case.

1. Why should “the so-called Anarchistic youth of today” be concerned that Trotskyists consider them allies?

Fisher starts his diatribe against anarchism with some thoughts on the radical youth active in the anti-globalisation demonstrations and movements:

“The so-called Anarchistic youth of today, year 2001, for the most part simply use the term ‘Anarchist’ as an indication of not wanting to go along with the ‘system’ in not wanting to assimilate, which is a giant leap forward on their part considering all their lives they’ve constantly been bombarded with the huge American Corporate propaganda machine. For this achievement, they are already more our ally than our enemy.”

It makes you wonder how Fisher knows this. Has there been a poll of “anarchistic youth” recently? It would be interesting to discover the empirical basis for this statement. Given the quality of the rest of the article, we can hazard a guess and say that these particular facts are just assertions and express wishful thinking rather than any sort of reality.

Needless to say, these “anarchistic youth” had better watch out. We all know what happens to the “ally” of the vanguard party once that party takes power. Anarchists remember the fate of our comrades when Lenin and Trotsky ruled the “proletarian” state.

The Russian anarchists were at the forefront of the struggle between the February and October revolutions in 1917. As socialist historian Samuel Farber notes, the anarchists “had actually been an unnamed coalition partner of the Bolsheviks in the October Revolution.” [Before Stalinism, p. 126] The anarchists were the “allies” of the Bolsheviks before they took power as both shared the goals of abolishing the provisional government and for a social revolution which would end capitalism.
lose their entire significance. They are reduced to ... [a] passive role ... A council of workers ceases to be free and of any use when liberty of the press no longer exists ... [and they] lose their significance when the elections are not preceded by a free electoral campaign, and when the elections are conducted under pressure of a party dictatorship ... It means the death-knell of the new system.” [Kropotkin’s Revolutionary Pamphlets, pp. 254–5]

Clearly, the fate of the soviets after October shows the dangers of Bolshevism to popular self-management and autonomy. We should be try and learn the lessons from the experience rather than, as pro-Bolsheviks do, rationalise and justify the usurpation of power by the party. The most obvious lesson to learn is to oppose the creation of any power above the soviets. This was not lost on Russian anarchists active in the revolution. For this reason, anarchistic-syndicalists resolved, in August 1918, that they “were for the soviets but categorically against the Soviet of People’s Commissars as an organ which does not stem from the soviet structure but only interferes with its work.” Thus they were “for the establishment of free soviets of workers’ and peasants’ representatives, and the abolition of the Soviet of People’s Commissars as an organisation inimical to the interests of the working class.” [contained in Paul Avrich, The Anarchists in the Russian Revolution, p. 118 and p. 117] This resolution was driven by the experience of the Bolshevik dominated “soviet” regime.

It is also worth quoting Rudolf Rocker at length on this issue:

“Let no one object that the ‘dictatorship of the proletariat’ cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International.” [Bakunin on Anarchism, p. 157]

Thus only by arguing for anarchist ideas can anarchy come about. It will not come about by accident. Hence Malatesta’s argument that anarchists “must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement ... [W]e must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised .... masses to awaken the spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces of the State and of capitalism and to raise the mental level and material conditions of the workers... And then, in the revolution, we must take an energetic part (if possible before and more effectively than the others) in the essential material struggle and drive it to the utmost limit in destroying all the repressive forces of the State. We must encourage the workers to take possession of the means of production ... and of stocks of manufactured goods; to organise immediately, on their own, an equitable distribution of ... products ... and for the continuation and intensification of production and all services useful to the public. We must ... promote action by the workers’ associations, the co-operatives, the voluntary groups — to prevent the emergence of new authoritarian powers, new governments, opposing them with violence if necessary, but above all rendering them useless.” [The Anarchist Revolution, pp. 109–110]

A key process of this is to argue that workers’ organisations become the framework of the new world and smash the state. As Murray Bookchin argues, anarchists “seek to persuade the factory committees, assemblies [and other organisations created by people
in struggle] ... to make themselves into genuine organs of popular self-management, not to dominate them, manipulate them, or hitch them to an all-knowing political party.” [Post-Scarcity Anarchism, p. 217] For more discussion of this issue, see section J.7.5 (What is the role of anarchists in a social revolution?).

Clearly, rather than being “the most crushing answer to anarchism,” the fate of the Albanian revolution rather shows how inaccurate Grant’s argument is. Anarchists do not hold the position he states we do, as we have proven. Anarchists were not surprised by the fate of the Albanian revolution as the Albanian workers were not fighting for an anarchist society but rather were protesting against the existing system. The role of anarchists in such a struggle would have been to convince those involved to smash the existing state and create a new society based on federations of workers’ associations. That this was not done suggests that anarchist ideas were not the dominant ones in the revolt and, therefore, it is hardly surprising that the revolution failed.

In other words, they meet the same fate as the soviets in the spring and summer of 1918.

Perhaps we should not be too surprised by these developments. After all, as we discuss in section 8 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the Bolsheviks had long had a distinctly undemocratic political ideology. Their support for democratic norms were less than consistent. The one thing they were consistent with was their hypocrisy. Thus democratic decisions were to be binding on their opponents (even if that majority had to be manipulated into being) but not upon them. Before the revolution Lenin had openly espoused a double standard of discipline. “We will not permit,” he argued, “the idea of unity to tie a noose around our necks, and we shall under no circumstances permit the Mensheviks to lead us by the rope.” [quoted by Robert V. Daniels, The Conscience of the Revolution, p. 17]

Once in power, their political perspectives had little trouble ignoring the will of the working class when it classed with what they, as that class’s self-proclaimed vanguard, had decided what was in its best interests. As we discussed in section H.5, such a autocratic perspective is at the heart of vanguardism. If you aim for party power, it comes as no surprise that the organs used to achieve it will wither under it. Just as muscles only remain strong if you use them, so soviets can only work if it is used to run society, not nominate the handful of party leaders who do. As Kropotkin argued in 1920:

“The idea of soviets ... of councils of workers and peasants ... controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural wealth by their own efforts.

“But as long as the country is governed by a party dictatorship, the workers’ and peasants’ councils evidently
not introduce soviet democracy in the cities after the end of the Civil War? Simply because they knew that such “loyalty” did not, in fact, exist. Zinoviev, for example, declared that the Bolsheviks’ support had been reduced to 1 per cent in early 1920. [Farber, Before Stalinism, p. 188]

So much for working class “loyalty” to the Bolsheviks. And, needless to say, Rees’ comments totally ignore the election results before the start of the civil war which prompted the Bolsheviks to pack or disband soviets. As Bertrand Russell summarised from his experiences in Lenin’s Russia during the civil war (in 1920): “No conceivable system of free elections would give majorities to the Communists, either in the town or country.” [The Practice and Theory of Bolshevism, pp. 40–1] Thus we have a major contradiction in the pro-Leninist argument. On the one hand, they stress that the workers supported the Bolsheviks wholeheartedly during the civil war. On the other, they argue that party dictatorship had to be imposed. If the Bolsheviks had the support they claimed they had, then they would have won soviet elections easily. They did not and so free soviet elections were not held.

This fact also explains the fate of the so-called “non party” conferences favoured by the Bolsheviks in late 1920. In spite of praising the soviets as “more democratic” than anything in the “best democratic republics of the bourgeois world,” Lenin also argued that non-Party conferences were also required “to be able to watch the mood of the masses, to come closer to them, to respond to their demands.” [Left-Wing Communism, p. 33 and p. 32] If the soviets were as democratic as Lenin claimed, then the Bolsheviks would have no need of “non-party” conferences. Significantly, the Bolsheviks “responded” to these conferences and “their demands” by disbanding them. This was because “[d]uring the disturbances” of late 1920, “they provided an effective platform for criticism of Bolshevik policies.” Their frequency was decreased and they “were discontinued soon afterward.” [Richard Sakwa, Soviet Communists in Power, 4638]

Appendix — The Russian Revolution

This appendix of the FAQ exists to discuss in depth the Russian revolution and the impact that Leninist ideology and practice had on its outcome. Given that the only reason why Leninism is taken seriously in some parts of the revolutionary movement is the Russian Revolution, it is useful to expose what Alexander Berkman called “the Bolshevik Myth.” This means discussing certain aspects of the revolution and indicating exactly how Leninism helped destroy any libertarian potential it had. It also means analysing common, modern-day, Leninist excuses for the actions of the Bolsheviks to see if they hold water. It also means analysing in depth specific events of the revolution (such as the Kronstadt uprising of March 1921 and the libertarian influenced Makhnovist movement) to see if there was an alternative to Leninism at the time. Luckily, the answer is yes.

As will become clear from this appendix, Bolshevik actions and ideology had a decisive impact on the development and degeneration of the Revolution. With its centralised, top-down statist political vision, its (openly) state capitalist economic vision and its aim for party power, Leninism had pushed the revolution in an authoritarian direction before the Russian Civil War started (the most common Leninist explanation of what went wrong). Leninism, ironically enough, proved the anarchist critique of Marxism to be correct. Anarchists are confident that in depth analysis of the Russian Revolution will confirm the limitations of Bolshevism as a
revolutionary movement and point to libertarian ideas for anyone who wants to change the world.

**What happened during the Russian Revolution?**

This appendix of the FAQ is not a full history of the Russian Revolution. The scope of such a work would simply be too large. Instead, this section will concentrate on certain key issues which matter in evaluating whether the Bolshevik revolution and regime were genuinely socialist or not. This is not all. Some Leninists acknowledge that that Bolshevik policies had little to do with socialism as such were the best that were available at the time. As such, this section will look at possible alternatives to Bolshevik policies and see whether they were, in fact, inevitable.

So for those seeking a comprehensive history of the revolution will have to look elsewhere. Here, we concentrate on those issues which matter when evaluating the socialist content of the revolution and of Bolshevism. In other words, the development of working class self-activity and self-organisation, workers’ resistance to their bosses (whether capitalist or “red”), the activity of opposition groups and parties and the fate of working class organisations like trade unions, factory committees and soviets. Moreover, the role of the ruling party and its ideals also need to be indicated and evaluated somewhat (see “How did Bolshevik ideology contribute to the failure of the Revolution?” for a fuller discussion of the role of Bolshevik ideology in the defeat of the revolution).

This means that this section is about two things, what Alexander Berkman termed “the Bolshevik Myth” and what Voline called “the Unknown Revolution” (these being the titles of their respective books on the revolution). After his experiences in Bolshevik Russia, Berkman came to the conclusion that it was “[h]igh time the truth about the Bolsheviki were told. The whitened sepulchre must

Clearly, attempts to blame the Civil War for the elimination of soviet power and democracy seems woefully weak given the actions of the Bolsheviks in the spring of 1918. And, equally clearly, the reduction of local soviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation (as codified in the Soviet Constitution of 1918) along with this direct repression.

The simple fact is that the soviets were marginalised and undermined after the October Revolution simply because they did reflect the wishes of the working class, in spite of their defects (defects the Bolsheviks exploited to consolidate their power). The problem was that the workers no longer supported Lenin. Few Leninists would support such an obvious conclusion. For example, John Rees states that “[i]n the cities the Reds enjoyed the fierce and virtually undivided loyalty of the masses throughout the civil war period.” [*In Defence of October*, pp. 3–82, *International Socialism*, no. 52, p. 47] Which, of course, explains the vast number of strikes and protests directed against the Bolshevik regime and the workers’ resolutions calling its end! It also explains why the Bolsheviks, in the face of such “undivided loyalty”, had to suppress opposition parties and impose a party dictatorship!

Simply put, if the Bolsheviks did have the support Rees states they did then they had no need to repress soviet democracy and opposition parties. Such “fierce” loyalty would not have been amenable to opposition arguments. Strange, then, that the Bolsheviks continually explained working class unrest in terms of the influence of Mensheviks, Left SRs and so on during the civil war. Moreover, Rees contradicts himself by arguing that if the Kronstadt revolt had succeeded, then it would have resulted in “the fall of the Bolsheviks.” [*Op. Cit.* , p. 63] Now, given that the Kronstadt revolt called for free soviet elections (and not “soviets without parties” as Rees asserts), why did the Bolsheviks not agree to them (at least in the cities)? If, as Rees argues, the Reds had the fierce loyalty of the city workers, then why did the Bolsheviks...
unmasked, the clay feet of the fetish beguiling the international proletariat to fatal will o’ wisps exposed. The Bolshevik myth must be destroyed.” By so doing, he aimed to help the global revolutionary movement learn from the experience of the Russian revolution. Given that “[t]o millions of the disenchanted and enslaved it became a new religion, the beacon of social salvation” it was an “imperative to unmask the great delusion, which otherwise might lead the Western workers to the same abyss as their brothers in Russia.” Bolshevism had “failed, utterly and absolutely” and so it was “incumbent upon those who have seen though the myth to expose its true nature ... Bolshevism is of the past. The future belongs to man and his liberty.”

Subsequent events proved Berkman correct. Socialism became linked to Soviet Russia and as it fell into Stalinism, the effect was to discredit socialism, even radical change as such, in the eyes of millions. And quite rightly too, given the horrors of Stalinism. If more radicals had had the foresight of Berkman and the other anarchists, this association of socialism and revolution with tyranny would have been combated and an alternative, libertarian, form of socialism would have risen to take the challenge of combating capitalism in the name of a genuine socialism, rooted in the ideals of liberty, equality and solidarity.

However, in spite of the horrors of Stalinism many people seeking a radical change in society are drawn to Leninism. This is partly to do with the fact that in many countries Leninist parties have a organised presence and many radicalised people come across them first. It is also partly to do with the fact that many forms of Leninism denounce Stalinism for what it was and raise the possibility of the “genuine” Leninism of the Bolshevik party under Lenin and Trotsky. This current of Leninism is usually called “Trotskyism” and has many offshoots. For some of these parties, the differences between Trotskyism and Stalinism is pretty narrow. The closer to orthodox Trotskyism you get, the more Stalinist it appears. As Victor Serge noted of Trotsky’s “Fourth International” in the 1930s,

soviets could no longer be influenced by ordinary workers, the regime could no longer be called a soviet regime.” [The Bolsheviks and Workers’ Control, p. xiii] By this obvious criteria, the Bolshevik regime was no longer soviet by the spring of 1918, i.e. before the outbreak of civil war. While opposition groups were not finally driven out of the soviets until 1923 (i.e. three years after the end of the civil war) their presence “does not indicate the existence of a multi-party system since they in no way threatened the dominating role of the Bolsheviks, and they had not done so from mid-1918.” [Richard Sakwa, Op. Cit., p. 168]

Tony Cliff, leader of the British Leninist party the SWP, justified the repression of the Mensheviks and SRs on the grounds that they were not prepared to accept the Soviet system and rejected the role of “constitutional opposition.” He tries to move forward the repression until after the outbreak of full civil war by stating that “[d]espite their strong opposition to the government, for some time, i.e. until after the armed uprising of the Czechoslovakian Legion [in late May, 1918] — the Mensheviks were not much hampered in their propaganda work.” If having papers banned every now and then, members arrested and soviets being disbanded as soon as they get a Menshevik majority is “not much hampered” then Cliff does seem to be giving that phrase a new meaning. Similarly, Cliff’s claim that the “civil war undermined the operation of the local soviets” also seems lacking based on this new research. [Lenin: Revolution Besieged, vol. 3, p. 163, p. 167 and p. 150]

However, the Bolshevik assault on the soviets started during the spring of 1918 (i.e. in March, April and May). That is before the Czech rising and the onset of full scale civil war which occurred in late May (see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?” on Bolshevik repression before the Czech revolt). Nor is it true that the Mensheviks rejected constitutional methods. Though they wished to see a re-convocation of the Constituent Assembly they believed that the only way to do this was by winning a majority of the soviets (see section 23).
“in the hearts of the persecuted I encountered the same attitudes as in their persecutors [the Stalinists] … Trotskyism was displaying symptoms of an outlook in harmony with the very Stalinism against which it had taken its stand … any person in the circles of the ‘Fourth International’ who went so far as to object to [Trotsky’s] propositions was promptly expelled and denounced in the same language that the bureaucracy had employed against us in the Soviet Union.” [Memoirs of a Revolutionary, p. 349] As we discuss in section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?”, perhaps this is unsurprising given how much politically Trotsky’s “Left Opposition” had shared with Stalinism.

Other Trotskyist parties have avoided the worse excesses of orthodox Trotskyism. Parties associated with the International Socialists, for example portray themselves as defending what they like to term “socialism from below” and the democratic promise of Bolshevism as expressed during 1917 and in the early months of Bolshevik rule. While anarchists are somewhat sceptical that Leninism can be called “socialism from below” (see section H.3.3), we need to address the claim that the period between February 1917 to the start of the Russian civil war at the end of May 1918 shows the real nature of Bolshevism. In order to do that we need to discuss what the Russian anarchist Voline called “The Unknown Revolution.”

So what is the “Unknown Revolution”? Voline, an active participant in 1917 Russian Revolution, used that expression as the title of his classic account of the Russian revolution. He used it to refer to the rarely acknowledged independent, creative actions of the revolutionary people themselves. As Voline argued, “it is not known how to study a revolution” and most historians “mistrust and ignore those developments which occur silently in the depths of the revolution … at best, they accord them a few words in passing … [Yet] it is precisely these hidden facts which are important, and which throw a true light on the events under consideration and on the period.” This section of the FAQ will try and present this “unknown revolution,” those movements “which fought the Bolshevik power in the name of true liberty

As discussed in section 21, the Committees of Poor Peasants were only supported by the Bolsheviks. Indeed, the Left SRs opposed then as being utterly counter-productive and an example of Bolshevik ignorance of village life. Consequently, we can say that the “delegates” from the committees were Bolsheviks or at least Bolshevik supporters. Significantly, by early 1919 Lenin admitted the Committees were failures and ordered them disbanded. The new policy reflected Left SR arguments against the Committees. It is hard not to concur with Vladimir Brovkin that by “establishing the committees of the poor to replace the [rural] soviets … the Bolsheviks were trying to create some institutional leverage of their own in the countryside for use against the SRs. In this light, the Bolshevik measures against the Menshevik-led city soviets … and against SR-led village soviets may be seen as a two-pronged attempt to stem the tide that threatened to leave them in the minority at the Fifth Congress of Soviets.” [The Mensheviks after October, p. 226]

Thus, by July 1918, the Bolsheviks had effectively secured a monopoly of political power in Russia. When the Bolsheviks (rightly, if hypocritically) disbanded the Constituent Assembly in January 1918, they had claimed that the soviets (rightly) represented a superior form of democracy. Once they started losing soviet elections, they could find no better way to “secure” workers’ democracy than to destroy it by gerrymandering soviets, disbanding them and expelling opposition parties from them. All peaceful attempts to replace them had been destroyed. The soviet CEC was marginalised and without any real power. Opposition parties had been repressed, usually on little or no evidence. The power of the soviets had been replaced by a soviet power in less than a year. However, this was simply the culmination of a process which had started when the Bolsheviks seized power in November 1917. Simply put, the Bolsheviks had always aimed for “all power to the party via the soviets” and once this had been achieved, the soviets could be dispensed with. Maurice Brinton simply stated the obvious when he wrote that “when institutions such as the
parties would have a majority at the Fifth All-Russian Congress of Soviets ... On the evening of 4 July, virtually from the moment the Fifth Congress of Soviets opened in Moscow’s Bolshoi Theatre, it was clear to the Left SRs that the Bolsheviks had effectively ‘fabricated’ a sizeable majority in the congress and consequently, that there was no hope whatever of utilising it to force a fundamental change in the government’s pro-German, anti-peasant policies.” While he acknowledges that an “exact breakdown of properly elected delegates may be impossible to ascertain” it was possible (“based on substantial but incomplete archival evidence”) to conclude that “it is quite clear that the Bolshevik majority was artificially inflated and highly suspect.” He quotes the report of one leading LSR, based on data from LSR members of the congress’s Credentials Committee, saying that the Bolsheviks “conjured up” 299 voting delegates. "The Bible tells us,” noted the report’s author, “that God created the heavens and the earth from nothing ... In the twentieth century the Bolsheviks are capable of no lesser miracles: out of nothing, they create legitimate credentials.” [Maria Spiridonova’s ‘Last Testament’, The Russian Review, pp. 424–46, vol. 54, July 1995, p. 426]

This gerrymandering played a key role in the subsequent events. “Deprived of their democratic majority,” Swain notes, “the Left SRs resorted to terror and assassinated the German ambassador Mirbach.” [Swain, Op. Cit., p. 176] The LSR assassination of Mirbach and the events which followed were soon labelled by the Bolsheviks an “uprising” against “soviet power” (see section 23 for more details). Lenin “decided that the killing of Mirbach provided a fortuitous opportunity to put an end to the growing Left SR threat.” [Rabinowitch, Op. Cit., p. 427] After this, the LSRs followed the Mensheviks and Right SRs and were expelled from the soviets. This in spite of the fact that the rank and file knew nothing of the plans of the central committees and that their soviet delegates had been elected by the masses. The Bolsheviks had finally eliminated the last of their more left-wing opponents (the anarchists had been dealt with the in April, see section 24 for details).
itly aimed to undermine such bodies or, at best, resulted in their marginalisation when implemented.

This section of the FAQ aims to make known the “unknown revolution” that continued under the Bolsheviks and, equally important, the Bolshevik response to it. As part of this process we need to address some of the key events of that period, such as the role of foreign intervention and the impact of the civil war. However, we do not go into these issues in depth here and instead cover them in depth in the appendix on “What caused the degeneration of the Russian Revolution?” This is because most Leninists excuse Bolshevik authoritarianism on the impact of the civil war, regardless of the facts of the matter. As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the ideology of Bolshevism played its role as well — something that modern day Leninists strenuously deny (again, regardless of the obvious). As we indicate in this section, the idea that Bolshevism came into conflict with the “unknown revolution” is simply not viable. Bolshevik ideology and practice made it inevitable that this conflict erupted, as it did before the start of the civil war (also see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?”).

Ultimately, the reason why Leninist ideas still have influence on the socialist movement is due to the apparent success of the Russian Revolution. Many Leninist groups, mainly Trotskyists and derivatives of Trotskyism, point to “Red October” and the creation of the first ever workers state as concrete examples of the validity of their ideas. They point to Lenin’s State and Revolution as proving the “democratic” (even “libertarian”) nature of Leninism while, at the same time, supporting the party dictatorship he created and, moreover, rationalising the utter lack of working class freedom and power under it. We will try to indicate the falseness of such claims. As will become clear from this section, the following summation of an anonymous revolutionary is totally correct:

donova’s address to the Congress: “You may have a majority in this congress, but you do have not a majority in the country.” [I. Steinberg, Spiridonova, p. 209]

Historian Geoffrey Swain indicates that the LSRs had a point:

“Up to the very last minute the Left SRs had been confident that, as the voice of Russia’s peasant masses, they would receive a majority when the Fifth Congress of Soviets assembled… which would enable them to deprive Lenin of power and launch a revolutionary war against Germany. Between April and the end of June 1918 membership of their party had almost doubled, from 60,000 to 100,000, and to prevent them securing a majority at the congress Lenin was forced to rely on dubious procedures: he allowed so-called committees of poor peasants to be represented at the congress. Thus as late as 3 July 1918 returns suggested a majority for the Left SRs, but a Congress of Committees of Poor Peasants held in Petrograd the same day ‘redressed the balance in favour of the Bolsheviks,’ to quote the Guardian’s Philips-Price, by deciding it had the right to represent the all those districts where local soviets had not been ‘cleansed of kulak elements and had not delivered the amount of food laid down in the requisitioning lists of the Committees of Poor Peasants.’ This blatant gerrymandering ensured a Bolshevik majority at the Fifth Congress of Soviets.” [The Origins of the Russian Civil War, p. 176]

Historian Alexander Rabinowitch confirms this gerrymandering. As he put it, by the summer of 1918 “popular disenchantment with Bolshevik rule was already well advanced, not only in rural but also in urban Russia” and the “primary beneficiaries of this nationwide grass-roots shift in public opinion were the Left SRs. During the second half of June 1918, it was an open question which of the two
This gerrymandering was not limited to just local soviets. The Bolsheviks used it at the fifth soviet congress as well.

First, it should be noted that in the run up to the congress, “on 14 June 1918, they expelled Martov and his five Mensheviks together with the Socialist Revolutionaries from the Central Executive Committee, closed down their newspapers .. and drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains.” [Israel Getzler, *Martov*, p. 181] The rationale for this action was the claim that the Mensheviks had taken part in anti-soviet rebellions (as we discuss in section 23, this was not true). The action was opposed by the Left SRs, who correctly questioned the legality of the Bolshevik expulsion of opposition groupings. They "branded the proposed expulsion bill illegal, since the Mensheviks and SRs had been sent to the CEC by the Congress of Soviets, and only the next congress had the right to withdraw their representation. Furthermore, the Bolsheviks had no right to pose as defenders of the soviets against the alleged SR counter-revolution when they themselves had been disbanding the peasants' soviets and creating the committees of the poor to replace them." [Brovkin, *The Mensheviks After October*, p. 231] When the vote was taken, only the Bolsheviks supported it. Their votes were sufficient to pass it.

Given that the Mensheviks had been winning soviet elections across Russia, it is clear that this action was driven far more by political needs than the truth. This resulted in the Left Social Revolutionaries (LSRs) as the only significant party left in the run up to the fifth Congress. The LSR author (and ex-commissar for justice in the only coalition soviet government) of the only biography of LSR leader (and long standing revolutionary who suffered torture and imprisonment in her fight against Tsarism) Maria Spiridonova states that “[b]etween 900 and 100 delegates were present. Officially the LSR numbered 40 percent of the delegates. They own opinion was that their number were even higher. The Bolsheviks strove to keep their majority by all the means in their power.” He quotes Spiri-

“In this, they were simply repeating the conclusions of anarchists. As Kropotkin stressed in 1920:

“...It seems to me that this attempt to build a communist republic on the basis of a strongly centralised state, under the iron law of the dictatorship of one party, has ended in a terrible fiasco. Russia teaches us how not to impose communism.” [Peter Kropotkin, quoted by Guerin, *Anarchism*, p. 106]

Ultimately, the experience of Bolshevism was a disaster. And as the Makhnovists in the Ukraine proved, Bolshevik ideology and practice was not the only option available (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). There were alternatives, but Bolshevik ideology simply excluded using them (we will discuss some possibilities in this various sub-sections below). In other words, Bolshevik ideology is simply not suitable for a real revolutionary movement and the problems it will face. In fact, its ideology and practice ensures that any such problems will be magnified and made worse, as the Russian revolution proves.

Sadly many socialists cannot bring themselves to acknowledge this. While recognising the evils of the Stalinist bureaucracy, these socialists deny that this degeneration of Bolshevism was inevitable and was caused by outside factors (namely the Russian Civil War or isolation). While not denying that these factors did have an effect in the outcome of the Russian Revolution, the seeds for bureaucracy existed from the first moment of the Bolshevik insurrection. These seeds where from three sources: Bolshevik politics, the nature of the state and the post-October economic arrangements favoured and implemented by the ruling party.
As we will indicate, these three factors caused the new “work-
ers’ state” to degenerate long before the outbreak of the Civil war in May of 1918. This means that the revolution was not defeated primarily because of isolation or the effects of the civil war. The Bolsheviks had already seriously undermined it from within long before the effects of isolation or civil war had a chance to take hold. The civil war which started in the summer of 1918 did take its toll in what revolutionary gains survived, not least because it allowed the Bolsheviks to portray themselves and their policies as the lesser of two evils. However, Lenin’s regime was already defending (state) capitalism against genuine socialist tendencies before the outbreak of civil war. The suppression of Kronstadt in March 1921 was simply the logical end result of a process that had started in the spring of 1918, at the latest. As such, isolation and civil war are hardly good excuses — particularly as anarchists had predicted they would affect every revolution decades previously and Leninists are meant to realise that civil war and revolution are inevitable. Also, it must be stressed that Bolshevik rule was opposed by the working class, who took collective action to resist it and the Bolsheviks justified their policies in ideological terms and not in terms of measures required by difficult circumstances (see the appendix on “What caused the degeneration of the Russian Revolution?”).

One last thing. We are sure, in chronicling the “excesses” of the Bolshevik regime, that some Leninists will say “they sound exactly like the right-wing.” Presumably, if we said that the sun rises in the East and sets in the West we would also “sound like the right-wing.” That the right-wing also points to certain facts of the revolution does not in any way discredit these facts. How these facts are used is what counts. The right uses the facts to discredit socialism and the revolution. Anarchists use them to argue for libertarian socialism and support the revolution while opposing the Bolshevik ideology and practice which distorted it. Similarly, unlike the right we take into account the factors which Leninists urge us to use to excuse Bolshevik authoritarianism (such as civil war, economic fate befell attempts to challenge the arrests of Moscow anarchists by the government on 12 April.” The chairman’s “handling of the anarchist matter ended its serious discussion in the VTsIK.” [Charles Duval, Op. Cit., pp. 13–14] Given that the VTsIK was meant to be the highest soviet body between congresses, the lack of concern for Bolshevik repression against soviets and opposition groups clearly shows the Bolshevik contempt for soviet democracy.

Needless to say, this destruction of soviet democracy continued during the civil war. For example, the Bolsheviks simply rejected the voice of people and would refuse to accept an election result. Emma Goldman attended an election meeting of bakers in Moscow in March, 1920. “It was,” she said, “the most exciting gathering I had witnessed in Russia.” However the “chosen representative, an Anarchist, had been refused his mandate by the Soviet authorities. It was the third time the workers gathered to re-elect their delegate ... and every time they elected the same man. The Communist candidate opposing him was Semashko, the Commissar of the Department of Health ... [who] raved against the workers for choosing a non-Communist, called anathema upon their heads, and threatened them with the Tcheka and the curtailment of their rations. But he had no effect on the audience except to emphasise their opposition to him, and to arouse antagonism against the party he represented. The workers’ choice was repudiated by the authorities and later even arrested and imprisoned.” After a hunger strike, they were released. In spite of chekists with loaded guns attending union meetings, the bakers “would not be intimidated” and threatened a strike unless they were permitted to elect their own candidate. This ensured the bakers’ demands were met. [My Disillusionment in Russia, pp. 88–9]

Unsurprisingly, “there is a mass of evidence to support the Menshevik accusations of electoral malpractice” during elections in May 1920. And in spite of Menshevik “declaration of support for the Soviet regime against the Poles” the party was “still subject to harassment.” [Skawa, Op. Cit., p. 178]
war had started (undoubtedly favouring the Bolsheviks) and the Bolsheviks had secured their majority by packing the soviet with non-workplace “representatives.”

In Tula, again in the spring of 1918, local Bolsheviks reported to the Bolshevik Central Committee that the “Bolshevik deputies began to be recalled one after another ... our situation became shakier with passing day. We were forced to block new elections to the soviet and even not to recognise them where they had taken place not in our favour.” In the end, the local party leader was forced to abolish the city soviet and to vest power in the Provincial Executive Committee. This refused to convene a plenum of the city soviet for more than two months, knowing that newly elected delegates were non-Bolshevik. [Smith, Op. Cit., p. 87]

In Yaroslavl’, the newly elected soviet convened on April 9th, 1918, and when it elected a Menshevik chairman, “the Bolshevik delegation walked out and declared the soviet dissolved. In response, workers in the city went out on strike, which the Bolsheviks answered by arresting the strike committee and threatening to dismiss the strikers and replace them with unemployed workers.” This failed and the Bolsheviks were forced to hold new elections, which they lost. Then “the Bolsheviks dissolved this soviet as well and places the city under martial law.” A similar event occurred in Riazan’ (again in April) and, again, the Bolsheviks “promptly dissolved the soviet and declared a dictatorship under a Military-Revolutionary Committee.” [Op. Cit., pp. 88–9]

The opposition parties raised such issues at the All-Russian Central Executive Committee of Soviets (VTsIK), to little avail. On the 11th of April, one “protested that non-Bolshevik controlled soviets were being dispersed by armed force, and wanted to discuss the issue.” The chairman “refus[ed] to include it in the agenda because of lack of supporting material” and such information be submitted to the presidium of the soviet. The majority (i.e. the Bolsheviks) “supported their chairman” and the facts were “submitted ... to the presidium, where they apparently remained.” It should be noted that the “same collapse and so on). We are simply not convinced by Leninist arguments.

Needless to say, few Leninists apply their logic to Stalinism. To attack Stalinism by describing the facts of the regime would make one sound like the “right-wing.” Does that mean socialists should defend one of the most horrific dictatorships that ever existed? If so, how does that sound to non-socialists? Surely they would conclude that socialism is about Stalinism, dictatorship, terror and so on? If not, why not? If “sounding like the right” makes criticism of Lenin’s regime anti-revolutionary, then why does this not apply to Stalinism? Simply because Lenin and Trotsky were not at the head of the dictatorship as they were in the early 1920s? Does the individuals who are in charge override the social relations of a society? Does dictatorship and one-man management become less so when Lenin rules? The apologists for Lenin and Trotsky point to the necessity created by the civil war and isolation within international capitalism for their authoritarian policies (while ignoring the fact they started before the civil war, continued after it and were justified at the time in terms of Bolshevik ideology). Stalin could make the same claim.

Other objections may be raised. It may be claimed that we quote “bourgeois” (or even worse, Menshevik) sources and so our account is flawed. In reply, we have to state that you cannot judge a regime based purely on what it says about itself. As such, critical accounts are required to paint a full picture of events. Moreover, it is a sad fact that few, if any, Leninist accounts of the Russian Revolution actually discuss the class and social dynamics (and struggles) of the period under Lenin and Trotsky. This means we have to utilise the sources which do, namely those historians who do not identify with the Bolshevik regime. And, of course, any analysis (or defence) of the Bolshevik regime will have to account for critical accounts, either by refuting them or by showing their limitations. As will become obvious in our discussion, the reason why latter day Bolsheviks talk about the class dynamics post-October.
in the most superficial way is that it would be hard, even impossible, to maintain that Lenin’s regime was remotely socialist or based on working class power. Simply put, from early 1918 (at the latest) conflict between the Bolsheviks and the Russian working masses was a constant feature of the regime. It is only when that conflict reached massive proportions that Leninists do not (i.e. cannot) ignore it. In such cases, as the Kronstadt rebellion proves, history is distorted in order to defend the Bolshevik state (see the appendix on “What was the Kronstadt Rebellion?” for details).

The fact that Leninists try to discredit anarchists by saying that we sound like the right is sad. In effect, it blocks any real discussion of the Russian Revolution and Bolshevism (as intended, probably). This ensures that Leninism remains above critique and so no lessons can be learnt from the Russian experience. After all, if the Bolsheviks had no choice then what lessons are there to learn? None. And if we are to learn no lessons (bar, obviously, mimic the Bolsheviks) we are doomed to repeat the same mistakes — mistakes that are partly explained by the objective circumstances at the time and partly by Bolshevik politics. But given that most of the circumstances the Bolsheviks faced, such as civil war and isolation, are likely to reappear in any future revolution, modern-day Leninists are simply ensuring that Karl Marx was right — history repeats itself, first time as tragedy, second time as farce.

Such a position is, of course, wonderful for the pro-Leninist. It allows them to quote Lenin and Trotsky and use the Bolsheviks as the paradigm of revolution while washing their hands of the results of that revolution. By arguing that the Bolsheviks were “making a virtue of necessity,” (to use the expression of Leninist Donny Gluckstein [The Tragedy of Bukharin, p. 41]), they are automatically absolved of proving their arguments about the “democratic” essence of Bolshevism in power. Which is useful as, logically, no such evidence could exist and, in fact, there is a whole host of evidence pointing the other way which can, by happy coincidence, be ignored. Indeed, from this perspective there is no there are data, the Mensheviks and the SRs won majorities on the city soviets in the spring of 1918.” Brovkin stresses that the “process of the Menshevik-SR electoral victories threatened Bolshevik power. That is why in the course of the spring and summer of 1918, the Soviet assemblies were disbanded in most cities and villages. To stay in power, the Bolsheviks had to destroy the Soviets... These steps generated a far-reaching transformation in the Soviet system, which remained ‘soviets’ in name only.” Brovkin presents accounts from numerous towns and cities. As an example, he discusses Tver’ where the “escalation of political tensions followed the already familiar pattern” as the “victory of the opposition at the polls” in April 1918 “brought about an intensification of the Bolshevik repression. Strikes, protests, and marches in Tver’ lead to the imposition of martial law.” [Brovkin, Op. Cit., p. 46, p. 47, p. 48 and p. 11] Thus Bolshevik armed force not only overthrew the election results, it also suppressed working class protest against such actions. (Brovkin’s book The Mensheviks after October contains the same information as his article).

This Bolshevik attack on the soviets usually started with attempts to stop new elections. For example, after a demonstration in Petrograd in favour of the Constituent Assembly was repressed by the Bolsheviks in mid-January 1918, calls for new elections to the soviet occurred in many factories. “Despite the efforts of the Bolsheviks and the Factory Committees they controlled, the movement for new elections to the soviet spread to more than twenty factories by early February and resulted in the election of fifty delegates: thirty-six SRs, seven Mensheviks and seven non-party.” However, the Bolsheviks “unwillingness to recognise the elections and to seat new delegates pushed a group of Socialists to ... lay plans for an alternative workers’ forum ... what was later to become the Assembly of Workers’ Plenipotentiaries.” [Scott Smith, “The Social-Revolutionaries and the Dilemma of Civil War”, The Bolsheviks in Russian Society, pp. 83–104, Vladimir N. Brovkin (Ed.), pp. 85–86] This forum, like all forms of working class protest, was crushed by the Bolshevik state. By the time the elections were held, in June 1918, the civil
For example, the Mensheviks “made something of a comeback about Saratov workers in the spring of 1918, for which the Bolsheviks expelled them from the soviet.” [Donald J. Raleigh, *Experiencing Russia’s Civil War*, p. 187] Izhevsk, a town of 100,000 with an armaments industry which was the main suppliers of rifles to the Tzar’s Army, experienced a swing to the left by the time of the October revolution. The Bolsheviks and SR-Maximalists became the majority and with a vote 92 to 58 for the soviet to assume power. After a revolt by SR-Maximalist Red Guards against the Bolshevik plans for a centralised Red Army in April, 1918, the Bolsheviks became the sole power. However, in the May elections the Mensheviks and [right] SRs “experienced a dramatic revival” and for “the first time since September 1917, these two parties constituted a majority in the Soviet by winning seventy of 135 seats.” The Bolsheviks “simply refused to acquiesce to the popular mandate of the Mensheviks and Socialist Revolutionaries.” In June, the Bolshevik leadership “appealed to the Karzan’ Soviet ... for assistance.” The troops sent along with the Bolshevik dominated Red Guards “abrogated the results of the May and June elections” and imprisoned the SR and Menshevik soviet delegates. The summer of 1918 also saw victories for the SRs and Mensheviks in the soviet elections in Votkinsk, a steel town near Izhevsk. “As in Izhevsk the Bolsheviks voided the elections.” [Stephan M. Merk, “The ‘Class-Tragedy’ of Izhevsk: Working Class Opposition to Bolshevism in 1918”, pp. 176–90, *Russian History*, vol. 2, no. 2, p. 181 and p. 186]

However, the most in depth account of this destruction of soviet is found in the research of Vladimir Brovkin. According to him, there “are three factors” which emerge from the soviet election results in the spring of 1918. These are, firstly, “the impressive success of the Menshevik-SR opposition” in those elections in all regions in European Russia. The second “is the Bolshevik practice of outright disbandment of the Menshevik-SR-controlled soviets. The third is the subsequent wave of anti-Bolshevik uprisings.” In fact, “in all provincial capitals of European Russia where elections were held on which point even discussing the revolution at all, beyond praising the activities and ideology of the Bolsheviks while sadly noting that “fate” (to quote Leninist Tony Cliff) ensured that they could not fulfil their promises. Which, of course, almost Leninist accounts do boil down to. Thus, for the modern Leninist, the Bolsheviks cannot be judged on what they did nor what they said while doing it (or even after). They can only be praised for what they said and did before they seized power.

However, anarchists have a problem with this position. It smacks more of religion than theory. Karl Marx was right to argue that you cannot judge people by what they say, only by what they do. It is in this revolutionary spirit that this section of the FAQ analyses the Russian revolution and the Bolshevik role within it. We need to analyse what they did when they held power as well as the election manifesto. As we will indicate in this section, neither was particularly appealing.

Finally, we should note that Leninists today have various arguments to justify what the Bolsheviks did once in power. We discuss these in the appendix on “What caused the degeneration of the Russian Revolution?” We also discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?” the ideological roots of the counter-revolutionary role of the Bolsheviks during the revolution. That the politics of the Bolsheviks played its role in the failure of the revolution can be seen from the example of the anarchist influenced Makhnovist movement which applied basic libertarian principles in the same difficult circumstances of the Russian Civil War (see “Why does the Makhnovist movement show there is an alternative to Bolshevism?” on this important movement).
1 Can you give a short summary of what happened in 1917?

2 How did the Bolsheviks gain mass support?

3 Surely the Russian Revolution proves that vanguard parties work?

No, far from it. Looking at the history of vanguardism we are struck by its failures, not its successes. Indeed, the proponents of “democratic centralism” can point to only one apparent success of their model, namely the Russian Revolution. However, we are warned by Leninists that failure to use the vanguard party will inevitably condemn future revolutions to failure:

“The proletariat can take power only through its vanguard... Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power... The Soviets are the only organised form of the tie between the vanguard and the class. A revolutionary content can be given this form only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain). No one has either shown in practice or tried to explain articulate on paper how the proletariat can seize power without the political leadership of a party that knows what it wants.” [Trotsky, Stalinism and Bolshevism]

To anarchist ears, such claims seem out of place. After all, did the Russian Revolution actually result in socialism or even a viable form of soviet democracy? Far from it. Unless you picture revolution as simply the changing of the party in power, you have to acknowledge that while the Bolshevik party did take power

A similar situation existed in Moscow. For example, the largest single union in the soviet in 1920 was that of soviet employees with 140 deputies (9% of the total), followed by the metal workers with 121 (8%). In total, the bureaucracies of the four biggest trade unions had 29.5% of delegates in the Moscow soviet. This packing of the soviet by the trade union bureaucracy existed in 1918 as well, ensuring the Bolsheviks were insulated from popular opposition and the recall of workplace delegates by their electors. Another form of gerrymandering was uniting areas of Bolshevik strength “for electoral purposes with places where they were weak, such as the creation of a single constituency out of the Moscow food administration (MPO) and the Cheka in February 1920.” [Richard Sakwa, Soviet Communists in Power, p. 179 and p. 178]

However, this activity was mild compared to the Bolshevik response to soviet elections which did not go their way. According to one historian, by the spring of 1918 “Menshevik newspapers and activists in the trade unions, the Soviets, and the factories had made a considerable impact on a working class which was becoming increasingly disillusioned with the Bolshevik regime, so much so that in many places the Bolsheviks felt constrained to dissolve Soviets or prevent re-elections where Mensheviks and Socialist Revolutionaries had gained majorities.” [Israel Getzler, Martov, p. 179] This is confirmed by other sources. “By the middle of 1918,” notes Leonard Schapiro, “the Mensheviks could claim with some justification that large numbers of the industrial working class were now behind them, and that for the systematic dispersal and packing of the soviets, and the mass arrests at workers’ meetings and congresses, their party could eventually have won power by its policy of constitutional opposition. In the elections to the soviets which were taking place in the spring of 1918 throughout Russia, arrests, military dispersal, even shootings followed whenever Mensheviks succeeded in winning majorities or a substantial representation.” [The Origin of the Communist Autocracy, p. 191]
might have put a brake to a procedure that could only benefit the Bolshevik party.” [Marc Ferro, *October 1917*, p. 191 and p. 195]

The effects of this can be seen in Petrograd soviet elections of June 1918. In these the Bolsheviks “lost the absolute majority in the soviet they had previously enjoyed” but remained its largest party. However, the results of these elections were irrelevant. This was because “under regulations prepared by the Bolsheviks and adopted by the ‘old’ Petrograd soviet, more than half of the projected 700-plus deputies in the ‘new’ soviet were to be elected by the Bolshevik-dominated district soviets, trade unions, factory committees, Red Army and naval units, and district worker conferences: thus, the Bolsheviks were assured of a solid majority even before factory voting began.” [Alexander Rabinowitch, *Early Disenchantment with Bolshevik Rule*, p. 45]

To be specific, the number of delegates elected directly from the workplace made up a mere third of the new soviet (i.e. only 260 of the 700 plus deputies in the new soviet were elected directly from the factories): “It was this arbitrary ‘stacking’ of the new soviet, much more than election of ‘dead souls’ from shut-down factories, unfair campaign practices, falsification of the vote, or direct repression, that gave the Bolsheviks an unfair advantage in the contest.” [Alexander Rabinowitch, *The Petrograd First City District Soviet during the Civil War*, p. 140]

In other words, the Bolsheviks gerrymandered and packed soviets to remain in power, so distorting the soviet structure to ensure Bolshevik dominance. This practice seems to have been commonplace. In Saratov, as in Petrograd, “the Bolsheviks, fearing that they would lose elections, changed the electoral rules ... in addition to the delegates elected directly at the factories, the trade unions — but only those in favour of soviet power, in other words supporters of the Bolsheviks and Left SRs — were given representation. Similarly, the political parties supporting Soviet power automatically received twenty-five seats in the soviets. Needless to say, these rules heavily favoured the ruling parties” as the Mensheviks and SRs “were regarded by the Bolsheviks as being against Soviet power.” [Brovkin, *Op. Cit.*, p. 30]

In Russian in November 1917, the net effect of this was not the stated goals that justified that action. Thus, if we take the term “effective” to mean “an efficient means to achieve the desired goals” then vanguardism has not been proven to be effective, quite the reverse (assuming that your desired goal is a socialist society, rather than party power). Needless to say, Trotsky blames the failure of the Russian Revolution on “objective” factors rather than Bolshevik policies and practice, an argument we address in detail in “What caused the degeneration of the Russian Revolution?” and will not do so here.

So while Leninists make great claims for the effectiveness of their chosen kind of party, the hard facts of history are against their positive evaluation of vanguard parties. Ironically, even the Russian Revolution disproves the claims of Leninists. The fact is that the Bolshevik party in 1917 was very far from the “democratic centralist” organisation which supporters of “vanguardism” like to claim it is. As such, its success in 1917 lies more in its divergence from the principles of “democratic centralism” than in their application. The subsequent degeneration of the revolution and the party is marked by the increasing application of those principles in the life of the party.

Thus, to refute the claims of the “effectiveness” and “efficiency” of vanguardism, we need to look at its one and only success, namely the Russian Revolution. As the Cohen-Bendit brothers argue, “far from leading the Russian Revolution forwards, the Bolsheviks were responsible for holding back the struggle of the masses between February and October 1917, and later for turning the revolution into a bureaucratic counter-revolution — in both cases because of the party’s very nature, structure and ideology.” Indeed, “[f]rom April to October, Lenin had to fight a constant battle to keep the Party leadership in tune with the masses.” [Obsolete Communism, p. 183 and p. 187] It was only by continually violating its own “nature, structure and ideology” that the Bolshevik party played an important role in the revolution. Whenever the principles of “democratic centralism”
were applied, the Bolshevik party played the role the Cohen-Bendit brothers subscribed to it (and once in power, the party’s negative features came to the fore).

Even Leninists acknowledge that, to quote Tony Cliff, throughout the history of Bolshevism, “a certain conservatism arose.” Indeed, “[a]t practically all sharp turning points, Lenin had to rely on the lower strata of the party machine against the higher, or on the rank and file against the machine as a whole.” [Lenin, vol. 2, p. 135] This fact, incidentally, refutes the basic assumptions of Lenin’s party schema, namely that the broad party membership, like the working class, was subject to bourgeois influences so necessitating central leadership and control from above.

Looking at both the 1905 and 1917 revolutions, we are struck by how often this “conservatism” arose and how often the higher bodies were behind the spontaneous actions of the masses and the party membership. Looking at the 1905 revolution, we discover a classic example of the inefficiency of “democratic centralism.” Facing in 1905 the rise of the soviets, councils of workers’ delegates elected to co-ordinate strikes and other forms of struggle, the Bolsheviks did not know what to do. “The Petersburg Committee of the Bolsheviks,” noted Trotsky, “was frightened at first by such an innovation as a non-partisan representation of the embattled masses, and could find nothing better to do than to present the Soviet with an ultimatum: immediately adopt a Social-Democratic program or disband. The Petersburg Soviet as a whole, including the contingent of Bolshevik workingmen as well ignored this ultimatum without batting an eyelash.” [Stalin, vol. 1, p. 106] More than that, “[t]he party’s Central Committee published the resolution on October 27, thereby making it the binding directive for all other Bolshevik organisations.” [Oskar Anweiler, The Soviets, p. 77] It was only the return of Lenin which stopped the Bolshevik’s open attacks against the Soviet (also see section 8 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”).
Local soviets “had little input into the formation of national policy” and “[e]ven at higher levels, institutional power shifted away from the soviets.” [C. Sirianni, Op. Cit., p. 204 and p. 203] The soviets quickly had become rubber-stamps for the Communist government, with the Soviet Constitution of 1918 codifying the centralisation of power and top-down decision making. Local soviets were expected to “carry out all orders of the respective higher organs of the soviet power” (i.e. to carry out the commands of the central government).

This was not all. While having popular support in October 1917, the realities of “Leninism in power” soon saw a backlash develop. The Bolsheviks started to loose popular support to opposition groups like the Mensheviks and SRs (left and right). This growing opposition was reflected in two ways. Firstly, a rise in working class protests in the form of strikes and independent organisations. Secondly, there was a rise in votes for the opposition parties in soviet elections. Faced with this, the Bolsheviks responded in three ways, delaying elections, gerrymandering or force. We will discuss each in turn.

Lenin argued in mid-April 1918 that the “socialist character of Soviet, i.e. proletarian democracy” lies, in part, in because “the people themselves determine the order and time of elections.” [The Immediate Tasks of the Soviet Government, pp. 36–7] However, the reality in the grassroots was somewhat different. There “the government [was] continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918” because it “feared that the opposition parties would show gains. This fear was well founded since in the period immediately preceding 25 January, in those Petrograd factories where the workers had decided to hold new elections, the Mensheviks, SRs, and non-affiliated candidates had won about half the seats.” [Samuel Farber, Before Stalinism, p. 22] In Yaroslavl, the more the Bolsheviks tried to postpone the elections, the more the idea of holding new elections became an issue itself.” When the Bolsheviks gave in and held elections in early

The rationale for these attacks is significant. The St. Petersburg Bolsheviks were convinced that “only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.” [quoted by Anweiler, Op. Cit., p. 77] In other words, the soviets could not reflect workers’ interests because they were elected by the workers! The implications of this perspective came clear in 1918, when the Bolsheviks gerrymandered and disbanded soviets to remain in power (see section 6). That the Bolshevik’s position flowed naturally from Lenin’s arguments in What is to be Done? is clear. Thus the underlying logic of Lenin’s vanguardism ensured that the Bolsheviks played a negative role with regards the soviets which, combined with “democratic centralism” ensured that it was spread far and wide. Only by ignoring their own party’s principles and staying in the Soviet did rank and file Bolsheviks play a positive role in the revolution. This divergence of top and bottom would be repeated in 1917.

Given this, perhaps it is unsurprising that Leninists started to rewrite the history of the 1905 revolution. Victor Serge, a “Left Oppositionist” and anti-Stalinist asserted in the late 1920s that in 1905 the Petrograd Soviet was “led by Trotsky and inspired by the Bolsheviks.” [Year One of the Russian Revolution, p. 36]. While the former claim is correct, the latter is not. As noted, the Bolsheviks were initially opposed the soviets and systematically worked to undermine them. Unsurprisingly, Trotsky at that time was a Menshevik, not a Bolshevik. After all, how could the most revolutionary party that ever existed have messed up so badly? How could democratic centralism faired so badly in practice? Best, then, to suggest that it did not and give the Bolsheviks a role better suited to the rhetoric of Bolshevism than its reality.

Trotsky was no different. He, needless to say, denied the obvious implications of these events in 1905. While admitting that
the Bolsheviks “adjusted themselves more slowly to the sweep of the movement” and that the Mensheviks “were preponderant in the Soviet,” he tries to save vanguardism by asserting that “the general direction of the Soviet’s policy proceeded in the main along Bolshevik lines.” So, in spite of the lack of Bolshevik influence, in spite of the slowness in adjusting to the revolution, Bolshevism was, in fact, the leading set of ideas in the revolution! Ironically, a few pages later, he mocks the claims of Stalinists that Stalin had “isolated the Mensheviks from the masses” by noting that the “figures hardly bear [the claims] out.” [Op. Cit., p. 112 and p. 117] Shame he did not apply this criteria to his own claims.

Of course, every party makes mistakes. The question is, how did the “most revolutionary party of all time” fare in 1917. Surely that revolution proves the validity of vanguardism and “democratic centralism”? After all, there was a successful revolution, the Bolshevik party did seize power. However, the apparent success of 1917 was not due to the application of “democratic centralism,” quite the reverse. While the myth of 1917 is that a highly efficient, democratic centralist vanguard party ensured the overthrow of the Provisional Government in November 1917 in favour of the Soviets (or so it seemed at the time) the facts are somewhat different. Rather, the Bolshevik party throughout 1917 was a fairly loose collection of local organisations (each more than willing to ignore central commands and express their autonomy), with much internal dissent and infighting and no discipline beyond what was created by common loyalty. The “democratic centralist” party, as desired by Lenin, was only created in the course of the Civil War and the tightening of the party dictatorship. In other words, the party became more like a “democratic centralist” one as the revolution degenerated. As such, the various followers of Lenin (Stalinists, Trotskyists and their multitude of offshoots) subscribe to a myth, which probably explains their lack of success in reproducing a similar organisation since. So assuming that the Bolsheviks did play an important role in the Russian revolution, it was because it was not the centralised,
Under the Bolsheviks, the presidium was converted “into the de facto centre of power within VTsIK.” It “began to award representations to groups and factions which supported the government. With the VTsIK becoming ever more unwieldy in size by the day, the presidium began to expand its activities.” The presidium was used “to circumvent general meetings.” Thus the Bolsheviks were able “to increase the power of the presidium, postpone regular sessions, and present VTsIK with policies which had already been implemented by the Sovnarkom. Even in the presidium itself very few people determined policy.” [Charles Duval, Op. Cit., p.7, p. 8 and p. 18]

So, from the very outset, the VTsIK was overshadowed by the “Council of People’s Commissars” (CPC). In the first year, only 68 of 480 decrees issued by the CPC were actually submitted to the Soviet Central Executive Committee, and even fewer were actually drafted by it. The VTsIK functions “were never clearly delineated, even in the constitution, despite vigorous attempts by the Left SRs … that Lenin never saw this highest soviet organ as the genuine equal of his cabin and that the Bolsheviks deliberated obstructed efforts at clarification is [a] convincing” conclusion to draw. It should be stressed that this process started before the outbreak of civil war in late May, 1918. After that, the All-Russian Congress of Soviets, which convened every three months or so during the first year of the revolution, met annually thereafter. Its elected VTsIK “also began to meet less frequently, and at the height of the civil war in late 1918 and throughout 1919, it never once met in full session.” [Carmen Sirianni, Workers’ Control and Socialist Democracy, pp. 203–4]

The marginalisation of the soviets can be seen from the decision on whether to continue the war against Germany. As Cornelius Castoriadis notes, under Lenin “[c]ollectively, the only real instance of power is the Party, and very soon, only the summits of the Party. Immediately after the seizure of power the soviets as institutions are reduced to the status of pure window-dressing (we need only look at the fact that, already at the beginning of 1918 in the discussions lead-

disciplined Bolshevik party of Leninist myth. Indeed, when the party did operate in a vanguardist manner, failure was soon to follow.

This claim can be proven by looking at the history of the 1917 revolution. The February revolution started with a spontaneous protests and strikes. As Murray Bookchin notes, “the Petrograd organisation of the Bolsheviks opposed the calling of strikes precisely on the eve of the revolution which was destined to overthrow the Tsar. Fortunately, the workers ignored the Bolshevik ‘directives’ and went on strike anyway. In the events which followed, no one was more surprised by the revolution than the ‘revolutionary’ parties, including the Bolsheviks.” [Post-Scarcity Anarchism, p. 194] Trotsky quotes one of the Bolshevik leaders at the time:

“Absolutely no guiding initiative from the party centres was felt … the Petrograd Committee had been arrested and the representative of the Central Committee … was unable to give any directives for the coming day.” [quoted by Trotsky, History of the Russian Revolution, vol. 1, p. 147]

Not the best of starts. Of course rank and file Bolsheviks took part in the demonstrations, street fights and strikes and so violated the principles their party was meant to be based on. As the revolution progressed, so did the dual nature of the Bolshevik party (i.e. its practical divergence from “democratic centralism” in order to be effective and attempts to force it back into that schema which handicapped the revolution). However, during 1917, “democratic centralism” was ignored in order to ensure the the Bolsheviks played any role at all in the revolution. As one historian of the party makes clear, in 1917 and until the outbreak of the Civil War, the party operated in ways that few modern “vanguard” parties would tolerate:

“The committees were a law unto themselves when it came to accepting orders from above. Democratic cen-
tralism, as vague a principle of internal administration as there ever has been, was commonly held at least to enjoin lower executive bodies that they should obey the behests of all higher bodies in the organisational hierarchy. But town committees in practice had the devil’s own job in imposing firm leadership ... Insubordination was the rule of the day whenever lower party bodies thought questions of importance were at stake. “Suburb committees too faced difficulties in imposing discipline. Many a party cell saw fit to thumb its nose at higher authority and to pursue policies which it felt to be more suited to local circumstances or more desirable in general. No great secret was made of this. In fact, it was openly admitted that hardly a party committee existed which did not encounter problems in enforcing its will even upon individual activists.” [Robert Service, *The Bolshevik Party in Revolution 1917–1923*, pp. 51–2]

So while Lenin’s ideal model of a disciplined, centralised and top-down party had been expounded since 1902, the operation of the party never matched his desire. As Service notes, “a disciplined hierarchy of command stretching down from the regional committees to party cells” had “never existed in Bolshevik history.” In the heady days of the revolution, when the party was flooded by new members, the party ignored what was meant to be its guiding principles. As Service constantly stresses, Bolshevik party life in 1917 was the exact opposite of that usually considered (by both opponents and supporters of Bolshevism) as it normal mode of operation. “Anarchist attitudes to higher authority,” he argues, “were the rule of the day” and “no Bolshevik leader in his right mind could have contemplated a regular insistence upon rigid standards of hierarchical control and discipline unless he had abandoned all hope of establishing a mass socialist party.” This meant that “in the Russia of 1917 it was as the VTsIK chairman and his tight control over its praesidium and the large, disciplined and compliant Bolshevik majority in the plenary assembly, Sverdlov isolated the opposition and rendered it impotent. So successful was he that, by early December 1917, Sukhanov had already written off the VTsIK as ‘a sorry parody of a revolutionary parliament,’ while for the Bolshevik, Martin Latsis-Zurabs, the VTsIK was not even a good rubberstamp. Latsis campaigned vigorously in March and April 1918 for the VTsIK’s abolition: with its ‘idle, long-winded talk and its incapacity for productive work’ the VTsIK merely held up the work of government, he claimed. And he may have had a point: during the period of 1917 to 1918, the Sovnarkom issued 474 decrees, the VTsIK a mere 62.” [Israel Getzler, *Soviets as Agents of Democratisation*, p. 27]

This process was not an accident. Far from it. In fact, the Bolshevik chairman Sverdlov knew exactly what he was doing. This included modifying the way the CEC worked:

“The structure of VTsIK itself began to change under Sverdlov. He began to use the presidium to circumvent the general meeting, which contained eloquent minority spokesmen ... Sverdlov’s use of the presidium marked a decisive change in the status of that body within the soviet hierarchy. In mid-1917 ... [the] plenum had directed all activities and ratified bureau decisions which had a ‘particularly important social-political character.’ The bureau ... served as the executive organ of the VTsIK plenum ... Only in extraordinary cases when the bureau could no be convened for technical reason could the presidium make decisions. Even then such actions remained subject to review by the plenum.” [Charles Duval, “Yakov M. Sverdlov and the All-Russian Central Executive Committee of Soviets (VTsIK),” pp. 3–22, *Soviet Studies*, vol. XXXI, no. 1, January 1979, pp. 6–7]
the Bolsheviks relied upon the appointment from above of commis-
sars with plenipotentiary powers, and they split up and reconstituted
fractious Soviets and intimidated political opponents.” [Neil Harding,
Leninism, p. 253] Strange actions for a party declaring it was
acting to ensure “All power to the Soviets” (as we discussed in the
last section, this was always considered by Lenin as little more than
a slogan to hide the fact that the party would be in power).

It is doubtful that when readers of Lenin’s State and Revo-
lution read his argument for combining legislative and executive
powers into one body, they had this in mind! But then, as we dis-
cussed in section 4, that work was never applied in practice so we
should not be too surprised by this turn of events. One thing is sure,
four days after the “soviet” revolution the Soviets had been replaced
as the effective power in society by a handful of Bolshevik leaders.
So the Bolsheviks immediately created a power above the Soviets
in the form of the CPC. Lenin’s argument in The State and Revo-
lution that, like the Paris Commune, the workers’ state would be
based on a fusion of executive and administrative functions in the
hands of the workers’ delegates did not last one night. In reality,
the Bolshevik party was the real power in “soviet” Russia.

Given that the All-Russian central Executive Committee of So-
viet (VTsIK) was dominated by Bolsheviks, it comes as no surprise
to discover it was used to augment this centralisation of power into
the hands of the party. The VTsIK (“charged by the October revolu-
tion with controlling the government,” the Sovnarkom) was “used not
to control but rather extend the authority and centralising fiat of the
government. That was the work of Iakov Sverdlov, the VTsIK chairman,
who — in close collaboration with Lenin as chairman of the
Sovnarkom — ensured that the government decrees and ordinances
were by the VTsIK and that they were thus endowed with Soviet legit-
imacy when they were sent to provincial soviet executive committees
for transmission to all local Soviets … To achieve that, Sverdlov had to
reduce the ‘Soviet Parliament’ to nothing more than an ‘administrative
branch’ (as Sukhanov put it) of the Sovnarkom. Using his position
the easiest thing in the world for lower party bodies to rebut the de-
mands and pleas by higher authority.” He stresses that “[s]uburb and
town committees … often refused to go along with official policies …
they also … sometimes took it into their heads to engage in active

This worked both ways, of course. Town committees did “snub
their nose at lower-echelon viewpoints in the time before the next ele-
ciction. Try as hard as they might, suburb committees and ordinary cells
could meanwhile do little to rectify matters beyond telling their own
representative on their town committee to speak on their behalf. Or,
if this too failed, they could resort to disruptive tactics by criticising
it in public and refusing it all collaboration.” [Op. Cit., pp. 52–3]

Even by early 1918, the Bolshevik party bore little resemblance to
the “democratic centralist” model desires by Lenin:

“The image of a disciplined hierarchy of party commit-
tees was therefore but a thin, artificial veneer which was
used by Bolshevik leaders to cover up the cracked surface
of the real picture underneath. Cells and suburb commit-
tees saw no reason to kow-tow to town committees; nor
did town committees feel under compulsion to show any
greater respect to their provincial and regional commit-
tees than before.” [Op. Cit., p. 74]

It is this insubordination, this local autonomy and action in
spite of central orders which explains the success of the Bolsheviks
in 1917. Rather than a highly centralised and disciplined body of
“professional” revolutionaries, the party in 1917 saw a “significant
change … within the membership of the party at local level … From
the time of the February revolution requirements for party member-
ship had been all but suspended, and now Bolshevik ranks swelled
with impetuous recruits who knew next to nothing about Marxism
and who were united by little more than overwhelming impatience for
revolutionary action.” [Alexander Rabinowitch, Prelude to Revo-
lution, p. 41]
This mass of new members (many of whom were peasants who had just recently joined the industrial workforce) had a radicalising effect on the party’s policies and structures. As even Leninist commentators argue, it was this influx of members who allowed Lenin to gain support for his radical revision of party aims in April. However, in spite of this radicalisation of the party base, the party machine still was at odds with the desires of the party. As Trotsky acknowledged, the situation “called for resolute confrontation of the sluggish Party machine with masses and ideas in motion.” He stressed that “the masses were incomparably more revolutionary than the Party, which in turn was more revolutionary than its committeemen.” Ironically, given the role Trotsky usually gave the party, he admits that “[w]ithout Lenin, no one had known what to make of the unprecedented situation.” [Stalin, vol. 1, p. 301, p. 305 and p. 297]

Which is significant in itself. The Bolshevik party is usually claimed as being the most “revolutionary” that ever existed, yet here is Trotsky admitting that its leading members did not have a clue what to do. He even argued that “[e]very time the Bolshevik leaders had to act without Lenin they fell into error, usually inclining to the Right.” [Op. Cit., p. 299] This negative opinion of the Bolsheviks applied even to the “left Bolsheviks, especially the workers” whom we are informed “tried with all their force to break through this quarantine” created by the Bolshevik leaders policy “of waiting, of accommodation, and of actual retreat before the Compromisers” after the February revolution and before the arrival of Lenin. Trotsky argues that “they did not know how to refute the premise about the bourgeois character of the revolution and the danger of an isolation of the proletariat. They submitted, gritting their teeth, to the directions of their leaders.” [History of the Russian Revolution, vol. 1, p. 273] It seems strange, to say the least, that without one person the whole of the party was reduced to such a level given that the aim of the “revolutionary” party was to develop the political awareness of its members.

In such a situation, we would expect the soviets to play no meaningful role in the new “workers’ state.” Under such a centralised system, we would expect the soviets to become little more than a fig-leaf for party power. Unsurprisingly, this is exactly what they did become. As we discuss in section 7 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, anarchists are not surprised by this as the centralisation so beloved by Marxists is designed to empower the few at the centre and marginalise the many at the circumference.

The very first act of the Bolshevik revolution was for the Second Congress of Soviets to alienate its power and hand it over to the “Council of People’s Commissars.” This was the new government and was totally Bolshevik in make-up (the Left SRs later joined it, although the Bolsheviks always maintained control). Thus the first act of the revolution was the creation of a power above the soviets. Although derived from the soviet congress, it was not identical to it. Thus the Bolshevik “workers’ state” or “semi-state” started to have the same characteristics as the normal state (see section H.3.7 for a discussion of what marks a state).

The subsequent marginalisation of the soviets in the “soviet” state occurred from top to bottom should not, therefore be considered an accident or a surprise. The Bolshevik desire for party power within a highly centralised state could have no other effect. At the top, the Central Executive Committee (CEC or VTsIK) was quickly marginalised from power. This body was meant to be the highest organ of soviet power but, in practice, it was sidelined by the Bolshevik government. This can be seen when, just four days after seizing power, the Bolshevik Council of People’s Commissars (CPC or Sovnarkom) “unilaterally arrogated to itself legislative power simply by promulgating a decree to this effect. This was, effectively, a Bolshevik coup d’etat that made clear the government’s (and party’s) pre-eminence over the soviets and their executive organ. Increasingly,
of delegates, i.e. “practically all representatives of the workers and peasants of the whole of Russia.” This was proof of “how stupid and ridiculous is the bourgeois fairy-tale about the Bolsheviks only having minority support.” [Op. Cit., pp. 355–6] Given that the workers and peasants had no real choice in who to vote for, can this result be surprising? Of course not. While the Bolsheviks had mass support a year previously, pointing to election results under a dictatorship where all other parties and groups are subject to state repression is hardly convincing evidence for current support. Needless to say, Stalin (like a host of other dictators) made similar claims on similarly dubious election results. If the Bolsheviks were sincere in their support for soviet power then they would have tried to organise genuine soviet elections. This was possible even during the civil war as the example of the Makhnovists showed.

So, in a nutshell, the Bolsheviks did not fundamentally support the goal of soviet power. Rather, they aimed to create a “soviet power,” a Bolshevik power above the soviets which derived its legitimacy from them. However, if the soviets conflicted with that power, it were the soviets which were repudiated not party power. Thus the result of Bolshevik ideology was the marginalisation of the soviets and their replacement by Bolshevik dictatorship. This process started before the civil war and can be traced to the nature of the state as well as the underlying assumptions of Bolshevik ideology (see “How did Bolshevik ideology contribute to the failure of the Revolution?”).

6 What happened to the soviets after October?

As indicated in the last question, the last thing which the Bolsheviks wanted was “all power to the soviets.” Rather they wanted the soviets to hand over that power to a Bolshevik government. As the people in liberal capitalist politics, the soviets were “sovereign” in name only. They were expected to delegate power to a government. Like the “sovereign people” of bourgeois republics, the soviets, Lenin’s arrival, according to Trotsky, allowed the influence of the more radical rank and file to defeat the conservatism of the party machine. By the end of April, Lenin had managed to win over the majority of the party leadership to his position. However, as Trotsky argues, this “April conflict between Lenin and the general staff of the party was not the only one of its kind. Throughout the whole history of Bolshevism ... all the leaders of the party at all the most important moments stood to the right of Lenin.” [Op. Cit., p. 305] As such, if “democratic centralism” had worked as intended, the whole party would have been arguing for incorrect positions the bulk of its existence (assuming, of course, that Lenin was correct most of the time).

For Trotsky, “Lenin exerted influence not so much as an individual but because he embodied the influence of the class on the Party and of the Party on its machine.” [Stalin, vol. 1, p. 299] Yet, this was the machine which Lenin had forged, which embodied his vision of how a “revolutionary” party should operate and was headed by him. In other words, to argue that the party machine was behind the party membership and the membership behind the class shows the bankruptcy of Lenin’s organisational scheme. This “backwardness,” moreover, indicates an independence of the party bureaucracy from the membership and the membership from the masses. As Lenin’s constantly repeated aim was for the party to seize power (based on the dubious assumption that class power would only be expressed, indeed was identical to, party power) this independence held serious dangers, dangers which became apparent once this goal was achieved.

Trotsky asks the question “by what miracle did Lenin manage in a few short weeks to turn the Party’s course into a new channel?” Significantly, he answers as follows: “Lenin’s personal attributes and the objective situation.” [Ibid.] No mention is made of the democratic features of the party organisation, which suggests that without Lenin the rank and file party members would not have been
able to shift the weight of the party machine in their favour. Trotsky seems close to admitting this:

“As often happens, a sharp cleavage developed between the classes in motion and the interests of the party machines. Even the Bolshevik Party cadres, who enjoyed the benefit of exceptional revolutionary training, were definitely inclined to disregard the masses and to identify their own special interests and the interests of the machine on the very day after the monarchy was overthrown.” [Stalin, vol. 1, p. 298]

Thus the party machine, which embodied the principles of “democratic centralism” proved less than able to the task assigned it in practice. Without Lenin, it is doubtful that the party membership would have over come the party machine:

“Lenin was strong not only because he understood the laws of the class struggle but also because his ear was faultlessly attuned to the stirrings of the masses in motion. He represented not so much the Party machine as the vanguard of the proletariat. He was definitely convinced that thousands from among those workers who had borne the brunt of supporting the underground Party would now support him. The masses at the moment were more revolutionary than the Party, and the Party more revolutionary than its machine. As early as March the actual attitude of the workers and soldiers had in many cases become stormily apparent, and it was widely at variance with the instructions issued by all the parties, including the Bolsheviks.” [Op. Cit., p. 299]

Little wonder the local party groupings ignored the party machine, practising autonomy and initiative in the face of a party machine inclined to conservatism, inertia, bureaucracy and remoteness. This conflict between the party machine and the principles it

By the early 1940s, he wrote that “[a]gainst the Party the anarchists were right when they inscribed on their black banners, ‘There is no worse poison than power’ — meaning absolute power. From now on the psychosis of power was to captive the great majority of the leadership, especially at the lower levels.” [Serge, Op. Cit., p. 100]

Nor can the effects of the civil war explain this shift. As we discuss in the next section, the Bolshevik assault on the soviets and their power started in the spring of 1918, months before the start of large scale civil war. And it should be stressed that the Bolsheviks were not at all bothered by the creation of party dictatorship over the soviets. Indeed, in spite of ruling over a one party state Lenin was arguing in November 1918 that “Soviet power is a million times more democratic than the most democratic bourgeois republic.” How can that be when the workers do not run society nor have a say in who rules them? When Karl Kautsky raised this issue, Lenin replied by saying he “fails to see the class nature of the state apparatus, of the machinery of state ... The Soviet government is the first in the world ... to enlist the people, specifically the exploited people in the work of administration.” [Collected Works, vol. 28, p. 247 and p. 248]

However, the key issue is not whether workers take part in the state machinery but whether they determine the policies that are being implemented, i.e. whether the masses are running their own lives. After all, as Ante Ciliga pointed out, the Stalinist GPU (secret police) “liked to boast of the working class origin of its henchmen.” One of his fellow prisoners retorted to such claims by pointing out they were “wrong to believe that in the days the Tsar the gaolers were recruited from among the dukes and the executioners from among the princes!” [The Russian Enigma, pp. 255–6] Simply put, just because the state administration is made up of bureaucrats who were originally working class does not mean that the working class, as a class, manages society.

In December of that year Lenin went one further and noted that at the Sixth Soviet Congress “the Bolsheviks had 97 per cent”
state bodies which came into conflict with both the ruling party and the masses. Placed above the people, isolated from them by centralisation of power, the Bolsheviks pre-revolutionary aim for party power unsurprising became in practice party dictatorship.

In less than a year, by July 1918, the soviet regime was a de facto party dictatorship. The theoretical revisions soon followed. Lenin, for example, was proclaiming in early December 1918 that while legalising the Mensheviks the Bolsheviks would “reserve state power for ourselves, and for ourselves alone.” [Collected Works, vol. 28, p. 213] Victor Serge records how when he arrived in Russia in the following month he discovered “a colourless article” signed by Zinoviev on “The Monopoly of Power” which said “Our Party rules alone … it will not allow anyone … The false democratic liberties demanded by the counter-revolution.” [Memoirs of a Revolutionary, p. 69] Serge, like most Bolsheviks, embraced this perspective wholeheartedly. For example, when the Bolsheviks published Bakunin’s “confession” to the Tsar in 1921 (in an attempt to discredit anarchism) “Serge seized on Bakunin’s passage concerning the need for dictatorial rule in Russia, suggesting that ‘already in 1848 Bakunin had presaged Bolshevism.’” [Lawrence D. Orton, “introduction,” The Confession of Mikhail Bakunin, p. 21] At the time Bakunin wrote his “confession” he was not an anarchist. At the time Serge wrote his comments, he was a leading Bolshevik and reflecting mainstream Bolshevik ideology.

Indeed, so important was it considered by them, the Bolsheviks revised their theory of the state to include this particular lesson of their revolution (see section H.3.8 for details). As noted in section H.1.2, all the leading Bolsheviks were talking about the “dictatorship of the party” and continued to do so until their deaths. Such a position, incidentally, is hard to square with support for soviet power in any meaningful term (although it is easy to square with an instrumentalist position on workers’ councils as a means to party power). It was only in the mid-30s that Serge started to revise his position for this position (Trotsky still subscribed to it). was based on and the needs of the revolution and party membership was expressed continually throughout 1917:

“In short, the success of the revolution called for action against the ‘highest circles of the party,’ who, from February to October, utterly failed to play the revolutionary role they ought to have taken in theory. The masses themselves made the revolution, with or even against the party — this much at least was clear to Trotsky the historian. But far from drawing the correct conclusion, Trotsky the theorist continued to argue that the masses are incapable of making a revolution without a leader.” [Daniel & Gabriel Cohn-Bendit, Op. Cit., p. 188]

Looking at the development of the revolution from April onwards, we are struck by the sluggishness of the party hierarchy. At every revolutionary upsurge, the party simply was not to the task of responding to the needs of masses and the local party groupings closest to them. The can be seen in June, July and October itself. At each turn, the rank and file groupings or Lenin had to constantly violate the principles of their own party in order to be effective. The remoteness and conservatism of the party even under Lenin can be constantly seen.

For example, when discussing the cancellation by the central committee of a demonstration planned for June 10th by the Petrograd Bolsheviks, the unresponsiveness of the party hierarchy can be seen. The “speeches by Lenin and Zinoviev [justifying their actions] by no means satisfied the Petersburg Committee. If anything, it appears that their explanations served to strengthen the feeling that at best the party leadership had acted irresponsibly and incompetently and was seriously out of touch with reality.” Indeed, many “blamed the Central Committee for taking so long to respond to Military Organisation appeals for a demonstration.” [Rabinowitch, Op. Cit., p. 88 and p. 92]
During the discussions in late June, 1917, on whether to take direct action against the Provisional Government there was a “wide gulf” between lower organs evaluations of the current situation and that of the Central Committee. [Rabinowitch, Op. Cit., p. 129] Indeed, among the delegates from the Bolshevik military groups, only Lashevich (an old Bolshevik) spoke in favour of the Central Committee position and he noted that “[f]requently it is impossible to make out where the Bolshevik ends and the Anarchist begins.” [quoted by Rabinowitch, Op. Cit., p. 129]

In the July days, the breach between the local party groups and the central committee increased. As we noted in the section 1, this spontaneous uprising was opposed to by the Bolshevik leadership, in spite of the leading role of their own militants (along with anarchists) in fermenting it. While calling on their own militants to restrain the masses, the party leadership was ignored by the rank and file membership who played an active role in the event. Sickened by being asked to play the role of “fireman,” the party militants rejected party discipline in order to maintain their credibility with the working class. Rank and file activists, pointing to the snowballing of the movement, showed clear dissatisfaction with the Central Committee. One argued that it “was not aware of the latest developments when it made its decision to oppose the movement into the streets.” Ultimately, the Central Committee appeal “for restraining the masses … was removed from … Pravda … and so the party’s indecision was reflected by a large blank space on page one.” [Rabinowitch, Op. Cit., p. 150, p. 159 and P. 175] Ultimately, the indecisive nature of the leadership can be explained by the fact it did not think it could seize state power for itself. As Trotsky noted, “the state of popular consciousness … made impossible the seizure of power by the Bolsheviks in July.” [History of the Russian Revolution, vol. 2, p. 81]

The indecision of the party hierarchy did have an effect, of course. While the anarchists at Kronstadt looked at the demonstration as the start of an uprising, the Bolsheviks there were power and from there subordinated the whole Revolution to their Party is explained by their ability to substitute the idea of a Soviet power for the social revolution and the social emancipation of the masses. A priori, these two ideas appear as non-contradictory for it was possible to understand Soviet power as the power of the soviets, and this facilitated the substitution of the idea of Soviet power for that of the Revolution. Nevertheless, in their realisation and consequences these ideas were in violent contraction to each other. The conception of Soviet Power incarnated in the Bolshevik state, was transformed into an entirely traditional bourgeois power concentrated in a handful of individuals who subjected to their authority all that was fundamental and most powerful in the life of the people — in this particular case, the social revolution. Therefore, with the help of the ‘power of the soviets’ — in which the Bolsheviks monopolised most of the posts — they effectively attained a total power and could proclaim their dictatorship throughout the revolutionary territory… All was reduced to a single centre, from where all instructions emanated concerning the way of life, of thought, of action of the working masses.” [Peter Arshinov, The Two Octobers]

Isolated from the masses, holding power on their behalf, the Bolshevik party could not help being influenced by the realities of their position in society and the social relationships produced by statist forms. Far from being the servants of the people, they become upon the seizing of power their masters. As we argue in section 7 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the experience of Bolshevism in power confirmed anarchist fears that the so-called “workers’ state” would quickly become a danger to the revolution, corrupting those who held power and generating a bureaucracy around the new
prove that the Bolsheviks did not, in fact, seek soviet power without doubt (see next section). And as we discuss in section 4 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the peculiar Bolshevik definition of “soviet power” allowed them to justify the elimination of from the bottom-up grassroots democracy in the military and in the workplace with top-down appointments.

Thus we have a distinctly strange meaning by the expression “All Power to the Soviets.” In practice, it meant that the soviets alienate its power to a Bolshevik government. This is what the Bolsheviks considered as “soviet power,” namely party power, pure and simple. As the Central Committee argued in November 1917, “it is impossible to refuse a purely Bolshevik government without reason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets … handed power over to this government.” [contained in Robert v. Daniels (ed.), A Documentary History of Communism, vol. 1, pp. 128–9] Lenin was clear, arguing mere days after the October Revolution that “our present slogan is: No Compromise, i.e. for a homogeneous Bolshevik government.” [quoted by Daniels, Conscience of the Revolution, p. 65]

In other words, “soviet power” exists when the soviets hand power over to someone else (namely the Bolshevik leaders)! The difference is important, “for the Anarchists declared, if ‘power’ really should belong to the soviets, it could not belong to the Bolshevik party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.” [Voline, The Unknown Revolution, p. 213]

Which means that while anarchists and Leninists both use the expression “All Power to the Soviets” it does not mean they mean exactly the same thing by it. In practice the Bolshevik vision simply replaced the power of the soviets with a “soviet power” above them:

“All Power to the Soviets.” In practice, it meant that the soviets alienate its power to a Bolshevik government. This is what the Bolsheviks considered as “soviet power,” namely party power, pure and simple. As the Central Committee argued in November 1917, “it is impossible to refuse a purely Bolshevik government without reason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets … handed power over to this government.” [contained in Robert v. Daniels (ed.), A Documentary History of Communism, vol. 1, pp. 128–9] Lenin was clear, arguing mere days after the October Revolution that “our present slogan is: No Compromise, i.e. for a homogeneous Bolshevik government.” [quoted by Daniels, Conscience of the Revolution, p. 65]

In other words, “soviet power” exists when the soviets hand power over to someone else (namely the Bolshevik leaders)! The difference is important, “for the Anarchists declared, if ‘power’ really should belong to the soviets, it could not belong to the Bolshevik party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.” [Voline, The Unknown Revolution, p. 213]

Which means that while anarchists and Leninists both use the expression “All Power to the Soviets” it does not mean they mean exactly the same thing by it. In practice the Bolshevik vision simply replaced the power of the soviets with a “soviet power” above them:

“wavering indecisively in the middle” between them and the Left-Social Revolutionaries who saw it as a means of applying pressure on the government. This was because they were “hamstrung by the indecision of the party Central Committee.” [Rabinowitch, Op. Cit., p. 187] Little wonder so many Bolshevik party organisations developed and protected their own autonomy and ability to act!

Significantly, one of the main Bolshevik groupings which helped organise and support the July uprising, the Military Organisation, started their own paper after the Central Committee had decreed after the failed revolt that neither it, nor the Petersburg Committee, should be allowed to have one. It “angrily insisted on what it considered its just prerogatives” and in “no uncertain terms it affirmed its right to publish an independent newspaper and formally protested what is referred to as ‘a system of persecution and repression of an extremely peculiar character which had begun with the election of the new Central Committee.’” [Rabinowitch, Op. Cit., p. 227] The Central Committee backed down, undoubtedly due to the fact it could not enforce its decision.

As the Cohn-Bendit brothers argue, “five months after the Revolution and three months before the October uprising, the masses were still governing themselves, and the Bolshevik vanguard simply had to toe the line.” [Op. Cit., p. 186] Within that vanguard, the central committee proved to be out of touch with the rank and file, who ignored it rather than break with their fellow workers.

Even by October, the party machine still lagged behind the needs of the revolution. In fact, Lenin could only impose his view by going over the head of the Central Committee. According to Trotsky’s account, “this time he [was not satisfied with furious criticism] of the ‘ruinous Fabianism of the Petrograd leadership’ and by way of protest he resign[ed] from the Central Committee.” [History of the Russian Revolution, vol. 3, p. 131] Trotsky quotes Lenin as follows:

“The success of the Bolsheviks in the October Revolution — that is to say, the fact that they found themselves in
“I am compelled to request permission to withdraw from the Central Committee, which I hereby do, and leave myself freedom of agitation in the lower ranks of the party and at the party congress.” [quoted by Trotsky, Op. Cit., p. 131]

Thus the October revolution was precipitated by a blatant violation of the principles Lenin spent his life advocating. Indeed, if someone else other than Lenin had done this we are sure that Lenin, and his numerous followers, would have dismissed it as the action of a “petty-bourgeois intellectual” who cannot handle party “discipline.” This is itself is significant, as is the fact that he decided to appeal to the “lower ranks” of the party. Simply put, rather than being “democratic” the party machine effectively blocked communication and control from the bottom up. Looking at the more radical party membership, he “could only impose his view by going over the head of his Central Committee.” [Daniel and Gabriel Cohn-Bendit, Op. Cit., p. 187] He made sure to send his letter of protest to “the Petrograd and Moscow committees” and also made sure that “copies fell into the hands of the more reliable party workers of the district locals.” By early October (and “over the heads of the Central Committee”) he wrote “directly to the Petrograd and Moscow committees” calling for insurrection. He also “appealed to a Petrograd party conference to speak a firm word in favour of insurrection.” [Trotsky, Op. Cit., p. 131 and p. 132]

In October, Lenin had to fight what he called “a wavering” in the “upper circles of the party” which lead to a “sort of dread of the struggle for power, an inclination to replace this struggle with resolutions protests, and conferences.” [quoted by Trotsky, Op. Cit., p. 132] For Trotsky, this represented “almost a direct pitting of the party against the Central Committee,” required because “it was a question of the fate of the revolution” and so “all other considerations fell away.” [Trotsky, Op. Cit., pp. 132–3] On October 8th, when Lenin addressed the Bolshevik delegates of the forthcoming North-
ready to take power. He states that in “a majority of provinces and county seats, the situation was incomparably less favourable” simply because the Bolsheviks were not as well supported. Later he notes that “[m]any of the provincial soviets had already, before the July days, become organs of power.” Thus Trotsky was only interested in whether the workers could have put the Bolsheviks in power or not rather than were the soviets able to take power themselves. Party power was the decisive criteria. [History of the Russian Revolution, vol. 2, p. 78, p. 77, p. 78, p. 81 and p. 281]

This can be seen from the October insurrection. Trotsky again admits that the “Bolsheviks could have seized power in Petrograd at the beginning of July” but “they could not have held it.” However, by September the Bolsheviks had gained majorities in the Petrograd and Moscow soviets. The second Congress of Soviets was approaching. The time was considered appropriate to think of insurrection. By in whose name and for what end? Trotsky makes it clear. “A revolutionary party is interested in legal coverings,” he argued and so the party could use the defending the second Congress of Soviets as the means to justify its seizure of power. He raises the question: “Would it not have been simpler ... to summon the insurrection directly in the name of the party?” and answers it in the negative. “It would be an obvious mistake,” he argued, “to identify the strength of the Bolshevik party with the strength of the soviets led by it. The latter was much greater than the former. However, without the former it would have been mere impotence.” He then quotes numerous Bolshevik delegates arguing that the masses would follow the soviet, not the party. Hence the importance of seizing power in the name of the soviets, regardless of the fact it was the Bolshevik party who would in practice hold “all power.” Trotsky quotes Lenin are asking “Who is to seize power?” “That is now of no importance,” argued Lenin. ‘Let the Military Revolutionary Committee take it, or ‘some other institution,’ which will declare that it will surrender the power only to the genuine representatives of the interests of the people.” Trotsky notes that “some other institution” was a “conspira-

ern Congress of Soviets on this subject, he did so “personally” as there “was no party decision” and the “higher institutions of the party had not yet expressed themselves.” [Trotsky, Op. Cit., p. 133] Ultimately, the Central Committee came round to Lenin’s position but they did so under pressure of means at odds with the principles of the party.

This divergence between the image and reality of the Bolsheviks explains their success. If the party had applied or had remained true to the principles of “democratic centralism” it is doubtful that it would have played an important role in the movement. As Alexander Rabinowitch argues, Bolshevik organisational unity and discipline is “vastly exaggerated” and, in fact, Bolshevik success in 1917 was down to “the party’s internally relatively democratic, tolerant, and decentralised structure and method of operation, as well as its essentially open and mass character — in striking contrast to the traditional Leninist model.” In 1917, he goes on, “subor-

The newcomers included tens of thousands of workers and soldiers ... who knew little, if anything, about Marxism and cared nothing about party discipline.” For example, while the slogan “All Power to the Soviets” was “officially withdrawn by the Sixth [Party] Congress in late July, this change did not take hold at the local level.” [The Bolsheviks Come to Power, p. 311, p. 312 and p. 313]

It is no exaggeration to argue that if any member of a current vanguard party acted as the Bolshevik rank and file did in 1917, they would quickly be expelled (this probably explains why no such party has been remotely successful since). However, this fer-

4612

4589
centralism” was actually applied within the party and clarified as an organisational principle:

“It was quite a turnabout since the anarchic days before the Civil War. The Central Committee had always advocated the virtues of obedience and co-operation; but the rank-and-filers of 1917 had cared little about such entreaties as they did about appeals made by other higher authorities. The wartime emergency now supplied an opportunity to expatiate on this theme at will.” [Service, Op. Cit., p. 91]

Service stresses that “it appears quite remarkable how quickly the Bolsheviks, who for years had talked idly about a strict hierarchy of command inside the party, at last began to put ideas into practice.” [Op. Cit., p. 96]

In other words, the conversion of the Bolshevik party into a fully fledged “democratic centralist” party occurred during the degeneration of the Revolution. This was both a consequence of the rising authoritarianism within the party and society as well as one of its causes. As such, it is quite ironic that the model used by modern day followers of Lenin is that of the party during the decline of the revolution, not its peak. This is not surprising. Once in power, the Bolshevik party imposed a state capitalist regime onto the Russian people. Can it be surprising that the party structure which it developed to aid this process was also based on bourgeois attitudes and organisation? Simply put, the party model advocated by Lenin may not have been very effective during a revolution but it was exceedingly effective at prompting hierarchy and authority in the post-revolutionary regime. It simply replaced the old ruling elite with another, made up of members of the radical intelligentsia and odd ex-worker or ex-peasant.

This was due to the hierarchical and top-down nature of the party Lenin had created. While the party base was largely working Bolsheviks themselves were more honest about it. For example, Trotsky quotes Lenin at the first soviet congress stating that it was “not true to say that no party exists which is ready to assume power; such a party exists: this is our party.” Moreover, “[o]ur party is ready to assume power.” As the Second Congress approached, Lenin “rebuked those who connected the uprising with the Second Congress of the Soviets.” He protested against Trotsky’s argument that they needed a Bolshevik majority at the Second Congress, arguing (according to Trotsky) that “[w]e have to win power and not tie ourselves to the Congress. It was ridiculous and absurd to warn the enemy about the date of the rising … First the party must seize power, arms in hand, and then we could talk about the Congress.” [On Lenin, p. 71, p. 85]

Trotsky argued that “the party could not seize power by itself, independently of the Soviets and behind its back. This would have been a mistake … [as the] soldiers knew their delegates in the Soviet; it was through the Soviet that they knew the party. If the uprising had taken place behind the back of the Soviet, independently of it, without its authority … there might have been a dangerous confusion among the troops.” Significantly, Trotsky made no mention of the proletariat. Finally, Lenin came over to Trotsky’s position, saying “Oh, all right, one can proceed in this fashion as well, provided we seize power.” [Op. Cit., p. 86 and p. 89]

Trotsky made similar arguments in his History of the Russian Revolution and his article Lessons of October. Discussing the July Days of 1917, for example, Trotsky discusses whether (to quote the title of the relevant chapter) “Could the Bolsheviks have seized the Power in July?” and noted, in passing, the army “was far from ready to raise an insurrection in order to give the power to the Bolshevik Party.” As far as the workers were concerned, although “inclining toward the Bolsheviks in its overwhelming majority, had still not broken the umbilical cord attaching it to the Compromisers” and so the Bolsheviks could not have “seized the helm in July.” He then lists other parts of the country where the soviets were
they “demand that the teaching should be conducted by the class-consciousness workers and soldiers, that this should be started immediately.” Until then, the “conscious workers must be in control.” [Will the Bolsheviks Maintain Power? p. 102, pp. 61–62, p. 66 and p. 68]

As such, given this clear and unambiguous position throughout 1917 by Lenin, it seems incredulous, to say the least, for Leninist Tony Cliff to assert that “[t]o start with Lenin spoke of the proletariat, the class — not the Bolshevik Party — assuming state power.” [Lenin, vol. 3, p. 161] Surely the title of one of Lenin’s most famous pre-October essays, usually translated as “Can the Bolsheviks Retain State Power?”, should have given the game away? As would, surely, quoting numerous calls by Lenin for the Bolsheviks to seize power? Apparently not.

This means, of course, Lenin is admitting that the working class in Russia would not have power under the Bolsheviks. Rather than “the poor” governing society directly, we would have the Bolsheviks governing in their interests. Thus, rather than soviet power as such, the Bolsheviks aimed for “party power through the soviets” — a radically different position. And as we discuss in the next section, when soviet power clashed with party power the former was always sacrificed to ensure the latter. As we indicate in section H.1.2, this support for party power before the revolution was soon transformed into a defence for party dictatorship after the Bolsheviks had seized power. However, we should not forget, to quote one historian, that the Bolshevik leaders “anticipated a ‘dictatorship of the proletariat,’ and that concept was a good deal closer to a party dictatorship in Lenin’s 1917 usage than revisionist scholars sometimes suggest.” [Sheila Fitzpatrick, “The Legacy of the Civil War,” pp. 385–398. Party, State, and Society in the Russian Civil War, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 388]

While modern-day Leninists tend to stress the assumption of power by the soviets as the goal of the Bolshevik revolution, the class, the leadership was not. Full-time revolutionaries, they were either middle-class intellectuals or (occasionally) ex-workers and (even rarer) ex-peasants who had left their class to become part of the party machine. Even the delegates at the party congresses did not truly reflect class basis of the party membership. For example, the number of delegates was still dominated by white-collar or others (59.1% to 40.9%) at the sixth party congress at the end of July 1917. [Cliff, Lenin, vol. 2, p. 160] So while the party gathered more working class members in 1917, it cannot be said that this was reflected in the party leadership which remained dominated by non-working class elements. Rather than being a genuine working class organisation, the Bolshevik party was a hierarchical group headed by non-working class elements whose working class base could not effectively control them even during the revolution in 1917. It was only effective because these newly joined and radicalised working class members ignored their own party structure and its defining ideology.

After the revolution, the Bolsheviks saw their membership start to decrease. Significantly, “the decline in numbers which occurred from early 1918 onwards” started happening “contrary to what is usually assumed, some months before the Central Committee’s decree in midsummer that the party should be purged of its ‘undesirable’ elements.” These lost members reflected two things. Firstly, the general decline in the size of the industrial working class. This meant that the radicalised new elements from the countryside which had flocked to the Bolsheviks in 1917 returned home. Secondly, the lost of popular support the Bolsheviks were facing due to the realities of their regime. This can be seen from the fact that while the Bolsheviks were losing members, the Left SRS almost doubled in size to 100,000 (the Mensheviks claimed to have a similar number). Rather than non-proletarians leaving, “[i]t is more probable by far that it was industrial workers who were leaving in droves. After all, it would have been strange if the growing unpopularity of Sovnarkom in factory milieu had been confined exclusively to non-Bolsheviks.”
Unsurprisingly, given its position in power, "[a]s the proportion of working-class members declined, so that of entrants from the middle-class rose; the steady drift towards a party in which industrial workers no longer numerically predominated was under way." By late 1918 membership started to increase again but "[m]ost newcomers were not of working-class origin ... the proportion of Bolsheviks of working-class origin fell from 57 per cent at the year's beginning to 48 per cent at the end." It should be noted that it was not specified how many were classed as having working-class origin were still employed in working-class jobs. [Robert Service, *Op. Cit.*, p. 70, pp. 70–1 and p. 90] A new ruling elite was thus born, thanks to the way vanguard parties are structured and the application of vanguardist principles which had previously been ignored.

In summary, the experience of the Russian Revolution does not, in fact, show the validity of the "vanguard" model. The Bolshevik party in 1917 played a leading role in the revolution only insofar as its members violated its own organisational principles (Lenin included). Faced with a real revolution and an influx of more radical new members, the party had to practice anarchist ideas of autonomy, local initiative and the ignoring of central orders which had no bearing to reality on the ground. When the party did try to apply the top-down and hierarchical principles of “democratic centralism” it failed to adjust to the needs of the moment. Moreover, when these principles were finally applied they helped ensure the degeneration of the revolution. As we discussed in section H.5, this was to be expected.

4 Was Lenin’s “State and Revolution” applied after October?

In a nutshell, no. In fact the opposite was the case. Post-October, the Bolsheviks not only failed to introduce the ideas of Lenin’s *State and Revolution*, they in fact introduced the exact opposite. As one historian puts it:

5 Did the Bolsheviks really aim for Soviet power?

It seems a truism for modern day Leninists that the Bolsheviks stood for “soviet power.” For example, they like to note that the Bolsheviks used the slogan “All Power to the Soviets” in 1917 as evidence. However, for the Bolsheviks this slogan had a radically different meaning to what many people would consider it to mean.

As we discuss in section 25, it was the anarchists (and those close to them, like the SR-Maximalists) who first raised the idea of soviets as the means by which the masses could run society. This was during the 1905 revolution. At that time, neither the Mensheviks nor the Bolsheviks viewed the soviets as the possible framework of a socialist society. This was still the case in 1917, until Lenin returned to Russia and convinced the Bolshevik Party that the time was right to raise the slogan “All Power to the Soviets.”

However, as well as this, Lenin also advocated a somewhat different vision of what a Bolshevik revolution would result in. Thus we find Lenin in 1917 continually repeating the basic idea: “The Bolsheviks must assume power.” The Bolsheviks “can and must take state power into their own hands.” He raised the question of “will the Bolsheviks dare take over full state power alone?” and answered it: “I have already had occasion ... to answer this question in the affirmative.” Moreover, “a political party ... would have no right to exist, would be unworthy of the name of party ... if it refused to take power when opportunity offers.” [*Selected Works*, vol. 2, p 328, p. 329 and p. 352]

He equated party power with popular power: “the power of the Bolsheviks — that is, the power of the proletariat.” Moreover, he argued that Russia “was ruled by 130,000 landowners ... and they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interest of the poor and against the rich.” He stresses that the Bolsheviks “are not Utopians. We know that just any labourer or any cook would be incapable of taking over immediately the administration of the State.” Therefore
executive power ... as a clearly separate body from the leading body of the legislature... Therefore, some sections of the contemporary Left appear to have greatly overestimated the importance that State and Revolution had for Lenin’s government. I would suggest that this document ... can be better understood as a distant, although doubtless sincere [!], socio-political vision ... as opposed to its having been a programmatic political statement, let alone a guide to action, for the period immediately after the successful seizure of power.” [Farber, Op. Cit., pp. 20–1 and p. 38]

That is one way of looking at it. Another would be to draw the conclusion that a “distant ... socio-political vision” drawn up to sound like a “guide to action” which was then immediately ignored is, at worse, little more than a deception, or, at best, a theoretical justification for seizing power in the face of orthodox Marxist dogma. Whatever the rationale for Lenin writing his book, one thing is true — it was never implemented. Strange, then, that Leninists today urge use to read it to see what “Lenin really wanted.” Particularly given that so few of its promises were actually implemented (those that were just recognised the facts on the ground) and all of were no longer applied in less than six months after the seize of power.

The best that can be said is that Lenin did want this vision to be applied but the realities of revolutionary Russia, the objective problems facing the revolution, made its application impossible. This is the standard Leninist account of the revolution. They seem unconcerned that they have just admitted that Lenin’s ideas were utterly impractical for the real problems that any revolution is most likely to face. This was the conclusion Lenin himself drew, as did the rest of the Bolshevik leadership. This can be seen from the actual practice of “Leninism in power” and the arguments it used. And yet, for some reason, Lenin’s book is still recommended by modern Leninists!

“To consider ‘State and Revolution’ as the basic statement of Lenin’s political philosophy — which non-Communists as well as Communists usually do — is a serious error. Its argument for a utopian anarchism never actually became official policy. The Leninism of 1917 ... came to grief in a few short years; it was the revived Leninism of 1902 which prevailed as the basis for the political development of the USSR.” [Robert V. Daniels, The Conscience of the Revolution, pp. 51–2]

Daniels is being far too lenient with the Bolsheviks. It was not, in fact, “a few short years” before the promises of 1917 were forgotten. In some cases, it was a few short hours. In others, a few short months. However, in a sense Daniels is right. It did take until 1921 before all hope for saving the Russian Revolution finally ended. With the crushing of the Kronstadt rebellion, the true nature of the regime became obvious to all with eyes to see. Moreover, the banning of factions within the party at the same time did mark a return to the pattern of “What is to be Done?” rather than the more fluid practice Bolshevism exhibited in, say, 1917 (see section 3). However, as we discuss in the appendix “Were any of the Bolshevik oppositions a real alternative?”, the various Bolshevik oppositions were, in their own way, just as authoritarian as the mainstream of the party.

In order to show that this is the case, we need to summarise the main ideas contained in Lenin’s work. Moreover, we need to indicate what the Bolsheviks did, in fact, do. Finally, we need to see if the various rationales justifying these actions hold water.

So what did Lenin argue for in State and Revolution? Writing in the mid-1930s, anarchist Camillo Berneri summarised the main ideas of that work as follows:

“The Leninist programme of 1917 included these points: the discontinuance of the police and standing army, abo-
tion of the professional bureaucracy, elections for all public positions and offices, revocability of all officials, equality of bureaucratic wages with workers’ wages, the maximum of democracy, peaceful competition among the parties within the soviets, abolition of the death penalty.” [“The Abolition and Extinction of the State,” Cienfuegos Press Anarchist Review, no. 4, p. 50]

As he noted, “[n]ot a single one of the points of this programme has been achieved.” This was, of course, under Stalinism and most Leninists will concur with Berneri. However what Leninists tend not to mention is that in the 7 month period from November 1917 to May 1918 none of these points was achieved. So, as an example of what Bolshevism “really” stands for it seems strange to harp on about a work which was never implemented when the its author was in a position to do so (i.e. before the onslaught of a civil war Lenin thought was inevitable anyway!).

To see that Berneri’s summary is correct, we need to quote Lenin directly. Obviously the work is a wide ranging defence of Lenin’s interpretation of Marxist theory on the state. As it is an attempt to overturn decades of Marxist orthodoxy, much of the work is quotes from Marx and Engels and Lenin’s attempts to enlist them for his case (we discuss this issue in section H.3.10). Equally, we need to discount the numerous straw men arguments about anarchism Lenin inflicts on his reader (see sections H.1.3, H.1.4 and H.1.5 for the truth about his claims). Here we simply list the key points as regards Lenin’s arguments about his “workers’ state” and how the workers would maintain control of it:

1) Using the Paris Commune as a prototype, Lenin argued for the abolition of “parliamentarianism” by turning “representative institutions from mere ‘talking shops’ into working bodies.” This would be done by removing “the division of labour between the legislative and the executive.” [Essential Works of Lenin, p. 304 and p. 306]
“Certainly, [state violence] starts out being used against the old power ... But as the new power goes on consolidating its position ... ever more frequently and ever more severely, the mailed fist of dictatorship is turned against the proletariat itself in whose name that dictatorship was set up and is operated! ... the actions of the present Russian government [of Lenin and Trotsky] have shown that in real terms (and it could not be otherwise) the ‘dictatorship of the proletariat’ means police, military, political and economic dictatorship exercised over the broad mass of the proletariat in city and country by the few leaders of the political party.

“The violence of the state always ends up being used AGAINST ITS SUBJECTS, of whom the vast majority are always proletarians ... The new government will be able to expropriate the old ruling class in whole or in part, but only so as to establish a new ruling class that will hold the greater part of the proletariat in subjection.

“That will come to pass if those who make up the government and the bureaucratic, military and police minority that upholds it end up becoming the real owners of wealth when the property of everyone is made over exclusively to the state. In the first place, the failure of the revolution will be self evident. In the second, in spite of the illusions that many people create, the conditions of the proletariat will always be those of a subject class.” [“Anarchy and ‘Scientific’ Communism”, in The Poverty of Statism, pp. 13–49, Albert Meltzer (ed.), pp. 26–31]

The standard response by most modern Leninists to arguments like this about Bolshevism is simply to downplay the authoritar-
is considered valid for today, in advanced countries as it was in revolutionary Russia.

Three things strike anarchist readers of Lenin’s work. Firstly, as we noted in section H.1.7, much of it is pure anarchism. Bakunin had raised the vision of a system of workers’ councils as the framework of a free socialist society in the 1860s and 1870s. Moreover, he had also argued for the election of mandated and recallable delegates as well as for using a popular militia to defend the revolution (see section H.2.1). What is not anarchist is the call for centralisation, equating the council system with a state and the toleration of a “new” officialdom. Secondly, the almost utter non-mention of the role of the party in the book is deeply significant. Given the emphasis that Lenin had always placed on the party, its absence is worrying. Particularly (as we indicate in section 5) he had been calling for the party to seize power all through 1917. When he does mention the party he does so in an ambiguous way which suggests that it, not the class, would be in power. As subsequent events show, this was indeed what happened in practice. And, finally, the anarchist reader is struck by the fact that every one of these key ideas were not implemented under Lenin. In fact, the opposite was done. This can be seen from looking at each point in turn.

The first point as the creation of “working bodies”, the combining of legislative and executive bodies. The first body to be created by the Bolshevik revolution was the “Council of People’s Commissars” (CPC) This was a government separate from and above the Central Executive Committee (CEC) of the soviets congress. It was an executive body elected by the soviet congress, but the soviets themselves were not turned into “working bodies.” Thus the promises of Lenin’s State and Revolution did not last the night.

As indicated in section 5, the Bolsheviks clearly knew that the Soviets had alienated their power to this body. However, it could be argued that Lenin’s promises were kept as this body simply gave itself legislative powers four days later. Sadly, this is not the case. In the Paris Commune the delegates of the people took executive

Thus the Russian Revolution and the Bolshevik regime confirmed anarchist theory and predictions about state socialism. In the words of Luigi Fabbri:

“It is fairly certain that between the capitalist regime and the socialist there will be an intervening period of struggle, during which proletariat revolutionary workers will have to work to uproot the remnants of bourgeois society … But if the object of this struggle and this organisation is to free the proletariat from exploitation and state rule, then the role of guide, tutor or director cannot be entrusted to a new state, which would have an interest in pointing the revolution in a completely opposite direction...

“The outcome would be that a new government — battening on the revolution and acting throughout the more or less extended period of its ‘provisional’ powers — would lay down the bureaucratic, military and economic foundations of a new and lasting state organisation, around which a compact network of interests and privileges would, naturally, be woven. Thus in a short space of time what one would have would not be the state abolished, but a state stronger and more energetic than its predecessor and which would come to exercise those functions proper to it — the ones Marx recognised as being such — ‘keeping the great majority of producers under the yoke of a numerically small exploiting minority.’

“This is the lesson that the history of all revolutions teaches us, from the most ancient down to the most recent; and it is confirmed … by the day-to-day developments of the Russian revolution ...
This was simply summarising Bolshevik practice from the start. However, in *State and Revolution* Lenin had argued for imposing “a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists.” In 1917 he was “clear that where is suppression there is also violence, there is no freedom, no democracy.” [Op. Cit., pp. 337–8] So if violence is directed against the working class then, obviously, there can be “no freedom, no democracy” for that class. And who identifies who the “wavering and unstable” elements are? Only the party. Thus any expression of workers’ democracy which conflicts with the party is a candidate for “revolutionary coercion.” So it probably just as well that the Bolsheviks had eliminated military democracy in March, 1918.

Trotsky expands on the obvious autocratic implications of this in 1921 when he attacked the Workers’ Opposition’s ideas on economic democracy:

“The Party ... is ... duty bound to retain its dictatorship, regardless of the temporary vacillations of the amorphous masses, regardless of the temporary vacillations even of the working class. This awareness is essential for cohesion; without it the Party is in danger of perishing ... At any given moment, the dictatorship does not rest on the formal principle of workers’ democracy ... if we look upon workers’ democracy as something unconditional ... then ... every plant should elect its own administrative organs and so on ... From a formal point of view this is the clearest link with workers’ democracy. But we are against it. Why? ... Because, in the first place, we want to retain the dictatorship of the Party, and, in the second place, because we think that the [democratic] way of managing important and essential plants is bound to be incompetent and prove a failure from an economic point of view ...” [quoted by Jay B. Sorenson, *The Life and Death of Soviet Trade Unionism*, p. 165]
from above (see section 4 of the appendix on “How did Bolshev
vik ideology contribute to the failure of the Revolution?”for the
deepl
undemocratic reasoning used to justify this top-down and
ocratic system of so-called democracy). The idea that different
parties could compete for votes in the soviets (or elsewhere) was
similarly curtailed and finally abolished.

Then there was the elimination of bureaucracy. As we show
in section 7 of the appendix on “How did Bolshevik ideology con-
tribute to the failure of the Revolution?”, a new bureaucratic and
centralised system quickly emerged. Rather than immediately cut-
ting the size and power of the bureaucracy, it steadily grew. It soon
became the real power in the state (and, ultimately, in the 1920s
became the social base for the rise of Stalin). Moreover, with the
concentration of power in the hands of the Bolshevik government,
the “essence” of bureaucracy remained as the party leaders became
“privileged persons divorced from the masses and superior to
the masses.” They were, for example, more than happy to justify their
suppression of military democracy in terms of them knowing bet-
ther than the general population what was best for them (see section
4 of the appendix on “How did Bolshevik ideology contribute to
the failure of the Revolution?” for details).

Then there is the fourth point, namely the elimination of the
standing army, the suppression of “special bodies of armed men”
by the “armed masses.” This promise did not last two months. On
the 26th of December, 1917, the Council of People’s Commissars
decreed the formation of a political (secret) police force, the
“Extraordinary Commission to Fight Counter-Revolution.” This was
more commonly known by the Russian initials of the first two
terms of its official name: The Cheka. Significantly, its founding
decree stated it was to “watch the press, saboteurs, strikers, and
the Socialist-Revolutionaries of the Right.” [contained in Robert V.
Daniels, A Documentary History of Communism, vol. 1, p.
133]
defence of workers’ self-management against Lenin’s policy! Lenin
told them to reread it (along with his other 1917 works) to see that
“state capitalism” was his aim all along! Not only that, he quoted
from State and Revolution. He argued that “accounting and con-
trol” was required “for the proper functioning of the first stage of
communist society.” “And this control,” he continued, “must be es-
tablished not only over ‘the insignificant capitalist minority, over the
gentry . . . ’, but also over the workers who ‘have been thoroughly cor-
rupted by capitalism . . . ’” He ended by saying it was “significant that
Bukharin did not emphasise this.” [Collected Works, vol. 27, pp.
353–4] Needless to say, the Leninists who urge us to read Lenin’s
work do not emphasise that either.

As the Bolsheviks lost more and more support, the number of
workers “thoroughly corrupted by capitalism” increased. How to
identify them was easy: they did not support the party. As histo-
rarian Richard summarises, a “lack of identification with the Bolshevik
party was treated as the absence of political consciousness altogether.”
[Soviet Communists in Power, p. 94] This is the logical conclu-
sion of vanguardism, of course (see section H.5.3). However, to ac-
knowledge that state violence was also required to “control” the
working class totally undermines the argument of State and Rev-
olution.

This is easy to see and to prove theoretically. For example, by
1920, Lenin was more than happy to admit that the “workers’ state”
used violence against the masses. At a conference of his political
police, the Cheka, Lenin argued as follows:

“Without revolutionary coercion directed against
the avowed enemies of the workers and peasants, it is im-
possible to break down the resistance of these exploiters.
On the other hand, revolutionary coercion is bound to be
employed towards the wavering and unstable elements
among the masses themselves.” [Collected Works,
vol. 42, p. 170]
started (i.e. when “the victories of the Czechoslovak troops over the Red Army in June 1918, that threatened the greatest danger to the Soviet republic,” to quote Cliff). Similarly, much of the economic policies implemented by the Bolsheviks had their roots in that book and the other writings by Lenin from 1917 (see section 5 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”). [Lenin, vol. 3, p. 161 and p. 18]

Given this, what use is Lenin’s State and Revolution? If this really was the “guide” it is claimed to be, the fact that it proved totally impractical suggests it should simply be ignored. Simply put, if the side effects of a revolution (such as civil war) require it to be ripped up then modern Leninists should come clean and admit that revolution and workers’ democracy simply do not go together. This was, after all, the conclusion of Lenin and Trotsky (see section H.3.8). As such, they should not recommend Lenin’s work as an example of what Bolshevism aims for. If, however, the basic idea of workers’ democracy and freedom are valid and considered the only way of achieving socialism then we need to wonder why the Bolsheviks did not apply them when they had the chance, particularly when the Makhnovists in the Ukraine did. Such an investigation would only end up by concluding the validity of anarchism, not Leninism.

This can be seen from the trajectory of Bolshevik ideology post-October. Simply put, it was not bothered by the breaking of the promises of State and Revolution and 1917 in general. As such, Cliff is just wrong to assert that while the message of State and Revolution was “violated again and again” it “was also invoked again and again against bureaucratic degeneration.” [Cliff, Op. Cit., p. 161] Far from it. Lenin’s State and Revolution was rarely invoked against degeneration by the mainstream Bolshevik leadership. Indeed, they happily supported party dictatorship and one-man management. Ironically for Cliff, it was famously invoked against the state capitalist policies being implemented in early 1918. This was done by the “Left Communists” around Bukharin in their

While it was initially a small organisation, as 1918 progressed it grew in size and activity. By April 1918, it was being used to break the anarchist movement across Russia (see section 23 for details). The Cheka soon became a key instrument of Bolshevik rule, with the full support of the likes of Lenin and Trotsky. The Cheka was most definitely a “special body of armed men” and not the same as the “armed workers.” In other words, Lenin’s claims in State and Revolution did not last two months and in under six months the Bolshevik state had a mighty group of “armed men” to impose its will.

This is not all. The Bolsheviks also conducted a sweeping transformation of the military within the first six months of taking power. During 1917, the soldiers and sailors (encouraged by the Bolsheviks and other revolutionaries) had formed their own committees and elected officers. In March 1918, Trotsky simply abolished all this by decree and replaced it with appointed officers (usually ex-Tsarist ones). In this way, the Red Army was turned from a workers’ militia (i.e. an armed people) into a “special body” separate from the general population (see section 15 for further discussion on this subject).

So instead of eliminating a “special force” above the people, the Bolsheviks did the opposite by creating a political police force (the Cheka) and a standing army (in which elections were a set aside by decree). These were special, professional, armed forces standing apart from the people and unaccountable to them. Indeed, they were used to repress strikes and working class unrest, a topic we now turn to.

Then there is the idea of that Lenin’s “workers’ state” would simple be an instrument of violence directed at the exploiters. This was not how it turned out in practice. As the Bolsheviks lost popular support, they turned the violence of the “worker’s state” against the workers (and, of course, the peasants). As noted above, when the Bolsheviks lost soviet elections they used force to disband them (see section 6 for further details). Faced with strikes and working
class protest during this period, the Bolsheviks responded with state violence (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). We will discuss the implications of this for Lenin’s theory below. So, as regards the claim that the new (“workers”) state would repress only the exploiters, the truth was that it was used to repress whoever opposed Bolshevik power, including workers and peasants.

As can be seen, after the first six months of Bolshevik rule not a single measure advocated by Lenin in *State and Revolution* existed in “revolutionary” Russia. Some of the promises were broken in quiet quickly (overnight, in one case). Most took longer. For example, the democratisation of the armed forces had been decreed in late December 1917. However, this was simply acknowledging the existing revolutionary gains of the military personnel. Similarly, the Bolsheviks passed a decree on workers’ control which, again, simply acknowledged the actual gains by the grassroots (and, in fact, limited them for further development — see section 9). This cannot be taken as evidence of the democratic nature of Bolshevism as most governments faced with a revolutionary movement will acknowledge and “legalise” the facts on the ground (until such time as they can neutralise or destroy them). For example, the Provisional Government created after the February Revolution also legalised the revolutionary gains of the workers (for example, legalising the soviets, factory committees, unions, strikes and so forth). The real question is whether Bolshevism continued to encourage these revolutionary gains once it had consolidated its power. Which they did not. Indeed, it can be argued that the Bolsheviks simply managed to do what the Provisional Government it replaced had failed to do, namely destroy the various organs of popular self-management created by the revolutionary masses. So the significant fact is not that the Bolsheviks recognised the gains of the masses but that their toleration of the application of what their followers say were their real principles did not last long and was quickly ended. Moreover, when the leading Bolsheviks looked back at this abolition they did not consider it in any way in contradiction to the principles of “communism” (see section 14).

We have stressed this period for a reason. This was the period before the out-break of major Civil War and thus the policies applied show the actual nature of Bolshevism, it’s essence if you like. This is a significant date as most Leninists blame the failure of Lenin to live up to his promises on this even. In reality, the civil war was not the reason for these betrayals — simply because it had not started yet (see section 16 on when the civil war started and its impact). Each of the promises were broken in turn months before the civil war happened. “All Power to the Soviets” became, very quickly, “All Power to the Bolsheviks.” In the words of historian Marc Ferro:

“In a way, *The State and Revolution* even laid the foundations and sketched out the essential features of an alternative to Bolshevik power, and only the pro-Leninist tradition has used it, almost to quieten its conscience, because Lenin, once in power, ignored its conclusions. The Bolsheviks, far from causing the state to wither away, found endless reasons for justifying its enforcement.” [October 1917, pp. 213–4]

Where does that leave Lenin’s *State and Revolution*? Well, modern-day Leninists still urge us to read it, considering it his greatest work and the best introduction to what Leninism really stands for. For example, we find Leninist Tony Cliff calling that book “Lenin’s real testament” while, at the same time, acknowledging that its “message … which was the guide for the first victorious proletarian revolution, was violated again and again during the civil war.” Not a very good “guide” or that convincing a “message” if it was not applicable in the very circumstances it was designed to be applied in (a bit like saying you have an excellent umbrella but it only works when it is not raining). Moreover, Cliff is factually incorrect. The Bolsheviks “violated” that “guide” before the civil war.
all the organisations that prepared and led the mutiny.” He reported on April 20th, 1921, that “in spite of all efforts we have been unable to discover the presence of any organisation and to seize any agents.” [quoted by Israel Getzler, “The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, Op. Cit., pp. 25–6]

These conclusions were drawn in spite of the interrogation of prisoners who would have been willing to tell the authorities what they wanted to hear in order to escape execution or imprisonment (unless of course placing the word “proletarian” before interrogation or torture — like state — produces different results?). Still, the Bolsheviks were apparently quite willing to consider inventing evidence of a conspiracy. Trotsky, for example, raised, on the 24th of March 1921, the possibility of a “Political Trial of Kronstadters and Makhnovites.” This show trial would be part of the “struggle” against “anarchism (Kronstadt and Makhno).” This was “presently an important task” and so it “seems ... appropriate to organise trials of Kronstadters ... and of Makhnovites.” The “effect of the reports and the speeches of the prosecutor etcetera would be far more powerful than the effects of brochures and leaflets about ... anarchism.” [quoted by Getzler, Op. Cit., p. 39] While Trotsky’s show trial was never staged, the fact that the idea was taken seriously can be seen from the invented summaries of the testimonies of three men considered by the Bolsheviks as ringleaders of the revolt. Perhaps the fact that the three (Kozlovsky, Petrichenko, Putilin) managed to escape to Finland ensured that Trotsky’s idea was never carried out. Stalin, of course, utilised the “powerful” nature of such trials in the 1930s.

While the Bolsheviks never published any of the documents they at times claimed to have proving the White conspiracy at Kronstadt, decades later historian Paul Avrich did discover an unsigned hand written manuscript labelled “Top Secret” and entitled “Memorandum on the Question of Organising an Uprising in Kronstadt.” Trotskyist Pierre Frank considered it “so convincing” that he arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the ‘people’…

“We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.

“The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification, a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to con-
ceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.

“Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary.” [Anarchism and Sovietism]

The validity of this argument can be seen, for example, from the expulsion of opposition parties from the soviets in June and July 1918. This act exposes the hollowness of Bolshevik claims of their soviet system presented a form of “higher” democracy. If the Bolshevik soviet system was, as they claimed, based on instant recall then why did they, for example, have to expel the Mensheviks and Right SRs from the soviet CEC in the first place? Why did the electors not simply recall them? It was two weeks after the Czech revolt before the Bolsheviks acted, surely enough time for voters to act? Perhaps this did not happen because the CEC was not, in fact, subject to instant recall at all? Being nominated at the quarterly soviet congress, they were effectively isolated from popular control. It also means that the Bolshevik government was even more insulated from popular control. To “recall” it, electors would have to either wait for the next national soviet congress or somehow convince the CEC to call an emergency one. As an example of workers’ running society, the Bolshevik system leaves much to be desired.

Another obvious lesson to learn was the use of appointments to the soviets and their executives from other organisations. As seen above, the Bolsheviks used the “representation” of other bodies they control (such as trade unions) to pack soviet assemblies in their favour. Similarly, allowing political parties to nominate repre-
“The publication of false news about Russia was nothing exceptional. Such news was published before, during, and after the Kronstadt events. It is undeniable that the bourgeoisie throughout the world was hostile to the Russian Revolution and would exaggerate any bad news emanating from that country. The Second Communist Conference of the Baltic Fleet had just voted a resounding resolution, critical of the political leadership of the Fleet. This fact could easily have been exaggerated by the bourgeois press, once again confusing the wishes with reality. To base an accusation on a 'proof' of this kind is inadmissible and immoral.”

In 1938 Trotsky himself was to drop this accusation. But ... he refers his readers to a study of the Kronstadt rebellion undertaken by an American Trotskyist John G. Wright ... [who] takes up once again the claim that the revolt must have been planned beforehand ... He says: 'the connection between Kronstadt and the counterrevolution can be established not only out of the mouths of the enemies of Bolshevism but also on the basis of irrefutable facts'. What irrefutable facts? Again, quotations from the bourgeois press ... giving false news before and during the insurrection.”[Op. Cit., p. 196]

The question of why the counterrevolutionary plotters would give their enemies advance notice of their plans and so time to take preventive action never crossed Leninist minds. How seriously these reports were taken can be seen by how the revolt took all the various Bolshevik hierarchies by surprise. Similarly, at the time no evidence was forthcoming that the Whites organised or took part in the revolt. Bukharin in July 1921, for example stated that, as regards Kronstadt, the “documents which have since been brought to light show clearly that the affair was instigated by purely White Guard centres.”[In Defence of the Russian Revolution, Al Richardson

sentatives in soviet executives also marginalised the soviet assemblies and those delegates actually elected in the workplaces.

This was obvious to the Russian anarchists, who argued “for effective soviets organised on collective lines with the direct delegation of workers and peasants from every factory, workshop, village, etc., and not political chatterboxes gaining entry through party lists and turning the soviets into talking shops.” [contained in Paul Avrich, The Anarchists in the Russian Revolution, p. 118] The Makhnovists, likewise, argued that “only labourers who are contributing work necessary to the social economy should participate in the soviets. Representatives of political organisations have no place in worker-peasant soviets, since their participation in a workers’ soviet will transform the latter into deputies of the party and can lead to the downfall of the soviet system.” [contained in Peter Arshinov’s History of the Makhnovist Movement, p. 266] As we discuss in section 15 of the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”, Leninists sometimes distort this into a claim that the Makhnovists opposed members of political standing for election.

This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounts that in early 1920 Bolsheviks in a chemical factory “put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote).” [quoted by Israel Getzler, Martov, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be “delegates” of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

However, in spite of these problems, the Russian soviets were a key means of ensuring working class participation in the revolution. As recognised by all the socialist oppositions to the Bolshe-
viks, from the anarchists to the Mensheviks. As one historian put it:

“Small wonder that the principal political demand of Mensheviks, Left SRs, SR Maximalists, Kronstadt sailors and of many oppositionists … has been for freely elected soviets which would this be restored to their original role as agents of democratisation.” [Israel Getzler, Soviets as Agents of Democratisation, p. 30]

The sad fate of the soviets after the Bolshevik seizure of power simply confirms the opinion of the left Menshevik Martov who had “rubbed it in to the Bolsheviks … at the first All-Russian Congress of Trade Unions [in January 1918], that they who were now extolling the Soviets as the ‘highest forms of the socialist development of the proletariat,’ had shown little love of them in 1905 or in 1917 after the July days; they loved Soviets only when they were ‘in the hands of the Bolshevik party’” [Getzler, Martov, p. 174] As the next few months showed, once the soviets left those hands, then the soviets themselves were destroyed. The civil war did not start this process, it just gave the latter-day supporters of Bolshevism something to use to justify these actions.

at how the Bolsheviks reacted to this announcement of an uprising in Kronstadt two weeks before it took place: they did nothing. As the Trotskyist editors of a book justifying the repression note, the “Red Army command was caught unprepared by the rebellion.” J.G. Wright, in his “The Truth about Kronstadt”, similarly noted that the “Red Army command” was “[c]aught off guard by the mutiny.” This in spite of Trotsky stating at the time that on “basis of the dispatch” he had “sent a warning to Petrograd to my naval colleagues.” [Lenin and Trotsky, Op. Cit., p. 6, p. 123 and p. 68] This clearly shows how little weight the newspaper reports were held before the rebellion. Of course, during and after the rebellion was a different matter and they quickly became a focal point for Bolshevik smears.

This is perhaps to be expected for, as proof of a White plot, this evidence is pathetic as can be seen by Lenin himself who noted a “campaign of lies” which produced “a vast number of fabrications in this period”. [Collected Works, vol. 32, p. 269] Likewise, Trotsky admitted that “the imperialist press … prints … a great number of fictitious reports about Russia” but also maintained that the reports on Kronstadt were examples of “forecasts” of “attempts at overturns in specific centres of Soviet Russia” (indeed, the “journalistic agents of imperialism only ‘forecast’ that which is entrusted for execution to other agents of this very imperialism.”). [Lenin and Trotsky, Kronstadt, pp. 50–1]

Yet this same press can be used as evidence for a White conspiracy in Kronstadt? “In reality,” as Emma Goldman noted, “this advance news was like other news from Paris, Riga or Helsingfors, and which rarely, if ever, coincided with anything that had been claimed by the counter-revolutionary agents abroad … No, the advance news in the Paris Press had no bearing whatever on the Kronstadt rebellion. In point of fact, no one in Petrograd in 1921 believed its connection, not even quite a number of Communists.” [“Trotsky Protests Too Much”, Op. Cit., p. 262] Ida Mett states the obvious:
the rebellion. As the obvious falseness of the claims became more and more well-known, Trotsky and his followers turned to other ways to slander the uprising. The most famous is the assertion that the “Kronstadt sailors were quite a different group from the revolutionary heroes of 1917.” [Wright, “The Truth about Kronstadt”, Op. Cit., p. 129] We turn to this question in the section 8 and indicate that subsequent research has refuted it (and how Trotskyists have misused this research). The more sophisticated ones utilise a variation on Serge’s arguments for why he, in the end, supported the Bolsheviks in 1921 and we discuss this in section 12. However, first we must discuss whether the Kronstadt revolt was, in fact, a White conspiracy (section 6) and its real relationship to the Whites (section 7).

6 Was the Kronstadt revolt a White plot?

As discussed in the last section, at the time the Bolsheviks portrayed the Kronstadt revolt as a conspiracy organised by a foreign spies and a former Tsarist General. Lenin, for example, proclaimed on March 8th that “White Guard generals were very active” at Kronstadt. “There is ample proof of this. A fortnight before the Kronstadt events, the Paris newspapers reported a mutiny at Kronstadt. It is quite clear that it is the work of Social Revolutionaries and White Guard emigres.” [Collected Works, vol. 32, p. 184] Trotsky, on March 16th, made the same point, arguing that “in a number of foreign newspapers ... news of an uprising in Kronstadt appeared as far back as the middle of February ... How [to] explain this? Very simply ... The Russian counterrevolutionary organisers promised to stage a mutiny at a propitious moment, while the impatient yellow and financial press write about it as an already accomplished fact.” [Lenin and Trotsky, Kronstadt, p. 68]

This appears to be the best, indeed only, “evidence” provided by Lenin and Trotsky as regards the White Guardist nature of the revolt. To see the truth of these claims it is simply a case of looking
7 How did the factory committee movement develop?
8 What was the Bolshevik position on “workers’ control” in 1917?
9 What happened to the factory committees after October?
10 What were the Bolshevik economic policies in 1918?
11 Did Bolshevik economic policies work?
12 Was there an alternative to Lenin’s “state capitalism” and “war communism”?
13 Did the Bolsheviks allow independent trade unions?
14 Was the Red Army really a revolutionary army?
15 Was the Red Army “filled with socialist consciousness”?
16 How did the civil war start and develop?
17 Was the civil war between just Reds and Whites?
18 How extensive was imperialist intervention?
19 Did the end of the civil war change Bolshevik policies?
20 Can the Red Terror and the Cheka be justified?
21 Did Bolshevik peasant policies work?
22 Was there an alternative to grain requisition?
23 Was the repression of the socialist opposition justified?
24 What did the anarchists do during the revolution?
25 Did the Russian revolution refute anarchism?

What was the Kronstadt Rebellion?

The Kronstadt rebellion took place in the first weeks of March 1921. Proclaimed by Trotsky himself as being the “pride and glory of calumnies put out by the Communist Press” about Nestor Makhno, “which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them” which suggests that Kronstadt was hardly the first time the Party had lied to them. [Op. Cit., pp. 124–6 and p. 122] Sadly, he fails to mention that he himself contributed to the Bolshevik lie machine about Kronstadt by, for example, publicly repeating the Soviet regime’s falsifications about the rebels in March 1922. [The Serge-Trotsky Papers, pp. 18–9] Nor was this an isolated case—he also repeated the usual Bolshevik slanders against the Makhnovists in 1920 before, in 1938, admitting such claims were “not true” [Victor Serge, Anarchists Never Surrender, p. 169 and p. 223] Likewise, a revolt in Saratov in May 1918 saw the party depict it “as the outgrowth of the actions of its collective enemies: White Guards, tsarist officer organisations, Black Hundreds, Cossacks, Czechoslovaks, and … Right SRs and Mensheviks. But the classified report of the Extraordinary Investigative Commission charged with studying the insurrection saw it as a spontaneous, disorganised movement caused by excessive use of force that turned the city’s inhabitants against Soviet power, which lacked a popular mandate.” [Donald J. Raleigh, Experiencing Russia’s Civil War, p. 54]

Finally, we must note that in the late 1920s the Stalinists tried to link the Trotskyist Opposition to a White General. Thus the “charge that the Opposition had ties with White Guards was trumpeted” and, while baseless, “the objective of further discrediting the Opposition had been accomplished. ‘The myth about the “Wrangel officer” is being broadcast through the land, poisoning the minds of a million party members and tens of millions of non party men’, reported the Opposition leaders.” [Tony Cliff, Trotsky, vol. 3, pp. 256–7]

These days, it is hard to find a Leninist who subscribes to this particular Bolshevik lie about Kronstadt. It has, in the main, been long abandoned by those who follow those who created it despite the fact it was the cornerstone of the official Bolshevik account of...
1919, by the Petrograd Soviet “for military feats and energetic activities during the attack of the Yudenich bands on Petrograd.” Indeed, he was one of the first generals who entered into service of the Bolsheviks and the Kronstadt soviet had elected him Chief-of-Staff of the fortress in the wake of the February revolution in 1917. All this did not stop the Bolsheviks claiming on March 3rd, 1921, that Kozlovsky was a “supporter of Yudenich and Kolchak”. [quoted by Israel Getzler, “The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, Op. Cit., p. 43 and p. 31]

Berkman was clearly correct and Wright, wrong. Kozlovsky took no role in the revolt and the Trotskyists join the Stalinists in the “historical falsification [which] had singled out [him] as the leader of the rebellion.” What he did do was offer his expertise to the Kronstadt rebels (just as he had to the Bolsheviks) and make plans which were rejected. If associating yourself with an event and making plans which are rejected by those involved equals a role in that event then Trotsky’s role in the Spanish revolution equalled that of Durruti’s. Likewise, no Trotskyist concludes that if Tsarist Generals providing advice makes something counter-revolutionary, then the Red Army must also have been. After all, the Bolshevik regime gave command of the assault on Kronstadt to Toukhatchevsky, a professional soldier and former Tsarist officer whose social background would have ensured he would harbour no sympathies — unlike many of the troops he commanded — for the socialist ideas being raised by the rebels and who would not think twice at placing machine-guns behind the Red Army forces to ensure their obedience. Indeed, after crushing Kronstadt he “turned to his next task — the suppression of the peasant rising in the Tambov and the adjoining provinces”. [George Katkov, Op. Cit., p. 40 and p. 66]

It should be noted that Bolsheviks slandering their opponents was hardly new. For example, Serge, a few pages before his account of the Kronstadt rebellion in his memoirs, mentions “the strenuous the Russian Revolution,” its sailors were renowned for their revolutionary ideas and activities and had turned the naval base and city into a de facto soviet republic soon after the February revolution. However, in 1921 Red Kronstadt had turned against the Communist dictatorship and raised the slogan of the 1917 revolution “All Power to the Soviets”, to which it added “and not to parties.” The rebels called this revolt the “Third Revolution” and saw it as completing the work began in the first two Russian Revolutions in 1917 by instituting a true toilers republic based on freely elected, self-managed, soviets. As the Russian Anarchist Voline put it, while ”Kronstadt fell and State Socialism triumphed” it “exposed ... the real character of the Communist dictatorship” and “[I]n the complex and shadowy labyrinth which opens out to the masses in revolt, Kronstadt is a bright beacon that lights up the right road.” [The Unknown Revolution, p. 537–8]

Given this, it is important to know and understand this revolt, what it says of Bolshevik ideology and practice and to refute the many slanders Leninists have hurled against it. These issues are addressed in the various sections below. First, though, it is necessary to summarise the events of the revolt itself.

Kronstadt was (and is) a naval fortress on an island in the Gulf of Finland. Traditionally, it has served as the base of the Russian Baltic Fleet and to guard the approaches to the city of St. Petersburg (which during the first world war was re-named Petrograd, then later Leningrad, and is now St. Petersburg again) thirty kilometres away. As noted, the Kronstadt sailors had been in the vanguard of the revolutionary events of 1905 and 1917 and far-left influence was high: Left-SRs, Maximalist-SRs, Bolsheviks and anarchists all had significant influence (in roughly that order, as discussed in section 9 below, Kronstadt was never a Bolshevik stronghold in 1917). The inhabitants of Kronstadt had been early supporters and practitioners of soviet democracy, forming a free commune in 1917 which was independent of the Provisional Government. In the words of Israel Getzler, an expert on Kronstadt, “it was in its commune-like
self-government that Red Kronstadt really came into its own, realising the radical, democratic and egalitarian aspirations of its garrison and working people, their insatiable appetite for social recognition, political activity and public debate, their pent up yearning for education, integration and community. Almost overnight, the ship’s crews, the naval and military units and the workers created and practised a direct democracy of base assemblies and committees.” In the centre of the fortress an enormous public square served as a popular forum holding as many as 30,000 people. The Kronstadters “proved convincingly the capacity of ordinary people to use their ‘heads, too’ in governing themselves, and managing Russia’s largest naval base and fortress.” [Kronstadt 1917–1921, p. 248 and p. 250]

The Russian Civil War had ended in Western Russia in November 1920 with the defeat of General Wrangel in the Crimea. All across Russia popular protests were erupting in the countryside and in the towns and cities. Peasant uprisings were occurring against the Communist Party policy of grain requisitioning (a policy the Bolsheviks and their supporters argue had been thrust upon them by the circumstances but which involved extensive, barbaric and counter-productive repression). In urban areas, a wave of spontaneous strikes occurred in protest against the militarisation of labour, lack of food, Bolshevik dictatorship and a host of other issues. So, “by the beginning of 1921 a revolutionary situation with workers in the vanguard had emerged in Soviet Russia” with “the simultaneous outbreak of strikes in Petrograd and Moscow and in other industrial regions.” “General strikes, or very widespread unrest” took place in all bar one major industrial region and strikes were combined with “factory occupations, ‘Italian strikes’, demonstrations, mass meetings, the beating up of communists and so on.” [Jonathan Aves, Workers Against Lenin, p. 3, p. 109, and p. 112] The rebel workers and peasants raised both economic and political demands.

In late February a general strike broke out in Petrograd along which immediately saw Bolshevik repression against it. On Febru...

it was only because Kozlovsky and his colleagues were unable to convince the ‘political leaders’, i.e. his SR allies [!], that the moment was propitious for exposing their true visage and program.” [“The Truth about Kronstadt”, Lenin and Trotsky, Kronstadt, p. 119] In other words, because the Provisional Revolutionary Committee failed to take the advice of the military specialists it proves that, in fact, they were in league. That is very impressive. We wonder if the Kronstadters had taken their advice then this would have proved that they were not, in fact, in league with them after all?

Every non-Leninist account agrees that Kozlovsky played no part in the revolt. Paul Avrich notes that when trouble erupted “the Bolsheviks at once denounced him as the evil genius of the movement,” immediately “oulawed” him and seized his family as hostages. He confirms that the military specialists “threw themselves into the task of planning military operations on behalf of the insurrection” and that Kozlovsky had refused to succeed as the commander of the fortress after the old one had fled to the mainland (as demanded by military rules). He stresses that “the officers remained in a purely advisory capacity throughout the rebellion. They had no share, as far as one can tell, in initiating or directing the revolt, or in framing its political program, which was alien to their way of thinking.” Their role “was confined to providing technical advice, just as it had been under the Bolsheviks.” The Provisional Revolutionary Committee “showed its distrust of the specialists by repeatedly rejecting their counsel, however sound and appropriate it might be.” And, of course, “[f]or all the government’s accusations that Kronstadt was a conspiracy of White Guard generals, ex-tsarist officers played a much more prominent role in the attacking force than among the defenders.” [Op. Cit., p. 99, p. 100, p. 101 and p. 203]

Kozlovsky before the revolt “had served the Bolsheviks so loyally that on 20 October 1920 the chief commander of the Baltic Fleet ... had awarded him a watch ‘for courage and feat of arms in the battle against Yudenich’” [Getzler, Kronstadt 1917–1921, p. 219] This officially confirmed the award made on the 3rd of December,
views granted to the Finnish press, Kozlovsky accused the sailors of having wasted precious time on issues other than the defence of the fortress. He explained this in terms of their reluctance to resort to bloodshed. Later, other officers of the garrison were also to accuse the sailors of military incompetence, and of complete lack of confidence in their technical advisers. Kozlovsky was the only general to have been present at Kronstadt. This was enough for the Government to make use of his name.

“The men of Kronstadt did, up to a point, make use of the military know how of certain officers in the fortress at the time. Some of these officers may have given the men advice out of sheer hostility to the Bolsheviks. But in their attack on Kronstadt, the Government forces were also making use of ex Tsarist officers. On the one side there were Kozlovsky, Salomianov, and Arkannihow; On the other, ex-Tsarist officers and specialists of the old regime, such as Toukhatchevsky, Kamenev, and Avrov. On neither side were these officers an independent force.” [Op. Cit., pp. 156–7]

These facts have been well-known since 1921 but they are not good enough for Trotskyists. Wright, for example, would have none of it and after quoting Alexander Berkman — that there was “a former general, Kozlovsky, in Kronstadt. It was Trotsky who had placed him there as an Artillery specialist. He played no role whatever in the Kronstadt events.” [“The Kronstadt Rebellion”, Op. Cit., p. 69] — he goes on to protest that this is not true. As evidence, Wright quotes from an interview by Kozlovsky and states that “from the lips of the counterrevolutionary general himself … we get the unambiguous declaration that from the very first day, he and his colleagues had openly associated themselves with the mutiny, had elaborated the ‘best’ plans to capture Petrograd … If the plan failed
another delegation to Petrograd to explain to the strikers and the city garrison the demands of Kronstadt and to request that non-partisan delegates be sent by the Petrograd workers to Kronstadt to learn first-hand what was happening there. This delegation of thirty members was arrested by the Bolshevik government.

As the term of office of the Kronstadt soviet was about to expire, the mass meeting also decided to call a Conference of Delegates for March 2nd to discuss the manner in which the new soviet elections would be held (Kronstadt had not had a freely elected soviet since the Bolsheviks “dissolving [of] the Kronstadt Soviet and establishing a puppet committee in its place” in July 1918 [Alexander Rabinowitch, The Bolsheviks in Power, p. 302]). This conference consisted of two delegates from the ship’s crews, army units, the docks, workshops, trade unions and Soviet institutions. This meeting of 303 delegates endorsed the Petropavlovsk resolution and elected a five-person Provisional Revolutionary Committee (this was enlarged to 15 members two days later by another conference of delegates). This committee was charged with organising the defence of Kronstadt, a move decided upon in part by the threats of the Bolshevik officials there and the rumour that the Bolsheviks had dispatched forces to attack the meeting.

The Communist Government issued an ultimatum on March 2nd which built upon Zinoviev’s telegram of the 28th and asserted that the revolt had “expected by, and undoubtedly been prepared by, French counterintelligence” and that the Petropavlovsk resolution was a “SR-Black Hundred resolution”. The Bolsheviks claimed that the revolt had been organised by an ex-Tsarist officers led by “former general Kozlovsky and three of his officers” and so “behind the SRs again stands a tsarist general.” [Lenin and Trotsky, Kronstadt, pp. 65–6] This was the official line throughout the revolt and any awkward facts (such as Kozlovsky, ironically, being placed in the fortress as a military specialist by Trotsky) ignored.

Basing himself on documents from the Soviet Archives, historian Israel Getzler states that “[b]y 5 March, if not earlier, the So-

Guard insurrections”) was in fact “the mutiny of ex-General Kozlovsky and the crew of the battle ship Petropavlovsk” and it was “clear that the Kronstadt revolt is being led from Paris. The French counter espionage is mixed up in the whole affair ... The Socialist Revolutionaries, who have their headquarters in Paris, are preparing the ground for an insurrection against the Soviet power. The ground prepared, their real master, the Tsarist general appeared”. [quoted by Mett, Op. Cit., p. 155] It seems strange that Frank complains that others “distort” the Bolsheviks position when, firstly, the person he quotes does not and, secondly, he distorts that persons’ actual position. As can be seen, Mett provided evidence for her claim — the quote provided heads the section from which Frank cherry-picks — yet Frank fails to inform his readers of this before quoting her on how “Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere ‘generals’ revolt.” [Op. Cit., p. 43]

After providing evidence that the Bolsheviks had blamed the revolt on a White conspiracy, she then turns to General Kozlovsky whom the Bolsheviks indicated by name as its leader and had outlawed in the proclamation of March 2nd. Who was he and what part did he play? Mett sums up the evidence:

“He was an artillery general, and had been one of the first to defect to the Bolsheviks. He seemed devoid of any capacity as a leader. At the time of the insurrection he happened to be in command of the artillery at Kronstadt. The communist commander of the fortress had defected. Kozlovsky, according to the rules prevailing in the fortress, had to replace him. He, in fact, refused, claiming that as the fortress was now under the jurisdiction of the Provisional Revolutionary Committee, the old rules no longer applied. Kozlovsky remained, it is true, in Kronstadt, but only as an artillery specialist. Moreover, after the fall of Kronstadt, in certain inter-
So by the 1950s even Isaac Deutscher, Trotsky’s somewhat un-critical biographer, had to admit that the Bolsheviks “denounced the men of Kronstadt as counter-revolutionary mutineers, led by a White general. The denunciation appears to have been groundless.” [The Prophet Armed, p. 511] Yet this did not stop the Trotskyist editors of Kronstadt showing the same contempt for their readers as the Bolsheviks showed for the truth. They include an “Introduction” to their work by Pierre Frank in which he argues that the Bolsheviks merely “state that [White] generals, counterrevolutionaries, sought to manipulate the insurgents” and that anarchists “turn this into a claim that these generals had launched the rebellion and that [quoting Ida Mett] ‘Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere “generals’ revolt,”’” [The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, Revolutionary Russia, pp. 24–44, Vol. 15, No. 1, p. 32]

As the Bolshevik regime sought to mobilise forces to crush the rebels, Kronstadt started to re-organise itself from the bottom up. The trade union committees were re-elected and a Council of Trade Unions formed. The Conference of Delegates met to discuss issues relating to the interests of Kronstadt and the struggle against the Bolshevik government. Around 300 Communists were arrested and treated humanely in prison while many more (at least 780) left the party, expressing support for the revolt and its aim of “all power to the soviets and not to parties”, in protest of the actions the party was taking against Kronstadt or its general role in the revolution. Significantly, up to one-third of the delegates elected to Kronstadt’s rebel conference of March 2nd were Communist Party members. [Avrich, Kronstadt 1921, pp. 184–7 and p. 81] While “[t]here can be no doubt that the [arrested] Kronstadt Communists were frightened and expected to be treated in the same way as their own Cheka treated its prisoners ... The fact is no Communists were shot, none were court-martialled, and the Provisional Revolutionary Committee showed no vindictiveness.” [George Katkov, “The Kronstadt Rising,”, St. Anthony’s Papers, No. 6, p. 44]

The Kronstadt revolt was a non-violent one, but from the start the attitude of the authorities was not one of serious negotiation but rather one of delivering an ultimatum on March 5th: either
come to your senses and surrender or suffer the consequences. A
leaflet issued by the Petrograd Defence Committee threatened that
they would shoot the rebels “like partridges” while any of their fam-
ilies in Petrograd were taken hostage. [Avrich, Op. Cit., pp. 144–6]
While there was at least three to four weeks before the ice was due
to melt after the March 2nd Conference of Delegates meeting which
marked the real start of the revolt, the Bolsheviks started military
operations at 6.45pm on March 7th.

There were possible means for a peaceful resolution of the con-
flict. On March 5th, two days before the bombardment of Kron-
stadt began, anarchists led by Emma Goldman and Alexander Berk-
man offered themselves as intermediates to facilitate negotiations
between the rebels and the government (anarchist influence had
been strong in Kronstadt in 1917). [Emma Goldman, Living My
Life, vol. 2, pp. 882–3] This was ignored by the Bolsheviks. Years
later, the Bolshevik Victor Serge (and eye-witness to the events)
acknowledged that “[e]ven when the fighting had started, it would
have been easy to avoid the worst: it was only necessary to accept the
mediation offered by the anarchists (notably Emma Goldman and
Alexander Berkman) who had contact with the insurgents. For rea-
sons of prestige and through an excess of authoritarianism, the Cen-
tral Committee refused this course.” [The Serge-Trotsky Papers, p.
164] Trotsky, it should be noted, in 1937 proclaimed that the “an-
archist and Menshevik elements … did their best to lead things to an
uprising. They succeeded. So nothing remained but armed struggle.”
[Lenin and Trotsky, Kronstadt, p. 82] Sadly, he never explained how
this was achieved — particularly given that many of the lead-
ing Mensheviks were already in prison before Kronstadt rebelled
and soon joined by others.

Another possible solution, namely the Petrograd Soviet sugges-
tion of March 6th that a delegation of party and non-party members
of the Soviet visit Kronstadt was not pursued by the government.
The rebels, unsurprisingly enough, had reservations about the real
status of the non-party delegates and made the very reasonable re-
practically general” This confirms the obvious: if the Bolshevik
leaders had considered the revolt to be counter-revolutionary
(passing a “SR-Black Hundreds” resolution as Zinoviev informed
Lenin on the 28th of February) then why were Kalinin and Kuzmin
sent to Kronstadt the next day to parley with the sailors? Is it
really conceivable that leading Bolsheviks could safely undertake
an official visit to the headquarters of a counter-revolution?
Serge suggested that it “was probably Kalinin who, on his return
to Petrograd, invented ‘the White General Kozlovsky’” for he had
attended the initial mass meeting at Kronstadt and “whose brutal
bungling provoked the rebellion” by “treat[ing] them as rogues
and traitors merely out for themselves, and threatened them with
merciless reprisals.” [Memoirs of a Revolutionary, pp. 124–6
and p. 127]

Thus the claim that the Kronstadt rebellion was the work of
Whites and led by a Tsarist General was a lie — a lie deliberately
and consciously spread. This was concocted to weaken support for
the rebellion in Petrograd and in the Red Army, to help isolate it.
Lenin admitted as much on the 15th of March when he stated at
the Tenth Party Conference that in Kronstadt “they do not want
either the whiteguards or our government”. This did not, of course,
stop him proclaiming earlier at this conference that the revolt was
“bound up initially with the whiteguards” [Collected Works, vol.
32, p. 228 and p. 185]

If you agree with Italian Marxist Antonio Gramsci that “to tell
the truth is a communist and revolutionary act” then it is clear that
the Bolsheviks in 1921 (and for a long time previously) were not
communist or revolutionary (and as the subsequent Leninist ac-
counts of Kronstadt show, Bolshevism is still neither). [quoted by
Gwyn A. Williams, Proletarian Order, p. 193] In stark contrast to
the Bolsheviks, the Kronstadt paper Izvestiia published Bolshevik
leaflets, paper articles and radio broadcasts so that the inhabitants
of the island could see exactly what lies the Bolsheviks were telling
about them.
Civil War. According to the Soviet press, the sailors, influenced by Mensheviks and SR's in their ranks, had shamelessly cast their lot with the 'White Guards,' led by a former tsarist general named Kozlovsky ... This, in turn, was said to be part of a carefully laid plot hatched in Paris by Russian emigres in league with French counterintelligence.” [Op. Cit., p. 88 and p. 95]

Lenin, for example, argued in a report to the Tenth Congress of the Communist Party on March 8th that "White Guard generals were very active over there. There is ample proof of this" and that it was "the work of Social Revolutionaries and White Guard emigres." The first government statement on the Kronstadt events was entitled "The Revolt of Ex-General Kozlovsky and the Warship Petropavlovsk" and stated that the revolt was “expected by, and undoubtedly prepared by, French counterintelligence” and that on the morning of March 2 “the group around ex-General Kozlovsky ... had openly appeared on the scene ... [he] and three of his officers ... have openly assumed the role of insurgents. Under their direction ... a number of ... responsible individuals, have been arrested... Behind the SRs again stands a tsarist general." [Lenin and Trotsky, Kronstadt, p. 44 and pp. 65–6]

The reality was different and the Bolsheviks knew it. Victor Serge, a French illegalist-anarchist turned Bolshevik, later recounted how he was first told that "Kronstadt is in the hands of the Whites" and that "[s]mall posters stuck on the walls in the still empty streets proclaimed that the counter-revolutionary General Kozlovsky had seized Kronstadt through conspiracy and treason." However, the "truth seeped through little by little, past the smokescreen put out by the Press, which was positively berserk with lies" (indeed, it "lied systematically"). He found out that the Bolshevik's official line was "an atrocious lie" and that "the sailors had mutinied, it was a naval revolt led by the Soviet." However, the "worse of it all was that we were paralysed by the official falsehoods. It had never happened before that our Party should lie to us like this. 'It's necessary for the benefit of the public,' said some ... the strike [in Petrograd] was now quest that the elections to the delegation take place within factories with observers from Kronstadt present. Nothing came of this (unsurprisingly, as such a delegation would have reported the truth that Kronstadt was a popular revolt of working people so exposing Bolshevik lies and making the planned armed attack more difficult). A delegation “sent by Kronstadt to explain the issues to the Petrograd Soviet and people was in the prisons of the Cheka” and so “right from the first moment, at a time when it was easy to mitigate the conflict, the Bolshevik leaders had no intention of using anything but forcible methods.” [Victor Serge, Memoirs of a Revolutionary, p. 127]

As Alexander Berkman noted, the Communist government would "make no concessions to the proletariat, while at the same time they were offering to compromise with the capitalists of Europe and America." [“The Kronstadt Rebellion”, The Russian Tragedy, p. 62]

The Communist government started to attack Kronstadt on March 7th and the first assault was a failure: ‘After the Gulf had swallowed its first victims, some of the Red soldiers, including a body of Peterhof kursanty, began to defect to the insurgents. Others refused to advance, in spite of threats from the machine gunners at the rear who had orders to shoot any wavering. The commissar of the northern group reported that his troops wanted to send a delegation to Kronstadt to find out the insurgents' demands.’ The revolt was isolated and received no external support. The Petrograd workers were under martial law and could little or no action to support Kronstadt (assuming they refused to believe the Bolshevik lies about the uprising). The attacks continued, with Trotsky at one stage sanctioning the use of chemical warfare against the rebels [Avrich, Op. Cit., pp. 153–4, p. 146 and pp. 211–2] However, this poison gas attack was not needed in the end for Kronstadt was taken by the Red Army on March 17th — yet even in the final assault occurred the Bolsheviks had to force their troops to fight, for on the night of 16–17 March “the extraordinary troika of Aleksei Nikolaev had arrested over 100 so-called instigators, 74 of whom he had publicly shot.” [Getzler, Op. Cit., p. 35] The Red Army troops
has also seen their ranks swell with Communist Party members — many from the Tenth Party Congress — who were happy to shoot any who hesitated or expressed sympathy for the rebels while behind them were machine guns ready to open fire at the slightest sign of dissent or retreat. Once the Bolshevik forces finally entered the city of Kronstadt “the attacking troops took revenge for their fallen comrades in an orgy of bloodletting.” [Avrich, Op. Cit., p. 211] Eight thousand sailors, soldiers and civilians escaped over the ice to Finland. The crews of the Petropavlovsk and Sevastopol fought to the bitter end, as did the cadets of the mechanics school, the torpedo detachment and the communications unit.

The next day, as an irony of history, the Bolsheviks celebrated the fiftieth anniversary of the Paris Commune:

“My Disillusionment in Russia, p. 199]

The repression did not end there. According to Serge, the “defeated sailors belonged body and soul to the Revolution; they had voiced the suffering and the will of the Russian people” yet "[h]undreds of prisoners were taken away to Petrograd; months later they were still being shot in small batches, a senseless and criminal agony” (particularly as they were “prisoners of war ... and the Government had for a long time promised an amnesty to its opponents on condition that they offered their support”). “This protracted massacre was either supervised or permitted by Dzerzhinsky” (the head of the Cheka). The “responsible of the Bolshevik

population, including the urban working class who raised these demands continually throughout the Civil War period during their strikes. Simply put, the policies of the Bolsheviks as regards food did not work and were, in fact, counter-productive — as many of the Russian proletariat recognised.

So to claim that Kronstadt solely reflected the plight or interests of the peasantry is nonsense, whether that claim was made in 1938, 1991 or now. Yet there is an irony in such assertions for, after all, the very demands which Trotskyists claims show the revolt’s peasant nature — point 8 (withdrawn of roadblocks) and point 11 (free action for peasants who do not use wage-labour) — were quickly agreed to by the Bolshevik authorities. During the revolt Zinoviev announced various “concessions to the workers’ most pressing demands” which included that “plans were afoot to abandon the forcible seizure of grain from the peasants in favour of a tax in kind ... which would at least partially restore freedom of trade between town and country” plus “the withdrawal of all roadblocks from the whole of the Petrograd province.” [Avrich, Op. Cit., p. 49] Surely, then, it was the Bolsheviks who represented the most “backward” elements of the peasantry? Moreover, given that the New Economic Policy (NEP) allowed wage labour does this not mean the Bolsheviks represented the interests of the kulak?

5 What lies did the Bolsheviks spread about Kronstadt?

From the start, the Bolsheviks lied about the uprising. Indeed, Kronstadt provides a classic example of how Lenin and Trotsky used slander against their political opponents. Both attempted to paint the revolt as being organised and lead by the Whites. As Paul Avrich notes, “every effort was made to discredit the rebels” and that the “chief object of Bolshevik propaganda was to show that the revolt was not a spontaneous outbreak of mass protest but a new counterrevolutionary conspiracy, following the pattern established during the
Of course, no worker or peasant could possibly reach beyond a trade union consciousness by their own efforts, as Lenin so thoughtfully argued in *What is to be Done?* (see section H.5). Neither could the experience of two revolutions have an impact on anyone, nor the extensive political agitation and propaganda of years of struggle. Indeed, the sailors were so backward that they had no “profound economic needs and interests” of their own but rather fought for “the needs and interests of the fathers and brothers!” Yet, according to Trotsky, “[t]hey themselves did not clearly understand that what their fathers and brothers needed first of all was free trade.” [Lenin and Trotsky, *Op. Cit.*, p. 92] And these were the sailors the Bolsheviks desired to operate some of the most advanced warships in the world?

Sadly for Wright’s assertions history has proven him wrong time and time again. Working people have constantly raised political demands which were far in advance of those of the “professional” revolutionaries (a certain German and the Paris Commune springs to mind, never mind a certain Russian and the soviets). The fact that the Kronstadt sailors not only “venture[d] upon an insurrection under an abstract political slogan of ‘free soviets’” but actually created one (the conference of delegates) goes unmentioned. Likewise, it is forgotten that the motivation for the resolution was solidarity with the strikes in Petrograd and so it also, naturally enough, included the dissatisfaction of both the workers and the peasants. For the Kronstadters, it was a case of the needs of all the toilers and so their resolution reflected the needs and demands of both. That two other worker revolts — waged by that proletarian weapon, the strike — also raised similar demands shows the baselessness of Wright’s assertions.

Thus claims that the Kronstadt demands reflected peasant needs is mistaken. In fact, they reflected the needs of the whole working Central Committee had been simply enormous” and “the subsequent repression … needlessly barbarous.” [*Op. Cit.*, p. 131 and p. 348] There are no reliable figures of casualties on either side. According to official Soviet figures, around 700 were killed and 2,500 wounded or shell-shocked on the government side. Others suggest over 10,000 killed, wounded or missing as a result of storming Kronstadt. One report puts the rebel deaths at 600 and more than 1,000 wounded. [Avrich, *Op. Cit.*, p. 211] There are also no reliable figures on how many rebels were later shot by the Cheka or sent to prison camps. The figures that exist are fragmentary. For example, “4,836 Kronstadt sailors were arrested and deported to the Crimea and the Caucasus. But when Lenin learned of this on the 19 April, he expressed ‘great misgivings regarding the location of these sailors’ [in these areas]. As a result these ... sent to forced labour camps in the Archangelsk, Vologda and Murmansk regions.” The families of the rebels were also deported, with one Bolshevik official “pointed at Siberia as ‘undoubtedly the only suitable region’ for these people.” [Gelzter, *Op. Cit.*, pp. 35–6 and p. 37] Many other rebels were executed:

"[One] 20 April report on ‘The Results of the Reprisals Against the Mutineers in the Period of 20 March to 15 April’ contains the following data: out of 3,000 active participants in the mutiny, 40 per cent (1,200) were sentenced to death, 25 per cent to five years of forced labour, and 35 per cent were released. [It] complained that in carrying out their work, the *troika* had had to rely exclusively on information provided by the Special Section of the *Vecheka*: ‘neither commissars nor local Communists provided any material’.

“The statistical communique of the Special Section of the Extraordinary *Troikas* of 1 May has the following data: 6,528 were arrested, of whom 2,168 had been shot, 1,955 had been sentenced to forced labour (of whom 1,486 re-
ceived a five year sentence), and 1,272 were released. In a statistical review of the mutiny made in 1935–36, the figure of those arrested is given as 10,026, but the review also says, ‘It has not been possible to establish accurately the number of the repressed.’” [Getzler, Op. Cit., p. 36]

After the revolt had been put down, the Bolshevik government reorganised the fortress. While it had attacked the revolt in the name of defending “Soviet Power” Kronstadt’s newly appointed military commander “abolished the [Kronstadt] soviet altogether” and ran the fortress “with the assistance of a revolutionary troika” (i.e. an appointed three man committee). [Getzler, Kronstadt 1917–1921, p. 244] Kronstadt’s newspaper was renamed Krasnyi Kronstadt (from Izvestiia) and stated in an editorial that the “fundamental features” of Kronstadt’s restored “dictatorship of the proletariat” during its “initial phases” were “[r]estrictions on political liberty, terror, military centralism and discipline and the direction of all means and resources towards the creation of an offensive and defensive state apparatus.” [quoted by Getzler, Op. Cit., p. 245] The victors quickly started to eliminate all traces of the revolt. Anchor square became Revolutionary Square and the rebel battleships Petropavlovsk and Sevastopol were renamed the Marat and the Paris Commune, respectively.

In terms of wider changes, the revolt and the mass strike waves saw the Bolshevik dictatorship change some of its policies during the revolt and after it had been crushed. While none of the political demands were granted, the economic ones were to a certain degree by means of the New Economic Policy (or NEP). That Lenin did this does not stop Leninists then or now denouncing these economic demands as expressing the Kronstadt’s revolt’s allegedly counter-revolutionary “petty-bourgeois” nature.

That, in summary, was the Kronstadt revolt. Obviously we cannot cover all the details and we recommend readers to consult the books and articles we list at the end of this section for fuller ac-
offered the best answer to putting an end to workers’ economic distress ... the workers’ delegates ... demanded the freeing of political prisoners, new elections to the soviets and to all labour organisations, independent unions, and freedom of speech, the press, and assembly.” These were identical to the demands raised in Kronstadt at the same time. The Bolsheviks “resolved to shut down the commission before it could issue a public statement calling for free elections and independent labour organisations” and “set up a Provincial Revolutionary Committee (gubrevkom), which introduced martial law both in the city and the garrison. It arrested the ringleaders of the workers’ movement” and “the police crackdown depressed the workers’ movement and activities of the rival socialist parties”. The Cheka “sentenced 219 people to death and others to various prison terms. It also expanded its network of informants” while the “next month the Cheka shot another 62 individuals and sentenced 205 more to jail. The local party reported to Moscow that the “all but general strike was liquidated after tremendous efforts of the entire party and Soviet apparatus.” [Donald J. Raleigh, Experiencing Russia’s Civil War, pp. 387–9]

Another revolt took place in Ekaterinoslav (in the Ukraine) in May 1921 which the local communists called a “little Kronstadt.” It started in the railway workshops and became “quickly politicised,” with the strike committee raising a “series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels.” The strike “spread to the other workshops. The very close similarity of the demands of the Ekaterinoslav workers to those of the Kronstadt rebels is evidence of their consciousness of being part of a wider movement but even more impressive is the speed and effectiveness with which the strike spread.” On June 1st the main large Ekaterinoslav factories joined the strike. The strike was spread via the use of trains and telegraph and soon an area up to fifty miles around the town was affected. The local Communist Party leader was instructed “to put down the rebellion without mercy ... Use Budennyi’s cavalry.” The strike was finally ended by the use of the Cheka, us-

counts of the events. Now we must analyse the revolt and indicate why it is so important in evaluating Bolshevism in both practice and as an ideology.

In the sections which follow, we indicate why the revolt is so important (section 1) and place it in historical context (section 2). We then present and discuss the Kronstadt demands, indicating their sources in working class rebellion and radicalism (see sections 3/3 and 4). We indicate the lies the Bolsheviks said about the rebellion at the time (section 5), whether it was, in fact, a White plot (section 6) and indicate the revolts real relationship to the Whites (section 7). We also disprove Trotskyist assertions that the sailors in 1921 were different from those in 1917 (section 8) or that their political perspectives had fundamentally changed (section 9). We indicate that state coercion and repression explains why the Kronstadt revolt did not spread to the Petrograd workers (section 10). Then we discuss the possibility of White intervention during and after the revolt (section 11). We follow this with a discussion of Leninist arguments that the country was too exhausted to allow soviet democracy (section 12) or that soviet democracy would have resulted in the defeat of the revolution (section 13). We will also show the depths to which more recent supporters of Leninism will sink to defend their heroes (section 14). Lastly, we discuss what the Kronstadt revolt tells us about Leninism (section 15).

As we will prove, Kronstadt was a popular uprising from below by many of the same sailors, soldiers and workers who made the 1917 October revolution, seeking to restore the liberties and rights they had seized and practiced then. While, undoubtedly, the Bolshevik repression of the revolt can be justified in terms of defending the state power of the Bolsheviks over the Russian working class, it cannot be defended as socialist. Indeed, it indicates that Bolshevism is a flawed political theory which cannot create a socialist society but only a state capitalist regime based on party dictatorship. This is what Kronstadt shows above all else: given a
choice between workers’ power and party power, Bolshevism will destroy the former to ensure the latter. In this, Kronstadt is no isolated event (see section H.6 for more details).

There are many essential resources on the revolt available. The best in depth studies are by historians Paul Avrich (Kronstadt 1921) and Israel Getzler (Kronstadt 1917–1921). Anarchist works include Ida Mett’s The Kronstadt Uprising (included in the anthology Bloodstained: One Hundred Years of Leninist Counterrevolution as The Kronstadt Commune), Alexander Berkman’s The Kronstadt Rebellion (included in the collection of Berkman’s pamphlets entitled The Russian Tragedy), Voline’s The Unknown Revolution has a good chapter on Kronstadt (and quotes extensively from the Kronstadters’ paper Izvestiia) while Anton Ciliga’s Kronstadt Revolt is also a good introduction to the issues relating to the uprising from a libertarian socialist perspective. Eye-witness accounts include chapters in Berkman’s The Bolshevik Myth as well as Emma Goldman’s My Disillusionment in Russia and Chapter LII of her autobiography Living My Life. Daniel Guerin’s anthology No Gods, No Masters has an excellent section on the rebellion which includes a lengthy extract from Goldman’s Living my Life as well as extracts from the Kronstadters’ paper.

For the Leninist account, the anthology Kronstadt contains Lenin and Trotsky’s articles on the revolt plus supplementary essays trying to refute the anarchist analysis of the revolt. This work is recommended for those seeking the official Trotskyist version of events as it contains all the relevant documents by the Bolshevik leaders as well the articles relating to the debate on Kronstadt which arose in the late 1930s. Victor Serge, an individualist-anarchist turned Bolshevik, was another eye-witness to the Kronstadt revolt and his Memoirs of a Revolutionary is worth consulting to discover why he supported what the Bolshevists did, albeit reluctantly (in private at least). Finally, it must be noted that Emma Goldman’s Trotsky Protests too Much is a
garrison ... fell in and joined the seamen.” [D. Fedotoff-White, The Growth of the Red Army, p. 154]

That is a lot of activity for “passive” people. In short: “But if the sailors took the lead, the Kronstadt garrison ... the Red Army troops who manned the surrounding forts and batteries ... soon fell into line; and the townspeople too, always susceptible to the influence of the seamen, with whom their occupations brought them into close contact, offered their active support” [Avrich, Op. Cit., p. 159]

As can be seen, the Petropavlovsk resolution not only reflected the demands of proletarians in Petrograd, it gained the support of proletarians in Kronstadt in the fleet, the army and the civilian workforce. More, the Kronstadt demands found support in urban areas. For example, “Workers [in Moscow] applauded pro-Kronshtadt speakers at mass meetings, but at no point during the Kronshtadt events did this sympathy translate into action, however limited. On 25 March workers at the Bromlei factory, who passed a resolution supporting Kronstadt, were punished with arrests, and the mass sacking and selective re-employment of the entire workforce, which in turn triggered some solidarity strikes in nearby factories. But that was all.” [Simon Pirani, “The Moscow Workers’ Movement in 1921 and the Role of Non-Partyism”, pp. 143–160, Europe-Asia Studies, Vol. 56, No. 1, p. 149] At least two other revolts did raise demands similar to those raised by Kronstadt in the fleet and both were by urban workers.

The first revolt started in Saratov when the authorities cut the already meagre rations at the beginning of March. The strike saw metallurgical plants and other large factories send representatives to the railroad shops and “the initiative ... came from the skilled stratum that the Communists normally deemed the most conscious.” Strikers gatherings alarmed the local authorities, which “agreed to permit the setting up of a commission that would re-examine the activities of all economic organs and the Cheka” but “the assemblies held at factories to elect delegates to the commission bitterly denounced the Communists” and elected 270 members (less than 10 were Communists). This commission “believed a political solution
nstadt’s total population, it hardly points to a “passive” attitude on behalf of the civilians and soldiers.

Second, the conference of delegates had a “membership that fluctuated between which two and three hundred sailors, soldiers, and working men.” This body remained in existence during the whole revolt as the equivalent of the 1917 soviet and, like that soviet, had delegates from Kronstadt’s “factories and military units.” It was, in effect, a “prototype of the ‘free soviets’ for which the insurgents had risen in revolt.” In addition, a new Trade Union Council was created, free from Communist domination. [Avrich, Op. Cit., p. 159 and p. 157] Elections were held for the Council of Trade Unions on the 7th and 8th of March and this was a “Council committee consisting of representatives from all trade unions” while the Conference of Delegates “had been elected by Kronstadt’s body politic at their places of work, in army units, factories, workshops and Soviet institutions.” The revolutionary troikas (the equivalent of the commissions of the Executive Committee of the Soviet in 1917) were also “elected by the base organisations.” Likewise, “the secretariats of the trade unions and the newly founded Council of Trade Unions were both elected by the entire membership of trade unions.” [Getzler, Op. Cit., pp. 238–9 and p. 240]

Third, the declarations by sailors, soldiers and workers printed in Izvestia which expressed their support for the revolt and those which announced they had left the Communist Party also present evidence which clearly contests Wright’s “incontestable facts.” One declaration of the “soldiers of the Red Army from the fort Krasnoarmeieitz” stated they were “body and soul with the Revolutionary Committee.” [quoted by Voline, The Unknown Revolution, p. 500] Likewise, given that the Red Army troops manned the main bastion and the outlying forts and gun emplacements at Kronstadt and that the Bolshevik troops had to take these forts by force, we can safely argue that the Red Army soldiers did not play a “passive” role during the rebellion. [Paul Avrich, Op. Cit., p. 54 and pp. 205–6] In short, the “local land forces of the Kronstadt

lively reply to Trotsky’s, Serge’s and Wright’s (one of Trotsky’s American followers) attempts to defend the Bolshevik repression of the revolt.

1 Why is the Kronstadt rebellion important?

The Kronstadt rebellion is important because, as Voline put it, it was “the first entirely independent attempt of the people to liberate itself from all yokes and achieve the Social Revolution, an attempt made directly, resolutely, and boldly by the working masses themselves without political shepherds, without leaders or tutors. It was the first step towards the third and social revolution.” [The Unknown Revolution, pp. 537–8] Moreover, the Bolshevik response to the revolt “sounded the death knell Bolshevism with its Party dictatorship, mad centralization, Tcheka terrorism and bureaucratic castes. It struck into the very heart of Communist autocracy. At the same time it shocked the intelligent and honest minds of Europe and America into a critical examination of Bolshevik theories and practices. It exploded the Bolshevik myth of the Communist State being the ‘Workers’ and Peasants’ Government’. It proved that the Bolshevik regime is unmitigated tyranny and reaction, and that the Communist State is itself the most potent and dangerous counter-revolution.” [Alexander Berkman, “The Kronstadt Rebellion”, The Russian Tragedy, p. 91]

The Kronstadt sailors, soldiers and workers in 1917 had been the one of the first groups to support the slogan “All power to the Soviets” as well as one of the first towns to put it into practice. The focal point of the 1921 revolt — the sailors of the warships Petropavlovsk and Sevastopol — had, in 1917, been well-known revolutionaries who had actively supported attempts to create a soviet system. They had been considered, until those fateful days in 1921, the pride and glory of the revolution, considered by all — including the Bolsheviks themselves — to be thoroughly revolu-
tionary in spirit and action. They were the staunchest supporters of the Soviet system but, as the revolt showed, they were opposed to the dictatorship of any political party.

The Kronstadt revolt was a popular movement from below aiming at restoring soviet democracy, to create a genuine soviet power in the sense of soviets themselves running society rather than being a fig leaf for party rule. As Alexander Berkman notes, the “spirit of the Conference [of delegates which elected the Provisional Revolutionary Committee] was thoroughly Sovietist: Kronstadt demanded Soviets free from interference by any political party; it wanted non-partisan Soviets that should truly reflect the needs and express the will of the workers and peasants. The attitude of the delegates was antagonistic to the arbitrary rule of bureaucratic commissars, but friendly to the Communist Party as such. They were staunch adherents of the Soviet system and they were earnestly seeking to find, by means friendly and peaceful, a solution of the pressing problems facing the revolution. ["The Kronstadt Rebellion", Op. Cit., p. 67] The attitude of the Bolsheviks indicated that, for them, soviet power was only useful in so far as it ensured their party’s power and if the two came into conflict then the latter must survive over the corpse of the former:

“But the ‘triumph’ of the Bolsheviks over Kronstadt held within itself the defeat of Bolshevism. It exposes the true character of the Communist dictatorship. The Communists proved themselves willing to sacrifice Communism, to make almost any compromise with international capitalism, yet refused the just demands of their own people — demands that voiced the October slogans of the Bolsheviks themselves: Soviets elected by direct and secret ballot, according to the Constitution of the Russian Socialist Federal Soviet Republic; and freedom of speech and press for the revolutionary parties.” [Berkman, “The Kronstadt Rebellion”, Op. Cit., p. 90]
worker and peasant and not between worker and kulak. This indicates a level of political awareness, an awareness of the fact that wage labour is the essence of capitalism. Thus Ante Ciliga:

“People often believe that Kronstadt forced the introduction of the New Economic Policy (NEP) — a profound error. The Kronstadt resolution pronounced in favour of the defence of the workers, not only against the bureaucratic capitalism of the State, but also against the restoration of private capitalism. This restoration was demanded — in opposition to Kronstadt — by the social democrats, who combined it with a regime of political democracy. And it was Lenin and Trotsky who to a great extent realised it (but without political democracy) in the form of the NEP. The Kronstadt resolution declared for the opposite since it declared itself against the employment of wage labour in agriculture and small industry. This resolution, and the movement underlying, sought for a revolutionary alliance of the proletarian and peasant workers with the poorest sections of the country labourers, in order that the revolution might develop towards socialism. The NEP, on the other hand, was a union of bureaucrats with the upper layers of the village against the proletariat; it was the alliance of State capitalism and private capitalism against socialism. The NEP is as much opposed to the Kronstadt demands as, for example, the revolutionary socialist programme of the vanguard of the European workers for the abolition of the Versailles system, is opposed to the abrogation of the Treaty of Versailles achieved by Hitler.”

Point 11 did, as Ida Mett noted, “reflected the demands of the peasants to whom the Kronstadt sailors had remained linked — as had, as a matter of fact, the whole of the Russian proletariat ... In

Occurring as it did after the end of the civil war, Kronstadt played a key role in opening the eyes of anarchists like Emma Goldman and Alexander Berkman to the real role of Bolshevism in the revolution. Until then, they (like many others) supported the Bolsheviks, rationalising their dictatorship as a temporary measure necessitated by the civil war. Kronstadt smashed that illusion, “broke the last thread that held me to the Bolsheviks. The wanton slaughter they had instigated spoke more eloquently against them than aught else. Whatever the pretences of the past, the Bolsheviks now proved themselves the most pernicious enemies of the Revolution. I would have nothing further to do with them.” [Emma Goldman, My Disillusionment in Russia, p. 200]

Therefore Kronstadt is important in evaluating the honesty of Leninist claims to be in favour of soviet democracy and power. The civil war was effectively over, yet the regime showed no signs of changing and, as before, the Bolsheviks were repressing strikes and protests in the name of “the political power of the proletariat” (see section H.6.3 for an account of labour struggles and their repression under Lenin from early 1918 onwards). In the countryside, they continued their futile and counterproductive policies against the peasants (ignoring the facts that their government was meant to be at the head of a workers and peasants’ state and that peasants made up the vast majority of the population). They proclaimed themselves to be defending “soviet power” while also placing the necessity of party dictatorship into the heart of their ideology and practice. In short, it goes to the heart of what socialism is as Maurice Brinton suggests:

“Attitudes to the Kronstadt events, expressed ... after the event often provide deep insight into the political thinking of contemporary revolutionaries. They may in fact provide a deeper insight into their conscious or unconscious aims than many a learned discussion about eco-
nomics, or philosophy, or about other episodes of revolutionary history.

“It is a question of one’s basic attitude as to what socialism is all about. What are epitomised in the Kronstadt events are some of the most difficult problems of revolutionary strategy and revolutionary ethics: the problems of ends and means, of the relations between Party and masses, in fact of whether a Party is necessary at all. Can the working class by itself only develop a trade union consciousness [as Lenin claimed]. Should it even be allowed, at all times, to go that far?

“Or can the working class develop a deeper consciousness and understanding of its interests than can any organization allegedly acting on its behalf? When the Stalinists or Trotskyists speak of Kronstadt as ‘an essential action against the class enemy’, when more ‘sophisticated’ revolutionaries refer to it as a ‘tragic necessity’, one is entitled to pause for a moment. One is entitled to ask how seriously they accept Marx’s dictum that ‘the emancipation of the working class is the task of the working class itself’. Do they take this seriously or do they pay mere lip-service to the words? Do they identify socialism with the autonomy (organizational and ideological) of the working class? Or do they see themselves, with their wisdom as to the ‘historical interests’ of others, and with their judgments as to what should be ‘permitted’, as the leadership around which the future elite will crystallise and develop? One is entitled not only to ask... but also to suggest the answer!” [Preface to Ida Mett’s ‘The Kronstadt Commune’, Bloodstained: One Hundred Years of Leninist Counterrevolution, pp. 137–8]

The events at Kronstadt cannot be looked at in isolation, but rather as part of a general struggle of the Russian working people from the spring of 1918 to 1917 and beyond were an important factor in the organisation of the volynka. ... There was also a degree of organisation ... which belies the impression of a spontaneous outburst.” [Jonathan Aves, Workers Against Lenin, p. 91 and p. 126]

Given that the Russian urban working class were also calling for free trade (and often without the political, anti-capitalist, riders Kronstadt added) it seems dishonest to claim that the sailors purely expressed the interests of the peasantry. Perhaps this explains why point 11 becomes summarised as “restoration of free trade” by most Trotskyists. [“Editorial Preface”, Lenin and Trotsky, Kronstadt, p. 6] Yet, by focusing on the “free trade” issue, Leninists distort the real reasons for the revolt as the Kronstadt rebellion did not call for “free trade” as Trotskyists argue but rather something far more important:

“In the Kronstadt Isvestia of March 14th we find a characteristic passage on this subject. The rebels proclaimed that ‘Kronstadt is not asking for freedom of trade but for genuine power to the Soviets.’ The Petrograd strikers were also demanding the reopening of the markets and the abolition of the road blocks set up by the militia. But they too were stating that freedom of trade by itself would not solve their problems.” [Ida Mett, Op. Cit., p. 77]

Thus we have the Petrograd (and other) workers calling for free trade (and so, presumably, expressing their economic interests) while the Kronstadt sailors were demanding first and foremost soviet power. Their programme called for the “granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided they look after them themselves and do not employ hired labour.” This was point 11 of the 15 demands, which showed the importance it ranked in their eyes. This would have been the basis of exchange between town and village, but exchange between
policies of War Communism, the justification of which, in the eyes of the sailors and of the population at large, had long since vanished.” He argues that many of the sailors had returned home on leave to see the plight of the villagers with their own eyes played a part in framing the resolution (particularly of point 11, the only peasant specific demand raised) but “[b]y the same token, the sailors’ inspection tour of Petrograd’s factories may account for their inclusion of the workingmen’s chief demands — the abolition of road-blocks, of privileged rations, and of armed factory squads — in their program.” [Avrich, Op. Cit., pp. 74–5] Simply put, the Kronstadt resolution “merely reiterated long standing workers’ demands.” [V. Brovkin, Op. Cit., p. 395]

Ignoring all this, Rees informs his readers that Kronstadt revolt “[a]lthough it was preceded by a wave of serious but quickly resolved strikes, the motivation of the Kronstadt rebellion was much closer to that of the peasantry than it was to dissatisfaction among what remained of the urban working class.” [Op. Cit., 61] In reality, Ida Mett had been correct to argue that the “Kronstadt revolution had the merit of stating things openly and clearly. But it was breaking no new ground. Its main ideas were being discussed everywhere. For having, in one way or another, put forward precisely such ideas, workers and peasants were already filling the prisons and the recently set up concentration camps.” Nor can it be claimed that these workers were non-proletarians (as if class is determined by thought rather than social position). Rather than being those workers with the closest relations with the countryside who were protesting, the opposite was the case. By 1921 “[a]ll who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside.” [Op. Cit., p. 149 and p. 145] Indeed, “an analysis of the industrial unrest in 1921 shows that long-standing workers were prominent in protest” and the “strongest reason for accepting the idea that it was established workers who were behind the volynka [i.e. the strike wave] is the form and course of protest. Traditions of protest reaching back through the
gle between the living forces arising from the creative impulse of the popular masses on the spot, on the one hand, namely the local workers’ and peasants’ organisations acting directly ... and the centralist Social Democratic [i.e., Marxist] power defending its existence, on the other; a struggle between authority and freedom.” [quoted by Paul Avrich, Anarchists in the Russian Revolution, p. 94] Thus Kronstadt is a symbol of the fact that state power cannot be utilised by the working class and always becomes a force for minority rule (in this case of former workers and revolutionaries, as Bakunin predicted — see section H.1.1).

There is another reason why the study of Kronstadt is important. Since the suppression of the revolt, Leninist and Trotskyist groups have continually justified the acts of the Bolsheviks. Moreover, they have followed Lenin and Trotsky in slandering the revolt and, indeed, have continually lied about it. When Trotskyist John Wright states — in the ironically entitled “The Truth About Kronstadt” — that the supporters of Kronstadt have “distort[ed] historical facts, monstrously exaggerat[ed] every subsidiary issue or question ... and throw[n] a veil ... over the real program and aims of the mutiny” he is, in fact, describing his and his fellow Trotskyists. [“The Truth about Kronstadt”, Lenin and Trotsky, Kronstadt, p. 102] As we will prove, anarchist accounts have been validated by later research while Trotskyist assertions have been exploded time and time again.

Similarly, when Trotsky argues that anarchists like Goldman and Berkman “do not have the slightest understanding of the criteria and methods of scientific research” and just “quote the proclamations of the insurgents like pious preachers quoting Holy Scriptures” he is, in fact, just describing himself and his followers (as we shall see, the latter just repeat his and Lenin’s assertions regardless of how silly or refuted they are). Ironically, he states that “Marx has said that it is impossible to judge either parties or peoples by what they say about themselves” while he himself justifies his actions by his claim that he and Lenin represented the “proletarian” revolution Bolsheviks. They want to control their own destinies.” It urged the strikers to demand the liberation of all arrested socialists and non-party workers, abolition of martial law, freedom of speech, press and assembly for all who labour, free elections of factory committees, trade unions, and Soviets. [Avrich, Kronstadt 1921, pp. 42–3] According to one Bolshevik Commissar) the “basic demands are everywhere the same: free trade, free labour, freedom of movement, and so on.” Two key demands raised in these strikes dated back to at least 1920, namely “for free trade and an end to privilege”, while in March 1919, “the Rechkin coach-building plant demanded equal rations for all workers” and that one of the “most characteristic demands of the striking workers at that time were for the free bringing-in of food.” [Mary McAuley, Bread and Justice, p. 299 and p. 302]

The following proclamation appeared on the walls:

“A complete change is necessary in the policies of the Government ... First of all, the workers and peasants need freedom. They don’t want to live by the decrees of the Bolshevik; they want to control their own destinies. We demand the liberation of all arrested Socialists and non-partisan workingmen; abolition of martial law; freedom of speech, press, and assembly for all who labor; free election of shop and factory committees, of labor union and Soviet representatives.” [quoted by Alexander Berkman, The Bolshevik Myth, p. 292]

As can be seen, these reflect points 1, 2, 3, 5, 8, 9, 10, 11 and 13 of the revolt. As Paul Avrich summarises, the Kronstadt demands “echoed the discontents not only of the Baltic Fleet but of the mass of Russians in towns and villages throughout the country. Themselves of plebeian stock, the sailors wanted relief for their peasant and worker kinfolk. Indeed, of the resolution’s 15 points, only one — the abolition of the political departments in the fleet — applied specifically to their own situation. The remainder ... was a broadside aimed at the
Petrograd. Their actions were inspired by solidarity for these workers and civilians. This clearly shows that Trotsky’s assertion that the revolt “reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in relation to ‘civilian’ Petrograd” to be utter and total nonsense.

Rather than being “deeply reactionary,” the ideas that motivated the revolt clearly were not. They called for soviet democracy, free speech, assembly and organisation for workers and peasants. These express the demands of most, if not all, Marxist parties (including the Bolsheviks in 1917) before they take power. They simply repeat the demands of the revolutionary period of 1917 and reflected the Soviet Constitution.

So did the demands represent the interests of the (non-kulak) peasantry? To determine whether this is the case, we must see whether the demands reflected those of industrial workers or not. If the demands do, in fact, match those of striking workers and other proletarian elements then we can easily dismiss this claim as it is impossible to say that they simply reflected the needs of peasants (of course, Trotskyists will argue that these proletarians were also “backward” but, in effect, they are arguing that any worker who did not quietly follow Bolshevik orders was “backward” — hardly a sound definition of the term).

We can quickly note that the demands echoed those raised during the Moscow and Petrograd strikes that preceded the Kronstadt revolt. For example, Paul Avrich records that the demands raised in the February strikes included “removal of roadblocks, permission to make foraging trips into the countryside and to trade freely with the villagers, [and] elimination of privileged rations for special categories of working men.” The workers also wanted the special guards of armed Bolsheviks, who carried out a purely police function, withdrawn from the factories” and raised “pleas for the restoration of political and civil rights.” One manifesto which appeared (unsigned but bore signs of Menshevik origin) argued that “the workers and peasants need freedom. They do not want to live by the decrees of the

and the real class interests of workers. [Lenin and Trotsky, Op. Cit., p. 88] In reality, Kronstadt shows what the Bolsheviks said about their regime was the opposite of what it really was as show by its actions: “How pathetic that he does not realise how much this applies to him!” [Emma Goldman, “Trotsky Protests Too Much”, Writings of Emma Goldman, p. 257]

Then there is the bad faith of most Trotskyist accounts (Victor Serge’s belated account in his Memoirs of a Revolutionary is noteworthy in being an exception to this). What becomes clear from our discussion is the way Trotskyists have selectively quoted the academic accounts to fit their ideological account of the uprising. Likewise, they regularly change the demands of the revolt — often simply inventing demands (like “Soviets without Bolsheviks”) — and ignore the ideological context (so ignoring how party dictatorship was a core Leninist principle before, during and after the rebellion). The reason for this should be obvious — the supporters of Bolshevism cannot help lie about the Kronstadt revolt as it so clearly exposes the real nature of Bolshevik ideology and the regime it created. Hence the repetition of the slanders, inventions and self-serving justifications the Bolsheviks made at the time, with varying degrees of sophistication (the most superficially convincing usually utilise Serge’s defence of the Bolsheviks’ actions).

These defences of the Bolshevism are a classic expression of Leninist double-think (the ability to know two contradictory facts and maintain both are true). Yet this can be explained for once it is understood that “workers’ power” and “soviet power” actually mean party power then the contradictions disappear. Party power had to be maintained at all costs, including the destruction of those who desired real soviet and workers’ power (and so soviet democracy). It is, surely, an utter absurdity to claim that a state apparatus which divests the workers of any control over society — or even itself — can be regarded as a “workers’ state”? Apparently not.
So, for example, Trotsky argued that in 1921 “the proletariat had to hold political power in its hands” yet later Trotskyists argue that the proletariat was too exhausted, atomised and decimated to do so. [Lenin and Trotsky, Kronstadt, p. 81] Similarly, the Trotskyist Pierre Frank states that for the Bolsheviks, “the dilemma was posed in these terms: either keep the workers’ state under their leadership, or see the counterrevolution begin, in one or other political disguise, ending in a counterrevolutionary reign of terror that would leave not the slightest room for democracy.” [Op. Cit., p. 15] Of course the fact that there was “not the slightest room for democracy” under Lenin is not mentioned, nor is the fact that the “dictatorship of the party” had been a fundamental aspect of Bolshevik ideology since early 1919 and practice since mid-1918 (by the latest). Nor does Frank consider it important to note that a “counterrevolutionary reign of terror” did develop under Stalin from the counterrevolutionary terror, repression and dictatorship practised in 1921 (and before) by Lenin and Trotsky — but, then, he also fails to mention that Trotsky’s Left Opposition was only in favour of democracy within the party. (see section 3 of the appendix “Were any of the Bolshevik oppositions a real alternative?”)

A more trivial example can be seen with the dismissal of Kronstadt’s economic demands as being impossible to agree to, as they reflected the “peasant counter-revolution” while the Bolsheviks in Petrograd announced the withdrawal of all road-blocks and demobilised the Red Army soldiers assigned to labour duties in Petrograd on 1st March and introduced the New Economic Policy afterwards. [Avrich, Op. Cit., pp. 48–9] Likewise, Leninist Chris Harman argued against the Stalinists that “people who seriously believe that workers at the height of revolution need a police guard to stop them handing their factories over to capitalists certainly have no real faith in the possibilities of a socialist future.” [Bureaucracy and Revolution in Eastern Europe, p. 144] Yet this did not stop him asserting that “Kronstadt in 1921 was not Kronstadt of 1917. The class composition of its sailors had changed. The best socialist elements had

rebellion and this revolutionary movement had transformed the countryside as Lenin admitted in 1921:

“There are far more middle peasants now than before, the antagonisms have been smoothed out, the land has been distributed for use far more equally, the kulak’s position has been undermined and he has been in considerable measure expropriated … statistics show quite definitely that there has been a levelling out, an equalisation, in the village, that is, the old sharp division into kulaks and cropless peasants has disappeared. Everything has become more equable, the peasantry in general has acquired the status of the middle peasant.” [Collected Works, vol. 32, p. 216]

Official Bolshevik figures later estimated that the percentage of peasants owning more than ten hectares had fallen from 3.7% in 1917 to 0.5% in 1920 and so the number of well-off peasants had “become quite negligible” as “the circumstances of peasants had levelled out” [Alexander Skirda, Nestor Makhno: Anarchy’s Cossack, pp. 173–4] So, as Ida Mett argued, “in their resolution, the Kronstadt sailors were taking up once again one of the big demands of October. They were supporting those peasant claims demanding the land and the right to own cattle for those peasants who did not exploit the labour of others. In 1921, moreover, there was another aspect to this particular demand. It was an attempt to solve the food question, which was becoming desperate. Under the system of forced requisition, the population of the towns was literally dying of hunger. Why, incidentally, should the satisfaction of these demands be deemed ‘tactically correct’ when advocated by Lenin, in March 1921, and ‘counter-revolutionary’ when put forward by the peasants themselves a few weeks earlier?” [Op. Cit., p. 151]

Secondly, the Kronstadt revolt started after the sailors at Kronstadt sent delegates to investigate the plight of striking workers in
tion to ‘civilian’ Petrograd, the hatred of the petty bourgeois for revolutionary discipline.” The revolt “represented the tendencies of the land-owning peasant, the small speculator, the kulak.” [Lenin and Trotsky, Kronstadt, p. 80 and p. 81]

Before discussing these claims, we must note that the Kronstadt sailors had been smeared before by those less revolutionary than themselves. The ex-Bolshevik turned Menshevik Vladimir Voitinsky, for example, who had visited the base in May 1917 later remembered them as being “degraded and demoralised” and “lack[ing] proletarian class-consciousness. It has the psychology of a Lumpenproletariat, a stratum that is a danger to a revolution rather than its support.” They were “material suitable for a rebellion a la Bakunin.” [quoted by Getzler, Kronstadt 1917–1921, p. 253] Four years later, it was the Bolsheviks denouncing them for being non-proletarian — this time they were peasants.

How true are such claims? Even the most superficial analysis of the Petropavlovsk resolution (see last section) and the events leading up to the revolt itself can allow the reader to dismiss Trotsky’s assertions.

First, according to the definition of “kulak” proved by the Trotskyists themselves, we discover that kulak refers to “well-to-do peasants who owned land and hired poor peasants to work it.” [Lenin and Trotsky, Op. Cit., p. 146] Point 11 of the Kronstadt demands explicitly states their opposition to rural wage labour. How could Kronstadt represent “the kulak” when it called for the abolition of hired labour on the land? If it did, then so did the Bolshevik’s own land decree of 26 October 1917 which proclaimed that the “right to use the land shall be accorded to all citizens of the Russian state ... desiring to cultivate it by their own labour, with the help of their families, or in partnership, but only as long as they are able to cultivate it. The employment of hired labour is not permitted.” [“Decree on the Land”, Robert V. Daniels (ed.), A Documentary History of Communism, vol. 1, p. 122] Moreover, Trotsky seems to have forgotten that the land decree was inspired by peasant long ago gone off to fight in the army in the front line. They were replaced in the main by peasants whose devotion to the revolution was that of their class. This was reflected in the demands of the uprising: Soviets without Bolsheviks and a free market in agriculture. The Bolshevik leaders could not accede to such demands. It would have meant liquidation of the socialist aims of the revolution without struggle.” [Chris Harman, “How the Revolution was Lost,” Binns, Cliff and Harman, Russia from Workers’ State to State Capitalism, p. 20] Yet as we discuss in this appendix, the ship crews were remarkably consistent over the period in question and, as such, his claims are as factual as his account of their demands — the Kronstadt rebels never raised the call for Soviets with Bolsheviks (they called for soviet democracy) and the Bolsheviks did, in the shape of the New Economic Policy announced just after the revolt was crushed “accede” to the demand for a free market in agriculture (although, it must be stressed, this allowed wage-labour which the rebels, as socialists, explicitly rejected). Nor should we forget that this Kronstadt demand — like so many others — simply repeated those of “the [striking] workers [in Petrograd who] wanted the special squads of armed Bolsheviks, who carried out a purely police function, withdrawn from the factories.” [Paul Avrich, Op. Cit., p. 42]

Leninists generally argue that the suppression of the rebellion was essential to defend the “gains of the revolution.” These are usually left unspecified, for good reason. What exactly were these gains? Not soviet democracy, freedom of speech, assembly and press, trade union freedom and workers’ control for the Kronstadters were crushed for demanding these. No, apparently the “gains” of the revolution were a Bolshevik government and state ownership and control of property. Never mind the obvious fact this was a state-capitalist dictatorship with an already strong and privileged bureaucratic machine: that Lenin and Trotsky were in power is enough for their followers to justify the repression of Kronstadt and subscribe to the notion of a “workers’ state” which excludes workers from power. As such, the Kronstadters and Pet-
rograd strikers “struggled for the socialism which the bureaucracy were already in the process of liquidating. That is the fundamental point of the whole problem.” [Anton Ciliga, “The Kronstadt Revolt”, The Raven, No. 8, p. 334]

Thus the double-think of Bolshevism is clearly seen from the Kronstadt events. The Bolsheviks and their supporters argue that Kronstadt was suppressed to defend soviet power yet argue that the Kronstadt demand for free soviet elections was “counter-revolutionary”, “backward”, “petty-bourgeois” and so on. How soviet power could mean anything without free elections is never explained. Similarly, they argue that it was necessary to defend the “workers state” by slaughtering those who called for workers to have some kind of say in how that state operated. It appears that the role of workers in a workers’ state was simply that of following orders without question. This explains why Trotsky was able to argue in the 1930s that the Russian working class was still the ruling class under Stalin: “So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class.” [“The Class Nature of the Soviet State”, Writings of Leon Trotsky 1933–34, p. 125] To be fair to Trotsky, the workers were in the same position in the social hierarchy and had the same say under Stalin as they had when he ruled the roost (i.e., less than in most democratic capitalist states) and he considered them to the ruling class then.

How can the Bolshevik repression be justified in terms of defending workers power when the workers were powerless? How can it be defended in terms of soviet power when the Soviets were rubber stamps of a party dictatorship? Simply put, the logic of the Bolsheviks and their latter-day apologists and supporters is the same character as that of the U.S. Officer during the Vietnam War who explained that in order to save the village, they had to destroy it.

One last point, while the Kronstadt revolt is a key event in the Russian Revolution, one that signified its end, we must not forget based on free associations which would encourage individual freedom and be based on working class power. They looked to a combination of renewed and democratic soviets and unions to transform Russian society into a real socialist system rather than the system of state capitalism the Bolsheviks had imposed.

Clearly, Kronstadt’s political programme was deeply socialist in nature. It opposed the new wage slavery of the workers to the state and argued for free associations of free producers. It was based on the key slogan of 1917, “All power to the soviets” but built upon it by adding the rider “but not to parties.” The sailors had learned the lesson of the October revolution, namely that if a party held power the soviets did not. The politics of the revolt were not dissimilar to those of libertarian socialists and, as we show in section 9, identical to the dominant ideas of Kronstadt in 1917. Yet, according to Trotskyists, these demands and politics represent the interests of the peasantry and it was these which motivated them. For anarchists, it is an expression of the interests of all working people (proletarian, peasant and artisan) against all those who would exploit and govern them (be it private capitalists or state bureaucrats). We discuss this issue in the next section.

4 Did the Kronstadt rebellion reflect “the exasperation of the peasantry”?

The notion that the Kronstadt rebellion reflected the needs and interests of the peasantry a common argument of Trotskyists. As a typical example, we see John Rees — who needless to say does not provide a summary of revolt’s 15 point programme — assert that the “sailors represented the exasperated of the peasantry with the War Communism regime”. [“In Defence of October”, pp. 3–82, International Socialism, no. 52, p. 63] In this he simply repeats Trotsky’s comments that the ideas of the rebellion “were deeply reactionary” and “reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in rela-
workshops,” where “power” was in “the hands of the workers,” the “Communists have brought in the rule of the commissars, with all the despotism of personal power.” Against this travesty of socialism, the paper proclaimed that “Revolutionary Kronstadt … fights for the true Soviet Republic of the workers in which the producer himself will be owner of the products of his labour and can dispose of them as he wishes”. This would create “a life animated by free labour and the free development of the individual” which could only be based on “All power to the Soviets and not to the parties” and “the power of the free soviets.” [quoted by Voline, Op. Cit., p. 519, p. 518, p. 511, p. 518 and p. 519]

Finally, we must note that many — with pro-Bolsheviks at the forefront — have proclaimed that the Kronstadt revolt raised the slogan “Soviets without Communists” or “Soviets without Bolsheviks”. Thus we find Trotsky stating that the “Kronstadt slogan” was “soviets without Communists.” [Lenin and Trotsky, Kronstadt, p. 90] Yet, as Paul Avrich notes in his essential work on the rebellion, “‘Soviets without Communists’ was not, as is often maintained by both Soviet and non-Soviet writers, a Kronstadt slogan.” Nor did they agitate under the banner “soviets without parties”, instead they argued for “all power to the soviets and not to parties.” Political parties were not to be excluded from the soviets, simply stopped from dominating them and substituting themselves for them. The Kronstadt programme “did allow a place for the Bolsheviks in the soviets, alongside the other left-wing organisations … Communists … participated in strength in the elected conference of delegates, which was the closest thing Kronstadt ever had to the free soviets of its dreams.” [Kronstadt 1921, p. 181] Indeed, “the proportion of Communists among the delegates finally elected to the delegates’ meeting was about one third.” [George Katkov, Op. Cit., p. 30]

As can be seen, while the 15 demands are the essence of the revolt, looking at Izvestiia confirms its revolutionary nature. The rebels of 1921, as in 1917, looked forward to a system of free soviets in which working people could transform their society into one that it is just one in a long series of Bolshevik attacks on the working class. As we indicate in the next section, the Bolshevik state had proven itself to be anti-revolutionary continually since October 1917. Yet Kronstadt is important simply because it so clearly pitted soviet democracy against “soviet power” and occurred after the end of the civil war. As it brought the Russian Revolution to an end and all the conditions for Stalinism were prepared by its defeat and the repression of the mass strike wave which produced it, it deserves to be remembered, analysed and discussed by all revolutionaries who seek to learn from, rather than repeat, history.

2 What was the context of the Kronstadt revolt?

The Kronstadt revolt cannot be understood in isolation. Indeed, to do so misses the real reason why Kronstadt is so important. The actions of the Bolsheviks in 1921 and their ideological justifications for their actions (justifications, of course, when they got beyond lying about the revolt — see section 5) merely reproduced in concentrated form what had been occurring ever since they had seized power in 1917.

Therefore it is necessary to present a short summary of Bolshevik activities before the events of Kronstadt (see section H.6 for fuller details). In addition, we have to sketch the developing social stratification under Lenin and the events immediate before the revolt which sparked it off (namely the strike wave across Russia which reached Petrograd in late February 1921). Once this has been done, we will soon see that Kronstadt was not an isolated event but rather an act of solidarity with the oppressed workers of Russia and an attempt to save the Russian Revolution from Communist dictatorship and its bureaucracy.

Alexander Berkman provides an excellent overview of what had happened in Russia after the October Revolution:
“The elective system was abolished, first in the army and navy, then in the industries. The Soviets of peasants and workers were castrated and turned into obedient Communist Committees, with the dreaded sword of the Cheka [political para-military police] ever hanging over them. The labour unions governmentisation, their proper activities suppressed, they were turned into mere transmitters of the orders of the State. Universal military service, coupled with the death penalty for conscientious objectors; enforced labour, with a vast officialdom for the apprehension and punishment of ‘deserters’; agrarian and industrial conscription of the peasantry; military Communism in the cities and the system of requisitioning in the country ... ; the suppression of workers’ protests by the military; the crushing of peasant dissatisfaction with an iron hand…”

[“The Russian Tragedy”, The Russian Tragedy, p. 27]

Here we will simply indicate that the Bolsheviks had systematically undermined the effective power of the soviets. Both locally and nationally, post-October power was centralised into the hands of the soviet executives rather than the general assemblies. At the top, power was concentrated even further with the creation of a Bolshevik government above the Central Executive Council elected by the (then) quarterly soviet congress. This is not all. Faced with growing opposition to their policies, the Bolsheviks responded in two ways. Either the soviet was packaged and gerrymandered to make the workplace soviet elections irrelevant (as in, say, Petrograd) or they simply disbanded any soviet elected with a non-Bolshevik majority (as in all provincial soviets for which records exist). So Bolshevik opposition to the soviet democracy demanded by the Kronstadt revolt had a long pedigree. It had started a few months after the Bolsheviks seizure of power in the name of the soviets, during the spring of 1918 (i.e. in March, the basis of socialism, it simply produced more wage-labour this time to the state: “From a slave of the capitalist the worker was transformed into a slave of state enterprises”. [quoted by Voline, Op. Cit., pp. 507–8 and p. 518] They clearly saw the need to replace wage slavery to the state (via nationalised property) with free associations of free workers and peasants. Such a transformation would come from the collective direct action and self-activity of working people, as expressed in the strikes which had so recently swept across the country.

This transformation from the bottom up was stressed elsewhere. The unions, Izvestiia argued, would “fulfil the great and urgent task of educating the masses for an economic and cultural renovation of the country ... The Soviet Socialist Republic cannot be strong unless its administration be exercised by the working class, with the help of renovated unions.” These should “become real representatives of the interests of the people.” The current unions did “nothing” to promote “economic activity of a co-operative nature” or the “cultural education” of their members due centralised system imposed by the Communist regime. This would change with “true union activity by the working class.” A strong syndicalist perspective can be seen here, urging self-managed unions to be at the forefront of transforming the economy into a free association of producers. They opposed any “socialist” system in which the peasant “has been transformed into a serf”, the worker “a simple wage-worker in the State factories” and those who protest are “thrown into the jails of the Cheka.” [quoted by Voline, Op. Cit., p. 510 and p. 512]

The rebels wrote in Izvestiia that soviet power cannot exist while a political party dominated the soviets, rightly noting that Russia was just “State Socialism with Soviets of functionaries who vote docilely what the authorities and their infallible commissars dictate to them.” Without real working class power, without “the will of the worker” expressed in their free soviets, corruption had become rampant (“Communists ... live in ease and the commissars get fat.”). Rather than a “time of free labour in the fields, factories and
second meeting of the ships’ companies at which the resolution was re-written.” [George Katkov, Op. Cit., p. 23]

While these fifteen demands are central to the revolt, looking at the paper produced during it helps us understand the nature of these demands and place them in a fuller political context. “The pages of Izvestia”, as Voline argued, “give abundant proof of the general enthusiasm, which re-appeared once the masses felt they had regained, in the free Soviets, the true road to emancipation and the hope of achieving the real revolution.” [The Unknown Revolution, p. 495] For example, food rations were equalised, except for the sick and to children, who received a larger one. Left-wing political parties were legalised. The Provisional Revolutionary Committee was elected by a “Conference of Delegates” made up of over two hundred delegates from military units and workplaces. This body elected the Provisional Revolutionary Committee on March 2nd and enlarged it (again by election) on March 4th as well as “deciding that all workers, without exception, should be armed and put in charge of guarding the interior of the city” and to organise re-elections for “the administrative commissions of all the unions and also of the Council of Unions” (which could “become the principle organ of the workers”). [Izvestia quoted by Voline, Op. Cit., p. 494]

In the article “The Goals for Which We Fight,” Izvestia argued that “[w]ith the aid of state unions” the Communists have “chained the workers to the machines, and transformed work into a new slavery instead of making it pleasant.” To the “protests of the peasants, which have gone so far as spontaneous revolts, to the demands of the workers, compelled by the very conditions of their life to resort to strikes, they reply with mass shootings and a ferocity that the Tsarist generals might have envied.” An “inevitable third revolution” was coming, shown by “increasing” workers’ strikes, which will be “achieved by the labouring masses themselves.” This would be based on “freely elected soviets” and the reorganisation of “the state unions into free associations of workers, peasants and intellectuals.” Thus Izvestia saw clearly the real nature of nationalisation. Rather than being April and May) and so before the Czech rising and the onset of full scale civil war which occurred in late May. Given this, any attempt to blame the Civil War for the elimination of soviet power and democracy seems woefully weak. Likewise, the reduction ofsoviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation and party power which could not help but ensure the marginalisation of the soviets as did its vanguardism (see section H.5).

It must be remembered that the Bolshevik aim was always party power and their turn to the soviets in 1917 was made precisely because this was considered the most likely means to achieve this long-standing aim (see section H.3.11). To be fair, many workers accepted the idea of “workers’ government” and a “workers’ state,” assuming the new power was their own and, of course, initially the Bolsheviks did have popular support (at least in the main urban areas, they could count on passive support due to the Bolshevikk appropriation of the SR’s land reform policy). Yet, this soon changed — which, incidentally, answers Brian Bambery’s rhetorical question of “why would the most militant working class in the world, within which there was a powerful cocktail of revolutionary ideas, and which had already made two revolutions (in 1905 and in February 1917), allow a handful of people to seize power behind its back in October 1917?” [“Leninism in the 21st Century”, Socialist Review, no. 248, January 2001] Once the Russian workers realised that a handful of people had seized power they did protest the usurpation of their power and rights by the Bolsheviks — and the Bolsheviks repressed them. With the start of the Civil War, the Bolsheviks played their trump card — essentially, “Us or the Whites” — and this helped ensure their power as the workers had few choices but to agree. This, however, did not stop mass resistance and strikes breaking out periodically during the civil war when workers and peasants could no longer put up with Bolshevik policies or the effects of the war (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?”). Given this, it comes as
no real surprise that while the Bolsheviks repeatedly repressed opposition parties and groups during the civil war, these were finally eliminated (along with factions within the Communist Party itself) only after its end: with the Whites gone, the opposition were rising in influence again within dissident workers and the “White card” could no longer be played to get them to begrudgingly support the Bolsheviks as during the war. “Paradoxical as it may sound,” Alexander Berkman noted, “the Communist dictatorship had no better ally, in the sense of strengthening and prolonging its life, than the reactionary forces which fought against it.” [The Bolshevik Myth, p. 340]

Moreover, the reality of the new regime confirmed that the “new” centralised structures preferred by the Bolsheviks soon produced the same alienation as previous states along with a bureaucracy which, rather than start to decline, immediately “grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between ‘people’ and ‘officials,’ which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about ‘bureaucratic excesses,’ lack of contact with voters, and new proletarian bureaucrats grew louder and louder.” [Oskar Anweiler, The Soviets, p. 242] Thus the early months of “soviet rule” saw “the widespread view that trade unions, factory committees, and soviets ... were no longer representative, democratically run working-class institutions; instead they had been transformed into arbitrary, bureaucratic government agencies. There was ample reason for this concern.” [Alexander Rabinowitch, The Bolsheviks in Power, p. 224] In Moscow, in August 1918, state officials represented 30 per cent of the workforce there and by 1920 the general number of office workers “still represented about a third of those employed in the city” (200,000 in November, 1920, rising to 228,000 in July, 1921 and, by October 1922, to 243,000). Thus “red tape and vast administrative offices typified Soviet reality” as the Bolsheviks “rapidly created their own [state] apparatus to wage the political...
2. Freedom of speech and of the press for workers and peasants, for the Anarchists, and for the Left Socialist parties.

3. The right of assembly, and freedom for trade union and peasant organisations.

4. The organisation, at the latest on 10th March 1921, of a Conference of non-Party workers, soldiers and sailors of Petrograd, Kronstadt and the Petrograd District.

5. The liberation of all political prisoners of the Socialist parties, and of all imprisoned workers and peasants, soldiers and sailors belonging to working class and peasant organisations.

6. The election of a commission to look into the dossiers of all those detained in prisons and concentration camps.

7. The abolition of all political sections in the armed forces. No political party should have privileges for the propagation of its ideas, or receive State subsidies to this end. In the place of the political sections various cultural groups should be set up, deriving resources from the State.

8. The immediate abolition of the militia detachments set up between towns and countryside.

9. The equalisation of rations for all workers, except those engaged in dangerous or unhealthy jobs.

10. The abolition of Party combat detachments in all military groups. The abolition of Party guards in factories and enterprises. If guards are required, they should be nominated, taking into account the views of the workers.

11. The granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided and economic offensive against the bourgeoisie and capitalism. As the functions of the state expanded, so did the bureaucracy” and so “following the revolution the process of institutional proliferation reached unprecedented heights ... a mass of economic organisations [were] created or expanded.” Worse, the “prevailence of bureaucracy, of committees and commissions ... permitted, and indeed encouraged, endless permutations of corrupt practices. These raged from the style of living of communist functionaries to bribe-taking by officials. With the power of allocation of scare resources, such as housing, there was an inordinate potential for corruption.” [Richard Sakwa, Soviet Communists in Power, pp. 190–3]

Emma Goldman recounted from experience “how paralysing was the effect of the bureaucratic red tape which delayed and often frustrated the most earnest and energetic efforts ... Materials were very scarce and it was most difficult to procure them owing to the unbelievably centralised Bolshevik methods. Thus to get a pound of nails one had to file applications in about ten or fifteen bureaus; to secure some bed linen or ordinary dishes one wasted days.” Thus “the newly fledged officialdom was as hard to cope with as the old bureaucracy” while the “bureaucratic officials seemed to take particular delight in countermanding each other’s orders.” In short, “the terrorism practiced by the Bolshevik against every revolutionary criticism ... the new Communist bureaucracy and inefficiency, and the hopelessness of the whole situation ... was a crushing indictment against the Bolsheviki, their theories and methods.” [My Disillusionment in Russia, p. 40, p. 45, p. 46 and p. 92] Thus, as anarchists had long warned, a new class — the state and party bureaucracy — had been created within the new regime, living like other ruling classes on the labour of others.

The dynamics of the class struggle under the Bolshevik regime, that is the conflict between the workers and “their” state, played its part in the evolution of Bolshevik ideology. Having lost popular support, the Bolshevik used their control of the state and its forces of coercion to remain in power. Being a de facto party dictatorship
since it had packed the Fifth All-Russian Congress of soviets in July 1918, the Bolsheviks soon sought to incorporate its practice into its ideology. Thus, we find Victor Serge in the 1930s noting that “at the start of 1919 I was horrified to read an article by Zinoviev ... on the monopoly of the party in power.” [The Serge-Trotsky Papers, p. 188] Serge, however, kept his horror well-hidden as he was soon publically seeking to convince anarchists in France and elsewhere of the necessity of this monopoly (see section H.1.2) while Lenin proclaimed in July 1919 that “it is a dictatorship of one party! This is what we stand for and shall not shift from this position because it is the party that has won, in the course of decades, the position of vanguard of the entire factory and industrial proletariat.” [Collected Works, vol. 29, p. 535] This orthodoxy was proclaimed by Trotsky the following year:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class... The dictatorship of the proletariat, in its very essence, signifies the immediate supremacy of the revolutionary vanguard, which relies upon the heavy masses, and, where necessary, obliges the backward tail to dress by the head”. [Communism and Terrorism, pp. 109–10]
sailors which, on 27 February, proceeded to Petrograd and made the round of the factories... They found the workers whom they addressed and questioned too frightened to speak up in the presence of the hosts of Communist factory guards, trade union officials, party committee men and Chekists.” [Gelzter, Kronstadt 1917–1921, p. 212] The delegation returned the next day to Kronstadt and reported its findings to a general meeting of the ship’s crews and adopted the resolutions which were to be the basis of the revolt (see next section). The Kronstadt rebellion had started.

It was these labour protests and their repression which started the events in Kronstadt. While many sailors had undoubtedly read or listened to the complaints of their relatives in the villages and had protested on their behalf to the Soviet authorities, it took the Petrograd strikes to be the catalyst for the revolt (after years of increasingly autocratic and bureaucratic Bolshevik rule) Moreover, they had other political reasons for protesting against the policies of the government: navy democracy had been abolished, the soviets had been turned into fig-leaves of party dictatorship, workers were back to being wages-slaves of new, State-appointed, bosses. They saw the revolution had failed and sought ways to save it, as can be seen when Izvestiia (the paper produced during the rebellion by the Provisional Revolutionary Committee) argued that in Kronstadt “there have been laid the foundations of the Third Revolution, which will break the last chains of the workers and lay open the new highway to socialist construction.” [quoted by Voline, The Unknown Revolution, p. 508]

3 What was the Kronstadt Programme?

It is rare for a Trotskyist to actually list the demands of the Kronstadt revolt in their entirety. A more-or-less (often less) accurate summary of certain points is the best the reader can expect. For example, the standard Trotskyist book on the rebellion could spare

At the Second Congress of the Communist International in the summer of 1920 the assembled revolutionaries heard leading Bolshevik Zinoviev proclaim that “[t]oday, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class” This meant that “the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.” [Proceedings and Documents of the Second Congress 1920, vol. 2, pp. 151–2] Unsurprisingly, then, the Kronstadt demand for soviet democracy was rejected by the party for it was incompatible with the party dictatorship predicated by the party ideology. This, of course, did not stop Trotsky proclaiming that Kronstadt had to be crushed as “the proletariat had to hold political power in its hands with redoubled energy”. [Lenin and Trotsky, Kronstadt, pp. 81–2]

Economically, the Bolshevik regime imposed a policy later called “War Communism” although, as Victor Serge later noted, “any one who, like myself, went so far as to consider it purely temporary was looked upon with disdain”. [Memoirs of a Revolutionary, p. 115] This regime was marked by extreme hierarchical and dictatorial practices, although it was building upon tendencies well in place before the civil war started (for example, the one-man management advocated by Lenin in April 1918 — see section H.3.14). The leading lights of the Communist Party were expressing themselves on the nature of the “socialist” regime they desired with Trotsky, for example, implementing — and ideologically justifying — the “militarisation of labour” and a corresponding empowerment of the state’s power over the working class now that the “internal civil war is coming to an end”. [Op. Cit., p. 132] These authoritarian policies included:
“The very principle of compulsory labour service is for the Communist quite unquestionable... But hitherto it has always remained a mere principle. Its application has always had an accidental, impartial, episodic character. Only now, when along the whole line we have reached the question of the economic re-birth of the country, have problems of compulsory labour service arisen before us in the most concrete way possible. The only solution of economic difficulties that is correct from the point of view both of principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power... and to introduce strict order into the work of its registration, mobilisation, and utilisation.” [Op. Cit., p. 135]

“The introduction of compulsory labour service is unthinkable without the application, to a greater or less degree, of the methods of militarisation of labour.” [Op. Cit., p. 137]

“Why do we speak of militarisation? Of course, this is only an analogy — but an analogy very rich in content. No social organisation except the army has ever considered itself justified in subordinating citizens to itself in such a measure, and to control them by its will on all sides to such a degree, as the State of the proletarian dictatorship considers itself justified in doing, and does.” [Op. Cit., p. 141]

“Both economic and political compulsion are only forms of the expression of the dictatorship of the working class in two closely connected regions... under Socialism there will not exist the apparatus of compulsion itself; namely, the State; for it will have melted away entirely into a producing and consuming commune. None the less, the road to Socialism lies through a period of the highest possible

Kronstadt which, according to Trotskyists, showed the “peasant” nature of the sailor’s revolt.

Thus a combination of force, propaganda and concessions was used to defeat the strike (which had quickly reached a near general strike level). As Paul Arvich notes, “there is no denying that the application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities had been indispensable in restoring order. Particularly impressive in this regard was the discipline shown by the local party organisation. Setting aside their internal disputes, the Petrograd Bolsheviks swiftly closed ranks and proceeded to carry out the unpleasant task of repression with efficiency and dispatch.” [Op. Cit., p. 50]

This indicates the immediate context of the Kronstadt rebellion. Yet Trotskyist J. G. Wright wonders whether the Kronstadt’s paper “lied when in the very first issue... it carried a sensational headline: ‘General Insurrection in Petrograd’” and states that people “spread... lies about the insurrection in Petrograd.” [Lenin and Trotsky, Kronstadt, p. 109] Yes, of course a near general strike, accompanied by mass meetings and demonstrations which was being repressed by force and martial law is an everyday occurrence and has nothing in common with an insurrection! If such events occurred in a state not headed by Lenin and Trotsky it is unlikely Mr. Wright would have such difficulty in recognising them for what there were. Historian V. Brovkin states the obvious: “To anyone who had lived through the events of February 1917, this chain of events appeared strikingly similar. It looked as if a popular insurrection had begun.” [Op. Cit., p. 393] Indeed, this was a key concern of the Bolshevik authorities as they sought, unfortunately successfully, to end the possibility of it repeating the events of four years before.

Unsurprisingly, the crew of the battleships Petropavlovsk and Sevastopol decided to act once “the news of strikes, lockouts, mass arrests and martial law” in Petrograd reached them. They “held a joint emergency meeting in the face of protests and threats of their commissars” and “elected a fact-finding delegation of thirty-two
A three-man Defence Committee was formed and Zinoviev “proclaimed martial law” on February 24th. [Avrich, Op. Cit., p. 39] A state of siege was imposed, along with a curfew of 11pm and the banning of all meetings and gatherings (indoor and out) unless approved of by the Defence Committee and “[a]ll infringements would be dealt with according to military law” [quoted by Mett, Op. Cit., p. 147] The workers “were ordered to return to the shops on pain of being deprived of their rations. This entirely failed of any effect, whereupon a number of unions were liquidated, their officials and the more recalcitrant strikers placed in prison … by armed Chekists and soldiers … The strike kept spreading, all extreme measures notwithstanding. Arrests followed upon arrests … The workers were determined, but it was apparent that they would soon be starved into submission … All avenues of approach to the industrial districts of the city were cut off by massed troops … the odds between the dictatorship and the workers were too uneven to permit the strikers to hold out much longer.” [Emma Goldman, Living My Life, vol. 2, p. 875] As part of this process of repression, the Bolshevik government had to rely on the kursanty (Communist officer cadets) as the local garrisons had been caught up the general ferment and could not be relied upon to carry out the government’s orders. “Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked … the curfew [was] strictly enforced,” while the Petrograd Cheka made widespread arrests. [Avrich, Op. Cit., pp. 46–7]

The Bolsheviks also stepped up their propaganda drive. The strikers were warned not to play into the hands of the counter-revolution. As well as their normal press, popular party members were sent to agitate in the streets, factories and barracks. They also made a series of concessions such as providing extra rations. On March 1st the Petrograd soviet announced the withdrawal of all road-blocks and demobilised the Red Army soldiers assigned to labour duties in Petrograd. [Avrich, Op. Cit., pp. 48–9] This, ironically, was one of the “counterrevolutionary” demands raised by

intensification of the principle of the State … Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction … No organisation except the army has ever controlled man with such severe compulsion as does the State organisation of the working class in the most difficult period of transition. It is just for this reason that we speak of the militarisation of labour.” [Op. Cit., pp. 169–70]

“It would consequently be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers [i.e., the party], and not at all in the form in which individual economic enterprises are administered … I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.” [Op. Cit., pp. 162–3]

This vision of strict centralisation and top-down economic structures built upon Bolshevik ideology and policies of the first months after the October revolution. The attempts at workers’ self-management organised by the factory committees was opposed in favour of a centralised state capitalist system, with Lenin arguing for appointed managers with “dictatorial” powers (see Maurice Brinton’s The Bolsheviks and Workers’ Control for
These policies ensured that “with unshakeable firmness [the Bolsheviks] wrested the factories from the workers (Communist and non-party) wrenched from them from their essential conquest, the one weapon they could use to take another step towards their emancipation, towards socialism. The Russian proletariat became once more the wage-earning manpower in other people’s factories. Of socialism there remained in Russia no more than the word.” [Anton Ciliga, The Russian Enigma, p. 286] With workers reduced to wage-workers as before the revolution, it comes as no surprise that labour protests and strikes — and their repression by the State — were a recurring feature of the Bolshevik regime before, during and after the civil war (see section H.6.3 for examples). Strikers faced the denial of rations, lock-outs, selective rehiring, and imprisonment at best, death at worse, at the hands of the troops and Cheka (the secret police) of the “workers’ state.” Ironically, those “who had seized power in 1917 in the name of the politically conscious proletariat were in fact weeding out all these conscious workers.” [Brovkin, Op. Cit., p. 298]

In the countryside, grain requisitioning resulted in peasant uprisings as food was taken from the peasants by force. While the armed detachments were “instructed to leave the peasants enough for their personal needs, it was common for the requisitioning squads to take at gun-point grain intended for personal consumption or set aside for the next sowing.” The villagers predictably used evasive tactics and cut back on the amount of land they tilled as well as practising open resistance. [Avrich, Op. Cit., pp. 9–10] Famine was a constant problem as a result, made even worse by the Bolshevik centralised economic structures whose “inefficiency ... saw [the seized food] products lying at side stations and rotting away.” [Goldman, My Disillusionment in Russia, p. 96] The lack of food — and Bolshevik policies which exacerbated the problem — was a common theme in workers’ strikes and protests, including those in Petrograd which directly inspired the Kronstadt revolt.
Finally, in the middle of February, 1921, “a rash of spontaneous factory meetings” began in Moscow. Workers called for the immediate scrapping of War Communism. These meetings were “succeeded by strikes and demonstrations.” Workers took to the streets demanding “free trade”, higher rations and “the abolition of grain requisitions.” Some demanded the restoration of political rights and civil liberties. Troops had to be called in to restore order. Then a far more serious wave of strikes and protests swept Petrograd. The Kronstadt revolt was sparked off by these protests. Like Moscow, these “street demonstrations were heralded by a rash of protest meetings in Petrograd’s numerous but depleted factories and shops.” Like Moscow, speakers “called for an end to grain requisitioning, the removal of roadblocks, the abolition of privileged rations, and permission to barter personal possessions for food.” On the 24th of February, the day after a workplace meeting, the Trubochny factory workforce downed tools and walked out. Workers from nearby factories joined in. The crowd of 2,000 was dispersed by armed military cadets. The next day, the Trubochny workers again took to the streets and visited other workplaces, bringing them out on strike too. [Paul Avrich, Op. Cit., pp. 35–6 and pp. 37–8] The strikers started to organise themselves: “As in 1918, workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries.” [Brovkin, Op. Cit., p. 393] Alexander Berkman noted in his diary the events unfolding before his eyes:

“Several factories have been closed for lack of fuel, and the employees put on half rations. They called a meeting to consult about the situation, but the authorities did not permit it to take place.

“The Trubotchny millworkers have gone on strike. In the distribution of winter clothing, they complain, the Communists received undue advantage over the

Thus the ruling party had in practice eliminated the political and economic power of the working class and, moreover, embedd this into its ideology. This was not seen as a temporary policy imposed upon the Bolsheviks by the war but rather, as can be seen, as an expression of principle and justified as such. Indeed, much of Bolshevik practice could be easily related to the demands of the Communist Manifesto, including its calls “to centralise all instruments of production in the hands of the State,” for the ”[c]entralisation of credit” and “the means of communication and transport in the hands of the State”, the ”[e]xtension of factories and instruments of production owned by the State” and the ”[e]stablishment of industrial armies, especially for agriculture”. Likewise, its suggestion that “Communists … theoretically … have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions, and the ultimate general results of the proletarian movement” contains within it the Bolshevik rationale for its rule over the proletariat in its higher interests (as defined, of course, by the Communist leaders). [Marx-Engels Collected Works, vol. 6, p. 504, p. 505 and p. 498]

All this required loyal troops and unsurprisingly the Bolsheviks quickly worked to recreate special bodies of armed men standing apart from the people (see section H.1.7). A political police force, the Cheka, was created in December 1917 while in the Red Army and Navy, anti-democratic principles were imposed. At the end of March, 1918, Trotsky proclaimed that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree.” Soldiers, he disingenuously suggested, did not have to fear this system of top-down appointment as “political power is in the hands of the same working class from whose ranks the Army is recruited” (i.e. in the hands of the Bolshevik party). There could “be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the appoint-
ment of members of the commanding staff by the organs of the Soviet Power.” [“Work, Discipline, Order”, How the Revolution Armed, vol. 1, p. 47] Of course, as any worker in struggle can tell you, they almost always come into conflict with the union’s bureaucracy (as Trotskyists themselves often point out).

In the Navy, a similar process occurred — much to the disgust and opposition of the sailors. As Paul Avrich notes, “Bolshevik efforts to liquidate the ship committees and impose the authority of the centrally appointed commissars aroused a storm of protest in the Baltic Fleet. For the sailors, whose aversion to external authority was proverbial, any attempt to restore discipline meant a betrayal of the freedoms for which they had struggled in 1917.” [Kronstadt 1921, p. 66] This process “began in earnest on 14 May 1918 with the appointment of Ivan Flerovsky as general commissar of the Baltic Fleet and chairman of its Council of Commissars, a body which replaced the disbanded elective Central Committee of the Baltic Fleet. Flerovsky promptly appointed bridge commissars to whom all ships’ committees were subordinated … Naval democracy was finally destroyed on 18 January 1919 when Trotsky … decreed the abolition of all ships’ committees, the appointment of commissars to all ships, and the setting up of revolutionary tribunals to maintain discipline, a function previously vested in elected ‘comradely courts.’” [Getzler, Kronstadt 1917–1921, p. 191]

Thus Voline:

“the Bolshevik government evidently understood the slogan ‘power to the soviets’ in a peculiar way. It applied it in reverse. Instead of giving assistance to the working masses and permitting them to conquer and enlarge their own autonomous activity, it began by taking all ‘power’ from them and treating them like subjects. It bent the factories to its will and liberated the workers from the right to make their own decisions; it took arbitrary and coercive measures, without even asking the advice of the

workers’ concerned; it ignored the demands emanating from the workers’ organisations. And, in particular, it increasingly curbed, under various pretexts, the freedom of action of the Soviets and of other workers’ organisations, everywhere imposing its will arbitrarily and even by violence.” [The Unknown Revolution, pp. 459–60]

From before the start of Civil War, the Russian people had been slowly but surely eliminated from any meaningful say in the progress of the revolution. The Bolsheviks undermined (when not abolishing) workers’ democracy, freedom and rights in workplaces, soviets, unions, the army and the navy. Unsurprisingly, the lack of any real control from below heightened the corrupting effects of power. Inequality, privilege and abuses were everywhere in the ruling party and bureaucracy (“Within the party, favouritism and corruption were rife. The Astoria Hotel, where many high officials lived, was the scene of debauchery, while ordinary citizens went without the bare necessities.” [Paul Avrich, “Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers’ Group”, The Russian Review, Vol. 43, No. 1, p. 7]).

With the end of the Civil War in November 1920, many expected a change of policy. However, months passed and the same policies were followed. “The Communist State,” as Alexander Berkman summarised, “showed no intention of loosening the yoke. The same policies continued, with labour militarisation still further enslaving the people, embittering them with added oppression and tyranny, and in consequence paralysing every possibility of industrial revival.” [“The Kronstadt Rebellion”, Op. Cit., p. 61] As in early 1920, the Bolsheviks took success in the Civil War as meaning success of their policies and sought to continue and widen their application — workers’ opposition was taken as being an example of the “declassing” of the working class and so ignored (given the party reflected their “real” interests, this was a logical position to take if its circular nature is ignored).
Bolshevik attempts to solve these problems via centralism, had also predicted the only way to solve them. Far from ignoring “material reality” anarchists have long been aware of the difficulties a revolution would face and had organised our politics around them. In contrast, Stack is arguing that these inevitable effects of a revolution create “circumstances” in which the revolution cannot “move forward”. If this is so, then revolution is an impossibility as it will always face economic disruption and isolation at some stage in its development, for a longer or shorter period. If we base our politics on the “best-case scenario” then they will soon be proven to be lacking.

Ultimately, Stack’s arguments (and those like it) are the ones which ignore “material reality” by arguing that Lenin’s state was a “revolutionary regime” and reconstruction could be anything but to the advantage of the bureaucracy without the active participation of what was left of the working class and the independence of their class organisations — unions, soviets and co-operatives. Indeed, the logic of his argument would mean rejecting the idea of socialist revolution as such as the problems he lists will affect every revolution and had affected the Russian Revolution from the start. So while the problems facing the Russian working class were difficult in the extreme in 1921, we should not forget that many of which were due to the results of Bolshevik economic policies which compounded economic chaos via centralisation as well as the inevitable results of monopolising political power which meant the crushing of all independent working class organisation and initiative. They could never be solved by someone else bar the thousands of workers taking strike action all across Russia at the time: “And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?” [Ida Mett, Op. Cit., p. 202]

The problem after October 1917 was that when the proletariat did organise itself, it was repressed as counterrevolutionary by the Bolsheviks. The reconstruction from below, the organisation of the “reproduced it in its entirety” to prove a White conspiracy existed behind the Kronstadt revolt. Indeed, he considers it as an “indisputable” revelation and that Lenin and Trotsky “were not mistaken in their analysis of Kronstadt.” [Lenin and Trotsky, Op. Cit., p. 26 and p. 32]

However, reading the document quickly shows that Kronstadt was not a product of a White conspiracy but rather that the White National Centre aimed to try and use a spontaneous “uprising” it thought was likely to “erupt there in the coming spring” for its own ends. The report notes that “among the sailors, numerous and unmistakable signs of mass dissatisfaction with the existing order can be noticed.” Indeed, the Memorandum states that “one must not forget that even if the French Command and the Russian anti-Bolshevik organisations do not take part in the preparation and direction of the uprising, a revolt in Kronstadt will take place all the same during the coming spring, but after a brief period of success it will be doomed to failure.” [quoted by Avrich, Kronstadt 1921, p. 235 and p. 240]

Avrich himself rejected the idea that this Memorandum explains the revolt:

“Nothing has come to light to show that the Secret Memorandum was ever put into practice or that any links had existed between the emigres and the sailors before the revolt. On the contrary, the rising bore the earmarks of spontaneity ... there was little in the behaviour of the rebels to suggest any careful advance preparation. Had there been a prearranged plan, surely the sailors would have waited a few weeks longer for the ice to melt ... the rebels, moreover, allowed Kalinin [a leading Communist] to return to Petrograd, though he would have made a valuable hostage. Further, no attempt was made to take the offensive ... Significant too, is the large number of Communists who took part in the movement ..."
The Sailors needed no outside encouragement to raise the banner of insurrection ... Kronstadt was clearly ripe for a rebellion. What set it off were not the machinations of emigre conspirators and foreign intelligence agents but the wave of peasant risings throughout the country and the labour disturbances in neighbouring Petrograd. And as the revolt unfolded, it followed the pattern of earlier outbursts against the central government from 1905 through the Civil War.

He concludes that while the National Centre had “anticipated” the revolt and “laid plans to help organise it,” they had “no time to put these plans into effect.” The “eruption occurred too soon, several weeks before the basic conditions of the plot ... could be fulfilled.” It “is not true,” he stresses, “that the emigres had engineering the rebellion.” The revolt was “a spontaneous and self-contained movement from beginning to end.” Most obviously, as Avrich notes, an “underlying assumption of the Memorandum is that the revolt would not occur until after the springtime thaw, when the ice had melted and Kronstadt was immune from an invasion from the mainland.”

Voline, then, just stated the obvious when he argued that the revolt “broke out spontaneously” for if it “had been the result of a plan conceived and prepared in advance, it would certainly not have occurred at the beginning of March, the least favourable time. A few weeks later, and Kronstadt, freed of ice, would have become an almost impregnable fortress ... The greatest opportunity of Bolshevik government was precisely the spontaneity of the movement and the absence of any premeditation, of any calculation, in the action of the sailors.”

Given that the Memorandum also recognised this need for the ice to thaw and it was the basic assumption behind it, the revolt was spontaneous and actually undercut the assumptions behind the Memorandum. Likewise, a prominent right-SR leader

Does this mean that, for Leninists, soviet democracy was impossible in early 1918? After all, then the Russian Revolution also faced a “destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world.” If these “were not circumstances in which the revolution could move forward” then it also applied in 1918 — in 1917, in fact — as well as in 1921. If so, then this means admitting that soviet democracy is impossible during a revolution, marked as it will always be by exceptionally difficult circumstances. Which, of course, means to defend party power and not soviet power and promote the dictatorship of the party over the working class, positions Leninists deny holding. Of course, as noted in section H.6, the Bolsheviks in practice were making soviet democracy impossible by suppressing soviets that elected the wrong people while the Bolshevik policies aiming to address these problems — which in 1917 Lenin had proclaimed could only be solved by revolution and placing the Bolsheviks into power — made the problems worse by their centralised and top-down nature. To suggest that the Bolsheviks had to remain in power because the country was exhausted in part as a result of their policies is hard to take seriously.

So anarchists had predicted the problems facing the Russian Revolution decades previously and, given the lack of success of
corn will decrease” as will “exports of manufactured wares.” A rev-
olution, he argued, “is not the work of one day. It means a whole
period, mostly lasting for several years, during which the country is
in a state of effervescence.” To overcome these problems he stressed
the importance of reconstruction from the bottom up, organised
directly by working people, with local action being the basis of
wider reconstruction. The “immense problem — the re-organisation
of production, redistribution of wealth and exchange, according to
new principles — cannot be solved by ... any kind of government. It
must be a natural growth resulting from the combined efforts of all in-
terested in it, freed from the bonds of the present institutions. It must
grow naturally, proceeding from the simplest up to complex federa-
tions; and it cannot be something schemed by a few men and ordered
from above. In this last shape it surely would have no chance of living
at all.” [Act for Yourselves, pp. 71–2, p. 67, pp, 72–3, pp. 25–6 and
p. 26]

The Russian revolution confirmed all this. It had faced economic
crisis all through 1917 and 1918. Indeed, by the spring of 1918 Rus-
sia was living through an almost total economic collapse, with a
general scarcity of all resources and mass unemployment. Accord-
ing to Tony Cliff (the leader of the SWP) in the spring of 1918
Russia’s “[w]ar-damaged industry continued to run down. ‘The bony
hand of hunger’ ... gripped the whole population ... One of the causes
of the famine was the breakdown of transport ... Industry was in a
state of complete collapse. Not only was there no food to feed the fac-
tory workers; there was no raw materials or fuel for industry. The
oilfields of the Baku, Grozny and Emba regions came to a standstill.
The situation was the same in the coalfields. The production of raw
materials was in no better a state ... The collapse of industry meant
unemployment for the workers.” [Lenin, vol. 3, pp. 67–9] The indus-
trial workforce dropped to 40% of its 1917 levels. The similarities
to Stack’s description of the situation in early 1921 is striking.

The fact is that Lenin and Trotsky had argued that revolution inevi-
tably meant civil war, economic crisis and so exceptional and dif-

alienation of the Kronstadt sailors than the Bolshevik state and its military hierarchies. The claim that Kronstadt was a White plot cannot be defended with anything but assertions. No evidence exists to back up such claims.

7 What was the real relationship of Kronstadt to the Whites?

As we indicated in the last section, the Kronstadt revolt was not a White conspiracy. It was a spontaneous popular revolt from below. However, some Trotskyists still try and smear the revolt by arguing that it was, in fact, really or “objectively” pro-White. We turn to this question now.

We must first stress that the Kronstadters’ rejected every offer of help from the National Centre and other obviously pro-White group. Historian Israel Getzler stressed that “the Kronstadters were extremely resentful of all gestures of sympathy and promises of help coming from the White-Guardist emigres.” He quotes a Red Cross visitor who stated that Kronstadt “will admit no White political party, no politician, with the exception of the Red Cross.” [Getzler, *Kronstadt 1917–1921*, p. 235] Avrich notes that the Kronstadter’s “passionately hated” the Whites and that “both during and afterwards in exile” they “indignantly rejected all government accusations of collaboration with counterrevolutionary groups either at home or abroad.” As the Communists themselves acknowledged, no outside aid ever reached the insurgents. [Avrich, *Op. Cit.*, p. 187, p. 112 and p. 123] In short, there was no relationship between the revolt and the Whites.

It must be noted that the rebels did accept help towards the end of the rebellion from the Russian Red Cross when the food situation had become critical but the fortress fell before any supplies sent. Yet, the Bolsheviks themselves turned to the American Relief Administration and the International Red Cross to fight the famine freedom, democracy and rights. But, then again, the Bolsheviks did not rate these gains highly either and were more than willing to sacrifice them to ensure their most important gain, state power. So when Stack argues that it was necessary to crush Kronstadt to “save the revolution” and “preserve[e] the revolutionary regime” we feel entitled to ask what was there left to save and preserve? The dictatorship and decrees of “Communist” leaders? In other words, party power. Yes, by suppressing Kronstadt Lenin and Trotsky saved the revolution: saved it for Stalin. This is hardly something to be proud of.

Ironically, given Stack’s assertions that anarchists ignore “material reality”, anarchists had long predicted that a revolution would be marked by economic disruption. Kropotkin, for example, argued that it was “certain that the coming Revolution … will burst upon us in the middle of a great industrial crisis … There are millions of unemployed workers in Europe at this moment. It will be worse when Revolution has burst upon us … The number of the out-of-works will be doubled as soon as barricades are erected in Europe and the United States … we know that in time of Revolution exchange and industry suffer most from the general upheaval … A Revolution in Europe means, then, the unavoidable stoppage of at least half the factories and workshops.” He stressed that there would be “the complete disorganisation” of the capitalist economy and that during a revolution “[i]nternational commerce will come to a standstill” and “the circulation of commodities and of provisions will be paralysed.” [*The Conquest of Bread*, pp. 69–70 and p. 191]

Elsewhere, Kropotkin argued that a revolution would “mean the stoppage of hundreds of manufactures and workshops, and the impossibility of reopening them. Thousands of workmen will find no employment … The present want of employment and misery will be increased tenfold.” He stressed that “the reconstruction of Society in accordance with more equitable principles will necessitate a disturbed period” and argued that any revolution will be isolated to begin with and so (with regards to the UK) “the imports of foreign
democracy the Bolsheviks were in fact condemning both. They sought to build socialism from above, through skilful manoeuvres of the Revolutionary General Staff. While waiting for a world revolution that was not round the corner, they built a state capitalist society, where the working class no longer had the right to make the decisions most intimately concerning it.” [Mett, Op. Cit., pp. 204–5]

Under the harsh material conditions facing Russia at the time, it goes without saying that the bureaucracy would utilise its position to gather the best resources around it. Stack fails to mention this and instead talks about the necessity of defending a “workers’ state” in which workers had no power and where bureaucratic abuses were rampant. If anyone is denying reality, it is him. Thus Ciliga:

“The Soviet Government and the higher circles in the Communist Party applied their own solution [to the problems facing the revolution] of increasing the power of the bureaucracy. The attribution of powers to the ‘Executive Committees’ which had hitherto been vested in the soviets, the replacement of the dictatorship of the class by the dictatorship of the party, the shift of authority even within the party from its members to its cadres, the replacement of the double power of the bureaucracy and the workers in the factory by the sole power of the former — to do all this was to ‘save the Revolution!’ ... The Bureaucracy prevented the bourgeois restoration ... by eliminating the proletarian character of the revolution.” [“The Kronstadt Revolt”, Op. Cit., p. 331]

Perhaps, in light of this, it is significant that, in his list of revolutionary gains from October 1917, Stack fails to mention what anarchists would consider the most important, namely workers’ power, in the Volga provinces and southern Urals later in 1921 and without whose aid “millions more would have died.” [S.A. Smith, Russia in Revolution, pp. 232–3] This crisis, a direct result of the disastrous Bolsheviks policies as regards the peasantry and food supplies the Kronstadters opposed, also saw the Bolshevik rebuff others of help by left dissidents in favour of the right “who had bitterly fought the October Revolution. They had repeatedly been arrested as counter-revolutionists, but now they were accepted with open arms as the ‘Citizens’ Committee.’ Every facility was given them in their work: a building, telephones, typists, and the right to publish a paper” This, though, was short-lived and they were soon “again denounced as counter-revolutionary, and its leaders exiled to distant parts of the country.” [Emma Goldman, Living My Life, vol. 2, pp. 900–1]

While there were no direct links between the rebels and the Whites, there is no denying that the latter were extremely happy that Kronstadt had revolted. However, it would be weak politics indeed that based itself on the reactions of reactionaries to evaluate social struggles. If we did then we would have to conclude that the Stalinists were right to crush the 1956 Hungarian revolt and the 1968 Prague Spring. Likewise, we would have to conclude that the overthrow of Stalinism in 1989 was nothing more than a counter-revolution rather than a popular revolt against a specific form of capitalism (namely state capitalism) and, indeed, many orthodox Trotskyists took this position. It smacks of the crude Stalinist amalgam which argued that because fascists and Trotskyists criticised Stalin, this showed that they were somehow linked.

Unsurprisingly, the Kronstadters themselves acknowledged that the Whites were happy to support their actions (indeed, any actions against the Bolsheviks) and the danger this represented. However, they noted that this joy was for different reasons than theirs:

“The ... Kronstadt sailors and workers have wrested the tiller from the Communists’ hands and have taken
over the helm ... Comrades, keep a close eye upon the vicinity of the tiller: enemies are even now trying to creep closer. A single lapse and they will wrest the tiller from you, and the soviet ship may go down to the triumphant laughter from tsarist lackeys and henchmen of the bourgeoisie.

"Comrades, right now you are rejoicing in the great, peaceful victory over the Communists’ dictatorship. Now, your enemies are celebrating too.

"Your grounds for such joy, and theirs, are quite contradictory.

"You are driven by a burning desire to restore the authentic power of the soviets, by a noble hope of seeing the worker engage in free labour and the peasant enjoy the right to dispose, on his land, of the produce of his labours. They dream of bringing back the tsarist knout and the privileges of the generals.

"Your interests are different. They are not fellow travellers with you.

"You needed to get rid of the Communists’ power over you in order to set about creative work and peaceable construction. Whereas they want to overthrow that power to make the workers and peasants their slaves again.

"You are in search of freedom. They want to shackle you as it suits them. Be vigilant! Don’t let the wolves in sheep’s clothing get near the tiller." [No Gods, No Masters, vol. 2, pp. 187–8]

Of course, this is not enough for the followers of Lenin and Trotsky. John Rees, for example, quotes Paul Avrich to support his assertion that the Kronstadt revolt was, in fact, pro-White. He argues as follows:

As such, to talk about anarchists dismissing the importance of material reality and a “revolutionary regime” while ignoring the inequalities in power and wealth, and the bureaucratisation and despotism which were their root, is definitely a case of the pot calling the kettle black! It means joining Lenin in having “no inkling that the state itself could become an instrument of exploitation and showed little understanding of how the Bolsheviks could themselves be ‘captured’ by the apparatus which they notionally controlled.” [S.A. Smith, Op. Cit., p. 216]

The question for anarchists, as for the Kronstadt rebels, was what the necessary pre-conditions for the needed reconstruction were. Could Russia be re-built in a socialist way while being subject to a dictatorship which crushed every sign of working class protest and collective action? It is an infantile delusion to think that such a regime could achieve this and it ill-suits a self-proclaimed socialist to suggest that a benevolent dictatorship is possible, particularly one who claims to believe in “socialism from below.” Surely the first step, as Kronstadt shows, would have to be the re-introduction of workers’ democracy and power for only this would give allow expression to the creative powers of the masses and interest them in the reconstruction of the country. Continuing party dictatorship would never do this:

“by its very essence a dictatorship destroys the creative capacities of a people... The revolutionary conquest could only be deepened through a genuine participation of the masses. Any attempt to substitute an ‘elite’ for those masses could only be profoundly reactionary.

“In 1921 the Russian Revolution stood at the cross roads. The democratic or the dictatorial way, that was the question. By lumping together bourgeois and proletarian
members comprised 41 per cent of the membership, as opposed to 60 per cent in 1917, but most of these were workers by social origin who no longer worked on the factory floor, having been promoted to positions in the state administration, economic organs, or the Red Army. The rest of the membership was more or less equally divided between peasants (most soldiers) and white-collar employees (most of whom worked in the state apparatuses. On the eve of the Tenth Party Congress, L.B. Krasin declared: ‘The source of the woes and unpleasantness that we are currently experiencing is the fact that the Communist Party consists of 10% convinced idealists, and 90% hangers-on without consciences, who have joined the party in order to get a position.’ Krasin articulated a growing sense that the party had been hijacked by careerists; and if the purge of 1921 is any guide, he was right … many rank-and-file party members began vociferously to attack the privileges enjoyed by ‘those at the top’. In June 1920 Preobrazhenskii reported to the Central Committee that the ‘majority of rank-and-file members’ supported slogans such as ‘Down with the privileged caste of the communist elite!’ … in September 1920 … a commission was set up to investigate ‘Kremlin privileges.’ Its recommendations were never implemented … [Even party members showed] exasperation at red tape and careerism [as well as] disaffection at the arbitrary transfers of cadres and the substitution of political departments, such as Trotsky had created in the Red Army, for party committees … it was clear that proletarians promoted into positions of authority often behaved little differently from those officials who had moved seamlessly from positions in tsarist ministries.

‘Paul Avrich … says there is ‘undeniable evidence’ that the leadership of the revolution came to an agreement with the Whites after they had been crushed and that ‘one cannot rule out the possibility that this was the continuation of a longstanding relationship.” [Op. Cit., p. 64]

What Rees fails to mention is that Avrich immediately adds “[y]et a careful search has yielded no evidence to support such a belief” before stating that “[n]othing has come to light to show that … any links had existed between the emigres and the sailors before the revolt.” How strange that Rees fails to quote or even mention Avrich’s conclusion to his own speculation! As for the post-revolt links between the leadership of the rebellion and the Whites, Avrich correctly argues that “[n]one of this proves that there were any ties between the [National] Centre and the Revolutionary Committee either before or during the revolt. It would seem, rather, that the mutual experience of bitterness and defeat, and a common determination to overthrow the Soviet regime, led them to join hands in the aftermath.” [Avrich, Op. Cit., p. 111 and p. 129] Seeing you friends and fellow toilers murdered by dictators may affect your judgement, unsurprisingly enough.

Let us, however, assume that certain elements in the leadership of the revolt were, in fact, scoundrels. What does this mean when evaluating it?

Firstly, we must point out that this leadership was elected by and under the control of the Conference of Delegates which was, in turn, elected by and under the control of the rank-and-file sailors, soldiers and civilians. This body met regularly during the revolt “to receive and debate the reports of the Revolutionary Committee and to propose measures and decrees.” [Getzler, Kronstadt 1917–1921, p. 217] The actions of the leadership were not independent of the mass of the population and so, regardless of their own agendas, had to work under control from below. In other words, the revolt can-
not be reduced to a discussion of whether a few of the leadership were scoundrels or not. Indeed, to do so just reflects the elitism of bourgeois history yet Rees does just that and reduces the Kronstadt revolt and its “ideology” down to just one person (Petrichenko). Perhaps we can evaluate Bolshevism with this method? Or Italian Socialism. After all, influential figures in both these movements ended up making contacts and deals with extremely suspect organisations and acting in ways we (and the movements they sprang from) would oppose. Does that mean we gain an insight into their natures by concentrating on Stalin’s or Mussolini’s later activities? Or evaluating their revolutionary nature from such individuals? Of course not. Indeed, Rees’s article is an attempt to argue that objective circumstances rather than Bolshevism as such lead to Stalinism. Rather than do the same for Kronstadt, he prefers to concentrate on an individual. This indicates a distinctly bourgeois perspective:

“What passes as socialist history is often only a mirror image of bourgeois historiography, a percolation into the ranks of the working class movement of typically bourgeois methods of thinking. In the world of this type of ‘historian’ leaders of genius replace the kings and queens of the bourgeois world … . The masses never appear independently on the historic stage, making their own history. At best they only ‘supply the steam’, enabling others to drive the locomotive, as Stalin so delicately put it … . This tendency to identify working class history with the history of its organisations, institutions and leaders is not only inadequate — it reflects a typically bourgeois vision of mankind, divided in almost pre-ordained manner between the few who will manage and decide, and the many, the malleable mass, incapable of acting consciously on its own behalf … . Most histories of the degeneration of the Russian Revolution rarely amount to more

Workers’ Opposition gives us an insight of the situation which existed at the start of 1921:

“The rank and file worker is observant. He sees that so far … the betterment of the workers’ lot has occupied the last place in our policy … . We all know that the housing problem cannot be solved in a few months, even years, and that due to our poverty, its solution is faced with serious difficulties. But the facts of ever-growing inequality between the privileged groups of the population in Soviet Russia and the rank and file workers, ‘the frame-work of the dictatorship’, breed and nourish the dissatisfaction.

“The rank and file worker sees how the Soviet official and the practical man lives and how he lives … . [It will be objected that] ‘We could not attend to that; pray, there was the military front.’ And yet whenever it was necessary to make repairs to any of the houses occupied by the Soviet institutions, they were able to find both the materials and the labour.” [Alexandra Kollontai, The Workers’ Opposition, p. 10]

A few months earlier, the Communist Yoffe wrote to Trotsky expressing the same concerns. “There is enormous inequality,” he wrote, “and one’s material position largely depends on one’s post in the party; you’ll agree that this is a dangerous situation.” [quoted by Orlando Figes, A People’s Tragedy, p. 695] Indeed, part of the factors resulting in Kronstadt was “the privileges and abuses of commissars, senior party functionaries and trade union officials who received special rations, allocations and housing and … quite openly enjoying the good life.” [Getzler, Kronstadt 1917–1921, p. 210] As one historian summarised:

“Between the Eighth Congress (March 1919) and the Tenth, the party grew from 310,000 to 730,000 … Worker
in the cultivation of their land had they had access to the farm implements stacked up in the warehouses of Kharkov and other industrial centres awaiting orders from Moscow for their distribution. These are characteristic examples of Bolshevik governmentalism and centralisation, which should serve as a warning to the workers of Europe and America of the destructive effects of Statism.” [My Disillusionment in Russia, p. 253]

The fact, of course, is that the majority of what remained of the working class would not have voted Communist in free soviet elections. Thus political considerations have to be factored in when evaluating Stack’s arguments. Likewise, he makes no mention of the Bolshevik orthodoxy on the necessity of party dictatorship nor makes any comments on the Bolshevik embrace of centralised economic and political structures and their obvious negative impact on the situation. Rather all the blame for the terrible economic situation he describes is laid purely at the feet of the counter-revolution — a position which, at best, is a half-truth and deliberately obscures the failure of Bolshevik policies. Nor was it believed at the time, for as Berkman summarised “the workers of Petrograd … charged that, aside from other causes, Bolshevik centralisation, bureaucracy, and autocratic attitude toward the peasants and workers were directly responsible for much of the misery and suffering of the people.” [“The Kronstadt Rebellion”, Op. Cit., p. 61] As such, it takes an impressive amount of gall to argue that we must support the repressive actions of a party dictatorship because the nation is exhausted when it is the case that “the dictatorship had paralysed the initiative of both the city proletariat and the peasantry.” [Goldman, “Trotsky Protests Too Much”, Op. Cit., p. 263]

Incredibly, Stack fails to even mention the power and privileges of the bureaucracy at the time. Officials got the best food, housing and so on. The lack of effective control or influence from below ensured that corruption was widespread. One of the leaders of the

Secondly, the question is one of whether workers are in struggle and what they aim for and definitely not one of whether some of the “leaders” are fine upstanding citizens. Ironically, Trotsky indicates why. In 1934, he had argued “[a]nyone who had proposed that we not support the British miners’ strike of 1926 or the recent large-scale strikes in the United States with all available means on the ground that the leaders of the strikes were for the most part scoundrels, would have been a traitor to the British and American workers.” [“No Compromise on the Russian Question”, Writings of Leon Trotsky: Supplement (1934–40), p. 539] The same applies to Kronstadt. Even if we assume that some of the leadership or those active in revolt did have links with the National Centre (an assumption we must stress has no evidence to support it), this in no way invalidates the Kronstadt revolt. The movement was not produced by the so-called “leaders” of the revolt but rather came from below and so reflected the demands and politics of those involved. To use an obvious example, if it were proved, as KGB and other soviet sources argued, that some of the leaders of the Hungary uprising of 1956 had CIA links or were CIA agitators, would that make the revolution and its workers’ councils somehow invalid? Of course not. If some of the leadership were scoundrels, as Trotsky argued, this does not invalid the revolt itself. Maurice Brinton stated the obvious:

“During the Hungarian Revolution of 1956 many were the messages of verbal or moral support for the rebels, emanating from the West, piously preaching the virtues of bourgeois democracy or of free enterprise. The objective of those who spoke in these terms were anything but the institution of a classless society. But their support for the rebels remained purely verbal, particularly when
it became clear to them what the real objectives of the revolution were ... The backbone of the Hungarian revolution was the network of workers’ councils. Their main demands were for workers’ management of production and for a government based on the councils. These facts justified the support of revolutionaries throughout the world ... The class criterion is the decisive one.

“Similar considerations apply to the Kronstadt rebellion. Its core was the revolutionary sailors. Its main objectives were ones with which no real revolutionary could disagree. That others sought to take advantage of the situation is inevitable — and irrelevant.” [“Preface to Ida Mett’s ‘The Kronstadt Commune’”, Op. Cit., p. 137]

This is recognised in their own way by the Trotskyists themselves. Trotsky used the strike example against those claiming, correctly, that to unconditionally defend the Soviet Union was to give an endorsement to Stalinism. Hence we see him, immediately after the words quoted above, add: “Exactly the same thing applies to the USSR!” [Op. Cit., p. 539] Wright echoes this with regards to Kronstadt:

“The fact that these strikes did not last longer of course suggests that the strikers could not sustain this activity indefinitely. However, this was more a product of state repression and the rations being withheld by the authorities to break the strike than any objectively predetermined impossibility of collective decision making. The workers may have been too exhausted to wage indefinite general strikes against a repressive state but that does not imply they could not practice collective decision making if that regime was replaced by a genuine soviet democracy. Likewise, the poor state of the Russian economy cannot be understood without reference to the negative impact of Bolshevik economic policies which made a bad situation far worse — both in terms of limiting economic activity and initiative as well as the powerful bureaucracy it had created. As Emma Goldman suggested:

“In the economic field this transformation must be in the hands of the industrial masses: the latter have the choice between an industrial State and anarcho-syndicalism. In the case of the former the menace to the constructive development of the new social structure would be as great as from the political State. It would become a dead weight upon the growth of the new forms of life ... It is only when the libertarian spirit permeates the economic organizations of the workers that the manifold creative energies of the people can manifest themselves and the revolution be safeguarded and defended. Only free initiative and popular participation in the affairs of the revolution can prevent the terrible blunders committed in Russia. For instance, with fuel only a hundred versts [about sixty-six miles] from Petrograd there would have been no necessity for that city to suffer from cold had the workers’ economic organizations of Petrograd been free to exercise their initiative for the common good. The peasants of the Ukraina would not have been hampered...
co-ordinate their struggles, what could stop them starting to manage their own destinies and begin to rebuild an economy suffering under the counter-productive policies of a party dictatorship?

So, in stark contrast to Stack’s claims, all across Russia in February 1921 the Russian working class were going on strike, organising meetings and demonstrations. In other words, taking collective action based on demands collectively agreed in workplace meetings. One factory would send delegates to others, urging them to join the movement which soon became a general strike in Petrograd and Moscow. In Kronstadt, workers, soldiers and sailors went the next step and organised a delegate conference. In other places they tried to do so, with various degrees of success. During the strikes in Petrograd “workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries” which raised demands later championed in Kronstadt. Its activities and other attempts to organise collectively were obviously hindered by the fact the Cheka arrested “all delegates to other enterprises” the strikers sent. Brovkin states that following the example of Petrograd, “workers in some cities set up assemblies of plenipotentiaries” as well. In Saratov “such a council grew out of a strike co-ordination committee.” [Op. Cit., p. 393, p. 396 and p. 398]

Any claim that the Russian working class had no capacity for collective action seems invalidated by such events. If anything was going to shatter what was left of working class collective power it would have been the Bolshevik repression of these strikes which, by its very nature, atomised and individualised the masses in order to break the collective action being practised. Martial law, the use of armed patrols on the streets and in the factories, the closing and re-registration of an enterprise labour force were all designed to break the strike and atomise the workforce — these actions would not have been needed if the Russian working class was, as Stack claims, non-existent, atomised and incapable of collective action and decision making.

social and historical content of the Kronstadt mutiny then he is himself an element of petty bourgeois reaction against the proletarian revolution … A trade union, say, of agricultural labourers may commit errors in a strike against farmers. We can criticise them but our criticism should be based upon a fundamental solidarity with the worker’s trade union and upon our opposition to the exploiters of the workers even if these exploiters happen to be small farmers.” [“The Truth about Kronstadt”, Op. Cit., p. 112]

This was written in 1938 in apparent ignorance that Emma Goldman had debunked similar assertions over ten years previously:

“There is another objection to my criticism on the part of the Communists. Russia is on strike, they say, and it is unethical for a revolutionist to side against the workers when they are striking against their masters. That is pure demagoguery practised by the Bolsheviki to silence criticism.

“It is not true that the Russian people are on strike. On the contrary, the truth of the matter is that the Russian people have been locked out and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviki this tyranny is masked by a world-stirring slogan: thus they have succeeded in blinding the masses. Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party.” [My Disillusionment in Russia, p. xlix]

So there was a few obvious differences which invalidates the Trotskyist analogy as regards both Stalinism and Kronstadt. First, in both cases there are more than two classes involved — along
with the peasants and workers, there is the bureaucracy. In Russia in 1921 as in 1934, the state and party bureaucracy was oppressing and exploiting the workers. Trade union bureaucrats, for all their faults, are not at a head of a dictatorship defended by troops and secret police. Second, in 1921 as before, the heads of the bureaucratic class had declared martial law and utilised troops, lockouts and arrests against the striking workers — a practice continued under Stalin. Trade union bureaucrats are, at best, hesitant to make a strike official and may well sell it out but they rarely call in the armed might of the state against their own members. Third, the regime in Russia in both 1921 and 1934 was a party dictatorship. Strikes are usually run to some degree by the strikers. Fourth, strikes are examples of proletarian direct action which can, and do, get out of control of union structures and bureaucrats. They can be the focal point for creating new forms of working class organisation and power which can end the power of the union bureaucrats and replace it with self-managed strikers assemblies and councils. Both the Bolshevik and Stalinist regimes were organised to repress any attempts at unseating them — indeed, the Kronstadt revolt was precisely such a rank-and-file movement. In short, Russian state was not a form of working class self-defence in even the limited form that trade unions are — rather, it was as Emma Goldman noted the organ of a new master class. That neither Trotsky nor Wright could see this obvious fact explains why they sided with the bureaucratic reaction against the proletarian revolution — although as the former was then part of the ruling bureaucracy, this is understandable.

While being more aware of the bureaucratic nature of the Bolshevik regime, John Rees continued this line of attack on Kronstadt:

“As it became clear that the revolt was isolated Petrichenko was forced to come to terms with the reality of the balance of class forces. On 13 March Petrichenko wired David Grimm, the chief of the National Centre

The Kronstadt Izvestiia of March 8 wrote that it was “here in Kronstadt that the foundation stone was laid of the Third Revolution that will smash the last shackles on the toiler and open up before him the broad new avenue to socialist construction.” It stressed that the “new revolution will rouse the toiling masses of the Orient and Occident. For it will offer the example of fresh socialist construction as opposed to mechanical, governmental ‘Communist’ construction.” [Op. Cit., p. 194] Clearly, the Kronstadt rebels knew that construction would take time and were arguing that the only means of rebuilding the country in a socialist direction was via the participation of what of left of the working class and peasantry in free class organisations like freely elected soviets and unions. Rather than wasting resources — both human and material — on repressing their strikes and revolts, Kronstadt’s success would have seen these used for reconstruction.

So, for example, the partial freeing of the economy from the Bolshevik bureaucracy expressed by the New Economic Policy (NEP) saw factory output rise by over 40% between 1920 and 1921 and by a further 30% between 1921 and 1922 while agriculture “too made remarkable strides forward.” [Robert Service, The Bolshevik Party in Revolution, p. 160] Victor Serge recalled how the NEP “was, in the space of a few months, already giving marvellous results. From one week to the next, the famine and the speculation were diminishing perceptibly. Restaurants were opening again”. [Memoirs of a Revolutionary, p. 147] Would workers’ freedom and democracy not have had at least a similar result and have the benefit of not enriching a new boss class?

The experience of the revolt provides evidence that this analysis was far from utopian. A Finish reporter in Kronstadt was struck by the “enthusiasm” of its inhabitants, by their renewed sense of purpose and mission. Avrich argues that for a “fleeting interval Kro-

We should note that it was due to the “food situation in Kronstadt . . . growing desperate” that Petrichenko contacted Grimm. [Avrich, Op. Cit., p. 121] If the revolt had spread to Petrograd and the striking workers there, such requests would have been unnecessary. However, as historian V. Brovkin notes, the “key here is that the Communists suppressed the workers uprising in Petrograd in the first days of March. The sailors’ uprising in Kronstadt, which was an outgrowth of the uprising in Petrograd, was now cut off from its larger social base and localised on a small island. From this moment on the Kronstadt sailors were on the defensive.” [Behind the Lines during the Civil War, pp. 396–7] So, in a sense, Rees is correct to point to “the reality of the balance of class forces” but he fails to appreciate that the bureaucratic class has to be factored in. Isolation was a product of the actions and so power of the state bureaucracy and was due to the reality of the balance of coercive forces — the Bolshevik state machine had successfully repressed the Petrograd strikes (see section 10).

So, in his analysis of the “balance of class forces”, Rees — like Trotsky and Wright — fails to account for the class which had real power (and the related privileges) in Russia at the time — the state and party bureaucracy. The working class and peasantry were officially powerless and the only influence they exercised in the “workers’ and peasants state” was when they rebelled, forcing “their” state to make concessions or to repress them (usually, a combina-
tion of both happened). The balance of class forces was between the workers, peasants and ruling bureaucracy. To ignore this class, the ruling class in Russia, means to misunderstand the problems facing the revolution and the Kronstadt revolt itself.

Given that the Bolshevik dictatorship had lied to and suppressed the Petrograd working class, the Kronstadters had few options left as regards aid. Rees’s argument smacks of the “logic” of Right as regards the Spanish Civil War, the Cuban revolution and the Sandinistas. Isolated, each of these revolts turned to the Soviet Union for aid thus proving what the Right had always known from the start, namely their objectively Communist nature and their part in the International Communist Conspiracy. Few revolutionaries would evaluate these struggles on such an illogical and narrow basis but Rees wants us to do so with Kronstadt.

Worse, the logic of Rees arguments was used by the Stalinists — yet it is doubtful he would agree with them that the fact the Hungarian revolution of 1956 called on Western aid against the Red Army shows that it was objectively counter-revolutionary and pro-capitalist, just as the Communist Party bureaucrats had argued. The fact that during that revolt many messages of support for the rebels also preached bourgeois values would also, according to Rees’s logic, damn that revolt in the eyes of all socialists. Similarly, the fact that the Polish union Solidarity got support from the West against the Stalinist regime does not mean that its struggle was counter-revolutionary. So the arguments used by Rees are identical to those used by Stalinists to support their repression of working class revolt in the Soviet Empire. Indeed, orthodox Trotskyists drew these conclusions and called Solidarnosc a company union of the CIA, bankers, the Vatican and Wall Street for capitalist counter-revolution in Poland and considered the fall of the Soviet Union as a defeat for the working class and socialism, in other words, a counterrevolution. As evidence they pointed to the joy and support each generated in Western elite circles — and denounced neo-

out when circumstances are hardly ideal — the Paris Commune springs to mind — but that is not reason to oppose them. Indeed, Stack’s fellow party member provides this very quote by Marx against those who dismiss the Bolshevik revolution as a complete delusion due to the backwardness of the country, arguing that ”[t]he unavoidable conclusion is that all the talk about ‘premature’ revolution ... is an excuse born of expediency, not a serious argument against revolutionary socialism.” [Op. Cit., pp. 9–10] The real question is whether revolutionaries, when faced with a popular revolt for socialism, should side with the rebels or a bureaucratic, state-capitalist party dictatorship.

The second thing to note is that Anarchists, regardless of Stack’s assertions, were and are well aware of the problems facing the revolution. Alexander Berkman (who was in Petrograd at the time) pointed out the “[l]ong years of war, revolution, and civil struggle” which “had bled Russia to exhaustion and brought her people to the brink of despair.” [“The Kronstadt Rebellion”, Op. Cit., p. 61] Like every worker, peasant, sailor and soldier in Russia, anarchists knew (and know) that reconstruction would not take place “overnight.” The Kronstadters’ recognised this in the first issue of their newspaper Izvestiia:

“Comrades and citizens, our country is passing through a tough time. For three years now, famine, cold and economic chaos have trapped us in a vice-like grip. The Communist Party which governs the country has drifted away from the masses and proved itself powerless to rescue them from a state of general ruination ... All workers, sailors and Red soldiers today can clearly see that only concentrated efforts, only the concentrated determination of the people can afford the country bread, wood and coal, can clothe and shoe the people and rescue the Republic from the impasse in which it
the same year stood at 1.6 percent of that in 1914. By 1921 Petrograd had lost 57 percent of its population and Moscow 44.5 percent. Workers were either dead, on the frontline of the civil war, or were fleeing the starvation of the city. The force that had made the revolution possible was being decimated ...

"The choice facing the regime in Russia was either to crush the uprising and save the revolution, or surrender to the rising and allow the forces of reaction to march in on their back. There was no material basis for a third way. A destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world were not circumstances in which the revolution could move forward. Great efforts would have to be made to solve these problems. There were no overnight solutions and preserving the revolutionary regime was crucial. Ultimately real solutions could only be found if the revolution were to spread internationally, but in the meantime to have any chance of success the regime had to survive. Only the right and the imperialist powers would have benefited from its destruction." ["Anarchy in the UK?", Socialist Review, no. 246]

As we discuss in the next section, Victor Serge’s own mind was stuffed by infantile delusions on the nature of the regime he was part of and the possibility of a benevolent dictatorship. Here, we address the suggestion that objective circumstances meant that genuine socialist solutions to the problems facing the Russian Revolution were impossible.

The first thing to note is how disingenuous Stack is being. "World history", as Marx himself noted, “would indeed be very easy to make if the struggle were taken up only on condition of infallibly favourable chances” [Marx, Marx-Engels Collected Works, vol. 44. p. 136] Revolutions have a habit of breaking

Trotskyists like Rees’ party when they, rightly, argued that these were popular revolts against state-capitalist exploitation.

In reality, of course, the fact that others sought to take advantage of these (and other) situations is inevitable and irrelevant. The important thing is whether working class people were in control of the revolt and what the main objectives of it were. By this class criteria, it is clear that the Kronstadt revolt was a revolutionary revolt as, like Hungry 1956, the core of the revolt was working people and their councils. It was they who were in control and called the tune. That Whites tried (unsuccessfully) to take advantage of it is as irrelevant to evaluating the Kronstadt revolt as the fact that Stalinists tried (successfully) to take advantage of the Spanish struggle against Fascism.

Lastly, we must comment upon the fact that members of Kronstadt’s Revolutionary Committee took refuge in Finland along with "[s]ome 8,000 people (some sailors and the most active part of the civilian population)." [Mett, Op. Cit., p. 172] This was as the Bolsheviks had predicted on March 5th: “At the last minute, all those generals, the Kozlovskys, the Bourkser, and all that riff raff, the Petrichenkos, and the Tourins will flee to Finland, to the White guards”. [quoted by Mett, Op. Cit., p. 162] However, this does not indicate any “White guardist” connections for where else could they go? The fact that active participants in the revolt ended up in the only place they could end up to avoid death has no bearing to that nature of that revolt nor can it be used as “evidence” of a “white conspiracy.”

In short, the attempts of Trotskyists to smear the Kronstadt sailors with having White links have no basis. That the Whites celebrated the revolt is as irrelevant as any warm words expressed towards the Hungarian revolution of 1956 by politicians in the West. Likewise, the actions of some rebels after the Bolsheviks had crushed the revolt cannot be used to discredit the revolt itself. The real relationship of the revolt to the Whites is clear. It was one of hatred and opposition.
The most common Trotskyist assertion to justify the repression of the Kronstadt revolt was first raised by Trotsky. It consists of arguing that the sailors in 1921 were different than those in 1917. Trotsky started this line of justification towards the end of the revolt itself when he stated on March 16th that the Baltic Fleet had been “inevitably thinned out with respect to personnel” and so a “great many of the revolutionary sailors” of 1917 had been “transferred” elsewhere. They had been “replaced in large measure by accidental elements” and this had “facilitated” the work of the “counterrevolutionary organisers” who had “selected” Kronstadt. In 1937 and 1938, he repeated this claim. [Lenin and Trotsky, Kronstadt, pp. 68–9, p. 79, p. 81 and p. 87]

His followers have repeated his assertions since. Wright suggested that “the personnel of the fortress could not possibly have remained static throughout the years between 1917 and 1921” and doubted that the revolutionary sailors of 1917 could have remained behind in the fortress while their comrades fought the Whites. [“The Truth about Kronstadt”, Op. Cit., pp. 122–3] John Rees, continuing this line of rationale, argued that “the composition of the garrison had changed … it seems likely that the peasants had increased their weight in the Kronstadt, as Trotsky suggested.” [Rees, Op. Cit., p. 61] In short, the revolutionary sailors of 1917 had been replaced by peasant conscripts in 1921. What are we to make of these claims?

First, we must note that this defence is completely irrelevant. If, as the Bolsheviks claimed, the revolt was a White plot or have led to a White counter-revolution then whether the sailors of 1921 had been there in 1917 is beside the point. Even if it were proven categorically that the bulk of the sailors had been revolutionary veterans the Bolsheviks would still have crushed the rebellion and their supporters would still justify this act. At best, this defence amounts to the unstated assumption that the revolutionary sailors was decimated and in such circumstances, it is argued, objective conditions meant that soviet democracy was impossible and so the Bolsheviks had to maintain their dictatorship at all costs to defend what was left of the revolution. Leninist Pat Stack of the British SWP is typical of this approach:

“Because anarchists dismiss the importance of material reality, events such as the 1921 Kronstadt rising against the Bolshevik government in Russia can become a rallying cry. The revolutionary Victor Serge was not uncritical of the Bolshevik handling of the rising, but he poured scorn on anarchist claims for it when he wrote, ‘The third revolution it was called by certain anarchists whose heads were stuffed by infantile delusions.’

“This third revolution, it was argued, would follow the first one in February 1917 and the second in October. The second had swept away the attempts to create capitalist power, had given land to the peasants and had extracted Russia from the horrible imperialist carnage of the First World War. The revolution had introduced a huge literacy programme, granted women abortion rights, introduced divorce and accepted the rights of the various Russian republics to self-determination. It had done so, however, against a background of a bloody and horrendous civil war where the old order tried to regain power. Sixteen imperialist powers sent armies against the regime, and trade embargoes were enforced.

“The reality of such actions caused huge suffering throughout Russia. The regime was deprived of raw materials and fuel, transportation networks were destroyed, and the cities began running out of food. By 1919 the regime only had 10 percent of the fuel that was available in 1917, and the production of iron ore in
Moreover, such an argument ignores the awkward facts that Lenin’s regime was by any objective measure an anti-working class dictatorship and that an even worse one did appear which did slaughter the Russian workers and peasants en masse, namely Stalinism.

Finally, why was the call that “bureaucratic autocracy must give place to Soviet democracy” inevitably counter-revolution in 1921 when raised in Kronstadt but revolutionary when (apparently) raised by Trotsky in 1936? [The Revolution Betrayed, p. 289] After all, in 1936 Russia was still surrounded by capitalist countries which hated it as well as facing re-armed and belligerent fascist Germany, Italy and Japan rather than states weary and exhausted after the First World War and facing internal revolts of their own. We will discuss this in section 13 and here simply note that, by opposing the Kronstadt revolt, Trotskyists “weaken their own case, for if the demands for freely elected soviets, for freedom of expression (proletarian democracy) and for workers’ management of production were wrong in 1921, why did they become partially correct in 1923? If in 1921 Lenin and Trotsky represented the ‘real’ interests of the workers (against the actual workers), why couldn’t Stalin? Why couldn’t Kadar in Hungary in 1956? The Trotskyist school of hagiography has helped to obscure the real lessons of the struggle against the bureaucracy.” [Maurice Brinton, “Preface to Ida Mett’s ‘The Kronstadt Commune’”, Op. Cit., pp. 130–1]

12 Was the country too exhausted to allow soviet democracy?

Trotskyists have, in general, three main lines of attack with regards the Kronstadt revolt. The first was that it was simply a White General revolt (see section 6). The second is that the sailors of 1921 were not those of 1917 (see section 8). The third is that the country was too exhausted for the Bolshevik dictatorship to agree to the revolt’s demands and introduce soviet democracy. The working class of 1917 would have been either completely indifferent to, or supportive of, the Bolshevik repression of the Petrograd strikes in 1921. This, to say the least, seems unlikely but it suggests that for Leninists the highest expression of class consciousness is identical to the lowest once they are in power.

Second, we have to determine what are the facts as regards the social composition and turnover of personnel in Kronstadt. Thanks to research by academics, this can be done and the evidence is clear — the bulk of the sailors in 1921 were veterans from 1917. Given this conclusion, it may come as no surprise to discover that these sources have been misused by Trotskyists and we will, after presenting the evidence, discuss this in order to indicate how far they will abuse the truth.

Academic Evan Mawdsley concludes that “it seems reasonable to challenge the previous interpretation” that there had been a “marked change in the composition of the men in the fleet ... particularly at the Kronstadt Naval Base.” From the “statistical data, it would appear that the situation in the DOT [Active Detachment] was” that “the majority of men had been veterans of 1917... and available information indicates that as many as three-quarters of the DOT ratings — the Kronstadt mutineers — had served in the fleet at least since the World War.” The data suggests “for the DOT as a whole on 1 January 1921, 23.5% could have been drafted before 1911, 52% from 1911 to 1918 and 24.5% after 1918.” In terms of the two battleships whose sailors played the leading role in 1921 revolt, the Petropavlovsk and the Sevastopol, he shows that “at the time of the uprising” of the 2,028 sailors, 20.2% were recruited into the navy before 1914, 59% joined in the years 1914–16, 14% in 1917 and 6.8% in the years 1918–21. So 93.2% of the sailors who launched the revolt in 1921 had been there in 1917. In short, the “majority of men seem to have been veterans of 1917”. [“The Baltic Fleet and the Kronstadt Mutiny”, pp. 506–521, Soviet Studies, vol. 24, no. 4, pp. 508–9] Thus:
“Although the number of ratings in the Baltic Fleet as a whole rose by 1 December 1920 to 24,914 — still 1,079 below the establishment — the basic composition of the DOT did not change greatly. The important point is that the 10,000 new recruits were trainees, not replacements ... and these men were in training depots in Petrograd, not at Kronstadt; furthermore, as at 1 December only 1,313 of a planned total of 10,384 had arrived. It also seems unlikely that the new volunteers could have been appeared in large numbers by the end of February 1921; those that did were probably in Petrograd and not aboard the ships of the DOT ... [and so] remobilisation, difficulties in finding suitable replacements ... [meant] that as many as three-quarters of the DOT ratings — the Kronstadt mutineers — had served in the fleet at least since the World War.”

“By the time of the rising the demobilisation of the older classes had hardly begun ... The composition of the DOT had not fundamentally changed, and anarchistic young peasants did not predominate there. The available data suggest that the main difficulty was not ... that the experienced sailors were being demobilised. Rather, they were not being demobilized rapidly enough.” [Op. Cit., pp. 509–10]

Another academic, Israel Getzler in his excellent account of Kronstadt during the revolution, also investigated this issue and presented identical conclusions. He demonstrated that of those serving in the Baltic fleet on 1st January 1921 at least 75.5% were drafted before 1918. Over 80% were from Great Russian areas, 10% from the Ukraine and 9% from Finland, Estonia, Latvia and Poland. He argues that the “veteran politicised Red sailor still predominated in Kronstadt at the end of 1920” and presents more “hard statistical data” like that just quoted by also investigating the crews of the two main

“But to recognise this is in fact to surrender the possibility of moral judgement and so to abdicate the responsibility of the historian. World history, as Hegel said, is world judgement; the historian is not just a mechanical recorder of facts, but also part of the human process he is investigating. If we sympathise with the Kronstadt rebels and still concede that the Bolsheviks were justified in subduing them — as indeed Victor Serge did — then we can sympathise with any rebels (the Paris Commune, say, or the plots against Hitler, Mussolini, and Franco) and still concede that any government is justified in subduing them.” [Op. Cit., p. 152]

A socialist regime cannot be defended by proclaiming that they did the same as a capitalist regime would do in similar circumstances. The criteria must be higher as the goals it is meant to embody and pursue are meant to be higher — they are meant to reflect the goal of human liberation. To suggest that it can act the same as a regime dedicated to defending human exploitation and oppression shows a confusion of mind.

The only possible justification for maintaining the party dictatorship was the argument that soviet democracy would have led to the defeat of the Communists at the polls (which would mean admitting that it was a dictatorship over the proletariat and had been for some time). This would, it is argued, have resulted in (eventually) a return of the Whites and an anti-working class dictatorship that would have slaughtered the Russian workers and peasants en masse. As we note in section 13, this was the position of Victor Serge in his Memoirs and echoed by more sophisticated Leninists ever since. Yet, such a position is self-serving and could have been used by Stalin to justify his regime and, unsurprisingly enough, the Hungarian Stalinists argued after crushing the 1956 revolution that “the dictatorship of the proletariat, if overthrown, cannot be succeeded by any form of government other than fascist counter-revolution.”
The only real threat to Bolshevik power was internal—from the workers and peasants the Bolsheviks claimed to be representing. Many of the deserters from the Red Army swelled the ranks of peasant guerrilla forces fighting the repressive and counter-productive food collection squads. In the Ukraine, the Bolsheviks were fighting the remnants of the Makhnovist army (a fight, incidentally, brought upon the Bolsheviks by themselves as they had betrayed the agreements made with the anarchist forces and attacked them once Wrangel had been defeated). In the towns and cities, the Bolsheviks faced general strikes, protests and mass meetings.

Thus the only danger facing the “soviet power” (i.e. Bolshevik power) was soviet democracy, a danger which had existed since the October revolution. As in 1918, when the Bolsheviks disbanded any soviet elected with non-Bolshevik majorities, they met the danger of soviet democracy with violence. The Bolsheviks were convinced that their own dictatorship was equivalent to the revolution and that their power was identical to that of the working class. They considered themselves to be the embodiment of “soviet power” and it obviously did not bother them that the demand for free soviets can hardly be considered as actions against the power of the soviets.

In such circumstances, the Bolshevik government viewed the Kronstadt revolt not as socialists should but rather as a ruling class. It was suppressed for “reasons of state” and not to defend a revolutionary regime (which was, by this stage, revolutionary in name only). This is reflected in Paul Avrich’s introduction which ends by suggesting that “[e]ach side behaved in accordance with its own particular goals and aspirations. To say this is not to deny the necessity of moral judgment. Yet Kronstadt presents a situation in which the historian can sympathise with the rebels and still concede that the Bolsheviks were justified in subduing them. To recognise this, indeed, is to grasp the full tragedy of Kronstadt.” [Op. Cit., p. 6] As anarchist Nicolas Walter suggests:

Historian Fedotoff-White also noted that “a good many” of the rebels “had had ample experience in organisational and political work since 1917. A number had long-standing associations with Anarchists and the Socialist Revolutionaries of the Left.” The cruiser Rossiia joined in the decision to re-elect the Kronstadt Soviet and its “crew consisted mostly of old seamen.” [The Growth of the Red Army, p. 155 and p. 138] Moreover, the majority of the revolutionary committee were veterans of the Kronstadt Soviet and the October revolution. [Ida Mett, Op. Cit., p. 42] While obviously not a miniature of the 1917 Baltic Fleet, the available information indicates that by length of service the sailors of Kronstadt in 1921 had been there since 1917 — including the sailors manning the battleships which were “the powder kegs of the rising.” Moreover, “[g]iven their maturity and experience, not to speak of their keen disillusionment as former participants in the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising.” [Avrich, Kronstadt 1921, p. 93 and p. 91]

So Getzler was right to conclude that it was “certainly the case” that the “activists of the 1921 uprising had been participants of the 1917 revolutions” for the “1,900 veteran sailors of the Petropavlovsk and the Sevastopol who spearheaded it. It was certainly true of a majority of the Revolutionary Committee and of the intellectuals … Likewise, at least three-quarters of the 10,000 to 12,000 sailors — the mainstay of the uprising — were old hands who had served in the navy through war and revolution.” [Op. Cit., p. 226] As Paul Avrich notes in a review of Getzler’s book:
“Getzler draws attention to the continuity in institutions, ideology, and personnel linking 1921 with 1917. In doing so he demolishes the allegation of Trotsky and other Bolshevik leaders that the majority of veteran Red sailors had, in the course of the Civil War, been replaced by politically retarded peasant recruits from the Ukraine and Western borderlands, thereby diluting the revolutionary character of the Baltic fleet. He shows, on the contrary, that no significant change had taken place in the fleet’s political and social composition, that at least three-quarters of the sailors on active duty in 1921 had been drafted before 1918 and were drawn predominantly from Great Russian areas.” [Soviet Studies, Vol. 36, No. 1, pp. 139–40]

This is not the end of the matter. A report by Vasilii Sevei, Plenipotentiary of the Special Section of the Vecheka, dated March 7th, 1921, stated that a “large majority” of the sailors of Baltic Fleet “were and still are professional revolutionaries and could well form the basis for a possible third revolution.” He notes that the “disease from which they suffer has been too long neglected.” What is significant about this social-political profile of the “large majority” of sailors was that it was not written in response of the Kronstadt revolt but that it was formulated well before. As its author put it in the report, “I stated these views more than a month ago in my memorandum to comrade Krestinskii” (then secretary of the Communist Party). And the recipient of this March 7th, 1921, report? Leon Trotsky. [quoted by Israel Getzler, “The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, Op. Cit., pp. 32–3]

It should also be noted that Stalinist works on the Kronstadt Rebellion tried to prove that the Red Sailors of 1917 had been replaced by 1921. As one historian notes: “Statistical arguments used by these authors are not convincing. They show that the actual proportion of

So in spite of massive social unrest and the revolt of a key fortress protecting Petrograd, the Western powers took no action. The Whites were disorganised and could only raise non-military supplies (none of which reached Kronstadt). Could this situation have changed if Kronstadt had spread to the mainland? It is doubtful simply because the Western governments, as Lenin argued, had to take into account the anti-interventionist position of their own working classes. The Whites had no military forces available, as the Bolsheviks themselves admitted. Avrich notes it would have taken months for what was left of these forces to reach Kronstadt by which time soviet democracy would have been consolidated and ready to protect itself.

Even if we assume that Kronstadt had survived until the ice melted while Petrograd remained under Bolshevik dictatorship it, again, is doubtful that it would have been the basis for renewed White attacks. Neither Wrangel’s troops nor foreign government forces would have been welcomed by Red Kronstadt. While non-military aid would have been welcome (i.e. food supplies and so on), it is hard to believe that the Conference of Delegates would have allowed troops to arrive or pass them by to attack Petrograd. Simply put, the Kronstadters were fighting for soviet power and were well aware that others may try to support the revolt for their own, anti-revolutionary, reasons (see section 7).

In short, the possibility of foreign intervention was negligible. The arguments of Lenin at the time, plus the demobilisation of the Red Army, all point in that direction. Moreover, the lack of response by Western governments during the revolt indicates that they were unlikely to take advantage of continuing unrest in Kronstadt, Petrograd and other towns and cities. Their working classes, sick of war and class consciousness enough to resist another intervention in Russia, would have been a factor in this apathetic response. Wrangel’s troops, as the Bolsheviks were aware, were not a threat.
to feed his troops on ‘humane grounds,’ meanwhile urging him to disband.” [Op. Cit., p. 105] The demobilising of the Red Army confirms that this threat was considered non-existent.

Thus, the claim that foreign intervention was likely seems without basis. Indeed, the Communist radio was arguing that “the organisation of disturbances in Kronstadt have the sole purpose of influencing the new American President and changing his policy toward Russia. At the same time the London Conference is holding its sessions, and the spreading of similar rumours must influence also the Turkish delegation and make it more submissive to the demands of the Entente. The rebellion the Petropavlovsk crew is undoubtedly part of a great conspiracy to create trouble within Soviet Russia and to injure our international position.” [quoted by Berkman, “The Kronstadt Rebellion” , Op. Cit., p. 71] Lenin himself argued on March 16th that “the enemies” around the Bolshevik state were “no longer able to wage their war of intervention” and so were launching a press campaign “with the prime object of disrupting the negotiations for a trade agreement with Britain, and the forthcoming trade agreement with America” for “we see that what they fear most, from the practical angle of international capital, is the resumption of proper trade relations. But they will fail in their attempts to disrupt them.” [Lenin, Collected Works, vol. 32, p. 270]

Moreover, these governments had to take into account of its own working class. It was doubtful that they would, after years of war, been able to intervene, particularly if there was a clearly socialist revolt coming from below. Their own working class, in such a situation, would have prevented intervention by foreign capitalist states. This was, in fact, acknowledged in Lenin on 5 July 1921: “we are not entirely isolated, since the whole international bourgeoisie is incapable of waging open war against us just now, because the whole working class, even though the majority is not yet communist, is sufficiently class-conscious to prevent intervention. The bourgeoisie is compelled to reckon with the temper of the masses even though they have not yet entirely sided with communism.” [Op. Cit., p. 495]

peasants serving in the Baltic Navy in 1921 was at that time rather smaller than the proportion of peasants in the Red Army in the same year.” [George Katkov, Op. Cit., p. 21] This places Trotsky’s assertion that the “workers who marched over the ice against the fortress represented the proletarian revolution” while the “sailors in revolt represented the peasant Thermidor” in context. [Lenin and Trotsky, Kronstadt, p. 82] Perhaps, for Trotskyists, this explains the fact that the “ordinary Red Army soldiers ... were reluctant and unreliable fighters against Red Kronstadt, although driven at gunpoint onto the ice and into battle”? [Getzler, Kronstadt 1917–1921, p. 243]

Needless to say, this statistical information was unavailable when libertarians wrote their accounts of the uprising. All they could go on were the facts of the uprising itself and the demands of the rebels. Based on these, it is little wonder that anarchists like Alexander Berkman stressed the continuity between the Red Kronstadters of 1917 and the rebels of 1921. Firstly, the rebels in 1921 took action in solidarity with the striking workers in Petrograd. In the words of Emma Goldman, it was “after the report of their Committee of the real state of affairs among the workers in Petrograd that the Kronstadt sailors did in 1921 what they had done in 1917. They immediately made common cause with the workers. The part of the sailors in 1917 was hailed as the red pride and glory of the Revolution. Their identical part in 1921 was denounced to the whole world as counter-revolutionary treason” by the Bolsheviks. [“Trotsky Protests Too Much”, Op. Cit. p. 259] Secondly, their demands were thoroughly in-line with the aspirations and politics of 1917 and clearly showed a socialist awareness and analysis. Thirdly, Emma Goldman spoke to some of those wounded in the attack on Kronstadt. She records how one ‘had realised that he had been duped by the cry of ‘counter-revolution.’ There were no Tsarist generals in Kronstadt, no White Guardists — he found only his own comrades, sailors and soldiers who had heroically fought for the Revolution.” [My Disillusionment in Russia, pp. 199–200] Similarly, Ante Ciliga quoted the testimony regarding Kronstadt of
a fellow political prisoner in Soviet Russia: “‘It is a myth that, from the social point of view, Kronstadt of 1921 had a wholly different population from that of 1917,’ [a] man from Petrograd, Dv., said to me in prison. In 1921 he was a member of the Communist youth, and was imprisoned in 1932 as a ‘decist’ (a member of Saponov’s group of ‘Democratic Centralists’).” [“The Kronstadt Revolt”, Op. Cit., pp. 335–6] Hence Goldman:

“No, I do not presume to argue what the Kronstadt sailors were in 1918 or 1919. I did not reach Russia until January, 1920. From that time on until Kronstadt was ‘liquidated’ the sailors of the Baltic fleet were held up as the glorious example of valour and unflinching courage. Time on end I was told not only by Anarchists, Mensheviks and social revolutionists, but by many Communists, that the sailors were the very backbone of the Revolution. On the 1st of May, 1920, during the celebration and the other festivities organised for the first British Labour Mission, the Kronstadt sailors presented a large clear-cut contingent, and were then pointed out as among the great heroes who had saved the Revolution from Kerensky, and Petrograd from Yudenich. During the anniversary of October the sailors were again in the front ranks, and their re-enactment of the taking of the Winter Palace was wildly acclaimed by a packed mass.

“Is it possible that the leading members of the party, save Leon Trotsky, were unaware of the corruption and the demoralisation of Kronstadt, claimed by him? I do not think so. Moreover, I doubt whether Trotsky himself held this view of the Kronstadt sailors until March, 1921. His story must, therefore, be an afterthought, or is it a rationalisation to justify

To back up his argument, Rees references Paul Avrich’s book. We, in turn, will consult that work to evaluate his argument.

First, the Kronstadt revolt broke out months after the end of the Civil War in Western Russia. Wrangel had fled from the Crimea in November 1920. The Bolsheviks were so afraid of White invasion that by early 1921 they demobilised half the Red Army (some 2,500,000 men). Second, the Russian emigres “remained as divided and ineffectual as before, with no prospect of co-operation in sight.” Third, as far as the last of the White Generals goes, Wrangel’s forces were in no state to re-invade Russia. His troops were “dispersed and their moral sagging” and it would have taken “months ... merely to mobilise his men and transport them from the Mediterranean to the Baltic.” A second front in the south “would have meant almost certain disaster.” Indeed, in a call issued by the Petrograd Defence Committee on March 5th, they asked the rebels: “Haven’t you heard what happened to Wrangel’s men, who are dying like flies, in their thousands of hunger and disease?” The call goes on to add “[t]his is the fate that awaits you, unless you surrender within 24 hours.” [Paul Avrich, Kronstadt 1921, p. 13, p. 219, p. 146 and p. 105]

Clearly, the prospect of a White invasion was slim. This leaves the question of capitalist governments. Avrich has this to say on this:

“Apart from their own energetic fund-raising campaign, the emigres sought the assistance of the Entente powers ... the United States government, loath to resume the interventionist policies of the Civil War, turned a deaf ear to all such appeals. The prospects of British aid were even dimmer ... The best hope of foreign support came from France ... the French refused to interfere either politically or militarily in the crisis.” [Op. Cit., pp. 117–9]

The French government had also “withdrew its recognition of Wrangel’s defunct government” in November 1920 “but continued
talking nonsense (see section 4). Thus Rees’ “class analysis” of the Kronstadt revolt is pathetic and has no bearing to the reality of the situation in Petrograd nor to the history of the revolt itself.

As can be seen, any attempt to use the relative inaction of the Petrograd workers as evidence of the class nature of the revolt has to be based on ignoring all the relevant facts of the situation. This can go so far as to selectively quote from academic accounts to present a radically different conclusion to that of the misused author’s.

**11 Were the Whites a threat during the Kronstadt revolt?**

The lack of foreign intervention during the Kronstadt revolt suggests more than just the fact that the revolt was not a “White conspiracy.” It also suggests that the White forces were in no position to take advantage of the rebellion or even support it. This is significant simply because the Bolsheviks and their supporters argue that the revolt had to be repressed simply because the Soviet State was in danger of White or foreign intervention. How much danger was there? According to John Rees, a substantial amount:

“The Whites, even though their armies had been beaten in the field, were still not finished — as the emigre response to the Kronstadt rising shows ... They had predicted a rising at Kronstadt and the White National Centre abroad raised a total of nearly 1 million French Francs, 2 million Finnish marks, £5000, $25,000 and 900 tons of flour in just two weeks; Indeed, the National Centre was already making plans for the forces of the French navy and those of General Wrangel, who still commanded 70,000 men in Turkey, to land in Kronstadt if the revolt were to succeed.” [Op. Cit., pp. 63–4]

In short, the continuity between the sailors of 1917 and 1921 could be seen from their actions (rising in solidarity with the Petrograd workers) and in their politics (as expressed in their demands and in their paper). The later research has just confirmed what is obvious from an analysis of such facts, namely that the rebels in 1921 were acting in the spirit of their comrades of 1917 and this implies a significant continuity in personnel (which perhaps explains the unwillingness of Leninists to mention that the revolt was in solidarity with the strikers or the demands of the rebels). The empirical evidence available supports the political analysis of the revolt conducted by revolutionaries like Berkman, Voline, Goldman and Ciliga.

So academic research refutes the claims of Trotskyists since Trotsky suggested that Kronstadt had “been completely emptied of proletarian elements” as “[a]ll the sailors” belonging to the ships’ crews “had become commissars, commanders, chairmen of local soviets.” Later, realising the stupidity of this claim, he changed it to Kronstadt being “denuded of all revolutionary forces” by “the winter of 1919.” He also acknowledged that “a certain number of qualified workers and technicians” remained to “take care of the machinery” but these were “politically unreliable” as proven by the fact they had not been selected to fight in the civil war. As evidence, he mentions that he had wired a “request at the end of 1919, or in 1920, to ‘send a group of Kronstadt sailors to this or that point’” and they had answered “No one left to send.” [Lenin and Trotsky, Kronstadt, p. 87, p. 90 and p. 81] Obviously, the Communist commander at Kronstadt had left his fortress and its ships totally unmanned! Such common sense is sadly lacking from Trotsky and the evidence does not support his claims.

Moreover, does this claim not also apply to the Communist Party membership at Kronstadt? Is Trotsky really arguing that the
Bolsheviks in Kronstadt after the winter of 1919 were not revolutionary? Given that the bulk of them had joined the party during or after this time, we must obviously conclude that the recruiters let anyone join. Moreover, there had been a “rigorous local purge” of the party conducted in the autumn of 1920 by the commander of the Baltic Fleet. [Getzler, *Kronstadt 1917–1921*, p. 211 and p. 205] Must we also conclude that this purge did not have revolutionary politics as a factor when determining whether a party member should be expelled or not?

Trotsky claims too much. There are two possibilities. The first is that the Kronstadt Communist Party was not revolutionary and was made up of politically backward individuals, careerists and so on. If that were the case in Kronstadt then it must also have been the case elsewhere in Russia and this discredits any attempt to argue that the Bolshevik party dictatorship was revolutionary. The second is that it did have revolutionary elements. If so, then the fact that hundreds of these members left the party during the revolt and only a minority opposed it makes the claim that the rebellion was “counter-revolutionary” difficult (indeed, impossible) to maintain. Of the around 2,000 members of the Communist Party in Kronstadt, some 500 officially resigned along nearly 300 candidate members. Trotsky later estimated that 30% of the party in Kronstadt took an active part in the revolt while 30% remained neutral. [Avrich, *Kronstadt 1921*, tp. 183–4] This shows that Trotsky’s claims that Kronstadt was denuded of revolutionary elements were false.

J.G. Wright, as noted above, thought that it was “impossible” to believe that the sailors of 1917 could leave their comrades to fight the Whites while they stayed at Kronstadt. [“The Truth About Kronstadt”, *Op. Cit.*, pp. 122–3] This may have been a valid argument if the Soviet armed forces were democratically run. However, as we indicated in section 2, it was organised in a typically bourgeois fashion. Trotsky had abolished democratic soldiers and sailors councils and the election of officers in favour of appointed officers and hier-

As can be seen, Frank “skips over” most of Avrich’s argument and so the basis of his conclusion. Indeed, what Frank calls Avrich’s “conclusion” cannot be understood by providing, as Frank does, the last reason Avrich gives for it. The dishonesty is clear, if not unexpected nor an isolated case.

John Rees, to provide another example, states that the revolt was “preceded by a wave of serious but quickly resolved strikes.” No mention that the strikes were “resolved” by force nor that the Kronstadt revolt was not only “preceded” by the strikes but was directly inspired by them, was in solidarity with them and raised many of the same demands. Similarly, he argues that the Kronstadters’ “insistence that they were fighting for a ‘third revolution’, freedom of expression and for ‘soviets without parties’ [although, as Avrich notes, they never raised that slogan and so we have to wonder who Rees is quoting here] has convinced many historians that this revolt was fundamentally distinct from the White Rebellions.” But this, apparently, is not the case as “one must be careful to analyse the difference between the conscious aims of the rebels and the possible outcome of their actions. The Bolshevik regime still rested on the shattered remnants of the working class. The Kronstadt sailors’ appeals to the Petrograd workers had met with little or no response.” [*Op. Cit.*, p. 61 and p. 63]

One has to wonder what planet Rees is on. After all, if the Bolsheviks had rested on the “shattered remnants of the working class” then they would not have had to turn Petrograd into an armed camp, repress strikes, impose martial law and arrest militant workers. The Kronstadt sailors’ appeals “met with little or no response” due to the Bolshevik coercion exercised in those fateful days. To not mention the repression in Petrograd is to deliberately deceive the reader. That the Kronstadt demands would have met with strong response in Petrograd can be seen from the actions of the Bolsheviks (who did not rest upon the workers but rather arrested them). Given that the Kronstadt demands simply reflected those raised by the Petrograd strikers themselves we can safely say that Rees is
force and the widespread arrests, not to speak of the
tireless propaganda waged by the authorities had been
indispensable in restoring order. Particularly impres-
sive in this regard was the discipline shown by the lo-
cal party organisation. Setting aside their internal dis-
putes, the Petrograd Bolsheviks swiftly closed ranks
and proceeded to carry out the unpleasant task of re-
pression with efficiency and dispatch ... “Then, too, the collapse of the movement would not
have come so soon but for the utter demoralisation of
Petrograd’s inhabitants. The workers were simply too
exhausted to keep up any sustained political activity . .. What is more, they lacked effective leadership and a
coherent program of action. In the past these had been
supplied by the radical intelligentsia ... [but they]
were themselves in no condition to lend the workers
any meaningful support, let alone active guidance ... they now felt too weary and terrorised ... to raise their
voices in opposition. With most of their comrades in
prison or exile, and some already executed, few of the
survivors were willing to risk the same fate, especially
when the odds against them were so overwhelming
and when the slightest protest might deprive their
families of their rations. For many intellectuals and
workers, moreover, the Bolsheviks, with all their
faults, were still the most effective barrier to a White
resurgence and the downfall of the revolution.

“For these reasons, the strikes in Petrograd were fated
to lead a brief existence. Indeed, they ended almost as
suddenly as they had begun, never having reached the
point of armed revolt against the regime.” [Paul Avrich,
Kronstadt, pp. 49–51]

archical, top-down, military structures. This meant that the sailors
would have stayed in Kronstadt if they had been ordered to — and
probably shot if they had not followed those orders. The fact that
they had to defend Petrograd combined with the level of technical
knowledge and experience required to operate the battleships and
defences at Kronstadt would have meant that many of the sailors
of 1917 would have been irreplaceable and so had to remain at Kro-

“One reason for the remarkable survival in Kronstadt
of these veteran sailors, albeit in greatly diminished
numbers, was precisely the difficulty of training, in
war-time conditions, a new generation competent in
the sophisticated technical skills required of Russia’s
ultra-modern battleships, and, indeed, in the fleet

We should also note here that “by the end of 1919 thousands of
veteran sailors, who had served on many fronts of the civil war and
in the administrative network of the expanding Soviet state, had re-
turned to the Baltic Fleet and to Kronstadt, most by way of remobili-
who had been ordered away did not come back is not a valid one.

Trotsky obviously felt that this argument of changing social
composition of the sailors would hold more water than claims
White Guards organised it and he continued this theme:

“The best, most self-sacrificing sailors were completely
withdrawn from Kronstadt and played an important role
at the fronts and in the local soviets throughout the coun-
try. What was left was the grey mass with big preten-
sions (‘We are from Kronstadt’), but without the politi-
cal education and unprepared for revolutionary sacrifice.
The country was starving. The Kronstadters demanded
privileges. The uprising was dictated by a desire to get privileged food rations.” [Lenin and Trotsky, Op. Cit., p. 79]

This was Trotsky’s first comment on the uprising for 16 years and, as Ida Mett notes, “[s]uch a demand was never put forward by the men of Kronstadt” and so Trotsky “started his public accusations with a lie.” [Op. Cit., p. 191] He repeated the claim again, six months later [Lenin and Trotsky, Op. Cit., p. 92] Unfortunately for him, the opposite was the case: point 9 of the Kronstadt demands explicitly called for an end of privileges by the “equalisation of rations for all workers.” This was implemented during the uprising.

As an aside, Trotsky later stated that “[w]hen conditions became very critical in hungry Petrograd, the Political Bureau more than once discussed the possibility of securing an ‘internal loan’ from Kronstadt, where a quantity of old provisions still remained. But delegates of the Petrograd workers answered: ‘You will get nothing from them by kindness. They speculate in cloth, coal, and bread. At present in Kronstadt every kind of riffraff has raised its head.’” [Lenin and Trotsky, Op. Cit., pp. 87–8] As Ida Mett pointed out, “[w]e should add that before the insurrection these ‘stores’ were in the hands of communist functionaries and that it was upon these people alone that consent to the proposed ‘loan’ depended. The rank and file sailor, who took part in the insurrection, had no means open to him whereby he could have opposed the loan, even if he had wanted to.” [Op. Cit., p. 193] If Trotsky’s words were true, then they were a crushing indictment of the Bolshevik regime and not the Kronstadt rebels.

As for Trotsky’s claim of a lack of political education and unwillingness for sacrifice, the 15 point resolution voted upon by the sailors exposes this as nonsense and the fact the sailors fought the Red Army to the end indicates that there were prepared to die for their ideals. Similarly, his argument that “in 1917–18, the Kronstadt sailor stood considerably higher than the average level of the Red Army” but by 1921 they “stood ... on a level considerably lower, in

Rather than being an irrefutable case against Kronstadt Trotskyists think it is, all that the isolation of Kronstadt proves is the power of the repressive system the rebels and the Russian masses faced.

On this theme, we can see the depths which Trotskyists go to re-write history from Pierre Frank’s “Introduction” to the work Kronstadt. He decides to quote Paul Avrich’s work (after, of course, warning the reader that Avrich “is not a Bolshevik or a Trotskyist” and his “political features are blurred”) and states that Avrich “done his work conscientiously, without skipping over the facts.” It is a shame that the same cannot be said of Frank who states that Avrich “discusses the strikes in Petrograd preceding Kronstadt and comes to the following conclusion”:

“For many intellectuals and workers, moreover, the Bolsheviks, with all their faults, were still the most effective barrier to a White resurgence and the downfall of the revolution.

“For these reasons, the strikes in Petrograd were fated to lead a brief existence. Indeed, they ended almost as suddenly as they had begun, never having reached the point of armed revolt against the regime.” [quoted by Frank, Lenin and Trotsky, Op. Cit., pp. 24–25]

It is the “moreover” in the first paragraph that gives the game away. Avrich lists a few more reasons than the one given by Frank. Here is what Avrich actually lists as the reasons for the end of the strike wave:

“after several days of tense excitement, the Petrograd disturbances petered out ... The concessions had done their work, for more than anything else it was cold and hunger which had stimulated popular disaffection. Yet there is no denying that the application of military
sufficient material standard by which to test its line of action, without the possible circulation of Menshevik papers. Noske [in Germany] crushes the Communists, but they grow. We have suppressed the Mensheviks and the S.R.s — and they have disappeared. This criterion is sufficient for us.” [Op. Cit., pp. 109–10]

An interesting criterion, to say the least. By this logic Hitler expressed the “interests of historical development” when the German Communists and Trotskyists “disappeared” by leaps and bounds. Similarly, the Trotskyists in Russia “disappeared” under Stalin. Is this a Trotskyist justification of Stalinism? After all, in November 1927, the Left Opposition called for workers to demonstrate in its support during the 10th anniversary celebrations of the October Revolution. The workers did not heed their call, leading neo-Trotskyist Tony Cliff to lament “the passivity of the mass of the workers, their lack of will to fight for the Opposition”. This lack of response was critical for the success of Stalinism: “For the ruling group to win it needed the passivity of the mass of the workers, while the Opposition needed the activity and consciousness of the masses for success.” [Trotsky, vol. 3, p. 263] So, if we apply the Leninist arguments against Kronstadt to this then, surely, we must conclude that the fact the workers remained passive shows that the Stalinists represented the “proletarian revolution” while the Trotskyists represented “petty bourgeois reaction”? That the Left Opposition proclaimed its proletarian credentials matters little, as Trotsky reminded us as regards the Kronstadt rebels, “Marx has said that it is impossible to judge either parties or peoples by what they say about themselves”. [Lenin and Trotsky, Kronstadt, p. 88] Likewise, noting the repressive nature of the regime in 1927 to explain this passivity would be acceptable if the repression in Petrograd before, during and after the Kronstadt rebellion was not ignored by the Trotskyists.

general, than the average level of the Red Army” but, as we indicate in section 9, the political programme of the revolt was fundamentally the same as the dominant ideas within Kronstadt during 1917. [Op. Cit., p. 87] More, we should note that the Kronstadt rebels opposed the introduction of wage labour, a basic socialist idea and one raised in 1917 by anarchists and others, while this was missing from the Bolshevik’s NEP policies. This shows clear continuity between 1921 and 1917 and, moreover, the mass meeting that agreed the resolution did so unanimously, meaning old and new sailors agreed to it. So much for Trotsky’s assertions.

Now we turn to the misuse of these sources to support their case. This indicates well the nature of Bolshevik ethics. “While the revolutionaries,” argued Ciliga with regards to the Bolsheviks, “remaining such only in words, accomplished in fact the task of the reaction and counter-revolution, they were compelled, inevitably, to have recourse to lies, to calumny and falsification.” [“The Kronstadt Revolt”, Op. Cit., p. 335] Defending these acts also pays its toll on those who follow this tradition, as we shall see.

Needless to say, such evidence as provided by Avrich and Getzler is rarely mentioned by supporters of Bolshevism. However, rather than ignore these works, the Trotskyists use them in their own way, for their own purposes — indeed, both Paul Avrich’s Kronstadt 1921 and Getzler’s Kronstadt 1917–1921 have been used to support pro-Bolshevist conclusions when, in fact, they do the opposite. The misuse of these references is quite unbelievable and shows the mentality of Trotskyism well.

Pierre Frank, for example argues that Avrich’s work has “conclusions” which are “similar to Trotsky’s” and “confirms the changes in the composition of the Kronstadt garrison that took place during the civil war, although with a few reservations.” [Lenin and Trotsky, Op. Cit., p. 25] A quick look at these reservations shows how false Frank is. It is worth quoting Avrich at length to show this:

4747
“There can be little doubt that during the Civil War years a large turnover had indeed taken place within the Baltic Fleet, and that many of the old-timers had been replaced by conscripts from rural districts who brought with them the deeply felt discontent of the Russian peasantry. By 1921, according to official figures, more than three-quarters of the sailors were of peasant origin, a substantially higher proportion than in 1917 ... Yet this does not necessarily mean that the behavioural patterns of the fleet had undergone any fundamental change. On the contrary, alongside the technical ratings, who were largely drawn from the working class, there had always been a large and unruly peasant element among the sailors ... Indeed, in 1905 and 1917 it was these very youths from the countryside who had given Kronstadt its reputation as a hotbed of revolutionary extremism. And throughout the Civil War the Kronstadters had remained an independent and headstrong lot, difficult to control and far from constant in their support for the government. It was for this reason so many of them ... had found themselves transferred to new posts remote from the centres of Bolshevik powers. Of those who remained, many hankered for the freedoms they had won in 1917 before the new regime began to establish its one-party dictatorship throughout the country.

Actually, there was little to distinguish the old-timers from the recent recruits in their midst. Both groups were largely of peasant background ... Not unexpectedly, when the rebellion finally erupted, it was the older seamen, veterans of many years of service (dating in some cases before the First World War) who took the lead ... Given their maturity and experience, stadt certainly intimidated the Petrograd workers. The demarcation did not take place ‘along class lines’ but according to the respective strengths of the organs of repression. The fact that the workers of Petrograd did not follow those of Kronstadt does not prove that they did not sympathise with them. Nor, at a later date, when the Russian proletariat failed to follow the various ‘oppositions’ did this prove that they were in agreement with Stalin! In such instances it was a question of the respective strengths of the forces confronting one another.” [Mett, Op. Cit., pp. 191–2]

Not that this was the first time Trotsky confused force with class. In 1920 he had defended the fact "of having substituted for the dictatorship of the Soviets the dictatorship of our party" by arguing that "it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party" and that there is "no substitution at all" when the "power of the party" replaces that of the working class. The rule of the party "has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour." [Terrorism and Communism, p. 109] He continued:

"But where is your guarantee, certain wise men ask us, that it is just your party that expresses the interests of historical development? Destroying or driving underground the other parties, you have thereby prevented their political competition with you, and consequently you have deprived yourselves of the possibility of testing your line of action.

"This idea is dictated by a purely liberal conception of the course of the revolution. In a period in which all antagonisms assume an open character, and the political struggle swiftly passes into a civil war, the ruling party has
This was a common practice and during this period the Cheka concentrated its efforts on the leaders and on disrupting communication: all delegates to other workplaces, all Mensheviks and SRs who could be found, all speakers at rallies were being arrested day after day. Thus the Communists “suppressed the workers’ uprising in Petrograd in the first days of March.” Unlike the Kronstadt sailors, the workers did not have weapons and “were essentially defenceless vis-a-vis the Cheka.” [V. Brovkin, Op. Cit., p. 396]

The state of siege was finally lifted on the 22nd of March, five days after the crushing of Kronstadt. The city had been “appeased by [economic] concessions and cowed by the presence of troops.” [Avrich, Op. Cit., p. 200] In these circumstances, is it surprising that the Petrograd workers did not join in the rebellion? So Trotsky is insulting the intelligence of his readers by arguing that the lack of support in Petrograd for Kronstadt reflected “class lines.” Indeed, by failing to mention (to use Emma Goldman’s words) “the campaign of slander, lies and calumny against the sailors” conducted by the Soviet Press (which “fairly oozed poison against the sailors”) or that “Petrograd was put under martial law” Trotsky, quite clearly, “deliberately falsifies the facts.” [“Trotsky Protests Too Much”, Op. Cit., p. 264] In short:

“Here again Trotsky is saying things which are quite untrue. Earlier on we showed how the wave of strikes had started in Petrograd and how Kronstadt had followed suit. It was against the strikers of Petrograd that the Government had to organise a special General Staff: the Committee of Defence. The repression was first directed against the Petrograd workers and against their demonstrations, by the despatch of armed detachments of Koursantsys.

“But the workers of Petrograd had no weapons. They could not defend themselves as could the Kronstadt sailors. The military repression directed against Kron-

not to speak of their keen disillusionment as former participants of the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising ... The proximity of Petrograd, moreover, with its intense intellectual and political life, had contributed towards sharpening their political awareness, and a good many had engaged in revolutionary activity during 1917 and after...

“As late as the autumn of 1920, Emma Goldman recalled, the sailors were still held up by the Communists themselves as a glowing example of valour and unflinching courage; on November 7, the third anniversary of the Bolshevik seizure of power, they were in the front ranks of the celebrations ... No one at the time spoke of any ‘class degeneration’ at Kronstadt. The allegation that politically retarded muzhiks had diluted the revolutionary character of the fleet, it would seem, was largely a device to explain away dissident movements among the sailors, and had been used as such as early as October 1918, following the abortive mutiny at the Petrograd naval station, when the social composition of the fleet could not yet have undergone any sweeping transformation.” [Kronstadt 1921, pp. 89–92]
new regime that would adhere more faithfully to the principles of the revolution." In October that year, "a mass meeting at the Petrograd naval base adopted a resolution" which included the sailors going "on record against the Bolshevik monopoly of political power. Condemning the suppression of the anarchists and opposition socialists, they called for free elections to the soviets and "denounced the compulsory seizure of gain." Their demands, as Avrich notes, "strikingly anticipated the Kronstadt programme of 1921, down to the slogans of 'free soviets' and 'Away with the commissarocracy.'" He stresses that a "glance at the behaviour of the Baltic Fleet from 1905 to 1921 reveals many elements of continuity." [Op. Cit., pp. 63–4] Frank’s selective quoting should be sufficient to dismiss his arguments.

However, an even worse example of Trotskyist betrayal of the truth is provided by the British SWP’s John Rees. The evidence Rees musters for the claim that the "composition" of the Kronstadt sailors "had changed" between 1917 and 1921 is a useful indication of the general Leninist method when it comes to the Russian revolution. Rees argues as follows:

“As we noted in section 2, the events in Kronstadt were in solidarity with the strike wave in Petrograd at the end of February. Then the Bolsheviks had repressed the workers with “arrests, the use of armed patrols in the streets and in the factories, and the closing and re-registration of an enterprise labour force.” [Mary McAuley, Op. Cit., p. 409] A three-man Defence Committee was formed and Zinoviev "proclaimed martial law" on February 24th (this was later "vested with absolute power throughout the entire province" on March 3rd). As part of this process, they had to rely on the koursanty (Communist officer cadets) as the local garrisons had been caught up in the general ferment and could not be relied upon to carry out the government’s orders: “Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked. .. the curfew [was] strictly enforced.” The Petrograd Cheka made widespread arrests. [Avrich, Op. Cit., p. 39, p. 142 and pp. 46–7] However, part of the Petrograd proletariat continued to strike during the Kronstadt events including the biggest factories of Petrograd: Poutilov, Baltisky, Oboukhov, Nievskia Manoufactura, etc. However, the Bolsheviks acted quickly to shut down the factories and started the re-registration of the workers. For workers to be locked out of a factory meant to be "automatically deprived of their rations." [Avrich, Op. Cit., p. 41] On the day the Bolsheviks attacked Kronstadt (March 7th) the Cheka reported that it was launching “decisive actions against the workers.” These “decisive actions” involved a “massive purge of Petrograd factories and plants.” At the Arsenal factory, for example, “the workers organised a mass meeting on 7th March, (the day the bombardment of Kronstadt began). This meeting adopted a resolution of the mutinous sailors! It elected a commission which was to go from factory to factory, agitating for a general strike.” [Mett, Op. Cit., p. 164] The Cheka confirms this event, reporting to Zinoviev on March 8th that "[a]t a rally of workers of the Arsenal Plant a resolution was passed to join the Kronstadt uprising. The general meeting had elected a delegation to maintain contact with Kronstadt.” This delegation had already been arrested.

This quote is referenced to Israel Getzler’s Kronstadt 1917–1921. Rees account is a fair version of the first half of Yasinskys’ report. However, Getzler continues exactly as reproduced below:
disturbances. The city became a vast garrison, with troops patrolling in every quarter. Notices posted on the walls reminded the citizenry that all gatherings would be dispersed and those who resisted shot on the spot. During the day the streets were nearly deserted, and, with the curfew now set at 9 p.m., night life ceased altogether.” [Avrich, Op. Cit., p. 142]

Berkman, also an eyewitness to the repression like Goldman, stated that:

“The Petrograd committee of defence, directed by Zinoviev, its chairman, assumed full control of the city and Province of Petrograd. The whole Northern District was put under martial law and all meetings prohibited. Extraordinary precautions were taken to protect the Government institutions and machine guns were placed in the Astoria, the hotel occupied by Zinoviev and other high Bolshevik functionaries. The proclamations posted on the street bulletin boards ordered the immediate return of all strikers to the factories, prohibited suspension of work, and warned the people against congregating on the streets. ‘In such cases’, the order read, ‘the soldiery will resort to arms. In case of resistance, shooting on the spot.’

“The committee of defence took up the systematic ‘cleaning of the city.’ Numerous workers, soldiers and sailors suspected of sympathising with Kronstadt, placed under arrest. All Petrograd sailors and several Army regiments thought to be ‘politically untrustworthy’ were ordered to distant points, while the families of Kronstadt sailors living in Petrograd were taken into custody as hostages.” [“The Kronstadt Rebellion”, Op. Cit., p. 71]

“Yasinsky was apprehensive about the future when, ‘sooner or later, Kronstadt’s veteran sailors, who were steeled in revolutionary fire and had acquired a clear revolutionary world-view would be replaced by inexperienced, freshly mobilised young sailors’. Still he comforted himself with the hope that Kronstadt’s sailors would gradually infuse them with their ‘noble spirit of revolutionary self-dedication’ to which Soviet Russia owed so much. As for the present he felt reassured that ‘in Kronstadt the red sailor still predominates.’” [Getzler, Kronstadt 1917–1921, p. 207]

Rees handy ‘editing’ of this quote transforms it from one showing that three months before the rising that Kronstadt had retained its revolutionary spirit to one implying the garrison had indeed been replaced.

Rees also tries to generate “[f]urther evidence of the changing class composition” by looking at the “social background of the Bolsheviks at the base.” What is the basis of Rees’ “further evidence”? Simply that in “September 1920, six months before the revolt, the Bolsheviks had 4,435 members at Kronstadt. Some 50 per cent of these were peasants, 40 percent workers and 10 percent intellectuals … Thus the percentage of peasants in the party was considerably higher than nationally … If we assume that the Bolshevik party was more working class in composition than the base as a whole, then it seems likely that the peasants had increased their weight in the Kronstadt, as Trotsky suggested.” [our emphasis, Op. Cit., p. 61] So on the basis of an assumption, it may be “likely” that Trotsky was correct: impressive “evidence” indeed.

The figures Rees uses are extracted from D. Fedotoff-White’s The Growth of the Red Army. Significantly, Rees fails to mention that the Kronstadt communists had just undergone a “re-registration” which saw about a quarter of the 4,435 members in August 1920 voluntarily resigning. By March 1921, the party
had half as many members as in the previous August and during the rebellion 497 members (again, about one-quarter of the total membership) voluntarily resigned, 211 were excluded after the defeat of the rebellion and 137 did not report for re-registration. [Fedotoff-White, Op. Cit., p. 140] It seems strange that the party leadership had not taken the opportunity to purge the Kronstadt party of “excessive” peasant influence in August 1920 when it had the chance.

Other questions arise from Rees’ argument. He uses the figures of Communist Party membership in an attempt to prove that the class composition of Kronstadt had changed, favouring the peasantry over the workers. Yet this is illogical. Kronstadt was primarily a military base and so its “class composition” would be skewed accordingly. Since the Bolshevik military machine was made up mostly of peasants, can we be surprised that the Communist Party in Kronstadt had a higher percentage of peasants than the national average? Significantly, Rees does not ponder the fact that the percentage of workers in the Kronstadt Communist Party was around the national average (indeed, Fedotoff-White notes that it “compares favourably in that respect with some of the large industrial centres.” [Op. Cit., p. 142]).

Also, given that Rees acknowledges that by December 1920 only 1,313 new recruits had arrived in the Baltic Fleet, his pondering of the composition of the Communist organisation at Kronstadt smacks more of desperation than serious analysis. By arguing that we “do not know how many more new recruits arrived in the three months before Kronstadt erupted,” Rees fails to see that this shows the irrelevance of his statistical analysis. [Op. Cit., p. 61] After all, how many of these “new recruits” would been allowed to join the Communist Party in the first place? Given that the Bolshevik membership had halved between August 1920 and March 1921, his analysis is simply pointless, a smokescreen to draw attention away from the weakness of his own case. Moreover, as evidence of changing class composition these figures are not very useful. This

abandoned you when he learned that you were led by generals like Kozlovsky. Siberia and the Ukraine support the Soviet power. Red Petrograd laughs at the miserable efforts of a handful of White Guards and Socialist Revolutionaries.” [quoted by Mett, Op. Cit., p. 162]

These lies would, of course, alienate many workers in Petrograd. Two hundred emissaries were sent from Kronstadt to distribute their demands but only a few avoided capture. The Party had brought the full weight of its propaganda machine to bear, lying about the revolt and those taking part in it. The government also placed a “careful watch” on the “trains from Petrograd to mainland points in the direction of Kronstadt to prevent any contact with the insurgents.” [Avrich, Op. Cit., p. 140 and p. 141]

However, while lying is a factor in the lack of active support, it is by no means the key one. That factor was state repression. Emma Goldman recalled the situation in Petrograd at the time:

“Extraordinary martial law was declared over the entire Petrograd Province, and none but specially authorised officials could leave the city. The Bolshevik press opened a campaign of calumny and vituperation against Kronstadt, proclaiming that the sailors and soldiers had made common cause with the ‘tsarist general Kozlovsky,’ and declaring the Kronstadt people outlawed.” [Living My Life, vol. 2, pp. 878–9]

Given what everyone knew what happened to people outlawed by the Bolsheviks, is it surprising that many workers in Petrograd (even if they knew they were being lied to) did not act? Particularly as the threat could be seen on the streets of Petrograd:

“On March 3 the Petrograd Defence Committee, now vested with absolute power throughout the entire province, took stern measures to prevent any further
of view” it is “extremely important to contrast the behaviour of Kronstadt to that of Petrograd in those critical days” for the “uprising did not attract the Petrograd workers. It repelled them. The stratification proceeded along class lines. The workers immediately felt that the Kronstadt mutineers stood on the opposite side of the barricades — and they supported the Soviet power. The political isolation of Kronstadt was the cause of its internal uncertainty and its military defeat.” (Hue and Cry Over Kronstadt, Lenin and Trotsky, Kronstadt, pp. 90–1)

First, it should be noted that Trotsky’s claims in 1937 are at odds with his opinion during the crisis. In a cable dated March 5th, 1921, to a member of the Council of Labour and Defence Trotsky insisted that “only the seizure of Kronstadt will put an end to the political crisis in Petrograd.” (quoting from Getzler, “The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, Op. Cit., p. 32) Thus, in 1921, Trotsky was well aware of the links between the Kronstadt revolt and the Petrograd strikes, seeing the destruction of the former as a means to defeating the latter. Simply put, the crushing of Kronstadt would give the rebel workers in Petrograd a clear message of what to expect if they persisted in their protests.

Second, Trotsky’s later arguments leave a lot to be desired. For example, he fails to note (to use Victor Serge’s words that the state and Communist Press “was positively berserk with lies” and “lied systematically” [Memoirs of a Revolutionary, pp. 125–6] The press and radio campaign directed against Kronstadt stated that the revolt had been organised by foreign spies and was led by ex-Tsarist generals. As an example (see section 5 for more details), on 5th March the Petrograd Defence Committee put out a call to the insurgents, inviting them to surrender:

“You are being told fairy tales when they tell you that Petrograd is with you or that the Ukraine supports you. These are impertinent lies. The last sailor in Petrograd is because they do not compare the composition of the Kronstadt Bolsheviks in 1917 to those in 1921. Given that the Kronstadt base always had a high percentage of peasants in its ranks, it follows that in 1917 the percentage of Bolsheviks of peasant origin could have been higher than normal as well. If this were the case, then Rees argument falls. Simply put, he is not comparing the appropriate figures.

It would have been very easy for Rees to inform his readers of the real facts concerning the changing composition of the Kronstadt garrison. He could have quoted Getzler’s work on this subject. As noted above, Getzler demonstrates that the crew of the battleships Petropavlovsk and Sevastopol, which formed the core of the rising, were recruited into the navy before 1917, only 6.9% having been recruited between 1918 and 1921. These figures are on the same page as the earlier quotes Rees uses but are ignored by him. Or, then again, he could have reported Samuel Farber’s summary of Getzler’s (and others) evidence. Rees rather lamely notes that Farber “does not look at the figures for the composition of the Bolsheviks” [Op. Cit., p. 62] Why should he when he has the appropriate figures for the sailors? Here is Farber’s account of the facts:

“this [Trotsky’s class composition] interpretation has failed to meet the historical test of the growing and relatively recent scholarship on the Russian Revolution … In fact, in 1921, a smaller proportion of Kronstadt sailors were of peasant social origin than was the case of the Red Army troops supporting the government … recently published data strongly suggest that the class composition of the ships and naval base had probably remained unchanged since before the Civil War. We now know that, given the war time difficulties of training new people in the technical skills required in Russia’s ultra-modern battleships, very few replacements had been sent to Kronstadt to take the place of the dead
and injured sailors. Thus, at the end of the Civil War in late 1920, no less than 93.9 per cent of the members of the crews of the Petropavlovsk and the Sevastopol ... were recruited into the navy before and during the 1917 revolutions. In fact, 59 per cent of these crews joined the navy in the years 1914–16, while only 6.8 per cent had been recruited in the years 1918–21 ... of the approximately 10,000 recruits who were supposed to be trained to replenish the Kronstadt garrison, only a few more than 1,000 had arrived by the end of 1920, and those had been stationed not in Kronstadt, but in Petrograd, where they were supposed to be trained.”

[Before Stalinism, pp. 192–3]

Yet Rees bemoans Farber for not looking at the Bolshevik membership figures! Yes, assumptions and likely conclusions drawn from assumptions are more important than hard statistical evidence.

After stating “if, for the sake of argument, we accept Sam Farber’s interpretation of the evidence” (evidence Rees refuses to inform the reader of) Rees then tries to save his case. He states Farber’s “point only has any validity if we take the statistics in isolation. But in reality this change [] in composition acted on a fleet whose ties with the peasantry had recently been strengthened in other ways. In particular, the Kronstadt sailors had recently been granted leave for the first time since the civil war. Many returned to their villages and came face to face with the condition of the countryside and the trials of the peasantry faced with food detachments.” [Op. Cit., p. 62] Yet such an argument has nothing to do with Rees original case. Let us not forget that he argued that the class composition of the garrison had changed, not that its political composition had changed. Faced with overwhelming evidence against his case, he not only does not inform his readers of it, he changes his original argument. Very impressive.

10 Why did the Petrograd workers not support Kronstadt?

For Trotskyists, the inaction of the Petrograd workers during the revolt is a significant factor in showing its “backward peasant” character. Trotsky, for example, argued that from “the class point
the prison. It fights for the true Soviet republic of the workers in which the producer himself will be owner of the products of his labour and can dispose of them as he wishes.” [quoted by Voline, Op. Cit., pp. 518–9]

So as can be seen, the Maximalists were in advance of the Bolsheviks too. They argued for soviet power, not party power, as well as workers’ self-management to replace the state capitalism of the Bolshevik party dictatorship. The political outlook of the Kronstadt rebels had not changed dramatically. Heavily influenced by anarchist and semi-anarchists in 1917, in 1921 the same political ideas came to the fore again once the sailors, soldiers and civilians had freed themselves from Bolshevik dictatorship and created the Conference of Delegates.

According to the logic of Trotsky’s argument, the Kronstadt sailors were revolutionary simply because of the actions of the Bolshevik minority, as a “revolution is ‘made’ directly by a minority. The success of a revolution is possible, however, only where this minority finds more or less support … on the part of the majority. The shift in different stages of the revolution … is directly determined by changing political relations between the minority and the majority, between the vanguard and the class.” It is this reason that necessitates “the dictatorship of the proletariat” as the level of the masses cannot be “equal” and of “extremely high development.” Trotsky argued that the “political composition of the Kronstadt Soviet reflected the composition of the garrison and the crews.” [Lenin and Trotsky, Op. Cit., p. 85, p. 92 and p. 86]

In other words, with the vanguard (the minority of Bolsheviks) gone, the majority of the Kronstadters fell back to their less developed ways. Yet, if the political composition of the revolt reflected the composition of the crews, then Trotsky’s argument suggests that this composition was remarkably unchanged for in the early months of 1918 the Bolsheviks saw their vote nearly half between late January and April 1918. Similarly, we find John Rees, in contra-

So, what of this argument? Hardly an impressive one. Let us not forget that the revolt came about in response to the wave of strikes in Petrograd, not a peasant revolt. Moreover, the demands of the revolt predominantly reflected worker demands, not peasant ones (as noted in section 4. Rees himself acknowledged that the Kronstadt demands were not reproduced by any peasant insurrection). The political aspects of these ideas reflected the political traditions of Kronstadt, which were not, in the main, Bolshevik. The sailors supported soviet power in 1917, not party power, and they again raised that demand in 1921. In other words, the political composition of the garrison was the same as in 1917 (see section 9). Rees is clearly clutching at straws.

The fact that the class composition of the sailors was similar in 1917 and in 1921 and that the bulk of the sailors at the heart of the revolt were veterans of 1917, means that Trotskyists can only fall back on their ideological definition of class. This perspective involves defining a specific “proletarian” political position (i.e. the politics of Bolshevism) and arguing that anyone who does not subscribe to that position is “petty-bourgeois” regardless of their actual position in society (i.e. their class position). As Ida Mett suggests, “[w]hen Trotsky asserts that all those supporting the government were genuinely proletarian and progressive, whereas all others represented the peasant counterrevolution, we have a right to ask of him that he present us with a serious factual analysis in support of his contention.” [Op. Cit., p. 195]

Given the political aspects of the Kronstadt demands we can safely argue that even if the rebellion had been the work of recent recruits they obviously had been influenced by the veteran sailors who remained. They, like the peasant-workers of 1905 and 1917, would have been able to raise their own political demands and ideas while, at the same time, listening to those among them with more political experience. Unsurprisingly, this is what did happen.

Rees, while studiously ignoring the hard data provided by Gelzter and repeated by Farber, comments that while we did
not know the composition of the sailors, we did “know about the composition of some of the other units based at Kronstadt, like the 2,5000 Ukrainians of the 160th Rifle Regiment, recruited from areas particularly friendly to the Makhno guerrillas and with less than 2 percent of Bolsheviks in its ranks.” [Op. Cit., p. 61] In other words, we know the origin of one other unit at Kronstadt, not the class “composition” of “some of the other units” there. Ignoring this, there are a few issues with Rees’s use of this fact. First, Rees gained his information on the 160th Rifle Regiment from Fedotoff-White’s work but does not think it important to note that he also indicated that Communists numbered less than 2 per cent of metal-workers in Petrograd and only 4 per cent of 2,200 employed in metal works in Moscow. [Fedotoff-White, Op. Cit., p. 132] As such the low figure for Communists in the 160th Rifle Regiment does not tell us much about its class composition. Second, as Fedotoff-White notes, while “the soldiers were also disaffected and had no love of the Communists and the commissars,” they were “unable to formulate their grievances clearly and delineate the issues at stake … They did not have it in them to formulate a plan of action. All that was done at Kronstadt was the work of the bluejackets [the sailors], who were the backbone of the movement.” If, as Rees argues, that new recruits explain the uprising, then how can he explain the differences between the army and navy? He cannot. The difference can be explained only in terms of what Rees is at pains to deny, namely the existence and influence of sailors who had been there since 1917. As Fedotoff-White speculates, “the younger element among the seamen” would “easily [fall] under the spell of the … older men they served with on board ships” and of the “large number of old-ex-sea men, employed in the industrial enterprises of Kronstadt.” He notes that “a good many” of the rebels “had had ample experience in organisational and political work since 1917. A number had long-standing associations with Anarchists and the Socialist Revolutionaries of the Left.” Thus the “survival of the libertarian pattern of 1917 … made it possible for the bluejackets not
This can be quickly seen from reading both the Petropavlovsk resolution and the Kronstadt newspaper Izvestiia (see No Gods, No Masters, vol. 2, pp. 183–204). The political continuity is striking between 1917 and 1921, as can be seen from the article “So-Called Socialism” published in its last issue on March 16th:

“In making the October Revolution, the sailors and Red soldiers, the workers and peasants, spilled their blood for the power of the Soviets, for the building of a workers’ republic.

“The Communist Party paid close attention to the aspirations of the masses. Having inscribed on its banners attractive slogans which aroused the enthusiasm of the workers, it swept them into the struggle and promised them that it would lead them into the beautiful kingdom of socialism which only the Bolsheviks knew how to build ... It seemed as if the time of free labour in the fields, factories and workshops had come. It seemed as if power were going to pass into the hands of the workers ... Then, feeling themselves strong enough, the Communists progressively eliminated from power first the socialists of other tendencies, then they pushed workers and peasants out of many state posts, while continuing to govern in their name.

“In this way the Communists have brought in the rule of the commissars, with all the despotism of personal power. Against all reason and contrary to the will of the workers, they then began stubbornly to build a state socialism with slaves, instead of building a society based on free labour ... the Bolsheviks established the nationalisation of works and factories. From a slave of the capitalist the worker was transformed into a slave of state enterprises. Soon this no longer sufficed, and they planned the application of the Taylor system.

Rees, needless to say, ignores all this and how it shows the political and personnel continuity of the Kronstadt rebellion. Ultimately, though, the assumption that the sailors could not raise revolutionary political demands if they were “raw recruits” only makes sense if we subscribe to Lenin’s dictum that the working class, by its own efforts, can only reach a trade union consciousness (i.e. that toiling people cannot liberate themselves). The bulk of the sailors at the start of 1921 had been there since 1917 but even if this were not the case and we assume that a majority of the sailors at Kronstadt were recent recruits, does this invalidate the rebellion? Of course not. After all, the Red sailors of 1917 were once raw recruits. They had become politicised over time by debate, discussion and struggle. So had the workers in Petrograd and elsewhere. Would Leninists have denounced strikers in 1905 or 1917 if it were discovered that most of them were recent peasant arrivals in the city? Of course not — they do so with regards to Kronstadt only because the rebels in question are facing Lenin and Trotsky.

Ironically, the Bolsheviks were simply repeating old Menshevik arguments once raised against them. Between 1910 and 1914, the industrial workforce in Russia grew from 1,793,000 workers to 2,400,000. At the same time, the influence of the Bolsheviks grew at Menshevik expense which the latter considered as “consequence of the changes that were taking place in the character of urban Russia” with peasants joining the labour force. [“Introduction”, The Mensheviks in the Russian Revolution, Abraham Archer (ed.), p. 24] The Mensheviks argued that the Bolsheviks gained their influence from such worker-peasant industrial “raw recruits” and not from the genuine working class. [Orlando Figes, A People’s Tragedy, p. 830] As Robert Service noted, “Menshevik critics were fond of carping that most Bolshevik newcomers were young lads fresh from the
villages and wanting in long experience of industrial life and political activity. It was not completely unknown for Bolshevik spokesmen to come close to admitting this.” [The Bolshevik Party in Revolution, p. 44] It was the industrial “raw recruits” who took part in the 1905 and 1917 revolutions, helping to raise and formulate demands as well as organising soviets, strikes and demonstrations and raising slogans which were to the left of the Bolsheviks. Does this process somehow grind to a halt when these “raw recruits” oppose the vanguard party? Of course not.

In short, this Trotsky inspired sociology has been debunked — and misses the point. Sadly, we have to address it in order to refute common-place Leninist arguments against Kronstadt and expose how willing they are to selectively quote from the sources they use. As we show in the next section, the political composition of the Kronstadt rebels, like their class composition, was basically unchanged in 1921 when compared to that which pre-dominated in 1917.

9 Was Kronstadt different politically in 1921?

As we indicated in the last section, over 90% of the Kronstadt sailors on the two battleships which were the catalyst for the rebellion for whom years of enlistment are known had been there since 1917. However, given that most Leninists mean “support the party” by the term “class consciousness,” it is useful to compare the political perspectives of Kronstadt in 1917 to that raised in the 1921 revolt. As will soon become clear, the political ideas expressed in 1921 were essentially similar to those popular in 1917. This similarly also proves the continuity between the Red sailors of 1917 and the rebels of 1921.

Kronstadt in 1917 was never dominated by the Bolsheviks, they were always a minority and a “radical populist coalition of Maximalists and Left SRs held sway, albeit precariously, within Kronstadt and its Soviet” while “externally Kronstadt was a loyal stronghold and the Helsingfors party organisation in 1917 recalled that the Anarchist-Communists had great influence in Kronstadt. Moreover, according to historian Alexander Rabinowitch, they had an “undeniable capacity to influence the course of events” and he speaks of “the influential Anarcho-Syndicalist Communists [of Kronstadt] under Iarchuk.” Indeed, anarchists “played a significant role in starting the July uprising” in 1917. [Prelude to Revolution, p. 62, p. 63, p. 187 and p. 138] This confirms Paul Avrich’s comments that the “influence of the anarchists … had always been strong within the fleet” and “the spirit of anarchism” had been “powerful in Kronstadt in 1917” (it “had by no means dissipated” in 1921). [Avrich, Op. Cit., p. 168 and p. 169]

A similar analysis of the Maximalists would produce the same results for Trotsky’s claims. Paul Avrich provides a useful summary of their politics. He notes the Maximalists occupied “a place in the revolutionary spectrum between the Left SR’s and the anarchists while sharing elements of both.” They “preached a doctrine of total revolution” and called for a “‘toilers’ soviet republic’ founded on freely elected soviets, with a minimum of central state authority. Politically, this was identical with the objective of the Kronstadters [in 1921], and ‘Power to the soviets but not the parties’ had originally been a Maximalist rallying-cry.” Economically, the parallels “are no less striking.” They denounced grain requisitioning and demanded that “all the land be turned over to the peasants.” For industry they rejected the Bolshevik theory and practice of “workers’ control” over bourgeois administrators in favour of the “social organisation of production and its systematic direction by representatives of the toiling people.” Opposed to nationalisation and centralised state management, they argued for socialisation and workers’ self-management of production. Little wonder he states that the “political group closest to the rebels in temperament and outlook were the SR Maximalists” and “[i]n nearly every important point the Kronstadt program, as set forth in the rebel Izvestiia, coincided with that of the Maximalists.” [Paul Avrich, Op. Cit., pp. 171–2]
“I am an anarchist because contemporary society is divided into two opposing classes: the impoverished and dispossessed workers and peasants ... and the rich men, kings and presidents ...”

“I am an anarchist because I scorn and detest all authority, since all authority is founded on injustice, exploitation and compulsion over the human personality. Authority dehumanises the individual and makes him a slave.

“I am an opponent of private property when it is held by individual capitalist parasites, for private property is theft ...”

“I am an anarchist because I believe only in the creative powers and independence of a united proletariat and not of the leaders of political parties of various kinds.

“I am an anarchist because I believe that the present struggle between the classes will end only when the toiling masses, organised as a class, gain their true interests and conquer, by means of a violent social revolution, all the riches of the earth ... having abolished all institutions of government and authority, the oppressed class must proclaim a society of free producers ... The popular masses themselves will conduct their affairs on equal and communal lines in free communities.” [N. Petrov, quoted by Paul Avrich, *Anarchists in the Russian Revolution*, pp. 35–6]

Very “petty bourgeois”! Of course Trotsky could argue that this represented the minority of “real revolutionaries,” the “elements most closely linked to the Bolsheviks” among the anarchists, but such an analysis cannot be taken seriously considering the influence of the anarchists in Kronstadt. [Lenin and Trotsky, *Op. Cit.*, p. 86] For example, a member of the Petrograd Committee of the Bolshevik regime”. [Getzler, *Kronstadt 1917–1921*, p. 179] This confirms Trotsky’s recollections from 1938 that “the Bolsheviks constituted less than one-half of the Kronstadt Soviet. The majority consisted of SRs and anarchists.” [“Hue and Cry Over Kronstadt”, Lenin and Trotsky, *Kronstadt*, p. 86] Indeed, in 1917 Trotsky even stated that the Kronstadters “are anarchists.” [quoted by Getzler, *Op. Cit.*, p. 98]

Kronstadt was in favour of Soviet power and, unsurprisingly, supported those parties which claimed to support that goal, which explains its initial support for the Bolshevik regime. Yet internally, the political climate in Kronstadt was “very close to the politics of the Socialist Revolutionary Maximalists, a left-wing split-off from the SR Party, politically located somewhere between the Left SRs and the Anarchists.” [Farber, *Before Stalinism*, p. 194] In Kronstadt this group was led by Anatolii Lamanov and “it rejected party factionalism” and “stood for pure sovietism”. They sought an immediate agrarian and urban social revolution, calling for the “socialisation of power, of the land and of the factories” to be organised by a federation of soviets based on direct elections and instant recall, as a first step towards socialism. [Getzler, *Op. Cit.*, p. 135] The similarities with anarchism are clear.

At the time of the October revolution, the Kronstadt soviet did not have a Bolshevik majority. The soviet elections in August saw the Bolsheviks receive 96 seats, as did the Non-Party grouping, the Left-SRs receiving 73, the Menshevik Internationalists 13 and anarchists 7. Kronstadt’s delegates to the third All-Russian Congress of Soviets were a Left-SR (157 votes), a SR-Maximalist (147 votes) and a Bolshevik (109 votes). It was only in the January elections in 1918 that the Bolsheviks improved their position, gaining 139 deputies compared to their previous 96. In spite of securing their highest ever vote during the era of multi-party soviets the Bolsheviks only gained 46 percent of seats in the soviet. Also elected at this time were 64 SRs (21 percent), 56 Maximalists (19 percent), 21 non-party delegates (7 percent), 15 Anarchists (5 percent) and 6
Mensheviks (2 percent). The soviet elected a Left SR as its chairman and in March it elected its three delegates to the Fourth Congress of Soviets, with the Bolshevik delegate receiving the lowest vote (behind a Maximalist and an anarchist with 124, 95 and 79 votes respectively). By the April 1918 elections, as in most of Russia, the Bolsheviks found their support had decreased. Only 53 Bolsheviks were elected (29 per cent) as compared to 41 SR Maximalists (22 percent), 39 Left SRs (21 percent), 14 Menshevik Internationalists (8 percent), 10 Anarchists (5 percent) and 24 non-party delegates (13 percent). Indeed, Bolshevik influence at Kronstadt was so weak that on April 18th, the Kronstadt soviet denounced the Bolsheviks attack against the anarchists in Moscow, April 12th by a vote of 81 to 57. The “Bolshevisation” of Kronstadt “and the destruction of its multi-party democracy was not due to internal developments and local Bolshevik strength, but decreed from outside and imposed by force.” [Getzler, Op. Cit., p. 134, pp. 182–4 and p. 186]

Thus the dominant political perspective in 1917 was one of “sovietism” — namely, all power to the soviets and not to parties. This was the main demand of the 1921 uprising. Politically, Kronstadt had not changed: “What is impressive is that Kronstadt seems to have changed so little throughout the period from 1905 to 1921. Moreover, the argument of ideological degeneration was used against the sailors as early as the mutiny of October 1918, when it was quite implausible”. [Nicolas Walter, The Anarchist Past and Other Essays, p. 138]

In addition to the soviet, there was the “general meetings in Anchor square, which were held nearly every day.” [Avrich, Op. Cit., p. 57] The Kronstadt Soviet was itself constantly pressurised by these mass meetings. For example, on 25 May 1917, a large crowd, inspired by Bolshevik and anarchist speakers, marched to the Naval Assembly and forced the leaders of the Soviet to rescind their agreement with the more moderate Petrograd Soviet. In February 1921, the Kronstadt rebels met in Anchor square to pass the Petropavlovsk resolution — just as happened before in 1917. And as in 1917, they elected a Conference of Delegates to manage the affairs of the Kronstadt. In other words, the sailors re-introduced exactly the same political forms they practised in 1917.

These facts suggest that any claims that the majority of sailors, soldiers and workers in Kronstadt had changed politically are unfounded. This, ironically enough, is confirmed by Trotsky.

Trotsky’s memory (which, after all, seems to be the basis of most of his and his followers’ arguments) did play tricks on him. He states that there “were no Mensheviks at all in Kronstadt.” As for the anarchists, “most” of them “represented the city petty bourgeoisie and stood at a lower level than the SRs.” The Left SRs “based themselves on the peasant part of the fleet and of the shore garrison.” [Lenin and Trotsky, Op. Cit., p. 86] So we have Trotsky arguing that the majority of the “pride and glory” of the revolution in 1917 voted for groups of a “lower level” than the Bolsheviks (and quite a few for a party, the Mensheviks, Trotsky said did not exist there).

Looking at the politics of these groups, we discover some strange inconsistencies which undermine the validity of Trotsky’s claims. For example, in the beginning of 1918, “the working population of Kronstadt, after debating the subject at many meetings, decided to proceed to socialise dwelling places ... A final monster meeting definitely instructed several members of the Soviet — Left Social-Revolutionaries and Anarcho-Syndicalists — to raise the question at the next [soviet] plenary session.” While the Bolshevik delegates tried to postpone the decision (arguing in the soviet that the decision was too important and should be decided by the central government) the “Left Social-Revolutionaries, Maximalists and Anarcho-Syndicalists asked for an immediate discussion and carried the vote.” [Voline, The Unknown Revolution, pp. 460–1] This fits in exactly with the communist-anarchist programme of socialisation but it is hardly an expression of representatives of “the city petty bourgeoisie.” Let us quote one:
“objective factors” will face every revolution. This means to use these factors to justify Bolshevik authoritarianism simply results in proving that Bolshevism is simply non-viable or that a liberatory social revolution is, in fact, impossible (and, as a consequence, genuine socialism).

There are, of course, other reasons why the Leninist critique of the anarchist position is false. In terms of theory, the Leninist position is the crudest form of economic determinism. As we discuss in section 7, ideas do matter and, as Marx himself stressed, can play a key in how a social process develops. In terms of the empirical evidence against the Trotskyist explanation, as we indicate in section 3, soviet democracy and workers’ power in the workplace was not undermined by the civil war. Rather, the process had begun before the civil war started and, equally significantly, continued after its end in November 1920.

Third, in terms of the economic and social backwardness of Russia, the similar (if not worse) backwardness of Germany in 1847 did not stop Marx arguing that socialist central planning was viable — indeed, in the Philosophy of Philosophy he berated Ricardian Socialist John Bray for suggesting using labour-notes “for a period of transition” to communism while in the Communist Manifesto he asserted that “the bourgeois revolution in Germany will be but the prelude to an immediately following proletarian revolution.” [Marx-Engels Collected Works, vo. 6, p. 142 and p. 519] Moreover, the notion that Russia was only ready for a bourgeois revolution was held by the Mensheviks (reflecting the mainstream position of Marxist social-democracy) and accordingly denounced by Leninists, then and now. So being predominantly a peasant society with little, if any, large-scale industry did not stop Marx issuing a very public call for communist revolution in Germany in 1847 (indeed, this was the social situation across whole of Continental Europe during Marx’s lifetime and for many decades afterwards).

Nor does the then backwardness of Russia hinder the adoption of various aspects of Bolshevism — such as vanguardism, the ne-

So, as far as “material reality” goes, it is clear that it is Stack who ignores it, not anarchists nor the Kronstadt rebels. Both recognised that the country was in dire straits and that a huge effort was required for reconstruction. The material basis at the time offered two possibilities for reconstruction — either from above or from...
below. Such a reconstruction could only be socialist in nature if it involved the direct participation of the working masses in determining what was needed and how to do it. In other words, the process had to start from below and no central committee utilising a fraction of the creative powers of the country could achieve it. Such a bureaucratic, top-down reconstruction would rebuild the society in a way which benefited a few. Which, of course, was what happened.

What is surprising is that any self-proclaimed socialist could think otherwise. In a country with no workers’ democracy, where the masses do not have even limited control over those in power, where all power and rights are held by the administration, where workers can do nothing on their own initiative, it is naive in the extreme to believe that any social reconstruction will not reflect the interests of the ruling bureaucracy. To suggest so, as Stack does, means ignoring the class reality of the situation in favour of wishful thinking over the possibility of benevolent dictatorship. It means ignoring that by crushing Kronstadt, the Bolsheviks not only crushed the Third Revolution but also paved the way for Stalinism.

Ultimately, Stack’s arguments fail to convince. As noted, his ideological gurus clearly argued that revolution without civil war and economic exhaustion was impossible. Sadly, the means to mitigate the problems of Civil War and economic crisis (namely workers’ self-management and control) inevitably came into conflict with party power and a vision of socialism premised on the efficiency of centralisation and could not be encouraged. If Bolshevism cannot meet the inevitable problems of revolution and maintain the principles it pays lip-service to (i.e. soviet democracy and workers’ control) then it clearly does not work and should be avoided. This argument, in short, represents the bankruptcy of Bolshevist ideology rather than a serious argument against the Kronstadt revolt.

These opinions were, as can be seen, to be expected from revolutionary anarchists schooled in the ideas of Bakunin and Kropotkin. Clearly, then, far from ignoring the “objective factors” facing the Bolsheviks, anarchists have based their politics around them. We have always argued that a social revolution would face isolation, economic disruption and civil war and have, for this reason, stressed the importance of mass participation (and the appropriate federalist structures required to foster it) in order to overcome them. As such, when Leninists argue that these inevitable “objective factors” caused the degeneration of Bolshevism, anarchists simply reply that if it cannot handle the inevitable then Bolshevism should be avoided: just as we would avoid a submarine which worked perfectly well until it was placed in the sea.

Moreover, what is to be made of this Leninist argument against anarchism? In fact, given the logic of their claims we have to draw the conclusion that the Leninists seem to think a revolution could happen without civil war and economic disruption. As such it suggests that the Leninists have the “utopian” politics in this matter. After all, if they argue that civil war is inevitable then how can they blame the degeneration of the revolution on it? Simply put, if Bolshevism cannot handle the inevitable it should be avoided at all costs.

Ironically, as indicated in the next section, we can find ample arguments to refute the Trotskyist case against the anarchist analysis in the works of leading Bolsheviks like Lenin, Trotsky and Bukharin. Indeed, their arguments provide a striking confirmation of the anarchist position as they, like Kropotkin, stress that difficult
of the problems it, like any revolution, would face. Their critique of Bolshevism was not based on decrying what they considered as inevitable, but rather the (counter-productive) Bolshevik response. Unsurprisingly, this extremely realistic perspective can be found in their later works. Berkman, for example, stressed that “when the social revolution had become thoroughly organised and production is functioning normally there will be enough for everybody. But in the first stages of the revolution, during the process of re-construction, we must take care to supply the people the best we can, and equally, which means rationing.” This was because the “first effect of the revolution is reduced production.” This would be initially due to the general strike which is its “starting point.” However, “[w]hen the social revolution begins in any land, its foreign commerce stops: the importation of raw materials and finished products is suspended. The country may even be blockaded by the bourgeois governments.” In addition, he thought it important not to suppress “small scale industries” as they would be essential when “a country in revolution is attacked by foreign governments, when it is blockaded and deprived of imports, when its large-scale industries threaten to break down or the railways do break down.” Rather than assume the problem away, it was essential that to counteract isolation workers must understand “that their cause is international” and that “the organisation of labour” must develop “beyond national boundaries.” However, “the probability is not to be discounted that the revolution may break out in one country sooner than in another” and “in such a case it would become imperative … not to wait for possible aid from outside, but immediately to exert all her energies to help herself supply the most essential needs of her people by her own efforts.” [What is Anarchism?, p. 215, p. 223 p. 228, p. 229 and p. 227]

Emma Goldman, likewise, noted that it was “a tragic fact that all revolutions have sprung from the loins of war. Instead of translating the revolution into social gains the people have usually been forced to defend themselves against warring parties.” “It seems,” she noted, “nothing great is born without pain and travail” as well as “the im-

13 Was there a real alternative to Kronstadt’s “Third Revolution”?

Another Trotskyist argument against Kronstadt and in favour of Bolshevik repression is related to the country was exhausted argument we discussed in the last section. It finds its clearest expression in Victor Serge’s argument:

“After many hesitations, and with unutterable anguish, my Communist friends and I finally declared ourselves on the side of the Party. This is why. Kronstadt had right on its side. Kronstadt was the beginning of a fresh, liberating revolution for popular democracy: ‘The Third Revolution!’ it was called by certain anarchists whose heads were stuffed with infantile illusions. However, the country was exhausted, and production practically at a standstill; there was no reserves of any kind, not even reserves of stamina in the hearts of the masses. The working-class elite that had been moulded in the struggle against the old regime was literally decimated. The Party, swollen by the influx of power-seekers, inspired little confidence … Soviet democracy lacked leadership, institutions and inspiration; at its back there were only masses of starving and desperate men.

“The popular counter-revolution translated the demand for freely-elected soviets into one for ‘Soviets without Communists.’ If the Bolshevik dictatorship fell, it was only a short step to chaos, and through chaos to a peasant rising, the massacre of the Communists, the return of the emigres, and in the end, through the sheer force of events, another dictatorship, this time anti-proletarian … In these circumstances it was the Party’s duty to make concessions, recognising
that the economic regime was intolerable, but not to abdicate power.” [Memoirs of a Revolutionary, pp. 128–9]

Serge is at least being honest here and not suggesting that it was a White Guard plot or a product of backward peasant recruits. Still, he supported the Bolsheviks, considering them as the only possible means of defending the revolution. Some of the more sophisticated modern day Leninists follow this line of reasoning and quote Trotsky somewhat out of context to proclaim that crushing the revolt was “a tragic necessity”. [Lenin and Trotsky, Kronstadt, p. 98] They want us to believe that the Bolsheviks were defending the remaining gains of the revolution and ensuring that no counter-revolution took place indirectly by allowing the Russian workers soviet democracy. The hope was that the revolution could survive until it spread internationally. As John Rees put it: “But ultimately, without a revival of struggle in Russia or successful revolution elsewhere, the [Left] Opposition was doomed to failure. That, however, could not be known in advance.” [Op. Cit., p. 69] This is echoed in different ways by other Leninists — the Bolsheviks had to crush Kronstadt to secure the revolution until it could spread to other countries, particularly advanced industrial nations. The isolation of the revolution ensured the victory of the bureaucracy and Stalin.

Let us accept Serge’s argument and those who, like Rees, echo it. This means that the only alternative to the “Third Revolution” would have been self-reform of the party dictatorship and, therefore, of the soviet state. Such an attempt was made after 1923 by the Left Opposition headed by Trotsky. Given the logic of such arguments, this is the only option left for Leninists. How viable was this alternative? Could the soviet dictatorship reform itself? Was soviet democracy more of a danger than the uncontrolled dictatorship of a party within a state marked by already serious levels of corruption, bureaucracy and despotism? History provides the answer with the rise of Stalin.

As for self-defence, he reproached the authors of classic syndicalist utopia How we shall bring about the Revolution for “considerably attenuating the resistance that the Social Revolution will probably meet with on its way.” He stressed that the “check of the attempt at Revolution in Russia [in 1905] has shown us all the danger that may follow from an illusion of this kind.” Elsewhere he argued that “[i]f armed brigands attack a people, is not that same people, armed with good weapons, the surest rampart to oppose to the foreign aggressor?” He recognised that “a society in which the workers would have a dominant voice” would require a revolution to create, “a revolution far more profound than any of the revolutions which history had on record.” In such a rebellion, however, “the workers would have against them, not the rotten generation of aristocrats against whom the French peasants and republicans had to fight in the [eighteenth] century — and even that fight was a desperate one — but the far more powerful, intellectually and physically, middle-classes, which have at their service all the potent machinery of the modern State.” Thus “each time that such a period of accelerated evolution and reconstruction on a grand scale begins, civil war is liable to break out on a small or large scale.” [Direct Struggle Against Capital, p. 561, p. 121 and pp. 495–6]

It must, therefore, be stressed that the very “objective factors” supporters of Bolshevism use to justify the actions of Lenin and Trotsky were correctly predicted by anarchists decades before hand. Indeed, rather than ignore them anarchists like Kropotkin based their political and social ideas on these difficulties. As such, it seems ironic for Leninists to attack anarchists for allegedly ignoring these factors. It is even more ironic as these very same Leninists are meant to know that any revolution will involve these exact same “objective factors,” something that Lenin and other leading Bolsheviks eventually acknowledged (see the next section).

Therefore, as noted above, when anarchists like Emma Goldman and Alexander Berkman arrived in Russia they were aware
to supply the wants of millions will thus start up at once in all its immensity. And the necessity of finding an immediate solution for it is the reason we consider that a step in the direction of [libertarian] Communism will be imposed on the revolted society — not in the future, but as soon as it applies its crowbar to the first stones of the capitalist edifice.” [Act for Yourselves, pp. 57–9]

This perspective was at the core of Kropotkin’s politics — he was an anarchist not because he thought the revolution would be easy but because he recognised it would be difficult. His classic work The Conquest of Bread was based on this clear understanding of the nature of a social revolution and the objective problems it will face. As he put it, while a “political revolution can be accomplished without shaking the foundations of industry” a revolution “where the people lay hands upon property will inevitably paralyse exchange and production ... This point cannot be too much insisted upon; the reorganisation of industry on a new basis ... cannot be accomplished in a few days.” Indeed, he considered it essential to “show how tremendous this problem is.” [The Conquest of Bread, pp. 72–3]

He pointed to the experience of the French Revolution as evidence for this, as it showed, “one of the great difficulties in every Revolution is the feeding of the large towns.” This was because the “large towns of modern times are centres of various industries that are developed chiefly for the sake of the rich or for the export trade” and these “two branches fail whenever any crisis occurs, and the question then arises of how these great urban agglomerations are to be fed.” This crisis, rather than making revolution impossible, spurred the creation of what Kropotkin terms “the communist movement” in which “the Parisian proletariat had already formed a conception of its class interests and had found men to express them well.” [The Great French Revolution, vol. II, p. 457 and p. 504]

However, given how widespread this infantile delusion is within the Leninists, more needs to be said. From a libertarian perspective, there are three main problems with this argument. First, it ignores the reality of the Bolshevik regime. Second, it ignores the politics of the Left Opposition. Third, it ignores how Bolshevik ideology would have impacted on any other revolution. We will discuss each in turn after making an obvious point — libertarian socialists who defend the Kronstadt revolt and oppose the actions of the Bolsheviks are not foolish enough to argue that Kronstadt’s “Third Revolution” would have definitely succeeded as every revolution is a gamble and may fail. Ante Ciliga put it well:

“Let us consider, finally, one last accusation which is commonly circulated: that action such as that at Kronstadt could have indirectly let loose the forces of the counter-revolution. It is possible indeed that even by placing itself on a footing of workers’ democracy the revolution might have been overthrown; but what is certain is that it has perished, and that it has perished on account of the policy of its leaders. The repression of Kronstadt, the suppression of the democracy of workers and soviets by the Russian Communist party, the elimination of the proletariat from the management of industry, and the introduction of the NEP, already signified the death of the Revolution.” [“The Kronstadt Revolt”, Op. Cit., p. 335]

No revolution is guaranteed to succeed. The same with Kronstadt’s “Third Revolution.” Its call for soviet democracy may have led to a return of the Whites, that is possible just as it was possible in 1917. One thing is sure, by maintaining the Bolshevik dictatorship the Russian Revolution was crushed and (Stalinist) counter-revolution ensued. As such, we must always remember what the alternatives were: “Were there not real dangers in the democratic
way? Was there no reason to fear reformist influences in the soviets, if democracy had been given free rein? We accept that this was a real danger. But it was no more of a danger than what inevitably followed the uncontrolled dictatorship of a single party”. [Mett, Op. Cit., p. 204]

After all, the most obvious objection is what gains, exactly? The only gains that remained were Bolshevik party power and nationalised industry — both of which excluded the real gains of the Russian Revolution from a socialist perspective (namely soviet power, the right to independent unions and to strike, freedom of assembly, association and speech for working people, the beginnings of workers’ self-management of production and so on). Indeed, both “gains” were the basis for the Stalinist bureaucracy’s power.

Unfortunately for the Left Opposition, the bureaucracy had gained experience in repressing working class struggles since early 1918 — most obviously in breaking the wave of strikes in 1921 and crushing the Kronstadt rebellion itself. As such, it is incredulous to suggest as Rees does that “the regime was left stranded, the well-head of renewal and thorough reform — the activity of the workers — had dried to a trickle ... To appeal outside the machine, as the Workers’ Opposition had wanted, was impossible. This is the tragedy of Lenin’s last fight and of the Left Opposition. They knew the problem but the means at their disposal was not equal to the task. Hence the paucity of the measures they advocated: self reform of the bureaucracy.” [Op. Cit., p. 68] The “well-head” of workers’ struggle did not dry-up by some natural process — it was deliberately blocked by the Bolshevik regime itself:

“After the launch of the NEP, the state’s strategy in dealing with strikes in the nationalised sector remained fairly uniform throughout the 1920s. Its priority was to compel workers to return to their jobs as quickly as possible for which the full forces of management, Party, unions, and state would be mobilised as required ... the nevertheless the same consequence: an immediate slackening of individual enterprise all over Europe. Capital will conceal itself, and hundreds of capitalists will prefer to abandon their undertakings and go to watering-places rather than abandon their unfixed capital in industrial production. And we know how a restriction of production in any one branch of industry affects many others, and these in turn spread wider and wider the area of depression.

“Already, at this moment, millions of those who have created all riches suffer from want of what must be considered necessaries for the life of a civilised man... Let the slightest commotion be felt in the industrial world, and it will take the shape of a general stoppage of work. Let the first attempt at expropriation be made, and the capitalist production of our days will at once come to a stop, and millions and millions of ‘unemployed’ will join the ranks of those who are already unemployed now.

“More than that ... The very first advance towards a Socialist society will imply a thorough reorganisation of industry as to what we have to produce. Socialism implies ... a transformation of industry so that it may be adapted to the needs of the customer, not those of the profit-maker. Many a branch of industry must disappear, or limits its production; many a new one must develop. We are now producing a great deal for export. But the export trade will be the first to be reduced as soon as attempts at Social Revolution are made anywhere in Europe ... All that can be, and will be reorganised in time — not by the State, of course (why, then, not say by Providence?), but by the workers themselves. But, in the meantime, the worker ... cannot wait for the gradual reorganisation of industry ... The great problem of how
However, as the claim that anarchists ignore the “objective circumstances” facing the Bolsheviks is relatively common, it is important to refute it once and for all — even if it means repeating some of arguments made in section H.6.1.

Anarchists take it for granted that, to quote Bakunin, revolutions “are not child’s play” and that they mean “war, and that implies the destruction of men and things.” The “Social Revolution must put an end to the old system of organisation based upon violence, giving full liberty to the masses, groups, communes, and associations, and likewise to individuals themselves, and destroying once and for all the historic cause of all violences, the power and existence of the State.” This meant a revolution would be “spontaneous, chaotic, and ruthless, always presupposes a vast destruction of property.” [The Political Philosophy of Bakunin, p. 372, p. 373, p. 380] He took it for granted that counter-revolution would exist, arguing that it was necessary to “constitute the federation of insurgent associations, communes and provinces ... to organise a revolutionary force capable of defeating reaction” and “for the purpose of self-defence.” [Micheal Bakunin: Selected Writings, p. 171]

It would, of course, be strange if this necessity for defence and reconstruction would have little impact on the economic conditions in the revolutionised society. The expropriation of the means of production and the land by a free federation of workers’ associations would have an impact on the economy. Kropotkin built upon Bakunin’s arguments, stressing that a social revolution would, by necessity, involve major difficulties and harsh objective circumstances. It is worth quoting one of his many discussions of this at length:

“Suppose we have entered a revolutionary period, with or without civil war — it does not matter, — a period when old institutions are falling into ruins and new ones are growing in their place. The movement may be limited to one State, or spread over the world, — it will have

Bolshevik leadership ... feared a repeat of the escalation and politicisation of worker discontent that had marked the end of War Communism ... Hence the general strategy employed by the state when faced by a strike was to attempt to pacify the bulk of striking workers, while seeking to ‘isolate’ or eliminate instigators and organisers. In cases where these measures failed ... a re-registration of the workforce, closure of the factory, or mass dismissals would be announced ... From the start, the CheKa/OGPU played a leading role in eradicating strikes, making arrests, bringing in its special troops to deal with unrest, and using its intelligence network to monitor the shopfloor and identify activists” [Andrew Pospielovsky, “Strikes during the NEP”, pp. 1–34, Revolutionary Russia, Vol. 10, No. 1, pp. 17–8]

These techniques had all been used and perfected from 1918 onwards. Thus the strike wave of 1923 was repressed by the same methods as those in 1921 with the name of the secret police being the only difference (from Cheka to GPU):

“Trade unions, reluctant to disturb the industrial revival, refused to press claims. Finally, ‘wild’ strikes broke out in many factories, spread, and were accompanied by violent explosions of discontent ... The threat of a general strike was in the air, and the movement seemed on the point of turning into a political revolt. Not since the Kronstadt rising had there been so much tension in the working class and so much alarm in ruling circle ... the remnants of the anti-Bolshevik parties ... [were] thoroughly suppressed [and] had been inactive ... the G.P.U arrested [the Workers’ Group] ... where there is much inflammable material a few sparks may produce a conflagration. The party leaders sought to stamp out
the sparks. They determined to suppress the Workers’ Group and the Workers’ Truth … Trotsky … had no sympathy with the crude and anarchic tub-thumping. Nor was he inclined to countenance industrial unrest”.

[Isaac Deutscher, The Prophet Unarmed, pp. 88–9]

The “leaders of the 1923 opposition did … nothing to protest at the repression of dissidents … Trotsky, in the very letters to the politburo in which he fired his first broadsides against the ‘unhealthy regime’ and lack of internal party democracy, supported repressive action against the far left.” Indeed, he “welcomed an instruction by Dzerzhinskii to party members immediately to report ‘any groupings within the party’, i.e. the Workers Group and Workers Truth, not only to the C[entral] C[ommittee] but also to the G.P.U., and emphasized that making such reports was ‘the elementary duty of every party member’.” [Simon Pirani, The Russian revolution in retreat, 1920–24, p. 215] Trotsky was clear that “it is obvious that there can be no toleration of the formation of groupings [within the party] whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers’ Truth and Workers’ Group.” [Challenge of the Left Opposition (1923–25), p. 408] By “dictatorship of the proletariat,” Trotsky meant the dictatorship of the party as both these opposition groups — unlike the Left Opposition — advocated genuine soviet democracy.

Rees suggests that the Stalinist bureaucracy could betray the revolution without “an armed counter-revolutionary seizure of power” and so “no martial law, no curfew or street battles” because of “the atomisation of the working class.” [Op. Cit., p. 69] However, the atomisation was a product of the armed counter-revolutionary activities of Lenin and Trotsky after 1918 which reached their culmination when in 1921 they broke the strikes in Petrograd (and elsewhere) by means of martial law and curfew and crushed the sailor rebellion by battles in the streets of Kronstadt. In 1927–8, economic matters, it comes as no surprise that its bureaucracy likewise grew — at least to non-Trotskyists. As such, rather than express the “most simplistic kind of philosophical idealism”, the anarchist critique is rooted in a clear materialist analysis of the effects of certain organisational structures and why these develop. Insofar as ideas played a role in the fate of Russian Revolution, they are reflected in Bolshevik preferences for centralised structures and the social relationships these produced when they were built — as we discuss elsewhere (see section H.6.2 and its related appendix, “How did Bolshevik ideology contribute to the failure of the Revolution?”). Rather than Trotsky’s attempts to understand a degeneration he failed to recognise until 1923, anarchists saw the signs when they first arose precisely due to our theory (indeed, Trotsky’s ability to recognise and explain Stalinism could only be hindered by him being one of the main architects of the degeneration).

Second, according to anarchist theory, the “objective factors” facing the Bolsheviks are to be expected in any revolution. Indeed, the likes of Bakunin and Kropotkin predicted that a revolution would face the very “objective factors” which Leninists use to justify and rationalise Bolshevik actions.

As such, to claim that anarchists ignore the “objective factors” facing the Bolsheviks is simply a joke: how can anarchists be considered to ignore what we consider to be the inevitable results of a revolution? Moreover, these Bolshevik assertions ignore the fact that the anarchists who wrote extensively about their experiences in Russia never failed to note that difficult objective factors facing it. Alexander Berkman in The Bolshevik Myth paints a clear picture of the problems facing the revolution, as does Emma Goldman in My Disillusionment in Russia. This is not to mention anarchists like Voline, Arshinov and Maximoff who took part in the Revolution, experiencing the “objective factors” first hand (and in the case of Voline and Arshinov, participating in the Makhnovist movement which, facing the same — if not worse — factors, managed not to act as the Bolsheviks did).
Do anarchists argue that “ideas” produce these bureaucracies? No, far from it — specific forms of social structure generate them. Thus hierarchical and centralised structures will inevitably generate bureaucracies — a theory generated from a careful analysis of countless organisations, including the State and mainstream trade unions. Nor do these structures just appear, but rather reflect specific class interests and needs — minority classes cannot favour social structures which include the masses. Thus “the ideal of the Jacobin State... had been designed from the viewpoint of the bourgeois, in direct opposition to the egalitarian and communist tendencies of the people which had arisen during the Revolution” [Peter Kropotkin, Modern Science and Anarchy, p. 366] Likewise, previous revolutions saw a similar process, as Kropotkin noted:

“It is often thought that it would be easy for a revolution to economise in the administration by reducing the number of officials. This was certainly not the case during the Revolution of 1789–1793, which with each year extended the functions of the State, over instruction, judges paid by the State, the administration paid out of the taxes, an immense army, and so forth.” [The Great French Revolution, vol. II, p. 460]

So based on an analysis of the State which recognised that it had its own vested interests (as outlined in section B.2), anarchists correctly predicted the “new form of wage-labour which would arise if the State took possession of the means of production and exchange ... New powers, industrial powers, added to those which it [already] possesses ... would create a new, formidable instrument of tyranny.” [Kropotkin, Modern Science and Anarchy, p. 170] Trotsky’s post-hoc analysis sought to explain something unanticipated in his own ideology and from which it had to be excused all responsibility, regardless of the facts and logic.

Given that Bolshevik ideology favoured adding more and more functions to the (“workers”) state, extending its reach into eco-

the workers had no interest in which branch of the bureaucracy would govern and exploit them and so remained passive. Rees fails to see that there was martial law, curfew and street battles but they occurred in 1921, not 1928. The rise of Stalinism was the victory of one side of the new bureaucratic class over another but that class had defeated the working class in March 1921.

Not that the Left Opposition’s political platform could have saved the revolution: it was utopian in that it urged the party and state bureaucracy to reform itself based upon maintaining the Bolshevik party’s dictatorship as well as one-man management in the workplace. As such, it did not get at the roots of the problem, namely the state-capitalist nature of the regime and Bolshevik ideology. The theoretical limitations of the “Left Opposition” are discussed in more detail in section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?” here we will restrict ourselves to looking at The Platform of the Opposition written in 1927.

While uttering many warm words about workers’, trade union and soviet democracy — for which the Kronstadt sailors and were branded “White Guardists” and “counter-revolutionary” — it also affirmed “the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” While bemoaning that the “growing replacement of the party by its own apparatus is promoted by a theory of Stalin’s which denies” this, it repeats this principle by arguing that “the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry.” [“The Platform of the Opposition”, The Challenge of the “Left Opposition” (1926–27), p. 395, p. 439 and p. 441] Any split in the party or the formation of two parties represented an enormous danger to the revolution:

“Nobody who sincerely defends the line of Lenin can entertain the idea of ‘two parties’ or play with the sug-
gestion of a split. Only those who desire to replace Lenin’s course with some other can advocate a split or a movement along the two-party road.

“We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party. It demands a proletarian party — that is, a party whose policy is determined by the interests of the proletariat and carried out by a proletarian nucleus. Correction of the line of our party, improvement of its social composition — that is not the two-party road, but the strengthening and guaranteeing of its unity as a revolutionary party of the proletariat.” [Op. Cit., pp. 440–1]

We can note, in passing, the interesting notion of party (and so “proletarian” state) policy “determined by the interests of the proletariat and carried out by a proletarian nucleus” but which is not determined by the proletariat itself. Which means that the policy of the “workers’ state” must be determined by some other (unspecified) group and not by the workers. What possibility can exist that this other group actually knows what is in the interests of the proletariat? None, of course, as any form of democratic decision can be ignored when those who determine the policy consider the protests of the proletariat to be not “in the interests of the proletariat” — hence the pressing need for “the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” Needless to say, the Platform makes no call for industrial democracy but rather proclaims that the “appropriation of surplus value by a workers’ state is not, of course, exploitation” while also acknowledging the existence of a “swollen and privileged administrative apparatus [which] devours a very considerable part of our surplus value” while “all the
So while it cannot be denied that objective factors influenced how certain Bolshevik policies were shaped and applied, the inspiration of those policies came from Bolshevik ideology. An acorn will grow and develop depending on the climate and location it finds itself in, but regardless of the "objective factors" it will still grow into an oak tree, however stunted. Similarly with the Russian revolution. While the circumstances it faced influenced its growth, Bolshevik ideology could not help but produce an authoritarian regime with no relationship with real socialism.

1 Do anarchists ignore the objective factors facing the Russian revolution?

It is often asserted by Leninists that anarchists simply ignore the "objective factors" facing the Bolsheviks when we discuss the degeneration of the Russian Revolution. According to this argument, anarchists present a basically idealistic analysis of the failure of Bolshevism, one not rooted in the material conditions (civil war, economic chaos, etc.) facing Lenin and Trotsky. As one Trotskyist puts it, anarchists "do not make the slightest attempt at a serious analysis of the situation" and so "other considerations, of a different, 'theoretical' nature, are to be found in their works." [Pierre Frank, "Introduction," Lenin and Trotsky, Kronstadt, p. 22] Thus:

"Bureaucratic conceptions beget bureaucracy just as opium begets sleep by virtue of its sleep-inducing properties. Trotsky was wrong to explain the proliferation and rise of the bureaucracy on the basis of the country's backwardness, low cultural level, and the isolation of the revolution. No, what gave rise to a social phenomenon like Stalinism was a conception or idea ... it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical data testify that the growth of wages is lagging behind the growth of the productivity of labour." [Op. Cit., pp. 347–50]

As Anton Ciliga recalled when in a Stalinist prison in the early 1930s, the imprisoned Trotskyists retained this perspective for "the argument of freedom to choose one's party" was "condemned formerly by Lenin, by Trotsky, and by the Decemists. And even then the major part of the Decemists and almost all the Trotskyists continued to consider that 'freedom of party' would be 'the end of the revolution'. 'Freedom to choose one's party — that is Menshevism,' was the Trotskyists' final verdict. 'The proletariat is socially homogenous and that is why its interests can only be represented by a single party,' the Decemist Davidov wrote. 'And why should not democracy within the party be coupled with its dictatorship outside?' the Decemist Nyura Yankovskaya wanted to know." He concluded the Trotskyists’ "outlook was not that very different from that of the Stalinist bureaucracy; they were slightly more polite and human, that was all." [The Russian Enigma, p. 280 and p. 263] This reflect the flawed class analysis of Leninism:

"Trotskyism as well as Stalinism saw ... two social orders: the proletariat versus bourgeoisie, the latter embracing the kulaks and the relics of the former ruling classes ... I had come to the conclusion that three social systems were partaking in the struggle: State capitalism, private capitalism and socialism, and that these three systems represented three classes: the bureaucracy, the bourgeoisie (including the kulaks) and the proletariat. The difference lay in that Stalinists and Trotskyism saw State capitalism as socialism and bureaucracy as proletariat. Trotsky as well as Stalin wished to pass off the State as being the proletariat, the bureaucratic dictatorship over the proletariat as the proletarian dictatorship, the victory of State capitalism over both private capitalism and socialism as a victory of the latter. The difference between Trotsky
and Stalin … [was that] Trotsky perceived and stressed the gaps and bureaucratic deformations of the system.”

The bureaucratic machine outnumbered the party — there were over five million state officials in 1921 compared to around 730,000 party members (reduced to 515,000 in January 1922 after a purge). The grim reality was that “those enjoying dominant positions in the State apparatus … had been consolidating their power and detaching themselves more and more from the workers. The bureaucracy was already assuming alarming proportions. The State machine was in the hands of a single Party, itself more and more permeated by careerist elements. A non Party worker was worth less, on the scale of everyday life, than an ex bourgeois or nobleman, who had belatedly rallied to the Party. Free criticism no longer existed. Any Party member could denounce as ‘counter revolutionary’ any worker simply defending his class rights and his dignity as a worker.” [Mett, Op. Cit., p. 140]

Likewise, within the party the higher echelons held power and had been more than willing to use it against internal dissidents long before 1921. As such, it ignored the reality of the Bolshevik party to appeal to the party machine to introduce “in deeds and not words a democratic regime. Do away with administrative pressure tactics. Stop the persecution and expulsion of those who hold independent opinions about party questions.” [Trotsky, Op. Cit., p. 407] It failed to note that these tactics were used by Lenin and Trotsky against Left-wing dissidents within the party after the October revolution.

The Left-Communists in early 1918, for example, were subject to such pressure. They were ousted from leading positions in the Supreme Economic Council in March 1918 and after their views were denounced by Lenin, a “campaign was whipped up in Leningrad which compelled Kommunist [their paper] to transfer publication to Moscow … After the appearance of the first issue of the paper a hastily convened Leningrad Party Conference produced a majority for Lenin and ‘demanded that the adherents of

interacted. Civil war undoubtedly meant economic disruption, economic disruption meant unemployment and that affected the working class via fewer goods available, fewer goods made it harder to exchange with the peasants for food, necessitating forced requisition by the regime, for example. So just because we separate the specific issues for discussion purposes, it should not be taken to imply that we are not aware of their combined impact. Likewise, recognising the impact of certain developments does not mean the responses to them are above criticism nor made the situation worse. Thus in our example above key links in that chain could have been broken by different policies.

To conclude: while mechanically invoking “objective factors” may be sufficient for the followers of Bolshevism, it cannot be sufficient for anyone who wants to learn from history, rather than repeat it. For, ultimately, if difficult times back in 1918–21 justified suppressing working class political and economic freedom and self-management, imprisoning and shooting anarchists and other socialists, implementing and glorifying party dictatorship, what might we expect during difficult times in the future? Simply put, if your defence of the Bolsheviks rests simply on “difficult circumstances” then it can only mean one thing, namely if “difficult circumstances” occur again (and they will) we can expect the same outcome.

Worse, perhaps a future revolution will be less destructive, less isolated, less resisted than the Russian (although, as we note below in section 2, leading Bolsheviks like Lenin, Trotsky and Bukharin argued that this would not be the case). That is a possibility. However, should we embrace an ideology whose argument is based on the hope that fate will be kinder to them this time? Particularly when, even assuming these better “objective circumstances,” while we may manage to avoid the horrors of Stalinism we would not avoid the recreation of a some kind of new class system as such an outcome is inherent in state-socialism?
And I certainly did not expect to see it ushered in by the Marxian theory.

"I did, however, hope to find in Russia at least the beginnings of the social changes for which the Revolution had been fought. Not the fate of the individual was my main concern as a revolutionist. I should have been content if the Russian workers and peasants as a whole had derived essential social betterment as a result of the Bolshevik régime.

"Two years of earnest study, investigation, and research convinced me that the great benefits brought to the Russian people by Bolshevism exist only on paper, painted in glowing colours to the masses of Europe and America by efficient Bolshevik propaganda. As advertising wizards the Bolsheviki excel anything the world had ever known before. But in reality the Russian people have gained nothing from the Bolshevik experiment." [My Disillusionment in Russia, p. xlvii-xlviii]

Second, we must stress that libertarians do not think any future revolution will suffer as terrible conditions as that experienced by the Russian one. However, it might and we need to base our politics on the worse case possibility. That said, we argue that Bolshevik policies made things worse — by centralising economic and political power, they automatically hindered the participation of working class people in the revolution, smothering any creative self-activity under the dead-weight of state officialdom. As a libertarian revolution would be based on maximising working class self-activity (at all levels, locally and upwards) we would argue that it would be better placed to respond to even the terrible conditions facing the Russian Revolution.

Third, it must be stressed that we are discussing these factors individually simply because it is easier to do so. It reality, they all
“In his speech to the Tenth Congress — published in the Congress Proceedings — Lenin voiced his regret at having ‘permitted’ such a discussion. ‘We have certainly committed an error,’ he said, ‘in having authorised this debate. Such a discussion was harmful just before the Spring months that would be loaded with such difficulties.’” [Op. Cit., p. 143]

Unsurprisingly, the Tenth Congress voted to ban factions within the Party. The elimination of discussion in the working class led to its ban in the party. Having the rank-and-file of the Party discuss issues would give false hopes to the working class as a whole who may attempt to influence policy by joining the party (and, of course, vote for the wrong people or policies). Equally unsurprising, we discover the Platform stating that “the dying out of inner-party democracy leads to a dying out of workers’ democracy in general — in the trade unions, and in all other nonparty mass organisations.” [“Platform of the Joint Opposition”, Op. Cit., p. 395]

Ignoring the awkward fact that Kronstadt was crushed precisely for demanding this, as noted the opposite causation is correct: the dying out of workers’ democracy in general leads to a dying out of inner-party democracy. Power monopolised by a single party means that all dissatisfaction becomes channelled through it — this cannot help but generate factions within the party as disagreements and interests need to be expressed somewhere. As the party dictatorship replaces the working masses, eliminating workers democracy by the dictatorship of a single party, democracy in that party must wither for if workers can join that party and influence its policies then the same problems that arose in the soviets and unions appear in the party. This necessitates a corresponding centralisation in power within the party as occurred in the soviets and unions, all to the detriment of rank and file power and control. This can be seen from the banning of factions within the party in early 1921:

Explanation of Bolshevik authoritarianism is unconvincing as every revolution — indeed, every revolutionary situation — has faced and will face this problem. Then section 5 analyses the common Leninist argument that the revolution failed because the Russian working class became “atomised” or “declassed,” showing that the Russian working class was more than capable of collective action throughout the 1918 to 1921 period (and beyond). The problem for the Leninists, which explains why they are disinclined to discuss it, is that it was directed against the Bolshevik party. As section 6 shows, the Bolshevik leaders at the time did not explain their actions in terms of the “objective factors” they faced. Then section 7 discusses the ideological utility that stressing “objective factors” has for Leninist ideology (namely, it shifts perspectives away from the Bolshevik vision of socialism) while section 8 highlights how Leninists also stress the importance of the very ideology they seek to discount.

Three final points.

First, anarchists do not criticise the Bolshevik regime because it was not perfect. Anarchists, as indicated in section H.2.5, have never thought there could be an “over-night” revolution which would usher in an ideal and so we subject the Bolshevik regime to realistic criteria, namely whether it was encouraging or undermining socialist tendencies. “Not that I expected to find Russia a proletarian Eldorado,” Alexander Berkman recalled. “By no means. I knew the great travail of a revolutionary period, how stupendous the difficulties to be overcome.” [The Bolshevik Myth, 328–9] Emma Goldman likewise summed up this position well:

“Both these criticisms would be justified had I come to Russia expecting to find Anarchism realised, or if I were to maintain that revolutions can be made peacefully ... I do not therefore expect Anarchism to follow in the immediate footsteps of centuries of despotism and submission.
civil war, the legacy of World War One, the international armies of counter-revolution and economic disruption. These “objective factors” meant that the revolution was, basically, suffocated and were the overriding cause for the rise of authoritarianism and the crushing of socialism.

Thus, as one British Leninist puts it, the “degree to which workers can ‘make their own history’ depends on the weight of objective factors bearing down on them … To decide in any given circumstance the weight of the subjective and objective factors demands a concrete analysis of the balance of forces.” The conditions in Russia meant that the “subjective factor” of Bolshevik ideology “was reduced to a choice between capitulation to the Whites or defending the revolution with whatever means were at hand. Within these limits Bolshevik policy was decisive. But it could not wish away the limits and start with a clean sheet. It is a tribute to the power of the Bolsheviks’ politics and organisation that they took the measures necessary and withstood the siege for so long.” [John Rees, “In Defence of October,” pp. 3–82, International Socialism, no. 52, p. 30]

For anarchists and other libertarian socialists, such “objective factors” do not explain why the Russian Revolution failed. This is because almost all revolutions will face the same, or similar, problems. As we indicate in section 1 of this appendix, anarchists like Kropotkin had long indicated that a revolution would suffer such events and argued for strategies and structures which would mitigate their impact by encouraging mass participation and local initiative. More, as discussed in section 2 the Bolsheviks themselves, with Lenin at their head, argued at the time that such factors would affect every revolution. In section 3, we build on this by arguing that any defence of Bolshevism based on blaming the impact of the civil war is both factually and logically flawed, not least because as we discussed in section H.2.1, Leninists like to claim that they are “realistic” (unlike the “utopian” anarchists) and recognise the need for a “workers’ state” because civil war is inevitable in a revolution. As far as economic disruption goes, as we discuss in section 4 this

“In March 1921, in the days of the Kronstadt revolt, which attracted into its ranks no small number of Bolsheviks, the 10th Congress of the party thought it necessary to resort to a prohibition of factions — that is, to transfer the political regime prevailing in the state to the inner life of the ruling party. This forbidding of factions was again regarded as an exceptional measure to be abandoned at the first serious improvement in the situation. At the same time, the Central Committee was extremely cautious in applying the new law, concerning itself most of all lest it lead to a strangling of the inner life of the party.” [Trotsky, The Revolution Betrayed, p. 96]

Yet this is, as we discuss in section H.5.3, the inevitable outcome of vanguardism in practice. Trotsky, then, simply opposed the application of repressive methods used on previous dissidents onto himself and those who agreed with him. He seemed genuinely surprised that the party machine would abuse its power in its own interests. Just as those outside the party — whether anarchists, other oppositional socialist groups or strikers — were repressed by the bureaucracy, so the party itself was subject to a similar regime. As Victor Serge noted, in practice the faction ban “meant the establishment within the Party of a dictatorship of the Old Bolsheviks, and the direction of direction of disciplinary measures, not against the unprincipled careerists and conformist latecomers, but against those sections with a critical outlook.” [Memoirs of a Revolutionary, p. 135] Originally this repression was mild but, over time, it increased in severity until Communists and even bureaucrats suffered the same fate as those without a party card.

The notion that the bureaucracy could be defeated from within was naive in the extreme. It — like any ruling class — could only be defended from below, by the working class. To fight the bureaucracy, the working class needed freedom: freedom to organ-
ise, freedom of the press, freedom of assembly, as demanded by the Kronstadt rebels. Limiting these essential liberties to within the party as Trotsky wished would solve little given the size and power of the bureaucracy and the willingness of the ruling elite — as shown in 1921, for example — to repress any workers who exercised those freedoms. It is, therefore, unsurprising to discover Ciliga recounting how in his prison the strongest fraction of the Trotskyists "hoped for reform from above ... As to making an appeal to the people and the masses ... this [was considered] an extremely dangerous course to follow: the peasants were 'against us'; the workers were undecided, the 'spirit of Kronstadt' pervaded the land and the "Thermidor front might well include the working class"" [Op. Cit., p. 212] Victor Serge, likewise, noted how Left Opposition "refused to appeal to workers and intellectuals who were not affiliated to the Party, because it believed that counterrevolutionary attitude, whether conscious or not, were still rife amongst them." [The Life and Death of Leon Trotsky, p. 140] As Trotsky put it: "We have never had and do not now have the intention of making nonparty people judges of our inner-party conflicts." [The Challenge of the Left Opposition (1926–27), p. 482] This is unsurprising, for it is doubtful such people would have restricted their demands to the limited inner-party reforms urged by the Left Opposition nor would they have forgotten Trotsky's policies when he had held power. So what else could it do? Appeal to the workers to fight, to revolt, in the name of... party dictatorship?

In terms of internal reform, this was doomed to failure in advance: the Left Opposition received the crop that Lenin and Trotsky sowed the seeds of in 1921. Much the same can be said for the idea that an external revolution could have regenerated the Soviet regime. In the words of Ida Mett:

"Some claim that the Bolsheviks allowed themselves such actions (as the suppression of Kronstadt) in the hope of a forthcoming world revolution, of which they considered their often all-too-idealised version of Bolshevik ideology had to be undermined to secure the survival of the revolution). So it must be noted that anarchists stress the interplay between the "objective factors" and the subjective ones such as party ideology. Faced with difficult circumstances, people and parties react in different ways. If they did not then it would imply what people think has no impact at all on their actions, that the politics of the Bolsheviks played no role in their decisions — which raises the interesting contradiction of why Leninists stress the power and importance of having the correct (their!) ideology. Unsurprisingly, this position simply cannot be maintained. As section H indicates, Leninist ideology itself played a key role in the rise of Stalinism.

Leninists, of course, try to distance themselves from Stalinism, correctly arguing that it was a brutal and undemocratic system (although some did, and do, defend it against attacks from the right). The problem is that it was when Lenin and Trotsky were at the head of the so-called "workers’ state" rather than when Stalin occupied that position that the regime broke strikes, repressed protests, shot strikers, banned left papers along with radical organisations and party factions, sent workers and revolutionaries to prison, advocated and introduced one-man management and piece-work in the workplace, eliminated democracy in the military, packed soviets to secure party power and shut down soviets elected with the "wrong" (i.e. non-Bolshevik) majorities, eliminated independent trade unions, and so on.

Many Leninists know nothing of this. Their parties simply do not present their members with the full facts of when Lenin and Trotsky were in power, nor do they encourage an atmosphere of independent analysis and investigation to discover these themselves. Others do know and either ignore than when discussing the revolution or attempt to justify these actions. When anarchists discuss why the Russian Revolution failed, these Leninists have basically one reply. They argue that anarchists never seem to consider the objective forces at play during the Russian revolution, namely the
As we discussed in section H.6, Chomsky’s feeling is more than supported by the historical record. The elimination of meaningful working class freedom and self-management began from the creation of the new regime after the October Revolution and was firmly in place before the start of the civil war at the end of May, 1918. The civil war simply accelerated processes which had already began, strengthened policies that had already been applied. Indeed, it could be argued that rather than impose alien policies onto Bolshevism, the civil war simply brought the hidden (and not-so-hidden) state capitalist and authoritarian politics of Leninism (and mainstream Marxism) to the fore.

Which is why analysing the failure of the revolution is important. If the various arguments presented by Leninists on why Bolshevism failed (and, consequently, why Stalinism developed) can be refuted, then we are left with the key issues of revolutionary politics — whether Bolshevik politics had a decisive negative impact on the development of the Russian Revolution and, if so, whether there was an alternative to those politics. As regards the first issue, as we discussed in section H.6.2, anarchists argue that this was the case: Bolshevik ideology itself played a key role in the degeneration of the revolution (also see the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”). And as regards the second, anarchists can point to the example of the Makhnovist movement active in Ukraine during the same revolution, which proves that alternative policies were possible and could be applied with radically different outcomes (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”).

Before continuing, we must note that our division of the discussion into objective and subjective factors is, of course, artificial and purely presentational. It is impossible to discuss everything at once and, moreover, this reflects pro-Bolshevik accounts of the regime which focus primarily on “objective factors” and rarely address ideological and structural influences (beyond lamenting that themselves the vanguard. But would not a revolution in another country have been influenced by the spirit of the Russian Revolution? When one considers the enormous moral authority of the Russian Revolution throughout the world one may ask oneself whether the deviations of this Revolution would not eventually have left an imprint on other countries. Many historical facts allow such a judgement. One may recognize the impossibility of genuine socialist construction in a single country, yet have doubts as to whether the bureaucratic deformations of the Bolshevik regime would have been straightened out by the winds coming from revolutions in other countries.” [Op. Cit., p. 203]

This is indeed the case — from the start, the Bolsheviks were considered by many socialists across the globe as showing the correct path in terms of revolutionary strategy and actions. This included the dogma on the necessity of party dictatorship which had become Bolshevik orthodoxy by the start of 1919 at the latest (reflecting its practice by mid-1918). Thus we see, for example, during the Hungarian Revolution which had seen libertarians form the first workers’ councils in December 1917 by 1919 they “felt that the powers of the [Communist] Revolutionary Governing Council [of Bela Kun] were excessive … For the syndicalists the legitimate holders of proletarian sovereignty were the workers councils … It was not long before they saw their cherished ideals defeated by the united party’s oligarchy. On April 7, 1919, elections were held for the Budapest Council of Workers’ and Soldiers’ Deputies. The syndicalist controlled Budapest Eighth district elected a slate consisting solely of syndicalist and anarchist write-in deputies in place of the single-party ticket. The Revolutionary Governing Council voided the results of the election and a week later the official slate ‘won’”. [Rudolf L. Tokes, Bela Kun and the Hungarian Soviet Republic, p. 38 and pp.151–2]
As in Russia, the “wrong” people had been elected to the soviets and so the Communist regime simply nullified workers’ democracy.

The same perspective was expressed in other countries. As another example, in Italy the pro-Bolsheviks were also raising the necessity of party dictatorship and were being opposed by the libertarians during the revolutionary crisis in 1920:

“Up to now, whenever we said that what the socialists term dictatorship of the proletariat is only, in fact, the dictatorship of some men who, with the assistance of a party, superimpose and impose themselves on the proletariat, they used to treat us as if we were little short of slanderers ... Moscow had become the Mecca of the proletariat; the source of light, and ... peremptory orders as to the ideas that those who, with permission from their betters, wished to call themselves communists ought to profess and the conduct they should observe ... the official Italian Socialist Party daily, up to now the most authorised mouthpiece for the word from Moscow, ... Avanti! of the 26th [September, 1920] ... said:

"In Russia, under the soviet regime, the Party really directs all State policy and all public activities; individuals as well as groups being utterly subordinated to the decisions of the Party, so that the dictatorship of the proletariat is really the dictatorship of the party and, as such of its central committee.’

“Well now we know what we have to look forward to: the dictatorship of the Leadership of the Socialist Party, or of the as yet unborn Communist Party ... a revolution made with an authoritarian outlook with dictatorial objectives ... through authoritarian imposition from above.”

[Errico Malatesta, “At Last! What is the ‘dictatorship of the proletariat’?”, Anarchistes, Socialistes et Communistes, pp. 208–10]

This appendix aims to discuss these pro-Bolshevik explanations for the failure of Bolshevism in more detail than in section H.6.1, indicating why anarchists are not convinced by Leninist accounts of why Bolshevism created a new class system rather than socialism. This subject is no mere historical discussion. Unless we learn the lessons of history, we will be doomed to repeat them. More, given the fact that many people who become interested in socialist ideas will come across the remnants of Leninist parties it is important that libertarians explain clearly and convincingly why the Russian Revolution failed and the role of Bolshevik ideology in that process. We need to account why a popular revolution became a state capitalist party dictatorship. As Noam Chomsky put it:

“In the stages leading up to the Bolshevik coup in October 1917, there were incipient socialist institutions developing in Russia — workers’ councils, collectives, things like that. And they survived to an extent once the Bolsheviks took over — but not for very long; Lenin and Trotsky pretty much eliminated them as they consolidated their power. I mean, you can argue about the justification for eliminating them, but the fact is that the socialist initiatives were pretty quickly eliminated.

“Now, people who want to justify it say, ‘The Bolsheviks had to do it’ — that’s the standard justification: Lenin and Trotsky had to do it, because of the contingencies of the civil war, for survival, there wouldn’t have been food otherwise, this and that. Well, obviously the question is, was that true. To answer that, you’ve got to look at the historical facts: I don’t think it was true. In fact, I think the incipient socialist structures in Russia were dismantled before the really dire conditions arose ... reading their own writings, my feeling is that Lenin and Trotsky knew what they were doing, it was conscious and understandable.” [Understanding Power, p. 226]
only their regime, but their stepbrothers as well, the Socialists in power in other countries, had demonstrated the failure of the Marxian State better than any anarchist argument. Living proof was always more convincing than theory. Naturally I did not regret the Socialist failure but I could not rejoice in it in the face of the Russian tragedy.”

[Living My Life, vol. 2, p. 969]

Alexander Berkman, like Goldman an eye-witness to developments between 1920 and 1922, provides an excellent overview of what had happened in Russia after the October Revolution:

“The elective system was abolished, first in the army and navy, then in the industries. The Soviets of peasants and workers were castrated and turned into obedient Communist Committees, with the dreaded sword of the Cheka [political para-military police] ever hanging over them. The labour unions governmentalised, their proper activities suppressed, they were turned into mere transmitters of the orders of the State. Universal military service, coupled with the death penalty for conscientious objectors; enforced labour, with a vast officialdom for the apprehension and punishment of ‘deserters’; agrarian and industrial conscription of the peasantry; military Communism in the cities and the system of requisitioning in the country … ; the suppression of workers’ protests by the military; the crushing of peasant dissatisfaction with an iron hand …” [The Russian Tragedy, p. 27]

Given that Leninists claim that the Russian revolution was a success (at least initially) and so proves the validity of their ideology, anarchists have a special duty to analyse and understand what went wrong. Simply put, if the Russian Revolution was a success, Leninism does not need failures!

Kronstadt, likewise, was integrated into this perspective with, for example, leading German Communist Karl Radek writing on 1 April 1921 that he was “convinced that in the light of the events at Kronstadt, the Communist elements which have so far not understood the role of the Party during the revolution, will at last learn the true value of these explanations, as well as the resolution of the 2nd Congress of the Communist International on the subject of the role of the Party.” For “the full benefit of this lesson” is that “even when that uprising bases itself on working-class discontent” it must “be realised that, if the Communist Party can only triumph when it has the support of the mass of workers, there will nevertheless arise situations in the West where it will have to, for a certain period, keep power using solely the forces of the vanguard.” He noted that this was a long standing position by quoting an earlier article of his from 1919:

‘And the mass … may well hesitate in the days of great difficulties, defeats, and it may even despair of victory and long to capitulate. The proletarian revolution does not bring with it an immediate relief of poverty, and in certain circumstances, it may even temporarily worsen the situation of the proletariat. The adversaries of the proletarian will take advantage of this opportunity to demand the government of the workers themselves; it is for this reason that it will be necessary to have a centralised Communist Party, powerful, armed with the means of the proletarian government and determined to conserve power for a certain time, even only as the Party of the revolutionary minority, while waiting for the conditions of the struggle to improve and for the morale of the masses to rise … there can arise situations where the revolutionary minority of the working class must shoulder the full weight of the struggle and where the dictatorship of the proletariat can only be
maintained, provisionally at least, as the dictatorship of the Communist Party.”

Events of March 1921 confirmed this position for the party’s “firm decision to retain power by all possible means” is “the greatest lesson of the Kronstadt events, the international lesson. He also referenced “our discussions with that section of Communists [in Germany] who wished to oppose the Russian dictatorship, the dictatorship of the Communist Party” — as also discussed by Lenin in “Left-Wing” Communism: An Infantile Disorder (see section H.3.3) — on “the problem of the relationship between the Communist Party and the mass of the proletariat and the form of the dictatorship: dictatorship of the Party or dictatorship of the class”. [The Kronstadt Uprising] Radek was just repeating the Bolshevik position in words with more than usual clarity and “ provisionally” unsurprisingly came to be measured in decades and was only ended by mass revolt in 1989.

The Bolsheviks had already been manipulating foreign Communist Parties in the interests of their state for a number of years. That is part of the reason why the Council Communists around Anton Pannekoek and Herman Gorter whom Radek referred to broke with the Third International in 1921. “We can now see why,” Pannekoek noted “the tactics of the Third International, laid down by Congress to apply homogeneously to all capitalist countries and to be directed from the centre, are determined not only by the needs of communist agitation in those countries, but also by the political needs of Soviet Russia” in addition to the “ immediate economic needs which determine their policies”. [“World Revolution and Communist Tactics”, Pannekoek and Gorter’s Marxism, p. 144]

Just as the influence of Lenin had been a key factor in the successful the struggle against anti-Parliamentarian tendencies in Communist Parties all across the world, so the example and influence of the Bolsheviks would have made its impact on any foreign revolution. Any successful revolutionaries would have

reasons for the failure tend to be more readily agreed upon within pro-Bolshevik Marxist circles than the date: isolation, the economic and social costs of civil war, the “backward” nature of Russian society and economy are usually listed as the key factors. As we shall see, these are often referred to as “objective factors” in contrast to the “subjective factors” of Bolshevik ideology, decisions and actions.

Moreover, what the Stalinist regime was is also discussed heatedly in Marxist circles. While anarchists agree with Emma Goldman’s summation that it was “an absolute despotism politically and the crassest form of state capitalism economically” [Red Emma Speaks, p. 420] so confirming in practice Kropotkin’s analysis that “State Socialism ... is in reality nothing but State capitalism” [“Caesarism,” Freedom, June 1899], mainstream Marxists have had more difficulty agreeing — some (orthodox Trotskyists) claiming it was a “ degenerated workers state,” others (such as the neo-Trotskyist British SWP) that it was “state capitalist” (although, as discussed in section H.3.13, for different reasons than anarchists). Indeed, after describing the various Marxist theories on the Russian regime, one expert concluded that “it is perfectly clear that Soviet society can hardly be explained in orthodox-Marxian terms at all. If it is accepted that the USSR was not communist in a Marxian sense, the analysis becomes almost impossible”. [Marcel van der Linden, Western Marxism and the Soviet Union, p. 317]

For anarchists, however, the failure of Bolshevism did not come as a surprise. In fact, just as with the reformist fate of the Social Democrats, the failure of the Russian Revolution provided empirical evidence for Bakunin’s critique of Marx (section H.1.1). As Emma Goldman recounts in her memoirs:

“Professor Harold Laski ... expressed the opinion that I ought to take some comfort in the vindication anarchism had received by the Bolsheviki. I agreed, adding that not
surrection of all the people and the voluntary organisation of the workers from below upward.” [Statism and Anarchy, pp. 178–9]

The tragedy of Kronstadt is a product of an ideology which did not — could not — understand how its strategy as well as the socioeconomic structures it favoured and built created a new class and armed it both ideologically and physically to secure its position in the new social hierarchy. If, as Marx suggested, history repeats itself first as tragedy and then as farce, the antics of Leninists since 1921 — the lying, the selective quoting, the cherry-picking, the ignoring of awkward facts, the replacing of research by the repeating of orthodoxy, etc. — to justify the repression are definitely farcical. All in all, Kronstadt should be remembered by all genuine socialists for it exposed the reality of the Bolshevik regime like no other event and so marked the definitive end of the Russian Revolution: its demands were the minimum needed to save the revolution from bureaucratic degeneration, party dictatorship and state-capitalism.

What caused the degeneration of the Russian Revolution?

As is well known, the Russian Revolution failed. Rather than produce socialism, the Bolshevik revolution gave birth to an autocratic party dictatorship presiding over a state capitalist economy. In turn, this regime gave rise to the horrors of Stalinism. While Stalinism was denounced by all genuine socialists, a massive debate has existed within the Marxist movement over when, exactly, the Russian Revolution failed and why it did.

Indeed, it is fair to say that the date chosen indicates much about the individual’s or party’s other politics. Some argue around 1928, others say around 1924, a few — anarchists and libertarian Marxists — argue from the Bolshevik seizure of power 1917. The applied such “lessons” of October such as the dictatorship of the proletariat being impossible without the dictatorship of the Communist Party, centralism, nationalisation, one-man management, militarisation of labour and so on. This would have distorted any revolution from the start as well as simply creating a new bureaucratic ruling class as had happened in Russia.

Given how obediently the Communist Parties around the world followed the insane policies of Stalinism, can we doubt this conclusion? After all, even in the 1930s, these positions were still held by Trotskyists across the globe. The first issue of the official American Trotskyist journal, for example, made its position clear by seeking to refute the notion that the dictatorship of the party was an alien concept brought into Bolshevism by Stalin! It did so by “quotations from Lenin, Trotsky and others so as to establish ... the dictatorship of the party is Leninist” rather than “a Stalinist innovation”. [Max Shachtman, “Dictatorship of Party or Proletariat? Remarks on a Conception of the AWP ... and Others”, New International, July 1934]

Thus the reality was that any Bolshevik-style revolution in Western Europe — and least we forget, Trotskyists are convinced that only a Bolshevik-lead revolution can succeed — would have followed the Bolshevik ideology with regards to the necessity of the dictatorship of the party as well as nationalisation and one-man management. In short, it would have also resulted in the political and economic dispossession of the working class by “its” party. As such, a successful revolution in the West would not have seen the Russian dictatorship over the proletariat ended but rather reinforced as the non-Russian Leninist parties would have simply repeated the “lessons” learned by the Bolsheviks and communicated internationally:

“It was, indeed, between 1917 and 1920 that the Bolshevik party established itself so firmly in power that it no longer could have been dislodged except by force of arms. And it was from the beginning of this period that the un-
certainties of its line were ironed out, the ambiguities
lifted, and the contradictions resolved. In the new State,
the proletariat was to work, to be mobilised, and, should
the need arise, to die in defence of the new power. It was
to give its most ‘conscious’ and most ‘capable’ members
to ‘its’ party, where they would become the leaders of society. It was to be ‘active’ and it had to ‘participate’
whenever it was asked to do so, but it was to do so only
and exactly to the extent that the Party demanded this of
the proletariat. Finally, it was to bow completely to the
Party’s will on all essential matters.” [Cornelius Casto-
riadis, Political and Social Writings, vol. 3, p. 99]

Simply put, democracy cannot be introduced in the soviets and
unions when party dictatorship is considered essential for the “re-
alisation” of the “proletarian” dictatorship and when there can only
be one party. If “proletarian” dictatorship is impossible without the
dictatorship of the party then, clearly, proletarian democracy be-
comes meaningless. All the workers would be allowed to do would
be to vote for members of the same party, all of whom would be
bound by party discipline to carry out the orders of the party leader-
ship. Power would rest in the party hierarchy and definitively
not in the working class, its unions or its soviets (both of which
would remain mere fig leafs for party rule). Ultimately, the only
guarantee that the party dictatorship would govern in the inter-
est of the proletariat would be the good intentions of those who
held power in its hierarchy. However, being unaccountable to the
masses, such a guarantee would be worthless — as history shows.

It may be objected here that this ignores that Trotsky stated in
1936 that when “the Soviet bureaucracy is overthrown by a revolu-
tionary party having all the attributes of the old Bolshevism” then it
“would begin with the restoration of democracy in the trade unions
and the Soviets. It would be able to, and would have to, restore free-
dom of Soviet parties.” Yet this ignores his suggestion that a “restora-
tion will rule, but no one would be ruled. Then there will
be no government, there will be no state; but if there is
a state, there will also be those who are ruled, there will
be slaves.

“In the Marxists’ theory this dilemma is resolved in a sim-
ple fashion. By popular government they mean govern-
ment of the people by a small number of representatives
elected by the people. So-called popular representatives
and rulers of the state elected by the entire nation on the
basis of universal suffrage — the last word of the Marx-
ists, as well as the democratic school — is a lie behind
which the despotism of a ruling minority is concealed, a
lie all the more dangerous in that it represents itself as
the expression of a sham popular will.

“So ... it always comes down to the same dismal result:
government of the vast majority of the people by a privi-
leged minority. But this minority, the Marxists say, will
consist of workers. Yes, perhaps, of former workers, who,
as soon as they become rulers or representatives of the
people will cease to be workers and will begin to look
upon the whole workers’ world from the heights of the
state. They will no longer represent the people but them-
sestheir own pretensions to govern the people ...

“They say that this state yoke, this dictatorship, is a nec-
essary transitional device for achieving the total libera-
tion of the people: anarchy, or freedom, is the goal, and
the state, or dictatorship, the means. Thus, for the masses
to be liberated they must first be enslaved ... They claim
that only a dictatorship (theirs, of course) can create pop-
ular freedom. We reply that no dictatorship can have any
other objective than to perpetuate itself, and that it can
engender and nurture only slavery in the people who en-
dure it. Liberty can only be created by liberty, by an in-
working class people to manage society and transform it as they see fit as they will make wrong decisions (like vote for the wrong party or, worse, take the management of their lives into their own hands). If the party leaders decide a decision by the masses is incorrect, then the masses are overridden (and repressed). So much for “all power to the soviets” or “workers’ power.”

Ultimately, Wright’s comments (and those like it) show that Bolshevism’s commitment to workers’ power and democracy is non-existent. What is there left of workers’ self-emancipation, power or democracy when the “workers state” represses the workers for trying to practice these essential features of any real form of socialism? How will the State machine required to do this “wither away”? It is the experience of Bolshevism in power that best refutes the Marxist claim that the workers’ state “will be democratic and participatory.” The suppression of Kronstadt was just one of a series of actions by the Bolsheviks which began before the start of the Civil War, with them abolishing soviets which elected non-Bolshevik majorities, abolishing elected officers and soldiers soviets in the Red Army and Navy and replacing workers’ self-management of production by state-appointed managers with “dictatorial” powers (see section H.6).

As anarchists predicted, the “workers’ state” did not, could not, be “participatory” as it was still a state. It spawned a new class system based on the bureaucracy oppressing and exploiting the working classes. Kronstadt is part of the empirical evidence which proves Bakunin’s predictions on the authoritarian nature of Marxism (see section H.1.1). This warning by Bakunin was confirmed by the Kronstadt rebellion and the justifications made at the time and afterwards by the supporters of Bolshevism:

“What does it mean, ‘the proletariat raised to a governing class?’ Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the government? The entire na-

tion of the right of criticism, and a genuine freedom of elections, are necessary conditions for the further development of the country” and this “assumes a revival of freedom of Soviet parties, beginning with the party of Bolsheviks”. [The Revolution Betrayed, p. 252 and p. 289] While in power Trotsky — like every leading Bolshevik — had repeatedly asserted that party dictatorship was not only completely compatible with “Soviet Democracy” but that the latter required the former. So rather than a complete introduction of Soviet democracy in the true meaning of the term, we would see the Trotskyists given freedom first but within the context of their party’s dictatorship. They would then decide which other parties counted as “Soviet parties” — we do not have to look at the fate of the Mensheviks under Lenin to see the flaws in such a position. It comes as no surprise to discover Trotsky reiterating the necessity of party dictatorship the year this work was published in English:

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history … The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution … Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not
permit the material and the moral development of the masses.” [Writings 1936–37, pp. 513–4]

We can agree with Trotsky on “the crushing of Soviet democracy by an all-powerful bureaucracy” occurred in Russia but not on the date — it happened when Lenin held the reins of power and not after his death. Likewise, we can agree that the “opposition parties were forbidden one after the other” is “obviously in conflict with the spirit of Soviet democracy” but must reject as revisionism the claim that “the leaders of Bolshevism regarded [this] not as a principle, but as an episodic act of self-defence.” [The Revolution Betrayed, p. 278 and p. 96] The Platform of the Opposition — to note just one example — shows that this smacks of the re-writing of history Trotsky correctly accused Stalinism of.

As can be seen, the alternatives suggested by Trotskyists to crushing Kronstadt are the real utopian positions. The self-reform of the regime by a section of its rulers is not only impossible in the face of the size and power of the bureaucracy but it was also based on maintaining the party dictatorship and one-man management within production. Unlike the Kronstadt Platform, it was doomed to failure from the start. Any group which raised demands for a return to the principles of 1917 were, like the Kronstadt sailors, crushed by forces of the State. In terms of workers’ struggles, the bureaucracy had long experience in repressing strikes and so any revolt would have undoubtedly suffered the fate of the Petrograd strikes which had inspired the solidarity of Kronstadt. Finally, the notion that a revolution elsewhere would have revitalised the Soviet regime fails to acknowledge that it would have — if it were Leninist in nature — been based on imposing a party dictatorship and state-capitalism as per the example of Soviet Russia under Lenin and Trotsky. As for a non-Leninist revolution, well, those who defend the Bolshevik repression of Kronstadt are Leninists and so assume that no such thing is possible...

the same task in the future by justifying repression in the past. For no matter how much Leninists may say otherwise, the ease with which the Bolsheviks embraced policies which are alleged to be the antithesis of what their ideology is claimed to stand for is of note — as is the lack of regret and the willingness of their followers to still justify them. As Samuel Farber reminds us, “there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers’ control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.” [Before Stalinism, p. 44] It is the practice of Bolshevik — and acts such as the repression of the Kronstadt revolt — which shows that it is fundamentally a “socialism from above” ideology (see section H.3.3) and so to be avoided.

And, we must ask, what, exactly, were these “conquests” of the revolution that must be defended? The suppression of strikes, independent political and labour organisations, elimination of freedom of speech, assembly and press and, of course, the elimination of soviet and union democracy in favour of party power? Which, of course, for all Leninists, is the real revolutionary conquest and anyone who questions that is a counter-revolutionary: “The sailors had dared to stand by the discontented workers. They had dared to demand that the promise of the Revolution — all Power in the Soviets — should be fulfilled. The political dictatorship had slain the dictatorship of the proletariat. That and that alone was their unforgivable offense against the holy spirit of Bolshevism.” [Emma Goldman, “Trotsky Protests Too Much”, Op. Cit., p. 266]

The issue is simple — either socialism means the self-emancipation of the working class or it does not. Leninist justifications for the suppression of the Kronstadt revolt simply mean that for the followers of Bolshevism, when necessary, the party will paternalistically repress the working class for its own good. The clear implication of this Leninist support of the suppression of Kronstadt is that, for Leninism, it is dangerous to allow
come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner.

“The process of alienating the Russian masses from the Revolution had begun almost immediately after Lenin and his party had ascended to power. Crass discrimination in rations and housing, suppression of every political right, continued persecution and arrests, early became the order of the day. True, the purges undertaken at that time did not include party members ... But all the other political opponents, among them Mensheviks, Social Revolutionists, Anarchists, many of the Liberal intelligentsia and workers as well as peasants, were given short shrift in the cellars of the Cheka, or exiled to slow death in distant parts of Russia and Siberia. In other words, Stalin has not originated the theory or methods that have crushed the Russian Revolution and have forged new chains for the Russian people.

“I admit, the dictatorship under Stalin’s rule has become monstrous. That does not, however, lessen the guilt of Leon Trotsky as one of the actors in the revolutionary drama of which Kronstadt was one of the bloodiest scenes.” [“Trotsky Protests Too Much”, Op. Cit., pp. 251–2]

Lastly, the supporters of Bolshevism argue that in suppressing the revolt “the Bolsheviks only did their duty. They defended the conquests of the revolution against the assaults of the counterrevolution.” [Wright, “The Truth about Kronstadt”, Op. Cit., p. 123] In other words, we can expect more Kronstads if these “revolutionaries” gain power — no clearer condemnation of Bolshevism as a socialist current is required. More, that is how Kronstadt is used in Leninist circles to this day, namely to steel the revolutionary cadres for

Regardless of the suggested alternative to Kronstadt’s Third Revolution, it can only be concluded that it did not exist — the balance of forces at the time, the nature of the regime, the ideology of the ruling elite, all pointed to this during the revolt itself. The unchallenged master of the economy and society, the Bolshevik bureaucracy was the nucleus of a new ruling class — the notion that such a machine could be controlled or appealed to by a few “pure” party members is the infantile delusion. This new bureaucratic class could only be removed by a Third Revolution and while this, possibly, could have resulted in a bourgeois counter-revolution the alternative of maintaining Bolshevik dictatorship would inevitably have resulted in Stalinism. When supporters of Bolshevism argue that Kronstadt would have opened the door to counter-revolution, they do not understand that the Bolsheviks were the counter-revolution in 1921 and that by suppressing Kronstadt the Bolsheviks not only opened the door to Stalinism but invited it in and gave it the keys to the house.

Lastly, we should draw some parallels between the fates of the Kronstadt sailors and the Left Opposition. John Rees argues that the Left Opposition had “the whole vast propaganda machine of the bureaucracy . . . turned against them;” a machine used by Trotsky and Lenin in 1921 against Kronstadt. Ultimately, the Left Opposition “were exiled, imprisoned and shot,” again like the Kronstadters and a host of revolutionaries who defended the revolution but opposed the Bolshevik dictatorship. [Op. Cit., p. 68]

A Third Revolution was the only real alternative in Bolshevik Russia. Any struggle from below post-1921 would have raised the same problems of soviet democracy and party dictatorship which Kronstadt raised. Given that the Left Opposition subscribed to the “Leninist principle” of “the dictatorship of the party;” it could not appeal to the masses as its members knew that not only would they not vote for it, the masses would hardly have taken to the streets for such a pitiful set of reforms. The arguments raised against Kronstadt that soviet democracy would lead to counter-revolution
are equally applicable to movements which appealed, as Rees desires, to the Russian working class post-Kronstadt. Moreover, any mass revolt would have faced the same state machine utilised in 1921 against Petrograd and Kronstadt. Finally, any Leninist external revolution would have imposed party dictatorship and state-capitalism following Bolshevik orthodoxy — along with the associated bureaucracy this hierarchical, centralised regime necessitated.

To conclude, the claim that Kronstadt would inevitably have led to an anti-proletarian dictatorship fails. Yes, it might have but the Bolshevik dictatorship itself was anti-proletarian (it had repressed proletarian protest, organisation, freedom and rights on numerous occasions) and it could never be reformed from within by its social position and the very logic of its own ideology. The rise of Stalinism was inevitable after the crushing of Kronstadt for there are no benevolent dictatorships, not even socialist ones headed by Trotsky. This is not hindsight — a massive, corrupt bureaucratic machine which had crushed numerous strikes, protests and revolts by the workers and peasants before early 1921 would not have been kept "pure" by a handful of leaders elected by a self-selected party which proclaimed the necessity of its own dictatorship.

14 How do modern day Trotskyists misrepresent Kronstadt?

We have discussed how Trotskyists have followed their heroes Lenin and Trotsky in abusing the facts about the Kronstadt sailors and uprising in previous sections. In section 8, we have indicated how they have selectively quoted from academic accounts of the uprising and suppressed evidence which contradicts their claims. In section 7, we have shown how they have selectively quoted from Paul Avrich's book on the revolt to paint a false picture of the connections between the Kronstadt sailors and the Whites. In section 10, we exposed how the repression against the Petrograd strikers themselves during the Civil War, but later on he was to characterise the Kronstadt rebels as 'stool pigeons' and 'hirelings of the French High Command.' They lack the categories of thought — the brain cells, we might dare say — necessary to understand, or even to record, this activity as it really occurs: to them, an activity that is not instituted, that has neither boss nor program, has no status; it is not even clearly perceptible, except perhaps in the mode of 'disorder' and 'troubles.' The autonomous activity of the masses belongs by definition to what is repressed in history.” [Op. Cit., p. 91]

The Trotskyist accounts of the Kronstadt revolt, with their continual attempts to portray it as a White conspiracy, proves this analysis is correct. Instead it was labelled the work of "backward peasants" being misled by SRs, a White General and spies — indeed, the possibility that the revolt was a spontaneous mass revolt with political aims was dismissed by one of them as "absurd". [Wright, "The Truth about Kronstadt"; Op. Cit., p. 111] Like the capitalist who considers a strike the work of "outside agitators" and "communists" misleading their workers, the Trotskyists present an analysis of Kronstadt reeking of elitism and ideological incomprehension. Independent self-activity by the working class is dismissed as "backward" and to be corrected by the “proletarian dictatorship” by any means necessary. Clearly Bolshevik ideology played a key role in the rise of Stalinism along with the regime built by Lenin and Trotsky which the Kronstadt sailors rebelled against. As Emma Goldman summarised:

"I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is. No, I hold no brief for the present ruler of Russia. I must, however, point out that Stalin did not
from someone who believes in decentralisation, federalism and self-management. In other words, political ideas do matter in society. Nor do anarchists leave our analysis at this obvious fact, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a federal, egalitarian system. That Frank seems to deny this obvious fact suggests he knows nothing of materialist philosophy and subscribes to the distinctly lobotomised (and bourgeois) “historical materialism” of Lenin (see Anton Pannekoek’s *Lenin as Philosopher* for details).

All in all, the attitude of Leninists to the Kronstadt event shows quite clearly that, for all their lip-service to history from below, they are just as fixated with leaders as is bourgeois history. As Cornelius Castoriadis argues:

“Now, we should point out that it is not workers who write history. It is always the others. And these others, whoever they may be, have a historical existence only insofar as the masses are passive, or active simply to support them, and this is precisely what ‘the others’ will tell us at every opportunity. Most of the time these others will not even possess eyes to see and ears to hear the gestures and utterances that express people’s autonomous activity. In the best of instances, they will sing the praises of this activity so long as it miraculously coincides with their own line, but they will radically condemn it, and impute to it the basest motives, as soon as it strays therefrom. Thus Trotsky describes in grandiose terms the anonymous workers of Petrograd moving ahead of the Bolshevik party or mobilising was removed from history. Here we summarise some of the other misrepresentations of Trotskyists about the revolt.

We noted in section 3 how Trotskyists fail to quote the Kronstadt demands. They often go one further by inventing them. Thus, for example, John Rees asserts that the Kronstaders were fighting for “soviets without parties.” [Op. Cit., p. 63] His fellow-party member Pat Stack goes one further and asserts that the “central demand of the Kronstadt rising though was ‘soviets without Bolsheviks’, in other words, the utter destruction of the workers’ state.” [“Anarchy in the UK?”, Socialist Review, no. 246, November 2000] Both reference Paul Avrich’s book *Kronstadt 1921* in their articles yet this is unambiguous: “‘Soviets without Communists’ was not, as is often maintained by both Soviet and non-Soviet writers, a Kronstadt slogan.” Nor did they agitate under the banner “soviets without parties.” They argued for “all power to the soviets and not to parties.” Political parties were not to be excluded from the soviets, simply stopped from dominating them and substituting themselves for them. As Avrich notes, the Kronstadt programme “did allow a place for the Bolsheviks in the soviets, alongside the other left-wing organisations ... Communists ... participated in strength in the elected conference of delegate, which was the closest thing Kronstadt ever had to the free soviets of its dreams.” The index for Avrich’s work handily includes this page in it, under the helpful entry “soviets: ‘without Communists.’” [Kronstadt 1921, p. 181 and p. 269]

The central demand of the uprising was simply soviet democracy and a return to the principles that the workers and peasants had been fighting the whites for. In other words, both Leninists have misrepresented the Kronstadt revolt’s demands and so misrepresented its aims while, at the same time, claiming to have read a work which debunks their own claim.

Rees goes one step further and tries to blame the Bolshevik massacre on the sailors themselves. He argues “in Petrograd Zinoviev had already essentially withdrawn the most detested aspects of War Communism in response to the strikes.” [Op. Cit., p. 63] Needless to
say, Zinoviev did not withdraw the political aspects of War Communism, just some of the economic ones and, as the Kronstadt revolt was mainly political, these concessions were not enough — indeed, the repression directed against workers’ rights and opposition socialist and anarchist groups increased. As such, Zinoviev confirmed what Kuzmin had warned the Conference of Delegates on 2nd March in Kronstadt, namely “that the Communists would on no account surrender power or share it with another political party or group.” [George Katkov, Op. Cit., p. 30] Rees then states the Kronstaders “response [to these concessions] was contained in their What We Are Fighting For” and quotes it as follows:

“there is no middle ground in the struggle against the Communists ... They give the appearance of making concessions: in Petrograd province road-block detachments have been removed and 10 million roubles have been allotted for the purchase of foodstuffs... But one must not be deceived ... No there can be no middle ground. Victory or death!” [quoted by Rees, Op. Cit., p. 63]

What Rees fails to inform the reader is that this was written on March 8th, while the Bolsheviks had started military operations on the previous evening. Moreover, the fact the “response” stated “[w]ithout a single shot, without a drop of blood, the first step has been taken [of the “Third Revolution”]. The toilers do not need blood. They will shed it only at a moment of self-defence” is not mentioned. [quoted by Avrich, Op. Cit., p. 243] In other words, the Kronstadt sailors reaffirmed their commitment to non-violent revolt. Any violence on their part was in self-defence against Bolshevik actions. Not that you would know that from Rees’ work. Indeed, as another one of his sources indicates, the rebels “had refrained from taking any communist lives. The Soviet Government, on the other hand, as early as March 3, already had executed forty-five seamen at Oranienbaum — a quite heavy proportion of the total personnel of the men

Kronstadt, pp. 22–3] Yet nothing could be further from the truth — what anarchists argue (like Lenin before the October revolution) is that every revolution will suffer from isolation, uneven political development, economic problems and so on (i.e. “exceptional circumstances,” see the appendix “What caused the degeneration of the Russian Revolution?”). The question is whether your revolution can survive them and whether your political ideas can meet these challenges without producing bureaucratic deformations. As can be seen from the Russian Revolution, Leninism fails that test.

Moreover, Frank is being incredulous. If we take his argument seriously then we have to conclude that Bolshevik ideology played no role in how the revolution developed. In other words, he subscribes to the contradictory position that Bolshevik politics were essential to the success of the revolution and yet played no role in its outcome. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions they face. What decisions they make will be influenced by the ideas they hold — they will not occur automatically, as if people were on auto-pilot — and their decisions are also shaped by the social relationships they experience. Thus, someone placed into a position of power over others will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations. Likewise, someone who favoured working class self-activity and did not view it as “petty-bourgeois” would not, as Zinoviev did in the summer of 1920, issue “a decree forbidding any kind of commercial transaction. The few small shops still open were closed and their doors sealed. However, the State apparatus was in no position to supply the towns. From this moment on, famine could no longer be attenuated by the initiative of the population. It became extreme.” [Mett, Op. Cit., p. 144]

So, obviously “ideas” matter, particularly during a revolution. Someone in favour of centralisation, nationalisation and who equates party rule with class rule (like Zinoviev, Lenin and Trotsky), will act in ways (and create structures) totally different
centrating power in the hands of a few, the political development of the bulk of the population is hindered. No longer in control of their fate, of their revolution, they will become prey to counter-revolutionary tendencies. Nor was the libertarian approach impossible to implement during a revolution or civil war. Anarchists applied their ideas very successfully in the Makhnovist movement in the Ukraine — as we discuss in more detail in the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”, within the areas they protected, the Makhnovists refused to dictate to the workers and peasants what to do and instead encouraged free soviets and workers’ control. In contrast, the Bolsheviks tried to ban congresses of workers’, peasants’ and soldiers’ delegates called by the Makhnovists. This should make the reader ponder if the elimination of workers’ democracy during the civil war can be fully explained by the objective conditions facing Lenin’s government or whether Leninist ideology played an important role in it.

The terrible objective circumstances facing the revolution obviously played a key role in the degeneration of the revolution. However, this is not the whole story. The ideas of the Bolsheviks played a key role as well — not least in often making those terrible objective circumstances worse by policies which centralised decision making and so produced wasteful, inefficient, ever-growing and corrupt bureaucracy. The circumstances the Bolsheviks faced may have shaped certain aspects of their actions, but it cannot be denied that the impulse for these actions were rooted in Bolshevik theory. In regards to this type of analysis, the Trotskyist Pierre Frank argues that anarchists think that bureaucratic conceptions “beget bureaucracy” and that “it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical idealism has laid low historical materialism.” This means, apparently, that anarchists ignore objective factors in the rise of the bureaucracy such as “the country’s backwardness, low cultural level, and the isolation of the revolution.” [Lenin and Trotsky, at the Naval Aviation Detachment. These men had voted for the Kronstadt resolution, but did not take arms against the government. This mass execution was merely a prelude to those that took place after the defeat of the mutineers.” These executions at Oranienbaum, it should be noted, exceeded the total of 36 seamen who had paid with their lives for the two large rebellions of the 1905 revolution at Kronstadt and Sveaborg. [D. Fedotoff-White, Op. Cit., p. 156]

Ted Grant, of the UK’s Socialist Appeal re-writes history significantly in his work Russia: From revolution to counter-revolution. He asserts, without providing any references or evidence, that the “first lie” of anti-Bolshevik writers on the subject “is to identify the Kronstadt mutineers of 1921 with the heroic Red sailors of 1917.” Yet this book appeared in 1997, long after the academic research we quote in section 8 proven that over 90% of the sailors on the two battleships which started the revolt had been recruited before and during the 1917 revolution and at least three-quarters of the sailors were old hands who had served in the navy through war and revolution. So was the majority of the Provisional Revolutionary Committee. Grant also asserts that the sailors in 1917 and 1921 “had nothing in common” because those “of 1917 were workers and Bolsheviks”, so ignoring the substantial evidence which had appeared decades before which — as we summarised in section 9 — showed that the Bolsheviks were a minority in Kronstadt during 1917 and that the demands raised in the revolt in 1921 matched the politics dominant in 1917. For good measure, he proclaims “[t]hat there were actual counter-revolutionary elements among the sailors was shown by the slogan ‘Soviets without Bolsheviks’” without apparently aware that this was never raised in Kronstadt.

Grant claims that “almost the entire Kronstadt garrison volunteered to fight in the ranks of the Red Army during the civil war.” Are we to believe that the Bolshevik commanders left Kronstadt (and so Petrograd) defenceless during the Civil War? Or drafted the skilled and trained (and so difficult to replace) sailors away
from their ships, so leaving them unusable? Of course not. Common sense refutes Grant’s argument even if you were unaware, as he was, of the statistical evidence that on 1st January, 1921, at least 75.5% of the Baltic Fleet was likely to have been drafted before 1918 and over 80% were from Great Russian areas and some 10% from the Ukraine. [Gelzter, Kronstadt 1917–1921, p. 208]

Not to be outdone, Grant then states that the “Kronstadt garrison of 1921 was composed mainly of raw peasant levies from the Black Sea Fleet. A cursory glance at the surnames of the mutineers immediately shows that they were almost all Ukrainians.” According to Paul Avrich, “[s]ome three or four hundred names appear in the journal of the rebel movement ... So far as one can judge from these surnames alone ... Great Russians are in the overwhelming majority.” Of the 15 person Provisional Revolutionary Committee, “three ... bore patently Ukrainian names and two others... Germanic names.” Of the three Ukrainians, two were sailors who “had fought on the barricades in 1917.” [Paul Avrich, Op. Cit., pp. 92–3 and p. 91] He also suggests that “[i]t is interesting to note that members of the Workers’ Opposition, a semi-anarcho-syndicalist tendency present at the Congress, also joined the attacking forces. This nails yet another lie, which attempts to establish a clumsy amalgam between Kronstadt — anarchism — Workers’ Opposition \96 three things that have absolutely nothing in common.” Ignoring the awkward fact that only Trotsky’s biography Isaac Deutscher claimed Kronstadt was led by anarchists, we can simply note that it was the leadership of the Bolsheviks who sought to link the Workers’ Opposition with Kronstadt at the time:

“But I ask: Why is Shlyapnikov not prosecuted for making such statements? Are we seriously discussing discipline and unity in an organised Party, or are we at a meeting of the Kronstadt type? For his is a Kronstadt, anarchist type of statement, to which the response is a gun.” [Lenin, Collected Works, vol. 32, p. 206]
the choice be made to put the social forces at the disposal ...? Will it be instead a government elected by universal suffrage, and thus the more or less sincere expression of the wishes of the majority? But if you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?” [Malatesta, Anarchy, pp. 53–4]

Hence the need for federalism, workers’ democracy and socio-economic self-management, for the demands of the Kronstadt revolt. As Malatesta put it: “Only freedom or the struggle for freedom can be the school for freedom.” [Errico Malatesta: His Life and Ideas, p. 59] The “epic of Kronstadt” proves “conclusively that what belongs really to the workers and peasants can be neither governmental nor statist, and what is governmental and statist can belong neither to the workers nor the peasants.” [Voline, The Unknown Revolution, p. 503] Kronstadt, in the words of Alexander Berkman, “proves once more that government, the State — whatever its name or form — is ever the mortal enemy of liberty and self-determination. The state has no soul, no principles. It has but one aim — to secure power and hold it, at any cost. That is the political lesson of Kronstadt.” [“The Kronstadt Rebellion”, Op. Cit., p. 89]

Anarchists are well aware that differences in political perspective exist within the working class. We are also aware of the importance of revolutionaries organising together to influence the class struggle, raising the need for revolution and the creation of working class organisations which can smash and replace the state with a system of self-managed communes and workers’

Alexander Shlyapnikov was a leader of the Workers’ Opposition so, as Nicolas Walter noted in 1971, “[a]ttempts to assimilate Kronstadt to the Workers’ Opposition, which were made by the Leninists at the time as part of the amalgam technique of propaganda and which have been made by libertarian Marxists since then as part of a similar technique in reverse, break on the decisive fact that the Workers’ Opposition ... always retained as its fundamental principle the Communist monopoly of power — the structure of the Bolshevik regime was to be changed, but not its basis as a party dictatorship; the fundamental principle of the Kronstadt programme, on the other hand, was precisely the removal of that dictatorship. The essential difference, however, was not in words but in deeds: when it came to a practical choice between Communism and communism, the Workers’ Opposition gladly turned their guns on Kronstadt.” [Op. Cit., p. 149]

And Grant talks about the “[m]any falsifications... written about this event,” that it “has been virtually turned into a myth” and that “these allegations bear no relation to the truth.” Truly amazing — although, to be fair, he may have been genuinely ignorant of the research on the subject but his readers would surely have expected him to do some investigation of the facts before so confidently accusing others of falsification and myth-making. The best that can be said is that he made no attempt to suggest he had read Paul Avrich’s and Israel Gelzter’s essential books on the subject while making his assertions.

Another SWP member, Abbie Bakan, asserts that “more than three quarters of the sailors” at Kronstadt “were recent recruits of peasant origin” but refuses to provide a source for this claim. [“A Tragic Necessity”, Socialist Worker Review, no. 136] As noted above, such a claim is false. The likely source for the assertion is Paul Avrich, who noted that more than three-quarters of the sailors were of peasant origin but Avrich does not say they were all recent recruits. While stating that there could be “little doubt” that the Civil War produced a “high turnover” and that “many” old-timers had been replaced by conscripts from rural areas, he does not in-
dicate that all the sailors from peasant backgrounds were new recruits. He also notes that “there had always been a large and unruly peasant element among the sailors.” [Op. Cit., pp. 89–90] It should be noted that Bakan seems ignorant of the research by Evan Mawdsley and Israel Gelzter which show beyond doubt that most of the sailors had been there in 1917. Like Grant, Bakan seems unwilling to research the subject being discussed — unlike Grant, Bakan is an academic.

She asserts that anti-Semitism “was vicious and rampant” yet fails to provide any official Kronstadt proclamations expressing this perspective. Rather, we are to generalise from the memoirs of one sailor who was not even based in Kronstadt and the anti-Semitic remark of Vershinin, a member of the Revolutionary Committee, which was reported by Bolshevik sources. The source for these claims is Paul Avrich’s book but, as Nicolas Walter points out, “he offers very little evidence for this. He quotes some hair-raising passages from the manuscript memoirs of a sailor who was serving in Petrograd, and refers to the sailor’s claim that his views were widely shared by his colleagues in the fleet ... That isn’t much of an argument, and the only other piece of evidence — the Bolshevik story that one of the first Kronstadt rebels they caught shouted to his captors to ‘join us and beat the Jews’ — is derisory. In view of the powerful tradition of antisemitism in Russia ... the remarkable thing is that there seems to have been virtually no breath of antisemitism during the Kronstadt rising.” [Op. Cit., pp. 147–8] Nor should we forget that the opinions of the single sailor whose testimony is verifiable (who, let us stress, was not even in Kronstadt) were irrelevant to the Bolsheviks when they drafted him in the first place. More importantly, this “vicious and rampant” anti-Semitism failed to be expressed in the demands raised nor the Kronstadt rebels’ newspaper or their radio broadcasts. Needless to say, the Bolsheviks failed to mention it at the time.

Yes, it is true that as Bakan (echoing Avrich) noted that the “worse venom of the Kronstadt rebels was levelled against Trotsky soviets must represent counter-revolutionary tendencies. As the working class is divided and subject to “vacillations” due to “waver-
ing and unstable elements among the masses themselves,” working class people simply cannot manage society themselves. Hence “the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” [Trotsky, “The Platform of the Opposition”, The Chal-

lege of the “Left Opposition” (1926–27), p. 395] And, equally logically, to events like Kronstadt. Thus Cornelius Castoriadis:

“To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The ‘need’ for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the ‘need’ for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and, in the final analy-

sis, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy.”

[Political and Social Writings, vol. 3, p. 104]

Moreover, the logic of the Bolshevik argument is flawed:

“Besides, if one wants a government which has to educate the masses and put them on the road to anarchy, one must also indicate what will be the background, and the way of forming this government.

“Will it be the dictatorship of the best people? But who are the best? And who will recognise these qualities in them? ... by whom and with what criterion will
available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40,913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants of workers. [George Leggett, The Cheka: Lenin's Political Police, p. 178] Ironically, the same Bolshevik ideology which proclaimed this dictatorship over the proletariat a “proletarian” regime deemed the proletariat itself to be “petty-bourgeois” in order to justify this repression.

This can be seen all through the history of Bolshevism. Bambery states (correctly) that “Lenin and the Bolsheviks initially opposed” the spontaneously formed soviets of 1905 but then, incredulously, assigns this opposition to the assertion that their “model of revolution was still shaped by that of the greatest previous revolution in France in 1789.” [Op. Cit.] In reality, it was because they considered, in the words of a leading Bolshevik, that “only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.” [quoted by Oskar Anweiler, The Soviets, p. 77] The soviet, in other words, could not represent the interests of the working class because it was elected by them! The Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political programme or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the subordination of consciousness to spontaneity, following Lenin in What is to be Done? when he had argued that the “spontaneous development of the labour movement leads to it being subordinated to bourgeois ideology.” [Essential Works of Lenin, p. 82]

This perspective is at the root of all Bolshevik justifications for party power after the October revolution. With the perception that spontaneous developments inevitably leads to bourgeois domination, any attempt to revoke Bolshevik delegates and elect others to and Zinoviev” but it was not because, as Bakan asserts, they were “treated as Jewish scapegoats.” Their ethnic background was not mentioned by the Kronstadt sailors and they were strong political reasons for attacking them. As Paul Avrich wrote, “Trotsky in particular was the living symbol of War Communism, of everything the sailors had rebelled against. His name was associated with centralisation and militarisation, with iron discipline and regimentation.” As for Zinoviev, he had “incurred the sailors’ loathing as the party boss who had suppressed the striking workers and who had stooped to taking their own families as hostages.” [Op. Cit., p. 178 and p. 176] Good reasons to attack them and nothing to do with them being Jewish. Needless to say, Bakan seems selective in her concern over anti-Semitism and makes no mention of Emma Goldman’s comment:

“To be sure, the former commissar assures us that ‘the peasants reconciled themselves to the requisition as a temporary evil,’ and that ‘the peasants approved of the Bolsheviks, but became increasingly hostile to the “Communists”‘. But these contentions are mere fiction ... In point of historic truth, the peasants hated the regime almost from the start, certainly from the moment when Lenin’s slogan, ‘Rob the robbers,’ was turned into ‘Rob the peasants for the glory of the Communist Dictatorship.’ That is why they were in constant ferment against the Bolshevik Dictatorship. A case in point was the uprising of the Karelian Peasants drowned in blood by the Tsarist General Slastchev-Krimsky ... [who] had fought against the Revolution from its very beginning and had led some of the Wrangel forces in the Crimea. He was guilty of fiendish barbarities to war prisoners and infamous as a maker of pogroms. Now Slastchev-Krimsky recanted and he returned to ‘his Fatherland.’ This arch-counter revolutionist and Jew-baiter, together with sev-
eral Tsarist generals and White Guardists, was received by the Bolsheviki with military honours. No doubt it was just retribution that the anti-Semite had to salute the Jew, Trotsky, his military superior. But to the Revolution and the Russian people the triumphal return of the imperialist was an outrage." [“Trotsky Protests Too Much”, Op. Cit., pp. 259–60]

Bakan states that the “demands of the Kronstadt sailors reflected the ideas of the most backward section of the peasantry.” As can be seen from section 3, such a comment cannot be matched with the actual demands raised (demands, of course, which are not provided). So which ideas reflected the “most backward section of the peasantry”? Free elections to the Soviets, freedom of speech and of the press for workers and peasants, right of assembly, freedom for trade union and peasant organisations, a conference of workers, soldiers and sailors, liberation of all political, worker and peasant prisoners, equalisation of rations, freedom for peasants as long as they do not employ hired labour, and so on? All these could, indeed should, be included in most socialist parties programmes and were, in fact, key elements of Bolshevik rhetoric in 1917 and reflected key aspects of the Soviet Constitution. Moreover, these “backward” peasants send a radio message marking International Woman’s Day, hoping that women would “soon accomplish” their “liberation from every form of violence and oppression.” [quoted by Alexander Berkman, “The Kronstadt Rebellion”, Op. Cit., p. 85]

How “backward” can you get!

Bakan pathetically acknowledges that their demands included “calls for greater freedoms” yet looks at the “main economic target” (not mentioning they were points 8 and 11 of the 15 demands, the bulk of the rest are political). These, apparently, were aimed at “the programme of forced requisitioning of peasant produce and the roadblock detachments that halted the black market in grain.” Given that she admits that the Bolshevik leadership was “already discussing” lead to anti-socialist conclusions (see section H.5) and this can be seen from how Bambery’s comments have exactly the same basis of Trotsky’s defence of the need of party dictatorship and why Kronstadt was counterrevolutionary. Bambery notes that even “in the soviets” there will be “divisions” and so we have the basic assumption which, combined with centralisation, vanguardism and other aspects of Bolshevism, leads to events like Kronstadt and the destruction of soviet power by party power. The arguments for centralisation mean, in practice, the concentration of power in the centre, in the hands of a few party leaders, as the working masses cannot be trusted to make the correct (“revolutionary”) decisions. This centralised power is then used to impose the will of the leaders, who use state power against the against whoever protests against the dictatorship of the party, including the very class they claim to represent. Thus the transformation of the “dictatorship of the proletariat” into the dictatorship over the proletariat under the Bolsheviks came as no surprise to anarchists.

Of course, it will be replied that the Bolshevik dictatorship used its power to crush the resistance of the bosses (and “backward workers” — that is, any workers who disagreed with the vanguard). Sadly, this is not the case. Lenin’s argument is flawed as it confuses the defence of the revolution with the defence of the party in power. These are two totally different things. The “revolutionary coercion” Lenin speaks of is, apparently, directed against one part of the working class. However, this will also intimidate the rest (just as bourgeois repression not only intimidates those who strike but those who may think of striking). As a policy, it can have but one effect — to eliminate all workers’ power and freedom. It is the violence of an oppressive minority against the oppressed majority, not vice versa. Ending free speech harmed working class people. Eliminating soviet democracy and union independence did not affect the bourgeoisie — neither did the militarisation of labour and the repression of strikes. Unsurprisingly, of the 17 000 camp detainees on whom statistical information was
“There can be no common ground between such approaches. For the authoritarian argues that the libertarian approach is noble but ‘utopian’ and doomed to failure from the start, while the libertarian argues on the evidence of history, that the authoritarian methods will simply replace one coercive state by another, equally despotic and remote from the people, and which will no more ‘wither away’ than its capitalist predecessor.”

[Lessons of the Spanish Revolution, p. 206]

Thus the reality of the Bolshevik regime confirmed Bakunin’s prediction that Marxism meant “the highly despotic government of the masses by a new and very small aristocracy of real or pretended scholars. The people are not learned, so they will be liberated from the cares of government and included in entirety in the governed herd.”

[Statism and Anarchy, pp. 178–9] True, while modern day Leninists follow Trotsky’s arguments they rarely acknowledge where they logically led or that their heroes explicitly acknowledged this conclusion and justified it. They do not state this position as honestly as did Lenin and Trotsky — although we do see echoes of it in their attempts to justify the repression of Kronstadt — as can be seen when Chris Bambery of the British SWP argues that “in Lenin’s concept of the party, democracy is balanced by centralism” for the “working class is fragmented. There are always those who wish to fight, those who will scab and those in between. Even in the soviets those divisions will be apparent. Revolutionary organisation does not aspire to represent the working class as a whole. It bases itself on those workers who want to challenge capitalism, and seeks to organise those to win the majority of workers to the need to take power.”

[“Leninism in the 21st century”, Socialist Review, no. 248]

Anarchists, as discussed in section J.3.6, recognise that the truth of this description of the working class but we draw radically different conclusions in terms of the relationship of socialists to that class and its divisions. We also argue that the Leninist assumptions the end of these features (due to their lack of success) it must be the case that the likes of Lenin, Zinoviev and Trotsky also “reflected the ideas of the most backward section of the peasantry”. Moreover, the demand to end the roadblocks was also raised by the Petrograd and Moscow workers during their strikes, as were most of the other demands raised by Kronstadt. [Avrich, Op. Cit., p. 42] The “most backward section of the peasantry” was getting around in those days, appearing as they were in the highest echelons of the Bolshevik party bureaucracy and the factories of Petrograd and other major cities!

In reality, of course, the opposition to the forced requisitioning of food and the roadblocks between town and countryside was a combination of ethical and practical considerations — not least, being counterproductive. As the striking workers show, you did not have to be a peasant to see this. Victor Serge, for example, recollected he would “have died without the sordid manipulations of the black market.” [Memoirs of a Revolutionary, p. 79] He was a government official, think how much worse it would have been for an ordinary worker. These policies harmed everyone, including industrial workers — little wonder they struck for their end and little wonder the sailors expressed solidarity with them and included it in their demands. Therefore, nothing can be drawn from these demands about the class nature of the revolt.

In an interesting example of double-think, Bakan then states that the sailors “called for the abolition of Bolshevik authority in the army, factories and mills.” What the resolution demanded was, in fact, “the abolition Party combat detachments in all military groups” as well as “Party guards in factories and enterprises” (point 10). In other words, to end the intimidation of workers and soldiers by armed communist units in their midst. Needless to say, we discover Leninists denounce this when Stalinists do it, arguing that “people who seriously believe that workers at the height of revolution need a police guard to stop them handing their factories over to capitalists certainly have no real faith in the possibilities of a socialist
future.” [Chris Harman, Bureaucracy and Revolution in Eastern Europe, p. 144]

Likewise, when Bakan states that “the real character of the rebellion” can be seen from the opening declaration that “the present soviets do not express the will of the workers and peasants” she could not have made a truer comment. The Kronstadt rebellion was a revolt for soviet democracy and against party dictatorship — so soviet democracy would only have led to “abolition of Bolshevik authority” if the existing soviets, as the resolution argued, did not express the will of their electors. Ignoring the reality of the situation in terms of lack of genuine soviet democracy under the Bolshevik dictatorship, she asserts that the Provisional Revolutionary Committee was “non-elected” and so contradicts every historian who acknowledges it was elected by the Conference of Delegates on March 2nd and expanded by the next conference a few days later. She even considers the fact the delegate meeting’s “denial of party members’ usual role in chairing the proceedings” as one of many “irregularities” while, of course, the real irregularity was the fact that one party (the government party) had such a “usual role” in the first place! Moreover, given that that Petrograd soviet meeting to discuss the revolt had Cheka guards (Lenin’s political police) on it, her notion that sailors guarded the Conference of Delegates meeting (a meeting held in opposition to the ruling party) was “irregular” seems ironic.

Lastly, the issue of the Memorandum of the White National Centre is raised and used as evidence that “Lenin’s suspicion of an international conspiracy linked up with the Kronstadt events has been vindicated.” Needless to say, she fails to mention that the historian who discovered the document rejected the notion that it proved that Kronstadt was linked to such a conspiracy (see section 6 for a full discussion). Much is made of the claim that “[t]wo weeks after the Kronstadt rebellion the ice was due to melt” and that “[h]olding out until the ice melted was identified as critical in the memorandum,” but this is not true. The Memorandum in fact, as Paul Avrich notes, “assumes that the rising will occur after the ice has melted.”

mine the democracy it claimed to embody. The Russian Revolution showed that Bakunin had been right to argue against Marx that the “workers’ state” would not remain controlled by the workers for long and would soon become a dictatorship over the proletariat by an elite which claimed to know the interests of the working class better than they did themselves. The logic of the centralisation favoured by Marxism clearly implies that when the party suppressed Kronstadt, when it disbanded non-Bolshevik soviets in early 1918 and robbed the workers and soviets of their power, the Bolsheviks were acting in the best interests of masses. The notion that Leninism is a revolutionary theory is invalidated by these arguments and practices they reflected. Rather than aim for a society based on workers’ power, they aim for a “workers’ state” in which workers delegate their power to the leaders of the party who then use that very same power to retain its social position in the face of popular dissent (the localities placing new obstacles in the way of the centralised state authority). Such an approach is doomed to failure — it cannot produce a socialist society as such a society (as Bakunin stressed) can only be built from below by the working class itself. As Vernon Richards argues:

“The distinction between the libertarian and authoritarian revolutionary movements in their struggle to establish the free society, is the means which each proposes should be used to this end. The libertarian maintains that the initiative must come from below, that the free society must be the result of the will to freedom of a large section of the population. The authoritarian ... believes that the will to freedom can only emerge once the existing economic and political system has be replaced by a dictatorship of the proletariat [i.e., the dictatorship of the party] which, as the awareness and sense of responsibility of the people grows, will wither away and the free society emerge.
So, if this vanguard is suppressing the proletariat itself, crushing its resistance by force, then by Lenin’s own logic “where there is suppression and where there is violence” then for the working class “there is no freedom and no democracy”. And, indeed, this was in fact the situation post-October. Likewise, in 1905, Lenin had argued (and used Engels as an authority) that “the principle, only from below is an anarchist principle.” For Lenin, Marxists must be in favour of “From above as well as from below” and “renunciation of pressure also from above is anarchism” as “[p]ressure from below is pressure by the citizens on the revolutionary government. Pressure from above is pressure by the revolutionary government on the citizens.” [Lenin, Op. Cit., vol. 8, p. 477, p. 474, p. 481 and p. 474] Yet, as Kronstadt shows, “pressure from above” has an advantage over “pressure from below” as it has the full power of the state apparatus to use against the citizens. In other words, the seeds for degeneration of the revolution and the repression of Kronstadt lie at the heart of the Bolshevik ideology — and in Marxism itself:

“The workers ... must not only strive for a single and indivisible German republic, but also within this republic for the most determined centralisation of power in the hands of the state authority. They must not allow themselves to be misguided by the democratic talk of freedom for the communities, of self-government, etc.... it must under no circumstances be permitted that every village, every town and every province should put a new obstacle in the path of revolutionary activity, which can proceed with full force only from the centre ... As in France in 1793 so today in Germany, it is the task of the really revolutionary party to carry through the strictest centralisation.” [Marx, Marx-Engels Collected Works, vol. 10, p. 285]

Such a perspective cannot help having disastrous consequences for a revolution as this centralisation of power would soon under-

To conclude, these writings shows how deeply the supporters of Leninism will sink to when attempting to discuss the Kronstadt rebellion. Sadly, as we have indicated many, many times, these are not isolated occurrences. Long refuted claims are repeated by those who seem to think doing research on a subject before writing about it is as counter-revolutionary as accurately reflecting the facts and arguments in any book they do deem fit to consult.

15 What does Kronstadt tell us about Bolshevism?

The rationales used by Lenin, Trotsky and their followers are significant aids to getting to the core of the Bolshevik Myth. These rationales and the various bad faith activities (selective quoting, invention, cherry-picking, deliberately ignoring relevant facts, etc.) utilised to create them allow us to understand the limitations of Bolshevik ideology and how it contributed to the degeneration of the revolution. However, the Kronstadt revolt should not be viewed in isolation — it was the climax of a process which had started as soon as the Bolsheviks had seized power in 1917. As Nicolas Walter suggests:

“Each side in every conflict, after all, behaves in accordance with its own particular goals and aspirations. It is action, more than anything else, which reveals the true nature of human beings. This in fact is the basis for our total condemnation of the Bolsheviks. We are not concerned with the possibility that the success of Kronstadt might have led to chaos, civil war, or counter-revolution, but with the certainty that the failure of Kronstadt did lead to dictatorship, purges, and counter-revolution. The suppression of real communists calling for real soviet power by people who described themselves as the Com-
not result merely in an expansion of democracy. Simultaneously with an immense expansion of democracy, which for the first time becomes democracy for the poor, democracy for the people, and not democracy for the money-bags, the dictatorship of the proletariat imposes a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists. We must suppress them in order to free humanity from wage slavery, their resistance must be crushed by force; it is clear that there is no freedom and no democracy where there is suppression and where there is violence." [“The State and Revolution”, Collected Works, vol. 25, pp. 466–7]

As the dissident (working class) Communist Gavriii Miasnokov argued in 1921 against Lenin’s defence of the regime and its authoritarianism:

“The trouble is that, while you raise your hand against the capitalist, you deal a blow to the worker. You know very well that for such words as I am now uttering hundreds, perhaps thousands, of workers are languishing in prison. That I myself remain at liberty is only because I am a veteran Communist, have suffered for my beliefs, and am known among the mass of workers. Were it not for this, were I just an ordinary mechanic from the same factory, where would I be now? In a Cheka prison or, more likely, made to ‘escape,’ just as I made Mikhail Romanov ‘escape.’ Once more I say: You raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked.” [quoted by Paul Avrich, “Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers’ Group”, The Russian Review, Vol. 43, No. 1, p. 11]
reactionary masses. The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralized organization of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves. To invest the mass with traits of sanctity and to reduce one's program to amorphous 'democracy', is to dissolve oneself in the class as it is, to turn from a vanguard into a rearguard, and by this very thing, to renounce revolutionary tasks. On the other hand, if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the class is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself. All this is elementary; all this has been demonstrated by the experience of Russia, and confirmed by the experience of Spain.” [“The Moralists and Sycophants against Marxism”, Their Morals and Ours, p. 59]

Yet, by definition, everyone is “backward” compared to the vanguard. Lenin and Trotsky are clearly arguing that the working class, as a class, is incapable of making a revolution or managing society itself — hence the party must step in on its behalf and, if necessary, ignore the wishes of the very people the party claims to represent. This requires a state in the normal sense of the word, an instrument of minority rule based on special bodies of armed people separate from the people itself — the Red Army and Cheka used to crush the Petrograd strikes and Kronstadt revolt of 1921. To recall Lenin’s words from 1917:

“And the dictatorship of the proletariat, i.e., the organisation of the vanguard of the oppressed as the ruling class for the purpose of suppressing the oppressors, can-

“the Kronstadt uprising was nothing but an armed reaction of the petty bourgeoisie against the hardships of social revolution and the severity of the proletarian dictatorship.

“That was exactly the significance of the Kronstadt slogan, ‘Soixants without Communists,’ which was immediately seized upon, not only by the SRs but by the bourgeois liberals as well. As a rather far-sighted representative of capital, Professor Miliukov understood that to free the soviets from the leadership of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletariat dictatorship. They could play no other role, regardless of the ‘ideas’ of their participants. The Kronstadt uprising thus had a counterrevolutionary character.” [Lenin and Trotsky, “Hue and Cry Over Kronstadt”, Kronstadt, p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik “leadership” (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would “only serve as a bridge from the proletarian dictatorship”. This argument was made (in 1938) as a general point and is not phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. So much for “All Power to the Soviets” or “workers’ power” — Trotsky is unambiguously calling for party power and, ultimately, party dictatorship. As he put it around the same time as the Kronstadt rebellion:
"The Workers' Opposition came out with dangerous slogans, in that they have made a fetish of democratic principles. They have placed the workers' rights to elect representatives for workers' organizations above the Party, as though the Party had no right to assert its dictatorship even in cases when that dictatorship clashes temporarily with the passing mood of the workers' democracy... It is essential that we should become aware of the revolutionary-historical birthright of the Party, which is in duty bound to retain its dictatorship, regardless of the temporary vacillations of the amorphous masses, regardless of the temporary vacillations even of the working class... At any given moment, the dictatorship does not rest upon the formal principle of workers' democracy... over and above the formal aspect [of workers' democracy] is the Party dictatorship which safeguards the basic interests of the working class even when the moods of that class are temporarily vacillating." [quoted by Bunyan, Op. Cit., pp. 251–2]

It should — but unfortunately probably will not — cause Trotskyists some concern that in 1957, after crushing the previous year's workers' revolution, the Hungarian Stalinists argued along exactly the same lines as Trotsky had after the Bolsheviks had crushed Kronstadt: "the regime is aware that the people do not always know what is good for them. It is therefore the duty of the leadership to act, not according to the will of the people, but according to what the leadership knows to be in the best interests of the people." [quoted by Andy Anderson, Hungary '56, p. 101]

Along with Trotsky, Lenin made the same point at the same Congress in March 1921 by arguing that "the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of that class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts (by imperialism in some countries) that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard that has absorbed the revolutionary energy of the class. The whole is like an arrangement of cogwheels. Such is the basic mechanism of the dictatorship of the proletariat, and of the essentials of transition from capitalism to communism." So in "the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers... the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat."

[Collected Works, vol. 32, p. 21 and p. 20] Yet what happens if there is a clash between the vanguard and the class? Lenin had explained the grim reality the previous year at a conference of the Cheka:

"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves." [Op. Cit., vol. 42, p. 170]

It must be remembered that Lenin, according to Trotsky, had privately confessed the following in early 1921: "If we perish, it is all the more important to preserve our ideological line and give a lesson to our continuators. This should never be forgotten, even in hopeless circumstances". [quoted by Maurice Brinton, The Bolsheviks and Workers' Control, p. 79] Trotsky repeated this lesson then as well as nearly 20 years later:

"But the masses are by no means identical: there are revolutionary masses, there are passive masses, there are
were still capable of providing the leaders and shared values on which resistance to labour policies based on coercion and Communist Party enthusiasm could be organised. As might be anticipated, the leaders of unrest were often to be found amongst the skilled male workers who enjoyed positions of authority in the informal shop-floor hierarchies.” Moreover, “despite intense repression, small groups of politicised activists were also important in initiating protest and some enterprises developed traditions of opposition to the communists.” Looking at the strike wave of early 1921 in Petrograd, the “strongest reason for accepting the idea that it was established workers who were behind the volynka [i.e. the strike wave] is the form and course of protest. Traditions of protest reaching back through the spring of 1918 to 1917 and beyond were an important factor in the organisation of the volynka. … There was also a degree of organisation … which belies the impression of a spontaneous outburst.” [Op. Cit., p. 39 and p. 126]

Clearly, then, the idea that the Russian working class was atomised or declassed cannot be defended given this series of struggles. As noted, the notion that the workers were “declassed” was used to justify state repression of collective working class struggle and defend the necessity of party dictatorship in face of it. Emma Goldman was right to later note how the “thought oppressed me that [the Bolsheviks] called ‘defence of the Revolution’ was really only the defence of [their] party in power.” [My Disillusionment in Russia, p. 57] The class struggle in Bolshevik Russia did not stop, it continued except the ruling class had changed from bourgeoisie to Bolshevik dictatorship:

“There is another objection to my criticism on the part of the Communists. Russia is on strike, they say, and it is unethical for a revolutionary to side against the workers when they are striking against their masters. That is pure demagoguery practised by the Bolsheviks to silence criticism.

cessity of party dictatorship, the centralised structure of socialism, one-man management, etc. — by Marxists in the West after 1917, indeed until now. As such, “backwardness” is a selective excuse — not least because few Leninists would agree that vanguardism was a product of Tsarist Russia and so applicable only there and then. In short, if Leninists took the issue of “backwardness” seriously then they would question all aspects of their ideology and hopefully — like the German Council Communists — recognise that Leninism is permeated with the social conditions of a semi-feudal regime and has little to offer modern revolutionaries (or revolutionaries active in the advanced capital nations of post-war Europe).

Fourth, there is the example of the Makhnovist movement. Operating in the same “objective circumstances,” facing the same “objective factors,” the Makhnovists did not implement the same policies as the Bolsheviks. As we discussed in the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”, rather than undermine soviet, soldier and workplace democracy and replace all with party dictatorship, the Makhnovists applied these as fully as they could. Now, if “objective factors” explain the actions of the Bolsheviks, then why did the Makhnovists not pursue identical policies? Why did the Makhnovists not raise the necessity of party dictatorship to an ideological truism?

In summary, regardless of Trotskyist assertions, anarchists do not ignore the objective factors facing the Bolsheviks during the revolution. As indicated, we predicted the problems they faced and developed our ideas to counter them. As the example of the Makhnovists showed, our ideas were more than adequate for the task — unlike those of the Bolsheviks.
2 Can “objective factors” really explain the failure of Bolshevism?

As noted in the previous section Leninists falsely argue that anarchists downplay (at best) or ignore (at worse) the “objective factors” facing the Bolsheviks during the Russian Revolution. However, there is more to it than that. Leninists also claim to be revolutionaries, they claim to know that revolutions will face problems, that civil war is inevitable and so forth. It therefore strikes anarchists as being somewhat hypocritical for Leninists to blame these very same “objective” but allegedly inevitable factors for the failure of Bolshevism in Russia.

Ironically enough, Lenin and Trotsky agree with these anarchist arguments. Looking at Trotsky, he dismissed the CNT’s leadership’s arguments in favour of collaborating with the bourgeois state as follows:

“The leaders of the Spanish Federation of Labour (CNT) ... became, in the critical hour, bourgeois ministers. They explained their open betrayal of the theory of anarchism by the pressure of ‘exceptional circumstances.’ But did not the leaders of the German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ Every serious revolutionary organisation, however, prepares precisely for ‘exceptional circumstances’ ... We have not the slightest intention of blaming the anarchists for not having liquidated the state with the mere stroke of a pen. A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society. But all the more severely do we blame the anarchist theory, which seemed to be wholly suitable for times of peace, but which had to be dropped rapidly

urbanised elements.” In summary, “the deurbanisation of those years represented a change in quantity but not entirely in quality in the cities. The proletariat declined in the city, but it did not wither away ... a core of the city’s working class remained.” [Op. Cit., p. 440, p. 442, p. 447 and p. 449] As Russian anarchist Ida Mett argued decades before in relation to the strikes in early 1921 that inspired the Kronstadt sailor rebellion:

“... became, in the critical hour, bourgeois ministers. They explained their open betrayal of the theory of anarchism by the pressure of ‘exceptional circumstances.’ But did not the leaders of the German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ Every serious revolutionary organisation, however, prepares precisely for ‘exceptional circumstances’ ... We have not the slightest intention of blaming the anarchists for not having liquidated the state with the mere stroke of a pen. A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society. But all the more severely do we blame the anarchist theory, which seemed to be wholly suitable for times of peace, but which had to be dropped rapidly

urbanised elements.” In summary, “the deurbanisation of those years represented a change in quantity but not entirely in quality in the cities. The proletariat declined in the city, but it did not wither away ... a core of the city’s working class remained.” [Op. Cit., p. 440, p. 442, p. 447 and p. 449] As Russian anarchist Ida Mett argued decades before in relation to the strikes in early 1921 that inspired the Kronstadt sailor rebellion:

“The population was drifting away from the capital. All who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside.

“This fact must be emphasised, in order to nail the official lies seeking to attribute the Petrograd strikes that were soon to break out to peasant elements, ‘insufficiently steeled in proletarian ideas.’ The real situation was the very opposite. A few workers were seeking refuge in the countryside. The bulk remained. There was certainly no exodus of peasants into the starving towns! ... It was the famous Petrograd proletariat, the proletariat which had played such a leading role in both previous revolutions, that was finally to resort to the classical weapon of the class struggle: the strike.” [The Kronstadt Uprising, p. 36]

In terms of struggle, links between the events in 1917 and those during the civil war also exist. For example Jonathan Aves writes that there were "distinct elements of continuity between the industrial unrest in 1920 and 1917. This is not surprising since the form of industrial unrest in 1920, as in the pre-revolutionary period and in 1917, was closely bound up with enterprise traditions and shop-floor sub-cultures. The size of the Russian industrial workforce had declined steeply during the Civil War but where enterprises stayed open ... their traditions of industrial unrest in 1920 shows that such sub-cultures
seriously claims that Bolshevik authoritarianism was the product of an “atomisation” or “declassing” of the working class or that it had ceased to exist in any meaningful sense. Clearly it existed and was capable of collective action and organisation — until it was repressed by the Bolsheviks and even then it kept returning. This implies that a key factor in rise of Bolshevik authoritarianism was political — the simple fact that the workers would not vote Bolshevik in free soviet and union elections and so they were not allowed to. As one Soviet Historian put it, “taking the account of the mood of the workers, the demand for free elections to the soviets [raised in early 1921] meant the implementation in practice of the infamous slogan of soviets without communists,” although there is little evidence that the strikers actually raised that “infamous” slogan. [quoted by Aves, Op. Cit., p. 123] It must also be noted that Bolshevik orthodoxy at the time stressed, and had done since at least early 1919, the necessity of Party dictatorship over the workers (see section H.1.2 for details).

Nor can it be said that this struggle can be blamed on “declassed” elements within the working class itself. In her study of this question, Diane Koenker notes that 90% of the change in the number of workers in Moscow “is accounted for by men. Working women did not leave the city,” their numbers dropping from 90,000 in 1918 to 80,000 in 1920. Why these 80,000 women workers should be denied a say in their own revolution is not clear, given the arguments of the pro-Bolshevik left. After all, the same workers remained in roughly the same numbers. Looking at the male worker population, their numbers fell from 215,000 to 124,000 during the same period. However, “the skilled workers whose class consciousness and revolutionary zeal had helped win the October revolution did not entirely disappear, and the women who remained were likely to be family members of these veterans of 1917.” It was “the loss of young activists rather than all skilled and class conscious urban workers that caused the level of Bolshevik support to decline during the civil war.” Indeed “the workers who remained in the city were among the most

Thus to argue that the “exceptional circumstances” caused by the civil war are the only root cause of the degeneration of the Russian Revolution is a damning indictment of Bolshevism: Lenin did not argue in State and Revolution that the application of soviet democracy was dependent only in “times of peace.” Rather, he stressed that they were for the “exceptional circumstance” of revolution and the civil war he considered its inevitable consequence. As such, we must note that Trotsky’s followers do not apply this critique to their own politics, which are also a form of the “exceptional circumstances” excuse. Given how quickly Bolshevik “principles” (as expressed in The State and Revolution) were dropped, we can only assume that Bolshevik ideas are also suitable purely for “times of peace” as well.

But, then, Trotsky was not above using such arguments himself (making later-day Trotskyists at least ideologically consistent in their hypocrisy). In the same essay, for example, he justifies the prohibition of other Soviet parties in terms of a “measure of defence of the dictatorship in a backward and devastation country, surrounded by enemies on all sides.” In other words, an appeal to the exceptional circumstances facing the Bolsheviks! Perhaps unsurprisingly, his followers have tended to stress this (contradictory) aspect of his argument rather than his comments that those “who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the
proletariat. The Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics.” [Op. Cit., p. 426 and p. 430] Which, of course, suggests that the prohibition of other parties had little impact on levels of soviet “democracy” allowed under the Bolsheviks.

This dismissal of the “exceptional circumstances” argument did not originate with Trotsky. Lenin repeatedly stressed that any revolution would face civil war and economic disruption. In early January, 1918, he was pointing to “the incredibly complications of war and economic ruin” in Russia and noting that “the fact that Soviet power has been established ... is why civil war has acquired predominance in Russia at the present time.” [Collected Works, vol. 26, p. 453 and p. 459] A few months later he states quite clearly that “it will never be possible to build socialism at a time when everything is running smoothly and tranquilly; it will never be possible to realise socialism without the landowners and capitalists putting up a furious resistance.” He reiterated this point, acknowledging that the “country is poor, the country is poverty-stricken, and it is impossible just now to satisfy all demands; that is why it is so difficult to build the new edifice in the midst of disruption. But those who believe that socialism can be built at a time of peace and tranquillity are profoundly mistake: it will be everywhere built at a time of disruption, at a time of famine. That is how it must be.” [Op. Cit., vol. 27, p. 520 and p. 517]

As regards civil war, he noted that “not one of the great revolutions of history has take place” without one and “without which not a single serious Marxist has conceived the transition from capitalism to socialism.” Moreover, “there can be no civil war — the inevitable condition and concomitant of socialist revolution — without disruption.” [Op. Cit., p. 496 and p. 497] He considered this disruption as being applicable to advanced capitalist nations as well:

“In Germany, state capitalism prevails, and therefore the revolution in Germany will be a hundred times more

“dismissive rejection” of the demand for a city-wide meeting “spoke volumes about their hostility to the development of the workers’ movement, and landed a blow at the type of collective democracy that might have better able to confront supply problems.” This, along with the other strikes that took place, showed that “the workers’ movement in Moscow was, despite its numerical weakness and the burdens of civil war, engaged with political as well as industrial issues ... the working class was far from non-existent, and when, in 1921, it began to resuscitate soviet democracy, the party’s decision to make the Moscow soviet its ‘creature’ was not effect but cause.” [Pirani, Op. Cit., p. 32, p. 33, p. 37 and p. 23]

When such things happen, we can conclude that Bolshevik desire to remain in power had a significant impact on whether workers were able to exercise collective power or not. As Pirani concludes:

“one of the most important choices the Bolsheviks made ... was to turn their backs on forms of collective, participatory democracy that workers briefly attempted to revive [after the civil war] ... [Available evidence] challenges the notion ... that political power was forced on the Bolsheviks because the working class was so weakened by the civil war that it was incapable of wielding it. In reality, non-party workers were willing and able to participate in political processes, but in the Moscow soviet and elsewhere, were pushed out of them by the Bolsheviks. The party’s vanguardism, i.e. its conviction that it had the right, and the duty, to make political decisions on the workers’ behalf, was now reinforced by its control of the state apparatus. The working class was politically expropriated: power was progressively concentrated in the party, specifically in the party elite.” [Op. Cit., p. 4]

Given this collective rebellion all across the industrial centres of Russia before, during and after the Civil War, it hard to take
Communist leader stated that these soviet elections had seen “a high level of activity by the masses and a striving to be in power themselves.” [quoted by Pirani, Op. Cit., p. 101]

In short, an “examination of industrial unrest after the Bolshevik seizure of power ... shows that the Revolution had brought to the surface resilient traditions of organisation in society and had released tremendous forces in favour of greater popular participation ... The survival of the popular movement through the political repression and economic devastation of the Civil War testifies to its strength.” [Aves, Op. Cit., p. 186] The idea that the Russian working class was incapable of collective struggle is hard to defend given this series of struggles (and state repression). The class struggle in Bolshevik Russia did not stop, it continued except the ruling class had changed. All the popular energy and organisation this expressed, which could have been used to combat the problems facing the revolution and create the foundations of a genuine socialist society, were wasted in fighting the Bolshevik regime. Ultimately, the “sustained, though ultimately futile, attempts to revive an autonomous workers’ movement, especially in mid-1918 and from late 1920, failed owing to repression.” [Sakwa, Op. Cit., p. 269] Another historian notes that “immediately after the civil war” there was “a revival of working class collective action that culminated in February-March 1921 in a widespread strike movement and the revolt at the Kronstadt naval base.” As such, the position expounded by Rees and other Leninists “is so one-sided as to be misleading.” [Pirani, Op. Cit., p. 7 and p. 23]

So, looking at the Moscow Tram strike of August 1920 as an example, in addition to economic demands, strikers called for a general meeting of all depots. This was “significant: here the workers’ movement was trying to get on the first rung of the ladder of organisation, and being knocked off by the Bolsheviks.” The party “responded to the strike in such a way as to undermine workers’ organisation and consciousness” and “throttled independent action” by “repression of the strike by means reminiscent of tsarism.” The Bolshevik’s devastating and ruinous than in a petty-bourgeois country — there, too, there will be gigantic difficulties and tremendous chaos and imbalance.” [Op. Cit., vol. 28, p. 298]

Lenin reiterated this point again and again. He argued that “we see famine not only in Russia, but in the most cultured, advanced countries, like Germany ... it is spread over a longer period than in Russia, but it is famine nevertheless, still more severe and painful than here.” In fact, “today even the richest countries are experiencing unprecedented food shortages and that the overwhelming majority of the working masses are suffering incredible torture.” [Op. Cit., vol. 27, p. 460 and p. 461] And from June, 1918:

“We must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging, and this civil war cuts off communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by the interchange of manufactured goods and you will understand that every civil war brings forth disasters.” [Op. Cit., vol. 27, p. 463]

As we discuss in section 4, the economic state of Germany immediately after the end of the war suggests that Lenin had a point: the German economy was in a serious state of devastation, a state equal to that of Russia during the equivalent period of its revolution. If economic conditions made party dictatorship inevitable in Bolshevik Russia (as pro-Leninists argue) it would mean that soviet democracy and revolution cannot go together.
Lenin, unlike many of his latter day followers, did not consider these grim objective conditions as making revolution impossible. Rather, for him, there was “no other way out of this war” which is causing the problems “except revolution, except civil war ... a war which always accompanies not only great revolutions but every serious revolution in history.” He continued by arguing that we “must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging, and this civil war cuts communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by interchange of manufactured goods and you will understand that every civil war brings fresh disasters.” [Op. Cit., p. 463] The similarities to Kropotkin’s arguments made three decades previously are clear (see section 1 for details).

Indeed, he mocked those who would argue that revolution could occur without “exceptional circumstances”:

“A revolutionary would not ‘agree’ to a proletarian revolution only ‘on the condition’ that it proceeds easily and smoothly, that there is, from the outset, combined action on the part of proletarians of different countries, that there are guarantees against defeats, that the road of the revolution is broad, free and straight, that it will not be necessary during the march to victory to sustain the heaviest casualties, to ‘bide one’s time in a besieged fortress,’ or to make one’s way along extremely narrow, impassable, winding and dangerous mountain tracks. Such a person is no revolutionary.” [Op. Cit., vol. 28, p. 68]

Thus industrial collapse and terrible difficulties would face any revolution. As Lenin noted, “in revolutionary epochs the class strug-
trial action — nor did he mention the use of State repression under Lenin against such action, instead falsely asserting that before the rise of Stalinism it “was taken for granted that strikes were not to be suppressed by the state.” [State Capitalism in Russia, p. 28] Ultimately, if these strikes between 1922 and 1924 showed a social basis existed to combat the rising Stalinist bureaucracy, surely the strikes between 1918 and 1921 likewise show a social basis existed to combat the existing Leninist bureaucracy?

As well as repression of strike waves across the country, the end of the civil war also saw the Bolsheviks finally destroy what was left of non-Bolshevik trade unionism. In Moscow, this took place against fierce resistance of the union members. As one historian concludes:

“Reflecting on the determined struggle mounted by printers, bakers and chemical workers in Moscow during 1920–1, in spite of appalling economic conditions, being represented by organisations weakened by constant repression ... to retain their independent labour organisations it is difficult not to feel that the social basis for a political alternative existed.” [Jonathan Aves, “The Demise of Non-Bolshevik Trade Unionism in Moscow: 1920–21”, pp. 101-33, Revolutionary Russia, vol. 2, no. 1, p. 130]

The also Bolsheviks dispersed provincial trade unions conferences in Vologda and Vitebsk in 1921 “because they had anti-communist majorities.” [Aves, Workers Against Lenin, p. 176] At the All-Russian Congress of Metalworkers’ Union in May, the delegates voted down the party-list of recommended candidates for union leadership. The Central Committee of the Party “disregarded every one of the votes and appointed a Metalworkers’ Committee of its own. So much for ‘elected and revocable delegates’. Elected by the union rank and file and revocable by
In 1921 he repeated this, arguing that “every revolution entails enormous sacrifice on the part of the class making it... The dictatorship of the proletariat in Russia has entailed for the ruling class — the proletariat — sacrifices, want and privation unprecedented in history, and the case will, in all probability, be the same in every other country.” [Collected Works, vol. 32, p. 488]

So Lenin is on record as saying these “objective factors” will always be the circumstances facing a socialist revolution. Indeed, in November 1922 he stated that rather than having undermined the revolution, “Soviet rule in Russia is celebrating its fifth anniversary. It is now sounder than ever.” [Op. Cit., vol. 33, p. 417]

All of which must be deeply embarrassing to Leninists. After all, here is Lenin arguing that the factors Leninists list as being responsible for the degeneration of the Russian Revolution were inevitable side effects of any revolution and, moreover, the revolution was more sound than ever! Of course, Lenin did not ponder how “Soviet rule” was compatible with party dictatorship, but then neither did Trotsky.

Nor was this perspective limited to Lenin. The inevitability of economic collapse being associated with a revolution was not lost on Trotsky either. For example, in Terrorism and Communism he argued that “all periods of transition have been characterised by... tragic features” of an “economic depression” such as exhaustion, poverty and hunger. Every class society “is violently swept off [the arena] by an intense struggle, which immediately brings to its participants even greater privations and sufferings than those against which they rose.” He gave the example of the French Revolution “which attained its titanic dimensions under the pressure of the masses exhausted with suffering, itself deepened and rendered more acute their misfortunes for a prolonged period and to an extraordinary extent.” He rhetorically asked: “Can it be otherwise?” So “revolutions which drag into their whirlpool millions of workers” automatically affect the “economic life of the country.” By “[d]ragging the mass of the people away from labour, drawing them for a prolonged period into

the strike wave continued unabated.” As in the civil war, the managers shut down plants, fired the workers and rehired them on an individual basis. In this way, trouble-makers were dismissed and “order” restored. The “pattern of workers’ action and Bolshevik reaction played itself out frequently in dozens of other strikes. The Bolsheviks acted with the explicit purpose of rooting out the possibility of further protest. They tried to condition workers that labour protest was futile.” The GPU (the renamed Cheka) “used force to disperse workers demonstrating with the arrested strike leaders.” [Vladimir Brovkin, Russia After Lenin, p. 174, pp. 174–5 and p. 175]

In Moscow, “[b]etween 1921 and 1926, all branches of industry and transport ... experienced wildcat strikes or other spontaneous labour disturbances. Strike waves peaked in the winter of 1920–21 ... and in the summer and fall of 1922 and 1923 ... during July-December 1922, for example, 65 strikes and 209 other industrial disturbances were recorded in Moscow’s state enterprises.” Metalworkers were arguably the most active sector at this time while “a number of large strikes” took place in the textile industry (where “strikes were sometimes co-ordinated by spontaneously organised strike committees or ‘parallel’ factory committees”). And in spite of repression, “politicisation continued to characterise many labour struggles” and, as before, “spontaneous labour activism hindered not only the party’s economic program but also the political and social stabilisation of the factories.” [John B. Hatch, Labour Conflict in Moscow, 1921–1925, p. 62, p. 63, p. 65, pp. 66–7 and p. 67]

We even find one of the leading proponents of “atomised” excuse, neo-Trotskyist Tony Cliff, noting against Stalinism that “in 1922, 192,000 workers went on strike in state-owned enterprises; in 1923 the number was 165,000; in 1924, 43,000; in 1925, 34,000; in 1926, 32,900; in 1927, 20,100; in the first half of 1928, 8,900. In 1922 the number of workers involved in labour conflicts was three and a half million, and in 1923, 1,592,800.” He did not ponder how a class he claimed elsewhere had become atomised, individualised, disintegrated and declasse could take such widescale collective indus-
After Kronstadt and the various strike waves and protests of that time, Bolshevik repression of labour unrest continued. The economic crisis of 1921 which accompanied the introduction of the NEP saw unemployment rise while workplaces “that had been prominent in unrest were particularly hit by ... purges ... The effect on the willingness of workers to support opposition parties was predictible.” Yet “[d]espite the heavy toll of redundancies, the ability to organise strikes did not disappear. Strike statistics for 1921 continue to provide only a very rough indicator of the true scale of industrial unrest and appear not to include the first half of the year.” [Aves, Op. Cit., p. 182–183] For example, in early March, “long strikes” hit the textile towns around Moscow. At the Glukhovskaja mills 5000 workers struck for 5 days, 1000 at a nearby factory for 2 days and 4000 at the Voskresenskaia mills for 6 days. In May, 1921, workers in the city of Moscow reacted to supply problems “with a wave of strikes. Party officials reckoned that in a 24-day period in May there were stoppages at 66 large enterprises.” These included a sit-down strike at one of Moscow’s largest plants, while “workers at engineering factories in Krasnopresnia followed suit, and Cheka agents reported ‘dissent, culminating in strikes and occupation’ in Bauman.” August 1922 saw 19,000 workers strike in textile mills in Moscow region for several days. Tram workers also struck that year, while teachers “organised strikes and mass meetings”. Workers usually elected delegates to negotiate with their trade unions as well as their bosses as both were Communist Party members. Strike organisers, needless to say, were sacked. [Pirani, Op. Cit., p. 82, pp. 111–2 and p. 157]

The spring of 1922 likewise saw Soviet Russia “hit by a new strike wave” and the strikes “continued to reflect enterprise traditions.” That year saw 538 strikes with 197,022 participants recorded. [Aves, Op. Cit., p. 183 and p. 184] The following year saw more stoppages and in “July 1923 more than 100 enterprises employing a total of some 50,000 people were on strike. In August figures totalled some 140 enterprises and 80,00 workers. In September and November

4952

the struggle, thereby destroying their connection with production, the revolution in all these ways strikes deadly blows at economic life, and inevitably lowers the standard which it found at its birth.” This affects the socialist revolution as the “more perfect the revolution, the greater are the masses it draws in; and the longer it is prolonged, the greater is the destruction it achieves in the apparatus of production, and the more terrible inroads does it make upon public resources. From this there follows merely the conclusion which did not require proof — that a civil war is harmful to economic life.” Given these inevitable circumstances, he justified Bolshevik policies as being the “only solution ... that is correct from the point of view both of principle and of practice” and, moreover, “dictatorship of the Soviets became possible only by means of the dictatorship of the party. [Terrorism and Communism, p. 7, p. 135 and p. 109]

While this argument does have its self-serving elements — generalising to all revolutions problems created or made worse by Bolshevik policies, decisions and prejudices — the general point remains valid: revolutions are disruptive.

Another leading Bolshevik, Nikolai Bukharin, wrote his (infamous) The Economics of the Transition Period to make theoretical sense of (i.e. rationalise and justify) the party’s changing policies and their social consequences since 1918 in terms of the inevitability of bad “objective factors” facing the revolution. While some Leninists like to paint Bukharin’s book (like most Bolshevik ideas of the time) as “making a virtue out of necessity,” Bukharin (like the rest of the Bolshevik leadership) did not. As one commentator, Stephan F. Cohen, notes, Bukharin “believe[d] that he was formulating universal laws of proletarian revolution.” [In Praise of War Communism: Bukharin’s The Economics of the Transition Period, p. 195]

Bukharin listed four “real costs of revolution,” namely “the physical destruction or deterioration of material and living elements of production, the atomisation of these elements and of sectors of the economy, and the need for unproductive consumption (civil war ma-
Materials, etc.). These costs were interrelated and followed sequentially. Collectively they resulted in 'the curtailment of the process of reproduction' (and 'negative expanded reproduction') and Bukharin’s main conclusion: ‘the production “anarchy” … , “the revolutionary disintegration of industry,” is an historically inevitable stage which no amount of lamentation will prevent.’” This was part of a general argument and his “point was that great revolutions were always accompanied by destructive civil wars ... But he was more intent on proving that a proletarian revolution resulted in an even greater temporary fall in production than did its bourgeois counterpart.” To do this he formulated the “costs of revolution” as “a law of revolution.” [Op. Cit., pp. 195–6 and p. 195]

Cohen notes that while this “may appear to have been an obvious point, but it apparently came as something of a revelation to many Bolsheviks. It directly opposed the prevailing Social Democratic assumption that the transition to socialism would be relatively painless ... Profound or not, Bolsheviks generally came to accept the ‘law’ and to regard it as a significant discovery by Bukharin.” [Op. Cit., p. 196]

To quote Bukharin himself:

“during the transition period the labour apparatus of society inevitably disintegrates, that reorganisation presupposes disorganisation, and that there the temporary collapse of productive forces is a law inherent to revolution.” [quoted by Cohen, Op. Cit., p. 196]

It would appear that this “obvious point” would still come “as something of a revelation to many Bolsheviks” today! Significantly, of course, Kropotkin had formulated this law decades previously and so the real question is how the Bolsheviks sought to cope with this inevitable law is what signifies the difference between anarchism and Leninism. Simply put, Bukharin endorsed the coercive measures of war communism as the means to go forward to socialism. As Cohen summarises, “force and coercion ... were the means by
took collective action to achieve them. In response, the Bolshevik regime used state repression to break this collective activity: martial law, lock-outs, mass arrests, withholding rations and shootings. As such, if the rise of Stalinism can, as modern-day Leninists argue, be explained by the “atomisation” of the working class during the civil war then the Bolshevik regime and its repression should be credited with ensuring this happened.

Unsurprisingly, as Emma Goldman recounted, “counter-revolutionists, and bandits in Soviet penal institutions were a negligible minority. The bulk of the prison population consisted of social heretics who were guilty of the cardinal sin against the Communist Church. For no offence was considered more heinous than to entertain political views in opposition to the party, and to voice any protest against the evils and crimes of Bolshevism. I found that by far the greatest number were political prisoners, as well as peasants and workers guilty of demanding better treatment and conditions.” [Living My Life, vol. 2, p. 873] Indeed, of the 17,000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40,913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, The Cheka: Lenin’s Political Police, p. 178] Other rebel toilers were not so lucky:

“It is not possible to estimate with any degree of accuracy how many workers were shot by the Cheka during 1918–1921 for participation in labour protest. However, an examination of individual cases suggests that shootings were employed to inspire terror and were not simply used in the occasional extreme case.” [Aves, Op. Cit., p. 35]
of the proletariat, male and female alike, the initiative for the disturbances came from the skilled stratum that the Communists normally deemed the most conscious.” The Communists “resolved to shut down the commission before it could issue a public statement” and as they “expected workers to protest the dissolution of their representative”, they also “set up a Provincial Revolutionary Committee … which introduced martial law both in the city and the garrison. It arrested the ringleaders of the workers’ movement … the police crackdown depressed the workers’ movement and the activities of the rival socialist parties.” The near general strike was broken by a “wave of repression” but “railroad workers and dockworkers and some printers refused to resume work.” The Cheka sentenced 219 people to death. [Donald J. Raleigh, Op. Cit., p. 379 and pp. 387–9]

A similar “little Kronstadt” broke out in the Ukrainian town of Ekaterinoslav at the end of May. The workers there “clearly had strong traditions of organisation” and elected a strike committee of fifteen which “put out a series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels.” On June 1st, “by a pre-arranged signal” workers went on strike throughout the town, with workers joining a meeting of the railway workers. The local Communist Party leader was instructed “to put down the rebellion without mercy … Use Budennyi’s [Red] cavalry.” The strikers prepared a train and its driver instructed to spread the strike throughout the network. Telegraph operators were told to send messages throughout the Soviet Republic calling for “free soviets” and soon an area up to fifty miles around the town was affected. The Communists used the Cheka to crush the movement, carrying out mass arrests and shooting 15 workers (and dumping their bodies in the River Dnepr). [Aves, Op. Cit., pp. 171–3] It must be noted that the call for “free soviets” had previously been raised by the anarchist-influenced Makhnovist movement.

Thus strike action was a constant feature of Bolshevik Russia during the civil war. Rather than being an “atomised” mass, the workers repeatedly organised themselves, made their demands and which equilibrium was to be forged out of disequilibrium.” [Op. Cit., p. 198] Given that Bukharin argued that a workers’ state, by definition, could not exploit the workers, he — like Lenin and Trotsky — opened up the possibility for rationalising all sorts of abuses as well as condoning numerous evils because they were “progressive.”

It should be noted that Lenin showed “ecstatic praise for the most ‘war communist’ sections” of Bukharin’s work. “Almost every passage,” Cohen notes, “on the role of the new state, statisation in general, militarisation and mobilisation met with ‘very good,’ often in three languages, … Most striking, Lenin’s greatest enthusiasm was reserved for the chapter on the role of coercion … at the end [of which] he wrote, ‘Now this chapter is superb!’” [Op. Cit., pp. 202–3]

Compare this to Kropotkin’s comment that the “revolutionary tribunal and the guillotine could not make up for the lack of a constructive communist theory” [The Great French Revolution, vol. II, p. 519]

Ultimately, claims that “objective factors” caused the degeneration of the revolution are mostly attempts to let the Bolsheviks of the hook for Stalinism. This approach was started by Trotsky and has continued to this day. Anarchists, unsurprisingly, do not think much of these explanations: the “objective factors” listed to explain the degeneration of the revolution are simply a list of factors every revolution would (and has) faced — as Lenin, Bukharin and Trotsky all admitted at the time. Bertrand Russell noted this after his trip to Soviet Russia, that while since October 1917 “the Soviet Government has been at war with almost all the world, and has at the same time to face civil war at home” this was “not to be regarded as accidental, or as a misfortune which could not be foreseen. According to Marxian theory, what has happened was bound to happen.” [The Theory and Practice of Bolshevism, p. 103]

So we have the strange paradox of Leninists dismissing or ignoring the arguments of their ideological gurus. For Trotsky, just as for Lenin, it was a truism that revolutionary politics had to handle “objective factors” and “exceptional circumstances” and both thought they had during the Russian revolution in a manner consistent
with their ideology: yet for their followers, these explain the failure of Bolshevism. Tony Cliff, one of Trotsky’s less orthodox followers, gives us a means of understanding this strange paradox. Discussing the Platform of the United Opposition he notes that it “also suffered from the inheritance of the exceptional conditions of the civil war, when the one-party system was transformed from a necessity into a virtue.” [Trotsky, vol. 3, pp. 248–9] Clearly, “exceptional circumstances” explain nothing and are simply an excuse for bad politics while “exceptional conditions” explain everything and defeat even the best politics!

As such, it seems extremely ironic that Leninists blame the civil war for the failure of the revolution as they continually raise the inevitability of civil war in a revolution to attack anarchism (see section H.2.1 for example). Yet, if civil war and the other factors listed by Leninists (but considered inevitable by Lenin) preclude the implementation of the radical democracy Lenin argued for in 1917 as the means to suppress the resistance of the capitalists then his followers should come clean and say that his book has no bearing on their vision of revolution. Given that the usual argument for the “dictatorship of the proletariat” is that it is required to repress counter-revolution, it seems somewhat ironic that the event it was said to be designed for (i.e. revolution) should be responsible for its degeneration.

As such, anarchists think these sorts of explanations of Bolshevist dictatorship are incredulous. After all, as revolutionaries the people who expound these “explanations” are meant to know that civil war, imperialist invasion and blockade, economic disruption, and a host of other “extremely difficult circumstances” are part and parcel of a revolution. They seem to be saying, “if only the ruling class had not acted as our political ideology predicts they would then the Bolshevik revolution would have been fine”!

In summary, anarchists are not at all convinced by the claims that “objective factors” can explain the failure of the Russian Revolution for, according to Lenin and Trotsky, these factors were to be in Petrograd, the mixture of (economic) concessions and coercion eventually broke the will of the strikers.

The events at the Bromlei works were significant in that the March 25th a mass meeting passed an anarchist and Left-SR initiated resolution supporting the Kronstadt rebels. The party “responded by having them sacked en masse”. The workers “demonstrated through” their district “and inspired some brief solidarity strikes.” Over 3000 workers joined the strikes and about 1000 of these joined the flying picket (managers at one print shop locked their workers in to stop them joining the protest). While the party was willing to negotiate economic issues, “it had no wish to discuss politics with workers” and so arrested those who initiated the resolution, sacked the rest of the workforce and selectively re-employed them. Two more strikes were conducted “to defend the political activists in their midst” and two mass meetings demanded the release of arrested ones. Workers also struck on supply issues in May, July and August. [Pirani, Op. Cit., pp. 83–4]

In Saratov, the strike started on March 3rd when railroad shop workers did not return to their benches and instead rallied to discuss an anticipated further reduction in food rations. The “railroad workers debated resolutions recently carried by the Moscow proletariat … The next day the strike spread to the metallurgical plants and to most other large factories, as Saratov workers elected representatives to an independent commission charged with evaluating the functioning of all economic organs. When it convened, the body called for the re-election of the soviets and immediate release of political prisoners.” During the next two days, “the assemblies held at factories to elect delegates to the commission bitterly denounced the Communists.” The “unrest spilled over into Pokrovsk.” The commission of 270 had less than ten Communists and “demanded the freeing of political prisoners, new elections to the soviets and to all labour organisations, independent unions, and freedom of speech, the press, and assembly.” While the ration cut “represent[ed] the catalyst, but not the cause, of the labour unrest” and “the turmoil touched all strata
A similar process of workers revolt and state repression occurred in Moscow at the same time. There “industrial unrest” also “turned into open confrontation and protest spilled on to the streets”, starting with a “wave of strikes that had its centre in the heart of industrial Moscow.” Meetings were held, followed by demonstrations and strikes which spread to other districts over the next few days. Workers demanded that elections to the soviets be held. Striking railway workers sent emissaries along the railway to spread the strike and soon strikes were “also spreading outside Moscow city itself into the surrounding provinces”. In response, “Moscow and Moscow province were put under martial law.” [Aves, Op. Cit., p. 130, p. 138 and pp. 139–144] This strike wave started when “[m]eetings in factories and plants gathered and criticised government policies, beginning with supply and developing into general political criticism.” As was typical, the “first response of the civil authorities to the disturbances was increased repression” although as “the number of striking factories increased some concessions were introduced.” Military units called in against striking workers “refused to open fire, and they were replaced by the armed communist detachments” which did. “That evening mass protest meetings were held … The following day several factories went on strike” and troops were “disarmed and locked in as a precaution” by the government against possible fraternalising. February 23rd saw a 10,000 strong street demonstration and “Moscow was placed under martial law with a 24-hour watch on factories by the communist detachments and trustworthy army units.” The disturbances were accompanied by factory occupations and on the 1st of March the soviet called on workers “not to go on strike.” However, “wide-scale arrests deprived the movement of its leadership.” March 5th saw disturbances at the Bromlei works, “resulting in the now customary arrest of workers. A general meeting at the plant on 25 March called for new elections to the Moscow Soviet. The management dispersed the meeting but the workers called on other plants to support the calls for new elections. As usual, the ringleaders were arrested.” [Sakwa, Op. Cit., pp. 242–3, p. 245 and p. 246] As expected in any revolution. That is why they say they want a “dictatorship of the proletariat,” to defend against counter-revolution (see section H.3.8 on how, once in power, Lenin and Trotsky revised this position). Now, if Bolshevism cannot handle what it says is inevitable, then it should be avoided. To use an analogy:

Bolshevik: “Join with us, we have a great umbrella which will keep us dry.”
Anarchist: “Last time it was used, it did not work. We all got soaked!”
Bolshevik: “But what our anarchist friend fails to mention is that it was raining at the time!”

Not very convincing! Yet, sadly, this is the logic of the common Leninist justification of Bolshevik authoritarianism during the Russian Revolution.

3 Can the civil war explain the failure of Bolshevism?

One of the most common assertions against the anarchist case against Bolshevism is that while we condemn the Bolsheviks, we fail to mention the civil war and the wars of intervention. Indeed, for most Leninists the civil war is usually considered the key event in the development of Stalinism as well as explaining and justifying all anti-socialist acts of the Bolsheviks after they seized power in 1917.

For anarchists, such an argument is flawed on two levels, namely logical and factual. The logical flaw is that Leninist argue that civil war is inevitable after a revolution. They maintain, correctly, that it is unlikely that the ruling class will disappear without a fight. Then they turn round and complain that because the ruling class did what the Marxists predicted they would do the Russian Revolution failed while also (incorrectly) asserting about
anarchists do not recognise the need to defend a revolution (see section H.2.1).

So, obviously, this line of defence is nonsense. If civil war is inevitable, then it cannot be used to justify the failure of Bolshevism. Marxists simply want to have their cake and eat it to: you simply cannot argue that civil war is inevitable and then blame it for the failure of the Russian Revolution.

Also, by stressing civil war and denouncing those who “forget the years of Civil War”, Trotsky and his followers end up being “Apologist[s] for Stalinism” for the civil war “was initiated by the international bourgeoisie. And thus the ugly sides of Bolshevism under Lenin, as well as under Stalin, find their chief and final cause in capitalism’s enmity to Bolshevism which, if it is a monster, is only a reluctant monster, killing and torturing in mere self-defence. In short, “so, if only in a roundabout way, Trotsky’s Bolshevism, despite its saturation with hatred for Stalin, leads in the end merely to a defence of Stalinism as the only possible self-defence for Trotsky. This explains the superficiality of the ideological differences between Stalinism and Trotskyism. The impossibility of attacking Stalin without attacking Lenin helps to explain, furthermore, Trotsky’s great difficulties as an oppositionist. Trotsky’s own past and theories preclude on his part the initiation of a movement to the left of Stalinism and condemned ‘Trotskyism’ to remain a mere collecting agency for unsuccessful Bolsheviks. As such it could maintain itself outside of Russia because of the ceaseless competitive struggles for power and positions within the so-called ‘communist’ world-movement. But it could not achieve significance for it had nothing to offer but the replacement of one set of politicians by another. The Trotskyist defence of Russia in the Second World War was consistent with all the previous policies of this, Stalin’s most bitter, but also most loyal, opposition.” [Paul Mattick, “Bolshevism and Stalinism”, Anti-Bolshevik Communism, pp. 68–9]

The other flaw in this defence of Bolshevism is the factual one, namely the awkward fact that Bolshevik authoritarianism started before the civil war broke out at the end of May, 1918. Simply put, viks did what many ruling elites do: they called it something else. Rather than admit it was a strike, they “usually employed the word volynka, which means only a ‘go-slow’”. [Aves, Op. Cit., p. 3, p. 109, p. 112 and pp. 111–2]

In Petrograd in the beginning of February “strikes were becoming an everyday occurrence” and by “the third week of February the situation rapidly deteriorated.” The city was rocked by strikes, meetings and demonstrations. In response to the general strike the Bolsheviks replied with a “military clamp-down, mass arrests and other coercive measures, such as the closure of enterprises, the purging of the workforce and stopping of rations which accompanied them.” [Aves, Op. Cit., p. 113 and p. 120] As Paul Avrich recounts, in Petrograd these “street demonstrations were heralded by a rash of protest meetings” in workplaces. On the 24th of February, the day after a workplace meeting, the Trubochny factory workforce downed tools and walked out the factory. Additional workers from nearby factories joined in. The crowd of 2,000 was dispersed by armed military cadets. The next day, the Trubochny workers again took to the streets and visited other workplaces, bringing them out on strike too. In the face of a near general strike, a three-man Defence Committee was formed. Zinoviev “proclaimed martial law” and “[o]vernight Petrograd became an armed camp.” Strikers were locked out and the “application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities” was “indispensable in restoring order” (as were economic concessions). [Kronstadt 1921, pp. 37–8, p. 39, pp. 46–7 and p. 50] Thus “massive city-wide protest spread through Petrograd ... Strikes and demonstrations spread. The regime responded as it had done in the past, with lock-outs, mass arrests, heavy show of force — and concessions.” [Remington, Op. Cit., p. 111] As we discuss in “What was the Kronstadt Rebellion?”, these strikes produced the Kronstadt revolt while the Bolshevik repression ensured the Petrograd workers did not act with the sailors.

4894

4947
sentenced to a forced labour camp until the end of the war. However, the “combined impact of these measures did not prevent further unrest and the workers put forward new demands.” On 19 June, the soviet approved “a programme for the suppression of counter-revolution” and “the transfer of Tula to the position of an armed camp.” The Tula strike “highlights the way in which workers, particularly skilled workers who were products of long-standing shop-floor subcultures and hierarchies, retained the capability as well as the will to defend their interests.” [Aves, Op. Cit., p. 50–55] Saratov also saw a wave of factory occupations break out in June and mill workers went out in July while in August, strikes and walkouts occurred in its mills and other factories and these “prompted a spate of arrests and repression.” In September railroad workers went out on strike, with arrests making “the situation worse, forcing the administration to accept the workers’ demands.” [Raleigh, Op. Cit., p. 375]

While strike activity “was most common in Petrograd, where there had been 2.5 strikers for every workman,” the figure for Moscow was 1.75 and 1.5 in Kazan. In early March “a wave of strikes hit the Volga town of Samara” when a strike by printers in spread to other enterprises. “Strike action in Moscow did not just include traditionally militant male metal workers.” Textile workers, tram workers and printers all took strike action. [Aves, Op. Cit., p. 69, p. 72 and pp. 77–8]

The end of the civil war did not see the end of working class protest. Quite the reverse, for “[b]y the beginning of 1921 a revolutionary situation with workers in the vanguard had emerged in Soviet Russia” with “the simultaneous outbreak of strikes in Petrograd and Moscow and in other industrial regions.” In February and March 1921, “industrial unrest broke out in a nation-wide wave of discontent or volynka. General strikes, or very widespread unrest” hit all but one of the country’s major industrial regions and “workers protest consisted not just of strikes but also of factory occupations, ‘Italian strikes’, demonstrations, mass meetings, the beating up of communists and so on.” Faced with this massive strike wave, the Bolshev-

it is difficult to blame a course of actions on an event which had not started yet. Moreover, Bolshevik authoritarianism increased after the civil war finished. This, incidentally, caused the few remaining anarchists who supported the regime to some degree to re-evaluate their position. In the words of Alexander Berkman:

“I would not concede the appalling truth. Still the hope persisted that the Bolsheviki, though absolutely wrong in principle and practice, yet grimly held on to some shreds of the revolutionary banner. ‘Allied interference,’ ‘the blockade and civil war,’ ‘the necessity of the transitory stage’ — thus I sought to placate my outraged conscience … At last the fronts were liquidated, civil war ended, and the country at peace. But Communist policies did not change. On the contrary … The party groaned under the unbearable yoke of the Party dictatorship… Then came Kronstadt and its simultaneous echoes throughout the land … Kronstadt was crushed as ruthlessly as Thiers and Gallifet slaughtered the Paris Communards. And with Kronstadt the entire country and its last hope. With it also my faith in the Bolsheviki.” [The Bolshevik Myth, p. 331]

If Berkman had been in Russia in 1918, he may have realised that Bolshevik tyranny after the end of the civil war which climaxed with the attack on Kronstadt (see the appendix on “What was the Kronstadt Rebellion?”) was not at odds with their pre-civil war activities to maintain their power. The simple fact is that Bolshevik authoritarianism was not caused by the pressures of the civil war, rather it started before then. All the civil war did was strengthen certain aspects of Bolshevik ideology and practice which had existed from the start. Needless to say, we cannot cover everything here and will by necessity focus on certain key developments which historian S.A. Smith summarises well:
“The Bolsheviks established their power in the localities through soviets, soldiers’ committees, factory committees, and Red Guards. Numbering less than 350,000 in October 1917, the party had little option but to allow such independent organisations extensive leeway. Yet the same desperate problems of unemployment and lack of food and fuel that helped turn the workers against the Provisional Government soon began to turn workers against the Bolsheviks. In the first half of 1918, some 100,000 to 150,000 workers across Russia took part in strikes, food riots and other protests, roughly on a par with labour unrest on the eve of the February Revolution.

In this context, the Bolsheviks struggled to concentrate authority in the hands of the party and state organs ... In spring 1918, worker discontent translated into a renewal of support for the Mensheviks and, to a lesser extent, the SRs, causing the Bolsheviks to cancel soviet elections and close down soviets that proved uncooperative, thus initiating the process whereby soviets and trade unions were turned into adjuncts to a one-party state. When the Whites seized leadership of the anti-Bolshevik movement in the latter months of 1918, however, most workers swung back in support of the government. During the civil war, labour unrest continued ... the Bolsheviks generally reacted by rushing in emergency supplies and by arresting the leaders of the protest, who were often Mensheviks or Left SRs ... they did not scruple when they deemed it necessary to deploy armed force to suppress strikes, to confiscate ration cards or even to dismiss strikers en masse and then rehire them selectively. The Bolsheviks expected the working class to speak with one voice — in favour of the regime — and when they didn’t they, who had once excoriated the Mensheviks for their refusal to it was situated in. In Moscow, a strike in May by printers resulted in their works “closed and the strikers sent to concentration camps after an attempt to start sympathy action failed.” [Aves, Op. Cit., p. 44, pp. 45–7, pp. 48–9 and p. 59]

In January 1920, a strike followed a mass meeting at a railway repair shop in Moscow. Attempts to spread were foiled by arrests. The workshop was closed, depriving workers of their rations and 103 workers of the 1,600 employed were imprisoned. “In late March 1920 there were strikes in some factories” in Moscow and “[a]t the height of the Polish war the protests and strikes, usually provoked by economic issues but not restricted to them, became particularly frequent ... The assault on non-Bolshevik trade unionism launched at this time was probably associated with the wave of unrest since there was a clear danger that they would provide a focus for opposition.” [Sakwa, Op. Cit., p. 95] The “largest strike in Moscow in the summer of 1920” was by tram workers over the equalisation of rations. It began on August 12th, when one tram depot went on strike, quickly followed by others while workers “in other industries joined in to.” The tram workers “stayed out a further two days before being driven back by arrests and threats of mass sackings.” In the textile manufacturing towns around Moscow “there were large-scale strikes” in November 1920, with 1000 workers striking for four days in one district and a strike of 500 mill workers saw 3,000 workers from another mill joining in. [Simon Pirani, The Russian Revolution in Retreat, 1920–24, p. 32 and p. 43]

Strikes occurred in other places, such as Tula were the workforce “contained a high proportion of skilled, long-standing, hereditary workers.” An “all-out strike” began at the start of June and on 8 June the local newspaper published a declaration from the Tula soviet threatening the strikers with “the most repressive measures, including the application of the highest measure of punishment”. The following day the city was declared to be under a “state of siege” by the local military authorities. The strikers lost ration cards and by 11 June there was a return to work. Twenty-three workers were
Nor was this collective struggle stop in 1919 — “strike action remained endemic in the first nine months of 1920” and “in the first six months of 1920 strikes had occurred in seventy-seven per cent of middle-sized and large works.” For the Petrograd province, soviet figures state that in 1919 there were 52 strikes with 65,625 participants and in 1920 73 strikes with 85,645, both high figures as according to one set of figures, which are by no means the lowest, there were 109,100 workers there. Strikes in 1920 “were frequently a direct protest against the intensification of War Communist labour policies, the militarisation of labour, the implementation of one-man management and the struggle against absenteeism, as well as food supply difficulties. The Communist Party press carried numerous articles attacking the slogan of ‘free labour.’” Overall, “the geographical extent of the February-March strike wave is impressive” and the “harsh discipline that went with labour militarisation led to an increase in industrial unrest in 1920.” [Aves, Op. Cit., p. 69, p. 74 and p. 80]

The spring of 1920 “saw discontent on the railways all over the country.” This continued throughout the year. In Petrograd, the Aleksandrovskii locomotive building works “had seen strikes in 1918 and 1919” and in August 1920 it again stopped work. Workers had sent three representatives to the works commissar, who had them arrested. Three days later, work stopped and the strikers demanded their release. The authorities placed a guard of 70 sailors outside the enterprise to lock the workers out. The Cheka then arrested the workers’ soviet delegates, who were from the SR (Minority) list, along with thirty workers and then the “opportunity was taken to carry out a general round-up, and arrests were made” at three other works. After the arrests, “a meeting was held to elect new soviet delegates but the workers refused to co-operate and a further 150 were arrested and exiled to Murmansk or transferred to other workshops.” The enormous Briansk works “experienced two major strikes in 1920”, and second one saw the introduction of martial law on both the works and the settlement accept that a true proletariat existed in Russia, charged the working class with being no more than a mass of uprooted peasants with a thoroughly petty-bourgeois psychology.” [Revolution and the People in Russia and China, p. 201]

The most important development during this period was the suppression of soviet democracy and basic working class freedoms. As we discuss in section H.6.1, the Bolsheviks pursued a policy of systematically undermining soviet democracy from the moment they seized power. The first act was the creation of a Bolshevik government over the soviets, so marginalising the very organs they claimed ruled in Russia (and directly against the promises made by Lenin in The State and Revolution — and not the last, as discussed in section H.1.7). The process was repeated in the local soviets, with the executive committees holding real power while the plenary sessions became increasingly infrequent and of little consequence. Come the spring of 1918, faced with growing working class opposition they started to delay soviet elections. When finally forced to hold elections, the Bolsheviks responded in two ways to maintain their power: either they packed the soviets with representatives of Bolshevik dominated organisation (making elections from the workplace irrelevant or they simply disbanded them by force if they lost (and repressed by force any protests against this). This was the situation at the grassroots, at the summit of the soviet system the Bolsheviks simply marginalised the Central Executive Committee of the soviets: real power was held by the Bolshevik government. They also packed the Fifth All-Russian Soviet Congress held in July 1918, using their control over the credentials committee to increase the number of Bolsheviks by seating delegates from bodies they controlled). The power of the soviets had simply become a fig-leaf for a “soviet power” — the handful of Bolsheviks who made up the government and the party’s central committee.
It should be stressed that the Bolshevik assault on the soviets occurred in March, April and May 1918. That is, before the Czech uprising and the onset of full-scale civil war. So, to generalise, it cannot be said that it was the Bolshevik party that alone wholeheartedly supported Soviet power: the facts are, in the words of left-Menshevik Julius Martov, the Bolsheviks loved Soviets only when they were “in the hands of the Bolshevik party.” [quoted by Getzler, Martov, p. 174] If the workers voted for others, “soviet power” was openly replaced by party power (the real aim, as discussed in section H.3.11). The Bolsheviks had consolidated their position by early 1918, turning the Soviet State into a de facto one party state by packing, gerrymandering and disbanding soviets before the start of the Civil War.

Given this legacy of repression, Leninist Tony Cliff’s assertion that it was only “under the iron pressure of the civil war [that] the Bolshevik leaders were forced to move, as the price of survival, to a one-party system” needs serious revising. Similarly, his comment that the “civil war undermined the operation of the local soviets” is equally inaccurate, as his is claim that “for some time — i.e. until the armed uprising of the Czechoslovak Legion — the Mensheviks were not much hampered in their propaganda work.” Simply put, Cliff’s statement that “it was about a year after the October Revolution before an actual monopoly of political power was held by one party” is false. [Lenin, vol. 3, p. 163, p. 150, p. 167 and p. 172] Such a monopoly existed before the start of the civil war, with extensive political repression existing before the uprising of the Czechoslovak Legion which began it. There was a de facto one-party state by the spring of 1918: it took about a year for this reality to be reflected in Bolshevik ideology and rhetoric.

Other Leninists are just as loose with the facts as Cliff. His fellow British SWP member Chris Harman suggested that the Bolsheviks were really democrats and that “[u]ntil the Civil War was well under way, this democratic dialectic of party and class could continue. The Bolsheviks held power as the majority party in the Soviets. But

various sources on simultaneous independent strikes in different cities and an overall picture begins to emerge... Workers’ unrest took place in Russia’s biggest and most important industrial centres: Moscow, Petrograd, Tver’, Tula, Briansk, and Sormovo. Strikes affected the largest industries... Workers’ demands reflected their grievances... The greatest diversity was in workers’ explicitly political demands or expression of political opinion... all workers’ resolutions demanded free and fair elections to the soviets... some workers... demanded the Constituent Assembly...

“The strikes of 1919... fill an important gap in the development of the popular movement between October 1917 and February 1921. On the one hand, they should be seen as antecedents of similar strikes in February 1921, which forced the Communists to abandon war communism. In the capitals, workers, just as the Kronstadt sailors had, still wanted fairly elected soviets and not a party dictatorship. On the other hand, the strikes continued the protests that had began in the summer of 1918. The variety of behavioural patterns displayed during the strikes points to a profound continuity...

“In all known cases the Bolsheviks’ initial response to strikes was to ban public meetings and rallies... In several cities... the authorities confiscated strikers’ food rations in order to suppress the strike. In at least five cities... the Bolsheviks occupied the striking plant and dismissed the strikers en masse... In all known cases the Bolsheviks arrested strikers... In Petrograd, Briansk, and Astrakhan’ the Bolsheviks executed striking workers.” [“Workers’ Unrest and the Bolshevik Response in 1919”, Slavic Review, vol. 49, no. 3, pp. 370–2]
assembled and sent a delegation to the works committee ... and put forward a number of demands ... On 12 March Putilov stopped work. Its workers called to others to join them, and some of them came out in a demonstration where they were fired upon by Cheka troops. Strikes then broke out at fourteen other enterprises ... On Sunday 16 March an appeal was made to the Putilovtsy to return to normal working the following day or ... the sailors and soldiers would be brought in. After a poor showing on the Monday, the sailor went in, and 120 workers were arrested; the sailors remained until the 21st and by the 22nd normal work had been resumed.”

In July strikes broke out again in response to the cancellation of holidays which involved 25,000 workers in 31 strikes. [Mary McAuley, Bread and Justice, pp. 251–253 and p. 254] In the Moscow area, while it is “impossible to say what proportion of workers were involved in the various disturbances,” following the lull after the defeat of the workers’ conference movement in mid-1918 “each wave of unrest was more powerful than the last, culminating in the mass movement from late 1920.” For example, at the end of June 1919, “a Moscow committee of defence (KOM) was formed to deal with the rising tide of disturbances” The KOM “concentrated emergency power in its hands, overriding the Moscow Soviet, and demanding obedience from the population. The disturbances died down under the pressure of repression.” [Richard Sakwa, Soviet Communists in Power, p. 94 and pp. 94–5] In Tula “after strikes in the spring of 1919” local Menshevik party activists had been arrested while Petrograd saw “violent strikes” at around the same time. [Jonathan Aves, Workers Against Lenin, p. 19 and p. 23]

Historian Vladimir Brovkin summarises the data he provides in his article “Workers’ Unrest and the Bolshevik Response in 1919” (reproduced along with data from other years in his book Behind the Front Lines of the Civil War) as follows:

“Data on one strike in one city may be dismissed as incidental. When, however, evidence is available from other parties continued to exist there too. The Mensheviks continued to operate legally and compete with the Bolsheviks for support until June 1918.” Harman does not specifically indicate when he considered the civil war to have started, but almost always it is said to have begun with the revolt of the Czech Legion at the end of May 1918 (a date he seems to agree with, as he writes that the “Right Social Revolutionaries were instigators of the counter-revolution”). The Bolsheviks excluded the Right-SRs and Mensheviks from the government on 14 June of that year so “well under way” appears to mean around 3 weeks. While opposition parties were sometimes tolerated and allowed to stand for election to soviets after this date, the reality was that the soviets had become little more than a fig-leaf of Bolshevik Party by July 1918 yet Harman proclaims “[o]f necessity the Soviet State of 1917 had been replaced by the single-party State of 1920 onwards.” [“How the Revolution was Lost”, pp. 13–36, Peter Bins, Tony Cliff, Chris Harman, Russia: From Workers’ State to State Capitalism, pp. 18–9]

The suppression of Soviet democracy reached its logical conclusion in 1921 when the Kronstadt soviet, heart of the 1917 revolution, was stormed by Bolshevik forces, the rebels executed, imprisoned or forced into exile. Soviet democracy was not just an issue of debate but one many workers died in fighting for: similar events to those at Kronstadt had occurred three years previously.

Before turning to other Bolshevik attacks on working class power and freedom, we need to address one issue. It will be proclaimed by pro-Bolsheviks that the Mensheviks (and SRs) were “counter-revolutionaries” and so Bolshevik actions against them were justified. However, the Bolsheviks started to suppress opposition soviets before the civil war broke out, so at the time neither group could be called “counter-revolutionary” in any meaningful sense of the word. The Civil War started on the 25th of May and the SRs and Mensheviks were expelled from the Soviets on the 14th of June. The right-SRs did support the revolt of the Czech Legion to form what was called the democratic counter-revolution,
based on reforming the Constituent Assembly in Samara (the White generals came later, displacing the SRs and fighting for the restoration of the Tsarist regime). The Mensheviks refused to support this strategy and while the Bolsheviks “offered some formidable fictions to justify the expulsions” there was “of course no substance in the charge that the Mensheviks had been mixed in counter-revolutionary activities on the Don, in the Urals, in Siberia, with the Czechoslovaks, or that they had joined the worst Black Hundreds.” The real reason was the political loses in the soviets before the Civil War: the Bolsheviks “drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains.” [Getzler, Op. Cit., p. 181]

Official Menshevik policy was to utilise soviet democracy to secure a change in government and policy, with any member found to have supported the armed rebellion of the right-SRs was expelled. This included a member of the Menshevik central committee who went “without its knowledge” to Samara and was “expelled from the party”. Likewise, the Volga Mensheviks were “sharply reproved by Martov and the Menshevik Central Committee and instructed that neither party organisations nor members could take part in ... such adventures.” [Getzler Op. Cit., p. 185] Such legal opposition did not stop the Bolsheviks repeatedly tolerating and banning the organisation (interestingly, periods of tolerance coincidenced with the decline of the White threat and the corresponding rise of working class protest). In summary, then, the charge that the Mensheviks “were active supporters of intervention and of counter-revolution” was “untrue ... and the Communists, if they ever believed it, never succeeded in establishing it.” [Leonard Schapiro, The Origin of the Communist Autocracy, p. 193]

Attacks on working class freedoms and democracy were not limited to the soviets. Before seizing power, the Bolsheviks had long presented economic visions much at odds with what libertarians consider as fundamentally socialist. Lenin, in April 1918, was 1917-type soviets.” The Left-SR controlled Kronstadt soviet had been disbanded and replaced by a Bolshevik revolutionary committee in July 1918. [Rabinowitch, The Bolsheviks in Power, p. 352 and p. 302]

This process of workers protest and state repression continued in 1919 and subsequent years. It followed a cyclical pattern. There was a “new outbreak of strikes in March 1919 after the collapse of Germany and the Bolshevik re-conquest of the Ukraine. The pattern of repression was also repeated. A strike at a galosh factory in early 1919 was followed by the closing of the factory, the firing of a number of workers, and the supervised re-election of its factory committee. The Soviet garrison at Astrakhan mutinied after its bread ration was cut. A strike among the city’s workers followed in support. A meeting of 10,000 Astrakhan workers was suddenly surrounded by loyal troops, who fired on the crowd with machine guns and hand grenades, killing 2,000. Another 2,000, taken prisoner, were subsequently executed. In Tula, when strikes at the defence factories stopped production for five days, the government responded by distributing more grain and arresting the strike organisers ... strikes at Putilov again broke out, at first related to the food crisis ... The government treated the strike as an act of counter-revolution and responded with a substantial political purge and re-organisation. An official investigation ... concluded that many shop committees were led by [Left] Social Revolutionaries ... These committees were abolished and management representatives were appointed in their stead.” [Remington, Op. Cit., pp. 109–10] In the Volga region, in March 1919 delegates to a conference of railroad workers “protested the Cheka’s arrest of union members, which the delegates insisted further disrupted transport. It certainly curred the number of strikes.” [Donald J. Raleigh, Experiencing Russia’s Civil War, p. 371]

The strikes in Petrograd centred around the Putilov shows the response of the authorities to the “atomised” workers who were taking collective action. In March 1919, “fifteen factories struck together (roughly 35,000 workers were involved) ... workers at Putilov
disillusionment in the spring of 1918. In fact, “by the early summer of 1918” there were “widespread anti-Bolshevik protests. Armed clashes occurred in the factory districts of Petrograd and other industrial centres.” and “after the initial weeks of ‘triumph’ ... Bolshevik labour relations after October” changed and “soon lead to open conflict, repression, and the consolidation of Bolshevik dictatorship over the proletariat in place of proletarian dictatorship itself.” [Rosenberg, Op. Cit., p. 107 and p. 117] Given this, the outbreak of the civil war consolidated workers support for the Bolsheviks and saved it from even more damaging workers’ unrest. As Thomas F. Remington puts it:

“At various times groups of workers rebelled against Bolshevik rule. But for the most part, forced to choose between ‘their’ regime and the unknown horrors of a White dictatorship, most willingly defended the Bolshevik cause. The effect of this dilemma may be seen in the periodic swings in the workers’ political temper. When Soviet rule stood in peril, the war simulated a spirit of solidarity and spared the regime the defection of its proletarian base. During lulls in the fighting, strikes and demonstrations broke out.” [Op. Cit., p. 101]

This cycle of resistance and repression was widespread. In July 1918, a leading Bolshevik insisted “that severe measures were needed to deal with strikes” in Petrograd while in other cities “harsher forms of repression” were used. For example, in Tula, in June 1918, the regime declared “martial law and arrested the protestors. Strikes followed and were suppressed by violence”. In Sormovo, 5,000 workers went on strike after a Menshevik-SR paper was closed. Violence was “used to break the strike.” [Remington, Op. Cit., p. 105] It should also be noted that at the end of September, there was a revolt by Baltic Fleet sailors demanding (as they did again in 1921) a “return to government by liberated, democratic soviets — that is, arguing for one-man management and “[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers.” His support for a new form of wage slavery involved granting state appointed “individual executives dictatorial powers (or ‘unlimited’ powers.” Large-scale industry (“the foundation of socialism”) required “thousands subordinating their will to the will of one,” and so the revolution “demands” that “the people unquestioningly obey the single will of the leaders of labour.” Lenin’s “superior forms of labour discipline” were simply hyper-developed capitalist forms. The role of workers in production was the same, but with a novel twist, namely “unquestioning obedience to the orders of individual representatives of the Soviet government during the work.” [Collected Works, vol. 27, p. 316, p. 267–9 and p. 271]

This simply replaced private capitalism with state capitalism. “In the shops where one-man management (Lenin’s own preference) replaced collegial management,” notes historian Diane Koenker, “workers faced the same kinds of authoritarian management they thought existed only under capitalism.” [Labour Relations in Socialist Russia, p. 177] If, as many Leninists claim, one-man management was a key factor in the rise of Stalinism and/or “state-capitalism” in Russia, then, clearly, Lenin’s input into these developments cannot be ignored (see section H.3.13 on the obvious similarities between state socialism and state capitalism). After advocating “one-man management” and “state capitalism” in early 1918, he remained a firm supporter of both and looking back at this time from April 1920, he reiterated his position (“Dictatorial powers and one-man management are not contradictory to socialist democracy”) while also stressing that this was not forced upon the Bolsheviks by civil war. Discussing how, as in April 1918, the civil war was ended and it was time to build socialism he argued that the “whole attention of the Communist Party and the Soviet government is centred on peaceful economic development,
on problems of the dictatorship and of one-man management ...
When we tackled them for the first time in 1918, there was no civil
war and no experience to speak of.” So it was “not only experience”
of civil war, argued Lenin “but something more profound . . . that
has induced us now, as it did two years ago, to concentrate all our

In the light of this it is bizarre that some later day Leninists
claim that the Bolsheviks only introduced one-man management
because of the Civil War. Clearly, this was not the case: it was this
period (before the civil war) that saw Lenin advocate and start to
take the control of the economy out of the hands of the workers and
place it into the hands of the Bolshevik party and the state bureau-
cracy. Thus what pro-Leninists like to portray as Stalinist had its
roots in Lenin’s regime, as can be seen when neo-Trotskyists like
the British SWP’s Peter Binns argue that Stalinism must be defined
as “state capitalism” because of the “exploitation and powerlessness
of the Russian working class”, created when it was “decreed” that
“all managers’ orders” were – to quote a 1929 resolution of the
Communist Party’s Central Committee – to be “unconditionally
binding on his subordinate administrative staff and on all workers”.
[“The Theory of State Capitalism”, pp. 73–98, Russia: From Work-
ers’ State to State Capitalism, p. 75] Given Lenin’s imposition of one-man management in early 1918, why was Bolshevism not
state-capitalist? Do social relationships change their nature depen-
dent on who imposes them, whether it was Lenin or Stalin?

Needless to say, the Bolshevik undermining of the factory
committee movement and, consequently, genuine worker’s self-
management of production in favour of state capitalism cannot be
gone into great depth here (see section H.6.2, for more discussion).
Suffice to say, the factory committees were deliberately submerged
in the trade unions and state control replaced workers’ control.
This involved practising one-man management and, as Lenin put
in at the start of May 1918, “our task is to study the state capitalism
of the Germans, to spare no effort in copying it and not to shrink
of the ‘criminal demagogy’ of certain elements. Lack of support for
current Bolshevik practices was treated as the absence of worker
consciousness altogether, but the causes of the unrest was more
complicated. In 1917 political issues gradually came to be perceived
through the lens of party affiliation, but by mid-1918 party conscious-
ness was reversed and a general consciousness of workers’ needs
restored. By July 1918 the protest movement had lost its momentum
in the face of severe repression and was engulfed by the civil war.”
In the light of the fate of workers’ protest, the May 16th resolution
by the Bogatyr’ Chemical Plant calling (among other things) for
“freedom of speech and meeting, and an end to the shooting of
citizens and workers” seems to the point. Unsurprisingly, “[f]aced
with political opposition within the soviets and worker dissatisfaction
in the factories Bolshevik power increasingly came to reply on the
party apparatus itself.” [Richard Sakwa, “The Commune State in
442–3, p. 442 and p. 443] State repression also took place “[i]n June
1918 [when] workers in Tula protested a cut in rations by boycotting
the local soviet. The regime declared martial law and arrested the
protestors. Strikes followed and were suppressed by violence. In
Sormovo, when a Menshevik-Social Revolutionary newspaper was
closed, 5,000 workers went on strike. Again firearms were used to
break the strike.” Other techniques were used to break resistance.
For example, the regime often threatened rebellious factories
with a lock out, which involved numerous layoffs, new rules of
discipline, purges of workers’ organisations and the introduction
of piece work. [Thomas F. Remington, Building Socialism in
Bolshevik Russia, p. 105 and p. 107] As discussed in section
H.6.1, similar events happened in other cities with the Bolsheviks
disbanding soviets elected with non-Bolshevik majorities all
across Russia and suppressing the resulting working class protest.
Rather than the Civil War disrupting the relationship between
the vanguard party and the class it claimed to lead, it was in fact the
Bolsheviks who did so in face of rising working class dissent and
majority in advance”. In short, the Bolsheviks “contrived a majority” in the new Soviet long before gaining 127 of the 260 factory delegates and even these victories raised “the nagging question of how many Bolshevik deputies from factories were elected instead of the opposition because of press restrictions, voter intimidation, vote fraud, or the short duration of the campaign.” Overall, then, the Bolshevik election victory “was highly suspect, even on the shop floor.” [Alexander Rabinowitch, The Bolsheviks in Power, pp. 248–252]

The fact the civil war had just started with the revolt of the Czech Legion at the end of May also undoubtedly aided the Bolsheviks during this election, as did the fact that the Mensheviks and Right-SRs had campaigned on a platform of winning the soviet elections as the means of replacing soviet democracy by the Constituent Assembly: many workers still viewed the soviets as their organisations and aimed for a functioning soviet system rather than its end. With their electoral “mandate,” secured beforehand, the opposition fatally weakened by its backward-looking perspective and the threat of counter-revolution (albeit in the name of the Constituent Assembly rather than White restoration), the Bolsheviks turned on the Conference, both locally and nationally, and arrested its leading activists, so decapitating one of the few independent working class organisations left in Russia. As Rabinowitch argues, “the Soviet authorities were profoundly worried by the threat posed by the Assembly and fully aware if their growing isolation from workers (their only real social base) ... Petrograd Bolsheviks developed a siege mentality and a corresponding disposition to consider any action — from suppression of the opposition press and manipulation of elections to terror even against workers — to be justified in the struggle to retain power until the start of the imminent world revolution.” [Early Disenchantment with Bolshevik Rule, pp. 43–4]

In Moscow, workers also organised a Conference movement and “[r]esentment against the Bolsheviks was expressed through strikes and disturbances, which the authorities treated as arising from supply difficulties, from ‘lack of consciousness,’ and because from adopting dictatorial methods to hasten the copying of it.” He stressed that this was no new idea, rather he “gave it before the Bolsheviks seized power.” [Op. Cit., vol. 27, p. 340 and p. 341]

It will be objected that Lenin advocated “workers’ control.” This is true, but a “workers’ control” of a very limited nature. As we discuss in section H.3.14, rather than seeing it as workers managing production directly, he always saw it in terms of workers’ “controlling” or “supervising” those who did and his views on this matter were radically different to those of the factory committees. This is not all, as Lenin always placed his ideas in a statist context — rather than base socialist reconstruction on working class self-organisation from below, the Bolsheviks started “to build, from the top, its ‘unified administration’” based on central bodies created by the Tsarist government in 1915 and 1916. [Maurice Brinton, The Bolsheviks and Workers’ Control, p. 36] The institutional framework of capitalism would be utilised as the principal (almost exclusive) instruments of “socialist” transformation. Lenin’s support for “one-man management” must be seen in this context, namely his vision of “socialism.”

Bolshevik advocating and implementing of “one-man management” was not limited to the workplace. On 30th of March 1918 Trotsky, as Commissar of Military Affairs, set about reorganising the army. The death penalty for disobedience under fire was reintroduced, as was saluting officers, special forms of address, separate living quarters and privileges for officers. Officers were no longer elected. [Brinton, Op. Cit., pp. 37–8] Trotsky made it clear: “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree”. [“Work, Discipline, Order”, How the Revolution Armed, vol. I, pp. 46–7] The soldiers were given no say in their fate, as per bourgeois armies.

Lenin’s proposals also struck at the heart of workers’ power in other ways. For example, he argued that “we must raise the question of piece-work and apply it ... in practice.” [“The Immediate Tasks
Of The Soviet Government”, Collected Works, vol. 27, p. 258] As Leninist Tony Cliff (of all people) noted, “the employers have at their disposal a number of effective methods of disrupting the unity of workers as a class. One of the most important of these is the fostering of competition between workers by means of piece-work systems.” He notes that this was used by the Nazis and the Stalinists “for the same purpose.” [State Capitalism in Russia, pp. 18–9] Obviously piece-work is different when Lenin introduces it!

Finally, there is the question of general political freedom. It was also in this time period that the Bolsheviks first used the secret police (the Cheka, formed in December 1917) against left-wing opposition groups. The anarchists in Moscow were attacked on the night of April 11–12, with armed detachments of the Cheka raiding 26 anarchist centres, killing or wounding 40 and jailing 500. Shortly afterwards the Cheka carried out similar raids in Petrograd and in the provinces. In May Burevestnik, Anarkhiia, Golos Truda and other leading anarchist periodicals closed down. [Paul Avrich, The Russian Anarchists, pp. 184–5] It must surely be a coincidence that there had been a “continued growth of anarchist influence among unskilled workers” after the October revolution and, equally coincidentally, that “[b]y the spring of 1918, very little was heard from the anarchists in Petrograd.” [David Mandel, The Petrograd Workers and the Soviet Seizure of Power, p. 357]

All this before the Trotsky provoked revolt of the Czech legion at the end of May, 1918, and the consequent “democratic counter-revolution” in favour of the Constituent Assembly (which the right-Socialist Revolutionaries led) and long before the rise of the White Armies (which replaced the right-SRs as the main threat to “soviet power” by the end of 1918) and Allied intervention. In summary, it was before large-scale civil war took place, in an interval of relative peace, that we see the introduction of most of the measures Leninists now try and pretend were necessitated by the Civil War itself. As discussed in sections H.1.7, the promises of 1917 did not last six months.

chantment with Bolshevik Rule, p. 42] This repression was not trivial:

“Among other things, all newspapers were forced to print on their front pages Petrograd soviet resolutions condemning the Assembly as part of the domestic and foreign counter-revolution. Factories participating in the strike were warned that they would be shut down and individual strikers were threatened with the loss of work — threats that were subsequently made good. Printing plants suspected of opposition sympathies were sealed, the offices of hostile trade unions were raided, martial law declared on rail lines, and armed strike-breaking patrols with authority to take whatever action was necessary to prevent work stoppages were formed and put on 24-hour duty at key points throughout Petrograd.” [Op. Cit., p. 45]

Needless to say, “the Petrograd authorities drew on the dubious mandate provided by the stacked soviet elections to justify banning the Extraordinary Assembly.” [Op. Cit., p. 42] While the Bolsheviks had won around 50% of workplace votes, they had gerrymandered the election results irrelevant. Faced with “demands from below for the immediate re-election” of the Soviet, before the long-postponed election took place the existing Bolshevik-controlled Soviet confirmed new regulations “to help offset possible weaknesses” in their “electoral strength in factories.” The “most significant change in the makeup of the new soviet was that numerically decisive representation was given to agencies in which the Bolsheviks had overwhelming strength, among them the Petrograd Trade Union Council, individual trade unions, factory committees in closed enterprises, district soviets, and district non-party workers’ conferences.” This ensured that “only 260 of roughly 700 deputies in the new soviet were to be elected in factories, which guaranteed a large Bolshevik
ing Nevskii district workers to return to work and continue preparation for a general city-wide strike.” [Rabinowitch, Op. Cit., p. 42] Unfortunately, for the Assembly, postponing the strikes until later, until a “better time”, rather than encouraging them gave the authorities time to prepare.

“At the end of May and beginning of June, a wave of strikes to protest the lack of bread swept Nivskii district factories” and “strikes followed by bloody clashes between workers and Soviet authorities had erupted in scattered parts of central Russia.” In Petrograd, things came to a head during and after the soviet elections in June. On June 21, a general meeting of Obukhov workers “seized control of the plant” and the next day the assembled workers “resolved to demand that the EAD should declare political strikes … to protest the political repression of workers.” Orders were issued by the authorities “to shut down Obukhov plant” and “the neighbourhood surrounding the plant was placed under martial law.” [Rabinowitch, The Bolsheviks in Power, p. 231 and pp. 246–7] So faced with workers collective action, the “Bolsheviks responded by ‘invading’ the whole Nevskii district with troops and shutting down Obukhov completely. Meetings everywhere were forbidden.” However “workers were not so readily pacified. In scores of additional factories and shops protests mounted and rapidly spread along the railways.” At the June 26th “extraordinary session” of the Conference a general strike was declared for July 2nd. The Bolshevik authorities acted quickly: “Any sign of sympathy for the strike was declared a criminal act. More arrests were made. In Moscow, Bolsheviks raided the Aleksandrovsk railroad shops, not without bloodshed. Dissidence spread.” On July 1st, “machine guns were set up at main points throughout the Petrograd and Moscow railroad junctions, and elsewhere in both cities as well. Controls were tightened in factories. Meetings were forcefully dispersed.” [Rosenberg, Op. Cit., p. 127] Unsurprisingly, “as a result of extreme government intimidation, the response to the Assembly’s strike call on 2 July was negligible.” [Rabinowitch, Early Disen-

This factual problem with the “civil war caused Bolshevik authoritarianism” excuse is the best answer to it. If the Bolsheviks pursued authoritarian policies before the civil war started, it is hard to justify their actions in terms of something that had not started yet. This explains why some Leninists have tried to muddy the waters somewhat by obscuring when the civil war started. For example, John Rees states that “[m]ost historians treat the revolution and the civil war as separate processes” yet “[i]n reality they were one.” He presents a catalogue of “armed resistance to the revolution,” including such “precursors of civil war before the revolution” as the suppression after the July days and the Kornilov revolt in 1917. [John Rees, “In Defence of October,” pp. 3–82, International Socialism, no. 52, p. 31–2]

Ironically, Rees fails to see how this blurring of when the civil war started actually harms Leninism. After all, most historians place the start of the civil war when the Czech legion revolted because it marked large-scale conflict between armies. It is one thing to say that authoritarianism was caused by war — large-scale conflict — and another to say any form of conflict caused it. Simply put, if the Bolshevik state could not handle relatively minor forms of counter-revolution then where does that leave Lenin’s State and Revolution? It is even worse if “civil war” is pushed back to before the actual revolution for then revolution is equated to civil war and so doomed to degeneration before it even starts. So while the period from October to May of 1918 was not trouble free, it was not one where the survival of the new regime looked to be seriously threatened as it was after that, particularly in 1919 and 1920. Thus “civil war” should be used, as is commonly done, to refer to the period from the Czech revolt (late May 1918) to the final defeat of Wrangel (November 1920).

This means attempts to push the start of the civil war back to October 1917 (or even earlier) simply weakens the Leninist argument. It still leaves the major problem for the “blame it on the civil war” position, namely to explain why the months before May of
1918 saw soviets being closed down, the start of the suppression of the factory committees, restrictions on freedom of speech and association, plus the repression of opposition groups (like the anarchists). Either any level of “civil war” makes Lenin’s *State and Revolution* redundant or the source of Bolshevik authoritarianism must be found elsewhere. Given that Leninists to this day continue to point to Lenin’s work as what they “really” stand for, it seems unlikely that they will take their rationales for the Bolsheviks’ violating it in practice to their logical position and place that work in the dustbin of history.

That covers the period before the start of the civil war. We now turn to the period after it finished. Here we find the same problem, namely an increase of authoritarianism even after the proclaimed cause for it (civil war) had ended.

The last White General Wrangel evacuated what remained of his forces to Constantinople in November 1920. With this defeat the Russian civil war had come to an end and the Bolsheviks started to demobilise the Red Army (halving its size to around 2,500,000 by the start of 1921). Those familiar with the history of the revolution will realise that it was some 4 months later that yet another massive strike wave occurred and the Kronstadt revolt took place (see the appendix “What was the Kronstadt Rebellion?”), while within the party, the 10th Congress banned factions. The repression of the strikes and Kronstadt revolt effectively destroying hope for mass pressure for change from below and the faction ban within the party closed off the very last “legal” door for those who opposed the regime from the left (although, as discussed in the appendix “Were any of the Bolshevik oppositions a real alternative?”, given that all the main factions did not question the necessity of party dictatorship there was no possibility for real socialist change).

It could be argued that the Bolsheviks were still fighting peasant insurrections and strikes across the country, but this has everything to do with Bolshevik policies and could only be considered “counter-revolutionary” if you think the Bolsheviks...
and soviets ... were no longer representative, democratically run working-class institutions; instead they had been transformed into arbitrary, bureaucratic government agencies. There was ample reason for this concern.” To counter the EAD, the Bolsheviks organised non-party conferences which, in itself, shows that the soviets had become as distant from the masses as the opposition argued. District soviets “were deeply concerned about their increasing isolation ... At the end of March ... they resolved to convene successive nonparty workers’ conferences ... in part to undercut the EAD by strengthening ties between district soviets and workers.” This was done amidst “unmistakable signs of the widening rift between Bolshevik-dominated political institutions and ordinary factory workers.” The EAD was an expression of the “growing disenchantment of Petrograd workers with economic conditions and the evolving structure and operation of Soviet political institutions”.

It “appeared that the government was now ready to go to whatever extremes it deemed necessary (including sanctioning the arrest and even shooting of workers) to quell labour unrest. This in turn led to intimidation, apathy, lethargy and passivity of other workers. In these circumstances, growth in support of the [Extraordinary] Assembly slowed down.” The Assembly’s plans for a May Day demonstration to protest the government’s policies were cancelled because of workers did not respond to the appeals to demonstrate, in part because of “Bolshevik threats against ‘protesters’”. This apathy did not last long as events “served to reinvigorate and temporarily radicalise the Assembly. These developments included yet another drastic drop in food supplies, the shooting of protesting housewives and workers in the Petrograd suburb of Kolpino, the arbitrary arrest and abuse of workers in another Petrograd suburb, Sestroresk, the closure of newspapers and the arrests of individuals who had denounced the Kolpino and Sestroresk events, the intensification of labour unrest and conflict with the authorities in the Obukhov plant and in other Petrograd fac-

had a monopoly of what socialism and revolution meant. In the case of the Makhnovists in the Ukraine, the Bolsheviks started that conflict by betraying them once they had played a key role in defeating Wrangel. As such, any resistance to Bolshevik rule by the working class and peasantry of Russia indicated the lack of democracy within the country rather than some sort of “counter-revolutionary” conflict.

So even the end of the Civil War causes problems for this defence of the Bolsheviks. Simply put, with the defeat of the Whites it would be expected that some return to democratic norms would happen. It did not, in fact the reverse happened. Factions were banned, even the smallest forms of opposition was finally eliminated from both the party and society as a whole. Those opposition groups and parties which had been tolerated during the civil war were finally smashed. Popular revolts for reform, such as the Kronstadt rebellion and the strike wave which inspired it (see ] [section 5 below), were put down by force. No form of opposition was tolerated, no freedom allowed. If civil war was the cause of Bolshevik authoritarianism, it seems strange that it got worse after it was finished.

This grim reality was what convinced anarchists like Emma Goldman and Alexander Berkman to finally break with the regime. After rationalising away their doubts with the hope that the end of the civil war would see change, the continuation of repression showed them the error of their ways. As Goldman put it:

“We must not fail to consider the Bolsheviki continue to employ exactly the same methods today as they did in ‘the moments of grim necessity, in 1919, 1920, and 1921.’ ... The military fronts have long ago been liquidated; internal counter-revolution is suppressed; the old bourgeoisie is eliminated; the ‘moments of grim necessity’ are past ... but the Terror, the Tchecka, suppression of free speech and press, and all the other Communist methods
of former years still remain in force. Indeed, they are being applied even more brutally and barbarously since the death of Lenin. Is it to ‘preserve the remnants of civilisation’ or to strengthen the weakening Party dictatorship?”

[My Disillusionment in Russia, pp. liii-liv]

This, then, is the main factual problem with the “blame the civil war” approach beloved by Leninists to this day: Bolshevik authoritarianism had not began with the start of the civil war, nor did it stop when the civil war ended.

As we discuss in section H.6, the root causes for Bolshevik authoritarianism post-October was Bolshevik ideology combined with state power. After all, how “democratic” is it to give all power to the Bolshevik party central committee? Surely socialism involves more than voting for a new government? Is it not about mass participation, the kind of participation centralised government precludes and Bolshevism vanguardism fears — as discussed in section H.5 — as being inevitably influenced by “bourgeois ideology”? In such circumstances, moving from party rule to party dictatorship is not such a leap.

That “civil war” cannot explain what happened can be shown by a counter-example which effectively shows that civil war did not inevitably mean party dictatorship ruling over a state capitalist economy (and protesting workers and peasants!). The Makhnovists (an anarchist influenced partisan army) managed to defend the revolution and encourage soviet democracy, freedom of speech, and so on, while doing so (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). Which, of course, does not really fit in with the Bolsheviks being forced to be anti-democratic due to the pressures of civil war.

So, in summary, civil war and imperialist intervention cannot be blamed for Bolshevik authoritarianism simply because the latter had started before the former existed. Moreover, the example of the Makhnovists suggests that Bolshevik policies during the civil war intensified the disenchantment of significant segments of Petrograd labour with Bolshevik-dominated Soviet rule.” [Alexander Rabinowitch, Early Disenchantment with Bolshevik Rule, p. 37]

The reasons for these protest movements were both political and economic. The deepening economic crisis combined with protests against Bolshevik authoritarianism to produce a wave of strikes aiming for political change. Feeling that the soviets were distant and unresponsive to their needs (with good reason, given Bolshevik postponement of soviet elections and gerrymandering of the soviets — see section H.6.1), workers turned to direct action and the initially Menshevik inspired “Conference of Factory and Plant Representatives” (also known as the “Extraordinary Assembly of Delegates from Petrograd Factories and Plants”, EAD) to voice their concerns. At its peak, reports “estimated that out of 146,000 workers still in Petrograd, as many as 100,000 supported the conference’s goals.” [Rosenberg, Op. Cit., p. 127] The aim of the Conference (as per Menshevik policy) was to reform the existing system from within and, as such, the Conference operated openly: “for the Soviet authorities in Petrograd, the rise of the Extraordinary Assembly of Delegates from Petrograd Factories and Plants was an ominous portent of worker defection.” [Rabinowitch, Op. Cit., p. 37]

The first wave of outrage and protests occurred after Bolshevik Red Guards opened fire on a demonstration for the Constituent Assembly in early January (killing 21, according to Bolshevik sources). This demonstration “was notable as the first time workers came out actively against the new regime. More ominously, it was also the first time forces representing soviet power used violence against workers.” [David Mandel, The Petrograd Workers and the Soviet Seizure of Power, p. 355] It would not be the last — indeed repression by the “workers’ state” of workers became a recurring feature of Bolshevism.

The general workers’ opposition saw the growth of the EAD. “The emergence of the EAD”, Rabinowitch notes, “was also stimulated by the widespread view that trade unions, factory committees,
Needless to say, it would be impossible to give a full account of working class resistance to Bolshevism. All we can do here is give a flavour of what was happening and the sources for further information (also see section H.6.3). What should be clear from our account is that the idea that the working class in this period was incapable of collective organisation and struggle is false, the idea that Bolshevist “substitutionism” can be explained in such terms is also false. In addition, it will become clear that Bolshevik repression explicitly aimed to break the ability of workers to organise and exercise collective power. As such, it seems hypocritical for modern-day Leninists to blame Bolshevik party dictatorship on the “atomisation” of the working class when Bolshevik rule was dependent on smashing working class collective organisation and resistance. Simply put, to remain in power Bolshevism, from almost the start, had to crush working class power. This is to be expected, given the centralised nature of the state and the class structures and authoritarian social relationships it generates (see section H.3.9) and the assumptions of vanguardism (see section H.5). If you like, October 1917 did not see the end of “dual power”: rather the Bolshevik state replaced the bourgeois state and working class power (as expressed in its collective struggle) came into conflict with it. By 1921 these protests and strikes were threatening the very existence of the Bolshevik dictatorship, forcing it to abandon key aspects of its economic policies.

This struggle of the “workers’ state” against the workers started early in 1918. “By the early summer of 1918,” records one historian, “there were widespread anti-Bolshevik protests. Armed clashes occurred in the factory districts of Petrograd and other industrial centres. Under the aegis of the Conference of Factory and Plant Representatives ... a general strike was set for July 2.” [William Rosenberg, *Russian Labour and Bolshevik Power*, p. 107] According to another historian, economic factors “were soon to erode the standing of the Bolsheviks among Petrograd workers ... These developments, in turn, led in short order to worker protests, which then precipitated violent repressions against hostile workers. Such treatment further were also not driven purely by the need for survival. As Kropotkin argued in 1920, “all foreign armed intervention necessarily strengthens the dictatorial tendencies of the government ... The evils inherent in a party dictatorship have been accentuated by the conditions of war in which this party maintains its power. This state of war has been the pretext for strengthening dictatorial methods which centralise the control of every detail of life in the hands of the government, with the effect of stopping an immense part of the ordinary activity of the country. The evils natural to state communism have been increased ten-fold under the pretext that all our misery is due to foreign intervention.” [Anarchism, p. 253]

In other words, while the civil war may have increased Bolshevik authoritarianism, it did not create it.

### 4 Did economic collapse and isolation destroy the revolution?

One of the most common Trotskyist explanations for the failure of the Russian revolution is that the Bolsheviks faced terrible economic conditions, which forced them to be less than democratic. Combined with the failure of the revolution to spread to more advanced countries, party dictatorship, it is argued, was inevitable. In the words of Leninist John Rees:

“In a country where the working class was a minority of the population, where industry had been battered by years of war and in conditions of White and imperialist encirclement, the balance gradually tilted towards greater coercion. Each step of the way was forced on the Bolsheviks by dire and pressing necessities.” [“In Defence of October,” *International Socialism*, no. 52, p. 41]

Thus “economic devastation” played a key part in the degeneration of the revolution. [Op. Cit., p. 31] Other Leninists have made
similar arguments, with Victor Serge noting that the “decline in production was uninterrupted. It should be noted that this decline had already begun before the revolution. In 1916 the output of agricultural machinery, for example, was down by 80 per cent compared with 1913. The year 1917 had been marked by a particularly general, rapid and serious downturn. The production figures for the principal industries in 1913 and 1918 were, in millions of poods: coal, from 1,738 to 731 (42 per cent); iron ore, from 57, 887 to 1,686; cast-iron, from 256 to 31.5 (12.3 per cent); steel, from 259 to 24.5; rails, from 39.4 to 1.1. As a percentage of 1913 production, output of linen fell to 75 per cent, of sugar to 24 per cent, and tobacco to 19 per cent.” Moreover, production continued “to fall until the end of civil war … For 1920, the following indices are given as a percentage of output in 1913: coal, 27 per cent; cast iron, 2.4 per cent; linen textiles, 38 per cent.”

Likewise Tony Cliff (like Serge, another of Rees’s references), who argued that war-damaged industry “continued to run down” in the spring of 1918: “One of the causes of famine was the breakdown of transport … Industry was in a state of complete collapse. Not only was there no food to feed the factory workers; there was no raw material or fuel for industry … The collapse of industry meant unemployment for the workers.” Cliff provides economic indexes. For large scale industry, taking 1913 as the base, 1917 saw production fall to 77%. In 1918, it was at 35% of the 1913 figure, 1919 it was 26% and 1920 was 18%. Productivity per worker also fell, from 85% in 1917, to 44% in 1918, 22% in 1919 and then 26% in 1920. [Lenin, vol. 3, pp. 67–9, p. 86 and p. 85]

In such circumstances, it is argued, how can you expect the Bolsheviks to subscribe to democratic and socialist norms? This meant that the success or failure of the revolution depended on whether the revolution spread to more advanced countries. Leninist Duncan Hallas argues that the “failure of the German Revolution in 1918–19 ... seems, in retrospect, to have been decisive ... for only substantial economic aid from an advanced economy, in practice from a social-
he does not — no more than Trotsky before him — mention that the strikes were “resolved” by “serious” state repression as Emma Goldman recalled:

Trotsky … omits the most important reason for the seeming indifference of the workers of Petrograd. It is of importance, therefore, to point out that the campaign of slander, lies and calumny against the sailors began on 2nd March, 1921. The Soviet Press fairly oozed poison against the sailors. The most despicable charges were hurled against them, and this was kept up until Kronstadt was liquidated on 17th March. In addition, Petrograd was put under martial law. Several factories were shut down … Under these iron-clad rules it was physically impossible for the workers of Petrograd to ally themselves with Kronstadt, especially as not one word of the manifestoes issued by the sailors in their paper was permitted to penetrate to the workers in Petrograd. In other words, Leon Trotsky deliberately falsifies the facts.” [“Trotsky Protests Too Much”, [Writings of Emma Goldman, 264]

Nor does Rees explain how “an atomised, individualised mass” could conduct such “serious” strikes, strikes which required martial law to break. Little wonder, then, Rees does not expound on the strikes and what they mean in terms of the revolution and his own argument. Ida Mett long ago stated the obvious about these all-Russia strike waves: “And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?” [The Kronstadt Uprising, p. 81]

Similarly, we find Victor Serge arguing that the “working class often fretted and cursed; sometimes it lent an ear to the Menshevik agitators, as in the great strikes at Petrograd in the spring of 1919.

ist Germany, could have reversed the disintegration of the Russian working class.” [“Towards a revolutionary socialist party,” pp. 38–55, Party and Class, Alex Callinicos (ed.), p. 44]

Anarchists are not convinced by these arguments. This is for two reasons.

Firstly, we are aware that revolutions are disruptive no matter where they occur and, moreover, Leninists are meant to know this too (see section 1). Simply put, there is a certain incredulous element to these arguments. Lenin himself had argued that “[e]very revolution … by its very nature implies a crisis, and a very deep crisis at that, both political and economic. This is irrespective of the crisis brought about by the war.” [Collected Works, vol. 30, p. 341] Serge also considered crisis as inevitable, arguing that the “conquest of production by the proletariat was in itself a stupendous victory, one which saved the revolution’s life. Undoubtedly, so thorough a recasting of all the organs of production is impossible without a substantial decline in output; undoubtedly, too, a proletariat cannot labour and fight at the same time.” [Op. Cit., p. 361] As we discussed in detail in section 2, this was a common Bolshevik position at the time and so it seems strange that — yet again — Leninists blame events they consider inevitable for the degeneration of the Bolshevik regime.

Secondly, and more importantly, every revolution or revolutionary situation has been accompanied by economic crisis. This means that if Bolshevik authoritarianism is blamed on the state of the economy, it is not hard to conclude that every Bolshevik-style revolution will suffer the same fate as the Russian one. For example, as we will shortly prove, Germany itself was in a state of serious economic disruption and falling production in 1918 and 1919, a collapse which would have got worse is a Bolshevik-style revolution had occurred there. This suggests that the common Leninist idea that a successful revolution in, say, Germany would have ensured the success of the Russian Revolution is flawed. Looking at Europe during the period immediately after the first world war, we discover great economic hardship. To quote one Trotskyist editor:
In the major imperialist countries of Europe, production still had not recovered from wartime destruction. A limited economic upswing in 1919 and early 1920 enabled many demobilised soldiers to find work, and unemployment fell somewhat. Nonetheless, in ‘victorious’ France overall production in 1920 was still only two-thirds its pre-war level. In Germany industrial production was little more than half its 1914 level, human consumption of grains was down 44 per cent, and the economy was gripped by spiralling inflation. Average per capita wages in Prague in 1920, adjusted for inflation, were just over one-third of pre-war levels. [John Riddell, "Introduction," Proceedings and Documents of the Second Congress, 1920, vol. I, p. 17]

Now, if economic collapse was responsible for Bolshevik authoritarianism and the subsequent failure of the revolution, it seems hard to understand why an expansion of the revolution into similarly crisis ridden countries would have had a major impact in the development of the revolution. Since most Leninists agree that a successful German Revolution would have made the difference, we will discuss this in more detail before going onto other revolutions and revolutionary situations.

By 1918, Germany was in a bad state. Victor Serge noted “the famine and economic collapse which caused the final ruin of the Central Powers.” [Op. Cit., p. 361] The semi-blockade of Germany during the war badly effected the economy, the “dynamic growth” of which before the war “had been largely dependent on the country’s involvement in the world market”. The war “proved catastrophic to those who had depended on the world market and had been involved in the production of consumer goods . . Slowly but surely the country slithered into austerity and ultimately economic collapse” and “overall food production declined further after poor harvests in 1916 and 1917. Thus grain production, already well below its prewar levels, soviet democracy was possible in those towns but not in Petrograd or Moscow? Or does the fact that the industrial workforce grew by 14.8% between October 1920 and April 1921 mean that the possibility for soviet democracy also grew by a related percentage? [Aves, Workers Against Lenin, p. 159] In neither case was soviet democracy encouraged, in spite of the reversal of the factor alleged to have undermined it.

Then there is the question of when the reduction of workers makes soviet democracy impossible. After all, between May 1917 and April 1918 the city of Moscow lost 300,000 of its two million inhabitants. Was soviet democracy impossible in April 1918 because of this? During the civil war, Moscow lost another 700,000 by 1920 (which is basically the same amount per year). [Diane Koenker, Op. Cit., p. 424] When did this fall in population mean that soviet democracy was impossible?

Simply put, comparing figures of one year to another simply fails to understand the dynamics at work, such as the impact of “reasons of state” and working class resistance to Bolshevik rule. It, in effect, turns attention away from the state of working class autonomy and on to number crunching.

Ultimately, the question of whether the working class was too “atomised” to govern can only be answered by doing something Leninists rarely do: looking at the class struggle in Russia during this period, by looking at the strikes, demonstrations and protests that occurred under Bolshevik rule. Needless to say, certain strike waves just cannot be ignored. The most obvious case is in Petrograd just before the Kronstadt revolt in early 1921. After all, the strikes (and subsequent Bolshevik repression) inspired the sailors to revolt in solidarity with them. Faced with such events, in Leninist circles the scale of the strikes and the Bolshevik repression is understated and the subject quickly changed. As we noted in section 10 of the appendix on “What was the Kronstadt Rebellion?”, John Rees states that Kronstadt was “preceded by a wave of serious but quickly resolved strikes.” [Op. Cit., p. 61] Needless to say,
mass unemployment and economic crisis, the workers organised
themselves and fought back. Likewise, the reduction in the number
of Russian workers did not restrict their ability to make collective
decisions and collectively act on them — Bolshevik repression did.

Moreover, while Leninists usually point to the fall in population in
Petrograd and Moscow during the civil war, concentrating on
these cities can be misleading. “Using the Petrograd figures,” notes
Daniel R. Bower, “historians have painted a lurid picture of flight from
the cities. In 1918 alone the former capital lost 850,000 people and
was by itself responsible for one-half of the total urban popula-
tion decline of the Civil War years. If one sets aside aggregate figures
to determine the trend characteristic of most cities, however, the ex-
periences of Petrograd appears exception. Only a handful of cities ... lost half their population between 1917 and 1920, and even Moscow, which declined by over 40 percent, was not typical of most towns in the northern, food-importing areas. A study of all cities ... found that the average decline in the north (167 towns in all, excluding the capital cities) amounted to 24 percent between 1917 and 1920. Among the towns in the food-producing areas in the southern and eastern regions of the Russian Republic (a total of 128), the average decline came to only 14 percent.” [“The city in danger: The Civil War and the Russian Urban Population,” Party, State, and Society in the Russian Civil War, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 61] Does this mean that the possibility of soviet democracy declined less in these towns? Yet the Bolsheviks applied their dictatorship even there, suggesting that declining urban populations was not the source of their authoritarianism.

Equally, what are we to make of towns and cities which increased their populations? For example, Minsk, Samara, Khar'kov, Tiflis, Baku, Rostov-on-Don, Tsaritsyn and Perm all grew in population (often by significant amounts) between 1910 and 1920 while other cities shrunk. [Diane Koenker, “Urbanisation and Deurbanisation in the Russian Revolution and Civil War,” pp. 424–450, The Journal of Modern History, vol. 57, no. 3, p. 425] Does that mean

slumped from 21.8 million to 14.9 million tons in those two years.” [V.
R. Berghahn, Modern Germany, p. 47, pp. 47–8, p. 50]

The parallels with pre-revolution Russia are striking and it is hardly surprising that revolution did break out in Germany in November 1918. Workers’ councils sprang up all across the country, inspired in part by the example of the Russian soviets (and what people thought was going on in Russia under the Bolsheviks). A Social-Democratic government was founded, which used the Free Corps (right-wing volunteer troops) to crush the revolution from January 1919 onwards. This meant that Germany in 1919 was marked by extensive civil war and in January 1920 a state of siege was re-introduced across half the country.

This social turmoil was matched by economic turmoil. As in Russia, Germany faced massive economic problems, problems which the revolution inherited. Taking 1928 as the base year, the index of industrial production in Germany was slightly lower in 1913, namely 98 in 1913 to 100 in 1928 and so Germany effectively lost 15 years of economic activity. In 1917, the index was 63 and by 1918 (the year of the revolution), it was 61 (i.e. industrial production had dropped by nearly 40%). In 1919, it fell again to 37, rising to 54 in 1920 and 65 in 1921. Thus, in 1919, the “industrial production reached an all-time low” and it “took until the late 1920s for [food] production to recover its 1912 level ... In 1921 grain production was still ... some 30 per cent below the 1912 figure.” Coal production was 69.1% of its 1913 level in 1920, falling to 32.8% in 1923. Iron production was 33.1% in 1920 and 25.6% in 1923. Steel production likewise fell to 48.5% in 1920 and fell again to 36% in 1923. [V. R. Berghahn, Op. Cit., p. 258, pp. 67–8, p. 71 and p. 259]

Significantly, one of the first acts of the Bolshevik government towards the new German Social-Democratic government was “the offer by the Soviet authorities of two trainloads of grain for the hun-
gry German population. It was a symbolical gesture and, in view of
desperate shortages in Russia itself, a generous one.” The offer, per-
haps unsurprisingly, was rejected in favour of grain from America. [E.H. Carr, *The Bolshevik Revolution*, vol. 3, p. 106]

The similarities between Germany and Russia are clear. As noted above, in Russia, the index for large scale industry fell to 77 in 1917 from 100 in 1913, falling again to 35 in 1918, 26 in 1919 and 18 in 1920. [Tony Cliff, *Lenin*, vol. 3, p. 86] In other words, a fall of 23% between 1913 and 1917, 54.5% between 1917 and 1918, 25.7% in 1918 and 30.8% in 1919. A similar process occurred in Germany, where the fall in production was 37.7% between 1913 and 1917, 8.2% between 1917 and 1918 and 33.9% between 1918 and 1919 (the year of revolution). While production did rise in 1920 by 45.9%, it was still around 45% less than before the war.

Thus, comparing the two countries we discover a similar picture of economic collapse. In the year the revolution started, production had fallen by 23% in Russia (from 1913 to 1917) and by 43% in Germany (from 1913 to 1918). Once revolution had effectively started, production fell even more. In Russia, it fell to 65% of its pre-war level in 1918, in Germany it fell to 62% of its pre-war level in 1919. Of course, in Germany revolution did not go as far as in Russia, and so production did rise somewhat in 1920 and afterwards. What is significant is that in 1923, production fell dramatically by 34% (from around 70% of its pre-war level to around 45% of that level). This economic collapse did not deter the Communists from trying to provoke a revolution in Germany that year, so suggesting that economic disruption played no role in their evaluation of the success of a revolution.

As such, it is not strange that most Leninist accounts of the revolution post-October rarely, if ever, mention what the working class was actually doing. We do get statistics on the drop of the numbers of industrial workers in the cities (usually Petrograd and Moscow), but any discussion on working class protest and strikes is limited at best, usually ignored. Which shows the bankruptcy of what can be called the “statistical tendency” of analysing the Russian working class. While statistics can tell us how many industrial workers remained in Russia in, say, 1921, they do not provide any idea of their combativeness or their ability to take collective decisions and action. If statistics alone indicated that, then the massive labour struggles in 1930s America would not have taken place. Millions had been made redundant: at the Ford Motor Company, for example, 128,000 workers had been employed in the spring of 1929 and only 37,000 were by August of 1931 (only 29% of the 1929 figure) while, by the end of 1930, almost half of the 280,000 textile mill workers in New England were out of work. [Howard Zinn, *A People’s History of the United States*, p. 378] Yet in the face of this
become ‘declassed’ in order to justify a political clamp-down.” [Aves, Op. Cit., p. 37, p. 80 and p. 18]

Other historians also note this context. For example, while the “working class had decreased in size and changed in composition, ... the protest movement from late 1920 made clear that it was not a negligible force and that in an inchoate way it retained a vision of socialism which was not identified entirely with Bolshevik power ... Lenin’s arguments on the declassing of the proletariat was more a way of avoiding this unpleasant truth than a real reflection of what remained, in Moscow at least, a substantial physical and ideological force.” [Richard Sakwa, Soviet Communists in Power, p. 261] In the words of Diane Koenker, “[i]f Lenin’s perceptions of the situation were at all representative, it appears that the Bolshevik party made deurbanisation and declassing the scapegoat for its political difficulties, when the party’s own policies and its unwillingness to accept changing proletarian attitudes were also to blame.” Ironically, this was not the first time that the Bolsheviks had blamed its problems on the lack of a “true” proletariat and its replacement by “petty-bourgeois” elements: “This was the same argument used to explain the Bolshevik’s lack of success in the early months of 1917 — that the cadres of conscious proletarians were diluted by non-proletarian elements.” [“Urbanisation and Deurbanisation in the Russian Revolution and Civil War,” pp. 424–450, The Journal of Modern History, vol. 57, no. 3, p. 449 and p. 428]

It should be noted that the “declassing” argument does have a superficial validity if you accept the logic of vanguardism. After all, if you accept the premise that the party alone represents socialist consciousness and that the working class, by its own efforts, can only reach a reformist level of political conscious (at best), then any deviation in working class support for the party obviously represents a drop in class consciousness or a “declassing” of the proletariat (see section H.5.1). Thus working class protest against the party can be dismissed as evidence of “declassing” which has to be suppressed rather than what it really is, namely evidence of work-

This means, given that the economic collapse in both 1918/19 and 1923 was as bad as that facing Russia in 1918 and that the Bolsheviks had started to undermine soviet and military democracy along with workers’ control by spring and summer of that year (see section 3), to blame Bolshevik actions on economic collapse would mean that any German revolution would have been subject to the same authoritarianism if the roots of Bolshevik authoritarianism were forced by economic events rather than a product of applying a specific political ideology via state power. Few Leninists draw this obvious conclusion from their own arguments although there is no reason for them not to.

So the German Revolution was facing the same problems the Russian one was. This means that when John Rees argues that giving machinery or goods to the peasants in return for grain instead of simply seizing it required “revolution in Germany, or at least the revival of industry” in Russia, he completely fails to indicate the troubles facing the German revolution (and the role Bolshevik policies and prejudices played in the collapse of industry, as noted in section H.6.2). “Without a successful German revolution,” he writes, “the Bolsheviks were thrown back into a bloody civil war with only limited resources. The revolution was under siege.” [John Rees, “In Defence of October,” pp. 3–82, International Socialism, no. 52, p. 40 and p. 29] Yet given the state of the German economy at the time, it is hard to see how much aid a successful German revolution could have given and so his belief that a successful German Revolution would have mitigated Bolshevik authoritarianism seems exactly that, a belief without any real evidence to support it. As Lenin argued against the Russian left-communists in early 1918:

“Yes, we shall see the world revolution, but for the time being it is a very good fairy-tale ... But I ask, is it proper for a serious revolutionary to believe in fairy-tales? ... [If you tell the people that civil war will break out in Germany and also guarantee that instead of a class with
imperialism we shall have a field revolution on a worldwide scale, the people will say you are deceiving them. In doing this you will be overcoming the difficulties with which history has confronted us only in your minds, by your wishes ... You are staking everything on this card! If the revolution breaks out, everything is saved ... But if it does not turn out as we desire, if it does not achieve victory tomorrow — what then? Then the masses will say to you, you acted like gamblers — you staked everything on a fortunate turn of events that did not take place ...”

[Collected Works, vol. 27, p. 102]

It seems ironic that modern-day Leninists subscribe to such “fairy-tales” in their attempts to excuse Lenin’s regime.

The same can be said of other revolutions as well. The Paris Commune, for example, was born after a four-month-long siege “had left the capital in a state of economic collapse. The winter had been the severest in living memory. Food and fuel had been the main problems .. . Unemployment was widespread. Thousands of demobilised soldiers wandered loose in Paris and joined in the general hunt for food, shelter and warmth. For most working men the only source of income was the 1.50 francs daily pay of the National Guard, which in effect had become a form of unemployment pay.” The city was “near starving” and by March it was “in a state of economic and political crisis.” [Stewart Edwards, “Introduction,” The Communards of Paris, 1871, p. 23] Yet this economic collapse and isolation did not stop the commune from introducing and maintaining democratic forms of decision making, both political and economic. A similar process occurred during the French Revolution, where mass participation via the “sections” was not hindered by economic collapse. It was finally stopped by state action organised by the Jacobins to destroy popular participation and initiative (see Kropotkin’s The Great French Revolution for details).

Lenin’s pessimistic analysis of 1921 is in sharp contrast to the optimistic mood of early 1920 in Bolshevik ranks produced by the defeat of the White armies. For example, writing in May 1920, Trotsky seemed oblivious to the atomisation of the Russian working class so much bemoaned later, arguing that “in spite of political tortures, physical sufferings and horrors, the labouring masses are infinitely distinct from political decomposition, from moral collapse, or from apathy ... Today, in all branches of industry, there is going on an energetic struggle for the establishment of strict labour discipline, and for the increase of the productivity of labour. The party organisations, the trade unions, the factory and workshop administrative committees, rival each one another in this respect, with the undivided support of the working class as a whole.” Indeed, they “concentrate their attention and will on collective problems” (“Thanks to a regime which, though it had inflicted great hardship upon them, has given their life a purpose and a high goal!”). Needless to say, the party had “the undivided support of the public opinion of the working class as a whole.” [Terrorism and Communism, p. 6]

The turn around in perspective after this period did not happen by accident, independently of the working class resistance to Bolshevik rule. After all, the defeat of the Whites in early of 1920 saw the Bolsheviks take “victory as a sign of the correctness of its ideological approach and set about the task of reconstruction on the basis of an intensification of War Communism policies with redoubled determination.” This led to “an increase in industrial unrest in 1920,” including “serious strikes.” The resistance was “becoming increasingly politicised.” Thus, the stage was set for Lenin’s turn around and his talk of “declassing.” In early 1921 “Lenin argued that workers, who were no more demoralised than they were in early 1920, had...
Soviet authorities had to protect the country against their kind.” [Living My Life, vol. 2, pp. 872–3]

This still seems to be the position in pro-Bolshevik accounts of the Revolution and its degeneration. After the Bolshevik seizure of power, the working class as an active agent almost immediately disappears from their accounts and any mention of strikes and protests is short and fleeting, if it exists at all. This is unsurprising, as it does not bode well for maintaining the Bolshevik Myth to admit that workers were resisting the so-called “proletarian dictatorship” from the start. The notion that the working class had “disappeared” fits into this selective blindness well: why discuss the actions of a class which did not exist? Thus we have a logical circle from which reality can be excluded: the working class is “atomised” and so cannot take industrial action, evidence of industrial action need not be looked for nor mentioned because the class is “atomised.”

As discussed in section H.6.3, the Russian working class did take extensive collective action throughout this period (from the Bolshevik seizure of power to well after the end of the civil war) and faced substantial State repression as a result. Here we provide more evidence of the existence of working class collective struggle throughout the period 1918 to 1923 but before doing so, it is necessary to place Lenin’s comments on the “declassing” of the working class in context: rather than being the result of a lack of collective industrial direct action and solidarity, Lenin’s arguments were the product of its opposite — the rise in collective struggle by the Russian working class. As one historian notes, “as discontent amongst workers became more and more difficult to ignore, Lenin ... began to argue that the consciousness of the working class had deteriorated ... workers had become ‘declassed.’” “Lenin’s analysis,” he continues, “had a superficial logic but it was based on a false conception of working-class consciousness. There is little evidence to suggest that the demands that workers made at the end of 1920 ... represented

During the Spanish Revolution, “overall Catalan production fell in the first year of war by 30 per cent, and in the cotton-working sector of the textile industry by twice as much. Overall unemployment (complete and partial) rose by nearly a quarter in the first year, and this despite the military mobilisation decreed in September 1936. The cost of living quadrupled in just over two years; wages ... only doubled.” [Ronald Fraser, Blood of Spain, p. 234] Markets, both internally and externally, for goods and raw materials were disrupted, not to mention the foreign blockade and the difficulties the war and revolution imposed in trying to buy products from other countries. This came on top of problems caused by the great depression of the 1930s which affected Spain along with most other countries. Yet, libertarian socialist norms of economic and social decision making continued in spite of economic disruption. Ironically, given the subject of this discussion, it was only once the Stalinist counter-revolution got going were they fatally undermined or destroyed.

Thus economic disruption need not automatically imply authoritarian policies. And just as well, given the fact that revolution and economic disruption seem to go hand in hand.

Looking further afield, even revolutionary situations can be accompanied with economic collapse. For example, the Argentine revolt against neo-liberalism which started in 2001 took place when economy was a mess, with poverty and unemployment at disgusting levels. Four years of recession saw the poverty rate balloon from 31 to 53 percent of the population of 37 million, while unemployment climbed from 14 to 21.4 percent, according to official figures. Yet in the face of such economic problems, working class people acted collectively, forming popular assemblies and taking over workplaces (see Horizontalism: Voices of Popular Power in Argentina, edited by Marina Sitrin).

The Great Depression of the 1930s in America saw a much deeper economic contradiction. Indeed, it was as bad as that associated with revolutionary Germany and Russia after the first world war. According to Howard Zinn, after the stock market
crash in 1929 “the economy was stunned, barely moving. Over five thousand banks closed and huge numbers of businesses, unable to get money, closed too. Those that continued laid off employees and cut the wages of those who remained, again and again. Industrial production fell by 50 percent, and by 1933 perhaps 15 million (no one knew exactly) — one-fourth or one-third of the labour force — were out of work.” [A People’s History of the United States, p. 378]

Specific industries were badly affected. For example, total GNP fell to 53.6% in 1933 compared to its 1929 value. The production of basic goods fell by much more. Iron and Steel saw a 59.3% decline, machinery a 61.6% decline and non-ferrous metals and products, a 55.9% decline. Transport was also affected, with transportation equipment declining by 64.2% rail car production dropping by 73.6% and locomotion production declining by 86.4%. Furniture production saw a decline of 57.9%. The workforce was equally affected, with unemployment reaching 25% in 1933. In Chicago 40% of the workforce was unemployed. Union membership, which had fallen from 5 million in 1920 to 3.4 million in 1929 fell to less than 3 million by 1933. [Lester V. Chandler, America’s Greatest Depression, 1929–1941, p. 20, p. 23, p. 34, p. 45 and p. 228]

Yet in the face of this economic collapse, no Leninist proclaimed the impossibility socialism. In fact, the reverse was the case. Similar arguments could apply to, say, post-world war two Europe, when economic collapse and war damage did not stop Trotskyists looking forward to, and seeking, revolutions there. Nor did the massive economic collapse that occurred after the fall of Stalinism in Russia in the early 1990s deter Leninist calls for revolution. Indeed, you can rest assured that any drop in economic activity, no matter how large or small, will be accompanied by Leninist articles arguing for the immediate introduction of socialism.

And this was the case in 1917 as well, when economic crisis had been a fact of Russian life throughout the year. Lenin, for example, argued at the end of September that “an inevitable catastrophe is threatening Russia ... The danger of a great catastrophe and of famine

Second, the fact is the Russian working class was far from “atomised.” Rather than being incapable of collective action, as Leninists assert, Russia’s workers were more than capable of taking collective action throughout the civil war period. The problem for Leninists is, of course, that any such collective action was directed against the Bolshevik regime. This caused the party no end of problems for if the working class was the ruling class under the Bolsheviks, then who was it striking and protesting against? Emma Goldman explains the issue well:

“In my early period the question of strikes had puzzled me a great deal. People had told me that the least attempt of that kind was crushed and the participants sent to prison. I had not believed it, and, as in all similar things, I turned to Zorin [a Bolshevik] for information. ‘Strikes under the dictatorship of the proletariat!’ he had proclaimed; ‘there’s no such thing.’ He had even upbraided me for crediting such wild and impossible tales. Against whom, indeed, should the workers strike in Soviet Russia, he argued. Against themselves? They were the masters of the country, politically as well as industrially. To be sure, there were some among the toilers who were not yet fully class-conscious and aware of their own true interests. These were sometimes disgruntled, but they were elements incited by ... self-seekers and enemies of the Revolution ... no better than out and out counter-revolutionists, and of course the
It is these objective factors which explain why the Bolshevik party substituted itself for the Russian working class. “Under such conditions,” argues Tony Cliff, “the class base of the Bolshevik Party disintegrated — not because of some mistakes in the policies of Bolshevism, not because of one or another conception of Bolshevism regarding the role of the party and its relation to the class — but because of mightier historical factors. The working class had become declassed … Bolshevik ‘substitutionism’ … did not jump out of Lenin’s head as Minerva out of Zeus’s, but was born of the objective conditions of civil war in a peasant country, where a small working class, reduced in weight, became fragmented and dissolved into the peasant masses.”

[Trotsky on Substitutionism, pp. 62–3] In other words, because the working class was so decimated the replacement of class power by party power and then by that of the bureaucracy (Stalinism) was inevitable.

Before discussing it, we should point out that this argument dates back to Lenin. For example, he argued in 1921 that the proletariat, “owing to the war and to the desperate poverty and ruin, has become declassed, i.e. dislodged from its class groove, and had ceased to exist as a proletariat … the proletariat has disappeared.”

[Collected Works, vol. 33, p. 65] However, unlike his later-day followers, Lenin was sure that while it “would be absurd and ridiculous to deny that the fact that the proletariat is declassed is a handicap” it could still “fulfil its task of wining and holding state power.”

Anarchists do not find these arguments particularly convincing. This is for two reasons.

First, it seems incredulous to blame the civil war for the “substitution” of Bolshevik power for working class power as party power had been Lenin’s stated aim in 1917 (and long before) and October saw the seizure of power by the Bolsheviks, not the soviets (see
ble. It means that revolutionaries need to be aware of these predictable — and predicted, at least by anarchists! — developments and be aware of the solutions can only be found in decentralisation, federalism and self-management. As Kropotkin put it:

“The first months of emancipation will inevitably increase consumption of goods and production will diminish. And, furthermore, any country achieving social revolution will be surrounded by a ring of neighbours either unfriendly or actually enemies ... The demands upon products will increase while production decreases, and finally famine will come. There is only one way of avoiding it. We should understand that as soon as a revolutionary movement begins in any country the only possible way out will consist in the workingmen [and women] and peasants from the beginning taking the whole national economy into their hands and organising it themselves ... But they will not be convinced of this necessity except when all responsibility for national economy, today in the hands of a multitude of ministers and committees, is presented in a simple form to each village and city, in every factory and shop, as their own affair, and when they understand that they must direct it themselves.” [Kropotkin, Anarchism, pp. 77–8]

Anarchists have always recognised that a revolution would face problems and difficult “objective factors” and has developed our ideas accordingly. We argue that to blame “objective factors” for the failure of the Russian Revolution simply shows that believing in fairy-tales is sadly far too common on the “serious” Leninist “revolutionary” left. As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, Marxist ideas were important and decisive in developments. In other words, economic disruption need not undermine a revolution if libertarian principles are applied. In Russia, this inevitable economic disruption was made worse by Bolshevik ideology due to the policies it inspired and the centralised structures it created.

5 Was the Russian working class atomised or “declassed”?

A standard Leninist explanation for the dictatorship of the Bolshevik party (and subsequent rise of Stalinism) is based on the “atomisation” or “declassing” of the proletariat. Neo-Trotskyist John Rees summarises this argument as follows:

“The civil war had reduced industry to rubble. The working class base of the workers’ state, mobilised time and again to defeat the Whites, the rock on which Bolshevik power stood, had disintegrated. The Bolsheviks survived three years of civil war and wars in intervention, but only at the cost of reducing the working class to an atomised, individualised mass, a fraction of its former size, and no longer able to exercise the collective power that it had done in 1917 ... The bureaucracy of the workers’ state was left suspended in mid-air, its class base eroded and demoralised. Such conditions could not help but have an effect on the machinery of the state and organisation of the Bolshevik Party ... The vice-like pressure of the civil war had transformed the state in other ways. The weight of the bureaucracy, of the army, of the Cheka, had grown enormously during the civil war. Without these institutions the October regime would have been swept away in a bloody, reactionary counter-revolution. With them the October revolution had become sclerotic and authoritarian ... The power of the bureaucracy, and within the bureaucracy the power of its top layers, grew.” [“In De-
“It is not true that the Russian people are on strike. On the contrary, the truth of the matter is that the Russian people have been locked out and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviks this tyranny is masked by a world-stirring slogan: thus they have succeeded in blinding the masses. Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party.” [My Disillusionment in Russia, p. xlix]

All of which, incidentally, answers Leninist Brian Bambery’s rhetorical question: “why would the most militant working class in the world, within which there was a powerful cocktail of revolutionary ideas, and which had already made two revolutions (in 1905 and in February 1917), allow a handful of people to seize power behind its back in October 1917?” [“Leninism in the 21st Century”, Socialist Review, no. 248, January 2001] Once the Russian workers realised that a handful of people had seized power they did protest the usurpation of their power and rights by the Bolsheviks. The Bolsheviks repressed them.

Yes, as Lenin argued, “it is clear that there is no freedom and no democracy where there is suppression and where there is violence.” In 1917 he was talking of the “freedom of the oppressors, the exploiters, the capitalists” but it equally applies to the working class — if the so-called “dictatorship of the proletariat, i.e., the organisation of the vanguard of the oppressed as the ruling class” is suppressing the working class itself then there can be “no freedom and no democracy” for the working class and so it cannot be the ruling class. Rather, it is the self-proclaimed “vanguard” party which is in fact the ruling class and just like “under capitalism we have the state in the proper sense of the word, that is, a special machine for the suppression of one class by another, and, what is more, of the majority by the minority.” Thus the so-called “workers state” became, as anarchists
had long predicted, like any other State, “a power which arose from society but places itself above it and alienates itself more and more from it” and “consists of special bodies of armed men having prisons, etc., at their command” (“The State and Revolution,” *The Lenin Anthology*, p. 373, p. 374, p. 316) As can be seen, the Bolshevik regime was most definitely a State... in the normal sense of the term. That it prefixed the word “Red” onto these instruments of minority rule matters little, as can be seen from the repression of labour protest under Lenin from early 1918 onwards.

All in all, these strikes and subsequent repression confirms Bakunin’s prescient critique of Marxism (see section H.1.1). Based on the anarchist analysis of the State as “minority government, from the top downward, of a vast quantity of men,” he correctly predicted that even the so-called workers’ State “cannot be sure of its own self-preservation without an armed force to defend it against its own internal enemies, against the discontent of its people.” [Michael Bakunin: Selected Writings, p. 265] Yes, of course, workers viewed the Bolshevik regime more favourably than the possibility of a White victory — but that is a very low bar indeed: socialism, surely, should aspire to be somewhat more appealing than the restoration of Tsarism!

Little wonder, then, that the role of the masses in the Russian Revolution after October 1917 is rarely discussed by pro-Bolshevik writers. Indeed, the conclusion to be reached is simply that for the Bolsheviks the role of workers is to support the party, get it into power and then do what it tells them. Unfortunately for the Bolsheviks, the Russian working class refused this position, the same position it held under Tsarism and capitalism. Instead they practiced collective struggle in defence of their economic and political interests, a struggle which inevitably brought them into conflict both with the “workers’ state” and their role in Bolshevik ideology. Faced with this collective action, the Bolshevik leaders (beginning with Lenin) started to talk about the “declassing” of the proletariat to justify their repression of (and power over) the working class.

Forgetting that he had argued against “primitive democracy” in What is to Be Done?, Lenin had lambasted the opportunists and “present Kautskyists” for “repeal[ing] the vulgar bourgeois jeers at ‘primitive’ democracy.” Now, in 1917, it was a case that “the transition from capitalism to socialism is impossible without some ‘reversion’ to ‘primitive’ democracy (how else can the majority, even the whole population, proceed to discharge state functions?)” ([Op. Cit., p. 302] Very true. As Leninism in power showed, the conscious elimination of “primitive democracy” in the army and workplace ensured that socialism was “impossible.” And this elimination was not justified in terms of “difficult” circumstances but rather in terms of principle and the inability of working people to manage their own affairs directly.

Particularly ironic, given Trotsky’s trade union committee analogy was Lenin’s comment that “Bernstein [the arch revisionist and reformist] combats ‘primitive democracy’ ... To prove that ‘primitive democracy’ is worthless, Bernstein refers to the experience of the British trade unions, as interpreted by the Webbs. Seventy years of development ... convinced the trade unions that primitive democracy was useless, and they substituted ordinary democracy, i.e. parliamentarism, combined with bureaucracy, for it.” Lenin replied that because the trade unions operated “in absolute capitalist slavery” a “number of concessions to the prevailing evil, violence, falsehood, exclusion of the poor from the affairs of the ‘higher’ administration ‘cannot be avoided.’ Under socialism much of the ‘primitive’ democracy will inevitably be revived, since, for the first time in history of civilised society, the mass of the population will rise to independent participation, not only in voting and elections, but also in the everyday administration of affairs” ([Op. Cit., p. 361] Obviously things looked a bit different once he and his fellow Bolshevik leaders were in power. Then the exclusion of the poor from the affairs of the “higher” administration was seen as normal practice, as proven by the practice of the trade unions! And as we note in section H.3.8,
with the factory committees and soldiers committees. In place of workers’ and soldiers’ direct democracy and self-management, the Bolsheviks appointed managers and officers and justified because a workers’ party was in power. After all, had not the masses elected the Bolsheviks into power? This became the means by which real democracy was eliminated in area after area of Russian working class life. Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic in any meaningful sense for long. At best, it will be like a bourgeois republic with purely elections where people elect a party to misrepresent them every four or so years while real economic, political and social power rests in the hands of a few. At worst, it would be a dictatorship with “elections” whose results are known before hand.

The Leninist vision of “democracy” is seen purely as a means of placing the party into power. Thus power in society shifts to the top, to the leaders of the centralised party in charge of the centralised state. The workers’ become mere electors rather than actual controllers of the revolution and are expected to carry out the orders of the party without comment. In other words, a decidedly bourgeois vision of “democracy.” Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace and community assemblies and their councils and conferences.

This vision was not a new development. Far from it. While, ironically enough, Lenin’s and Trotsky’s support for the appointment of officers/managers can be refuted by looking at Lenin’s State and Revolution, the fact is that the undemocratic perspectives they are based on can be found in Lenin’s What is to be Done?. This suggests that his 1917 arguments were the aberration and against the true essence of Leninism, not his and Trotsky’s policies once they were in power (as Leninists like to argue).

Ironically, it was the aim of Bolshevik repression to “atomise” the working class as, fundamentally, their rule depended on it. While Bolshevik repression did, in the end, succeed it cannot be said that the working class in Russia did not resist this usurpation of power by the Bolshevik party. As such, rather than “atomisation” or “de-classing” being the cause for Bolshevik power and repression, it was, in fact, one of results of them — and helped ensure the rise of Stalin.

6 Did the Bolsheviks blame “objective factors” for their actions?

In a word, no. At the time of the revolution and for some period afterwards, the idea that “objective factors” were responsible for their policies was one which few, if any, Bolshevik leaders expressed. As we discussed in section 2, leading Bolsheviks like Lenin, Trotsky and Bukharin argued that any revolution would face civil war and economic crisis. Lenin did talk about the “de-classing” of the proletariat from 1920 onwards, but that did not seem to affect the proletarian and socialist character of his regime (indeed, Lenin’s argument was developed in the context of increasing working class collective action, not its absence).

This is not to say that the Bolshevik leaders were completely happy with the state of their revolution after the final victory over the White counter-revolution. Lenin, for example, expressed deep concern about the rising bureaucratic deformations he saw in the soviet state (particularly after the end of the civil war). Yet, while concerned about the bureaucracy, he was not concerned about the Party’s monopoly of power in spite of the obvious relation between the two (how could a party dictatorship function without a bureaucracy?). Similarly, he tried to combat the bureaucracy by increasing the very structural forms which created it in the first place, namely by increasing centralisation, which in turn increased the bureaucracy and its power. In short, he fought the bureaucracy by “top-
down” and, ironically, bureaucratic methods, the only ones left to him. A similar position was held by Trotsky, who was quite explicit in supporting the party dictatorship throughout the 1920s (and, indeed, the 1930s — as discussed in the appendix “Reply to errors and distortions in David McNally’s pamphlet ‘Socialism from Below’”). Needless to say, due to the limitations of the ideology, both failed to understand how bureaucracy arises and how it could be effectively fought.

This position started to change, however, as the 1920s drew on and Trotsky was increasingly sidelined from power. Then, faced with the rise of Stalinism, Trotsky had to find a theory which allowed him to explain the degeneration of the revolution and, at the same time, absolve Bolshevik ideology (and his own actions!) from all responsibility for it. He did so by invoking the objective factors facing the revolution. Since then, his various followers have utilised this argument, with various changes in emphasis, to attack Stalinism while defending Bolshevism.

The problem with this type of argument is that all the major evils usually associated with Stalinism already existed under Lenin and Trotsky. Party dictatorship, one-man management, repression of opposition groups and working class protest, state bureaucracy and so on all existed before Stalin manoeuvred himself into absolute power. Thus, for example, we find Peter Binns of the British SWP lament in 1987 that:

“This exploitation and powerlessness of the Russian class [under Mikhail Gorbachev] is nothing new. It came about more than 50 years ago. The final vestiges of workers’ rights disappeared in 1929 when it was decreed that all managers’ orders were now to be ‘unconditionally binding on his subordinate administrative staff and on all workers’. It was at this time that the trade unions ceased to be able to play any function on behalf of workers, in particular over the negotiation of wages.

If only the Tsar had thought of that one! If he had, he would still be in power. And, needless to say, Trotsky did not apply that particular logic to himself. After all, he had no experience of holding governmental office or building an army (or even being in combat). Nor did any of the other Bolshevik leaders. By the logic of his argument, not only should the workers not been allowed to vote for a soviet government, he and his fellow Bolsheviks should not have assumed power in 1917. But, clearly, sauce for the goose is definitely not sauce for the gander.

For all his talk that the masses could replace the Bolsheviks at the All-Russian Congress of Soviets, Trotsky failed to realise that these proposals (and other ones like it) ensured that this was unlikely to happen. Even assuming that the Bolsheviks had not gerrymandered and disbanded soviets, the fact is that the Bolshevik vision of “democracy” effectively hollowed out the grassroots participation required to make democracy at the top anything more than a fig-leaf for party power. He honestly seemed to believe that eliminating mass participation in other areas of society would have no effect on the levels of participation in soviet elections. Would people subjected to one-man management in the workplace and in the army really be truly free and able to vote for parties which had not appointed their bosses? Could workers who were disenchanted economically and socially remain in political power (assuming you equate voting a handful of leaders into power with “political power”)? And does being able to elect a representative every quarter to the All-Russian congress really mean that the working class was really in charge of society? Of course not.

This vision of top-down “democracy” can, of course, be traced back to Marx’s arguments of 1850 and Lenin’s comments that the “organisational principle of revolutionary Social-Democracy” was “to proceed from the top downward.” (see sections H.3.2 and H.3.3). By equating centralised, top-down decision making by an elected government with “democracy,” the Bolsheviks had the ideological justification to eliminate the functional democracy associated
Lenin, Marx) “the suppression of the standing army, and the substitution for it of the armed people.” [quoted by Lenin, Op. Cit., p. 300]

Trotsky continues his argument. The Trade union committee, he asserts, would say “You yourselves have chosen the committee. If you don’t like us, dismiss us, but once you have entrusted us with the direction of the union, then give us the possibility of choosing the clerk or the cashier, since we are better able to judge in the matter than you, and if our way of conducting business is bad, then throw us out and elect another committee.” After this defence of elected dictatorship, he states that the “Soviet government is the same as the committee of a trade union. It is elected by the workers and peasants, and you can at the All-Russian Congress of the Soviets, at any moment you like, dismiss that government and appoint another.” Until that happens, he was happy to urge blind obedience by the sovereign people to their servants: “But once you have appointed it, you must give it the right to choose the technical specialists, the clerks, the secretaries in the broad sense of the word, and in military affairs, in particular.” He tried to calm the nerves of those who could see the obvious problems with this argument by asking whether it was “possible for the Soviet government to appoint military specialists against the interests of the labouring and peasant masses?” [Op. Cit., p. 113]

And the answer to that question is, of course, an emphatic yes. Even looking at his own analogy, namely that of a trade union committee, it is obvious that an elected body can have interests separate from and in opposition to those who elected it. The history of trade unionism is full of examples of committees betraying the membership of the unions. And, of course, the history of the Soviet government under Lenin and Trotsky (never mind Stalin!) shows that just because it was once elected by a majority of the working people does not mean it will act in their best interests.

Trotsky even went one better. “The army is now only in the process of formation,” he noted. “How could the soldiers who have just entered the army choose the chiefs! Have they any vote to go by? They have none. And therefore elections are impossible.” [Op. Cit., p.

An internal passport system was introduced, and in 1930 all industrial enterprises were forbidden to employ workers who left their former jobs without permission ... As the Russian authorities themselves cynically put it: “With the entry of the USSR into the period of socialism, the possibility of using coercive measures by corrective labour have immeasurably increased.” ... In fact all efforts to start any independent workers’ initiatives, let alone workers’ councils, are now suppressed and are standardly rewarded with extreme forms of repression.” [“The Theory of State Capitalism”, pp. 73–98, Russia: From Workers’ State to State Capitalism, p. 75]

Yet this describes the regime under Lenin and Trotsky! As noted in section H.3.14, in early 1918 Lenin advocated “dictatorial” one-man management and started to impose it, so ending the experiments in workers’ control which had previously flourished since mid-1917. This was followed a few years later by the “militarisation of labour”, likewise championed by Lenin and Trotsky:

“The militarisation of labour, rushed through the ninth Party Congress with typical Tammany Hall steam-roller methods, definitely turned every worker into a galley-slave. The substitution of one-man power in the shops and mills in place of co-operative management placed the masses again under the thumb of the very elements they had for three years been taught to hate as the worst menace ... Insult was added to injury by the introduction of the labour book, which virtually stamped everyone a felon, robbed him of the last vestiges of freedom, deprived him of the choice of place and occupation, and fastened him to a given district without the right of straying too far, on pain of severest penalties.” [Emma Goldman, Living My Life, vol. 2, p. 780]
As noted in the last section, workers who protested against the imposition of these policies and class relations were likewise rewarded with repression. Indeed, Trotsky wrote a book defending this regime against criticism by leading Marxist Karl Kautsky which included the comment that "[i]n point of fact, under Socialism there will not exist the apparatus of compulsion itself, namely, the State: for it will have melted away entirely into a producing and consuming commune. None the less, the road to Socialism lies through a period of the highest possible intensification of the principle of the State. And you and I are just passing through that period. Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction." [Terrorism and Communism, pp. 169–70] As Stalin put in 1930 (apparently, according to Binns, when a new class system had now developed):

“We are in favour of the withering away of the state, and at the same time we stand for the strengthening of the dictatorship of the proletariat, which represents the most powerful and mighty of all forms of the state which have existed up to the present day. The highest development of the power of the state, with the object of preparing the conditions of the withering away of the state: that is the Marxist formula. Is it ‘contradictory’? Yes, it is ‘contradictory.’ But this contradiction is a living thing and wholly reflects the Marxist dialectic.” [quoted by Alfred B. Evans Jr., Soviet Marxism-Leninism: The Decline of an Ideology, p. 39]

Thus Stalinism and Bolshevism was based on the same social-relations — and a social system is not defined by the individuals in charge and their intentions but rather the relations within its social structures and the power-relations these generate. While it can be the factories to the state bureaucracy. Lenin argued for and implemented one-man management, piecework, Taylorism and other things Stalinism is condemned for (see section 3, for example). In the army, Trotsky disbanded the soldier committees and elected officers by decree.

How Trotsky defended this policy of appointing officers is significant. It mirrors Lenin’s argument in favour of appointed one-man management and, as such, reflects the basic Bolshevik vision of democracy. By looking at his argument we can see how the Bolshevik vision of democracy fatality undermined the Russian Revolution and its socialist content. The problems of the civil war simply deepened the abscess in democracy created by Lenin and Trotsky in the spring of 1918.

Trotsky acknowledged that that “the soldier-workers and soldier-peasants” needed “to elect commanders for themselves” in the Tzarist army “not as military chiefs, but simply as representatives who could guard them against attacks of counter-revolutionary classes.” However, in the new Red Army this was not needed as it was the “workers’ and peasants’ Soviets, i.e. the same classes which compose the army” which is building it. He blandly asserted that "[h]ere no internal struggle is possible." To illustrate his point he pointed to the trade unions. “The metal workers,” he noted, “elect their committee, and the committee finds a secretary, a clerk, and a number of other persons who are necessary. Does it ever happen that the workers should say: ‘Why are our clerks and treasurers appointed, and not elected?’ No, no intelligent workers will say so.” [Leon Trotsky Speaks, p. 112–3]

Thus in less than six months, Lenin’s call in “State and Revolution” that “[a]ll officials, without exception, [would be] elected and subject to recall at any time” was dismissed as the demand that “no intelligent workers” would raise! [Essential Works of Lenin, p. 302] But, then again, Trotsky was in the process of destroying another apparent “principle” of Leninism, namely (to quote, like
validity of that vision or the strength of commitment its supporters hold it.

Given this, the question becomes which of these two aspects of Marxism was considered its “essence” by Lenin and the Bolsheviks. Obviously, it is hard to isolate the real Bolshevik vision of democracy from the influence of “objective factors.” However, we can get a taste by looking at how the Bolsheviks acted and argued during the first six months in power. During this period, the problems facing the revolution were hard but not as bad as those facing it after the Czech revolt at the end of May, 1918. Particularly after March, 1918, the Bolsheviks were in a position to start constructive work as in the middle of that month Lenin claimed that the “Soviet Government has triumphed in the Civil War.” [quoted by Maximoff, The Guillotine at Work, p. 53]

So the question as to whether the Bolsheviks were forced into authoritarian and hierarchical methods by the practical necessities of the civil war or whether all this was inherent in Leninism all along, and the natural product of Leninist ideology, can be answered by looking at the record of the Bolsheviks prior to the civil war. From this we can ascertain the effect of the civil war. And the obvious conclusion is that the record of the initial months of Bolshevik rule point to a less than democratic approach which suggests that authoritarian policies were inherent in Leninism and, as such, pointed the revolution into a path were further authoritarian policies were not only easy to implement, but had to be as alternative options had been eliminated by previous policies. Moreover, Bolshevik ideology itself made such policies easy to accept and to justify.

As discussed in section 6 of the appendix “What happened during the Russian Revolution?”, it was during this period that the Bolsheviks started to gerrymander soviets and disband any they lost elections to. As we indicate in section 9 of the appendix “What happened during the Russian Revolution?”, they undermined the factory committees, stopping them federating and basically handed argued that Stalinism was worse — that repression was more brutal and privileges were more extreme — this does not change the class nature of the regime and the inequalities that these authoritarian social relations created. As Emma Goldman saw at first hand, “better and more plentiful food was served Party members at the Smolny dining-room and many similar injustices and evils”, there was a “special hospital for Communists, with every modern comfort, while other institutions lacked the barest medical and surgical necessities”, “housing arrangements disclosed similar favouritism and injustice” along with general “inefficiency, mismanagement, and bureaucratic corruption”. [Living My Life, vol. 2, p. 732, p. 754 and p. 900] That the bureaucracy under Stalin gained more wealth and exercised greater power over its subjects hardly changes the class nature of the regime. Indeed, the greater abuses of Stalinism had their basis in the social relations created under Lenin and Trotsky (and, of course, Stalin who was — least we forget — an “old Bolshevik” as well, indeed an older one than Trotsky).

Worse for the advocates of this position, with the exception of the state bureaucracy, none of the mainstream Bolshevik leaders found anything to complain about. Whether it is Lenin or Trotsky, the sad fact of the matter is that a party dictatorship presiding over an essentially state capitalism economy was not considered a bad thing. Indeed, the “gains” of October Trotskyists claim that Stalinism destroyed were, in fact, long dead by 1921. Soviet democracy, working class freedom of speech, association and assembly, workers’ self-management in the workplace, trade union freedom, the ability to strike, and a host of other, elementary, working class rights had been eliminated long before the end of the civil war (indeed, often before it started) and “there is no evidence indicating that Lenin or any mainstream Bolshevik leaders lamented the loss of workers’ control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.” [Samuel Farber, Before Stalinism, p. 44]
Which, of course, causes problems for those who seek to distance Lenin and Trotsky from Stalinism and claim that Bolshevism is fundamentally “democratic” in nature. The knots Leninists get into to do this can be ludicrous. A particularly crazy example can be seen from the UK’s Socialist Workers Party. For John Rees, it is a truism that “it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time.” [“In Defence of October,” pp. 3–82, International Socialism, no. 52, p. 70] So we cannot judge the Bolsheviks on what they did nor what they said! This is understandable for, as Rees implicitly admits, the Bolsheviks did not blame “objective circumstances” for their decisions. Rather, they viewed them as ideologically correct responses to difficulties they thought every revolution would face.

So this sort of position has little substance to it. It is both logically and factually flawed. Logically, it simply makes little sense as anything but an attempt to narrow political discussion and whitewash Bolshevik practice and politics. Given that Leninists constantly quote from Lenin’s and Trotsky’s post-1918 works, it seems strange that they try to stop others so doing. Strange, but not surprising, given their task is to perpetuate the Bolshevik Myth. Where that leaves revolutionary politics is left unsaid, but it seems to involve worshipping at the shrine of October and treating as a heretic anyone who dares suggest we analysis it in any depth and perhaps learn lessons from it. As discussed in the next section, there is utility in such spurious arguments.

Of course Rees’ comments are little more than assertions. Given that he dismisses the idea that we can actually take what any Bolshevik says at face value, we are left with little more than a mind reading operation in trying to find out what the likes of Lenin and Trotsky “really” thought. Perhaps the root explanation of Rees’ position is the awkward fact that there are no quotes from any of the leading Bolsheviks which support it? After all, if they were quotes participation, for self-management, became the basis for re-imposing capitalist relations of production in revolutionary Russia.

4 How did the Bolshevik vision of “democracy” affect the revolution?

As discussed in section H.3.2, Marx and Engels had left their followers which a contradictory legacy as regards “socialism from below.” On the one hand, their praise for the Paris Commune and its libertarian ideas pointed to a participatory democracy run from below. On the other, Marx’s comments during the German Revolution in 1850 that the workers must “strive for… the most determined centralisation of power in the hands of the state authority” because “the path of revolutionary activity” can “proceed only from the centre” suggests a top-down approach. He stressed that centralisation of power was essential to overcome local autonomy, which would allow “every village, every town and every province” to put “a new obstacle in the path” the revolution due to “local and provincial obstinacy.” [Marx-Engels Reader, p. 509]

Building upon this contradictory legacy, Lenin unambiguously stressed the “from above” aspect of it (see section H.3.3 for details). The only real exception to this perspective occurred in 1917, when Lenin was trying to win mass support for his party. However, even this support for democracy from below was always tempered by reminding the reader that the Bolsheviks stood for centralisation and strong government once they were in power (see section 7).

Once in power, the promises of 1917 were quickly forgotten. Unsurprisingly, modern day Leninists argue that this was due to the difficult circumstances facing the Bolsheviks at the time. They argue that the words of 1917 represent the true democratic vision of Bolshevism. Anarchists are not impressed. After all, for an idea to be useful it must be practical — even in “exceptional circumstances.” If the Bolshevik vision is not robust enough to handle the problems that have affected every revolution then we have to question the
Obviously if Lenin and Trotsky are the captains of the ship of state, such considerations are less important. When it is Lenin wielding “imperious authority” then workers’ democracy can be forgotten and the regime remain a “workers’ state”!

By ignoring the key issue Bakunin and other anarchists drew attention to by attacking “authority” (and let us not forget that by that they meant hierarchical organisations in which power is concentrated at the top in a few hands — see section H.4), Engels opened up the way of seeing democratic decision as being less than important. This is not to suggest that Engels favoured dictatorship. Rather we are suggesting that by confusing two radically different forms of organisation as self-management and hierarchy he blurred latter Marxists to the importance of participation and collective decision making from below. After all, if all organisation is “authoritarian” then it matters little, in the end, how it is structured. Dictatorship, representative democracy and self-management were all equally “authoritarian” and so the issues raised by anarchism can safely be ignored (namely that electing bosses does not equate to freedom). Thus the Bolshevik willingness to equate their dictatorship with rule by the working class is not such a surprise after all.

To conclude, rather than the anti-authoritarians not knowing “what they are talking about,” “creating nothing but confusion,” “betraying the movement of the proletariat” and “serving the reaction,” it was Engels’ essay that aided the Bolshevik counter-revolution and helped, in its own small way, to lay the foundations for Leninist tyranny and state capitalism. [Engels, Op. Cit., p. 733] Ultimately, Engels “On Authority” helped give Lenin the ideological premises by which to undermine workers’ economic power during the revolution and recreate capitalist social relations and call it “socialism.” His ill thought out diatribe had ramifications even he would never have guessed (but were obvious at the time to libertarians). His use of the modern factory system to argue against the anarchist call for workers’ councils, federalism and workers’ autonomy, for par-

from the hallowed texts expounding the position Rees says the Bolshevik leaders “really” held then he would have provided them. The simple fact is that Lenin and Trotsky, like all the Bolshevik leaders, considered a one-party dictatorship presiding over a state capitalist economy as “socialism” (it also explains Trotsky’s difficulty in understanding the obvious class-nature of Stalinism and his ambiguous position in terms of its “achievements”). Can we really dismiss this simply as “rhetorical justifications” rather than an expression of “their own theory”? Can we really ignore the awkward fact that they never expressed “their own theory” and instead we have to make do with the “rhetorical justifications” Rees is at such pains for us to ignore?

Which shows that a major problem in discussing the failure of the Russian Revolution is the attitude of modern day Leninists. Rees presents us with another example when he asserts that “what is required of historians, particularly Marxists, is to separate phrase from substance.” The Bolsheviks, Rees argues, were “inclined to make a virtue of necessity, to claim that the harsh measures of the civil war were the epitome of socialism.” Indeed, he states that non-Leninists “take Lenin or Trotsky’s shouts of command in the midst of battle and portray them as considered analyses of events.” [Op. Cit., p. 46]

Yet this argument is simply incredulous. After all, neither Lenin nor Trotsky could be said to be anything but political activists who took the time to consider events and analyse them in detail, however wrongly. Moreover, they defended their arguments in terms of Marxism. Would Rees consider Lenin’s State and Revolution as an unimportant work? After all, this was produced in the midst of the events of 1917, in often difficult circumstances (such as when hiding from the police). If so, then why not his other, less appealing, political proclamations (never mind actions)? Moreover, looking at just a few of the works produced in this period it is clear that they are anything but “shouts of command in the midst of battle.” Trotsky’s Terrorism and Communism is a substantial book,
for example. It was not an ad hoc comment made during a conference or “in the midst of battle.” Quite the reverse, it was a detailed, substantial and thought-out reply to criticism by the influential German social democrat Karl Kautsky (and, before Lenin, the most respected Marxist thinker in the world). Indeed, Trotsky explicitly asks the question (“Is there still theoretical necessity to justify revolutionary terrorism?”) and answers yes, his “book must serve the ends of an irreconcilable struggle against the cowardice, half-measures, and hypocrisy of Kautskianism in all countries.” [Terrorism and Communism, p. 9 and p. 10]

This work was circulated at the Second Congress of the Communist International along with Lenin’s ‘Left-wing’ Communism: An Infantile Disorder, a work still recommended by the likes of SWP in spite of its defence of party dictatorship (see section H.3.3) and so in spite of it being, presumably, “shouts of command in the midst of battle” rather than “considered analyses of events”. Significantly, Congress attendee anarchist-turned-Bolshevik Alfred Rosmer later opined that both works had “lost none of their value” and could “still be profitably read today. [Lenin’s Moscow, p. 69]

Therefore, Rees’s comments are hard to take seriously. It is even harder to do so when it becomes clear that Rees does not apply his comments consistently or logically. He does not object to quoting Lenin and Trotsky during this period when they say something he approves of, regardless of how badly it reflects their actions. This is hardly convincing, particularly when their “good” quotes are so at odds with their practice and their “bad” quotes so consistent with them: as Marx argued, we should judge people by what they do, not by what they say. This seems a basic principle of scientific analysis and it is significant, if not surprising, that Leninists like Rees want to reject it.

Worse, as we note in section H.6.2, Bolshevik ideology played its role in the degeneration of the revolution from the start. Many — but not all — the negative developments within the Revolution were actually consistent with the vision of socialism expounded in

stormy sea the level of tolerance is far lower.” [Lenin, vol. 3, p. 179]

Ignoring the obvious points (such as comparing working class freedom and democracy to a game!), we can see shades of Engels in Cliff’s words. Let us not forget that Engels argued that “a ship on the high seas” at a “time of danger” required “the necessity of authority, and of imperious authority at that.” [Op. Cit., p. 732] Here Cliff is placing the party into the Captain’s role and the workers as the crew. The Captain, in Engels argument, exercised “imperious authority.” In Cliff’s, the party decides the freedoms which working class people are allowed to have — and so subjects them to its “imperious authority.”

Little wonder Bolshevism failed. By this simple analogy Cliff shows the authoritarian essence of Bolshevism and who really has “all power” under that system. Like the crew and passengers dominated by the will of the captain, the working class under Leninism will be dominated by the party. It does not bode well that Cliff thinks that democracy can be “feasible” in some circumstances, but not others and it is up to those in power (i.e. the party leaders) to determine when it was. In his rush to justify Bolshevik party dictatorship in terms of “objective conditions” he clearly forgot his earlier comments that the “liberation of the working class can only be achieved through the action of the working class. Hence one can have a revolution with more or less violence, with more or less suppression of civil rights of the bourgeoisie and its hangers-on [a general catch-all category which, if Bolshevik practice is anything to go by, can include rebel workers, indeed the whole working class!], with more or less political freedom, but one cannot gave a revolution, as the history of Russia conclusively demonstrates, without workers’ democracy — even if restricted and distorted. Socialist advance must be gauged by workers’ freedom, by their power to shape their own destiny ... Without workers’ democracy the immediate means leads to a very different end, to an end that is prefigured in these same means.”
social relationships would have been dominant within “socialist” Russia — with the only difference being that rather than private capitalism it would have been state capitalism. As Lenin admitted, incidentally. It is doubtful that this state capitalism would have been made to serve “the whole people” as Lenin naively believed.

In another way Engels identification of organisation with authority affected the outcome of the revolution. As any form of organisation involved, for Engels, the domination of individuals and, as such, “authoritarian” then the nature of the socialist state was as irrelevant as the way workplaces were run. As both party dictatorship and soviet democracy meant that the individual was “dominated” by collective decisions, so both were “authoritarian.” As such, the transformation of the soviet state into a party dictatorship did not fundamentally mean a change for the individuals subject to it. Little wonder that no leading Bolshevik called the end of soviet democracy and its replacement by party dictatorship as a “retreat” or even as something to be worried about (indeed, they all argued the opposite, namely that party dictatorship was essential and not an issue to be worried about).

Perhaps this analogy by the SWP’s Tony Cliff of the relationship between the party and the working class provides an insight:

“In essence the dictatorship of the proletariat does not represent a combination of abstract, immutable elements like democracy and centralism, independent of time and space. The actual level of democracy, as well as centralism, depends on three basic factors: 1. the strength of the proletariat; 2. the material and cultural legacy left to it by the old regime; and 3. the strength of capitalist resistance. The level of democracy feasible must be indirect proportion to the first two factors, and in inverse proportion to the third. The captain of an ocean liner can allow football to be played on his vessel; on a tiny raft in a

1917. Others were, of course, opposed to the claims made before the seizure of power but were inevitable given these very claims — not least the swift rise of a new bureaucracy (as anarchists had warned about long before October) given Marxist prejudices in favour of centralism and nationalisation. Focusing on “objective circumstances” draws attention away from this negative impact of both the Bolshevik vision of socialism which guided the policies being implemented and the policies being imposed. The assumption that these policies were not only driven by necessity but also successfully countered this necessity cannot be maintained for the policies imposed not only reflected many of the pre-1918 positions of orthodox Marxism, they had a negative impact in-so-far as they made a bad economic situation worse as well as expanding and empowering an officioldom which soon enough became a new ruling class (for further discussion see the appendix “How did Bolshevik ideology contribute to the failure of the Revolution?”)

Ultimately, the theoretical problem with this position is that it denies the importance of ideas. After all, even if it were true that the theory of Bolshevism was different to its practice and the justifications for that practice, it would leave us with the conclusion that this theory was not sufficient when faced with the rigours of reality. In other words, that it is impractical — a conclusion that Leninists do not want to draw, hence the stress on “objective factors” to explain its failure.

Similarly, there seems to be an idealist tint to Leninist accounts of the Russian Revolution. They seem to portray the Lenin of 1921 as, essentially, the same person as the Lenin of 1917. That seems to violate the basic ideas of materialism. As Herbert Read points out, “the phrase ‘the dictatorship of the proletariat’ ... became fatal through the interventions of two political expedients — the identification of the proletariat with the Bolshevik Party, and the use of the State as an instrument of revolution. Expedients and compromises may have been necessary for the defeat of the reactionary forces; but there is no doubt whatsoever that what took place was a progres-
sive brutalisation of Lenin’s own mind under the corrupting influence of the exercise of power.” [A One-Man Manifesto, p. 51] It seems common sense that if a political strategy exposes its followers to the corrupting effects of power we should factor this into any evaluation of it. Sadly, Leninists fail to do this— even worse, they attempt to whitewash the post-October Lenin (and Trotsky) by excluding the “bad” quotes which reflect their practice, a practice which they are at pains to downplay (or ignore)!

As libertarian socialist Cornelius Castoriadis noted, this Bolshevik response “teaches us nothing we could extend beyond the confines of the Russian situation in 1920. The sole conclusion to be drawn from this kind of ‘analysis’ is that revolutionaries should ardently hope that future revolutions break out in more advanced countries, that they should not remain isolated, and that civil wars should not in the least be devastating.” It does not explain “why it ‘degenerated’ precisely in such a way that it led to the power of the bureaucracy”, which is perhaps unsurprising for “[i]nsofar as ideas play a role in the development of history— and, in the final analysis, they play an enormous role— the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy.” [The Role of Bolshevik Ideology in the Birth of the Bureaucracy, p. 92 and p. 104]

Then, of course, there is the attitude of the Bolshevik leaders themselves to these so-called “shouts of command in the midst of battle.” Rather than dismiss them as irrelevant, they continued to subscribe to them years later. For example, Trotsky was still in favour of party dictatorship in the late 1930s (see section H.1.2). Looking at his justly infamous Terrorism and Communism, we discover him in the 1930s reiterating his support for his arguments of 1920. His preface to the 1936 French edition sees him state that the book was “devoted to a clarification of the methods of the proletariat’s revolutionary policy in our epoch.” He concluded as follows: “Victory is conceivable only on the basis of Bolshevik methods, to the defence of which the present work is devoted.” The previous year, in
it in society as a whole. Which, of course, they soon did in Bolshevik Russia, even in the limited form of electing a “revolutionary” government.

So while the causes of the failure of the Russian Revolution were many fold, the obvious influence of Engels’ “On Authority” on the fate of the workers’ control movement should be noted. After all, Engels’ argument confuses the issues that Bakunin and other anarchists were trying to raise (namely on the nature of the organisations we create and our relationships with others). If, as Engels’ argues, all organisation is “authoritarian,” then does this mean that there no real difference between organisational structures? Is a dictatorship just the same as a self-managed group, as they are both organisations and so both “authoritarian”? If so, surely that means the kinds of organisation we create are irrelevant and what really matters is state ownership? Such logic can only lead to the perspective that working class self-management of production is irrelevant to socialism and, unfortunately, the experience of the Russian Revolution tends to suggest that for mainstream Marxism this is the case. The Bolsheviks imposed distinctly authoritarian social structures while arguing that they were creating socialism.

Like Engels, the Bolsheviks defended the principle of authority. The dictatorship of the Party over the proletariat in the workplace (and, indeed, elsewhere) ultimately found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable, given the current mode of production, they argued. And, as Engels had stressed, no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant for the leading Bolsheviks how a workplace is organised as, no matter what, it would be “authoritarian.” Thus “one-man management” would be, basically, the same as worker’s self-management via an elected factory committee. As Trotsky made clear in 1920, for the Bolsheviks the “dictatorship of the proletariat is expressed in the abolition his introduction to the second English edition, he was equally unrepentant. “The British proletariat,” he argued, “will enter upon a period of political crisis and theoretical criticism ... The teachings of Marx and Lenin for the first time will find the masses as their audience. Such being the case, it may be also that the present book will turn out to be not without its use.” He dismissed the “consoling illusion” that “the arguments of this book [were] true for backward Russia” but “utterly without application to advanced lands.” The “wave of Fascist or militarised police dictatorships” in the 1920s and 1930s was the reason. It seems ironic that Trotsky’s self-proclaimed followers are now repeating the arguments of what he termed “incurable Fabians”, namely that arguments within it were irrelevant and not applicable in circumstances other than those it was written in. [Terrorism and Communism, p. xix, p. xxxv, p. xlvii and p. xxxix]

So rather than distance himself from the authoritarian and state-capitalist policies modern day Leninists claim were thrust upon an unwilling Bolshevik party by “objective factors,” Trotsky defended them. This is unsurprising, given that as we noted above in section 2, Trotsky himself argues in that work that these “objective factors” would be faced in every revolution. As it was, he argues that it was only the “slow development of the revolution in the West” which stopped “a direct passage from military Communism to a Socialistic system of production.” Rather than admit to “illusions” caused by the “iron necessity” of winning the civil war, he talks about “those economic hopes which were bound up with the development of the world revolution.” He even links Bolshevik practice with Stalinism, noting that the “idea of five-year plans was not only formulated in that period [1918–1920], but in some economic departments it was also technically worked out.” Indeed, in 1920 he noted how the policies he was implementing in practice and defending in theory were “correct from the point of view both of principle and of practice”. [Op. Cit., p. xliii and p. 135]
Even his essay outlining what he considers the differences between Stalinism and Bolshevism does not see him fundamentally distancing himself from the positions modern day Leninists like to explain by “objective factors.” He stated that the “Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics.” What did that involve? Immediately before making that claim he argued that the “Bolshevik party has shown the entire world how to carry out armed insurrection and the seizure of power. Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” Thus the “party dictatorship” is seen as being an example of “Marxist politics” being successfully applied and not something to be opposed. Moreover, “the Bolshevik party was able to carry on its magnificent ‘practical’ work only because it illuminated all its steps with theory.” [“Stalinism and Bolshevism,” Writings of Leon Trotsky 1936–37, pp. 430–1]

Clearly, rather than denounce the power of the party as being against Bolshevik theory, as Rees claims, for Trotsky it represented its application. While Trotsky excuses some Bolshevik actions (such as the banning of opposition groups) as a product of “objective factors” (such as the civil war), he clearly sees the degeneration of the revolution coming after the civil war and its “correct combination” of “Marxist politics” and “military art,” which included “party dictatorship” over the soviets.

This lack of distancing is to be expected. After, the idea that “objective factors” caused the degeneration of the Russian Revolution was first developed by Trotsky to explain, after his fall from power, the rise of Stalin. While he was head of the Soviet state no such “objective” factors seemed to be required to “explain” the party dictatorship over the working class. Indeed, quite the reverse as he argued in 1923: “If there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party.” [Leon

The net effect of Lenin’s arguments, as anarchist Peter Arshinov noted a few years later, was that the “fundamental fact” of the Bolshevik revolution was “that the workers and the peasant labourers remained within the earlier situation of ‘working classes’ — producers managed by authority from above.” He stressed that Bolshevik political and economic ideas may have “remov[ed] the workers from the hands of individual capitalists” but they “delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital … Wage labour has remained what it was before, expect that it has taken on the character of an obligation to the State… . It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism.” [The History of the Makhnovist Movement, p. 35 and p. 71] Moreover, Lenin’s position failed to understand that unless workers have power at the point of production, they will soon loose
control the workers. Unsurprisingly, Lenin also urged the introduction of two such techniques, namely “piece-work” and “applying much of what is scientific and progressive in the Taylor system.” [Op. Cit., pp. 23–4] As Trotskyist Tony Cliff reminds us, “the employers have at their disposal a number of effective methods of disrupting the unity [of workers as a class]. Once of the most important of these is the fostering of competition between workers by means of piece-work systems.” He notes that these were used by the Nazis and the Stalinists “for the same purpose.” [State Capitalism in Russia, pp. 18–9] Obviously piece-work is different when Lenin introduces it! Similarly, when Trotsky notes that “[b]lind obedience is not a thing to be proud of in a revolutionary,” it is somewhat different when Lenin calls upon workers to do so (or, for that matter, Trotsky himself when in power — see section 6 for Trotsky’s radically different perspective on blind obedience of the worker to “his” state in 1920!). [Terrorism and Communism, p. xlvii]

The economic dominance of the bourgeoisie ensures the political dispossession of the working class. Why expect the introduction of capitalist social relations in production to have different outcomes just because Lenin was the head of the government? In the words of libertarian socialist Maurice Brinton:

“We hold that the ‘relations of production’ — the relations which individuals or groups enter into with one another in the process of producing wealth — are the essential foundations of any society. A certain pattern of relations of production is the common denominator of all class societies. This pattern is one in which the producer does not dominate the means of production but on the contrary both is ‘separated from them’ and from the products of his own labour. In all class societies the producer is in a position of subordination to those who manage the productive process. Workers’ management of production — implying as it does the total domina-

Trotsky in 1920 (and beyond!) was just stating mainstream Bolshevik ideology, echoing a statement made in March 1923 by the Central Committee (of which he and Lenin were members) to mark the 25th anniversary of the founding of the Communist Party issued long after the need for “shouts of command in the midst of battle”. It sums up the lessons gained from the revolution and states that “the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat.” Vacillations, of course, are expressed by workers’ democracy. Little wonder the statement rejects it: “The dictatorship of the working class finds its expression in the dictatorship of the party.” [“To the Workers of the USSR” in G. Zinoviev, History of the Bolshevik Party, p. 213, p. 214]

So, as with all the leading Bolsheviks, he considered the party dictatorship as an inevitable result of any proletarian revolution.
Moreover, he did not question the social relationships within production either. One-man management held no fears for him and he considered the state-capitalist regime under himself and Lenin “socialist” and defended it as such. He was fully supportive of one-man management, going so far as to suggest in 1920 that “if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.” [Terrorism and Communism, pp. 169–70] Writing in the peace of 1923, he likewise argued that the “system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have authority over the selection of functionaries and their transfer and removal.” These economic organs must “in actual practice have full freedom of selection and appointment.” [quoted by Robert V. Daniels, A Documentary History of Communism, vol. 1, p. 237]

As can be seen, all of these post-civil war opinions fit in well with his civil war opinions on the matter. Now, it seems strange that rather than present what he “really” thought, Trotsky expounded what presumably was the opposite of it. Surely the simplest conclusion to draw is that Trotsky said what he really did think and expressed this in his so-called “shouts of command” made during the civil war? Can all these comments be dismissed as “rhetorical justifications” and not reflective of Trotsky’s real ideas? Ultimately, either you subscribe to the idea that Lenin and Trotsky were able to clearly express their ideas themselves or you subscribe to the notion that they hid their “real” politics and only modern-day Leninists can determine what they, in fact, “really” meant to say and what they “really” stood for. And as for all those “awkward” quotes which express the opposite of the divined true faith, well, they can be ignored.

In general, he stressed, there was “absolutely no contradiction in principle between Soviet (that is, socialist) democracy and the exercise of dictatorial powers by individuals.” [Op. Cit., pp. 32–3 and p. 33] Which is, of course, sophistry as dictatorship by a few people in some aspects of life will erode democracy in others. For example, being subject to the economic power of the capitalist during work harms the individual and reduces their ability to participate in other aspects of social life. Why should being subject to “red” bosses be any different?

In particular, Lenin argued that “individual dictatorial power” was required because “large-scale machine industry” (which is the “foundation of socialism”) calls for “absolute and strict unity of will, which directs the joint labours of hundreds, thousands and tens of thousands of people... But how can strict unity of will be ensured? By thousands subordinating their will to the will of one.” He reiterated that the “unquestioning subordination to a single will is absolutely necessary for the success of processes organised on the pattern of large-scale machine industry.” The people must “unquestioningly obey the single will of the leaders of labour.” And so it was a case (for the workers, at least) of “[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers.” [Op. Cit., p. 33, p. 34 and p. 44]

The parallels with Engels’ “On Authority” could not be clearer, as are the fallacies of Lenin’s assertions (see, for example, section H.4.4). Lenin, like Engels, uses the example of modern industry to bolster his arguments. Yet the net effect of Lenin’s argument was to eliminate working class economic power at the point of production. Instead of socialist social relationships, Lenin imposed capitalist ones. Indeed, no capitalist would disagree with Lenin’s workplace regime — they try to create such a regime by breaking unions and introducing technologies and techniques which allow them to con-
Firstly, that the “state capitalist” vision of socialism imposed upon Russia by the Bolsheviks was what they had always intended to introduce. It was their limited support for workers’ control in 1917 that was atypical and not part of their tradition, not their policies once in power (as modern day Leninists assert).Secondly, that this vision had its roots in classical Marxism, specifically Engels’ “On Authority” and the identification of socialism with nationalised property (see section H.3.13 for more on this).

That Engels diatribe had a negative impact on the development of the Russian revolution can easily be seen from Lenin’s arguments. For example, Lenin argues that the “tightening of discipline” and “harmonious organisation” calls “for coercion — coercion precisely in the form of dictatorship.” He did not object to granting “individual executives dictatorial power (or ‘unlimited’ powers)” and did not think “the appointment of individual, dictators with unlimited power” was incompatible with “the fundamental principles of the Soviet government.” After all, “the history of revolutionary movements” had “shown” that “the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes.” He notes that “Undoubtedly, the dictatorship of individuals was compatible with bourgeois democracy.” [Op. Cit., p. 28 and p. 32] It would be churlish to note that previous revolutionary movements had not been socialist in nature and did not aim to abolish classes. In such cases, the government appointing people with dictatorial powers would not have harmed the nature of the revolution, which was transferring power from one minority class to another.

Lenin mocked the “exceedingly poor arguments” of those who objected, saying that they “demand of us a higher democracy than bourgeois democracy and say: personal dictatorship is absolutely incompatible with your, Bolshevik (i.e. not bourgeois, but socialist) Soviet democracy.” As the Bolsheviks were “not anarchists,” he admitted the need “coercion” in the “transition from capitalism to socialism,” its form being determined “by the degree of development

Which is, of course, hardly a convincing position to take, particularly as Lenin and Trotsky were hardly shy in justifying their authoritarian policies and expressing a distinct lack of concern over the fate of any meaningful working class conquest of the revolution like, say, soviet democracy. Indeed, as we note in section 5 of the appendix “Were any of the Bolshevik oppositions a real alternative?”, the sad fact is that the inter-party conflicts of the 1920s were not about workers’ democracy at all rather party democracy, as admitted in 1925 by Max Eastman, one of Trotsky’s main supporters at the time, who noted that “this programme of democracy within the party [was] called ‘Workers’ Democracy’ by Lenin” and that “Trotsky merely revived this original plea.” [Since Lenin Died, p. 35] Ironically, Trotskyists in soviet prisons in the early 1930s “continued to consider that ‘Freedom to choose one’s party — that is Menshevism’” and this was their “final verdict.” [Ante Ciliga, The Russian Enigma, p. 280] No wonder they seemed surprised to be there!

Ultimately, Trotsky’s issue with Stalinism was not based on real socialist principles, such as meaningful working class freedoms and power. Rather it was a case of “the political centre of gravity [having] shifted from the proletarian vanguard to the bureaucracy” and this caused “the party” to change “its social structure as well as in its ideology.” [“Stalinism and Bolshevism,” Writings of Leon Trotsky 1936–37, p. 422] The party dictatorship had been replaced by the dictatorship of the state bureaucracy, in other words. Once this happened, Trotsky sought to explain it. As analysing the impact of Bolshevik ideology and practice were, by definition, out of the question given his role in formulating and imposing it, that left the various “objective factors” Trotsky turned to in order to explain developments after 1923, to explain Stalinism while keeping true to Bolshevik ideology and practice.

This legacy shows itself with those who repeated it afterwards. Trotsky’s limited critique explains why, to quote Chris Harman (another member of the British SWP), Trotsky “continued to his
death to harbour the illusion that somehow, despite the lack of workers’ democracy, Russia was a ‘workers’ state.’ Simply put, there had been no workers’ democracy under Lenin and Trotsky and he considered that regime a “workers’ state” so why should this be a key criteria for evaluating Stalinism? The question arises why Harman thought that Lenin’s Russia was some kind of “workers’ state” if workers’ democracy is the criteria by which such things are to be judged. But, then again, he thinks Trotsky’s Left Opposition “framed a policy along [the] lines” of “returning to genuine workers’ democracy”? [Bureaucracy and Revolution in Eastern Europe, p. 20 and p. 19] This also undermines the SWP’s “Stalinism was state-capitalism” position (it must be stressed, as noted in section H.3.13, this is not the same as the anarchist analysis, even if the conclusions are the same). As orthodox Trotskyist Ted Grant summarised in 1949:

“If Comrade Cliff’s thesis is correct, that state capitalism exists in Russia today [under Stalin], then he cannot avoid the conclusion that state capitalism has been in existence since the Russian Revolution and the function of the revolution itself was to introduce this state capitalist system of society. For despite his tortuous efforts to draw a line between the economic basis of Russian society before the year 1928 and after, the economic basis of Russian society has in fact remained unchanged.” [‘Against the Theory of State Capitalism: Reply to Comrade Cliff,” The Unbroken Thread, p. 199]

Indeed! Although Grant was wrong to view Stalin’s Russia as a “degenerated workers’ state” rather that reject Bolshevism for introducing state-capitalism and party dictatorship in Russia, the fact is that in terms of social relations he is correct — Russia was state-capitalist under Lenin and Trotsky. The awkward fact is that the Russian working class was expropriated both politically and eco-

authority effectively prevents active participation in the social production of values. And there was no alternative.

As noted in section 8 of the appendix “What happened during the Russian Revolution?” and section H.3.14, during 1917 Lenin did not favour workers’ self-management of production. He raised the idea of “workers’ control” after the workers spontaneously raised the idea and practice themselves during the revolution. Moreover, he interpreted that slogan in his own way, placing it within a statist context and within institutions inherited from capitalism (see section H.3.12). Once in power, it was (unsurprisingly) his vision of socialism and workers’ control that was implemented, not the workers’ factory committees. The core of that vision he repeatedly stressed had been raised before the October revolution.

This vision can be best seen in The Immediate Tasks of the Soviet Government, written by Lenin and published on the 25th of April 1918. This occurred before the start of the civil war and, indeed, he starts by arguing that “[t]hanks to the peace which has been achieved” the Bolsheviks had “gained an opportunity to concentrate its efforts for a while on the most important and most difficult aspect of the socialist revolution, namely the task of organisation.” The Bolsheviks, who had “managed to complete the conquest of power,” now faced “the principal task of convincing people” and doing practical organisational work.” Only when this was done “will it be possible to say that Russia has become not only a Soviet, but also a socialist, republic.” [The Immediate Tasks of the Soviet Government, p. 2 and p. 8]

Sadly, this “organisation” was riddled with authoritarianism and was fundamentally top-down in nature. His “socialist” vision was simply state capitalism (see section 10 of the appendix “What happened during the Russian Revolution?”). However, what interests us here is that his arguments to justify the “socialist” policies he presented are similar to those put forward by Engels in “On Authority.” As such, we can only reach the following conclusions.
ment” would be, basically, the same as worker’s self-management via an elected factory committee.

For Engels, any form of joint activity required as its “first condition” a “dominant will that settles all subordinate questions, whether this will is represented by a single delegate or a committee charged with the execution of the resolutions of the majority of persons interested. In either case there is very pronounced authority.” Thus the “necessity of authority, and of imperious authority at that.” Collective life, he stressed, required “a certain authority, no matter how delegated” and “a certain subordination, are things which, independently of all social organisation, are imposed upon us.” [The Marx-Engels Reader, p. 732]

Lenin was aware of these arguments, even quoting from this essay in his State and Revolution. Thus he was aware that for Engels, collective decisions meant “the will of the single individual will always have to subordinate itself, which means that questions are settled in an authoritarian way.” Thus there was no difference if “they are settled by decision of a delegate placed at the head of each branch of labour or, if possible, by a majority vote.” The more advanced the technology, the greater the “despotism”: “The automatic machinery of a big factory is much more despotic than the small capitalist who employ workers ever have been.” [Op. Cit., p. 731] Thus Engels had used the modern factory system of mass production as a direct analogy to argue against the anarchist call for workers’ councils and self-management in production, for workers’ autonomy and participation. Like Engels, Lenin stressed the necessity of central authority in industry.

It can be argued that it was this moment that ensured the creation of state capitalism under the Bolsheviks. This is the moment in Marxist theory when the turn from economics to technics, from proletarian control to technocracy, from workers’ self-management to appointed state management was ensured. Henceforth the end of any critique of alienation in mainstream Marxism was assured. Submission to technique under hierarchical economically in the first few months. A new State — with its own bureaucracy and armed forces separate from the masses — was emerging by January 1918, with the elimination of democracy within the armed forces and workplaces imposed by March and April of that year. This process was in place before “objective factors” like civil war started or had a significant impact — which undoubtedly explains why the Bolsheviks at the time did not justify their policies in those terms, why Lenin in November 1919 stated that the “organisation of the communist activity of the proletariat and the entire policy of the Communists have now acquired a final, lasting form; I am certain that we are on the right path and that progress along that path is fully ensured.” [Collected Works, vol. 30, p. 144]

The major problem for Trotskyists of all kinds is that all the characteristics which they claim differentiate Bolshevism and Stalinism were all applied under Lenin and Trotsky. So, while most neo-Trotskyists like to proclaim that socialism has to be politically and economically democratic to qualify as socialist in order to exclude Stalinism from Marxism, the awkward fact is that these same parties also consider Lenin’s regime post-1917 as socialist in spite of it being a party dictatorship politically and state-capitalist economically: apparently, socialism need not be democratic after all.

For anarchists, however, the regime confirmed the “belief that a revolution à la Bakunin would have brought more constructive results, if not immediate anarchism ... the Russian Revolution had been à la Bakunin, but it had since been transformed à la Karl Marx. That seemed to be the real trouble. I had not been naive enough to expect anarchism to rise phoenix-like from the ashes of the old. But I did hope that the masses, who had made the Revolution, would also have the chance to direct its course.” [Emma Goldman, Living My Life, vol. 2, p. 826] As Kropotkin summarised, we “have always pointed out the effects of Marxism in action. Why be surprised now?” In short, it was the case of “a small political party which by its false theories, blunders, and inefficiency has demonstrated how revolutions must
not be made.” [quoted by Emma Goldman, My Disillusionment in Russia, p. 36 and p. 98]

So, in summary, the leading Bolsheviks did not view “objective factors” as explaining the failure of the revolution. Indeed, until Trotsky was squeezed out of power they did not think that the revolution had failed: party dictatorship and one-man management were considered as expressions of a successful revolution. Trotsky’s issue with Stalinism was simply that the bureaucracy had replaced the “the proletarian vanguard” (i.e. himself and his followers) as the dominant force in the Soviet State and it had started to use the techniques of political repression developed against opposition parties and groups against him. The idea that “objective factors” caused the failure of the revolution was not used to explain the party dictatorship but rather the usurpation of its power by the bureaucracy. Its subsequent use by both orthodox and neo-Trotskyists to rationalise Leninist policies do not address the fundamental issue of why the revolution failed as it, as we discuss in the next section, exists to exclude the impact of Bolshevik ideology in that process. Ultimately, it is unconvincing when placed in the wider context of Leninist ideology before, during and after the civil war.

7 What role does “objective factors” play in Leninist ideology?

As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, Marxist ideology played a key role in the degeneration of the revolution and in laying the groundwork for the rise of Stalinism. However, this is a conclusion which no Leninist could entertain for a moment and this explains the popularity of “objective factors” within these circles — for its role is to obscure this key factor in the failure of the revolution. Kropotkin stated the obvious, namely that the problems theoretically to the dangers of their own actions, so helping to undermine the socialist potential of the Russian revolution. While the Marxist theory of the state, with its ahistoric and ambiguous use of the word “state” undermined popular autonomy and power in favour of party power, Engels’ essay “On Authority” helped undermine popular self-management.

Simply put, Engels essay contained the germs from which Lenin and Trotsky’s support for one-man management flowed. He provided the Marxist orthodoxy required to undermine real working class power by confusing all forms of organisation with “authority” and equating the necessity of self-discipline with “subordination” to one will. Engels’ infamous essay helped Lenin to destroy self-management in the workplace and replace it with appointed “one-man management” armed with “dictatorial powers.”

For Lenin and Trotsky, familiar with Engels’ “On Authority,” it was a truism that any form of organisation was based on “authoritarianism” and, consequently, it did not really matter how that “authority” was constituted. Thus Marxism’s agnostic attitude to the patterns of domination and subordination within society was used to justify one-man management and party dictatorship. Indeed, “Soviet socialist democracy and individual management and dictatorship are in no way contradictory . . . the will of a class may sometimes be carried by a dictator, who sometimes does more alone and is frequently more necessary.” [Lenin, Collected Works, vol. 30, p. 476]

Like Engels, Lenin defended the principle of authority. The dictatorship of the Party over the proletariat found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable given the current mode of production, they argued. And no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant how a workplace is organised as, no matter what, it would be “authoritarian.” Thus “one-man manage-
activity required by a social revolution with top-down rule by a few party leaders. Such rule could not avoid becoming bureaucratised and coming into conflict with the real aspirations and interests of those it claimed to represent. In such circumstances, in a conflict between the “workers’ state” and the actual workers the Marxist theory of the state, combined with the assumptions of vanguardism, made the shift to party dictatorship inevitable. As we discussed in section 3 of the appendix on “What caused the degeneration of the Russian Revolution?”, authoritarian tendencies had surfaced before the civil war began.

The strange paradox of Leninism, namely that the theoretical dictatorship of the proletariat was, in practice, a dictatorship over the proletariat comes as no surprise. In spite of Lenin announcing “all power to the soviets” he remained committed to a disciplined party wielding centralised power. This regime soon expropriated the soviets while calling the subsequent regime “Soviet.” Rather that create the authoritarian tendencies of the Bolshevik state the “objective factors” facing Lenin’s regime simply increased their impact. The preconditions for the minority rule which the civil war intensified to extreme levels already existed within Marxist theory. Consequently, a Leninist revolution which avoided the (inevitable) problems facing a revolution would still create some kind of class society simply because it reproduces minority rule by creating a “workers’ state” as its first step. Sadly, Marxist theory confuses popular self-government with a state so ensuring the substitution of rule by a few party leaders for the popular participation required to ensure a successful revolution.

3 How did Engels’ essay “On Authority” affect the revolution?

We have discussed Engels’ infamous diatribe against anarchism already (see section H.4 and subsequent sections). Here we discuss how its caricature of anarchism helped disarm the Bolsheviks the-

were increased but not created by the counter-revolution and other “objective factors”:

“The evils naturally inherent in party dictatorship have thus been increased by the war conditions under which this party maintained itself. The state of war has been an excuse for strengthening the dictatorial methods of the party, as well as its tendency to centralise every detail of life in the hands of the Government, with the result that immense branches of the usual activities of the nation have been brought to a standstill. The natural evils of State Communism are thus increased tenfold under the excuse that all misfortunes of our life are due to the intervention of foreigners.” [Direct Struggle Against Capital, p. 488]

So the stressing of “objective factors” is hardly accidental for it shifts perspectives away from Bolshevik ideology and its flaws. It ensures that any Leninist defence of Bolshevism based purely on stressing “objective factors” results in the conclusion that Bolshevism ideology played no role in the decisions made by the party leaders, that they simply operated on autopilot from October 1917 onwards. As Samuel Farber puts it “determinism’s characteristic and systemic failure is to understand that what the masses of people do and think politically is as much part of the process determining the outcome of history as are the objective obstacles that most definitely limit peoples’ choices.” [Before Stalinism, p. 198] This is particularly the case when, as in Bolshevik Russia, “the masses of people” have had their revolution expropriated from them and placed into the hands of a few leaders at the top of a centralised, hierarchical social structure which combines political and economic decision making and power.

For anarchists, “objective factors” and “ideology” are interwoven — ideas reflect the social conditions in which they develop.
but how people react to events are influenced by the ideas in their heads and these are also influenced by “ideologically correct” sources from the past. The decisions made by those in power impact on the objective circumstances — making them better or worse depending on their suitability to address the issues. Social structures create specific social relations, and so an ideological prejudice in favour of, say, centralisation results in the building of specific forms of social organisation which, in turn, quickly become objective factors. Similarly, concentrating power into a few hands automatically limits the options and knowledge available to solve the problems, as Malatesta noted long before 1918:

“Social action […] is the resultant of initiatives, thoughts and actions of all individuals who make up society; a resultant which, all other things being equal, is greater or smaller depending on whether individual forces are directed to a common objective or are divided or antagonistic. And if instead, as do the authoritarians, one means government action when one talks of social action, then this is still the resultant of individual forces, but only of those individuals who form the government or who by reason of their position can influence the policy of the government. […] Even if we pursue our hypothesis of the ideal government of the authoritarian socialists, it follows from what we have said that far from resulting in an increase in the productive, organising and protective forces in society, it would greatly reduce them, limiting initiative to a few, and giving them the right to do everything without, of course, being able to provide them with the gift of being all-knowing.” [Anarchy, pp. 38–9]

In short, when a few hold political, economic and social power and are ruling in the name of the working class then the impact of

hegemony have been preserved and strengthened. By expropriating the bourgeoisie politically, Hitler saved it, even if temporarily, from economic expropriation. The fact that the bourgeoisie was compelled to resort to the fascist regime testifies to the fact that its hegemony was endangered but not at all that it had fallen.” [Trotsky, The Class Nature Of The Soviet State]

Yet Trotsky is confusing the matter. He is comparing the actions of class society with those a socialist revolution. While a minority class need not “participate” en mass the question arises does this apply to the transition from class society to a classless one? Can the working class really can be “expropriated” politically and still remain “the ruling class”? Moreover, Trotsky fails to note that the working class was economically and politically expropriated under Stalinism as well. This is unsurprising, as both forms of expropriation had occurred when he and Lenin held the reins of state power. Yet Trotsky’s confused ramblings do serve a purpose in showing how the Marxist theory of the state can be used to rationalise the replacement of popular power by party power. With such ideological baggage, can it be a surprise that the Bolshevik replacement of workers’ power by party power could be a revolutionary goal? Ironically, the Marxist theory of the state as an instrument of class rule helped ensure that the Russian working class did not become the ruling class post-October. Rather, it ensured that the Bolshevik party did.

To conclude, by its reductionist logic, the Marxist theory of the state ensured that the substitution of popular power by party power could go ahead and, moreover, be justified ideologically. The first steps towards party dictatorship can be found in such apparently “libertarian” works as Lenin’s “State and Revolution” with its emphasis on “representation” and “centralisation.” The net effect of this was to centralise power into fewer and fewer hands, replacing the essential constructive working class participation and self-
is remotely “proletarian”? Ultimately, the working class can only “rule” society through its collective participation in decision making (social, economic and “political”). If working class people are not managing their own affairs, if they have delegated that power to a few party leaders then they are not a ruling class and could never be. While the bourgeoisie can, and has, ruled economically under an actual dictatorship, the same cannot be said to be the case with the working class. Every class society is marked by a clear division between order takers and order givers. To think that such a division can be implemented in a socialist revolution and for it to remain socialist is pure naivety. As the Bolshevik revolution showed, representative government is the first step in the political expropriation of the working class from control over their fate.

This can best be seen by Trotsky’s confused analyses of Stalinism. He simply could not understand the nature of Stalinism with the simplistic analytical tools he inherited from mainstream Marxism and Bolshevism. Thus we find him arguing in 1933 that:

“The dictatorship of a class does not mean by a long shot that its entire mass always participates in the management of the state. This we have seen, first of all, in the case of the propertied classes. The nobility ruled through the monarchy before which the noble stood on his knees. The dictatorship of the bourgeoisie took on comparatively developed democratic forms only under the conditions of capitalist upswing when the ruling class had nothing to fear. Before our own eyes, democracy has been supplanted in Germany by Hitler’s autocracy, with all the traditional bourgeois parties smashed to smithereens. Today, the German bourgeoisie does not rule directly; politically it is placed under complete subjection to Hitler and his bands. Nevertheless, the dictatorship of the bourgeoisie remains inviolate in Germany, because all the conditions of its social ideology becomes correspondingly concentrated. Unsurprisingly, rather than just select policies at random the Bolshevik leadership pursued consistently before, during and after the civil war policies which reflected their ideology. There was a preference for policies which centralised power in the hands of a few (politically and economically), that saw socialism as being defined by nationalisation rather than self-management, that considered bigger as inherently better, that stressed that role and power of the vanguard above that of the working class, that saw class consciousness as being determined by how much a worker agreed with the party leadership rather than whether it expressed the actual needs and interests of the class as a whole.

By stressing just one aspect of the matter, the “objective,” Leninists ensure that the other, the “subjective,” is ignored and so ensure a flawed analysis of the revolution and lessons to be learned from it. Indeed, what could be learned? Only that any future revolution should occur in an advanced capitalist nation, avoid isolation, civil war and so on. Thus Bolshevik ideology can be uncritically embraced for, ultimately, it has never been applied!

Yet Bolshevism itself undermined the socialist potential of the revolution, irrespective of the actual circumstances involved (which, to some degree, will affect any revolution). For example, the Bolshevik preference for centralisation and nationalisation would negatively affect a revolution conducted in even the best circumstances, as would the seizure of state power rather than its destruction. Only the elimination of what makes Bolshevism Bolshevism would ensure that a revolution would be successful. So anarchists stress that rather than being forced upon them by “objective factors” many of these policies were, in fact, in line with pre-civil war Bolshevik ideas. The Bolshevik vision of socialism, in other words, ensured that they smothered the (libertarian) socialist tendencies and institutions that existed at the time. As Chomsky summarises, “Lenin and Trotsky, shortly after seizing state power in 1917, moved to dismantle organs of popular control,
including factory committees and Soviets, thus proceeding to deter and overcome socialist tendencies.” [Deterring Democracy, p. 361]

That they **thought** their system of state capitalism was a form of “socialism” is irrelevant — they systematically combated (real) socialist tendencies in favour of state capitalist ones and did so knowingly and deliberately (see sections H.3.1 and H.3.13 on the differences between real socialism and Marxism in its Bolshevik mode and section H.6 on Bolshevik practice itself).

So it is important to stress that even if the Russian Revolution had occurred in better circumstances, it is unlikely that Bolshevism would have resulted in socialism rather than state capitalism. Bolshevik principles ensure that any revolution lead by a vanguard party would not have succeeded. This can be seen from the experience of Bolshevism immediately after it seized power, before the start of the civil war and major economic collapse, so their application in even the best of situations would have undermined socialist tendencies in the revolution. Simply put, a statist revolution will have statist, not libertarian, ends.

The focusing on “objective factors” (particularly the civil war) has become the traditional excuse for people with a romantic attachment to Leninism but who are unwilling to critically analyse what the Bolsheviks actually did in power and how it so often reflected their pre-October policies and promises. This excuse is not viable if you seek to build a revolutionary movement today: you need to choose between the real path of Lenin and the real, anarchist, alternative. As Lenin constantly stressed, a revolution will be difficult — fooling ourselves about what will happen now just undermines our chances of success in the future and ensure that history will repeat itself. For the “objective factors” argument is not a defence of Leninism, but rather one that seeks to evade having to make such a defence. Revolutionary politics would be much better served by confronting this history and the politics behind it head on. Perhaps, if Leninists did do this, they would remain Leninists, but at least then their party members and those who read their

the Leninists revised their theory of the state to take into account the realities of state power and the need to justify minority power over the masses (see section H.3.8).

Needless to say, even electoral support for the Bolsheviks should not and cannot be equated to working class management of society. Echoing Marx and Engels at their most reductionist (see section H.3.9), Lenin stressed that the state was “an organ or machine for the subjection of one class by another ... when the State has become proletarian, when it has become a machine for the domination of the proletariat over the bourgeoisie, then we shall fully and unreservedly for a strong government and centralism.” [Op. Cit., p. 75] The notions that the state could have interests of its own, that it is not simply an instrument of class rule but rather minority class rule are nowhere to be found. The implications of this simplistic analysis had severe ramifications for the Russian Revolution and Trotskyist explanations of both Stalinism and its rise.

Which brings us to the second issue. It is clear that by considering the state simply as an instrument of class rule Lenin could downplay, even ignore, such important questions of how the working class can “rule” society, how it can be a “ruling” class. Blinded by the notion that a state could not be anything but an instrument of class rule, the Bolsheviks simply were able to justify any limitation of working class democracy and freedom and argue that it had no impact on whether the Bolshevik regime was really a “dictatorship of the proletariat” or not. This can be seen from Lenin’s polemic with German Social-Democrat Karl Kautsky, where he glibly stated that “[t]he form of government, has absolutely nothing to so with it.” [Collected Works, vol. 28, p. 238]

Yet the idea that there is a difference between who rules in a revolutionary situation and how they rule is a key one, and one raised by the anarchists against Marxism. After all, if the working class is politically expropriated how can you maintain that a regime
However, governing in the “interests” of the poor is not the same as the poor governing themselves. Thus we have the first key substitution that leads to authoritarian rule, namely the substitution of the power of the masses by the power of a few members who make up the government. Such a small body will require a centralised state system and, consequently, we have the creation of a hierarchical body around the new government which, as we discuss in section 7, will become the real master in society.

The preconditions for a new form of class society have been created and, moreover, they are rooted in the basic ideas of Marxism. Society has been split into two bodies, the masses and those who claim to rule in their name. Given this basic inequality in power we would, according to anarchist theory, expect the interests of the masses and the rulers to separate and come into conflict. While the Bolsheviks had the support of the working class (as they did in the first few months of their rule), this does not equal mass participation in running society. Quite the reverse. So while Lenin raised the vision of mass participation in the “final” stage of communism, he unfortunately blocked the means to get there.

Simply put, a self-managed society can only be created by self-managed means. To think we can have a “public power” separate from the masses which will, slowly, dissolve itself into it is the height of naivety. Unsurprisingly, once in power the Bolsheviks held onto power by all means available, including gerrymandering and disbanding soviets, suppressing peaceful opposition parties and violently repressing the very workers it claimed ruled in “soviet” Russia (see section 6 of the appendix “What happened during the Russian Revolution?”). Significantly, this conflict developed before the start of the civil war (see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). So when popular support was lost, the basic contradictions in the Bolshevik position and theory became clear. Rather than be a “soviet” power, the Bolshevik regime was simply rule over the workers in their name, nothing more. And equally unsurprisingly, publications would have an understanding of what this meant. And they would have to dump Lenin’s State and Revolution into the same place Lenin himself did when in power — into the rubbish bin — and admit that democracy and Bolshevik revolution do not go together.

Looking at the “subjective factor” and the ideology which drove it means to recognise that it was not a case of the Bolshevik regime wanting to introduce communism but, being isolated, ended up imposing state capitalism instead. Rather, these policies were explicitly advocated from the start, before the seizure of power in October 1917. So the idea that “objective factors” caused the degeneration of the revolution is valid if and only if the Bolsheviks were implementing socialist policies during the period immediately after the October revolution: that was not the case, Lenin and other leading Bolsheviks explicitly argued for these policies as essential for building socialism (or, at best, the preconditions of socialism) in Russia and Bolshevik practice flowed from this analysis. Unsurprisingly, then, the Bolsheviks happily introduced authoritarian and state capitalist policies from the start. Many of the policies denounced as “Stalinist” by Leninists were being advocated and implemented by Lenin in the spring of 1918, i.e. before the start of the civil war and the deepening of economic chaos that it produced.

In other words, the usual excuses for Bolshevik tyranny do not hold much water, both factually and logically.

8 Do Leninists usually deny the importance of ideology?

In a word, no. Usually Leninists stress the importance of ideology in both social change and revolution — after all, why join their party if ideology is unimportant as decisions are driven by “objective factors”? Yet, ironically, other aspects of their analysis of the Russian Revolution recognises that ideology does play an important role.
Indeed, the framework which Leninists use in this discussion shows the importance of Bolshevik ideology and the key role it played in the outcome of the revolution. After all, pro-Bolsheviks argue that the “objective factors” forced the Bolsheviks to act as they did. However, the proletariat is meant to be the “ruling class” in the “dictatorship of the proletariat.” As such, to argue that the Bolshevists were forced to act as they did due to circumstances means to implicitly acknowledge that the party held power in Russia, not the working class. That a ruling party could become a party dictatorship is not unsurprising, nor that its vision of what “socialism” was would be given preference over the desires of the working class in whose name it ruled. So these apologetics show the validity of Bakunin’s critique of Marxism:

“Nor can we comprehend talk of freedom of the proletariat or true deliverance of the masses within the State and by the State. State signifies domination, and all domination implies subjection of the masses, and as a result, their exploitation to the advantage of some governing minority. “Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional governments, nor so called revolutionary dictatorships: because we are persuaded that revolution is sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction.” [No Gods, No Masters, vol. 1, p. 160]

This is not the only way in which Leninist defences of Bolshevism undermines itself. In their own way, Leninists admit the key role of ideas indirectly when they cannot avoid mentioning the collective resistance to Bolshevism indicated in section 5 above. In dictatorship and continue to talk about the working class being in power. Because of Marxism’s metaphysical definition of the state (see section H.3.7), actual working class people’s power over their lives is downplayed, if not ignored, in favour party power.

As parties represent classes in this schema, if the party is in power then, by definition, so is the class. This raises the possibility of Lenin asserting the “working class” held power even when his party was exercising a dictatorship over the working class and violently repressing any protests by it. As one socialist historian puts it, “while it is true that Lenin recognised the different functions and democratic raison d’être for both the soviets and his party, in the last analysis it was the party that was more important than the soviets. In other words, the party was the final repository of working-class sovereignty. Thus, Lenin did not seem to have been reflected on or have been particularly perturbed by the decline of the soviets after 1918.” [Samuel Farber, Before Stalinism, p. 212] This can be seen from how the Marxist theory of the state was changed after the Bolsheviks seized power to bring into line with its new role as the means by which the vanguard ruled society (see section H.3.8).

This confusion between two radically different concepts and their submersion into the term “state” had its negative impact from the start. Firstly, the Bolsheviks constantly equated rule by the Bolshevik party (in practice, its central committee) with the working class as a whole. Rather than rule by all the masses, the Bolsheviks substituted rule by a handful of leaders. Thus we find Lenin talking about “the power of the Bolsheviks — that is, the power of the proletariat” as if these things were the same. Thus it was a case of “the Bolsheviks” having “to take the whole governmental power into their own hands,” of “the complete assumption of power by the Bolsheviks alone,” rather than the masses. Indeed, Russia had been “ruled by 130,000 landowners” and “yet they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interests of the poor and against the rich.” [Will the Bolsheviks Maintain Power?, p. 102, p. 7 and pp. 61–2]
vik arguments in favour of party dictatorship during the civil war period (and beyond).

The problem with the centralised, representative structures Lenin favours for the “dictatorship of the proletariat” is that they are rooted in the inequality of power. They constitute in fact, if not initially in theory, a power above society. As Lenin put it, “the essence of bureaucracy” is “privileged persons divorced from the masses and superior to the masses.” [Op. Cit., p. 360] In the words of Malatesta, a “government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of.” [Anarchy, p. 34] As we discussed in appendix “What happened during the Russian Revolution?”, Lenin’s regime provides more than enough evidence to support such an analysis.

This is the fatal flaw in the Marxist theory of the state. As Bakunin put it, “the theory of the state” is “based on this fiction of pseudo-popular representation — which in actual fact means the government of the masses by an insignificant handful of privileged individuals, elected (or even not elected) by mobs of people rounded up for voting and never knowing what or whom they are voting for — on this imaginary and abstract expression of the imaginary thought and will of the all the people, of which the real, living people do not have the faintest idea.” Thus the state represents “government of the majority by a minority in the name of the presumed stupidity of the one and the presumed intelligence of the other.” [Op. Cit., pp. 136–7]

By confusing popular participation with a state, by ignoring the real inequalities of power in any state structure, Marxism allowed Lenin and the Bolsheviks to usurp state power, implement party the few cases when the class struggle under the Bolsheviks is not ignored, Leninists often argue that while the working class was capable of collective decision making and action, the nature of such action was suspect. This arguments rests on the premise that the “advanced” workers (i.e. party members) left the workplace for the front or for government posts, leaving the “backward” workers behind. This argument is often used, particularly in regard to the garrison of Kronstadt at the time of their revolt in early 1921 (see section 8 of the appendix on “What was the Kronstadt Rebellion?”).

Yet this argument raises more problems that its solves. In any revolution the most advanced, the most politically consciousness tend to volunteer to go to the front first and, of course, tend to be elected as delegates to committees of various kinds (local, regional and national; economic, political and social). There is little that can be done about it but if soviet — or socialist — democracy depends on the “advanced” workers being there in order for it to work, then it suggests two things. First, and most obvious, that ideas matter — if not, then the question of advanced and backward workers would be irrelevant. Second, that the commitment to democracy is lacking in those who argue along these lines, for what happens if the “backward” masses reject the “advanced” elements? Given the key role played by the latter then do they have the right, even the duty, to impose their will on the former? And it also begs the question of who determines what constitutes “backward” — if it means “does not support the party” then it becomes little more than a rationale for party dictatorship (as it did under Lenin and Trotsky).

Writing in 1938 while he defended the repression of the 1921 Kronstadt revolt, Trotsky argued that a “revolution is ‘made’ directly by a minority,” he argued that the “success” of a revolution is “possible” when “this minority finds more or less support, or at least friendly neutrality, on the part of the majority.” So what happens if the majority expresses opposition to the party? Unfortunately Trotsky does not raise this question, but he does answer it indirectly by arguing that “to free the soviets from the leadership [sic!] of the Bol-
sheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the ‘ideas’ of their participants.” [Lenin and Trotsky, Kronstadt, p. 85 and p. 90]

Thus to let the working masses (the “majority”) have free soviet elections and so reject the vanguard (the “minority”) would mean the end of soviet power, allowing the proletariat a say in the progress of the revolution means the end of the “proletarian dictatorship”? Which, of course, is interesting logic. The authoritarian core of the Bolshevik vision of revolution is thus exposed — along with the key role of ideology in the outcome of the revolution!

Victor Serge likewise presented an insight into the Bolshevik perspective on the role of ideology in a revolution when he noted that in 1918 “[a]gitation conducted by the SRs and Mensheviks called demonstrations in the streets and prepared for a general strike. The demands were: free trade, wage increases, payment of wages one, two or three months in advance and ‘democracy.’ The intention was to incite the working class itself against the revolution.” Which only makes sense once you realise that by “the revolution” Serge simply meant “the Bolsheviks” and the obvious truth that the working class was not managing the revolution at all, was not, in any sense, in power. “The best elements among the workers,” explains Serge, “were away fighting; those in the factories were precisely the less energetic, less revolutionary sections, along with the petty folk, yesterday’s small shopkeepers and artisans, who had come there to find refuge. This proletariat of the reserve often allowed itself to fall under the sway of Menshevik propaganda.” [Year One of the Russian Revolution, p. 229] Given that Serge is discussing the period before the revolt of Czechoslovak Legion (and so the start of the civil war), a greater indictment of Bolshevism cannot be found.

Can we expect the same types of organs and social relationships to produce different results simply because Lenin is at the head of the state? Of course not.

As the Marxist theory of the state confused party/vanguard power with working class power, we should not be surprised that Lenin’s “State and Revolution” failed to discuss the practicalities of this essential question in anything but a passing and ambiguous manner. For example, Lenin notes that “[b]y educating the workers’ party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of leading the whole people to socialism, of directing and organising the new order.” [Op. Cit., p. 288] It is not clear whether it is the vanguard or the proletariat as a whole which assumes power. Later, he states that “the dictatorship of the proletariat” was “the organisation of the vanguard of the oppressed as the ruling class for the purpose of crushing the oppressors.” [Op. Cit., p. 337] Given that this fits in with subsequent Bolshevik practice, it seems clear that it is the vanguard which assumes power rather than the whole class. The negative effects of this are discussed in section 8.

However, the assumption of power by the party highlights the key problem with the Marxist theory of the state and how it could be used to justify the destruction of popular power. It does not matter in the Marxist schema whether the class or the party is in power, it does not impact on whether the working class is the “ruling class” or not. As Lenin put it. “democracy is not identical with the subordination of the minority to the majority. Democracy is a state which recognises the subordination of the minority to the majority, i.e. an organisation for the systematic use of violence by one class against the other, by one section of the population against another.” [Op. Cit., p. 332] Thus the majority need not actually “rule” (i.e. make the fundamental decisions) for a regime to be considered a “democracy” or an instrument of class rule. That power can be delegated to a party leadership (even dictatorship) without harming the “class nature” of the state. This results of such a theory can be seen from Bolshe-
Thus Lenin’s work is deeply ambiguous. He is confusing popular self-management with a state structure. Anarchists argue that states, by their very nature, are based on concentrated, centralised, alienated power in the hands of a few. Thus Lenin’s “workers’ state” is just the same as any other state, namely rule by a few over the many. This is confirmed when Lenin argues that “[u]nder socialism, all will take part in the work of government in turn and will soon become accustomed to no one governing.” In fact, once the “overwhelming majority” have “learned to administer the state themselves, have taken this business into their own hands … the need for government begins to disappear. The more complete democracy becomes, the nearer the moment approaches when it becomes unnecessary. The more democratic the ‘state’ of the armed workers — which is ‘no longer a state in the proper sense of the word’ — becomes, the more rapidly does the state begin to wither away.”

Moreover, “[u]ntil the ‘higher’ phase of communism arrives, the Socialists demand the strictest control, by society and by the state, of the amount of labour and of consumption.” [Op. Cit., p. 361, p. 349 and p. 345]

Clearly, the “proletarian” state is not based on direct, mass participation by the population but, in fact, on giving power to a few representatives. It is not identical with “society,” i.e. the armed, self-organised people. Rather than look to the popular assemblies of the French revolution, Lenin, like the bourgeoisie, looked to representative structures — structures designed to combat working class power and influence. (at one point Lenin states that “for a certain time not only bourgeois right, but even the bourgeois state remains under communism, without the bourgeoisie!” This was because “bourgeois right in regard to the distribution of articles of consumption inevitably presupposes the existence of the bourgeois state, for right is nothing without an apparatus capable of enforcing the observance of the standards of right.” [Op. Cit., p. 346]).

After all, what does “workers’ democracy” mean unless the proletariat can vote for its own delegates? Little wonder Daniel Guerin described Serge’s book as “largely a justification of the liquidation of the soviets by Bolshevism.” [Anarchism, p. 97] What point is there having genuine soviet elections if the “less revolutionary sections” (i.e. Trotsky’s “majority”) will not vote for the vanguard? And can socialism exist without democracy? Can we expect an accountable vanguard to govern in the interests of anyone but its own? Of course not!

Thus we find Serge arguing that the “party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses … it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences.” [Op. Cit., p. 218] Ideas apparently do matter after all. Trotsky comments on this theme allows us to draw the obvious conclusions:

“The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves … if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the proletariat is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself.” [“The Moralists and Sycophants against Marxism”, pp. 53–66, Their Morals and Ours, p. 59]

Of course, by definition, every group is “backward” compared to the vanguard and so Trotsky’s and Serge’s argument amounts to little more than a justification for party dictatorship over the proletariat. Thus the validity of Bakunin’s prediction that Marxism’s
“sham people’s government would be no other than the completely despotic rule of the masses by a new and very small aristocracy of actual or alleged ‘scholars.’ The people are no ‘scholars,’ and therefore they are as a whole to be freed from the toils of government, and as a whole they are to make up the herd that is governed. What a splendid freedom!” [Micheal Bakunin: Selected Writings, p. 269] Is it then that surprising that Bolsheviks revised the Marxist theory of the state to justify elite rule? As discussed in section H.3.8, once in power Lenin and Trotsky saw that the “workers’ state” had to be independent of the working class in order to overcome the “waver-ing” and “vacillation of the masses themselves.”

The reason why such a system would not result in socialism does not take long to discover. For anarchists, freedom is not just a goal, a noble end to be achieved sometime in the distant future, but rather a necessary part of the process of creating socialism. Eliminate freedom (and, as a necessary result, workplace and community self-management, initiative, self-activity) and the end result will be anything but socialism. Ultimately, as Malatesta argued, “the only way that the masses can raise themselves” is by freedom “for it is only through freedom that one educates oneself to be free.” [Op. Cit., p. 53] Ironically, by using state repression to combat “backward” elements, the Bolsheviks ensured that they stayed that way and, more importantly, disempowered the whole working class so ensuring that Bolshevik dictatorship came into constant conflict with it and its continuing struggle for autonomy. Rather than base itself on the creative powers of the masses, Bolshevism crushed it as a threat to its power and so ensured that the economic and social problems affecting Russia increased.

And need it be pointed out that “low” culture or “backwardness” have been used by numerous imperialist and authoritarian regimes to justify their rule over a given population? It matters little whether the population are of the same nationality as the rulers or from a subjugated people, the arguments and the logic are the same. Whether dressed up in racist or classist clothing, the

Combine this with an awareness that bureaucracy must continue to exist in the “proletarian” state then we have the ideological preconditions for dictatorship over the proletariat. “There can be no thought,” asserted Lenin, “of destroying officialdom immediately everywhere, completely. That is utopia. But to smash the old bureaucratic machine at once and to begin immediately to construct a new one that will enable all officialdom to be gradually abolished is not utopia.” In other words, Lenin expected “the gradual ‘withering away’ of all bureaucracy.” [Op. Cit., p. 306 and p. 307]

Yet why expect a “new” bureaucracy to be as easy to control as the old one? Regular election to posts does not undermine the institutional links, pressures and powers a centralised “officialdom” will generate around itself, even a so-called “proletarian” one. Significantly, Lenin justified this defence of temporary state bureaucracy by the kind of straw man argument against anarchism “State and Revolution” is riddled with. “We are not utopians,” asserted Lenin, “we do not indulge in ‘dreams’ of dispensing at once with all administration, with all subordination: these anarchist dreams … are totally alien to Marxism, and, as a matter of fact, serve only to postpone the socialist revolution until human nature has changed. No, we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and ‘managers.’” [Op. Cit., p. 307] Yet anarchists do not wish to “dispense” with “all administration,” rather we wish to replace government by administration, hierarchical positions (“subordination”) with cooperative organisation. Equally, we see the revolution as a process in which “human nature” is changed by the struggle itself so that working class people become capable of organising itself and society without bosses, bureaucrats and politicians. If Lenin says that socialism “cannot dispense” with the hierarchical structures required by class society why should we expect the same kinds of structures and social relationships to have different ends just because “red” managers are in power?
stands outside the people and above them, and must invariably try to subject them to rules and objectives which are alien to them.” It was for this reason “we declare ourselves the enemies of every government and state every state power ... the people can only be happy and free when they create their own life, organising themselves from below upwards.” [Statism and Anarchy, p. 136]

The “workers’ state” proved no exception to that generalisation. The roots of the problem, which expressed itself from the start during the Russian revolution, was the fatal confusion of the state with organs of popular self-management. Lenin argued in “State and Revolution” that, on the one hand, “the armed proletariat itself shall becomethegovernment” while, on the other, that “[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions.” If, as Lenin asserts, democracy “means equality” he has reintroduced inequality into the “proletarian” state as the representatives have, by definition, more power than those who elected them. [Essential Works of Lenin, p. 363, p. 306 and p. 346] Yet, as noted in section H.1.2, representative bodies necessarily place policy-making in the hands of deputies and do not (and cannot) mean that the working class as a class can manage society. Moreover, such bodies ensure that popular power can be usurped without difficulty by a minority. After all, a minority already does hold power.

True equality implies the abolition of the state and its replacement by a federation of self-managed communes. The state, as anarchists have long stressed, signifies a power above society, a concentration of power into a few hands. Lenin, ironically, quotes Engels on the state being marked by “the establishment of a public power, which is no longer directly identical with the population organising itself as an armed power.” [quoted by Lenin, Op. Cit., p. 275] As Lenin supported representative structures rather than one based on elected, mandated and recallable delegates then he has created a “public power” no longer identical with the population.

same elitist pedigree lies behind the pro-Bolshevik argument that democracy would have brought “chaos” or “capitalist restoration.” The implicit assumption that working class people are not fit for self-government is clear from these rationales. Equally obvious is the idea that the party knows better than working class people what is best for them.

Sounding like Bolshevik Henry Kissingers, Leninists argue that Lenin and Trotsky had to enforce their dictatorship over the proletariat to stop a "capitalist restoration" (Kissinger was the US state’s liaison with the Chilean military when it helped their coup in 1973 and infamously stated that the country should not be allowed to turn communist due to the stupidity of its own people). Needless to say, anarchists argue that even if the Bolshevik regime had not already been capitalist (specifically, state capitalist) this logic simply represents an elitist position based on “socialism from above” (see section H.3.3). Yes, soviet democracy may have resulted in the return of (private) capitalism but by maintaining party dictatorship the possibility of socialism was automatically nullified. Simply put, the pro-Leninist argument implies that socialism can be implemented from above as long as the right people with the right ideas are in power. Thus the crudest determinism flips into the most vacuous idealism, with the flipping driven by the overwhelming necessity of defend the Bolshevik regime. And while we can understand Trotsky seeking to absolve his conscious on the role his decisions, policies and politics played in creating the regime Stalin so adroitly utilised in his rise to power, it becomes less clear why modern-day socialists would seek to encase themselves in such contradictions.

Such reasoning by Trotsky and Serge show the role of ideology in the outcome of the revolution, so undermining their invocation of “objective factors” to explain all. Yet, at the same time, they stress the importance of Leninist ideology in ensuring the “victory” of the revolution. They seek to have it both ways — the application of the crudest form of deterministic materialism on the one side, the glorification of the will of a few leaders on the other. It also exposes
the authoritarian core of Leninism which justified the repression of working class revolt. Given this, it is incredulous for Leninists like Chris Harman to suggest that it was the “decimation of the working class” which caused (by “necessity”) the “Soviet institutions” to take “on a life independently of the class they had arisen from. Those workers and peasants who fought the Civil War could not govern themselves collectively from their places in the factories.” [“How the revolution was lost”, pp. 13–36, P. Binns, T. Cliff, C. Harman, Russia: From Workers’ State to State Capitalism, p. 18] Given that this “independent” life is required to allow the party (re-quoting Serge) to “go against the current,” Harman simply fails to understand the dynamics of the revolution, the actual social position of the vanguard and the resistance of the working class subject to it. Moreover, the reason why the “workers and peasants” could not govern themselves collectively was because the party had seized power for itself and systematically destroyed soviet, workplace and military democracy to remain there (see section H.6). Then there is the way the Bolsheviks reacted to such collective unrest: they sought to break the workers as a collective force. The use of violence, lockouts and re-registration was typical, as was the arresting of “ringleaders” (see section 5 above for details) It seems ironic, therefore, to blame “objective factors” for the “atomisation” of the working class when, in fact, this was a key aim of Bolshevik repression of labour protest — repression which was easily justified by its ideology.

Ultimately, the degeneration of the Russian Revolution can be traced from when the Bolsheviks seized power on behalf of the Russian working class and peasantry and has its roots in Marxist ideology. Most obviously, state implies the delegation of power and initiative into the hands of a few leaders who form the “revolutionary government.” Yet the power of any revolution, as Bakunin recognised, derives from the decentralisation of power, from the active participation of the masses in the collective social movement and the direct action it generates. As soon as this power passes out
rule and, consequently, cannot be used by the majority to manage their own affairs. Every bourgeois revolution, moreover, has been marked by a conflict between centralised power and popular power and, unsurprisingly, the bourgeois favoured the former over the latter. As such, we would expect centralised power (i.e. a state) to be the means by which a minority class seized power over the masses and never the means by which the majority managed society themselves. It was for this reason that anarchists refuse to confuse a federation of self-managed organisations with a state:

“The reader knows by now that the anarchists refused to use the term 'State' even for a transitional situation. The gap between authoritarians and libertarians has not always been very wide on this score. In the First International the collectivists, whose spokesman was Bakunin, allowed the terms ‘regenerate State,’ ‘new and revolutionary State,’ or even ‘socialist State’ to be accepted as synonyms for ‘social collective.’ The anarchists soon saw, however, that it was rather dangerous for them to use the same word as the authoritarians while giving it a quite different meaning. They felt that a new concept called for a new word and that the use of the old term could be dangerously ambiguous; so they ceased to give the name ‘State’ to the social collective of the future.”

[Daniel Guerin, Anarchism, pp. 60–1]

This is no mere semantics. The essence of statism is the removal of powers that should belong to the community as whole (though they may for reasons of efficiency delegate their actual implementation to elected, mandated and recallable committees) into the hands of a tiny minority who claim to act on our behalf and in our interests but who are not under our direct control. In other words it continues the division into rulers and ruled. Any confusion between two such radically different forms of organisation of the hands of the working class, the revolution is doomed: the counter-revolution has begun and it matters little that it is draped in a red flag. Hence anarchist opposition to the state.

Sadly, many socialists have failed to recognise this. Hopefully we have shown that the standard explanations of the failure of the Russian revolution are, at their base, superficial and will only ensure that history will repeat itself. For the idea that Bolshevik policies did not impact on the outcome of the revolution is a false assertion, as the Makhnovists show (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”) and Leninists themselves implicitly admit. Beliefs are utopian if subjective ideas are not grounded in objective reality. Anarchists hold that part of the subjective conditions required before socialism can exist is the existence of free exchange of ideas and working class democracy (i.e. self-management). To believe that revolution is possible without freedom, to believe those in power can, through their good intentions, impose socialism from above, as the Bolsheviks did, is indeed utopian.

How did Bolshevik ideology contribute to the failure of the Revolution?

It is a truism of Leninism that Stalinism has nothing to do with the ideas of Bolshevism. Moreover, most are at pains to stress that these ideas have no relation to the actual practice of the Bolshevik Party after the October Revolution. To re-quote one Leninist:

“it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time.” [John Rees, “In De-
His fellow party member Duncan Hallas argued that it was “these desperate conditions” (namely terrible economic situation combined with civil war) which resulted in “the Bolshevik Party [coming] to substitute its own rule for that of a decimated, exhausted working class” anarchists disagree. [Towards a Revolutionary Socialist Party, p. 43]

We have discussed in the appendix on “What caused the degeneration of the Russian Revolution?” why the various “objective factors” explanations favoured by Leninists to explain the defeat of the Russian Revolution are unconvincing. Ultimately, they rest on the spurious argument that if only what most revolutionaries (including, ironically, Leninists!) consider as inevitable side effects of a revolution did not occur, then Bolshevism would have been fine. It is hard to take seriously the argument that if only the ruling class disappeared without a fight, if the imperialists had not intervened and if the economy was not disrupted then Bolshevism would have resulted in socialism. This is particularly the case as Leninists argue that only their version of socialism recognises that the ruling class will not disappear after a revolution, that we will face counter-revolution and so we need a state to defend the revolution! As we argued in section H.2.1, this is not the case. Anarchists have long recognised that a revolution will require defending and that it will provoke a serious disruption in the economic life of a country.

Given the somewhat unrealistic tone of these kinds of assertions, it is necessary to look at the ideological underpinnings of Bolshevism and how they played their part in the defeat of the Russian Revolution. This section, therefore, will discuss why such Leninist claims are not true. Simply put, Bolshevik ideology did play a role in the degeneration of the Russian Revolution. This is obvious once we look at most aspects of Bolshevik ideology as well

people are ignorant necessitates strong, solicitous care by the government. [It] will create a single State bank, concentrating in its hands all the commercial, industrial, agricultural, and even scientific production; and they will divide the mass of people into two armies — industrial and agricultural armies under the direct command of the State engineers who will constitute the new privileged scientific-political class.” [The Political Philosophy of Bakunin, p. 289] As Bolshevism proved, there was always an alternative to socialism or a reversion to capitalism, in this case state capitalism.

So libertarians have long been aware that actually existing capitalism could be replaced by another form of class society. As the experience of Bolshevik tyranny proves beyond doubt, this perspective is the correct one. And that perspective ensured that during the Russian Revolution the Makhnovists had to encourage free soviets and workers’ self-management, freedom of speech and organisation in order for the revolution to remain socialist (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). In contrast, the Bolsheviks implemented party dictatorship, nationalisation and one-man management while proclaiming this had something to do with socialism. Little wonder Trotsky had such difficulties understanding the obvious truth that Stalinism has nothing to do with socialism.

2 Why did the Marxist theory of the state undermine working class power?

As discussed in section H.3.7, anarchists and Marxists have fundamentally different definitions of what constitutes a state. These different definitions resulted, in practice, to the Bolsheviks undermining real working class power during the Russian Revolution in favour of an abstract “power” which served as little more than a fig-leaf for Bolshevik power.

For anarchists, the state is marked by centralised power in the hands of a few. The state, we argue, is designed to ensure minority
two possibilities — socialism (by definition classless) or a return to capitalism.

Once we see that because of their flawed perspective on what comes after capitalism we understand why, for the Bolsheviks, the means used and institutions created were meaningless. We can see one of the roots for Bolshevik indifference to working class self-management. As Samuel Farber notes that “there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers’ control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.” [Before Stalinism, p. 44] There was no need, for such means had no impact on achieving the ends Bolshevik power had set itself. As we discuss in section 6, such questions of meaningful working class participation in the workplace or the soviets were considered by the likes of Trotsky as fundamentally irrelevant to whether Bolshevik Russia was socialist or whether the working class was the ruling class or not, incredible as it may seem.

So if we accept Marx’s basic schema, then we simply have to conclude that what means we use are, ultimately, irrelevant as there is only one outcome. As long as property is nationalised and a non-capitalist party holds state power, then the basic socialist nature of the regime automatically flows. This was, of course, Trotsky’s argument with regard to Stalinist Russia and why he defended it against those who recognised that it was a new form of class society. Yet it is precisely the rise of Stalinism out of the dictatorship of the Bolsheviks which exposes the limitations in the Marxist schema of historical development.

Simply put, there is no guarantee that getting rid of capitalism will result in a decent society. As anarchists like Bakunin argued against Marx, it is possible to get rid of capitalism while not creating socialism, if we understand by that term a free, classless society of equals. Rather, a Marxist revolution would “concentrate all the powers of government in strong hands, because the very fact that the

This is unsurprising. The Leninist idea that politics of the Bolsheviks had no influence on the outcome of the revolution, that their policies during the revolution were a product purely of objective forces, is unconvincing. The facts of the matter is that people
are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold — they will not occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone who favours centralisation and sees nationalisation as the defining characteristic of socialism will make different decisions than someone who favours decentralising power and sees self-management as the key issue. The former will also create different forms of social organisation based on their perceptions of what "socialism" is and what is "efficient." Similarly, the different forms of social organisation favoured will also impact on how a revolution develops and the political decisions they make. For example, if you have a vision which favours centralised, hierarchical organisation then those placed into a position of power over others within such structures will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

In summary, the ideas in people’s heads matter, including during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. The organisation they create will create specific forms of social relationships which, in turn, will shape the ideas of those subject to them. This means that a centralised, hierarchical system will create authoritarian social relationships and these will shape those within them and the ideas they have in totally different ways than a decentralised, egalitarian system.

Similarly, if Bolshevik policies hastened the alienation of working class people and peasants from the regime which, in turn, resulted in resistance to them then some of the “objective factors” facing Lenin’s regime were themselves the products of earlier political decisions. Unwelcome and unforeseen (at least to the Bolshevik leadership) consequences of specific Bolshevik practices never mechanical or fatalistic, the definition of the dictatorship of the proletariat as a transition period meant that there could be two outcomes of this phase: going forward to socialism, or backsliding to capitalism. The policy of the party would tip the balance.” [Revolution Besieged, p. 364]

Marxists, like Marx, argue that socialism was the society which would come after capitalism. Thus the Bolsheviks had the mindset that whatever they did there was only two possibilities: (their version of) socialism or the restoration of capitalism. However, this is based on a false premise. Is it valid to assume that there is only one possible post-capitalist future, one that, by definition, is classless? If so, then any action or structure could be utilised to fight reaction as after victory there can be only one outcome. However, if there is more that one post-capitalist future then the question of means becomes decisive. If we assume just two possible post-capitalist futures, one based on self-management and without classes and another with economic, social and political power centralised in a few hands, then the means used in a revolution become decisive in determining which possibility will become reality.

If we accept the Marxist theory and assume only one possible post-capitalist system, then all that is required of revolutionary anti-capitalist movements is that they only need to overthrow capitalism and they will wind up where they wish to arrive as there is no other possible outcome. But if the answer no, then in order to wind up where we wish to arrive, we have to not only overthrow capitalism, we have use means that will push us toward the desired future society. As such, means become the key and they cannot be ignored or downplayed in favour of the ends — particularly as these ends will never be reached if the appropriate means are not used.

This is no abstract metaphysical or ideological/theoretical point. The impact of this issue can be seen from the practice of Bolshevism in power. For Lenin and Trotsky, any and all means could and were used in pursuit of their ends. They simply could not see how the means used shaped the ends reached. Ultimately, there was only
this is that the “totality of [the] relations of production constitutes the economic structure of society, the real foundation, on which arises a legal and political superstructure and to which correspond definite forms of social consciousness… At a certain stage of development, the material productive forces of society come into conflict with the existing relations of production or — this merely expresses the same thing in legal terms — with the property relations within the framework of which they have operated hitherto. From forms of development of productive forces these relations turn into their fetters. Then begins an era of social revolution.” [A Contribution to the Critique of Political Economy, pp. 20–1]

Thus slavery was replaced by feudalism, feudalism with capitalism. For Marx, the “bourgeois mode of production is the last antagonistic form of the social process of production” and “the productive forces developing within bourgeois society create also the material conditions for a solution of this antagonism.” [Op. Cit., p. 21] In other words, after capitalism there would be socialism:

“The monopoly of capital becomes a fetter upon the mode of production which has flourished alongside and under it. The centralisation of the means of production and the socialisation of labour reach a point at which they become incompatible with their capitalist integument. The integument is burst asunder. The knell of capitalist private property sounds. The expropriators are expropriated.” [Karl Marx, Capital, vol. 1, p. 929]

Socialism replaces capitalism once the “proletariat seized political power and turns the means of production into state property.” By so doing, “it abolishes itself as proletariat, abolishes all class distinctions and class antagonisms, abolishes also the state as state.” [Engels, The Marx-Engels Reader, p. 713]

Most Marxists subscribe to this schema of historical progress. For example, Tony Cliff noted that, “[f]or Lenin, whose Marxism was and actions, but still flowing from Bolshevik ideology all the same. So, for example, when leading Bolsheviks had preconceived biases against decentralisation, federalism, “petty-bourgeois” peasants, “declasse” workers or “anarcho-syndicalist” tendencies, this would automatically become an ideological determinant to the policies decided upon by the ruling party. While social circumstances may have limited Bolshevik options, these social circumstances were also shaped by the results of Bolshevik ideology and practice and, moreover, possible solutions to social problems were also limited by Bolshevik ideology and practice.

So, political ideas do matter. And, ironically, the very Leninists who argue that Bolshevik politics played no role in the degeneration of the revolution accept this. Modern day Leninists, while denying Bolshevik ideology had a negative on the development of the revolution also subscribe to the contradictory idea that Bolshevik politics were essential for its “success!” Indeed, the fact that they are Leninists shows this is the case. They obviously think that Leninist ideas on centralisation, the role of the party, the “workers’ state” and a host of other issues are correct and, moreover, essential for the success of a revolution. They just dislike the results when these ideas were applied in practice within the institutional context these ideas promote, subject to the pressures of the objective circumstances they argue every revolution will face!

Little wonder anarchists are not convinced by Leninist arguments that their ideology played no role in the rise of Stalinism in Russia. Simply put, if you use certain methods then these will be rooted in the specific vision you are aiming for. If you think socialism is state ownership and centralised planning then you will favour institutions and organisations which facilitate that end. If you want a highly centralised state and consider a state as simply being an “instrument of class rule” then you will see little to worry about in the concentration of power into the hands of a few party leaders. However, if you see socialism in terms of working class managing their own affairs then you will view such developments
as being fundamentally in opposition to your goals and definitely \textbf{not} a means to that end.

So part of the reason why Marxist revolutions yield such anti-working class outcomes is to do with its ideology, methods and goals. It has little to do with the will to power of a few individuals (important a role as that can play, sometimes, in events). In a nutshell, the ideology and vision guiding Leninist parties incorporate hierarchical values and pursue hierarchical aims. Furthermore, the methods and organisations favoured to achieve (their vision of) “socialism” are fundamentally hierarchical, aiming to ensure that power is centralised at the top of pyramidal structures in the hands of the party leaders.

It would be wrong, as Leninists will do, to dismiss this as simply a case of “idealism.” After all, we are talking about the ideology of a ruling party. As such, these ideas are more than just ideas: after the seizure of power, they became a part of the real social situation within Russia. Individually, party members assumed leadership posts in all spheres of social life and started to apply their ideology. Then, overtime, the results of this application ensured that the party could not be done otherwise as the framework of exercising power had been shaped by its successful application (e.g. Bolshevik centralism ensured that all its policies were marked by centralist tendencies, simply because Bolshevik power had become centralised). Soon, the only real instance of power is the Party, and very soon, only the summits of the Party. This cannot help but shape its policies and actions. As Castoriadis argues:

“If it is true that people’s real social existence determines their consciousness, it is from that moment illusory to expect the Bolshevik party to act in any other fashion than according to its real social position. The real social situation of the Party is that of a directorial organ, and its point of view toward this society henceforth is not necessarily the same as the one this society has toward

so we will, by necessity, concrete on the key ones. These are believe in centralisation, the confusion of party power with popular power, the Marxist theory of the state, the negative influence of Engels’ infamous essay “On Authority”, the equation of nationalisation and state capitalism with socialism, the lack of awareness that working class economic power was a key factor in socialism, the notion that “big” was automatically “more efficient,” the identification of class consciousness with supporting the party, how the vanguard party organises itself and, lastly, the underlying assumptions that vanguardism is based on.

Each one of these factors had a negative impact on the development of the revolution, combined they were devastating. Nor can it be a case of keeping Bolshevism while getting rid of some of these positions. Most go to the heart of Bolshevism and could only be eliminated by eliminating what makes Leninism Leninist. Thus some Leninists now pay lip service to workers’ control of production and recognise that the Bolsheviks saw the form of property (i.e., whether private or state owned) as being far more important that workers’ management of production. Yet revising Bolshevism to take into account this flaw means little unless the others are also revised. Simply put, workers’ management of production would have little impact in a highly centralised state ruled over by a equally centralised vanguard party. Self-management in production or society could not co-exist with a state and party power nor with “centralised” economic decision making based on nationalised property. In a nutshell, the only way Bolshevism could result in a genuine socialist society is if it stopped being Bolshevik!

1 How did the Marxist historical materialism affect Bolshevism?

As is well known, Marx argued that history progressed through distinct stages. After his death, this “materialist conception of history” became known as “historical materialism.” The basic idea of
get there are different. Can we be surprised if Marxist means cannot achieve anarchist (i.e. authentic socialist) ends? To his credit, Shachtman acknowledges that post-civil war salvation “required full democratic rights” for all workers, and that this was “precisely what the Bolsheviks ... were determined not to permit.” Sadly he failed to wonder why the democratic principles of the “original program” were only “honoured in the breach” and why “Lenin and Trotsky did not observe them.” The possibility that Bakunin was right and that statism and socialism cannot go together was not raised. ["Introduction" to Trotsky’s Terrorism and Communism, p. xv]

Equally, there is a tendency of pro-Leninists to concentrate on the period between the two revolutions of 1917 when specifying what Bolshevism “really” stood for, particularly Lenin’s book State and Revolution. To use an analogy, when Leninists do this they are like politicians who, when faced with people questioning the results of their policies, ask them to look at their election manifesto rather than what they have done when in power. As we discuss in section 4 of the appendix “What happened during the Russian Revolution?” Lenin’s book was never applied in practice. From the very first day, the Bolsheviks ignored it. After 6 months none of its keys ideas had been applied. Indeed, in all cases the exact opposite had been imposed. As such, to blame (say) the civil war for the reality of “Bolshevik in power” (as Leninists do) seems without substance. Simply put, State and Revolution is no guide to what Bolshevism “really” stood for. Neither is their position before seizing power if the realities of their chosen methods (i.e. seizing state power) quickly changed their perspective, practice and ideology (i.e. shaped the desired ends). Assuming of course that most of their post-October policies were radically different from their pre-October ones, which (as we indicate here) they were not.

With that said, what do anarchists consider the key aspects of Bolshevik ideology which helped to ensure the defeat of the Russian Revolution and had, long before the civil war started, had started its degeneration into tyranny? These factors are many and

As such, means and ends are related and cannot be separated. As Emma Goldman argued, there is “no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual habit and social practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical... The great and inspiring aims of the Revolution became so clouded with and obscured by the methods used by the ruling political power that it was hard to distinguish what was temporary means and what final purpose. Psychologically and socially the means necessarily influence and alter the aims. The whole history of man is continuous proof of the maxim that to divest one’s methods of ethical concepts means to Sink into the depths of utter demoralisation. In that lies the real tragedy of the Bolshevik philosophy as applied to the Russian Revolution. May this lesson not be in vain.” [My Disillusionment in Russia, pp. 260–1]

If this analysis of the anarchists against Bolshevism is true then it follows that the Bolsheviks were not just wrong on one or two issues but their political outlook right down to the core was wrong. Its vision of socialism was flawed, which produced a flawed perspective on the potentially valid means available to achieve it. Leninism, we must never forget, does not aim for the same kind of society anarchism does. As we discussed in section H.3.1, the short, medium and long term goals of both movements are radically different. While both claim to aim for “communism,” what is mean by that word is radically different in details if somewhat similar in
outline. The anarchist ideal of a classless, stateless and free society
is based on a decentralised, participatory and bottom-up premise.
The Leninist ideal is the product of a centralised, party ruled and
top-down paradigm.

This explains why Leninists advocate a democratic-centralist
“Revolutionary Party.” It arises from the fact that their programme
is the capture of state power in order to abolish the “anarchy of the
market.” Not the abolition of wage labour, but its universalisation
under the state as one big boss. Not the destruction of alienated
forces (political, social and economic) but rather their capture by
the party on behalf of the masses. In other words, this section of the
FAQ is based on the fact that Leninists are not (libertarian) commu-
nists; they have not broken sufficiently with Second International
orthodoxy, with the assumption that socialism is basically state
capitalism (“The idea of the State as Capitalist, to which the Social-
Democrat fraction of the great Socialist Party is now trying to reduce
Socialism.” [Peter Kropotkin, The Great French Revolution, vol. 1,
p. 31]). Just as one cannot abolish alienation with alienated means,
so we cannot attack Leninist “means” also without distinguishing
our libertarian “ends” from theirs.

This means that both Leninist means and ends are flawed. Both
will fail to produce a socialist society. As Kropotkin said at the time,
the Bolsheviks “have shown how the Revolution is not to be made.”
[quoted by Berkman, The Bolshevik Myth, p. 75] If applied to-
day, Leninist ideas will undoubtedly fail from an anarchist point
of view while, as under Lenin, “succeeding” from the limited per-
spective of Bolshevism. Yes, the party may be in power and, yes,
capitalist property may be abolished by nationalisation but, no, a
socialist society would be no nearer. Rather we would have a new
hierarchical and class system rather than the classless and free so-
ciety which non-anarchist socialists claim to be aiming for.

Let us be perfectly clear. Anarchists are not saying that Stalin-
ism will be the inevitable result of any Bolshevik revolution. What
we are saying is that some form of class society will result from
any such a revolution. The exact form this class system will take
will vary depending on the objective circumstances it faces, but
no matter the specific form of such a post-revolutionary society it
will not be a socialist one. This is because of the ideology of the
party in power will shape the revolution in specific ways which,
by necessity, form new forms of hierarchical and class exploitation
and oppression. The preferred means of Bolshevism (vanguardism,
statism, centralisation, nationalisation, and so on) will determine
the ends, the ends being not communist anarchism but some kind
of bureaucratic state capitalist society labelled “socialism” by those
in charge. Stalinism, in this perspective, was the result of an inter-
action of certain ideological goals and positions as well as organi-
sational principles and preferences with structural and circumstan-
tial pressures resulting from the specific conditions prevalent at the
time. For example, a Leninist revolution in an advanced western
country would not require the barbaric means used by Stalinism
to industrialise Russia.

This section of the FAQ will, therefore, indicate the key areas
of Bolshevik ideology which, when applied, will undermine any
revolution as they did the Russian. As such, it is all fine and well
for Trotskyist Max Shachtman (like so many others) to argue that
the Bolsheviks had “convert[ed] the expediencies and necessities of
the civil war period into virtues and principles which had never been
part of their original program.” Looking at this “original program”
we can see elements of what was latter to be applied. Rather than
express a divergence it could be argued that it was this that under-
mined the more democratic aspects of their original program. In
other words, perhaps the use of state power and economic nation-
alisation came into conflict with, and finally destroyed, the original
proclaimed socialist principles? And, perhaps, the “socialist” vision
of Bolshevism was so deeply flawed that even attempting to apply
it destroyed the aspirations for liberty, equality and solidarity that
inspired it? For, after all, as we indicated in section H.3.1, the an-
archist and mainstream Marxist visions of socialism and how to
“Of course, the foundation of our regime is the dictatorship of a class. But this in turn ... assumes it is a class that has come to self-consciousness through its vanguard, which is to say, through the party. Without this, the dictatorship could not exist ... Dictatorship is the most highly concentrated function of a class, and therefore the basic instrument of a dictatorship is a party. In the most fundamental aspects a class realises its dictatorship through a party. That is why Lenin spoke not only of the dictatorship of the class but also the dictatorship of the party and, in a certain sense, made them identical.” [Trotsky, The Challenge of the “Left Opposition” (1926–27), pp. 75–6]

Trotsky argued that Stalin’s policies were, in fact, a ploy to substitute the dictatorship of the party apparatus for the dictatorship of the party. Such a substitution, he argued, had its roots in a “disproportion” between the workers and peasants. As long as there was a “proper proportion” between the two and “the advance of democratic methods in the party and working class organisations,” then “the identification of the dictatorship of the class with that of the party is fully and completely justified historically and politically.” Needless to say, Trotsky did not bother to ask how much democracy (of any kind) was possible under a party dictatorship nor how a class could run society or have democratic organisations if subjected to such a dictatorship. For him it was a truism that the “dictatorship of a party does not contradict the dictatorship of the class either theoretically or practically, but is an expression of it.” [Op. Cit., p. 76]

This was no temporary aberration. As indicated in section H.3.8, Trotsky repeated this support for party dictatorship ten years later. This was because it was Bolshevik orthodoxy, as indicated in March 1923 by the Central Committee of the Communist Party when it summarised the lessons gained from the Russian

been implemented then “to free the soviets from the leadership [sic!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves ... Social-Revolutionary-anarchist soviets would serve only as a bridge from the proletarian dictatorship [sic!] to capitalist restoration.” He generalised this example, by pointing to the “experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats.” [Lenin and Trotsky, Kronstadt, p. 90] Modern day Leninists repeat this argument, failing to note that they sound like leftist Henry Kissingers (Kissinger, let us not forget, ensured US aid for Pinochet’s coup in Chile and argued that “I don’t see why we need to stand by and watch a country go communist due to the irresponsibility of its own people”).

Today we have Leninists combining rhetoric about democratic socialism, with elections and recall, with a mentality which justifies the suppression of working class revolt because they are not prepared to stand by and watch a country go capitalist due to the irresponsibility of its own people. Perhaps, unsurprisingly, previously in 1937 Trotsky expressed his support for the “objective necessity” of the “revolutionary dictatorship of a proletarian party” and, two years later, that the “vanguard of the proletariat” must be “armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself.” (see section H.3.8). If only modern day Leninists were as honest!

So the Bolshevik contempt for working class self-government still exists. While few, however, explicitly proclaim the logic of this position (namely party dictatorship) most defend the Bolsheviks implementing this conclusion in practice. Can we not conclude that, faced with the same problems the Bolsheviks faced, these modern day Leninists will implement the same policies? That they will go from party power to party dictatorship, simply because they know better than those who elected them on such matters? That answer seems all too obvious.
As such, the Bolshevik preference for centralised state power and of representative forms of democracy involved the substitution of the party for the class and, consequently, will facilitate the dictatorship over the proletariat when faced with the inevitable problems facing any revolution. As Bakunin put it, a “people’s administration, according to [the Marxists], must mean a people’s administration by virtue of a small number of representatives chosen by the people... [I]t is a deception which would conceal the despotism of a governing minority, all the more dangerous because it appears as a sham expression of the people’s will... [T]he vast majority, the great mass of people, would be governed by a privileged minority... [of] former workers, who would stop being workers the moment they became rulers or representatives, and would then come to regard the whole blue-collar world from governmental heights, and would not represent the people but themselves and their pretensions.” So the Marxist state would be “the reign of the scientific mind, the most aristocratic, despotic, arrogant and contemptuous of all regimes. There will be a new class, a new hierarchy of real of bogus learning, and the world will be divided into a dominant, science-based minority and a vast, ignorant majority. And then let the ignorant masses beware!”

[Michael Bakunin: Selected Writings, p. 268, pp. 268–9 and p. 266]

In summary, Trotsky’s deeply undemocratic justification for appointing officers, like Lenin’s similar arguments for appointing managers, express the logic and reality of Bolshevism far better than statements made before the Bolsheviks seized power and never implemented. Sadly, modern Leninists concentrate on the promises of the election manifesto rather than the grim reality of Bolshevik power and its long standing top-down vision of “democracy.” A vision which helped undermine the revolution and ensure its degeneration into a party dictatorship presiding over a state capitalist economy.

“Workers’ democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions by those bodies immediately under them. It does not, however, imply the freedom to form factional groupings, which are extremely dangerous for the ruling party, since they always threaten to split or fragment the government and the state apparatus as a whole.

“Within a party, which represents a voluntary union of people on the basis of definite ideals and practice, it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers’ Truth and Workers’ Group.” [Trotsky, Op. Cit., p. 408]

As we show in the next section, these groups actually advocated genuine workers’ democracy — that is, they opposed the party’s monopoly of power and supported multi-party elections. Thus Trotsky’s opposition was hardly democratic, defending the practice and concept of “the dictatorship of the party” throughout the 1920s and — correctly! — linking it to Lenin and so Leninist orthodoxy.
mean, the Bolsheviks had changed its meaning to become “party democracy.” Thus Trotsky could talk about “party dictatorship” and “workers’ democracy” without contradiction. As his supporter Max Eastman noted in the mid-1920s, Trotsky was in favour of the “programme of democracy within the party — called ‘Workers’ Democracy’ by Lenin.” This “was not something new or especially devised ... It was part of the essential policy of Lenin for going forward toward the creation of a Communist society — a principle adopted under his leadership at the Tenth Congress of the party, immediately after the cessation of the civil war.” [Since Lenin Died, p. 35] In the words of historian Robert V. Daniels:

“The Opposition’s political ideal was summed up in the slogan ‘workers’ democracy,’ which referred particularly to two documents [from 1921 and 1923] ... Both these statements concerned the need to combat ‘bureaucratism’ and implement party democracy.” [Op. Cit., p. 300]

That this was the case can be seen from the Fourth All-Russian Congress of Trade Unions in 1921:

“At the meeting of delegates who were party members, Tomsky submitted for routine approval a set of theses on the tasks of trade unions. The approval was a matter of form, but an omission was noted, The theses made no reference to the formula of ‘proletarian democracy’ with which the Tenth Congress had tried to assuage the rank and file. Riazanov ... offered an amendment to fill the breach, in language almost identical with the Tenth Congress resolution: ‘The party must observe with special care the normal methods of proletarian democracy, particularly in the trade unions, where most of all the selection of leaders should be done by the organised party

5 What was the effect of the Bolshevik vision of “socialism”?

As we discussed in section H.3.1, anarchists and most Marxists are divided not only by means but also by ends. Simply put, libertarians and Leninist do not have the same vision of socialism. Given this, anarchists are not surprised at the negative results of the Bolshevik revolution — the use of anti-socialist means to attain anti-socialist ends would obviously have less than desirable results.

The content of the Bolshevik vision of “socialism” is criticised by anarchists on two main counts. Firstly, it is a top-down, centralised vision of “socialism.” This can only result in the destruction of working class economic power at the point of production in favour of centralised bureaucratic power. Secondly, for Bolshevism nationalisation, not workers’ self-management, was the key issue. We will discuss the first issue here and the second in the following section.

The Bolshevik vision of “socialism” was inherently centralised and top-down. This can be seen from the organisational schemas and arguments made by leading Bolsheviks before and immediately after the Revolution. For example, we discover Trotsky arguing in March 1918 that workplaces “will be subject to policies laid down by the local council of workmen’s deputies” who, in turn, had “their range of discretion ... limited in turn by regulations made for each class of industry by the boards or bureaux of the central government.” He dismissed Kropotkin’s communalist ideas by saying local autonomy was not “suited to the state of things in modern industrial society” and “would result in endless frictions and difficulties.” As the “coal from the Donets basin goes all over Russia, and is indispensable in all sorts of industries” you could not allow “the organised people of that district [to] do what they pleased with the coal mines” as they “could hold up all the rest of Russia.” [contained in Al Richardson (ed.), In Defence of the Russian Revolution, p. 186]
Lenin repeated this centralised vision in June of that year, arguing that “Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the general production directions and decisions of the centre.” He continued by explicitly arguing that “[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the given industry … would be regional anarchosyndicalism, and not communism.” [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 292]

Thus the Bolshevik economic ideal was centralised and top-down. This is not unsurprising, as Lenin had promised precisely this when the Bolsheviks got into power. As in the Bolshevik party itself, the lower organs were controlled by the higher ones (and as we will discuss, these higher ones were not directly elected by the lower ones). The problems with this vision are many fold.

Firstly, to impose an “ideal” solution would destroy a revolution — the actions and decisions (including what others may consider mistakes) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). Thus real socialisation must proceed from below, reflecting the real development and desires of those involved. Centralisation can only result in replacing socialisation with nationalisation and the elimination of workers’ self-management with hierarchical management. Workers’ again would be reduced to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Secondly, Trotsky seems to think that workers at the base of society would be so unchanged by a revolution that they would hold their fellow workers ransom. And, moreover, that other workers

In “The New Course” (generally accepted as being the first public expression of his opposition to the developing Stalinist regime), he stated that “[w]e are the only party in the country, and in the period of the dictatorship it could not be otherwise.” Moreover, it was “incontestable that factions [within the party] are a scourge in the present situation” and so the party “does not want factions and will not tolerate them.” [The Challenge of the “Left Opposition” (1923–25), p. 78, p. 80 and p. 86] In May 1924, he even went so far as to proclaim that:

“Comrades, none of us wants to be or can be right against the party. In the last analysis, the party is always right, because the party is the sole historical instrument that the working class possesses for the solution of its fundamental tasks. I have already said that nothing would be simpler than to say before the party that all these criticisms, all these declarations, warnings, and protests — all were mistaken from beginning to end. I cannot say so, however, comrades, because I do not think it. I know that no one can be right against the party. It is only possible to be right with the party and through it since history has not created any other way to determine the correct position.” [Op. Cit., p.161]

So his opposition was a loyal one, initially accepting defeats and following party discipline. In fact, he made a great deal of being the true heir of Lenin and so not only did not question Bolshevik orthodoxy but instead championed it in every detail. Hence the limitations of his opposition.

However, confusion creeps into the politics of the “Left Opposition” simply because it used the term “workers’ democracy” a lot. However, a close reading of Trotsky’s argument soon clarifies this issue. Trotsky, following the Communist Party itself and the “Workers’ Opposition”, had simply redefined what “workers’ democracy” meant. Rather than mean what you would expect it would
Trotsky did not even manage that. His opposition was firmly limited to internal reforms to the party which he hoped would result in wider participation in the soviets and trade unions. Just as he did not bother to explain why continuing party dictatorship would reinvigorate the soviets or unions, he did not explain how benevolent dictatorship was possible nor why an economic regime marked by wage-labour (employed by the state rather than capitalists) would not be exploitative. Instead, these positions were simply asserted — for they were, after all, Leninist orthodoxy and had been for some time.

Politically, Trotsky was unashamedly in favour of party dictatorship. Indeed, his basic opposition to Stalinism was because he considered it as the end of that dictatorship by the rule of the bureaucracy. His comments against the “Workers’ Opposition” at the Tenth Party Congress in March 1921 set the tone:

“The ‘workers opposition’ puts forward dangerous slogans which fetishise the principles of democracy. Elections from within the working class were put above the party, as if the party had no right to defend its dictatorship even when this dictatorship was temporarily at odds with the passing feelings of workers’ democracy ... It is essential to have a sense of — so to speak — the revolutionary-historical primacy of the party, which is obliged to hold on to its dictatorship, despite the temporary wavering of the masses ... even of the workers.”

[quoted by Alec Nove, “Trotsky, collectivization and the five year plan,” Socialism, Economics and Development, p. 100]

In April 1923, he stressed that “[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party.” [Leon Trotsky Speaks, p. 158] He was true to his word.

But not as strange as thinking that giving extensive powers to a central body will not produce equally selfish behaviour (but on a wider and more dangerous scale). The basic fallacy of Trotsky’s argument is that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin’s power was derived from the state bureaucracy which ran the economy in its own interests. Not that did not suddenly arise with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, “in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies” and he points to the “not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People’s Commissars of the Northern Region, the Vologda Council of People’s Commissars, and the Petrograd Food Commissariat.” [Before Stalinism, p. 73]

In other words, centralised bodies are not immune to viewing resources as their own property and doing as they please with it. Compared to an individual workplace, the state’s power to enforce its viewpoint against the rest of society is considerably stronger and the centralised system would be harder to control. The requirements of gathering and processing the information required for the centre to make intelligent decisions would be immense, thus provoking a large bureaucracy which would be hard to control and soon become the real power in the state. A centralised body, therefore, effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. If that sounds familiar, it should. It is precisely what did happen in Lenin’s Russia and laid the basis for Stalinism.
Thirdly, to eliminate the dangers of workers’ self-management generating “propertarian” notions, the workers’ have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates bourgeois social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had “pointed out the necessity of recognising the dictatorial authority of single individuals for the pursuit of carrying out the Soviet idea” and even claimed that at that stage “there were no disputes in connection with the question” of one-man management. [quoted by Brinton, Op. Cit., p. 65] While the first claim is true (Lenin argued for one-man management appointed from above before the start of the Civil War in May 1918) the latter one is not true (excluding anarchists, anarcho-syndicalists and Maximalists, there were also the dissent “Left Communists” in the Bolshevik party itself).

Fourthly, centralism was not that efficient. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre: “it seems apparent that many workers themselves ... had now come to believe ... that confusion and anarchy [sic] at the top were the major causes of their difficulties, and with some justification. The fact was that Bolshevik administration was chaotic ... Scores of competitive and conflicting Bolshevik and Soviet authorities issued contradictory orders, often brought to factories by armed Chekists. The Supreme Economic Council... issued dozens of orders and passed countless directives with virtually no real knowledge of affairs.” [William G. Rosenberg, Russian Labour and Bolshevik Power, p. 116] The Bolsheviks, as Lenin had promised, built from the top-down their system of “unified administration” based on the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, Op. Cit., p. 36] This was very centralised and very inefficient (see section 7 for more discussion).

It is indeed the case that since 1919 Trotsky, like Lenin, had been wholeheartedly in favour of the party dictatorship and had opposed all oppositions which raised the need for economic reforms which would increase workers’ control. This did not change in the 1920s but by 1923 even he could not fail to see that something was going wrong. Unsurprisingly, given its blindness to the substantial evidence of degeneration that had grown every greater since 1917, his opposition was by far the weakest politically as it questioned far fewer things. As Cornelius Castoriadis points out:

“From the beginning of 1918 until the banning of factions in March 1921, tendencies within the Bolshevik party were formed that, with farsightedness and sometimes an astonishing clarity, expressed opposition to the Party’s bureaucratic line and to its very rapid bureaucratisation. These were the ‘Left Communists’ (at the beginning of 1918), then the ‘Democratic Centralist’ tendency (1919), and finally the ‘Workers’ Opposition’ (1920–21)... these oppositions were defeated one by one ... The very feeble echoes of their critique of the bureaucracy that can be found later in the (Trotskyist) ‘Left Opposition’ after 1923 do not have the same signification. Trotsky was opposed to the bad policies of the bureaucracy and to the excesses of its power. He never put into question its essential nature. Until practically the end of his life, he never brought up the questions raised by the various oppositions of the period from 1918 to 1921 (in essence: ‘Who manages production?’ and ‘What is the proletariat supposed to do during the ‘dictatorship of the proletariat,’ other than work and follow the orders of ‘its’ party?’).”

[Political and Social Writings, vol. 2, p. 98]

While the “Left Communists” and “Workers’ Opposition” had challenged Lenin’s state capitalist economic policies while upholding the Bolshevik monopoly of power (implicitly or explicitly),
3 What about Trotsky’s “Left Opposition” in the 1920s?

We now turn to what is probably the most famous opposition, namely Trotsky’s “Left Opposition” of 1923–7, for it spawned numerous Trotskyist sects across the globe as well as the second “Fourth International” (the first had been formed in 1922 by council communists from Germany, Holland and Britain, amongst others). Chris Harman (of the UK’s SWP) can be considered typical, arguing that “there was always an alternative to Stalinism. It meant, in the late 1920s, returning to genuine workers’ democracy and consciously linking the fate of Russia to the fate of world revolution.” He asserts that the “historical merit of the “Left Opposition” was that it “did link the question of the expansion of industry with that of working-class democracy and internationalism.” [Bureaucracy and Revolution in Eastern Europe, p. 19] Other Leninists make similar claims. Victor Serge, a member of the “Left Opposition” in Russia and then Trotskyist in exile, stated that its programme was “the reform of the Soviet State by a return to working-class democracy.” [Memoirs of a Revolutionary, p. 256]

Unfortunately, such claims are not true. As Serge himself noted elsewhere, Trotsky may have “ever since 1923 [been] for the renovation of the party through inner party democracy and the struggle against bureaucracy” but “the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late.” [The Serge-Trotsky Papers, p. 201 and p. 181] Here we show that this was, indeed, the case and will concentrate on the 1923 to 1927 period, before it was crushed and all opposition disappeared for decades (for a refutation of similar claims about Trotsky’s opposition to Stalinism which extends into the 1930s, see section 15 of the appendix “Reply to errors and distortions in David McNally’s pamphlet ‘Socialism from Below’”).
this was not part of the Bolshevik vision. At best they were tacked onto this vision as a (very) junior partner (as in 1917) or they were quickly marginalised and then dumped when they had outlived their usefulness in securing Bolshevik power (as in 1918).

While some Leninists like to paint the economic policies of the Bolsheviks in power as being different from what they called for in 1917, the truth is radically different. For example, Tony Cliff of the UK’s “Socialist Workers Party” asserts, correctly, that in April 1918 the “defence of state capitalism constituted the essence of his economic policy for this period.” However, he also states that this was “an entirely new formulation,” which was not the case in the slightest. [Cliff, Op. Cit., p. 69] As Lenin himself acknowledged.

Lenin had always confused state capitalism with socialism. “State capitalism,” he wrote, “is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps.” He argued that socialism “is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.” [The Threatening Catastrophe and how to avoid it, p. 38 and p. 37]

This was in May, 1917. A few months latter, he was talking about how the institutions of state capitalism could be taken over and used to create socialism (see section H.3.12). Unsurprisingly, when defending Cliff’s “new formulation” against the “Left Communists” in the spring of 1918 he noted that he gave his “high appreciation of state capitalism” “before the Bolsheviks seized power.” [Selected Works, vol. 2, p. 636]

And, indeed, his praise for state capitalism and its forms of social organisation can be found in his State and Revolution:

“the post-office [is] an example of the socialist system...
At present... [it] is organised on the lines of a state capitalist monopoly. Imperialism is gradually transforming

the Central Committee, only four managed to return as voting delegates to the next congress.” A similar process was at work in the trade unions. For example, “[w]hen the metalworkers’ union held its congress in May 1921, the Central Committee of the party handed it a list of recommended candidates for the union leadership. The metalworkers’ delegates voted down the party-backed list, but this gesture proved futile: the party leadership boldly appointed their own men to the union offices.” This was “a show of political force” as the union was a centre of the “Workers’ Opposition”. [Daniels, Op. Cit., p. 161 and p. 157]

This repression was practised under Lenin and Trotsky, using techniques which were later used by the Stalinists against Trotsky and his followers. Lenin himself was not above seeking to remove his opponents from the central committee by undemocratic methods. At the Tenth Party Congress he had persuaded Shlyapnikov to be elected to the Central Committee in an attempt to undermine the opposition. A mere “five months later, Lenin was demanding his expulsion for a few sharp words of criticism of the bureaucracy, uttered at a private meeting of a local party cell. If he was looking for a pretext, he could scarcely have picked a weaker one.” [Schapiro, Op. Cit., p. 327]

Lenin failed by only one vote short of the necessary two thirds majority of the Committee.

In summary, the “Workers’ Opposition” vision was limited. Politically, it merely wanted democracy within the party and did not question the party’s monopoly of power. As such, it definitely did not deserve the labels “anarchist” and “syndicalist” which its opponents labelled it. As far as its economic policy goes, it, too, was limited. Its demands for economic democracy were circumscribed by placing it under the control of the communist cells within the trade unions as well as within a typically Marxist centralised economic structure.
This last possibility may explain Lenin’s vitriolic attacks on the “Workers’ Opposition.”

This opposition, like the “Left Communists” of 1918, was ultimately defeated by organisational pressures within the party and state. Victor Serge “was horrified to see the voting rigged for Lenin’s and Zinoviev’s ’majority’” in late 1920. [Memoirs of a Revolutionary, p. 123] Kollantai complained that while officially one and a half million copies of the “Workers’ Opposition” manifesto were published, in fact only 1500 were “and that with difficulty.” [quoted by Schapiro, Op. Cit., p. 291] This applied even more after the banning of factions, when the party machine used state power to break up the base of the opposition in the trade unions as well as its influence in the party:

“Victimisation of supporters of the “Workers’ Opposition” began immediately after the Tenth Party Congress. ‘The struggle,’ as Shlyapnikov later recounted, ‘took place not along ideological lines but by means ... of edging out from appointments, of systematic transfers from one district to another, and even expulsion from the party.’ ... the attack was levelled not for heretical opinions, but for criticism of any kind of party shortcomings. ‘Every member of the party who spoke in defence of the resolution on workers’ democracy [in the party] was declared a supporter of the Workers’ Opposition and guilty of disintegrating the party,’ and was accordingly victimised.” [Schapiro, Op. Cit., pp. 325–6]

Thus “the party Secretariat was perfecting its technique of dealing with recalcitrant individuals by the power of removal and transfer, directed primarily at the adherents of the Workers’ Opposition. (Of the 37 Workers’ Opposition delegates to the Tenth Congress whom Lenin consulted when he was persuading Shlyapnikov and Kutuzov to enter

all trusts into organisations of a similar type ... the mechanism of social management is here already to hand. Overthrow the capitalists ... Our immediate object is to organise the whole of national economy on the lines of the postal system ... It is such a state, standing on such an economic basis, that we need.” [Essential Works of Lenin, pp. 307–8]

Given this, Lenin’s rejection of the factory committee’s model of socialism comes as no surprise (see section 10 of the appendix “What happened during the Russian Revolution?” for more details). As we noted in section H.3.14, rather than promote workers’ control, Lenin effectively undermined it. Murray Bookchin points out the obvious:

“In accepting the concept of worker’s control, Lenin’s famous decree of November 14, 1917, merely acknowledged an accomplished fact; the Bolsheviks dared not oppose the workers at this early date. But they began to whistle down the power of the factory committees. In January 1918, a scant two months after ‘decreeing’ workers’ control, Lenin began to advocate that the administration of the factories be placed under trade union control. The story that the Bolsheviks ‘patiently’ experimented with workers’ control, only to find it ‘inefficient’ and ‘chaotic,’ is a myth. Their ‘patience’ did not last more than a few weeks. Not only did Lenin oppose direct workers’ control within a matter of weeks ... even union control came to an end shortly after it had been established. By the summer of 1918, almost all of Russian industry had been placed under bourgeois forms of management.” [Post-Scarcity Anarchism, pp. 200–1]

Significantly, even his initial vision of workers’ control was hierarchical, centralised and top-down. In the workplace it was to be
exercised by factory committees. The “higher workers’ control bodies” were to be “composed of representatives of trade unions, factory and office workers’ committees, and workers’ co-operatives.” The decisions of the lower bodies “may be revoked only by higher workers’ control bodies.” [quoted by Cliff, Op. Cit., p. 10] As Maurice Brinton notes:

“there [was] … a firm hierarchy of control organs … each Committee was to be responsible to a ‘Regional Council of Workers’ Control’, subordinated in turn to an ‘All-Russian Council of Workers’ Control’. The composition of these higher organs was decided by the Party.

“The trade unions were massively represented in the middle and higher strata of this new pyramid of ‘institutionalised workers’ control.’ For instance the All-Russian Council of Workers’ Control was to consist of 21 ‘representatives’: 5 from the All-Russian Central Executive Committee of the Soviets, 5 from the Executive of the All-Russian Council of Trade Unions, 5 from the Association of Engineers and Technicians, 2 from the Association of Agronomists, 2 from the Petrograd Trade Union Council, 1 from each All-Russian Trade Union Federation numbering fewer than 100,000 members (2 for Federations of over this number)... and 5 from the All-Russian Council of Factory Committees! The Factory Committees often under anarcho-syndicalist influence had been well and truly ‘cut down to size’.” [Op. Cit., p. 18]

As we note in section 10 of the appendix “What happened during the Russian Revolution?”, this was a conscious preference on Lenin’s part. The factory committees had started to federate, creating their own institutional framework of socialism based on the workers own class organisation. Lenin, as he had explained in 1917, favoured using the institutions created by “state capitalism” and

was the lesson — along with party dictatorship — he wished his followers to learn:

“the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... Such is the basic mechanism of the dictatorship of the proletariat, and the essentials of transition from capitalism to communism ... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [Lenin, Op. Cit., vol. 32, p. 21]

In short, the proletariat having economic power would undermine “the dictatorship of the proletariat”:

“To govern you need an army of steeled revolutionary Communists. We have it, and it is called the Party. All this syndicalist nonsense about mandatory nominations of producers must go into the wastepaper basket. To proceed on those lines would mean thrusting the Party aside and making the dictatorship of the proletariat in Russia impossible.” [Lenin, Op. Cit., p. 21]

In summary, like the “Left Communists”, the “Workers’ Opposition” presented a platform of economic and internal party reforms rooted in the assumption of Bolshevik party domination. Such a policy would be too contradictory to be applied: either the economic reforms would remain a dead letter under party control or the economic reforms would provoke demands for political change.
But we are against it. Why? For a basic reason, to preserve the party’s dictatorship, and for subordinate reasons: management would be inefficient.” [quoted by Alec Nove, “Trotsky, collectivization and the five year plan,” Socialism, Economics and Development, p. 100] In terms of his “subordinate” reason, it should suffice to note the waste and inefficiency in the economy which occurred after he and Lenin imposed “one-man management” and the “militarisation of labour” (see section H.6.2).

It should be stressed that this opposition and the debate it provoked occurred after the end of the Civil War. The Whites under Wrangel had been defeated in November 1920 and the Russian revolution was no longer in immediate danger. As such, there was an opportunity for constructive activity and mass participation in the rebuilding of Russia. The leading Bolsheviks rejected such demands, even in the limited form advocated by the “Workers’ Opposition”. Lenin and Trotsky clearly saw any working class participation as a danger to their power. Against the idea of economic participation under Communist control raised by the “Workers’ Opposition”, the leading Bolsheviks favoured the New Economic Policy (NEP). This was a return to the same kind of market-based “state capitalist” strategy Lenin had advocated against the “Left Communists” before the outbreak of the civil war in May 1918 (and, as noted, he had argued for in 1917). This shows a remarkable consistency in Lenin’s thoughts, suggesting that claims the policies he advocated and implemented in power were somehow the opposite of what he “really” wanted are weak.

As with the “Left Communists” of 1918, Lenin saw his opposition to the “Workers’ Opposition” as reflecting the basic ideas of his politics. “If we perish,” he said privately at the time according to Trotsky, “it is all the more important to preserve our ideological line and give a lesson to our continuators. This should never be forgotten, even in hopeless circumstances.” [quoted by Daniels, Op. Cit., p. 147] Thus the opposition to even limited economic democracy simply tacked on a form of “workers’ control” distinctly at odds with the popular usage of the expression. He rejected the suggestions of factory committees themselves. The Supreme Economic Council, established by the Soviet government, soon demonstrated how to really mismanage the economy.

As such, the economic developments proposed by Lenin in early 1918 and onwards were not the result of the specific problems facing the Russian revolution. The fact is while the dire problems facing the Russian revolution undoubtedly made many aspects of the Bolshevik system worse, they did not create them. Rather, the centralised, bureaucratic and top-down abuses Leninists like to distance themselves from where, in fact, built into Lenin’s socialism from the start. A form of socialism Lenin and his government explicitly favoured and created in opposition to other, authentically proletarian, versions.

The path to state capitalism was the one Lenin wanted to trend. It was not forced upon him or the Bolsheviks. And, by re-introducing wage slavery (this time, to the state) the Bolshevik vision of socialism helped undermine the revolution, workers’ power and, sadly, build the foundations of Stalinism.

6 How did Bolshevik preference for nationalisation affect the revolution?

As noted in the last section, unlike anarchism, for Bolshevism nationalisation, not workers’ self-management, was the key issue in socialism. As noted in section 3, Lenin had proclaimed the necessity for appointed one-man managers and implementing “state capitalism” in April 1918. Neither policy was thought to harm the socialist character of the regime. As Trotsky stressed in 1920, the decision to place a manager at the head of a factory instead of a workers’ collective had no political significance:
“It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers and not at all in the form in which individual economic organisations are administered.” [Terrorism and Communism, p. 162]

Nor was this considered a bad thing or forced upon the Bolsheviks as a result of terrible circumstances. Quite the reverse: “I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.” [Op. Cit., pp. 162–3] As discussed in the previous section, this evaluation fits perfectly into Bolshevik ideology and practice before and after they seized power. One can easily find dozens of quotations from Lenin expressing the same idea.

Needless to say, Trotsky’s “collective will of the workers” was simply a euphemism for the Party, whose dictatorship over the workers Trotsky glibly justified:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no sub-

the Party’s efforts and raised hopes among the workers which could only be disappointed. But, most important, the demands of the Workers’ Opposition were revolutionary in a wrong (anarcho-syndicalist) way. This was the ultimate anathema.” [Op. Cit., p. 79]

For Lenin, the idea of industrial democracy was a nonsense. In this he was simply repeating the perspective he had held from the spring of 1918. As he put it, it was “a term that lends itself to misinterpretations. It may be read as a repudiation of dictatorship and individual authority.” Industry, he argued, “is indispensable, democracy is not” and “on no account must we renounce dictatorship either.” Indeed, “[i]ndustry is indispensable, democracy is a category proper only to the political sphere”. He did admit “[t]hat [the opposition] has been penetrating into the broad masses is evident”, however the “bidding for or flirtation with the non-Party masses” was a “radical departure from Marxism.” “Marxism teaches,” he stressed, “and this tenet has not only been formally endorsed by the whole Communist International in the decisions of the Second (1920) Congress of the Comintern on the role of the political party of the proletariat, but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat .... that alone will be capable of withstanding the inevitable petty-bourgeois vacillation of this mass ... Without this the dictatorship of the proletariat is impossible.” [Collected Works, vol. 31, p. 82, p. 27, p. 26, p. 197 and p. 246] In other words, “Marxism” teaches that workers’ democracy and protest (the only means by which “vacillation” can be expressed) is a danger to the “dictatorship of the proletariat” — see section H.5.3 on why this position is the inevitable outcome of vanguardism.

In a way, Lenin was correct for economic democracy combined with political dictatorship would be a contradiction. Trotsky recognised this contradiction at the Tenth Congress when attacking the “Workers’ Opposition”: “Formally speaking this [the creation of factory committees] is indeed the clearest line of workers’ democracy.
industry’, and not only the ‘appointments method’, which has been
the prevailing one up to now, but all ‘appointments’, that is, in the
last analysis, repudiating the Party’s leading role in relation to the
non-Party masses. We must combat the syndicalist deviation, which
will kill the Party unless it is entirely cured of it.” Indeed, “syndicalist
deviation … leads to the collapse of the dictatorship of the proletariat.”
[Collected Works, Vol. 32, p. 53 and p. 86] Maurice Brinton cor-
correctly notes that by this Lenin meant that “working class power (‘the
dictatorship of the proletariat’) is impossible if there are militants in
the Party who think the working class should exert more power in
production (‘the syndicalist deviation’).” Moreover, “Lenin here poses
quite clearly the question of ‘power of the Party’ or ‘power of the class.’
He unambiguously opts for the former — no doubt rationalising his
choice by equating the two. But he goes even further. He not only
equates ‘workers power’ with the rule of the Party. He equates it with
acceptance of the ideas of the Party leaders!” [The Bolsheviks and
Workers Control, p. 76]
The “Workers’ Opposition,” asserted Lenin was a “syndicalist
and anarchist deviation” produced partly by “the influx into the
Party of former Mensheviks, and also of workers and peasants who
have not yet fully assimilated the communist world outlook.” Their
ideas on economic reform were “radically wrong in theory, and
represent a complete break with Marxism and communism, with
the practical experience of all semi-proletarian revolutions and of
Significantly, the “basic arguments of the Opposition were not dealt
with in any depth” at the tenth party congress. “What argument —
as distinct from invective — there was, was often confused,” Maurice
Brinton summarises. “For instance, apart from being (a) ‘genuinely
counter-revolutionary’ and (b) ‘objectively counter-revolutionary’,
the Workers’ Opposition was also ‘too revolutionary’. Their demands
were ‘too advanced’ and the Soviet Government still had to concen-
trate on overcoming the masses’ cultural backwardness. According to
Smilga the extreme demands (of the Workers’ Opposition) disrupted
stition at all. The Communists express the fundamen-
tal interests of the working class.” [Op. Cit., p. 109]

While Trotsky’s honesty on this matter is refreshing (unlike his
followers today who hypocritically talk about the “leadership” of
the Bolshevik party) we can say that this was a fatal position to
take. Indeed, for Trotsky any system (including the militarisation
of labour) was acceptable as the key “differences … is defined by
a fundamental test: who is in power?” — the capitalist class or the
proletariat (i.e. the party) [Op. Cit., pp. 171–2] Thus working class
control over their own affairs was of little importance: “The worker
does not merely bargain with the Soviet State; no, he is subordinated
to the Soviet State, under its orders in every direction — for it is his
State.” [Op. Cit., p. 168] This, of course, echoed his own arguments
in favour of appointment (see section 4) and Lenin’s demands for
the “exercise of dictatorial powers by individuals” in the workplace
(see section 3) in early 1918. Cornelius Castoriadis points out the
obvious:

“The role of the proletariat in the new State was thus
quite clear. It was that of enthusiastic and passive citi-
zens. And the role of the proletariat in work and in pro-
duction was no less clear. On the whole, it was the same
as before — under capitalism — except that workers of
‘character and capacity’ [to quote Trotsky] were to be
chosen to replace factory managers who had fled.” [The
Role of the Bureaucracy in the birth of the Bu-
reaucracy, p. 99]

Trotsky’s position, it should be noted, remained consistent.
In the early 1930s he argued (in respect to Stalin’s regime) that
“anatomy of society is determined by its economic relations. So long
as the forms of property that have been created by the October
Revolution are not overthrown, the proletariat remains the ruling
class." [The Class Nature of The Soviet State] Obviously, if
the prime issue is property and not who manages the means of
production (or even “the state”) then having functioning factory-
committees becomes as irrelevant as having democratic soviets
when determining whether the working class is in power or not.

(As an aside, we should not by that surprised that Trotsky could
think the workers were the “ruling class” in the vast prison-camp
which was Stalin’s USSR, given that he thought the workers were the
“ruling class” when he and Lenin headed the Bolshevik party
dictatorship! Thus we have the strange division Leninists make be-
tween Lenin’s dictatorship and Stalin’s (and those of Stalin’s fol-
lowers). When Lenin presides over a one-party dictatorship, breaks
up strikes, bans political parties, bans Bolshevik factions, and impris-
ons and shoots political dissidents these are all regrettable but
necessary steps in the protection of the “proletarian state.” When
Stalin does the exact same thing, a few years later, they are all ter-
rrible examples of the deformation of this same “proletarian state”!)

For anarchists (and other libertarian socialists) this was and is
nonsense. Without workers’ self-management in production, so-
cialism cannot exist. To focus attention of whether individuals own
property or whether the state does is fundamentally a red-herring.
Without workers’ self-management of production, private capital-
ism will simply have been replaced by state capitalism. As one
anarchist active in the factory committee movement argued in Jan-
uary, 1918, it is “not the liberation of the proletariat when many in-
dividual plunders are changed for one very powerful plunder — the
state. The position of the proletariat remains the same.” Therefore,
“[w]e must not forget that the factory committees are the nuclei of
the future socialist order” nor must we forget “that the state ... will
try to maintain its own interests at the expense of the interests of
the workers. There is no doubt that we will be witnesses of a great
conflict between the state power in the centre and the organisations
composed exclusively of workers which are found in the localities.”
He was proved right. Instead of centralised the Bolshevik vision of
mental weakness of the case of the Workers’ Opposition
was that, while demanding more freedom of initiative
for the workers, it was quite content to leave untouched
the state of affairs in which a few hundred thousand im-
posed their will on many millions. ‘And since when have we
been enemies of komitetchina [manipulation and
control by communist party committees], I should like to
know?’ Shlyapnikov asked at the Tenth Party Congress.
He went on to explain that the trade union congress in which, as he and his followers proposed, all control of in-
dustry should be vested would ‘of course’ be composed
of delegates nominated and elected ‘through the party
cells, as we always do.’ But he argued that the local trade
union cells would ensure the election of men qualified
by experience and ability in place of those who are ‘im-
posed on us at present’ by the centre. Kollontai and her
supporters had no wish to disturb the communist party’s
monopoly of political power.” [Leonard Schapiro, The
Origin of the Communist Autocracy, p. 294]

Thus they “sought to preserve the Bolshevik monopoly of power,
condoning the use of terror whenever necessary to accomplish this.
They limited their demands to internal party reforms, and never ad-
vocated sharing political authority with other socialist organisations.”
Indeed, Kollontai “declared that the Workers’ Opposition were among
the first volunteers to go fight the [Kronstadt] rebels”, who had raised
the demand for soviet democracy (see appendix “What was the Kro-
nsstadt Rebellion?” for more information). [Paul Avrich, Kronstadt
1921, pp. 182–3]

Even this extremely limited demand for more economic democ-
ocracy was too much for Lenin. In January 1921, he argued that the
Bolsheviks “have now added to our platform the following: We must
combat the ideological discord and the unsound elements of the op-
position who talk themselves into repudiating all ‘militarisation of
we achieve communism through the workers or over their heads, by
the hands of Soviet officials?” The answer was correct, arguing for
the former and “see[ing] in the unions the managers and cre-
ators of the communist economy.” This would be “a system of
self-activity for the masses” for “the building of Communism can
and must be the work of the toiling masses themselves.” In short: “it
182, p. 200 and p. 199]

Economically, then, the “Workers’ Opposition” had much to re-
commend it for it raised ideas long argued by anarchists. Yet, as with
the “Left Communists”, these positive ideas are undermined by a
typically Marxist centralised institutional framework in which ind-
ustrial unions “elect the central body directing the whole economic
life of the republic.” [Kollontai, Op. Cit., p. 176] As such, the argu-
ments raised in the previous section apply, namely that the cen-
tralised regime within which these ideas would be applied would nullify them and end up producing a new class system around the
bureaucrats such a system requires.

Likewise with their political ideas. The group did not seek actual
workers’ democracy for the “task of the Party at its present crisis” is
to “lend its ear to the healthy class call of the wide working masses”
but “correction of the activity of the Party” meant “going back to
democracy, freedom of opinion, and criticism inside the Party.” The
struggle was “to destroy bureaucracy in the party and replace it by
workers’ democracy”: “for establishing democracy in the party, and
for the elimination of all bureaucracy”. [Kollontai, Op. Cit., p. 172,
p. 192 and p. 197] Its demands were solely concerning the internal
regime of the party, not a call for wider democratic reforms in the
state or society as a whole:

“...The arguments of Kollontai were ... strictly limited in
their appeal to the communist party ... Nor did they in
any form criticise the domination of the communist mi-
nority over the majority of the proletariat. The funda-
state capitalism, the anarchists argued that factory committees “be
united on the basic of federalism, into industrial federations ... [and]
poly-industrial soviets of national economy.” Only in that way could
real socialism be created. [quoted by Frederick I. Kaplan, Bolshe-
vik Ideology and the Ethics of Soviet Labour, p. 163 and p. 166]
(see section 7 of the appendix “What happened during the Russian
Revolution?” for more on the factory committee movement).

The reason is obvious. It is worth quoting Cornelius Castoriadis
at length on why the Bolshevik system was doomed to failure:

“So we end up with the uncontested power of managers
in the factories, and the Party’s exclusive ‘control’ (in
reality, what kind of control was it, anyway?). And there
was the uncontested power of the Party over society,
without any control. From that point on, nobody could
prevent these two powers from merging, could anyone
stop the two strata embodying them from merging, nor
could the consolidation of an irremovable bureaucracy
ruling over all sectors of social life be halted. The process
may have been accelerated or magnified by the entry of
non-proletarian elements into the Party, as they rushed
to jump on the bandwagon. But this was a consequence,
and not a cause, of the Party’s orientation ...

“Who is to manage production ...? ... the correct answer
[is] the collective organs of labouring people. What the
party leadership wanted, what it had already imposed —
and on this point there was no difference between Lenin
and Trotsky — was a hierarchy directed from above. We
know that this was the conception that triumphed. We
know, too, where this ‘victory’ led ...

“In all Lenin’s speeches and writings of this period, what
recurs again and again like an obsession is the idea that
Russia ought to learn from the advanced capitalist coun-
tries; that there are not a hundred and one different ways
of developing production and labour productivity if one wants to emerge from backwardness and chaos; that one must adopt capitalist methods of ‘rationalisation’ and management as well as capitalist forms of work ‘incentives.’ All these, for Lenin, are just ‘means’ that apparently could freely be placed in the service of a radically different historical end, the building of socialism.

“Thus Trotsky, when discussing the merits of militarism, came to separate the army itself, its structure and its methods, from the social system it serves. What is criticised in bourgeois militarism and in the bourgeois army, Trotsky says in substance, is that they are in the service of the bourgeoisie. Except for that, there is nothing in them to be criticised. The sole difference, he says, lies in this: ‘Who is in power?’ Likewise, the dictatorship of the proletariat is not expressed by the ‘form in which individual economic enterprises are administered.’

“The idea that like means cannot be placed indifferently into the service of different ends; that there is an intrinsic relationship between the instruments used and the result obtained; that, especially, neither the army nor the factory are simple ‘means’ or ‘instruments,’ but social structures in which are organised two fundamental aspects of human relations (production and violence); that in them can be seen in condensed form the essential expression of the type of social relations that characterise an era — this idea, though perfectly obvious and banal for Marxists, was totally ‘forgotten.’ It was just a matter of developing production, using proven methods and structures. That among these ‘proofs’ the principal one was the development of capitalism as a social system and that a factory produces not so much cloth or steel but proletariat and capital were facts that were utterly ignored.

Should we be surprised that such techniques should be utilised within the party when necessary? Ultimately, as well as exposing how Lenin’s economic ideas helped build the bureaucratic state capitalism Stalinism was born from, the saga of the “Left Communists” shows how the polemical and organisational techniques of Stalinism also did not fall from the sky.

2 What were the limitations of the “Workers’ Opposition” of 1920?

The next major group of party dissidents were the “Workers’ Opposition” of late 1920 and early 1921 (not to be confused with the opposition of actual workers to the regime — see section H.6.3). Lead by Alexandra Kollontai and Alexander Shlyapnikov, this grouping is better known than other early oppositions simply because it was the focus for much debate at the tenth party congress in March 1921 and its existence was a precipitating factor in the banning of factions within the Communist Party. Also, the manifesto Kollontai wrote for the group was translated by council communists in Britain and elsewhere.

Unlike the “Left Communists” (see the last section), their support for party dictatorship was more than logically implied, it was taken for granted. Their manifesto fails to mention political democracy at all, instead discussing exclusively economic and party democracy. Thus it was expressing the “basis on which, in its opinion, the dictatorship of the proletariat must rest in the sphere of industrial reconstruction”, for the “whole controversy boils down to one basic question: who shall build the communist economy, and how shall it be build?” [Selected Writings of Alexandra Kollontai, p. 161 and p. 173]

Kollontai was right to state that the working class “can alone be the creator of communism” and to ask the question of “shall over the masses of the proletariat.” [Collected Works, Vol. 12, pp. 424–5 and p. 427]
Indeed, "[s]oon after the party congress had approved the peace [of Brest-Litovsk in the spring of 1918], a Petrograd city party conference produced a majority for Lenin. It ordered the suspension of the newspaper Kommunist which had been serving as a Left Communist organ ... The fourth and final issue of the Moscow Kommunist had to be published as a private factional paper rather than as the official organ of a party organisation." Ultimately, "[u]nder the conditions of party life established by Lenin, defence of the Opposition position became impossible within the terms of Bolshevik discipline." [Daniels, Op. Cit., p. 88 and p. 89] So much for faction rights — three years before they were officially prohibited in the 10th Party Congress!

In addition, the “Left Communists” were not defeated by those with superior ideas winning the debate. Rather, Lenin’s arguments “evinced caricatured distortion of their positions, evasiveness, and bitter invective more than principled confrontation and clarification of opposing positions.” For example, "[b]y selectively quoting Osinsky’s article so as to make it appear that the Left Communist opposed all labour discipline, he was able to avoid confronting their concrete proposals for work norms and self-discipline by democratically elected workers organisations.” Lenin “caricatured” other ideas, so "[c]ompletely misrepresenting" them while in other cases “not a word” was uttered in reply to their critique. [Carmen Sirianni, Workers Control and Socialist Democracy, pp. 149–50] A similar response befell the other oppositions discussed here — whether under Lenin or under Stalin.

In this, though, Lenin was hardly being original. In May 1907 Lenin had defended himself within the party for the rhetoric he had used against a group of Mensheviks, arguing that the “wording is calculated to evoke in the reader hatred, aversion and contempt ... Such wording is calculated not to convince, but to break up the ranks of the opponent ... to destroy him ... to evoke the worse thoughts, the worst suspicions about the opponent.” This was part of a struggle to “struggle to destroy the hostile organisation, destroy its influence

“Obviously, behind this ‘forgetfulness’ is hidden something else. At the time, of course, there was the desperate concern to revive production as soon as possible and to put a collapsing economy back on its feet. This preoccupation, however, does not fatally dictate the choice of ‘means.’ If it seemed obvious to Bolshevik leaders that the sole effective means were capitalist ones, it was because they were imbued with the conviction that capitalism was the only effective and rational system of production. Faithful in this respect to Marx, they wanted to abolish private property and market anarchy, but not the type of organisation capitalism had achieved at the point of production. They wanted to modify the economy, not the relations between people at work or the nature of labour itself.

“At a deeper level still, their philosophy was to develop the forces of production. Here too they were the faithful inheritors of Marx — or at least one side of Marx, which became the predominant one in his mature writings. The development of the forces of production was, if not the ultimate goal, at any rate the essential means, in the sense that everything else would follow as a by-product and that everything else had to be subordinated to it...

“To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The ‘need’ for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the ‘need’ for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and, in the final analy-
sis, they play an enormous role — the Bolshevik ideology
(and with it, the Marxist ideology lying behind it) was a
decisive factor in the birth of the Russian bureaucracy.”

Therefore, we “may therefore conclude that, contrary to the pre-
vailing mythology, it was not in 1927, or in 1923, or even in 1921 that
the game was played and lost, but much earlier, during the period
from 1918 to 1920... [1921 saw] the beginning of the reconstruction
of the productive apparatus. This reconstruction effort, however,
was already firmly set in the groove of bureaucratic capitalism.” [Op. Cit.,
p. 99] In this, they simply followed the economic ideas Lenin had
expounded in 1917 and 1918, but in an even more undemocratic
way. Modern-day Leninism basically takes the revolutionised Rus-
ia of the Bolsheviks and, essentially, imposes upon it a more demo-
cratic form of government rather than Lenin’s (and then Stalin’s).
Anarchists, however, still oppose the economy.

Ironically, proof that libertarians are right on this issue can be
found in Trotsky’s own work. In 1936, he argued that the “demo-
ibilisation of the Red Army of five million played no small role in the
formation of the bureaucracy. The victorious commanders assumed
leading posts in the local Soviets, in economy, in education, and they
persistently introduced everywhere that regime which had ensured
success in the civil war. Thus on all sides the masses were pushed
away gradually from actual participation in the leadership of the
country.” [The Revolution Betrayed] Needless to say, he failed
to note who had abolished the election of commanders in the Red
Army in March 1918, namely himself (see section 4). Similarly, he
failed to note that the “masses” had been “pushed... from actual
participation in the leadership of the country” well before the end of
the civil war and that, at the time, he was not concerned about it.
Equally, it would be churlish to note that back in 1920 he thought
that ”Military’ qualities... are valued in every sphere. It was in this
sense that I said that every class prefers to have in its service those of
utilisation of labour.” [quoted by Silvana Malle, The Economic
Organization of War Communism 1918–1921, p. 297] Like
other Marxists, they seemed unaware of the bureaucracy needed
to gather and process the necessary (overwhelming) data to create
a plan as well as the means of implementing it. As we discuss in
section H.3.13, such a system would be the very state-capitalism
the “Left Communists” correctly railed against: “we are by every
means — by nationalisation, by centralisation — strangling the forces
in our country. The masses are being cut off from living creative
power in all branches of our national economy.” [Lomov, quoted by
Carmen Sirianni, Workers Control and Socialist Democracy,
p. 155] Combine this with the privileged role of the party and
all the conditions were there to ensure a similar outcome to that
created by the Leninist mainstream — even if, ironically, the “Left
Communists” were the most vocal in denouncing the inevitable
bureaucratic inefficiencies and abuses of the centralised system
they both shared.

Finally, how this conflict within the party was resolved is signif-
ificant, given that the banning of factions (which is generally seen
as a key cause in the rise of Stalinism) occurred in 1921 (a ban, in-
cidentally. Trotsky defended throughout the early 1920s). As one
historian notes:

“The resolution of the party controversy in the spring of
1918 set a pattern that was to be followed throughout the
history of the Communist Opposition in Russia. This was
the settlement of the issues not by discussion, persuasion,
or compromise, but by a high-pressure campaign in the
party organisations, backed by a barrage of violent in-
vective in the party press and in the pronouncements of
the party leaders. Lenin’s polemics set the tone, and his
organisational lieutenants brought the membership into
line.” [Daniels, Op. Cit., p. 87]
they disagreed regarding the role it was to play in the transition period — the Communists ascribed to it a vital role — both sought its ultimate extinction. Rather, what fundamentally divided them was that Communists were convinced that only a centrally-planned economy, in which large-scale production was predominant, would be able to provide the material basis of abundance, on which alone socialism could be founded.” [Kowalski, Op. Cit., p. 111]

Ignoring the awkward anarchist advocate no such thing — see section I.3.8 — we will simply note that this typically Marxist position would lead to a new class system. So while Osinskii argued that workplaces would be run by boards elected by workers, but not composed of a majority of workers employed in a given enterprise, these would elect regional economic councils, which in turn would create a central economic council and it is the higher bodies which would have the power to affirm or veto those bodies below them: “in the final analysis the authorities at the lower levels would have to be overridden. Osinskii and his fellow-thinkers were compelled to assign the ultimate power of economic decision making to the centre, as their conception of the economics of socialism demanded.” In short, they “did not comprehend that their conception of central planning was incompatible with the devolution of authority to the shop floor that they aspired to” and so it is hard not to conclude that the “ideological preconceptions of the Left Communists would have spawned a centralised, bureaucratic system, not an emancipated society in which power was diffused to the workers.” [Kowalski, Op. Cit., p. 113, p. 186 and p. 188]

This is unsurprising, given the fact that the “Left Communists” were Marxists, with a vision of socialism inherited from Marx based on a centralised plan. Thus we find Osinskii in 1918 defining his vision as “state socialism, i.e. a centralised system of socialised production, monopolised product distribution and planned its members who, other things being equal, have passed through the military school … This experience is a great and valuable experience. And when a former regimental commissary returns to his trade union, he becomes not a bad organiser.” [Terrorism and Communism, p. 173]

In 1937 Trotsky asserted that “liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repres-
sions, meant an upheaval of social relations in the interests of the masses, whereas Stalin’s Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority.” [Trotsky, Stalinism and Bolshevism] Yet Stalin’s “upheaval” was built upon the social relations created when Lenin and Trotsky held power. State ownership, one-man management, and so on where originally advocated and implemented by Lenin and Trotsky. The bureaucracy did not have to expropriate the working class economically — “real” Bolshevism had already did so. Nor can it be said that the social relations associated with the political sphere had fundamentally changed under Stalin. He had, after all, inherited the one-party state from Lenin and Trotsky. In a nutshell, Trotsky is talking nonsense.

Simply put, as Trotsky himself indicates, Bolshevik preference for nationalisation helped ensure the creation and subsequent rise of the Stalinist bureaucracy. Rather than be the product of terrible objective circumstances as his followers suggest, the Bolshevik state capitalist economic system was at the heart of their vision of what socialism was. The civil war simply brought the underlying logic of vision into the fore.

7 How did Bolshevik preference for centralism affect the revolution?

The next issue we will discuss is centralisation. Before starting, it is essential that it be stressed that anarchists are not against co-ordinated activity and organisation on a large scale. Anarchists
stress the need for federalism to meet the need for such work (see section A.2.9, for example). As such, our critique of Bolshevik centralism is not a call for “localism” or isolation (as many Leninists assert). Rather, it is a critique of how the social co-operation essential for society will be conducted. Will it be in a federal (and so bottom-up) way or will it be in a centralised (and so top-down) way?

It goes almost without saying that Bolshevik ideology was centralist in nature. Lenin repeatedly stressed the importance of centralisation, arguing constantly that Marxism was, by its very nature, centralist (and top-down — section H.3.3). Long before the revolution, Lenin had argued that within the party it was a case of “the transformation of the power of ideas into the power of authority, the subordination of lower Party bodies to higher ones.” [Collected Works, vol. 7, p. 367] Such visions of centralised organisation were the model for the revolutionary state. In 1917, he repeatedly stressed that after it the Bolsheviks would be totally in favour of “centralism” and “strong state power.” [Lenin, Selected Works, vol. 2, p. 374] Once in power, they did not disappoint.

Anarchists argue that this prejudice in favour of centralisation and centralism is at odds with Leninist claims to be in favour of mass participation. It is all fine and well for Trotskyist Tony Cliff to quote Lenin arguing that under capitalism the “talent among the people” is “merely suppressed” and that it “must be given an opportunity to display itself” and that this can “save the cause of socialism,” it is something else for Lenin (and the Leninist tradition) to favour organisational structures that allow that to happen. Similarly, it is fine to record Lenin asserting that “living, creative socialism is the product of the masses themselves” but it is something else to justify the barriers Leninist ideology placed in the way of it by its advocacy of centralism. [quoted by Tony Cliff, Lenin, vol. 3, p. 20 and p. 21]

The central contradiction of Leninism is that while it (sometimes) talks about mass participation, it has always prefers an or-

An economic democracy combined with what amounts to a party dictatorship would be an impossibility that could never work in practice.

As such, the fact that Bukharin (one time “Left Communist”) “continued to eulogise the party’s dictatorship, sometimes quite unabashedly” during and after the civil war becomes understandable. In this, he was not being extreme but rather expressing the orthodoxy, for “Bolsheviks no longer bothered to disclaim that the dictatorship of the proletariat was the ‘dictatorship of the party’” for “class immaturity was not a peculiarity of the Russian proletariat, but a characteristic of proletarian revolutions in general.” [Stephen F. Cohen, Bukharin and the Bolshevik Revolution, p. 145 and p. 142]

So by 1921, all the leading Bolsheviks had argued this position for some time (see section H.1.2, for example). Bukharin even went so far as to argue that “the watchword” taken up by some workers (“even metal workers”) of “For class dictatorship, but against party dictatorship!” showed that the proletariat “was declassed.” This also indicated that a “misunderstanding arose which threatened the whole system of the proletarian dictatorship.” [contained in Al Richardson (ed.), In Defence of the Russian Revolution, p. 192] The echoes of the positions argued before the civil war can be seen in Bukharin’s glib comment that proletarian management of the revolution meant the end of the “proletarian” dictatorship!

Thirdly, while correctly stressing the need for workers’ management and participation the “Left Communists” placed it within a centralised institutional context which nullified it. Incorrectly proclaiming that anarchists aimed at turning all workplaces into the property of their workforce, the “Left Communists” argued for a typically Marxist (centralised) alternative:

“It was Bukharin who developed this theme most cogently. In the final analysis, the basic distinction between Communists and Anarchists, he argued, was not their attitude to the state and its power. While
“Ultimately, the only criterion that they appeared able to offer was to define ‘proletarian’ in terms of adherence to their own policy prescriptions and ‘non-proletarian’ by non-adherence to them. In consequence, all who dared to oppose them could be accused either of being non-proletarian, or at the very least suffering from some form of ‘false consciousness’ — and in the interests of building socialism must recant or be purged from the party. Rather ironically, beneath the surface of their fine rhetoric in defence of the soviets, and of the party as ‘a forum for all of proletarian democracy,’ there lay a political philosophy that was arguably as authoritarian as that of which they accused Lenin and his faction.” [Kowalski, Op. Cit., pp. 136–7]

“According to the “Left Communists”, therefore,” notes Richard Sakwa, “the party was the custodian of an interest higher than that of the soviets. Earlier theoretical considerations on the vanguard role of the party, developed in response to this problem, were confirmed by the circumstances of Bolshevism in power. The political dominance of the party over the soviets encouraged an administrative one as well. Such a development was further encouraged by the emergence of a massive and unwieldy bureaucratic apparatus in 1918 ... The “Left Communists” and the party leadership were therefore in agreement that ... the party should play a tutelary role over the soviets.” Furthermore, “[w]ith such a formulation it proved difficult to maintain the vitality of the soviet plenum as the soviet was controlled by a party fraction, itself controlled by a party committee outside the soviet.” [Op. Cit., p. 182 and p. 182–3]

This position can be traced back to the fundamentals of Bolshevism (see section H.5 on vanguardism). With this ideological preference for party power and the ideological justification for ignoring soviet democracy, it is doubtful that their (correct) commitment to workers’ economic self-management would have been successful.

Organisational form (centralism) which hinders, and ultimately destroys, the participation that real socialism needs.

That centralism works in this way should come as no surprise. After all, it based on centralising power at the top of an organisation and, consequently, into a few hands. It was for this precise reason that every ruling class in history has utilised centralisation against the masses. As we indicated in section B.2.5, centralisation has always been the tool of minority classes to disempower the masses. In the American and French revolutions, centralisation of state power was the means used to destroy the revolution, to take it out of the hands of the masses and concentrate it into the hands of a minority. In France:

“From the moment the bourgeoisie set themselves against the popular stream they were in need of a weapon that could enable them to resist pressure from the bras nus [working people]; they forced one by strengthening the central power ... [This was] the formation of the state machinery through which the bourgeoisie was going to enslave the proletariat. Here is the centralised state, with its bureaucracy and police ... [it was] a conscious attempt to reduce ... the power of the people.” [Daniel Guerin, Class Struggle in the First French Republic, p. 176]

The reason is not hard to understand — mass participation and class society do not go together. Thus, “the move towards bourgeois dictatorship” saw “the strengthening of the central power against the masses.” [Guerin, Op. Cit., pp. 177–8] “To attack the central power,” argued Kropotkin, “to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more.” [Words of a Rebel, p. 143]
Can we expect a similar concentration of the central power under the Bolsheviks to have a different impact? And, as discussed in appendix “What happened during the Russian Revolution?” we find a similar marginalisation of the working class from its own revolution. Rather than being actively participating in the transformation of society, they were transformed into spectators who simply were expected to implement the decisions made by the Bolsheviks on their behalf. Bolshevik centralisation quickly ensured the disempowerment of working class people. Unsurprisingly enough, given its role in class society and in bourgeois revolutions.

In this section of the FAQ, we will indicate why this process happened, why Bolshevik centralisation undermined the socialist content of the revolution in favour of new forms of oppression and exploitation.

Therefore, anarchists argue, centralism cannot help but generate minority rule, not a classless society. Representative, and so centralised, democracy, argued Malatesta, “substitutes the will of a few for that of all ... and in the name of a fictitious collective interest, rides roughshod over every real interests, and by means of elections and the vote, disregards the wishes of each and everyone.” [Life and Ideas, p. 147]

This is rooted in the nature of the system, for democracy does not mean, in practice, “rule by all the people.” Rather, as Malatesta pointed out, it “would be closer to the truth to say ‘government of the majority of the people.” And even this is false, as “it is never the case that the representatives of the majority of the people are in the same mind on all questions; it is therefore necessary to have recourse again to the majority system and thus we will get closer still to the truth with ‘government of the majority of the elected by the majority of the electors.” This, obviously, “is already beginning to bear a strong resemblance to minority government.” And so, “it is easy to understand what has already been proven by universal historical experience: even in the most democratic of democracies it is always a small minority that rules and imposes its will and interests by force.” And so central-

Firstly, by basing themselves on Bolshevik orthodoxy they allowed Lenin to dominate the debate. This meant that their more “libertarian” reading of Lenin’s work could be nullified by Lenin himself pointing to the authoritarian and state capitalist aspects of those very same works. Which is ironic, as today most Leninists tend to point to these very same democratic sounding aspects of Lenin’s ideas while downplaying the more blatant anti-socialist ones. Given that Lenin had dismissed such approaches himself during the debate against the “Left Communists” in 1918, it seems dishonest for his latter day followers to do this.

Secondly, their perspective on the role of the party undermined their commitment to true workers’ power and freedom. This can be seen from the comments of Sorin, a leading member of the group, who argued that the “Left Communists” were “the most passionate proponents of soviet power, but ... only so far as this power does not degenerate ... in a petty-bourgeois direction.” [quoted by Ronald I. Kowalski, The Bolshevik Party in Conflict, p. 135] For them, like any Bolshevik, the party played the key role for it was the only true bastion of the interests of the proletariat and, as such, the party “is in every case and everywhere superior to the soviets ... The soviets represent labouring democracy in general; and its interest, in particular the interests of the petty bourgeois peasantry, do not always coincide with the interests of the proletariat.” [quoted by Richard Sakwa, Soviet Communists in Power, p. 182]

Thus soviet power was limited to approval of the party line and — as with Lenin — any deviation from that line could be denounced as “petty bourgeois” and, therefore, ignored. “Ironically,” Kowalski summarises, “Sorin’s call for a revived soviet democracy was becoming vitiated by the dominant role assigned, in the final analysis, to the party.” [Op. Cit., p. 136] Thus their politics were just as authoritarian as the mainstream Bolshevism they attacked on other issues:
tion will be set up by the proletariat itself, or they will not be set up at all: something else will be set up — state capitalism.” [quoted by Brinton, The Bolsheviks and Workers’ Control, p. 39]

Lenin reacted sharply, heaping insult upon insult on the “Left Communists” and arguing against their ideas. Rather than see self-management (or even workers’ control) as the key, he argued forcefully that “economically, state capitalism is immeasurably superior to our present economic system.” He linked this with his previous writings, correctly noting his “high appreciation of state capitalism” had been given “before the Bolsheviks seized power” in, amongst other works, his State and Revolution and so it was “significant that [his opponents] did not emphasise this”. For Lenin, “Socialism is inconceivable without large scale capitalist engineering” and “without planned state organisation, which keeps tens of millions of people to the strictest observance of a unified standard in production and distribution.” Thus “our task is to study the state capitalism of the Germans, to spare no effort in copying it and not shrink from adopting dictatorial methods to hasten the copying of it.” [Collected Works, vol. 27, p. 339, p. 341, p. 354, p. 339 and p. 340]

For Lenin, as long as a workers’ party held political power, the working class need not fear “state capitalism” and the lack of economic power at the point of production. Ignoring the awkward fact that it was the Bolsheviks rather than the proletariat who held political power, Lenin failed to realise that without economic power working class political power would be fatally undermined. Unfortunately, Lenin’s arguments carried the day (see section H.3.14) and, in practice, the net effect was simply to hand over the economy to the state bureaucracy and create the social relationships which Stalinism thrived upon. As such, the merit of the “Left Communists” can be seen.

However, the “Left Communists”, while correct on socialism needing workers’ economic self-management, were limited in other ways. The major problems were three-fold.

The Russian Revolution is a striking confirmation of this libertarian analysis. By applying centralism, the Bolsheviks disempowered the masses and concentrated power into the hands of the party leadership. This places power in a distinct social class and subject to the pervasive effects of their concrete social circumstances within their institutional position. As Bakunin predicted with amazing accuracy:

“The falsehood of the representative system rests upon the fiction that the executive power and the legislative chamber issuing from popular elections must, or even can for that matter, represent the will of the people … the instinctive aims of those who govern … are, because of their exceptional position diametrically opposed to the instinctive popular aspirations. Whatever their democratic sentiments and intentions may be, viewing society from the high position in which they find themselves, they cannot consider this society in any other way but that in which a schoolmaster views the pupils. And there can be no equality between the schoolmaster and the pupils… Whoever says political power says domination. And where domination exists, a more or less considerable section of the population is bound to be dominated by others… those who do the dominating necessarily must repress and consequently oppress those who are subject to the domination … [This] explains why and how men who were democrats and rebels of the reddest variety when they were a part of the mass of governed people, became exceedingly moderate when they rose to power. Usually these...
backslidings are attributed to treason. That, however, is an erroneous idea; they have for their main cause the change of position and perspective ... if there should be established tomorrow a government ... made up exclusively of workers, those ... staunch democrats and Socialists, will become determined aristocrats, bold or timid worshippers of the principle of authority, and will also become oppressors and exploiters.” [The Political Philosophy of Bakunin, p. 218]

However, due to the inefficiencies of centralised bodies, this is not the end of the process. Around the new ruling bodies inevitably springs up officialdom. This is because a centralised body does not know what is happening in the grassroots. Therefore it needs a bureaucracy to gather and process that information and to implement its decisions. In the words of Bakunin:

“where is the head, however brilliant it may be, or if one wishes to speak of a collective dictatorship, were it formed of many hundreds of individuals endowed with superior faculties, where are those brains powerful enough and wide-ranging enough to embrace the infinite multiplicity and diversity of the real interests, aspirations, wishes and needs whose sum total constitutes the collective will of a people, and to invent a social organisation can which can satisfy everybody? This organisation will never be anything but a Procrustean bed which the more or less obvious violence of the State will be able to force unhappy society to lie down on... Such a system ... would lead inevitably to the creation of a new State, and consequently to the formation of a governmental aristocracy, that is, an entire class of people, having nothing in common with the mass of people ... [and would] exploit the people and subject oppositions and how the repression of a genuine dissident working class group within the Communist Party shows how deeply unlibertarian and so anti-socialist the real Bolshevik tradition is.

1 Were the “Left Communists” of 1918 an alternative?

The first opposition of note in the party to the Leninist mainstream was that of the “Left Communists” in early 1918. This was clustered around the Bolshevik leader Bukharin and was focused around opposition to the Brest-Litovsk peace treaty with Germany and Lenin’s advocacy of “state capitalism” as the means of both building socialism and getting Russia out of its economic problems. Here we focus of the latter issue, namely their critique of Lenin’s economic policies and its limitations. In addition, we will discuss the flaws in their political ideas.

The first issue of their theoretical journal Kommunist was published in April 1918 and it argued vigorously against Lenin’s advocacy of “one-man management” and “state capitalism” as necessary and immediate steps for the new regime. It warned of “bureaucratic centralisation, the rule of various commissars, the loss of independence for local Soviets and in practice the rejection of the type of state-commune administered from below” if Lenin’s policies were continued to be followed. The second issue saw an article by Osinsky which correctly predicted that “for the construction of the proletarian society by the class creativity of the workers themselves, not by the Ukases of the captains of industry ... If the proletariat itself does not know how to create the necessary prerequisites for the socialist organisation of labour, no one can do this for it and no one can compel it to do this. The stick, if raised against the workers, will find itself in the hands of a social force which is either under the influence of another social class or is in the hands of the soviet power; but the soviet power will then be forced to seek support against the proletariat from another class (e.g. the peasantry) and by this it will destroy itself as the dictatorship of the proletariat. Socialism and socialist organis-
order: go and agitate; but they haven’t the right to elect their own committee, their own organs.

“I then put the question to comrade Lenin: Who will appoint the Central Committee? You see, there can be individual authority here as well. Here also a single commander can be appointed.” [Sapronov, quoted by Daniels, Op. Cit., p. 114]

Obviously a man ahead of his time. As Stalin proved, if “one-man management” was such a good idea then why should it not be practised in the Council of People’s Commissars?

So these oppositions did identify real problems and many of their policies had elements of real solutions within them. Yet, as discussed in section H.3.5, placing certain libertarian ideas within an overall centralised vision or system will not undermine its wider authoritarian nature. Most obviously, the Bolshevik preference (at least before embracing party dictatorship after 1917) for centralised “democracy” effectively hollowed out the real democracy at the base which makes it more than just picking masters and created the structures and social relationships which made further degeneration inevitable — the very problems the oppositions themselves raised but whose real roots evaded them.

Here we indicate the positive ideas of the various oppositions but also indicate their limitations, which flow from the fact these are Bolshevik oppositions and so shared a similar set of prejudices and vision of (centralised) socialism.

Finally, to contrast these fake “oppositions” with a genuine opposition, we will discuss (in section 4) the “Workers’ Group” which was expelled from the Communist Party of 1922–3 and repressed under Lenin and Trotsky. This grouping stood for traditional socialist values, including many of the principles the Bolshevik party claimed to support before it seized power (such as workers’ democracy) and some it did not (such as workers’ self-management of production). We do so to indicate the limited nature of the previous

As the bureaucracy is permanent and controls information and resources, it soon becomes the main source of power in the state. The transformation of the bureaucracy from servant to the master soon results. The “official” government is soon controlled by it, shaping its activities in line with its interests. Being highly centralised, popular control is even more limited than government control — people would simply not know where real power lay, which officials to replace or even what was going on within the distant bureaucracy. Moreover, if the people did manage to replace the correct people, the newcomers would be subject to the same institutional pressures that corrupted the previous members and so the process would start again (assuming their did not come under the immediate influence of those who remained in the bureaucracy).

Consequently, a new bureaucratic class develops around the centralised bodies created by the governing party. This body would soon become riddled with personal influences and favours, so ensuring that members could be sheltered from popular control. As Malatesta argued, they “would use every means available to those in power to have their friends elected as the successors who would then in turn support and protect them. And thus government would be passes to and fro in the same hands, and democracy, which is the alleged government of all, would end up, as usual, in an oligarchy, which is the government of a few, the government of a class.” [Anarchy, p. 34]

This state bureaucracy, of course, need not be dictatorial nor the regime it rules/administers be totalitarian (for example, bourgeois states combine bureaucracy with many real and important liberties). However, such a regime is still a class one and socialism would still not exist — as proven by the state bureaucracies and nationalised property within bourgeois society.
So the danger to liberty of combining political and economic power into one set of hands (the state’s) is obvious. As Kropotkin argued:

“the state was, and continues to be, the chief instrument for permitting the few to monopolise the land, and the capitalists to appropriate for themselves a quite disproportionate share of the yearly accumulated surplus of production. Consequently, while combating the present monopolisation of land, and capitalism altogether, the anarchists combat with the same energy the state, as the main support of that system. Not this or that special form, but the state altogether ... The state organisation, having always been, both in ancient and modern history ... the instrument for establishing monopolies in favour of the ruling minorities, cannot be made to work for the destruction of these monopolies. The anarchists consider, therefore, that to hand over to the state all the main sources of economical life — the land, the mines, the railways, banking, insurance, and so on — as also the management of all the main branches of industry, in addition to all the functions already accumulated in its hands (education, state-supported religions, defence of the territory, etc.), would mean to create a new instrument of tyranny. State capitalism would only increase the powers of bureaucracy and capitalism. True progress lies in the direction of decentralisation, both territorial and functional, in the development of the spirit of local and personal initiative, and of free federation from the simple to the compound, in lieu of the present hierarchy from the centre to the periphery.” [Kropotkin’s Revolutionary Pamphlets, p. 286]

Thus we have the basic argument why centralism will result in the continuation of class society. Does the Bolshevik experience did not have valid points, just that they shared the key assumptions of Bolshevism which undermined the Russian revolution either by their application or their use to justify specific (usually highly authoritarian) practice.

We will not cover all the various oppositions with the Bolshevik party here (Robert V. Daniels’ The Conscience of the Revolution discusses all of them in some detail, as does Leonard Schapiro’s The Origin of the Communist Autocracy). We will concentrate on the “Left Communists” of 1918 (in section 1), the “Workers’ Opposition” of 1920–1 (in section 2) and the Trotsky-led “Left Opposition” of 1923–7 (in section 3). Each opposition is a pale reflection of the one before it and each had clear limitations in their ideas which fatally undermined any liberatory potential they had. Indeed, by the time of the “Left Opposition” we are reduced to simply the more radical faction of the state and party bureaucracy fighting the dominant faction with the aim of securing a benevolent state capitalist dictatorship.

As noted, certain elements of these oppositions were undoubtedly correct. So, for example, the (correct) arguments of the “Left Communists” against Lenin’s policy of “one-man management” were echoed by the “Democratic Centralists” at the Ninth Party Congress (an opposition we do not cover here). One member of this grouping (which included such former “Left Communists” as Osinsky) argued against Lenin’s position in favour of appointed managers inside and outside the party as follows:

“The Central Committee finds that the [local] party committee is a bourgeois prejudice, is conservatism bordering on the province of treason, and that the new form is the replacement of party committees by political departments, the heads of which by themselves replace the elected committees ... You transform the members of the party into an obedient gramophone, with leaders who
Nor can it be said that Trotsky ever appreciated Kropotkin’s “general observation” that “those who preach dictatorship do not in general perceive that in sustaining their prejudice they only prepare the way for those who later on will cut their throats.” [Kropotkin’s Revolutionary Pamphlets, p. 244]

In summary, it cannot be a coincidence that once in power the Bolsheviks acted in ways which had clear links to the political ideology it had been advocating before hand. As such, the Bolshevik aim for party power helped undermine the real power of working class people during the Russian revolution. Rooted in a deeply anti-democratic political tradition, it was ideologically predisposed to substitute party power for soviet power and, finally, to create — and justify — the dictatorship over the proletariat. The civil war may have shaped certain aspects of these authoritarian tendencies but it did not create them.

Were any of the Bolshevik oppositions a real alternative?

As well as the obvious failure of the Russian Revolution (see section H.6), the limitations in Bolshevism can be seen by the various oppositions to the mainstream of that party. That Bolshevik politics are not a suitable instrument for working class self-liberation is expressed in the limited way opposition groups questioned Bolshevik orthodoxy — even in the case of the opposition to the rising Stalinist bureaucracy.

All were based on standard vanguardist positions, as discussed in section H.5, such as a privileged position for the party, reflected in the aim for party power and, inevitably, the Bolshevik monopoly of power. This meant their opposition was focused on seeking reforms in areas which did not question the role and position of the party (such as economic policy) or sought to strengthen it (against the bureaucracy). This does not mean that the various oppositions contradict this analysis? Essentially, it confirms to Kropotkin’s predictions on the uselessness of “revolutionary” government:

“Instead of acting for themselves, instead of marching forward, instead of advancing in the direction of the new order of things, the people confiding in their governors, entrusted to them the charge of taking initiative. This was the first consequence of the inevitable result of elections... Shut up in the city hall, charged to proceed after the forms established by the preceding governments, these ardent revolutionists, these reformers found themselves smitten with incapacity and sterility... but it was not the men who were the cause for this failure — it was the system...

“The will of the bulk of the nation once expressed, the rest would submit to it with a good grace, but this is not how things are done. The revolution bursts out long before a general understanding has come, and those who have a clear idea of what should be done the next day are only a very small minority. The great mass of the people have as yet only a general idea of the end which they wish realised, without knowing much how to advance towards that end, and without having much confidence in the direction to follow. The practical solution will not be found, will not be made clear until the change will have already begun. It will be the product of the revolution itself, of the people in action, — or else it will be nothing, incapable of finding solutions which can only spring from the life of the people... The government becomes a parliament with all the vices of a middle-class parliament. Far from being a ‘revolutionary’ government it becomes the greatest obstacle to the revolution and at last the people find themselves compelled to put it out of the way, to dismiss those that but yesterday they acclaimed as their children.
“But it is not so easy to do so. The new government which has hastened to organise a new administration in order to extend it’s domination and make itself obeyed does not understand giving up so easily. Jealous of maintaining it’s power, it clings to it with all the energy of an institution which has yet had time to fall into senile decay. It decides to oppose force with force, and there is only one means then to dislodge it, namely, to take up arms, to make another revolution in order to dismiss those in whom the people had placed all their hopes.” [Op. Cit., pp. 240–2]

By the spring and summer of 1918, the Bolshevik party had consolidated its power. It had created a new state, marked as all states are by the concentration of power in a few hands and bureaucracy. Effective power became concentrated into the hands of the executive committees of the soviets from top to bottom. Faced with rejection at soviet election after soviet election, the Bolsheviks simply disbanded them and gerrymandered the rest. At the summit of the new state, a similar process was at work. The soviets had little real power, which was centralised in Lenin’s new government. This is discussed in more detail in section 6 of the appendix “What happened during the Russian Revolution?”. Thus centralisation quickly displaced popular power and participation. As predicted by Russia anarchists in November 1917:

“Once their power is consolidated and ‘legalised’, the Bolsheviks – who are Social Democrats, that is, men of centralist and authoritarian action – will begin to rearrange the life of the country and of the people by governmental and dictatorial methods, imposed by the centre. They will dictate the will of the party to all Russia, and command the whole nation. Your Soviets and your other local organisations will become little by

Nor can it be said that the Bolsheviks learned from the experience of the Russian Revolution. This can be seen from Trotsky’s 1937 comments that the “proletariat can take power only through its vanguard. In itself the necessity for state power arises from the insufficient cultural level of the masses and their heterogeneity.” Thus “state power” is required not to defend the revolution against reaction but from the working class itself, who do not have a high enough “cultural level” to govern themselves. At best, their role is that of a passive supporter, for “[w]ithout the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.” While soviets “are the only organised form of the tie between the vanguard and the class” it does not mean that they are organs of self-management. No, a “revolutionary content can be given only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain).”

Sadly, Trotsky failed to explicitly address the question of what happens when the “masses” stop having “confidence in the vanguard” and decides to support some other group. After all, if a “revolutionary content” can only be given by “the party” then if the masses reject the party then the soviets can no only be revolutionary. To save the revolution, it would be necessary to destroy the democracy and power of the soviets. Which is exactly what the Bolsheviks did do in 1918. By equating popular power with party power Bolshevism not only opens the door to party dictatorship, it invites it in, gives it some coffee and asks it to make itself a
any actions necessary to maintain the revolution — even if these actions violated the basic principles required to have any form of meaningful workers’ democracy and freedom. Thus the “dictatorship of the proletariat” had long become equated with party power and, once in power, it was only a matter of time before it became the “dictatorship of the party.” And once this did occur, none of the leading Bolsheviks questioned it. The implications of these Bolshevik perspectives came clear after 1917, when the Bolsheviks raised the need for party dictatorship to an ideological truism.

Thus it seems strange to hear some Leninists complain that the rise of Stalinism can be explained by the rising “independence” of the state machine from the class (i.e. party) it claimed to in service of. Needless to say, few Leninists ponder the links between the rising “independence” of the state machine from the proletariat (by which most, in fact, mean the “vanguard” of the proletariat, the party) and Bolshevik ideology. As noted in section H.3.8, a key development in Bolshevik theory on the state was the perceived need for the vanguard to ignore the wishes of the class it claimed to represent and lead. For example, Victor Serge (writing in the 1920s) considered it a truism that the “party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses … it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences.” [Year One of the Russian Revolution, p. 218]

The problem with this is that, by definition, everyone is backward in comparison to the vanguard party. Moreover, in Bolshevik ideology it is the party which determines what is and is not “proletarian consciousness.” Thus we have the party ideologue presenting self-justifications for party power over the working class. Now, is the vanguard to be able to ignore the masses then it must have power over them. Moreover, to be independent of the masses the machine it relies on to implement its power must also, by defini-

little, simply executive organs of the will of the central government. In the place of healthy, constructive work by the labouring masses, in place of free unification from the bottom, we will see the installation of an authoritarian and statist apparatus which would act from above and set about wiping out everything that stood in its way with an iron hand. The Soviets and other organisations will have to obey and do its will. That will be called ‘discipline.’” [quoted by Voline, The Unknown Revolution, p. 235]

From top to bottom, the new party in power systematically undermined the influence and power of the soviets they claimed to be ensuring the power of. This process had begun, it should be stressed before the start of the civil war in May, 1918. Thus Leninist Tony Cliff is wrong to state that it was “under the iron pressure of the civil war” which forced the Bolshevik leaders “to move, as the price of survival, to a one-party system.” [Revolution Besieged, p. 163] From the summer of 1918 (i.e. before the civil war even started), the Bolsheviks had turned from the first of Kropotkin’s “revolutionary” governments (representative government) to the other, dictatorship, with sadly predictable results.

So far, the anarchist predictions on the nature of centralised revolutionary governments had been confirmed. Being placed in a new social position and, therefore, different social relationships, produced a dramatic revision on the perspectives of the Bolsheviks. They went from being in favour of party power to being in favour of party dictatorship. They acted to ensure their power by making accountability and recall difficult, if not impossible, and simply ignored any election results which did not favour them.

What of the second prediction of anarchism, namely that centralisation will recreate bureaucracy? That, too, was confirmed. After all, some means were required to gather, collate and provide information by which the central bodies made their decisions. Thus
a necessary side-effect of Bolshevik centralism was bureaucracy, which, as is well known, ultimately fused with the party and replaced Leninism with Stalinism. The rise of a state bureaucracy started immediately with the seizure of power by the Bolsheviks. Instead of the state starting to “wither away” from the start it grew:

“The old state’s political apparatus was ’smashed,’ but in its place a new bureaucratic and centralised system emerged with extraordinary rapidity. After the transfer of government to Moscow in March 1918 it continued to expand … As the functions of the state expanded so did the bureaucracy, and by August 1918 nearly a third of Moscow’s working population were employed in offices [147,134 employed in state institutions and 83,886 in local ones. This was 13.7% of the total adult population and 29.6% of the independent population of 846,095]. The great increase in the number of employees … took place in early to mid-1918 and, thereafter, despite many campaigns to reduce their number, they remained a steady proportion of the falling population … At first the problem was dismissed by arguments that the impressive participation of the working class in state structures was evidence that there was no ‘bureaucratism’ in the bureaucracy. According to the industrial census of 31 August 1918, out of 123,578 workers in Moscow, only 4,191 (3.4 percent) were involved in some sort of public organisation … Class composition is a dubious criterion of the level of bureaucratism. Working class participation in state structures did not ensure an organisation against bureaucratism, and this was nowhere more true than in the new organisations that regulated the economic life of the country.” [Richard Sakwa, “The Commune State in Moscow in 1918,” pp. 429–449, Slavic Review, vol. 46, no. 3/4, pp. 437–8]

Ironically, while Bolshevism claims to be the party of the working class, representing it essentially or exclusively, they do so in the name of possessing a theory that, qua theory, can be the possession of intellectuals and, therefore, has to be “introduced” to the working class from outside (see section H.5.1 for details).

This means that Bolshevism is rooted in the identification of “class consciousness” with supporting the party. Given the underlying premises of vanguardism, unsurprisingly the Bolsheviks took “class consciousness” to mean this. If the workers protested against the policies of the party, this represented a fall in class consciousness and, therefore, working class resistance placed “class” power in danger. If, on the other hand, the workers remained quiet and followed the party’s decision then, obviously, they showed high levels of class consciousness. The net effect of this position was, of course, to justify party dictatorship. Which, of course, the Bolsheviks did create and justified ideologically.

Thus the Bolshevik aim for party power results in disempowering the working class in practice. Moreover, the assumptions of vanguardism ensure that only the party leadership is able to judge what is and is not in the interests of the working class. Any disagreement by elements of that class or the whole class itself can be dismissed as “wavering” and “vacillation.” While this is perfectly acceptable within the Leninist “from above” perspective, from an anarchist “from below” perspective it means little more than pseudo-theoretical justification for party dictatorship over the proletariat and the ensuring that a socialist society will never be created. Ultimately, socialism without freedom is meaningless — as the Bolshevik regime proved time and time again.

As such, to claim that the Bolsheviks did not aim to “substitute” party power for working class power seems inconsistent with both Bolshevik theory and practice. Lenin had been aiming for party power from the start, identifying it with working class power. As the party was the vanguard of the proletariat, it was duty bound to seize power and govern on behalf of the masses and, moreover, take
a clash between soviet democracy and party power, the Bolsheviks consistently favoured the latter.

Thus Bolshevik ideology had consistently favoured party power and had a long term ideological preference for it. Combine this aim of party power with a vanguardism position (see section H.5) and party dictatorship will soon result. Neil Harding summarises the issue well:

“There were a number of very basic axioms that lay at the very heart of the theory and practice of Leninism with regard to the party … It was the party that disposed of scientific or objective knowledge. Its analysis of the strivings of the proletariat was, therefore, privileged over the proletariat’s own class goals and a single discernible class will was, similarly, axiomatic to both Marxism and Leninism. Both maintained that it was the communists who alone articulated these goals and this will — that was the party’s principal historical role.

“At this point, Leninism (again faithful to the Marxist original) resorted to a little-noticed definitional conjuring trick — one that proved to be of crucial importance for the mesmeric effect of the ideology. The trick was spectacularly simple and audacious — the class was defined as class only to the extent that it conformed to the party’s account of its objectives, and mobilised itself to fulfil them…. The messy, real proletarians — the aggregation of wage workers with all their diverse projects and aspirations — were to be judged by their progress towards a properly class existence by the party that had itself devised the criteria for the class existence.” [Leninism, pp. 173–4]

This authoritarian position, which allows “socialism” to be imposed by force upon the working class, lies at the core of Leninism.

The “bureaucracy grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between ‘people’ and ‘officials,’ which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about ‘bureaucratic excesses,’ lack of contact with voters, and new proletarian bureaucrats grew louder and louder.” [Oskar Anweiler, The Soviets, p. 242]

Overtime, this permanent collection of bodies would become the real power in the state, with the party members nominally in charge really under the control of an unelected and uncontrolled officialdom. This was recognised by Lenin in the last years of his life. As he noted in 1922:

“Let us look at Moscow … Who is leading whom? The 4,700 responsible Communists the mass of bureaucrats, or the other way round? I do not believe that you can say that the Communists are leading this mass. To put it honestly, they are not the leaders, but the led.” [quoted by Chris Harman, Bureaucracy and Revolution in Eastern Europe, p. 13]

By the end of 1920, there were five times more state officials than industrial workers. 5, 880,000 were members of the state bureaucracy. However, the bureaucracy had existed since the start. As noted above, the 231,000 people employed in offices in Moscow in August 1918 represented 30 per cent of the workforce there. “By 1920 the general number of office workers … still represented about a third of those employed in the city.” In November, 1920, they were 200 000 office workers in Moscow, compared to 231 000 in August, 1918. By July, 1921 (in spite of a plan to transfer 10,000 away) their numbers had increased to 228,000 and by October 1922, to 243,000. [Richard Sakwa, Soviet Communists in Power, p. 192, p. 191 and p. 193]

This makes perfect sense as “on coming to power the Bolsheviks smashed the old state but rapidly created their own apparatus to wage
the political and economic offensive against the bourgeois and capitalism. As the functions of the state expanded, so did the bureaucracy... following the revolution the process of institutional proliferation reached unprecedented heights.” [Op. Cit., p. 191] And with bureaucracy came the abuse of it simply because it held real power:

“The prevalence of bureaucracy, of committees and commissions ... permitted, and indeed encouraged, endless permutations of corrupt practices. These raged from the style of living of communist functionaries to bribe-taking by officials. With the power of allocation of scarce resources, such as housing, there was an inordinate potential for corruption.” [Op. Cit., p. 193]

The growth in power of the bureaucracy should not, therefore, come as a major surprise given that had existed from the start in sizeable numbers. However, for the Bolsheviks “the development of a bureaucracy” was a puzzle, “whose emergence and properties mystified them.” However, it should be noted that, “[f]or the Bolsheviks, bureaucratism signified the escape of this bureaucracy from the will of the party as it took on a life of its own.” [Sakwa, Op. Cit., p. 182 and p. 190] This was the key. They did not object the usurpation of power by the party (indeed they placed party dictatorship at the core of their politics and universalised it to a general principle for all “socialist” revolutions). Nor did they object to the centralisation of power and activity (and so the bureaucratisation of life). They only objected to it when the bureaucracy was not doing what the party wanted it to. Indeed, this was the basic argument of Trotsky against Stalinism (see section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?”).

Faced with this bureaucracy, the Bolsheviks tried to combat it (unsuccessfully) and explain it. As the failed to achieve the latter, they failed in the former. Given the Bolshevik fixation for all things centralised, they simply added to the problem rather than solve guard of the whole factory and industrial proletariat.” [quoted by E.H. Carr, The Bolshevik Revolution, vol. 1, p. 236] Or when he replied to a critic in 1920 that “[h]e says we understand by the words dictatorship of proletariat what is actually the dictatorship of its determined and conscious minority. And that is the fact.” This “minority ... may be called a party,” Lenin stressed. [quoted by Arthur Ransome, The Crisis in Russia 1920, p. 35]

This perspective can be traced back to the underlying ideology expounded by the Bolsheviks before and during 1917. For example, mere days after seizing power in the October Revolution Lenin was stressing that the Bolsheviks’ “present slogan is: No compromise, i.e. for a homogeneous Boshevik government.” He did not hesitate to use the threat to “appeal to the sailors” against the other socialist parties, stating “[i]f you get the majority, take power in the Central Executive Committee and carry one. But we will go to the sailors.” [quoted by Tony Cliff, Lenin, vol. 3, p. 26] Clearly soviet power was far from Lenin’s mind, rejecting soviet democracy if need be in favour of party power. Strangely, Cliff (a supporter of Lenin) states that Lenin “did not visualise one-party rule” and that the “first decrees and laws issued after the October revolution were full of repetitions of the word ‘democracy.’” [Op. Cit., p. 161 and p. 146] He goes on to quote Lenin stating that “[a]s a democratic government we cannot ignore the decision of the masses of the people, even though we disagree with it.” Cliff strangely fails to mention that Lenin also applied this not only to the land decree (as Cliff notes) but also to the Constituent Assembly. “And even if,” Lenin continued, “the peasants continue to follow the Socialist Revolutionaries, even if they give this party a majority in the Constituent Assembly, we shall still say — what of it?” [Lenin, Collected Works, vol. 26, pp. 260–1] But the Bolsheviks disbanded the Constituent Assembly after one session. The peasants had voted for the SRs and the Assembly went the same way as Lenin’s promises. And if Lenin’s promises of 1917 on the Assembly proved to be of little value, then why should his various comments to soviet democracy be considered any different? In
mere fig-leaves for party power (see section 6 of the appendix “What happened during the Russian Revolution?” for more details).

It cannot be mere coincidence that the ideas and rhetoric against the soviets in 1905 should resurface again once the Bolsheviks were in power. For example, in 1905, in St. Petersburg “the Bolsheviks pressed on” with their campaign and, “according to the testimony of Vladimir Voitinskii, then a young Bolshevik agitator, the initial thrust of the Bolshevik ‘plan’ was to push the SRs [who were in a minority] out of the Soviet, while ‘the final blow would be directed against the Mensheviks. Voitinskii also recalled the heated argument advanced by the popular agitator Nikolai Krylenko (‘Abram’) for the ‘dispersal of the Soviet’ should it reject the ‘ultimatum’ to declare its affiliation with the RSDP.’” [Getzler, Op. Cit., pp. 127–8] This mirrored events in 1918. Then “at the local political level” Bolshevik majorities were attained (“by means fair, foul and terrorist”) “in the plenary assemblies of the soviets, and with the barring of all those not ‘completely dedicated to Soviet power’ [i.e. Mensheviks and SRs] from the newly established network of soviet administrative departments and from the soviet militias. Soviets where Bolshevik majorities could not be achieved were simply disbanded.” A similar process occurred at the summit (see section 7). Thus “the October revolution marked [the soviets] transformation from agents of democratisation into regional and local administrative organs of the centralised, one-party Soviet state.” [Israel Getzler, Soviets as Agents of Democratisation, p. 27 and pp. 26–7]

Can such an outcome really have no link at all with the Bolshevik position and practice in period before 1917 and, in particular, during the 1905 revolution? Obviously not. As such, we should not be too surprised or shocked when Lenin replied to a critic who assailed the “dictatorship of one party” in 1919 by clearly and unashamedly stating: “Yes, the dictatorship of one party! We stand upon it and cannot depart from this ground, since this is the party which in the course of decades has won for itself the position of van-

it. Thus we find that “[o]n the eve of the VIII Party Congress Lenin had argued that centralisation was the only way to combat bureaucr-

Unsurprisingly, Lenin’s “anti-bureaucratic” policies in the last years of his live were “organisational ones. He purposes the formation of the Workers’ and Peasants’ Inspection to correct bureaucratic deformations in the party and state — and this body falls under Stalin’s control and becomes highly bureaucratic in its own right. Lenin then suggests that the size of the Workers’ and Peasants’ Inspection be reduced and that it be merged with the Control Commission. He advocates enlarging the Central Committee. Thus it rolls along; this body to be enlarged, this one to be merged with another, still a third to be modified or abolished. The strange ballet of organisational forms continues up to his very death, as though the problem could be resolved by organisational means.” [Murray Bookchin, Post-Scarcity Anarchism, p. 205]

Failing to understand the links between centralism and bureaucracy, Lenin had to find another source for the bureaucracy. He found one. He “argued that the low cultural level of the working class prevented mass involvement in management and this led to bu-
reaucratism … the new state could only reply on a minuscule layer of workers while the rest were backward because of the low cultural level of the country.” However, such an explanation is by no means convinc ing: “Such culturalist assertions, which could neither be proved or disproved but which were politically highly effective in explaining the gulf, served to blur the political and structural causes of the prob-
lem. The working class was thus held responsible for the failings of the bureaucracy. At the end of the civil war the theme of the back-
wardness of the proletariat was given greater elaboration in Lenin’s theory of the declassing of the proletariat.” [Sakwa, Op. Cit., p. 195] Given that the bureaucracy had existed from the start, it is hard to say that a more “cultured” working class would have been in a better position to control the officials of a highly centralised state bureaucracy. Given the problems workers in “developed” nations
have in controlling their (centralised) union bureaucracies, Lenin’s explanation seems simply inadequate and, ultimately, self-serving.

Nor was this centralism particularly efficient. You need only read Goldman’s or Berkman’s accounts of their time in Bolshevik Russia to see how inefficient and wasteful centralisation and its resultant bureaucracy was in practice (see My Disillusionment in Russia and The Bolshevik Myth, respectively). This can be traced, in part, to the centralised economic structures favoured by the Bolsheviks. Rejecting the alternative vision of socialism advocated and, in part created, by the factory committees (and supported wholeheartedly by the Russian Anarchists at the time), the Bolsheviks basically took over and used the “state capitalist” organs created under Tsarism as the basis of their “socialism” (see section 5). As Lenin promised before seizing power:

"Forced syndicatisation — that is, forced fusion into unions [i.e. trusts] under the control of the State — this is what capitalism has prepared for us — this is what the Banker State has realised in Germany — this is what will be completely realisable in Russia by the Soviets, by the dictatorship of the proletariat." [Will the Bolsheviks Maintain Power?, p. 53]

In practice, Lenin’s centralised vision soon proved to be a disaster (see section 11 of the appendix “What happened during the Russian Revolution?” for details). It was highly inefficient and simply spawned a vast bureaucracy. There was an alternative, as we discuss in section 12 of the appendix “What happened during the Russian Revolution?”, the only reason that industry did not totally collapse in Russia during the early months of the revolution was the activity of the factory committees. However, such activity was not part of the Bolshevik vision of centralised socialism and so the factory committees were not encouraged. At the very moment when mass participation and initiative is required (i.e. during a
detected this danger early in the development of the Soviets and hoped to subdue it by subordinating the Soviets to the party. The drawback of the new ‘soviet democracy’ hailed by Lenin in 1906 is that he could envisage the Soviets only as controlled organisations; for him they were the instruments by which the party controlled the working masses, rather than true forms of a workers democracy." [Op. Cit., p. 85]

As we noted in section H.3.11, Lenin had concluded in 1907 that while the party could “utilise” the Soviets “for the purpose of developing the Social-Democratic movement,” the party “must bear in mind that if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous.” [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 210] Thus the means by which working class can manage their own affairs would become “superfluous” once the party was in power. As Samuel Farber argues, Lenin’s position before 1917 was “clearly implying that the party could normally fulfil its revolutionary role without the existence of broad class organisations ... Consequently, Lenin’s and the party’s eventual endorsement of the Soviets in 1905 seems to have been tactical in character. That is, the Bolshevik support for the Soviets did not at the time signify a theoretical and/or principled commitment to these institutions as revolutionary organs to overthrow the old society, let alone as key structural ingredients of the post-revolutionary order. Furthermore, it is again revealing that from 1905 to 1917 the concept of Soviets did not play an important role in the thinking of Lenin or of the Bolshevik Party ... [T]hese strategies and tactics vis-a-vis the Soviets ... can be fairly seen as expressing a predisposition favouring the party and downgrading the Soviets and other non-party class organisations, at least in relative terms.” [Before Stalinism, p. 37] Such a perspective on the Soviets can be seen once the party was in power when they quickly turned them, without concern, into
party organisation has no other means of directing the proletariat’s revolutionary action ... The soviet of workers deputies must be a technical instrument of the party for the purpose of giving political leadership to the masses through the RSDWP [the Social-Democratic Party]. It is therefore imperative to gain control of the soviet and prevail upon it to recognise the program and political leadership of the RSDWP.” [quoted by Anweiler, Op. Cit., p. 79]

This perspective that the party should be given precedence can be seen in Lenin’s comment that while the Bolsheviks should “go along with the unpoliticalised proletarians, but on no account and at no time should we forget that animosity among the proletariat toward the Social Democrats is a remnant of bourgeois attitudes ... Participation in unaffiliated organisations can be permitted to socialists only as an exception ... only if the independence of the workers party is guaranteed and if within unaffiliated organisations or soviets individual delegates or party groups are subject to unconditional control and guidance by the party executive.” [quoted by Anweiler, Op. Cit., p. 81] These comments have clear links to Lenin’s argument in 1920 that working class protest against the Bolsheviks showed that they had become “declassed” (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?”). It similarly allows soviets to be disbanded if Bolsheviks are not elected (which they were, see section 6 of the appendix “What happened during the Russian Revolution?”). It also ensures that Bolshevik representatives to the soviets are not delegates from the workplace, but rather a “transmission belt” (to use a phrase from the 1920s) for the decisions of the party leadership. In a nutshell, Bolshevik soviets would represent the party’s central committee, not those who elected them. As Oskar Anweiler summarised:

“The ‘revolutionary genius’ of the people, which Lenin had mentioned and which was present in the soviets, constantly harboured the danger of ‘anarcho-syndicalist tendencies’ that Lenin fought against all his life. He revolution) the Bolsheviks favoured a system which killed it. As Kropotkin argued a few years later:

“production and exchange represented an undertaking so complicated that the plans of the state socialists, which lead to a party directorship, would prove to be absolutely ineffective as soon as they were applied to life. No government would be able to organise production if the workers themselves through their unions did not do it in each branch of industry; for in all production there arise daily thousands of difficulties which no government can solve or foresee ... Only the efforts of thousands of intelligences working on the problems can co-operate in the development of a new social system and find the best solutions for the thousands of local needs.” [Kropotkin’s Revolutionary Pamphlets, pp. 76–7]

No system is perfect. Any system will take time to develop fully. Of course the factory committees made mistakes and, sometimes, things were pretty chaotic with different factories competing for scarce resources. But that does not prove that factory committees and their federations were not the most efficient way of running things under the circumstances. Unless, of course, you share the Bolsheviks a dogmatic belief that central planning is always more efficient. Moreover, attacks on the factory committees for lack of co-ordination by pro-Leninists seem less than sincere, given the utter lack of encouragement (and, often, actual barriers) the Bolsheviks placed in the way of the creation of federations of factory committees (see section 9 of the appendix “What happened during the Russian Revolution?” for further details).

Lastly, Bolshevik centralism (as well as being extremely inefficient) also ensured that the control of production and the subsequent surplus would be in the hands of the state and, so, class society would continue. In Russia, capitalism became state capitalism
under Lenin and Trotsky (see sections 5 and 6 for more discussion of this).

So Bolshevik support for centralised power ensured that minority power replaced popular power, which, in turn, necessitated bureaucracy to maintain it. Bolshevism retained statist and capitalist social relations and, as such, could not develop socialist ones which, by their very nature, imply egalitarianism in terms of social influence and power (i.e. the abolition of concentrated power, both economic and political). Ironically, by being centralists, the Bolsheviks systematically eliminated mass participation and ensured the replacement of popular power with party power. This saw the rebirth of non-socialist social relationships within society, so ensuring the defeat of the socialist tendencies and institutions which had started to grow during 1917.

It cannot be said that this centralism was a product of the civil war. As best it could be argued that the civil war extenuated an existing centralist spirit into ultra-centralism, but it did not create it. After all, Lenin was stressing that the Bolsheviks were “convinced centralists ... by their programme and the tactics of the whole of their party” in 1917. Ironically, he never realised (nor much cared, after the seizure of power) that this position precluded his call for “the deepening and extension of democracy in the administration of a State of the of the proletarian type.” [Can the Bolsheviks Maintain Power?, p. 74 and p. 55] Given that centralism exists to ensure minority rule, we should not be surprised that party power replaced popular participation and self-government quickly after the October Revolution. Which it did. Writing in September 1918, a Russian anarchist portrays the results of Bolshevik ideology in practice:

“Within the framework of this dictatorship [of the proletariat] ... we can see that the centralisation of power has begun to crystallise and grow firm, that the apparatus of the state is being consolidated by the ownership of prop-

less than important. The key for them was to maintain Bolshevik party power and if soviet democracy was the price to pay, then they were more than willing to pay it. As such, Bolshevik attitudes in 1905 are significant:

“Despite the failure of the Bolshevik assault on the non-partisanship of the [St.] Petersburg Soviet, which may be dismissed as a passing episode ... the attempt ... is of particular significance in understanding the Bolshevik’s mentality, political ambitions and modus operandi. First, starting in [St.] Petersburg, the Bolshevik campaign was repeated in a number of provincial soviets such as Kostroma and Tver, and, possibly, Sorovo. Second, the assault reveals that from the outset the Bolsheviks were distrustful of, if not hostile towards the Soviets, to which they had at best an instrumental and always party-minded attitude. Finally, the attempt to bring the [St.] Petersburg Soviet to heel is an early and major example of Bolshevik take-over techniques hitherto practised within the narrow confines of the underground party and now extended to the larger arena of open mass organisations such as soviets, with the ultimate aim of controlling them and turning them into one-party organisations, or, failing that, of destroying them.” [Israel Getzler, “The Bolshevik Onslaught on the Non-Party ‘Political Profile’ of the Petersburg Soviet of Workers’ Deputies October–November 1905”, Revolutionary History, pp. 123–146, vol. 5, no. 2, pp. 124–5]

The instrumentalist approach of the Bolsheviks post-1917 can be seen from their arguments and attitudes in 1905. On the day the Moscow soviet opened, a congress of the northern committees of the Social Democratic Party passed a resolution stating that a “council of workers deputies should be established only in places where the
that the Bolsheviks embraced it and keenly applied it to elections to soviets and unions as well as Parliaments once in power (see section 6 of the appendix “What happened during the Russian Revolution?” for example). But, at the time, he sided with Lenin against the Mensheviks and it can be argued that the latter applied these teachings of that most respected pre-1914 Russian Marxist thinker.

This undemocratic perspective can also be seen when, in 1905, the St. Petersbourg Bolsheviks, like most of the party, opposed the soviets. They argued that “only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.” [quoted by Oskar Anweiler, The Soviets, p. 77] Thus the soviets could not reflect workers’ interests because they were elected by the workers!

The Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political program or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the “subordination of consciousness to spontaneity” and under the label “non-party” allow “the rotten goods of bourgeois ideology” to be introduced among the workers. [quoted by Anweiler, Op. Cit., p. 78 and p. 79] In this, the St. Petersbourg Bolsheviks were simply following Lenin’s What is to be Done?, in which Lenin had argued that the “spontaneous development of the labour movement leads to it being subordinated to bourgeois ideology.” [Essential Works of Lenin, p. 82] Lenin in 1905, to his credit, rejected these clear conclusions of his own theory and was more supportive of the soviets than his followers (although “he sided in principle with those who saw in the soviet the danger of amorphous nonpartisan organisation.” [Anweiler, Op. Cit., p. 81]).

This perspective, however, is at the root of all Bolshevik justifications for party power after the October revolution. The logical result of this position can be found in the actions of the Bolsheviks in 1918 and onwards. For the Bolsheviks in power, the soviets were

erty and even by an anti-socialist morality. Instead of hundreds of thousands of property owners there is now a single owner served by a whole bureaucratic system and a new ‘statised’ morality.

“The proletariat is gradually being enserfed by the state. The people are being transformed into servants over whom there has risen a new class of administrators — a new class ... Isn’t this merely a new class system looming on the revolutionary horizon ...

“The resemblance is all too striking ... And if the elements of class inequality are as yet indistinct, it is only a matter of time before privileges will pass to the administrators. We do not mean to say ... that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from, centralisation. It cannot be otherwise ... we are presently moving not towards socialism but towards state capitalism.

“Will state capitalism lead us to the gates of socialism? Of this we see not the slightest evidence ... Arrayed against socialism are ... thousands of administrators. And if the workers ... should become a powerful revolutionary force, then it is hardly necessary to point out that the class of administrators, wielding the state apparatus, will be a far from weak opponent. The single owner and state capitalism form a new dam before the waves of our social revolution...

“Is it at all possible to conduct the social revolution through a centralised authority? Not even a Solomon
could direct the revolutionary struggle or the economy from one centre ...” [M. Sergven, cited by Paul Avrich, Anarchists in the Russian Revolution, pp. 123–5]

Subsequent developments proved this argument correct. Working class revolts were crushed by the state and a new class society developed. little wonder, then, Alexander Berkman’s summary of what he saw first hand in Bolshevik Russia a few years later:

“Mechanical centralisation, run mad, is paralysing the industrial and economic activities of the country. Initiative is frowned upon, free effort systematically discouraged. The great masses are deprived of the opportunity to shape the policies of the Revolution, or take part in the administration of the affairs of the country. The government is monopolising every avenue of life; the Revolution is divorced from the people. A bureaucratic machine is created that is appalling in its parasitism, inefficiency and corruption. In Moscow alone this new class of sovbyurs (Soviet bureaucrats) exceeds, in 1920, the total of office holders throughout the whole of Russia under the Tsar in 1914... The Bolshevik economic policies, effectively aided by this bureaucracy, completely disorganise the already crippled industrial life of the country. Lenin, Zinoviev, and other Communist leaders thunder philippics against the new Soviet bourgeoisie, — and issue ever new decrees that strengthen and augment its numbers and influence.” [The Russian Tragedy, p. 26]

Bakunin would not have been remotely surprised. As such, the Bolshevik revolution provided a good example to support Malatesta’s argument that “if ... one means government action when one talks of social action, then this is still the resultant of individual forces, but only of those individuals who form the government ... it follows...”

“Every particular democratic principle must be considered not in itself, abstractly, ... the success of the revolution is the highest law. And if, for the success of the revolution’s success, we need temporarily to restrict the functioning of a particular democratic principle, then it would be criminal to refrain from imposing that restriction... And we must take the same attitude where the question of the length of parliaments is concerned. If, in an outburst of revolutionary enthusiasm, the people elect a very good parliament ... it would suit us to try and make that a long Parliament; but if the elections turned out badly for us, we should have to try and disperse the resulting parliament not after two years but, if possible, after two weeks.” [RSDLP, Minutes of the Second Congress of the RSDLP, p. 220]

Another delegate argued that “[t]here is not a single one among the principles of democracy which we ought not to subordinate to the interests of our Party ... we must consider democratic principles exclusively from the standpoint of the most rapid achievement of that aim [i.e. revolution], from the standpoint of the interests of our Party. If any particular demand is against our interests, we must not include it.” To which, Plekhanov replied, “I fully associate myself with what Comrade Posadovksy has said.” [Op. Cit., p. 219 and p. 220] Lenin “agreed unreservedly with this subordination of democratic principles to party interests.” [Oskar Anweiler, The Soviets, p. 211]

Plekhanov at this time was linked with Lenin, although this association lasted less than a year. After that, he became associated with the Mensheviks (before his support for Russia in World War I saw him form his own faction). Needless to say, he was mightily annoyed when Lenin threw his words back in his face in 1918 when the Bolsheviks disbanded the Constituent Assembly. Yet while Plekhanov came to reject this position (perhaps because the elections had not “turned out badly for” his liking) it is obvious
Thus the Bolshevik party would be in power, with the “conscious workers” ruling over the rest. The question instantly arises of what happens if the masses turn against the party. If the Bolsheviks embody “the power of the proletariat,” what happens if the proletariat reject the party? The undermining of soviet power by party power and the destruction of soviet democracy in the spring and summer of 1918 answers that specific question (see section 6 of the appendix “What happened during the Russian Revolution?”). This should have come as no surprise, given the stated aim (and implementation) of party power plus the Bolshevik identification of party power with workers’ power. It is not a great step to party dictatorship over the proletariat from these premises (particularly if we include the underlying assumptions of vanguardism — see section H.5.3). A step, we must stress, that the Bolsheviks quickly took when faced with working class rejection in the soviet elections of spring and summer of 1918.

Nor was this destruction of soviet democracy by party power just the result of specific conditions in 1917–8. This perspective had been in Russian Marxist circles well before the revolution. As we discuss in section H.5, vanguardism implies party power (see, as noted, section H.5.3 in particular). The ideas of Lenin’s What is to be Done? give the ideological justification for party dictatorship over the masses. Once in power, the logic of vanguardism came into its own, allowing the most disgraceful repression of working class freedoms to be justified in terms of “Soviet Power” and other euphemisms for the party.

The identification of workers’ power with party power has deeply undemocratic results, as the experience of the Bolsheviks proves. However, these results were actually articulated in Russian socialist circles before hand. At the divisive 1903 congress of the Russian Social Democrats, which saw the split into two factions (Bolshevik and Menshevism) Plekhanov, the father of Russian Marxism, argued as follows:

that far from resulting in an increase in the productive, organising and protective forces in society, it would greatly reduce them, limiting initiative to a few, and giving them the right to do everything without, of course, being able to provide them with the gift of being all-knowing.” [Anarchy, pp. 36–7]

By confusing “state action” with collective working class action, the Bolsheviks effectively eliminated the latter in favour of the former. The usurpation of all aspects of life by the centralised bodies created by the Bolsheviks left workers with no choice but to act as isolated individuals. Can it be surprising, then, that Bolshevik policies aided the atomisation of the working class by replacing collective organisation and action by state bureaucracy? The potential for collective action was there. You need only look at the strikes and protests directed against the Bolsheviks to see that was the case (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). Ironically, Bolshevik policies and ideology ensured that the collective effort and action of workers was directed not at solving the revolution’s problems but resisting Bolshevik tyranny.

That centralism concentrates power in a few hands can be seen even in Leninist accounts of the Russian revolution. To take one example, Tony Cliff may assert that the “mistakes of the masses were themselves creative” but when push comes to shove, he (like Lenin) simply does not allow the masses to make such mistakes and, consequently, learn from them. Thus he defends Lenin’s economic policies of “state capitalism” and “one-man management” (and in the process misleadingly suggests that these were new ideas on Lenin’s part, imposed by objective factors, rather than, as Lenin acknowledged, what he had advocated all along — see section 5). Thus we discover that the collapse of industry (which had started in the start of 1917) meant that “[d]rastic measures had to be taken.” But never fear, “Lenin was not one to shirk responsibility, however unpleasant the task.” He called for “state capitalism,” and there “were more difficult decisions to be accepted. To save industry
from complete collapse, Lenin argued for the need to impose one-man management.” So much for the creative self-activity of the masses, which was quickly dumped — precisely at the time when it was most desperately needed. And it is nice to know that in a workers’ state it is not the workers who decide things. Rather it is Lenin (or his modern equivalent, like Cliff) who would have the task of not shirking from the responsibility of deciding which drastic measures are required. [Op. Cit., p. 21, p. 71 and p. 73] So much for “workers’ power”!

Ultimately, centralism is designed to exclude the mass participation anarchists have long argued is required by a social revolution. It helped to undermine what Kropotkin considered the key to the success of a social revolution — “the people becom[ing] masters of their destiny.” [Op. Cit., p. 133] In his words:

“We understand the revolution as a widespread popular movement, during which in every town and village within the region of revolt, the masses will have to take it upon themselves the work of construction upon communist bases, without awaiting any orders and directions from above ... As to representative government, whether self-appointed or elected ... , we place in it no hopes whatever. We know beforehand that it will be able to do nothing to accomplish the revolution as long as the people themselves do not accomplish the change by working out on the spot the necessary new institutions ... nowhere and never in history do we find that people carried into government by a revolutionary wave, have proved equal to the occasion.

“In the task of reconstructing society on new principles, separate men ... are sure to fail. The collective spirit of the masses is necessary for this purpose ... a socialist government ... would be absolutely powerless without the activity of the people themselves, and that, necessarily, they would soon begin to act fatally as a bridle upon the revolution.” [Op. Cit., pp. 188–190]

The Bolshevik revolution and its mania for centralism proved him right. The use of centralisation helped ensure that workers’ lost any meaningful say in their revolution and helped alienate them from it. Instead of the mass participation of all, the Bolsheviks ensured the top-down rule of a few. Unsurprisingly, as mass participation is what centralism was designed to exclude. Wishful thinking on behalf of the Bolshevik leaders (and their later-day followers) could not (and can not) overcome the structural imperatives of centralisation and its role in society. Nor could it stop the creation of a bureaucracy around these new centralised institutions.

8 How did the aim for party power undermine the revolution?

As well as a passion for centralisation and state capitalism, Bolshevism had another aim which helped undermine the revolution. This was the goal of party power (see see section 5 of the appendix “What happened during the Russian Revolution?” for details). Given this, namely that the Bolsheviks had, from the start, aimed for party power it should not come as too surprising that Bolshevik dictatorship quickly replaced soviet democracy.

Given this obvious fact, it seems strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when the Bolshevik Party took power in October 1917, it did “substitute” itself for the working class and did so deliberately and knowingly. As we note in section 2, this usurpation of power by a minority was perfectly acceptable within the Marxist theory of the state, a theory which aided this process no end.
Moreover, as we discuss in the next section, they also successfully applied these ideas when and where they could.

So what was their social programme? Being anarchists, it comprised two parts, namely political and economic aspects. The Makhnovists aimed for a true social revolution in which the working classes (both urban and rural) could actively manage their own affairs and society. As such, their social programme reflected the fact that oppression has its roots in both political and economic power and so aimed at eliminating both the state and private property. As the core of their social ideas was the simple principle of working-class autonomy, the idea that the liberation of working-class people must be the task of the working-class people themselves. This vision is at the heart of anarchism and was expressed most elegantly by Makhno:

“Conquer or die — such is the dilemma that faces the Ukrainian peasants and workers at this historic moment ... But we will not conquer in order to repeat the errors of the past years, the error of putting our fate into the hands of new masters; we will conquer in order to take our destinies into our own hands, to conduct our lives according to our own will and our own conception of the truth.” [quoted by Peter Arshinov, *The History of the Makhnovist Movement*, p. 58]

As such, the Makhnovists were extremely hostile to the idea of state power, recognising it simply as a means by which the majority are ruled by the few. Equally, they were opposed to wage slavery (to private or state bosses), recognising that as long as the workers do not manage their own work, they can never be free. As they put it, their goals could only be achieved by an “implacable revolution and consistent struggle against all lies, arbitrariness and coercion, wherever they come from, a struggle to the death, a struggle for free speech, for the righteous cause, a struggle with weapons in

revolution, namely that “the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat.” Vacillations are expressed by workers’ democracy and so this was rejected: “The dictatorship of the working class finds its expression in the dictatorship of the party.” (”To the Workers of the USSR”, Zinoviev, *History of the Bolshevik Party*, p. 213 and p. 214)

Unsurprisingly, this perspective was also raised in the 1927 Platform of the Opposition, alongside the same contradictory demands for “workers’ democracy” and the revitalising of the soviets and trade unions. It made the limited nature of Trotsky’s opposition clear, for it attacked Stalin for weakening the party’s dictatorship. In its words, the “growing replacement of the party by its own apparatus is promoted by a ‘theory’ of Stalin’s which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” It repeats this principle by arguing that “the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry.” As such, “[w]e will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party.” [”The Platform of the Opposition”, *The Challenge of the “Left Opposition”* (1926–27), p. 395, p. 439 and p. 441]

This conviction was so strong that even after the defeat of the “Left Opposition” it was the case that in the prison camps “almost all the Trotskyists continued to consider that ‘freedom of party’ would be ‘the end of the revolution.’ ‘Freedom to choose one’s party — that is Menshevism,’ was the Trotskyists’ final verdict.” [Ante Ciliga, *The Russian Enigma*, p. 280] Such is the power of ideology.

So “workers’ democracy” had a very specific meaning to the Communist Party, namely one limited to within the party and not a call for genuine democracy in the unions or soviets. Such a de-
inition, obviously, in no way undermines the dictatorship of the
party — but it does allow the use of quotations by Leninists to bol-
ster a false narrative on the nature of Bolshevism.

Politically, then, the opposition urged the benevolent dictator-
ship of an internally democratic party. Economically, Trotsky’s op-
position was far more backward than previous ones. For Trotsky,
economic democracy was not an issue and so it played no role in de-
termining the socialist nature of a society. Rather state ownership
did. Thus he did not question one-man management in the work-
place nor the capitalist social relationships it generated. For Trot-
sky, it was “necessary for each state-owned factory, with its technical
director and with its commercial director, to be subjected not only to
to control from the top — by the state organs — but also from below,
by the market which will remain the regulator of the state economy
for a long time to come.” In spite of the obvious fact that the work-
ers did not control their labour or its product, Trotsky asserted that
"[n]o class exploitation exists here, and consequently neither does cap-
talism exist.” Moreover, “socialist industry ... utilises methods of de-
velopment which were invented by capitalist economy.” Ultimately,
it was not self-management that mattered, it was “the growth of
Soviet state industry [which] signifies the growth of socialism itself;
a direct strengthening of the power of the proletariat”.

Unsurprisingly, then, the “Left Opposition” did not even have the
merit of the “Left Communists” or “Workers’ Opposition” in
raising economic reforms. Its Platform simply repeated Bolshevik
orthodoxies, arguing that “nationalisation of the means of produc-
tion was a decisive step toward the socialist reconstruction of that
whole social system which is founded upon the exploitation of man
by man” and that the “appropriation of surplus value by a workers’
state is not, of course, exploitation.” However, it also acknowledged
that “we have a workers’ state with bureaucratic distortions” and a
“swollen and privileged administrative apparatus devours a very con-
siderable part of our surplus value” while “all the data testify that

6 Did the Makhnovists have a constructive social programme?

Yes, they did. The Makhnovists spent a great deal of energy and
effort in developing, propagating and explaining their ideas on how
a free society should be created and run. As Michael Malet noted,
the “leading Makhnovists had definite ideas about the ideal form of
social organisation.”
The new federation was named “Nabat” (Alarm) and had a six-person Secretariat. Kharkiv was chosen as its headquarters, while it had groups in other major Ukrainian cities (including Kyiv, Odessa and Katerynoslav). The final organisation of the Nabat was accomplished at a conference held in April 2–7, 1919. The federation aimed to form a “united anarchism” and guaranteed a substantial degree of autonomy for every participating group and individual. A number of newspapers appeared in a Ukrainian towns and cities (mostly entitled Nabat), as did leaflets and pamphlets. There was a main weekly paper (called Nabat) which was concerned largely with anarchist theory. This completed the Makhnovist papers Road to Freedom (which was often daily, sometimes weekly and dealt with libertarian ideas, everyday problems and information on partisan activities) and The Makhnovist Voice (which dealt primarily with the interests, problems, and tasks of the Makhnovist movement and its army). The Nabat organisation was also published a pamphlet dealing with the Makhnovist movement’s problems, the economic organisation of the region, the free soviets, the social basis of the society that was to be built, and the problem of defence.

Unsurprisingly, the Nabat federation and the Makhnovists worked together closely, with Nabat members worked in the army (particularly its cultural section). Some of its members were also elected to the Makhnovist Revolutionary Military Soviet. It should be noted that the Nabat federation gained a number of experienced anarchists from Soviet Russia, who fled to the Ukraine to escape Bolshevik repression. The Nabat shared the fortunes of the Makhno movement. It carried on its work freely as long as the region was controlled by the Makhnovist Army, but when Bolshevik or White forces prevailed, the anarchists were forced underground. The movement was finally crushed in November 1920, when the Bolsheviks betrayed the Makhnovists.

As can be seen, the Makhnovists implemented to a large degree the anarchist idea of self-managed, horizontally federated assoc-

5198

the growth of wages is lagging behind the growth of the productivity of labour.” [“The Platform of the Opposition”, The Challenge of the “Left Opposition” (1926–27), pp. 347–8, p. 350]

So an economic regime marked by one-man management by state-appointed bosses under a party dictatorship could somehow be without exploitation even though someone other than the workers controlled both their labour and how its product (and any surplus) was used? It is hardly surprising that the new master class sought their own benefit; what is surprising is that the “Left Opposition” could not see the reality of state-capitalism. Rather, it focused its attention on the living standards of the working class and paid no attention to the relations of production in the workplace, raising no proposals nor demands about establishing workers’ control of industry. Given its own-proclaimed role as defender of Leninist orthodoxy and its social relations, perhaps this is not so surprising after all.

In summary, Trotsky’s “opposition” in no way presented any real alternative to Stalinism. At no time did he question the fundamental social relationships within Soviet society. As the 1927 Platform noted, he saw Stalinism as the victory of the state bureaucracy over the party and its dictatorship. Writing ten years after the Platform, Trotsky reiterated this, arguing that the “bureaucracy won the upper hand. It cowed the revolutionary vanguard, trampled upon Marxism, prostituted the Bolshevik party … To the extent that the political centre of gravity has shifted from the proletarian vanguard to the bureaucracy, the party has changed its social structure as well as its ideology.” He simply wanted to shift the “political centre of gravity” back towards the party, as it had been in the early 1920s when he and Lenin were in power. He in no significant way questioned the nature of the regime or the social relationships it was rooted in (whether political or economic). Indeed, “[t]hose who counterpose the abstraction of soviets to the party dictatorship should understand that only thanks to the Bolshevik leadership were the soviets able to lift themselves out of the mud of reformism and attain the state form

5123
This explains his continual self-imposed role after his exile of loyal opposition to Stalinism in spite of the violence applied to him and his followers. It also explains the lack of excitement by the Russian working class over the “Left Opposition” for their choice was between two factions within the master class. As Serge acknowledged: “Outraged by the Opposition, they [the bureaucrats] saw it as treason against them; which in a sense it was, since the Opposition itself belonged to the ruling bureaucracy.” [Memoirs of a Revolutionary, p. 225]

This may come as a shock to many readers. This is because Trotskyists are notorious for their rewriting of the policies of Trotsky’s opposition, as seen by the words of Chris Harman we quoted earlier. Yet this is hardly surprising, as openly saying that benevolent state-capitalist party dictatorship was the only alternative to Stalinism would be hard to maintain. Like Trotsky, there is a pressing need to avoid looking at the social relations under Lenin in case obvious similarities are noticed to those under Stalin. Thus we find Harman stating in his summary of the rise of Stalinism that it was after “Lenin’s illness and subsequent death” when the “principles of October were abandoned one by one.” [Op. Cit., p. 14] Presumably, in that case, the “principles of October” included the practice of, and ideological commitment to, party dictatorship, one-man management, banning opposition parties and groups (as well as factions within the Communist Party), censorship, state repression of working class strikes and protests, piece-work, Taylorism, the end of independent trade unions and a host of other crimes against socialism implemented under Lenin and normal practice at the time of his death.

Like Lenin, the “Left Opposition” did not question the Bolshevik’s monopoly of power and explicitly supported the idea of party dictatorship. This fact helps explains what Harman seems puzzled by, namely that Trotsky “continued to his death to harbour the il-equalitarian mobilisation” should take place. This meant that this appeal, “sanctioned by the moral authority of the congress, emphasised the need for fresh troops in the insurrectionary army, no-one was compelled to enlist.” [Voline, Op. Cit., p. 577] The Congress itself passed a resolution after a long and passionate debate that stated it “rejected ‘compulsory’ mobilisation, opting for an ‘obligatory’ one; that is, each peasant who is able to carry arms, should recognise his obligation to enlist in the ranks of the partisans and to defend the interests of the entire toiling people of Ukraine.” [quoted by Palij, Op. Cit., p. 155] There were far more volunteers than arms, the opposite of what occurred to both the Reds and Whites during the Civil War. [Malet, Op. Cit., p. 106]

The third Congress decided to conduct a voluntary mobilisation all those born between 1889 and 1898. This congress told them to assemble at certain points, organise themselves and elect their officers. Another mobilisation decided at the Aleksandrovsk congress never took place. How far the Makhnovists were forced to conscript troops is still a matter of debate. Paul Avrich, for example, states that “voluntary mobilisation” in reality “meant outright conscription, as all able-bodied men were required to serve.” [Op. Cit., p. 114] On the other side, surviving leaflets from 1920 “are in the nature of appeals to join up, not instructions.” [Malet, Op. Cit., p. 105] Trotsky, ironically, noted that “Makhno does not have general mobilisations, and indeed these would be impossible, as he lacks the necessary apparatus.” [quoted by Malet, Op. Cit., p. 106] It is probably right to say that the Congresses desired that every able-bodied man join the Makhnovist army, but they simply did not have the means to enforce that desire and that the Makhnovists tried their best to avoid conscription by appealing to the peasants’ revolutionary conscience, with some success.

As well as the military organisation, there was also an explicitly anarchist federation operating in the Ukraine at the same time. The first conference to organise a “Confederation of Anarchist Organisations of the Ukraine” was held between November 12th to
As such, when Palij notes that this council “had no decisive voice in the army’s actions,” he misses the point of the council. [Palij, Ibid.] It did not determine the military affairs of the army, but rather the interaction of the military and civilians and made sure that the decisions of congresses were executed. Thus the whole army was nominally under the control of the regional congresses of workers, peasants and insurgents. At these congresses, delegates of the toiling people decided upon the policy to be pursued by the Makhnovist Army. The Revolutionary Military Soviet existed to oversee that decisions were implemented, not to determine the military activities of the troops.

It should also be noted that women not only supported the Makhnovists, they also “fought alongside the men.” [Arshinov, Op. Cit., p. 145] However, “the participation of women in the movement (by all accounts, quite substantial)” needs “further investigation.” [Serge Cipko, “Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,” pp. 57–75, The Raven, no. 13, p. 75]

At its height, the army was made up of infantry, cavalry, artillery, machine-gun units, and special branches, including an intelligence service. As the success of partisan warfare depends upon mobility, the army gradually mounted its infantry in light carts (called “tachanka”) during 1918–19. As Michael Malet notes, this was a “novel tactic” and Makhno “could be described as the inventor of the motorised division before the car came into general use.” [Op. Cit., p. 85] The tachanka was used to transport as many troops as possible, giving the Makhnovists mobile infantry which could keep up with the cavalry. In addition, a machine-gun was sometimes mounted in the rear (in autumn 1919, the 1st machine-gun regiment consisted of 120 guns, all mounted on tachanki).

For the most part the Makhnovist army was a volunteer army, unlike all others operating in the Russian Civil War. However, at times of crisis attempts were made to mobilise troops. For example, the Second regional congress agreed that a “general voluntary and
that "[b]eginning in those years, a good many Oppositionists rallied to the ‘general line’ and renounced their errors since, as they put it, ‘After all, it is our programme that is being applied.’” Nor did it help that at “the end of 1928, Trotsky wrote to [the Opposition] from his exile … to the effect that, since the Right represented the danger of a slide towards capitalism, we had to support the ‘Centre’ — Stalin — against it.” [Op. Cit., p. 252 and p. 253]

However, Serge’s comments on “working-class democracy” are somewhat incredulous, given (as we noted above) that he knew fine well that the Opposition did not stand for it. His summary of the 1927 Platform was restricted to it aiming “to restore life to the Soviets … and above all to revitalise the Party and the trade unions… In conclusion, the Opposition openly demanded a Congress for the reform of the Party, and the implementation of the excellent resolutions on internal democracy that had been adopted in 1921 and 1923.” [Op. Cit., pp. 224–5] Which is essentially correct: once we understand that the Platform was based on redefining “workers’ democracy” to mean “party democracy” within the context of its dictatorship.

Yet we can hardly blame the likes of Harman, as it was Trotsky himself who started the process of revising history to exclude his own role in creating the evils he (sometimes) denounced his opponents within the party for. For example, the 1927 Platform states that “[n]ever before have the trade unions and the working mass stood so far from the management of socialist industry as now” and that “[p]re-revolutionary relations between foremen and workmen are frequently found.” [“The Platform of the Opposition”, Op. Cit., pp. 353–4] Which is hardly surprising, given that Lenin had argued for, and implemented, appointed one-man management armed with “dictatorial powers” from April 1918 onwards (see section H.3.14).

Trotsky himself supported it wholeheartedly. Thus we find him arguing in 1923 that the “system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have au-

“As the Makhno army gradually grew, it assumed a more regular army organisation. Each tactical unit was composed of three subordinate units: a division consisted of three brigades; a brigade, of three regiments; a regiment, of three battalions. Theoretically commanders were elected; in practice, however, the top commanders were usually carefully selected by Makhno from among his close friends. As a rule, they were all equal and if several units fought together the top commanders commanded jointly. The army was nominally headed by a Revolutionary Military Council of about ten to twenty members … Like the commanders, the council members were elected, but some were appointed by Makhno …. There also was an elected cultural section in the army. Its aim was to conduct political and ideological propaganda among the partisans and peasants.” [Palić, Op. Cit., pp. 108–9]

The Revolutionary Military Council was elected and directly accountable to the regional workers, peasants and insurgent congresses. It was designed to co-ordinate the local soviets and execute the decisions of the regional congresses.

Hence Voline:

“This council embraced the whole free region. It was supposed to carry out all the economic, political, social and military decisions made at the congress. It was thus, in a certain sense, the supreme executive of the whole movement. But it was not at all an authoritarian organ. Only strictly executive functions were assigned to it. It confined itself to carrying out the instructions and decisions of the congress. At any moment, it could be dissolved by the congress and cease to exist.” [Op. Cit., p. 577]
Red Army and traditional military forces. While the army structure changed depending on its circumstances, the core ideas remained. These were as follows:

“The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline.

‘Voluntary enlistment meant that the army was composed only of revolutionary fighters who entered it of their own free will.

‘The electoral principle meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.

‘Self-discipline meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander.” [Op. Cit., p. 96]

Voline paints a similar picture. He also notes that the electoral principle was sometimes violated and commanders appointed “in urgent situations by the commander himself,” although such people had to be “accepted without reservation” by “the insurgents of the unit in question or by the whole army.” [Op. Cit., p. 584]

Thus the Makhnovist army, bar some deviation provoked by circumstances, was a fundamentally democratic organisation. The guerrillas elected the officers of their detachments, and, at mass assemblies and congresses, decided policy and discipline for the army. In the words of historian Michael Palij:

authority over the selection of functionaries and their transfer and removal.” These economic organs must “in actual practice have full freedom of selection and appointment.” He also tied payment to performance, arguing that “the payment of the directors of enterprises must be made to depend on their balance sheets, like wages depend on output.” [quoted by Robert V. Daniels, A Documentary History of Communism, vol. 1, p. 237] In this, it must be noted, he was repeating arguments made during the civil war (as expressed, in say, Terrorism and Communism).

Harman argues that the Stalinist bureaucracy became a ruling class and Russia state-capitalist in 1928 when it implemented the first five year plan. This industrialisation was provoked by military competition with the west, which forced the “drive to accumulate” which caused the bureaucracy to attack “the living standards of peasants and workers.” He quotes Stalin: “to slacken the pace (of industrialisation) would mean to lag behind; and those who lag behind are beaten … We must make good this lag in ten years. Either we do so or they crush us.” Moreover, the “environment in which we are placed … at home and abroad … compels us to adopt a rapid rate of industrialisation.” [Op. Cit., pp. 15–6] Given that this was exactly the same argument as Trotsky in 1927, it seems far from clear that the “Left Opposition” presented any sort of alternative to Stalinism for it, after all, “took the stand that large-scale new investment was imperative, especially in heavy industry, and that comprehensive planning and new sources of capital accumulation should be employed immediately to effect a high rate of industrial expansion … They also stressed the necessity of rapidly overtaking the capitalist powers in economic strength, both as a guarantee of military security and as a demonstration of the superiority of the socialist system.” [Robert V. Daniels, The Conscience of the Revolution, p. 290]

Indeed, the idea of “primitive socialist accumulation” was raised by Yevgeni Preobrazhensky, a leading member of “Left Opposition”, in 1926. Like capitalist “primitive accumulation” (see section F.8), this argued that the State had to build industry by means of squeeze-
ing more surplus from the peasantry. Would the industrialisation advocated by the “Left Opposition” been obtained by any means other than politically enforced exploitation and the repression of first peasant and then, inevitably, proletarian protest? Faced with the same objective pressures and goals, would it have been any different if that faction had become dominant in the party dictatorship? It is doubtful, unless you argue that who is in charge rather than social relationships that determine the socialist nature of a regime. But, then again, that is precisely what Trotskyists like Harman do when they look at Lenin’s Russia.

As an added irony, as we discuss in section H.3.13, Harman’s party — the British SWP — argues that the USSR under Stalin was “state capitalist” due to “the international arms competition.” [Op. Cit., p. 17] Yet the economic policy of the “Left Opposition” was to industrialise Russia, on increasing accumulation in order to compete militarily with traditional capitalist states. As the 1927 Platform argued, it was a case that the “present tempo of industrialisation and the tempo indicated for the coming years are obviously inadequate” and so argued for an acceleration of industrialisation for the “Soviet Union must not fall further behind the capitalist countries, but in the near future must overtake them.” Thus industrialisation “must be sufficient to guarantee the defence of the country and in particular an adequate growth of war industries.” [“The Platform of the Opposition”, Op. Cit., pp. 369–70] Why does this not make Trotskyan advocate of state capitalism? All that the Oppositionists could argue is that their industrialisation would have been less brutal, less oppressive and with fewer privileges for the bureaucracy... but a nicer ruling class is still a ruling class.

Given this, it is easy to understand why we will ignore as fundamentally meaningless the pseudo-scientific comments on the relative weight of “social forces” in the rise of the bureaucracy so beloved by certain Trotskyists. This is because, ultimately, it is speculation on what could be the “objective” conditions required for a benevolent (party) dictatorship and state-capitalist economy to ex-

"[T]hrough combat losses, hardship, and sickness, the number of Makhno partisans was diminishing and they were cut off from their main sources of recruits and supplies. The Ukrainian peasants were tried of the endless terror caused by successive occupation of village after village by the Red troops and the Cheka. The continuous fighting and requisitions were leaving the peasants with little food and horses for the partisans. They could not live in a state of permanent revolution. Moreover, there was extreme drought and consequently a bad harvest in Ukraine, especially in the region of the Makhno movement.” [Op. Cit., pp. 240–1]

The state terrorism and the summer drought caused Makhno to give up the struggle in mid-August and instead fight his way to the Dniester with the last of his forces and cross into Romania on August 26. Some of his forces which stayed behind were still active for a short time. In November 1921 the Cheka seized 20 machine guns and 2,833 rifles in the new Zaporizhya province alone.

For more details of the history of the movement, Michael Malet’s Nestor Makhno in the Russian Revolution is an excellent summary. Michael Palij’s The Anarchism of Nestor Makhno is also worth consulting, as are the anarchist histories of Voline and Arshinov.

5 How were the Makhnovists organised?

Being influenced by anarchist ideas, the Makhnovists were organised along libertarian lines. This meant that in both civilian and military areas, self-management was practised. This section discusses the military organisation, while the next discusses the social aspect of the movement.

By practising self-management, the Makhnovists offered a completely different model of military organisation to that of both the
to shoot all Makhnovist prisoners, the “existence of roundup detach-
ments at the end of 1920, whose task was to re-collect prisoners freed
by the Makhnovists” shows that the Makhnovists did not reciprocate

At the end of 1920, the Makhnovists had ten to fifteen thou-
sand troops and the “growing strength of the Makhno army and its
successes caused serious concern in the Bolshevik regime, so it was
decided to increase the number of troops opposing Makhno.” [Palij,
Op. Cit., p. 237] All the pressure exerted by the Bolsheviks was
paying off. Although Makhno repeatedly broke through numerous
mass encirclements and picked up deserters from the Red Army,
his forces were being eroded by the far greater numbers employed
against them. In addition, “the Red command worked out new plans
to fight Makhno by stationing whole regiments, primarily cavalry, in
the occupied villages, to terrorise the peasants and prevent them from
supporting Makhno... Also the Cheka punitive units were constantly
trailing the partisans, executing Makhno’s sympathisers and the part-
sans’ families.” [Palij Op. Cit., p. 238] In spite of the difficult con-
ditions, Makhno was still able to attract some Red Army soldiers
even whole units to his side. For example, “when the partisans
were fighting Budenny’s Fourth Cavalry Division, their First Brigade,
commanded by Maslak, joined Makhno.” [Palij, Op. Cit., p. 239]

Makhno was forced to leave his home areas of operations and
flee east, then west again. By early January his forces had fought
24 battles in 24 days. This pattern continued throughout March
and April into May. In June, the Bolsheviks changed their strategy
to one of predicting where Makhno was heading and garrisoning
troops in that area. In one battle on 15 June, Frunze himself was
almost captured. Despite this, the insurgents were very weak and
their peasant base was exhausted by years of war and civil war. In
the most sympathetic areas, Red Army troops were garrisoned on
the peasants. Thus Palij:

...
“social forces” at work in Russia for he failed to understand the class
nature of the bureaucracy. He failed to understand that the bureau-
cracy overcame the party because the party itself was — inevitably —
corrupted by the social position it held.

Internally, then, the “Left Opposition” was no alternative. As for
Harman’s assertion that the “Left Opposition” stood for “inter-
ationalism,” that is less straight forward than he would like to think.
As noted, it favoured the industrialisation of Russia to defend the
regime against its foreign competitors. As such, the “Left Oppo-
sition” were as committed to building “socialism” in the USSR as
were the Stalinist promoters of “socialism in one country.” The dif-
ference was that the “Left Opposition” also argued for spreading
revolution externally as well. For them, this was the only means of
assuring the lasting victory of “socialism” (i.e. a nationalised econ-
omy) in Russia but they also aimed at building the industrial base
in a single country along with this.

Yet this driving necessity to “defend” the conquests of October
produced contradictions from the start. Most obviously, this meant
— just like the Stalinists later — interfering in Communist Parties
of other nations to produce outcomes favourable to the USSR. Thus
we find the German Council Communists forming the “Fourth
International” in protest to the Bolshevik domination of the Third
International (Comintern) and the imposition of policies (such as
parliamentarianism) “determined not only by the needs of commu-
nist agitation in those countries, but also by the political needs of So-
viet Russia.” [Anton Pannekoek, “World Revolution and Communist
Tactics: Afterword”. Pannekoek and Gorter’s Marxism, p. 144]

As well as favouring the right-wing in various national parties
(not least, the German and British) the Bolshevik regime signed
numerous agreements with capitalist nations. As anarchist Marie-
Louise Berneri summarised in the 1940s:

they had received undated anti-Makhnovist proclamations on that
date. [Malet, Ibid.]

At 3am on the 26th the attacks on the Makhnovists started.
Alongside this one of the Makhnovist commanders was lured to
a meeting by the Bolsheviks, seized and shot. Some Makhnovist
forces managed to break through the encircling Bolsheviks but
only after taking heavy losses — of the 2,000–4,000 cavalry at
Simferopol, only 250 escaped. By the 1st December, Rakovsi
reported the imminent demise of the Makhnovists to the Kharkiv
soviet only to have to eat his words when Makhno routed the 42nd
division on the 6th, retaking Hulyai Pole and 6,000 prisoners, of
whom 2,000 joined his forces. [Malet, Op. Cit., p. 72] Simultane-
ously with the attack on the Makhnovists, the Bolsheviks rounded
up all known anarchists in the Ukraine (many of whom were
in Kharkiv waiting for a legally organised Nabat conference to
begin).

In the resulting struggle between the two forces, as Palij
notes, the “support of the population was a significant advantage
to Makhno, for they supplied the partisans with needed material,
including horses and food, while the Red troops operated among a
foreign and hostile people.” The Bolsheviks found that the peasants
not only refused to supply them with goods, they also refused to
answer their questions or, at best, gave answers which were vague
and confusing. “In contrast to the Bolsheviks, Makhno partisans
received detailed, accurate information from the population at all

Frunze brought in extra forces and ordered both the “annihila-
tion of the Makhnovists” and total disarming of the region. Plagued
by desertions, it was also ordered that all Makhnovist prisoners
were to be shot, to discourage the local population and Red Army
soldiers thinking of joining them. There is also evidence of unrest in
the Azov fleet, with acts of sabotage being carried out by sailors to
prevent their weapons being used against the Makhnovists. [Malet,
Op. Cit., p. 73] While it was common practice for the Bolsheviks
On hearing this success on 16th November, the reaction of the Makhnovista still at Hulyai Pole was cynical but realistic: "It's the end of the agreement. I'll bet you anything that the Bolsheviks will be on us within the week." [quoted by Malet, Op. Cit., p. 70] They were not wrong. Already Frunze, the Red Army commander, had ordered two entire cavalry armies to concentrate near Hulyai Pole at the same time as he ordered the Makhnovist forces to the Caucasus Front! By 24th November Frunze was preparing for the treachery to come, in Order 00149 (which was not sent to the Makhnovist units) saying if they had not departed to the Caucasus front by the 26th “the Red regiments of the front, who have now finished with Wrangel, will start speaking a different language to these Makhnovist youths.” [quoted by Malet, Op. Cit., p. 71]

Of course this treachery went right to the top, just before the 26th “deadline” (which Makhno, not having seen the orders, was unaware of), Lenin urged Rakovski, head of the Ukrainian government to "[k]eep a close watch on all anarchists and prepare documents of a criminal nature as soon as possible, on the basis of which charges can be preferred against them." [quoted by Malet, Op. Cit., p. 71] Indeed, it later appeared the treachery had been prepared from at least 14th or 16th November, as prisoners captured later stated “Quite early in its history, the allegedly revolutionary aims of the Comintern stood in contrast to the diplomatic relations of the Soviet Union with other countries.”

“Thus the Bolsheviks entered into commercial agreements with Mussolini’s Fascist Government soon after it assumed power in Italy. On the morning after the murder of the Socialist deputy Matteotti the Soviet Ambassador called on Mussolini. At the very same time when the German Communists were planning the overthrow of the State, the Russian government was not only making trade agreements with the German capitalist government, but even making secret arrangements whereby the Germans could evade the military terms of the Treaty of Versailles by establishing arms factories, and training armies on Russian soil. Wherever a clash occurred the claims of Soviet foreign policy prevailed over the needs of the revolutionary class struggle.” [Neither East Nor West, p. 63]

It is worth discussing the relations between Lenin’s Russia and the German military in more detail. Negotiations between the two states started as early as 1920 and involved an important aide of Trotsky’s. The fruit of the German military’s negotiations were “secret military understandings” and by September 1922 German officers and pilots were training in Russia. An organisation of German military and industrial enterprises in Russia was established and under its auspices shells, tanks and aircraft were manufactured in Russia for the German army (an attempt to produce poison gas failed). [E.H. Carr, The Bolshevik Revolution, vol. 3, p. 327 and pp. 431–2] In April, 1923, the German High Command ordered 35 million gold marks worth of war material and “[w]ith this military rapprochement between Germany and Russia went increasing trade between the two countries. After the Treaty of Rapallo, Krassin, the People’s Commissar for Foreign Trade warned the German workers...”
(in an interview in 'Rote Fahne') against strikes which could lead to the interruption of deliveries of essential materials to Russia. Already the interests of the Soviet State were above those of the German proletariat.” [Aberdeen Solidarity, Spartakism to National Bolshevism, p. 24]

These relations had their impact on the politics of the German Communist Party, specifically its so-called “Schlageter Line” of co-operation with nationalist and fascist groups. This policy was first promoted in the Comintern by leading Communist Radek and inspired by Zinoviev. According to Radek, “national Bolshevism” was required as the “strong emphasis on the nation in Germany is a revolutionary act.” [quoted by E.H. Carr, The Interregnum 1923–1924, p. 177] During the summer of 1923, joint meetings were held and both communist and fascist speakers urged an alliance with Soviet Russia against the Entente powers. So, for several months, the German Communists worked with the Nazis, going so far as to stage rallies and share podiums together. The Communist leader Ruth Fischer even argued that “he who denounces Jewish capital … is already a warrior in the class war, even though he does not know it” (she latter said her remarks had been distorted). [quoted by Carr, Op. Cit., p. 182f] This continued until “the Nazis leadership placed a ban on further co-operation.” [Carr, Op. Cit., p. 183] Thus the activities of the German communists were tailored to fit into the needs of Lenin’s regime.

How “internationalist” was it to arm and train the very forces which had crushed revolutionary workers in Germany between 1919 and 1921? How sensible was it, when pressing for world revolution, to enhance the power of the army which would be used to attack any revolution in Germany? Which, of course, was what happened in 1923, when the army repressed the Comintern inspired revolt in November that year. Trotsky was one of the staunchest in favour of this insurrection, insisting that it be fixed for the 7th of that month, the anniversary of the Bolshevik seizure of power. The attempted revolt was a dismal failure. Rather than a revolu-

In July and August the Makhnovists went on the offensive, raiding the Bolsheviks in three provinces and attacking the Red Army infrastructure. Wrangel began another offensive in September, driving the Red Army back again and again and again and threatening the Makhnovist area. Faced with Wrangel’s success, the Bolsheviks started to rethink their position on Makhno, although on the 24th of September the Bolshevik commander-in-chief Kamenev was still declaring the need for “the final liquidation of the Makhno band.” [Malet, Op. Cit., p. 62] A few days later, the Bolsheviks changed their mind and negotiations began.

So, by October 1920, the success of the Wrangel offensive was again forcing the Bolsheviks and Makhnovists to put aside their differences and take on the common enemy. A deal was reached and on October 2nd, Frunze, the new Red Army commander of the Southern Front, ordered a cessation of hostilities against the Makhnovists. A statement from the Soviet of the Revolutionary Insurgent Army of the Ukraine (Makhnovists) explained the treaty as necessitated by the White offensive but also representing a victory over the “high-handed communists and commissars” in forcing them to recognise the “free insurrection.” [Malet, Op. Cit., p. 64]

The agreement was signed between October 10th and 15th. It consisted of two parts, a Political and a Military agreement (see section 13 for full details). The Political agreement simply gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution. The Military agreement resulted in the Makhnovists becoming part of the Red Army, keeping their established internal structure and, significantly, stopped them from accepting into their ranks any Red Army detachments or deserters therefrom. According to Bolshevik sources, “there was never the slightest intention on the Bolshevik side of keeping to the agreement once its military value had passed.” [David Footman, Op. Cit., p. 296]

Even before the agreement came into effect, the Makhnovists were fighting alongside the Bolsheviks and between October 4 and
part of the Bolshevik administrative apparatus, which acted as “informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans.” [Palij, Op. Cit., pp. 212–3]

In addition to this suffering, the Bolshevik decision to attack Makhno rather than push into the Crimea was also to prolong the civil war by nine more months. The Whites re-organised themselves under General Wrangel, who began a limited offensive in June. Indeed, the Bolshevik “policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region.” [Palij, Op. Cit., p. 214]

It was widely believed on the White side that Makhno was ready to co-operate with them and, desperate for men, Wrangel decided to appeal to the Makhnovists for an alliance. Their response was simple and direct, they decided to immediately execute his delegate and publish both his letter and a response in the Makhnovist paper “The Road to Freedom.” [Malet, Op. Cit., p. 60] Of course, this did not stop the Bolsheviks later claiming such an alliance existed!

Ironically enough, at a general assembly of insurgents, it was decided that “the destruction of Wrangel” would “eliminate a threat to the revolution” and so free “all of Russia” from “the counter-revolutionary barrage.” The mass of workers and peasants “urgently needed an end to all those wars” and so they proposed “to the Communists that hostilities between them and the Makhnovists be suspended in order that they might wipe out Wrangel. In July and August, 1920, telegrams to this effect were sent to Moscow and Kharkov.” There was no reply and the Bolsheviks “continued their war against the Makhnovists, and they also continued their previous campaign of lies and calumnies against them.” [Arshinov, Op. Cit., p. 176]

In Berlin on the 7th of November, there was a dinner at the Russian embassy for German officers, industrialists and officials to celebrate the anniversary of the Russian revolution. [Carr, Op. Cit., p. 205 and p. 226] The obvious question is how many Communists and workers killed in the revolt had been at the receiving end of weapons and training supplied to the German army by the Red Army?

To state another obvious point: “We are now a long way from the insistence of Liebknecht that, for socialists, the main enemy lies in your own country. The activities above need outlining, not refutation. It cannot be claimed that arming capitalist armies, or working with fascists helps raise the consciousness of the working class. What is important is to point out how by 1923, the activities of the supine K.P.D. were tailored to fit the needs of Russia, in this case an alliance with Germany.” [Aberdeen Solidarity, Op. Cit., p. 25]

Moreover, the nature of any such revolution is what counts. The “Left Opposition” would have encouraged revolutions which followed (to re-quote the Platform of the Opposition) the “Leninist principle” (“inviolable for every Bolshevik”) that “the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” It would have urged centralisation. It would have opposed workers’ self-management in favour of nationalisation and one-man management. In other words, the influence of the “Left Opposition” would have been as detrimental to the global workers’ movement and other revolutions as Stalin’s was (or, for that matter, Lenin’s) although, of course, in a different way. Generalising Lenin’s state capitalism would not have resulted in socialism, no matter how many revolutions in the west the “Left Opposition” encouraged. Simon Pirani puts it well:

“The legacy of the Bolsheviks’ actions was not limited to their impact on Soviet history, though. The effect on the political development of the workers’ movement internationally was just as important. Authoritarian, van-
guardist and statist ways of thinking and assumptions spread out from Moscow — not only directly through the Comintern and the Communist Parties, which for decades influenced radical workers’ struggles, but also in many indirect ways. Moscow’s instructions to Communist Parties might or might not be obeyed, but, far beyond the ranks of those parties, Bolshevik ideologies clouded, obstructed and diverted efforts to develop socialist ideas and strategies for working-class movements. Bolshevik ideology packed the powerful punch of association with the first successful workers’ revolution: it was the great shadow of 1917, hanging over the twentieth century like the shadow of 1789 hung over the nineteenth century, that gave these ideologies force. Socialism was damaged not only by the choices the Bolsheviks made, but by their sincere insistence that those choices were the continuation of the revolution, and by the powerful influence of their ideology on subsequent movements of social liberation.” [The Russian Revolution in Retreat, p. 241]

Finally, the fate of the “Left Opposition” should be noted. As befell the previous oppositions, the party machine was used against it. Indeed, by repeatedly and publicly proclaiming himself the greatest defender of party unity and the strongest opponent of inner-party factions, Trotsky himself supplied his enemies with the best argument in favor of the dissolution of the “Left Opposition”. Nor was he willing to call upon any social forces outwith the party to combat the bureaucracy. Indeed, he refused to publicly support the party members who had took part in the workers’ strike movement and had been expelled from the party. Worse, “Trotsky, in the very letters to the politburo in which he fired his first broadsides against the ‘unhealthy regime’ and lack of internal party democracy, supported repressive action against the far left.” Indeed, he “welcomed an in-

In addition, war with Poland did not break out until the end of April, over three months later. Needless to say, the Makhnovists did realise the political motivations behind the order. As Arshinov notes, “[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this.” Moreover, the Makhnovists considered the move “physically impossible” as “half the men, the entire staff and the commander himself were in hospital with typhus.” [Op. Cit., p. 163]

This was the signal for nine months of bitter fighting between the Red Army and the Makhnovists. Military events in this period are confused, with the Red Army claiming victory again and again, only for the Makhnovists to appear somewhere else. Hulyai Pole changed hands on a couple of occasions. The Bolsheviks did not use local troops in this campaign, due to fear of fraternisation. In addition, they used “new tactics,” and “attacked not only Makhno’s partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” They also set up “Committees of the Poor” as
Whites would probably have entered Moscow in December 1919 at the latest.” [Op. Cit., p. 625]

In December the Red Army advance made possible by Makhno’s devastation of Denikin’s supply lines continued. By early January the Reds had split White forces into three and their troops had reached Katerynoslav. The attitude of the Bolsheviks to the Makhnovists had already been decided. On December 12th, 1919, Trotsky stated that when the two forces met, the Bolsheviks had “an order … from which we must not retreat one single step.” While we discuss this secret order in more depth in section 13, we will note here that it gave partisans the option of becoming “fully subordinate to [Bolshevik] command” or “be subjected to ruthless punishment.” [How the Revolution Armed, vol. II., pp. 110–1 and p. 442] Another secret order to the 45th division issued on January 4th instructed them to “annihilate Makhnovist bands” and “disarm the population.” The 41st was sent “into reserve” to the Hulyai Pole region. This was “five days before Makhno was outlawed, and shows that the Bolshevik command had a clear view of Makhno’s future, even if the latter did not.” [Malet, Op. Cit., p. 54]

Unaware of this, the Makhnovista put out propaganda leaflets directed at the Red Army rank and file, appealing to them as comrades. At Aleksandrovsk on December 5th talks occurred between a representative of the Makhnovists and the commander of the 45th division’s 1st brigade. These broke down when Makhno was ordered to the Polish front, which the Makhnovists refused. On January 9th, Yegorov, commander of the Red Army southern front, used this pretext to outlaw Makhno. This outlawing was engineered deliberately by the Bolsheviks:

“The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon struction by Dzerzhinskii to party members immediately to report ‘any groupings within the party’, i.e. the Workers Group and Workers Truth, not only to the CC but also to the GPU, and emphasized that making such reports was ‘the elementary duty of every party member’.” [Simon Pirani, Op. Cit., p. 215]

Thus, the Stalinists began by using the very techniques the likes of Trotsky had supported against their opponents years before. For example, the Eighth Party Congress in December 1919 agreed that “[a]ll decisions of the higher jurisdiction are absolutely binding for the lower.” Moreover, “[e]ach decision must above all be fulfilled, and only after this is an appeal to the corresponding party organ permissible.” Centralism was reaffirmed: “The whole matter of assignment of party workers is in the hands of the Central Committee of the party. Its decision is binding for everyone...” These decisions were used as a weapon against the opposition: “Translating this principle into practice, the Secretariat under Krestinsky [a Trotsky supporter] began deliberately to transfer party officials for political reasons, to end personal conflicts and curb opposition.” In 1923, the Secretariat “brought into play its power of transfer, which had already proven to be an effective political weapon against the Ukrainian Leftists and the Workers’ Opposition. [Robert V. Daniels, Op. Cit., p. 113 and p. 229]

The party itself had been reorganised, with “the replacement of local party committees, which were at least democratic in form, by bureaucratically constituted ‘political departments.’ With the institution of such bodies, all political activity ... was placed under rigid control from above. This innovation was taken from the army; as its origin suggests, it was strictly a military, authoritarian institution, designed for transmitting propaganda downward rather than opinion upward.” [Daniels, Op. Cit., p. 114] Needless to say, it was Trotsky himself who implemented that regime in the army in March 1918 when he abolished the soldier’s committees and elected officers, stating that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by de-
This, of course, did not stop him asserting in 1936 that the “demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war.” [The Revolution Betrayed, pp. 89–90]

It should also be remembered that when, in early in 1922, the “Workers’ Opposition” had appealed to Communists abroad in the form of a statement to a Congress of the Communist International (Comintern) which included the accusation that the “party and trade-union bureaucracy … ignore the decisions of our congresses on putting workers’ democracy [inside the party] into practice.” Their “effort to draw the proletarian masses closer to the state is declared to be ‘anarcho-syndicalism,’ and its adherents are subjected to persecution and discrediting.” They argued that the “tutelage and pressure by the bureaucracy goes so far that it is prescribed for members of the party, under threat of exclusion and other repressive measures, to elect not those whom the Communists want themselves, but those whom the ignorant high places want.” [quoted by Daniels, Op. Cit., p. 162] It was Trotsky who defended the party against these claims — unsurprisingly, the Bolshevik dominated Comintern decided against the opposition.

Even more ironically, the dominant faction of the bureaucracy heaped upon Trotsky’s opposition faction similar insults to those he (and Lenin) had heaped upon previous oppositions inside and outside the party. In 1924, the Trotskyist opposition was accused of having “clearly violated the decision of the Tenth Congress … which prohibited the formation of factions within the party” and has “enlivened the hopes of all enemies of the party, including the West-European bourgeoisie, for a split in the ranks of the Russian Communist Party.” It was a “direct departure of Leninism” and “also a clearly expressed petty-bourgeois deviation” reflecting “the pressure of the petty bourgeois on the position of the proletarian party

Nationalists disputed this, pointing to the fighting that had started two days before between them and the Whites).

This meant that the Makhnovists were forced to fight the numerically superior Whites. After two days of desperate fighting, the Whites were routed and two regiments were destroyed at the battle of Peregonovka village. Makhno’s forces then conducted an incredibly rapid advance in three directions helped by their mobile cart-transported infantry, in three days smashing three reserve regiments and at the greatest point advancing 235 miles east. On the 6th October a drive to the south started which took key White ports and captured a huge quantity of equipment including 600 trucks of British-supplied ammunition and an aeroplane. This was disastrous for Denikin whose forces had reached the northernmost point on their advance on Moscow, for these ports were key for his supply routes. The advance continued, cutting the railway route and so stopping all shells reaching Denikin’s Moscow front.

Denikin was forced to send some of his best troops from the Moscow front to drive back the Makhnovists and British boats were sent to towns on the coast where Makhno might retreat through. The key city of Katerinoslav was taken with the aid of a workers’ uprising on November 9th and held for a month before the advancing Whites and a typhoid epidemic which was to devastate the Makhnovista ranks by the end of the year forced them out of the city. In December, the Red Army advance made possible by Makhno’s devastation of Denikin’s supply lines continued.

Thus Voline:

“It is necessary to emphasise here the historic fact that the honour of having annihilated the Denikinist counter-revolution in the autumn of 1919, belongs entirely to the Makhnovist Insurrectionary Army. If the insurgents had not won the decisive victory of Peregonovka, and had not continued to sap the bases in Denikin’s rear, destroying his supply service for artillery, food and ammunition, the
At the end of July, Makhno recalled the troops he had earlier left in the Red Army and by mid-August the forces met up, becoming an army of some 15,000. At Mykolaiv, the Red Army units were defecting to Makhno in large numbers due in part to the feeling that the Red Army were abandoning the defence of the Ukraine. This was the start of Denikin’s massive push north and Petliura’s push east. By the end of August, Makhno felt strong enough to go on the offensive against the Whites. Superior White forces pushed the Makhnovists further and further west, away from their home region. “Denikin,” in Voline’s words, “not only made war on the army as such, but also on the whole peasant population. In addition to the usual persecutions and beatings, the villages he occupied were burnt and wrecked. The greater part of the peasants’ dwellings were looted and wrecked. Hundreds of peasants were shot. The women maltreated, and nearly all the Jewish women ... were raped.” This repression “obliged the inhabitants of the villages threatened by the approach of the Denikinists to abandon their hearths and flee. Thus the Makhnovist army was joined and followed in their retreat by thousands of peasant families in flight from their homes with their livestock and belongings. It was a veritable migration. An enormous mass of men, women and children trailed after the army in its slow retreat towards the west, a retreat which gradually extended over hundreds of kilometres.” [Op. Cit., p. 607]

Meeting the Nationalists in mid-September, it was agreed on both sides that fighting would only aid the Whites and so the Makhnovists entered a non-aggression pact with Petliura. This enabled them to offload over 1,000 wounded. The Makhnovists continued their propaganda campaign against the Nationalists, however. By the 24th of September, intelligence reports suggested that White forces had appeared to the west of their current position (i.e. where the Nationalists were). The Makhnovists concluded that the only way this could have happened was if the Nationalists had allowed the Whites to cross their territory (the

and its policy.” [contained in Daniels, A Documentary History of Communism, vol. 1, pp. 247–8] In 1927, it was the case that the “United Opposition” was “[objectively... a tool of the bourgeois elements.” [quoted by Daniels, The Conscience of the Revolution, p. 318] This, of course, did not deter Trotsky making similar claims against his opponents on the left during the 1930s.

Ultimately, the Stalinists had a key weapon in its armoury: “the GPU security police. Having been used against the Workers Group and Workers Truth, it was now mobilized, covertly, against the new opposition.” [Pirani, Op. Cit., p. 219] Indeed, its use in 1923 (as sanctioned by Trotsky) was used as a precedent when it was the turn of the “Left Opposition”.

So what would have happened if the “Left Opposition” had won? The first task would have been a purge of the party in order to cleanse it of bureaucratic and corrupt elements. In this it would have repeated the events of 1921 when Lenin had “proclaimed a purge of the Party, aimed at those revolutionaries who had come in from other parties — i.e. those who were not saturated with the Bolshevik mentality. This meant the establishment within the Party of a dictatorship of the old Bolsheviks, and the direction of disciplinary measures, not against the unprincipled careerists and conformist late-comers, but against those sections with a critical outlook.” [Serge, Op. Cit., p. 135] It is unlikely that another purge would have been any more successful.

Given the identical social relations between Leninism and Stalinism, all that is left to the supporters of Leninism seeking to differentiate it from Stalinism is to focus on the regime within the Communist Party itself. It is stressed that the Bolshevik party under Lenin was far more democratic than under Stalin and, moreover, the repression of the late 1920s onwards simply did not exist. True, although the suppression of opposition currents within Bolshevism did not start under Stalinism for it had existed to some degree from the start. Of course, the Stalinists did not stop there. Once the “Left Opposition” was broken its members were brutally
repressed. Some were simply murdered, many more arrested and placed into prison camps where many died. Which shows, in its own way, a key difference between Lenin’s and Stalin’s regime. Under Lenin, the opposition outside the party was brutally repressed. Stalin simply applied the methods used by Lenin outside the party to oppositions within it. As Emma Goldman summarised:

“It does not occur to him that one might detest the savage in the Kremlin and his cruel regime and yet not exonerate Leon Trotsky ... In point of truth I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is. No, I hold no brief for the present ruler of Russia. I must, however, point out that Stalin did not come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner.” [“Trotsky protests too much”, Writings of Emma Goldman, p. 251]

Ultimately, Trotsky’s “opposition” to the regime he helped shape so much was based on the utopian notion that there could be a benevolent dictatorship. That he was sincere in his illusions is as irrelevant as to pointing to a better internal party regime to differentiate Lenin’s regime from Stalin’s.

4 What do these oppositions tell us about the essence of Leninism?

The history and ideas of these oppositions are important in evaluating the claims of Leninists. If, as modern-day supporters of Bolshevism argue, Leninism is inherently democratic then we have to come to the conclusion that none of the party oppositions represented the real Leninist tradition. Given that many Trotskyists sup-
Due to this Bolshevik betrayal, the Makhnovist sector was in very grave danger. At Hulyai Pole, a peasant regiment was scraped together in 24 hours in an attempt to save the town. It encountered White Cossacks ten miles away from the town and was mown down. The Whites entered Hulyai Pole the next day (June 6th) and gave it a good going over. On the same day, the Bolsheviks issued an order for Makhno’s arrest. Makhno was warned and put in his resignation, arguing that it was “an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs.” Combined with the “hostile attitude” of the Bolshevik authorities towards him, which would lead “unavoidably to the creation of a special internal front,” Makhno believed it was his duty to do what he could to avert it, and so he left his post. [quoted by Arshinov, Op. Cit., p. 129] While Makhno escaped, his staff was not so lucky. Five of them were arrested the same day and shot as a result of Trotsky’s order to ban the fourth congress.

Leaving his troops in the frontline, Makhno left with a small cavalry detachment. While leaving the rest under Red command, Makhno made a secret agreement with his regimental commanders to await a message from him to leave the Red Army and join up against with the partisans. On the 9th and 10th of June, Hulyai Pole was retaken by Bolshevik forces, who took the opportunity to attack and sack the Makhnovist communes. [Arshinov, Op. Cit., p. 86f]

After intense fighting, the Whites finally split the Southern Front into three on June 21st. Needless to say, Trotsky and the Bolsheviks blamed this on the partisan forces (even stating that they had “opened the front” to the Whites). This was nonsense, as noted above.

According to intense fighting, the Whites finally split the Southern Front into three on June 21st. Needless to say, Trotsky and the Bolsheviks blamed this on the partisan forces (even stating that they had “opened the front” to the Whites). This was nonsense, as noted above.

After leaving the front, Makhno took refuge in the Chorno-Znamenski forest before continuing the retreat north and skirmishing with Red Army units. This brought him into the territory held by Hryhoriyiv and this, in turn, meant they had to proceed care-

port the “Left Opposition” as the only alternative to Stalinism, defending the true essence of Bolshevism (see last section for details), we can only wonder what the real Bolshevik tradition is. After all, the “Left Opposition” wholeheartedly supported party dictatorship, remained silent on workers’ control and urged the speeding up of industrialisation to meet military competition from the west — all things which Leninists say they oppose in Stalinism as being incompatible with genuine socialism.

However, there were groups which did raise more substantial critiques of mainstream Bolshevism and did so while Lenin and Trotsky were heads of the State. How Lenin and Trotsky responded to them is significant. Rather than embrace them as expressing what they (according to Leninists) really stood for, they used state repression to break them. This, anarchists argue, shows the essence of Leninism was expressed by the regime Lenin and Trotsky had created — and now defended — rather than selective quoting and wishful thinking about the “Left Opposition”.

The only groups associated with the Bolshevik party which advocated democracy for working people were the dissidents of the “Workers’ Truth” and “Workers’ Group.” Both were expelled from the party and their members arrested by the Bolsheviks. The latter group is better known and so, by necessity, we will concentrate on that. It was also the largest and boldest, composed mainly of workers. It attacked the “purely bureaucratic way” industry was run and urging “the direct participation of the working class” in it. However, unlike the “Workers’ Opposition”, the “Workers’ Group” extended their call for workers’ democracy to beyond the workplace and party. They wondered if the proletariat might not be “compelled once again to start anew the struggle ... for the overthrow of the oligarchy.” They noted that ruling clique in the party “will tolerate no criticism, since it considers itself just as infallible as the Pope of Rome.” [quoted by E.H. Carr, The Interregnum 1923–1924, p. 82 and p. 269]
The “Workers’ Group” is associated with the old worker Bolshevik G. T. Miasnikov, its founder and leading thinker (see Paul Avrich’s “Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers’ Group” [The Russian Review, Vol. 43, No. 1, pp. 1–29] for more details). As Ante Ciliga recalled about the political debate in the prison camps in the late 1920s and early 1930s (for was more freedom of expression in prison than in Bolshevik society):

“In the criticism of the Lenin of the revolutionary period the tone was set by ... the Workers Group ... [It was], in origin, from the Bolshevik old guard. But ... they criticised Lenin’s course of action from the beginning, and not on details but as a whole. The Workers Opposition denounced Lenin’s economic line. The Workers Group went even farther and attacked the political regime and the single party established by Lenin prior to the NEP [that is before the spring of 1921, when the New Economic Policy (NEP) was introduced]...

“Having put as the basis of its programme Marx’s watchword for the 1st International — ‘The emancipation of the workers must be the task of the workers themselves’ — the Workers Group declared war from the start on the Leninist concept of the ‘dictatorship of the party’ and the bureaucratic organisation of production, enunciated by Lenin in the initial period of the revolution’s decline. Against the Leninist line, they demanded organisation of production by the masses themselves, beginning with factory collectives. Politically, the Workers Group demanded the control of power and of the party by the worker masses. These, the true political leaders of the country, must have the right to withdraw power from any political party, even from the Communist Party, if they judged that that party was not defending their interests. Contrary to ... the majority of the Workers’
36] The Makhnovist advance stopped due to the non-fulfilment of an urgent order for ammunition.

On the 19th of May, a White counter-attack not only stopped the advance of the Red Army, it forced the 9th division (and then the Makhnovists) to retreat. On the 29th, the Whites launched a further offensive against the northern Donbas, opening a gap between the 13th and 8th Red Armies. Due to the gravity of the situation, the RSV summoned a fourth congress for June 15th. Trotsky not only banned this congress but took the lead in slandering the Makhnovists and calling for their elimination (see section 13 for details). As well as “this deliberately false agitational campaign, the [Bolshevik] blockade of the region was carried to the limit ... The provisioning of shells, cartridges and other indispensable equipment which was used by daily at the front, ceased completely.” [Arshinov, Op. Cit., p. 118] Palij confirms this, noting that “the supplies of arms and other war material to Makhno was stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops.” [Op. Cit., p. 175] David Footman also notes that the Bolshevik “hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition.” He also mentions that “[i]n the latter part of May the Cheka sent over two agents to assassinate Makhno.” [Civil War in Russia, p. 271]

Needless to say, Trotsky blamed this White success to the Makhnovists, arguing it was retreating constantly before even the slightest attack by the Whites. However, this was not the case. Analysing these events in July 1919, Antonov (the commander of the Southern Front before Trotsky replaced him) wrote:

“Above all, the facts witness that the affirmations about the weakness of the most contaminated region — that from Hulyai Pole to Berdiansk — are without foundation ... It is not because we ourselves have been better organised militarily, but because those troops were directly defending their native place ... Makhno stayed at

Opposition, for whom the demand for ‘workers’ democracy’ was practically limited to the economic domain, and who tried to reconcile it with the ‘single party,’ the Workers Group extended its struggle for workers’ democracy to the demand for the workers to choose among competing political parties of the worker milieu. Socialism could only be the work of free creation by the workers. While that which was being constructed by coercion, and given the name of socialism, was for them nothing but bureaucratic State capitalism from the very beginning.” [The Russian Enigma, pp. 277–8]

The group had its origins when Miasnikov had exposed the abuses he had seen first hand in Lenin’s regime. In 1921, he stated the obvious that “[i]t stands to reason that workers’ democracy presupposes not only the right to vote but also freedom of speech and press. If workers who govern the country, manage factories, do not have freedom of speech, we get a highly abnormal state.” He urged total freedom of speech for all. He discussed corruption within the party, noting that a “special type of Communist is evolving. He is forward, sensible, and, what counts most, he knows how to please his superiors, which the latter like only too much.” Furthermore, “[i]f one of the party rank and file dares to have an opinion of his own, he is looked upon as a heretic and people scoff at him saying, ‘Wouldn’t Ilyitch (Lenin) have come to this idea if it were timely now? So you are the only clever man around, eh, you want to be wiser than all? Ha, ha, ha! You want to be clever than Ilyitch!’ This is the typical ‘argumentation’ of the honourable Communist fraternity.” “Any one who ventures a critical opinion of his own,” he noted, “will be labelled a Menshevik or Social-Revolutionist, with all the consequences that entails.” [quoted by G. P. Maximoff, The Guillotine at Work, p. 269 and p. 268]

Lenin tried to reply to Miasnikov’s demand for freedom of speech. Freedom of the press, Lenin argued, would, under existing
circumstances, strengthen the forces of counter-revolution. Lenin rejected freedom in the abstract: "what sort of freedom of the press? What for? For which class?" “We do not believe in ‘absolutes.’ We laugh at ‘pure democracy,’” he asserted. Freedom of press in Russia, Lenin maintained, “surrounded by the bourgeois enemies of the whole world, means freedom of political organisation for the bourgeoisie and its most loyal servants, the Mensheviks and Socialist Revolutionaries” and so “means facilitating the enemy’s task, means helping the class enemy.” In short: “We have no wish to commit suicide, and therefore, we will not do this.” According to Lenin, freedom of speech was a “non-party, anti-proletarian slogan” as well as “an obvious political mistake.” [Collected Works, Vol. 32, pp. 504–8]

Miasnikov – rightly – was not convinced by Lenin’s arguments. He wrote a strong reply reminding Lenin of his revolutionary credentials:

“You say that I want freedom of the press for the bourgeoisie. On the contrary, I want freedom of the press for myself, a proletarian, a member of the party for fifteen years, who has been a party member in Russia and not abroad. I spent seven and a half of the eleven years of my party membership before 1917 in prisons and at hard labour, with a total of seventy-five days in hunger strikes. I was mercilessly beaten and subjected to other tortures ... I escaped not abroad [like Lenin], but for party work here in Russia. To me one can grant at least a little freedom of press. Or is it that I must leave or be expelled from the party as soon as I disagree with you in the evaluation of social forces? Such simplified treatment evades but does not tackle our problems ...

“To break the jaws of international bourgeoisie, is all very well, but the trouble is that, you raise your hand against the bourgeoisie and you strike at the worker. Which class authority and joined the Bolsheviks once that that regime’s armed forces had disintegrated. Arshinov notes that he had “never been a revolutionary” and that there had been a “great deal of adventurism in his joining the ranks of the Petliurists and then the ranks of the Red Army.” His temperment was mixed, consisting of “a certain amount of sympathy for oppressed peasants, authoritarianism, the extravagance of a Cossack chieftain, nationalist sentiments and anti-Semitism.” [Op. Cit., p. 110]

Hryhoriyiv started his revolt by issuing a Universal, or declaration to the Ukrainian people, which contained a virulent attack on the Bolsheviks as well as one explicit anti-Semitic reference, but without mention of Makhno. The height of the revolt was his appearance in the suburbs of Katerynoslav, which he was stopped from taking. He started a pogrom in Yelyzavethrad which claimed three thousand victims.

Once the Makhnovists had been informed of this rebellion, an enlarged staff and RMS meeting was held. A telegram was sent to the soldiers at the front urging them to hold the front and another to the Bolsheviks with a similar message. A few days latter, when more information had been received, a proclamation was issued against Hyyhoriyiv attacking him for seeking to impose a new authority on the working class, for encouraging toiling people to attack each other, and for inciting pogroms. [Arshinov, Op. Cit., pp. 112 and pp. 114–7]

While it took a fortnight for Red forces to contain Hryhoriyiv without trouble, this involved using all available reverses of all three Ukrainian armies. This left none for Makhno’s hard-pressed forces at the front. In addition, Dybenko withdrew a front-line regiment from Makhno for use against the revolt and diverted reinforcements from the Crimea which were intended for Makhno. Despite this Makhnos forces (now numbering 20,000) were ordered to resume the attack on the whites. This was due to “unremitting pressure from Moscow to take Taganrog and Rostov.” [Malet, Op. Cit., p.
The anarchist influence in and around Hulyai Pole also worried the Bolsheviks. They started a slander campaign against the Makhnovists, to the alarm of Antonov, the overall front commander, who replied in response to an article in Kharkiv Izvestiya:

“The article is the most perverted fiction and does not in the least correspond to the existing situation. The insurgents fighting the whites are on a level with the Red Army men, but are in a far worse condition for supplies.”

In a postscript, Antonov added that the press campaign had certainly helped turn Makhno anti-Soviet (i.e. anti-Bolshevik, as Makhno supported free soviets).

At the beginning of May, another partisan commander, Hryhoriyiv, revolted against the Bolsheviks in the central Ukraine. Hryhoriyiv, like the Makhnovists, had joined with the Bolsheviks when they had re-entered the Ukraine, however his social and political background was totally different. Hryhoriyiv was a former Tsarist officer, who had commanded numerous troops under the Petliurist

now supplies the greatest numbers of people arrested on charges of counter-revolution? Peasants and workers, to be sure. There is no Communist working class. There is just a working class pure and simple ...

“Don’t you know that thousands of proletarians are kept in prison because they talked the way I am talking now, and that bourgeois people are not arrested on this score for the simple reason that they are never concerned with these questions? If I am still at large, that is so because of my standing as a Communist. I have suffered for my Communist views; moreover, I am known by the workers; were it not for these facts, were I just an ordinary Communist mechanic from the same factory, where would I be now? In the Che-Ka [prison], or more than this, I would be made to ‘escape’, just as I made Mikhail Romanov (Tsar’s brother) ‘escape’, as Luxemburg and Liebknecht were made to ‘escape’. Once more I say: you raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked.” [quoted by Maximoff, Op. Cit., pp. 270–1]

After engaging in political activity in his home area, Miasnikov was summoned to Moscow and placed under the control of the Central Committee. In defiance of it, he returned to the Urals and resumed his agitation. At the end of August in 1922 he appeared before a general meeting of Motovilikha party members and succeeded in winning them over to his side. Adopting a resolution against the censure of Miasnikov by the Central Committee’s Organisational Bureau (Orgburo), they branded his transfer to Moscow a form of “banishment” and demanded that he be allowed “full freedom of speech and press within the party.” [quoted by Avrich, “Bolshevik Opposition To Lenin: G. Miasnikov and the Workers Group”, The Russian Review, Vol. 43, No. 1, p. 12]
On 25 November he wrote to a sympathiser in Petrograd urging a campaign of agitation in preparation for the 11th party congress. By now Miasnikov was being watched by the Cheka and his letter was intercepted. For Lenin, this was the last straw. “We must devote greater attention to Miasnikov’s agitation,” he wrote to Molotov on 5 December, “and to report on it to the Politburo twice a month.” [quoted by Avrich, Op. Cit., p. 13] To deal with Miasnikov, meanwhile, the Orgburo formed a new commission which recommended his expulsion from the party, which was agreed by the Central Committee’s Political Bureau (Politburo) on 20 February 1922. This was the first instance, except for the brief expulsion of S. A. Lozovsky in 1918, where Lenin actually expelled a well-known Bolshevik of long standing.

By the start of 1923, Miasnikov had organised a clandestine opposition and formed (despite his expulsion) the “Workers’ Group of the Russian Communist Party.” He claimed that it, and not the Bolshevik leadership, represented the authentic voice of the proletariat. P. B. Moiseev, a Bolshevik since 1914, and N. V. Kuznetsov, a former member of the “Workers’ Opposition,” joined the group. The three men, all workers, constituted themselves as its “Provisional Central Organisational Bureau”. Their first act, in February 1923, was to draw up a statement of principles in anticipation of the Twelfth Party Congress called the “Manifesto of the Workers’ Group of the Russian Communist Party,” amongst other things “denouncing the New Exploitation of the Proletariat and urging the workers to fight for soviet democracy”. [I. Deutscher, The Prophet Unarmed, p.107]

The manifesto recapitulated the program of Miasnikov’s earlier arguments: workers’ self-determination and self-management, the removal of bourgeois specialists from positions of authority, freedom of discussion within the party, and the election of new soviets centred in the factories. It protested against administrative high-handedness, the expanding bureaucracy, the predominance of non-workers within the party, and the suppression of local ini-

Unsurprisingly, the peasants reacted strongly to the Bolshevik regime. Their “agricultural policy and terrorism” ensured that “by the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks.” [Palij, Op. Cit., p. 156] In April alone, there were 93 separate armed rebellions against the Bolsheviks in the Ukraine. The “more oppressive the Bolshevik policy, the more the peasants supported Makhno. Consequently, the Bolsheviks began to organise more systematically against the Makhno movement, both as an ideology and as a social movement.” [Palij, Op. Cit., p. 157]

In mid-March the Red Army attacked eastwards. In the course of this Dybenko, commander of the Trandneiper division, recommended one of Makhno’s commanders for a medal. Then the Makhnovists attacked the Donbas (east) to relieve the pressure on the Soviet 8th Army caused by a White advance. They took Mariupol following a White incursion at the beginning of April. A White counter-offensive resulted in the Red 9th division panicking, allowing the Whites into Makhno’s rear. Red Commander Dybenko refused orders to come to the Makhnovists aid as he was more interested in the Crimea (south). [Malet, Op. Cit., p. 31]

This period saw the most sustained freedom for the region around Hulyai Pole. It had been free of enemy occupation since January, allowing constructive activity to restart. The inhabitants of the free region “created new forms of social organisation: free workers’ communes and Soviets.” [Voline, Op. Cit., p. 574] The Revolutionary Military Soviet (RMS) called a third regional worker, peasant and insurgent congresses had on April 10th to review progress and to look forward. This was the largest congress to date, with delegates from 72 volosts containing two million people. The Bolshevik military commander Dybenko tried to ban it. The
way, with no military violence directed towards them permitted. [Malet, Op. Cit., p. 25]

By the end of January, white reinforcements were landing in the ports of the south. On January 22nd, a worker, peasant and insurgent congress was held at Velyka Mykhailivka. A resolution was passed urging an end to conflict between Makhnovists, Nationalists and Bolsheviks. An alliance was signed between the Makhnovists and the Bolsheviks in early February. This agreement ensured that the Partisan units entered the Red Army as distinct formations, with their internal organisation (including the election of commanders) intact, and the Red Army in the area formed a brigade to be known as “the third Transdnieper Batko Makhno brigade” with Makhno as commander. The Whites were repulsed and Hulyai Pole retaken and the front pushed some distance eastwards.

Thus the military situation had improved by the time of the second worker, peasant and insurgent congress held at Hulyai Pole on February 12th. This congress set up a “Revolutionary Military Soviet” to co-ordinate civilian affairs and execute its decisions. The congress resolved that “the land belongs to nobody” and should be cultivated without the use of hired labour. It also accepted a resolution opposing anti-Jewish pogroms. Also passed was a resolution which sharply attacked the Bolsheviks, caused by their behaviour since their arrival in the Ukraine. [Palij, Op. Cit., pp. 154–5] A report by the commander of the 2nd Red Army, Skatchko, indicates the nature of this behaviour:

“Little local Chekas are undertaking a relentless campaign against the Makhnovists, even when they are shedding their blood at the front. They are hunting them down from the rear and persecuting them solely for belonging to the Makhnovist movement … It cannot continue like this: the activity of the local Chekas is deliberately ruining the front, reducing all military successes to nothing, and contributing to the creation of

Within the party the manifesto defended the right to form factions and draw up platforms. “If criticism does not have a distinct point of view,” Miasnikov wrote to Zinoviev, “a platform on which to rally a majority of party members, on which to develop a new policy with regard to this or that question, then it is not really criticism but a mere collection of words, nothing but chatter.” He went even further, calling into question the Bolshevik monopoly of power. Under a single-party dictatorship, he argued, elections remained “an empty formality.” To speak of “workers’ democracy” while insisting on one-party government, he told Zinoviev, was to entwine oneself in a contradiction, a “contradiction in terms.” [quoted by Avrich, Op. Cit., pp. 19–20]

Miasnikov was arrested by the GPU (the new name for the Cheka) on 25 May 1923, a month after the Twelfth Party Congress (the rest of the group’s leadership was soon to follow). Miasnikov was released from custody and permitted to leave for Germany...
In Berlin he formed ties with the council communists of the German Communist Workers’ Party (KAPD) and with the left wing of the German Communist Party. With the aid of these groups, Miasnikov was able to publish the manifesto of the Workers’ Group, prefaced by an appeal drafted by his associates in Moscow. The appeal concluded with a set of slogans proclaiming the aims of the Workers’ Group: “The strength of the working class lies in its solidarity. Long live freedom of speech and press for the proletarians! Long live Soviet Power! Long live Proletarian Democracy! Long live Communism!” [quoted by Avrich, Op. Cit., p. 22]

Inside Russia the manifesto was having an effect. Fresh recruits were drawn into the Workers’ Group. It established ties with discontented workers in several cities and began negotiations with leaders of the now defunct “Workers’ Opposition”. The group won support within the Red Army garrison quartered in the Kremlin, a company of which had to be transferred to Smolensk. By summer of 1923 the group had some 300 members in Moscow, as well as a sprinkling of adherents in other cities. Many were Old Bolsheviks, and nearly all were workers. Soon an unexpected opportunity for the group to extend its influence arrived. In August and September 1923 a wave of strikes (which recalled the strike wave of February 1921 which inspired the Kronstadt sailors to rebel) swept Russia’s industrial centres. An economic crisis had been deepening since the beginning of the year, bringing cuts in wages and the dismissal of large numbers of workers. The resulting strikes, which broke out in Moscow and other cities, were spontaneous and no evidence existed to connect them with any oppositionist faction. The Workers’ Group, however, sought to take advantage of the unrest to oppose the party leadership. Stepping up its agitation, it considered calling a one-day general strike and organising a mass demonstration of workers on the lines of Bloody Sunday 1905 with a portrait of Lenin (rather than the Tzar) at its head.

...
armed struggle against all their enemies. The guiding principle of this merciless struggle was as follows. No lord who persecuted the peasants, no policeman of the Hetman, no Russian or German officer who was an implacable enemy of the peasants, deserved any pity; he must be destroyed. All who participated in the oppression of the poor peasants and workers, all who sought to suppress their rights, to exploit their labour, should be executed.

"Within two or three weeks, the unit had already become the terror, not only of the local bourgeoisie, but also of the Austro-German authorities." [The Unknown Revolution, p. 558]

The night of 26 September saw Hulyai Pole briefly liberated from Hetman and Austrian troops by the actions of Makhno’s troops in association with local people. On the retreat from this Makhno’s small band grew when he met the partisan troops headed by Schus. When the Austrians cornered them, they launched a surprise counter attack and routed the opposition. This became known as the battle of Dibrivki and it is from this date, 5 October 1918 that Makhno is given the nickname ‘Batko’, meaning “father” (see section 3 for details). For the next two months already-existing partisan groups sought out and joined the growing army.

In this period, Makhno, with portable printing equipment, was raiding the occupying garrisons and troop trains in the Southern Ukraine. Normal practice was to execute the officers and free the troops. In this period the moral of the occupying troops had crumbled and revolutionary propaganda had made inroads into many units. This was also affecting the nationalist troops and on 20 November the first nationalist unit defected to the Makhnovists. This encouraged them to return to Hulyai Pole on 27 December and there the insurrectionary Staff was formed, this body was

The authorities became alarmed. The “party leaders” were “determined to suppress the Workers’ Group and the Workers’ Truth” and ordered the GPU into action. [I. Deutscher, Op. Cit., p. 108] By the end of September its meeting places had been raided, literature seized, and leaders arrested. Twelve members were expelled from the party and fourteen others received reprimands. Miasnikov was considered such a threat that in the autumn of 1923 he was lured back to Russia on assurances from Zinoviev and Krestinsky, the Soviet ambassador in Berlin, that he would not be arrested. Once in Russia he was immediately placed behind bars, arrested by Dzerzhinsky himself (the infamous creator and head of the Cheka) as a sign of the gravity with which the government viewed the situation.

This response is significant, simply because Trotsky was still an influential member of the Communist Party leadership and, given that for most modern day Leninists he raised the banner of authentic Leninism against the obvious evils of Stalinism, it casts a light on the nature of Bolshevism. More, for as Paul Avrich points out, “[i]n January 1924, Lenin died. By then the Workers’ Group had been silenced. It was the last dissident movement within the party to be liquidated while Lenin was still alive. It was also the last rank-and-file group to be smashed with the blessing of all the top Soviet leaders, who now began their struggle for Lenin’s mantle.” [Op. Cit., p. 24]

Thus the response of Trotsky is particularly important. As Deutscher notes, Trotsky “did not protest” when the dissidents “were thrown into prison.” Dzerzhinsky, the head of the GPU (the renamed Cheka) was given the task of breaking the opposition groups by the central committee and “found that even party members of unquestioned loyalty regarded them as comrades and refused to testify against them. He then turned to the Politburo and asked it to declare it was the duty of any party member to denounce to the GPU people inside the party engaged aggressive action against the official leaders.” Trotsky “did not tell the Politburo plainly that it
should reject Dzerzhinsky’s demand. He evaded the question.” [Op. Cit., pp. 108–9]

Neo-Trotskyist Tony Cliff presents a similar picture of Trotsky’s lack of concern for opposition groups and his utter failure to support working class self-activity or calls for real democracy. He notes that in July and August 1923 Moscow and Petrograd “were shaken by industrial unrest. Unofficial strikes broke out in many places .. . In November 1923, rumours of a general strike circulated throughout Moscow, and the movement seems at the point of turning into a political revolt. Not since the Kronstadt rising of 1921 had there been so much tension in the working class and so much alarm in the ruling circles.” The ruling elite, including Trotsky, acted to maintain their position and the secret police turned on any political group which could influence the movement. The “strike wave gave a new lease of life to the Mensheviks” and so “the GPU carried out a massive round up of Mensheviks, and as many as one thousand were arrested in Moscow alone.” When it was the turn of the Workers Group and Workers Truth, Trotsky “did not condemn their persecution” and he “did not support their incitement of workers to industrial unrest.” Moreover, “[n]or was Trotsky ready to support the demand for workers’ democracy in the extreme form to which the Workers Group and Workers Truth raised it.” [Trotsky, vol. 3, p. 25, p. 26 and pp. 26–7]

By “extreme,” Cliff obviously meant “genuine” as Trotsky did not call for workers’ democracy in any meaningful form (as Cliff acknowledged elsewhere in his book). Indeed, the “New Course Resolution” — a key document of the “Left Opposition” — stated “it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers’ Truth and Workers’ Group.” Trotsky himself was at pains to distance himself from Miasnikov. [The Challenge of the “Left Opposition” (1923–25), p. 408 and p. 80] The resolution made it clear that it considered the dictatorship of the proletariat to be incompatible with real workers democracy given that both these

By the time Makhno arrived back in the Ukraine in July, 1918, opposition to the German-backed Hetman’s regime was mounting and was frequently met with brutal repression, including reprisal executions. Makhno was forced to live underground and on the move, secretly meeting with others, with the Austrians always close behind. Voline recounts Makhno’s activities at this time:

“Back in Hulyai Pole, Makhno came to the decision to die or obtain victory for the peasants ... He did not delay starting his mission openly among the great masses of peasants, speaking at improvised meetings, writing and distributing letters and tracts. By pen and mouth, he called on the peasants for a decisive struggle against the power of Skoropadsky and the landlords. He declared tirelessly that the workers should now take their fates into their own hands and not let their freedom to act be taken from them ...”

“Besides his appeals, Makhno proceeded immediately to direct action. His first concern was to form a revolutionary military unit, sufficiently strong to guarantee freedom of propaganda and action in the villages and towns and at the same time to begin guerrilla operations. This unit was quickly organised ...”

“His first unit undertook two urgent tasks, namely, pursuing energetically the work of propaganda and organisation among the peasants and carrying out a stubborn
acclaim the heroes. They unanimously agreed to consider Makhno as Batko of the entire revolutionary insurrection in the Ukraine.” [Arshinov, Op. Cit., pp. 59–60]

This was how Makhno acquired the nickname “Batko,” which stuck to him thereafter.

It should be stressed that “Batko” was a nickname and did not signify any form of autocratic or hierarchical position within the movement:

“During the civil war, it signified the leadership and control of a specific area and its population in both civil and military fields. The central point of the use of the word, rather than ‘leader’ or ‘dictator’ is that the leadership is usually based on respect, as in Makhno’s case, and always on intimate knowledge of the home territory.” [Michael Malet, Op. Cit., p. 17]

That this was a nickname can be seen from the fact that “[a]fter 1920 he was usually called ‘Malyi’ (‘Shorty’), a nickname referring to his short stature, which was introduced by chance by one of the insurgents.” [Peter Arshinov, Op. Cit., p. 226] To attach significance to the fact that the peasants called Makhno “Batko” (as the Bolsheviks did) simply signifies an ignorance of the Makhnovist movement and its social environment.

4 Can you give a short overview of the Makhnovist movement?

This section of the FAQ gives a short overview of the Makhnovists from July 1918 (when Makhno returned to the Ukraine) and August 1921, when it was finally defeated by Bolshevik armed force.

It will be primarily a military history, with the socio-political aspects of the movement discussed in sections 6 (its theory) and 7.
Ultimately, the only real alternative existed outwith the party and Leninism. Whether this was recognising the real sources for its failures (as shown by numerous anarchist thinkers at the time, not least eye-witnesses like Emma Goldman and Alexander Berkman) or by creating an actual mass libertarian alternative in the Ukraine (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). Yet discussing the various Bolshevik oppositions is helpful to understanding why the revolution failed: for the nature of the various oppositions within the party and the fate of such real dissidents as the “Workers’ Group” says far more about the real reasons the Russian revolution failed than Trotskyist books on the matter. It proves that the essence of Bolshevism is not a democratic one but rather a deeply authoritarian one hidden (at times) behind libertarian sounding rhetoric. Faced with opposition which were somewhat libertarian, the response of Lenin and Trotsky was to repress them.

In summary, the various opposition groups within Bolshevism were not alternatives and instead show that the problems of the revolution and subsequent civil war did not create but rather revealed Bolshevism’s authoritarian core.

**Why does the Makhnovist movement show there is an alternative to Bolshevism?**

The key Leninist defence of the actions of the Bolsheviks in the Russian revolution is that they had no other choice. Complaints against the Bolshevik attacks on the gains of the revolution and the pro-revolutionary Left in Russia are met with a mantra involving the white terror, the primitive state of Russia and the reactionary peasantry, the invading imperialist armies (although the actual number can, and does, vary depending on who you are talking to) and other such “forces of nature” which we are to believe ready to die on this spot ...’ The movement was ominous, the men were firm and full of enthusiasm. All 30 saw only one path before them — the path toward the enemy, who had about a thousand well-armed men, and they all realised that this meant certain death for them. All were moved, but none lost courage.

“It was at this movement that one of the partisans, Shchus’, turned to Makhno and said:

“From now on you will be Batko to all of us, and we vow to die with you in the ranks of the insurgents.’

“Then the whole detachment swore never to abandon the insurgent ranks, and to consider Makhno the general Batko of the entire revolutionary insurrection. Then they prepared to attack. Shchus’ with five to seven men was assigned to attack the flank of the enemy. Makhno with the others attacked from the front. With a ferocious ‘Hurrah!’ the partisans threw themselves headlong against the enemy, smiting the very centre with sabres, rifles and revolvers. The attack had a shattering effect. The enemy, who were expecting nothing of the kind, were bowled over and began to flee in panic, saving themselves in groups and individually, abandoning arms, machine guns and horses. Without leaving them time to come to themselves, to become aware of the number of attacking forces, and to pass to a counter-attack, the insurgents chased them in separate groups, cutting them down in full gallop. A part of the pomeshchik detachment fled to the Volchya River, where they were drowned by peasants who had joined the battle. The enemy’s defeat was complete.

“Local peasants and detachments of revolutionary insurgents came from all directions to triumphantly...
occupied by them at the time], decided to eliminate Makhno and his detachment [of partisans] at any cost. The pomeshchiks created a special volunteer detachment consisting of their own sons and those of kulaks for the decisive struggle against Makhno. On the 30th of September this detachment, with the help of the Austro-Germans, cornered Makhno in the region of Bol’shaya Mikhailovka, setting up strong military posts on all roads. At this time Makhno found himself with only 30 partisans and one machine gun. He was forced to make a fighting retreat, manoeuvring in the midst of numerous enemy forces. Arriving in the forest of Dibrivki, Makhno found himself in an extremely difficult situation. The paths of retreat were occupied by the enemy. It was impossible for the detachment to break through, and escaping individually was beneath their revolutionary dignity. No one in the detachment would agree to abandon their leader so as to save himself. After some reflection, two days later, Makhno decided to return to the village of Bol’shaya Mikhailovka (Dibrivki). Leaving the forest the partisans met peasants who came to warn them that there were large enemy forces in Dibrivki and that they should make haste to go elsewhere. This information did not stop Makhno and his partisans ... [and] they set out for Bol’shaya Mikhailovka. They approached the village guardedly. Makhno himself and a few of his comrades went on reconnaissance and saw a large enemy camp on the church square, dozens of machine guns, hundreds of saddle horses, and groups of cavalry. Peasants informed them that a battalion of Austrians and a special pomeshchik detachment were in the village. Retreat was impossible. Then Makhno, with his usual stubbornness and determination, said to his companions: ‘Well, my friends! We should all be...
area operated without a centralised state apparatus of the Bolshevist type and was, instead, based on the anarchist idea of Free Soviets. There “the insurgents raised the black flag of anarchism and set forth on the anti-authoritarian road of the free organisation of the workers.” [Arshinov, The History of the Makhnovist Movement, p. 50] The space in which this happened was created by a partisan force that instead of using the “efficiency” of executions for desertion, tsarist officers appointed over the rank and file soldiers’ wishes and saluting so loved by the Bolsheviks instead operated as a volunteer army with elected officers and voluntary discipline. This movement was the Makhnovists, named after its leader, the Ukrainian anarchist Nestor Makhno. The Black Flag which floated over the lead wagon of the Insurgent Army was inscribed with the slogans “Liberty or Death” and “The Land to the Peasants, the Factories to the Workers.” These slogans summarised what the Makhnovist were fighting for — a libertarian socialist society. At its height in the autumn of 1919, the Makhnovists numbered around 40,000 and its extended area of influence corresponded to nearly one third of the Ukrainian Soviet Republic, comprising a population of over seven million.

It is this that explains the importance of the Makhnovists. As historian Christopher Reed notes, the “Bolsheviks’ main claim to legitimacy rested on the argument that they were the only ones capable of preventing a similar disaster [counter-revolution] for the workers and peasants of Russia and that their harsh methods were necessary in the face of a ruthless and unrelenting enemy.” However, Reed argues that “the Makhno movement in the Ukraine suggests that there was more than one way to fight against the counter-revolution.” [From Tsar to Soviets, pp. 258–9] This is why the Makhnovist movement is so important, why it shows that there was, and is, an alternative to the ideas of Bolshevism. Here we have a mass movement operating in the same “exceptional circumstances” as the Bolsheviks which did not implement the same policies. Indeed, rather than suppress soviet, workplace and military democracy in favour of the “[revolutionary] insurrection in the Ukraine. This took place in the following circumstances. Local pomeshchiks [landed gentry] in the major centres, the kulaks [rich peasants], and the German authorities [the Ukraine being
peasant masses] and in the general development of the revolutionary insurrection in the southern Ukraine was performed by the detachment of partisans guided by a peasant native to the region: Nestor Makhno.” [The Unknown Revolution, p. 551] “From the first days of the movement,” Arshinov notes, “up to its culminating point, when the peasants vanquished the landowners, Makhno played a preponderant and central role to such an extent that the whole insurgent region and the most heroic moments of the struggle are linked to his name. Later, when the insurrection had triumphed completely over the Skoropadsky counter-revolution and the region was threatened by Denikin, Makhno became the rallying point for millions of peasants in several regions.” [Op. Cit., p. 50]

It must be stressed that Nestor Makhno was not the boss of the Mahknovista. He was not their ruler or general. As such, the fact that the Makhnovists were (unofficially) named after Makhno does not imply that it was his personal fiefdom, nor that those involved followed him as an individual. Rather, the movement was named after him because he was universally respected within it as a leading militant. This fact also explains why Makhno was nicknamed “Batko” (see next section).

This can be seen from how the movement was organised and was run. As we discuss in section 5, it was organised in a fundamentally democratic way, by means of mass assemblies of insurgents, elected officers, regular insurgent, peasant and worker congresses and an elected “Revolutionary Military Soviet.” The driving force in the Makhnovist movement was not, therefore, Makhno but rather the anarchist ideas of self-management. As Trotsky himself was aware, the Makhnovists were influenced by anarchist ideas:

“Makhno and his companions-in-arms are not non-party people at all. They are all of the Anarchist persuasion, and send out circulars and letters summoning Anarchists to Hulyai Pole so as to organise their own Anarchist power there.” [Trotsky, Op. Cit.]

of centralised, top-down party power and modify their political line to justify their implementation of party dictatorship, the Makhnovists did all they could to implement and encourage working-class self-government.

As such, it is difficult to blame the development of Bolshevik policies towards state-capitalist and party-dictatorship directions on the problems caused during the revolution when the Makhnovists, facing similar conditions, did all they could to protect working-class autonomy and freedom. Indeed, it could be argued that the problems facing the Makhnovists were greater in many ways. The Ukraine probably saw more fighting in the Russian Civil War then any other area. Unlike the Bolsheviks, the Makhnovists lost the centre of their movement and had to re-liberate it. To do so they fought the Austrian and German armies, Ukrainian Nationalists, Bolsheviks and the White Armies of Denikin and then Wrangel. There were smaller skirmishes involving Cossacks returning to the Don and independent “Green” bands. The anarchists fought all these various armies over the four years their movement was in existence. This war was not only bloody but saw constant shifts of fronts, advances and retreats and changes from near conventional war to mobile partisan war. The consequences of this was that no area of the territory was a safe “rear” area for any period of time and so little constructive activity was possible. Section 4 presents a summary of the military campaigns of these years. A brief idea of the depth of fighting in these years can be seen by considering the town at the centre of the Makhnovists, Hulyai Pole which changed hands no less than 16 times in the period from 1917–1921.

Clearly, in terms of conflict (and the resulting disruption caused by it), the Makhnovists did not have the relative peace the Bolsheviks had (who never once lost their main bases of Petrograd or Moscow, although they came close). As such, the problems used to justify the repressive and dictatorial policies of the Bolsheviks also apply to the Makhnovists. Despite this, the activity of the Makhno-
vists in the Ukraine demonstrated that an alternative to the supposedly necessary methods of the Bolsheviks did exist. Where the Bolsheviks suppressed freedom of speech, assembly and press, the Makhnovists encouraged it. Where the Bolsheviks turned the soviets into mere cyphers of their government and undermined soviet power, the Makhnovists encouraged working-class participation and free soviets. As we discuss in section 7, the Makhnovists applied their ideas of working class self-management whenever and wherever they could.

Sadly, the Makhnovist movement is a relatively unknown event during the revolution. There are few non-anarchist accounts of it and the few histories which do mention it often simply slander it. However, as the Cohn-Bendit brothers correctly argue, the movement, "better perhaps than any other movement, shows that the Russian Revolution could have been a great liberating force." Equally, the reason why it has been almost totally ignored (or slandered, when mentioned) by Stalinist and Trotskyist writers is simple: "It shows the Bolsheviks stifling workers and peasants with lies and calumnies, and then crushing them in a bloody massacre." [Daniel and Gabriel Cohn-Bendit, Obsolete Communism: The Left-Wing Alternative, p. 200]

This section of our FAQ will indicate the nature and history of this important social movement. As we will prove, "the Makhnovshchina ... was a true popular movement of peasants and workers, and ... its essential goal was to establish the freedom of workers by means of revolutionary self-activity on the part of the masses." [Arshinov, The History of the Makhnovist Movement, p. 209]

They achieved this goal in extremely difficult circumstances and resisted all attempts to limit the freedom of the working class, no matter where it came from. As Makhno himself once noted:

"Our practice in the Ukraine showed clearly that the peasant problem had very different solutions from those imposed by Bolshevism. If our experience had spread to

2 Why was the movement named after Makhno?

Officially, the Makhnovist movement was called the Revolutionary Insurrectionary Army of the Ukraine. In practice, it was usually called the “Makhno movement” ("Makhnovshchina" in Russian) or the Makhnovists. Unsurprisingly, Trotsky placed great significance on this:

"The anti-popular character of the Makhno movement is most clearly revealed in the fact that the army of Hulyai Pole is actually called 'Makhno's Army'. There, armed men are united not around a programme, not around an ideological banner, but around a man." [The Makhno Movement]

Ignoring the irony of a self-proclaimed Marxist (and later Leninist and founder of Trotskyism!) making such a comment, we can only indicate why the Makhnovists called themselves by that name:

"Because, first, in the terrible days of reaction in the Ukraine, we saw in our ranks an unfailing friend and leader, MAKHNO, whose voice of protest against any kind of coercion of the working people rang out in all the Ukraine, calling for a battle against all oppressors, pillagers and political charlatans who betray us; and who is now marching together with us in our common ranks unwavering toward the final goal: liberation of the working people from any kind of oppression." [contained in Arshinov, Op. Cit., p. 272]

The two of the anarchists who took part in the movement and later wrote its history concur. Voline argues that the reason why the movement was known as the “Makhnovist movement” was because the “most important role in this work of unification [of the
Libertarian Communists (known as the “Platform”). As discussed in section J.3.3, the Platform was an attempt to analyse what had gone wrong in the Russian Revolution and suggested a much tighter anarchist organisation in future. This idea provoked intense debate after its publication, with the majority of anarchists rejecting it (for Makhno’s discussion with Malatesta on this issue, see The Anarchist Revolution published by Freedom Press). This debate often resulted in bitter polemics and left Makhno somewhat isolated as some of his friends, like Voline, opposed the Platform. However, he remained an anarchist to his death in 1934.

Makhno died on the morning of July 25th and was cremated three days later and his ashes placed in an urn within Pere Lachaise, the cemetery of the Paris Commune. Five hundred Russian, French, Spanish and Italian comrades attended the funeral, at which the French anarchist Benar and Voline spoke (Voline used the occasion to refute Bolshevik allegations of anti-Semitism). Makhno’s wife, Halyna, was too overcome to speak.

So ended the life of one great fighters for working-class freedom. Little wonder Durruti’s words to Makhno:

“We have come to salute you, the symbol of all those revolutionaries who struggled for the realisation of Anarchist ideas in Russia. We also come to pay our respects to the rich experience of the Ukraine.” [quoted by Abel Paz, Durruti: The People Armed, p. 88–9]

For fuller details of Makhno’s life, see the accounts by Peter Arshinov (The History of the Makhnovist Movement), Paul Avrich (“Nestor Makhno: The Man and the Myth,” in Anarchist Portraits), Michael Palij, (The Anarchism of Nestor Makhno) and Michael Malet (Nestor Makhno in the Russian Revolution).

Two distinct aspects of the anarchist movement existed in the Ukraine at this time, a political and non-military structure called the Nabat (Alarm) federation which operated through the soviets and collectives and a military command structure usually known after is commander Nestor Makhno as the Makhnovshchina (which means the “Makhno movement”) although its proper name was the Revolutionary Insurgent Army of the Ukraine. This section of the FAQ will cover both, although the Makhnovshchina will be the main focus.

For more information on the Makhnovist movement, consult the following books. Anarchist accounts of the movement can be found in Peter Arshinov’s excellent The History of...
the Makhnovist Movement and Voline’s The Unknown Revolution (Voline’s work is based on extensive quotes from Arshinov’s work, but does contain useful additional material). For non-anarchist accounts, Michael Malet’s Nestor Makhno in the Russian Revolution is essential reading as it contains useful information on both the history of the movement, its social basis and political ideas. Malet considers his work as a supplement to Michael Palij’s The Anarchism of Nestor Makhno, 1918–1921 which is primarily a military account of the movement but which does cover some of its social and political aspects. Unfortunately, both books are rare. Paul Avrich’s The Russian Anarchists contains a short account of the movement and his Anarchist Portraits has a chapter on Nestor Makhno. Makhnovist source material is included in Avrich’s The Anarchists in the Russian Revolution. Daniel Guerin includes a section on Makhno and the Makhnovist Movement in volume 2 of No Gods, No Masters. As well as extracts from Arshinov’s book, it has various manifestos from the movement as well as Makhno’s account of his meeting with Lenin. Christopher Read’s From Tsar to Soviets has an excellent section on the Makhnovists. Serge Cipko presents an excellent overview of works on the Makhnovists in his “Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921” (The Raven, no. 13). Alexander Skirda presents an overview of perestroika soviet accounts of Makhno in his essay “The Rehabilitation of Makhno” (The Raven, no. 8). Skirda’s biography Nestor Makhno: Le Cosaque de l’anarchie is by far the best account of the movement available.

Lastly, a few words on names. There is a large variation on the spelling of names within the source material. For example, Makhno’s home town has been translated as Gulyai Pole, Gulyai Polye Hulyai-Pole and Hulyai Pole. Similarly, with other place names. The bandit Grigor’ev has been also translated as Hryhor’iv and Hryhoriyiv. We generally take Michael Malet’s translations
The Bolsheviks helped Makhno to return to the Ukraine. The trip was accomplished with great difficulty. Once Makhno was almost killed. He was arrested by Austro-German troops and was carrying libertarian pamphlets at the time. A Jewish inhabitant of Hulyai Pole, who had know Makhno for some time, succeeded in saving him by paying a considerable sum of money for his liberation. Once back in Hulyai-Pole, he started to organise resistance to the occupying forces of the Austro-Germans and their puppet regime led by Hetman Skoropadsky. With the resistance, the Makhno movement can be said to have arisen (see section 3 on way it was named after Makhno). From July 1918 to August 1921, Makhno led the struggle for working class freedom against all oppressors, whether Bolshevik, White or Nationalist. During the course of this struggle, he proved himself to be “a guerrilla leader of quite outstanding ability.” [David Footman, Civil War in Russia, p. 245] The military history of this movement is discussed in section 4, while other aspects of the movement are discussed in other sections.

After the defeat of the Makhnovist movement in 1921, Makhno was exiled in Western Europe. In 1925 he ended up in Paris, where he lived for the rest of his life. While there, he remained active in the anarchist movement, with the pen replacing the sabre (to use Alexander Skirda’s colourful expression). Makhno contributed articles to various anarchist journals and in particular to Delo Truda, an anarchist-communist paper started in Paris by Peter Arshinov (many of these articles have been published in the book The Struggle Against the State and Other Essays). He remained active in the anarchist movement to the end.

In Paris, Makhno met the famous Spanish anarchists Buenaventura Durruti and Francisco Ascaso in 1927. He argued that in Spain “conditions for a revolution with a strong anarchist content are better than in Russia” because not only was there “a proletariat and a peasantry with a revolutionary tradition whose political maturity is shown in its reactions,” the Spanish anarchists had “a sense of organ-

1 Who was Nestor Makhno?

The Makhnovist movement was named after Nestor Makhno, a Ukrainian anarchist who played a key role in the movement from the start. Indeed, Makhnochchina literally means “Makhno movement” and his name is forever linked with the revolution in the South-East of the Ukraine. So who was Makhno?

Nestor Ivanovich Makhno was born on the 27th of October, 1889 in Hulyai Pole, which is situated in Katerynoslav province, in the south east of the Ukraine between the Dnieper River and the Sea of Azov. While it seems to be conventional for many historians to call Hulyai Pole a “village,” it was in fact a town with a population of about 30,000 and boasted several factories and schools.

Makhno was the son of a poor peasant family. His father died when he was ten months old, leaving him and his four brothers in the care of their mother. Due to the extreme poverty of his family, he had to start work as a shepherd at the age of seven. At eight he started to attend the Second Hulyai Pole primary school in winter and worked for local landlords during the summer. He left school when he was twelve and took up full-time employment as a farmhand on the estates of nobles and on the farms of the German colonist kulaks. At the age of seventeen, he started to work in Hulyai Pole itself, first as an apprentice painter, then as an unskilled worker in a local iron foundry and, finally, as a founder in the same establishment.

It was when he was working in the iron foundry that he became involved in revolutionary politics. In the stormy years following the 1905 revolution, Makhno got involved in revolutionary politics. This decision was based on his experiences of injustice at work and seeing the terror of the Russian regime during the 1905 events (in Hulyai Pole there had been no serious disorder, yet the regime
sent a detachment of mounted police to suppress gatherings and meetings in the town, terrorising the population by whipping those caught in the streets and beating prisoners with rifle butts. In 1906, Makhno decided to join the anarchist group in Hulyai Pole (which had been formed the previous year and consisted mainly of sons of poorer peasants).

At the end of 1906 and in 1907, Makhno was arrested and accused of political assassinations, but was released due to lack of evidence. In 1908, due to the denunciation of a police spy within the anarchist group, he was arrested and put in jail. In March, 1910, Makhno and thirteen others were tried by a military court and sentenced to death by hanging. Due to his youth and the efforts of his mother, the death penalty was commuted to life imprisonment with hard labour. He served his time at the Butyrki prison in Moscow, resisting the prison authorities by every means available to him. Due to this resistance, he spent much of his time in chains or in damp and freezing confinement. This experience ensured that Makhno developed an intense hatred of prisons (later, during the revolution, his first act in entering a town or city was to release all prisoners and destroy the prison).

It was during his time in Butyrki that Makhno met Peter Arshinov, a fellow anarchist prisoner and later activist and historian of the Makhnovist movement. Arshinov was born in 1887 in the Ukrainian industrial town of Katerinoslav. His father was a factory worker and he was a metal worker. Originally a Bolshevik, he had become an anarchist in 1906, taking a leading part in organising factory workers and actions against the regime. In 1907 he was arrested and sentenced to death, escaping to Western Europe. In 1909, he returned to Russia and was again arrested and again escaped. In 1910, he was arrested and placed in the Butyrki prison where he met Makhno. The two anarchists established a close personal and political friendship, with Arshinov helping Makhno develop and deepen his anarchist ideas.

and also in part by the Socialist Revolutionaries ... Your Bolsheviks have scarcely any presence in our villages. Where they have penetrated, their influence is minimal. Almost all the communes or peasant associations in the Ukraine were formed at the instigation of the anarchist-communists. The armed struggle of the working people against the counter-revolution in general and the Austro-German invasion in particular has been undertaken with the ideological and organic guidance of the anarchist-communists exclusively.

“Certainly it is not in your party’s interest to give us credit for all this, but these are the facts and you can’t dispute them. You know perfectly well, I assume, the effective force and the fighting capacity of the free, revolutionary forces of the Ukraine. It is not without reason that you have evoked the courage with which they have heroically defended the common revolutionary conquests. Among them, at least one half have fought under the anarchist banner…

“All this shows how mistaken you are, comrade Lenin, in alleging that we, the anarchist-communists, don’t have our feet on the ground, that our attitude towards ‘the present’ is deplorable and that we are too fond of dreaming about the future. What I have said to you in the course of this interview cannot be questioned because it is the truth. The account which I have made to you contradicts the conclusions you expressed about us. Everyone can see we are firmly planted in ‘the present,’ that we are working and searching for the means to bring about the future we desire, and that we are in fact dealing very seriously with this problem.”

On March 2\textsuperscript{nd}, 1917, after eight years and eight months in prison, Makhno was released along with all other political prisoners as a result of the February Revolution. After spending three weeks in Moscow with the Moscow anarchists, Makhno returned to Hulyai Pole. As the only political prisoner who was returned to his family by the revolution, Makhno became very well-respected in his home town. After years of imprisonment, suffering but learning, Makhno was no longer an inexperienced young activist, but a tested anarchist militant with both a powerful will and strong ideas about social conflict and revolutionary politics. Ideas which he immediately set about applying.

Once home in Hulyai Pole, Makhno immediately devoted himself to revolutionary work. Unsurprisingly, the remaining members of the anarchist group, as well as many peasants, came to visit him. After discussing ideas with them, Makhno proposed beginning organisational work immediately in order to strengthen links between the peasants in Hulyai Pole and its region with the anarchist group. On March 28–29, a Peasant Union was created with Makhno as its chairman. Subsequently, he organised similar unions in other villages and towns in the area. Makhno also played a large part in a successful strike by wood and metal workers at a factory owned by his old boss (this defeat led to the other bosses capitulating to the workers as well). At the same time, peasants refused to pay their rent to the landlords. [Michael Malet, \textit{Nestor Makhno in the Russian Civil War}, p. 4] Regional assemblies of peasants were called, both at Hulyai Pole and elsewhere, and on August 5–7, the provincial congress at Katerinoslav decided to reorganise the Peasant Unions into Soviets of Peasants’ and Workers’ Deputies.

In this way, “Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported his efforts, hoping to expedite the expropriation of large estates.” [Michael Palij, \textit{The Anarchism of Nestor Makhno}, p. 71] In Hulyai Pole, the revolution was moving faster than elsewhere (for example, while the Aleksandrovsk soviet supported the actions of the Provisional

board and lodging, he met the chairman of the All-Russian Central Executive Committee of the Soviets, Jakov M. Sverdlov, who arranged for Makhno to meet Lenin. Lenin asked Makhno, “How did the peasants of your region understand the slogan \textsc{ALL POWER TO THE SOVIETS IN THE VILLAGES}?” Makhno states that Lenin “was astonished” at his reply:

“The peasants understood this slogan in their own way. According to their interpretation, all power, in all areas of life, must be identified with the consciousness and will of the working people. The peasants understand that the soviets of workers and peasants of village, country and district are neither more nor less than the means of revolutionary organisation and economic self-management of working people in the struggle against the bourgeoisie and its lackeys, the Right socialists and their coalition government.”

To this Lenin replied: “Well, then, the peasants of your region are infected with anarchism!” [Nestor Makhno, \textit{My Visit to the Kremlin}, p. 18] Later in the interview, Lenin stated: “Do the anarchists ever recognise their lack of realism in present-day life? Why, they don’t even think of it.” Makhno replied:

“But I must tell you, comrade Lenin, that your assertion that the anarchists don’t understand the present realistically, that they have no real connection with it and so forth, is fundamentally mistaken. The anarchist-communists in the Ukraine ... the anarchist-communists, I say, have already given many proofs that they are firmly planted in ‘the present.’ The whole struggle of the revolutionary Ukrainian countryside against the Central Rada has been carried out under the ideological guidance of the anarchist-communists...
Government during the July days in Petrograd, a meeting in Hulyai Pole saluted the rebellious soldiers and workers. Peasants were drawn to Hulyai Pole for advice and help from the neighbouring volosts (administrative districts). The peasantry wanted to seize the land of the large landowners and the kulaks (rich peasants). Makhno presented this demand at the first sessions of the regional Soviet, which were held in Hulyai Pole. In August, Makhno called all the local landlords and rich peasants (kulaks) together and all documents concerning ownership (of land, livestock and equipment) were taken from them. An inventory of this property was taken and reported to the session of the local soviet and then at a regional meeting. It was agreed that all land, livestock and equipment was to be divided equally, the division to include the former owners. This was the core of the agrarian program of the movement, namely the liquidation of the property of the landowners and kulaks. No-one could own more land than they could work with their own labour. All this was in flat defiance to the Provisional Government which was insisting that all such questions be left to the Constituent Assembly. Free communes were also created on ex-landlord estates.

Unsurprisingly, the implementation of these decisions was delayed because of the opposition of the landlords and kulaks, who organised themselves and appealed to the provisional authorities. When General Kornilov tried to march on Petrograd and take power, the Hulyai Pole soviet took the initiative and formed a local “Committee for the Salvation of the Revolution” headed by Makhno. The real aim was to disarm the potential local enemy — the landlords, bourgeoisie, and kulaks — as well as to expropriate their ownership of the people’s wealth: the land, factories, plants, printing shops, theatres and so on. On 25 September a volost congress of Soviets and peasant organisations in Hulyai Pole proclaimed the confiscation of the landowners’ land and its transformation into social property. Raids on the estates of landlords and rich peasants, including German colonists, began and the expropriation of the expropriators began.

Makhno’s activities came to a halt the following spring when Lenin’s government signed the Treaty of Brest-Litovsk. This treaty gave sizeable parts of the Russian Empire, including the Ukraine, to Germany and Austria in return for peace. The Treaty also saw the invasion of the Ukraine by large numbers of German and Austrian troops, who conquered the entire country in less than three months. Makhno succeeded in forming several military units, consisting of 1700 men, but could not stop Hulyai Pole being taken. After an anarchist congress at the end of April in Taganrog, it was decided to organise small combat units of five to ten peasants and workers, to collect arms from the enemy and to prepare for a general peasant uprising against the Austro-German troops and, finally, to send a small group to Soviet Russia to see at first hand what was happening there to both the revolution and to the anarchists under Bolshevik rule. Makhno was part of that group.

By June, Makhno had arrived in Moscow. He immediately visited a number of Russian anarchists (including his old friend Peter Arshinov). The anarchist movement in Moscow was cowed, due to a Cheka raid in April which broke the backbone of the movement, so ending a political threat to the Bolshevists from the left. To Makhno, coming from an area where freedom of speech and organisation was taken for granted, the low level of activity came as a shock. He regarded Moscow as the capital of the “paper revolution,” whose red tape and meaninglessness had affected even the anarchists. Makhno also visited Peter Kropotkin, asking his advice on revolutionary work and the situation in the Ukraine. To Makhno, “Moscow appeared as ‘the capital of the Paper Revolution,’ a vast factory turning out empty resolutions and slogans while one political party, by means of force and fraud, elevated itself into the position of a ruling class.” [David Footman, Op. Cit., p. 252]

While in Moscow, Makhno met with Lenin. This meeting came about by chance. Visiting the Kremlin to obtain a permit for free
the workers had “entrusted us [the Bolshevik leaders] with the direction of the union” and this meant that the Bolshevik leaders, not the workers, should decide things as “we are better able to judge in the matter” than them! The workers role was stated clearly: “if our way of conducting the business is bad, then throw us out and elect another committee!” [Leon Trotsky Speaks, p. 113] In other words, like any bureaucrat, for Trotsky working-class participation in the affairs of the revolution was seen as irrelevant: the masses had voted and their role was now that of obeying those who “are better able to judge.”

Using an argument the Tsar could have been proud of, Trotsky defended the elimination of soldier democracy:

“How could soldiers who have just entered the army choose the chiefs! Have they any vote to go by? They have none. And therefore elections are impossible.”

[Ibid.]

Equally, how could workers and peasants who have just entered political or economic struggle in 1917 choose the chiefs? Had they any vote to go by? They had none. And therefore political and workplace elections are impossible. Unsurprisingly, Trotsky soon ended up applying this logic to politics as well, defending (like all the leaders of Bolshevism) the dictatorship of the party over working class. How could the “ignorant” workers be expected to elect the best “chiefs” never mind manage their own affairs!

Ironically, in 1936 the Stalinist Communist Party in Spain was to make very similar arguments about the need for a regular army and army discipline to win the war. As Aileen O’Carroll in her essay “Freedom and Revolution” argues:

“The conventional army structure evolved when feudal kings or capitalist governments required the working class to fight its wars for them. These had to be authoritarian institutions, because although propaganda hand. Only through the abolition of all rulers, through the destruction of the whole foundation of their lies, in state affairs as well as in political and economic affairs. And only through the social revolution can the genuine Worker-Peasant soviet system be realised and can we arrive at SOCIALISM.” [contained in Arshinov, Op. Cit., p. 273] They, like other anarchists and the Kronstadt rebels, termed this programme of working class self-management the “third revolution.”

We will discuss the political aspect of the Makhnovist programme first, then its economic one. However, the Makhnovists considered (correctly) that both aspects could not be separated. As they put it: “We will not lay down our arms until we have wiped out once and for all every political and economic oppression and until genuine equality and brotherhood is established in the land.” [contained in Arshinov, Op. Cit., p. 281] We split the aspects simply to aid the presentation of their ideas.

At the core of their ideas was what they termed the “Free Soviet System” (or “free soviets” for short). It was this system which would allow the working class to create and run a new society. As they put it:

“[The] Makhnovists realise that the working people are no longer a flock of sheep to be ordered about by anyone. We consider the working people capable of building, on their own and without parties, commissars or generals, their own FREE SOVIET SYSTEM, in which those who are elected to the Soviet will not, as now [under the Bolsheviks], command and order us, but on the contrary, will be only the executors of the decisions made in our own workers’ gatherings and conferences.” [contained in Peter Arshinov, Op. Cit., pp. 280–1]

Thus the key idea advocated by the leading Makhnovista for social organisation and decision-making was the “free toilers’ soviet
of peasant and worker organisations.” This meant they were to be independent of all central authority and composed of those who worked, and not political parties. They were to federate on a local, then regional and then national level, and power within the federation was to be horizontal and not vertical. [Michael Malet, Op. Cit., p. 107] Such a system was in opposition to the Bolshevik practice of Soviets defined and dominated by political parties with a vertical decision-making structure that reached its highest point in the Bolshevik Central Committee.

Thus, for the Makhnovists, the soviet system would be a “bottom-up” system, one designed not to empower a few party leaders at the centre but rather a means by which working people could manage their own affairs. As the put it, the “soviet system is not the power of the social-democratic Communist-Bolsheviks who now call themselves a soviet power; rather it is the supreme form of non-authoritarian anti-state socialism, which expresses itself in the organisation of a free, happy and independent system of social life for the working people.” This would be based on the “principles of solidarity, friendship and equality.” This meant that in the Makhnovist system of free soviets, the “working people themselves must freely choose their own soviets, which will carry out the will and desires of the working people themselves, that is to say, ADMINISTRATIVE, not ruling soviets.” [contained in Arshinov, Op. Cit., pp. 272–3]

As David Footman summarises, Makhno’s “ultimate aims were simple. All instruments of government were to be destroyed. All political parties were to be opposed, as all of them were working for some or other form of new government in which the party members would assume the role of a ruling class. All social and economic affairs were to be settled in friendly discussion between freely elected representatives of the toiling masses.” [Op. Cit., p. 247]

Hence the Makhnovist social organisation was a federation of self-managed workers’ and peasants’ councils (soviets), which would “be only the executors of the decisions made in our workers’
Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with.” [The Bolsheviks and Workers’ Control, p. 37]

Officers were appointed rather than elected. They argued this had to be done to win the war. The “principle of election,” stated Trotsky, “is politically purposeless and technically inexpedient and has been, in practice, abolished by decree.” Thus the election of officers and the creation of soldiers’ committees was abolished from the top, replaced by appointed officers. Trotsky’s rationale for this was simply that “political power is in the hands of the same working class from whose ranks the Army is recruited.” In other words, the Bolshevik Party held power as power was actually held by it, not the working class. Trotsky tried to answer the obvious objection:

“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the appointment of members of the commanding staff by the organs of the Soviet Power.” [Work, Discipline, Order]

He repeated this argument in his 1919 diatribe against the Makhnovists:

“The Makhnovites shout raucously: ‘Down with appointed commanders!’ This they do only so as to delude gatherings and conferences.” [contained in Arshinov, Op. Cit., p. 281] In other words, an anarchist system based on mass assemblies and decision-making from the bottom up.

Economically, as is to be expected, the Makhnovists opposed private property, capitalism and wage-slavery. Their economic ideas were summarised in a Makhnovist declaration as follows:

“The lands of the service gentry, of the monasteries, of the princes and other enemies of the toiling masses, with all their livestock and goods, are passed on to the use of those peasants who support themselves solely through their own labour. This transfer will be carried out in an orderly fashion determined in common at peasant assemblies, which must remember in this matter not only each of their own personal interests, but also bear in mind the common interest of all the oppressed, working peasantry.

“Factories, workshops, mines and other tools and means of production become the property of the working class as a whole, which will run all enterprises themselves, through their trade unions, getting production under way and striving to tie together all industry in the country in a single, unitary organisation.” [contained in Arshinov, Op. Cit., p. 266]

They continually stressed that the “land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised.” This meant a system of use-rights, as “the land, the mines, the factories, the workshops, the railroads, and so on, will belong neither to individuals nor to the government, but solely to those who work with them.” [Op. Cit., p. 273 and p. 281]

In industry, such a system clearly implied a system of worker’s self-management within a system of federated factory committees
or union branches. On the land, it meant the end of landlordism, with peasants being entitled to as much land and equipment as they could cultivate without the use of hired labour. As a Makhnovist congress in 1919 resolved:

“The land question should be decided on a Ukraine-wide scale at an all-Ukrainian congress of peasants on the following basis: in the interests of socialism and the struggle against the bourgeoisie, all land should be transferred to the hands of the toiling peasants. According to the principle that ‘the land belongs to nobody’ and can be used only by those who care about it, who cultivate it, the land should be transferred to the toiling peasantry of Ukraine for their use without pay according to the norm of equal distribution.” [quoted by Palij, Op. Cit., p. 155]

In addition to advocating the abolition of private property in land and the end of wage labour by distributing land to those who worked it, the Makhnovists also supported the forming of “free” or “working” communes. Like their policy of land distribution, it also aimed to benefit the poorer peasants and rural wage labourers. The “free commune” was a voluntary association of rural workers who took over an expropriated estate and managed the land in common. The commune was managed by a general meeting of all its members and based on the liberty, equality and solidarity of its members.

Clearly, in terms of their economic policies, the Makhnovists proposed a clear and viable alternative to both rural and urban capitalism, namely workers’ self-management. Industry and land would be socialised, with the actual management of production resting in the hands of the workers themselves and co-ordinated by federated workers’ organisations. On the land, they proposed the creation of voluntary communes which would enable the benefits of co-operative labour to be applied. Like their political ideas,

14 How did the Makhnovists and Bolsheviks differ?

Like chalk and cheese.

Whereas the Bolsheviks talked about soviet democracy while exercising a party dictatorship, the Makhnovists not only talked about “free soviets,” they also encouraged them with all their ability. Similarly, while Lenin stated that free speech was “a bourgeois notion” and that there could be “no free speech in a revolutionary period,” the Makhnovists proclaimed free speech for working people. [Lenin quoted by Goldman, My Disillusionment in Russia, p. 33] While the Bolsheviks ended up arguing for the necessity of party dictatorship during a revolution, the Makhnovists introduced free soviets and organised peasant, worker and insurgent congresses to conduct the revolution.

We have discussed the Makhnovist ideas in both theory and practice in sections 5, 6 and 7. In spite of the chaos and difficulties imposed upon the movement by having to fight the counter-revolution, the Makhnovists applied their ideals constantly. The Makhnovists were a mass movement and its constructive efforts showed that there was an alternative route the Russian revolution could have followed other than the authoritarian dictatorship that Leninists, then and now, claimed was inevitable if the revolution was to be saved.

To see why, we must compare Bolshevik ideology and practice to that of the Makhnovists in three key areas. Firstly, on how a revolution should be defended. Secondly, on the role of the soviets and party in the revolution. Thirdly, on the question of working-class freedom.

Early in 1918, after the signing of the Brest-Litovsk Treaty the Bolsheviks re-introduced Tsarist officers into the army alongside bourgeois military discipline. As Maurice Brinton correctly summarises:

“Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red
against all tyrants and oppressors of the working people.” [contained in Arshinov, Op. Cit., p. 276 and p. 283]

Even after the defeat of the Makhnovists, the Bolsheviks did not stop their campaign of lies. For example, Trotsky reported to the Ninth Congress of Soviets on December 26th, 1921, that the Makhnovists were “in Romania,” where Makhno had “received a friendly welcome” and was “liv[ing] comfortably in Bucharest.” The Makhnovists had picked Romania because it was, like Poland, “a country where they ... felt secure” due to the way they treated “Russian counter-revolutionary bands.” [How the Revolution Armed, vol. IV, p. 404] In reality, the “Romanian authorities put Makhno, his wife, and his followers in an internment camp.” The Bolsheviks were not unaware of this, as they “sent a series of sharp diplomatic notes demanding Makhno’s extradiction.” They expelled Makhno and his wife to Poland on April 11, 1922. The Poles also interned them and, again, the Bolsheviks demanded Makhno’s extradition “on the ground that he was a criminal and not entitled to political asylum.” [Palij, Op. Cit., p. 242] Trotsky’s lies come as no surprise, given his and his party’s track record on slandering anarchists.

As can be seen, the relationship of the Makhnovists to the Bolsheviks was one of constant betrayal of the former by the latter. Moreover, the Bolsheviks took every opportunity to slander the Makhnovists, with Trotsky going so far as to report Makhno was living well while he was rotting in a capitalist prison. This is to be expected, as the aims of the two groups were at such odds. As we discuss in the next section, while the Makhnovists did whatever they could to encourage working-class self-management and freedom, the Bolsheviks had evolved from advocating the government of their party as the expression of “the dictatorship of the proletariat” to stating that only the dictatorship of their party could ensure the success of a social revolution and so was “the dictatorship of the proletariat.” As the Makhnovist movement shows, if need be, the party would happily exercise its dictatorship over the proletariat (and peasantry) if that was needed to retain its power.

In summary, the Makhnovist had a constructive social ideas which aimed to ensure the total economic and political emancipation of the working people. Their vision of a free society was based on a federation of free, self-managed soviets, the socialisation of the means of life and workers’ self-management of production by a federation of labour unions or factory committees. As the black flags they carried into battle read, “liberty or death” and “the land to the peasants, the factories to the workers.”

7 Did they apply their ideas in practice?

Yes, the Makhnovists consistently applied their political and social ideas when they had the opportunity to do so. Unlike the Bolsheviks, who quickly turned away from their stated aims of soviet democracy and workers’ control in favour of dictatorship by the Bolshevik party, the Makhnovists did all in their power to encourage, create and defend working-class freedom and self-management (see section 14 for further discussion). In the words of historian Christopher Reed:

“there can be no question that the anarchists did everything they could to free the peasants and workers and give them the opportunity to develop their own forms of collective control over land and factories ... [T]he Ukrainian anarchists fought under the slogan of land to the peasants, factories to the workers and power to the soviet. Wherever they had influence they supported the setting up of communes and soviet. They introduced safeguards intended to protect direct self-government from organised interference ... They conducted relentless class war against landlords, officers, factory owners and the commercial classes could expect short shrift from
Makhno and his men, especially if they had taken up arms against the people or, like the Whites ..., had been responsible for looting, pogroms and vicious reprisals against unarmed peasants on a colossal scale.” [From Tsar to Soviets, p. 263]

As we discussed in the last section, the core ideas which inspired the Makhnovists were working-class self-determination and self-management. They aimed at the creation of a “free soviet system” and the end of capitalism by rural and industrial self-management. It is to the credit of the Makhnovists that they applied these ideas in practice rather than talking about high principles and doing the exact opposite.

In practice, of course, the war left little room for much construction work. As Voline pointed out, one of the key disadvantages of the movement was the “almost continual necessity of fighting and defending itself against all kinds of enemies, without being able to concentrate on peaceful and truly positive works.” [The Unknown Revolution, p. 571] However, in the disruption of the Civil War the Makhnovists applied their ideas when and where they could.

Within the army, as we discussed in section 5, the insurgent troops elected their own commanders and had regular mass assemblies to discuss policy and the agreed norms of conduct within it. In civilian matters, the Makhnovists from the start encouraged working-class self-organisation and self-government. By late 1917, in the area around Hulyai Pole “the toiling masses proceeded ... to consolidate their revolution. The little factories functioned ... under the control of the workers. The estates were split up ... among the peasants ... a certain number of agricultural communes were formed.” [David Footman, Op. Cit., p. 248]

The aim of the Makhnovists was to “transfer all the lands owned by the gentry, monasteries, and the state into the hands of peasants or to organise, if they wished, peasant communes.” [Palij, Op. Cit., p. 70] This policy was introduced from the start, and by the autumn

In the words of Makhno:

“...In this difficult and responsible revolutionary position the Makhno movement made one great mistake: alliance with the Bolsheviks against a common enemy, Wrangel and the Entente. In the period of this alliance that was morally right and of practical value for the revolution, the Makhno movement mistook Bolshevik revolutionism and failed to secure itself in advance against betrayal. The Bolsheviks and their experts treacherously circumvented it.” [quoted by Palij, Op. Cit., p. 234]

While the Bolsheviks continuously proclaimed the final defeat of the Makhnovists, they held out for nearly a year before being forced to leave the Ukraine in August 1921. Indeed, by the end of 1920 his troops number ten to fifteen thousand men and the “growing strength of the Makhno army and its successes caused serious concern in the Bolshevik regime.” More Red troops were deployed, “stationing whole regiments, primarily cavalry, in the occupied villages to terrorise the peasants and prevent them from supporting Makhno... Cheka punitive units were constantly trailing the partisans, executing Makhno’s sympathisers and the partisans’ families.” [Palij, Op. Cit., p. 237 and p. 238] Combined with this state terrorism, economic conditions in the villages got worse. The countryside was exhausted and 1921 was a famine year. With his rural base itself barely surviving, the Makhnovists could not survive long.

It should be noted that during the periods after the Bolsheviks had turned on the Makhnovists, the latter appealed to rank-and-file Red Army troops not to attack them. As one of their leaflets put it: “Down with fratricidal war among the working people!” They urged the Red Army troops (with some success) to rebel against the commissars and appointed officers and join with the Makhnovists, who would “greet [them] as our own brothers and together we will create a free and just life for workers and peasants and will struggle
Unsurprisingly, the Bolsheviks refused to ratify this clause. As one Bolshevik historian pointed out, the “fourth point was fundamental to both sides, it meant the system of free Soviets, which was in total opposition to the idea of the dictatorship of the proletariat.” [quoted by Malet, Op. Cit., p. 108] As we discuss in the next section, the Bolsheviks had equated the “dictatorship of the proletariat” with the dictatorship of their party and so working-class self-management could not be allowed. It should be noted that this fourth clause was the cause of Lenin and Trotsky’s toying with the idea of allowing the Makhnovists south-eastern Ukraine as an anarchist experiment (as mentioned by both Victor Serge and Trotsky in later years).

Once Wrangel had been defeated by Makhnovist and Red Army units, the Bolsheviks turned on the movement. Makhno had “assumed that the coming conflict with the Bolsheviks could be limited to the realm of ideas, feeling that the strong revolutionary ideas and feelings of the peasants, together with their distrust of the foreign invaders, were the best guarantees for the movement’s territory. Moreover, Makhno believed that the Bolsheviks would not attack his movement immediately. A respite of some three months would have allowed him to consolidate his power [sic!] and to win over much of the Bolshevik rank and file.” [Palij, Op. Cit., p. 231] From the wording of the second clause of the military agreement (namely, to refuse Red Army deserters or units), it is clear that the Bolsheviks were aware of the appeal of Makhnovist politics on the Red Army soldiers. As soon as Wrangel was defeated, the Red Army attacked. Makhnovist commanders were invited to meetings, arrested and then shot. The Red Army surrounded Makhnovist units and attacked them. At the same time, anarchists were arrested all across the Ukraine. Hulyai Pole itself was attacked (Makhno, despite overwhelming odds, broke out). [Malet, Op. Cit., pp. 71–2] of 1917, all land, equipment and livestock around Hulyai Pole had been expropriated from the gentry and kulaks and placed in the hands of working peasants. Land reform had been achieved by the direct action of the peasantry.

However, “many of the peasants understood that the task was not finished, that it was not enough to appropriate a plot of land and be content with it. From the hardships of their lives they learned that enemies were watching from all sides, and that they must stick together. In several places there were attempts to organise social life communally.” [Arshinov, Op. Cit., p. 86]

In line with social anarchist theory, the Makhnovists also tried to introduce collective forms of farming. These experiments in collective working and living were called “free communes.” Despite the difficult military situation communes were established, principally near Hulyai Pole, in the autumn of 1917. This activity was resumed in February to March of 1918. They re-appeared in early 1919, once the threat of counter-revolution had been (temporarily) defeated.

There were four of these communes within five miles of Hulyai Pole itself and many more further afield. According to Makhno, these agricultural communes “were in most cases organised by peasants, though sometimes their composition was a mixture of peasants and workmen [sic!]. Their organisation was based on equality and solidarity of the members. All members of these communes — both men and women — applied themselves willingly to their tasks, whether in the field or the household.” Unlike many communes, people were given the personal space they desired, so “any members of the commune who wanted to cook separately for themselves and their children, or to take food from the communal kitchens and eat it in their own quarters, met with no objection from the other members.” The management of each commune “was conducted by a general meeting of all its members.” In addition, the communes decided to introducing anarchist schooling based on the ideas of Francisco Ferrer (see section J.5.13 for details). Makhno himself worked on one for
two days a week for a period. [Makhno, quoted by Paul Avrich, Anarchists in the Russian Revolution, pp. 131]

They were set up on the former estates of landlords, and consisted of around 10 families or 100 to 300 people and although each had peasant anarchist members not all the members were anarchists. Makhno worked on Commune No. 1, which was on the estate of former landlord Klassen. When re-founded in 1919 this commune was named after Rosa Luxemburg, the Marxist revolutionary who had recently been murdered in the German revolution. It was a success, for by the spring sowing it had grown from nine families to 285 members working 340 acres of land. The communes represented a way that poor and middle peasants could pool resources to work estates that they could not have worked otherwise and, as Michael Malet points out, “they were organised from the bottom up, not the top down.” [Op. Cit., p. 121]

However, as Makhno himself acknowledged, while the “majority of the toiling population saw in the organisation of rural communes the healthy germ of a new social life” which could provide a “model of a free and communal form of life,” the “mass of people did not go over to it.” They cited as their reasons “the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new ‘revolutionary’ [Bolshevik] and counter-revolutionary authorities. For this reason the toiling population of the district limited their revolutionary activity to supporting in every way those bold springs.” [Makhno, quoted by Avrich, Op. Cit., p. 132] Given that the communes were finally destroyed by White and Red forces in June 1919, their caution was justified. After this, peace did not return long enough for the experiment to be restarted.

As Michael Malet argues:

“Very few peasant movements in history have been able to show in practice the sort of society and type of land-holding they would like to see. The Makhnovist move-

has been concluded; it will call upon the people to cease all military actions hostile to the Soviet power; and for its part, the Soviet power will immediately publish the clauses of the agreement.

This agreement was agreed by both sides, although the Bolshevists immediately broke it by publishing the military agreement first, followed by the political agreement a week later, so obscuring the real meaning of the pact. As it stands, the political clause simply gave anarchists and Makhnovists the rights they should have already had, according to the constitution of the Soviet state. This shows how far the Bolshevists had applied that constitution.

The agreement is highly significant as it itself it disproves many of the Bolshevists slanders about the Makhnovists and it proves the suppression of the anarchist press to have been on political grounds.

However, the Makhnovists desired to add a fourth clause to the Political Agreement:

“Since one of the essential principles of the Makhnovist movement is the struggle for the self-management of the workers, the Insurrectionary Army (Makhnovist) believes it should insist on the following fourth point of the political agreement: in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management; these institutions will be autonomous and joined in federation, by means of agree-
or anarchists, except those who carry on armed conflict against the Soviet Government.

“2. Complete freedom in all forms of public expression and propaganda for all Makhnovists and anarchists, for their principles and ideas, in speech and the press, with the exception of anything that might call for the violent overthrow of the Soviet Government, and on condition that the requirements of military censorship be respected. For all kinds of publications, the Makhnovists and anarchists, as revolutionary organisations recognised by the Soviet Government may make use of the technical apparatus of the Soviet State, while naturally submitting to the technical rules for publication.

“3. Free participation in elections to the Soviets; and the right of Makhnovists and anarchists to be elected thereto. Free participation in the organisation of the forthcoming Fifth Pan-Ukrainian Congress of Soviets ... 

Part II — Military Agreement.

“1. The Ukrainian Revolutionary Insurrectionary Army (Makhnovist) will join the armed forces of the Republic as a partisan army, subordinate, in regard to operations, to the supreme command of the Red Army; it will retain its established internal structure, and does not have to adopt the bases and principles of the regular Red Army.

“2. When crossing Soviet territory at the front, or going between fronts, the Insurrectionary Army will not accept into its ranks neither any detachments of, nor deserters from, the Red Army ...

“3. For the purpose of destroying the common enemy — the White Army — the Ukrainian Revolutionary Insurrectionary Army (Makhnovists) will inform the working masses that collaborate with it the agreement that is proof that peasant revolutionaries can put forward positive, practical ideas.” [Op. Cit., p. 121]

The Makhnovist experiments, it should be noted, have strong similarities to the rural revolution during the Spanish Revolution of 1936 (see sections I.8.5 and I.8.6 for more details).

As well as implementing their economic ideas on workers’ self-management, land reform and free communes, the Makhnovists also organised regional congresses as well as local soviets. Most of the activity happened in and around Hulyai Pole, the focal point of the movement. This was in accord with their vision of a “free soviet system.” Needless to say, the congresses could only be called during periods of relative calm (i.e. the Makhnovist home area was not occupied by hostile forces) and so congresses of insurgents, peasants and workers were called in early 1919 and another in October of that year. The actual dates of the regional congresses were:

23 January 1919 at Velyka Mykhailivka
12 February 1919 at Hulyai Pole
10 April 1919 at Hulyai Pole
20 October 1919 at Aleksandrovsk

A congress for the fifteenth of June 1919 never met because Trotsky unilaterally banned it, under pain of death to anyone even discussing it, never mind calling for it or attending as a delegate. Unlike the third congress, which ignored a similar ban by Dybenko, the fourth congress could not go ahead due to the treacherous attack by the Red Army that preceded it. Four Makhnovist commanders were executed by the Red Army for advertising this congress. Another congress planned for Aleksandrovsk in November 1920 was also prevented by Bolshevik betrayal, namely the attack after Wrangel had been defeated. [Malet, Op. Cit., p. 108] See section 13 for further details.
The reason for these regional congresses was simple, to co-ordinate the revolution. “It was indispensable,” Arshinov notes, “to establish institutions which unified first a district composed of various villages, and then the districts and departments which composed the liberated region. It was indispensable to find general solutions for problems common to the entire region. It was indispensable to create organs suitable for these tasks. And the peasants did not fail to create them. These organs were the regional congresses of peasants and workers.” [Op. Cit., pp. 87–8] These congresses “were composed of delegates of peasants, workers and of the insurgent army, and were intended to clarify and record the decisions of the toiling masses and to be regarded as the supreme authority for the liberated area.” [David Footman, Op. Cit., p. 266]

The first congress, which was the smallest, discussed the strengthening of the front, the adoption of a common nomenclature for popular organisations (soviets and the like) and to send a delegation to convince the draftees in the Nationalist forces to return home. It was also decided to organise a second congress. The second congress was larger, having 245 delegates from 350 districts. This congress “was strongly anti-Bolshevik and favoured a democratic socio-political way of life.” [Palij, Op. Cit., p. 153] One delegate made the issue clear:

“No party has a right to usurp governmental power into its own hands . . . We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers’ wish.” [quoted by Palij, Op. Cit., p. 154]

A general resolution was passed, which acknowledged the fact that the Bolshevik party was “demanding a monopoly of the Revolution.” It also stated:

Properties and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” They also set up “Committees of the Poor” as part of the Bolshevik administrative apparatus, which acted as “informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans.” [Palij, Op. Cit., pp. 212–3]

This conflict undoubtedly gave time for the Whites to reorganise themselves and encouraged the Poles to invade the Ukraine, so prolonging the Civil War. The Makhnovists were threatened by both the Bolsheviks and Wrangel. By mid-1920, Wrangel appeared to be gaining the upper hand and the Makhnovists “could not remain indifferent to Wrangel’s advance . . . Everything done to destroy him would in the last analysis benefit the revolution.” This lead the Makhnovists to consider allying with the Bolsheviks as “the difference between the Communists and Wrangel was that the Communists had the support of the masses with faith in the revolution. It is true that these masses were cynically misled by the Communists, who exploited the revolutionary enthusiasm of the workers in the interests of Bolshevik power.” With this in mind, the Makhnovists agreed at a mass assembly to make an alliance with the Bolsheviks against Wrangel as this would eliminate the White threat and end the civil war. [Arshinov, Op. Cit., p. 176]

The Bolsheviks ignored the Makhnovist offer using mid-September, when “Wrangel’s success caused the Bolsheviks leaders to reconsider.” [Palij, Op. Cit., p. 223] Sometime between the 10th and 15th of October the final agreement was signed:

“Part I — Political Agreement.

1. Immediate release of all Makhnovists and anarchists imprisoned or in exile in the territories of the Soviet Republic; cessation of all persecutions of Makhnovists
steps’ ... [He] concluded: “The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno’s realisation of this.” [Palij, Op. Cit., p. 209 and p. 210] As can be seen, these actions fit perfectly with Trotsky’s secret order and with Bolshevik desire for a monopoly of power for itself (see next section).

As expected, the Makhnovists refused to leave their territory. They realised the political motivations behind the order. As Arshinov notes, “sending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this.” [Op. Cit., p. 163] As well as political objections, the Makhnovists listed practical reasons for not going. Firstly, “the Insurrectionary Army was subordinate neither to the 14th Corps nor to any other unit of the Red Army. The Red commander had no authority to give orders to the Insurrectionary Army.” Secondly, “it was materially impossible to carry it out, since half the men, as well as nearly all the commanders and staff, and Makhno himself, were sick [with typhus].” Thirdly, “the fighting qualities and revolutionary usefulness of the Insurrectionary Army were certainly much greater on their own ground.” [Voline, Op. Cit., pp. 650–1]

The Bolsheviks refused to discuss the issue and on the 14th of January, they declared the Makhnovists outlawed. They then “made a great effort to destroy” Makhno. [Palij, Op. Cit., p. 210] In summary, the Bolsheviks started the conflict in order to eliminate opposition to their power. This led to nine months of bitter fighting between the Red Army and the Makhnovists. To prevent fraternisation, the Bolsheviks did not use local troops and instead imported Latvian, Estonian and Chinese troops. They also used other “new tactics,” and “attacked not only Makhno’s partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their

“With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers’ deputies of their freedom and autonomy.” [quoted by Footman, Op. Cit., p. 267]

As noted in section 5, the congress also decided to issue an “obligatory” mobilisation to gather troops for the Army. It also accepted a resolution on land reform, stating that the land “belongs to nobody” and could be used by anyone as long as they did not use wage labour (see section 6 for the full resolution). The congress accepted a resolution against plunder, violence, and anti-Jewish pogroms, recognising it as an attempt by the Tsarist government to “turn the attention of all toiling people away from the real reason for their poverty,” namely the Tsarist regime’s oppression. [quoted by Palij, Op. Cit., p. 155]

The second congress also elected the Revolutionary Military Soviet of Peasants, Workers and Insurgents, which had “no powers to initiate policy but designed merely to implement the decisions of the periodic congresses.” [Footman, Op. Cit., p. 267]

The third congress was the largest and most representative, with delegates from 72 volosts (in which two million people lived). This congress aimed to “clarify the situation and to consider the prospects for the future of the region.” It decided to conduct a voluntary mobilisation of men to fight the Whites and “rejected, with the approval of both rich and poor peasants, the Bolshevik expropriations.” [Palij, Op. Cit., p. 158] Toward the end of the congress, it received a telegram from the Bolshevik commander Dybenko calling it “counter-revolutionary,” its organisers “outlaws” and dissolving it by his order. The congress immediately voted
an indignant resolution in rely. This corrected Dybenko’s factual mistakes on who called it, informed him why it was called, gave him a history lesson on the Makhnovist region and asked him:

“Can there exist laws made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves? ...

“Is it permissible, is it admissible, that they should come to the country to establish laws of violence, to subjugate a people who have just overthrown all lawmakers and all laws?

“Does there exist a law according to which a revolutionary has the right to apply the most severe penalties to a revolutionary mass, of which he calls himself the defender, simply because this mass has taken the good things which the revolution promised them, freedom and equality, without his permission?

“Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the freedom which they have just conquered?

“Do the laws of the revolution order the shooting of a delegate because he believes he ought to carry out the mandate given him by the revolutionary mass which elected him?

“Whose interests should the revolutionary defend; those of the Party or those of the people who set the revolution in motion with their blood?” [quoted by Arshinov, Op. Cit., p. 103]

As we discuss in section 13, Trotsky’s order to ban the fourth congress indicates that such laws do exist, with the “entire peasant and labouring population are declared guilty of high treason if they detachments” and would agitate against “guerrilla-ism.” Once partisan forces meet with Red Army troops, the former “ceases to be a military unit after it has appeared on our side of the line ... From that moment it becomes merely material for processing, and for that purpose is to be sent to our rear.” To “secure complete subordination of the detachments,” the Red forces “must make use of the agents previously set to these detachments.” The aim, simply put, was to ensure that the partisans became “fully subordinate to our command.” If the partisans who had been fighting for revolution and against the Whites opposed becoming “material for processing” (i.e cannon fodder), “refuses to submit to orders, displays unruleiness and self-will,” then it “must be subjected to ruthless punishment.” Recognising the organic links the partisans had with the peasants, Trotsky argues that “in the Ukraine, guerrilla detachments appear and disappear with ease, dissolving themselves into the mass of the armed peasant population” and so “a fundamental condition for the success against guerrilla-ism is unconditional disarmament of the rural population, without exception.” [Trotsky, How the Revolution Armed, vol. II, pp. 440–2] As events would show, the Bolsheviks implemented Trotsky’s order to the letter.

On December 24th, Makhno’s troops met with the Bolshevik 14th army and its commander “admitted Makhno’s service in defeating Denikin.” However, while “the Bolsheviks fraternised with the Makhno troops ... they distrusted Makhno, fearing the popularity he had gained as a result of his successful fighting against Denikin.” The Bolsheviks had “no intention of tolerating Makhno’s independent policy, but hoped first to destroy his army by removing it from its own base. With this in mind, on January 8th, 1920, the Revolutionary Military Council of the Fourteenth Army ordered Makhno to move to the Polish Front ... The author of the order realised that there was no real war between the Poles and the Bolsheviks at the time and he also knew that Makhno would not abandon his region.... Uborevich [the author] explained that an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next
in the Bolshevik attempt to “liquidate the Makhnovist movement.” This campaign saw Bolshevik regiments invade the insurgent area, shooting militants on the spot and destroying the free communes and other Makhnovist organisations. [Arshinov, Op. Cit., p. 121] It should be noted that during the Spanish Revolution, the Stalinists acted in the same way, attacking rural collectives while the anarchist troops fought against Franco at the front.

Thus the participating event for the break between the Makhnovists and Bolsheviks was Trotsky’s banning of the fourth regional congress. However, this was preceded by an intense press campaign against the Makhnovists as well as holding back of essential supplies from the frontline troops. Clearly the Bolsheviks considered that the soviet system was threatened if soviet conferences were called and that the “dictatorship of the proletariat” was undermined if the proletariat took part in the revolutionary process!

With the Makhnovist front weakened, they could not hold against Denikin’s attacks, particularly when Red Army troops retreated on their flank. Thus, the front which the Makhnovists themselves had formed and held for more than six months was finally broken. [Arshinov, Op. Cit., p. 124] The Red Army was split into three and the Whites entered the Ukraine, which the Bolsheviks promptly abandoned to its fate. The Makhnovists, drawing stray Red Army and other forces to it, continued to fight the Whites, ultimately inflicting a decisive defeat on them at Peregonovka, subsequently destroying their supply lines and ensuring Denikin’s defeat (see section 4).

The Red Army re-entered the Ukraine at the end of 1919. Bolshevik plans with regard to the Makhnovists had already been decided in a secret order written by Trotsky on December 11th. Red Army troops had to “be protected against infection by guerrilla-ism and Makhnovism” by various means, including “extensive agitation” which used “examples from the past to show the treacherous role played by the Makhnovites.” A “considerable number of agents” would be sent “ahead” of the main forces to “join the guerrilla
Makhnovist “counter-intelligence” section. As noted in section 5, the Makhnovists, like all the armies in the Russian Civil War, had its intelligence service. It combined a number of functions, such as military reconnaissance, arrest and holding of prisoners, counter-insurgency (“Originally it had a punitive function, but because of improper treatment of prisoners of war, it was deprived of its punitive function.” [Palij, Op. Cit., p. 300]). The delegate stated that this “counter-espionage service” was engaged in “arbitrary acts and uncontrolled actions — of which some are very serious, rather like the Bolshevik Cheka.” [quoted by Voline, Op. Cit., p. 643] Immediately a commission of several delegates was created to investigate the situation. Voline argues that “Such an initiative on the part of workers’ delegates would not have been possible under the Bolshevik regime. It was by activity of this kind that the congress gave a preview of the way in which a society should function from the beginning if it is based on a desire for progress and self-realisation.” [Voline, Ibid.] Sadly, the commission could not complete its work due to the city being evacuated soon after the congress.

Another incident shows that under the Makhnovists the civilian population was in control. A delegate noted that Klein, the Makhnovist military commander in the city, had become publicly and riotously drunk after issuing proclamations against drunkenness. Klein was called before the congress, which accepted his apology and his request to be sent to the front, away from the boredom of desk work which had driven him to drink! This, according to Voline, showed that the workers and their congress were the masters and the army its servant. [Voline, Op. Cit., pp. 645–7]

Outside of the congresses the work of local Soviets was to be co-ordinated through the Revolutionary Military Soviet (RMS), the first RMS was set up by the 2nd congress and consisted of one delegate for each of the 32 volsts the Makhnovista had liberated. The RMS was to be answerable to the congresses and limited to implementing their decisions but the difficult military situation meant

if they dare to participate in their own free congress.” [Op. Cit., p. 123]

According to Voline, in Alexandrovsk “all workers meetings planned for the purpose of discussing the call of the Council and the agenda of the Congress were forbidden under pain of death. Those which were organised in ignorance of the order were dispersed by armed force. In other cities and towns, the Bolsheviks acted in the same way. As for the peasants in the villages, they were treated with still less ceremony; in many places militants and even peasants ‘suspected of acting in favour of the insurgents and the Congress’ were seized and executed after a semblance of a trial. Many peasants carrying the call were arrested, ‘tried’ and shot, before they could even find out about Order No. 1824.” [Op. Cit., pp. 599–600]

As Arshinov summarises:

“This entire document represents such a crying usurpation of the rights of the workers that it is pointless to comment further on it.” [Op. Cit., p. 124]

Trotsky continued his usurpation of the rights of the workers in a later order on the congress. In this, Trotsky called this openly announced workers, peasant and insurgent congress a “conspiracy against Soviet power” and a “congress of Anarchist-kulaks delegates for struggle against the Red Army and the Soviet power” (which explains why the congress organisers had asked that hotbed of kulakism, the Red Army troops, to send delegates!). Trotsky indicated the fate of those workers and peasants who dared participate in their own revolution: “There can be only one penalty for these individuals: shooting.” [How the Revolution Armed, vol. II, p. 293]

Trotsky also ordered the arrest of Makhno, who escaped but who ordered his troops to remain under Bolshevik command to ensure that the front against Denikin was maintained. However, five members of his staff were shot for having distributed literature concerning the banned fourth congress. This order was the first step
“1. By the present order this congress is forbidden, and will in no circumstances be allowed to take place.

“2. All the peasant and working class population shall be warned, orally and in writing, that participation in the said congress will be considered an act of high treason against the Soviet Republic and the Soviet front.

“3. All delegates to the said Congress shall be arrested immediately and bought before the Revolutionary Military Tribunal of the 14th, formerly 2nd, Army of the Ukraine.

“4. The persons spreading the call of Makhno and the Hulyai Pole Executive Committee to the Congress shall likewise be arrested.

“5. The present order shall have the force of law as soon as it is telegraphed. It should be widely distributed, displayed in all public places, and sent to the representatives of the executive committees of towns and villages, as well as to all the representatives of Soviet authority, and to commanders and commissars of military units.”

Arshinov argues that this “document is truly classic” and “whoever studies the Russian revolution should learn it by heart.” He compares Trotsky’s order to the reply the Makhnovists had sent to the Bolsheviks’ attempt to ban the third congress. Clearly, Order No. 1824 shows that laws did exist “made by a a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves”!

Equally, the order shows that “a revolutionary has the right to apply the most severe penalties to a revolutionary mass ... simply because this mass has taken the good things which the revolution has promised them, freedom and equality, without his permission?" Little wonder Arshinov states that this order meant that the “entire peasant and labouring population are declared guilty of high treason this seldom happened. When it did (the 3rd Congress) the Congress had no problems with its actions in the previous period. After the Aleksandrovsk congress, the RMS consisted of 22 delegates including three known Bolsheviks and four known Makhnovists, the Bolsheviks considered the remaining delegates “anarchists or anarchist sympathisers”.

The military chaos of 1920 saw the RMS dissolved and replaced by the Soviet of Revolutionary Insurgents of the Ukraine, which consisted of seven members elected by the insurgent army. Its secretary was a left Socialist Revolutionary. The RMS in addition to making decisions between Congresses carried out propaganda work including the editing of the Makhnovist paper “The Road to Freedom” and collected and distributed money.

Lastly, we must discuss what happened when the Makhnovists applied their ideas in any cities they liberated as this gives a clear idea of the way they applied their ideas in practice. Anarchist participant Yossif the Emigrant stated that it was “Makhno’s custom upon taking a city or town to call the people together and announce to them that henceforth they are free to organise their lives as they think best for themselves. He always proclaims complete freedom of speech and press; he does not fill the prisons or begin executions, as the Communists do.” He stressed it was “the expression of the toilers themselves” and “the first great mass movement that by its own efforts seeks to free itself from government and establish economic self-determination. In that sense it is thoroughly Anarchistic.” [Alexander Berkman, The Bolshevik Myth, pp. 193–5]

Arshinov paints a similar picture:

“As soon as they entered a city, they declared that they did not represent any kind of authority, that their armed forces obliged no one to any sort of obligation and had no other aim than to protect the freedom of the working people. The freedom of the peasants and the workers, said the Makhnovists, resides in the peasants and work-
ers themselves and may not be restricted. In all fields of their lives it is up to the workers and peasants themselves to construct whatever they consider necessary. As for the Makhnovists — they can only assist them with advice, by putting at their disposal the intellectual or military forces they need, but under no circumstances can the Makhnovists prescribe for them in any manner.” [Arshinov, Op. Cit., p. 148]

In addition, the Makhnovists “fully applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power.” Indeed, the “only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statists was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people.” They also took the opportunity to destroy every prison they got their hands on, believing that free people “have no use for prisons” which are “always built only to subjugate the people, the workers and peasants.” [Op. Cit., p. 153, p. 154 and p. 153]

The Makhnovists encouraged self-management. Looking at Aleksandrovsk:

“They immediately invited the working population to participate in a general conference of the workers of the city. When the conference met, a detailed report was given on the military situation in the region and it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations, basing themselves on the principles of labour and equality. The workers thorough-going annihilation of the partisan’s ideological leaders as well as men like Hryhoriyov who wielded political power.” [Adams, Op. Cit., p. 360] Unsurprisingly, given Trotsky’s stated mission, Bolshevik hostility towards the Makhnovists became more than mere words. It took the form of both direct and indirect aggression. “In the latter part of May,” states Footman, “the Cheka sent over two agents to assassinate Makhno.” Around the same time, the Red “hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition.” [Op. Cit., p. 271 and p. 272] This, obviously, had a negative impact the Makhnovists’ ability to fight the Whites.

Due to the gravity of the military and political situations both at and behind the front, the Makhnovist Revolutionary Military Soviet decided to call an extraordinary congress of peasants, workers, insurgents and Red soldiers. This congress was to determine the immediate tasks and the practical measures to be taken by the workers to remedy the mortal danger represented by the Whites. On May 31st, a call was sent out which stated, in part, “that only the working masses themselves can find a solution [to the current problem], and not individuals or parties.” The congress would be based as follows: “elections of delegates of peasants and workers will take place at general assemblies of villages, towns, factories and workshops.” [quoted by Arshinov, Op. Cit., p. 121]

The Bolshevik reply came quickly, with Trotsky issuing his infamous Order no. 1824 on June 4th:

“This Congress is directed squarely against the Soviet Power in the Ukraine and against the organisation of the southern front, where Makhno’s brigade is stationed. This congress can have no other result then to excite some new disgraceful revolt like that of Grigor’ev, and to open the front to the Whites, before whom Makhno’s brigade can only retreat incessantly on account of the incompetence, criminal designs and treason of its commanders.

5216 5265
defender, simply because this mass has taken the good 

things which the revolution promised them, freedom
and equality, without his permission?

“Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the
freedom which they have just conquered?

“Do the laws of the revolution order the shooting of a del-
egate because he believes he ought to carry out the man-
date given him by the revolutionary mass which elected
him?

“Whose interests should the revolutionary defend; those
of the Party or those of the people who set the revolution
Cit., p. 103]

After the 3rd congress, the Bolsheviks started to turn against
Makhno:

“It was now that favourable mention of Makhno ceased
to appear in the Soviet Press; an increasingly critical
note became apparent. Supplies failed to get through to
Makhnovite units and areas.” [Footman, Op. Cit., p. 271]

Lenin himself advised local Bolshevik leaders on Makhno, stating in early May that “temporarily, while Rostov is not yet captured, it is necessary to be diplomatic.” [quoted by Arthur E. Adams, Bolsheviks in the Ukraine, pp. 352–3] Thus, as long as the Bolsheviks needed cannon fodder, Makhno was to be tolerated. Things changed when Trotsky arrived. On May 17th he promised a “radical and merciless liquidation of partisanschina [the partisan movement], independence, hooliganism, and leftism.” [quoted by Adams, Op. Cit., p. 360] According to one historian, Trotsky “favoured a

enthusiastically acclaimed all these suggestions; but they hesitated to carry them out, troubled by their nov-
elty, and troubled mainly by the nearness of the front,
which made them fear that the situation of the town
was uncertain and unstable. The first conference was
followed by a second. The problems of organising life
according to principles of self-management by workers
were examined and discussed with animation by the
masses of workers, who all welcomed these ideas with
the greatest enthusiasm, but who only with difficulty
succeeded in giving them concrete forms. Railroad
workers took the first step in this direction. They formed
a committee charged with organising the railway
network of the region ... From this point, the proletariat
of Aleksandrovsk began to turn systematically to the
Cit., p. 149]

Unfortunately, the Makhnovists occupied only two cities
(Alexandrovsk for four weeks and Katerinoslav for two periods
of one and five weeks respectively). As a rule the Makhnovist
rank and file had little or no experience of life in the cities and
this placed severe limits on their ability to understand the specific
problems of the workers there. In addition, the cities did not have
a large anarchist movement, meaning that the Mensheviks and
Bolsheviks had more support then they did. Both parties were,
at best, neutral to the Makhnovists and anarchists, so making
it likely that they would influence the city workers against the
movement. As Voline noted, the “absence of a vigorous organised
workers’ movement which could support the peasant insurgents”
was a disadvantage. [Op. Cit., p. 571]

There were minor successes in both cities. In Alexandrovsk,
some trains were got running and a few factories reopened. In
Katerinoslav (where the city was under a state of siege and
constant bombardment by the Whites), the tobacco workers won a collective agreement that had long been refused and the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, Op. Cit., p. 124]

Clearly, whenever they could, the Makhnovists practised their stated goals of working-class self-management and supported the organisational structures to ensure the control of and participation in the social revolution by the toiling masses. Equally, when they liberated towns and cities they did not impose their own power upon the working-class population but rather urged it to organise itself by setting up soviets, unions and other forms of working-class power. They urged workers to organise self-management of industry. True to the anarchist vision of a free society, they advocated and practised freedom of assembly, speech and organisation. In the words of historian Christopher Reed:

“Makhno’s Insurgent Army ... was the quintessence of a self-administered, people’s revolutionary army. It arose from the peasants, it was composed of peasants, it handed power to the peasants. It encouraged the growth of communes, co-operatives and soviets but distrusted all permanent elites attempting to take hold within them. It would be foolish to think that Makhno was supported by every peasant or that he and his followers could not, on occasions, direct their cruelty towards dissidents within their own ranks, but, on the whole, the movement perhaps erred on the side of being too self-effacing, of handing too much authority to the population at key moments.” [From Tsar to Soviets, p. 260]
the political differences and the evolving nature of the Bolshevik’s conception of party rule).

Such a perspective ensured that they could only co-operate during periods when the White threat seemed most dangerous. As soon as the threat was defeated or they felt strong enough, the Bolsheviks turned on their former allies instantly. This section discusses each of the Bolshevik betrayals and the subsequent conflicts. As such, it is naturally broken up into three parts, reflecting each of the betrayals and their aftermath.

Michael Malet sums up the usual Bolshevik-Makhnovist relationship by arguing that it “will be apparent that the aim of the Soviet government from the spring of 1919 onwards was to destroy the Makhnovists as an independent force, preferably killing Makhno himself in the process... Given the disastrous nature of Bolshevik land policy... this was not only unsurprisingly, it was inevitable.” He also adds that the “fact that Makhno had a socio-political philosophy to back up his arguments only made the Bolsheviks more determined to break his hold over the south-east Ukraine, as soon as they realised that Nestor would not surrender that hold voluntarily.” [Op. Cit., p. 128 and p. 129]

The first betrayal occurred in June 1919. The Makhnovists had been integrated with the Red Army in late January 1919, retaining their internal organisation (including the election of commanders) and their black flags. With the Red Army they fought against Denikin’s Volunteer Army. Before the arrival of Red forces in their region and the subsequent pact, the Makhnovists had organised a successful regional insurgent, peasant and worker congress which had agreed to call a second for February 12th. This second congress set up a Revolutionary Military Soviet to implement the decisions of this and following congresses. This congress (see section 7) passed an anti-Bolshevik resolution, which urged “the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution.” Such actions included the monopolisation of the revolution, centralis-

As such, Makhnovist practice matched its theory. This can be said of few social movements and it is to their credit that this is the case.

8 Weren’t the Makhnovists just Kulaks?

According to Trotsky (and, of course, repeated by his followers), “Makhno created a cavalry of peasants who supplied their own horses. These were not the downtrodden village poor whom the October revolution first awakened, but the strong and well-fed peasants who were afraid of losing what they had. The anarchist ideas of Makhno (ignoring of the state, non-recognition of the central power) corresponded to the spirit of this kulak cavalry as nothing else could.” He argued that the Makhnovist struggle was not the anarchist struggle against the state and capitalism, but rather “a struggle of the infuriated petty property owner against the proletarian dictatorship.” The Makhnov movement, he stressed, was just an example of the “convulsions of the peasant petty bourgeoisie which desired, of course, to liberate itself from capital but at the same time did not consent to subordinate itself to the dictatorship of the proletariat.” [Lenin and Trotsky, Kronstadt, p. 80, p. 89 and pp. 89–90]

Unfortunately for those who use this kind of argument against the Makhnovists, it fails to stand up to any kind of scrutiny. Ignoring the sophistry of equating the Bolshevik party’s dictatorship with the “dictatorship of the proletariat,” we can easily refute Trotsky’s somewhat spurious argument concerning the background of the Makhnovists.

Firstly, however, we should clarify what is meant by the term “kulak.” According to one set of Trotskyist editors, it was “popularly used to refer to well-to-do peasants who owned land and hired poor peasants to work it.” [“glossary,” Lenin and Trotsky, Kronstadt, p. 146] The term itself derives from the Russian for “fist,” with appropriate overtones of grasping and meanness. In other words, a rural small-scale capitalist (employer of wage labour and often the
renter of land and loaner of money as well) rather than a well-off peasant as such. Trotsky, however, muddies the water considerably by talking about the “peasant petty bourgeoisie” as well. Given that a peasant is “petty” (i.e. petit) bourgeois (i.e. own and use their own means of production), Trotsky is blurring the lines between rural capitalist (kulak) and the middle peasantry, as occurred so often under Bolshevik rule.

Secondly, we could just point to the eyewitness accounts of the anarchists Arshinov and Voline. Both stress that the Makhno movement was a mass revolutionary movement of the peasant and working poor in the Southern Ukraine. Arshinov states that after Denikin’s troops had been broken in 1919, the Makhnovists “literally swept through villages, towns and cities like an enormous broom” and the “returned pomechikhs [landlords], the kulaks, the police, the priests” were destroyed, so refuting the “the myth spread by the Bolsheviks about the so-called kulak character of the Makhnovshchina.” Ironically, he states that “wherever the Makhnovist movement developed, the kulaks sought the protection of the Soviet authorities, and found it there.” [Op. Cit., p. 145] Yossif the Emigrant, another anarchist active in the movement, told anarchist Alexander Berkman that while there was a “kulak” element within it, “the great majority are not of that type.” [quoted by Berkman, The Bolshevik Myth, p. 187] According to Gallina Makhno (Makhno’s wife), when entering a town or village it was “always Makhno’s practice to compel the rich peasants, the kulaki, to give up their surplus wealth, which was then divided among the poor, Makhno keeping a share for his army. Then he would call a meeting of the villagers, address them on the purposes of the povstantsi [partisan] movement, and distribute his literature.” [Emma Goldman, My Disillusionment in Russia, p. 149]

However, this would be replying to Trotsky’s assertions with testimony which was obviously pro-Makhnovist. As such, we need to do more than this, we need to refute Trotsky’s assertions in states the obvious: “The Makhnovists were totally opposed to the Whites.” [Op. Cit., p. 140]

We will leave the last word to the considered judgement of the White General Denikin who, in exile, stated that the Makhno movement was “the most antagonistic to the idea of the White movement.” [quoted by Malet, Op. Cit., p. 140]

In summary, the Makhnovists fought the White counter-revolution with all their might, playing a key role in the struggle and defeat of both Denikin and Wrangel. Anyone who claims that they worked with the Whites is either ignorant or a liar.

13 What was the relationship of the Bolsheviks to the movement?

The Makhnovists worked with the Bolsheviks in three periods. The first (and longest) was against Denikin after the Red Army had entered the Ukraine after the withdrawal of the Austro-Germans. The second was an informal agreement for a short period after Denikin had been defeated. The third was a formal political and military agreement between October and November 1920 in the struggle against Wrangel. Each period of co-operation ended with Bolshevik betrayal and conflict between the two forces.

As such, the relationship of the Bolsheviks to the Makhnovists was one of, at best, hostile co-operation against a common enemy. Usually, it was one of conflict. This was due, fundamentally, to two different concepts of social revolution. While the Makhnovists, as anarchists, believed in working-class self-management and autonomy, the Bolsheviks believed that only a centralised state structure (headed by themselves) could ensure the success of the revolution. By equating working-class power with Bolshevik party government (and from 1919 onwards, with the dictatorship of the Bolshevik party), they could not help viewing the Makhnovist movement as a threat to their power (see section 14 for a discussion of
the year. Equally, it seems like a bad joke for Trotsky to blame the victim of Bolshevik intrigues for defending themselves. And the idea that Makhno had “protectors” in any imperialist nation is a joke, which deserves only laughter as a response!

It should be noted that it is “agreed that the initiative for joint action against Wrangel came from the Makhnovites.” This was ignored by the Bolsheviks until after “Wrangel started his big offensive” in September 1920 [Footman, Op. Cit., p. 294 and p. 295]

So while the Bolsheviks claimed that the Makhnovists had made a pact with General Wrangel, the facts are that Makhnovists fought the Whites with all their energy. Indeed, they considered the Whites so great a threat to the revolution they even agreed to pursue a pact with the Bolsheviks, who had betrayed them twice already and had subjected both them and the peasantry to repression. As such, it could be argued that the Bolsheviks were the only counter-revolutionaries the Makhnovists can be accurately accused of collaborating with.

Every historian who has studied the movement has refuted claims that the Makhnovist movement made any alliance with the counter-revolutionary White forces. For example, Michael Palij notes that Denikin “was the main enemy that Makhno fought, stubbornly and uncompromising, from the end of 1918 to the end of 1919. Its social and anti-Ukrainian policies greatly antagonised all segments of Ukrainian society. The result of this was an increased resistance to the Volunteer Army and its regime and a substantial strengthening of the Makhno movement.” He also notes that after several months of “hard fighting” Denikin’s troops “came to regard Makhno’s army as their most formidable enemy.” Makhno’s conflict with Wrangel was equally as fierce and “[a]lthough Makhno had fought both the Bolsheviks and Wrangel, his contribution to the final defeat of the latter was essential, as is proved by the efforts of both sides to have him as an ally.” [Op. Cit., p. 177, p. 202 and p. 228] According to Footman, Makhno “remained to the end the implacable enemy of the Whites.” [Op. Cit., p. 295] Malet just

depth, drawing on as many non-anarchist sources and facts as possible.

The key to refuting Trotsky’s argument that the Makhnovists were just kulaks is to understand the nature of rural life before and during 1917. Michael Malet estimates that in 1917, the peasantry could be divided into three broad categories. About 40 percent could no longer make a living off their land or had none, another 40 percent who could make ends meet, except in a bad year, and 20 percent who were relatively well off, with a fraction at the very top who were very well off. [Op. Cit., p. 117] Assuming that “kulak” simply meant “rich” or “well-off” peasant, then Trotsky is arguing that the Makhnovist movement represented and was based on this top 20 percent. However, if we take the term “kulak” to mean “small rural capitalist” (i.e. employer of wage labour) then this figure would be substantially smaller as few within this group would employ hired labour or rent land. In fact, the percentage of peasant households in Russia employing permanent wage-labour was 3.3% in 1917, falling to 1% in 1920. [Teodor Shanin, The Awkward Class, p. 171]

In 1917, the peasants all across the Russian Empire took back the land stolen by the landlords. This lead to two developments. Firstly, there was a “powerful levelling effect” in rural life. [Shanin, Op. Cit., p. 159] Secondly, the peasants would only support those who supported their aspirations for land reform (which was why the Bolsheviks effectively stole the Socialist-Revolutionary land policy in 1917). The Ukraine was no different. In 1917 the class structure in the countryside changed when the Hulyai Pole peasants were amongst the first to seize the landlords’ land. In August 1917 Makhno assembled all the landed gentry (“pomeshchiks”) of the region “and made them give him all the documents relating to lands and buildings.” After making an exact inventory of all this property and presenting a report to the local and then district congress of soviets, he “proceeded to equalise the rights of the pomeshchiks and kulaks with those of the poor peasant labour-
ers in regard to the use of the land ... the congress decided to let the pomeshchiks and kulaks have a share of the land, as well as tools and livestock, equal to that of the labourers.” Several other peasant congresses nearby followed this example and adopted the same measure. [Peter Arshinov, Op. Cit., pp. 53–4]

Most of this land, tools and livestock was distributed to poor peasants, the rest was used to set up voluntary communes where the peasants themselves (and not the state) self-managed the land. Thus the peasants’ “economic conditions in the region of the Makhno movement were greatly improved at the expense of the landlords, the church, monasteries, and the richest peasants.” [Palij, Op. Cit., p. 214] This redistribution was based on the principle that every peasant was entitled to as much land as their family could cultivate without the use of hired labour. The abolition of wage labour in the countryside was also the method the anarchists were to use in Spain to divide up the land some 20 years later.

We should also note that the Makhnovist policy of land reform based on the abolition of wage labour was, as we noted in section 7, the position agreed at the second regional congress called in 1919. The Makhnovists specifically argued with regards to the kulaks:

“We are sure that ... the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak’s surplus land for general use, then naturally drawing the kulak elements into the social organisation.” [cited by Michael Malet, Op. Cit., pp. 118–9]

As such, when Trotsky talks about the “downtrodden village poor whom the October revolution first awakened,” he is wrong. In the area around Hulyai Pole it was not the October revolution which “first awakened” them into action, it was the activities of Makhno and the anarchists during the summer and autumn of

kind of popular base. [quoted by Palij, Op. Cit., p. 220] By October, Trotsky had retracted this statement:

“Wrangel really tried to come into direct contact with Makhno’s men and dispatched to Makhno’s headquarters two representatives for negotiations ... [However] Makhno’s men not only did not enter into negotiations with the representatives of Wrangel, but publicly hanged them as soon as they arrived at the headquarters.” [quoted by Palij, Ibid.]

Trotsky, of course, still tried to blacken the Makhnovists. In the same article he argued that “[u]ndoubtedly Makhno actually co-operated with Wrangel, and also with the Polish szlachta, as he fought with them against the Red Army. However, there was no formal alliance between them. All the documents mentioning a formal alliance were fabricated by Wrangel ... All this fabrication was made to deceive the protectors of Makhno, the French, and other imperialists.” [quoted by Palij, Op. Cit., p. 225]

It is hard to know where to start in this amazing piece of political story-telling. As we discuss in more detail in section 13, the Makhnovists were fighting the Red Army from January to September 1920 because the Bolsheviks had engineered their outlawing! As historian David Footman points out, the attempt by the Bolsheviks to transfer Makhno to Polish front was done for political reasons:

“it is admitted on the Soviet side that this order was primarily ‘dictated by the necessity’ of liquidating Makhnovshchina as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence” [Op. Cit., p. 291]

Indeed, it could be argued that by attacking Makhno in January helped the Whites to regroup under Wrangel and return later in
not limit their aims to national liberation, but rather sought the self-liberation of the working classes from every oppression — foreign or domestic, economic or political, cultural or social.

12 Did the Makhnovists support the Whites?

No, they did not. However, black propaganda by the Bolsheviks stated they did. Victor Serge wrote about the “strenuous calumnies put out by the Communist Party” against him “which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them.” [Memoirs of a Revolutionary, p. 122]

According to Arshinov, “Soviet newspapers spread the false news of an alliance between Makhno and Wrangel” and in the summer of 1920, a representative of the Kharkov government “declared at the Plenary Session of the Ekaterinoslav Soviet, that Soviet authorities had written proof of the alliance between Makhno and Wrangel. This was obviously an intentional lie.” Wrangel, perhaps believing these lies had some basis, sent a messenger to Makhno in July, 1920. “Wrangel’s messenger was immediately executed” and the “entire incident was reported in the Makhnovist press. All this was perfectly clear to the Bolsheviks. They nevertheless continued to trumpet the alliance between Makhno and Wrangel. It was only after a military-political agreement had been concluded between the Makhnovists and the Soviet power that the Soviet Commissariat of War announced that there had never been an alliance between Makhno and Wrangel, that earlier Soviet assertions to this effect were an error.” [Op. Cit., pp. 173–5]

Needless to say, while the Bolsheviks spread the rumour to discredit Makhno, the Whites spread it to win the confidence of the peasants. Thus when Trotsky stated that Wrangel had “united with the Ukrainian partisan Makhno,” he was aiding the efforts of Wrangel to learn from previous White mistakes and build some

1917 which had done that (or, more correctly, it was their activities which aided this process as the poor peasants and landless workers needed no encouragement to expropriate the landlords).

Needless to say, this land redistribution reinforced Makhno’s popularity with the people and was essential for the army’s later popularity and its ability to depend on the peasants for support. However, the landlords and richer kulaks did not appreciate it and, unsurprisingly, tried to crush the movement when they could. Once the Austro-Germans invaded, the local rich took the opportunity to roll back the social revolution and the local pomeshchiks and kulaks formed a “special volunteer detachment” to fight Makhno once he had returned from exile in July 1918. [Arshinov, Op. Cit., p. 59]

This system of land reform did not seek to divide the village. Indeed, the Makhnovist approach is sometimes called the “united village” theory. Rather than provoke unnecessary and damaging conflict behind the frontlines, land reform would be placed in the hands of the village community, which would ensure that even the kulaks would have a fair stake in the post-revolutionary society as everyone would have as much land as they could till without using hired labour. The Bolshevik policy, as we will see, aimed at artificially imposing “class conflict” upon the villages from without and was a disaster as it was totally alien to the actual socio-economic situation. Unsurprisingly, peasant communities as a whole rose up against the Bolsheviks all across Russia.

As such, the claim that the Makhnovists were simply “kulaks” is false as it fails to, firstly, acknowledge the actual pre-revolutionary composition of the peasantry and, secondly, to understand the social-revolution that had happened in the region of Hulyai Pole in 1917 and, thirdly, totally ignores the actual Makhnovist position on land reform. As Michael Malet argues, the Bolsheviks “totally misconstrued the nature of the Makhno movement. It was not a movement of kulaks, but of the broad mass of the peasants, especially the poor and middle peasants.” [Op. Cit., p. 122]
This was sometimes acknowledged by Bolsheviks themselves. IAkovlev acknowledged in 1920 that in 1919 Makhno “was a real peasant idol, an expression of all peasant spontaneity against ... Communists in the cities and simultaneously against city capitalists and landowners. In the Makhno movement it is difficult to distinguish where the poor peasant begins [and] the ‘kulak’ ends. It was a spontaneous peasant movement .... In the village we had no foothold, there was not one element with which we could join that would be our ally in the struggle against the bandits [sic!’.” [quoted by Palij, Op. Cit., p. 157]

According to a Soviet author present at the Makhnovist regional congresses on January 23 and February 12: “In 1919 when I asked the chairman of the two Congresses (a Jewish farmer) whether the ‘kulaks’ were allowed to participate in the Congress, he angrily responded: ‘When will you finally stop talking about kulaks? Now we have no kulaks among us: everybody is tilling as much land as he wishes and as much as he can.’” [quoted by Palij, Op. Cit., p. 293]

According to Christian Rakovskii, the Bolshevik ruler of Ukraine, “three-fourths of the membership of the [partisan] bands were poor peasants.” He presented a highly original and inventive explanation of this fact by arguing that “rich peasants stayed in the village and paid poor ones to fight. Poor peasants were the hired army of the kulaks.” [Vladimir N. Brovkin, Behind the Front the Lines of the Civil War, p. 112 and p. 328]

Even Trotsky (himself the son of a rich peasant!) let the cat out of the bag in 1919:

“The liquidation of Makhno does not mean the end of the Makhnovschyna, which has its roots in the ignorant popular masses.” [quoted by Malet, Op. Cit., p. 122]

Ultimately, all sources (including Bolshevik ones) accept that in the autumn of 1919 (at the very least) Makhno’s support was overwhelming and came from all sections of the population.
should be given in the schools, now that Denikin’s troops have been expelled.

“The revolutionary insurgents, holding to the principles of true socialism, cannot in any field or by any measure do violence to the natural desires and needs of the Ukrainian people. This is why the question of the language to be taught in the schools cannot be solved by our army, but can only be decided by the people themselves, by parents, teachers and students. It goes without saying that all the orders of Denikin’s so-called ‘Special Bureau’ as well as General Mai-Maevsky’s order No. 22, which forbids the use of the mother tongue in the schools, are null and void, having been forcibly imposed on the schools. In the interest of the greatest intellectual development of the people, the language of instruction should be that toward which the local population naturally tends, and this is why the population, the students, the teachers and the parents, and not authorities or the army, should freely and independently resolve this question.”

They also printed a Ukrainian version of their paper (“The Road to Freedom”). Clearly their opposition to Ukrainian nationalism did not mean that the Makhnovists were indifferent to imperialism and foreign political or cultural domination. This explains why Makhno criticised his enemies for anti-Ukrainian actions and language. Michael Malet summarises, for the Makhnovists “Ukrainian culture was welcome, but political nationalism was highly suspect.” [Op. Cit., p. 143]

Given anarchist support for federal organisation from below upwards, working-class self-determination and autonomy, plus a healthy respect for local culture, it is easy to see why some histo-

Even ignoring the fact there was a social revolution and the eye-witness Bolshevik accounts (including Trotsky’s!) which contradict Trotsky’s assertions, Trotsky can be faulted for other reasons.

The most important issue is simply that the Makhnovist movement could not have survived four years if (at best) 20 per cent of the population supported it. As Christopher Reed notes, when the Makhnovists were “in retreat they would abandon their weapons and merge with the local population. The fact that they were able to succeed shows how closely they were linked with the ordinary peasants because such tactics made Makhno’s men very vulnerable to informers. There were very few examples of betrayal.” [Op. Cit., p. 260] If Makhno’s social base was as weak as claimed there would have been no need for the Bolsheviks to enter into alliances with him, particularly in the autumn of 1920 when the Makhnovists held no significant liberated area. Even after the defeat of Wrangel and the subsequent Bolshevik betrayal and repression, Makhno’s mass base allowed him to remain active for months. Indeed, it was only when the peasants themselves had become exhausted in 1921 due to worsening economic conditions and state repression, were the Makhnovists finally forced into exile.

In the attempt to “eradicate his influence in the countryside” the Bolsheviks “by weight of numbers and consistent ruthlessness they achieved a partial success.” This was achieved by state terrorism:

“On the occupation of a village by the Red Army the Cheka would hunt out and hang all active Makhnovist supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants ... and three or four Red militia men left as armed support for the new village bosses.” [David Footman, Op. Cit., p. 292]

Moreover, in these “military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red
rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents. Red Army reports complain of poor morale ... The Reds used a number of Lettish and Chinese troops to decrease the risk of fraternisation.” [Footman, Op. Cit., p. 293] If the Makhnovists were made up of kulaks, why would the Bolsheviks fear fraternisation? Equally, if the Makhnovists were “kulaks” then how could they have such an impact on Red Army troops (who were mostly poor peasants)? After all, Trotsky had been complaining that “Makhnovism” had been infecting nearby Red Army troops and in August 1919 was arguing that it was “still a poison which has infected backward units in the Ukrainian army.” In December 1919, he noted that “disintegration takes place in unstable units of our army when they came into contact with Makhno’s forces.” It seems unlikely that a movement made up of “kulaks” could have such an impact. Moreover, as Trotsky noted, not all Makhnovists were anarchists, “some of them wrongly regard themselves as Communists.” Again, why would people who regarded themselves as Communists join a movement of “kulaks”? [How the Revolution Armed, vol. II, p. 367, p. 110 and p. 137]

In addition, it seems highly unlikely (to say the least!) that a movement which is alleged to be either made up of or supported by the kulaks could have had a land policy which emphasised and implemented an equal share for the poorest peasantry, not just of land but also of live and dead stock as well as opposing the hiring of labour. This fact is reinforced when we look at the peasant reaction to the Bolshevik (and, presumably, anti-kulak and pro-“downtrodden village poor”) land policy. Simply put, their policies resulted in massive peasant unrest directed against the Bolsheviks.

The Bolshevik land decrees of the 5th and 11th of February, 1919, stated that large landlord holdings would become state farms and all stock was to be taken over by the Ministry of Agriculture, with only between one third and one half of the land being reserved for poor peasants. This was “largely irrelevant, since the peasantry the Ukraine should be organised on a basis of free labour and the independence of the peasants and the workers ... and that nothing but struggle was possible between the Makhnovitchina, the movement of the workers, and the Petlurovitchina, the movement of the bourgeoisie.” [Voline, Op. Cit., p. 572]

This does not mean that anarchists are indifferent to cultural and national domination and oppression. Far from it! As we discussed in sections D.6 and D.7, anarchists are against foreign domination and cultural imperialism, believing that every community or national group has the right to be itself and develop as it sees fit. This means that anarchists seek to transform national liberation struggles into human liberation struggles, turning any struggle against foreign oppression and domination into a struggle against all forms of oppression and domination.

This means that the Makhnovists, like anarchists in general, seek to encourage local culture and language while opposed nationalism. As Frank Sysyn argues, it “would be a mistake ... to label the Makhnivtsi as ‘anti-Ukrainian.’ Although they opposed the political goals of most ‘svidomi ukraintsi’ (nationally conscious Ukrainians), they accepted the existence of a Ukrainian nation and used the terms ‘Ukraine’ and ‘Ukrainian.’” [Nestor Makhno and the Ukrainian Revolution, p. 288] It should be noted that opponents of Ukrainian independence generally called it the “south of Russia” or “Little Russia.”

Thus an opposition to nationalism did not imply a rejection or blindness to foreign domination and free cultural expression. On the question of the language to be taught in schools, the Cultural-Educational Section of the Makhnovist Insurgent Army wrote the following in October, 1919:

“The cultural-educational section of the Makhnovist army constantly receives questions from school teachers asking about the language in which instruction
an instant appeal to national sentiments. The whole struggle of the Makhnovists against the Bolsheviks was conducted solely in the name of the rights and interests of the workers. Denikin’s troops, the Austro-Germans, Petliura, the French troops in Berdyansk, Wrangel — were all treated by the Makhnovists as enemies of the workers. Each one of these invasions represented for them essentially a threat to the workers, and the Makhnovists had no interest in the national flag under which they marched.” [Op. Cit., p. 210]

He stressed that “national prejudices had no place in the Makhnovshchina. There was also no place in the movement for religious prejudices … Among modern social movements, the Makhnovshchina was one of the few in which an individual had absolutely no interest in his own or his neighbour’s religion or nationality, in which he respected only the labour and the freedom of the worker.” [Op. Cit., p. 211]

The Makhnovists made their position on nationalism clear in the ‘Declaration’ published by the Revolutionary Military Council of the army in October, 1919:

“When speaking of Ukrainian independence, we do not mean national independence in Petliura’s sense but the social independence of workers and peasants. We declare that Ukrainian, and all other, working people have the right to self-determination not as an ‘independent nation’ but as ‘independent workers’” [quoted by Arshinov, Op. Cit., p. 210]

In other words, the Makhnovists “declared, that in their option Petliurovtchina [the Petliura movement, Petliura being the leader of the Nationalists] was a bourgeois nationalist movement whose road was entirely different from that of the revolutionary peasants, that had expected, and in some cases already controlled, all of it. To them, the government was taking away their land, and not seizing it from the landlords, then keeping some of it and handing the rest over to its rightful owners.” [Malet, Op. Cit., p. 134] Thus the land was to expropriated by the state, not by the peasants. The result of this policy soon became clear:

“The Bolsheviks expropriation policy was countervailed by the peasants’ resistance based upon their assumption that ‘the land belongs to nobody … it can be used only by those who care about it, who cultivate it.’ Thus the peasants maintained that all the property of the former landlords was now by right their own. This attitude was shared not only by the rich and middle peasants but also the poor and landless, for they all wished to be independent farmers. The poorer the areas, the more dissatisfied were the peasants with the Bolshevik decrees.

“Thus Communist agricultural policy and terrorism brought about a strong reaction against the new Bolshevik regime. By the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks.” [Palij, Op. Cit., p. 156]

The Bolshevik inspired Poor Peasant Committees were “associated with this disastrous policy, were discredited, and their re introduction would need the aid of troops.” [Malet, Op. Cit., p. 135] The Makhnovists, in contrast, did not impose themselves onto the villages, nor did they attempt to tell the peasants what to do and how to divide the land. Rather they advocated the formation of Free Soviets through which these decisions could be made. This, along with their support for land reform, helped win them mass support.

After evacuating the Ukraine in mid-1919 due to the success of Denikin’s counter-revolution, the Ukrainian Communists took time to mull over what had happened. The Central Committee’s November 1919 resolution on the Ukraine “gave top priority to the
middle peasant — so often and so conveniently lumped in together with the kulak and dealt with accordingly — the transfer of landlord land to the poor peasants with only minimum exceptions for state farms.” These points were the basis of the new Ukrainian land law of 5th of February, 1920. [Malet, Op. Cit., p. 135] This new law reflected long standing Makhnovist theory and practice. Therefore, the changing nature of Bolshevik land policy in the Ukraine indicates that Trotsky’s claims are false. The very fact that the Bolsheviks had to adjust their policies in line with Makhnovist theory indicates that the later appealed to the middle and poor peasants.

Equally, it seems strange that the “kulaks” who apparently dominated the movement should have let themselves be led by poor peasants and workers. Voline presents a list of some of the participants of the movement and the vast majority are either peasants or workers. [Op. Cit., pp. 688–91] As historian Michael Palij notes, “[a]lmost to a man, they [the Makhnovist leadership] were of poor peasant origin, with little formal education.” [Op. Cit., p. 254] Exceptions to the general rule were usually workers. Most were Anarchists or Socialist-Revolutionaries. [Palij, Op. Cit., pp. 254–62]

Of course, it can be argued that the leadership of a movement need not come from the class which it claims to lead. The leadership of the Bolsheviks, for example, had very few actual proletarians within it. However, it seems unlikely that a class would select as its leaders members of the population it oppressed! Equally, it seems as unlikely that poor peasants and workers would let themselves lead a movement of kulaks, whose aims would be alien to theirs. After all, poor peasants would seek land reform while kulaks would view this as a threat to their social position. As can be seen from the Makhnovist land policy, they argued for (and implemented) radical land reform, placing the land into the hands of peasants who worked the land without hiring labour (see section 7).

As regards Trotsky’s argument that the Makhnovists had to be kulaks because they originally formed a cavalry unit, it is easy to say “Nationalism.” Those who seriously investigate the issue come to the same conclusion, namely that neither Makhno nor the Makhnovist movement was nationalist (see, for example, Frank Sysyn’s essay Nestor Makhno and the Ukrainian Revolution which discusses this issue).

Therefore, any claims that the Makhnovists were nationalists are incorrect. The Makhnovist movement was first and foremost an internationalist movement of working people. This is to be expected as anarchists have long argued that nationalism is a cross-class movement which aims to maintain the existing class system but without foreign domination (see section D.6 for details). As such, the Makhnovists were well aware that nationalism could not solve the social question and would simply replace a Russian ruling class and state with a Ukrainian one.

This meant that the aims of the Makhnovists went further than simply national liberation or self-determination. Anarchists, rather, aim for working-class self-liberation and self-determination, both as individuals and as groups, as well as politically, economically and socially. To quote Makhno’s wire to Lenin in December 1918, the Makhnovist “aims are known and clear to all. They are fighting against the authority of all political governments and for liberty and independence of the working people.” [quoted by Palij, Op. Cit., p. 80]

From this class and anti-hierarchical perspective, it is not unsurprising that the Makhnovists were not nationalists. They did not seek Ukrainian independence but rather working-class autonomy. This, of necessity, meant they opposed all those who aimed to govern and/or exploit the working class. Hence Arshinov:

“Composed of the poorest peasants, who were united by the fact that they all worked with their own hands, the Makhnovist movement was founded on the deep feeling of fraternity which characterises only the most oppressed. During its entire history it did not for
vering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers’ democracy.” [quoted by Samuel Farber, *Before Stalinism*, p. 209]

Opposing workers’ democracy because working people could make decisions that the party thought were wrong shows a deep “hostility” to the real city workers and their liberty and equality. Equally, Bolshevik repression of workers’ strikes, freedom of speech, assembly, organisation and self-determination shows far more “hostility” to the city worker than a few Makhnovist misunderstandings!

All in all, any claim that the Makhnovists “hated” city workers is simply false. While some Makhnovists may not have liked the city nor really understood the complexities of an urban economy, they did recognise the importance of encouraging working-class autonomy and self-organisation within them and building links between the rural and urban toilers. While the lack of a large-scale anarcho-syndicalist movement hindered any positive construction, the Makhnovists at least tried to promote urban self-management. Given Bolshevik authoritarianism and its various rationalisations, it would be fairer to say that it was the Bolsheviks who expressed “hostility” to the city workers by imposing their dictatorship upon them rather than supporting working-class self-management as the Makhnovists did!

11 Were the Makhnovists nationalists?

Some books on the Makhnovist movement try to present the Makhnovists as being Ukrainian nationalists. A few discuss the matter in order, perhaps, to increase the respectability of the Makhnovist movement by associating it with a more “serious” and “respectable” political theory than anarchism, namely refute. Makhno himself was the son of poor peasants, an agricultural labourer and a worker in a factory. He was able to ride a horse, so why could other poor peasants not do so? Ultimately, it simply shows that Trotsky knew very little of Ukrainian peasant life and society.

Given that the Bolshevik government was meant to be a “worker-peasant” power, it seems strange that Trotsky dismisses the concerns of the peasantry so. He should have remembered that peasant uprisings against the Bolshevik government occurred constantly under the Bolsheviks, forcing them (eventually) to, first, recognise the false nature of their peasant policies in 1919 and, second, to introduce the NEP in 1921. As such, it seems somewhat ironic for Trotsky to attack the Makhnovists for not following flawed Bolshevik ideology as regards the peasantry!

The Bolsheviks, as Marxists, saw the peasants as “petit bourgeoisie” and uninterested in the revolution except as a means to grab their own plot of land. Their idea of land collectivisation was limited to state ownership. The initial Bolshevik land strategy can be summed up as mobilising the poor peasantry against the rest on the one hand and mobilising the city worker against the peasants (through forced grain confiscation on the other). The lack of knowledge of peasant life was the basis of this policy, which was abandoned in 1919 when it was soon proven to be totally wrong. Rather than see wealth extremes rise, the 1917 revolution saw a general levelling.

As regards the peasantry, here as elsewhere the Bolsheviks claimed their strategy was the objectively necessary (only possible) one in the circumstances. And here again the Makhnovists demonstrate this to be false, as the Bolsheviks themselves acknowledged in practice by changing their agricultural policies and bringing them closer to the Makhnovist position.

Clearly, both factually and logically, Trotsky’s arguments are false. Ultimately, like most Bolsheviks, Trotsky uses the term “kulak” as a meaningless term of abuse, with no relation to the actual
class structure of peasant life. It simply means a peasant opposed to the Bolsheviks rather than an actual social strata. Essentially, he is using the standard Leninist technique of specifying a person’s class (or ideas) based on whether they subscribe to (or simply follow without question) Leninist ideology (see section H.2.12 for further discussion of this). This explains why the Makhnovists went from being heroic revolutionaries to kulak bandits (and back again!) depending on whether their activity coincided with the needs of Bolshevik power or not. Expediency is not a sound base to build a critique, particularly one based simply on assertions like Trotsky’s.

9 Were the Makhnovists anti-Semitic and pogromists?

No, they were not. Anyone who claims that the Mahnovist movement was anti-Semitic or conducted pogroms against Jews simply shows ignorance or a desire to deceive. As we will show, the Makhnovists were both theoretically and practically opposed to anti-Semitism and pogroms.

Unsurprisingly, many Leninists slander the Makhnovists on this score. Trotsky, for example, asserted in 1937 that Makhno’s followers expressed “a militant anti-Semitism.” [Lenin and Trotsky, Kronstadt, p. 80] Needless to say, the Trotskyist editors of the book in question did not indicate that Trotsky was wrong in the accusation. In this way a slander goes unchecked and becomes “accepted” as being true. As the charge of “militant anti-Semitism” is a serious one, so it is essential that we (unlike Trotsky) provide evidence to refute it.

To do so we will present a chronological overview of the evidence against it. This will, to some degree, result in some duplication as well as lengthy quotations, however it is unavoidable. We are sorry to labour this point, but this allegation is sadly commonplace and it is essential to refute it fully.

Unsurprisingly, Arshinov’s 1923 account of the movement takes on the allegations that the Makhnovists were anti-Semitic.

All this does not mean that there were not misunderstandings between the Makhno movement, a predominantly rural movement, and the workers in the cities. Far from it. Equally, it can be said that the Makhnovists did not understand the workings of an urban economy and society as well as they understood their own. However, they made no attempt to impose their world-view on the city workers (unlike the Bolsheviks, who did so on both urban and rural workers). However, ignorance of the city and its resulting misunderstandings do not constitute “hostility” or “hatred.”

Moreover, where these misunderstandings developed show that the claims that the Makhnovists hated the city workers are simply false. Simply put, the misunderstanding occurred when the Makhnovists had liberated cities from the Whites. As we discussed in section 7, the first thing the Makhnovists did was to call a conference of workers’ delegates to discuss the current situation and to urge them to form soviets, unions and co-operatives in order to manage their own affairs. This hardly shows “hatred” of the city worker. In contrast, the first thing the Bolsheviks did in taking a city was to form a “revolutionary committee” to govern the town and implement Bolshevik policy.

This, needless to say, shows a distinct “hostility” to the city workers on the part of the Bolsheviks. Equally, the Bolshevik advocacy of party dictatorship to overcome the “wavering” of the working class. In the words of Trotsky himself (in 1921):

“The Workers’ Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers’ right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers’ democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to maintain its dictatorship, regardless of temporary wa-
Makhnovists had to “loot” trains (needless to say, Trotsky does not explain how the Makhnovists knew the trains were “marked for the factories.”). It should be noted that the Bolsheviks “looted” the countryside, can we surmise that the Bolsheviks simply expressed “hostility to the village”? As regards the shooting of Communists, a far simpler and more plausible explanation also exists. Rather than show “hostility to the city,” it shows “hostility” to the Communist Party, its policies and its authoritarian ideas. Given that the Bolsheviks had betrayed the Makhnovists on three occasions (see section 13) and attacked them, “hostility” to Communists seems a sensible position to take! Equally, the first Bolshevik attack on the Makhnovists occurred in mid-1919, when the Bolsheviks began justifying their party dictatorship as essential for the success of the revolution. The other two occurred in 1920, when the Bolsheviks were announcing to the whole world at the Communist International (to quote Zinoviev) that “the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.” [Proceedings and Documents of the Second Congress 1920, vol. 1, p. 152] Given this, perhaps the fact that the Makhnovists shot Communists can be explained in terms of defence against Bolshevik betrayal and opposition to the dictatorship of the Communist Party rather than “hostility to the city.” Needless to say, the Communists shot Makhnovists and anarchists. What does that suggest a “hostility” to by the Bolsheviks? Working-class autonomy and freedom?

Clearly, Trotsky was clutching at straws in his smearing of the Makhnovist movement as haters of the city worker. The “hostility” Trotsky speaks of can be far more easily explained in terms of the necessities imposed upon the Makhnovists by the civil war and the betrayals of the Bolsheviks. As such, it would be fairer to state that the Makhnovists showed “hostility” or “hatred” to the city or city workers only if you equate both with the Bolshevik party dictatorship. In other words, the Makhnovists showed “hostility” to the new ruling class of the Communist Party hierarchy.

He presents extensive evidence to show that the Makhnovists opposed anti-Semitism and pogroms. It is worth quoting him at length:

“In the Russian press as well as abroad, the Makhnovshchina was often pictured as a very restricted guerrilla movement, foreign to ideas of brotherhood and international solidarity, and even tainted with anti-Semitism. Nothing could be more criminal than such slanders. In order to shed light on this question, we will cite here certain documented facts which relate to this subject.

“An important role was played in the Makhnovist army by revolutionaries of Jewish origin, many of whom had been sentenced to forced labour for participation in the 1905 revolution, or else had been obliged to emigrate to Western Europe or America. Among others, we can mention:

‘Kogan — vice-president of the central organ of the movement, the Regional Revolutionary Military Council of Hulyai Pole. Kogan was a worker who, for reasons of principle, had left his factory well before the revolution of 1917, and had gone to do agricultural work in a poor Jewish agricultural colony. Wounded at the battle of Peregonovka, near Uman, against the Denikinists, he was seized by them at the hospital at Uman where he was being treated, and, according to witnesses, the Denikinists killed him with sabres.

‘L. Zin’kovsky (Zadov) — head of the army’s counter espionage section, and later commander of a special cavalry regiment. A worker who before the 1917 revolution was condemned to ten years of forced labour for political activities. One of the most active militants of the revolutionary insurrection.
"Elena Keller — secretary of the army’s cultural and educational section. A worker who took part in the syndicalist movement in America. One of the organisers of the ‘Nabat’ Confederation.

"Iosif Emigrant (Gotman) — Member of the army’s cultural and educational section. A worker who took an active part in the Ukrainian anarchist movement. One of the organisers of the ‘Nabat’ Confederation, and later a member of its secretariat.

"Ya. Alyi (Sukhovol’sky) — worker, and member of the army’s cultural and educational section. In the Tsarist period he was condemned to forced labor for political activity. One of the organisers of the ‘Nabat’ Confederation and a member of its secretariat.

“We could add many more names to the long list of Jewish revolutionaries who took part in different areas of the Makhnovist movement, but we will not do this, because it would endanger their security.

“At the heart of the revolutionary insurrection, the Jewish working population was among brothers. The Jewish agricultural colonies scattered throughout the districts of Mariupol, Berdyansk, Aleksandrovsk and elsewhere, actively participated in the regional assemblies of peasants, workers and insurgents; they sent delegates there, and also to the regional Revolutionary Military Council.

“Following certain anti-Semitic incidents which occurred in the region in February, 1919, Makhno proposed to all the Jewish colonies that they organise their self-defence and he furnished the necessary guns and ammunition to all these colonies. At the same time Makhno organised a series of meetings in the region where he appealed to the masses to struggle against anti-Semitism.

Simply put, Trotsky misinterprets hostility to the repressive policies of the Bolshevik dictatorship with hostility to the city.

Moreover, ignoring the actual relationships of the Makhnovists with the city workers, we can fault Trotsky’s arguments without recourse to such minor things as facts. This is because every one of his “examples” of “hatred for the city and the city worker” can be explained by more common sense arguments.

As regards the destruction of trains and railway tracks, a far simpler and more plausible explanation can be found than Trotsky’s “hostility to the city.” This is the fact that a civil war was taking place. Both the Reds and Whites used armoured trains to move troops and as bases of operations. To destroy the means by which your enemy attacks you is common sense! Equally, in the chaotic times of the war, resources were often in low supply and in order to survive the
general peasant revolt, also “nourished the movement of Makhno, who seized and looted trains marked for the factories, the plants, and the Red Army; tore up railway tracks, shot Communists, etc.” [Lenin and Trotsky, Kronstadt, p. 80 and p. 89]

Unsurprisingly, Trotsky simply shows his ignorance of the Makhno movement by these statements. To refute Trotsky’s claim we can simply point to how the Makhnovists acted once they occupied a city. As we discuss in section 7, the first thing the Makhnovists did was to call a conference of workers and urge them to organise their own affairs directly, using their own class organs of self-management (soviets, unions, etc.). Hardly the activity of a group of people who allegedly “hated” city workers!

We can also point to the fact that the Makhnovists arranged direct exchanges of goods between the towns and country. In early 1918, for example, corn was shipped directly to a Moscow factory in return for textiles (without state interference). In 1919, 1500 tons of grain (and a small amount of coal) was sent by train to Petrograd and Moscow where the commander of the train was to exchange it again for textiles. The initiative in both cases came from the Hulyai Pole peasants. Again, hardly the work of city-hating peasants.

Peter Arshinov indicates the underlying theory behind the Makhnovists as regards the relations between city and country:

“The Makhnovshchina ... understands that the victory and consolidation of the revolution ... cannot be realised without a close alliance between the working classes of the cities and those of the countryside. The peasants understand that without urban workers and powerful industrial enterprises they will be deprived of most of the benefits which the social revolution makes possible. Furthermore, they consider the urban workers to be their brothers, members of the same family of workers.

“There can be no doubt that, at the moment of the victory of the social revolution, the peasants will give their entire
immediately set up a special commission to investigate this event. This commission discovered that the murders had been committed by seven peasants of the neighboring village of Uspenovka. These peasants were not part of the insurrectionary army. However, the Makhnovists felt it was impossible to leave this crime unpunished, and they shot the murderers. It was later established that this event and other attempts of this nature had been carried out at the instigation of Denikin’s agents, who had managed to infiltrate the region and had sought by these means to prepare an atmosphere favourable for the entry of Denikin’s troops into the Ukraine.

“On May 4th or 5th, 1919, Makhno and a few commanders hurriedly left the front and went to Hulyai Pole, where they were awaited by the Extraordinary Plenipotentiary of the Republic, L. Kamenev, who had arrived from Khar’kov with other representatives of the Soviet government. At the Verkhnii Tokmak station, Makhno saw a poster with the words: ‘Death to Jews, Save the Revolution, Long Live Batko Makhno.’

“Who put up that poster?’ Makhno asked.

“He learned that the poster had been put up by an insurgent whom Makhno knew personally, a soldier who had taken part in the battle against Denikin’s troops, a person who was in general decent. He presented himself immediately and was shot on the spot.

“Makhno continued the journey to Hulyai Pole. During the rest of the day and during his negotiations with the Plenipotentiary of the Republic, he could not free himself from the influence of this event. He realised that the insurgent had been cruelly dealt with, but he also knew that in conditions of war and in view of Denikin’s ad-

We apologise again for labouring this point, but the lie that Makhno and the Makhnovists were anti-Semitic is relatively commonplace and needs to be refuted. As noted, Trotskyists repeat Trotsky’s false assertions without correction. Other repeat the lie from other sources. It was essential, therefore, to spend time making the facts available and to nail the lie of Makhnovist anti-Semitism once and for all!

10 Did the Makhnovists hate the city and city workers?

For some reason the Makhnovists have been portrayed as being against the city and even history as such. This assertion is false, although sometimes made. For example, historian Bruce Lincoln states that Makhno “had studied the anarchist writings of Bakunin, whose condemnation of cities and large-scale industries fit so well with the anti-urban, anti-industrial feelings of the Ukrainian peasants, and his program was precisely the sort that struck responsive chords in peasant hearts.” [Red Victory, p. 325] Lincoln fails to present any evidence for this claim. This is unsurprising as it is doubtful that Makhno read such condemnations in Bakunin as they do not, in fact, exist. Similarly, the Makhnovist “program” (like anarchism in general) was not “anti-urban” or “anti-industrial.”

However, Lincoln’s inventions are mild compared to Trotsky’s. According to Trotsky, “the followers of Makhno” were marked by “hatred for the city and the city worker.” He later gives some more concrete examples of this “hostility to the city” which, as with the
time when anti-Semitism was fast becoming fashionable, did not go unheeded by the population. There were a number of Jewish colonies in the south-east Ukraine.” [Op. Cit., p. 169]

Unsurprisingly, Malet notes that apart from certain personal considerations (such as his friendship with a number of Jews, including Voline and Yossif the Emigrant), “the basis of Makhno’s hostility to anti-Semitism was his anarchism. Anarchism has always been an international creed, explicitly condemning all forms of racial hatred as incompatible with the freedom of individuals and the society of equals.” And like other serious historians, he points to “the continual participation in the movement of both intellectual Jews from outside, and Jews from the local colonies” as “further proof … of the low level of anti-Semitism within the Makhnovshchina.” [Op. Cit., p. 171 and pp. 171–2]

Anarchist Serge Cipko summarises the literature by stating that the “scholarly literature that discusses Makhno’s relationships with the Jewish population is of the same opinion [that the Makhnovists were not anti-Semitic] and concur that unlike the Whites, Bolsheviks and other competing groups in Ukraine during the Revolution, the Makhnovists did not engage in pogroms.” (“Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,” pp. 57–75, The Raven, no. 13, p. 62)

Historian Christopher Reed concurs, noting that “Makhno actively opposed anti-Semitism ... Not surprisingly, many Jews held prominent positions in the Insurgent movement and Jewish farmers and villagers staunchly supported Makhno in the face of the unre-

vance, such posters could represent an enormous danger for the Jewish population and for the entire revolution if one did not oppose them quickly and resolutely.

“When the insurrectionary army retreated toward Uman in the summer of 1919, there were several cases when insurgents plundered Jewish homes. When the insurrectionary army examined these cases, it was learned that one group of four or five men was involved in all these incidents — men who had earlier belonged to Hryhoriyiv’s detachments and who had been incorporated into the Makhnovist army after Hryhoriyiv was shot. This group was disarmed and discharged immediately. Following this, all the combatants who had served under Hryhoriyiv were discharged from the Makhnovist army as an unreliable element whose re-education was not possible in view of the unfavorable conditions and the lack of time. Thus we see how the Makhnovists viewed anti-Semitism. Outbursts of anti-Semitism in various parts of the Ukraine had no relation to the Makhnovshchina.

“Wherever the Jewish population was in contact with the Makhnovists, it found in them its best protectors against anti-Semitic incidents. The Jewish population of Hulyai Pole, Aleksandrovsk, Berdyansk, Mariupol, as well as all the Jewish agricultural colonies scattered throughout the Donets region, can themselves corroborate the fact that they always found the Makhnovists to be true revolutionary friends, and that due to the severe and decisive measures of the Makhno visits, the anti-Semitic leanings of the counter-revolutionary forces in this region were promptly squashed.

“Anti-Semitism exists in Russia as well as in many other countries. In Russia, and to some extent in the Ukraine,
it is not a result of the revolutionary epoch or of the insurrectionary movement, but is on the contrary a vestige of the past. The Makhnovists always fought it resolutely in words as well as deeds. During the entire period of the movement, they issued numerous publications calling on the masses to struggle against this evil. It can firmly be stated that in the struggle against anti-Semitism in the Ukraine and beyond its borders, their accomplishment was enormous.” [Arshinov, Op. Cit., pp. 211–215]

Arshinov then goes on to quote an appeal published by Makhnovists together with anarchists referring to an anti-Semitic incident which took place in the spring of 1919. It is called WORKERS, PEASANTS AND INSURGENTS FOR THE OPPRESSED, AGAINST THE OPPRESSORS — ALWAYS!

“During the painful days of reaction, when the situation of the Ukrainian peasants was especially difficult and seemed hopeless, you were the first to rise as fearless and unconquerable fighters for the great cause of the liberation of the working masses... This was the most beautiful and joyful moment in the history of our revolution. You marched against the enemy with weapons in your hands as conscious revolutionaries, guided by the great idea of freedom and equality... But harmful and criminal elements succeeded in insinuating themselves into your ranks. And the revolutionary songs, songs of brotherhood and of the approaching liberation of the workers, began to be disrupted by the harrowing cries of poor Jews who were being tormented to death... On the clear and splendid foundation of the revolution appeared indelible dark blots caused by the parched blood of poor Jewish martyrs who now, as before, continue to be innocent victims of the criminal reaction, of the class strug-

Fleshin, and Mollie Steimer did not criticise Makhno as an anti-Semite, they also "defended him against the campaign of slander that persisted from all sides." [Anarchist Portraits, pp. 122–3] It should be noted that Schwartzbard assassinated the Nationalist leader Petliura in 1926 because he considered him responsible for pogroms conducted by Nationalist troops during the civil war. He shot Petliura the day after he, Makhno and Berkman had seen him at a Russian restaurant in Paris. [Malet, Op. Cit., p. 189]

Michael Malet, in his account of the Makhnovists, states that "there is overwhelming evidence that Makhno himself was not anti-Semitic." [Op. Cit., p. 168] He indicates that in the period January to September 1919, the Central Committee of Zionist Organisations in Russia listed the Nationalists as creating 15,000 victims of pogroms, then the Denikinists with 9,500 followed by Hryhoriyiv, Sokolovsky, Struk, Yatsenko and Soviet troops (500 victims). Makhno is not mentioned. Of the pogroms listed, almost all took place on the western Ukraine, where the local otamany (warlords) and the Nationalists were strong. Very few took place where Makhno’s influence predominated, the nearest being in Katerinoslav town and Kherson province; none in the provinces of Katerinoslav or Tavria. It should also be noted that the period of January to June of that year was one of stability within the Makhnovist region, so allowing them the space to apply their ideas. Malet summarises:

"Even granted the lower level of Jewish involvement in left-bank trade, the almost total lack of anti-Semitic manifestations would show that Makhno’s appeals, at a
this fact, every time, with absolute certainty, at the place and on the date of the pogrom, no Makhnovist unit was operating or even located in the vicinity. Not once have I been able to prove the existence of a Makhnovist unit at the place a pogrom against the Jews took place. Consequently, the pogroms in question could not have been the work of the Makhnovists.” [quoted by Voline, Op. Cit., p. 699]

This conclusion is confirmed by later historians. Paul Avrich notes that “[c]harges of Jew-baiting and of anti-Jewish pogroms have come from every quarter, left, right, and centre. Without exception, however, they are based on hearsay, rumour, or intentional slander, and remain undocumented and unproved.” He adds that the “Soviet propaganda machine was at particular pains to malign Makhno as a bandit and pogromist.” Wishing to verify the conclusions of Tcherikover proved by Voline, Avrich examined several hundred photographs in the Tcherikover Collection, housed in the YIVO Library in New York and depicting anti-Jewish atrocities in the Ukraine during the Civil War. He found that “only one [was] labelled as being the work of the Makhnovists, though even here neither Makhno himself nor any of his recognisable subordinates are to be seen, nor is there any indication that Makhno had authorised the raid or, indeed, that the band involved was in fact affiliated with his Insurgent Army.” Avrich then states that “there is evidence that Makhno did all in his power to counteract anti-Semitic tendencies among his followers” and that “a considerable number of Jews took part in the Makhnovist movement.” He also points out that the Jewish anarchists Alexander Berkman, Emma Goldman, Sholem Schwartzbard, Voline, Senya...
by dealing ruthlessly with all instigators of anti-Semitic pogroms.

“The path toward the emancipation of the workers can be reached by the union of all the workers of the world.” [quoted by Arshinov, Op. Cit., 215–7]

Arshinov also quotes an order issued by Makhno to “all revolutionary insurgents without exception” which states, in part, that the “goal of our revolutionary army, and of every insurgent participating in it, is an honourable struggle for the full liberation of the Ukrainian workers from all oppression.” This was “why every insurgent should constantly keep in mind that there is no place among us for those who, under the cover of the revolutionary insurrection, seek to satisfy their desires for personal profit, violence and plunder at the expense of the peaceful Jewish population.” [quoted by Arshinov, Op. Cit., pp. 217–8]

Unsurprisingly, as an anarchist, Makhno presents a class analysis of the problem of racism, arguing as follows:

“Every revolutionary insurgent should remember that his personal enemies as well as the enemies of all the people are the rich bourgeoisie, regardless of whether they be Russian, or Jewish, or Ukrainian. The enemies of the working people are also those who protect the unjust bourgeois regime, i.e., the Soviet Commissars, the members of repressive expeditionary corps, the Extraordinary Commissions which go through the cities and villages torturing the working people who refuse to submit to their arbitrary dictatorship. Every insurgent should arrest and send to the army staff all representatives of such expeditionary corps, Extraordinary Commissions and other institutions which oppress and subjugate the people; if they resist, they should be shot on the spot. As for any violence done to peaceful workers of whatever same way as non-Jewish counter-revolutionaries.” [The Unknown Revolution, pp. 967–8]

However, it could be claimed that these accounts are from anarchists and so are biased. Ignoring the question of why so many Jewish anarchists should defend Makhno if he was, in fact, a pogromist or anti-Semite, we can turn to non-anarchist sources for confirmation of the fact that Makhno and the Makhnovist movement were not anti-Semites.

First, we turn to Voline, who quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-Semitism. Tcherikover had, for a number of years, had specialised in research on the persecutions of the Jews in Russia. The Jewish historian states

“with certainty that, on the whole, the behaviour of Makhno’s army cannot be compared with that of the other armies which were operating in Russian during the events 1917–21. Two facts I can certify absolutely explicitly.

“1. It is undeniable that, of all these armies, including the Red Army, the Makhnovists behaved best with regard the civil population in general and the Jewish population in particular. I have numerous testimonies to this. The proportion of justified complaints against the Makhnovist army, in comparison with the others, is negligible.

“2. Do not speak of pogroms alleged to have been organised by Makhno himself. That is a slander or an error. Nothing of the sort occurred. As for the Makhnovist Army, I have had hints and precise denunciations on this subject. But, up to the present, every time I have tried to check the facts, I have been obliged to declare that on the day in question no Makhnovist unit could have been at the place indicated, the whole army being far away from there. Upon examining the evidence closely, I established
and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population... One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabethgrad...

“We could cite a whole series of similar facts, but we do not find it necessary... and will content ourselves with mentioning briefly the following essential facts:

1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.

2. Several members of the Education and Propaganda Commission were Jewish.

3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.

4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.

5. In general the Jewish population, which was very numerous in the Ukraine, took an active part in all the activities of the movement. The Jewish agricultural colonies which were scattered throughout the districts of Mariupol, Berdiansk, Alexandrovsk, etc., participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council.

6. Rich and reactionary Jews certainly had to suffer from the Makhnovist army, not as Jews, but just in the nationality — such acts are unworthy of any revolutionary insurgent, and the perpetrator of such acts will be punished by death.” [quoted by Arshinov, Op. Cit., p. 218]

It should also be noted that the chairmen of three Makhnovist regional congresses were Jewish. The first and second congresses had a Jewish chairman [Paliy, Op. Cit., p. 293], while Voline was the chair for the fourth one held at Aleksandrovsk. Similarly, one of the heads of the army’s counter-espionage section was Jewish. [Arshinov, Op. Cit., p. 212] Little wonder both Arshinov and Voline stress that an important role was played by Jews within the movement.

The Jewish American anarchists Alexander Berkman and Emma Goldman were also in Russia and the Ukraine during the revolution. Between 1920 and 1921, they were in contact with anarchists involved with the Makhnovists and were concerned to verify what they had heard about the movement from Bolshevik and other sources. Berkman recounts meeting the Jewish anarchist Yossif the Emigrant (shot by the Bolsheviks in late 1920). Yossif stated that “Nestor is merciless toward those guilty of Jew-baiting. Most of you have read his numerous proclamations against pogroms, and you know how severely he punishes such things.” He stressed that any stories of atrocities and pogroms committed by the Makhnovists were “lies wilfully spread by the Bolsheviks” who “hate Nestor worse than they do Wrangel.” For Yossif, “Makhno represents the real spirit of October.” [quoted by Berkman, Op. Cit., pp. 187–9] He also notes that Gallina Makhno, Nestor’s wife, would “slightly raise her voice in indignation when reports of Jew-baiting by povstantsi [partisans] were mentioned. These stories were deliberately spread by the Bolsheviks, she averred. No one could be more severe in punishing such excesses than Nestor. Some of his best comrades are Jews; there are a number of them in the Revolutionary Soviet and in other branches of the army. Few men

After his exile, Makhno himself spent time refuting allegations of anti-Semitism. Two articles on this subject are contained in The Struggle Against the State and other Essays, a collection of Makhno’s exile writings. In the article “The Makhnovshchina and Anti-Semitism” he recounts various examples of the “uncompromising line on the anti-Semitism of pogromists” which the Makhnovists took “throughout its entire existence.” This was “because it was a genuinely revolutionary toilers’ movement in the Ukraine.” He stressed that “at no time did the movement make it its business to carry out pogroms against Jews nor did it ever encourage any.” [The Struggle Against the State and Other Essays, p. 38 and p. 34] He wrote another article (called “To the Jews of All Countries”):

“In my first ‘Appeal to Jews, published in the French libertarian newspaper, Le Libertaire, I asked Jews in general, which is to say the bourgeois and the socialist ones as well as the ‘anarchist’ ones like Yanovsky, who have all spoken of me as a pogromist against Jews and labelled as anti-Semitic the liberation movement of the Ukrainian peasants and workers of which I was the leader, to detail to me the specific facts instead of blathering vacuously away: just where and just when did I or the aforementioned movement perpetrate such acts? ... Thus far, no such evidence advanced by Jews has come to my attention. The only thing that has appeared thus far in the press generally, certain Jewish anarchist organs included, regarding myself and the insurgent movement I led, has been the product of the most shameless lies and of the vulgarity of certain political mavericks and their hirelings.” [Op. Cit., p. 28]

It should be noted that Yanovsky, editor of the Yiddish language anarchist paper Freie Arbeiter Stimme later admitted that Makhno was right. Yanovsky originally believed the charges of anti-Semitism made against Makhno, going so far as ignoring Makhno’s appeal to him out of hand. However, by the time of Makhno’s death in 1934, Yanovsky had learned the truth:

“So strongly biased was I against him [Makhno] at that time I did not think it necessary to find out whether my serious accusation was founded on any real facts during the period of his great fight for real freedom in Russia. Now I know that my accusations of anti-Semitism against Makhno were built entirely on the lies of the Bolsheviks and to the rest of their crimes must be added this great crime of killing his greatness and the purity of this fighter for freedom.”

Due to this, he could not forgive himself for “so misjudg[ing] a man merely on the basis of calumny by his bitter enemies who more than once shamefully betrayed him, and against whom he fought so heroically.” He also notes that it had “become known to me that a great many Jewish comrades were heart and soul with Makhno and the whole Makhno movement. Amongst them was one whom I knew well personally, Joseph Zutman of Detroit, and I know that he would not have had anything to do with persons, or a movement, which possessed the slightest leaning towards anti-Semitism.” [“appendix,” My Visit to the Kremlin, pp. 36–7]

However, by far the best source to refute claims of anti-Semitism the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:

“We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno
not understand what socialism actually is (and as Proudhon stated “I am socialist” [Selected Writing of Pierre-Joseph Proudhon, p. 195] and described himself as a socialist many times this also applies to Proudhon himself!). So the question arises, did Proudhon support private property in the capitalist sense of the word? The answer is no. To quote George Woodcock summary of Proudhon’s ideas on this subject we find:

“He [Proudhon] was denouncing the property of a man who uses it to exploit the labour of others, without an effort on his own part, property distinguished by interest and rent, by the impositions of the non-producer on the producer. Towards property regarded as ‘possession,’ the right of a man to control his dwelling and the land and tools he needs to live, Proudhon had no hostility; indeed he regarded it as the cornerstone of liberty.” [“On Proudhon’s ‘What is Property?’”, The Raven No. 31, pp. 208–9]

George Crowder makes the same point:

“The ownership he opposes is basically that which is unearned … including such things as interest on loans and income from rent. This is contrasted with ownership rights in those goods either produced by the work of the owner or necessary for that work, for example his dwelling-house, land and tools. Proudhon initially refers to legitimate rights of ownership of these goods as ‘possession,’ and although in his latter work he calls this ‘property,’ the conceptual distinction remains the same.” [Classical Anarchism, pp. 85–86]

Indeed, according to Proudhon himself, the “accumulation of capital and instrument is what the capitalist owes to the producer, but he never pays him for it. It is this fraudulent deprivation which

and jingoism can play a part initially in encouraging enlistment, the horrors of war soon expose the futility of nationalism. A large part of military organisation is aimed at ensuring that soldiers remain fighting for causes they do not necessarily believe in. Military discipline attempts to create an unthinking, unquestioning body of soldiers, as fearful of their own side as of the other.” [Red & Black Revolution, no. 1]

In short in both Russia and Spain the Bolsheviks wanted an army that would obey them regardless of whether the individual soldiers felt they were doing the correct thing, indeed who would obey through fear of their officers even when they knew what they were doing was wrong. Such a body would be essential for enforcing minority rule over the wishes of the workers. Would a self-managed army be inclined to repress workers’ and peasants’ strikes and protests? Of course not.

The Makhnovists show that another kind of revolutionary army was possible in the Russian Revolution and that the “ignorant” masses could choose their own officers. In other words, the latter-day justifications of the followers of Bolshevism are wrong when they assert that the creation of the top-down, hierarchical Red Army was a result of the “contradiction between the political consciousness and circumstantial coercion” and “a retreat” because “officers were appointed and not elected,” it was a conscript army and “severe military discipline.” [John Rees, “In Defence of October”, International Socialism, no. 52, pp. 3–82, p. 46] As can be seen, Trotsky did not consider it as a “retreat” or caused by “circumstances.” Equally, the Makhnovists managed to organise themselves relatively democratically in the circumstances created by the same civil war.

As such, the differences between the Makhnovists and the Bolsheviks as regards the internal organisation of a revolutionary army are clear. The Bolsheviks applied top-down, bourgeois
methods of internal organisation and discipline. The Makhnovists applied democratic internal organisation and discipline as far as possible.

From our discussion of the Bolshevik justifications for its system of appointed officers in the Red Army, it will come as no surprise that as regards the relationship of the soviets to the revolutionary organisation (party) the Makhnovists and Bolsheviks were (again) miles apart. While we discuss this in greater detail in section 14 of the appendix “What happened during the Russian Revolution?” , we will give a flavour of Bolshevik ideology on this subject here.

From the start, Lenin identified soviet (or working class) power with the power of their own party. In October 1917, Lenin was equating party and class: “the power of the Bolsheviks — that is, the power of the proletariat.” [Will the Bolsheviks Maintain Power?, p. 102] After the October Revolution, the Bolsheviks were clear that the soviets would not have “all power.” Rather, the first act of soviet sovereignty was to alienate it into the hands of a Bolshevik government. In response to a few leading Bolsheviks who called for a coalition government, the Bolshevik Central Committee stated that it was “impossible to refuse a purely Bolshevik government without treason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets ... handed power over to this government.” [quoted by Robert V. Daniels, A Documentary History of Communism, vol. 1, pp. 127–8] How can the “power of the Soviets” exist when said soviets immediately “handed power” over to another body? Thus the only “power” the soviets had was simply the “power” to determine who actually held political power.

The question of who held power, the soviets or the party, came into focus when the soviet elections resulted in non-Bolshevik majorities being elected. After the initial honeymoon period, soviet elections started to go badly for the Bolsheviks. Ever since taking power in 1917, the Bolsheviks had become increasingly alienated from the working class. The spring and summer of 1918 saw “great

socialist! Indeed, at one point Bookchin mentions the “individu-alistic artisanal socialism of Proudhon” [p. 258] which suggests a somewhat confused approach to Proudhon’s ideas!

In effect, Bookchin makes the same mistake as Caplan; but, unlike Caplan, he should know better. Rather than not being a socialist, Proudhon is obviously an example of what Bookchin himself calls “artisanal socialism” (as Marx and Engels recognised). Indeed, he notes that Proudhon was its “most famous advocate” and that “nearly all so-called ‘utopian’ socialists, even [Robert] Owen — the most labour-orientated — as well as Proudhon — essentially sought the equitable distribution of property.” [p. 273] Given Proudhon’s opposition to wage labour and capitalist property and his support for industrial democracy as an alternative, Bookchin’s position is untenable — he confuses socialism with communism, rejecting as socialist all views which are not communism (a position he shares with right-libertarians).

He did not always hold this position, though. He writes in The Spanish Anarchists that:

“Proudhon envisions a free society as one in which small craftsmen, peasants, and collectively owned industrial enterprises negotiate and contract with each other to satisfy their material needs. Exploitation is brought to an end... Although these views involve a break with capitalism, by no means can they be regarded as communist ideas...” [p. 18]

In contrast to some of Bookchin’s comments (and Caplan) K. Steven Vincent is correct to argue that, for Proudhon, justice “applied to the economy was associative socialism” and so Proudhon is squarely in the socialist camp [Pierre-Joseph Proudhon and the Rise of French Republican Socialism, p. 228].

However, perhaps all these “leftists” are wrong (bar Bookchin, who is wrong, at least some of the time). Perhaps they just did
Revolution, p. 98, pp. 215–6 and pp. 221–2, and his opposition to state control of capital as being "more wage slavery" and, instead, urging whatever capital required collective labour to be "democratically organised workers' associations" [No Gods, No Masters, vol. 1, p. 62].

Bookchin (on page 78) quotes Proudhon as arguing that "association" was "a protest against the wage system" which suggests that Bookchin’s claims that Proudhonian "analysis minimised the social relations embodied in the capitalist market and industry" [p. 180] is false. Given that wage labour is the unique social relationship within capitalism, it is clear from Proudhon’s works that he did not "minimise" the social relations created by capitalism, rather the opposite. Proudhon’s opposition to wage labour clearly shows that he focused on the key social relation which capitalism creates — namely the one of domination of the worker by the capitalist.

Bookchin does mention that Proudhon was "obliged in 1851, in the wake of the associationist ferment of 1848 and after, to acknowledge that association of some sort was unavoidable for large-scale enterprises." [p. 78] However, Proudhon’s support of industrial democracy pre-dates 1851 by some 11 years. He stated in What is Property? that he "preach[ed] emancipation to the proletaires; association to the labourers" and that "leaders" within industry “must be chosen from the labourers by the labourers themselves.” [p. 137 and p. 414] It is significant that the first work to call itself an anarchist opposed property along with the state, exploitation along with oppression and supported self-management against hierarchical relationships within production (“anarchos”-capitalists take note!). Proudhon also called for “democratically organised workers’ associations” to run large-scale industry in his 1848 Election Manifesto. [No Gods, No Masters, vol. 1, p. 62] Given that Bookchin considers as “authentic artisanal socialists” those who called for collective ownership of the means of production, but “exempted from collectivisation the peasantry” [p. 4] we have to conclude that Proudhon was such an “authentic” artisanal

Bolshevik losses in the soviet elections” in all provincial city elections that data is available for. The Mensheviks were the main beneficiaries of these election swings (Socialist Revolutionaries also gained) The Bolsheviks forcibly disbanded such soviets. They continually postponed elections and "pack[ed] local soviets once they could no longer count on an electoral majority” by giving representation to the organisations they dominated which made workplace elections meaningless. [Samuel Farber, Before Stalinism, pp. 22–4 and p. 33] In Petrograd, such packing swamped the actual number of workplace delegates, transforming the soviets and making elections irrelevant. Of the 700-plus deputies to the “new” soviet, over half were elected by Bolshevik dominated organisations so ensuring a solid Bolshevik majority even before the factory voting began.

Thus, the regime remained “soviet” in name only. Faced with a defeat in the soviets, the Bolsheviks simply abolished them or changed them to ensure their position. This process, it should be noted, started before the outbreak of Civil War in late May 1918, implying that Bolshevik authoritarianism cannot be explained as reactions to difficult objective circumstances.

Unsurprisingly, Bolshevik ideology started to adjust to the position the party found itself in. As Samuel Farber argues, in the “period of March to June 1918, Lenin began to make frequent distinctions within the working class, singling out workers who could still be trusted, denouncing workers whom he accused of abandoning the working class and deserting to the side of the bourgeoisie, and complaining about how the working class had become ‘infected with the disease of petty-bourgeois disintegration.’” [Op. Cit., p. 25] Combined with the vision of “working-class” or “soviet” power expressed by the power of his party, this laid the foundations for what came next. In 1919 Lenin fully and explicitly argued that the “dictatorship of the proletariat” was, in fact, the dictatorship of the Bolshevik party:
“we are reproached with having established a dictatorship of one party ... we say, 'Yes, it is a dictatorship of one party! This is what we stand for and we shall not shift from that position ...'” [Collected Works, vol. 29, p. 535]

This quickly become Bolshevik orthodoxy. Trotsky argued in his infamous work Terrorism and Communism that there was “no substitution at all” when “the power of the party” replaces “the power of the working class.” Zinoviev argued this point at the Second Congress of the Communist International. As he put it:

“Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... [T]he dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.” [Proceedings and Documents of the Second Congress, 1920, vol. 1, pp. 151–2]

Neither Lenin nor Trotsky disagreed. By the end of the civil war, Lenin was arguing that “the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [Collected Works, vol. 32, p. 21]

3 — Was Proudhon a socialist or a capitalist?

In section 8 (Who are the major anarchist thinkers?), Caplan tries his best to claim that Proudhon was not really a socialist at all. He states that “Pierre-Joseph Proudhon is also often included [as a “left anarchist”] although his ideas on the desirability of a modified form of private property would lead some to exclude him from the leftist camp altogether.”

“Some” of which group? Other anarchists, like Bakunin and Kropotkin? Obviously not — Bakunin claimed that “Proudhon was the master of us all.” According to George Woodcock Kropotkin was one of Proudhon’s “confessed disciples.” Perhaps that makes Bakunin and Kropotkin proto-capitalists? Obviously not. What about Tucker? He called Proudhon “the father of the Anarchistic school of Socialism.” [Instead of a Book, p. 381] And, as we noted above, the socialist historian Carl Lauder considered Proudhon a socialist, as did the noted British socialist G.D.H. Cole in his History of Socialist Thought (and in fact called him one of the “major prophets of Socialism.”). What about Marx and Engels, surely they would be able to say if he was a socialist or not? According to Engels, Proudhon was “the Socialist of the small peasant and master-craftsman.” [Marx and Engels, Selected Works, p. 260]

In fact, the only “left” (i.e. social) anarchist of note who seems to place Proudhon outside of the “leftist” (i.e. anarchist) camp is Murray Bookchin. In the second volume of The Third Revolution Bookchin argues that “Proudhon was no socialist” simply because he favoured “private property.” [p. 39] However, he does note the “one moral provision [that] distinguished the Proudhonist contract from the capitalist contract” namely “it abjured profit and exploitation.” [Op. Cit., pp. 40–41] — which, of course, places him in the socialist tradition (see last section). Unfortunately, Bookchin fails to acknowledge this or that Proudhon was totally opposed to wage labour along with usury, which, again, instantly places him in ranks of socialism (see, for example, the General Idea of the
In other words, Proudhon shared the common aim of all socialists (namely to abolish capitalism, wage labour and exploitation) but disagreed with the means. As can be seen, Tucker placed himself squarely in this tradition and so could (and did) call himself a socialist. Little wonder Joseph Labadie often said that “All anarchists are socialists, but not all socialists are anarchists.” That Caplan tries to ignore this aspect of Individualist Anarchism in an attempt to co-opt it into “anarcho”-capitalism indicates well that his FAQ is not an objective or neutral work.

Caplan states that the “United States has been an even more fertile ground for individualist anarchism: during the 19th-century, such figures as Josiah Warren, Lysander Spooner, and Benjamin Tucker gained prominence for their vision of an anarchism based upon freedom of contract and private property.”

However, as indicated, Tucker and Spooner did not support private property in the capitalist sense of the word and Kropotkin and Bakunin, no less than Tucker and Spooner, supported free agreement between individuals and groups. What does that prove? That Caplan seems more interested in the words Tucker and Proudhon used rather than the meanings they attached to them. Hardly convincing.

Perhaps Caplan should consider Proudhon’s words on the subject of socialism:

“Modern Socialism was not founded as a sect or church; it has seen a number of different schools.” [Selected Writings of Pierre-Joseph Proudhon, p. 177]

If he did perhaps he would who see that the Individualist Anarchists were a school of socialism, given their opposition to exploitation and the desire to see its end via their political, economic and social ideas.

This places the Bolshevik betrayals of the Makhnovists in 1919 and 1920 into political context. It also explains the Bolshevik opposition to the proposed fourth clause of the 1920 political and military agreement (see last section). Simply put, at the time (and long afterwards) the Bolsheviks equated the revolution with their own power. As such, Makhnovist calls for soviet self-management threatened the “dictatorship of the proletariat” (i.e. dictatorship of the party) by encouraging working people to participate in the revolution and giving the radically false idea that working-class power could be exercised by working people and their own class organisations.

Lenin, Trotsky and Zinoviev held this position until their deaths. Trotsky, for example, was arguing in 1923 that “if there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work.” [Leon Trotsky Speaks, p. 158] Even after the rise of Stalinism, he was still arguing for the “objective necessity” of the “revolutionary dictatorship of a proletarian party” in 1937. He stressed that the “revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution ... Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions.” [Trotsky, Writings 1936–37, pp. 513–4]

This suggests that the later Trotskyist argument that the Bolsheviks were forced by “objective factors” to replace the dictatorship of the proletariat by that of the party is false. At the time, and afterwards, the Bolsheviks did not argue in these terms. The end of soviet democracy was not considered a problem or a retreat for the revolution. The opposite was the case, with the elimination of democracy being raised to an ideological truism to be applied everywhere. Equally, the fact that the Makhnovists did all they could
to promote soviet self-management and actually called regional congresses of workers, peasants and insurgents suggests that “objective factors” simply cannot explain Bolshevik actions. Simply put, like the Bolshevik betrayals of the Makhnovists, the Bolshevik elimination of soviet democracy by party dictatorship can only be fully understood by looking at Bolshevik ideology.

Little wonder the Makhnovists argued as followed:

“Since the arrival of the Bolsheviks the dictatorship of their party has been established here. As a party of statists, the Bolshevik Party everywhere has set up state organs for the purpose of governing the revolutionary people. Everything has to be submitted to their authority and take place under their vigilant eye. All opposition, protest, or even independent initiative has been stifled by their Extraordinary Commissions [the secret police, the Cheka]. Furthermore, all these institutions are composed of people who are removed from labour and from revolution. In other words, what has been created is a situation in which the labouring and revolutionary people have fallen under the surveillance and rule of people who are alien to the working classes, people who are inclined to exercise arbitrariness and violence over the workers. Such is the dictatorship of the Bolshevik-Communist Party . . .

“We again remind the working people that they will liberate themselves from oppression, misery and violence only through their own efforts. No change in power will help them in this. Only by means of their own free worker-peasant organisations can the workers reach the summit of the social revolution — complete freedom and real equality.” [quoted by Arshinov, Op. Cit. pp. 116–7]
Thus the common agreement between all socialists was that capitalism was based upon exploitation and wage slavery, that workers did not have access to the means of production and so had to sell themselves to the class that did. Thus we find Individualist Anarchists arguing that the whole produce of labour ought to belong to the labourer and opposing the exploitation of labour by capital. To use Tucker’s own words:

“the fact that one class of men are dependent for their living upon the sale of their labour, while another class of men are relieved of the necessity of labour by being legally privileged to sell something that is not labour... And to such a state of things I am as much opposed as any one. But the minute you remove privilege ... every man will be a labourer exchanging with fellow-labourers ... What Anarchistic-Socialism aims to abolish is usury ... it wants to deprive capital of its reward.” [Instead of a Book, p. 404]

By ending wage labour, anarchist socialism would ensure “The land to the cultivator. The mine to the miner. The tool to the labourer. The product to the producer” and so “everyone [would] be a proprietor” and so there would be “no more proletaires” (in the words of Ernest Lesigne, quoted favourably by Tucker as part of what he called a “summary exposition of Socialism from the standpoint of Anarchism” [Op. Cit., p. 17, p. 16]). Wage labour, and so capitalism, would be no more and “the product [would go] to the producer.” The Individualist Anarchists, as Wm. Gary Kline correctly points out, “expected a society of largely self-employed workmen with no significant disparity of wealth between any of them.” [The Individualist

Which brings us to the next issue, namely working-class freedom. For anarchists, the key point of a revolution is to increase working-class freedom. It means the end of hierarchy and the direct participation in the revolution by the working classes themselves. As Bakunin put it, “revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.” [Michael Bakunin: Selected Writings, p. 237] For this reason, the Makhnovists (like Bakunin) argued for a revolutionary society based on free federations of worker and peasant organisations (free soviets).

This means that actions which consolidated rule by a few cannot be revolutionary, even if the few are made up of the most revolutionary of the revolutionaries. Thus working class power cannot be equated to the power of a political party, no matter how “socialist” or “revolutionary” its ideas or rhetoric. This means that Bolshevik restrictions on working class freedom (of speech, assembly, press, organisation) struck at the heart of the revolution. It did not signify the defence of the revolution, but rather its defeat. Ultimately, as Emma Goldman quickly recognised, what the Bolsheviks called “defence of the Revolution” was “really only the defence of [the] party in power.” [My Disillusionment in Russia, p. 57]

Anarchists had long argued that, to quote Goldman again, there is “no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical.” [Op. Cit., p. 260] The evolution of Bolshevik practice and theory reinforces this argument. The means used had an impact on the course of events, which in turn shaped the next set of means and the ideology used to justify it.
This explains the Makhnovist and Bolshevik differences in relationship to working-class freedom. For anarchists, only freedom or the struggle for freedom can teach people to be free (and so is genuinely revolutionary). This explains why the Makhnovists not only proclaimed freedom of election, speech, press, assembly and organisation for working people, which was an essential revolutionary position, they also implemented it (see section 7). The Bolsheviks did the reverse, clamping down on the opposition at every occasion (including workers’ strikes and protests). For the Makhnovists, working-class freedom was the key gain of the revolution, and so had to be introduced, practised and defended. Hence Makhno:

“I consider it an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs. That is why the prohibitions of such congresses, and the declaration proclaiming them illegal…, represent a direct and insolent violation of the rights of the workers.” [quoted by Arshinov, Op. Cit., p. 129]

For the Bolsheviks, working-class freedom was something to fear. Back in 1903, Lenin laid the groundwork for this by arguing that the “spontaneous development of the labour movement leads to it being subordinated to bourgeois ideology.” He stressed that “the working class, exclusively by their own effort, is able to develop only trade union consciousness … the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.” This meant that “Social Democratic [i.e. socialist] consciousness … could only be brought to them from without.” [Essential Works of Lenin, p. 82 and pp. 74–5] Clearly, if the workers turned against the party, then the workers were “being subordinated to bourgeois ideology.” It was in their own interests, therefore, for the party to subordinate so on. Moreover, as the economy changed in the 19th century, so did socialist ideas. Murray Bookchin gives a good summary of this process:

“Th[e] growing shift from artisanal to an industrial economy gave rise to a gradual but major shift in socialism itself. For the artisan, socialism meant producers’ co-operatives composed of men who worked together in small shared collectivist associations … For the industrial proletarian, by contrast, socialism came to mean the formation of a mass organisation that gave factory workers the collective power to expropriate a plant that no single worker could properly own… They advocated public ownership of the means of production, whether by the state or by the working class organised in trade unions.” [The Third Revolution, vol. 2, p. 262]

So, in this evolution of socialism we can place the various brands of anarchism. Individualist anarchism is clearly a form of artisanal socialism (which reflects its American roots) while communist anarchism and anarcho-syndicalism are forms of industrial (or proletarian) socialism (which reflects its roots in Europe). Proudhon’s mutualism bridges these extremes, advocating as it does artisan socialism for small-scale industry and agriculture and co-operative associations for large-scale industry (which reflects the state of the French economy in the 1840s to 1860s). The common feature of all these forms of anarchism is opposition to usury and the notion that “workers shall own the means of production.” Or, in Proudhon’s words, “abolition of the proletariat.” [Op. Cit., p. 179] As one expert on Proudhon points out, Proudhon’s support for “association” (or “associative socialism”) “anticipated all those later movements” which demanded “that the economy be controlled neither by private enterprise nor by the state … but by the producers” such as “the revolutionary syndicalists” and “the students of 1968.”
avoids the central issue of freedom, of whether a given society generates oppression and exploitation or not. By looking at “property” Caplan ignores liberty, a strange but unsurprising position for a self-proclaimed “libertarian” to take.

Thus both of Caplan’s “definitions” of socialism are lacking. A “traditional” one of government ownership is hardly that and the one based on “property” rights avoids the key issue while, in its own way, includes all the anarchists in the socialist camp (something Caplan, we are sure, did not intend).

So what would be a useful definition of socialism? From our discussion on property we can instantly reject Caplan’s biased and simplistic starting points. In fact, a definition of socialism which most socialists would agree with would be one that stated that “the whole produce of labour ought to belong to the labourer” (to use words Thomas Hodgskin, an early English socialist, from his essay Labour Defended against the Claims of Capital). Tucker stated that “the bottom claim of Socialism” was “that labour should be put in possession of its own,” that “the natural wage of labour is its product” (see his essay State Socialism and Anarchism). This definition also found favour with Kropotkin who stated that socialism “in its wide, generic, and true sense” was an “effort to abolish the exploitation of labour by capital.” [Kropotkin’s Revolutionary Pamphlets, p. 169]

From this position, socialists soon realised that (to again quote Kropotkin) “the only guarantee not to by robbed of the fruits of your labour is to possess the instruments of labour.” [The Conquest of Bread, p. 145] Because of this socialism also could be defined as “the workers shall own the means of production,” as this automatically meant that the product would go to the producer, and, in fact, this could also be a definition of socialism most socialists would agree with. The form of this ownership, however, differed from socialist tendency to socialist tendency (some, like Proudhon, proposed co-operative associations, others like Kropotkin communal ownership, others like the Social Democrats state ownership and
Unsurprisingly, the Makhnovists supported the Kronstadt rebellion (see the appendix "What was the Kronstadt uprising?" for more on Kronstadt). Indeed, there is significant overlap between the Kronstadt demands and the ideas of the Makhnovist movement. For example, the Makhnovist idea of free soviets is almost identical to the first three points of the Kronstadt programme and their land policy the same as point 11 of the Kronstadt demands. The Kronstadt rebels also raised the idea of “free soviets” and the “third revolution,” common Makhnovist slogans (see section 3 of the appendix “What was the Kronstadt uprising?” for details). As one Bolshevik writer notes, it is “characteristic that the anarchist-Makhnovists in the Ukraine reprinted the appeal of the Kronstadters, and in general did not hide their sympathy for them.” [quoted by Malet, Op. Cit., p. 108] Voline also noted that the “ideas and activities of the Makhnovist peasants were similar in all respects to those of the Kronstadt rebels in 1921.” [Op. Cit., p. 575]

In summary, the major difference between the Makhnovists and the Bolsheviks is that the former stuck by and introduced their stated aims of “soviet power” and working-class freedom while the latter rejected them once they clashed with Bolshevik party policies.

15 How do the modern followers of Bolshevism slander the Makhnovists?

Many modern-day supporters of Bolshevism, on the rare occasions when they do mention the Makhnovist movement, simply repeat the old Bolshevik (and Stalinist) slanders against them.

For example, this is what Joseph Seymour of the U.S. Spartacus League did. Their newspaper Workers Vanguard ran a series entitled “Marxism vs. Anarchism” and in part 7, during his discussion of the Russian Revolution, Seymour claimed: “no advocate of occupancy and use believes that it can be put in force until as a theory it has been accepted as generally ... seen and accepted as is the prevailing theory of ordinary private property.” [Occupancy and Use versus the Single Tax]

So, as can be seen, Individualist Anarchism rejected important aspects of capitalist property rights. Given that the Individualist Anarchists were writing at a time when agriculture was still the largest source of employment this position on land is much more significant than it first appears. In effect, Tucker and the other American Anarchists were advocating a massive and fundamental change in property-rights, in the social relationships they generated and in American society. This is, in other words, a very “strong restriction” in capitalist property rights (and it is this type of property Caplan is referring to, rather than “property” in the abstract).

However, such a “definition” of socialism as “restricting” private property is flawed as it does not really reflect anarchist ideas on the subject. Anarchists, in effect, reject the simplistic analysis that because a society (or thinker) accepts “property” that it (or he/she) is capitalistic. This is for two reasons. Firstly, the term “property” has been used to describe a wide range of situations and institutions. Thus Tucker used the term “property” to describe a society in which capitalist property rights were not enforced. Secondly, and far more importantly, concentrating on “property” rights in the abstract ignores the social relationships it generates. Freedom is product of social interaction, not one of isolation. This means that the social relationships generated in a given society are the key to evaluating it — not whether it has “property” or not. To look at “property” in the abstract is to ignore people and the relationships they create between each other. And it is these relationships which determine whether they are free or not (and so exploited or not). Caplan’s use of the anti-property rights “definition” of socialism
This distinction is to paint a very misleading picture of what socialism stands for.

This leaves the “the strong restriction ... of private property” definition of socialism. Here Caplan is on stronger ground. Unfortunately, by using that definition the Individualist Anarchists, like the Social Anarchists, are included in socialist camp, a conclusion he is trying to avoid. As every anarchist shares Proudhon’s analysis that “property is theft” and that possession would be the basis of anarchism, it means that every anarchist is a socialist (as Labadie always claimed). This includes Tucker and the other Individualist Anarchists. For example, Joseph Labadie stated that “the two great sub-divisions of Socialists” (anarchists and State Socialists) both “agree that the resources of nature — land, mines, and so forth — should not be held as private property and subject to being held by the individual for speculative purposes, that use of these things shall be the only valid title, and that each person has an equal right to the use of all these things. They all agree that the present social system is one composed of a class of slaves and a class of masters, and that justice is impossible under such conditions.” [What is Socialism?]

Tucker himself argued that the anarchists’ “occupancy and use” title to land and other scare material would involve a change (and, in effect, “restriction”) of current (i.e. capitalist) property rights:

“It will be seen from this definition that Anarchistic property concerns only products. But anything is a product upon which human labour has been expended. It should be stated, however, that in the case of land, or of any other material the supply of which is so limited that all cannot hold it in unlimited quantities, Anarchism undertakes to protect no titles except such as are based on actual occupancy and use.” [Instead of a Book, p. 61]

and so:

“The most significant counter-revolutionary force under the banner of anarchism was the Ukrainian peasant-based army of Nestor Makhno, which carried out pogroms against Jewish communities and collaborated with White armies against the Bolsheviks.” [Workers Vanguard, 8/30/1996, p. 7]

Seymour, needless to say, made these accusations without providing any documentation, and with good reason, for outside of Stalinist hagiographies, no evidence exists to support his claims. As we indicated in section 9, the Makhnovists opposed anti-Semitism and did not conduct pogroms. Equally, section 12 proves that the Makhnovists did not collaborate with the Whites in any way (although this did not stop the Bolshevik press deliberately spreading the lie that they had).

More recently, the UK Leninist Revolutionary Communist Group asserted in their paper that the Makhnovists “joined with counter-revolutionary White and imperialist armies against socialist Russia. This band of brigands also carried out pogroms against Jewish communities in the Ukraine.” [Fight Racism! Fight Imperialism!, issue no. 174, p. 12] No evidence for such a claim was presented in the original review article. When an anarchist pointed out their assertion was “falling back on a long tradition of Stalinist lies” and asked for “any historical references” to support it, the paper replied by stating that while there were “several” references, it would give two: “E.H. Carr refers to it in his history of the civil war. Also the anarchist historian Paul Avrich mentions it in his work The anarchists in the Russian Revolution.” [Op. Cit., no. 175, p. 15]

In reality, neither work says any such thing. Looking at the first (unnamed) one, assuming it is E.H. Carr’s The Bolshevik Revolution there is no reference to pogroms carried out by the Makhnovists (looking in the index for “Makhno”). Which, perhaps, explains why the paper refused to provide a book title and page number. As far as the second reference goes, Avrich made no such claim in The
Anarchists in the Russian Revolution. He did address the issue in his *Anarchist Portraits*, concluding such charges are false.

And the name of the original article? Ironically, it was entitled “The anarchist school of falsification”!

However, more sophisticated slanders, lies and distortions have been levelled at the Makhnovists by the supporters of Bolshevism. This is to be expected, as the experience of the Makhnovists effectively refute the claim that the Bolsheviks had no choice but to act as they did. It is hard to maintain a position that “objective conditions” made the Bolsheviks act as they did when another mass revolutionary army, operating in the same environment, did not act in the same way. This means that the Makhnovists are strong evidence that Bolshevik politics played a key role in the degeneration of the Russian Revolution. Clearly such a conclusion is dangerous to Bolshevism and so the Maknovist movement must be attacked, regardless of the facts.

A recent example of this is John Rees’ essay “In Defence of October” (*International Socialism*, no. 52, pp. 3–82). Rees, a member of the UK Socialist Workers’ Party (SWP) is at pains to downplay the role of Bolshevik ideology in the degeneration of the Russian Revolution. He argues that “objective factors” ensured that the Bolsheviks acted as they did. The “subjective factor” was simply a choice between defeat and defence against the Whites: “Within these limits Bolshevik policy was decisive.” [*Op. Cit.*, p. 30] This explains his attack on the Makhnovist movement. Faced with the same “objective factors” as the Bolsheviks, the Makhnovists did not act in the same way. As such, the “subjective factor” amounts to more than Rees’ stark choice and so objective conditions cannot explain everything.

Clearly, then, the Makhnovists undermine his basic thesis. As such, we would expect a less than honest account of the movement and Rees does not disappoint. He talks about the “muddled anarchism” of Makhno, dismissing the whole movement as offering no alternative to Bolshevism and being without “an articulated politi-

“to everything that enables any man [or woman]… to appropriate the product of other’s toil” [*The Conquest of Bread*, p. 61]

Even Marx and Engels did not define socialism in terms of the abolition of all forms of “private property.” Like anarchists, they distinguished between that property which allows exploitation to occur and that which did not. Looking at the Communist Manifesto we find them arguing that the “distinguishing feature of Communism is not the abolition of property generally, but the abolition of bourgeois property” and that “Communism deprives no man of the power to appropriate the products of society; all that it does is to deprive him of the power to subjugate the labour of others by means of such appropriation.” Moreover, they correctly note that “property” has meant different things at different times and that the “abolition of existing property relations is not at all a distinctive feature of Communism” as “[a]ll property relations in the past have continually been subject to historical change consequent upon the change in historical conditions.” As an example, they argue that the French Revolution “abolished feudal property in favour of bourgeois property.” [*The Manifesto of the Communist Party*, p.47, p. 49 and p. 47]

Which means that the idea that socialism means abolishing “private property” is only true for those kinds of property that are used to exploit the labour of others. Nicholas Walter sums up the anarchist position when he wrote that anarchists “are in favour of the private property which cannot be used by one person to exploit another.” [*Reinventing Anarchy*, p. 49] In other words, property which is no longer truly private as it is used by those who do not own it. In effect, the key point of Proudhon’s *What is Property*, namely the difference between possession and property. Which means that rather than desire the abolition of all forms of “private property,” socialists (of all kinds, libertarian and authoritarian) desire the abolition of a specific kind of property, namely that kind which allows the exploitation and domination of others. To ignore
Thus Jeremy Jennings’ summary of the anarchist position on private property:

“The point to stress is that all anarchists [including Spooner and Tucker], and not only those wedded to the predominant twentieth-century strain of anarchist communism have been critical of private property to the extent that it was a source of hierarchy and privilege.”

He goes on to state that anarchists like Tucker and Spooner “agreed with the proposition that property was legitimate only insofar as it embraced no more than the total product of individual labour.” [“Anarchism”, Contemporary Political Ideologies, Roger Eatwell and Anthony Wright (eds.), p. 132]

The idea that socialism can be defined as state ownership or even opposition to, or “abolition” of, all forms of property is not one which is historically accurate for all forms of socialism. Obviously communist-anarchists and syndicalists would dismiss out of hand the identification of socialism as state ownership, as would Individualist Anarchists like Tucker and Joseph Labadie. As for opposition or abolition of all forms of “private property” as defining socialism, such a position would have surprised communist-anarchists like Kropotkin (and, obviously, such self-proclaimed socialists as Tucker and Labadie).

For example, in Act for Yourselves Kropotkin explicitly states that a peasant “who is in possession of just the amount of land he can cultivate” would not be expropriated in an anarchist revolution. Similarly for the family “inhabiting a house which affords them just enough space ... considered necessary for that number of people” and the artisan “working with their own tools or handloom” would be left alone [pp. 104–5]. He makes the same point in The Conquest of Bread [p. 61] Thus, like Proudhon, Kropotkin replaces private property with possession as the former is “theft” (i.e. it allows exploitation, which “indicate[s] the scope of Expropriation” namely...
2 — Why is Caplan’s definition of socialism wrong?

Perhaps the problem lies with Caplan’s “definition” of socialism. In section 7 (Is anarchism the same thing as socialism?) he states:

“If we accept one traditional definition of socialism — ‘advocacy of government ownership of the means of production’ — it seems that anarchists are not socialists by definition. But if by socialism we mean something more inclusive, such as ‘advocacy of the strong restriction or abolition of private property,’ then the question becomes more complex.”

Which are hardly traditional definitions of socialism unless you are ignorant of socialist ideas! By definition one, Bakunin and Kropotkin are not socialists. As far as definition two goes, all anarchists were opposed to (capitalist) private property and argued for its abolition and its replacement with possession. The actual forms of possession differed from between anarchist schools of thought, but the common aim to end private property (capitalism) was still there. To quote Dana, in a pamphlet called “a really intelligent, forceful, and sympathetic account of mutual banking” by Tucker, individualist anarchists desire to “destroy the tyranny of capital, — that is, of property” by mutual credit. [Charles A. Dana, Proudhon and his “Bank of the People”, p. 46]

Interestingly, this second definition of socialism brings to light a contradiction in Caplan’s account. Elsewhere in the FAQ he notes that Proudhon had “ideas on the desirability of a modified form of private property.” In fact, Proudhon did desire to restrict private property to that of possession, as Caplan himself seems aware. In other words, even taking his own definitions we find that Proudhon would be considered a socialist! Indeed, according to Proudhon, “all accumulated capital is collective property, no one may be its exclusive owner.” [Selected Writings of Pierre-Joseph Proudhon, p. 44]
Interestingly, Landauer includes Proudhon in his history and states that he was "the most profound thinker among pre-Marxian socialists." [p. 67] Given that Caplan elsewhere in his FAQ tries to co-opt Proudhon into the “anarcho”-capitalist school as well as Tucker, his citing of Landauer seems particularly dishonest. Landauer presents Proudhon’s ideas in some depth in his work within a chapter headed

**“The three Anticapitalistic Movements.”** Indeed, he starts his discussion of Proudhon’s ideas with the words "In France, post-Utopian socialism begins with Peter Joseph Proudhon." [p. 59] Given that both Kropotkin and Tucker indicated that Individualist Anarchism followed Proudhon’s economic and political ideas the fact that Landauer states that Proudhon was a socialist implies that Individualist Anarchism is also socialist (or "Leftist" to use Caplan’s term).

Tucker and the other individualist anarchists considered themselves as followers of Proudhon’s ideas (as did Bakunin and Kropotkin). For example, Tucker stated that his journal Liberty was “brought into existence as a direct consequence of the teachings of Proudhon” and “lives principally to spread them.” [cited by Paul Avrich in his “Introduction” to Proudhon and his “Bank of the People” by Charles A. Dana]

Obviously Landauer considered Proudhon a socialist and if Individualist Anarchism follows Proudhon’s ideas then it, too, must be socialist.

Unsurprisingly, then, Tucker also considered himself a socialist. To state the obvious, Tucker and Bakunin both shared Proudhon’s opposition to private property (in the capitalist sense of the word), although Tucker confused this opposition (and possibly the casual reader) by talking about possession as “property.”

So, it appears that Caplan is the one trying to rewrite history.

#app2

Rees’ account of the movement (The Anarchism of Nestor Makhno, 1918–1921), fails to use it. So, in summary, a major part of his account is based on falsehoods, falsehoods exposed as such decades ago. This indicates well the quality of his case against the Makhnovist movement.

As regards the “evidence” he extracts from this fake diary and Red Army reports, it simply shows that Bolsheviks were shot by Makhno’s troops and Red Army troops died in combat. This went both ways, of course. In “military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents.” Equally, “[o]n the occupation of a village by the Red Army the Cheka would hunt out and hang all active Makhnovite supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants … and three or four Red militia men left as armed support for the new village bosses.” [David Footman, Op. Cit., pp. 292–3] As such, Rees’ account of Makhnovist “terror” against the Bolsheviks seems somewhat hypocritical. We can equally surmise that the methods used by the Bolsheviks against the Makhnovists also “often mirrored those used by the Whites”! And Rees lambastes socialist Samuel Farber for mentioning the “Red Terror, but not the Green Terror” in Farber’s discussion of the Tambov revolt! All in all, pretty pathetic.

Rees’ concern for the truth can be seen from the fact that he asserts that Makhno’s “rebellion” was “smaller” than the Tambov uprising and distinguished from it “only by the muddled anarchism of its leader.” [Op. Cit., p. 58] In fact, the Makhnovist movement was the bigger of the two. As Michael Malet notes:

"The differences between them explain why the Makhnovshchina lasted over four years, the Antonovshchina less than one year. The initial area of the Makhno movement was larger, and later expanded, whereas the
Antonov region was restricted to the southern half of one province throughout its existence. The Makhno movement became established earlier, and was well-known before its break with the soviet regime. A crucial factor was the period of peace between the Bolsheviks and Makhno during the first half of 1919, something Antonov never had. It allowed for political and social development as well as military build-up. It followed from this that Makhno attracted much more support, which was increased and deepened by the positive ideology of Makhno and the anarchists who came to help him. This was not a matter of being anti-State and anti-town — all the Greens, including Antonov, shared this view in a less sophisticated form — but a positive land policy and a realisation of the need to link up with the towns on a federal basis in the post-revolutionary society." [Op. Cit., p. 155]

Even in terms of troops, the Makhno movement was larger. The Antonov rebellion had "a peak of around 20,000" troops. [Read, Op. Cit., p. 268] Makhno, in comparison, had a peak of about 40,000 in late 1919 [Palij, Op. Cit., p. 112] (Read states a peak of around 30,000 [Op. Cit., p. 264]). Even by the end of 1920, a few months into the Tambov rebellion (it started in August of that year), the Makhnovists still had 10 to 15 thousand troops. [Palij, Op. Cit., p. 237]

In summary, the movement which lasted longer, covered a larger area and involved more troops is classed by Rees as the smaller of the two! Incredible — but it does give a flavour of the scholarship involved in his essay. Perhaps by "smaller" Rees simply meant that Makhno was physically shorter than Antonov?

After getting such minor details as size wrong, Rees turns to the actual history of the movement. He looks at the relations between the Makhnovists and the Bolsheviks, accurately stating that they
arguing that the anarchist movement has historically been clearly leftist. In my own view, it is necessary to re-write a great deal of history to maintain this claim.”

He quotes Carl Landauer’s *European Socialism: A History of Ideas and Movements* as evidence:

“To be sure, there is a difference between individualistic anarchism and collectivistic or communistic anarchism; Bakunin called himself a communist anarchist. But the communist anarchists also do not acknowledge any right to society to force the individual. They differ from the anarchistic individualists in their belief that men, if freed from coercion, will enter into voluntary associations of a communistic type, while the other wing believes that the free person will prefer a high degree of isolation. The communist anarchists repudiate the right of private property which is maintained through the power of the state. The individualist anarchists are inclined to maintain private property as a necessary condition of individual independence, without fully answering the question of how property could be maintained without courts and police.”

Caplan goes on to state that “the interesting point is that before the emergence of modern anarcho-capitalism Landauer found it necessary to distinguish two strands of anarchism, only one of which he considered to be within the broad socialist tradition.”

However, what Caplan seems to ignore is that both individualist and social anarchists agree that there is a difference between the two schools of anarchist thought! Some insight. Of course, Caplan tries to suggest that Landauer’s non-discussion of the individualist anarchists is somehow “evidence” that their ideas are not socialistic. Firstly, Landauer’s book is about *European Socialism*. Individualist anarchism was almost exclusively based

“were chequered.” However, he is wrong when he tries to explain what happened by stating they “reflect[ed] the fast changing military situation in the Ukraine throughout the civil war.” [Op. Cit., p. 58] In fact, as we will prove, the relationships between the two forces reflected the military situation refracted through the ideology and needs of Bolshevik power. To ignore the ideological factor in the Makhnovist-Bolshevik relationships cannot be justified as the military situation does not fully explain what happened.

The Makhnovists co-operated with the Red Army three times. Only two of these periods were formal alliances (the first and last). Discussing the first two pacts, Rees alleges that the Makhnovists broke with the Bolsheviks. The truth is the opposite — the Bolsheviks turned on the Makhnovists and betrayed them in order to consolidate their power. These facts are hardly unknown to Rees as they are contained in the very books he quotes from as evidence for his rewritten history.

The first pact between the Makhnovists and the Red Army ended June 1918. According to Rees, “[c]o-operation continued until June 1919 when the Insurgent Army broke from the Red Army” and quotes Michael Palij’s book *The Anarchism of Nestor Makhno* as follows: “as soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks’ rear, which subsequently attacked strongholds, troops, police, trains and food collectors.” [Op. Cit., p. 58] Rees is clearly implying that Makhno attacked the Bolsheviks, apparently for no reason. The truth is totally different. It is easy to show this — all we need to do is look at the book he uses as evidence.

Rees quotes Palij on page 177. This page is from chapter 16, which is called “The Bolsheviks Break with Makhno.” As this was not enough of a clue, Palij presents some necessary background for this Bolshevik break. He notes that before the break, “the Bolsheviks renewed their anti-Makhno propaganda. Trotsky, in particular, led a violent campaign against the Makhno movement.” He also mentions that “[a]t the same time, the supplies of arms and other
war materials to Makhno were stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops.” In this context, the Makhnovists Revolutionary Military Council “decided to call a fourth congress of peasants, workers, and partisans” for June 15th, 1919, which Trotsky promptly banned, warning the population that “participation in the Congress shall be considered an act of state treason against the Soviet Republic and the front.” [Op. Cit., p. 175 and p. 176]

The Bolsheviks had, of course, tried to ban the third congress in April but had been ignored. This time, they made sure that they were not. Makhno and his staff were not informed of Trotsky’s dictatorial order and learned of it three days later. On June 9th, Makhno sent a telegram informing the Bolsheviks that he was leaving his post as leader of the Makhnovists. He “handed over his command and left the front with a few of his close associates and a cavalry detachment” while calling upon the partisans to “remain at the front to hold off Denikin’s forces.” Trotsky ordered his arrest, but Makhno was warned in advance and escaped. On June 15–16th, members of Makhno’s staff “were captured and executed the next day.” Now Palij recounts how “[a]s soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks’ rear, which subsequently attacked strongholds, troops, police, trains and food collectors.” [Op. Cit., p. 177]

Palij “subsequently” refers to Makhno after Denikin’s breakthrough and his occupation of the Ukraine. “The oppressive policy of the Denikin regime,” he notes, “convinced the population that it was as bad as the Bolshevik regime, and brought a strong reaction that led able young men ... to leave their homes and join Makhno and other partisan groups.” [Op. Cit., p. 190] As Makhno put it, “[w]hen the Red Army in south Ukraine began to retreat ... as if to straighten the front line, but in reality to evacuate Ukraine ... only then did my staff and I decide to act.” [quoted by Palij, Op. Cit., p. 190] After trying to fight Denikin’s troops, Makhno retreated and called upon his troops to leave the Red Army and rejoin the fight against Denikin. He “sent agents amongst the Red troops” it no longer is. As such, in an anarchist FAQ section F became redundant as “anarcho”-capitalism is a fringe ideology even within the USA. If it were not for their presence on the web and some academics taking their claims to being anarchists at face value, we would only mention them in passing.

We have decided to include this appendix as it is really an addition to the main body of the FAQ. Parties interested in why “anarcho”-capitalist claims are false can explore this appendix, those who are interested in anarchist politics can read the FAQ without having to also read too many arguments between anarchists and capitalists. We should, perhaps, thank Caplan for allowing us an opportunity of explaining the ideas of such people as Proudhon and Tucker, allowing us to quote them and so bring their ideas to a wider audience and for indicating that anarchism, in all its forms, has always opposed capitalism and always will.

Replies to Some Errors and Distortions in Bryan Caplan’s “Anarchist Theory FAQ” version 5.2

1 – Individualist Anarchists and the socialist movement.

Caplan, in his FAQ, attempts to rewrite anarchist history by trying to claim that the individualist anarchists were forerunners of the so-called “anarcho-capitalist” school. However, as is so often the case with Caplan’s FAQ, nothing could be further from the truth.

In section 5 (What major subdivisions may be made among anarchists?) of his FAQ, Caplan writes that:

“A large segment of left-anarchists is extremely sceptical about the anarchist credentials of anarcho-capitalists,
Appendix : Anarchism and “anarcho”-capitalism

This appendix exists for one reason, namely to explain why the idea of “anarcho”-capitalism is a bogus one. While we have covered this topic in section F, we thought that this appendix should be created in order to discuss in more detail why anarchists reject both “anarcho”-capitalism and its claims to being anarchist.

This appendix has three parts. The first two sections are our critique of Bryan Caplan’s “anarcho”-capitalist “Anarchist Theory FAQ.” Caplan’s FAQ is the main on-line attempt to give the oxymoron of “anarcho”-capitalism some form of justification and so it is worthwhile explaining, using his FAQ as the base, why such an attempt fails. The last part of this appendix is the original version of section F.

As we will prove, Caplan’s FAQ fails in its attempt to show that “anarcho” capitalism can be considered as part of the anarchist movement and in fact his account involves extensive re-writing of history. This appendix is in two parts, a reply to Caplan’s most recent FAQ release (version 5.2) and an older reply to version 4.1.1 (which was originally section F.10 of the FAQ). The introduction to the reply to version 4.1.1 indicates what most anarchists think of Caplan’s FAQ and its claims of “objectivity” as so we will not repeat ourselves here.

We decided to replace the original version of section F with an edited version simply because the original section was too long in respect to the rest of the FAQ. While this FAQ may have started out as a rebuttal to “anarcho”-capitalist claims of being anarchist, to carry out propaganda urging them to stay and fight Denikin with the Makhnovists, which they did in large numbers. This propaganda was “combined with sabotage.” Between these two events, Makhno had entered the territory of pogromist warlord Hryhoryiv (which did not contain Red troops as they were in conflict) and assassinated him. [Op. Cit., p. 191 and p. 173]

It should also be noted that Palij states that it was the Whites who “were the main enemy that Makhno fought, stubbornly and uncompromisingly, from the end of 1918 to the end of 1919.” [Op. Cit., p. 177]

Clearly, Rees’s summary leaves a lot to be desired! Rather than Makhno attacking the Bolsheviks, it was they who broke with him — as Palij, Rees’s source, makes clear. Indeed, Makhno made no attempt to undermine the Red Army’s campaign against Denikin (after all, that would have placed his troops and region in danger). Rather, he waited until the Bolsheviks showed that they would not defend the Ukraine against the Whites before he acted. As such, Rees misuses his source material and used Palij as evidence for a viewpoint which is the exact opposite of the one he recounts. The dishonesty is obvious. But, then again, it is understandable, as Trotsky banning a worker, peasant and partisan congress would hardly fit into Rees’ attempt to portray the Bolsheviks as democratic socialists overcome by objective circumstances! Given that the Makhnovists had successfully held three such congresses to discuss the war against reaction, how could objective circumstances be blamed for the dictatorial actions of Trotsky and other leading Red Army officers in the Ukraine? Better not to mention this and instead rewrite history by making Makhno break with the Bolsheviks and attack them for no reason!

Rees moves onto the period of co-operation between the insurgents and the Bolsheviks. His version of what happened is that “Denikin’s advance against Makhno’s territory in autumn 1919 quickly forced a renewal of the treaty with the Bolsheviks. Makhno
harassed Denikin’s troops from the rear, making their advance more
difficult.” [Op. Cit., p. 58]
A more accurate account of what happened would be that Makhno reorganised his troops after the Bolsheviks had retreated and evacuated the Ukraine. These troops included those that had been left in the Red Army in June, who now left to rejoin him (and brought a few Red Army units along too). After conducting quick and demoralising raids against Denikin’s forces, the Makhnovists were forced to retreat to the West (followed by White forces). In late September, near Peregonovka, Makhno inflicted a major defeat against the following Whites and allowed the Makhnovists to attack across Denikin’s supply lines (which stopped his attack on Moscow thus, ironically, saving the Bolshevik regime). Makhno’s swift attack on the rear of the Whites ensured their defeat. As the correspondent of Le Temps observed:

“There is no doubt that Denikin’s defeat is explained more by the uprising of the peasants who brandished Makhno’s black flag, then by the success of Trotsky’s regular army. The partisan bands of ‘Batko’ tipped the scales in favour of the Reds.” [quoted by Palij, Op. Cit., p. 208]

Palij argues that it was the “rapidly changing military situation [which] soon caused a change in the Bolsheviks’ attitude toward Makhno.” The two forces meet up on December 24th, 1919. However, “[a]lthough the Bolsheviks fraternised with the Makhno troops and the commander even offered co-operation, they distrusted Makhno, fearing the popularity he had gained as a result of his successful fight against Denikin.” [Op. Cit., p. 209] It should also be stressed that no formal treaty was signed.

Clearly, Rees’ summary leaves a lot to be desired!

This is not the end of it. Rees even attempts to blame the Makhnovists for the attack of General Wrangel. He argues that “by

placed the need of the revolution first and suggested an alliance to defeat the common enemy of Wrangel. Once Wrangel had been defeated, the Bolsheviks ripped up the agreement they had signed and, yet again, turned on the Makhnovists. Simply put, the Bolsheviks continually placed their own interests before that of the revolution and their allies. This is to be expected from an ideology based on vanguardism (see section H.5 for further discussion).

This does not mean that anarchists and Leninists should not work together. In some circumstances and in some social movements, this may be essential. However, it would be wise to learn from history and not ignore it and, as such, modern activists should be wary when conducting such co-operation. Ultimately, for Leninists, social movements are simply a means to their end (the seizing of state power by them on behalf of the working class) and anarchists should never forget it.

Thus the lessons of the Makhnovist movement are exceedingly rich. Simply put, the Makhnovshchina show that anarchism is a viable form of revolutionary ideas and can be applied successfully in extremely difficult circumstances. They show that social revolutions need not consist of changing one set of bosses for another. The Makhnovist movement clearly shows that libertarian ideas can be successfully applied in a revolutionary situation.

5300

Thus the lessons of the Makhnovist movement are exceedingly rich. Simply put, the Makhnovshchina show that anarchism is a viable form of revolutionary ideas and can be applied successfully in extremely difficult circumstances. They show that social revolutions need not consist of changing one set of bosses for another. The Makhnovist movement clearly shows that libertarian ideas can be successfully applied in a revolutionary situation.

5341
As the Makhnovists themselves realised, their movement had to be complemented by urban working-class self-activity and self-organisations. While they did all they could to encourage it, they lacked a base within the workers’ movement and so their ideas had to overcome the twin barriers of workers’ unfamiliarity with both them and their ideas and Marxist influence. With a strong working-class movement influenced by anarchist ideas, the possibilities for constructive work between city and village would have been helped immensely (this can be seen from the example of the Spanish Revolution of 1936, where rural and urban collectives and unions made direct links with each other).

Lastly, there is the lesson to be gained from Makhnovist co-operation with the Bolsheviks. Simply put, the experience shows the importance of being wary towards Bolshevism. As Voline put it, another disadvantage of the Makhnovists was a “certain casualness, a lack of necessary distrust, towards the Communists.” [Op. Cit., p. 571] The Makhnovists were betrayed three times by the Bolsheviks, who continually placed maintaining their own power above the needs of the revolution. The anarchists were simply used as cannon fodder against the Whites and once their utility had ended, the Bolsheviks turned their guns on them.

Thus a lesson to be learned is that co-operation between anarchists and Bolsheviks is fraught with danger. As many activists are aware, modern-day supporters of Bolshevism constantly urge everyone to unite “against the common enemy” and not to be “sectarian” (although, somehow this appeal to non-sectarianism does not stop them printing lying accounts of anarchism!). The Makhnovists took them at their word in early 1919 and soon found out that “unity” meant “follow our orders.” When the Makhnovists continued to apply their ideas of working-class self-management, the Bolsheviks turned on them. Similarly, in early 1920 the Bolsheviks outlawed the Makhnovists in order to break their influence in the Ukraine. The Makhnovist contribution to the defeat of Denikin (the common enemy) was ignored. Lastly, in mid-1920 the Makhnovists

the end of 1919 the immediate White threat was removed. Makhno refused to move his troops to the Polish front to meet the imminent invasion and hostilities with the Red Army began again on an even more widespread scale.” [Op. Cit., p. 58]

This, needless to say, is a total distortion of the facts. Firstly, it should be noted that the “imminent” invasion by Poland Rees mentions did not, in fact, occur until “the end of April” (the 26th, to be precise). The break with Makhno occurred as a result of an order issued in early January (the 8th, to be precise). [Michael Palij, Op. Cit., p. 219 and p. 210] Clearly, the excuse of “imminent” invasion was a cover, as recognised by a source Rees himself uses, namely Palij’s work:

“The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon his region .... Uborevich [the author] explained that ‘an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next steps’ ... [He] concluded: ‘The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno’s realisation of this.’” [Palij, Op. Cit., p. 210]

This is confirmed by Rees’ other references. David Footman, whom Rees also uses for evidence against the Makhnovist movement, notes that while it was “true there were military reasons for reinforcing” the Polish frontier (although he also notes the significant fact that the war “was not to break out for another four months”), it was “admitted on the Soviet side that this order was primarily ‘dictated by the necessity’ of liquidating Makhnovshchina as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence, and to split up and integrate his partisans into various Red Army formations.”
He notes that there were “other occasions (notably in Siberia) of the Soviet authorities solving the problem of difficult partisan leaders by sending them off to fight on distant fronts” and, of course, that “Makhno and his staff... were perfectly aware of the underlying Soviet motives.” Footman recounts how the Makhnovist staff sent a “reasoned reply” to the Bolsheviks, that there “was no immediate response” from them and in “mid-January the Central Committee of the Ukrainian Communist Party declared Makhno and his force to be outside the law, and the Red Army attacked.” [The Russian Civil War, pp. 290–1]

In other words, according to the sources Rees himself selects, the Bolsheviks started the conflict in order to eliminate opposition to their power!

Needless to say, the Makhnovists did realise the political motivations behind the order. As Arshinov notes, “[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this.” In addition, “neither the 14th Corps nor any other unit of the Red Army had any ties with the Makhnovist army; least of all were they in a position to give orders to the insurrectionary army.” Nor does Rees mention that the Makhnovists considered the move “physically impossible” as “half the men, the entire staff and the commander himself were in hospital with typhus.” [Op. Cit., p. 163]

Consider what Rees is (distortedly) accounting. The beginning of 1920 was a time of peace. The Civil War looked like it was over. The White Generals had been defeated. Now the Bolsheviks turn on their allies after issuing an ultimatum which they knew would never be obeyed. Under the circumstances, a stupider decision cannot be easily found! Moreover, the very logic of the order was a joke. Would be it wise to leave the Ukraine undefended? Of course not and if Red Army units were to stay to defend the region, why as important as the Makhnovshchina, did not have a base and could not threaten nor endanger them.” [Op. Cit., p. 248] Waiting till after a revolution starts to build such a base is a dangerous tactic, as the experience of the Russian anarchists shows. As the experience of the Moscow anarchists active in the bakers’ union shows, organised working-class support can be an effective deterrent to state repression (the Moscow bakers’ union continued to have anarchists active in it until 1921).

It should be noted that this lesson was recognised by the main anarchists associated with the Makhnovists. In exile, Voina argued for the need to build a “synthesis” anarchist federation (see section J.3.2) while Arshinov and Makhno both associated themselves with the Platform (see section J.3.3).

Another key lesson is the need to combine rural and urban organisation. As Voina argued, the “absence of a vigorous organised workers’ movement which could support that of the peasant insurgents” was a major disadvantage for the Makhno movement. [Voina, Op. Cit., p. 571] If there had been a workers’ movement influenced by anarchist or syndicalist ideas within the Ukrainian towns during the Russian Revolution, the possibilities of constructive work would have been increased immensely. Take the example of when the Makhnovists liberated Aleksandrovsk and organised two workers’ conferences. It was only at the insurgents’ insistence that the unions agreed to send delegates, but for information only. This was undoubtedly due to the fact that Mensheviks had some influence in the unions and Bolshevik influence was increasing. Both parties may have preferred the Makhnovists to the Whites, but neither accepted anarchist ideas of workers’ self-management and so constructive work was limited to the railway workers. In contrast, when Katerinoslav was liberated, the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, Op. Cit., p. 123 and p. 124]
gained influence as well). As Voline noted, one of the advantages the Makhnovist movement had was "the activity of ... libertarian elements in the region ... [and the] rapidity with which the peasant masses and the insurgents, despite unfavourable circumstances, became acquainted with libertarian ideas and sought to apply them." [Op. Cit., p. 570]

Arshinov expands on this issue in a chapter of his history ("The Makhnovshchina and Anarchism"), arguing that many Russian anarchists "suffered from the disease of disorganisation," which led to "impoverished ideas and futile practice." Moreover, most did not join the Makhnovist movement, "remained in their circles and slept through a mass movement of paramount importance." [Op. Cit., p. 244 and p. 242]

Indeed, it was only in May 1919 that the "Nabat" Ukrainian anarchist confederation was organised. This federation worked closely with the Makhnovists and gained influence in the villages, towns and cities within and around the Makhnovist region. In such circumstances, the anarchists were at a disadvantage compared to the Bolsheviks, Mensheviks and Socialist-Revolutionaries, who had been organised far longer and so had more influence within the urban workers.

While many anarchists did participate effectively and organisationally within many areas of Russia and the Ukraine (gaining influence in Moscow and Petrograd, for example), they were much weaker than the Bolsheviks. This meant that the Bolshevik idea of revolution gained influence (by, it should be noted, appropriating anarchist slogans and tactics). Once in power, the Bolsheviks turned against their rivals, using state repression to effectively destroy the anarchist movement in Russia in April 1918 (see section 24 of the appendix "What happened during the Russian Revolution?" for details). This, incidentally, led to many anarchists coming to the Ukraine to escape repression and many joined the Makhnovists. As Arshinov notes, the Bolsheviks "knew perfectly well that ... anarchism in Russia, lacking any contact with a mass movement not the Makhnovists who actually came from the area in question? Why provoke a conflict when it was possible to transfer Red Army units to the Polish front? Simply put, Rees presents a distorted picture of what was happening in the Ukraine at the time simply so he can whitewash the Bolshevik regime and blacken the Makhnovists. As he himself later notes, the Bolshevik-Makhnovist conflict gave the White General Wrangel the space required to restart the Civil War. Thus the Bolshevik decision to attack the Makhnovists helped prolong the Civil War — the very factor Rees blames the degeneration of the Russian Revolution and Bolshevik ideology and practice on!

It is now that Rees presents his evidence of Makhnovist violence against the Bolsheviks (the Red Army reports and entries from the fake diary of Makhno's wife). Arguing that the entries from the fake diary "betray the nature of the movement in this period," he tries to link them with Makhnovist theory. "These actions," he argues, "were consistent with an earlier resolution of the Insurgent Army which declared that it was 'the actions of the Bolshevik regime which cause a real danger to the worker-peasant revolution." [Op. Cit., p. 59]

Firstly, given a true account of the second break between the Makhnovists and Bolsheviks, it would be fair to conclude that the resolution was, in fact, correct! However, such facts are not mentioned by Rees, so the reader is left in ignorance.

Secondly, to correct another of Rees’ causal mistakes, it should be noted that this resolution was not passed by the Insurgent Army. Rather it was passed at the Second Regional Congress of Peasants, Workers and Insurgents held at Hulyai Pole on February 12th, 1919. This congress had 245 delegates, representing 350 districts and was one of four organised by the Makhnovists. Unsurprisingly, these regional congresses are not even mentioned by Rees in his account. This is for obvious reasons — if the Makhnovists could organise congresses of workers, peasants and insurgents to discuss the progress of the revolution, then why
could the Bolsheviks not manage it? Equally, to mention them would also mean mentioning that the Bolsheviks tried to ban one and succeeded in banning another.

Thirdly, the tone of the congress was anti-Bolshevik simply because the Ukraine had had a taste of Bolshevik rule. As Rees himself acknowledges in a roundabout way, the Bolsheviks had managed to alienate the peasantry by their agricultural policies.

Fourthly, the Bolsheviks had engineered the outlawing of the Makhnovists. Thus the actions of the Makhnovists were not “consistent” with the earlier resolution. They were, in fact, “consistent” with self-defence against a repressive state which had attacked them first!

Looking at the congress where the resolution was passed, we find that the list of “real dangers” was, quite simply, sensible and, in fact, in line with Leninist rhetoric. The resolution acknowledged the fact that the Bolshevik party was “demanding a monopoly of the Revolution.” As we discussed in section 14, it was during this period that the Bolsheviks explicitly started to argue that the “dictatorship of the party” was the “dictatorship of the proletariat.” The resolution also stated:

“With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers’ deputies of their freedom and autonomy.” [quoted by Footman, Op. Cit., p. 267]

It also stated:

“the political commissars are watching each step of the local soviets and dealing ruthlessly with those friends...” “Take that faith away,” stressed Alexander Berkman, “deprive the people of power by setting up some authority over them, be it a political party or military organisation, and you have dealt a fatal blow to the revolution. You will have robbed it of its main source of strength, the masses.” [ABC of Anarchism, p. 82]

Secondly, it allows the participation of all in solving the problems of the revolution and of constructing the new society. Without this input, real socialism cannot be created and, at best, some form of oppressive state capitalist regime would be created (as Bolshevism shows). A new society needs the freedom of experimentation, to adapt freely to the problems it faces, to adjust to the needs and hopes of those making it. Without working-class freedom and autonomy, public life becomes impoverished, miserable and rigid as the affairs of all are handed over to a few leaders at the top of a social hierarchy, who cannot possibly understand, let alone solve, the problems affecting society. Freedom allows the working class to take an active part in the revolution. Restricting working-class freedom means the bureaucratisation of the revolution as a few party leaders cannot hope to direct and rule the lives of millions without a strong state apparatus. Simply put, the emancipation of the working class is the task of the working class itself. Either working class people create socialism (and that needs workers’ autonomy and freedom as its basis), or some clique will and the result will not be a socialist society.

As the experience of the Makhnovist movement shows, working-class freedom can be applied during a revolution and when it is faced with the danger of counter-revolution.

Another key lesson from the Makhnovist movement is that of the need for effective anarchist organisation. The Makhnovists did not become anarchist-influenced by chance. The hard effort by the local anarchists in Hulyai Pole before and during 1917 paid off in terms of political influence afterwards. Therefore, anarchists need to take a leading role in the struggles of working people (as we indicated in section I.8.2, this was how the Spanish anarchists...
the tendency to authoritarianism, far from ensuring victory, nearly led to catastrophe. For one thing, it helped alienate many workers who felt cheated by the outcome of the revolution, and support for the regime was... far from even in this core group... [It] may, indeed, have been becoming more alienated as a result of Bolshevik measures depriving it of the means of expression of its growing catalogue of grievances... From being 'necessary' or even functional, the Bolshevik leadership's obsession with externally imposed discipline and authority might even have made the task of victory in the war more difficult and more costly. If the counter-example of Makhno is anything to go by then it certainly did.” [Christopher Read, From Tsar to Soviets, pp. 264–5]

As such, another key lesson to be learned from the Makhno movement is the importance of practising during a revolution the ideas you preach before it. Means and ends are linked, with the means shaping the ends and the ends inspiring the means. As such, if you argue for working-class power and freedom, you cannot dump these aims during a revolution without ensuring that they are never applied after it. As the Makhnovist movement showed, even the most difficult situations need not hinder the application of revolutionary ideas.

The importance of encouraging working-class autonomy also shines through the Makhnovist experience. The problems facing a social revolution are many, as are the problems involved in constructing a new society. The solutions to these problems cannot be found without the active and full participation of the working class. As the Makhnovist congresses and soviets show, free debate and meaningful meetings are the only means, firstly, to ensure that working-class people are “the masters of their own lives,” that “they themselves are making the revolution,” that they “have gained free-

Delegates also complained that the Bolshevik government had not been elected, that it was “imposing upon us its party dictatorship” and “attempting to introduce its Bolshevik monopoly over the soviets.” [quoted by Palić, Op. Cit., p. 154]

The resolution noted that the current situation was “characterised by the seizure of power by the political party of Communists-Bolsheviks who do not balk at anything in order to preserve and consolidate their political power by armed force acting from the centre. The party is conducting a criminal policy in regard to the social revolution and in regard to the labouring masses.” To top it off, point number three read:

“We protest against the reactionary habits of Bolshevik rulers, commissars, and agents of the Cheka, who are shooting workers, peasants, and rebels, inventing all kinds of excuses... The Cheka which were supposed to struggle with counterrevolution... have turned in the Bolsheviks’ hands into an instrument for the suppression of the will of the people. They have grown in some cases into detachments of several hundred armed men with a variety of arms. We demand that all these forces be dispatched to the front.” [quoted by Vladimir N. Brovkin, Behind the Front Lines of the Civil War, pp. 109–10]

We should also point out that Rees selectively quotes the resolution to distort its meaning. The resolution, in fact, “urges the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution.”
We have listed some of the actions of the Bolsheviks that the congress considered as a “real danger.” Considering the truth of these complaints, only someone blinded by Bolshevik ideology would consider it strange that worker and peasant delegates should agree to “watch vigilantly” those actions of the Bolsheviks which were a “real danger” to their revolution!

Lenin (before taking power, of course) had argued that elections and recall to soviets were essential to ensure that the workers control the “workers’ state” and that socialism required the elimination of “special bodies of armed men” by an armed population. To this day, his followers parrot his claims (while, simultaneously, justifying the exact opposite in Lenin’s Russia). Now, is Rees really arguing that the Bolshevik monopoly of power, the creation of a secret police and the clamping down on working people’s freedom were not dangers to the Russian Revolution and should not be watched “vigilantly”? If so, then his conception of revolution includes the strange notion that dictatorship by a party does not threaten a revolution! Then again, neither did the Bolsheviks (indeed, they thought calling worker, peasant and partisan congresses to discuss the development of the revolution as the real danger to it!). If not, then he cannot fault the regional congress resolution for pointing out the obvious. As such, Rees’ misquoting of the resolution backfires on him.

Significantly, Rees fails to mention that during this period (the first half of 1920), the Bolsheviks “shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties, and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” The hypocrisy is clear. While Rees presents information (some of it, we stress, from a fake source) on Makhnovist attacks against the Bolshevik dictatorship, he remains silent on the Bolshevik tactics, violence and state terrorism. Given that the Bolsheviks had attacked the Makhnovists, it seems strange that had come to power on the basis of promoting them. But the Insurgent Army, given its size and equipment, was very effective. Some have even credited it with greater responsibility than the Red Army for the defeat of Denikin. It took enormous efforts by the Bolsheviks, including the arrest or shooting of thousands of people, in order to pacify the region ... even after the Insurgent Army was militarily broken, it took six months to mop up the remnants... Within its area of operations, which consisted of only two to three per cent of the total population of European Russia, the Insurgent Army was undoubtedly highly effective. While one can never know how history might have turned out had things been different, the Insurgent Army gives plenty of grounds for thinking that a people’s revolutionary war of the kind it represented might have been at least as effective on a national scale with nationwide resources at its disposal as Trotsky and the Red Army’s ruthless centralisation. It would not, however, have been compatible with the imposition from above of the Bolshevik leadership’s vision of revolution. When the Insurgent Army drove the enemy out of an area they encouraged the local population to solve their own problems. Where the Red Army took over, the Cheka quickly followed. The Bolsheviks themselves were energetically snuffing out the ideals of 1917.

“Given such considerations it may be, though it cannot be logically proven one way or the other, that the Bolsheviks’ deeply rooted authoritarianism rather than the civil war itself led to the construction of a highly centralised system that aimed at ‘complete control’ over political and many other aspects of social life. It could even be argued, though it is equally unprovable, that
This means that one of the key defences of the Bolshevik Myth, namely that the Bolsheviks had no choice but to act as they did due to "objective factors" or "circumstances" is totally undermined. As such, it points to the obvious conclusion: Bolshevik ideology influenced the practice of the party, as did their position within the "workers' state," and so influenced the outcome of the Revolution. This means that to play down Bolshevik ideology or practice in favour of "objective factors", one fails to understand that the actions and ideas generated during the revolution were not "objectively" determined but were themselves important and sometimes decisive factors in the outcome.

Take, for example, the Bolshevik decision to betray the Makhnovists in 1920. Neither betrayal was "objectively determined" beforehand. However, it did make perfect sense from a perspective which equated the revolution with the "dictatorship of the party." That the first betrayal undoubtedly extended the length of the Civil War by allowing the Whites the space to reorganise under Wrangel also had its impact on Bolshevik theory and practice as well as the "objective factors" it had to face.

As such, the Makhnovists give a counter-example to the common pro-Bolshevik argument that the horrors of the Civil War were responsible for the degeneration of the Bolshevik Party and the revolution. In the words of one historian:

"[The] Insurgent Army ... was organised on a voluntary basis and respected the principle of election of commanders and staff. The regulations governing conduct were drawn up by commissions of soldiers and approved by general meetings of the units concerned. In other words, it embodied the principles of the soldiers' movement of 1917, principles rejected by the Bolsheviks when they set up the Red Army, supposedly because of their harmful effects on fighting efficiency, a characteristic of them discovered by the Bolsheviks only after they

that Rees ignores the "merciless methods" of the Bolsheviks (to use Palij's phrase) and concentrates instead on the acts of self-defence forced onto the Makhnovists. Perhaps this is because it would provide too strong a "flavour" of the Bolshevik regime? [Op. Cit., pp. 212–3 and p. 213]

Rees makes great play of the fact that White forces took advantage of the conflict between the Makhnovists and the Bolsheviks, as would be expected. However, it seems like an act of ideological faith to blame the victims of this conflict for it! In his attempts to demonise the Makhnovists, he argues that "[i]n fact it was Makhno's actions against the Red Army which made 'a brief return of the Whites possible.'" In defence of his claims, Rees quotes from W. Bruce Lincoln's Red Victory. However, looking at Lincoln's work we discover that Lincoln is well aware who is to blame for the return of the Whites. Unsurprisingly, it is not the Makhnovists:

"Once Trotsky's Red Army had crushed Iudenich and Kolchak and driven Deniken's forces back upon their bases in the Crimea and the Kuban, it turned upon Makhno's partisan forces with a vengeance ... [I]n mid-January 1920, after a typhus epidemic had decimated his forces, a re-established Central Committee of the Ukrainian Communist Party declared Makhno an outlaw. Yet the Bolsheviks could not free themselves from Makhno's grasp so easily, and it became one of the supreme ironies of the Russian Civil War that his attacks against the rear of the Red Army made it possible for the resurrected White armies ... to return briefly to the southern Ukraine in 1920." [Red Victory, p. 327]

Ignoring the fact that Rees does not bother to give the correct quote (a problem that re-occurs frequently in his essay), it
can be seen that he does paraphrase the last sentence of Lincoln’s work correctly. Strange, then, that he ignores the rest of his account which clearly indicates that the Bolsheviks “turned upon” the Makhnovists and “declared Makhno an outlaw.” Obviously such trivial facts as the initial Bolshevik attacks against the Makhnovists are unimportant to understanding what actually happened in this period. Informing his readers that it was the Bolsheviks’ betrayal of the Makhnovists which provoked the resistance that “made it possible for ... the White armies ... to return briefly” would confuse them with facts and so it goes unmentioned.

Lincoln, it must be stressed, concurs with Rees’s other main sources (Palij and Footman) on the fact that the Bolsheviks betrayed the Makhnovists! Clearly, Rees has rewritten history and distorted all of his main references on the Makhnovist movement. After reading the same fact in three different sources, you would think that the Bolshevik betrayal of the Makhnovists which provoked their resistance against them would warrant some mention, but no! In true Stalinist fashion, Rees managed to turn a Bolshevik betrayal of the Makhnovists into a stick with which to beat them with! Truly amazing.

Simply put, if the Bolsheviks had not wanted to impose their rule over the Ukraine, then the conflict with the Makhnovists need not have taken place and Wrangel would not have been in a position to invade the Ukraine. Why did the Bolsheviks act in this way? There was no “objective factor” for this action and so we must turn to Bolshevik ideology.

As we proved in section 14, Bolshevik ideology by this time identified Bolshevik party dictatorship as the only expression of “the dictatorship of the proletariat.” Does Rees really believe that such perspectives had no impact on how the Bolsheviks acted during the Revolution? The betrayal of the Makhnovists can only be understood in terms of the “subjective factor” Rees seeks to ignore. If you think, as the Bolsheviks clearly did, that the dictatorship of the proletariat equalled the dictatorship of the party (and vice versa), then the Bolsheviks certainly believed that the Makhnovists were nothing but a counter-revolutionary element.

A far more compelling analysis would recognise that the Makhnovists were not a perfect social movement but that the deviations of its practice from its theory can be explained by the objective factors it faced. Equally, the example of the Makhnovists shows the weakness of Rees’ main argument, namely that the objective factors that Bolshevism faced can solely explain its authoritarian politics. That the Makhnovists, facing the same objective factors, did not act in the same manner as the Bolsheviks shows that Bolshevik ideology played a key role in the failure of the revolution. This explains Rees’ clumsy attempts to rewrite the history and theory of the Makhnovshchina.

16 What lessons can be learned from the Makhnovists?

The Makhnovist movement was one of the most important events of the Russian Revolution. It was a mass movement of working people who tried and succeeded to implement libertarian ideas in extremely difficult circumstances.

As such, the most important lesson gained from the experience of the Makhno movement is simply that “objective factors” cannot and do not explain the degeneration of the Russian Revolution or Bolshevik authoritarianism. Here was a movement which faced the same terrible circumstances as the Bolsheviks faced (White counter-revolution, economic disruption, and so on) and yet did not act in the same manner as the Bolsheviks. Where the Bolsheviks completely abolished army democracy, the Makhnovists extensively applied it. Where the Bolsheviks implemented party dictatorship over the soviets, the Makhnovists encouraged and practised soviet self-management. While the Bolsheviks eliminated freedom of speech, press, assembly, the Makhnovists defended and implemented them. The list is endless (see section 14).
the movement are a joke. While justifying the far more extreme deviations of Bolshevik theory and practice in terms of “objective factors,” he refuses to consider this possibility for the Makhnovists. The hypocrisy is clear, if not unexpected.

One last point. Taking Rees’ “class analysis” of the Makhnovists seriously, the logical conclusion of his argument is clear. For Rees, a movement which compromises slightly with its principles in the face of extreme “objective factors” is “petty bourgeois.” However, a movement which compromises totally (indeed introduces and justifies the exact opposite of its original claims) in face of the same “objective factors” is “proletarian.” As such, his pathetic attempt at “class analysis” of the Makhnovists simply shows up the dictatorial nature of the Bolsheviks. If trying to live up to libertarian/democratic ideals but not totally succeeding signifies being “petty-bourgeois” while dismissing those ideals totally in favour of top-down, autocratic hierarchies is “proletarian” then sane people would happily be labelled “petty-bourgeois”!

And Rees states that “[n]either Makhno’s social programme nor his political regime could provide an alternative to the Bolsheviks!” [Op. Cit., p. 60] Little wonder he distorts that social programme and political regime — an honest account of both would see that Rees is wrong. The Makhnovist movement clearly shows that not only did Bolshevik policies have a decisive impact on the development of the Russian Revolution, there was a clear alternative to Bolshevik authoritarianism and party dictatorship.

In summary, Rees’ attack on the Makhnovists fails. It can be faulted on both factual and logical grounds. His article is so riddled with errors, selective quoting and downright lies that it is factually unreliable. Similarly, his attempt to attack the Makhnovist political theory and practice is equally factually incorrect. His attempt to explain the deviations of Makhnovist practice from its theory in terms of the “social base” is simply an insult to the intelligence of the reader and an abuse of class analysis.
Bolsheviks in Tavriia on June 6th.” Indeed, it was after a “series of battles” that Wrangel “penetrated north, forcing a general Bolshevik retreat.” Now, “as Wrangel advanced deeper into the Left Bank, Makhno retreated north to the Kharkiv region, leaving behind small partisan units in the villages and towns to carry on covert destruction of the Bolshevik administrative apparatus and supply bases.” [Op. Cit., p. 219] Again, Rees’ account has little bearing to reality or the source material he uses.

Rees continues to re-write history by arguing that “Makhno did not fight with the Reds again until October 1920 when Wrangel advanced on Makhno’s base.” [Op. Cit., p. 59] In fact, it was the Makhnovists who contacted the Bolsheviks in July and August in 1920 with a view to suspending hostilities and co-operating in the fight against Wrangel. This decision was made at a mass assembly of insurgents. Sadly, the Bolsheviks made no response. Only in September, after Wrangel had occupied many towns, did the Bolsheviks enter into negotiations. [Arshinov, Op. Cit., pp. 176–7] This is confirmed by Footman, who states that it is “agreed that the initiative for joint action against Wrangel came from the Makhnovists” [Op. Cit., p. 294], as well as by Palij, who notes that “Makhno was compelled to seek an understanding with the Bolsheviks” but “no reply was received.” It was “Wrangel’s success [which] caused the Bolshevik leaders to reconsider Makhno’s earlier proposal.” [Op. Cit., pp. 222–3] Obviously indicating that the Makhnovists placed the struggle against the White counter-revolution above their own politics would place the Bolsheviks in a bad light, and so Rees fails to give the details behind the agreement of joint action against Wrangel.

As regards this third and final break, Rees states that it was (“unsurprisingly”) a “treaty of convenience on the part of both sides and as soon as Wrangel was defeated at the end of the year the Red Army fought Makhno until he have up the struggle.” [Op. Cit., p. 59] Which, as far as it goes, is true. Makhno, however, “assumed [that] the forthcoming conflict with the Bolsheviks could be limited to the realm of ideas” and that they “would not attack his movement where to do work they neither liked nor understood” and the “insurgents had their own homes to defend.” [Malet, Op. Cit., p. 130] Thus, while Rees quotes Footman’s opinion that “Makhno’s later campaigns [were] among the most bloody and vindictive,” these facts suggest that we cannot “safely assume that these [security] services were responsible for frequent injustices and atrocities.” Clearly, if the Makhnovists were releasing Red Army prisoners (and many of whom were joining Makhno), the picture of an atrocity inflicting army can hardly be a valid picture.

And it should be stressed that Bolshevik terror and violence against the Makhnovists is strangely absent from Rees’s account.

Rees presents just one concrete example of Makhnovist “Cheka-like” violence, namely, the execution of a Bolshevik cell in December, 1919. It should be noted that the Bolsheviks had been explicitly arguing for Party dictatorship for some time by then. The reason why the Bolsheviks had been “denied an open trial” was because they had already been shot. Unfortunately, Makhno gave two contradictory reasons why the Bolsheviks had been killed. This led to the Makhnovist Revolutionary Military Soviet setting up a commission of three to investigate the issue. Perhaps unsurprisingly, the commission exonerated Makhno although Voline, out of the members, seemed to have been genuinely embarrassed by the affair. [Malet, Op. Cit., pp. 51–2] Needless to say, Rees fails to comment on the Bolshevik summary killing of Makhnovist staff in June 1919 or, indeed, any other summary executions conducted by the Bolsheviks against the Makhnovists (including the shooting of prisoners).

Given the summary justice handed out by the Bolshevik Cheka, it seems strange that Rees dismisses the Makhnovist movement on assumptions and one event, yet he does. Obviously, the large-scale and continuous Bolshevik killings of political enemies (including Makhnovists) is irrelevant compared to this one event.

All in all, Rees’ attempts to blame the few deviations the Makhnovists had from anarchist theory on the “social base” of
party participation within their soviets and congresses, the Makhnovists opposed the domination of soviets and congresses by political parties, a radically different concept. Like the Kronstadt rebels, they argued for all power to the soviets and not to parties.

Lastly, Rees attacks the Makhnovists for having two security forces, the Cheka-like razvedka and the Punitive Commission. How this is an expression of the Makhnovist “social base” is hard to explain, as both the Bolsheviks and Whites also had their security forces and counter-intelligence agencies.

While Rees quotes Footman’s statement that “we can safely assume […] these services were responsible for frequent injustices and atrocities,” he fails to mention that Footman does not provide any examples (hence his comment that we can “assume” they occurred!). Footman himself notes that “[o]f the Makhnovite security services … we know very little.” [David Footman, Op. Cit., p. 288]

Rees himself only lists one, namely the summary shooting of a Bolshevik cell discovered in the Army. Given the bloody record of the Bolshevik Cheka (which, again, Rees defends as necessary to defend against the Whites!), this suggests that the crimes of the Makhnovist counter-intelligence pale in comparison.

Rees also quotes the historian Chamberlin that “Makhno’s private Cheka … quickly disposed of anyone who was suspected of plotting against his life.” [Op. Cit., 60] Strangely enough, Rees fails to mention the Bolshevik attempts to assassinate Makhno, including the one in the latter part of May 1919 when, it should be noted, the Makhnovists and Bolsheviks were meant to be in alliance. Nor does he mention that the Cheka “would hunt out and hang all active Makhnovites.” [David Footman, Civil War in Russia, p. 271 and p. 293]

As regards the last conflict with the Red Army, it should be noted that while “generalised accusations of Makhnovist atrocities are common” the facts are it was “the Makhnovists who stood to gain by liberating prisoners, the Bolsheviks by shooting them.” This was because “the Red Army soldiers had been conscripted from else-immediately.” [Palij, Op. Cit., p. 231] He was wrong. Instead the Bolsheviks attacked the Makhnovists without warning and, unlike the other breaks, without pretext (although leaflets handed out to the Red Army stated that Makhno had “violate[ed] the agreement”! [Palij, Op. Cit., p. 236]).

It would be a good idea to reproduce the agreement which the Bolsheviks ripped up. There were two parts, a military and a political one. The military one is pretty straightforward (although the clause on the Makhnovists refusing to accept Red Army detachments or deserters suggests that the Makhnovists’ democratic army was seen by many Red Army soldiers as a better alternative to Trotsky’s autocratic structure). The political agreement was as follows:

“1. Immediate release, and an end to the persecution of all Makhno men and anarchists in the territories of the Soviet Republics, except those who carry on armed resistance against Soviet authorities.

“2. Makhno men and anarchists were to have complete freedom of expression of their ideas and principles, by speech and the press, provided that nothing was expressed that tended to a violent overthrow of Soviet government, and on condition that military censorship be respected...

“3. Makhno men and anarchists were to enjoy full rights of participation in elections to the soviets, including the right to be elected, and free participation in the organisation of the forthcoming Fifth All-Ukrainian Congress of Soviets…” [cited by Palij, Op. Cit., p. 224]

Needless to say, the Bolsheviks delayed the publication of the political agreement several until several days after the military one was published — “thus blurring its real meaning.” [Palij, Op. Cit.,

5330 5311
Clearly, as it stands, the agreement just gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution! Little wonder the Bolsheviks ignored it — they also ignored their own constitution. However, it is the fourth point of the political agreement which gives the best insight into the nature of Bolshevism. This last point was never ratified by the Bolsheviks as it was “absolutely unacceptable to the dictatorship of the proletariat.” [quoted by Palij, *Ibid.*] This clause was:

“One of the basic principles of the Makhno movement being the struggle for the self-administration of the toilers, the Partisan Army brings up a fourth point: in the region of the Makhno movement, the worker and peasant population is to organise and maintain its own free institutions for economic and political self-administration; this region is subsequently federated with Soviet republics by means of agreements freely negotiated with the appropriate Soviet governmental organ.” [quoted by Paliy, *Op. Cit.*, p. 224]

Clearly, this idea of worker and peasant self-management, like soviet democracy, could not be reconciled with the Bolshevik support for party dictatorship as the expression of “the dictatorship of the proletariat” which had become a Bolshevik ideological truism by that time. Little wonder the Bolsheviks failed to ratify the fourth clause and violated the other agreements. Simply put, a libertarian alternative to Bolshevism would give the Russian and Ukrainian working masses hope of freedom and make them harder to control.

As such, the Makhnovists supported the right of working-class self-determination, as expressed by one delegate to Hulyai Pole conference in February 1919:

“No party has a right to usurp governmental power into its hands ... We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers’ wish.” [quoted by Paliy, *Op. Cit.*, p. 154]

Thus, Rees fails to present an accurate account of Makhnovist theory and practice as regards “free soviets.” Rather than oppose

Communists [Malet, *Op. Cit.*, p. 111, p. 124] Clearly, members of political parties were elected to both the congresses and the Revolutionary Military Soviet. As such, the idea that free soviets excluded members of political parties is false — they simply were not dominated by them (for example, having executives made up of members of a single party or delegating their power to a government as per the national soviet in Russia). This could, of course, change. In the words of the Makhnovist reply to Bolshevik attempts to ban one of their congresses:

“The Revolutionary Military Council ... holds itself above the pressure and influence of all parties and only recognises the people who elected it. Its duty is to accomplish what the people have instructed it to do, and to create no obstacles to any left socialist party in the propagation of ideas. Consequently, if one day the Bolshevik idea succeeds among the workers, the Revolutionary Military Council ... will necessarily be replaced by another organisation, ‘more revolutionary’ and more Bolshevik.” [quoted by Arshinov, *Op. Cit.*, pp. 103–4]
working-class organs into talking-shops. [Paul Avrich, *The Russian Anarchists*, p. 190] This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounts that in early 1920 a chemical factory “put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote).” [quoted by Israel Getzler, *Martov*, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be “delegates” of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

Given that the people elected to the free soviets would be delegates and not representatives, this would mean that they would reflect the wishes of their workmates rather than the decisions of the party’s central committee. As such, if a worker who was a member of a political party could convince their workmates of their ideas, the delegate would reflect the decisions of the mass assembly. As such, the input of political parties would not be undermined in any way (although their domination would be!).

As such, the Makhnovist ideas on soviets did not, in fact, mean that workers and peasants could not elect or send delegates who were members of political parties. They had no problems as such with delegates who happened to be working-class party members. They did have problems with delegates representing only political parties, delegates who were not workers and soviets being mere ciphers covering party rule.

That this was the case can be seen from a few facts. Firstly, the February 1919 congress resolution “was written by the anarchists, left Socialist Revolutionaries, and the chairman.” [Palij, *Op. Cit.*, p. 155] Similarly, the Makhnovist Revolutionary Military Soviet created at the Aleksandrovsk congress in late 1919 had three Communists elected to it. There were 18 delegates from workers at that congress, six were Mensheviks and the remaining 12 included on the chaos caused by the civil war. Yet here are the Bolsheviks prolonging this very Civil War by turning (yet again!) on their allies. After the defeat of the Whites, the Bolsheviks preferred to attack the Makhnovists rather than allow them the freedom they had been fighting for. Resources which could have been used to aid the economic rebuilding of Russia and the Ukraine were used to attack their former allies. The talents and energy of the Makhnovists were either killed or wasted in a pointless conflict. Should we be surprised? After all, the Bolsheviks had preferred to compound their foes during the Civil War (and, indirectly, aid the very Whites they were fighting) by betraying their Makhnovist allies on two previous occasions (once, because the Makhnovists had dared call a conference of working people to discuss the civil war being fought in their name). Clearly, Bolshevik politics and ideology played a key role in all these decisions. They were not driven by terrible objective circumstances (indeed, they made them worse).

Rees obviously distorted the truth about the first two agreements between the Makhnovists and the Bolsheviks. He portrayed the Makhnovists as the guilty party, “breaking” with the Bolsheviks when in fact it was (in both cases) the Bolsheviks who broke with and betrayed the Makhnovists. That explains why he fails to present any information on why the first break happened and why he distorts the events of the second. It cannot be said that he was unaware of these facts — they are in the very books he himself references! As such, we have a clear and intended desire to deceive the reader. As regards the third agreement, while he makes no pretence that the Makhnovists were the guilty party however, he implies that the Bolsheviks had to act as they did before the Makhnovists turned on them. Little wonder, then, that he does not provide the details of the agreement made between the Bolsheviks and Makhnovists — to do so would have been to expose the authoritarianism of the Bolsheviks. Simply put, Rees’ distortions of the source material he uses comes as no surprise. It undermines his
basic argument and so cannot be used in its original form. Hence the cherry-picking of quotations to support his case.

After distorting Makhnovist relations with the Bolsheviks, Rees moves on to distorting the socio-political ideas and practice of the Makhnovists. As would be expected from his hatchet-job on the military history of the movement, his account of its social ideas leaves much to be desired. However, both aspects of his critique have much in common. His account of its theoretical ideas and its attempts to apply them again abuse the source material in disgraceful ways.

For example, Rees states that under the Makhnovists "[p]ap ers could be published, but the Bolshevik and Left Socialist Revolutionary press were not allowed to call for revolution" and references Michael Palij’s book. [Op. Cit., p. 60] Looking at the page in question, we discover a somewhat different account. According to Palij’s work, what the Makhnovists actually “prohibited” was that these parties should “propagate armed uprisings against the Makhnovist movement.” A clear rewriting of the source material and an indication of how low Leninists will sink. Significantly, Palij also notes that this “freedom of speech, press, assembly and association” was implemented “[i]n contrast to the Bolshevik regime” and its policy of crushing such liberties. [Op. Cit., pp. 152–3] Ironically, the military-political agreement of late 1920 between the Reds and Makhnovists included a similar clause, banning expression that “tended to a violent overthrow of the Soviet government.” [quoted by Palij, OP. Cit., p. 224] Which means, to use Rees’ distorted terminology, that the Bolsheviks banned calls for revolution!

However, this distortion of the source material does give us an insight into the mentality of Leninism. After all, according to Palij, when the Makhnovists entered a city or town they “immediately announced to the population that the army did not intend to exercise political authority.” The workers and peasants were to set up soviets “that would carry out the will and orders of their constituents” as well as “organis[e] their own self-defence force against counter-
Take for example his first “paper” decree, namely the election of commanders. He states that “in practice the most senior commanders were appointed by Makhno.” In other words, the Makhnovists applied this principle extensively but not completely. The Bolsheviks abolished it by decree (and did not blame it on “exceptional circumstances” nor consider it as a “retreat”, as Rees asserts). Now, if Rees’ “class analysis” of the limitations of the Makhnovists were true, does this mean that an army of a regime with a proletarian base (as he considers the Bolshevik regime) cannot have elected commanders? This is the logical conclusion of his argument.

Equally, his attempt to “give a flavour of the movement” by quoting one of the resolutions adopted by a mass meeting of partisans also backfires (namely, “to obey the orders of the commanders if the commanders are sober enough to give them”). Firstly, it should be noted that this was, originally, from a Red Army source. Secondly, drunkenness was a big problem during the civil war (as in any war). It was one of the easiest ways of forgetting reality at a time when life was often unpleasant and sometimes short. As such, the “objective factor” of civil war explains this resolution rather than the social base of the movement! Thirdly, Rees himself quotes a Central Committee member’s comment to the Eighth Party Congress that there were so many “horrifying facts about drunkenness, debauchery, corruption, robbery and irresponsible behaviour of many party members that one’s hair stands on end.” [Op. Cit., p. 66] The Eighth Congress was in 1919. Does this comment give a “flavour” of the Bolshevik regime under Lenin? Obviously not, as Rees defends it and blames this list of horrors on the objective factors facing the Bolsheviks. Why does the drunkenness of the Makhnovists come from their “social base” while that of the Bolsheviks from “objective factors”? Simply put, Rees is insulting the intelligence of his readers.

The Makhnovist resolution was passed by a mass assembly of partisans, suggesting a fundamentally democratic organisation. Rees argues that the civil war resulted in the Bolshevik vices revolution and banditry.” These political changes were matched in the economic sphere as well, as the “holdings of the landlords, the monasteries and the state, including all livestocks and goods, were to be transferred to the peasants” and “all factories, plants, mines, and other means of production were to become property of all the workers under control of their professional unions.” [Op. Cit., p. 151]

In such an environment, a call for “revolution” (or, more correctly, “armed uprisings against the Makhnov movement”) could only mean a Bolshevik coup to install a Bolshevik party dictatorship. As the Makhnovists were clearly defending working-class and peasant self-government, then a Bolshevik call for “armed uprisings” against them also meant the end of such free soviets and their replacement with party dictatorship. Little wonder Rees distorts his source! Arshinov makes the situation clear:

“The only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist Revolutionaries and other statists was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people. In Aleksandrovsk and Ekaterinoslav, right after the occupation of these cities by the Makhnovists, the Bolsheviks hastened to organise Revkoms (Revolutionary Committees) seeking to organise their political power and govern the population ... Makhno advised them to go and take up some honest trade instead of seeking to impose their will on the workers ... In this context the Makhnovists’ attitude was completely justified and consistent. To protect the full freedom of speech, press, and organisation, they had to take measures against formations which sought to stifle this freedom, to suppress other organisations, and to impose their will and dictatorial authority on the workers.” [Op. Cit., p. 154]
Little wonder Rees distorts the issues and transforms a policy to defend the real revolution into one which banned a “call for revolution.” We should be grateful that he distorted the Makhnovist message for it allows us to indicate the dictatorial nature of the regime and politics Rees is defending.

All of which disproves Rees’ assertion that “the movement never had any real support from the working class. Neither was it particularly interested in developing a programme which would appeal to the workers.” [Op. Cit., p. 59] Now, Rees had obviously read Palij’s summary of Makhnovist ideas. Is he claiming that workers’ self-management and the socialisation of the means of production do not “appeal” to workers? After all, most Leninists pay lip-service to these ideas. Is Rees arguing that the Bolshevik policies of the time (namely one-man management and the militarisation of labour) “appealed” to the workers more than workers’ self-management of production? Equally, the Makhnovists argued that the workers should form their own free soviets which would “carry out the will and orders of their constituents.” [Palij, Op. Cit., p. 151] Is Rees really arguing that the Bolshevik policy of party dictatorship “appealed” to the workers more than soviet democracy? If so, then heaven help us if the SWP ever get into power!

Luckily, as Jonathan Aves’ book Workers Against Lenin proves, this was not the case. Working-class resistance to Bolshevik policies was extremely widespread and was expressed by strikes. It should be noted that the wave of strikes all across Russia which preceded the Kronstadt revolt also raised the demand for soviet democracy. The call for “free soviets” was raised by the Kronstadt revolt itself and during the “mini-Kronstadt” in Katerinoslav in June 1921 where the demands of the workers “were very similar in content with the resolutions of the Kronstadt rebels” and telegraph operators sent “messages throughout the Soviet Republic calling for ‘free soviets.’” [Jonathan Aves, Workers Against Lenin, p. 172 and p. 173]

Bolsheviks in June 1919 and completely destroyed by the Whites a few days later. In such circumstances, can it be surprising that only a minority of peasants got involved in them? Rather than praise the Makhnovists for positive social experimentation in difficult circumstances, Rees shows his ignorance of the objective conditions facing the revolution. Perhaps if the peasants did not have to worry about the Bolsheviks as well as the Whites, they would have had more members?

All in all, Rees account of Makhnovist ideas on the peasant economy are, to put it mildly, incorrect. They paint a radically different picture of the reality of both Makhnovist ideas and practice as regards the peasantry. Ironically, the soundness of Makhnovist policy in this area can be seen from the fact that the Bolsheviks changed their land policy to bring it into line with it. Not, of course, that you would know that from Rees’ account. Nor would you know what the facts of the Bolsheviks’ land policy were either. Indeed, Rees uses Michael Palij’s book to create a picture of events which is the exact opposite of that contained in it! Very impressive!

Intent on driving the final nail into the coffin, he tries to apply “class analysis” to the Makhnovists. Rees actually states that “given this social base [i.e the Makhnovists’ peasant base] … much of Makhno’s libertarianism amounted to little more than paper decrees.” [Op. Cit., p. 60]

Ironically enough, the list of “paper decrees” Rees presents (when not false or distorted) are also failings associated with the Bolsheviks (and taken to even more extreme measures by the Bolsheviks)! As such, his lambasting of the Makhnovists seems deeply hypocritical. Moreover, his attempt to ground the few deviations that exist between Makhnovist practice and Makhnovist theory in the peasant base of the army seems an abuse of class analysis. After all, these deviations were also shared by the Bolsheviks. As such, how can Rees justify the Bolshevik deviations from socialist theory in terms of “objective factors” yet blame Makhnovist ones on their “social base”? Do “objective factors” only afflict Leninists?
As well as ignoring the wealth of information on Makhnovist land policy, Rees turns to their attempts to form free agrarian communes. He argues that Makhno’s attempts “to go beyond the traditional peasant economy were doomed” and quotes Makhno’s memoirs which state “the mass of the people did not go over” to his peasant communes, which only involved a few hundred families. [Op. Cit., p. 59]

Looking at Makhno’s memoirs a somewhat different picture appears. Firstly, Makhno states that there were “four such agricultural communes within a three- or four-mile radius of Hulyai-Pole,” but in the whole district “there were many” in 1918 (the period being discussed in his memoirs). Makhno recounts how each “commune consisted of ten families of peasants and workers, totalling a hundred, two hundred or three hundred members” and the “management of each commune was conducted by a general meeting of all its members.” He does state that “the mass of people did not go over to it” but, significantly, he argues that this was because of “the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new ‘revolutionary’ and counter-revolutionary authorities. For this reason the toiling population of the district limited their real revolutionary activity to supporting in every way those bold spirits among them who had settled on the old estates [of the landlords] and organised their personal and economic life on free communal lines.” [quoted by Paul Avrich, The Anarchists in the Russian Revolution, pp. 130–2]

Of course, failing to mention the time period Makhno was recounting does distort the success of the communes. The Bolsheviks were evacuating the Ukraine as part of their treaty with German and Austrian Imperialism when the communes were being set up. This left them in a dangerous position, needless to say. By July, 1918, the area was occupied by Austrian troops and it was early 1919 before the situation was stable enough to allow their reintroduction. One commune was named “Rosa Luxemburg” (after the Marxist revolutionary martyr) and was mostly destroyed by the

Clearly, the Makhnovists did create a “programme that would appeal to the workers.” However, it is true that the Makhnovists did fail win over more than a minority of workers. This may have been due to the fact that the Makhnovists only freed two cities, both for short periods of time. As Paul Avrich notes, “he found little time to implement his economic programs.” [Anarchist Portraits, p. 121] Given how Rees bends over backwards to justify Bolshevik policies in terms of “objective factors,” it is significant that in his discussion of the Makhnovists such “objective factors” as time fail to get a mention!

Thus Rees’s attempt to paint the Makhnovists as anti-working class fails. While this is the core of his dismissal of them as a possible “libertarian alternative to the Bolsheviks,” the facts do not support his assertions. He gives the example of Makhno’s advice to railway workers in Aleksandrovsk “who had not been paid for many weeks” that they should “simply charge passengers a fair price and so generate their own wages.” He states that this “advice aimed at reproducing the petit-bourgeois patterns of the countryside.” [Op. Cit., p. 59] Two points can be raised to this argument.

Firstly, we should highlight the Bolshevik (and so, presumably, “proletarian”) patterns imposed on the railway workers. Trotsky simply “placed the railwaymen and the personnel of the repair workshops under martial law” and “summarily ousted” the leaders of the railwaymen’s trade union when they objected.” The Central Administrative Body of Railways (Tsektran) he created was run by him “along strictly military and bureaucratic lines.” In other words, he applied his ideas on the “militarisation of labour” in full. [M. Brinton, The Bolsheviks and Workers’ Control, p. 67] Compared to the Bolshevik pattern, only an ideologue could suggest that Makhno’s advice (and it was advice, not a decree imposed from above, as was Trotsky’s) can be considered worse. Indeed, by being based on workers’ self-management it was infinitely more socialist than the militarised Bolshevik state capitalist system.
Secondly, Rees fails to understand the nature of anarchism. Anarchism argues that it is up to working class people to organise their own activities. This meant that, ultimately, it was up to the railway workers themselves (in association with other workers) to organise their own work and industry. Rather than being imposed by a few leaders, real socialism can only come from below, built by working people, through their own efforts and own class organisations. Anarchists can suggest ideas and solutions, but ultimately its up to workers (and peasants) to organise their own affairs. Thus, rather than being a source of condemnation, Makhno’s comments should be considered as praiseworthy as they were made in a spirit of equality and were based on encouraging workers’ self-management.

Ultimately, the best reply to Rees is simply the fact that after holding a “general conference of the workers of the city” at which it was “proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations” based on “the principles of self-management,” the railroad workers took the first step in this direction by “form[ing] a committee charged with organising the railway network of the region.” [Arshinov, Op. Cit., p. 149]

Even more amazing (if that is possible) is Rees’ account of the revolution in the countryside. Rees argues that the “real basis of Makhno’s support was not his anarchism, but his opposition to grain requisitioning and his determination not to disturb the peasant economy” [Op. Cit., p. 59] and quotes Palij as follows:

“Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts with the villages and to maintain a sort of united front of the entire peasantry.”

However, here is the actual context of the (corrected) quote:

It does seem ironic that Rees attacks the Makhnovists for not pursuing Bolshevik peasant policies. Considering the absolute failure of those policies, the fact that Makhno did not follow them is hardly cause for condemnation! Indeed, given the numerous anti-Bolshevik uprisings and large-scale state repression they provoked, attacking the Makhnovists for not pursuing such insane policies is equally insane. After all, who, in the middle of a Civil War, makes matters worse for themselves by creating more enemies? Only the insane — or the Bolsheviks!

That Makhnovist land policy was correct and the Bolshevik one wrong can be seen from the fact that the latter changed their policies and brought them into line with the Makhnovist ones. As Palij notes, the Bolsheviks “modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the former landlords’ land, state, and church lands among the peasants.” This, of course, was a vindication of Makhnovist policy (which dated from 1917!). Makhno “initiated the peasants’ movement, confiscating and distributing landlords’ land and goods” (and, unlike the Bolsheviks, “encouraging the workers to take over factories and workshops”). As regards the Bolsheviks attempts to break up what they considered the “age-old class structure” of the villages with the “Committees of the Poor,” it was, as noted above, a complete disaster and counter-productive. [Op. Cit., p. 213 and p. 250] All in all, the Makhnovist policies were clearly the most successful as regards the peasantry. They broke up the class system in the countryside by expropriating the ruling class and did not create new conflicts by artificially imposing themselves onto the villages.

Lastly, we must also wonder just how sensible it is to “disturb” the economy that produces the food you eat. Given that Rees, in part, blames Bolshevik tyranny on the disruption of the economy, it seems incredible that he faults Makhno for not adding to the chaos by failing to “disrupt the peasant economy”? However, why let logic get in the way of a good rant!
opposed, but also informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans ... Consequently, Makhno’s ‘heart hardened and he sometimes ordered executions where some generosity would have bestowed more credit upon him and his movement. That the Bolsheviks preceded him with the bad example was no excuse. For he claimed to be fighting for a better cause.’ Although the committees in time gave the Bolsheviks a hold on every village, their abuse of power disorganised and slowed down agricultural life ... This policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region.” [M. Palij, Op. Cit., pp. 213–4]

Amazing what a “...” can hide, is it not! Rees turns an account which clearly shows the Bolshevik policy was based on informers, secret police and the murder of rebels as well as being a total disaster into a victory. Moreover, he also transforms it so that the victims are portrayed as the villains. Words cannot do this rewriting of history justice. Yes, indeed, an organisation of informers to the secret police in every village can aid the “ascendancy” of a one-party dictatorship (aided, of course, by overwhelming military force), but it cannot aid the ascendancy of freedom, equality and socialism.

Given the actual record of the Bolsheviks’ attempts to break up what they considered the “age-old class structure” of the villages with the “Committees of the Poor,” it is clear why Rees distorts his source.

“Peasants’ economic conditions in the region of the Makhno movement were greatly improved at the expense of the estates of the landlords, the church, monasteries, and the richest peasants, but Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts within the villages and to maintain a sort of united front of the entire peasantry.” [M. Palij, Op. Cit., p. 214]

Clearly, Rees has distorted the source material, conveniently missing out the information that Makhno had most definitely “disturbed” the peasant economy at the expense of the rich! And, we are sure that Rees would have a fit if it were suggested that the real basis of Bolshevik support was not their socialism, but their opposition to the war and the Whites!

Amazingly, Rees also somehow manages to forget to mention the peasant revolution which had started in 1917 in his attack against Makhno:

“Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported the expropriation of large estates ... On the eve of open conflict [in late 1917], Makhno assembled all the landowners and rich peasants (kulaks) of the area and took from them all official documents relating to their land, livestock, and equipment. Subsequently an inventory of this property was taken and reported to the people at the session of the local soviet, and then at the regional meeting. It was decided to allow the landlords to share the land, livestock, and tools equally with the peasants.” [Palij, Op. Cit., p. 71]

Obviously, Rees considers the expropriating of the landlords and kulaks as an act which “did not disturb the age-old class structure of the countryside”!
Let us not forget that the official Makhnovist position was that the "holdings of the landlords, the monasteries, and the state, including all livestock and goods, were to be transferred to the peasants." [Palij, Op. Cit., p. 151] At the second congress of workers, peasants and insurgents held in February, 1919, it was resolved that "all land be transferred to the hands of toiling peasants ... according to the norm of equal distribution." [quoted by Palij, Op. Cit., p. 155]

This meant that every peasant family had as much land as they could cultivate without the use of hired labour. The Makhnovists argued with regards to the kulaks:

"We are sure that ... the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak's surplus land for general use, then naturally drawing the kulak elements into the social organisation." [cited by Michael Malet, Op. Cit., pp. 118–9]

Thus, just to stress the point, the Makhnovists did "disturb" the "age-old class structure of the countryside."

Clearly, Rees is simply taking nonsense. When he states that Makhnovist land policies "did not disturb the age-old class structure of the countryside," he is simply showing his utter and total disregard for the truth. As the Bolsheviks themselves found out, no mass movement could possibly exist among the peasants without having a positive and levelling land policy. The Makhnovists were no exception.

Rees then states that "[i]n 1919 the local Bolshevik authorities made mistakes which played into Makhno's hands." Unsurprisingly enough, he argues that this was because they "tried to carry through the socialisation of the land, rather than handing it over to the peasants." [Op. Cit., p. 60] In fact, the Bolsheviks did not try to implement the "socialisation" of land. Rather, they tried to nationalise

the land and place it under state control — a radically different concept. Indeed, it was the Makhnovists who argued that the "land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised." [contained in Arshinov, Op. Cit., p. 273] The Bolsheviks, in contrast, initially "decreed that all lands formerly belonging to the landlords should be expropriated and transformed into state farms." [Palij, Op. Cit., p. 156] The peasants quite rightly thought that this just replaced one set of landlords with another, stealing the land which rightfully belonged to them.

After distorting the source material by selective quoting, Rees does it again when he argues that "by the spring of 1920 they [the Bolsheviks] had reversed the policy towards the peasants and instituted Committees of Poor Peasants, these 'hurt Makhno ... his heart hardened and he sometimes ordered executions.' This policy helped the Bolshevik ascendancy." [Op. Cit., p. 60]

Rees quotes Palij as evidence. To refute his argument we need simply quote the same pages:

‘Although they [the Bolsheviks] modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the former landlords’, state and church lands among the peasants, they did not succeed in placating them because of the requisitions, which the peasants considered outright robbery ... Subsequently the Bolsheviks decided to introduce class warfare into the villages. A decree was issued on May 19, 1920, establishing 'Committees of the Poor' ... Authority in the villages was delegated to the committees, which assisted the Bolsheviks in seizing the surplus grain ... The establishment of Committees of the Poor was painful to Makhno because they became not only part of the Bolshevik administrative apparatus the peasants
The “anarcho”-capitalist argument hinges on using the dictionary definition of “anarchism” and/or “anarchy” — they try to define anarchism as being “opposition to government,” and nothing else. However, dictionaries are hardly politically sophisticated and their definitions rarely reflect the wide range of ideas associated with political theories and their history. Thus the dictionary “definition” is anarchism will tend to ignore its consistent views on authority, exploitation, property and capitalism (ideas easily discovered if actual anarchist texts are read). And, of course, many dictionaries “define” anarchy as “chaos” or “disorder” but we never see “anarcho”-capitalists use that particular definition!

And for this strategy to work, a lot of “inconvenient” history and ideas from all branches of anarchism must be ignored. From individualists like Spooner and Tucker to communists like Kropotkin and Malatesta, anarchists have always been anti-capitalist (see section G for more on the anti-capitalist nature of individualist anarchism). Therefore “anarcho”-capitalists are not anarchists in the same sense that rain is not dry.

Of course, we cannot stop the “anarcho”-capitalists using the words “anarcho,” “anarchism” and “anarchy” to describe their ideas. The democracies of the west could not stop the Chinese Stalinist state calling itself the People’s Republic of China. Nor could the social democrats stop the fascists in Germany calling themselves “National Socialists”. Nor could the Italian anarcho-syndicalists stop the fascists using the expression “National Syndicalism”. This does not mean that any of these movements actual name reflected their content — China is a dictatorship, not a democracy, the Nazi’s were not socialists (capitalists made fortunes in Nazi Germany because it crushed the labour movement), and the Italian fascist state had nothing in common with anarcho-syndicalists ideas of decentralised, “from the bottom up” unions and the abolition of the state and capitalism.

Therefore, just because someone uses a label it does not mean that they support the ideas associated with that label. And this is causes the poverty of the worker, the opulence of the idle and the inequality of their conditions. And it is this, above all, which has so aptly been called the exploitation of man by man.” [Selected Writings of Pierre-Joseph Proudhon, p. 43]

He called his ideas on possession a “third form of society, the synthesis of communism and property” and calls it “liberty.” [The Anarchist Reader, p. 68]. He even goes so far as to say that property “by its despotism and encroachment, soon proves itself oppressive and anti-social.” [Op. Cit., p. 67] Opposing private property he thought that “all accumulated capital is collective property, no one may be its exclusive owner.” Indeed, he considered the aim of his economic reforms “was to rescue the working masses from capitalist exploitation.” [Selected Writings of Pierre-Joseph Proudhon, p. 44, p. 80] In other words, Proudhon considered capitalist property to be the source of exploitation and oppression and he opposed it. He explicitly contrasts his ideas to that of capitalist property and rejects it as a means of ensuring liberty.

Caplan goes on to claim that “[s]ome of Proudhon’s other heterodoxies include his defence of the right of inheritance and his emphasis on the genuine antagonism between state power and property rights.” However, this is a common anarchist position. Anarchists are well aware that possession is a source of independence within capitalism and so should be supported. As Albert Meltzer puts it:

“All present systems of ownership mean that some are deprived of the fruits of their labour. It is true that, in a competitive society, only the possession of independent means enables one to be free of the economy (that is what Proudhon meant when, addressing himself to the self-employed artisan, he said ‘property is liberty’, which seems at first sight a contradiction with his dictum that it was theft)” [Anarchism: Arguments For and Against, pp. 12–13]

Malatesta makes the same point:
“Our opponents ... are in the habit of justifying the right to private property by stating that property is the condition and guarantee of liberty.

“And we agree with them. Do we not say repeatedly that poverty is slavery?

“But then why do we oppose them?

“The reason is clear: in reality the property that they defend is capitalist property... which therefore depends on the existence of a class of the disinherited and dispossessed, forced to sell their labour to the property owners for a wage below its real value... This means that workers are subjected to a kind of slavery.” [The Anarchist Revolution, p. 113]

As does Kropotkin:

“the only guarantee not to be robbed of the fruits of your labour is to possess the instruments of labour... man really produces most when he works in freedom, when he has a certain choice in his occupations, when he has no overseer to impede him, and lastly, when he sees his work bringing profit to him and to others who work like him, but bringing in little to idlers.” [The Conquest of Bread, p. 145]

Perhaps this makes these three well known anarcho-communists “really” proto¬“anarcho”-capitalists as well? Obviously not. Instead of wondering if his ideas on what socialism is are wrong, he tries to rewrite history to fit the anarchist movement into his capitalist ideas of what anarchism, socialism and whatever are actually like.

In addition, we must point out that Proudhon’s “emphasis on the genuine antagonism between state power and property rights” came from his later writings, in which he argued that property rights were required to control state power. In other words, this “heterodoxy” came from a period in which Proudhon did not think that

Appendix — Is “anarcho”-capitalism a type of anarchism?

Anyone who has followed political discussion on the net has probably come across people calling themselves libertarians but arguing from a right-wing, pro-capitalist perspective. For most Europeans this is weird, as in Europe the term “libertarian” is almost always used in conjunction with “socialist” or “communist.” In the US, though, the Right has partially succeeded in appropriating this term for itself. Even stranger, however, is that a few of these right-wingers have started calling themselves “anarchists” in what must be one of the finest examples of an oxymoron in the English language: ‘Anarcho-capitalist’!!

Arguing with fools is seldom rewarded, but to allow their foolishness to go unchallenged risks allowing them to deceive those who are new to anarchism. That’s what this section of the anarchist FAQ is for, to show why the claims of these “anarchist” capitalists are false. Anarchism has always been anti-capitalist and any “anarchism” that claims otherwise cannot be part of the anarchist tradition. So this section of the FAQ does not reflect some kind of debate within anarchism, as many of these types like to pretend, but a debate between anarchism and its old enemy, capitalism. In many ways this debate mirrors the one between Peter Kropotkin and Herbert Spencer, an English pro-capitalist, minimal statist, at the turn the 19th century and, as such, it is hardly new.
hand’ and the ‘captains of industry’ would be anxious ‘to teach them a lesson’ as ‘discipline in the factories’ and ‘political stability’ are more appreciated by business leaders than profits. Their class interest tells them that lasting full employment is unsound from their point of view and that unemployment is an integral part of the ‘normal’ capitalist system.” See section C.7 (“What causes the capitalist business cycle?”) for a fuller discussion of this point.

In addition, the claims that a “deregulated economy” would benefit the poor do not have much empirical evidence to back them up. If we look at the last quarter of the twentieth century we discover that a more deregulated economy has lead to massive increases in inequality and poverty. If a movement towards a deregulated economy has had the opposite effect than that predicted by Caplan, why should a totally deregulated economy have the opposite effect. It is a bit like claiming that while adding black paint to grey makes it more black, adding the whole tin will make it white!

The reason for increased inequality and poverty as a result of increased deregulation is simple. A “free exchange” between two people will benefit the stronger party. This is obvious as the economy is marked by power, regardless of “anarcho”-capitalist claims, and any “free exchange” will reflect difference in power. Moreover, a series of such exchanges will have an accumulative effect, with the results of previous exchanges bolstering the position of the stronger party in the current exchange.

Moreover, the claim that removing taxation will increase donations to charity is someone strange. We doubt that the rich who object to money being taken from them to pay for welfare will increase the amount of money they give to others if taxation was abolished. As Peter Sabatini points out, “anarcho”-capitalists “constantly rant and shriek about how the government, or the rabble, hinders their Lockean right to amass capital.” [Social Anarchism, no. 23, p.101] Caplan seems to expect them to turn over a new leaf and give more to that same rabble!

state could be abolished and so “property is the only power that can act as a counterweight to the State.” [Selected Writings of Pierre-Joseph Proudhon, p. 140] Of course, this “later” Proudhon also acknowledged that property was “an absolutism within an absolutism,” “by nature autocratic” and that its “politics could be summed up in a single word,” namely “exploitation.” [p. 141, p. 140, p. 134]

Moreover, Proudhon argues that “spread[ing] it more equally and establish[ing] it more firmly in society” is the means by which “property” “becomes a guarantee of liberty and keeps the State on an even keel.” [p. 133, p. 140] In other words, rather than “property” as such limiting the state, it is “property” divided equally through society which is the key, without concentrations of economic power and inequality which would result in exploitation and oppression. Therefore, “[s]imple justice... requires that equal division of land shall not only operate at the outset. If there is to be no abuse, it must be maintained from generation to generation.” [Op. Cit., p. 141, p. 133, p. 130].

Interestingly, one of Proudhon’s “other heterodoxies” Caplan does not mention is his belief that “property” was required not only to defend people against the state, but also capitalism. He saw society dividing into “two classes, one of employed workers, the other of property-owners, capitalists, entrepreneurs.” He thus recognised that capitalism was just as oppressive as the state and that it assured “the victory of the strong over the weak, of those who property over those who own nothing.” [as quoted by Alan Ritter, The Political Thought of Pierre-Joseph Proudhon, p. 121] Thus Proudhon’s argument that “property is liberty” is directed not only against the state, but also against social inequality and concentrations of economic power and wealth.

Indeed, he considered that “companies of capitalists” were the “exploiters of the bodies and souls of their wage earners” and an outrage on “human dignity and personality.” Instead of wage labour he thought that the “industry to be operated, the work to be done, are the common and indivisible property of all the participant workers.”
In other words, self-management and workers’ control. In this way there would be ‘no more government of man by man, by means of accumulation of capital’ and the “social republic” established. Hence his support for co-operatives:

“The importance of their work lies not in their petty union interests, but in their denial of the rule of capitalists, usurers, and governments, which the first [French] revolution left undisturbed. Afterwards, when they have conquered the political lie... the groups of workers should take over the great departments of industry which are their natural inheritance.” [cited in Pierre-Joseph Proudhon, E. Hymans, pp. 190–1, and Anarchism, George Woodcock, p. 110, 112]

In other words, a socialist society as workers would no longer be separated from the means of production and they would control their own work (the “abolition of the proletariat,” to use Proudhon’s expression). This would mean recognising that “the right to products is exclusive — jus in re; the right to means is common — jus ad rem” [cited by Woodcock, Anarchism, p. 96] which would lead to self-management:

“In democratising us, revolution has launched us on the path of industrial democracy.” [Selected Writings of Pierre-Joseph Proudhon, p. 63]

As Woodcock points out, in Proudhon’s “picture of the ideal society of the ideal society it is this predominance of the small proprietor, the peasant or artisan, that immediately impresses one” with “the creation of co-operative associations for the running of factories and railways.” [“On Proudhon’s ‘What is Property?’”, Op. Cit., p. 209, p. 210]

All of which hardly supports Caplan’s attempts to portray Proudhon as “really” a capitalist all along. Indeed, the “later” private and public domination. Such domination violates freedom and any free association which dominates any within it violates the basis of that association in self-assumed obligation (see section A.2.11). Thus Proudhon:

“The social contract should increase the well-being and liberty of every citizen. — If any one-sided conditions should slip in; if one part of the citizens should find themselves, by the contract, subordinated and exploited by others, it would no longer be a contract; it would be a fraud, against which annulment might at any time be invoked justly.” [The General Idea of the Revolution, p. 114]

Caplan’s claim that right libertarians oppose regulation of individual behaviour is simply not true. They just oppose state regulation while supporting private regulation wholeheartedly. Anarchists, in contrast, reject both public and private domination.

Caplan:

“Poverty would be handled by work and responsibility for those able to care for themselves, and voluntary charity for those who cannot. (Libertarians hasten to add that a deregulated economy would greatly increase the economic opportunities of the poor, and elimination of taxation would lead to a large increase in charitable giving.)”

Notice the implication that poverty is now caused by laziness and irresponsibility rather than by the inevitable workings of an economic system that requires a large “reserve army of the unemployed” as a condition of profitability. The continuous “boom” economy of “anarcho”-capitalist fantasies is simply incompatible with the fundamental principles of capitalism. To re-quote Michael Kalecki (from section B.4.4), “[T] lasting full employment is not at all to [the] liking [of business leaders]. The workers would ‘get out of
end of free speech and free association as the property owner can censor those on their property (such as workers or tenants) and ban their organisations (such as unions). Of course, in his example Rothbard looks at the “trespasser,” not the wage worker or the tenant (two far more common examples in any modern society). Rothbard is proposing the dictatorship of the property owner and the end of civil liberties and equal rights (as property is unequally distributed). He gives this utter denial of liberty an Orwellian twist by proclaiming the end of civil liberties by property rights as “a new liberty.” Perhaps for the property-owner, but not the wage worker — “We who belong to the proletaire class, property excommunicates us!” [Proudhon, What is Property?, p. 137]

In effect, right-Libertarians do not care how many restrictions are placed on you as long as it is not the government doing it. Of course it will be claimed that workers and tenants “consent” to these controls (although they reject the notion that citizens “consent” to government controls by not leaving their state). Here the libertarian case is so disingenuous as to be offensive. There is no symmetry in the situations facing workers and firms. To the worker, the loss of a job is often far more of a threat than the loss of one worker is to the firm. The reality of economic power leads people to contract into situations that, although they are indeed the “best” arrangements of those available, are nonetheless miserable. In any real economy — and, remember, the right-libertarian economy lacks any social safety net, making workers’ positions more insecure than now — the right-libertarian denial of economic power is a delusion.

Unlike anarchist theory, right-libertarian theory provides no rationale to protest private power (or even state power if we accept the notion that the state owns its territory). Relations of domination and subjection are valid expressions of liberty in their system and, perversely, attempts to resist authority (by strikes, unions, resistance) are deemed “initiations of force” upon the oppressor! In contrast, anarchist theory provides a strong rationale for resisting Proudhon’s support for protectionism [Selected Writings of Pierre-Joseph Proudhon, p. 187], the “fixing after amicable discussion of a maximum and minimum profit margin,” “the organising of regulating societies” and that mutualism would “regulate the market” [Op. Cit., p. 70] and his obvious awareness of economic power and that capitalism exploited and oppressed the wage-worker suggests that rather than leading some to exclude Proudhon from the “leftist camp” altogether, it is a case of excluding him utterly from the “rightist camp” (i.e. “anarcho”-capitalism). Therefore Caplan’s attempt to claim (co-opt would be better) Proudhon for “anarcho”-capitalism indicates how far Caplan will twist (or ignore) the evidence. As would quickly become obvious when reading his work, Proudhon would (to use Caplan’s words) “normally classify government, property, hierarchical organisations ... as ‘rulership.’”

To summarise, Proudhon was a socialist and Caplan’s attempts to rewrite anarchist and socialist history fails. Proudhon was the fountainhead for both wings of the anarchist movement and What is Property? “embraces the core of nineteenth century anarchism... [bar support for revolution] all the rest of later anarchism is there, spoken or implied: the conception of a free society united by association, of workers controlling the means of production... [this book] remains the foundation on which the whole edifice of nineteenth century anarchist theory was to be constructed.” [Op. Cit., p. 210]

Little wonder Bakunin stated that his ideas were Proudhonism “widely developed and pushed to these, its final consequences.” [Michael Bakunin: Selected Writings, p. 198]

4 — Tucker on Property, Communism and Socialism.

That Tucker called himself a socialist is quickly seen from Instead of A Book or any of the books written about Tucker and his ideas. That Caplan seeks to deny this means that either Caplan has not looked at either Instead of a Book or the secondary lit-
erature (with obvious implications for the accuracy of his FAQ) or he decided to ignore these facts in favour of his own ideologically tainted version of history (again with obvious implications for the accuracy and objectivity of his FAQ).

Caplan, in an attempt to deny the obvious, quotes Tucker from 1887 as follows in section 14 (What are the major debates between anarchists? What are the recurring arguments?):

“It will probably surprise many who know nothing of Proudhon save his declaration that ‘property is robbery’ to learn that he was perhaps the most vigorous hater of Communism that ever lived on this planet. But the apparent inconsistency vanishes when you read his book and find that by property he means simply legally privileged wealth or the power of usury, and not at all the possession by the labourer of his products.”

You will instantly notice that Proudhon does not mean by property “the possession of the labourer of his products.” However, Proudhon did include in his definition of “property” the possession of the capital to steal profits from the work of the labourers. As is clear from the quote, Tucker and Proudhon was opposed to capitalist property (“the power of usury”). From Caplan’s own evidence he proves that Tucker was not a capitalist!

But lets quote Tucker on what he meant by “usury”:

“There are three forms of usury, interest on money, rent on land and houses, and profit in exchange. Whoever is in receipt of any of these is a usurer.” [cited in *Men against the State* by James J. Martin, p. 208]

Which can hardly be claimed as being the words of a person who supports capitalism!

haviour as such. Rather, they **support** property owners suppressing civil liberties on their property and the regulation of personal behaviour by employers and landlords. This they argue is a valid expression of property rights. Indeed, any attempts to allow workers civil liberties or restrict employers demands on workers by state or union action is denounced as a violation of “liberty” (i.e. the power of the property owner). Those subject to the denial of civil liberties or the regulation of their personal behaviour by landlords or employees can “love it or leave it.” Of course, the same can be said to any objector to state oppression — and frequently is. This is an artificial double standard, which labels a restraint by one group or person in a completely different way than the same restraint by others simply because one is called “the government” and the other is not.

This denial of civil liberties can be seen from these words by Murray Rothbard:

”[I]n the profoundest sense there are no rights but property rights . . . Freedom of speech is supposed to mean the right of everyone to say whatever he likes. But the neglected question is: Where? Where does a man have this right? He certainly does not have it on property on which he is trespassing. In short, he has this right only either on his own property or on the property of someone who has agreed, as a gift or in a rental contract, to allow him in the premises. In fact, then, there is no such thing as a separate ‘right to free speech’; there is only a man’s property right: the right to do as he wills with his own or to make voluntary agreements with other property owners.” [Murray Rothbard, *Power and Market*, p. 176]

Of course, Rothbard fails to see that for the property-less such a regime implies **no** rights whatsoever. It also means the effective
property “justly” and if they are entitled to it so is the state to its “property”!

But as is so often the case, property owners are exempt from the analysis the state is subjected to by “anarcho”-capitalists. The state and property owners may do the same thing (such as ban freedom of speech and association or regulate individual behaviour) but only the state is condemned by “anarcho”-capitalism.

Caplan:

“On other issues, the anarcho-capitalist differs little if at all from the more moderate libertarian. Services should be privatised and opened to free competition; regulation of personal AND economic behaviour should be done away with.”

The “anarcho”-capitalist’s professed desire to “do away” with the “regulation” of economic behaviour is entirely disingenuous. For, by giving capitalists the ability to protect their exploitative monopolies of social capital by the use of coercive private states, one is thereby “regulating” the economy in the strongest possible way, i.e. ensuring that it will be channelled in certain directions rather than others. For example, one is guaranteeing that production will be for profit rather than use; that there will consequently be runaway growth and an endless devouring of nature based on the principle of ‘grow or die;’ and that the alienation and deskilling of the workforce will continue. What the “anarcho”-capitalist really means by “doing away with the regulation of economic behaviour” is that ordinary people will have even less opportunity than now to democratically control the rapacious behaviour of capitalists. Needless to say, the “regulation of personal” behaviour would not be done away with in the workplace, where the authority of the bosses would still exist and you would have to follow their petty rules and regulations.

Moreover, regardless of “anarcho”-capitalist claims, they do not, in fact, support civil liberties or oppose “regulation” of personal be-

And we should note that Tucker considered both government and capital oppressive. He argued that anarchism meant “the restriction of power to self and the abolition of power over others. Government makes itself felt alike in country and in city, capital has its usurious grip on the farm as surely as on the workshop and the oppressions and exactions of neither government nor capital can be avoided by migration.” [Instead of a Book, p. 114]

And, we may add, since when was socialism identical to communism? Perhaps Caplan should actually read Proudhon and the anarchist critique of private property before writing such nonsense? We have indicated Proudhon’s ideas above and will not repeat ourselves. However, it is interesting that this passes as “evidence” of “anti-socialism” for Caplan, indicating that he does not know what socialism or anarchism actually is. To state the obvious, you can be a hater of “communism” and still be a socialist!

So this, his one attempt to prove that Tucker, Spooner and even Proudhon were really capitalists by quoting the actual people involved is a failure.

He asserts that for any claim that “anarcho”-capitalism is not anarchist is wrong because “the factual supporting arguments are often incorrect. For example, despite a popular claim that socialism and anarchism have been inextricably linked since the inception of the anarchist movement, many 19th-century anarchists, not only Americans such as Tucker and Spooner, but even Europeans like Proudhon, were ardently in favour of private property (merely believing that some existing sorts of property were illegitimate, without opposing private property as such).”

The facts supporting the claim of anarchists being socialists, however, are not “incorrect.” It is Caplan’s assumption that socialism is against all forms of “property” which is wrong. To state the obvious, socialism does not equal communism (and anarcho-communists support the rights of workers to own their own means of production if they do not wish to join communist communes — see above). Thus Proudhon was renown as the leading French So-
cialist theorist when he was alive. His ideas were widely known in the socialist movement and in many ways his economic theories were similar to the ideas of such well known early socialists as Robert Owen and William Thompson. As Kropotkin notes:

“It is worth noticing that French mutualism had its precursor in England, in William Thompson, who began by mutualism before he became a communist, and in his followers John Gray (A Lecture on Human Happiness, 1825; The Social System, 1831) and J. F. Bray (Labour’s Wrongs and Labour’s Remedy, 1839).” [Kropotkin’s Revolutionary Pamphlets, p. 291]

Perhaps Caplan will now claim Robert Owen and William Thompson as capitalists?

Tucker called himself a socialist on many different occasions and stated that there were “two schools of Socialistic thought ... State Socialism and Anarchism.” And stated in very clear terms that:

“Liberty insists on Socialism... — true Socialism, Anarchistic Socialism: the prevalence on earth of Liberty, Equality, and Solidarity.” [Instead of a Book, p. 363]

And like all socialists, he opposed capitalism (i.e. usury and wage slavery) and wished that “there should be no more proletaires.” [see the essay “State Socialism and Anarchism” in Instead of a Book, p. 17]

Caplan, of course, is well aware of Tucker’s opinions on the subject of capitalism and private property. In section 13 (What moral justifications have been offered for anarchism?) he writes:

“Still other anarchists, such as Lysander Spooner and Benjamin Tucker as well as Proudhon, have argued that anarchism would abolish the exploitation inherent in interest and rent simply by means of free competition.
difficulty surviving (i.e. private property and private states), but they are unwilling to allow workers to set up co-operatives under conditions that would ensure their success (i.e. the absence of private property and private states). This reflects the usual vacuousness of the right-libertarian concepts of “freedom” and “voluntarism.”

In other words, these worker-owned firms would exist in and be subject to the same capitalist “general libertarian law code” and work in the same capitalist market as the rest of society. So, not only are these co-operatives subject to capitalist market forces, they exist and operate in a society defined by capitalist laws. As discussed in section F.2, such disregard for the social context of human action shows up the “anarcho” capitalist’s disregard for meaningful liberty.

All Caplan is arguing here is that as long as people remain within the (capitalist) “law code,” they can do whatever they like. However, what determines the amount of coercion required in a society is the extent to which people are willing to accept the rules imposed on them. This is as true of an “anarcho”-capitalist society as it is of any other. In other words, if more and more people reject the basic assumptions of capitalism, the more coercion against anarchist tendencies will be required. Saying that people would be free to experiment under “anarcho”-capitalist law (if they can afford it, of course) does not address the issue of changes in social awareness (caused, by example, by class struggle) which can make such “laws” redundant. So, when all is said and done, “anarcho”-capitalism just states that as long as you accept their rules, you are free to do what you like.

How generous of them!

Thus, while we would be allowed to be collective capitalists or property owners under “anarcho”-capitalists we would have no choice about living under laws based on the most rigid and extreme interpretation of property rights available. In other words, “anarcho”-capitalists recognise (at least implicitly) that there exists

In their view, only labour income is legitimate, and an important piece of the case for anarchism is that without government-imposed monopolies, non-labour income would be driven to zero by market forces. It is unclear, however, if they regard this as merely a desirable side effect, or if they would reject anarchism if they learned that the predicted economic effect thereof would not actually occur.”

Firstly, we must point that Proudhon, Tucker and Spooner considered profits to be exploitative as well as interest and rent. Hence we find Tucker arguing that a “just distribution of the products of labour is to be obtained by destroying all sources of income except labour. These sources may be summed up in one word, — usury; and the three principle forms of usury are interest, rent and profit.” [Instead of a Book, p. 474] To ignore the fact that Tucker also considered profit as exploitative seems strange, to say the least, when presenting an account of his ideas.

Secondly, rather than it being “unclear” whether the end of usury was “merely a desirable side effect” of anarchism, the opposite is the case. Anyone reading Tucker (or Proudhon) would quickly see that their politics were formulated with the express aim of ending usury. Just one example from hundreds:

“Liberty will abolish interest; it will abolish profit; it will abolish monopolistic rent; it will abolish taxation; it will abolish the exploitation of labour; it will abolish all means whereby any labourer can be deprived of any of his product.” [Instead of a Book, p. 347]

While it is fair to wonder whether these economic effects would result from the application of Tucker’s ideas, it is distinctly incorrect to claim that the end of usury was considered in any way as a “desirable side effect” of them. Rather, in their eyes, the end of
usury was one of the aims of Individualist Anarchism, as can be clearly seen. As Wm. Gary Kline points out in his excellent account of Individualist Anarchism:

“the American anarchists exposed the tension existing in liberal thought between private property and the ideal of equal access. The Individualist Anarchists were, at least, aware that existing conditions were far from ideal, that the system itself worked against the majority of individuals in their efforts to attain its promises. Lack of capital, the means to creation and accumulation of wealth, usually doomed a labourer to a life of exploitation. This the anarchists knew and they abhorred such a system.” [The Individualist Anarchists, p. 102]

This is part of the reason why they considered themselves socialists and, equally as important, they were considered socialists by other socialists such as Kropotkin and Rocker. The Individualist Anarchists, as can be seen, fit very easily into Kropotkin’s comments that “the anarchists, in common with all socialists... maintain that the now prevailing system of private ownership in land, and our capitalist production for the sake of profits, represent a monopoly which runs against both the principles of justice and the dictates of utility.” [Kropotkin’s Revolutionary Pamphlets, p. 285] Given that they considered profits as usury and proposed “occupancy and use” in place of the prevailing land ownership rights they are obviously socialists.

That the end of usury was considered a clear aim of his politics explains Tucker’s 1911 postscript to his famous essay “State Socialism and Anarchism” in which he argues that “concentrated capital” itself was a barrier towards anarchy. He argued that the “trust is now a monster which... even the freest competition, could it be instituted, would be unable to destroy.” While, in an earlier period, big business “needed the money monopoly for its sustenance and its advantages for workers in collective ownership of the firms in which they work.

This problem can only be solved by eliminating private property and the coercive statist mechanisms required to protect it (including private states masquerading as “protection companies”), because this is the only way to eliminate competition for profits as the driving force of economic activity. In a libertarian socialist environment, federated associations of workers in co-operative enterprises would co-ordinate production for use rather than profit, thus eliminating the competitive basis of the economy and so also the “grow-or-die” principle which now puts co-operatives at a fatal economic disadvantage. (For more on how such an economy would be organised and operated, as well as answers to objections, see section I.)

And let us not forget what is implied by Caplan’s statement that the “anarcho”-capitalist does not think that co-operative holding of “property” “would be widespread or prevalent.” It means that the vast majority would be subject to the power, authority and laws of the property owner and so would not govern themselves. In other words, it would a system of private statism rather than anarchy. Caplan:

“However, in theory an ‘anarcho-capitalist’ society might be filled with nothing but communes or worker-owned firms, so long as these associations were formed voluntarily (i.e., individuals joined voluntarily and capital was obtained with the consent of the owners) and individuals retained the right to exit and set up corporations or other profit-making, individualistic firms.”

It’s interesting that the “anarcho”-capitalists are willing to allow workers to set up “voluntary” co-operatives so long as the conditions are retained which ensure that such co-operatives will have
based on the fact that co-operatives have a tendency to grow at a slower rate than capitalist firms. This is a good thing if one’s primary concern is, say, protecting the environment, but fatal if one is trying to survive in a competitive capitalist environment.

Under capitalism, successful competition for profits is the fundamental fact of economic survival. This means that banks and private investors seeking the highest returns on their investments will favour those companies that grow the fastest. Moreover, in co-operatives returns to capital are less than in capitalist firms. Under such conditions, capitalist firms will attract more investment capital, allowing them to buy more productivity-enhancing technology and thus to sell their products more cheaply than co-operatives. Even though co-operatives are at least as efficient (usually more so) than their equivalent capitalist firms, the effect of market forces (particularly those associated with capital markets) will select against them. This bias against co-operatives under capitalism is enough to ensure that, despite their often higher efficiency, they cannot prosper under capitalism (i.e. capitalism selects the least efficient way of producing). Hence Caplan’s comments hide how the effect of inequalities in wealth and power under capitalism determine which alternatives are “widespread” in the “free market”.

Moreover, co-operatives within capitalism have a tendency to adapt to the dominant market conditions rather than undermining them. There will be pressure on the co-operatives to compete more effectively by adopting the same cost-cutting and profit-enhancing measures as capitalist firms. Such measures will include the deskilling of workers; squeezing as much “productivity” as is humanly possible from them; and a system of pay differentials in which the majority of workers receive low wages while the bulk of profits are reinvested in technology upgrades and other capital expansion that keeps pace with capitalist firms. But this means that in a capitalist environment, there tend to be few practical growth” its size now ensured that it “sees in the money monopoly a convenience, to be sure, but no longer a necessity. It can do without it.” This meant that the way was now “not so clear.” Indeed, he argued that the problem of the trusts “must be grappled with for a time solely by forces political or revolutionary” as the trust had moved beyond the reach of “economic forces” simply due to the concentration of resources in its hands. [“Postscript” to State Socialism and Anarchism]

If the end of “usury” was considered a “side-effect” rather than an objective, then the problems of the trusts and economic inequality/power (“enormous concentration of wealth”) would not have been an issue. That the fact of economic power was obviously considered a hindrance to anarchy suggests the end of usury was a key aim, an aim which “free competition” in the abstract could not achieve. Rather than take the “anarcho”-capitalist position that massive inequality did not affect “free competition” or individual liberty, Tucker obviously thought it did and, therefore, “free competition” (and so the abolition of the public state) in conditions of massive inequality would not create an anarchist society.

By trying to relegate an aim to a “side-effect,” Caplan distorts the ideas of Tucker. Indeed, his comments on trusts, “concentrated capital” and the “enormous concentration of wealth” indicates how far Individualist Anarchism is from “anarcho”-capitalism (which dismisses the question of economic power Tucker raises out of hand). It also indicates the unity of political and economic ideas, with Tucker being aware that without a suitable economic basis individual freedom was meaningless. That an economy (like capitalism) with massive inequalities in wealth and so power was not such a basis is obvious from Tucker’s comments.

Thirdly, what did Tucker consider as a government-imposed monopoly? Private property, particularly in land! As he states “Anarchism undertakes to protect no titles except such as are based upon actual occupancy and use” and that anarchism “means the abolition of landlordism and the annihilation of rent.” [Instead of a Book,
This, to state the obvious, is a restriction on “private property” (in the capitalist sense), which, if we use Caplan’s definition of socialism, means that Tucker was obviously part of the “Leftist camp” (i.e. socialist camp). In other words, Tucker considered capitalism as the product of statism while socialism (libertarian of course) would be the product of anarchy.

So, Caplan’s historical argument to support his notion that anarchism is simply anti-government fails. Anarchism, in all its many forms, have distinct economic as well as political ideas and these cannot be parted without loosing what makes anarchism unique. In particular, Caplan’s attempt to portray Proudhon as an example of a “pure” anti-government anarchism also fails, and so his attempt to co-opt Tucker and Spooner also fails (as noted, Tucker cannot be classed as a “pure” anti-government anarchist either). If Proudhon was a socialist, then it follows that his self-proclaimed followers will also be socialists — and, unsurprisingly, Tucker called himself a socialist and considered anarchism as part of the wider socialist movement.

“Like Proudhon, Tucker was an ‘un-marxian socialist’”

5 — Anarchism and “anarcho”-capitalism

Caplan tries to build upon the non-existent foundation of Tucker’s and Proudhon’s “capitalism” by stating that:

“Nor did an ardent anarcho-communist like Kropotkin deny Proudhon or even Tucker the title of ‘anarchist.’ In his Modern Science and Anarchism, Kropotkin discusses not only Proudhon but ‘the American anarchist individualists who were represented in the fifties by S.P. Andrews and W. Greene, later on by Lysander Spooner, and now

progressive legislatures or enforced by direct action) simply define liberty and property rights whereas the rules that benefit workers, tenants and consumers are simply an interference with liberty. The rules one likes, in other words, are the foundations of sacred property rights (and so “liberty,” as least for the capitalist and landlord), those one does not like are meddlesome regulation. This is a very handy trick and would not be worth mentioning if it was not so commonplace in right-libertarian theory.

We should leave aside the fantasy that the law under “anarcho”-capitalism is a politically neutral set of universal rules deduced from particular cases and free from a particular instrumental or class agenda.

Caplan:

“Critics of anarcho-capitalism sometimes assume that communal or worker-owned firms would be penalised or prohibited in an anarcho-capitalist society. It would be more accurate to state that while individuals would be free to voluntarily form communitarian organisations, the anarcho-capitalist simply doubts that they would be widespread or prevalent.”

There is good reason for this doubt. Worker co-operatives would not be widespread or prevalent in an “anarcho”-capitalist society for the same reason that they are not widespread or prevalent now: namely, that the socio-economic, legal, and political systems would be structured in such a way as to automatically discourage their growth (in addition, capitalist firms and the rich would also have an advantage in that they would still own and control the wealth they currently have which are a result of previous “initiations of force”. This would give them an obvious advantage on the “free-market” — an advantage which would be insurmountable).

As we explain in more detail in section J.5.11, the reason why there are not more producer co-operatives is partly structural,
as water law, mining law, etc. And Friedman admits that ‘focal points’ including prevalent norms are likely to circumscribe and somewhat standardise the menu of available legal codes.”

The argument that “consumer demand” would determine a “philosophically neutral” content of the law cannot be sustained. Any law code will reflect the philosophy of those who create it. Under “anarcho”-capitalism, as we have noted (see section F.6), the values of the capitalist rich will be dominant and will shape the law code and justice system, as they do now, only more so. The law code will therefore continue to give priority to the protection of private property over human values; those who have the most money will continue being able to hire the best lawyers; and the best (i.e. most highly paid) judges will be inclined to side with the wealthy and to rule in their interests, out of class loyalty (and personal interests).

Moreover, given that the law code exists to protect capitalist property rights, how can it be “philosophically neutral” with that basis? How would “competing” property frameworks co-exist? If a defence agency allowed squatting and another (hired by the property owner) did not, there is no way (bar force) a conflict could be resolved. Then the firm with the most resources would win. “Anarcho”-capitalism, in effect, smuggles into the foundation of their system a distinctly non-neutral philosophy, namely capitalism. Those who reject such a basis may end up sharing the fate of tribal peoples who rejected that system of property rights, for example, the Native Americans.

In other words, in terms of outcome the whole system would favour capitalist values and so not be “philosophically neutral.” The law would be favourable to employers rather than workers, manufacturers rather than consumers, and landlords rather than tenants. Indeed, from the “anarcho”-capitalist perspective the rules that benefit employers, landlords and manufacturers (as passed by

There is a nice historical irony in Caplan’s attempts to use Kropotkin to prove the historical validity of “anarcho”-capitalism. This is because while Kropotkin was happy to include Tucker into the anarchist movement, Tucker often claimed that an anarchist could not be a communist! In State Socialism and Anarchism he stated that anarchism was “an ideal utterly inconsistent with that of those Communists who falsely call themselves Anarchists while at the same time advocating a regime of Archism fully as despotic as that of the State Socialists themselves.” [“State Socialism and Anarchism”, Instead of a Book, pp. 15–16]

While modern social anarchists follow Kropotkin in not denying Proudhon or Tucker as anarchists, we do deny the anarchist title to supporters of capitalism. Why? Simply because anarchism as a political movement (as opposed to a dictionary definition) has always been anti-capitalist and against capitalist wage slavery, exploitation and oppression. In other words, anarchism (in all its forms) has always been associated with specific political and economic ideas. Both Tucker and Kropotkin defined their anarchism as an opposition to both state and capitalism. To quote Tucker on the subject:

“Liberty insists… [on] the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man.” [cited in Native American Anarchism — A Study of Left-
Wing American Individualism by Eunice Schuster, p. 140

Kropotkin defined anarchism as “the no-government system of socialism.” [Kropotkin’s Revolutionary Pamphlets, p. 46] Malatesta argued that “when [people] sought to overthrow both State and property — then it was anarchy was born” and, like Tucker, aimed for “the complete destruction of the domination and exploitation of man by man.” [Life and Ideas, p. 19, pp. 22–28] Indeed every leading anarchist theorist defined anarchism as opposition to government and exploitation. Thus Brain Morris’ excellent summary:

“Another criticism of anarchism is that it has a narrow view of politics: that it sees the state as the fount of all evil, ignoring other aspects of social and economic life. This is a misrepresentation of anarchism. It partly derives from the way anarchism has been defined [in dictionaries, for example], and partly because Marxist historians have tried to exclude anarchism from the broader socialist movement. But when one examines the writings of classical anarchists... as well as the character of anarchist movements... it is clearly evident that it has never had this limited vision. It has always challenged all forms of authority and exploitation, and has been equally critical of capitalism and religion as it has been of the state.” [“Anthropology and Anarchism,” Anarchy: A Journal of Desire Armed no. 45, p. 40]

Therefore anarchism was never purely a political concept, but always combined an opposition to oppression with an opposition to exploitation. Little wonder, then, that both strands of anarchism have declared themselves “socialist” and so it is “conceptually and historically misleading” to “create a dichotomy between socialism and

Alabama] say they could not work at a profit without the lowering effect in wages of convict-labour competition.” [The Umbrella of US Power, p. 32]

Needless to say, Caplan fails to mention this aspect of “anarcho”-capitalism (just as he fails to mention the example of Ford’s private police state). Perhaps an “anarcho”-capitalist will say that prison labour will be less productive than wage labour and so workers have little to fear, but this makes little sense. If wage labour is more productive then prison labour will not find a market (and then what for the prisoners? Will profit-maximising companies really invest in an industry with such high over-heads as maintaining prisoners for free?). Thus it seems more than likely that any “prison-factory system” will be as productive as the surrounding wage-labour ones, thus forcing down their wages and the conditions of labour. For capitalists this would be ideal, however for the vast majority a different conclusion must be drawn.

Caplan:

“Probably the main division between the anarcho-capitalists stems from the apparent differences between Rothbard’s natural-law anarchism, and David Friedman’s more economistic approach. Rothbard puts more emphasis on the need for a generally recognised libertarian legal code (which he thinks could be developed fairly easily by purification of the Anglo-American common law), whereas Friedman focuses more intently on the possibility of plural legal systems co-existing and responding to the consumer demands of different elements of the population. The difference, however, is probably overstated. Rothbard believes that it is legitimate for consumer demand to determine the philosophically neutral content of the law, such as legal procedure, as well as technical issues of property right definition such
— a problem that lies in the structure of the system itself. The real solution is the creation of a non-hierarchical society based on communal ownership of productive assets, which, by eliminating poverty and the other negative effects of capitalism, would greatly reduce the incidence of criminal behaviour and so the need for punitive countermeasures.

Finally, two more points on private prisons. Firstly, as to the desirability of a "prison factory system," we will merely note that, given the capitalist principle of "grow-or-die," if punishing crime becomes a business, one can be sure that those who profit from it will find ways to ensure that the “criminal” population keeps expanding at a rate sufficient to maintain a high rate of profit and growth. After all, the logic of a “prison factory system” is self-defeating. If the aim of prison is to deter crime (as some claim) and if a private prison system will meet that aim, then a successful private prison system will stop crime, which, in turn, will put them out of business! Thus a “prison factory system” cannot aim to be efficient (i.e. stop crime).

Secondly, Caplan does not mention the effect of prison labour on the wages, job conditions and market position of workers. Having a sizeable proportion of the working population labouring in prison would have a serious impact on the bargaining power of workers. How could workers outside of prison compete with such a regime of labour discipline without submitting to prison-like conditions themselves? Unsurprisingly, US history again presents some insight into this. As Noam Chomsky notes, the “rapid industrial development in the southeastern region [of America] a century ago was based on (Black) convict labour, leased to the highest bidder.” Chomsky quotes expert Alex Lichtenstein comments that Southern Industrialists pointed out that convict labour was “more reliable and productive than free labour” and that it overcomes the problem of labour turnover and instability. It also “remove[d] all danger and cost of strikes” and that it lowers wages for “free labour” (i.e. wage labour). The US Bureau of Labor reported that “mine owners [in

and anarchism.” [Brian Morris, Op. Cit., p. 39] Needless to say, anarchists oppose state socialism just as much as they oppose capitalism. All of which means that anarchism and capitalism are two different political ideas with specific (and opposed) meanings — to deny these meanings by uniting the two terms creates an oxymoron, one that denies the history and the development of ideas as well as the whole history of the anarchist movement itself.

As Kropotkin knew Proudhon to be an anti-capitalist, a socialist (but not a communist) it is hardly surprising that he mentions him. Again, Caplan’s attempt to provide historical evidence for a “right-wing” anarchism fails. Funny that the followers of Kropotkin are now defending individualist anarchism from the attempted “adoption” by supporters of capitalism! That in itself should be enough to indicate Caplan’s attempt to use Kropotkin to give credence to “anarcho”-capitalist co-option of Proudhon, Tucker and Spooner fails.

Interestingly, Caplan admits that “anarcho”-capitalism has recent origins. In section 8 (Who are the major anarchist thinkers?) he states:

“Anarcho-capitalism has a much more recent origin in the latter half of the 20th century. The two most famous advocates of anarcho-capitalism are probably Murray Rothbard and David Friedman. There were however some interesting earlier precursors, notably the Belgian economist Gustave de Molinari. Two other 19th-century anarchists who have been adopted by modern anarcho-capitalists with a few caveats are Benjamin Tucker and Lysander Spooner. (Some left-anarchists contest the adoption, but overall Tucker and Spooner probably have much more in common with anarcho-capitalists than with left-anarchists.)”

Firstly, as he states, Tucker and Spooner have been “adopted” by the “anarcho”-capitalist school. Being dead they have little chance
to protest such an adoption, but it is clear that they considered themselves as socialists, against capitalism (it may be claimed that Spooner never called himself a socialist, but then again he never called himself an anarchist either; it is his strong opposition to wage labour that places him in the socialist camp). Secondly, Caplan lets the cat out the bag by noting that this “adoption” involved a few warnings — more specifically, the attempt to rubbish or ignore the underlying socio-economic ideas of Tucker and Spooner and the obvious anti-capitalist nature of their vision of a free society.

Individualist anarchists are, indeed, more similar to classical liberals than social anarchists. Similarly, social anarchists are more similar to Marxists than Individualist anarchists. But neither statement means that Individualist anarchists are capitalists, or social anarchists are state socialists. It just means some of their ideas overlap — and we must point out that Individualist anarchist ideas overlap with Marxist ones, and social anarchist ones with liberal ones (indeed, one interesting overlap between Marxism and Individualist Anarchism can be seen from Marx’s comment that abolishing interest and interest-bearing capital “means the abolition of capital and of capitalist production itself.” [Theories of Surplus Value, vol. 3, p. 472] Given that Individualist Anarchism aimed to abolish interest (along with rent and profit) it would suggest, from a Marxist position, that it is a socialist theory).

So, if we accept Kropotkin’s summary that Individualist Anarchism ideas are “partly those of Proudhon, but party those of Herbert Spencer” [Kropotkins’ Revolutionary Pamphlets, p. 173], what the “anarcho”-capitalist school is trying to is to ignore the Proudhonian (i.e. socialist) aspect of their theories. However, that just leaves Spencer and Spencer was not an anarchist, but a right-wing Libertarian, a supporter of capitalism (a “champion of the capitalistic class” as Tucker put it). In other words, to ignore the socialist aspect of Individualist Anarchism (or anarchism in general) is to reduce it to liberalism, an extreme version of liberalism, but liberty rights, the powers and privileges of the owner are built into the system from the start.

Second, the left-libertarian critique of punishment does not rest, as “anarcho”-capitalists claim, on the naive view that intimidation and coercion aren’t effective in controlling behaviour. Rather, it rests on the premise that capitalist societies produce large numbers of criminals, whereas societies based on equality and community ownership of productive assets do not.

The argument for this is that societies based on private property and hierarchy inevitably lead to a huge gap between the have-haves and the have-nots, with the latter sunk in poverty, alienation, resentment, anger, and hopelessness, while at the same time such societies promote greed, ambition, ruthlessness, deceit, and other aspects of competitive individualism that destroy communal values like sharing, co-operation, and mutual aid. Thus in capitalist societies, the vast majority of “crime” turns out to be so-called “crimes against property,” which can be traced to poverty and the grossly unfair distribution of wealth. Where the top one percent of the population controls more wealth than the bottom 90 percent combined, it is no wonder that a considerable number of those on the bottom should try to recoup illegally some of the mal-distributed wealth they cannot obtain legally. (In this they are encouraged by the bad example of the ruling class, whose parasitic ways of making a living would be classified as criminal if the mechanisms for defining “criminal behaviour” were not controlled by the ruling class itself.) And most of the remaining “crimes against persons” can be traced to the alienation, dehumanisation, frustration, rage, and other negative emotions produced by the inhumane and unjust economic system.

Thus it is only in our societies like ours, with their wholesale manufacture of many different kinds of criminals, that punishment appears to be the only possible way to discourage “crime.” From the left-libertarian perspective, however, the punitive approach is a band-aid measure that does not get to the real root of the problem.
pay taxes to the US government. The regime at Ford could not restrict their liberty as no one forced them to work for the company. Needless to say, an “anarcho”-capitalist would reject out of hand the argument that no-one forced the citizen to entry or remain in the USA and so they consented to taxation, the government’s laws and so on.

This is more than a history lesson. Such private police forces are on the rise again (see “Armed and Dangerous: Private Police on the March” by Mike Zielinski, Covert Action Quarterly, no. 54, Fall, 1995 for example). This system of private police (as demonstrated by Ford) is just one of the hidden aspects of Caplan’s comment that the “anarcho”-capitalist “typically hails modern society’s increasing reliance on private security guards... and other demonstrations of the free market’s ability to supply the defensive and legal services normally assumed to be of necessity a government monopoly.”

Needless to say, private police states are not a step forward in anarchist eyes.

Caplan:

“Unlike some left-anarchists, the anarcho-capitalist has no objection to punishing criminals; and he finds the former’s claim that punishment does not deter crime to be the height of naivete. Traditional punishment might be meted out after a conviction by a neutral arbitrator; or a system of monetary restitution (probably in conjunction with a prison factory system) might exist instead.”

Let us note first that in disputes between the capitalist class and the working class, there would be no “neutral arbitrator,” because the rich would either own the arbitration company or influence control it through the power of the purse (see section F.6). In addition, “successful” arbitrators would also be wealthy, therefore making neutrality even more unlikely. Moreover, given that the laws the “neutral arbitrator” would be using are based on capitalist prop-

alism nevertheless — and liberalism is not anarchism. To reduce anarchism so is to destroy what makes anarchism a unique political theory and movement:

“anarchism does derive from liberalism and socialism both historically and ideologically ... In a sense, anarchists always remain liberals and socialists, and whenever they reject what is good in either they betray anarchism itself ... We are liberals but more so, and socialists but more so.” [Nicholas Walter, Reinventing Anarchy, p. 44]

In other words, “anarcho”-capitalism is a development of ideas which have little in common with anarchism. Jeremy Jennings, in his overview of anarchist theory and history, agrees:

“It is hard not to conclude that these ideas [“anarcho”-capitalism] — with roots deep in classical liberalism — are described as anarchist only on the basis of a misunderstanding of what anarchism is.” [Contemporary Political Ideologies, Roger Eatwell and Anthony Wright (eds.), p. 142]

Barbara Goodwin also agrees that the “anarcho”-capitalists’ “true place is in the group of right-wing libertarians” not in anarchism [Using Political Ideas, p. 148]. Indeed, that “anarcho”-capitalism is an off-shoot of classical liberalism is a position Murray Rothbard would agree with, as he states that right-wing Libertarians constitute “the vanguard of classical liberalism.” [quoted by Ulrike Heider, Anarchism: Left, Right and Green, p. 95] Unfortunately for this perspective anarchism is not liberalism and liberalism is not anarchism. And equally as unfortunate (this time for the anarchist movement!) “anarcho”-capitalism “is judged to be anarchism largely because some anarcho-capitalists say they are ‘anarchists’ and because they criticise the State.” [Peter Sabatini,
However, being opposed to the state is a necessary but not sufficient condition for being an anarchist (as can be seen from the history of the anarchist movement). Brian Morris puts it well when he writes:

“The term anarchy comes from the Greek, and essentially means ‘no ruler.’ Anarchists are people who reject all forms of government or coercive authority, all forms of hierarchy and domination. They are therefore opposed to what the Mexican anarchist Flores Magon called the ‘sombre trinity’ — state, capital and the church. Anarchists are thus opposed to both capitalism and to the state, as well as to all forms of religious authority. But anarchists also seek to establish or bring about by varying means, a condition of anarchy, that is, a decentralised society without coercive institutions, a society organised through a federation of voluntary associations. Contemporary ‘right-wing’ libertarians ... who are often described as ‘anarcho-capitalists’ and who fervently defend capitalism, are not in any real sense anarchists.” [Op. Cit., p. 38]

Rather than call themselves by a name which reflects their origins in liberalism (and not anarchism), the “anarcho”-capitalists have instead seen fit to try and appropriate the name of anarchism and, in order to do so, ignore key aspects of anarchist theory in the process. Little wonder, then, they try and prove their anarchist credentials via dictionary definitions rather than from the anarchist movement itself (see next section).

Caplan’s attempt in his FAQ is an example to ignore individualist anarchist theory and history. Ignored is any attempt to understand their ideas on property and instead Caplan just concentrates on the fact they use the word. Caplan also ignores:

The private police attacked women workers handing out pro-union handbills and gave them “a serve beating.” At Kansas and Dallas “similar beatings were handed out to the union men.” [Op. Cit., p. 34] This use of private police to control the work force was not unique. General Motors “spent one million dollars on espionage, employing fourteen detective agencies and two hundred spies at one time [between 1933 and 1936]. The Pinkerton Detective Agency found anti-unionism its most lucrative activity.” [Op. Cit., p. 32] We must also note that the Pinkerton’s had been selling their private police services for decades before the 1930s. In the 1870s, they had infiltrated and destroyed the Molly Maguires (a secret organisation Irish miners had developed to fight the coal bosses). For over 60 years the Pinkerton Detective Agency had “specialised in providing spies, agent provocateurs, and private armed forces for employers combating labour organisations.” By 1892 it “had provided its services for management in seventy major labour disputes, and its 2 000 active agents and 30 000 reserves totalled more than the standing army of the nation.” [Jeremy Brecher, Strike!, p. 9 and p. 55] With this force available, little wonder unions found it so hard to survive in the USA. Given that unions could be considered as “defence” agencies for workers, this suggests a picture of how “anarcho”-capitalism may work in practice.

It could be argued that, in the end, the union was recognised by the Ford company. However, this occurred after the New Deal was in place (which helped the process), after years of illegal activity (by definition union activism on Ford property was an illegal act) and extremely militant strikes. Given that the union agreement occurred nearly 40 years after Ford was formed and in a legal situation violently at odds with “anarcho”-capitalism (or even minimal statist capitalism), we would be justified in wondering if unionisation would ever have occurred at Ford and if Ford’s private police state would ever have been reformed.

Of course, from an “anarcho”-capitalist perspective the only limitation in the Ford workers’ liberty was the fact they had to
and the result was the emergence of the corporate America that “anarcho”-capitalists say they oppose.

Caplan argues that “liquor-store owners” do not generally kill each other over turf. This is true (but then again they do not have access to their own private cops currently so perhaps this could change). But the company owners who created their own private police forces and armies in America’s past did allow their goons to attack and murder union organisers and strikers. Let us look at Henry Ford’s Service Department (private police force) in action:

“In 1932 a hunger march of the unemployed was planned to march up to the gates of the Ford plant at Dearborn... The machine guns of the Dearborn police and the Ford Motor Company’s Service Department killed [four] and wounded over a score of others... Ford was fundamentally and entirely opposed to trade unions. The idea of working men questioning his prerogatives as an owner was outrageous... [T]he River Rouge plant... was dominated by the autocratic regime of Bennett’s service men. Bennett organised and trained the three and a half thousand private policemen employed by Ford. His task was to maintain discipline amongst the work force, protect Ford’s property [and power], and prevent unionisation... Frank Murphy, the mayor of Detroit, claimed that ‘Henry Ford employs some of the worst gangsters in our city.’ The claim was well based. Ford’s Service Department policed the gates of his plants, infiltrated emergent groups of union activists, posed as workers to spy on men on the line... Under this tyranny the Ford worker had no security, no rights. So much so that any information about the state of things within the plant could only be freely obtained from ex-Ford workers.” [Huw Beynon, Working for Ford, pp. 29–30]

In fact, the only things considered useful seems to be the individualist anarchist’s support for free agreement (something Kropotkin also agreed with) and their use of the word “property.” But even a cursory investigation indicates the non-capitalist nature of their ideas on property and the socialistic nature of their theories.

Perhaps Caplan should ponder these words of Kropotkin supporters of the “individualist anarchism of the American Proudhonians... soon realise that the individualisation they so highly praise is not attainable by individual efforts, and... abandon the ranks of the anarchists, and are driven into the liberal individualism of the classical economist.” [Kropotkin’s Revolutionary Pamphlets, p. 297]

Caplan seems to confuse the end of the ending place of ex-anarchists with their starting point. As can be seen from his attempt to co-opt Proudhon, Spooner and Tucker he has to ignore their ideas and rewrite history.

6 — Appendix: Defining Anarchism

In his Appendix “Defining Anarchism” we find that Caplan attempts to defend his dictionary definition of anarchism. He does this by attempting to refute two arguments, The Philological Argument and the Historical Argument.
Taking each in turn we find:

Caplan’s definition of “The Philological Argument” is as follows:

“Several critics have noted the origin of the term ‘anarchy,’ which derives from the Greek ‘arkhos,’ meaning ‘ruler,’ and the prefix an-: meaning ‘without.’ It is therefore suggested that in my definition the word ‘government’ should be replaced with the word ‘domination’ or ‘rulership’; thus re-written, it would then read: ‘The theory or doctrine that all forms of rulership are unnecessary, oppressive, and undesirable and should be abolished.’”

Caplan replies by stating that:

“This is all good and well, so long as we realise that various groups of anarchists will radically disagree about what is or is not an instance of ‘rulership.’”

However, in order to refute this argument by this method, he has to ignore his own methodology. A dictionary definition of ruler is “a person who rules by authority.” and “rule” is defined as “to have authoritative control over people” or “to keep (a person or feeling etc.) under control, to dominate” [The Oxford Study Dictionary]

Hierarchy by its very nature is a form of rulership (hier-archy) and is so opposed by anarchists. Capitalism is based upon wage labour, in which a worker follows the rules of their boss. This is obviously a form of hierarchy, of domination. Almost all people (excluding die-hard supporters of capitalism) would agree that being told what to do, when to do and how to do by a boss is a form of rulership. Anarchists, therefore, argue that “economic exploitation and political domination . . . are] two continually interacting aspects of the same thing — the subjection of man by man.” [Errico Malatesta, Life and Ideas, p. 147] Rocker made the same point, arguing that the “exploitation of man by man and the domination of

in areas which need it most will be far higher than for areas which do not need it. As poor areas are generally more crime afflicted than rich areas, “anarcho”-capitalism may see vast sections of the population not able to afford “protection” (just as they may not be able to afford health care and other essential services). Indeed, “protection services” which try to provide cheap services to “high-risk” areas will be at a competitive disadvantage in relation to those who do not, as the “high-risk” areas will hurt profits and companies without “high-risk” “customers” could undercut those that have.

Caplan:

‘Anarcho-capitalists generally give little credence to the view that their ‘private police agencies’ would be equivalent to today’s Mafia — the cost advantages of open, legitimate business would make ‘criminal police’ uncompetitive. (Moreover, they argue, the Mafia can only thrive in the artificial market niche created by the prohibition of alcohol, drugs, prostitution, gambling, and other victimless crimes. Mafia gangs might kill each other over turf, but liquor-store owners generally do not.)’

As we have pointed out in section F.6, the “Mafia” objection to “anarcho”-capitalist defence companies is a red herring. The biggest problem would not be “criminal police” but the fact that working people and tenants would subject to the rules, power and laws of the property owners, the rich would be able to buy better police protection and “justice” than the poor and that the “general” law code these companies would defend would be slanted towards the interests and power of the capitalist class (defending capitalist property rights and the proprietors power). And as we also noted, such a system has already been tried in 19th-century and early 20th America, with the result that the rich reduced the working class to a serf-like existence, capitalist production undermined independent producers (to the annoyance of individualist anarchists at the time),
faith” to insure their profitability by agreeing not to compete aggressively against each other in order to exploit the market. Obviously in “anarcho”-capitalism the firms in question only use their powers for good!

Needless to say, the "anarcho"-capitalist will object and argue that competition will ensure that collusion will not occur. However, given that co-operation is required between all firms in order to provide the commodity “peace” this places the "anarcho"-capitalist in a bind. As Caplan notes, “aggressive” firms are “likely to attract only high-risk clients and thus suffer from extraordinarily high costs.” From the perspective of the colluding firms, a new entry into their market is, by definition, aggressive. If the colluding firms do not co-operate with the new competitor, then it will suffer from “extraordinarily high costs” and either go out of business or join the co-operators. If the new entry could survive in the face of the colluding firms hostility then so could “bad” defence firms, ones that ignored the market standards.

So the "anarcho"-capitalist faces two options. Either an “aggressive” firm cannot survive or it can. If it cannot then the very reason why it cannot ensures that collusion is built into the market and while the system is peaceful it is based on an effective monopoly of colluding firms who charge monopoly profits. This, in effect, is a state under the “anarcho”-capitalist’s definition as a property owner cannot freely select their own “protection” — they are limited to the firms (and laws) provided by the co-operating firms. Or an “aggressive” firm can survive, violence is commonplace and chaos ensures.

Caplan’s passing reference to the “adverse selection problem” in medical insurance suggests another problem with “anarcho”-capitalism. The problem is that high-risk people are especially likely to seek protection, which drives up the price for, as “anarcho”-capitalists themselves note, areas with high crime levels “will be bad for profits,” as hardware and personnel costs will be correspondingly higher. This means that the price for “protection” man over man are inseparable, and each is the condition of the other.” [Anarcho-Syndicalism, p. 18]

Thus Caplan is ignoring the meaning of words to state that “on its own terms this argument fails to exclude anarcho-capitalists” because they define rulership to exclude most forms of archy! Hardly convincing.

Strangely enough, “anarcho”-capitalist icon Murray Rothbard actually provides evidence that the anarchist position is correct. He argues that the state “arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area.” [The Ethics of Liberty, p. 170] This is obviously a form of rulership. However, he also argues that “[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc.” [Op. Cit., p. 173] Which, to state the obvious, means that both the state and property is marked by an “ultimate decision-making power” over a given territory. The only “difference” is that Rothbard claims the former is “just” (i.e. “justly” acquired) and the latter is “unjust” (i.e. acquired by force). In reality of course, the modern distribution of property is just as much a product of past force as is the modern state. In other words, the current property owners have acquired their property in the same unjust fashion as the state has its. If one is valid, so is the other. Rothbard (and “anarcho”-capitalists in general) are trying to have it both ways.

Rothbard goes on to show why statism and private property are essentially the same thing:

“If the State may be said too properly own its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there is no private property in its area, because it really owns the entire land surface. So long as the State permits its subjects to leave its territory, then, it can be said to act as does any other

Of course Rothbard does not draw the obvious conclusion. He wants to maintain that the state is bad and property is good while drawing attention to their obvious similarities! Ultimately Rothbard is exposing the bankruptcy of his own politics and analysis. According to Rothbard, something can look like a state (i.e. have the "ultimate decision-making power" over an area) and act like a state (i.e. "make rules for everyone" who lives in an area, i.e. govern them) but not be a state. This not a viable position for obvious reasons.

Thus to claim, as Caplan does, that property does not generate "rulership" is obviously nonsense. Not only does it ignore the dictionary definition of rulership (which, let us not forget, is Caplan's own methodology) as well as commonsense, it obviously ignores what the two institutions have in common. If the state is to be condemned as "rulership" then so must property — for reasons, ironically enough, Rothbard makes clear!

Caplan’s critique of the "Philological Argument" fails because he tries to deny that the social relationship between worker and capitalist and tenant and landlord is based upon archy, when it obviously is. To quote Proudhon, considered by Tucker as "the Anarchist par excellence," the employee “is subordinated, exploited: his permanent condition is one of obedience.” Without "association" (i.e. co-operative workplaces, workers’ self-management) there would be “two industrial castes of masters and wage-workers which is repugnant to a free and democratic society,” castes “related as subordinates and superiors.” [The General Idea of the Revolution, p. 216]

Moving on, Caplan defines the Historical Argument as:

“A second popular argument states that historically, the term ‘anarchism’ has been clearly linked with anarcho-socialists, anarcho-communists, anarcho-syndicalists, forces of opposing warlords, because such conflicts allow the combatants a chance to "prove their manhood," vent their aggression, obtain honours and titles, advance in the ranks, obtain spoils, etc. The “anarcho” capitalist has given no reason why warfare among legalised gangs would not continue under industrial feudalism, except the extremely lame reason that it would not be profitable — a reason that has never prevented war in any known feudal society.

It should be noted that the above is not an argument from "original sin." Feudal societies are characterised by conflict between opposing "protection agencies" not because of the innate depravity of human beings but because of a social structure based on private property and hierarchy, which brings out the latent capacities for violence, domination, greed, etc. that humans have by creating a financial incentive to be so. But this is not to say that a different social structure would not bring out latent capacities for much different qualities like sharing, peaceableness, and co-operation, which human beings also have. In fact, as Kropotkin argued in Mutual Aid and as recent anthropologists have confirmed in greater detail, ancient societies based on communal ownership of productive assets and little social hierarchy were basically peaceful, with no signs of warfare for thousands of years.

However, let us assume that such a competitive system does actually work as described. Caplan, in effect, argues that competition will generate co-operation. This is due to the nature of the market in question — defence (and so peace) is dependent on firms working together as the commodity "peace" cannot be supplied by one firm. However, this co-operation does not, for some reason, become collusion between the firms in question. According to "anarcho"-capitalists this competitive system not only produces co-operation, it excludes "defence" firms making agreements to fix monopoly profits (i.e. co-operation that benefits the firms in question). Why does the market produce beneficial co-operation to everyone but not collusion for the firms in question? Collusion is when firms have “business relationships” and "negotiate in good
parallel to the well-known ‘adverse selection problem’ in e.g. medical insurance — the problem being that high-risk people are especially likely to seek insurance, which drives up the price when riskiness is hard for the insurer to discern or if regulation requires a uniform price regardless of risk).

The theory that “failure to peacefully arbitrate will yield to jointly destructive warfare, which will be bad for profits” can be faulted in two ways. Firstly, if warfare would be bad for profits, what is to stop a large “defence association” from ignoring a smaller one’s claim? If warfare were “bad for business,” it would be even worse for a small company without the capital to survive a conflict, which could give big “defence associations” the leverage to force compliance with their business interests. Price wars are often bad for business, but companies sometimes start them if they think they can win. Needless to say, demand would exist for such a service (unless you assume a transformation in the “human nature” generated by capitalism — an unlikely situation and one “anarchist”-capitalists usually deny is required for their system to work). Secondly — and this is equally, if not more, likely — a “balance of power” method to stop warfare has little to recommend it from history. This can be seen from the First World War and feudal society.

What the “anarchist”-capitalist is describing is essentially a system of “industrial feudalism” wherein people contract for “protection” with armed gangs of their choice. Feudal societies have never been known to be peaceful, even though war is always “unprofitable” for one side or the other or both. The argument fails to consider that “defence companies,” whether they be called police forces, paramilitaries or full-blown armies, tend to attract the “martial” type of authoritarian personality, and that this type of “macho” personality thrives on and finds its reason for existence in armed conflict and other forms of interpersonal violence and intimidation. Hence feudal society is continually wracked by battles between the and other enemies of the capitalist system. Hence, the term ‘anarcho-capitalism’ is a strange oxymoron which only demonstrates ignorance of the anarchist tradition.”

He argues that “even if we were to accept the premise of this argument — to wit, that the meaning of a word is somehow determined by its historical usage — the conclusion would not follow because the minor premise is wrong. It is simply not true that from its earliest history, all anarchists were opponents of private property, free markets, and so on.”

Firstly, anarchism is not just a word, but a political idea and movement and so the word used in a political context is associated with a given body of ideas. You cannot use the word to describe something which has little or nothing in common with that body of ideas. You cannot call Marxism “anarchism” simply because they share the anarchist opposition to capitalist exploitation and aim for a stateless society, for example.

Secondly, it is true that anarchists like Tucker were not against the free market, but they did not consider capitalism to be defined by the free market but by exploitation and wage labour (as do all socialists). In this they share a common ground with Market Socialists who, like Tucker and Proudhon, do not equate socialism with opposition to the market or capitalism with the “free market.” The idea that socialists oppose “private property, free markets, and so on” is just an assumption by Caplan. Proudhon, for example, was not opposed to competition, “property” (in the sense of possession) and markets but during his lifetime and up to the present date he is acknowledged as a socialist, indeed one of the greatest in French (if not European) history. Similarly we find Rudolf Rocker writing that the Individualist Anarchists “all agree on the point that man be given the full reward of his labour and recognised in this right the economic basis of all personal liberty. They regard free competition … as something inherent in human nature … They answered the socialists of other schools [emphasis added] who saw in free competition\[emphasis added\]...
one of the destructive elements of capitalistic society that the evil lies in the fact that today we have too little rather than too much competition.” [quoted by Herbert Read, A One-Man Manifesto, p. 147]

Rocker obviously considered support for free markets as compatible with socialism. In other words, Caplan’s assumption that all socialists oppose free markets, competition and so on is simply false — as can be seen from the history of the socialist movement. What socialists do oppose is capitalist exploitation — socialism “in its wide, generic, and true sense” was an “effort to abolish the exploitation of labour by capital.” [Peter Kropotkin, Kropotkin’s Revolutionary Pamphlets, p. 169] In this sense the Individualist Anarchists are obviously socialists, as Tucker and Labadie constantly pointed out.

In addition, as we have proved elsewhere, Tucker was opposed to capitalist private property just as much as Kropotkin was. Moreover, it is clear from Tucker’s works that he considered himself an enemy of the capitalist system and called himself a socialist. Thus Caplan’s attempt to judge the historical argument on its own merits fails because he has to rewrite history to do so.

Caplan is right to state that the meaning of words change over time, but this does not mean we should run to use dictionary definitions. Dictionaries rarely express political ideas well — for example, most dictionaries define the word “anarchy” as “chaos” and “disorder.” Does that mean anarchists aim to create chaos? Of course not. Therefore, Caplan’s attempt to use dictionary definitions is selective and ultimately useless — anarchy as a political movement cannot be expressed by dictionary definitions and any attempt to do so means to ignore history.

The problems in using dictionary definitions to describe political ideas can best be seen from the definition of the word “Socialism.” According to the Oxford Study Dictionary Socialism is “a political and economic theory advocating that land, resources, and the chief industries should be owned and managed by the State.” The Webster’s Ninth New Collegiate Dictionary, conversely, defines socialism as “any of various economic and political theories

Of course, if landlords do “bundle” police services in their contracts this means that they are determining the monopoly of force over the property in question. Tenants would “consent” to the police force and the laws of the landlord in exactly the same way emigrants “consent” to the laws and government of, say, the USA when they move there. Rather than show the difference between statism and capitalism, Caplan has indicated their essential commonality. For the proletarian, property is but another form of state. For this reason anarchists would agree with Rousseau when he wrote that:

“That a rich and powerful man, having acquired immense possessions in lands, should impose laws on those who want to establish themselves there, and that he should only allow them to do so on condition that they accept his supreme authority and obey all his wishes; that, I can still conceive. But how can I conceive such a treaty, which presupposes anterior rights, could be the first foundation of law? Would not this tyrannical act contain a double usurpation: that on the ownership of the land and that on the liberty of the inhabitants?” [The Social Contract and Discourses, p. 316]

Caplan:

“The underlying idea is that contrary to popular belief, private police would have strong incentives to be peaceful and respect individual rights. For first of all, failure to peacefully arbitrate will yield to jointly destructive warfare, which will be bad for profits. Second, firms will want to develop long-term business relationships, and hence be willing to negotiate in good faith to insure their long-term profitability. And third, aggressive firms would be likely to attract only high-risk clients and thus suffer from extraordinarily high costs (a problem
the only change would be that drug-dealing and prostitution would be legalised and gangs could start calling themselves “defence companies.”

Caplan:

“In his ideal society, these market alternatives to government services would take over all legitimate security services. One plausible market structure would involve individuals subscribing to one of a large number of competing police services; these police services would then set up contracts or networks for peacefully handling disputes between members of each others’ agencies. Alternately, police services might be ‘bundled’ with housing services, just as landlords often bundle water and power with rental housing, and gardening and security are today provided to residents in gated communities and apartment complexes.”

This is a scenario designed with the upper classes in mind and a few working class people, i.e. those with some property (for example, a house) — sometimes labelled the “middle class”. But under capitalism, the tendency toward capital concentration leads to increasing wealth polarisation, which means a shrinking “middle class” (i.e. working class with decent jobs and their own homes) and a growing “underclass” (i.e. working class people without a decent job). Ironically enough, America (with one of the most laissez-faire capitalist systems) is also the Western nation with the smallest “middle class” and wealth concentration has steadily increased since the 1970s. Thus the number of people who could afford to buy protection and “justice” from the best companies would continually decrease. For this reason there would be a growing number of people at the mercy of the rich and powerful, particularly when it comes to matters concerning employment, which is the main way in which the poor would be victimised by the rich and powerful (as is indeed the case now).

advocating collective or government ownership and administration of the means of production and distribution of goods.”

Clearly the latter source has a more accurate definition of socialism than the former, by allowing for “collective” versus solely “State” control of productive means. Which definition would be better? It depends on the person involved. A Marxist, for example, could prefer the first one simply to exclude anarchism from the socialist movement, something they have continually tried to do. A right-libertarian could, again, prefer the first, for obvious reasons. Anarchists would prefer the second, again for obvious reasons. However neither definition does justice to the wide range of ideas that have described themselves as socialist.

Using dictionaries as the basis of defining political movements ensures that one’s views depend on which dictionary one uses, and when it was written, and so on. This is why they are not the best means of resolving disputes — if resolution of disputes is, in fact, your goal.

Both Kropotkin and Tucker stated that they were socialists and that anarchism was socialistic. If we take the common modern meaning of the word as state ownership as the valid one then Tucker and Kropotkin are not socialists and no form of anarchism is socialist. This is obviously nonsense and it shows the limitations of using dictionary definitions on political theories.

Therefore Caplan’s attempt to justify using the dictionary definition fails. Firstly, because the definitions used would depend which dictionary you use. Secondly, dictionary definitions cannot capture the ins and outs of a political theory or its ideas on wider subjects.

Ironically enough, Caplan is repeating an attempt made by State Socialists to deny Individualist Anarchism its socialist title (see “Socialism and the Lexicographers” in Instead of a Book). In reply to this attempt, Tucker noted that:
“The makers of dictionaries are dependent upon specialists for their definitions. A specialist’s definition may be true or it may be erroneous. But its truth cannot be increased or its error diminished by its acceptance by the lexicographer. Each definition must stand on its own merits.” [Instead of a Book, p. 369]

And Tucker provided many quotes from other dictionaries to refute the attempt by the State Socialists to define Individualist Anarchism outside the Socialist movement. He also notes that any person trying such a method will “find that the Anarchistic Socialists are not to be stripped of one half of their title by the mere dictum of the last lexicographer.” [Op. Cit., p. 365]

Caplan should take note. His technique been tried before and it failed then and it will fail again for the same reasons.

As far as his case against the Historical Argument goes, this is equally as flawed. Caplan states that:

"Before the Protestant Reformation, the word ‘Christian,’ had referred almost entirely to Catholics (as well as adherents of the Orthodox Church) for about one thousand years. Does this reveal any linguistic confusion on the part of Lutherans, Calvinists, and so on, when they called themselves ‘Christians’? Of course not. It merely reveals that a word’s historical usage does not determine its meaning."

However, as analogies go this is pretty pathetic. Both the Protestants and Catholics followed the teachings of Christ but had different interpretations of it. As such they could both be considered Christians — followers of the Bible. In the case of anarchism, there are two main groupings — individualist and social. Both Tucker and Bakunin claimed to follow, apply and develop Proudhon’s ideas (and share his opposition to both state and capitalism) and so are part of the anarchist tradition.

That the law code of the state is being defended by private companies is hardly a step towards anarchy. This indicates exactly why an “anarcho”-capitalist system will be a collection of private states united around a common, capitalistic, and hierarchical law code. In addition, this system does not abolish the monopoly of government over society represented by the “general libertarian law code,” nor the monopoly of power that owners have over their property and those who use it. The difference between public and private statism is that the boss can select which law enforcement agents will enforce his or her power.

The threat to freedom and justice for the working class is clear. The thug-like nature of many private security guards enforcing private power is well documented. For example, the beating of protesters by “private cops” is a common sight in anti-motorway campaigns or when animal right activists attempt to disrupt fox hunts. The shooting of strikers during strikes occurred during the peak period of American laissez-faire capitalism. However, as most forms of protest involve the violation of “absolute” property rights, the “justice” system under “anarcho”-capitalism would undoubtedly fine the victims of such attacks by private cops.

It is also interesting that the “anarcho”-capitalist “hails” what are actually symptoms of social breakdown under capitalism. With increasing wealth disparity, poverty, and chronic high unemployment, society is becoming polarised into those who can afford to live in secure, gated communities and those who cannot. The latter are increasingly marginalised in ghettos and poor neighbourhoods where drug-dealing, prostitution, and theft become main forms of livelihood, with gangs offering a feudalistic type of “protection” to those who join or pay tribute to them. Under “anarcho”-capitalism,
the 19th century, e.g. the coal towns that were virtually owned by private coal companies. We have already discussed the negative impact of that experiment on the working class in section F.6.2. Our objection is not that such privatisation cannot be done, but that it is an error to call it a form of anarchism. In reality it is an extreme form of laissez-faire capitalism, which is the exact opposite of anarchism. The defence of private power by private police is hardly a move towards the end of authority, nor are collections of private states an example of anarchism.

Indeed, that “anarcho”-capitalism does not desire the end of the state, just a change in its form, can be seen from Caplan’s own arguments. He states that “the remaining functions of the state” should be “turned over to the free market.” Thus the state (and its functions, primarily the defence of capitalist property rights) is privatised and not, in fact, abolished. In effect, the “anarcho”-capitalist seeks to abolish the state by calling it something else.

Caplan:

“The anarcho-capitalist typically hails modern society’s increasing reliance on private security guards, gated communities, arbitration and mediation, and other demonstrations of the free market’s ability to supply the defensive and legal services normally assumed to be of necessity a government monopoly.”

It is questionable that “modern society” as such has increased its reliance on “private security guards, gated communities” and so on. Rather, it is the wealthy who have increased their reliance on these forms of private defence. Indeed it is strange to hear a right-libertarian even use the term “society” as, according to that ideology, society does not exist! Perhaps the term “society” is used to hide the class nature of these developments? As for “gated communities” it is clear that their inhabitants would object if the rest of society gated themselves from them! But such is the logic of such developments — but the gated communities want it both ways. They

The anarchist movement was based upon applying the core ideas of Proudhon (his anti-statism and socialism) and developing them in the same spirit, and these ideas find their roots in socialist history and theory. For example, William Godwin was claimed as an anarchist after his death by the movement because of his opposition to both state and private property, something all anarchists oppose. Similarly, Max Stirner’s opposition to both state and capitalist property places him within the anarchist tradition.

Given that we find fascists and Nazis calling themselves “republicans,” “democrats,” even “liberals” it is worthwhile remembering that the names of political theories are defined not by who use them, but by the ideas associated with the name. In other words, a fascist cannot call themselves a “liberal” any more than a capitalist can call themselves an “anarchist.” To state, as Caplan does, that the historical usage of a word does not determine its meaning results in utter confusion and the end of meaningful political debate. If the historical usage of a name is meaningless will we soon see fascists as well as capitalists calling themselves anarchists? In other words, the label “anarcho-capitalism” is a misnomer, pure and simple, as all anarchists have opposed capitalism as an authoritarian system based upon exploitation and wage slavery.

To ignore the historical usage of a word means to ignore what the movement that used that word stood for. Thus, if Caplan is correct, an organisation calling itself the “Libertarian National Socialist Party,” for example, can rightly call itself libertarian for “a word’s historical usage does not determine its meaning.” Given that right-libertarians in the USA have tried to steal the name “libertarian” from anarchists and anarchist influenced socialists, such a perspective on Caplan’s part makes perfect sense. How ironic that a movement that defends private property so strongly continually tries to steal names from other political tendencies.

Perhaps a better analogy for the conflict between anarchism and “anarcho”-capitalism would be between Satanists and Christians. Would we consider as Christian a Satanist grouping claiming...
to be Christian? A grouping that rejects everything that Christians believe but who like the name? Of course not. Neither would we consider as a right-libertarian someone who is against the free market or someone as a Marxist who supports capitalism. However, that is what Caplan and other "anarcho"-capitalists want us to do with anarchism.

Both social and individualist anarchists defined their ideas in terms of both political (abolition of the state) and economic (abolition of exploitation) ideas. Kropotkin defined anarchism as "the no-government form of socialism" while Tucker insisted that anarchism was "the abolition of the State and the abolition of usury." In this they followed Proudhon who stated that "[w]e do not admit the government of man by man any more than the exploitation of man by man." [quoted by Peter Marshall, Demanding the Impossible, p. 245]

In other words, a political movement’s economic ideas are just as much a part of its theories as their political ideas. Any attempt to consider one in isolation from the other kills what defines the theory and makes it unique. And, ultimately, any such attempt, is a lie:

"[classical liberalism] is in theory a kind of anarchy without socialism, and therefore simply a lie, for freedom is impossible without equality, and real anarchy cannot exist without solidarity, without socialism." [Errico Malatesta, Anarchy, p. 46]

Therefore Caplan’s case against the Historical Argument also fails — "anarcho-capitalism" is a misnomer because anarchism has always, in all its forms, opposed capitalism. Denying and re-writing history is hardly a means of refuting the historical argument. Caplan ends by stating:

"Let us designate anarchism (1) anarchism as you define it. Let us designate anarchism (2) anarchism as I and the
tries, who overtook her, one after another, in the volume of manufacturing production and in exports and finally in real income per head.” [Op. Cit., p. xxvi] Indeed, “America’s growth and productivity rates were higher when tariffs were steep than when they came down.” [Larry Elliot and Dan Atkinson, Op. Cit., p. 277]

It is possible to explain almost everything that has ever happened in the world economy as evidence not of the failure of markets but rather of what happens when markets are not able to operate freely. Indeed, this is the right-libertarian position in a nutshell. However, it does seem strange that movements towards increased freedom for markets produce worse results than the old, more regulated, way. Similarly it seems strange that the country that embraced laissez-faire and free trade (Britain) did worse than those which embraced protectionism (USA, Germany, etc.).

It could always be argued that the protectionist countries had embraced free trade their economies would have done even better. This is, of course, a possibility — if somewhat unlikely. After all, the argument for laissez-faire and free trade is that it benefits all parties, even if it is embraced unilaterally. That Britain obviously did not benefit suggests a flaw in the theory (and that no country has industrialised without protectionism suggests likewise). Unfortunately, free-market capitalist economics lends itself to a mind frame that ensures that nothing could happen in the real world that would could ever change its supporters minds about anything.

Free trade, it could be argued, benefits only those who have established themselves in the market — that is, have market power. Thus Britain could initially benefit from free trade as it was the only industrialised nation (and even its early industrialisation cannot be divorced from its initial mercantilist policies). This position of strength allowed them to dominate and destroy possible competitors (as Kaldor points out, “[w]here the British succeeded in gaining free entry for its goods… it had disastrous effects on local manufactures and employment.” [Op. Cit., p. xxvi]). This would revert the other country back towards agriculture, an industry with dimin-

American Heritage College Dictionary define it. This is a FAQ about anarchism (2).”

Note that here we see again how the dictionary is a very poor foundation upon to base an argument. Again using Webster’s Ninth New Collegiate Dictionary, we find under “anarchist” — “one who rebels against any authority, established order, or ruling power.” This definition is very close to that which “traditional” anarchists have — which is the basis for our own opposition to the notion that anarchism is merely rebellion against State authority.

Clearly this definition is at odds with Caplan’s own view; is Webster’s then wrong, and Caplan’s view right? Which view is backed by the theory and history of the movement? Surely that should be the basis of who is part of the anarchist tradition and movement and who is not? Rather than do this, Caplan and other “anarcho”-capitalists rush to the dictionary (well, those that do not define anarchy as “disorder”). This is for a reason as anarchism as a political movement as always been explicitly anti-capitalist and so the term “anarcho”-capitalism is an oxymoron.

What Caplan fails to even comprehend is that his choices are false. Anarchism can be designated in two ways:

(1). Anarchism as you define it
(2). Anarchism as the anarchist movement defines it and finds expression in the theories developed by that movement.

Caplan chooses anarchism (1) and so denies the whole history of the anarchist movement. Anarchism is not a word, it is a political theory with a long history which dictionaries cannot cover. Therefore any attempt to define anarchism by such means is deeply flawed and ultimately fails.

That Caplan’s position is ultimately false can be seen from the “anarcho”-capitalists themselves. In many dictionaries anarchy is
defined as “disorder,” “a state of lawlessness” and so on. Strangely enough, no "anarcho"-capitalist ever uses these dictionary definitions of “anarchy”! Thus appeals to dictionaries are just as much a case of defining anarchism as you desire as not using dictionaries. Far better to look at the history and traditions of the anarchist movement itself, seek out its common features and apply those as criteria to those seeking to include themselves in the movement. As can be seen, “anarcho”-capitalism fails this test and, therefore, are not part of the anarchist movement. Far better for us all if they pick a new label to call themselves rather than steal our name.

Although most anarchists disagree on many things, the denial of our history is not one of them.

Replies to Some Errors and Distortions in Bryan Caplan’s “Anarchist Theory FAQ” version 4.1.1.

There have been a few “anarchist” FAQ’s produced before. Bryan Caplan’s anarchism FAQ is one of the more recent. While appearing to be a “neutral” statement of anarchist ideas, it is actually in large part an “anarcho”-capitalist FAQ. This can be seen by the fact that anarchist ideas (which he calls “left-anarchist”) are given less than half the available space while “anarcho”-capitalist dogma makes up the majority of it. Considering that anarchism has been around far longer than “anarcho”-capitalism and is the bigger and better established movement, this is surprising. Even his use of the term “left anarchist” is strange as it is never used by anarchists and ignores the fact that Individualist Anarchists like Tucker called themselves “socialists” and considered themselves part of the wider socialist movement. For anarchists, the expression “left anarchist” is meaningless as all anarchists are anti-capitalist. Thus the terms used to describe each “school” in his FAQ are biased (those whom Caplan calls “Left anarchists” do not

Randall Wray, Demand Constraints and Economic Growth. Given that the US is usually considered the most laissez-faire out of these 7 countries, Caplan’s claim of high progress for deregulated systems seems at odds with this evidence.

As far as technological innovation goes, it is also not clear that deregulation has aided that process. Much of our modern technology owns its origins to the US Pentagon system, in which public money is provided to companies for military R&D purposes. Once the technology has been proven viable, the companies involved can sell their public subsidised products for private profit. The computer industry (as we point out in section J.4.7) is a classic example of this — indeed it is unlikely whether we would have computers or the internet if we had waited for capitalists to develop them. So whether a totally deregulated capitalism would have as high a rate of technological progress is a moot point.

So, it seems likely that it is only the assumption that the free capitalist market will generate “an efficient allocation of resources and (more importantly) a high rate of economic progress.” Empirical evidence points the other way — namely, that state aided capitalism provides an approximation of these claims. Indeed, if we look at the example of the British Empire (which pursued a strong free trade and laissez-faire policy over the areas it had invaded) we can suggest that the opposite may be true. After 25 prosperous years of fast growth (3.5 per cent), after 1873 Britain had 40 years of slow growth (1.5 per cent), the last 14 years of which were the worse — with productivity declining, GDP stagnant and home investment halved. [Nicholas Kaldor, Further Essays on Applied Economics, p. 239] In comparison, those countries which embraced protectionism (such as Germany and the USA) industrialised successfully and become competitors with the UK. Indeed, these new competitors grew in time to be efficient competitors of Britain not only in foreign markets but also in Britain’s home market. The result was that “for fifty years Britain’s GDP grew very slowly relative to the more successful of the newer industrialised coun-
seen as contributing rather quickly to profits. Firms and economies can’t get richer by starving themselves, but stock market investors can get richer when the companies they own go hungry. As for the long term, well, that’s someone else’s problem.” [Wall Street, p. 171]

This means that resources are allocated to short term projects, those that enrich the investors now rather than produce long term growth and benefits later. This results in slower and more unstable investment than less market centred economies, as well as greater instability over the business cycle [Op. Cit., pp. 174–5] Thus the claim that capitalism results in the “efficient” allocation of resources is only true if we assume “efficient” equals highest profits for capitalists. As Henwood summarises, “the US financial system performs dismally at its advertised task, that of efficiently directing society’s savings towards their optimal investment pursuits. The system is stupefyingly expensive, gives terrible signals, and has surprisingly little to do with real investment.” [Op. Cit., p. 3]

Moreover, the claim that laissez-faire economies produce a high rate of economic progress can be questioned on the empirical evidence available. For example, from the 1970s onwards there has been a strong tendency towards economic deregulation. However, this tendency has been associated with a slow down of economic growth. For example, "[g]rowth rates, investment rates and productivity rates are all lower now than in the [Keynesian post-war] Golden Age, and there is evidence that the trend rate of growth — the underlying growth rate — has also decreased.” Before the Thatcher pro-market reforms, the British economy grew by 2.4% in the 1970s. After Thatcher’s election in 1979, growth decreased to 2% in the 1980s and to 1.2% in the 1990s. In the USA, we find a similar pattern. Growth was 4.4% in the 1960s, 3.2% in the 1970s, 2.8% in the 1980s and 1.9% in the first half of the 1990s [Larry Elliot and Dan Atkinson, The Age of Insecurity, p. 236]. Moreover, in terms of inflation-adjusted GDP per capita and productivity, the US had the worse performance out of the US, UK, Japan, Italy, France, Canada and Australia between 1970 and 1995 [Marc-Anfre Pigeon and L.
fact he e-mailed one of the authors of this FAQ on the issue that anarchists never used or use the term “left-anarchist” to describe social anarchism. He replied by arguing that the term “left-anarchist” had been used by Michel Foucault, who never claimed to be an anarchist, in one of his private letters! Strangely, he never posted his FAQ to the list again).

Therefore, as can be seen from these few examples, Caplan’s “FAQ” is blatantly biased towards “anarcho-capitalism” and based on the mis-characterisations and the dis-emphasis on some of the most important issues between “anarcho-capitalists” and anarchists. It is clear that his viewpoint is anything but impartial.

This section will highlight some of the many errors and distortions in that FAQ. Numbers in square brackets refer to the corresponding sections Caplan’s FAQ.

1 Is anarchism purely negative?

[1]. Caplan, consulting his American Heritage Dictionary, claims: “Anarchism is a negative; it holds that one thing, namely government, is bad and should be abolished. Aside from this defining tenet, it would be difficult to list any belief that all anarchists hold.”

The last sentence is ridiculous. If we look at the works of Tucker, Kropotkin, Proudhon and Bakunin (for example) we discover that we can, indeed list one more “belief that all anarchists hold.” This is opposition to exploitation, to usury (i.e. profits, interest and rent). For example, Tucker argued that “Liberty insists... on the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man.” [cited in Native American Anarchism — A Study of Left-Wing American Individualism by Eunice Schuster, p. 140] Such a position is one that Proudhon, Bakunin and Kropotkin would agree with.

In other words, anarchists hold two beliefs — opposition to government and opposition to exploitation. Any person which rejects

Furthermore, if we look at the stock market (a key aspect of any capitalist system) we discover a strong tendencies against the efficient allocation of resources. The stock market often experiences “bubbles” and becomes significantly over-valued. An inflated stock market badly distorts investment decisions. For example, if Internet companies are wildly over-valued then the sale of shares of new Internet companies or the providing of start-up capital will drain away savings that could be more productively used elsewhere. The real economy will pay a heavy price from such misdirected investment and, more importantly, resources are not efficiency allocated as the stock market skews resources into the apparently more profitable areas and away from where they could be used to satisfy other needs.

The stock market is also a source of other inefficiencies. Supporters of “free-market” capitalism always argued that the Stalinist system of central planning created a perverse set of incentives to managers. In effect, the system penalised honest managers and encouraged the flow of dis-information. This lead to information being distorted and resources inefficiently allocated and wasted. Unfortunately the stock market also creates its own set of perverse responses and mis-information. Doug Henwood argues that “something like a prisoners’ dilemma prevails in relations between managers and the stock market. Even if participants are aware of an upward bias to earnings estimates, and even if they correct for it, managers still have an incentive to try and fool the market. If you tell the truth, your accurate estimates will be marked down by a sceptical market. So its entirely rational for managers to boost profits in the short term, either through accounting gimmickry or by making only investments with quick paybacks.” He goes on to note that “[i]f the markets see high costs as bad, and low costs as good, then firms may shun expensive investments because they will be taken as signs of managerial incompetence. Throughout the late 1980s and early 1990s, the stock market rewarded firms announcing write-offs and mass firings — a bulimic strategy of management — since the cost cutting was
region does not mean everyone living there is “entitled” to it. In market economies, people are entitled to food according to their ability to produce it for themselves or to pay or swap for it. In capitalist economies, most people are entitled to food only if they can sell their labour/liberty to those who own the means of life (which increases the economic insecurity of wage workers).

If some group loses its entitlement to food, whether there is a decline in the available supply or not, a famine can occur. This may seem obvious, yet before — and after — Sen, famine studies have remained fixated on the drop in food available instead of whether specific social groups are entitled to it. Thus even a relatively successful economy can price workers out of the food market (a depressed economy brings the contradiction between need and profit — use value and exchange value — even more to the forefront). This “pricing out” can occur especially if food can get higher prices (and so profits) elsewhere — for example the Irish famine of 1848 and sub-Saharan famines of the 1980s saw food being exported from famine areas to areas where it could fetch a higher price. In other words, market forces can skew resource allocation away from where it is most needed to where it can generate a profit. As anarchist George Barret noted decades before Sen:

“Today the scramble is to compete for the greatest profits. If there is more profit to be made in satisfying my lady’s passing whim than there is in feeding hungry children, then competition brings us in feverish haste to supply the former, whilst cold charity or the poor law can supply the latter, or leave it unsupplied, just as it feels disposed. That is how it works out.” [Objectives to Anarchism]

In other words, inequality skews resource allocation towards the wealthy. While such a situation may be “efficient allocation of resources” from the perspective of the capitalist, it is hardly so from a social perspective (i.e. one that considers all individual needs rather than “effective demand”).

either of these positions cannot be part of the anarchist movement. In other words, an anarchist must be against capitalism in order to be a true anarchist.

Moreover it is not at all difficult to find a more fundamental “defining tenet” of anarchism. We can do so merely by analysing the term “an-archy,” which is composed of the Greek words an, meaning “no” or “without,” and arche, meaning literally “a ruler,” but more generally referring to the principle of rulership, i.e. hierarchical authority. Hence an anarchist is someone who advocates abolishing the principle of hierarchical authority — not just in government but in all institutions and social relations.

Anarchists oppose the principle of hierarchical authority because it is the basis of domination, which is not only degrading in itself but generally leads to exploitation and all the social evils which follow from exploitation, from poverty, hunger and homelessness to class struggle and armed conflict.

Because anarchists oppose hierarchical authority, domination, and exploitation, they naturally seek to eliminate all hierarchies, as the very purpose of hierarchy is to facilitate the domination and (usually) exploitation of subordinates.

The reason anarchists oppose government, then, is because government is one manifestation of the evils of hierarchical authority, domination, and exploitation. But the capitalist workplace is another. In fact, the capitalist workplace is where most people have their most frequent and unpleasant encounters with these evils. Hence workers’ control — the elimination of the hierarchical workplace through democratic self-management — has been central to the agenda of classical and contemporary anarchism from the 19th century to the present. Indeed, anarchism was born out of the struggle of workers against capitalist exploitation.

To accept Caplan’s definition of anarchism, however, would mean that anarchists’ historical struggle for workers’ self-management has never been a “genuine” anarchist activity. This is clearly a reductio ad absurdum of that definition.
Caplan has confused a necessary condition with a sufficient condition. Opposition to government is a necessary condition of anarchism, but not a sufficient one. To put it differently, all anarchists oppose government, but opposition to government does not automatically make one an anarchist. To be an anarchist one must oppose government for anarchist reasons and be opposed to all other forms of hierarchical structure.

To understand why let us look at capitalist property. Murray Rothbard argues that “Obviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc.” [The Ethics of Liberty, p. 173] Defence firms would be employed to enforce those decisions (i.e. laws and rules). No real disagreement there. What is illuminating is Rothbard’s comments that the state “arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area” [Op. Cit., p. 170] Which, to state the obvious, means that both the state and property is marked by an “ultimate decision-making power” over their territory. The only “difference” is that Rothbard claims the former is “just” (i.e. “justly” acquired) and the latter is “unjust” (i.e. acquired by force). In reality, the modern distribution of property is just as much a product of past force as is the modern state. In other words, the current property owners have acquired their property in the same unjust fashion as the state has its. If one is valid, so is the other. Rothbard (and “anarcho”-capitalists in general) are trying to have it both ways.

Rothbard goes on to show why statism and private property are essentially the same thing:

“If the State may be said too properly own its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there is no private property in its area, because it really owns the entire land surface. So long as the State permits its subjects to leave to impoverishment, alienation, etc., and thus damaging most individuals rather than “protecting” them.

Caplan goes on:

“This normative theory is closely linked to laissez-faire economic theory, according to which private property and unregulated competition generally lead to both an efficient allocation of resources and (more importantly) a high rate of economic progress.”

Caplan does not mention the obvious problems with this “theory,” e.g. that during the heyday of laissez-faire capitalism in the US there was vast wealth disparity, with an enormous mass of impoverished people living in slums in the major cities — hardly an “efficient” allocation of resources or an example of “progress.” Of course, if one defines “efficiency” as “the most effective means of exploiting the working class” and “progress” as “a high rate of profit for investors,” then the conclusion of the “theory” does indeed follow.

And let us not forget that it is general equilibrium theory which predicts that unregulated competition will produce an efficient allocation of resources. However, as we noted in section C.1, such a model has little to do with any real economy. This means that there is no real reason to assume an efficient outcome of capitalist economies. Concentrations of economic power and wealth can easily skew outcomes to favour the haves over the have-nots (as history again and again shows).

Moreover, the capitalism can easily lead to resources being allocated to the most profitable uses rather than those which are most needed by individuals. A classic example is in the case of famines. Amartya Sen (who won the 1998 Nobel Prize for economics) developed an “entitlement” approach to the study of famine. This approach starts with the insight that having food available in a country or...
5 How would anarcho-capitalism work?

[10.] This section (How would anarcho-capitalism work?) contains Caplan’s summary of arguments for “anarcho”-capitalism, which he describes as an offshoot of Libertarianism. Thus:

“So-called ‘minarchist’ libertarians such as Nozick have argued that the largest justified government was one which was limited to the protection of individuals and their private property against physical invasion; accordingly, they favour a government limited to supplying police, courts, a legal code, and national defence.”

The first thing to note about this argument is that it is stated in such a way as to prejudice the reader against the left-libertarian critique of private property. The minarchist right—“libertarian,” it is said, only wants to protect individuals and their private property against “physical invasion.” But, because of the loose way in which the term “property” is generally used, the “private property” of most “individuals” is commonly thought of as personal possessions, i.e. cars, houses, clothing, etc. (For the left-libertarian distinction between private property and possessions, see section B.3.1.) Therefore the argument makes it appear that right libertarians are in favour of protecting personal possessions whereas left-libertarians are not, thus conjuring up a world where, for example, there would be no protection against one’s house being “physically invaded” by an intruder or a stranger stealing the shirt off one’s back!

By lumping the protection of “individuals” together with the protection of their “private property,” the argument implies that right libertarians are concerned with the welfare of the vast majority of the population, whereas in reality, the vast majority of “individuals” do not own any private property (i.e. means of production) — only a handful of capitalists do. Moreover, these capitalists use their private property to exploit the working class, leading

Of course Rothbard does not draw the obvious conclusion. He wants to maintain that the state is bad and property is good while drawing attention to their obvious similarities! Ultimately Rothbard is exposing the bankruptcy of his own politics and analysis. According to Rothbard, something can look like a state (i.e. have the “ultimate decision-making power” over an area) and act like a state (i.e. “make rules for everyone” who lives in an area, i.e. govern them) but not be a state. This not a viable position for obvious reasons.

In capitalism, property and possession are opposites — as Proud-hon argued in What is Property?. Under possession, the “property” owner exercises “ultimate decision-making power” over themselves as no-one else uses the resource in question. This is non-hierarchical. Under capitalism, however, use and ownership are divided. Landlords and capitalists give others access to their property while retaining power over it and so the people who use it. This is by nature hierarchical. Little wonder Noam Chomsky argued that a “consistent anarchist must oppose private ownership of the means of production and the wage slavery which is a component of this system as incompatible with the principle that labour must be freely undertaken and under the control of the producer.” [“Notes on Anarchism”, For Reasons of State, p. 158]

Thus a true anarchist must oppose both state and capitalism as they generate the same hierarchical social relationships (as recognised by Rothbard but apparently subjected to “doublethink”). As “anarcho”-capitalists do not oppose capitalist property they cannot be anarchists — they support a very specific form of archy, that of the capitalist/landlord over working class people.

Self-styled “anarcho”-capitalists do not oppose government for anarchist reasons. That is, they oppose it not because it is a manifes-
tation of hierarchical authority, but because government authority often conflicts with capitalists’ authority over the enterprises they control. By getting rid of government with its minimum wage laws, health and safety requirements, union rights laws, environmental standards, child labour laws, and other inconveniences, capitalists would have even more power to exploit workers than they already do. These consequences of “anarcho”-capitalism are diametrically opposed to the historically central objective of the anarchist movement, which is to eliminate capitalist exploitation.

We must conclude, then, that “anarcho”-capitalists are not anarchists at all. In reality they are capitalists posing as anarchists in order to attract support for their laissez-faire economic project from those who are angry at government. This scam is only possible on the basis of the misunderstanding perpetrated by Caplan: that anarchism means nothing more than opposition to government. Better definitions of anarchism can be found in other reference works. For example, in Grollier’s Online Encyclopedia we read: “Anarchism rejects all forms of hierarchical authority, social and economic as well as political.” According to this more historically and etymologically accurate definition, “anarcho”-capitalism is not a form of anarchism, since it does not reject hierarchical authority in the economic sphere (which has been the area of prime concern to anarchists since day one). Hence it is bogus anarchism.

2 Anarchism and Equality

[5.] On the question “What major subdivisions may be made among anarchists?” Caplan writes:

“Unlike the left-anarchists, anarcho-capitalists generally place little or no value on equality, believing that inequalities along all dimensions — including income and wealth — are not only perfectly legitimate so long as they
implies economic inequalities due to private property, the answer
is that private property requires some kind of state, if not a public
state then private security forces (“private-state capitalism”), as
advocated by “anarcho”-capitalists, in order to protect private
property. Therefore, “anarcho”-capitalists are asking if an anar-
chist society will allow the existence of states. Of course, in the
territory that used to be claimed by a nation state a whole host
of communities and societies will spring up — but that does not
make the non-anarchist ones anarchist!

Thus suppose that in a hypothetical libertarian socialist society,
Bob tries to set up private security forces to protect certain means
of production, e.g. farmland. By the hypothesis, if Bob merely
wanted to work the land himself, there would be no reason for him
go to the trouble of creating a private state to guard it, because
use-rights guarantee that he has free access to the productive
assets he needs to make a living. Thus, the only plausible reason
Bob could have for claiming and guarding more farmland than he
could use himself would be a desire to create a monopoly of land in
order to exact tribute from others for the privilege of using it. But
this would be an attempt to set up a system of feudal exploitation
in the midst of a free community. Thus the community is justified
disarming this would-be parasite and ignoring his claims to
“own” more land than he can use himself.

In other words, there is no “right” to adopt an “egalitarian way
of life” within a libertarian community, since such a right would
have to be enforced by the creation of a coercive system of enslav-
ment, which would mean the end of the “libertarian” community.
To the contrary, the members of such a community have a right,
guaranteed by “the people in arms,” to resist such attempts to en-
slave them.

The statement that “left” anarchists have “occasionally” insisted
that small farmers and the like would not be forcibly collectivised
is a distortion of the facts. No responsible left libertarian adva-
crates forced collectivisation, i.e. compelling others to join collec-
‘come about in the right way,’ but are the natural conse-
quence of human freedom.”

This statement is not inaccurate as a characterisation of
“anarcho”-capitalist ideas, but its implications need to be made
clear. “Anarcho”-capitalists generally place little or no value on
equality — particularly economic equality — because they know
that under their system, where capitalists would be completely
free to exploit workers to the hilt, wealth and income inequalities
would become even greater than they are now. Thus their refer-
ences to “human freedom” as the way in which such inequalities
would allegedly come about means “freedom of capitalists to
exploit workers;” it does not mean “freedom of workers from
capitalist exploitation.”

But “freedom to exploit workers” has historically been the
objective only of capitalists, not anarchists. Therefore, “anarcho”-
capitalism again shows itself to be nothing more than capitalism
attempting to pass itself off as part of the anarchist movement
— a movement that has been dedicated since its inception to the
destruction of capitalism! One would have to look hard to find a
more audacious fraud.

As we argue in section 2.1 of the appendix “Is ‘anarcho’-
capitalism a type of anarchism?” the claim that inequalities are
irrelevant if they “come about the right way” ignores the reality of
freedom and what is required to be free. To see why we have to
repeat part of our argument from that section and look at Murray
Rothbard’s (a leading “anarcho”-capitalist icon) analysis of the
situation after the abolition of serfdom in Russia and slavery in
America. He writes:

“The bodies of the oppressed were freed, but the prop-
erty which they had worked and eminently deserved to
own, remained in the hands of their former oppressors.
With economic power thus remaining in their hands, the
former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits.” [The Ethics of Liberty, p. 74]

However, contrast this with Rothbard’s (and Caplan’s) claims that if market forces (“voluntary exchanges”) result in the creation of free tenants or wage-labourers then these labourers and tenants are free (see, for example, The Ethics of Liberty, pp. 221–2 on why “economic power” within capitalism does not, in fact, exist). But the labourers dispossessed by market forces are in exactly the same situation as the former serfs and slaves. Rothbard sees the obvious “economic power” in the later case, but denies it in the former. But the conditions of the people in question are identical and it is these conditions that horrify us and create social relationships because on subordination, authority and oppression rather than freedom. It is only ideology that stops Rothbard and Caplan drawing the obvious conclusion — identical conditions produce identical social relationships and so if the formally “free” ex-serfs are subject to “economic power” and “masters” then so are the formally “free” labourers within capitalism! Both sets of workers may be formally free, but their circumstances are such that they are “free” to “consent” to sell their freedom to others (i.e. economic power produces relationships of domination and unfreedom between formally free individuals).

Thus inequalities that “come about in the right way” restrict freedom just as much as inequalities that do not. If the latter restricts liberty and generate oppressive and exploitative social relationships then so do the former. Thus, if we are serious about individuality liberty (rather than property) we must look at inequalities and what generate them.

One last thing, Caplan states that inequalities in capitalism are “the natural consequence of human freedom.” They are not, unless attitude, and would go on living on the Individualist system.” [The Conquest of Bread, p. 81] While he was hopeful that “everywhere [would be] more or less Socialism” he recognised that the revolution would not conform to “any particular rule” and would differ in different areas — “in one country State Socialist, in another Federation” and so on. [Op. Cit., p. 82] Malatesta made the same point, arguing that “after the revolution” there would be “relations between anarchist groupings and those living under some kind of authority, between communist collectives and those living in an individualistic way.” This is because anarchism “cannot be imposed”. [Life and Ideas, p. 173, p. 21]

Needless to say, these “separatist societies” (which may or may not be “inegalitarian”) would not be anarchist societies. If a group of people wanted to set up a capitalist, Marxist, Georgist or whatever kind of community then their right would be respected (although, of course, anarchists would seek to convince those who live in such a regime of the benefits of anarchism!). As Malatesta pointed out, “free and voluntary communism is ironical if one has not the right and the possibility to live in a different regime, collectivist, mutualist, individualist — as one wishes, always on condition that there is no oppression or exploitation of other” as “it is clear that all, and only, those ways of life which respect freedom, and recognise that each individual has an equal right to the means of production and to the full enjoyment of the product of his own labour, have anything in common with anarchism.” [Op. Cit., p. 103 and p. 33]

Ultimately, “it is not a question of right and wrong; it is a question of freedom for everybody… None can judge with certainty who is right and who is wrong, who is nearest to the truth, or which is the best way to achieve the greatest good for each and everyone. Freedom coupled with experience, is the only way of discovering the truth and what is best; and there can be no freedom if there is the denial of the freedom to err.” [Op. Cit., p. 49]

Secondly, regarding “dissidents” who wanted to set up their own “inegalitarian separatist societies,” if the term “inegalitarian”
deeper sources of enjoyment which art and science offer to all who seek them, he [or she] will not sell his strength... No one will volunteer to work for the enrichment of your Rothschild.” [Op. Cit., p. 61]

In this scenario, private property was “abolished,” but not through coercion. Indeed, it was precisely the abolition of organised coercion that allowed private property to be abolished.

4 Anarchism and dissidents

[9.] On the question “How would left-anarchy work?” Caplan writes:

“Some other crucial features of the left-anarchist society are quite unclear. Whether dissidents who despised all forms of communal living would be permitted to set up their own inegalitarian separatist societies is rarely touched upon. Occasionally left-anarchists have insisted that small farmers and the like would not be forcibly collectivised, but the limits of the right to refuse to adopt an egalitarian way of life are rarely specified.”

This is a straw man. “Left” (i.e. real) anarchist theory clearly implies and explicitly states the answer to these questions.

Firstly, on the issue of “separatist” societies. Anarchist thinkers have always acknowledged that there would be multitude of different communities after a revolution (and not just Caplan’s “inegalitarian” ones). Marx, for example, mocked Bakunin for arguing that only revolutionary communes would federate together and that this would not claim any right to govern others (see Bakunin’s “Letter to Albert Richards”, Michael Bakunin: Selected Writings, p. 179) Kropotkin stated that “the point attained in the socialisation of wealth will not be everywhere the same” and “[s]ide by side with the revolutionised communes ... places would remain in an expectant

you subscribe to the idea that capitalist property rights are the basis of human freedom. However, the assumption that capitalist property rights are the best means to defend individual liberty can be easily seen to be flawed just from the example of the ex-slaves and ex-serfs we have just described. Inequalities resulting from “voluntary exchanges” in the capitalist market can and do result in the denial of freedom, thus suggesting that “property” and liberty are not natural consequences of each other.

To state the obvious, private property (rather than possession) means that the non-property owner can gain access to the resource in question only when they agree to submit to the property owner’s authority (and pay tribute for the privilege of being bossed about). This aspect of property (rightly called “despotism” by Proudhon) is one which right-libertarians continually fail to highlight when they defend it as the paradigm of liberty.

3 Is anarchism the same thing as socialism?

[7.] In this section (“Is anarchism the same thing as socialism?”) Caplan writes:

“Outside of the Anglo-American political culture, there has been a long and close historical relationship between the more orthodox socialists who advocate a socialist government, and the anarchist socialists who desire some sort of decentralised, voluntary socialism. The two groups both want to severely limit or abolish private property...”

For Caplan to claim that anarchism is not the same thing as socialism, he has to ignore anarchist history. For example, the Individualist anarchists called themselves “socialists,” as did social anarchists. Indeed, Individualist Anarchists like Joseph Labadie stated that “Anarchism is voluntary socialism” [Anarchism: What it is
and What it is Not) and wanted to limit private property in many ways (for example, “the resources of nature — land, mines, and so forth — should not be held as private property and subject to being held by the individual for speculative purposes, that use of these things shall be the only valid title, and that each person has an equal right to the use of all these things.” [What is Socialism?]). Therefore, within the “Anglo-American political culture,” all types of anarchists considered themselves part of the socialist movement. This can be seen not only from Kropotkin’s or Bakunin’s work, but also in Tucker’s (see Instead of a Book). So to claim that the “Anglo-American” anarchists did not have “a long and close historical relationship” with the wider socialist movement is simply false.

The statement that anarchists want to severely limit or abolish “private property” is misleading if it is not further explained. For the way it stands, it sounds like anarchism is just another form of coercive “state” (i.e. a political entity that forcibly prevents people from owning private property), whereas this is far from the case.

Firstly, anarchists are not against “private property” in the sense personal belongings. “Anarchists,” points out Nicholas Walter, “are in favour of the private property which cannot be used by one person to exploit another — those personal possessions which we accumulate from childhood and which become part of ours.” [“About Anarchism”, in Reinventing Anarchy, p. 49] Kropotkin makes the anarchist position clear when he wrote that we “do not want to rob any one of his coat” but expropriation “must apply to everything that enables any man [or woman] — by he financier, mill owner, or landlord — to appropriate the product of others’ toil.” [The Conquest of Bread, p. 61]

In effect, Caplan is confusing two very different kinds of “private property”, of which one rests on usefulness to an individual, the other on the employment (and so exploitation) of the labour of others. The latter produces social relations of domination between individuals, while the former is a relationship between people and things. As Proudhon argued, possession becomes property only when it also serves as means of exploitation and subjection of other people. But failing to distinguish these radically different forms of “private property” Caplan distorts the anarchist position.

Secondly, it is not that anarchists want to pass laws making private property (in the second, exploitative, sense) illegal. Rather they want to restructure society in such a way that the means of production are freely available for workers to use. This does not mean “anarchist police” standing around with guns to prohibit people from owning private property. Rather, it means dismantling the coercive state agencies that make private property possible, i.e., the departments of real police who now stand around with guns protecting private property.

Once that occurs, anarchists maintain that capitalism would be impossible, since capitalism is essentially a monopoly of the means of production, which can only be maintained by organised coercion. For suppose that in an anarchist society someone (call him Bob) somehow acquires certain machinery needed to produce widgets (a doubtful supposition if widget-making machines are very expensive, as there will be little wealth disparity in an anarchist society). And suppose Bob offers to let workers with widget-making skills use his machines if they will pay him “rent,” i.e. allow him to appropriate a certain amount of the value embodied in the widgets they produce. The workers will simply refuse, choosing instead to join a widget-making collective where they have free access to widget-making machinery, thus preventing Bob from living parasitically on their labour. Thus Kropotkin:

“Everywhere you will find that the wealth of the wealthy springs from the poverty of the poor. That is why an anarchist society need not fear the advent of a Rothschild [or any other millionaire] who would settle in its midst. If every member of the community knows that after a few hours of productive toil he [or she] will have a right to all the pleasures that civilisation procures, and to those
‘booty’ is the law, the State. As Bakunin wrote, ‘Ghosts should not rule and oppress this world, which belongs only to the living’” [Jeff Draughn, Between Anarchism and Libertarianism].

Or, in other words, right-Libertarianism fails to “meet the charge that normal operations of the market systematically places an entire class of persons (wage earners) in circumstances that compel them to accept the terms and conditions of labour dictated by those who offer work. While it is true that individuals are formally free to seek better jobs or withhold their labour in the hope of receiving higher wages, in the end their position in the market works against them; they cannot live if they do not find employment. When circumstances regularly bestow a relative disadvantage on one class of persons in their dealings with another class, members of the advantaged class have little need of coercive measures to get what they want.” [Stephen L. Newman, Liberalism at Wit’s End, p. 130]

To ignore the circumstances which drive people to seek out the most “beneficial exchange” is to blind yourself to the power relationships inherent within capitalism — power relationships created by the unequal bargaining power of the parties involved (also see section 3.1). And to argue that “consent” ensures freedom is false; if you are “consenting” to be join a dictatorial organisation, you “consent” not to be free (and to paraphrase Rousseau, a person who renounces freedom renounces being human).

Which is why circumstances are important — if someone truly wants to join an authoritarian organisation, then so be it. It is their life. But if circumstances ensure their “consent” then they are not free. The danger is, of course, that people become accustomed to authoritarian relationships and end up viewing them as forms of freedom. This can be seen from the state, which the vast majority support and “consent” to. And this also applies to wage labour, which many workers today accept as a “necessary evil” (like the state) but, as we indicate in section 8.6, the first wave of workers viewed with horror as a form of (wage) slavery and did all that they could to avoid. In such situations all we can do is argue with them the case with “anarcho”-capitalism — its ideas are at odds with the key ideas associated with all forms of traditional anarchism (even individualist anarchism which is often claimed as being a forefather of the ideology).

All we can do is indicate why “anarcho”-capitalism is not part of the anarchist tradition and so has falsely appropriated the name. This section of the FAQ aims to do just that — present the case why “anarcho”-capitalists are not anarchists. We do this, in part, by indicating where they differ from genuine anarchists (on such essential issues as private property, equality, exploitation and opposition to hierarchy) In addition, we take the opportunity to present a general critique of right-libertarian claims from an anarchist perspective. In this way we show up why anarchists reject that theory as being opposed to liberty and anarchist ideals.

We are covering this topic in an anarchist FAQ for three reasons. Firstly, the number of “libertarian” and “anarcho”-capitalists on the net means that those seeking to find out about anarchism may conclude that they are “anarchists” as well. Secondly, unfortunately, some academics and writers have taken their claims of being anarchists at face value and have included their ideology into general accounts of anarchism. These two reasons are obviously related and hence the need to show the facts of the matter. As we have extensively documented in earlier sections, anarchist theory has always been anti-capitalist. There is no relationship between anarchism and capitalism, in any form. Therefore, there is a need for this section in order to indicate exactly why “anarcho”-capitalism is not anarchist. As will be quickly seen from our discussion, almost all anarchists who become aware of “anarcho”-capitalism quickly reject it as a form of anarchism (the better academic accounts do note that anarchists generally reject the claim, though). The last reason is to provide other anarchists with arguments and evidence to use against “anarcho”-capitalism and its claims of being a new form of “anarchism.”
So this section of the FAQ does not, as we noted above, represent some kind of “debate” within anarchism. It reflects the attempt by anarchists to reclaim the history and meaning of anarchism from those who are attempting to steal its name (just as right-wingers in America have attempted to appropriate the name “libertarian” for their pro-capitalist views, and by so doing ignore over 100 years of anti-capitalist usage). However, this section also serves two other purposes. Firstly, critiquing right-libertarian and “anarchoco-capitalist theories allows us to explain anarchist ones at the same time and indicate why they are better. Secondly, and more importantly, the “ideas” and “ideals” that underlie “anarchoco-capitalism are usually identical (or, at the very least, similar) to those of neo-liberalism. This was noted by Bob Black in the early 1980s, when a “wing of the Reaganist Right has obviously appropriated, with suspect selectivity, such libertarian themes as deregulation and voluntarism. Ideologues indignant that Reagan has travestied their principles. Tough shit! I notice that it’s their principles, not mine, that he found suitable to travesty.” [The Libertarian As Conservative]

This was echoed by Noam Chomsky two decades later when while “nobody takes [right-wing libertarianism] seriously” as “everybody knows that a society that worked by … [its] principles would self-destruct in three seconds” the “only reason” why some people “pretend to take it seriously is because you can use it as a weapon.” [Understanding Power, p. 200] As neo-liberalism is being used as the ideological basis of the current attack on the working class, critiquing “anarchoco-capitalism and right-libertarianism also allows use to build theoretical weapons to use to resist this attack and aid the class struggle.

A few more points before beginning. When debating with “libertarian” or “anarchist” capitalists it’s necessary to remember that while they claim “real capitalism” does not exist (because all existing forms of capitalism are statist), they will claim that all the good things we have — advanced medical technology, consumer choice of products, etc. — are nevertheless due to “capitalism.” Yet “But did you really consent?

“When the highway man holds his gun to your head, you turn your valuables over to him. You ‘consent’ all right, but you do so because you cannot help yourself, because you are compelled by his gun.

“Are you not compelled to work for an employer? Your need compels you just as the highwayman’s gun. You must live… You can’t work for yourself … The factories, machinery, and tools belong to the employing class, so you must hire yourself out to that class in order to work and live. Whatever you work at, whoever your employer may be, it is always comes to the same: you must work for him. You can’t help yourself. You are compelled.” [What is Communist Anarchism?, p. 9]

Due to this class monopoly over the means of life, workers (usually) are at a disadvantage in terms of bargaining power — there are more workers than jobs (see sections B.4.3 and 10.2 for a discussion why this is the normal situation on the labour market).

As was indicated in section B.4 (How does capitalism affect liberty?), within capitalism there is no equality between owners and the dispossessed, and so property is a source of power. To claim that this power should be “left alone” or is “fair” is “to the anarchists… preposterous. Once a State has been established, and most of the country’s capital privatised, the threat of physical force is no longer necessary to coerce workers into accepting jobs, even with low pay and poor conditions. To use Ayn Rand’s term, ‘initial force’ has already taken place, by those who now have capital against those who do not…. In other words, if a thief died and willed his ‘ill-gotten gain’ to his children, would the children have a right to inherit the
2.4 But surely transactions on the market are voluntary?

Of course, it is usually maintained by “anarcho”-capitalists that no-one puts a gun to a worker’s head to join a specific company. Yes, indeed, this is true — workers can apply for any job they like. But the point is that the vast majority cannot avoid having to sell their liberty to others (self-employment and co-operatives are an option, but they account for less than 10% of the working population and are unlikely to spread due to the nature of capitalist market forces — see sections J.5.11 and J.5.12 for details). And as Bob Black pointed out, right libertarians argue that “one can at least change jobs, but you can’t avoid having a job — just as under statism one can at least change nationalities but you can’t avoid subjection to one nation-state or another. But freedom means more than the right to change masters.” [The Libertarian as Conservative]

So why do workers agree to join a company? Because circumstances force them to do so — circumstances created, we must note, by human actions and institutions and not some abstract “fact of nature.” And if the world that humans create by their activity is detrimental to what we should value most (individual liberty and individuality) then we should consider how to change that world for the better. Thus “circumstances” (current “objective reality”) is a valid source of unfreedom and for human investigation and creative activity — regardless of the claims of right-Libertarians.

Let us look at the circumstances created by capitalism. Capitalism is marked by a class of dispossessed labourers who have nothing to sell by their labour. They are legally barred from access to the means of life and so have little option but to take part in the labour market. As Alexander Berkman put it:

“The law says your employer does not sell anything from you, because it is done with your consent. You have agreed to work for your boss for certain pay, he to have all that you produce ...

if you point out any problems in modern life, these will be blamed on “statism.” Since there has never been and never will be a capitalist system without some sort of state, it’s hard to argue against this “logic.” Many actually use the example of the Internet as proof of the power of “capitalism,” ignoring the fact that the state paid for its development before turning it over to companies to make a profit from it. Similar points can be made about numerous other products of “capitalism” and the world we live in. To artificially separate one aspect of a complex evolution fails to understand the nature and history of the capitalist system.

In addition to this ability to be selective about the history and results of capitalism, their theory has a great “escape clause.” If wealthy employers abuse their power or the rights of the working class (as they have always done), then they have (according to “libertarian” ideology) ceased to be capitalists! This is based upon the misperception that an economic system that relies on force cannot be capitalistic. This is very handy as it can absolve the ideology from blame for any (excessive) oppression which results from its practice. Thus individuals are always to blame, not the system that generated the opportunities for abuse they freely used.

Anarchism has always been aware of the existence of “free market” capitalism, particularly its extreme (minimal state) wing, and has always rejected it. As we discuss in section 7, anarchists from Proudhon onwards have rejected the idea of any similar aims and goals (and, significantly, vice versa). As academic Alan Carter notes, anarchist concern for equality as a necessary precondition for genuine freedom means “that is one very good reason for not confusing anarchists with liberals or economic ‘libertarians’ — in other words, for not lumping together everyone who is in some way or another critical of the state. It is why calling the likes of Nozick ‘anarchists’ is highly misleading.” [“Some notes on ‘Anarchism’”, pp. 141–5, Anarchist Studies, vol. 1, no. 2, p. 143] So anarchists have evaluated “free market” capitalism and rejected it as non-anarchist for over 150 years. Attempts by “anarcho”-capitalism to say that
their system is “anarchist” flies in the face of this long history of anarchist analysis. That some academics fall for their attempts to appropriate the anarchist label for their ideology is down to a false premise: it “is judged to be anarchism largely because some anarcho-capitalists say they are ‘anarchists’ and because they criticise the State.” [Peter Sabatini, Social Anarchism, no. 23, p. 100]

More generally, we must stress that most (if not all) anarchists do not want to live in a society just like this one but without state coercion and (the initiation of) force. Anarchists do not confuse “freedom” with the “right” to govern and exploit others nor with being able to change masters. It is not enough to say we can start our own (co-operative) business in such a society. We want the abolition of the capitalist system of authoritarian relationships, not just a change of bosses or the possibility of little islands of liberty within a sea of capitalism (islands which are always in danger of being flooded and our activity destroyed). Thus, in this section of the FAQ, we analyse many “anarcho”-capitalist claims on their own terms (for example, the importance of equality in the market or why capitalism cannot be reformed away by exchanges on the capitalist market) but that does not mean we desire a society nearly identical to the current one. Far from it, we want to transform this society into one more suited for developing and enriching individuality and freedom. But before we can achieve that we must critically evaluate the current society and point out its basic limitations.

Finally, we dedicate this section of the FAQ to those who have seen the real face of “free market” capitalism at work: the working men and women (anarchist or not) murdered in the jails and concentration camps or on the streets by the hired assassins of capitalisms. over his, etc.” [Op. Cit., p. 173] and, equally obviously, this ultimate-decision making power extends to those who use, but do not own, such property. But how “free” is a free society where the majority have to sell their liberty to another in order to live? Rothbard (correctly) argues that the State “uses its monopoly of force ... to control, regulate, and coerce its hapless subjects. Often it pushes its way into controlling the morality and the very lives of its subjects.” [Op. Cit., p. 171] However he fails to note that employers do exactly the same thing to their employees. This, from an anarchist perspective, is unsurprising, for (after all) the employer is “the ultimate decision-making power over his just property” just as the state is over its “unjust” property. That similar forms of control and regulation develop is not a surprise given the similar hierarchical relations in both structures.

That there is a choice in available states does not make statism any less unjust and unfree. Similarly, just because we have a choice between employers does not make wage labour any less unjust or unfree. But trying to dismiss one form of domination as flowing from “just” property while attacking the other because it flows from “unjust” property is not seeing the wood for the trees. If one reduces liberty, so does the other. Whether the situation we are in resulted from “just” or “unjust” steps is irrelevant to the restrictions of freedom we face because of them (and as we argue in section 2.5, “unjust” situations can easily flow from “just” steps).

The “anarcho”-capitalist insistence that the voluntary nature of an association determines whether it is anarchistic is deeply flawed — so flawed in fact that states and state-like structures (such as capitalist firms) can be considered anarchistic! In contrast, anarchists think that the hierarchical nature of the associations we join is equally as important as its voluntary nature when determining whether it is anarchistic or statist. However this option is not available to the “anarcho”-capitalist as it logically entails that capitalist companies are to be opposed along with the state as sources of domination, oppression and exploitation. #secf24
owner and the state create/share the same authoritarian relationships. If statism is unfree, then so is capitalism. And, we must add, how “just” is a system which undermines liberty. Can “justice” ever be met in a society in which one class has more power and freedom than another. If one party is in an inferior position, then they have little choice but to agree to the disadvantageous terms offered by the superior party (see section 3.1). In such a situation, a “just” outcome will be unlikely as any contract agreed will be skewed to favour one side over the other.

The implications of these points are important. We can easily imagine a situation within “anarcho”-capitalism where a few companies/people start to buy up land and form company regions and towns. After all, this has happened continually throughout capitalism. Thus a “natural” process may develop where a few owners start to accumulate larger and larger tracks of land “justly”. Such a process does not need to result in one company owning the world. It is likely that a few hundred, perhaps a few thousand, could do so. But this is not a cause for rejoicing — after all the current “market” in “unjust” states also has a few hundred competitors in it. And even if there is a large multitude of property owners, the situation for the working class is exactly the same as the citizen under current statism! Does the fact that it is “justly” acquired property that faces the worker really change the fact she must submit to the government and rules of another to gain access to the means of life?

When faced with anarchist criticisms that circumstances force workers to accept wage slavery the “anarcho”-capitalist claims that these are to be considered as objective facts of nature and so wage labour is not domination. However, the same can be said of states — we are born into a world where states claim to own all the available land. If states are replaced by individuals or groups of individuals does this change the essential nature of our dispossession? Of course not.

Rothbard argues that “[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones

1 Are “anarcho”-capitalists really anarchists?

In a word, no. While “anarcho”-capitalists obviously try to associate themselves with the anarchist tradition by using the word “anarcho” or by calling themselves “anarchists”, their ideas are distinctly at odds with those associated with anarchism. As a result, any claims that their ideas are anarchist or that they are part of the anarchist tradition or movement are false.

“Anarcho”-capitalists claim to be anarchists because they say that they oppose government. As such, as noted in the last section, they use a dictionary definition of anarchism. However, this fails to appreciate that anarchism is a political theory, not a dictionary definition. As dictionaries are rarely politically sophisticated things, this means that they fail to recognise that anarchism is more than just opposition to government, it is also marked a opposition to capitalism (i.e. exploitation and private property). Thus, opposition to government is a necessary but not sufficient condition for being an anarchist — you also need to be opposed to exploitation and capitalist private property. As “anarcho”-capitalists do not consider interest, rent and profits (i.e. capitalism) to be exploitative nor oppose capitalist property rights, they are not anarchists.

Moreover, “anarcho”-capitalism is inherently self-refuting. This can be seen from leading “anarcho”-capitalist Murray Rothbard. he thundered against the evil of the state, arguing that it “arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area.” In and of itself, this definition is unremarkable. That a few people (an elite of rulers) claim the right to rule others must be part of any sensible definition of the state or government. However, the problems begin for Rothbard when he notes that “[o]bviously, in a free society, Smith has the ultimate decision-making power over his own just property, Jones over his, etc.” [The Ethics of Liberty, p. 170 and p. 173] The logical contradiction in this position should be obvious, but not to Rothbard. It shows the power of ideology, the ability of means words (the expression
“private property”) to turn the bad (“ultimate decision-making power over a given area”) into the good (“ultimate decision-making power over a given area”).

Now, this contradiction can be solved in only one way — the owners of the “given area” are also its users. In other words, Rothbard is a capitalist and supports private property. In other words, wage labour and landlords. This means that he supports a divergence between ownership and use and this means that this “ultimate decision-making power” extends to those who use, but do not own, such property (i.e. tenants and workers). The statist nature of private property is clearly indicated by Rothbard’s words — the property owner in an “anarcho”-capitalist society possesses the “ultimate decision-making power” over a given area, which is also what the state has currently. Rothbard has, ironically, proved by his own definition that “anarcho”-capitalism is not anarchist.

Rothbard does try to solve this obvious contradiction, but utterly fails. He simply ignores the crux of the matter, that capitalism is based on hierarchy and, therefore, cannot be anarchist. He does this by arguing that the hierarchy associated with capitalism is fine as long as the private property that produced it was acquired in a “just” manner. In so doing he yet again draws attention to the identical authority structures and social relationships of the state and property. As he puts it:

“If the State may be said too properly own its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there is no private property in its area, because it really owns the entire land surface. So long as the State permits its subjects to leave its territory, then, it can be said to act as does any other

so are the transactions which have sprung from it. Thus if state claims of property rights are invalid, so are most (if not all) capitalist claims. If the laws of the state are illegitimate, so are the rules of the capitalist. If taxation is illegitimate, then so are rent, interest and profit. Rothbard’s “historical” argument against the state can also be applied to private property and if the one is unjustified, then so is the other.

Thirdly, if the state had evolved “justly” then Rothbard would actually have nothing against it! A strange position for an anarchist to take. Logically this means that if a system of corporate states evolved from the workings of the capitalist market then the “anarcho”-capitalist would have nothing against it. This can be seen from “anarcho”-capitalist support for company towns even though they have correctly been described as “industrial feudalism” (see section 6 for more on this).

Fourthly, Rothbard’s argument implies that similar circumstances producing similar relationships of domination and unfreedom are somehow different if they are created by “just” and “unjust” means. Rothbard claims that because the property is “justly” acquired it means the authority a capitalist over his employees is totally different from that of a state over its subject. But such a claim is false — both the subject/citizen and the employee are in a similar relationship of domination and authoritarianism. As we argued in section 2.2, how a person got into a situation is irrelevant when considering how free they are. Thus, the person who “consents” to be governed by another because all available resources are privately owned is in exactly the same situation as a person who has to join a state because all available resources are owned by one state or another. Both are unfree and are part of authoritarian relationships based upon domination.

And, lastly, while “anarcho”-capitalism may be a “just” society, it is definitely not a free one. It will be marked by extensive hierarchy, unfreedom and government, but these restrictions of freedom will be of a private nature. As Rothbard indicates, the property
frontier no longer exists “and there is no point crying over the fact” [Op. Cit., p. 240]).

So what makes hierarchy legitimate for Rothbard is whether the property it derives from was acquired justly or unjustly. Which leads us to a few very important points.

Firstly, Rothbard is explicitly acknowledging the similarities between statism and capitalism. He is arguing that if the state had developed in a “just” way, then it is perfectly justifiable in governing (“set[ting] down rules”) those who “consent” to live on its territory in exactly the same way a property owner does. In other words, private property can be considered as a “justly” created state! These similarities between property and statism have long been recognised by anarchists and that is why we reject private property along with the state (Proudhon did, after all, note that “property is despotism” and well as “theft”). But, according to Rothbard, something can look like a state (i.e. be a monopoly of decision making over an area) and act like a state (i.e. set down rules for people, govern them, impose a monopoly of force) but not be a state. But if it looks like a duck and sounds like a duck, it is a duck. Claiming that the origins of the thing are what counts is irrelevant — for example, a cloned duck is just as much a duck as a naturally born one. A statist organisation is authoritarian whether it comes from “just” or “unjust” origins. Does transforming the ownership of the land from states to capitalists really make the relations of domination created by the dispossession of the many less authoritarian and unfree? Of course not.

Secondly, much property in “actually existing” capitalism is the product (directly or indirectly) of state laws and violence (“the emergence of both agrarian and industrial capitalism in Britain [and elsewhere, we must add] ... could not have got off the ground without resources to state violence — legal or otherwise” [Brian Morris, Ecology & Anarchism, p. 190]). If state claims of ownership are invalid due to their history, then so are many others (particularly those which claim to own land). As the initial creation was illegitimate,
despotic, for now the king and his relatives can claim for themselves the libertarians’ very principle of the absolute right of private property, an absoluteness which they might not have dared to claim before.” [Op. Cit., pp. 54–5]

So not only does the property owner have the same monopoly of power over a given area as the state, it is more despotic as it is based on the “absolute right of private property”? And remember, Rothbard is arguing in favour of “anarcho”-capitalism and remember, Rothbard is arguing in favour of “anarchism”-capitalism (“if you have unbridled capitalism, you will have all kinds of authority: you will have extreme authority.” [Chomsky, Understanding Power, p. 200]). So in practice, private property is a major source of oppression and authoritarianism within society — there is little or no freedom within capitalist production (as Bakunin noted, “the worker sells his person and his liberty for a given time”). So, in stark contrast to anarchists, “anarchism”-capitalists have no problem with factory fascism (i.e. wage labour), a position which seems highly illogical for a theory calling itself libertarian. If it were truly libertarian, it would oppose all forms of domination, not just statism. This position flows from the “anarchism”-capitalist definition of freedom as the absence of coercion and will be discussed in section 2 in more detail.

Of course, Rothbard has yet another means to escape the obvious, namely that the market will limit the abuses of the property owners. If workers do not like their ruler then they can seek another. However, this reply completely ignores the reality of economic and social power. Thus the “consent” argument fails because it ignores the social circumstances of capitalism which limit the choice of the many. Anarchists have long argued that, as a class, workers have little choice but to “consent” to capitalist hierarchy. The alternative is either dire poverty or starvation.

mands of the state and those issued by one’s employer?... Though admittedly the circumstances are not identical, telling disgruntled empowers that they are always free to leave their jobs seems no different in principle from telling political dissidents that they are free to emigrate.” [Liberalism at Wit’s End, pp. 45–46]

Murray Rothbard, in his own way, agrees:

“If the State may be said too properly own its territory, then it is proper for it to make rules for everyone who presumes to live in that area. It can legitimately seize or control private property because there is no private property in its area, because it really owns the entire land surface. So long as the State permits its subjects to leave its territory, then, it can be said to act as does any other owner who sets down rules for people living on his property.” [The Ethics of Liberty, p. 170]

Rothbard’s argues that this is not the case simply because the state did not acquire its property in a “just” manner and that it claims rights over virgin land (both of which violates Rothbard’s “homesteading” theory of property — see section 4.1 for details and a critique). Rothbard argues that this doctrine of statism (the state as property owner) is unrealistic and ahistoric, but his account of the origins of property is equally unrealistic and ahistoric and that does not stop him supporting capitalism. People in glass houses should not throw stones!

Thus he claims that the state is evil and its claims to authority/power false simply because it acquired the resources it claims to own “unjustly” — for example, by violence and coercion (see The Ethics of Liberty, pp. 170–1, for Rothbard’s attempt to explain why the state should not be considered as the owner of land). And even if the state was the owner of its territory, it cannot appropriate virgin land (although, as he notes elsewhere, the “vast” US
to get a job “anarcho”-capitalists would celebrate this as an example of the benefits of a “flexible” labour market). Yes, states often conscript citizens and send them into dangerous situations but bosses often force their employees to accept dangerous working environments on pain of firing. Yes, many states do restrict freedom of association and speech, but so do bosses. Yes, states tax their citizens but landlords and companies only let others use their property if they get money in return (i.e. rent or profits). Indeed, if the employee or tenant does not provide the employer or landlord with enough profits, they will quickly be shown the door. Of course employees can start their own companies but citizens can start their own state if they convince an existing state (the owner of a set of resources) to sell/give land to them. Setting up a company also requires existing owners to sell/give resources to those who need them. Of course, in a democratic state citizens can influence the nature of laws and orders they obey. In a capitalist company, this is not the case.

This means that, logically, “anarcho”-capitalism must consider a series of freely exitable states as “anarchist” and not a source of domination. If consent (not leaving) is what is required to make capitalist domination not domination then the same can be said of statist domination. Stephen L. Newman makes the same point:

“The emphasis [right-wing] libertarians place on the opposition of liberty and political power tends to obscure the role of authority in their worldview … the authority exercised in private relationships, however — in the relationship between employer and employee, for instance — meets with no objection… . [This] reveals a curious insensitivity to the use of private authority as a means of social control. Comparing public and private authority, we might well ask of the [right-wing] libertarians: When the price of exercising one’s freedom is terribly high, what practical difference is there between the com-

“Anarcho”-capitalists dismiss such claims by denying that there is such a thing as economic power. Rather, it is simply freedom of contract. Anarchists consider such claims as a joke. To show why, we need only quote (yet again) Rothbard on the abolition of slavery and serfdom in the 19th century. He argued, correctly, that the “bodies of the oppressed were freed, but the property which they had worked and eminently deserved to own, remained in the hands of their former oppressors. With economic power thus remaining in their hands, the former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits.” [Op. Cit., p. 74]

To say the least, anarchists fail to see the logic in this position. Contrast this with the standard “anarcho”-capitalist claim that if market forces (“voluntary exchanges”) result in the creation of “free tenants or farm labourers” then they are free. Yet labourers dispossessed by market forces are in exactly the same social and economic situation as the ex-serfs and ex-slaves. If the latter do not have the fruits of freedom, neither do the former. Rothbard sees the obvious “economic power” in the latter case, but denies it in the former. It is only Rothbard’s ideology that stops him from drawing the obvious conclusion — identical economic conditions produce identical social relationships and so capitalism is marked by “economic power” and “virtual masters.” The only solution is for “anarcho”-capitalists to simply say the ex-serfs and ex-slaves were actually free to choose and, consequently, Rothbard was wrong. It might be inhuman, but at least it would be consistent!

Rothbard’s perspective is alien to anarchism. For example, as individualist anarchist William Bailie noted, under capitalism there is a class system marked by “a dependent industrial class of wage-workers” and “a privileged class of wealth-monopolisers, each becoming more and more distinct from the other as capitalism advances.” This has turned property into “a social power, an economic force destructive of rights, a fertile source of injustice, a means of enslav-
“Anarcho-capitalism, in my opinion, is a doctrinal system which, if ever implemented, would lead to forms of tyranny and oppression that have few counterparts in human history. There isn’t the slightest possibility that its (in my view, horrendous) ideas would be implemented, because they would quickly destroy any society that made this colossal error. The idea of ‘free contract’ between the potentate and his starving subject is a sick joke, perhaps worth some moments in an academic seminar exploring the consequences of (in my view, absurd) ideas, but nowhere else.” [Noam Chomsky on Anarchism, interview with Tom Lane, December 23, 1996]

Clearly, then, by its own arguments “anarcho”-capitalism is not anarchist. This should come as no surprise to anarchists. Anarchism, as a political theory, was born when Proudhon wrote "ing the dispossessed." He concludes: “Under this system equal liberty cannot obtain.” Bailie notes that the modern “industrial world under capitalistic conditions” have “arisen under the regime of status” (and so “law-made privileges”) however, it seems unlikely that he would have concluded that such a class system would be fine if it had developed naturally or the current state was abolished while leaving the class structure intact (as we note in section G.4, Tucker recognised that even the “freest competition” was powerless against the “enormous concentration of wealth” associated with modern capitalism). [The Individualist Anarchists, p. 121]

Therefore anarchists recognise that “free exchange” or “consent” in unequal circumstances will reduce freedom as well as increasing inequality between individuals and classes. In other words, as we discuss in section 3, inequality will produce social relationships which are based on hierarchy and domination, not freedom. As Noam Chomsky put it:

However, anarchism, by definition, is in favour of organisations and social relationships which are non-hierarchical and non-authoritarian. Otherwise, some people are more free than others. Failing to attack hierarchy leads to massive contradiction. For example, since the British Army is a volunteer one, it is an “anarchist” organisation! (see next section for a discussion on why the “anarcho”-capitalism concept of freedom also allows the state to appear “libertarian”).

In other words, “full capitalist property rights” do not protect freedom, in fact they actively deny it. But this lack of freedom is only inevitable if we accept capitalist private property rights. If we reject them, we can try and create a world based on freedom in all aspects of life, rather than just in a few.

2.3 Can “anarcho”-capitalist theory justify the state?

Ironically enough, “anarcho”-capitalist ideology actually allows the state to be justified along with capitalist hierarchy. This is because the reason why capitalist authority is acceptable to the “anarcho”-capitalist is because it is “voluntary” — no one forces the worker to join or remain within a specific company (force of circumstances are irrelevant in this viewpoint). Thus capitalist domination is not really domination at all. But the same can be said of all democratic states as well. Few such states bar exit for its citizens — they are free to leave at any time and join any other state that will have them (exactly as employees can with companies). Of course there are differences between the two kinds of authority — anarchists do not deny that — but the similarities are all too clear.

The “anarcho”-capitalist could argue that changing jobs is easier than changing states and, sometimes, this is correct — but not always. Yes, changing states does require the moving of home and possessions over great distances but so can changing job (indeed, if a worker has to move half-way across a country or even the world
So the right-wing “libertarian” right is interested only in a narrow concept of freedom (rather than in “freedom” or “liberty” as such). This can be seen in the argument of Ayn Rand (a leading ideologue of “libertarian” capitalism) that *Freedom, in a political context, means freedom from government coercion. It does not mean freedom from the landlord, or freedom from the employer, or freedom from the laws of nature which do not provide men with automatic prosperity. It means freedom from the coercive power of the state — and nothing else!* [Capitalism: The Unknown Ideal, p. 192] By arguing in this way, right libertarians ignore the vast number of authoritarian social relationships that exist in capitalist society and, as Rand does here, imply that these social relationships are like “the laws of nature.” However, if one looks at the world without prejudice but with an eye to maximising freedom, the major coercive institution is seen to be not the state but capitalist social relationships (as indicated in section B.4).

The right “libertarian,” then, far from being a defender of freedom, is in fact a keen defender of certain forms of authority and domination. As Peter Kropotkin noted, the “modern Individualism initiated by Herbert Spencer is, like the critical theory of Proudhon, a powerful indictment against the dangers and wrongs of government, but its practical solution of the social problem is miserable — so miserable as to lead us to inquire if the talk of ‘No force’ be merely an excuse for supporting landlord and capitalist domination.” [Act For Yourselves, p. 98]

To defend the “freedom” of property owners is to defend authority and privilege — in other words, statism. So, in considering the concept of liberty as “freedom from,” it is clear that by defending private property (as opposed to possession) the “anarcho”-capitalist is defending the power and authority of property owners to govern those who use “their” property. And also, we must note, defending all the petty tyrannies that make the work lives of so many people frustrating, stressful and unrewarding.

What is Property? specifically to refute the notion that workers are free when capitalist property forces them to seek employment by landlords and capitalists. He was well aware that in such circumstances property “violates equality by the rights of exclusion and increase, and freedom by despotism … [and has] perfect identity with robbery.” He, unsurprisingly, talks of the “proprietor, to whom [the worker] has sold and surrendered his liberty.” For Proudhon, anarchy was “the absence of a master, of a sovereign” while “proprietor” was “synonymous” with “sovereign” for he “imposes his will as law, and suffers neither contradiction nor control.” This meant that “property engenders despotism,” as “each proprietor is sovereign lord within the sphere of his property.” [What is Property, p. 251, p. 130, p. 264 and pp. 266–7] It must also be stressed that Proudhon’s classic work is a lengthy critique of the kind of apologetics for private property Rothbard espouses to salvage his ideology from its obvious contradictions.

Ironically, Rothbard repeats the same analysis as Proudhon but draws the opposite conclusions and expects to be considered an anarchist! Moreover, it seems equally ironic that “anarcho”-capitalism calls itself “anarchist” while basing itself on the arguments that anarchism was created in opposition to. As shown, “anarcho”-capitalism makes as much sense as “anarcho-statism” — an oxymoron, a contradiction in terms. The idea that “anarcho”-capitalism warrants the name “anarchist” is simply false. Only someone ignorant of anarchism could maintain such a thing. While you expect anarchist theory to show this to be the case, the wonderful thing is that “anarcho”-capitalism itself does the same.

Little wonder Bob Black argues that “[t]o demonise state authoritarianism while ignoring identical albeit contract-consecrated servient arrangements in the large-scale corporations which control the world economy is fetishism at its worst.” [Libertarian as Conservative] The similarities between capitalism and statism are clear — and so why “anarcho”-capitalism cannot be anarchist. To reject the authority (the “ultimate decision-making power”) of
the state and embrace that of the property owner indicates not only a highly illogical stance but one at odds with the basic principles of anarchism. This whole-hearted support for wage labour and capitalist property rights indicates that “anarcho”-capitalists are not anarchists because they do not reject all forms of archy. They obviously support the hierarchy between boss and worker (wage labour) and landlord and tenant. Anarchism, by definition, is against all forms of archy, including the hierarchy generated by capitalist property. To ignore the obvious archy associated with capitalist property is highly illogical.

In addition, we must note that such inequalities in power and wealth will need “defending” from those subject to them (“anarcho”-capitalists recognise the need for private police and courts to defend property from theft — and, anarchists add, to defend the theft and despotism associated with property!). Due to its support of private property (and thus authority), “anarcho”-capitalism ends up retaining a state in its “anarchy”; namely a private state whose existence its proponents attempt to deny simply by refusing to call it a state, like an ostrich hiding its head in the sand (see section 6 for more on this and why “anarcho”-capitalism is better described as “private state” capitalism). As Albert Meltzer put it:

“Common-sense shows that any capitalist society might dispense with a ‘State’ ... but it could not dispense with organised government, or a privatised form of it, if there were people amassing money and others working to amass it for them. The philosophy of ‘anarcho-capitalism’ dreamed up by the ‘libertarian’ New Right, has nothing to do with Anarchism as known by the Anarchist movement proper. It is a lie ... Patently unbridled capitalism ... needs some force at its disposal to maintain class privileges, either form the State itself or from private armies. What they believe in is in fact a monitored and regulated as the work life of millions of people across the world, you would rightly consider it oppression.

Perhaps Reekie (like most right-libertarians) will maintain that workers voluntarily agree (“consent”) to be subject to the bosses dictatorship (he writes that “each will only enter into the contractual agreement known as a firm if each believes he will be better off thereby. The firm is simply another example of mutually beneficial exchange” [Op. Cit., p. 137]). However, this does not stop the relationship being authoritarian or dictatorial (and so exploitative as it is highly unlikely that those at the top will not abuse their power). And as we argue further in the next section (and also see sections B.4, 3.1 and 10.2), in a capitalist society workers have the option of finding a job or facing abject poverty and/or starvation.

Little wonder, then, that people “voluntarily” sell their labour and “consent” to authoritarian structures! They have little option to do otherwise. So, within the labour market, workers can and do seek out the best working conditions possible, but that does not mean that the final contract agreed is “freely” accepted and not due to the force of circumstances, that both parties have equal bargaining power when drawing up the contract or that the freedom of both parties is ensured. Which means to argue (as many right-libertarians do) that freedom cannot be restricted by wage labour because people enter into relationships they consider will lead to improvements over their initial situation totally misses the points. As the initial situation is not considered relevant, their argument fails. After all, agreeing to work in a sweatshop 14 hours a day is an improvement over starving to death — but it does not mean that those who so agree are free when working there or actually want to be there. They are not and it is the circumstances, created and enforced by the law, that have ensured that they “consent” to such a regime (given the chance, they would desire to change that regime but cannot as this would violate their bosses property rights and they would be repressed for trying).
Entrepreneurs and Liberty, p. 136, p. 137]. Given that “the terms of contract” involve the worker agreeing to obey the employers orders and that they will be fired if they do not, it’s pretty clear that the ordering that goes on in the “intra-firm labour market” is decidedly one way. Bosses have the power, workers are paid to obey. And this begs the question, if the employment contract creates a free worker, why must she abandon her liberty during work hours?

Reekie actually recognises this lack of freedom in a “round about” way when he notes that “employees in a firm at any level in the hierarchy can exercise an entrepreneurial role. The area within which that role can be carried out increases the more authority the employee has.” [Op. Cit., p. 142] Which means workers are subject to control from above which restricts the activities they are allowed to do and so they are not free to act, make decisions, participate in the plans of the organisation, to create the future and so forth within working hours. And it is strange that while recognising the firm as a hierarchy, Reekie tries to deny that it is authoritarian or dictatorial — as if you could have a hierarchy without authoritarian structures or an unelected person in authority who is not a dictator. His confusion is shared by Austrian guru Ludwig von Mises, who asserts that the “entrepreneur and capitalist are not irresponsible autocrats” because they are “unconditionally subject to the sovereignty of the consumer” while, on the next page, admitting there is a “managerial hierarchy” which contains “the average subordinate employee.” [Human Action, p. 809 and p. 810] It does not enter his mind that the capitalist may be subject to some consumer control while being an autocrat to their subordinated employees. Again, we find the right-“libertarian” acknowledging that the capitalist managerial structure is a hierarchy and workers are subordinated while denying it is autocratic to the workers! Thus we have “free” workers within a relationship distinctly lacking freedom (in the sense of self-government) — a strange paradox. Indeed, if your personal life were as closely limited State — that us, one in which the State has one function, to protect the ruling class, does not interfere with exploitation, and comes as cheap as possible for the ruling class. The idea also serves another purpose … a moral justification for bourgeois consciences in avoiding taxes without feeling guilty about it.” [Anarchism: Arguments For and Against, p. 50]

For anarchists, this need of capitalism for some kind of state is unsurprising. For “Anarchy without socialism seems equally as impossible to us [as socialism without anarchy], for in such a case it could not be other than the domination of the strongest, and would therefore set in motion right away the organisation and consolidation of this domination; that is to the constitution of government.” [Errico Malatesta, Life and Ideas, p. 148] Because of this, the “anarcho”-capitalist rejection of anarchist ideas on capitalist property economics and the need for equality, they cannot be considered anarchists or part of the anarchist tradition.

Thus anarchism is far more than the common dictionary definition of “no government” — it also entails being against all forms of archy, including those generated by capitalist property. This is clear from the roots of the word “anarchy.” As we noted in section A.1, the word anarchia means “no rulers” or “contrary to authority.” As Rothbard himself acknowledges, the property owner is the ruler of their property and, therefore, those who use it. For this reason “anarcho”-capitalism cannot be considered as a form of anarchism — a real anarchist must logically oppose the authority of the property owner along with that of the state. As “anarcho”-capitalism does not explicitly (or implicitly, for that matter) call for economic arrangements that will end wage labour and usury it cannot be considered anarchist or part of the anarchist tradition.

Political theories should be identified by their actual features and history rather than labels. Once we recognise that, we soon find out that “anarcho”-capitalism is an oxymoron. Anarchists and
“anarcho”-capitalists are not part of the same movement or tradition. Their ideas and aims are in direct opposition to those of all kinds of anarchists.

While anarchists have always opposed capitalism, “anarcho”-capitalists have embraced it. And due to this embrace their “anarchy” will be marked by extensive differences in wealth and power, differences that will show themselves up in relationships based upon subordination and hierarchy (such as wage labour), not freedom (little wonder that Proudhon argued that “property is despotism” — it creates authoritarian and hierarchical relationships between people in a similar way to statism).

Their support for “free market” capitalism ignores the impact of wealth and power on the nature and outcome of individual decisions within the market (see sections 2 and 3 for further discussion). For example, as we indicate in sections J.5.10, J.5.11 and J.5.12, wage labour is less efficient than self-management in production but due to the structure and dynamics of the capitalist market, “market forces” will actively discourage self-management due to its empowering nature for workers. In other words, a developed capitalist market will promote hierarchy and unfreedom in production in spite of its effects on individual workers and their wants (see also section 10.2). Thus “free market” capitalism tends to re-enforce inequalities of wealth and power, not eliminate them.

Furthermore, any such system of (economic and social) power will require extensive force to maintain it and the “anarcho”-capitalist system of competing “defence firms” will simply be a new state, enforcing capitalist power, property rights and law.

Overall, the lack of concern for meaningful freedom within production and the effects of vast differences in power and wealth within society as a whole makes “anarcho”-capitalism little better than “anarchism for the rich.” Emma Goldman recognised this when she argued that “‘Rugged individualism’ has meant all the ‘individualism’ for the masters … in whose name political tyranny and social oppression are defended and held up as virtues while every as-

All in all, the right-Libertarian concept of freedom is lacking. For an ideology that takes the name “Libertarianism” it is seems happy to ignore actual liberty and instead concentrate on an abstract form of liberty which ignores so many sources of unfreedom as to narrow the concept until it becomes little more than a justification for authoritarianism. This can be seen from right-Libertarian attitudes about private property and its effects on liberty (as discussed in the next section). #secf22

2.2 How does private property affect freedom?

The right-libertarian does not address or even acknowledge that the (absolute) right of private property may lead to extensive control by property owners over those who use, but do not own, property (such as workers and tenants). Thus a free-market capitalist system leads to a very selective and class-based protection of “rights” and “freedoms.” For example, under capitalism, the “freedom” of employers inevitably conflicts with the “freedom” of employees. When stockholders or their managers exercise their “freedom of enterprise” to decide how their company will operate, they violate their employee’s right to decide how their labouring capacities will be utilised. In other words, under capitalism, the “property rights” of employers will conflict with and restrict the “human right” of employees to manage themselves. Capitalism allows the right of self-management only to the few, not to all. Or, alternatively, capitalism does not recognise certain human rights as universal which anarchism does.

This can be seen from Austrian Economist W. Duncan Reekie’s defence of wage labour. While referring to “intra-firm labour markets” as “hierarchies”, Reekie (in his best ex cathedra tone) states that “[t]here is nothing authoritarian, dictatorial or exploitative in the relationship. Employees order employers to pay them amounts specified in the hiring contract just as much as employers order employees to abide by the terms of the contract.” [Markets,
ment of mankind.” He goes on to argue that “man in isolation can have no awareness of his liberty… Liberty is therefore a feature not of isolation but of interaction, not of exclusion but rather of connection.” [Selected Writings, p. 146, p. 147] Right Libertarians, by building their definition of freedom from the isolated person, end up by supporting restrictions of liberty due to a neglect of an adequate recognition of the actual interdependence of human beings, of the fact what each person does is effected by and affects others. People become aware of their humanity (liberty) in society, not outside it. It is the social relationships we take part in which determine how free we are and any definition of freedom which builds upon an individual without social ties is doomed to create relations of domination, not freedom, between individuals — as Rothbard’s theory does (to put it another way, voluntary association is a necessary, but not sufficient, condition for freedom. Which is why anarchists have always stressed the importance of equality — see section 3 for details).

So while facts of nature can restrict your options and freedom, it is the circumstances within which they act and the options they limit that are important (a person trapped at the bottom of a pit is unfree as the options available are so few; the lame person is free because their available options are extensive). In the same manner, the facts of society can and do restrict your freedom because they are the products of human action and are defined and protected by human institutions, it is the circumstances within which individuals make their decisions and the social relationships these decisions produce that are important (the worker driven by poverty to accept a slave contract in a sweat shop is unfree because the circumstances he faces have limited his options and the relations he accepts are based upon hierarchy; the person who decides to join an anarchist commune is free because the commune is non-hierarchical and she has the option of joining another commune, working alone and so forth).

piration and attempt of man to gain freedom … is denounced as … evil in the name of that same individualism.” [Red Emma Speaks, p. 112] And, as such, is no anarchism at all.

So, unlike anarchists, “anarcho”-capitalists do not seek the “abolition of the proletariat” (to use Proudhon’s expression) via changing capitalist property rights and institutions. Thus the “anarcho”-capitalist and the anarchist have different starting positions and opposite ends in mind and so they cannot be considered part of the same (anarchist) tradition. As we discuss further in later sections, the “anarcho”-capitalist claims to being anarchists are bogus simply because they reject so much of the anarchist tradition as to make what they do accept non-anarchist in theory and practice. Little wonder Peter Marshall said that “few anarchists would accept the ‘anarcho-capitalists’ into the anarchist camp since they do not share a concern for economic equality and social justice.” [Demanding the Impossible, p. 565] #secf11

1.1 Why is the failure to renounce hierarchy the Achilles Heel of right-wing libertarianism

Any capitalist system will produce vast differences in economic (and social) wealth and power. As we argue in section 3.1, such differences will reflect themselves in the market and any “free” contracts agreed there will create hierarchical relationships. Thus capitalism is marked by hierarchy (see section B.1.2) and, unsurprisingly, right-libertarians and “anarcho”-capitalists fail to oppose such “free market” generated hierarchy.

Both groups approve of it in the capitalist workplace or rented accommodation and the right-Libertarians also approve of it in a ‘minimal’ state to protect private property (“anarcho”-capitalists, in contrast, approve of the use of private defence firms to protect property). But the failure of these two movements to renounce hierarchy is their weakest point. For anti-authoritarianism has sunk deep roots into the modern psyche, as a legacy of the sixties.
Many people who do not even know what anarchism is have been profoundly affected by the personal liberation and counterculture movements of the past thirty years, epitomised by the popular bumper sticker, “Question Authority.” As a result, society now tolerates much more choice than ever before in matters of religion, sexuality, art, music, clothing, and other components of lifestyle. We need only recall the conservatism that reigned in such areas during the fifties to see that the idea of liberty has made tremendous advances in just a few decades.

Although this liberatory impulse has so far been confined almost entirely to the personal and cultural realms, it may yet be capable of spilling over and affecting economic and political institutions, provided it continues to grow. The Right is well aware of this, as seen in its ongoing campaigns for “family values,” school prayer, suppression of women’s rights, fundamentalist Christianity, sexual abstinence before marriage, and other attempts to revive the Ozzie-and-Harriet mindset of the Good Old Days. This is where the efforts of “cultural anarchists” — artists, musicians, poets, and others — are important in keeping alive the ideal of personal freedom and resistance to authority as a necessary foundation for economic and political restructuring.

Indeed, the libertarian right (as a whole) support restrictions on freedom as long as it’s not the state that is doing it! Their support for capitalism means that they have no problem with bosses dictating what workers do during working hours (nor outside working hours, if the job requires employees to take drug tests or not be gay in order to keep it). If a private landlord or company decrees a mandatory rule or mode of living, workers/tenants must “love it or leave it!” Of course, that the same argument also applies to state laws is one hotly denied by right-Liberarians — a definite case of not seeing the wood for the trees (see section 2.3).

Of course, the “anarcho”-capitalist will argue, workers and tenants can find a more liberal boss or landlord. This, however, ignores two key facts. Firstly, being able to move to a more liberal state in the later case, but denies it in the former. But the conditions of the people in question are identical and it is these conditions that horrify us. It is only his ideology that stops Rothbard drawing the obvious conclusion — identical conditions produce identical social relationships and so if the formally “free” ex-serfs are subject to “economic power” and “masters” then so are the formally “free” labourers within capitalism! Both sets of workers may be formally free, but their circumstances are such that they are “free” to “consent” to sell their freedom to others (i.e. economic power produces relationships of domination and unfreedom between formally free individuals).

Thus Rothbard’s definition of liberty in terms of rights fails to provide us with a realistic and viable understanding of freedom. Someone can be a virtual slave while still having her rights non-violated (conversely, someone can have their property rights violated and still be free; for example, the child who enters your backyard without your permission to get her ball hardly violates your liberty — indeed, you would never know that she has entered your property unless you happened to see her do it). So the idea that freedom means non-aggression against person and their legitimate material property justifies extensive non-freedom for the working class. The non-violation of property rights does not imply freedom, as Rothbard’s discussion of the former slaves shows. Anyone who, along with Rothbard, defines freedom “as the absence of invasion by another man of any man’s person or property” in a deeply inequality society is supporting, and justifying, capitalist and landlord domination. As anarchists have long realised, in an unequal society, a contractarian starting point implies an absolutist conclusion.

Why is this? Simply because freedom is a result of social interaction, not the product of some isolated, abstract individual (Rothbard uses the model of Robinson Crusoe to construct his ideology). But as Bakunin argued, “the freedom of the individual is a function of men in society, a necessary consequence of the collective develop-
anyway, which is impossible to climb up. No one would deny that you are unfree. Let us further assume that another person walks by and accidentally falls into the pit with you.

According to right-libertarianism, while you are unfree (i.e. subject to deliberate coercion) your fellow pit-dweller is perfectly free for they have subject to the “facts of nature” and not human action (deliberate or otherwise). Or, perhaps, they “voluntarily choose” to stay in the pit, after all, it is “only” the “facts of nature” limiting their actions. But, obviously, both of you are in exactly the same position, have exactly the same choices and so are equally unfree! Thus a definition of “liberty” that maintains that only deliberate acts of others — for example, coercion — reduces freedom misses the point totally.

Why is this example important? Let us consider Murray Rothbard’s analysis of the situation after the abolition of serfdom in Russia and slavery in America. He writes:

“The bodies of the oppressed were freed, but the property which they had worked and eminently deserved to own, remained in the hands of their former oppressors. With economic power thus remaining in their hands, the former lords soon found themselves virtual masters once more of what were now free tenants or farm labourers. The serfs and slaves had tasted freedom, but had been cruelly derived of its fruits.” [The Ethics of Liberty, p. 74]

However, contrast this with Rothbard’s claims that if market forces (“voluntary exchanges”) result in the creation of free tenants or labourers then these labourers and tenants are free (see, for example, The Ethics of Liberty, pp. 221–2 on why “economic power” within capitalism does not exist). But the labourers dispossessed by market forces are in exactly the same situation as the former serfs and slaves. Rothbard sees the obvious “economic power” hardly makes state laws less offensive (as they themselves will be the first to point out). Secondly, looking for a new job or home is not that easy. Just a moving to a new state can involve drastic upheavals, so change changing jobs and homes. Moreover, the job market is usually a buyers market (it has to be in capitalism, otherwise profits are squeezed — see sections C.7 and 10.2) and this means that workers are not usually in a position (unless they organise) to demand increased liberties at work.

It seems somewhat ironic, to say the least, that right-libertarians place rights of property over the rights of self-ownership, even though (according to their ideology) self-ownership is the foundational right from which property rights are derived. Thus in right-libertarianism the rights of property owners to discriminate and govern the property-less are more important than the freedom from discrimination (i.e. to be yourself) or the freedom to govern oneself at all times.

So, when it boils down to it, right-libertarians are not really bothered about restrictions on liberty and, indeed, they will defend private restrictions on liberty with all their might. This may seem a strange position for self-proclaimed “libertarians” to take, but it flows naturally from their definition of freedom (see section 2 for a full discussion of this). But by not attacking hierarchy beyond certain forms of statism, the ‘libertarian’ right fundamentally undermines its claim to be libertarian. Freedom cannot be compartmentalised, but is holistic. The denial of liberty in, say, the workplace, quickly results in its being denied elsewhere in society (due to the impact of the inequalities it would produce), just as the degrading effects of wage labour and the hierarchies with which it is bound up are felt by the worker outside work.

Neither the Libertarian Party nor so-called “anarcho”-capitalism is genuinely anti-authoritarian, as those who are truly dedicated to liberty must be. #secf12
1.2 How libertarian is right-Libertarian theory?

The short answer is, not very. Liberty not only implies but also requires independent, critical thought (indeed, anarchists would argue that critical thought requires free development and evolution and that it is precisely this which capitalist hierarchy crushes). For anarchists a libertarian theory, if it is to be worthy of the name, must be based upon critical thought and reflect the key aspect that characterises life — change and the ability to evolve. To hold up dogma and base “theory” upon assumptions (as opposed to facts) is the opposite of a libertarian frame of mind. A libertarian theory must be based upon reality and recognise the need for change and the existence of change. Unfortunately, right-Libertarianism is marked more by ideology than critical analysis.

Right-Libertarianism is characterised by a strong tendency of creating theories based upon assumptions and deductions from these axioms (for a discussion on the pre-scientific nature of this methodology and of its dangers, see the next section). Robert Nozick, for example, in *Anarchy, State, and Utopia* makes no attempt to provide a justification of the property rights his whole theory is based upon. His main assumption is that “[i]ndividuals have rights, and there are certain things no person or group may do to them (without violating their rights).” [Anarchy, State and Utopia, p. ix] While this does have its intuitive appeal, it is not much to base a political ideology upon. After all, what rights people consider as valid can be pretty subjective and have constantly evolved during history. To say that “individuals have rights” is to open up the question “what rights?” Indeed, as we argue in greater length in section 2, such a rights based system as Nozick desires can and does lead to situations developing in which people “consent” to be exploited and oppressed and that, intuitively, many people consider supporting the “violation” of these “certain rights” (by creating other ones) simply because of their evil consequences.

Of course, coercion and restriction of liberty can be resisted, unlike “natural forces” like gravity. So if, as Berlin argues, “negative” freedom means that you “lack political freedom only if you are prevented from attaining a goal by human beings,” then capitalism is indeed based on such a lack, since property rights need to be enforced by human beings (“I am prevented by others from doing what I could otherwise do”). After all, as Proudhon long ago noted, the market is manmade, hence any constraint it imposes is the coercion of man by man and so economic laws are not as inevitable as natural ones [see Alan Ritter’s *The Political Thought of Pierre-Joseph Proudhon*, p. 122]. Or, to put it slightly differently, capitalism requires coercion in order to work, and hence, is not similar to a “fact of nature,” regardless of Nozick’s claims (i.e. property rights have to be defined and enforced by human beings, although the nature of the labour market resulting from capitalist property definitions is such that direct coercion is usually not needed). This implication is actually recognised by right-libertarians, because they argue that the rights-framework of society should be set up in one way rather than another. In other words, they recognise that society is not independent of human interaction, and so can be changed.

Perhaps, as seems the case, the “anarcho”-capitalist or right-Libertarian will claim that it is only deliberate acts which violate your (libertarian defined) rights by other humans beings that cause unfreedom (“we define freedom ... as the absence of invasion by another man of an man’s person or property” [Rothbard, *The Ethics of Liberty*, p. 41]) and so if no-one deliberately coerces you then you are free. In this way the workings of the capitalist market can be placed alongside the “facts of nature” and ignored as a source of unfreedom. However, a moment’s thought shows that this is not the case. Both deliberate and non-deliberate acts can leave individuals lacking freedom.

Let us assume (in an example paraphrased from Alan Haworth’s excellent book *Anti-Libertarianism*, p. 49) that someone kidnaps you and places you down a deep (naturally formed) pit, miles from
In other words, starting from the assumption “people have [certain] rights” Nozick constructs a theory which, when faced with the reality of unfreedom and domination it would create for the many, justifies this unfreedom as an expression of liberty. In other words, regardless of the outcome, the initial assumptions are what matter. Nozick’s intuitive rights system can lead to some very non-intuitive outcomes.

And does Nozick prove the theory of property rights he assumes? He states that “we shall not formulate [it] here.” [Op. Cit., p. 150] Moreover, it is not formulated anywhere else in his book. And if it is not formulated, what is there to defend? Surely this means that his Libertarianism is without foundations? As Jonathan Wolff notes, Nozick’s “Libertarian property rights remain substantially undefended.” [Robert Nozick: Property, Justice and the Minimal State, p. 117] Given that the right to acquire property is critical to his whole theory you would think it important enough to go into in some detail (or at least document). After all, unless he provides us with a firm basis for property rights then his entitlement theory is nonsense as no one has the right to (private) property.

It could be argued that Nozick does present enough information to allow us to piece together a possible argument in favour of property rights based on his modification of the “Lockean Proviso” (although he does not point us to these arguments). However, assuming this is the case, such a defence actually fails (see section B.3.4 for more on this). If individuals do have rights, these rights do not include property rights in the form Nozick assumes (but does not prove). Nozick appears initially convincing because what he assumes with regards to property is a normal feature of the society we are in (we would be forgiven when we note here that feeble arguments pass for convincing when they are on the same side as the prevailing sentiment).

Similarly, both Murray Rothbard and Ayn Rand (who is infamous for repeating “A is A” ad infinitum) do the same — base their ideologies on assumptions (see section 11 for more on this).
Therefore, we see that most of the leading right-Libertarian ideologues base themselves on assumptions about what “Man” is or the rights they should have (usually in the form that people have (certain) rights because they are people). From these theorems and assumptions they build their respective ideologies, using logic to deduce the conclusions that their assumptions imply. Such a methodology is unscientific and, indeed, a relic of religious (pre-scientific) society (see next section) but, more importantly, can have negative effects on maximising liberty. This is because this “methodology” has distinct problems. Murray Bookchin argues:

“Conventional reason rests on identity, not change; its fundamental principle is that A equals A, the famous ‘principle of identity,’ which means that any given phenomenon can be only itself and cannot be other than what we immediately perceive it to be at a given moment in time. It does not address the problem of change. A human being is an infant at one time, a child at another, an adolescent at still another, and finally a youth and an adult. When we analyse an infant by means of conventional reason, we are not exploring what it is becoming in the process of developing into a child.” [*A Philosophical Naturalism*, Society and Nature No.2, p. 64]

In other words, right-Libertarian theory is based upon ignoring the fundamental aspect of life — namely change and evolution. Perhaps it will be argued that identity also accounts for change by including potentiality — which means, that we have the strange situation that A can potentially be A! If A is not actually A, but only has the potential to be A, then A is not A. Thus to include change is to acknowledge that A does not equal A — that individuals and humanity evolves and so what constitutes A also changes. To maintain identity and then to deny it seems strange.

freedom caused by wage slavery are not really restrictions because the worker voluntarily consents to the contract. The circumstances that drive a worker to make the contract are irrelevant because they are created by people exercising their rights and not violating other peoples’ ones (see the section on “Voluntary Exchange” in *Anarchy, State, and Utopia*, pp. 262–265).

This means that within a society “[w]hether a person’s actions are voluntary depends on what limits his alternatives. If facts of nature do so, the actions are voluntary. (I may voluntarily walk to someplace I would prefer to fly to unaided).” [*Anarchy, State, and Utopia*, p. 262] Similarly, the results of voluntary actions and the transference of property can be considered alongside the “facts of nature” (they are, after all, the resultants of “natural rights”). This means that the circumstances created by the existence and use of property can be considered, in essence, as a “natural” fact and so the actions we take in response to these circumstances are therefore “voluntary” and we are “free” (Nozick presents the example [p. 263] of someone who marries the only available person — all the more attractive people having already chosen others — as a case of an action that is voluntary despite removal of all but the least attractive alternative through the legitimate actions of others. Needless to say, the example can be — and is — extended to workers on the labour market — although, of course, you do not starve to death if you decide not to marry).

However, such an argument fails to notice that property is different from gravity or biology. Of course not being able to fly does not restrict freedom. Neither does not being able to jump 10 feet into the air. But unlike gravity (for example), private property has to be protected by laws and the police. No one stops you from flying, but laws and police forces must exist to ensure that capitalist property (and the owners’ authority over it) is respected. The claim, therefore, that private property in general, and capitalism in particular, can be considered as “facts of nature,” like gravity, ignores an important fact: namely that the people involved in an
And if a society is run on the wage- and profit-based system suggested by the “anarcho” and “libertarian” capitalists, freedom becomes a commodity. The more money you have, the more freedom you get. Then, since money is only available to those who earn it, Libertarianism is based on that classic saying “work makes one free!” (Arbeit macht frei!), which the Nazis placed on the gates of their concentration camps. Of course, since it is capitalism, this motto is somewhat different for those at the top. In this case it is “other people’s work makes one free!” — a truism in any society based on private property and the authority that stems from it.

Thus it is debatable that a libertarian or “anarcho” capitalist society would have less unfreedom or coercion in it than “actually existing capitalism.” In contrast to anarchism, “anarcho”-capitalism, with its narrow definitions, restricts freedom to only a few aspects of social life and ignores domination and authority beyond those aspects. As Peter Marshall points out, the right-libertarian’s “definition of freedom is entirely negative. It calls for the absence of coercion but cannot guarantee the positive freedom of individual autonomy and independence.” [Demanding the Impossible, p. 564] By confining freedom to such a narrow range of human action, “anarcho”-capitalism is clearly not a form of anarchism. Real anarchists support freedom in every aspect of an individual’s life. #secf21

2.1 What are the implications of defining liberty in terms of (property) rights?

The change from defending liberty to defending (property) rights has important implications. For one thing, it allows right libertarians to imply that private property is similar to a “fact of nature,” and so to conclude that the restrictions on freedom produced by it can be ignored. This can be seen in Robert Nozick’s argument that decisions are voluntary if the limitations on one’s actions are not caused by human action which infringe the rights of others. Thus, in a “pure” capitalist society the restrictions on

That change is far from the “A is A” mentality can be seen from Murray Rothbard who goes so far as to state that “one of the notable attributes of natural law” is “its applicability to all men [sic!], regardless of time or place. Thus ethical law takes its place alongside physical or ‘scientific’ natural laws.” [The Ethics of Liberty, p. 42] Apparently the “nature of man” is the only living thing in nature that does not evolve or change! Of course, it could be argued that by “natural law” Rothbard is only referring to his method of deducing his (and, we stress, they are just his — not natural) “ethical laws” — but his methodology starts by assuming certain things about “man.” Whether these assumptions seem far or not is besides the point, by using the term “natural law” Rothbard is arguing that any actions that violate his ethical laws are somehow “against nature” (but if they were against nature, they could not occur — see section 11 for more on this). Deductions from assumptions is a Procrustean bed for humanity (as Rothbard’s ideology shows).

So, as can be seen, many leading right-Libertarians place great store by the axiom “A is A” or that “man” has certain rights simply because “he” is a “man”. And as Bookchin points out, such conventional reason “doubtless plays an indispensable role in mathematical thinking and mathematical sciences … and in the nuts-and-bolts of dealing with everyday life” and so is essential to “understand or design mechanical entities.” [Ibid., p.67] But the question arises, is such reason useful when considering people and other forms of life?

Mechanical entities are but one (small) aspect of human life. Unfortunately for right-Libertarians (and fortunately for the rest of humanity), human beings are not mechanical entities but instead are living, breathing, feeling, hoping, dreaming, changing living organisms. They are not mechanical entities and any theory that uses reason based on such (non-living) entities will flounder when faced with living ones. In other words, right-Libertarian theory treats people as the capitalist system tries to — namely as commodities, as things. Instead of human beings, whose ideas, ideals
and ethics change, develop and grow, capitalism and capitalist ideologies try to reduce human life to the level of corn or iron (by emphasising the unchanging “nature” of man and their starting assumptions/rights).

This can be seen from their support for wage labour, the reduction of human activity to a commodity on the market. While paying lip service to liberty and life, right-libertarianism justifies the commodification of labour and life, which within a system of capitalist property rights can result in the treating of people as means to an end as opposed to an end in themselves (see sections 2 and 3.1).

And as Bookchin points out, “in an age of sharply conflicting values and emotionally charged ideals, such a way of reasoning is often repellent. Dogmatism, authoritarianism, and fear seem all-pervasive.” [Ibid., p. 68] Right-Libertarianism provides more than enough evidence for Bookchin’s summary with its support for authoritarian social relationships, hierarchy and even slavery (see section 2).

This mechanical viewpoint is also reflected in their lack of appreciation that social institutions and relationships evolve over time and, sometimes, fundamentally change. This can best be seen from property. Right-libertarians fail to see that over time (in the words of Proudhon) property “changed its nature.” Originally, “the word property was synonymous with ... individual possession” but it became more “complex” and turned into private property – “the right to use it by his neighbour’s labour.” The changing of use-rights to (capitalist) property rights created relations of domination and exploitation between people absent before. For the right-Libertarian, both the tools of the self-employed artisan and the capital of a transnational corporation are both forms of ‘property’ and (so) basically identical. In practice, of course, the social relations they create and the impact they have on society are totally different. Thus the mechanical mind-set of right-Libertarianism fails to understand how institutions, like property, evolve and come to replace whatever freedom enhancing features they had with oppression (indeed, von Mises argued that ”[t]here

an ideology proclaiming its support for liberty sees nothing wrong with the alienation and denial of liberty but, in actual fact, it is unsurprising. After all, contract theory is a “theoretical strategy that justifies subjection by presenting it as freedom” and nothing more. Little wonder, then, that contract “creates a relation of subordination” and not of freedom [Carole Pateman, Op. Cit., p. 39, p. 59]

Any attempt to build an ethical framework starting from the abstract individual (as Rothbard does with his “legitimate rights” method) will result in domination and oppression between people, not freedom. Indeed, Rothbard provides an example of the dangers of idealist philosophy that Bakunin warned about when he argued that while “[m]aterialism denies free will and ends in the establishment of liberty; idealism, in the name of human dignity, proclaims free will, and on the ruins of every liberty founds authority.” [God and the State, p. 48] This is the case with “anarcho”-capitalism can be seen from Rothbard’s wholehearted support for wage labour and the rules imposed by property owners on those who use, but do not own, their property. Rothbard, basing himself on abstract individualism, cannot help but justify authority over liberty.

Overall, we can see that the logic of the right-libertarian definition of “freedom” ends up negating itself, because it results in the creation and encouragement of authority, which is an opposite of freedom. For example, as Ayn Rand points out, “man has to sustain his life by his own effort, the man who has no right to the product of his effort has no means to sustain his life. The man who produces while others dispose of his product, is a slave.” [The Ayn Rand Lexicon: Objectivism from A to Z, pp. 388–9] But, as was shown in section C, capitalism is based on, as Proudhon put it, workers working “for an entrepreneur who pays them and keeps their products,” and so is a form of theft. Thus, by “libertarian” capitalism’s own logic, capitalism is based not on freedom, but on (wage) slavery; for interest, profit and rent are derived from a worker’s unpaid labour, i.e. “others dispose of his [sic] product.”
which, since he cannot be separated from his capacities, he sells command over the use of his body and himself… To sell command over the use of oneself for a specified period … is to be an unfree labourer.”

[The Sexual Contract, p. 151]

In other words, contracts about property in the person inevitably create subordination. “Anarcho”-capitalism defines this source of unfreedom away, but it still exists and has a major impact on people’s liberty. Therefore freedom is better described as “self-government” or “self-management” — to be able to govern one’s own actions (if alone) or to participate in the determination of joint activity (if part of a group). Freedom, to put it another way, is not an abstract legal concept, but the vital concrete possibility for every human being to bring to full development all their powers, capacities, and talents which nature has endowed them. A key aspect of this is to govern one’s own actions when within associations (self-management). If we look at freedom this way, we see that coercion is condemned but so is hierarchy (and so is capitalism for during working hours, people are not free to make their own plans and have a say in what affects them. They are order takers, not free individuals).

It is because anarchists have recognised the authoritarian nature of capitalist firms that they have opposed wage labour and capitalist property rights along with the state. They have desired to replace institutions structured by subordination with institutions constituted by free relationships (based, in other words, on self-management) in all areas of life, including economic organisations. Hence Proudhon’s argument that the “workmen’s associations … are full of hope both as a protest against the wage system, and as an affirmation of reciprocity” and that their importance lies “in their denial of the rule of capitalists, money lenders and governments.” [The General Idea of the Revolution, pp. 98–99]

Unlike anarchists, the “anarcho”-capitalist account of freedom allows an individual’s freedom to be rented out to another while maintaining that the person is still free. It may seem strange that...
and the person who owns capital commands the person who “only” owns his life and productive abilities. And as Oscar Wilde once noted, crimes against property “are the crimes that the English law, valuing what a man has more than what a man is, punishes with the harshest and most horrible severity.” [The Soul of Man Under Socialism]

This mentality is reflected in right-libertarianism when it claims that stealing food is a crime while starving to death (due to the action of market forces/power and property rights) is no infringement of your rights (see section 4.2 for a similar argument with regards to water). It can also be seen when right-libertarian’s claim that the taxation “of earnings from labour” (e.g. of one dollar from a millionaire) is "on a par with forced labour" [Nozick, Op. Cit., p. 169] while working in a sweatshop for 14 hours a day (enriching said millionaire) does not affect your liberty as you “consent” to it due to market forces (although, of course, many rich people have earned their money without labouring themselves — their earnings derive from the wage labour of others so would taxing those, non-labour, earnings be “forced labour”?) Interestingly, the Individualist Anarchist Ben Tucker argued that an income tax was “a recognition of the fact that industrial freedom and equality of opportunity no longer exist here [in the USA in the 1890s] even in the imperfect state in which they once did exist” [quoted by James Martin, Men Against the State, p. 263] which suggests a somewhat different viewpoint on this matter than Nozick or Rothbard.

That capitalism produces an inverted set of ethics can be seen when the Ford produced the Pinto. The Pinto had a flaw in it which meant that if it was hit in a certain way in a crash the fuel tank exploded. The Ford company decided it was more “economically viable” to produce that car and pay damages to those who were injured or the relatives of those who died than pay to change the invested capital. The needs for the owners of capital to make a profit came before the needs of the living. Similarly, bosses often hire people to perform unsafe work in dangerous conditions and fire

But “labour services” are unlike the private possessions Rothbard lists as being alienable. As we argued in section B.1 (“Why do anarchists oppose hierarchy”) a person’s “labour services” and “will” cannot be divided — if you sell your labour services, you also have to give control of your body and mind to another person! If a worker does not obey the commands of her employer, she is fired. That Rothbard denies this indicates a total lack of common-sense. Perhaps Rothbard will argue that as the worker can quit at any time she does not alienate their will (this seems to be his case against slave contracts — see section 2.6). But this ignores the fact that between the signing and breaking of the contract and during work hours (and perhaps outside work hours, if the boss has mandatory drug testing or will fire workers who attend union or anarchist meetings or those who have an “unnatural” sexuality and so on) the worker does alienate his will and body. In the words of Rudolf Rocker, “under the realities of the capitalist economic form ... there can be no talk of a ‘right over one’s own person,’ for that ends when one is compelled to submit to the economic dictation of another if he does not want to starve.” [Anarcho-Syndicalism, p. 17]

Ironically, the rights of property (which are said to flow from an individual’s self-ownership of themselves) becomes the means, under capitalism, by which self-ownership of non-property owners is denied. The foundational right (self-ownership) becomes denied by the derivative right (ownership of things). Under capitalism, a lack of property can be just as oppressive as a lack of legal rights because of the relationships of domination and subjection this situation creates.

So Rothbard’s argument (as well as being contradictory) misses the point (and the reality of capitalism). Yes, if we define freedom as “the absence of coercion” then the idea that wage labour does not restrict liberty is unavoidable, but such a definition is useless. This is because it hides structures of power and relations of domination and subordination. As Carole Pateman argues, “the contract in which the worker allegedly sells his labour power is a contract in
what constitutes “legitimate” “rights,” then their claim to be defenders of liberty is weak.

Another important implication of this “liberty as property” concept is that it produces a strangely alienated concept of freedom. Liberty, as we noted, is no longer considered absolute, but a derivative of property — which has the important consequence that you can “sell” your liberty and still be considered free by the ideology. This concept of liberty (namely “liberty as property”) is usually termed “self-ownership.” But, to state the obvious, I do not “own” myself, as if were an object somehow separable from my subjectivity — I am myself. However, the concept of “self-ownership” is handy for justifying various forms of domination and oppression — for by agreeing (usually under the force of circumstances, we must note) to certain contracts, an individual can “sell” (or rent out) themselves to others (for example, when workers sell their labour power to capitalists on the “free market”). In effect, “self-ownership” becomes the means of justifying treating people as objects — ironically, the very thing the concept was created to stop! As L. Susan Brown notes, “[a]t the moment an individual ‘sells’ labour power to another, he/she loses self-determination and instead is treated as a subjectless instrument for the fulfilment of another’s will.” [The Politics of Individualism, p. 4]

Given that workers are paid to obey, you really have to wonder which planet Murray Rothbard is on when he argues that a person’s “labour service is alienable, but his will is not” and that he [sic!] “cannot alienate his will, more particularly his control over his own mind and body.” [The Ethics of Liberty, p. 40, p. 135] He contrasts private property and self-ownership by arguing that “[a]ll physical property owned by a person is alienable … I can give away or sell to another person my shoes, my house, my car, my money, etc. But there are certain vital things which, in natural fact and in the nature of man, are inalienable … [his] will and control over his own person are inalienable.” [Op. Cit., pp. 134–5]

Right-libertarian ideology is the philosophical equivalent. Its dogma is “capital” and it comes before life (i.e. “labour”).

As Bakunin once put it, “you will always find the idealists in the very act of practical materialism, while you will see the materialists pursuing and realising the most grandly ideal aspirations and thoughts.” [God and the State, p. 49] Hence we see right “libertarians” supporting sweat shops and opposing taxation — for, in the end, money (and the power that goes with it) counts far more in that ideology than ideals such as liberty, individual dignity, empowering, creative and productive work and so forth for all. The central flaw of right-libertarianism is that it does not recognise that the workings of the capitalist market can easily ensure that the majority end up becoming a resource for others in ways far worse than that associated with taxation. The legal rights of self-ownership supported by right-libertarians does not mean that people have the ability to avoid what is in effect enslavement to another (see sections 2 and 3).

Right-Libertarian theory is not based upon a libertarian methodology or perspective and so it is hardly surprising it results in support for authoritarian social relationships and, indeed, slavery (see section 2.6). #secf13

1.3 Is right-Libertarian theory scientific in nature?

Usually, no. The scientific approach is inductive, much of the right-libertarian approach is deductive. The first draws generalisations from the data, the second applies preconceived generalisations to the data. A completely deductive approach is pre-scientific, however, which is why many right-Libertarians cannot legitimately claim to use a scientific method. Deduction does occur in science, but the generalisations are primarily based on other data, not a priori assumptions, and are checked against
data to see if they are accurate. Anarchists tend to fall into the inductive camp, as Kropotkin put it:

“Precisely this natural-scientific method applied to economic facts, enables us to prove that the so-called ‘laws’ of middle-class sociology, including also their political economy, are not laws at all, but simply guesses, or mere assertions which have never been verified at all.”

[Kropotkin’s Revolutionary Pamphlets, p. 153]

The idea that natural-scientific methods can be applied to economic and social life is one that many right-libertarians reject. Instead they favour the deductive (pre-scientific) approach (this we must note is not limited purely to Austrian economists, many more mainstream capitalist economists also embrace deduction over induction).

The tendency for right-Libertarianism to fall into dogmatism (or a priori theorems, as they call it) and its implications can best be seen from the work of Ludwig von Mises and other economists from the right-Libertarian “Austrian school.” Of course, not all right-libertarians necessarily subscribe to this approach (Murray Rothbard for one did) but its use by so many leading lights of both schools of thought is significant and worthy of comment. And as we are concentrating on methodology it is not essential to discuss the starting assumptions. The assumptions (such as, to use Rothbard’s words, the Austrian’s “fundamental axiom that individual human beings act”) may be correct, incorrect or incomplete — but the method of using them advocated by von Mises ensures that such considerations are irrelevant.

Von Mises (a leading member of the Austrian school of economics) begins by noting that social and economic theory “is not derived from experience; it is prior to experience...” Which is back to front. It is obvious that experience of capitalism is necessary in order to develop a viable theory about how it works. Without the

Why this is the case can be seen from how the “anarcho”-capitalist defines freedom.

In a right-libertarian or “anarcho”-capitalist society, freedom is considered to be a product of property. As Murray Rothbard puts it, “the libertarian defines the concept of ‘freedom’ or ‘liberty’...[as a] condition in which a person’s ownership rights in his body and his legitimate material property rights are not invaded, are not aggressed against.... Freedom and unrestricted property rights go hand in hand.”

This definition has some problems, however. In such a society, one cannot (legitimately) do anything with or on another’s property if the owner prohibits it. This means that an individual’s only guaranteed freedom is determined by the amount of property that he or she owns. This has the consequence that someone with no property has no guaranteed freedom at all (beyond, of course, the freedom not to be murdered or otherwise harmed by the deliberate acts of others). In other words, a distribution of property is a distribution of freedom, as the right-libertarians themselves define it. It strikes anarchists as strange that an ideology that claims to be committed to promoting freedom entails the conclusion that some people should be more free than others. However, this is the logical implication of their view, which raises a serious doubt as to whether “anarcho”-capitalists are actually interested in freedom.

Looking at Rothbard’s definition of “liberty” quoted above, we can see that freedom is actually no longer considered to be a fundamental, independent concept. Instead, freedom is a derivative of something more fundamental, namely the “legitimate rights” of an individual, which are identified as property rights. In other words, given that “anarcho”-capitalists and right libertarians in general consider the right to property as “absolute,” it follows that freedom and property become one and the same. This suggests an alternative name for the right Libertarian, namely “Propertarian.” And, needless to say, if we do not accept the right-libertarians’ view of
applied to right-wing libertarians (even if they do call themselves “anarcho”-capitalists). This is because they do not seek to correct the inequalities produced by previous state action before ending it nor do they seek to change the definitions of “private property” imposed by the state. In effect, they argue that the “dictatorship of the bourgeoisie” should “wither away” and be limited to defending the property accumulated in a few hands. Needless to say, starting from the current (coercively produced) distribution of property and then eliminating “force” simply means defending the power and privilege of ruling minorities:

“The modern Individualism initiated by Herbert Spencer is, like the critical theory of Proudhon, a powerful indictment against the dangers and wrongs of government, but its practical solution of the social problem is miserable — so miserable as to lead us to inquire if the talk of ‘No force’ be merely an excuse for supporting landlord and capitalist domination.” [Act For Yourselves, p. 98]

> <h1>2 What do “anarcho”-capitalists, the concept of freedom is limited to the idea of “freedom from.” For them, freedom means simply freedom from the “initiation of force,” or the “non-aggression against anyone’s person and property.” [Murray Rothbard, For a New Liberty, p. 23] The notion that real freedom must combine both freedom “to” and freedom “from” is missing in their ideology, as is the social context of the so-called freedom they defend.

Before starting, it is useful to quote Alan Haworth when he notes that “[i]n fact, it is surprising how little close attention the concept of freedom receives from libertarian writers. Once again Anarchy, State, and Utopia is a case in point. The word ‘freedom’ doesn’t even appear in the index. The word ‘liberty’ appears, but only to refer the reader to the ‘Wilt Chamberlain’ passage. In a supposedly ‘libertarian’ work, this is more than surprising. It is truly remarkable.” [Anti-Libertarianism, p. 95]
No theorems are not open to any verification or falsification on the grounds of experience. The ultimate yardstick of an economic theorem’s correctness or incorrectness is solely reason unaided by experience.” [Human Action, p. 858]

Von Mises rejects the scientific approach as do all Austrian Economists. Murray Rothbard states approvingly that “Mises indeed held not only that economic theory does not need to be ‘tested’ by historical fact but also that it cannot be so tested.” [“Praxeology: The Methodology of Austrian Economics” in The Foundation of Modern Austrian Economics, p. 32] Similarly, von Hayek wrote that economic theories can “never be verified or falsified by reference to facts. All that we can and must verify is the presence of our assumptions in the particular case.” [Individualism and Economic Order, p. 73]

This may seem somewhat strange to non-Austrians. How can we ignore reality when deciding whether a theory is a good one or not? If we cannot evaluate our ideas, how can we consider them anything bar dogma? The Austrian’s maintain that we cannot use historical evidence because every historical situation is unique. Thus we cannot use “complex heterogeneous historical facts as if they were repeatable homogeneous facts” like those in a scientist’s experiment [Rothbard, Op. Cit., p. 33]. While such a position does have an element of truth about it, the extreme a priorism that is drawn from this element is radically false (just as extreme empiricism is also false, but for different reasons).

Those who hold such a position ensure that their ideas cannot be evaluated beyond logical analysis. As Rothbard makes clear, “since praxeology begins with a true axiom, A, all that can be deduced from this axiom must also be true. For if A implies be, and A is true, then B must also be true.” [Op. Cit., pp. 19–20] But such an approach makes the search for truth a game without rules. The Austrian economists (and other right-libertarians) who use this honestly obtained under the reign of liberty, do not think it either unjust or unwise to dispossess the landlords who have monopolised natural wealth by force and fraud. We hold that the poor and disinherit toilers would be justified in expropriating, not alone the landlords, who notoriously have no equitable titles to their lands, but all the financial lords and rulers, all the millionaires and very wealthy individuals... Almost all possessors of great wealth enjoy neither what they nor their ancestors rightfully acquired (and if Mr. Herbert wishes to challenge the correctness of this statement, we are ready to go with him into a full discussion of the subject)...

“If he holds that the landlords are justly entitled to their lands, let him make a defence of the landlords or an attack on our unjust proposal.” [quoted by Carl Watner, “The English Individualists As They Appear In Liberty,” pp. 191–211, Benjamin R. Tucker and the Champions of Liberty, Coughlin, Hamilton and Sullivan (eds.), pp. 199–200] Significantly, Tucker and other individualist anarchists saw state intervention has a result of capital manipulating legislation to gain an advantage on the so-called free market which allowed them to exploit labour and, as such, it benefited the whole capitalist class. Rothbard, at best, acknowledges that some sections of big business benefit from the current system and so fails to have the comprehensive understanding of the dynamics of capitalism as a system (rather as an ideology). This lack of understanding of capitalism as a historic and dynamic system rooted in class rule and economic power is important in evaluating “anarcho”-capitalist claims to anarchism. Marxists are not considered anarchists as they support the state as a means of transition to an anarchist society. Much the same logic can be
that tradition, the tradition associated with a capitalism which no longer needs obvious state intervention as enough wealth as been accumulated to keep workers under control by means of market power.

As with the original nineteenth century British “anti-state” capitalists like Spencer and Herbert, Rothbard “completely overlooks the role of the state in building and maintaining a capitalist economy in the West.Privileged to live in the twentieth century, long after the battles to establish capitalism have been fought and won, Rothbard sees the state solely as a burden on the market and a vehicle for imposing the still greater burden of socialism. He manifests a kind of historical nearsightedness that allows him to collapse many centuries of human experience into one long night of tyranny that ended only with the invention of the free market and its ‘spontaneous’ triumph over the past. It is pointless to argue, as Rothbard seems ready to do, that capitalism would have succeeded without the bourgeois state; the fact is that all capitalist nations have relied on the machinery of government to create and preserve the political and legal environments required by their economic system.” That, of course, has not stopped him “critis[ing] others for being unhistorical.” [Stephen L Newman, Liberalism at Wit’s End, pp. 77–8 and p. 79]

In other words, there is substantial differences between the victims of a thief trying to stop being robbed and be left alone to enjoy their property and the successful thief doing the same! Individualist Anarchist’s were aware of this. For example, Victor Yarros stressed this key difference between individualist anarchism and the proto-“libertarian” capitalists of “voluntarism”:

“[Auberon Herbert] believes in allowing people to retain all their possessions, no matter how unjustly and basely acquired, while getting them, so to speak, to swear off stealing and usurping and to promise to behave well in the future. We, on the other hand, while insisting on the principle of private property, in wealth method are free to theorise anything they want, without such irritating constrictions as facts, statistics, data, history or experimental confirmation. Their only guide is logic. But this is no different from what religions do when they assert the logical existence of God. Theories ungrounded in facts and data are easily spun into any belief a person wants. Starting assumptions and trains of logic may contain inaccuracies so small as to be undetectable, yet will yield entirely false conclusions.

In addition, trains of logic may miss things which are only brought to light by actual experiences (after all, the human mind is not all knowing or all seeing). To ignore actual experience is to loose that input when evaluating a theory. Hence our comments on the irrelevance of the assumptions used — the methodology is such that incomplete or incorrect assumptions or steps cannot be identified in light of experience. This is because one way of discovering if a given chain of logic requires checking is to test its conclusions against available evidence (although von Mises did argue that the “ultimate yardstick” was “solely reason unaided by experience”). If we do take experience into account and rethink a given theory in the light of contradictory evidence, the problem remains that a given logical chain may be correct, but incomplete or concentrate on or stress inappropriate factors. In other words, our logical deductions may be correct but our starting place or steps wrong and as the facts are to be rejected in the light of the deductive method, we cannot revise our ideas.

Indeed, this approach could result in discarding (certain forms of) human behaviour as irrelevant (which the Austrian system claims using empirical evidence does). For there are too many variables that can have an influence upon individual acts to yield conclusive results explaining human behaviour. Indeed, the deductive approach may ignore as irrelevant certain human motivations which have a decisive impact on an outcome. There could be a strong tendency to project “right-libertarian person” onto the rest of society and history, for example, and draw inappropriate
insights into the way human society works or has worked. This can be seen, for example, in attempts to claim pre-capitalist societies as examples of “anarcho”-capitalism in action.

Moreover, deductive reasoning cannot indicate the relative significance of assumptions or theoretical factors. That requires empirical study. It could be that a factor considered important in the theory actually turns out to have little effect in practice and so the derived axioms are so weak as to be seriously misleading.

In such a purely ideal realm, observation and experience are distrusted (when not ignored) and instead theory is the lodestone. Given the bias of most theorists in this tradition, it is unsurprising that this style of economics can always be trusted to produce results proving free markets to be the finest principle of social organisation. And, as an added bonus, reality can be ignored as it is never “pure” enough according to the assumptions required by the theory. It could be argued, because of this, that many right-libertarians insulate their theories from criticism by refusing to test them or acknowledge the results of such testing (indeed, it could also be argued that much of right-libertarianism is more a religion than a political theory as it is set-up in such a way that it is either true or false, with this being determined not by evaluating facts but by whether you accept the assumptions and logical chains presented with them).

Strangely enough, while dismissing the “testability” of theories many right-Libertarians (including Murray Rothbard) do investigate historical situations and claim them as examples of how well their ideas work in practice. But why does historical fact suddenly become useful when it can be used to bolster the right-Libertarian argument? Any such example is just as “complex” as any other and the good results indicated may not be accountable to the assumptions and steps of the theory but to other factors totally ignored by it. If economic (or other) theory is untestable then no conclusions can be drawn from history, including claims for the superiority of laissez-faire capitalism. You cannot have it both ways — although accumulation” in favour of the pre-capitalist forms of property and society it was destroying.

However, when capitalism found its feet and could do without such obvious intervention, the possibility of an “anti-state” capitalism could arise. Such a possibility became a definite once the state started to intervene in ways which, while benefiting the system as a whole, came into conflict with the property and power of individual members of the capitalist and landlord class. Thus social legislation which attempted to restrict the negative effects of unbridled exploitation and oppression on workers and the environment were having on the economy were the source of much outrage in certain bourgeois circles:

“Quite independently of these tendencies [of individualist anarchism] ... the anti-state bourgeoisie (which is also anti-statist, being hostile to any social intervention on the part of the State to protect the victims of exploitation — in the matter of working hours, hygienic working conditions and so on), and the greed of unlimited exploitation, had stirred up in England a certain agitation in favour of pseudo-individualism, an unrestrained exploitation. To this end, they enlisted the services of a mercenary pseudo-literature ... which played with doctrinaire and fanatical ideas in order to project a species of ‘individualism’ that was absolutely sterile, and a species of ‘non-interventionism’ that would let a man die of hunger rather than offend his dignity.” [Max Nettlau, A Short History of Anarchism, p. 39]

This perspective can be seen when Tucker denounced Herbert Spencer as a champion of the capitalistic class for his vocal attacks on social legislation which claimed to benefit working class people but stays strangely silent on the laws passed to benefit (usually indirectly) capital and the rich. “Anarcho”-capitalism is part of
or on too limited a scale... Where, amongst such curious characters, is the ‘field of abstinence’ for the capitalists? ... Today’s wage-labourer is tomorrow’s independent peasant or artisan, working for himself. He vanishes from the labour-market — but not into the workhouse.” There is a “constant transformation of wage-labourers into independent producers, who work for themselves instead of for capital” and so “the degree of exploitation of the wage-labourer remain[s] indecently low.” In addition, the “wage-labourer also loses, along with the relation of dependence, the feeling of dependence on the abstemious capitalist.” [Op. Cit., pp. 935–6]

Saying that, as we discuss in section G.4, individualist anarchist support for wage labour is at odds with the ideas of Proudhon and, far more importantly, in contradiction to many of the stated principles of the individualist anarchists themselves. In particular, wage labour violates “occupancy and use” as well as having more than a passing similarity to the state. However, these problems can be solved by consistently applying the principles of individualist anarchism, unlike “anarchist”-capitalism, and that is why it is a real school of anarchism. In other words, a system of generalised wage labour would not be anarchist nor would it be non-exploitative. Moreover, the social context these ideas were developed in and would have been applied ensure that these contradictions would have been minimised. If they had been applied, a genuine anarchist society of self-employed workers would, in all likelihood, have been created (at least at first, whether the market would increase inequalities is a moot point — see section G.4).

We must stress that the social situation is important as it shows how apparently superficially similar arguments can have radically different aims and results depending on who suggests them and in what circumstances. As noted, during the rise of capitalism the bourgeoisie were not shy in urging state intervention against the masses. Unsurprisingly, working class people generally took an anti-state position during this period. The individualist anarchists were part of that tradition, opposing what Marx termed “primitive

we doubt that right-libertarians will stop using history as evidence that their ideas work.

Perhaps the Austrian desire to investigate history is not so strange after all. Clashes with reality make a-priori deductive systems implose as the falsifications run back up the deductive changes to shatter the structure built upon the original axioms. Thus the desire to find some example which proves their ideology must be tremendous. However, the deductive a-priori methodology makes them unwilling to admit to being mistaken — hence their attempts to downplay examples which refute their dogmas. Thus we have the desire for historical examples while at the same time they have extensive ideological justifications that ensure reality only enters their world-view when it agrees with them. In practice, the latter wins as real-life refuses to be boxed into their dogmas and deductions.

Of course it is sometimes argued that it is complex data that is the problem. Let use assume that this is the case. It is argued that when dealing with complex information it is impossible to use aggregate data without first having more simple assumptions (i.e. that “humans act”). Due to the complexity of the situation, it is argued, it is impossible to aggregate data because this hides the individual activities that creates it. Thus “complex” data cannot be used to invalidate assumptions or theories. Hence, according to Austrians, the axioms derived from the “simple fact” that “humans act” are the only basis for thinking about the economy.

Such a position is false in two ways.

Firstly, the aggregation of data does allow us to understand complex systems. If we look at a chair, we cannot find out whether it is comfortable, its colour, whether it is soft or hard by looking at the atoms that make it up. To suggest that you can is to imply the existence of green, soft, comfortable atoms. Similarly with gases. They are composed to countless individual atoms but scientists do not study them by looking at those atoms and their actions. Within limits, this is also valid for human action. For example, it
would be crazy to maintain from historical data that interest rates will be a certain percentage a week but it is valid to maintain that interest rates are known to be related to certain variables in certain ways. Or that certain experiences will tend to result in certain forms of psychological damage. General tendencies and “rules of thumb” can be evolved from such study and these can be used to guide current practice and theory. By aggregating data you can produce valid information, rules of thumb, theories and evidence which would be lost if you concentrated on “simple data” (such as “humans act”). Therefore, empirical study produces facts which vary across time and place, and yet underlying and important patterns can be generated (patterns which can be evaluated against new data and improved upon).

Secondly, the simple actions themselves influence and are influenced in turn by overall (complex) facts. People act in different ways in different circumstances (something we can agree with Austrians about, although we refuse to take it to their extreme position of rejecting empirical evidence as such). To use simple acts to understand complex systems means to miss the fact that these acts are not independent of their circumstances. For example, to claim that the capitalist market is “just” the resultant of bilateral exchanges ignores the fact that the market activity shapes the nature and form of these bilateral exchanges. The “simple” data is dependent on the “complex” system — and so the complex system cannot be understood by looking at the simple actions in isolation. To do so would be to draw incomplete and misleading conclusions (and it is due to these interrelations that we argue that aggregate data should be used critically). This is particularly important when looking at capitalism, where the “simple” acts of exchange in the labour market are dependent upon and shaped by circumstances outside these acts.

So to claim that (complex) data cannot be used to evaluate a theory is false. Data can be useful when seeing whether a theory is confirmed by reality. This is the nature of the scientific method —

It is this process which Individualist Anarchism protested against, the use of the state to favour the rising capitalist class. However, unlike social anarchists, many individualist anarchists were not consistently against wage labour. This is the other significant overlap between “anarcho”-capitalism and individualist anarchism. However, they were opposed to exploitation and argued (unlike “anarcho”-capitalism) that in their system workers bargaining powers would be raised to such a level that their wages would equal the full product of their labour. However, as we discuss in section G.1.1 the social context the individualist anarchists lived in must be remembered. America at the times was a predominantly rural society and industry was not as developed as it is now wage labour would have been minimised (Spoon, for example, explicitly envisioned a society made up mostly entirely of self-employed workers). As Kline argues:

“Committed as they were to equality in the pursuit of property, the objective for the anarchist became the construction of a society providing equal access to those things necessary for creating wealth. The goal of the anarchists who extolled mutualism and the abolition of all monopolies was, then, a society where everyone willing to work would have the tools and raw materials necessary for production in a non-exploitative system ... the dominant vision of the future society ... [was] underpinned by individual, self-employed workers.”
[Op. Cit., p. 95]

As such, a limited amount of wage labour within a predominantly self-employed economy does not make a given society capitalist any more than a small amount of governmental communities within an predominantly anarchist world would make it statist. As Marx argued, when “the separation of the worker from the conditions of labour and from the soil … does not yet exist, or only sporadically,
paying lip-service to the possibilities of co-operatives — and if an “anarcho”-capitalist thinks that co-operative will become the dominant form of workplace organisation, then they are some kind of market socialist, not a capitalist. It is clear that their end point (a pure capitalism, i.e. generalised wage labour) is directly the opposite of that desired by anarchists. This was the case of the Individualist Anarchists who embraced the ideal of (non-capitalist) laissez faire competition — they did so, as noted, to end exploitation, not to maintain it. Indeed, their analysis of the change in American society from one of mainly independent producers into one based mainly upon wage labour has many parallels with, of all people, Karl Marx’s presented in chapter 33 of Capital. Marx, correctly, argues that “the capitalist mode of production and accumulation, and therefore capitalist private property, have for their fundamental condition the annihilation of that private property which rests on the labour of the individual himself; in other words, the expropriation of the worker.” [Op. Cit., p. 940] He notes that to achieve this, the state is used:

“How then can the anti-capitalistic cancer of the colonies be healed? . . . Let the Government set an artificial price on the virgin soil, a price independent of the law of supply and demand, a price that compels the immigrant to work a long time for wages before he can earn enough money to buy land, and turn himself into an independent farmer.” [Op. Cit., p. 938]

Moreover, tariffs are introduced with “the objective of manufacturing capitalists artificially” for the “system of protection was an artificial means of manufacturing manufacturers, or expropriating independent workers, of capitalising the national means of production and subsistence, and of forcibly cutting short the transition … to the modern mode of production,” to capitalism [Op. Cit., p. 932 and pp. 921–2] you compare the results expected by your theory to the facts and if they do not match you check your facts and check your theory. This may involve revising the assumptions, methodology and theories you use if the evidence is such as to bring them into question. For example, if you claim that capitalism is based on freedom but that the net result of capitalism is to produce relations of domination between people then it would be valid to revise, for example, your definition of freedom rather than deny that domination restricts freedom (see section 2 on this). But if actual experience is to be distrusted when evaluating theory, we effectively place ideology above people — after all, how the ideology affects people in practice is irrelevant as experiences cannot be used to evaluate the (logically sound but actually deeply flawed) theory.

Moreover, there is a slight arrogance in the “Austrian” dismissal of empirical evidence. If, as they argue, the economy is just too complex to allow us to generalise from experience then how can one person comprehend it sufficiently to create an economic ideology as the Austrian’s suggest? Surely no one mind (or series of minds) can produce a model which accurately reflects such a complex system? To suggest that one can deduce a theory for an exceedingly complex social system from the theoretical work based on an analysis technique which deliberately ignores that reality as being unreliable seems to require a deliberate suspension of one’s reasoning faculties. Of course, it may be argued that such a task is possible, given a small enough subset of economic activity. However, such a process is sure to lead its practitioners astray as the subset is not independent of the whole and, consequently, can be influenced in ways the ideologist does not (indeed, cannot) take into account. Simply put, even the greatest mind cannot comprehend the complexities of real life and so empirical evidence needs to inform any theory seeking to describe and explain it. To reject it is simply to retreat into dogmatism and ideology, which is precisely what right-wing libertarians generally do.
Ultimately, this dismissal of empirical evidence seems little more than self-serving. It’s utility to the ideologist is obvious. It allows them to speculate to their hearts content, building models of the economy with no bearing to reality. Their models and the conclusions it generates need never be bothered with reality — nor the effects of their dogma. Which shows its utility to the powerful. It allows them to spout comments like “the free market benefits all” while the rich get richer and allows them to brush aside any one who points out such troublesome facts.

That this position is self-serving can be seen from the fact that most right libertarians are very selective about applying von Mises’ argument. As a rule of thumb, it is only applied when the empirical evidence goes against capitalism. In such circumstances the fact that the current system is not a free market will also be mentioned. However, if the evidence seems to bolster the case for propertarianism then empirical evidence becomes all the rage. Needless to say, the fact that we do not have a free market will be conveniently forgotten. Depending on the needs of the moment, fundamental facts are dropped and retrieved to bolster the ideology.

As we indicated above (in section 1.2) and will discuss in more depth later (in section 11) most of the leading right-Libertarian theorists base themselves on such deductive methodologies, starting from assumptions and “logically” drawing conclusions from them. The religious undertones of such methodology can best be seen from the roots of right-Libertarian “Natural law” theory.

Carole Pateman, in her analysis of Liberal contract theory, indicates the religious nature of the “Natural Law” argument so loved by the theorists of the “Radical Right.” She notes that for Locke (the main source of the Libertarian Right’s Natural Law cult) “natural law” was equivalent of “God’s Law” and that “God’s law exists externally to and independently of individuals.” [The Problem of Political Obligation, p. 154] No role for critical thought there, only obedience. Most modern day “Natural Law” supporters forget to mention this religious undercurrent and instead talk of about “Na-
since all would be required to live at their own expense and not at the expense of exploited fellow human beings.” [Op. Cit., pp. 103–4]

Because of the evil effects of inequality on freedom, both social and individualist anarchists desired to create an environment in which circumstances would not drive people to sell their liberty to others at a disadvantage. In other words, they desired an equalisation of market power by opposing interest, rent and profit and capitalist definitions of private property. Kline summarises this by saying “the American [individualist] anarchists exposed the tension existing in liberal thought between private property and the ideal of equal access. The Individual Anarchists were, at least, aware that existing conditions were far from ideal, that the system itself working against the majority of individuals in their efforts to attain its promises. Lack of capital, the means to creation and accumulation of wealth, usually doomed a labourer to a life of exploitation. This the anarchists knew and they abhorred such a system.” [Op. Cit., p. 102]

And this desire for bargaining equality is reflected in their economic ideas and by removing these underlying economic ideas of the individualist anarchists, “anarcho”-capitalism makes a mockery of any ideas they do appropriate. Essentially, the Individualist Anarchists agreed with Rousseau that in order to prevent extreme inequality of fortunes you deprive people of the means to accumulate in the first place and not take away wealth from the rich. An important point which “anarcho”-capitalism fails to understand or appreciate.

There are, of course, overlaps between individualist anarchism and “anarcho”-capitalism, just as there are overlaps between it and Marxism (and social anarchism, of course). However, just as a similar analysis of capitalism does not make individualist anarchists Marxists, so apparent similarities between individualist anarchism does not make it a forerunner of “anarcho”-capitalism. For example, both schools support the idea of “free markets.” Yet the question of markets is fundamentally second to the issue of property rights for what is exchanged on the market is dependent on what...
“The flowering of human society depends on two factors: the intellectual power of outstanding men to conceive sound social and economic theories, and the ability of these or other men to make these ideologies palatable to the majority.” [Human Action, p. 864]

Yet such a task would require massive propaganda work and would only, ultimately, succeed by removing the majority from any say in the running of society. Once that is done then we have to believe that the ruling elite will be altruistic in the extreme and not abuse their position to create laws and processes which defended what they thought was “legitimate” property, property rights and what constitutes “aggression.” Which, ironically, contradicts the key capitalist notion that people are driven by self-gain. The obvious conclusion from such argument is that any right-libertarian regime would have to exclude change. If people can change the regime they are under they may change it in ways that right libertarians do not support. The provision for ending amendments to the regime or the law would effectively ban most opposition groups or parties as, by definition, they could do nothing once in office (for minimal state “libertarians”) or in the market for “defence” agencies (for “anarcho”-capitalists). How this differs from a dictatorship is hard to say — after all, most dictatorships have parliamentary bodies which have no power but which can talk a lot. Perhaps the knowledge that it is private police enforcing private power will make those subject to the regime maximise their utility by keeping quiet and not protesting. Given this, von Mises’ praise for fascism in the 1920s may be less contradictory than it first appears (see section 6.5) as it successfully “deterred democracy” by crushing the labour, socialist and anarchist movements across the world.

So, von Mises, von Hayek and most right-libertarians reject the scientific method in favour of ideological correctness — if the facts contradict your theory then they can be dismissed as too “complex” labour power, even this option is lacking — workers have to accept a job in order to live. As we argue in section 10.2, workers are usually at a disadvantage on the labour market when compared to capitalists, and this forces them to sell their liberty in return for making profits for others. These profits increase inequality in society as the property owners receive the surplus value their workers produce. This increases inequality further, consolidating market power and so weakens the bargaining position of workers further, ensuring that even the freest competition possible could not eliminate class power and society (something B. Tucker recognised as occurring with the development of trusts within capitalism — see section G.4).

By removing the underlying commitment to abolish non-labour income, any “anarchist” capitalist society would have vast differences in wealth and so power. Instead of a government imposed monopolies in land, money and so on, the economic power flowing from private property and capital would ensure that the majority remained in (to use Spooner’s words) “the condition of servants” (see sections 2 and 3.1 for more on this). The Individualist Anarchists were aware of this danger and so supported economic ideas that opposed usury (i.e. rent, profit and interest) and ensured the worker the full value of her labour. While not all of them called these ideas “socialist” it is clear that these ideas are socialist in nature and in aim (similarly, not all the Individualist Anarchists called themselves anarchists but their ideas are clearly anarchist in nature and in aim).

This combination of the political and economic is essential as they mutually reinforce each other. Without the economic ideas, the political ideas would be meaningless as inequality would make a mockery of them. As Kline notes, the Individualist Anarchists’ “proposals were designed to establish true equality of opportunity … and they expected this would result in a society without great wealth or poverty. In the absence of monopolistic factors which would distort competition, they expected a society largely of self-employed workmen with no significant disparity of wealth between any of them
labour derived income as usury, unlike “anarcho”-capitalists. Similarly, anarchists reject the notion of capitalist property rights in favour of possession (including the full fruits of one’s labour). For example, anarchists reject private ownership of land in favour of a “occupancy and use” regime. In this we follow Proudhon’s *What is Property?* and argue that “property is theft”. Rothbard, as noted, rejected this perspective.

As these ideas are an essential part of anarchist politics, they cannot be removed without seriously damaging the rest of the theory. This can be seen from Tucker’s comments that “*Liberty insists... [on] the abolition of the State and the abolition of usury; on no more government of man by man, and no more exploitation of man by man.*” [cited by Eunice Schuster in *Native American Anarchism*, p. 140]. He indicates that anarchism has specific economic and political ideas, that it opposes capitalism along with the state. Therefore anarchism was never purely a “political” concept, but always combined an opposition to oppression with an opposition to exploitation. The social anarchists made exactly the same point. Which means that when Tucker argued that “*Liberty insists on Socialism... — true Socialism, Anarchistic Socialism: the prevalence on earth of Liberty, Equality, and Solidarity*” he knew exactly what he was saying and meant it wholeheartedly. [Instead of a Book, p. 363]

So because “anarcho”-capitalists embrace capitalism and reject socialism, they cannot be considered anarchists or part of the anarchist tradition.

Which brings us nicely to the second point, namely a lack of concern for equality. In stark contrast to anarchists of all schools, inequality is not seen to be a problem with “anarcho”-capitalists (see section 3). However, it is a truism that not all “traders” are equally subject to the market (i.e. have the same market power). In many cases, a few have sufficient control of resources to influence or determine price and in such cases, all others must submit to those terms or not buy the commodity. When the commodity is or “unique”. Facts, however, should inform theory and any theory’s methodology should take this into account. To dismiss facts out of hand is to promote dogma. This is not to suggest that a theory should be modified every time new data comes along — that would be crazy as unique situations do exist, data can be wrong and so forth — but it does suggest that if your theory continually comes into conflict with reality, its time to rethink the theory and not assume that facts cannot invalidate it. A true libertarian would approach a contradiction between reality and theory by evaluating the facts available and changing the theory is this is required, not by ignoring reality or dismissing it as “complex”.

Thus, much of right-Libertarian theory is neither libertarian nor scientific. Much of right-libertarian thought is highly axiomatic, being logically deduced from such starting axioms as “self-ownership” or “no one should initiate force against another”. Hence the importance of our discussion of von Mises as this indicates the dangers of this approach, namely the tendency to ignore/dismiss the consequences of these logical chains and, indeed, to justify them in terms of these axioms rather than from the facts. In addition, the methodology used is such as that it would be fair to argue that right-libertarians get to critique reality but reality can never be used to critique right-libertarianism — for any empirical data presented as evidence as be dismissed as “too complex” or “unique” and so irrelevant (unless it can be used to support their claims, of course).

Hence W. Duncan Reekie’s argument (quoting leading Austrian economist Israel Kirzner) that “empirical work *has the function of establishing the applicability of particular theorems, and thus illustrating their operation* ... Confirmation of theory is not possible because there is no constants in human action, nor is it necessary because theorems themselves describe relationships logically developed from hypothesised conditions. Failure of a logically derived axiom to fit the facts does not render it invalid, rather it ‘might merely indicate inapplicability’ to the circumstances of the case.” [Markets, Entrepreneurs and Liberty, p. 31]
So, if facts confirm your theory, your theory is right. If facts do not confirm your theory, it is still right but just not applicable in this case! Which has the handy side effect of ensuring that facts can only be used to support the ideology, never to refute it (which is, according to this perspective, impossible anyway). As Karl Popper argued, a “theory which is not refutable by any conceivable event is non-scientific.” [Conjectures and Refutations, p. 36] In other words (as we noted above), if reality contradicts your theory, ignore reality!

Kropotkin hoped “that those who believe in [current economic doctrines] will themselves become convinced of their error as soon as they come to see the necessity of verifying their quantitative deductions by quantitative investigation.” [Op. Cit., p. 178] However, the Austrian approach builds so many barriers to this that it is doubtful that this will occur. Indeed, right-libertarianism, with its focus on exchange rather than its consequences, seems to be based upon justifying domination in terms of their deductions than analysing what freedom actually means in terms of human existence (see section 2 for a fuller discussion).

The real question is why are such theories taken seriously and arouse such interest. Why are they not simply dismissed out of hand, given their methodology and the authoritarian conclusions they produce? The answer is, in part, that feeble arguments can easily pass for convincing when they are on the same side as the prevailing sentiment and social system. And, of course, there is the utility of such theories for ruling elites — “[a[n ideological defence of privileges, exploitation, and private power will be welcomed, regardless of its merits.” [Noam Chomsky, The Chomsky Reader, p. 188] #secf14

Of course, Rothbard is simply skimming the surface. There are two main ways “anarcho”-capitalists differ from individualist anarchists. The first one is the fact that the individualist anarchists are socialists. The second is on whether equality is essential or not to anarchism. Each will be discussed in turn.

Unlike both Individualist (and social) anarchists, “anarcho”-capitalists support capitalism (a “pure” free market type, which has never existed although it has been approximated occasionally). This means that they reject totally the ideas of anarchists with regards to property and economic analysis. For example, like all supporters of capitalists they consider rent, profit and interest as valid incomes. In contrast, all Anarchists consider these as exploitation and agree with the Individualist Anarchist Benjamin Tucker when he argued that “[w]hoever contributes to production is alone entitled. What has no rights that who is bound to respect. What is a thing. Who is a person. Things have no claims; they exist only to be claimed. The possession of a right cannot be predicted of dead material, but only a living person.”[quoted by Wm. Gary Kline, The Individualist Anarchists, p. 73]

This, we must note, is the fundamental critique of the capitalist theory that capital is productive. In and of themselves, fixed costs do not create value. Rather value is creation depends on how investments are developed and used once in place. Because of this the Individualist Anarchists, like other anarchists, considered non-
On the land question, Rothbard opposed the individualist position of “occupancy and use” as it “would automatically abolish all rent payments for land.” Which was precisely why the individualist anarchists advocated it! In a predominantly rural economy, this would result in a significant levelling of income and social power as well as bolstering the bargaining position of non-land workers by reducing unemployment. He bemoans that landlords cannot charge rent on their “justly-acquired private property” without noticing that is begging the question as anarchists deny that this is “justly-acquired” land. Unsurprising, Rothbard considers “the property theory” of land ownership as John Locke’s, ignoring the fact that the first self-proclaimed anarchist book was written to refute that kind of theory. His argument simply shows how far from anarchism his ideology is. For Rothbard, it goes without saying that the landlord’s “freedom of contract” tops the worker’s freedom to control their own work and live and, of course, their right to life. [Op. Cit., p. 8 and p. 9] However, for anarchists, “the land is indispensable to our existence, consequently a common thing, consequently insusceptible of appropriation.” [Proudhon, What is Property?, p. 107]

The reason question is why Rothbard considers this a political difference rather than an economic one. Unfortunately, he does not explain. Perhaps because of the underlying socialist perspective behind the anarchist position? Or perhaps the fact that feudalism and monarchism was based on the owner of the land being its ruler suggests a political aspect to the ideology best left unexplored? Given that the idea of grounding rulership on land ownership receded during the Middle Ages, it may be unwise to note that under “anarcho”-capitalism the landlord and capitalist would, likewise, be sovereign over the land and those who used it? As we noted in section 1, this is the conclusion that Rothbard does draw. As such, there is a political aspect to this difference.

Moreover, “the expropriation of the mass of the people from the soil forms the basis of the capitalist mode of production.” [Marx, Capital]
Unsurprisingly, the political differences he highlights are significant, namely "the role of law and the jury system" and "the land question." The former difference relates to the fact that the individualist anarchists "allow each individual free-market court, and more specifically, each free-market jury, totally free rein over judicial decision." This horrified Rothbard. The reason is obvious, as it allows real people to judge the law as well as the facts, modifying the former as society changes and evolves. For Rothbard, the idea that ordinary people should have a say in the law is dismissed. Rather, "it would not be a very difficult task for Libertarian lawyers and jurists to arrive at a rational and objective code of libertarian legal principles and procedures." [Op. Cit., p. 7–8] Of course, the fact that "lawyers" and "jurists" may have a radically different idea of what is just than those subject to their laws is not raised by Rothbard, never mind answered. While Rothbard notes that juries may defend the people against the state, the notion that they may defend the people against the authority and power of the rich is not even raised. That is why the rich have tended to oppose juries as well as popular assemblies.

Unsurprisingly, the few individualist anarchists that remained pointed this out. Laurance Labadie, the son of Tucker associate Joseph Labadie, argued in response to Rothbard as follows:

“Mere common sense would suggest that any court would be influenced by experience; and any free-market court or judge would in the very nature of things have some precedents guiding them in their instructions to a jury. But since no case is exactly the same, a jury would have considerable say about the heinousness of the offence in each case, realising that circumstances alter cases, and prescribing penalty accordingly. This appeared to Spooner and Tucker to be a more flexible and equitable administration of justice possible or feasible, human beings being what they are....

“But when Mr. Rothbard quibbles about the jurisprudential ideas of Spooner and Tucker, and at the same time upholds presumably in his courts the very economic evils which are at bottom the very reason for human contention and conflict, he would seem to be a man who chokes at a gnat while swallowing a camel.” [quoted by Mildred J. Loomis and Mark A. Sullivan, “Laurance Labadie: Keeper Of The Flame”, pp. 116–30, Benjamin R. Tucker and the Champions of Liberty, Coughlin, Hamilton and Sullivan (eds.), p. 124]

In other words, to exclude the general population from any say in the law and how it changes is hardly a “minor” difference! Particularly if you are proposing an economic system which is based on inequalities of wealth, power and influence and the means of accumulating more. It is like a supporter of the state saying that it is a “minor” difference if you favour a dictatorship rather than a democratically elected government. As Tucker argued, “it is precisely in the tempering of the rigidity of enforcement that one of the chief excellences of Anarchism consists … under Anarchism all rules and laws will be little more than suggestions for the guidance of juries, and that all disputes will be submitted to juries which will judge not only the facts but the law, the justice of the law, its applicability to the given circumstances, and the penalty or damage to be inflicted because of its infraction … under Anarchism the law will be regarded as just in proportion to its flexibility, instead of now in proportion to its rigidity.” [The Individualist Anarchists, pp. 160–1] In others, the law will evolve to take into account changing social circumstances and, as a consequence, public opinion on specific events and rights. Tucker’s position is fundamentally democratic and evolutionary while Rothbard’s is autocratic and fossilised.
does not take much imagination to see that the same could apply to “defence” firms and courts. This was/is the case in company towns (indeed, you can consider unions as a form of “defence” firm and these companies refused to recognise them). As the labour market is almost always a buyer’s market, it is not enough to argue that workers can find a new job without this condition. They may not and so have to put up with this situation. And if (as seems likely) the laws and rules of the property-owner will take precedence in any conflict, then workers and tenants will be at a disadvantage no matter how “impartial” the judges.

Ironically, some “anarcho”-capitalists point to current day company/union negotiations as an example of how different defence firms would work out their differences peacefully. Sadly for this argument, union rights under “actually existing capitalism” were created and enforced by the state in direct opposition to capitalist “freedom of contract.” Before the law was changed, unions were often crushed by force — the companies were better armed, had more resources and had the law on their side. Today, with the “downsizing” of companies we can see what happens to “peaceful negotiation” and “co-operation” between unions and companies when it is no longer required (i.e. when the resources of both sides are unequal). The market power of companies far exceeds those of the unions and the law, by definition, favours the companies. As an example of how competing “protection agencies” work in an “anarcho”-capitalist society, it is far more insightful than originally intended!

Now let us consider the “basic law code” itself. How the laws in the “general libertarian law code” would actually be selected is anyone’s guess, although many “anarcho”-capitalists support the myth of “natural law,” and this would suggest an unchangeable law code selected by those considered as “the voice of nature” (see section 11. for a discussion of its authoritarian implications). David Friedman argues that as well as a market in defence companies, there will also be a market in laws and rights. However, there will be and convince them that certain forms of organisations (such as the state and capitalist firms) are an evil and urge them to change society to ensure their extinction.

So due to this lack of appreciation of circumstances (and the fact that people become accustomed to certain ways of life) “anarcho”-capitalism actively supports structures that restrict freedom for the many. And how is “anarcho”-capitalism anarchist if it generates extensive amounts of archy? It is for this reason that all anarchists support self-management within free association — that way we maximise freedom both inside and outside organisations. But only stressing freedom outside organisations, “anarcho”-capitalism ends up denying freedom as such (after all, we spend most of our waking hours at work). If “anarcho”-capitalists really desired freedom, they would reject capitalism and become anarchists — only in a libertarian socialist society would agreements to become a wage worker be truly voluntary as they would not be driven by circumstances to sell their liberty.

This means that while right-Libertarianism appears to make “choice” an ideal (which sounds good, liberating and positive) in practice it has become a “dismal politics,” a politics of choice where most of the choices are bad. And, to state the obvious, the choices we are “free” to make are shaped by the differences in wealth and power in society (see section 3.1) as well as such things as “isolation paradoxes” (see section B.6) and the laws and other human institutions that exist. If we ignore the context within which people make their choices then we glorify abstract processes at the expense of real people. And, as importantly, we must add that many of the choices we make under capitalism (shaped as they are by the circumstances within which they are made), such as employment contracts, result in our “choice” being narrowed to “love it or leave it” in the organisations we create/join as a result of these “free” choices.

This ideological blind spot flows from the “anarcho”-capitalist definition of “freedom” as “absence of coercion” — as workers
“freely consent” to joining a specific workplace, their freedom is unrestricted. But to defend only “freedom from” in a capitalist society means to defend the power and authority of the few against the attempts of the many to claim their freedom and rights. To requote Emma Goldman, “Rugged individualism has meant all the ‘individualism’ for the masters …, in whose name political tyranny and social oppression are defended and held up as virtues’ while every aspiration and attempt of man to gain freedom … is denounced as … evil in the name of that same individualism.” [Red Emma Speaks, p. 112]

In other words, it’s all fine and well saying (as right-libertarians do) that you aim to abolish force from human relationships but if you support an economic system which creates hierarchy (and so domination and oppression) by its very workings, “defensive” force will always be required to maintain and enforce that domination. Moreover, if one class has extensive power over another due to the systematic (and normal) workings of the market, any force used to defend that power is automatically “defensive”. Thus to argue against the use of force and ignore the power relationships that exist within and shape a society (and so also shape the individuals within it) is to defend and justify capitalist and landlord domination and denounce any attempts to resist that domination as “initiation of force.”

Anarchists, in contrast, oppose hierarchy (and so domination within relationships — bar S&M personal relationships, which are a totally different thing altogether; they are truly voluntary and they also do not attempt to hide the power relationships involved by using economic jargon). This opposition, while also including opposition to the use of force against equals (for example, anarchists are opposed to forcing workers and peasants to join a self-managed commune or syndicate), also includes support for the attempts of those subject to domination to end it (for example, workers striking for union recognition are not “initiating force”, they are fighting for their freedom).
“code”? Obviously not. The rich would only support a code which defended their power over the poor.

Although only “finding” the law, the arbitrators and judges still exert an influence in the “justice” process, an influence not impartial or neutral. As the arbitrators themselves would be part of a profession, with specific companies developing within the market, it does not take a genius to realise that when “interpreting” the “basic law code,” such companies would hardly act against their own interests as companies. In addition, if the “justice” system was based on “one dollar, one vote,” the “law” would best defend those with the most “votes” (the question of market forces will be discussed in section 6.3). Moreover, even if “market forces” would ensure that “impartial” judges were dominant, all judges would be enforcing a very partial law code (namely one that defended capitalist property rights). Impartiality when enforcing partial laws hardly makes judgements less unfair.

Thus, due to these three pressures — the interests of arbitrators/judges, the influence of money and the nature of the law — the terms of “free agreements” under such a law system would be tilted in favour of lenders over debtors, landlords over tenants, employers over employees, and in general, the rich over the poor, just as we have today. This is what one would expect in a system based on “unrestricted” property rights and a (capitalist) free market. A similar tendency towards the standardisation of output in an industry in response to influences of wealth can be seen from the current media system (see section D.3 — How does wealth influence the mass media?)

Some “anarcho”-capitalists, however, claim that just as cheaper cars were developed to meet demand, so cheaper defence associations and “people’s arbitrators” would develop on the market for the working class. In this way impartiality will be ensured. This argument overlooks a few key points:

Firstly, the general “libertarian” law code would be applicable to all associations, so they would have to operate within a sys-

In other words, apparently “voluntary” agreements can and do limit freedom and so the circumstances that drive people into them must be considered when deciding whether any such limitation is valid. By ignoring circumstances, “anarcho”-capitalism ends up by failing to deliver what it promises — a society of free individuals — and instead presents us with a society of masters and servants. The question is, what do we feel moved to insist that people enjoy? Formal, abstract (bourgeois) self-ownership (“freedom”) or a more substantive control over one’s life (i.e. autonomy)? #secf25

2.5 But surely circumstances are the result of liberty and so cannot be objected to?

It is often argued by right-libertarians that the circumstances we face within capitalism are the result of individual decisions (i.e. individual liberty) and so we must accept them as the expressions of these acts (the most famous example of this argument is in Nozick’s Anarchy, State, and Utopia pp. 161–163 where he maintains that “liberty upsets patterns”). This is because whatever situation evolves from a just situation by just (i.e. non-coercive steps) is also (by definition) just.

However, it is not apparent that adding just steps to a just situation will result in a just society. We will illustrate with a couple of banal examples. If you add chemicals which are non-combustible together you can create a new, combustible, chemical (i.e. X becomes not-X by adding new X to it). Similarly, if you have an odd number and add another odd number to it, it becomes even (again, X becomes not-X by adding a new X to it). So it is very possible to go from an just state to an unjust state by just step (and it is possible to remain in an unjust state by just acts; for example if we tried to implement “anarcho”-capitalism on the existing — unjustly created — situation of “actually existing” capitalism it would be like having an odd number and adding even numbers to it). In other words, the outcome of “just” steps can increase inequality within society.
and so ensure that some acquire an unacceptable amount of power over others, via their control over resources. Such an inequality of power would create an “unjust” situation where the major are free to sell their liberty to others due to inequality in power and resources on the “free” market.

Ignoring this objection, we could argue (as many “anarcho”-capitalists and right-libertarians do) that the unforeseen results of human action are fine unless we assume that these human actions are in themselves bad (i.e. that individual choice is evil).

Such an argument is false for three reasons.

First, when we make our choices the aggregate impact of these choices are unknown to us — and not on offer when we make our choices. Thus we cannot be said to “choose” these outcomes, outcomes which we may consider deeply undesirable, and so the fact that these outcomes are the result of individual choices is besides the point (if we knew the outcome we could refrain from doing them). The choices themselves, therefore, do not validate the outcome as the outcome was not part of the choices when they were made (i.e. the means do not justify the ends). In other words, private acts often have important public consequences (and “bilateral exchanges” often involve externalities for third parties). Secondly, if the outcome of individual choices is to deny or restrict individual choice on a wider scale at a later stage, then we are hardly arguing that individual choice is a bad thing. We want to arrange it so that the decisions we make now do not result in them restricting our ability to make choices in important areas of life at a latter stage. Which means we are in favour of individual choices and so liberty, not against them. Thirdly, the unforeseen or unplanned results of individual actions are not necessarily a good thing. If the aggregate outcome of individual choices harms individuals then we have a right to modify the circumstances within which choices are made and/or the aggregate results of these choices.

An example will show what we mean (again drawn from Haworth’s excellent Anti-Libertarianism, p. 35). Millions of people
chinery of Freedom, p. 116] It is sometimes acknowledged that non-libertarian laws may be demanded (and supplied) in such a market.

Around this system of “defence companies” is a free market in “arbitrators” and “appeal judges” to administer justice and the “basic law code.” Rothbard believes that such a system would see “arbitrators with the best reputation for efficiency and probity…[being] chosen by the various parties in the market…and will come to be given an increasing amount of business.” [Rothbard, Op. Cit., p.199] Judges “will prosper on the market in proportion to their reputation for efficiency and impartiality.” [Op. Cit., p. 204]

Therefore, like any other company, arbitrators would strive for profits and wealth, with the most successful ones becoming “prosperous.” Of course, such wealth would have no impact on the decisions of the judges, and if it did, the population (in theory) are free to select any other judge (although, of course, they would also “strive for profits and wealth” — which means the choice of character may be somewhat limited! — and the laws which they were using to guide their judgements would be enforcing capitalist rights).

Whether or not this system would work as desired is discussed in the following sections. We think that it will not. Moreover, we will argue that “anarcho”-capitalist “defence companies” meet not only the criteria of statehood we outlined in section B.2, but also Rothbard’s own criteria for the state, quoted above.

As regards the anarchist criterion, it is clear that “defence companies” exist to defend private property; that they are hierarchical (in that they are capitalist companies which defend the power of those who employ them); that they are professional coercive bodies; and that they exercise a monopoly of force over a given area (the area, initially, being the property of the person or company who is employing the “association”). If, as Ayn Rand noted (using a Weberian definition of the state) a government is an institution “that holds the exclusive power to enforce certain rules of conduct in a given geographical area” [Capitalism: The Unknown Ideal, p.

Across the world bought deodorants which caused a hole to occur in the ozone layer surrounding the Earth. The resultant of these acts created a situation in which individuals and the eco-system they inhabited were in great danger. The actual acts themselves were by no means wrong, but the aggregate impact was. A similar argument can apply to any form of pollution. Now, unless the right-Libertarian argues that skin cancer or other forms of pollution related illness are fine, its clear that the resultant of individual acts can be harmful to individuals.

The right-Libertarian could argue that pollution is an “initiation of force” against an individual’s property-rights in their person and so individuals can sue the polluters. But hierarchy also harms the individual (see section B.1) — and so can be considered as an infringement of their “property-rights” (i.e. liberty, to get away from the insane property fetish of right-Libertarianism). The loss of autonomy can be just as harmful to an individual as lung cancer although very different in form. And the differences in wealth resulting from hierarchy is well known to have serious impacts on life-span and health.

As noted in section 2.1, the market is just as man-made as pollution. This means that the “circumstances” we face are due to aggregate of millions of individual acts and these acts occur within a specific framework of rights, institutions and ethics. Anarchists think that a transformation of our society and its rights and ideals is required so that the resultant of individual choices does not have the ironic effect of limiting individual choice (freedom) in many important ways (such as in work, for example).

In other words, the circumstances created by capitalist rights and institutions requires a transformation of these rights and institutions in such a way as to maximise individual choice for all — namely, to abolish these rights and replace them with new ones (for example, replace property rights with use rights). Thus Nozick’s claims that “Z does choose voluntarily if the other individuals A through Y each acted voluntarily and within their rights” [Op. Cit.,
p. 263] misses the point — it is these rights that are in question
(given that Nozick assumes these rights then his whole thesis is
begging the question).

And we must add (before anyone points it out) that, yes, we
are aware that many decisions will unavoidably limit current and
future choices. For example, the decision to build a factory on a
green-belt area will make it impossible for people to walk through
the woods that are no longer there. But such “limitations” (if they
can be called that) of choice are different from the limitations we
are highlighting here, namely the lose of freedom that accompanies
the circumstances created via exchange in the market. The human
actions which build the factory modify reality but do not gener-
ate social relationships of domination between people in so doing.
The human actions of market exchange, in contrast, modify the
relative strengths of everyone in society and so has a distinct im-
 pact on the social relationships we “voluntarily” agree to create.
Or, to put it another way, the decision to build on the green-belt
site does “limit” choice in the abstract but it does not limit choice
in the kind of relationships we form with other people nor cre-
ate authoritarian relationships between people due to inequality
influencing the content of the associations we form. However,
the profits produced from using the factory increases inequality (and
so market/economic power) and so weakens the position of the
working class in respect to the capitalist class within society. This
increased inequality will be reflected in the “free” contracts and
working regimes that are created, with the weaker “trader” having
to compromise far more than before.

So, to try and defend wage slavery and other forms of hierar-
chy by arguing that “circumstances” are created by individual lib-
erty runs aground on its own logic. If the circumstances created
by individual liberty results in pollution then the right-Libertarian
will be the first to seek to change those circumstances. They recog-
nise that the right to pollute while producing is secondary to our
right to be healthy. Similarly, if the circumstances created by indi-
not be the same state as exists now. Regarding this point, “anarcho”-
capitalism plainly advocates “defence associations” to protect prop-
erty. For the “anarcho”-capitalist, however, these private compa-
nies are not states. For anarchists, they most definitely are.

According to Murray Rothbard (“Society Without A State”, in
Nomos XIX, Pennock and Chapman, eds., p. 192.), a state must
have one or both of the following characteristics:

He makes the same point in The Ethics of Liberty [p. 171].

Instead of this, the “anarcho”-capitalist thinks that people
should be able to select their own “defence companies” (which
would provide the needed police) and courts from the free market
in “defence” which would spring up after the state monopoly
has been eliminated. These companies “all... would have to abide
by the basic law code” [“Society Without A State”, p. 206]. Thus a
“general libertarian law code” would govern the actions of these
companies. This “law code” would prohibit coercive aggression
at the very least, although to do so it would have to specify what
counted as legitimate property, how said can be owned and what
actually constitutes aggression. Thus the law code would be quite
extensive.

How is this law code to be actually specified? Would these laws
be democratically decided? Would they reflect common usage (i.e.
custom)? “supply and demand”? “Natural law”? Given the strong
dislike of democracy shown by “anarcho”-capitalists, we think we
can safely say that some combination of the last two options would
be used. Murray Rothbard, as noted in section 1.4, opposed the
individualist anarchist principle that juries would judge both the
facts and the law, suggesting instead that “Libertarian lawyers and
jurists” would determine a “rational and objective code of libertar-
ian legal principles and procedures.” The judges in his system would
“not [be] making the law but finding it on the basis of agreed-upon
principles derived either from custom or reason.” [“Society without a
State”, Op. Cit., p. 206] David Friedman, on the other hand, argues
that different defence firms would sell their own laws. [The Ma-
as (in part) “the assumption of sole authority over a given area and all within it.” [The Individualist Anarchists, p. 24] If the property owners can determine “prohibitions” (i.e. laws and rules) for those who use the property then they are the “sole authority over a given area and all within it,” i.e. a state. Thus privatising “the commons” means subjecting the non-property owners to the rules and laws of the property owners — in effect, privatising the state and turning the world into a series of Monarchies and oligarchies without the pretence of democracy and democratic rights.

These examples can hardly be said to be increasing liberty for society as a whole, although “anarcho” capitalists seem to think they would. So far from increasing liberty for all, then, privatising would only increase it for the ruling elite, by giving them yet another monopoly from which to collect income and exercise their power over. It would reduce freedom for everyone else. As Peter Marshall notes, “[i]n the name of freedom, the anarcho-capitalists would like to turn public spaces into private property, but freedom does not flourish behind high fences protected by private companies but expands in the open air when it is enjoyed by all” [Demanding the Impossible, p. 564].

Little wonder Proudhon argued that “if the public highway is nothing but an accessory of private property; if the communal lands are converted into private property; if the public domain, in short, is guarded, exploited, leased, and sold like private property — what remains for the proletaire? Of what advantage is it to him that society has left the state of war to enter the regime of police?” [System of Economic Contradictions, p. 371]

6 Is “anarcho”-capitalism against the state?

No. Due to its basis in private property, “anarcho”-capitalism implies a class division of society into bosses and workers. Any such division will require a state to maintain it. However, it need vidual liberty results in hierarchy (pollution of the mind and our relationships with others as opposed to the body, although it affects that to) then we are entitled to change these circumstances too and the means by which we get there (namely the institutional and rights framework of society). Our right to liberty is more important than the rights of property — sadly, the right-Libertarian refuses to recognise this. #secf26

2.6 Do Libertarian-capitalists support slavery?

Yes. It may come as a surprise to many people, but right-Libertarianism is one of the few political theories that justifies slavery. For example, Robert Nozick asks whether “a free system would allow [the individual] to sell himself into slavery” and he answers “I believe that it would.” [Anarchy, State and Utopia, p. 371] While some right-Libertarians do not agree with Nozick, there is no logical basis in their ideology for such disagreement.

The logic is simple, you cannot really own something unless you can sell it. Self-ownership is one of the cornerstones of laissez-faire capitalist ideology. Therefore, since you own yourself you can sell yourself.

(For Murray Rothbard’s claims of the “unenforceability, in libertarian theory, of voluntary slave contracts” see The Ethics of Liberty, pp. 134–135 — of course, other libertarian theorists claim the exact opposite so “libertarian theory” makes no such claims, but nevermind! Essentially, his point revolves around the assertion that a person “cannot, in nature, sell himself into slavery and have this sale enforced — for this would mean that his future will over his own body was being surrendered in advance” and that if a “labourer remains totally subservient to his master’s will voluntarily, he is not yet a slave since his submission is voluntary.” [p. 40] However, as we noted in section 2, Rothbard emphasis on quitting fails to recognise that actual denial of will and control over ones own body that is explicit in wage labour. It is this failure that pro-slave
contract “libertarians” stress — as we will see, they consider the slave contract as an extended wage contract. Moreover, a modern slave contract would likely take the form of a “performance bond” [p. 136] in which the slave agrees to perform X years labour or pay their master substantial damages. The threat of damages that enforces the contract and such a “contract” Rothbard does agree is enforceable — along with “conditional exchange” [p. 141] which could be another way of creating slave contracts.

Nozick’s defence of slavery should not come as a surprise to any one familiar with classical liberalism. An elitist ideology, its main rationale is to defend the liberty and power of property owners and justify unfree social relationships (such as government and wage labour) in terms of “consent.” Nozick just takes it to its logical conclusion, a conclusion which Rothbard, while balking at the label used, does not actually disagree with.

This is because Nozick’s argument is not new but, as with so many others, can be found in John Locke’s work. The key difference is that Locke refused the term “slavery” and favoured “drudgery” as, for him, slavery mean a relationship “between a lawful conqueror and a captive” where the former has the power of life and death over the latter. Once a “compact” is agreed between them, “an agreement for a limited power on the one side, and obedience on the other... slavery ceases.” As long as the master could not kill the slave, then it was “drudgery.” Like Nozick, he acknowledges that “men did sell themselves; but, it is plain, this was only to drudgery, not to slavery: for, it is evident, the person sold was not under an absolute, arbitrary, despotic power: for the master could not have power to kill him, at any time, whom, at a certain time, he was obliged to let go free out of his service.” [Locke, Second Treatise of Government, Section 24] In other words, like Rothbard, voluntary slavery was fine but just call it something else.

Not that Locke was bothered by involuntary slavery. He was heavily involved in the slave trade. He owned shares in the “Royal Africa Company” which carried on the slave trade for England, also happens to be the boss being picketed, then workers’ rights would be zero. Perhaps we could also see capitalists suing working class organisations for littering their property if they do hand out leaflets (so placing even greater stress on limited resources).

The I.W.W. went down in history for its rigorous defence of freedom of speech because of its rightly famous “free speech” fights in numerous American cities and towns. Repression was inflicted upon wobblies who joined the struggle by “private citizens,” but in the end the I.W.W. won. Consider the case under “anarcho”-capitalism. The wobblies would have been “criminal aggressors” as the owners of the streets have refused to allow “undesirables” to use them to argue their case. If they refused to acknowledge the decree of the property owners, private cops would have taken them away. Given that those who controlled city government in the historical example were the wealthiest citizens in town, its likely that the same people would have been involved in the fictional (“anarcho”-capitalist) account. Is it a good thing that in the real account the wobblies are hailed as heroes of freedom but in the fictional one they are “criminal aggressors”?

Does converting public spaces into private property really stop restrictions on free speech being a bad thing?

Of course, Rothbard (and other right-libertarians) are aware that privatisation will not remove restrictions on freedom of speech, association and so on (while, at the same time, trying to portray themselves as supporters of such liberties!). However, for right-libertarians such restrictions are of no consequence. As Rothbard argues, any “prohibitions would not be state imposed, but would simply be requirements for residence or for use of some person’s or community’s land area.” [Nations by Consent, p. 85] Thus we yet again see the blindness of right-libertarians to the commonality between private property and the state. The state also maintains that submitting to its authority is the requirement for taking up residence in its territory (see also section 2.3 for more on this). As Benjamin Tucker noted, the state can be defined
who could have potentially caused their illness. Hence the road-owners would be sued for letting polluting (or unsafe) cars onto “their” roads. The road-owners would therefore desire to restrict pollution levels by restricting the right to use their property, and so would resist the “right of passage” as an “attack” on their “absolute” property rights. If the road-owners got their way (which would be highly likely given the need for “absolute” property rights and is suggested by the variable pricing way to avoid traffic jams mentioned above) and were able to control who used their property, freedom to travel would be very restricted and limited to those whom the owner considered “desirable.” Indeed, Murray Rothbard supports such a regime (“In the free [sic!] society, they [travellers] would, in the first instance, have the right to travel only on those streets whose owners agree to have them there” [The Ethics of Liberty, p. 119]). The threat to liberty in such a system is obvious — to all but Rothbard and other right-libertarians, of course.

To take another example, let us consider the privatisation of parks, streets and other public areas. Currently, individuals can use these areas to hold political demonstrations, hand out leaflets, picket and so on. However, under “anarcho”-capitalism the owners of such property can restrict such liberties if they desire, calling such activities “initiation of force” (although they cannot explain how speaking your mind is an example of “force”). Therefore, freedom of speech, assembly and a host of other liberties we take for granted would be reduced (if not eliminated) under a right-“libertarian” regime. Or, taking the case of pickets and other forms of social struggle, its clear that privatising “the commons” would only benefit the bosses. Strikers or other activists picketing or handing out leaflets in shopping centre’s are quickly ejected by private security even today. Think about how much worse it would become under “anarcho”-capitalism when the whole world becomes a series of malls — it would be impossible to hold a picket when the owner of the pavement objects, for example (as Rothbard himself argues, Op. Cit., p. 132) and if the owner of the pavement making a profit when he sold them. He also held a significant share in another slave company, the “Bahama Adventurers.” In the “Second Treatise”, Locke justified slavery in terms of “Captives taken in a just war.” [Section 85] In other words, a war waged against aggressors. That, of course, had nothing to do with the actual slavery Locke profited from (slave raids were common, for example). Nor did his “liberal” principles stop him suggesting a constitution that would ensure that “every freeman of Carolina shall have absolute power and authority over his Negro slaves.” The constitution itself was typically autocratic and hierarchical, designed explicitly to “avoid erecting a numerous democracy.” [The Works of John Locke, vol. X, p. 196]

So the notion of contractual slavery has a long history within right-wing liberalism, although most refuse to call it by that name. It is of course simply embarrassment that stops Rothbard calling a spade a spade. He incorrectly assumes that slavery has to be involuntary. In fact, historically, voluntary slave contracts have been common (David Ellerman’s Property and Contract in Economics has an excellent overview). Any new form of voluntary slavery would be a “civilised” form of slavery and could occur when an individual would “agree” to sell themselves to themselves to another (as when a starving worker would “agree” to become a slave in return for food). In addition, the contract would be able to be broken under certain conditions (perhaps in return for breaking the contract, the former slave would have pay damages to his or her master for the labour their master would lose — a sizeable amount no doubt and such a payment could result in debt slavery, which is the most common form of “civilised” slavery. Such damages may be agreed in the contract as a “performance bond” or “conditional exchange”).

In summary, right-Libertarians are talking about “civilised” slavery (or, in other words, civil slavery) and not forced slavery. While some may have reservations about calling it slavery, they agree with the basic concept that since people own themselves
they can sell themselves as well as selling their labour for a lifetime.

We must stress that this is no academic debate. “Voluntary” slavery has been a problem in many societies and still exists in many countries today (particularly third world ones where bonded labour — i.e. where debt is used to enslave people — is the most common form). With the rise of sweat shops and child labour in many “developed” countries such as the USA, “voluntary” slavery (perhaps via debt and bonded labour) may become common in all parts of the world — an ironic (if not surprising) result of “freeing” the market and being indifferent to the actual freedom of those within it.

And it is interesting to note that even Murray Rothbard is not against the selling of humans. He argued that children are the property of their parents. They can (bar actually murdering them by violence) do whatever they please with them, even sell them on a “flourishing free child market.” [The Ethics of Liberty, p. 102]

Combined with a whole hearted support for child labour (after all, the child can leave its parents if it objects to working for them) such a “free child market” could easily become a “child slave market” — with entrepreneurs making a healthy profit selling infants to other entrepreneurs who could make profits from the toil of “their” children (and such a process did occur in 19th century Britain). Unsurprisingly, Rothbard ignores the possible nasty aspects of such a market in human flesh (such as children being sold to work in factories, homes and brothels). And, of course, such a market could see women “specialising” in producing children for it (the use of child labour during the Industrial Revolution actually made it economically sensible for families to have more children) and, perhaps, gluts and scarcities of babies due to changing market conditions. But this is besides the point.

Of course, this theoretical justification for slavery at the heart of an ideology calling itself “libertarianism” is hard for many right-Libertarians to accept. Some of the “anarcho”-capitalist type argue

erty.” [Nations by Consent, p. 84] What happens to those who cannot afford to pay for access is not addressed (perhaps, being unable to exit a given capitalist’s land they will become bonded labourers? Or be imprisoned and used to undercut workers’ wages via prison labour? Perhaps they will just be shot as trespassers? Who can tell?). Nor is it addressed how this situation actually increases freedom. For Rothbard, a “totally privatised country would be as closed as the particular inhabitants and property owners [not the same thing, we must point out] desire. It seems clear, then, that the regime of open borders that exists de facto in the US really amounts to a compulsory opening by the central state... and does not genuinely reflect the wishes of the proprietors.” [Op. Cit., p. 85] Of course, the wishes of non-proprietors (the vast majority) do not matter in the slightest. Thus, it is clear, that with the privatisation of “the commons” the right to roam, to travel, would become a privilege, subject to the laws and rules of the property owners. This can hardly be said to increase freedom for anyone bar the capitalist class.

Rothbard acknowledges that “in a fully privatised world, access rights would obviously be a crucial part of land ownership.” [Nations by Consent, p. 86] Given that there is no free lunch, we can imagine we would have to pay for such “rights.” The implications of this are obviously unappealing and an obvious danger to individual freedom. The problem of access associated with the idea of privatising the roads can only be avoided by having a “right of passage” encoded into the “general libertarian law code.” This would mean that road owners would be required, by law, to let anyone use them. But where are “absolute” property rights in this case? Are the owners of roads not to have the same rights as other owners? And if “right of passage” is enforced, what would this mean for road owners when people sue them for car-pollution related illnesses? (The right of those injured by pollution to sue polluters is the main way “anarcho”-capitalists propose to protect the environment. See sections E.2 and E.3). It is unlikely that those wishing to bring suit could find, never mind sue, the millions of individual car owners
If they restricted use purely to their own customers, the tracking problem appears again.

Some may object that this picture of extensive surveillance of individuals would not occur or be impossible. However, Murray Rothbard (in a slightly different context) argued that technology would be available to collate information about individuals. He argued that "[i]t should be pointed out that modern technology makes even more feasible the collection and dissemination of information about people’s credit ratings and records of keeping or violating their contracts or arbitration agreements. Presumably, an anarchist [sic!] society would see the expansion of this sort of dissemination of data.” [“Society Without A State”, in Nomos XIX, Pennock and Chapman (eds.), p. 199] So, perhaps, with the total privatisation of society we would also see the rise of private Big Brothers, collecting information about individuals for use by property owners. The example of the Economic League (a British company who provided the “service” of tracking the political affiliations and activities of workers for employers) springs to mind.

And, of course, these privatisation suggestions ignore differences in income and market power. If, for example, variable pricing is used to discourage road use at times of peak demand (to eliminate traffic jams at rush-hour) as is suggested both by Murray Rothbard and David Friedman, then the rich will have far more “freedom” to travel than the rest of the population. And we may even see people having to go into debt just to get to work or move to look for work.

Which raises another problem with notion of total privatisation, the problem that it implies the end of freedom of travel. Unless you get permission or (and this seems more likely) pay for access, you will not be able to travel anywhere. As Rothbard himself makes clear, “anarch”-capitalism means the end of the right to roam or even travel. He states that "it became clear to me that a totally privatised country would not have open borders at all. If every piece of land in a country were owned ... no immigrant could enter there unless invited to enter and allowed to rent, or purchase, prop-

that such contracts would be very hard to enforce in their system of capitalism. This attempt to get out of the contradiction fails simply because it ignores the nature of the capitalist market. If there is a demand for slave contracts to be enforced, then companies will develop to provide that “service” (and it would be interesting to see how two “protection” firms, one defending slave contracts and another not, could compromise and reach a peaceful agreement over whether slave contracts were valid). Thus we could see a so-called “anarchist” or “free” society producing companies whose specific purpose was to hunt down escaped slaves (i.e. individuals in slave contracts who have not paid damages to their owners for freedom). Of course, perhaps Rothbard would claim that such slave contracts would be “outlawed” under his “general libertarian law code” but this is a denial of market “freedom”. If slave contracts are “banned” then surely this is paternalism, stopping individuals from contracting out their “labour services” to whom and however long they “desire”. You cannot have it both ways.

So, ironically, an ideology proclaiming itself to support “liberty” ends up justifying and defending slavery. Indeed, for the right-libertarian the slave contract is an exemplification, not the denial, of the individual’s liberty! How is this possible? How can slavery be supported as an expression of liberty? Simple, right-Libertarian support for slavery is a symptom of a deeper authoritarianism, namely their uncritical acceptance of contract theory. The central claim of contract theory is that contract is the means to secure and enhance individual freedom. Slavery is the antithesis to freedom and so, in theory, contract and slavery must be mutually exclusive. However, as indicated above, some contract theorists (past and present) have included slave contracts among legitimate contracts. This suggests that contract theory cannot provide the theoretical support needed to secure and enhance individual freedom. Why is this?

As Carole Pateman argues, “contract theory is primarily about a way of creating social relations constituted by subordination, not
about exchange.” Rather than undermining subordination, contract theorists justify modern subjection — “contract doctrine has proclaimed that subjection to a master — a boss, a husband — is freedom.” [The Sexual Contract, p. 40 and p. 146] The question central to contract theory (and so right-Libertarianism) is not “are people free” (as one would expect) but “are people free to subordinate themselves in any manner they please.” A radically different question and one only fitting to someone who does not know what liberty means.

Anarchists argue that not all contracts are legitimate and no free individual can make a contract that denies his or her own freedom. If an individual is able to express themselves by making free agreements then those free agreements must also be based upon freedom internally as well. Any agreement that creates domination or hierarchy negates the assumptions underlying the agreement and makes itself null and void. In other words, voluntary government is still government and the defining characteristic of an anarchy must be, surely, “no government” and “no rulers.”

This is most easily seen in the extreme case of the slave contract. John Stuart Mill stated that such a contract would be “null and void.” He argued that an individual may voluntarily choose to enter such a contract but in so doing “he abdicates his liberty; he foregoes any future use of it beyond that single act. He therefore defeats, in his own case, the very purpose which is the justification of allowing him to dispose of himself... The principle of freedom cannot require that he should be free not to be free. It is not freedom, to be allowed to alienate his freedom.” He adds that “these reasons, the force of which is so conspicuous in this particular case, are evidently of far wider application.” [quoted by Pateman, Op. Cit., pp. 171–2]

And it is such an application that defenders of capitalism fear (Mill did in fact apply these reasons wider and unsurprisingly became a supporter of a market syndicalist form of socialism). If we reject slave contracts as illegitimate then, logically, we must also reject all contracts that express qualities similar to slavery (i.e. deny on paying for what one uses, privatisation of roads would require some method of tracking individuals to ensure that they pay for the roads they use. In the UK, for example, during the 1980s the British Tory government looked into the idea of toll-based motorways. Obviously having toll-booths on motorways would hinder their use and restrict “freedom,” and so they came up with the idea of tracking cars by satellite. Every vehicle would have a tracking device installed in it and a satellite would record where people went and which roads they used. They would then be sent a bill or have their bank balances debited based on this information (in the fascist city-state/company town of Singapore such a scheme has been introduced).

If we extrapolate from this example to a system of fully privatised “commons,” it would clearly require all individuals to have tracking devices on them so they could be properly billed for use of roads, pavements, etc. Obviously being tracked by private firms would be a serious threat to individual liberty. Another, less costly, option would be for private guards to randomly stop and question car-owners and individuals to make sure they had paid for the use of the road or pavement in question. “Parasites” would be arrested and fined or locked up. Again, however, being stopped and questioned by uniformed individuals has more in common with police states than liberty. Toll-boothing every street would be highly unfeasible due to the costs involved and difficulties for use that it implies. Thus the idea of privatising roads and charging drivers to gain access seems impractical at best and distinctly freedom endangering if implemented at worse.

Of course, the option of owners letting users have free access to the roads and pavements they construct and run would be difficult for a profit-based company. No one could make a profit in that case. If companies paid to construct roads for their customers/employees to use, they would be financially hindered in competition with other companies that did not, and thus would be unlikely to do so.
ignore it in the workplace. But factory fascism is just as freedom destroying as the army or political fascism.

Due to this basic lack of concern for freedom, “anarcho”-capitalists cannot be considered as anarchists. Their total lack of concern about factory fascism (i.e. wage labour) places them totally outside the anarchist tradition. Real anarchists have always been aware of that private property and wage labour restriction freedom and desired to create a society in which people would be able to avoid it. In other words, where all relations are non-hierarchical and truly co-operative.

To conclude, to claim that private property eliminates hierarchy is false. Nor does capitalism co-ordinate economic activities without hierarchical structures. For this reason anarchists support co-operative forms of production rather than capitalistic forms.

5 Will privatising “the commons” increase liberty?

“Anarcho”-capitalists aim for a situation in which “no land areas, no square footage in the world shall remain public,” in other words everything will be “privatised.” [Murray Rothbard, Nations by Consent, p. 84] They claim that privatising “the commons” (e.g. roads, parks, etc.) which are now freely available to all will increase liberty. Is this true? We have shown before why the claim that privatisation can protect the environment is highly implausible (see section E.2). Here we will concern ourselves with private ownership of commonly used “property” which we all take for granted and pay for with taxes.

Its clear from even a brief consideration of a hypothetical society based on “privatised” roads (as suggested by Murray Rothbard in For a New Liberty, pp. 202–203 and David Friedman in The Machinery of Freedom, pp. 98–101) that the only increase of liberty will be for the ruling elite. As “anarcho”-capitalism is based freedom) including wage slavery. Given that, as David Ellerman points out, “the voluntary slave ... and the employee cannot in fact take their will out of their intentional actions so that they could be ‘employed’ by the master or employer” we are left with “the rather implausible assertion that a person can vacate his or her will for eight or so hours a day for weeks, months, or years on end but cannot do so for a working lifetime.” [Property and Contract in Economics, p. 58]

The implications of supporting voluntary slavery is quite devastating for all forms of right-wing “libertarianism.” This was proven by Ellerman when he wrote an extremely robust defence of it under the pseudonym “J. Philmore” called The Libertarian Case for Slavery (first published in The Philosophical Forum, xiv, 1982). This classic rebuttal takes the form of “proof by contradiction” (or reductio ad absurdum) whereby he takes the arguments of right-libertarianism to their logical end and shows how they reach the memorably conclusion that the “time has come for liberal economic and political thinkers to stop dodging this issue and to critically re-examine their shared prejudices about certain voluntary social institutions ... this critical process will inexorably drive liberalism to its only logical conclusion: libertarianism that finally lays the true moral foundation for economic and political slavery.”

Ellerman shows how, from a right-“libertarian” perspective there is a “fundamental contradiction” in a modern liberal society for the state to prohibit slave contracts. He notes that there “seems to be a basic shared prejudice of liberalism that slavery is inherently involuntary, so the issue of genuinely voluntary slavery has received little scrutiny. The perfectly valid liberal argument that involuntary slavery is inherently unjust is thus taken to include voluntary slavery (in which case, the argument, by definition, does not apply). This has resulted in an abridgment of the freedom of contract in modern liberal society.” Thus it is possible to argue for a “civilised form of contractual slavery.” [“J. Philmore,” Op. Cit.]
So accurate and logical was Ellerman’s article that many of its readers were convinced it was written by a right-libertarian (including, we have to say, us!). One such writer was Carole Pateman, who correctly noted that “[t]here is a nice historical irony here. In the American South, slaves were emancipated and turned into wage labourers, and now American contractarians argue that all workers should have the opportunity to turn themselves into civil slaves.” [Op. Cit., p. 63].

The aim of Ellerman’s article was to show the problems that employment (wage labour) presents for the concept of self-government and how contract need not result in social relationships based on freedom. As “Philmore” put it, “[a]ny thorough and decisive critique of voluntary slavery or constitutional nondemocratic government would carry over to the employment contract — which is the voluntary contractual basis for the free-market free-enterprise system. Such a critique would thus be a reductio ad absurdum.” As “contractual slavery” is an “extension of the employer-employee contract,” he shows that the difference between wage labour and slavery is the time scale rather than the principle or social relationships involved. [Op. Cit.] This explains, firstly, the early workers’ movement called capitalism “wage slavery” (anarchists still do) and, secondly, why capitalists like Rothbard support the concept but balk at the name. It exposes the unfree nature of the system they support! While it is possible to present wage labour as “freedom” due to its “consensual” nature, it becomes much harder to do so when talking about slavery or dictatorship. Then the contradictions are exposed for all to see and be horrified by.

All this does not mean that we must reject free agreement. Far from it! Free agreement is essential for a society based upon individual dignity and liberty. There are a variety of forms of free agreement and anarchists support those based upon co-operation and self-management (i.e. individuals working together as equals). Anarchists desire to create relationships which reflect (and so ex-
4.5 Does private property co-ordinate without hierarchy?

It is usually to find right-libertarians maintain that private property (i.e. capitalism) allows economic activity to be co-ordinated by non-hierarchical means. In other words, they maintain that capitalism is a system of large scale co-ordination without hierarchy. These claims follow the argument of noted right-wing, “free market” economist Milton Friedman who contrasts “central planning involving the use of coercion — the technique of the army or the modern totalitarian state” with “voluntary co-operation between individuals — the technique of the marketplace” as two distinct ways of co-ordinating the economic activity of large groups (“millions”) of people. [Capitalism and Freedom, p. 13].

However, this is just playing with words. As they themselves point out the internal structure of a corporation or capitalist company is not a “market” (i.e. non-hierarchical) structure, it is a “non-market” (hierarchical) structure of a market participant (see section 2.2). However “market participants” are part of the market. In other words, capitalism is not a system of co-ordination without hierarchy because it does contain hierarchical organisations which are an essential part of the system!

Indeed, the capitalist company is a form of central planning and shares the same “technique” as the army. As the pro-capitalist writer Peter Drucker noted in his history of General Motors, ”[t]here is a remarkably close parallel between General Motors’ scheme of organisation and those of the two institutions most renowned for administrative efficiency: that of the Catholic Church and that of the modern army...” [quoted by David Enger, Apostles of Greed, p. 66]. And so capitalism is marked by a series of totalitarian organisations — and since when was totalitarianism liberty enhancing? Indeed, many “anarcho”-capitalists actually celebrate the command economy of the capitalist firm as being more “efficient” than self-managed firms (usually because democ-

press) the liberty that is the basis of free agreement. Capitalism creates relationships that deny liberty. The opposition between autonomy and subjection can only be maintained by modifying or rejecting contract theory, something that capitalism cannot do and so the right-wing Libertarian rejects autonomy in favour of subjection (and so rejects socialism in favour of capitalism).

The real contrast between anarchism and right-Libertarianism is best expressed in their respective opinions on slavery. Anarchism is based upon the individual whose individuality depends upon the maintenance of free relationships with other individuals. If individuals deny their capacities for self-government from themselves through a contract the individuals bring about a qualitative change in their relationship to others — freedom is turned into mastery and subordination. For the anarchist, slavery is thus the paradigm of what freedom is not, instead of an exemplification of what it is (as right-Libertarians state). As Proudhon argued:

“If I were asked to answer the following question: What is slavery? and I should answer in one word, It is murder, my meaning would be understood at once. No extended argument would be required to show that the power to take from a man his thought, his will, his personality, is a power of life and death; and that to enslave a man is to kill him.” [What is Property?, p. 37]

In contrast, the right-Libertarian effectively argues that “I support slavery because I believe in liberty.” It is a sad reflection of the ethical and intellectual bankruptcy of our society that such an “argument” is actually taken seriously by (some) people. The concept of “slavery as freedom” is far too Orwellian to warrant a critique — we will leave it up to right Libertarians to corrupt our language and ethical standards with an attempt to prove it.

From the basic insight that slavery is the opposite of freedom, the anarchist rejection of authoritarian social relations quickly follows (the right-wing Libertarians fear):
“Liberty is inviolable. I can neither sell nor alienate my liberty; every contract, every condition of a contract, which has in view the alienation or suspension of liberty, is null: the slave, when he plants his foot upon the soil of liberty, at that moment becomes a free man. Liberty is the original condition of man; to renounce liberty is to renounce the nature of man: after that, how could we perform the acts of man?” [P.J. Proudhon, Op. Cit., p. 67]

The employment contract (i.e. wage slavery) abrogates liberty. It is based upon inequality of power and “exploitation is a consequence of the fact that the sale of labour power entails the worker’s subordination.” [Carole Pateman, Op. Cit., P. 149] Hence Proudhon’s (and Mill’s) support of self-management and opposition to capitalism — any relationship that resembles slavery is illegitimate and no contract that creates a relationship of subordination is valid. Thus in a truly anarchistic society, slave contracts would be unenforceable — people in a truly free (i.e. non-capitalist) society would never tolerate such a horrible institution or consider it a valid agreement. If someone was silly enough to sign such a contract, they would simply have to say they now rejected it in order to be free — such contracts are made to be broken and without the force of a law system (and private defence firms) to back it up, such contracts will stay broken.

The right-Libertarian support for slave contracts (and wage slavery) indicates that their ideology has little to do with liberty and far more to do with justifying property and the oppression and exploitation it produces. Their support and theoretical support for slavery indicates a deeper authoritarianism which negates their claims to be libertarians.

Which, of course, highlights the problems within the “trader” model advocated by Ayn Rand. According to her, the trader is the example of moral behaviour — you have something I want, I have something you want, we trade and we both benefit and so our activity is self-interested and no-one sacrifices themselves for another. While this has some intuitive appeal it fails to note that in the real world it is a pure fantasy. The trader wants to get the best deal possible for themselves and if the bargaining positions are unequal then one person will gain at the expense of the other (if the “commodity” being traded is labour, the seller may not even have the option of not trading at all). The trader is only involved in economic exchange, and has no concern for the welfare of the person they are trading with. They are a bearer of things, not an individual with a wide range of interests, concerns, hopes and dreams. These are irrelevant, unless you can make money out of them of course! Thus the trader is often a manipulator and outside novels it most definitely is a case of “buyer beware!”

If the trader model is taken as the basis of interpersonal relationships, economic gain replaces respect and empathy for others. It replaces human relationships with relationships based on things — and such a mentality does not encompass how interpersonal relationships affect both you and the society you life in. In the end, it impoverishes society and individuality. Yes, any relationship must be based upon self-interest (mutual aid is, after all, something we do because we benefit from it in some way) but the trader model presents such a narrow self-interest that it is useless and actively impoverishes the very things it should be protecting — individuality and interpersonal relationships (see section I.7.4 on how capitalism does not protect individuality).
property corrupts this liberatory aspect of “property” by allowing relationships of domination and oppression to be built up on top of it. Because of this recognition, all anarchists have tried to equalise property and turn it back into possession.

Also, capitalist individualism actively builds barriers between people. Under capitalism, money rules and individuality is expressed via consumption choices (i.e. money). But money does not encourage an empathy with others. As Frank Stronach (chair of Magna International, a Canadian auto-parts maker that shifted its production to Mexico) put it, "[t]o be in business your first mandate is to make money, and money has no heart, no soul, conscience, homeland." [cited by Doug Henwood, Wall Street, p. 113] And for those who study economics, it seems that this dehumanising effect also strikes them as well:

“Studying economics also seems to make you a nastier person. Psychological studies have shown that economics graduate students are more likely to ‘free ride’ — shirk contributions to an experimental ‘public goods’ account in the pursuit of higher private returns — than the general public. Economists also are less generous that other academics in charitable giving. Undergraduate economics majors are more likely to defect in the classic prisoner’s dilemma game that are other majors. And on other tests, students grow less honest — expressing less of a tendency, for example, to return found money — after studying economics, but not studying a control subject like astronomy.

“This is no surprise, really. Mainstream economics is built entirely on a notion of self-interested individuals, rational self-maximisers who can order their wants and spend accordingly. There’s little room for sentiment, uncertainty, selflessness, and social institutions. Whether this is an accurate picture of

### 2.7 But surely abolishing capitalism would restrict liberty?

Many “anarcho”-capitalists and other supporters of capitalism argue that it would be “authoritarian” to restrict the number of alternatives that people can choose between by abolishing capitalism. If workers become wage labourers, so it is argued, it is because they “value” other things more — otherwise they would not agree to the exchange. But such an argument ignores that reality of capitalism.

By maintaining capitalist private property, the options available to people are restricted. In a fully developed capitalist economy the vast majority have the “option” of selling their labour or starving/living in poverty — self-employed workers account for less than 10% of the working population. Usually, workers are at a disadvantage on the labour market due to the existence of unemployment and so accept wage labour because otherwise they would starve (see section 10.2 for a discussion on why this is the case). And as we argue in sections J.5.11 and J.5.12, even if the majority of the working population desired co-operative workplaces, a capitalist market will not provide them with that outcome due to the nature of the capitalist workplace (also see Juliet C. Schor’s excellent book The Overworked American for a discussion of why workers desire for more free time is not reflected in the labour market). In other words, it is a myth to claim that wage labour exists or that workplaces are hierarchical because workers value other things — they are hierarchical because bosses have more clout on the market than workers and, to use Schor’s expression, workers end up wanting what they get rather than getting what they want.

Looking at the reality of capitalism we find that because of inequality in resources (protected by the full might of the legal system, we should note) those with property get to govern those without it during working hours (and beyond in many cases). If the supporters of capitalism were actually concerned about liberty (as opposed to property) that situation would be abhorrent to them —
after all, individuals can no longer exercise their ability to make decisions, choices, and are reduced to being order takers. If choice and liberty are the things we value, then the ability to make choices in all aspects of life automatically follows (including during work hours). However, the authoritarian relationships and the continual violation of autonomy wage labour implies are irrelevant to “anarcho”-capitalists (indeed, attempts to change this situation are denounced as violations of the autonomy of the property owner!). By purely concentrating on the moment that a contract is signed they blind themselves to the restrictions of liberty that wage contracts create.

Of course, anarchists have no desire to ban wage labour — we aim to create a society within which people are not forced by circumstances to sell their liberty to others. In order to do this, anarchists propose a modification of property and property rights to ensure true freedom of choice (a freedom of choice denied to us by capitalism). As we have noted many times, “bilateral exchanges” can and do adversely effect the position of third parties if they result in the build-up of power/money in the hands of a few. And one of these adverse effects can be the restriction of workers options due to economic power. Therefore it is the supporter of capitalist who restricts options by supporting an economic system and rights framework that by their very workings reduce the options available to the majority, who then are “free to choose” between those that remain (see also section B.4). Anarchists, in contrast, desire to expand the available options by abolishing capitalist private property rights and removing inequalities in wealth and power that help restrict our options and liberties artificially.

So does an anarchist society have much to fear from the spread of wage labour within it? Probably not. If we look at societies such as the early United States or the beginnings of the Industrial Revolution in Britain, for example, we find that, given the choice, most people preferred to work for themselves. Capitalists found it hard to find enough workers to employ and the amount of wages that is restricted to the right, they are not. For example, the “individualist theory of society … might be advanced in a capitalist or in an anti-capitalist form … the theory as developed by critics of capitalism such as Hodgskin and the anarchist Tucker saw ownership of capital by a few as an obstacle to genuine individualism, and the individualist ideal was realisable only through the free association of labourers (Hodgskin) or independent proprietorship (Tucker).” [David Miller, Social Justice, pp. 290–1]

And the reason why social anarchists oppose capitalism is that it creates a false individualism, an abstract one which crushes the individuality of the many and justifies (and supports) hierarchical and authoritarian social relations. In Kropotkin’s words, “what has been called ‘individualism’ up to now has been only a foolish egoism which belittles the individual. It did not led to what it was established as a goal: that is the complete, broad, and most perfectly attainable development of individuality.” The new individualism desired by Kropotkin “will not consist … in the oppression of one’s neighbour … [as this] reduced the [individualist] …to the level of an animal in a herd.” [Selected Writings, p, 295, p. 296]

4.4 How does private property affect relationships?

Obviously, capitalist private property affects relationships between people by creating structures of power. Property, as we have argued all through this FAQ, creates relationships based upon domination — and this cannot help but produce servile tendencies within those subject to them (it also produces rebellious tendencies as well, the actual ratio between the two tendencies dependent on the individual in question and the community they are in). As anarchists have long recognised, power corrupts — both those subjected to it and those who exercise it.

While few, if any, anarchists would fail to recognise the importance of possession — which creates the necessary space all individuals need to be themselves — they all agree that private prop-
from their isolated but economically rational decisions.” [quoted by Alfie Kohn, No Contest, p. 67, p. 260f]

Steve Biko, a black activist murdered by the South African police in the 1970s, argued that “the most potent weapon of the oppressor is the mind of the oppressed.” And this is something capitalists have long recognised. Their investment in “Public Relations” and “education” programmes for their employees shows this clearly, as does the hierarchical nature of the firm. By having a ladder to climb, the firm rewards obedience and penalises rebellion. This aims at creating a mind-set which views hierarchy as good and so helps produce servile people.

This is why anarchists would agree with Alfie Kohn when he argues that “the individualist worldview is a profoundly conservative doctrine: it inherently stifles change.” [Ibid., p. 67] So, what is the best way for a boss to maintain his or her power? Create a hierarchical workplace and encourage capitalist individualism (as capitalist individualism actually works against attempts to increase freedom from hierarchy). Needless to say, such a technique cannot work forever — hierarchy also encourages revolt — but such divide and conquer can be very effective.

And as anarchist author Michael Moorcock put it, “Rugged individualism also goes hand in hand with a strong faith in paternalism — albeit a tolerant and somewhat distant paternalism — and many otherwise sharp-witted libertarians seem to see nothing in the morality of a John Wayne Western to conflict with their views. Heinlein’s paternalism is at heart the same as Wayne’s... To be an anarchist, surely, is to reject authority but to accept self-discipline and community responsibility. To be a rugged individualist a la Heinlein and others is to be forever a child who must obey, charm and cajole to be tolerated by some benign, omniscient father: Rooster Coburn shuffling his feet in front of a judge he respects for his office (but not necessarily himself) in True Grit.” [Starship Stormtroopers]

One last thing, don’t be fooled into thinking that individualism or concern about individuality — not quite the same thing —

had to be offered to hire workers were so high as to destroy any profit margins. Moreover, the mobility of workers and their “laziness” was frequently commented upon, with employers despairing at the fact workers would just work enough to make end meet and then disappear. Thus, left to the actions of the “free market,” it is doubtful that wage labour would have spread. But it was not left to the “free market”.

In response to these “problems”, the capitalists turned to the state and enforced various restrictions on society (the most important being the land, tariff and money monopolies — see sections B.3 and 8). In free competition between artisan and wage labour, wage labour only succeeded due to the use of state action to create the required circumstances to discipline the labour force and to accumulate enough capital to give capitalists an edge over artisan production (see section 8 for more details).

Thus an anarchist society would not have to fear the spreading of wage labour within it. This is simply because would-be capitalists (like those in the early United States) would have to offer such excellent conditions, workers’ control and high wages as to make the possibility of extensive profits from workers’ labour nearly impossible. Without the state to support them, they will not be able to accumulate enough capital to give them an advantage within a free society. Moreover, it is somewhat ironic to hear capitalists talking about anarchism denying choice when we oppose wage labour considering the fact workers were not given any choice when the capitalists used the state to develop wage labour in the first place!

2.8 Why should we reject the “anarcho”-capitalist definitions of freedom and justice?

Simply because they lead to the creation of authoritarian social relationships and so to restrictions on liberty. A political theory which, when consistently followed, has evil or iniquitous consequences, is a bad theory.
For example, any theory that can justify slavery is obviously a bad theory — slavery does not cease to stink the moment it is seen to follow your theory. As right-Libertarians can justify slave contracts as a type of wage labour (see section 2.6) as well as numerous other authoritarian social relationships, it is obviously a bad theory.

It is worth quoting Noam Chomsky at length on this subject:

“Consider, for example, the ‘entitlement theory of justice’... according to this theory, a person has a right to whatever he has acquired by means that are just. If, by luck or labour or ingenuity, a person acquires such and such, then he is entitled to keep it and dispose of it as he wills, and a just society will not infringe on this right.

“One can easily determine where such a principle might lead. It is entirely possible that by legitimate means — say, luck supplemented by contractual arrangements ‘freely undertaken’ under pressure of need — one person might gain control of the necessities of life. Others are then free to sell themselves to this person as slaves, if he is willing to accept them. Otherwise, they are free to perish. Without extra question-begging conditions, the society is just.

“The argument has all the merits of a proof that 2 + 2 = 5... Suppose that some concept of a ‘just society’ is advanced that fails to characterise the situation just described as unjust... Then one of two conclusions is in order. We may conclude that the concept is simply unimportant and of no interest as a guide to thought or action, since it fails to apply properly even in such an elementary case as this. Or we may conclude that the concept advanced is to be dismissed in that it fails

it does make some sense — in a capitalist environment — to assume that the entrepreneur is the main actor, but as an individualistic model of activity it fails totally. Perhaps it would not be unfair to say that capitalist individualism celebrates the entrepreneur because this reflects a hierarchical system in which for the one to flourish, the many must obey? (Also see section 1.1).

Capitalist individualism does not recognise the power structures that exist within capitalism and how they affect individuals. In Brian Morris’ words, what they fail “to recognise is that most productive relations under capitalism allow little scope for creativity and self-expression on the part of workers; that such relationships are not equitable; nor are they freely engaged in for the mutual benefit of both parties, for workers have no control over the production process or over the product of their labour. Rand [like other right-libertarians] misleadingly equates trade, artistic production and wage-slavery... [but] wage-slavery... is quite different from the trade principle” as it is a form of “exploitation.” [Ecology & Anarchism, p. 190]

He further notes that “[s]o-called trade relations involving human labour are contrary to the egoist values Rand [and other capitalist individualists] espouses — they involve little in the way of independence, freedom, integrity or justice.” [Ibid., p. 191]

Moreover, capitalist individualism actually supports authority and hierarchy. As Joshua Chen and Joel Rogers point out, the “achievement of short-run material satisfaction often makes it irrational [from an individualist perspective] to engage in more radical struggle, since that struggle is by definition against those institutions which provide one’s current gain.” In other words, to rise up the company structure, to “better oneself,” (or even get a good reference) you cannot be a pain in the side of management — obedient workers do well, rebel workers do not.

Thus the hierarchical structures help develop an “individualistic” perspective which actually reinforces those authority structures. This, as Cohn and Rogers notes, means that “the structure in which [workers] find themselves yields less than optimal social results.
ordination of those lower down the hierarchy (see, again, any Ayn Rand book on the worship of business leaders). In the Austrian school of economics, for example, the entrepreneur is considered the driving force of the market process and tend to abstract away from the organisations they govern. This approach is usually followed by right-libertarians. Often you get the impression that the accomplishments of a firm are the personal triumphs of the capitalists, as though their subordinates are merely tools not unlike the machines on which they labour.

We should not, of course, interpret this to mean that right-libertarians believe that entrepreneurs run their companies single-handedly (although you do get that impression sometimes!). But these abstractions help hide the fact that the economy is overwhelmingly interdependent and organised hierarchically within industry. Even in their primary role as organisers, entrepreneurs depend on the group. A company president can only issue general guidelines to his managers, who must inevitably organise and direct much of their departments on their own. The larger a company gets, the less personal and direct control an entrepreneur has over it. They must delegate out an increasing share of authority and responsibility, and is more dependent than ever on others to help him run things, investigate conditions, inform policy, and make recommendations. Moreover, the authority structures are from the “top-down” — indeed the firm is essentially a command economy, with all members part of a collective working on a common plan to achieve a common goal (i.e. it is essentially collectivist in nature — which means it is not too unsurprising that Lenin argued that state socialism could be considered as one big firm or office and why the system he built on that model was so horrific).

So the firm (the key component of the capitalist economy) is marked by a distinct lack of individualism, a lack usually ignored by right libertarians (or, at best, considered as “unavoidable”). As these firms are hierarchical structures and workers are paid to obey,

to correspond to the pretheoretical notion that it intends to capture in clear cases. If our intuitive concept of justice is clear enough to rule social arrangements of the sort described as grossly unjust, then the sole interest of a demonstration that this outcome might be ‘just’ under a given ‘theory of justice’ lies in the inference by reductio ad absurdum to the conclusion that the theory is hopelessly inadequate. While it may capture some partial intuition regarding justice, it evidentlyneglects others.

“The real question to be raised about theories that fail so completely to capture the concept of justice in its significant and intuitive sense is why they arouse such interest. Why are they not simply dismissed out of hand on the grounds of this failure, which is striking in clear cases? Perhaps the answer is, in part, the one given by Edward Greenberg in a discussion of some recent work on the entitlement theory of justice. After reviewing empirical and conceptual shortcomings, he observes that such work ‘plays an important function in the process of . . . ‘blaming the victim,’ and of protecting property against egalitarian onslaughts by various non-propertied groups.’ An ideological defence of privileges, exploitation, and private power will be welcomed, regardless of its merits.

“These matters are of no small importance to poor and oppressed people here and elsewhere.” [The Chomsky Reader, pp. 187–188]

It may be argued that the reductions in liberty associated with capitalism is not really an iniquitous outcome, but such an argument is hardly fitting for a theory proclaiming itself “libertarian.” And the results of these authoritarian social relationships? To
quote Adam Smith, under the capitalist division of labour the worker “has no occasion to exert his understanding, or exercise his invention” and “he naturally loses, therefore, the habit of such exercise and generally becomes as stupid and ignorant as it is possible for a human creature to become.” The worker’s mind falls “into that drowsy stupidity, which, in a civilised society, seems to benumb the understanding of almost all of the inferior [sic!] ranks of people.” [cited by Chomsky, Op. Cit., p. 186]

Of course, it may be argued that these evil effects of capitalist authority relations on individuals are also not iniquitous (or that the very real domination of workers by bosses is not really domination) but that suggests a desire to sacrifice real individuals, their hopes and dreams and lives to an abstract concept of liberty, the accumulative effect of which would be to impoverish all our lives. The kind of relationships we create within the organisations we join are of as great an importance as their voluntary nature. Social relations shape the individual in many ways, restricting their freedom, their perceptions of what freedom is and what their interests actually are. This means that, in order not to be farcical, any relationships we create must reflect in their internal workings the critical evaluation and self-government that created them in the first place. Sadly capitalist individualism masks structures of power and relations of domination and subordination within seemingly “voluntary” associations — it fails to note the relations of domination resulting from private property and so “what has been called ‘individualism’ up to now has been only a foolish egoism which belittles the individual. Foolish because it was not individualism at all. It did not lead to what was established as a goal; that is the complete, broad, and most perfectly attainable development of individuality.” [Peter Kropotkin, Selected Writings, p. 297]

This right-Libertarian lack of concern for concrete individual freedom and individuality is a reflection of their support for “free markets” (or “economic liberty” as they sometimes phrase it). However, as Max Stirner noted, this fails to understand that “[p]olitical

As an aside, we should point out that (following Stirner) the would-be monopolist is doing nothing wrong (as such) in attempting to monopolise the oasis. He is, after all, following his self-interest. However, what is objectionable is the right-libertarian attempt to turn thus act into a “right” which must be respected by the other travellers. Simply put, if the other travellers gang up and dispose of this would be tyrant then they are right to do so — to argue that this is a violation of the monopolists “rights” is insane and an indication of a slave mentality (or, following Rousseau, that the others are “simple”). Of course, if the would-be monopolist has the necessary force to withstand the other travellers then his property then the matter is closed — might makes right. But to worship rights, even when they obviously result in despotism, is definitely a case of “spooks in the head” and “man is created for the Sabbath” not “the Sabbath is created for man.”

4.3 How does private property effect individualism?

Private property is usually associated by “anarcho”-capitalism with individualism. Usually private property is seen as the key way of ensuring individualism and individual freedom (and that private property is the expression of individualism). Therefore it is useful to indicate how private property can have a serious impact on individualism.

Usually right-libertarians contrast the joys of “individualism” with the evils of “collectivism” in which the individual is submerged into the group or collective and is made to work for the benefit of the group (see any Ayn Rand book or essay on the evils of collectivism).

But what is ironic is that right-libertarian ideology creates a view of industry which would (perhaps) shame even the most die-hard fan of Stalin. What do we mean? Simply that right-libertarians stress the abilities of the people at the top of the company, the owner, the entrepreneur, and tend to ignore the very real subor-
sition on this example is a good illustration of the dangers of de-
ductive logic from assumptions (see section 1.3 for more on this
right-libertarian methodology) — after all W. Duncan Reekie, in
his introduction to Austrian Economics, states that "[t]o be intel-
lectually consistent one must concede his absolute right to the oasis." [Markets, Entrepreneurs and Liberty, p. 181] To place ideology
before people is to ensure humanity is placed on a Procrustean bed.

Which brings us to another point. Often right-libertarians say
that anarchists and other socialists are “lazy” or “do not want to
work”. You could interpret Kirzner’s example as saying that the
other travellers are “lazy” for not rushing ahead and appropriating
the oasis. But this is false. For under capitalism you can only get
rich by exploiting the labour of others via wage slavery or, within a
company, get better pay by taking “positions of responsibility” (i.e.
management positions). If you have an ethical objection to treating
others as objects (“means to an end”) then these options are un-
available to you. Thus anarchists and other socialists are not “lazy”
because they are not rich — they just have no desire to get rich off
the labour and liberty of others (as expressed in their opposition
to private property and the relations of domination it creates). In
other words, Anarchism is not the “politics of envy”; it is the poli-
tics of liberty and the desire to treat others as “ends in themselves”.

Rothbard is aware of what is involved in accepting the Lockean
Proviso — namely the existence of private property ("Locke’s pro-
viso may lead to the outlawry of all private property of land, since one
can always say that the reduction of available land leaves everyone
else ... worse off", The Ethics of Liberty, p. 240 — see section B.3.4
for a discussion on why the Proviso does imply the end of capital-
ist property rights). Which is why he, and other right-libertarians,
reject it. Its simple. Either you reject the Proviso and embrace cap-
talist property rights (and so allow one class of people to be dis-
possessed and another empowered at their expense) or you reject
private property in favour of possession and liberty. Anarchists,
obviously, favour the latter option.

liberty means that the polis, the State, is free; ... not, therefore, that I
am free of the State... It does not mean my liberty, but the liberty of a
power that rules and subjugates me; it means that one of my despots
... is free." [The Ego and Its Own, p. 107] Thus the desire for “free
markets” results in a blindness that while the market may be “free”
the individuals within it may not be (as Stirner was well aware,
"[u]nder the regime of the commonality the labourers always fall
into the hands of the possessors ... of the capitalists, therefore." [Op.
Cit., p. 115])

In other words, right-libertarians give the greatest importance
to an abstract concept of freedom and fail to take into account the
fact that real, concrete freedom is the outcome of self-managed ac-
tivity, solidarity and voluntary co-operation. For liberty to be real
it must exist in all aspects of our daily life and cannot be contracted
away without seriously effecting our minds, bodies and lives. Thus,
the right-Libertarian’s “defence of freedom is undermined by their in-
sistence on the concept of negative liberty, which all too easily trans-
lates in experience as the negation of liberty.” [Stephan L. Newman,
Liberalism as Wit’s End, p. 161]

Thus right-Libertarian’s fundamental fallacy is that “contract”
does not result in the end of power or domination (particularly
when the bargaining power or wealth of the would-be contractors
is not equal). As Carole Pateman notes, "[i]ronically, the contrac-
tarian ideal cannot encompass capitalist employment. Employment
is not a continual series of discrete contracts between employer and
worker, but ... one contract in which a worker binds himself to enter
an enterprise and follow the directions of the employer for the dura-
tion of the contract. As Huw Benyon has bluntly stated, ‘workers are
paid to obey.’" [The Sexual Contract, p. 148] This means that “the
employment contract (like the marriage contract) is not an exchange;
both contracts create social relations that endure over time — social
relations of subordination.” [Ibid.]

Authority impoverishes us all and must, therefore, be combated
wherever it appears. That is why anarchists oppose capitalism, so
that there shall be “no more government of man by man, by means of accumulation of capital.” [P.-J. Proudhon, cited by Woodcock in Anarchism, p. 110] If, as Murray Bookchin point it, “the object of anarchism is to increase choice” [The Ecology of Freedom, p. 70] then this applies both to when we are creating associations/relationships with others and when we are within these associations/relationships — i.e. that they are consistent with the liberty of all, and that implies participation and self-management not hierarchy. “Anarcho”-capitalism fails to understand this essential point and by concentrating purely on the first condition for liberty ensures a society based upon domination, oppression and hierarchy and not freedom.

It is unsurprising, therefore, to find that the basic unit of analysis of the “anarcho”-capitalist/right-libertarian is the transaction (the “trade,” the “contract”). The freedom of the individual is seen as revolving around an act, the contract, and not in our relations with others. All the social facts and mechanisms that precede, surround and result from the transaction are omitted. In particular, the social relations that result from the transaction are ignored (those, and the circumstances that make people contract, are the two unmentionables of right-libertarianism).

For anarchists it seems strange to concentrate on the moment that a contract is signed and ignore the far longer time the contract is active for (as we noted in section A.2.14, if the worker is free when they sign a contract, slavery soon overtakes them). Yes, the voluntary nature of a decision is important, but so are the social relationships we experience due to those decisions.

For the anarchist, freedom is based upon the insight that other people, apart from (indeed, because of) having their own intrinsic value, also are “means to my end”, that it is through their freedom that I gain my own — so enriching my life. As Bakunin put it:

“I who want to be free cannot be because all the men around me do not yet want to be free, and consequently

have the right to refuse a sale or charge whatever the customers will pay. The situation may be unfortunate for the customers, as are many situations in life.” [The Ethics of Liberty, p. 221] (Rothbard, we should note, is relying to the right-libertarian von Hayek who — to his credit — does maintain that this is a coercive situation; but as others, including other right-libertarians, point out, he has to change his definition of coercion/freedom to do so — see Stephan L. Newman’s Liberalism at Wit’s End, pp. 130–134 for an excellent summary of this debate).

Now, we could be tempted just to rant about the evils of the right libertarian mind-frame but we will try to present a clam analysis of this position. Now, what Kirzner (and Rothbard et al) fails to note is that without the water the other travellers will die in a matter of days. The monopolist has the power of life and death over his fellow travellers. Perhaps he hates one of them and so raced ahead to ensure their death. Perhaps he just recognised the vast power that his appropriation would give him and so, correctly, sees that the other travellers would give up all their possessions and property to him in return for enough water to survive.

Either way, it’s clear that perhaps the other travellers did not “race ahead” because they were ethical people — they would not desire to inflict such tyranny on others because they would not like it inflicted upon them.

Thus we can answer Kirzner’s question — “What ... is so obviously acceptable about the Lockean proviso... ?” [Ibid.]

It is the means by which human actions are held accountable to social standards and ethics. It is the means by which the greediest, most evil and debased humans are stopped from dragging the rest of humanity down to their level (via a “race to the bottom”) and inflicting untold tyranny and domination on their fellow humans. An ideology that could consider the oppression which could result from such an appropriation as “supplying a vital service” and any act to remove this tyranny as “coercion” is obviously a very sick ideology. And we may note that the right-libertarian po-
then that is their proper assumption of risk in this free and uncertain world. There is no longer a vast frontier in the United States, and there is no point crying over the fact.” [Murray Rothbard, *The Ethics of Liberty*, p. 240].

Hence the appropriation of resources is an essentially individualistic, asocial act — the requirements of others are either irrelevant or unknown. However, such an argument fails to take into account why the Lockean Proviso has such an appeal. When we do this we see that rejecting it leads to massive injustice, even slavery.

However, let us start with a defence of rejecting the Proviso from a leading Austrian economist:

“Consider ... the case ... of the unheld sole water hole in the desert (which everyone in a group of travellers knows about), which one of the travellers, by racing ahead of the others, succeeds in appropriating ... [This] clearly and unjustly violates the Lockean proviso... For use, however, this view is by no means the only one possible. We notice that the energetic traveller who appropriated all the water was not doing anything which (always ignoring, of course, prohibitions resting on the Lockean proviso itself) the other travellers were not equally free to do. The other travellers, too, could have raced ahead ... [they] did not bother to race for the water ... It does not seem obvious that these other travellers can claim that they were hurt by an action which they could themselves have easily taken” [Israel M. Kirzner, “Entrepreneurship, Entitlement, and Economic Justice”, pp. 385–413, in *Reading Nozick*, p. 406]

Murray Rothbard, we should note, takes a similar position in a similar example, arguing that “the owner [of the sole oasis] is scarcely being ‘coercive’; in fact he is supplying a vital service, and should they become tools of oppression against me.” [quoted by Errico Malatesta in *Anarchy*, p. 27]

Therefore anarchists argue that we must reject the right-Libertarian theories of freedom and justice because they end up supporting the denial of liberty as the expression of liberty. What this fails to recognise is that freedom is a product of social life and that (in Bakunin’s words) “no man can achieve his own emancipation without at the same time working for the emancipation of all men around him. My freedom is the freedom of all since I am not truly free in thought and in fact, except when my freedom and my rights are confirmed and approved in the freedom and rights of all men who are my equals.” [Ibid.]

Other people give us the possibilities to develop our full human potentiality and thereby our freedom, so when we destroy the freedom of others we limit our own. “To treat others and oneself as property,” argues anarchist L. Susan Brown, “objectifies the human individual, denies the unity of subject and object and is a negation of individual will ... even the freedom gained by the other is compromised by this relationship, for to negate the will of another to achieve one’s own freedom destroys the very freedom one sought in the first place.” [The Politics of Individualism, p. 3]

Fundamentally, it is for this reason that anarchists reject the right-Libertarian theories of freedom and justice — it just does not ensure individual freedom or individuality.

3 Why do anarcho”-capitalists place little or no value on “equality”?

Murray Rothbard argues that “the ‘rightist’ libertarian is not opposed to inequality.” [For a New Liberty, p. 47] In contrast, “leftist” libertarians oppose inequality because it has harmful effects on individual liberty.
Part of the reason “anarcho”-capitalism places little or no value on “equality” derives from their definition of that term. Murray Rothbard defines equality as:

“A and B are ‘equal’ if they are identical to each other with respect to a given attribute... There is one and only one way, then, in which any two people can really be ‘equal’ in the fullest sense: they must be identical in all their attributes.”

He then points out the obvious fact that “men are not uniform,... the species, mankind, is uniquely characterised by a high degree of variety, diversity, differentiation: in short, inequality.”

[Equality as a Revolt against Nature and Other Essays, p. 4, p.5]

In other words, every individual is unique. Something no egalitarian has ever denied. On the basis of this amazing insight, he concludes that equality is impossible (except “equality of rights”) and that the attempt to achieve “equality” is a “revolt against nature” — as if any anarchist had ever advocated such a notion of equality as being identical!

And so, because we are all unique, the outcome of our actions will not be identical and so social inequality flows from natural differences and not due to the economic system we live under. Inequality of endowment implies inequality of outcome and so social inequality. As individual differences are a fact of nature, attempts to create a society based on “equality” (i.e. making everyone identical in terms of possessions and so forth) is impossible and “unnatural.”

Before continuing, we must note that Rothbard is destroying language to make his point and that he is not the first to abuse language in this particular way. In George Orwell’s 1984, the expression “all men are created equal” could be translated into Newspeak, but it would make as much sense as saying “all men have red hair,”

Shay’s rebellion started, a rebellion which was an important factor in the centralisation of state power in America to ensure that popular input and control over government were marginalised and that the wealthy elite and their property rights were protected against the many (see Bookchin, Op. Cit., for details). Thus the homestead system was undermined, essentially, by the need to pay for services in specie (as demanded by merchants).

So while Rothbard’s theory as a certain appeal (reinforced by watching too many Westerns, we imagine) it fails to justify the “unrestricted” property rights theory (and the theory of freedom Rothbard derives from it). All it does is to end up justifying capitalist and landlord domination (which is probably what it was intended to do).

4.2 Why is the “Lockean Proviso” important?

Robert Nozick, in his work Anarchy, State, and Utopia presented a case for private property rights that was based on what he termed the “Lockean Proviso” — namely that common (or unowned) land and resources could be appropriated by individuals as long as the position of others is not worsen by so doing. However, if we do take this Proviso seriously private property rights cannot be defined (see section B.3.4 for details). Thus Nozick’s arguments in favour of property rights fail.

Some right-libertarians, particularly those associated with the Austrian school of economics argue that we must reject the Lockean Proviso (probably due to the fact it can be used to undermine the case for absolute property rights). Their argument goes as follows: if an individual appropriates and uses a previously unused resource, it is because it has value to him/her, as an individual, to engage in such action. The individual has stolen nothing because it was previously unowned and we cannot know if other people are better or worse off, all we know is that, for whatever reason, they did not appropriate the resource (“If latecomers are worse off, well
If they ignore the homesteaders claims he can call upon his “defence” firm to stop them — and then, in true Rothbardian fashion, the homesteader can refuse to supply water to them unless they hand over all their possessions (see section 4.2 on this). And if the history of the United States (which is obviously the model for Rothbard’s theory) is anything to go by, such people will become “criminal aggressors” and removed from the picture.

Which is another problem with Rothbard’s account. It is completely ahistoric (and so, as we noted above, is more like an “immaculate conception of property”). He has transported “capitalist man” into the dawn of time and constructed a history of property based upon what he is trying to justify (not surprising, as he does this with his “Natural Law” theory too — see section 7). What is interesting to note, though, is that the actual experience of life on the US frontier (the historic example Rothbard seems to want to claim) was far from the individualistic framework he builds upon it and (ironically enough) it was destroyed by the development of capitalism.

As Murray Bookchin notes, “the independence that the New England yeomanry enjoyed was itself a function of the co-operative social base from which it emerged. To barter home-grown goods and objects, to share tools and implements, to engage in common labour during harvesting time in a system of mutual aid, indeed, to help new-comers in barn-raising, corn-husking, log-rolling, and the like, was the indispensable cement that bound scattered farmsteads into a united community.” [The Third Revolution, vol. 1, p. 233] Bookchin quotes David P. Szatmary (author of a book on Shay’ Rebellion) stating that it was a society based upon “co-operative, community orientated interchanges” and not a “basically competitive society.” [Ibid.]

Into this non-capitalist society came capitalist elements. Market forces and economic power soon resulted in the transformation of this society. Merchants asked for payment in specie which (and along with taxes) soon resulted in indebtedness and the dispossession of the homesteaders from their land and goods. In response

an obvious falsehood (see “The Principles of Newspeak” Appendix).

It’s nice to know that “Mr. Libertarian” is stealing ideas from Big Brother, and for the same reason: to make critical thought impossible by restricting the meaning of words.

“Equality,” in the context of political discussion, does not mean “identical,” it usually means equality of rights, respect, worth, power and so forth. It does not imply treating everyone identically (for example, expecting an eighty year old man to do identical work to an eighteen violates treating both with respect as unique individuals). For anarchists, as Alexander Berkman writes, “equality does not mean an equal amount but equal opportunity... Do not make the mistake of identifying equality in liberty with the forced equality of the convict camp. True anarchist equality implies freedom, not quantity. It does not mean that every one must eat, drink, or wear the same things, do the same work, or live in the same manner. Far from it: the very reverse, in fact. Individual needs and tastes differ, as appetites differ. It is equal opportunity to satisfy them that constitutes true equality. Far from levelling, such equality opens the door for the greatest possible variety of activity and development. For human character is diverse, and only the repression of this free diversity results in levelling, in uniformity and sameness. Free opportunity and acting out your individuality means development of natural dissimilarities and variations... . Life in freedom, in anarchy will do more than liberate man merely from his present political and economic bondage. That will be only the first step, the preliminary to a truly human existence.” [The ABC of Anarchism, p. 25]

Thus anarchists reject the Rothbardian-Newspeak definition of equality as meaningless within political discussion. No two people are identical and so imposing “identical” equality between them would mean treating them as unequals, i.e. not having equal worth or giving them equal respect as befits them as human beings and fellow unique individuals.
So what should we make of Rothbard’s claim? It is tempting just to quote Rousseau when he argued "it is ... useless to inquire whether there is any essential connection between the two inequalities [social and natural]; for this would be only asking, in other words, whether those who command are necessarily better than those who obey, and if strength of body or of mind, wisdom, or virtue are always found in particular individuals, in proportion to their power or wealth: a question fit perhaps to be discussed by slaves in the hearing of their masters, but highly unbecoming to reasonable and free men in search of the truth." [The Social Contract and Discourses, p. 49] But a few more points should be raised.

The uniqueness of individuals has always existed but for the vast majority of human history we have lived in very egalitarian societies. If social inequality did, indeed, flow from natural inequalities then all societies would be marked by it. This is not the case. Indeed, taking a relatively recent example, many visitors to the early United States noted its egalitarian nature, something that soon changed with the rise of wage labour and industrial capitalism (a rise dependent upon state action, we must add, — see section 8). This implies that the society we live in (its rights framework, the social relationships it generates and so forth) has a far more of a decisive impact on inequality than individual differences. Thus certain rights frameworks will tend to magnify “natural” inequalities (assuming that is the source of the initial inequality, rather than, say, violence and force). As Noam Chomsky argues:

"Presumably it is the case that in our ‘real world’ some combination of attributes is conducive to success in responding to ‘the demands of the economic system’ ... One might suppose that some mixture of avarice, selfishness, lack of concern for others, aggressiveness, and similar characteristics play a part in getting ahead [in capitalism].... Whatever the correct collection of attributes may be, we may ask what follows from the fact, if it becomes property in Rothbard’s theory. And, of course, fencing in areas of rainforest disrupts the local eco-system — animals cannot freely travel, for example — which, again, is what ecologists desire to stop. Would Rothbard accept a piece of paper as “transforming” land? We doubt it (after all, in his example the wilderness owner did legally own it) — and so most ecologists will have a hard time in “anarcho”-capitalism (wilderness is just not an option).

As an aside, we must note that Rothbard fails to realise — and this comes from his worship of the market and his "Austrian economics" — is that people value many things which do not appear on the market. He claims that wilderness is “valueless unused natural objects” (for it people valued them, they would use — i.e. appropriate — them). But unused things may be of considerable value to people, wilderness being a classic example. And if something cannot be transformed into private property, does that mean people do not value it? For example, people value community, stress free working environments, meaningful work — if the market cannot provide these, does that mean they do not value them? Of course not (see Juliet Schor’s The Overworked American on how working people’s desire for shorter working hours was not transformed into options on the market).

Moreover, Rothbard’s “homesteading” theory actually violates his support for unrestricted property rights. What if a property owner wants part of her land to remain wilderness? Their desires are violated by the “homesteading” theory (unless, of course, fencing things off equals “transforming” them, which it apparently does not). How can companies provide wilderness holidays to people if they have no right to stop settlers (including large companies) “homesteading” that wilderness? And, of course, where does Rothbard’s theory leave hunter-gather or nomad societies. They use the resources of the wilderness, but they do not “transform” them (in this case you cannot easily tell if virgin land is empty or being used as a resource). If a troop of nomads find its traditionally used, but natural, oasis appropriated by a homesteader what are they to do?
ing their labour” with the land does not spring into mind reading Rothbard’s account of property growth, but in the real world that is what will happen.

If we take the question of wilderness (a topic close to many eco-anarchists’ and deep ecologists’ hearts) we run into similar problems. Rothbard states clearly that “libertarian theory must invalidate [any] claim to ownership” of land that has “never been transformed from its natural state” (he presents an example of an owner who has left a piece of his “legally owned” land untouched). If another person appears who does transform the land, it becomes “justly owned by another” and the original owner cannot stop her (and should the original owner “use violence to prevent another settler from entering this never-used land and transforming it into use” they also become a “criminal aggressor”). Rothbard also stresses that he is not saying that land must continually be in use to be valid property [Op. Cit., pp. 63–64] (after all, that would justify landless workers seizing the land from landowners during a depression and working it themselves).

Now, where does that leave wilderness? In response to ecologists who oppose the destruction of the rainforest, “anarcho”-capitalists suggest that they put their money where their mouth is and buy rainforest land. In this way, it is claimed, rainforest will be protected (see section B.5 for why such arguments are nonsense). As ecologists desire the rainforest because it is wilderness they are unlikely to “transform” it by human labour (its precisely that they want to stop). From Rothbard’s arguments it is fair to ask whether logging companies have a right to “transform” the virgin wilderness owned by ecologists, after all it meets Rothbard’s criteria (it is still wilderness). Perhaps it will be claimed that fencing off land “transforms” it (hardly what you imagine “mixing labour” with to mean, but nevermind) — but that allows large companies and rich individuals to hire workers to fence in vast tracks of land (and recreate the land monopoly by a “libertarian” route). But as we noted above, fencing off land does not seem to imply that it is a fact, that some partially inherited combination of attributes tends to material success? All that follows...

.. is a comment on our particular social and economic arrangements .. . The egalitarian might responds, in all such cases, that the social order should be changes so that the collection of attributes that tends to bring success no longer do so” [The Chomsky Reader, p. 190] 

So, perhaps, if we change society then the social inequalities we see today would disappear. It is more than probable that natural difference has been long ago been replaced with social inequalities, especially inequalities of property (which will tend to increase, rather than decrease, inequality). And as we argue in section 8 these inequalities of property were initially the result of force, not differences in ability. Thus to claim that social inequality flows from natural differences is false as most social inequality has flown from violence and force. This initial inequality has been magnified by the framework of capitalist property rights and so the inequality within capitalism is far more dependent upon, say, the existence of wage labour, rather than “natural” differences between individuals.

If we look at capitalism, we see that in workplaces and across industries many, if not most, unique individuals receive identical wages for identical work (although this often is not the case for women and blacks, who receive less wages than male, white workers). Similarly, capitalists have deliberately introduced wage inequalities and hierarchies for no other reason that to divide (and so rule) the workforce (see section D.10). Thus, if we assume egalitarianism is a revolt against nature, then much of capitalist economic life is in such a revolt (and when it is not, the “natural” inequalities have been imposed artificially by those in power).

Thus “natural” differences do not necessarily result in inequality as such. Given a different social system, “natural” differences would be encouraged and celebrated far wider than they are under...
capitalism (where, as we argued in section B.1, hierarchy ensures the crushing of individuality rather than its encouragement) without any change in social equality. The claim that "natural" differences generates social inequalities is question begging in the extreme — it takes the rights framework of society as a given and ignores the initial source of inequality in property and power. Indeed, inequality of outcome or reward is more likely to be influenced by social conditions rather than individual differences (as would be the case in a society based on wage labour or other forms of exploitation).

Another reason for “anarcho”-capitalist lack of concern for equality is that they think that “liberty upsets patterns” (see section 2.5, for example). It is argued that equality can only be maintained by restricting individual freedom to make exchanges or by taxation of income. However, what this argument fails to acknowledge is that inequality also restricts individual freedom (see next section, for example) and that the capitalist property rights framework is not the only one possible. After all, money is power and inequalities in terms of power easily result in restrictions of liberty and the transformation of the majority into order takers rather than free producers. In other words, once a certain level of inequality is reached, property does not promote, but actually conflicts with, the ends which render private property legitimate. Moreover, Nozick (in his “liberty upsets patterns” argument) "has produced ... an argument for unrestricted private property using unrestricted private property, and thus he begs the question he tries to answer." [Andrew Kerhohan, “Capitalism and Self-Ownership”, from Capitalism, p. 71] For example, a worker employed by a capitalist cannot freely exchange the machines or raw materials they have been provided with to use but Nozick does not class this distribution of “restricted” property rights as infringing liberty (nor does he argue that wage slavery itself restricts freedom, of course).

However, if we take Rothbard’s theory at face value we find numerous problems with it. If title to unowned resources comes via the “expenditure of labour” on it, how can rivers, lakes and the oceans be appropriated? The banks of the rivers can be transformed, but can the river itself? How can you mix your labour with water? “Anarcho”-capitalists usually blame pollution on the fact that rivers, oceans, and so forth are unowned, but how can an individual “transform” water by their labour? Also, does fencing in land mean you have “mixed labour” with it? If so then transnational corporations can pay workers to fence in vast tracks of virgin land (such as rainforest) and so come to “own” it. Rothbard argues that this is not the case (he expresses opposition to “arbitrary claims”). He notes that it is not the case that "the first discoverer … could properly lay claim to [a piece of land] … [by] laying out a boundary for the area.” He thinks that “their claim would still be no more than the boundary itself, and not to any of the land within, for only the boundary will have been transformed and used by men” [Op. Cit., p. 50f]

However, if the boundary is private property and the owner refuses others permission to cross it, then the enclosed land is inaccessible to others! If an “enterprising” right-libertarian builds a fence around the only oasis in a desert and refuses permission to cross it to travellers unless they pay his price (which is everything they own) then the person has appropriated the oasis without “transforming” it by his labour. The travellers have the choice of paying the price or dying (and the oasis owner is well within his rights letting them die). Given Rothbard’s comments, it is probable that he will claim that such a boundary is null and void as it allows “arbitrary” claims — although this position is not at all clear. After all, the fence builder has transformed the boundary and “unrestricted” property rights is what right-libertarianism is all about.

And, of course, Rothbard ignores the fact of economic power — a transnational corporation can “transform” far more virgin resources in a day than a family could in a year. Transnational’s “mix-
then, is a piece of land upon which, henceforth, no one has a right to step, save the proprietor and his friends ... Let [this]... multiply, and soon the people ... will have nowhere to rest, no place to shelter, no ground to till. They will die at the proprietor’s door, on the edge of that property which was their birthright.” [What is Property?, pp. 84–85, p. 118]

As Rothbard himself noted in respect to the aftermath of slavery (see section 2.1), not having access to the means of life places one the position of unjust dependency on those who do. Rothbard’s theory fails because for “[w]e who belong to the proletaire class, property excommunicates us!” [P-J Proudhon, Op. Cit., p. 105] and so the vast majority of the population experience property as theft and despotism rather than as a source of liberty and empowerment (which possession gives). Thus, Rothbard’s account fails to take into account the Lockean Proviso (see section B.3.4) and so, for all its intuitive appeal, ends up justifying capitalist and landlord domination (see next section on why the Lockean Proviso is important).

It also seems strange that while (correctly) attacking social contract theories of the state as invalid (because “no past generation can bind later generations” [Op. Cit., p. 145]) he fails to see he is doing exactly that with his support of private property (similarly, Ayn Rand argued that “[a]ny alleged ‘right’ of one man, which necessitates the violation of the right of another, is not and cannot be a right” [Capitalism: The Unknown Ideal, p. 325] but obviously appropriating land does violate the rights of others to walk, use or appropriate that land). Due to his support for appropriation and inheritance, he is clearly ensuring that future generations are not born as free as the first settlers were (after all, they cannot appropriate any land, it is all taken!). If future generations cannot be bound by past ones, this applies equally to resources and property rights. Something anarchists have long realised — there is no defensible reason why those who first acquired property should control its use by future generations.

So in response to the claim that equality could only be maintained by continuously interfering with people’s lives, anarchists would say that the inequalities produced by capitalist property rights also involve extensive and continuous interference with people’s lives. After all, as Bob Black notes “[j]our foreman or supervisor gives you more or-else orders in a week than the police do in a decade” nevermind the other effects of inequality such as stress, ill health and so on [Libertarian as Conservative]. Thus claims that equality involves infringing liberty ignores the fact that inequality also infringes liberty. A reorganisation of society could effectively minimise inequalities by eliminating the major source of such inequalities (wage labour) by self-management (see section I.5.12 for a discussion of “capitalistic acts” within an anarchist society). We have no desire to restrict free exchanges (after all, most anarchists desire to see the “gift economy” become a reality sooner or later) but we argue that free exchanges need not involve the unrestricted property rights Nozick assumes. As we argue in sections 2 and 3.1, inequality can easily lead to the situation where self-ownership is used to justify its own negation and so unrestricted property rights may undermine the meaningful self-determination (what anarchists would usually call “freedom” rather than self-ownership) which many people intuitively understand by the term “self-ownership”.

Thus, for anarchists, the “anarcho”-capitalist opposition to equality misses the point and is extremely question begging. Anarchists do not desire to make humanity “identical” (which would be impossible and a total denial of liberty and equality) but to make the social relationships between individuals equal in power. In other words, they desire a situation where people interact together without institutionalised power or hierarchy and are influenced by each other “naturally,” in proportion to how the (individual) differences between (social) equals are applicable in a given context. To quote Michael Bakunin, “[t]he greatest intelligence would not be equal to a comprehension of the
whole. Thence results... the necessity of the division and association of labour. I receive and I give — such is human life. Each directs and is directed in his turn. Therefore there is no fixed and constant authority, but a continual exchange of mutual, temporary, and, above all, voluntary authority and subordination.” [God and the State, p. 33]

Such an environment can only exist within self-managed associations, for capitalism (i.e. wage labour) creates very specific relations and institutions of authority. It is for this reason anarchists are socialists (i.e. opposed to wage labour, the existence of a proletariat or working class). In other words, anarchists support equality precisely because we recognise that everyone is unique. If we are serious about “equality of rights” or “equal freedom” then conditions must be such that people can enjoy these rights and liberties. If we assume the right to develop one’s capacities to the fullest, for example, then inequality of resources and so power within society destroys that right simply because people do not have the means to freely exercise their capacities (they are subject to the authority of the boss, for example, during work hours).

So, in direct contrast to anarchism, right-Libertarianism is unconcerned about any form of equality except “equality of rights”. This blinds them to the realities of life; in particular, the impact of economic and social power on individuals within society and the social relationships of domination they create. Individuals may be “equal” before the law and in rights, but they may not be free due to the influence of social inequality, the relationships it creates and how it affects the law and the ability of the oppressed to use it. Because of this, all anarchists insist that equality is essential for freedom, including those in the Individualist Anarchist tradition the “anarcho”-capitalist tries to co-opt — “Spooner and Godwin insist that inequality corrupts freedom. Their anarchism is directed as much against inequality as against tyranny” and “[w]hile sympathetic to Spooner’s individualist anarchism, they [Rothbard and David Friedman] fail to notice or conveniently overlook its egalitarian implica-

4.1 What is wrong with a “homesteading” theory of property?

So how do “anarcho”-capitalists justify property? Looking at Murray Rothbard, we find that he proposes a “homesteading theory of property”. In this theory it is argued that property comes from occupancy and mixing labour with natural resources (which are assumed to be unowned). Thus the world is transformed into private property, for “title to an unowned resource (such as land) comes properly only from the expenditure of labour to transform that resource into use.” [The Ethics of Liberty, p. 63]

Rothbard paints a conceptual history of individuals and families forging a home in the wilderness by the sweat of their labour (its tempting to rename his theory the “immaculate conception of property” as his conceptual theory is somewhat at odds with actual historical fact).

Sadly for Murray Rothbard, his “homesteading” theory was refuted by Proudhon in What is Property? in 1840 (along with many other justifications of property). Proudhon rightly argues that “if the liberty of man is sacred, it is equally sacred in all individuals; that, if it needs property for its objective action, that is, for its life, the appropriation of material is equally necessary for all ... Does it not follow that if one individual cannot prevent another ... from appropriating an amount of material equal to his own, no more can he prevent individuals to come.” And if all the available resources are appropriated, and the owner “draws boundaries, fences himself in ... Here,
as with any other kind of -cracy.” [Anarchism and Anarchist Communism, pp. 52–53]

Because of this need to defend privilege and power, “anarcho”-capitalism is best called “private-state” capitalism. This will be discussed in more detail in section 6.

By advocating private property, right libertarians contradict many of their other claims. For example, they say that they support the right of individuals to travel where they like. They make this claim because they assume that only the state limits free travel. But this is a false assumption. Owners must agree to let you on their land or property (“people only have the right to move to those properties and lands where the owners desire to rent or sell to them.” [Murray Rothbard, The Ethics of Liberty, p. 119]. There is no “freedom of travel” onto private property (including private roads). Therefore immigration may be just as hard under “anarcho”-capitalism as it is under statism (after all, the state, like the property owner, only lets people in whom it wants to let in). People will still have to get another property owner to agree to let them in before they can travel — exactly as now (and, of course, they also have to get the owners of the road to let them in as well). Private property, as can be seen from this simple example, is the state writ small.

One last point, this ignoring of (“politically incorrect”) economic and other views of dead political thinkers and activists while claiming them as “libertarians” seems to be commonplace in right-Libertarian circles. For example, Aristotle (beloved by Ayn Rand) “thought that only living things could bear fruit. Money, not a living thing, was by its nature barren, and any attempt to make it bear fruit (tokos, in Greek, the same word used for interest) was a crime against nature.” [Marcello de Cecco, quoted by Doug Henwood, Wall Street, p. 41] Such opposition to interest hardly fits well into capitalism, and so either goes unmentioned or gets classed as an “error” (although we could ask why Aristotle is
By twisting the language of political debate, the vast differences in power in capitalist society can be “blamed” not on an unjust and authoritarian system but on “biology” (we are all unique individuals, after all). Unlike genes (although biotechnology corporations are working on this, too!), human society can be changed, by the individuals who comprise it, to reflect the basic features we all share in common — our humanity, our ability to think and feel, and our need for freedom.

3.1 Why is this disregard for equality important?

Simply because a disregard for equality soon ends with liberty for the majority being negated in many important ways. Most “anarcho”-capitalists and right-Libertarians deny (or at best ignore) market power. Rothbard, for example, claims that economic power does not exist; what people call “economic power” is “simply the right under freedom to refuse to make an exchange” [The Ethics of Liberty, p. 222] and so the concept is meaningless.

However, the fact is that there are substantial power centres in society (and so are the source of hierarchical power and authoritarian social relations) which are not the state. The central fallacy of “anarcho”-capitalism is the (unstated) assumption that the various actors within an economy have relatively equal power. This assumption has been noted by many readers of their works. For example, Peter Marshall notes that “anarcho-capitalists’ like Murray Rothbard assume individuals would have equal bargaining power in a [capitalist] market-based society” [Demanding the Impossible, p. 46] George Walford also makes this clear in his comments on David Friedman’s The Machinery of Freedom:

“‘The private ownership envisages by the anarcho-capitalists would be very different from that which we know. It is hardly going too far to say that while the one is nasty, the other would be nice. In anarcho-

examples of “justly acquired” property producing terrible consequences).

The defence of capitalist property does have one interesting side effect, namely the need arises to defend inequality and the authoritarian relationships inequality creates. In order to protect the private property needed by capitalists in order to continue exploiting the working class, “anarcho”-capitalists propose private security forces rather than state security forces (police and military) — a proposal that is equivalent to bringing back the state under another name.

Due to (capitalist) private property, wage labour would still exist under “anarcho”-capitalism (it is capitalism after all). This means that “defensive” force, a state, is required to “defend” exploitation, oppression, hierarchy and authority from those who suffer them. Inequality makes a mockery of free agreement and “consent” (see section 3.1). As Peter Kropotkin pointed out long ago:

“When a workman sells his labour to an employer ... it is a mockery to call that a free contract. Modern economists may call it free, but the father of political economy — Adam Smith — was never guilty of such a misrepresentation. As long as three-quarters of humanity are compelled to enter into agreements of that description, force is, of course, necessary, both to enforce the supposed agreements and to maintain such a state of things. Force — and a good deal of force — is necessary to prevent the labourers from taking possession of what they consider unjustly appropriated by the few... . The Spencerian party [proto-right-libertarians] perfectly well understand that; and while they advocate no force for changing the existing conditions, they advocate still more force than is now used for maintaining them. As to Anarchy, it is obviously as incompatible with plutocracy
[is presented] to indicate that in many large famines in
the recent past, in which millions of people have died,
there was no over-all decline in food availability at all,
and the famines occurred precisely because of shifts in
entitlement resulting from exercises of rights that are
perfectly legitimate… . [Can] famines … occur with a
system of rights of the kind morally defended in vari-
ous ethical theories, including Nozick’s. I believe the an-
swer is straightforwardly yes, since for many people the
only resource that they legitimately possess, viz. their
labour-power, may well turn out to be unsaleable in the
market, giving the person no command over food … [i]f
results such as starvation and famines were to occur,
would the distribution of holdings still be morally ac-
ceptable despite their disastrous consequences? There is
something deeply implausible in the affirmative answer.”
[Resources, Values and Development, pp. 311–2]

Thus “unrestricted” property rights can have seriously bad con-
sequences and so the existence of “justly held” property need not
imply a just or free society — far from it. The inequalities property
can generate can have a serious on individual freedom (see section
3.1). Indeed, Murray Rothbard argued that the state was evil not
because it restricted individual freedom but because the resources
it claimed to own were not “justly” acquired. Thus right-libertarian
theory judges property not on its impact on current freedom but by
looking at past history. This has the interesting side effect of
allowing its supporters to look at capitalist and statist hierarchies,
acknowledge their similar negative effects on the liberty of those
subjected to them but argue that one is legitimate and the other is
not simply because of their history! As if this changed the domi-
nation and unfreedom that both inflict on people living today (see
section 2.3 for further discussion and sections 2.8 and 4.2 for other
capitalism there would be no National Insurance, no
Social Security, no National Health Service and not
even anything corresponding to the Poor Laws; there
would be no public safety-nets at all. It would be
a rigorously competitive society: work, beg or die.
But as one reads on, learning that each individual
would have to buy, personally, all goods and services
needed, not only food, clothing and shelter but also
education, medicine, sanitation, justice, police, all
forms of security and insurance, even permission
to use the streets (for these also would be privately
owned), as one reads about all this a curious feature
emerges: everybody always has enough money to buy
all these things.

“There are no public casual wards or hospitals or hos-
pices, but neither is there anybody dying in the streets.
There is no public educational system but no unedu-
cated children, no public police service but nobody un-
able to buy the services of an efficient security firm,
no public law but nobody unable to buy the use of a
private legal system. Neither is there anybody able to
buy much more than anybody else; no person or group
possesses economic power over others.

“No explanation is offered. The anarcho-capitalists
simply take it for granted that in their favoured
society, although it possesses no machinery for re-
straining competition (for this would need to exercise
authority over the competitors and it is an anarcho-
capitalist society) competition would not be carried
to the point where anybody actually suffered from it.
While proclaiming their system to be a competitive
one, in which private interest rules unchecked, they
show it operating as a co-operative one, in which no
person or group profits at the cost of another.” [On the Capitalist Anarchists]

This assumption of (relative) equality comes to the fore in Murray Rothbard’s “Homesteading” concept of property (discussed in section 4.1). “Homesteading” paints a picture of individuals and families doing into the wilderness to make a home for themselves, fighting against the elements and so forth. It does not invoke the idea of transnational corporations employing tens of thousands of people or a population without land, resources and selling their labour to others. Indeed, Rothbard argues that economic power does not exist (at least under capitalism; as we saw in section 2.1 he does make — highly illogical — exceptions). Similarly, David Friedman’s example of a pro-death penalty and anti-death penalty “defence” firm coming to an agreement (see section 6.3) assumes that the firms have equal bargaining powers and resources — if not, then the bargaining process would be very one-sided and the smaller company would think twice before taking on the larger one in battle (the likely outcome if they cannot come to an agreement on this issue) and so compromise.

However, the right-libertarian denial of market power is unsurprising. The necessity, not the redundancy, of equality is required if the inherent problems of contract are not to become too obvious. If some individuals are assumed to have significantly more power than others, and if they are always self-interested, then a contract that creates equal partners is impossible — the pact will establish an association of masters and servants. Needless to say, the strong will present the contract as being to the advantage of both: the strong no longer have to labour (and become rich, i.e. even stronger) and the weak receive an income and so do not starve.

If freedom is considered as a function of ownership then it is very clear that individuals lacking property (outside their own body, of course) loses effective control over their own person and labour (which was, lets not forget, the basis of their equal small possessions are bought up again by greater proprietors, and the ‘free people’ change into day labourers.” [The Ego and Its Own, p. 248]

Thus “anarcho”-capitalists reject totally one of the common (and so defining) features of all anarchist traditions — the opposition to capitalist property. From Individualist Anarchists like Tucker to Communist-Anarchists like Bookchin, anarchists have been opposed to what Godwin termed “accumulated property.” This was because it was in “direct contradiction” to property in the form of “the produce of his [the worker’s] own industry” and so it allows “one man… [to] dispos[e] of the produce of another man’s industry.” [The Anarchist Reader, pp. 129–131] Thus, for anarchists, capitalist property is a source exploitation and domination, not freedom (it undermines the freedom associated with possession by created relations of domination between owner and employee).

Hardly surprising then the fact that, according to Murray Bookchin, Murray Rothbard “attacked me [Bookchin] as an anarchist with vigour because, as he put it, I am opposed to private property.” [The Raven, no. 29, p. 343]

We will discuss Rothbard’s “homesteading” justification of property in the next section. However, we will note here one aspect of right-libertarian defence of “unrestricted” property rights, namely that it easily generates evil side effects such as hierarchy and starvation. As famine expert Amartya Sen notes:

“Take a theory of entitlements based on a set of rights of ‘ownership, transfer and rectification.’ In this system a set of holdings of different people are judged to be just (or unjust) by looking at past history, and not by checking the consequences of that set of holdings. But what if the consequences are recognisably terrible?… [R]efer[ing] to some empirical findings in a work on famines… evidence
which goes with it. It is true that they call for an end to the state, but this is not because they are concerned about workers being exploited or oppressed but because they don’t want the state to impede capitalists’ “freedom” to exploit and oppress workers even more than is the case now!

They make an idol of private property and claim to defend absolute, “unrestricted” property rights (i.e. that property owners can do anything they like with their property, as long as it does not damage the property of others. In particular, taxation and theft are among the greatest evils possible as they involve coercion against “justly held” property). They agree with John Adams that “[t]he moment that idea is admitted into society that property is not as sacred as the Laws of God, and that there is not a force of law and public justice to protect it, anarchy and tyranny commence. Property must be sacred or liberty cannot exist.”

But in their celebration of property as the source of liberty they ignore the fact that private property is a source of “tyranny” in itself (see sections B.1 and B.4, for example — and please note that anarchists only object to private property, not individual possession, see section B.3.1). However, as much anarchists may disagree about other matters, they are united in condemning private property. Thus Proudhon argued that property was “theft” and “despotism” while Stirner indicated the religious and statist nature of private property and its impact on individual liberty when he wrote:

“Property in the civic sense means sacred property, such that I must respect your property... Be it ever so little, if one only has somewhat of his own — to wit, a respected property: The more such owners... the more ‘free people and good patriots’ has the State.

“Political liberalism, like everything religious, counts on respect, humaneness, the virtues of love... For in practice people respect nothing, and everyday the
who compromise.” [Juliet B. Schor, The Overworked American, p. 129] Thus the ability to refuse an exchange weighs most heavily on one class than another and so ensures that “free exchange” works to ensure the domination (and so exploitation) of one party by the other.

Inequality in the market ensures that the decisions of the majority of within it are shaped in accordance with that needs of the powerful, not the needs of all. It was for this reason that the Individual Anarchist J.K. Ingalls opposed Henry George’s proposal of nationalising the land. Ingalls was well aware that the rich could outbid the poor for leases on land and so the dispossession of the working classes would continue.

The market, therefore, does not end power or unfreedom — they are still there, but in different forms. And for an exchange to be truly voluntary, both parties must have equal power to accept, reject, or influence its terms. Unfortunately, these conditions are rarely met on the labour market or within the capitalist market in general. Thus Rothbard’s argument that economic power does not exist fails to acknowledge that the rich can out-bid the poor for resources and that a corporation generally has greater ability to refuse a contract (with an individual, union or community) than vice versa (and that the impact of such a refusal is such that it will encourage the others involved to “compromise” far sooner). And in such circumstances, formally free individuals will have to “consent” to be unfree in order to survive.

As Max Stirner pointed out in the 1840s, free competition “is not ‘free,’ because I lack the things for competition.” [The Ego and Its Own, p. 262] Due to this basic inequality of wealth (of “things”) we find that “[u]nder the regime of the commonality the labourers always fall into the hands of the possessors ... of the capitalists, therefore. The labourer cannot realise on his labour to the extent of the value that it has for the customer.” [Op. Cit., p. 115] Its interesting to note that even Stirner recognises that capitalism results in exploitation. And we may add that value the labourer does not “re-

person, how can it be deemed acceptable to leave the life and protection of even one individual to the charitable whims of others? (Perhaps it will be argued that individual’s have the right to life, but not a right to be a parasite. This ignores the fact some people cannot work — babies and some handicapped people — and that, in a functioning capitalist economy, many people cannot find work all the time. Is it this recognition of that babies cannot work that prompts many right-libertarians to turn them into property? Of course, rich folk who have never done a days work in their lives are never classed as parasites, even if they inherited all their money).

All things considered, little wonder that Proudhon argued that:

“Even charitable institutions serve the ends of those in authority marvellously well.

“Charity is the strongest chain by which privilege and the Government, bound to protect them, holds down the lower classes. With charity, sweeter to the heart of men, more intelligible to the poor man than the abstruse laws of Political Economy, one may dispense with justice.” [The General Idea of the Revolution, pp. 69–70]

As noted, the right-libertarian (passing) acknowledgement of poverty does not mean that they recognise the existence of market power. They never ask themselves how can someone be free if their social situation is such that they are drowning in a see of usury and have to sell their labour (and so liberty) to survive.

4 What is the right-libertarian position on private property?

Right libertarians are not interested in eliminating capitalist private property and thus the authority, oppression and exploitation
words, their propaganda is based on something that has never existed, and never will, namely an egalitarian capitalist society.

3.2 But what about “anarcho”-capitalist support for charity?

Yes, while being blind to the impact of inequality in terms of economic and social power and influence, most right-libertarians do argue that the very poor could depend on charity in their system. But such a recognition of poverty does not reflect an awareness of the need for equality or the impact of inequality on the agreements we make. Quite the reverse in fact, as the existence of extensive inequality is assumed — after all, in a society of relative equals, poverty would not exist, nor would charity be needed.

Ignoring the fact that their ideology hardly promotes a charitable perspective, we will raise four points. Firstly, charity will not be enough to countermand the existence and impact of vast inequalities of wealth (and so power). Secondly, it will be likely that charities will be concerned with “improving” the moral quality of the poor and so will divide them into the “deserving” (i.e. obedient) and “undeserving” (i.e. rebellious) poor. Charity will be forthcoming to the former, those who agree to busy-bodies sticking their noses into their lives. In this way charity could become another tool of economic and social power (see Oscar Wilde’s *The Soul of Man Under Socialism* for more on charity). Thirdly, it is unlikely that charity will be able to replace all the social spending conducted by the state — to do so would require a ten-fold increase in charitable donations (and given that most right-libertarians denounce the government for making them pay taxes to help the poor, it seems unlikely that they will turn round and *increase* the amount they give). And, lastly, charity is an implicate recognition that, under capitalism, no one has the right of life — its a privilege you have to pay for. That in itself is enough to reject the charity option. And, of course, in a system designed to secure the life and liberty of each individual, it is a contradiction.

To quote Stephan L. Newman:

“Another disquieting aspect of the libertarians’ refusal to acknowledge power in the market is their failure to confront the tension between freedom and autonomy... Wage labour under capitalism is, of course, formally free labour. No one is forced to work at gun point. Economic circumstance, however, often has the effect of force; it compels the relatively poor to accept work under conditions dictated by owners and managers. The individual worker retains freedom [i.e. negative liberty] but loses autonomy [positive liberty].” [*Liberalism at Wit’s End*, pp. 122–123]

(As an aside, we should point out that the full Stirner quote cited above is "[u]nder the regime of the commonality the labourers always fall into the hands of the possessors, of those who have at their disposal some bit of the state domains (and everything possessible in State domain belongs to the State and is only a fief of the individual), especially money and land; of the capitalists, therefore. The labourer cannot realise on his labour to the extent of the value that it has for the customer."

It could be argued that we misrepresenting Stirner by truncating the quote, but we feel that such a claim this is incorrect. Its clear from his book that Stirner is considering the “minimal” state ("The State is a — commoners’ State ... It protects man ...according to whether the rights entrusted to him by the State are enjoyed and managed in accordance with the will, that is, laws, of the State.” The State "looks on indifferently as one grows poor and the other rich, unruffled by this alternation. As individuals they are really equal before its face.” [*Op. Cit.*, p. 115, p. 252]). As “anarcho”-capitalists consider
their system to be one of rights and laws (particularly property rights), we feel that it’s fair to generalise Stirner’s comments into capitalism as such as opposed to “minimum state” capitalism. If we replace “State” by “libertarian law code” you will see what we mean. We have included this aside before any right-libertarians claim that we are misrepresenting Stirner’ argument.

If we consider “equality before the law” it is obvious that this also has limitations in an (materially) unequal society. Brian Morris notes that for Ayn Rand, “[u]nder capitalism … politics (state) and economics (capitalism) are separated … This, of course, is pure ideology, for Rand’s justification of the state is that it ‘protects’ private property, that is, it supports and upholds the economic power of capitalists by coercive means.” [Ecology & Anarchism, p. 189] The same can be said of “anarcho”-capitalism and its “protection agencies” and “general libertarian law code.” If within a society a few own all the resources and the majority are dispossessed, then any law code which protects private property automatically empowers the owning class. Workers will always be initiating force if act against the code and so “equality before the law” reinforces inequality of power and wealth.

This means that a system of property rights protects the liberties of some people in a way which gives them an unacceptable degree of power over others. And this cannot be met merely by reaffirming the rights in question, we have to assess the relative importance of various kinds of liberty and other values we how dear.

Therefore right-libertarian disregard for equality is important because it allows “anarcho”-capitalism to ignore many important restrictions of freedom in society. In addition, it allows them to brush over the negative effects of their system by painting an unreal picture of a capitalist society without vast extremes of wealth and power (indeed, they often construe capitalist society in terms of an ideal — namely artisan production — that is really pre-capitalist and whose social basis has been eroded by capitalist development). Inequality shapes the decisions we have available and what ones we make:

“An ‘incentive’ is always available in conditions of substantial social inequality that ensure that the ‘weak’ enter into a contract. When social inequality prevails, questions arises about what counts as voluntary entry into a contract … Men and women … are now juridically free and equal citizens, but, in unequal social conditions, the possibility cannot be ruled out that some or many contracts create relationships that bear uncomfortable resemblances to a slave contract.” [Carole Pateman, The Sexual Contract, p. 62]

This ideological confusion of right-libertarianism can also be seen from their opposition to taxation. On the one hand, they argue that taxation is wrong because it takes money from those who “earn” it and gives it to the poor. On the other hand, “free market” capitalism is assumed to be a more equal society! If taxation takes from the rich and gives to the poor, how will “anarcho”-capitalism be more egalitarian? That equalisation mechanism would be gone (of course, it could be claimed that all great riches are purely the result of state intervention skewing the “free market” but that places all their “rags to riches” stories in a strange position). Thus we have a problem, either we have relative equality or we do not. Either we have riches, and so market power, or we do not. And its clear from the likes of Rothbard, “anarcho”-capitalism will not be without its millionaires (there is, after all, apparently nothing un-libertarian about “organisation, hierarchy, wage-work, granting of funds by libertarian millionaires, and a libertarian party”). And so we are left with market power and so extensive unfreedom.

Thus, for an ideology that denounces egalitarianism as a “revolt against nature” it is pretty funny that they paint a picture of “anarcho”-capitalism as a society of (relative) equals. In other
in which they controlled their own work (and so themselves) to one in which others controlled them, and they did not like it. However, while many modern workers instinctively hate wage labour and having bosses, without the awareness of some other method of working, many put up with it as “inevitable.” The first generation of wage labourers had the awareness of something else (although, of course, a flawed something else) and this gave then a deep insight into the nature of capitalism and produced a deeply radical response to it and its authoritarian structures.

Far from being a “natural” development, then, capitalism was imposed on a society of free and independent people by state action. Those workers alive at the time viewed it as “unnatural relations” and organised to overcome it. These feelings and hopes still exist, and will continue to exist until such time as we organise and “abolish the wage system” (to quote the IWW preamble) and the state that supports it.

8.7 Why is the history of capitalism important?

Simply because it provides us with an understanding of whether that system is “natural” and whether it can be considered as just and free. If the system was created by violence, state action and other unjust means then the apparent “freedom” which we currently face within it is a fraud, a fraud masking unnecessary and harmful relations of domination, oppression and exploitation. Moreover, by seeing how capitalist relationships were viewed by the first generation of wage slaves reminds us that just because many people have adjusted to this regime and consider it as normal (or even natural) it is nothing of the kind.

Murray Rothbard is well aware of the importance of history. He considered the “moral indignation” of socialism arises from the argument “that the capitalists have stolen the rightful property of the workers, and therefore that existing titles to accumulated capital are unjust.” He argues that given “this hypothesis, the remainder of extensive market pressure to unify these differing law codes into one standard one (imagine what would happen if ever CD manufacturer created a unique CD player, or every computer manufacturer different sized floppy-disk drivers — little wonder, then, that over time companies standardise their products). Friedman himself acknowledges that this process is likely (and uses the example of standard paper sizes to indicate such a process).

In any event, the laws would not be decided on the basis of “one person, one vote”; hence, as market forces worked their magic, the “general” law code would reflect vested interests and so be very hard to change. As rights and laws would be a commodity like everything else in capitalism, they would soon reflect the interests of the rich — particularly if those interpreting the law are wealthy professionals and companies with vested interests of their own. Little wonder that the individualist anarchists proposed “trial by jury” as the only basis for real justice in a free society. For, unlike professional “arbitrators,” juries are ad hoc, made up of ordinary people and do not reflect power, authority, or the influence of wealth. And by being able to judge the law as well as a conflict, they can ensure a populist revision of laws as society progresses.

Thus a system of “defence” on the market will continue to reflect the influence and power of property owners and wealth and not be subject to popular control beyond choosing between companies to enforce the capitalist laws.

6.2 What are the social consequences of such a system?

The “anarcho” capitalist imagines that there will be police agencies, “defence associations,” courts, and appeals courts all organised on a free-market basis and available for hire. As David Weick points out, however, the major problem with such a system would not be the corruption of “private” courts and police forces (although, as suggested above, this could indeed be a problem):
“There is something more serious than the ‘Mafia danger’, and this other problem concerns the role of such ‘defence’ institutions in a given social and economic context.

[The] context... is one of a free-market economy with no restraints upon accumulation of property. Now, we had an American experience, roughly from the end of the Civil War to the 1930’s, in what were in effect private courts, private police, indeed private governments. We had the experience of the (private) Pinkerton police which, by its spies, by its agents provocateurs, and by methods that included violence and kidnapping, was one of the most powerful tools of large corporations and an instrument of oppression of working people. We had the experience as well of the police forces established to the same end, within corporations, by numerous companies... (The automobile companies drew upon additional covert instruments of a private nature, usually termed vigilante, such as the Black Legion). These were, in effect, private armies, and were sometimes described as such. The territories owned by coal companies, which frequently included entire towns and their environs, the stores the miners were obliged by economic coercion to patronise, the houses they lived in, were commonly policed by the private police of the United States Steel Corporation or whatever company owned the properties. The chief practical function of these police was, of course, to prevent labour organisation and preserve a certain balance of ‘bargaining.’

“These complexes were a law unto themselves, powerful enough to ignore, when they did not purchase, the governments of various jurisdictions of the American federal system. This industrial system was, at the time, of-

These responses of workers to the experience of wage labour is important to show that capitalism is by no means “natural.” The fact is the first generation of workers tried to avoid wage labour is at all possible as they hated the restrictions of freedom it imposed upon them. They were perfectly aware that wage labour was wage slavery — that they were decidedly unfree during working hours and subjected to the will of another. While many working people now are accustomed to wage labour (while often hating their job) the actual process of resistance to the development of capitalism indicates well its inherently authoritarian nature. Only once other options were closed off and capitalists given an edge in the “free” market by state action did people accept and become accustomed to wage labour.

Opposition to wage labour and factory fascism was/is widespread and seems to occur wherever it is encountered. “Research has shown”, summarises William Lazonick, “that the ‘free-born Englishman’ of the eighteenth century — even those who, by force of circumstance, had to submit to agricultural wage labour — tenaciously resisted entry into the capitalist workshop.” [Business Organisation and the Myth of the Market Economy, p. 37] British workers shared the dislike of wage labour of their American cousins. A “Member of the Builders’ Union” in the 1830s argued that the trade unions “will not only strike for less work, and more wages, but will ultimately abolish wages, become their own masters and work for each other; labour and capital will no longer be separate but will be indissolubly joined together in the hands of workmen and work-women.” [quoted by Geoffrey Ostergaard, The Tradition of Workers’ Control, p. 133] This is unsurprising, for as Ostergaard notes, “the workers then, who had not been swallowed up whole by the industrial revolution, could make critical comparisons between the factory system and what preceded it.” [Op. Cit., p. 134] While wage slavery may seem “natural” today, the first generation of wage labourers saw the transformation of the social relationships they experienced in work, from a situation
eryday continues to add power to its incorporate sovereignty, while the sovereignty of the working people decreases in the same degree.” [quoted by Brecher and Costello, *Op. Cit.*, p. 29]

Almost as soon as there were wage workers, there were strikes, machine breaking, riots, unions and many other forms of resistance. John Zerzan’s argument that there was a “relentless assault on the worker’s historical rights to free time, self-education, craftsmanship, and play was at the heart of the rise of the factory system” is extremely accurate [*Elements of Refusal*, p. 105]. And it was an assault that workers resisted with all their might. In response to being subjected to the “law of value,” workers rebelled and tried to organise themselves to fight the powers that be and to replace the system with a co-operative one. As the printer’s union argued, “[w]e regard such an organisation [a union] not only as an agent of immediate relief, but also as an essential to the ultimate destruction of those unnatural relations at present subsisting between the interests of the employing and the employed classes… [W]hen labour determines to sell itself no longer to speculators, but to become its own employer, to own and enjoy itself and the fruit thereof, the necessity for scales of prices will have passed away and labour will be forever rescued from the control of the capitalist.” [quoted by Brecher and Costello, *Op. Cit.*, pp. 27–28]

Little wonder, then, why wage labourers considered capitalism as a form of “slavery” and why the term “wage slavery” became so popular in the anarchist movement. It was just reflecting the feelings of those who experienced the wages system at first hand and joined the socialist and anarchist movements. As labour historian Norman Ware notes, the “term ‘wage slave’ had a much better standing in the forties [of the 19th century] than it has today. It was not then regarded as an empty shibboleth of the soap-box orator. This would suggest that it has suffered only the normal degradation of language, has become a cliche, not that it is a grossly misleading characterisation.” [*Op. Cit.*, p. xvf]

For a description of the weaponry and activities of these private armies, the economic historian Maurice Dobbs presents an excellent summary in *Studies in Capitalist Development* [pp. 353–357]. According to a report on “Private Police Systems” cited by Dobbs, in a town dominated by Republican Steel, the “civil liberties and the rights of labour were suppressed by company police. Union organisers were driven out of town.” Company towns had their own (company-run) money, stores, houses and jails and many corporations had machine-guns and tear-gas along with the usual shotguns, rifles and revolvers. The “usurpation of police powers by privately paid ‘guards and ‘deputies’, often hired from detective agencies, many with criminal records” was “a general practice in many parts of the country.”

The local (state-run) law enforcement agencies turned a blind-eye to what was going on (after all, the workers had broken their contracts and so were “criminal aggressors” against the companies) even when union members and strikers were beaten and killed. The workers own defence organisations were the only ones willing to help them, and if the workers seemed to be winning then troops were called in to “restore the peace” (as happened in the Ludlow strike, when strikers originally cheered the troops as they thought they would defend their civil rights; needless to say, they were wrong).

Here we have a society which is claimed by many “anarcho”-capitalists as one of the closest examples to their “ideal,” with limited state intervention, free reign for property owners, etc. What happened? The rich reduced the working class to a serf-like existence, capitalist production undermined independent producers (much to the annoyance of individualist anarchists at the time), and the result was the emergence of the corporate America that “anarcho”-capitalists say they oppose.
Are we to expect that “anarcho”-capitalism will be different? That, unlike before, “defence” firms will intervene on behalf of strikers? Given that the “general libertarian law code” will be enforcing capitalist property rights, workers will be in exactly the same situation as they were then. Support of strikers violating property rights would be a violation of the “general libertarian law code” and be costly for profit making firms to do (if not dangerous as they could be “outlawed” by the rest). Thus “anarcho”-capitalism will extend extensive rights and powers to bosses, but few if any rights to rebellious workers. And this difference in power is enshrined within the fundamental institutions of the system.

In evaluating “anarcho”-capitalism’s claim to be a form of anarchism, Peter Marshall notes that “private protection agencies would merely serve the interests of their paymasters.” [Demanding the Impossible, p. 653] With the increase of private “defence associations” under “really existing capitalism” today (associations that many “anarcho”-capitalists point to as examples of their ideas), we see a vindication of Marshall’s claim. There have been many documented experiences of protesters being badly beaten by private security guards. As far as market theory goes, the companies are only supplying what the buyer is demanding. The rights of others are not a factor (yet more “externalities,” obviously). Even if the victims successfully sue the company, the message is clear — social activism can seriously damage your health. With a reversion to “a general libertarian law code” enforced by private companies, this form of “defence” of “absolute” property rights can only increase, perhaps to the levels previously attained in the heyday of US capitalism, as described above by Weick.

6.3 But surely market forces will stop abuses by the rich?

Unlikely. The rise of corporations within America indicates exactly how a “general libertarian law code” would reflect the inter-

However, toward the middle of the 19th century the economy began to change. Capitalism began to be imported into American society as the infrastructure was improved, which allowed markets for manufactured goods to grow. Soon, due to (state-supported) capitalist competition, artisan production was replaced by wage labour. Thus “evolved” modern capitalism. Many workers understood, resisted, and opposed their increasing subjugation to their employers (“the masters”, to use Adam Smith’s expression), which could not be reconciled with the principles of freedom and economic independence that had marked American life and sunk deeply into mass consciousness during the days of the early economy. In 1854, for example, a group of skilled piano makers wrote that “the day is far distant when they [wage earners] will so far forget what is due to manhood as to glory in a system forced upon them by their necessity and in opposition to their feelings of independence and self-respect. May the piano trade be spared such exhibitions of the degrading power of the day [wage] system.” [quoted by Brecher and Costello, Common Sense for Hard Times, p. 26]

Clearly the working class did not consider working for a daily wage, in contrast to working for themselves and selling their own product, to be a step forward for liberty or individual dignity. The difference between selling the product of one’s labour and selling one’s labour (i.e. oneself) was seen and condemned (“[w]hen the producer … sold his product, he retained himself. But when he came to sell his labour, he sold himself … the extension [of wage labour] to the skilled worker was regarded by him as a symbol of a deeper change” [Norman Ware, The Industrial Worker, 1840–1860, p. xiv]). Indeed, one group of workers argued that they were “slaves in the strictest sense of the word” as they had “to toil from the rising of the sun to the going down of the same for our masters — aye, masters, and for our daily bread” [Quoted by Ware, Op. Cit., p. 42] and another argued that “the factory system contains in itself the elements of slavery, we think no sound reasoning can deny, and ev-
long centuries been held in the grasp of one set of oppressors by right of conquest or right of discovery; and it is now held by another, through the right of purchase from them. All of man’s natural possessions… have been claimed as property; nor has man himself escaped the insatiate jaws of greed. The invasion of his rights and possessions has resulted… in clothing property with a power to accumulate an income.” [quoted by James Martin, Men Against the State, p. 142]

8.6 How did working people view the rise of capitalism?

The best example of how hated capitalism was can be seen by the rise and spread of the socialist movement, in all its many forms, across the world. It is no coincidence that the development of capitalism also saw the rise of socialist theories. However, in order to fully understand how different capitalism was from previous economic systems, we will consider early capitalism in the US, which for many “Libertarians” is the example of the “capitalism-equals-freedom” argument.

Early America was pervaded by artisan production — individual ownership of the means of production. Unlike capitalism, this system is not marked by the separation of the worker from the means of life. Most people did not have to work for another, and so did not. As Jeremy Brecher notes, in 1831 the “great majority of Americans were farmers working their own land, primarily for their own needs. Most of the rest were self-employed artisans, merchants, traders, and professionals. Other classes — employees and industrialists in the North, slaves and planters in the South — were relatively small. The great majority of Americans were independent and free from anybody’s command.” [Strike!, p. xxi] These conditions created the high cost of combined (wage) labour which ensured the practice of slavery existed.

Of course it will be argued that the Supreme Court is a monopoly and so our analysis is flawed. In “anarcho”-capitalism there is no monopoly. But the corporate laws came about because there was a demand for them. That demand would still have existed in “anarcho”-capitalism. Now, while there may be no Supreme Court, Rothbard does maintain that “the basic Law Code would have to be agreed upon by all the judicial agencies” but he maintains that this “would imply no unified legal system”! Even though “[a]ny agencies that transgressed the basic libertarian law code would be open outlaws” and soon crushed this is not, apparently, a monopoly. [The Ethics of Liberty, p. 234] So, you either agree to the law code or you go out of business. And that is not a monopoly! Therefore, we think, our comments on the Supreme Court decision are valid.

If all the available defence firms enforce the same laws, then it can hardly be called “competitive”! And if this is the case (and it
is) “when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing 'companies.”’ [Weick, Op. Cit., p. 225]

This is particularly true if these companies are themselves Big Business and so have a large impact on the laws they are enforcing. If the law code recognises and protects capitalist power, property and wealth as fundamental any attempt to change this is “initiation of force” and so the power of the rich is written into the system from the start!

(And, we must add, if there is a general libertarian law code to which all must subscribe, where does that put customer demand? If people demand a non-libertarian law code, will defence firms refuse to supply it? If so, will not new firms, looking for profit, spring up that will supply what is being demanded? And will that not put them in direct conflict with the existing, pro-general law code ones? And will a market in law codes not just reflect economic power and wealth? David Friedman, who is for a market in law codes, argues that “[i]f almost everyone believes strongly that heroin addiction is so horrible that it should not be permitted anywhere under any circumstances anarcho-capitalist institutions will produce laws against heroin. Laws are being produced on the market, and that is what the market wants.” And he adds that “market demands are in dollars, not votes. The legality of heroin will be determined, not by how many are for or against but how high a cost each side is willing to bear in order to get its way.” [The Machinery of Freedom, p. 127] And, as the market is less than equal in terms of income and wealth, such a position will mean that the capitalist class will have a higher effective demand than the working class, and more resources to pay for any conflicts that arise. Thus any law codes that develop will tend to reflect the interests of the wealthy.)

Which brings us nicely on to the next problem regarding market forces.

5606

... [R]ising debts and taxes forced midwestern family farmers to compete as commodity producers in order to maintain their landholding ... The transformation ... was the central precondition for the development of industrial capitalism in the United States.” [Charlie Post, Ibid., p. 226]

In addition to seizing the land and distributing it in such a way as to benefit capitalist industry, the “government played its part in helping the bankers and hurting the farmers; it kept the amount of money — based in the gold supply — steady while the population rose, so there was less and less money in circulation. The farmer had to pay off his debts in dollars that were harder to get. The bankers, getting loans back, were getting dollars worth more than when they loaned them out — a kind of interest on top of interest. That was why farmers’ movements [like the Individualist Anarchists, we must add] ... [talked about] putting more money in circulation.” [Howard Zinn, Op. Cit., p. 278]

Overall, therefore, state action ensured the transformation of America from a society of independent workers to a capitalist one. By creating and enforcing the “land monopoly” (of which state ownership of unoccupied land and its enforcement of landlord rights were the most important) the state ensured that the balance of class forces tipped in favour of the capitalist class. By removing the option of farming your own land, the US government created its own form of enclosure and the creation of a landless workforce with little option but to sell its liberty on the “free market”. This, combined with protectionism, ensured the transformation of American society from a pre-capitalist one into a capitalist one. They was nothing “natural” about it.

Little wonder the Individualist Anarchist J.K. Ingalls attacked the “land monopoly” in the following words:

“The earth, with its vast resources of mineral wealth, its spontaneous productions and its fertile soil, the free gift of God and the common patrimony of mankind, has for
This change in the appropriation of land had significant effects on agriculture and the desirability of taking up farming for immigrants. As Post notes, "[w]hen the social conditions for obtaining and maintaining possession of land change, as they did in the mid-west between 1830 and 1840, pursuing the goal of preserving [family ownership and control] ... produced very different results. In order to pay growing mortgages, debts and taxes, family farmers were compelled to specialise production toward cash crops and to market more and more of their output." [Op. Cit., p. 221–2]

So, in order to pay for land which was formerly free, farmers got themselves into debt and increasingly turned to the market to pay it off. Thus, the "Federal land system, by transforming land into a commodity and stimulating land speculation, made the midwestern farmers dependent upon markets for the continual possession of their farms." [Charlie Post, Op. Cit., p. 223] Once on the market, farmers had to invest in new machinery and this also got them into debt. In the face of a bad harvest or market glut, they could not repay their loans and their farms had to be sold to do so. By 1880, 25% of all farms were rented by tenants, and the numbers kept rising.

This means that Murray Rothbard’s comment that "once the land was purchased by the settler, the injustice disappeared" is nonsense — the injustice was transmitted to other parts of society and this, along with the legacy of the original injustice, lived on and helped transform society towards capitalism [The Ethics of Liberty, p. 73]. In addition, his comments about "the establishment in North America of a truly libertarian land system" would be one the Individualist Anarchists would have seriously disagreed with! [Ibid.]

Thus state action, in restricting free access to the land, ensured that workers were dependent on wage labour. In addition, the "transformation of social property relations in northern agriculture set the stage for the 'agricultural revolution' of the 1840s and 1850s..." As well as the obvious influence of economic interests and differences in wealth, another problem faces the "free market" justice of "anarcho"-capitalism. This is the "general libertarian law code" itself. Even if we assume that the system actually works like it should in theory, the simple fact remains that these "defence companies" are enforcing laws which explicitly defend capitalist property (and so social relations). Capitalists own the means of production upon which they hire wage-labourers to work and this is an inequality established prior to any specific transaction in the labour market. This inequality reflects itself in terms of differences in power within (and outside) the company and in the "law code" of "anarcho"-capitalism which protects that power against the dispossessed.

In other words, the law code within which the defence companies work assumes that capitalist property is legitimate and that force can legitimately be used to defend it. This means that, in effect, "anarcho"-capitalism is based on a monopoly of law, a monopoly which explicitly exists to defend the power and capital of the wealthy. The major difference is that the agencies used to protect that wealth will be in a weaker position to act independently of their pay-masters. Unlike the state, the "defence" firm is not remotely accountable to the general population and cannot be used to equalise even slightly the power relationships between worker and capitalist.

And, needless to say, it is very likely that the private police forces will give preferential treatment to their wealthier customers (what business does not?) and that the law code will reflect the interests of the wealthier sectors of society (particularly if "prosperous" judges administer that code) in reality, even if not in theory. Since, in capitalist practice, "the customer is always right," the best-paying customers will get their way in "anarcho"-capitalist society.

For example, in chapter 29 of The Machinery of Freedom, David Friedman presents an example of how a clash of different law codes could be resolved by a bargaining process (the law in
question is the death penalty). This process would involve one defence firm giving a sum of money to the other for them accepting the appropriate (anti/pro capital punishment) court. Friedman claims that "[a]s in any good trade, everyone gains" but this is obviously not true. Assuming the anti-capital punishment defence firm pays the pro one to accept an anti-capital punishment court, then, yes, both defence firms have made money and so are happy, so are the anti-capital punishment consumers but the pro-death penalty customers have only (perhaps) received a cut in their bills. Their desire to see criminals hanged (for whatever reason) has been ignored (if they were not in favour of the death penalty, they would not have subscribed to that company). Friedman claims that the deal, by allowing the anti-death penalty firm to cut its costs, will ensure that it "keep its customers and even get more" but this is just an assumption. It is just as likely to lose customers to a defence firm that refuses to compromise (and has the resources to back it up). Friedman’s assumption that lower costs will automatically win over people’s passions is unfounded. As is the assumption that both firms have equal resources and bargaining power. If the pro-capital punishment firm demands more than the anti can provide and has larger weaponry and troops, then the anti defence firm may have to agree to let the pro one have its way.

So, all in all, it is not clear that “everyone gains” — there may be a sizeable percentage of those involved who do not “gain” as their desire for capital punishment is traded away by those who claimed they would enforce it.

In other words, a system of competing law codes and privatised rights does not ensure that all consumers interests are meet. Given unequal resources within society, it is also clear that the “effective demand” of the parties involved to see their law codes enforced is drastically different. The wealthy head of a transnational corporation will have far more resources available to him to pay for his laws to be enforced than one of his employees on the assembly line. Moreover, as we argue in sections 3.1 and 10.2, the labour market “supply and demand” in the labour market (i.e. that the bargaining position on the labour market favoured employer over employee). Once this situation became the typical one (i.e. when the option of self-employment was effectively eliminated) a (protectionist based) “laissez-faire” approach could be adopted and state action used only to protect private property from the actions of the dispossessed.

So how was this transformation of land ownership achieved? Instead of allowing settlers to appropriate their own farms as was the case before the 1830s, the state stepped in once the army had cleared out the original users. Its first major role was to enforce legal rights of property on unused land. Land stolen from the Native Americans was sold at auction to the highest bidders, namely speculators, who then sold it on to farmers. This process started right "after the revolution, [when] huge sections of land were bought up by rich speculators" and their claims supported by the law [Howard Zinn, A People’s History of the United States, p. 125] Thus land which should have been free was sold to land-hungry farmers and the few enriched themselves at the expense of the many. Not only did this increase inequality within society, it also encouraged the development of wage labour — having to pay for land would have ensured that many immigrants remained on the East Coast until they had enough money. Thus a pool of people with little option but to sell their labour was increased due to state protection of unoccupied land. That the land usually ended up in the hands of farmers did not (could not) countermand the shift in class forces that this policy created.

This was also the essential role of the various “Homesteading Acts” and, in general, the “Federal land law in the 19th century provided for the sale of most of the public domain at public auction to the higher bidder … Actual settlers were forced to buy land from speculators, at prices considerably above the federal minimal price” (which few people could afford anyway) [Charlie Post, Op. Cit., p. 222]. Little wonder the Individualist Anarchists supported an “occupancy and use” system of land ownership as a key way of stopping capi-
cumstances facing the ruling class in the Americas were distinctly different than in the Old World and so the "land monopoly" took a different form there. In the Americas, enclosures were unimportant as customary land rights did not really exist. Here the problem was that (after the original users of the land were eliminated, of course) there were vast tracts of land available for people to use.

Unsurprisingly, there was a movement towards independent farming and this pushed up the price of labour, by reducing the supply. Capitalists found it difficult to find workers willing to work for them at wages low enough to provide them with sufficient profits. It was due the difficulty in finding cheap enough labour that capitalists in America turned to slavery. All things being equal, wage labour is more productive than slavery. But in early America all things were not equal. Having access to cheap (indeed, free) land meant that working people had a choice, and few desired to become wage slaves. Because of this, capitalists turned to slavery in the South and the "land monopoly" in the North and West.

This was because, in the words of Maurice Dobbs, it "became clear to those who wished to reproduce capitalist relations of production in the new country that the foundation-stone of their endeavour must be the restriction of land-ownership to a minority and the exclusion of the majority from [productive] property." [Studies in Capitalist Development, pp. 221–2] As one radical historian puts it, "[w]hen land is ‘free’ or ‘cheap’, as it was in different regions of the United States before the 1830s, there was no compulsion for farmers to introduce labour-saving technology. As a result, ‘independent household production’... hindered the development of capitalism... [by] allowing large portions of the population to escape wage labour." [Charlie Post, "The ‘Agricultural Revolution’ in the United States", pp. 216–228, Science and Society, vol. 61, no. 2, p. 221]

It was precisely this option (i.e. of independent production) that had to be destroyed in order for capitalist industry to develop. The state had to violate the holy laws of "supply and demand" by controlling the access to land in order to ensure the normal workings of is usually skewed in favour of capitalists. This means that workers have to compromise to get work and such compromises may involve agreeing to join a specific "defence" firm or not join one at all (just as workers are often forced to sign non-union contracts today in order to get work). In other words, a privatised law system is very likely to skew the enforcement of laws in line with the skewing of income and wealth in society. At the very least, unlike every other market, the customer is not guaranteed to get exactly what they demand simply because the product they "consume" is dependent on other within the same market to ensure its supply. The unique workings of the law/defence market are such as to deny customer choice (we will discuss other aspects of this unique market shortly).

Weick sums up by saying "any judicial system is going to exist in the context of economic institutions. If there are gross inequalities of power in the economic and social domains, one has to imagine society as strangely compartmentalised in order to believe that those inequalities will fail to reflect themselves in the judicial and legal domain, and that the economically powerful will be unable to manipulate the legal and judicial system to their advantage. To abstract from such influences of context, and then consider the merits of an abstract judicial system... is to follow a method that is not likely to take us far. This, by the way, is a criticism that applies...to any theory that relies on a rule of law to override the tendencies inherent in a given social and economic system" [Weick, Op. Cit., p. 225] (For a discussion of this problem as it would surface in attempts to protect the environment under "anarcho"-capitalism, see sections E.2 and E.3).

There is another reason why "market forces" will not stop abuse by the rich, or indeed stop the system from turning from private to public statism. This is due to the nature of the "defence" market (for a similar analysis of the "defence" market see Tyler Cowen’s "Law as a Public Good: The Economics of Anarchy" in Economics and Philosophy, no. 8 (1992), pp. 249–267 and "Rejoinder to David
Thirdly, it is often claimed that it was population growth, rather than enclosures, that caused the supply of wage workers. So was population growth more important that enclosures? Maurice Dobbs argues that “the centuries in which a proletariat was most rapidly recruited were apt to be those of slow rather than of rapid natural increase of population, and the paucity or plenitude of a labour reserve in different countries was not correlated with comparable difference in their rates of population-growth.” [Studies in Capitalist Development, p. 223] Moreover, the population argument ignores the question of whether the changes in society caused by enclosures and the rise of capitalism have an impact on the observed trends towards earlier marriage and larger families after 1750. Lazonick argues that “[t]here is reason to believe that they did.” [Op. Cit., p. 33] Also, of course, the use of child labour in the factories created an economic incentive to have more children, an incentive created by the developing capitalist system. Overall, Lazonick notes that “[t]o argue that population growth created the industrial labour supply is to ignore these momentous social transformations” associated with the rise of capitalism [Business Organisation and the Myth of the Market Economy, p. 273].

In other words, there is good reason to think that the enclosures, far from being some kind of socialist myth, in fact played a key role in the development of capitalism. As Lazonick himself notes, “Chambers misunderstood” “the argument concerning the ‘institutional creation’ of a proletarianised (i.e. landless) workforce. Indeed, Chamber’s own evidence and logic tend to support the Marxian [and anarchist!] argument, when it is properly understood.” [Op. Cit., p. 273]

8.5 What about the lack of enclosures in the Americas?

The enclosure movement was but one way of creating the “land monopoly” which ensured the creation of a working class. The cir-
excellent essay “Karl Marx and Enclosures in England” [Review of Radical Political Economy, no. 6, Summer, 1974] which can be found in his books Competitive Advantage on the Shop Floor and Business Organisation and the Myth of the Market Economy. There are three main claims against the socialist account of the enclosures. We will cover each in turn.

Firstly, it is often claimed that the enclosures drove the uprooted cottager and small peasant into industry. However, this was never claimed. It is correct that the agricultural revolution associated with the enclosures increased the demand for farm labour as claimed by Chambers and others. And this is the whole point — enclosures created a pool of dispossessed labourers who had to sell their time/liberty to survive. The "critical transformation was not the level of agricultural employment before and after enclosure but the changes in employment relations caused by the reorganisation of landholdings and the reallocation of access to land." [Competitive Advantage on the Shop Floor, p. 30] Thus the key feature of the enclosures was that it created a supply for farm labour, a supply that had no choice but to work for another. This would drive down wages and increase demand. Moreover, freed from the land, these workers could later move to the towns in search for better work.

Secondly, it is argued that the number of small farm owners increased, or at least did not greatly decline, and so the enclosure movement was unimportant. Again, this misses the point. Small farm owners can still employ wage workers (i.e. become capitalist farmers as opposed to "yeomen" — independent peasant proprietor). As Lazonick notes, "[i]t is true that after 1750 some petty proprietors continued to occupy and work their own land. But in a world of capitalist agriculture, the yeomanry no longer played an important role in determining the course of capitalist agriculture. As a social class that could influence the evolution of British economy society, the yeomanry had disappeared." [Op. Cit., p. 32] I buy are independent of the relationships that exist between competing companies. However, in the case of private states, this is not the case. If a specific "defence" company has bad relationships with other companies in the market then it is against my self-interest to subscribe to it. Why join a private state if its judgements are ignored by the others and it has to resort to violence to be heard? This, as well as being potentially dangerous, will also push up the prices I have to pay. Arbitration is one of the most important services a defence firm can offer its customers and its market share is based upon being able to settle interagency disputes without risk of war or uncertainty that the final outcome will not be accepted by all parties.

Therefore, the market set-up within the "anarcho"-capitalist "defence" market is such that private states have to co-operate with the others (or go out of business fast) and this means collusion can take place. In other words, a system of private states will have to agree to work together in order to provide the service of "law enforcement" to their customers and the result of such co-operation is to create a cartel. However, unlike cartels in other industries, the "defence" cartel will be a stable body simply because its members have to work with their competitors in order to survive.

Let us look at what would happen after such a cartel is formed in a specific area and a new "defence company" desired to enter the market. This new company will have to work with the members of the cartel in order to provide its services to its customers (note that "anarcho"-capitalists already assume that they will have to subscribe to the same law code). If the new defence firm tries to undercut the cartel's monopoly prices, the other companies would refuse to work with it. Having to face constant conflict or the possibility of conflict, seeing its decisions being ignored by other agencies and being uncertain what the results of a dispute would be, few would patronise the new "defence company." The new company's prices would go up and so face either folding or joining the cartel. Unlike
every other market, if a “defence company” does not have friendly, co-operative relations with other firms in the same industry then it will go out of business.

This means that the firms that are co-operating have but to agree not to deal with new firms which are attempting to undermine the cartel in order for them to fail. A “cartel busting” firm goes out of business in the same way an outlaw one does — the higher costs associated with having to solve all its conflicts by force, not arbitration, increases its production costs much higher than the competitors and the firm faces insurmountable difficulties selling its products at a profit (ignoring any drop of demand due to fears of conflict by actual and potential customers). Even if we assume that many people will happily join the new firm in spite of the dangers to protect themselves against the cartel and its taxation (i.e. monopoly profits), enough will remain members of the cartel (perhaps they will be fired if they change, perhaps they dislike change and think the extra money is worth peace, perhaps they fear that by joining the new company their peace will be disrupted or the outcomes of their problems with others too unsure to be worth it, perhaps they are shareholders and want to maintain their income) so that co-operation will still be needed and conflict unprofitable and dangerous (and as the cartel will have more resources than the new firm, it could usually hold out longer than the new firm could). In effect, breaking the cartel may take the form of an armed revolution — as it would with any state.

The forces that break up cartels and monopolies in other industries (such as free entry — although, of course the “defence” market will be subject to oligopolistic tendencies as any other and this will create barriers to entry, see section C.4) do not work here and so new firms have to co-operate or loose market share and/or profits. This means that “defence companies” will reap monopoly profits and, more importantly, have a monopoly of force over a given area.

Hence a monopoly of private states will develop in addition to the existing monopoly of law and this is a de facto monopoly of

E.P. Thompson) enclosure “was a plain enough case of class robbery, played according to the fair rules of property and law laid down by a parliament of property-owners and lawyers.” [The Making of the English Working Class, pp. 237–8]

The enclosures were one of the ways that the “land monopoly” was created. The land monopoly was used to refer to capitalist property rights and ownership of land by (among others) the Individualist Anarchists. Instead of an “occupancy and use” regime advocated by anarchists, the land monopoly allowed a few to bar the many from the land — so creating a class of people with nothing to sell but their labour. While this monopoly is less important these days in developed nations (few people know how to farm) it was essential as a means of consolidating capitalism. Given the choice, most people preferred to become independent farmers rather than wage workers (see next section).

However, the importance of the enclosure movement is downplayed by supporters of capitalism. Little wonder, for it is something of an embarrassment for them to acknowledge that the creation of capitalism was somewhat less than “immaculate” — after all, capitalism is portrayed as an almost ideal society of freedom. To find out that an idol has feet of clay and that we are still living with the impact of its origins is something pro-capitalists must deny. So is the enclosures a socialist myth? Most claims that it is flow from the work of the historian J.D. Chambers’ famous essay “Enclosures and the Labour Supply in the Industrial Revolution.” [Economic History Review, 2nd series, no. 5, August 1953] In this essay, Chambers attempts to refute Karl Marx’s account of the enclosures and the role it played in what Marx called “primitive accumulation.”

We cannot be expected to provide an extensive account of the debate that has raged over this issue. All we can do is provide a summary of the work of William Lazonick who presented an excellent reply to those who claim that the enclosures were an unimportant historical event. We are drawing upon his summary of his
is as grim a joke as to speak of the natural death of soldiers slaughtered on a battlefield.” [Op. Cit., p. 189]

Like the more recent case of fascist Chile, “free market” capitalism was imposed on the majority of society by an elite using the authoritarian state. This was recognised by Adam Smith when he opposed state intervention in The Wealth of Nations. In Smith’s day, the government was openly and unashamedly an instrument of wealth owners. Less than 10 per cent of British men (and no women) had the right to vote. When Smith opposed state interference, he was opposing the imposition of wealth owners’ interests on everybody else (and, of course, how “liberal”, nevermind “libertarian”, is a political system in which the many follow the rules and laws set-down in the so-called interests of all by the few? As history shows, any minority given, or who take, such power will abuse it in their own interests). Today, the situation is reversed, with neo-liberals and right libertarians opposing state interference in the economy (e.g. regulation of Big Business) so as to prevent the public from having even a minor impact on the power or interests of the elite.

The fact that “free market” capitalism always requires introduction by an authoritarian state should make all honest “Libertarians” ask: How “free” is the “free market”? And why, when it is introduced, do the rich get richer and the poor poorer? This was the case in Chile (see Section C.11). For the poverty associated with the rise of capitalism in England 200 years ago, E.P. Thompson’s The Making of the English Working Class provides a detailed discussion. Howard Zinn’s A People’s History of the United States describes the poverty associated with 19th-century US capitalism.

8.4 Aren’t the enclosures a socialist myth?

The short answer is no, they are not. While a lot of historical analysis has been spent in trying to deny the extent and impact of the enclosures, the simple fact is (in the words of noted historian force over a given area (i.e. some kind of public state run by share holders). New companies attempting to enter the “defence” industry will have to work with the existing cartel in order to provide the services it offers to its customers. The cartel is in a dominant position and new entries into the market either become part of it or fail. This is exactly the position with the state, with “private agencies” free to operate as long as they work to the state’s guidelines. As with the monopolist “general libertarian law code”, if you do not toe the line, you go out of business fast.

It is also likely that a multitude of cartels would develop, with a given cartel operating in a given locality. This is because law enforcement would be localised in given areas as most crime occurs where the criminal lives. Few criminals would live in New York and commit crimes in Portland. However, as defence companies have to co-operate to provide their services, so would the cartels. Few people live all their lives in one area and so firms from different cartels would come into contact, so forming a cartel of cartels.

A cartel of cartels may (perhaps) be less powerful than a local cartel, but it would still be required and for exactly the same reasons a local one is. Therefore “anarcho”-capitalism would, like “actually existing capitalism,” be marked by a series of public states covering given areas, co-ordinated by larger states at higher levels. Such a set up would parallel the United States in many ways except it would be run directly by wealthy shareholders without the sham of “democratic” elections. Moreover, as in the USA and other states there will still be a monopoly of rules and laws (the “general libertarian law code”).

Some “anarcho”-capitalists claim that this will not occur, but that the co-operation needed to provide the service of law enforcement will somehow not turn into collusion between companies. However, they are quick to argue that renegade “agencies” (for example, the so-called “Mafia problem” or those who reject judgements) will go out of business because of the higher costs associated with conflict and not arbitration. However, these higher costs...
are ensured because the firms in question do not co-operate with others. If other agencies boycott a firm but co-operate with all the others, then the boycotted firm will be at the same disadvantage — regardless of whether it is a cartel buster or a renegade.

The “anarcho”-capitalist is trying to have it both ways. If the punishment of non-conforming firms cannot occur, then “anarcho”-capitalism will turn into a war of all against all or, at the very least, the service of social peace and law enforcement cannot be provided. If firms cannot deter others from disrupting the social peace (one service the firm provides) then “anarcho”-capitalism is not stable and will not remain orderly as agencies develop which favour the interests of their own customers and enforce their own law codes at the expense of others. If collusion cannot occur (or is too costly) then neither can the punishment of non-conforming firms and “anarcho”-capitalism will prove to be unstable.

So, to sum up, the “defence” market of private states has powerful forces within it to turn it into a monopoly of force over a given area. From a privately chosen monopoly of force over a specific (privately owned) area, the market of private states will turn into a monopoly of force over a general area. This is due to the need for peaceful relations between companies, relations which are required for a firm to secure market share. The unique market forces that exist within this market ensure collusion and monopoly.

In other words, the system of private states will become a cartel and so a public state — unaccountable to all but its shareholders, a state of the wealthy, by the wealthy, for the wealthy. In other words, fascism.

6.4 Why are these “defence associations” states?

It is clear that “anarcho”-capitalist defence associations meet the criteria of statehood outlined in section B.2 (“Why are anarchists against the state”). They defend property and preserve authority relationships, they practice coercion, and are hierarchical relationships within society. The commons increased freedom for ordinary people and made them less willing to follow orders and accept wage labour. The reference to “Indians” is important, as the independence and freedom of Native Americans is well documented. The common feature of both cultures was communal ownership of the means of production and free access to it (usufruct). This is discussed further in section I.7 (Won’t Libertarian Socialism destroy individuality?)

As the early American economist Edward Wakefield noted in 1833, “where land is cheap and all are free, where every one who so pleases can easily obtain a piece of land for himself, not only is labour dear, as respects the labourer’s share of the product, but the difficulty is to obtain combined labour at any price.” [England and America, quoted by Jeremy Brecher and Tim Costello, Commonsense for Hard Times, p. 24]

The enclosure of the commons (in whatever form it took — see section 8.5 for the US equivalent) solved both problems — the high cost of labour, and the freedom and dignity of the worker. The enclosures perfectly illustrate the principle that capitalism requires a state to ensure that the majority of people do not have free access to any means of livelihood and so must sell themselves to capitalists in order to survive. There is no doubt that if the state had “left alone” the European peasantry, allowing them to continue their collective farming practices (“collective farming” because, as Kropotkin shows in Mutual Aid, the peasants not only shared the land but much of the farm labour as well), capitalism could not have taken hold (see Mutual Aid, pp. 184–189, for more on the European enclosures). As Kropotkin notes, “[i]nstances of commoners themselves dividing their lands were rare, everywhere the State coerced them to enforce the division, or simply favoured the private appropriation of their lands” by the nobles and wealthy. [Mutual Aid, p. 188]

Thus Kropotkin’s statement that “to speak of the natural death of the village community [or the commons] in virtue of economical law
bility, combined with enclosure, that meant people could not just work their own land.

In other words, the circumstances so created by enclosing the land and enforcing property rights to large estates ensured that capitalists did not have to point a gun at workers head to get them to work long hours in authoritarian, dehumanising conditions. In such circumstances, when the majority are dispossessed and face the threat of starvation, poverty, homelessness and so on, “initiation of force” is not required. But guns were required to enforce the system of private property that created the labour market in the first place, to enforce the enclosure of common land and protect the estates of the nobility and wealthy.

In addition to increasing the availability of land on the market, the enclosures also had the effect of destroying working-class independence. Through these Acts, innumerable peasants were excluded from access to their former means of livelihood, forcing them to migrate to the cities to seek work in the newly emerging factories of the budding capitalist class, who were thus provided with a ready source of cheap labour. The capitalists, of course, did not describe the results this way, but attempted to obfuscate the issue with their usual rhetoric about civilisation and progress. Thus John Bellers, a 17th-century supporter of enclosures, claimed that commons were “a hindrance to Industry, and ... Nurseries of Idle-ness and Insolence.” The “forests and great Commons make the Poor that are upon them too much like the indians.” [quoted by Thompson, Op. Cit., p. 163] Elsewhere Thompson argues that the commons “were now seen as a dangerous centre of indiscipline ... Ideology was added to self-interest. It became a matter of public-spirited pol-icy for gentlemen to remove cottagers from the commons, reduce his labourers to dependence ...” [The Making of the English Working Class, pp. 242–3]

The commons gave working-class people a degree of independence which allowed them to be “insolent” to their betters. This had to be stopped, as it undermined to the very roots of author-

5666 institutions which govern those under them on behalf of a “ruling elite,” i.e. those who employ both the governing forces and those they govern. Thus, from an anarchist perspective, these “defence associations” as most definitely states.

What is interesting, however, is that by their own definitions a very good case can be made that these “defence associations” as states in the “anarcho”-capitalist sense too. Capitalist apologists usually define a “government” (or state) as those who have a monopoly of force and coercion within a given area. Relative to the rest of the society, these defence associations would have a monopoly of force and coercion of a given piece of property; thus, by the “anarcho”-capitalists’ own definition of statehood, these associations would qualify!

If we look at Rothbard’s definition of statehood, which requires (a) the power to tax and/or (b) a “coerced monopoly of the provision of defence over a given area”, “anarcho”-capitalism runs into trouble.

In the first place, the costs of hiring defence associations will be deducted from the wealth created by those who use, but do not own, the property of capitalists and landlords. Let not forget that a capitalist will only employ a worker or rent out land and housing if they make a profit from so doing. Without the labour of the worker, there would be nothing to sell and no wages to pay for rent. Thus a company’s or landlord’s “defence” firm will be paid from the revenue gathered from the capitalists power to extract a tribute from those who use, but do not own, a property. In other words, workers would pay for the agencies that enforce their employers’ authority over them via the wage system and rent — taxation in a more insidious form.

In the second, under capitalism most people spend a large part of their day on other people’s property — that is, they work for capitalists and/or live in rented accommodation. Hence if property owners select a “defence association” to protect their factories, farms, rental housing, etc., their employees and tenants will view it as a “coerced monopoly of the provision of defence over a given
area.” For certainly the employees and tenants will not be able to hire their own defence companies to expropriate the capitalists and landlords. So, from the standpoint of the employees and tenants, the owners do have a monopoly of “defence” over the areas in question. Of course, the “anarcho”-capitalist will argue that the tenants and workers “consent” to all the rules and conditions of a contract when they sign it and so the property owner’s monopoly is not “coerced.” However, the “consent” argument is so weak in conditions of inequality as to be useless (see sections 2.4 and 3.1, for example) and, moreover, it can and has been used to justify the state. In other words, “consent” in and of itself does not ensure that a given regime is not statist (see section 2.3 for more on this). So an argument along these lines is deeply flawed and can be used to justify regimes which are little better than “industrial feudalism” (such as, as indicated in section B.4, company towns, for example — an institution which right-libertarianism has no problem with). Even the “general libertarian law code,” could be considered a “monopoly of government over a particular area,” particularly if ordinary people have no real means of affecting the law code, either because it is market-driven and so is money-determined, or because it will be “natural” law and so unchangeable by mere mortals.

In other words, if the state “arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area” [Rothbard, The Ethics of Liberty, p. 170] then its pretty clear that the property owner shares this power. The owner is, after all, the “ultimate decision-making power” in their workplace or on their land. If the boss takes a dislike to you (for example, you do not follow their orders) then you get fired. If you cannot get a job or rent the land without agreeing to certain conditions (such as not joining a union or subscribing to the “defence firm” approved by your employer) then you either sign the contract or look for something else. Of course Rothbard fails to note that bosses have this monopoly of power and is instead referring to “prohibiting the voluntary purchase and sale of defence and judicial services.” [Op. Cit.,

This places those with capital at an advantage, which will tend to increase, rather than decrease, the inequalities in society (and so place the landless workers at an increasing disadvantage over time). This process can be seen from early stages of capitalism. With the enclosure of the land, an agricultural workforce was created which had to travel where the work was. This influx of landless ex-peasants into the towns ensured that the traditional guild system crumbled and was transformed into capitalistic industry with bosses and wage slaves rather than master craftsmen and their journeymen. Hence the enclosure of land played a key role, for “it is clear that economic inequalities are unlikely to create a division of society into an employing master class and a subject wage-earning class, unless access to the mans of production, including land, is by some means or another barred to a substantial section of the community.” [Maurice Dobbs, Studies in Capitalist Development, p. 253]

The importance of access to land is summarised by this limerick by the followers of Henry George (a 19th century writer who argued for a “single tax” and the nationalisation of land). The Georgites got their basic argument on the importance of land down these few, excellent lines:

A college economist planned
To live without access to land
He would have succeeded
But found that he needed
Food, shelter and somewhere to stand.

Thus the Individualist (and other) anarchists’ concern over the “land monopoly” of which the Enclosure Acts were but one part. The land monopoly, to use Tucker’s words, “consists in the enforcement by government of land titles which do not rest upon personal occupancy and cultivation.” [The Anarchist Reader, p. 150] It is important to remember that wage labour first developed on the land and it was the protection of land titles of landlords and no-
— to interfere with the authority of bosses. That this is just the
defence of privilege and power (and not freedom) has been discussed
in section B and elsewhere in this appendix, so we will not repeat
ourselves here.

Samuel Johnson once observed that “we hear the loudest yelps
for liberty among the drivers of Negroes.” Our modern “libertarian”
capitalist drivers of wage-slaves are yelping for exactly the same
kind of “liberty.” [Johnson quoted in Noam Chomsky, *Year 501*, p. 141]

8.3 What other forms did state intervention in
creating capitalism take?

Beyond being a paymaster for new forms of production and
social relations and defending the owners’ power, the state inter-
vened economically in other ways as well. As we noted in section
B.2.5, the state played a key role in transforming the law codes of
society in a capitalistic fashion, ignoring custom and common law
to do so. Similarly, the use of tariffs and the granting of monopolies
to companies played an important role in accumulating capital at
the expense of working people, as did the breaking of unions and
strikes by force.

However, one of the most blatant of these acts was the enclosure
of common land. In Britain, by means of the Enclosure Acts, land
that had been freely used by poor peasants for farming their small
family plots was claimed by large landlords as private property. As
E.P. Thompson notes, “Parliament and law imposed capitalistic defini-
tions to exclusive property in land” [*Customs in Common*, p. 163].
Property rights, which exclusively favoured the rich, replaced the
use rights and free agreement that had governed peasant’s use of
the commons. Unlike use rights, which rest in the individual, prop-
erty rights require state intervention to create and maintain.

This stealing of the land should not be under estimated. With-
out land, you cannot live and have to sell your liberty to others.

But just as surely as the law of contract allows the banning of
unions from a property, it can just as surely ban the sale
and purchase of defence and judicial services (it could be argued
that market forces will stop this happening, but this is unlikely as
bosses usually have the advantage on the labour market and work-
ers have to compromise to get a job — see section 10.2 on why this
is the case). After all, in the company towns, only company money
was legal tender and company police the only law enforcers.

Therefore, it is obvious that the “anarcho”-capitalist system
meets the Weberian criteria of a monopoly to enforce certain
rules in a given area of land. The “general libertarian law code” is
a monopoly and property owners determine the rules that apply
to their property. Moreover, if the rules that property owners
enforce are subject to rules contained in the monopolistic “general
libertarian law code” (for example, that they cannot ban the sale
and purchase of certain products — such as defence — on their
own territory) then “anarcho”-capitalism definitely meets the
Weberian definition of the state (as described by Ayn Rand as
an institution “that holds the exclusive power to enforce certain
rules of conduct in a given geographical area” [*Capitalism: The
Unknown Ideal*, p. 239]) as its “law code” overrides the desires
of property owners to do what they like on their own property.

Therefore, no matter how you look at it, “anarcho”-capitalism
and its “defence” market promotes a “monopoly of ultimate decision
making power” over a “given territorial area”. It is obvious that for
anarchists, the “anarcho”-capitalist system is a state system. As, as
we note, a reasonable case can be made for it also being a state in
“anarcho”-capitalist theory as well.

So, in effect, “anarcho”-capitalism has a different sort of state,
one in which bosses hire and fire the policeman. As Peter Sabatini
notes [in *Libertarianism: Bogus Anarchy*], “within Libertarian-
ism, Rothbard represents a minority perspective that actually argues
for the total elimination of the state. However Rothbard’s claim as an
anarchist is quickly voided when it is shown that he only wants an
end to the public state. In its place he allows countless private states, with each person supplying their own police force, army, and law, or else purchasing these services from capitalist vendors... Rothbard sees nothing at all wrong with the amassing of wealth, therefore those with more capital will inevitably have greater coercive force at their disposal, just as they do now.”

Far from wanting to abolish the state, then, “anarcho”-capitalists only desire to privatise it — to make it solely accountable to capitalist wealth. Their “companies” perform the same services as the state, for the same people, in the same manner. However, there is one slight difference. Property owners would be able to select between competing companies for their “services.” Because such “companies” are employed by the boss, they would be used to reinforce the totalitarian nature of capitalist firms by ensuring that the police and the law they enforce are not even slightly accountable to ordinary people.

Looking beyond the “defence association” to the defence market itself (as we argued in the last section), this will become a cartel and so become some kind of public state. The very nature of the private state, its need to co-operate with others in the same industry, push it towards a monopoly network of firms and so a monopoly of force over a given area. Given the assumptions used to defend “anarcho”-capitalism, its system of private statism will develop into public statism — a state run by managers accountable only to the share-holding elite.

To quote Peter Marshall again, the “anarcho”-capitalists “claim that all would benefit from a free exchange on the market, it is by no means certain; any unfettered market system would most likely sponsor a reversion to an unequal society with defence associations perpetuating exploitation and privilege.” [Demanding the Impossible, p. 565] History, and current practice, prove this point.

In short, “anarcho”-capitalists are not anarchists at all, they are just capitalists who desire to see private states develop — states which are strictly accountable to their paymasters without even imagery that makes capitalism a system more committed to freedom, or even ordinary civil liberties, than it was historically” [From Urbanisation to Cities, p. 180f]. Takis Fotopoules, in his essay “The Nation-state and the Market”, indicates that the social forces at work in “freeing” the market did not represent a “natural” evolution towards freedom:

“Contrary to what liberals and Marxists assert, marketisation of the economy was not just an evolutionary process, following the expansion of trade under mercantilism ... modern [i.e. capitalist] markets did not evolve out of local markets and/or markets for foreign goods ... the nation-state, which was just emerging at the end of the Middle Ages, played a crucial role creating the conditions for the ‘nationalisation’ of the market ... and ... by freeing the market [i.e. the rich and proto-capitalists] from effective social control.” [Society and Nature, Vol. 3, pp. 44–45]

The “freeing” of the market thus means freeing those who “own” most of the market (i.e. the wealthy elite) from “effective social control,” but the rest of society was not as lucky. Peter Kropotkin makes a similar point in Modern Science and Anarchism, ”[w]hile giving the capitalist any degree of free scope to amass his wealth at the expense of the helpless labourers, the government has nowhere and never ... afforded the labourers the opportunity 'to do as they pleased'.” [Kropotkin’s Revolutionary Pamphlets, p. 182]

The one essential form of support the “Libertarian” right wants the state (or “defence” firms) to provide capitalism is the enforcement of property rights — the right of property owners to “do as they like” on their own property, which can have obvious and extensive social impacts. What “libertarian” capitalists object to is attempts by others — workers, society as a whole, the state, etc.
Similar comments are applicable to American supporters of laissez faire who fail to notice that the “traditional” American support for world-wide free trade is quite a recent phenomenon. It started only at the end of the Second World War (although, of course, within America military Keynesian policies were utilised). While American industry was developing, the country had no time for laissez-faire. After it had grown strong, the United States began preaching laissez-faire to the rest of the world — and began to kid itself about its own history, believing its slogans about laissez-faire as the secret of its success. In addition to the tariff, nineteenth-century America went in heavily for industrial planning—occasionally under that name but more often in the name of national defence. The military was the excuse for what is today termed rebuilding infrastructure, picking winners, promoting research, and co-ordinating industrial growth (as it still is, we should add).

As Richard B. Du Boff points out, the “anti-state” backlash of the 1840s onwards in America was highly selective, as the general opinion was that “[h]enceforth, if governments wished to subsidise private business operations, there would be no objection. But if public power were to be used to control business actions or if the public sector were to undertake economic initiatives on its own, it would run up against the determined opposition of private capital.” [Accumulation and Power, p. 26] In other words, the state could aid capitalists indirectly (via tariffs, land policy, repression of the labour movement, infrastructure subsidy and so on) and it would “leave them alone” to oppress and exploit workers, exploit consumers, build their industrial empires and so forth.

So, the expression “laissez-faire” dates from the period when capitalists were objecting to the restrictions that helped create them in the first place. It has little to do with freedom as such and far more to do with the needs of capitalist power and profits (as Murray Bookchin argues, it is an error to depict this “revolutionary era and its democratic aspirations as ‘bourgeois,’ an

the sham of democracy we have today. Hence a far better name for “anarcho”-capitalism would be “private-state” capitalism. At least that way we get a fairer idea of what they are trying to sell us. As Bob Black writes in The Libertarian as Conservative, “To my mind a right-wing anarchist is just a minarchist who’d abolish the state to his own satisfaction by calling it something else…. They don’t denounce what the state does, they just object to who’s doing it.”

6.5 What other effects would “free market” justice have?

Such a system would be dangerous simply because of the power it places in the hands of companies. As Michael Taylor notes, “whether the [protection] market is competitive or not, it must be remembered that the product is a peculiar one: when we buy cars or shoes or telephone services we do not give the firm power based on force, but armed protection agencies, like the state, make customers (their own and others’) vulnerable, and having given them power we cannot be sure that they will use it only for our protection.” [Community, Anarchy and Liberty, p. 65]

As we argued above, there are many reasons to believe that a “protection” market will place most of society (bar the wealthy elite) in a “vulnerable” position. One such reason is the assumptions of the “anarcho”-capitalists themselves. As they note, capitalism is marked by an extreme division of labour. Instead of everyone having all the skills they need, these skills are distributed throughout society and all (so it is claimed) benefit.

This applies equally to the “defence” market. People subscribe to a “defence firm” because they either cannot or do not want the labour of having to protect their own property and person. The skills of defence, therefore, are concentrated in these companies and so these firms will have an advantage in terms of experience and mental state (they are trained to fight) as well as, as seems likely, weaponry. This means that most normal people will be
somewhat at a disadvantage if a cartel of defence firms decides to act coercively. The division of labour society will discourage the spread of skills required for sustained warfare throughout society and, perhaps, ensure that customers remain "vulnerable." The price of liberty may be eternal vigilance, but are most people willing to include eternal preparation of war as well? For modern society, the answer seems to be no, they prefer to let others do that (namely the state and its armed forces). And, we should note, an armed society may be a polite one, but its politeness comes from fear, not mutual respect and so totally phoney and soul destroying.

If we look at inequality within society, this may produce a ghettosisation effect within “anarcho”-capitalism. As David Friedman notes, conflict between defence firms is bad for business. Conflict costs money both in terms of weaponry used and increased (“danger money”) wages. For this reason he thinks that peaceful cooperation will exist between firms. However, if we look at poor areas with high crime rates then its clear that such an area will be a dangerous place. In other words, it is very likely to be high in conflict. But conflict increases costs, and so prices. Does this mean that those areas which need police most will also have the highest prices for law enforcement? That is the case with insurance now, so perhaps we will see whole areas turning into Hobbesian anarchy simply because the high costs associated with dangerous areas will make the effective demand for their services approach zero.

In a system based on “private statism,” police and justice would be determined by “free market” forces. As indicated in section B.4.1, right-libertarians maintain that one would have few rights on other peoples’ property, and so the owner’s will would be the law (possibly restricted somewhat by a “general libertarian law code”, perhaps not — see last section). In this situation, those who could not afford police protection would become victims of roving bandits and rampant crime, resulting in a society where the wealthy are securely protected in their bastions by their own armed forces, with

of the English Working Class, p. 90]. Capitalists simply wanted capitalist states to replace monarchical states, so that heads of government would follow state economic policies regarded by capitalists as beneficial to their class as a whole. And as development economist Lance Taylor argues:

“In the long run, there are no laissez-faire transitions to modern economic growth. The state has always intervened to create a capitalist class, and then it has to regulate the capitalist class, and then the state has to worry about being taken over by the capitalist class, but the state has always been there.” [quoted by Noam Chomsky, Year 501, p. 104]

In order to attack mercantilism, the early capitalists had to ignore the successful impact of its policies in developing industry and a “store of wealth” for future economic activity. As William Lazonick points out, “the political purpose of [Adam Smith’s] the Wealth of Nations was to attack the mercantilist institutions that the British economy had built up over the previous two hundred years... In his attack on these institutions, Smith might have asked why the extent of the world market available to Britain in the late eighteenth century was so uniquely under British control. If Smith had asked this 'big question,' he might have been forced to grant credit for [it]... to the very mercantilist institutions he was attacking...” Moreover, he “might have recognised the integral relation between economic and political power in the rise of Britain to international dominance.” Overall, “[w]hat the British advocates of laissez-faire neglected to talk about was the role that a system of national power had played in creating conditions for Britain to embark on its dynamic development path... They did not bother to ask how Britain had attained th[e] position [of 'workshop of the world'], while they conveniently ignored the on going system of national power — the British Empire — that... continued to support Britain’s position.” [Business Organisation and the Myth of the Market Economy, p. 2, p. 3, p.5]
lutist state strove, in its own interest, to meet the demands of commerce, it still put on industry countless fetters which became gradually more and more oppressive ... [it] became an unbearable burden ... which paralysed all economic and social life." [Op. Cit., p. 119] All in all, mercantilism became more of a hindrance than a help and so had to be replaced. With the growth of economic and social power by the capitalist class, this replacement was made easier.

Errico Malatesta notes, "[t]he development of production, the vast expansion of commerce, the immeasurable power assumed by money ... have guaranteed this supremacy [of economic power over the political power] to the capitalist class which, no longer content with enjoying the support of the government, demanded that government arise from its own ranks. A government which owed its origin to the right of conquest ... though subject by existing circumstances to the capitalist class, went on maintaining a proud and contemptuous attitude towards its now wealthy former slaves, and had pretensions to independence of domination. That government was indeed the defender, the property owners' gendarme, but the kind of gendarmes who think they are somebody, and behave in an arrogant manner towards the people they have to escort and defend, when they don't rob or kill them at the next street corner; and the capitalist class got rid of it ... [and replaced it] by a government [and state] ... at all times under its control and specifically organised to defend that class against any possible demands by the disinherited." [Anarchy, pp. 19–20]

Malatesta here indicates the true meaning of "leave us alone," or "laissez-faire." The absolutist state (not "the state" per se) began to interfere with capitalists’ profit-making activities and authority, so they determined that it had to go — as happened, for example, in the English, French and American revolutions. However, in other ways, state intervention in society was encouraged and applauded by capitalists. "It is ironic that the main protagonists of the State, in its political and administrative authority, were the middle-class Utilitarians, on the other side of whose Statist banner were inscribed the doctrines of economic Laissez Faire" [E.P. Thompson, The Making

...
ural law” with right-libertarians, the authoritarian nature of which is discussed in section 11).

Therefore, in “anarcho”-capitalism you are free to follow the (capitalist) laws and to act within the limits of these laws. It is only within this context that you can experiment (if you can afford to). If you act outside these laws, then you will be subject to coercion. The amount of coercion required to prevent such actions depends on how willing people are to respect the laws. Hence it is not the case that an “anarcho”-capitalist society is particularly conducive to social experimentation and free evolution, as its advocates like to claim. Indeed, the opposite may be the case, as any capitalist system will have vast differences of wealth and power within it, thus ensuring that the ability to experiment is limited to those who can afford it. As Jonathan Wolff points out, the “image of people freely moving from one utopia to another until they find their heaven, ignores the thought that certain choices may be irreversible… This thought may lead to speculation about whether a law of evolution would apply to the plural utopias. Perhaps, in the long run, we may find the framework regulated by the law of survival of the economically most fit, and so we would expect to see a development not of diversity but of homogeneity. Those communities with great market power would eventually soak up all but the most resistant of those communities around them.” [Robert Nozick: Property, Justice and the Minimal State, p. 135]

And if the initial distribution of resources is similar to that already existing then the “economically most fit” will be capitalist (as argued in section 1.5.12, the capitalist market actively selects against co-operatives even though they are more productive). Given the head start provided by statism, it seems likely that explicitly capitalist utopia’s would remain the dominant type (particularly as the rights framework is such as to protect capitalist property rights). Moreover, we doubt that most “anarcho”-capitalists would embrace the ideology if it was more than likely that non-

Over all, as Paul Ormerod puts it, the “advice to follow pure free-market policies seems … to be contrary to the lessons of virtually the whole of economic history since the Industrial Revolution … every country which has moved into … strong sustained growth … has done so in outright violation of pure, free-market principles.” “The model of entrepreneurial activity in the product market, with judicious state support plus repression in the labour market, seems to be a good model of economic development.” [The Death of Economics, p. 63]

Thus the social forces at work creating capitalism was a combination of capitalist activity and state action. But without the support of the state, it is doubtful that capitalist activity would have been enough to generate the initial accumulation required to start the economic ball rolling. Hence the necessity of Mercantilism in Europe and its modified cousin of state aid, tariffs and “homestead acts” in America.

8.2 What was the social context of the statement “laissez-faire?”

The honeymoon of interests between the early capitalists and autocratic kings did not last long. “This selfsame monarchy, which for weighty reasons sought to further the aims of commercial capital and was… itself aided in its development by capital, grew at last into a crippling obstacle to any further development of European industry.” [Rudolf Rocker, Nationalism and Culture, p. 117]

This is the social context of the expression “laissez-faire” — a system which has outgrown the supports that protected it in its early stages of growth. Just as children eventually rebel against the protection and rules of their parents, so the capitalists rebelled against the over-bearing support of the absolutist state. Mercantilist policies favoured some industries and harmed the growth of industrial capitalism in others. The rules and regulations imposed upon those it did favour reduced the flexibility of capitalists to changing environments. As Rocker argues, “no matter how the abo-
all else a policy of protectionism, i.e. the use of government to stimulate the growth of native industry). Only once America was at the top of the economic pile did it renounce state intervention (just as Britain did, we must note).

This is not to suggest that government aid was limited to tariffs. The state played a key role in the development of industry and manufacturing. As John Zerzan notes, the “role of the State is tellingly reflected by the fact that the ‘armoury system’ now rivals the older ‘American system of manufactures’ term as the more accurate to describe the new system of production methods” developed in the early 1800s. [Elements of Refusal, p. 100] Moreover, the “lead in technological innovation [during the US Industrial Revolution] came in armaments where assured government orders justified high fixed-cost investments in special-pursue machinery and managerial personnel. Indeed, some of the pioneering effects occurred in government-owned armouries.” [William Lazonick, Competitive Advantage on the Shop Floor, p. 218] The government also “actively furthered this process [of “commercial revolution”] with public works in transportation and communication.” [Richard B. Du Boff, Op. Cit., p. 15]

In addition to this “physical” aid, “state government provided critical help, with devices like the chartered corporation” [Ibid.] and, as we noted in section B.2.5, changes in the legal system which favoured capitalist interests over the rest of society.

Interestingly, there was increasing inequality between 1840 and 1860 in the USA. This coincided with the victory of wage labour and industrial capitalism — the 1820s “constituted a watershed in U.S. life. By the end of that decade … industrialism assured its decisive American victory, by the end of the 1830s all of its cardinal features were definitely present.” [John Zerzan, Op. Cit., p. 99] This is unsurprising, for as we have argued many times, the capitalist market tends to increase, not reduce, inequalities between individuals and classes. Little wonder the Individualist Anarchists at the time denounced the way that property had been transformed into “a power [with which] to accumulate an income” (to use the words of J.K. Ingalls).
within a large part of society, the capitalists backed fascism in order to stop the evolutionary process within society.

The socialist economic historian Maurice Dobbs, after reviewing the private armies in 1920s and 1930s America made much the same point:

“When business policy takes the step of financing and arming a mass political movement to capture the machinery of government, to outlaw opposing forms of organisation and suppress hostile opinions we have merely a further and more logical stage beyond [private armies]” [Op, Cit., p. 357]

(Noted Austrian Economist Ludwig von Mises whose extreme free market liberal political and economic ideas inspired right-libertarianism in many ways had this to say about fascism: “It cannot be denied that Fascism and similar movements aiming at the establishment of dictatorships are full of the best intentions and that their intervention has, for the moment, saved European civilisation. The merit that Fascism has thereby won for itself will live eternally in history.” [Liberalism, p. 51])

This example illustrates the fact that capitalism per se is essentially authoritarian, because it is necessarily based on coercion and hierarchy, which explains why capitalists have resorted to the most extreme forms of authoritarianism — including totalitarian dictatorship — during crises that threatened the fundamental rules of the system itself. There is no reason to think that “anarcho”-capitalism would be any different. Since “anarcho”-capitalism, with its private states, does not actually want to get rid of hierarchical forms of authority, the need for one government to unify the enforcement activities of the various defence companies becomes apparent. In the end, that is what “anarcho”-capitalism recognises with its “general libertarian law code” (based either on market forces or “natural law”). Thus it ap-

This process of state aid in capitalist development was also seen in the United States of America. As Edward Herman points out, the “level of government involvement in business in the United States from the late eighteenth century to the present has followed a U-shaped pattern: There was extensive government intervention in the pre-Civil War period (major subsidies, joint ventures with active government participation and direct government production), then a quasi-laissez faire period between the Civil War and the end of the nineteenth century [a period marked by “the aggressive use of tariff protection” and state supported railway construction, a key factor in capitalist expansion in the USA], followed by a gradual upswing of government intervention in the twentieth century, which accelerated after 1930.” [Corporate Control, Corporate Power, p. 162]

Such intervention ensured that income was transferred from workers to capitalists. Under state protection, America industrialised by forcing the consumer to enrich the capitalists and increase their capital stock. “According to one study, of the tariff had been removed in the 1830s ‘about half the industrial sector of New England would have been bankrupted’ … the tariff became a near-permanent political institution representing government assistance to manufacturing. It kept price levels from being driven down by foreign competition and thereby shifted the distribution of income in favour of owners of industrial property to the disadvantage of workers and customers.” [Richard B. Du Boff, Accumulation and Power, p. 56]

This protection was essential, for as Du Boff notes, the “end of the European wars in 1814 … reopened the United States to a flood of British imports that drove many American competitors out of business. Large portions of the newly expanded manufacturing base were wiped out, bringing a decade of near-stagnation.” Unsurprisingly, the “era of protectionism began in 1816, with northern agitation for higher tariffs. .. “ [Op, Cit., p. 14, p. 55]

Combined with ready repression of the labour movement and government “homesteading” acts (see section 8.5), tariffs were the American equivalent of mercantilism (which, after all, was above
dependence caused by the possession of the majority of households of land caused the rising class of merchants to complain “that men who should work as wage-labourers cling to the soil, and in the naughtiness of their hearts prefer independence as squatters to employment by a master.” [R.H Tawney, cited by Allan Elgar in The Apostles of Greed, p. 12]

In addition, other forms of state aid ensured that capitalist firms got a head start, so ensuring their dominance over other forms of work (such as co-operatives). A major way of creating a pool of resources that could be used for investment was the use of mercantilist policies which used protectionist measures to enrich capitalists and landlords at the expense of consumers and their workers. For example, one of most common complaints of early capitalists was that workers could not turn up to work regularly. Once they had worked a few days, they disappeared as they had earned enough money to live on. With higher prices for food, caused by protectionist measures, workers had to work longer and harder and so became accustomed to factory labour. In addition, mercantilism allowed native industry to develop by barring foreign competition and so allowed industrialists to reap excess profits which they could then use to increase their investments. In the words of Marian-socialist economic historian Maurice Dobbs:

“In short, the Mercantile System was a system of State-regulated exploitation through trade which played a highly important rule in the adolescence of capitalist industry: it was essentially the economic policy of an age of primitive accumulation.” [Studies in Capitalism Development, p. 209]

As Rocker summarises, “when absolutism had victoriously overcome all opposition to national unification, but its furthering of mercantilism and economic monopoly it gave the whole social evolution a direction which could only lead to capitalism.” [Op. Cit., pp. 116–7]
and social demands and goals along with their opposition to the state. As such, anti-statism may be a necessary condition to be an anarchist, but not a sufficient one to count a specific individual or theory as anarchist.

Specifically, anarchists have turned their analysis onto private property noting that the hierarchical social relationships created by inequality of wealth (for example, wage labour) restricts individual freedom. This means that if we do seek “the maximum of individual liberty” then our analysis cannot be limited to just the state or government. Consequently, to limit anarchism as Hart does requires substantial rewriting of history, as can be seen from his account of William Godwin.

Hart tries to co-opt of William Godwin into the ranks of “anti-state” liberalism, arguing that he “defended individualism and the right to property.” [Op. Cit., p. 265] He, of course, quotes from Godwin to support his claim yet strangely truncates Godwin’s argument to exclude his conclusion that “[w]hen the laws of morality shall be clearly understood, their excellence universally apprehended, and themselves seen to be coincident with each man’s private advantage, the idea of property in this sense will remain, but no man will have the least desire, for purposes of ostentation or luxury, to possess more than his neighbours.” [An Enquiry into Political Justice, p. 199] In other words, personal property (possession) would still exist but not private property in the sense of capital or inequality of wealth.

This analysis is confirmed in book 8 of Godwin’s classic work entitled “On Property.” Needless to say, Hart fails to mention this analysis, unsurprising as it was later reprinted as a socialist pamphlet. Godwin thought that the “subject of property is the key-stone that completes the fabric of political justice.” Like Proudhon, Godwin subjects property as well as the state to an anarchist analysis. For Godwin, there were “three degrees” of property. The first is possession of things you need to live. The second is “the empire to which every man is entitled over the produce of his own industry.” The third
will see. That modern “capitalism” is, in effect, a kind of “corporate mercantilism,” with states providing the conditions that allow corporations to flourish (e.g. tax breaks, subsidies, bailouts, anti-labour laws, etc.) says more about the statist roots of capitalism than the ideologically correct definition of capitalism used by its supporters.

8.1 What social forces lay behind the rise of capitalism?

Capitalist society is a relatively recent development. As Murray Bookchin points out, for a “long era, perhaps spanning more than five centuries,” capitalism “coexisted with feudal and simple commodity relationships” in Europe. He argues that this period “simply cannot be treated as ‘transitional’ without reading back the present into the past.” [From Urbanisation to Cities, p. 179] In other words, capitalism was not an inevitable outcome of “history” or social evolution.

He goes on to note that capitalism existed “with growing significance in the mixed economy of the West from the fourteenth century up to the seventeenth” but that it “literally exploded into being in Europe, particularly England, during the eighteenth and especially nineteenth centuries.” [Op. Cit., p. 181] The question arises, what lay behind this “growing significance”? Did capitalism “explode” due to its inherently more efficient nature or where there other, non-economic, forces at work? As we will show, it was most definitely the later one — capitalism was born not from economic forces but from the political actions of the social elites which its usury enriched. Unlike artisan (simple commodity) production, wage labour generates inequalities and wealth for the few and so will be selected, protected and encouraged by those who control the state in their own economic and social interests.

The development of capitalism in Europe was favoured by two social elites, the rising capitalist class within the degenerating me-
equality and injustice. As Peter Marshall confirms, “Godwin’s economics, like his politics, are an extension of his ethics.” [Demanding the Impossible, p. 210]

Godwin’s theory of property is significant because it reflected what was to become standard nineteenth century socialist thought on the matter. In Britain, his ideas influenced Robert Owen and, as a result, the early socialist movement in that country. His analysis of property, as noted, predated Proudhon’s classic anarchist analysis. As such, to state, as Hart did, that Godwin simply “concluded that the state was an evil which had to be reduced in power if not eliminated completely” while not noting his analysis of property gives a radically false presentation of his ideas. [Hart, Op. Cit., p. 265] However, it does fit into his flawed assertion that anarchism is purely concerned with the state. Any evidence to the contrary is simply ignored.

7.1 Are competing governments anarchism?

No, of course not. Yet according to “anarcho”-capitalism, it is. This can be seen from the ideas of Gustave de Molinari.

Hart is on firmer ground when he argues that the 19th century French economist Gustave de Molinari is the true founder of “anarcho”-capitalism. With Molinari, he argues, “the two different currents of anarchist thought converged: he combined the political anarchism of Burke and Godwin with the nascent economic anarchism of Adam Smith and Say to create a new forms of anarchism” that has been called “anarcho-capitalism, or free market anarchism.” [Op. Cit., p. 269] Of course, Godwin (like other anarchists) did not limit his anarchism purely to “political” issues and so he discussed “economic anarchism” as well in his critique of private property (as Proudhon also did later). As such, to artificially split anarchism into political and economic spheres is both historically and logically flawed. While some dictionaries limit “anarchism” to opposition to the state, anarchists did and do not.

It appears that, for Rothbard, the collusion between state and business is the fault, not of capitalism, but of particular capitalists. The system is pure; only individuals are corrupt. But, for anarchists, the origins of the modern state-capitalist system lies not in the individual qualities of capitalists as such but in the dynamic and evolution of capitalism itself — a complex interaction of class interest, class struggle, social defence against the destructive actions of the market, individual qualities and so forth. In other words, Rothbard’s claims are flawed — they fail to understand capitalism as a system and its dynamic nature.

Indeed, if we look at the role of the state in creating capitalism we could be tempted to rename “anarcho”-capitalism “marxian-capitalism”. This is because, given the historical evidence, a political theory can be developed by which the “dictatorship of the bourgeoisie” is created and that this capitalist state “withers away” into anarchy. That this means rejecting the economic and social ideas of Marxism and their replacement by their direct opposite should not mean that we should reject the idea (after all, that is what “anarcho”-capitalism has done to Individualist Anarchism!). But we doubt that many “anarcho”-capitalists will accept such a name change (even though this would reflect their politics far better; after all they do not object to past initiations of force, just current ones and many do seem to think that the modern state will wither away due to market forces).

But this is beside the point. The fact remains that state action was required to create and maintain capitalism. Without state support it is doubtful that capitalism would have developed at all.

So, when the right suggests that “we” be “left alone,” what they mean by “we” comes into clear focus when we consider how capitalism developed. Artisans and peasants were only “left alone” to starve, and the working classes of industrial capitalism were only “left alone” outside work and for only as long as they respected the rules of their “betters.” As for the other side of the class divide, they desire to be “left alone” to exercise their power over others, as we
Needless to say, some right-libertarians recognise that the state played a massive role in encouraging industrialisation (more correct to say “proletarianisation” as it created a working class which did not own the tools they used, although we stress that this process started on the land and not in industry). So they contrast “bad” business people (who took state aid) and “good” ones. Thus Rothbard’s comment that Marxists have “made no particular distinction between ‘bourgeoisie’ who made use of the state, and bourgeoisie who acted on the free market.” [The Ethics of Liberty, p. 72]

But such an argument is nonsense as it ignores the fact that the “free market” is a network (and defined by the state by the property rights it enforces). For example, the owners of the American steel and other companies who grew rich and their companies big behind protectionist walls are obviously “bad” bourgeoisie. But are the bourgeoisie who supplied the steel companies with coal, machinery, food, “defence” and so on not also benefiting from state action? And the suppliers of the luxury goods to the wealthy steel company owners, did they not benefit from state action? Or the suppliers of commodities to the workers that laboured in the steel factories that the tariffs made possible, did they not benefit? And the suppliers to these suppliers? And the suppliers to these suppliers? Did not the users of technology first introduced into industry by companies protected by state orders also not benefit? Did not the capitalists who had a large and landless working class to select from benefit from the “land monopoly” even though they may not have, unlike other capitalists, directly advocated it? It increased the pool of wage labour for all capitalists and increased their bargaining position/power in the labour market at the expense of the working class. In other words, such a policy helped maintain capitalist market power, irrespective of whether individual capitalists encouraged politicians to vote to create/maintain it. And, similarly, all capitalists benefited from the changes in common law to recognise and protect capitalist private property and rights that the state enforced during the 19th century (see section B.2.5).

The key problem for Hart is that Molinari refused to call himself an anarchist. He did not even oppose government, as Hart himself notes Molinari proposed a system of insurance companies to provide defence of property and “called these insurance companies ‘governments’ even though they did not have a monopoly within a given geographical area.” As Hart notes, Molinari was the sole defender of such free-market justice at the time in France. [David M. Hart, “Gustave de Molinari and the Anti-statist Liberal Tradition: Part II”, pp. 399–434, Journal of Libertarian Studies, vol. V, no. 4, p. 415 and p. 411] Molinari was clear that he wanted “a regime of free government,” counterpoising “monopolist or communist governments” to “free governments.” This would lead to “freedom of government” rather than its abolition (not freedom from government). For Molinari the future would not bring “the suppression of the state which is the dream of the anarchists . . . It will bring the diffusion of the state within society. That is . . . a free state in a free society.”” [quoted by Hart, Op. Cit., p. 429, p. 411 and p. 422] As such, Molinari can hardly be considered an anarchist, even if “anarchist” is limited to purely being against government.

Moreover, in another sense Molinari was in favour of the state. As we discuss in section 6, these companies would have a monopoly within a given geographical area — they have to in order to enforce the property owner’s power over those who use, but do not own, the property in question. The key contradiction can be seen in Molinari’s advocating of company towns, privately owned communities (his term was a “proprietary company”). Instead of taxes, people would pay rent and the “administration of the community would be either left in the hands of the company itself or handled special organisations set up for this purpose.” Within such a regime “those with the most property had proportionally the greater say in matters which affected the community.” If the poor objected then they could simply leave. [Op. Cit., pp. 421–2 and p. 422]
Given this, the idea that Molinari was an anarchist in any form can be dismissed. His system was based on privatising government, not abolishing it (as he himself admitted). This would be different from the current system, of course, as landlords and capitalists would be hiring force directly to enforce their decisions rather than relying on a state which they control indirectly. This system, as we proved in section 6, would not be anarchist as can be seen from American history. There capitalists and landlords created their own private police forces and armies, which regularly attacked and murdered union organisers and strikers. As an example, there is Henry Ford’s Service Department (private police force):

“In 1932 a hunger march of the unemployed was planned to march up to the gates of the Ford plant at Dearborn... The machine guns of the Dearborn police and the Ford Motor Company’s Service Department killed [four] and wounded over a score of others... Ford was fundamentally and entirely opposed to trade unions. The idea of working men questioning his prerogatives as an owner was outrageous... The River Rouge plant... was dominated by the autocratic regime of Bennett’s service men. Bennett... organised and trained the three and a half thousand private policemen employed by Ford. His task was to maintain discipline amongst the work force, protect Ford’s property and power, and prevent unionisation... Frank Murphy, the mayor of Detroit, claimed that ‘Henry Ford employs some of the worst gangsters in our city.’ The claim was well based. Ford's Service Department policed the gates of his plants, infiltrated emergent groups of union activists, posed as workers to spy on men on the line... Under this tyranny the Ford worker had no security, no rights. So much so that any information about the state of things within the plant could only be so poor as to utterly mistaken; it is a ‘fairly tale,’ or it is a class theory used to justify the privileges of the upper classes.” [The State, pp. 5–6]

This thesis will be discussed in the following sections. It is, of course, ironic to hear right-wing libertarians sing the praises of a capitalism that never existed and urge its adoption by all nations, in spite of the historical evidence suggesting that only state intervention made capitalist economies viable — even in that Mecca of “free enterprise,” the United States. As Noam Chomsky argues, “who but a lunatic could have opposed the development of a textile industry in New England in the early nineteenth century, when British textile production was so much more efficient that half the New England industrial sector would have gone bankrupt without very high protective tariffs, thus terminating industrial development in the United States? Or the high tariffs that radically undermined economic efficiency to allow the United States to develop steel and other manufacturing capacities? Or the gross distortions of the market that created modern electronics?” [World Orders, Old and New, p. 168]. To claim, therefore, that “mercantilism” is not capitalism makes little sense. Without mercantilism, “proper” capitalism would never have developed, and any attempt to divorce a social system from its roots is ahistoric and makes a mockery of critical thought.

Similarly, it is somewhat ironic when “anarcho”-capitalists and right libertarians claim that they support the freedom of individuals to choose how to live. After all, the working class was not given that particular choice when capitalism was developing. Indeed, their right to choose their own way of life was constantly violated and denied. So to claim that now (after capitalism has been created) we get the chance to try and live as we like is insulting in the extreme. The available options we have are not independent of the society we live in and are decisively shaped by the past. To claim we are “free” to live as we like (within the laws of capitalism) is basically to argue that we are able to “buy” the freedom that every individual is due from those who have stolen it from us in the first place!
rial from abroad also enriched the European economy, giving the development of capitalism an added boost. Thus Kropotkin:

“The history of the genesis of capital has already been told by socialists many times. They have described how it was born of war and pillage, of slavery and serfdom, of modern fraud and exploitation. They have shown how it is nourished by the blood of the worker, and how little by little it has conquered the whole world.” [Op. Cit., p. 207]

Or, if Kropotkin seems too committed to be fair, we have John Stuart Mill’s statement that:

“The social arrangements of modern Europe commenced from a distribution of property which was the result, not of just partition, or acquisition by industry, but of conquest and violence...” [Principles of Political Economy, p. 15]

Therefore, when supporters of “libertarian” capitalism say they are against the “initiation of force,” they mean only new initiations of force; for the system they support was born from numerous initiations of force in the past. And, as can be seen from the history of the last 100 years, it also requires state intervention to keep it going (section D.1, “Why does state intervention occur?,” addresses this point in some detail). Indeed, many thinkers have argued that it was precisely this state support and coercion (particularly the separation of people from the land) that played the key role in allowing capitalism to develop rather than the theory that “previous savings” did so. As the noted German thinker Franz Oppenheimer argued, “the concept of a ‘primitive accumulation,’ or an original store of wealth, in land and in movable property, brought about by means of purely economic forces” while “seem[ing] quite plausible” is in

freely obtained from ex-Ford workers.” [Huw Beynon, Working for Ford, pp. 29–30]

The private police attacked women workers handing out pro-union handbills and gave them “a severe beating.” At Kansas and Dallas “similar beatings were handed out to the union men.” This use of private police to control the work force was not unique. General Motors “spent one million dollars on espionage, employing fourteen detective agencies and two hundred spies at one time [between 1933 and 1936]. The Pinkerton Detective Agency found anti-unionism its most lucrative activity.” [Op. Cit., p. 34 and p. 32] We must also note that the Pinkerton’s had been selling their private police services for decades before the 1930s. For over 60 years the Pinkerton Detective Agency had “specialised in providing spies, agent provocateurs, and private armed forces for employers combating labour organisations.” By 1892 it “had provided its services for management in seventy major labour disputes, and its 2 000 active agents and 30 000 reserves totalled more than the standing army of the nation.” [Jeremy Brecher, Strike!, p. 55] With this force available, little wonder unions found it so hard to survive in the USA.

Only an “anarcho”-capitalist would deny that this is a private government, employing private police to enforce private power. Given that unions could be considered as “defence” agencies for workers, this suggests a picture of how “anarcho”-capitalism may work in practice radically different from the pictures painted by its advocates. The reason is simple, it does not ignore inequality and subjects economics to an anarchist analysis. Little wonder, then, that Proudhon stressed that it “becomes necessary for the workers to form themselves into democratic societies, with equal conditions for all members, on pain of a relapse into feudalism.” Anarchism, in other words, would see “[c]apitalistic and proprietary exploitation stopped everywhere, the wage system abolished and so “the economic organisation [would] replace[s] the governmental and military system.” [The General Idea of the Revolution, p. 227 and p. 281]
Clearly, the idea that Proudhon shared the same political goal as Molinari is a joke. He would have dismissed such a system as little more than an updated form of feudalism in which the property owner is sovereign and the workers subjects (see section B.4 for more details).

Unsurprisingly, Molinari (unlike the individualist anarchists) attacked the jury system, arguing that its obliged people to "perform the duties of judges. This is pure communism." People would “judge according to the colour of their opinions, than according to justice.” [quoted by Hart, Op. Cit., p. 409] As the jury system used amateurs (i.e. ordinary people) rather than full-time professionals it could not be relied upon to defend the power and property rights of the rich. As we noted in section 1.4, Rothbard criticised the individualist anarchists for supporting juries for essentially the same reasons.

But, as is clear from Hart’s account, Molinari had little concern that working class people should have a say in their own lives beyond consuming goods. His perspective can be seen from his lament about those "colonies where slavery has been abolished without the compulsory labour being replaced with an equivalent quantity of free [sic!] labour [i.e., wage labour], there has occurred the opposite of what happens everyday before our eyes. Simple workers have been seen to exploit in their turn the industrial entrepreneurs, demanding from them wages which bear absolutely no relation to the legitimate share in the product which they ought to receive. The planters were unable to obtain for their sugar a sufficient price to cover the increase in wages, and were obliged to furnish the extra amount, at first out of their profits, and then out of their very capital. A considerable number of planters have been ruined as a result ... It is doubtless better that these accumulations of capital should be destroyed than that generations of men should perish [Marx: 'how generous of M. Molinari'] but would it not be better if both survived?" [quoted by Karl Marx, Capital, vol. 1, p. 937f]

perfected against unions to ensure that it does not gain a foothold in their domain (see section 6 for more details).

Clearly, then, a “right-wing” anarchism is impossible as any system based on capitalist property rights will simply be an oligarchy run by and for the wealthy. As Rothbard notes, any defence agency based on democratic principles will not survive in the “market” for defence simply because it does not allow the wealthy to control it and its decisions. Little wonder Proudhon argued that laissez-faire capitalism meant “the victory of the strong over the weak, of those who own property over those who own nothing.” [quoted by Peter Marshall, Demanding the Impossible, p. 259]

8 What role did the state take in the creation of capitalism?

If the “anarcho”-capitalist is to claim with any plausibility that “real” capitalism is non-statist or that it can exist without a state, it must be shown that capitalism evolved naturally, in opposition to state intervention. However, in reality, the opposite is the case. Capitalism was born from state intervention and, in the words of Kropotkin, "the State ... and capitalism ... developed side by side, mutually supporting and re-enforcing each other.” [Kropotkin's Revolutionary Pamphlets, p. 181]

Numerous writers have made this point. For example, in Karl Polanyi’s flawed masterpiece The Great Transformation we read that "the road to the free market was opened and kept open by an enormous increase in continuous, centrally organised and controlled interventionism” by the state [p. 140]. This intervention took many forms — for example, state support during “mercantilism,” which allowed the “manufactures” (i.e. industry) to survive and develop, enclosures of common land, and so forth. In addition, the slave trade, the invasion and brutal conquest of the Americas and other “primitive” nations, and the looting of gold, slaves, and raw mate-
firms which do not support their property rights, power, profits and definition of property rights, it is clear that agencies which favour the wealthy will survive on the market. The idea that market demand will counter this class rule seems unlikely, given Rothbard’s own argument. After all, in order to compete successfully you need more than demand, you need source of investment. If co-operative defence agencies do form, they will be at a market disadvantage due to lack of investment. As argued in section J.5.12, even though co-operatives are more efficient than capitalist firms lack of investment (caused by the lack of control by capitalists Rothbard notes) stops them replacing wage slavery. Thus capitalist wealth and power inhibits the spread of freedom in production. If we apply his own argument to Rothbard’s system, we suggest that the market in “defence” will also stop the spread of more libertarian associations thanks to capitalist power and wealth. In other words, like any market, Rothbard’s “defence” market will simply reflect the interests of the elite, not the masses.

Moreover, we can expect any democratic defence agency (like a union) to support, say, striking workers or squatting tenants, to be crushed. This is because, as Rothbard stresses, all “defence” firms would be expected to apply the “common” law, as written by “Libertarian lawyers and jurists.” If they did not they would quickly be labelled “outlaw” agencies and crushed by the others. Ironically, Tucker would join Bakunin and Kropotkin in an “anarchist” court accused to violating “anarchist” law by practising and advocating “occupancy and use” rather than the approved Rothbardian property rights. Even if these democratic “defence” agencies could survive and not be driven out of the market by a combination of lack of investment and violence due to their “outlaw” status, there is another problem. As we discussed in section 1, landlords and capitalists have a monopoly of decision making power over their property. As such, they can simply refuse to recognise any democratic agency as a legitimate defence association and use the same tactics to create “the product” without the whip and the branding iron to aid them! As Marx so rightly comments: ‘And what, if you please, is this “legitimate share”, which, according to [Molinari’s] own admission, the capitalist in Europe daily neglects to pay? Over yonder, in the colonies, where the workers are so “simple” as to “exploit” the capitalist, M. Molinari feels a powerful itch to use police methods to set on the right road that law of supply and demand which works automatically everywhere else.” [Op. Cit., p. 937f]

An added difficulty in arguing that Molinari was an anarchist is that he was a contemporary of Proudhon, the first self-declared anarchist, and lived in a country with a vigorous anarchist movement. Surely if he was really an anarchist, he would have proclaimed his kinship with Proudhon and joined in the wider movement. He did not, as Hart notes as regards Proudhon:

“their differences in economic theory were considerable, and it is probably for this reason that Molinari refused to call himself an anarchist in spite of their many similarities in political theory. Molinari refused to accept the socialist economic ideas of Proudhon ... in Molinari’s mind,
the term ‘anarchist’ was intimately linked with socialist and statist economic views.” [Op. Cit., p. 415]

Yet Proudhon’s economic views, like Godwin’s, flowed from his anarchist analysis and principles. They cannot be arbitrarily separated as Hart suggests. So while arguing that “Molinari was just as much an anarchist as Proudhon,” Hart forgets the key issue. Proudhon was aware that private property ensured that the proletarian did not exercise “self-government” during working hours, i.e. was not a self-governing individual. As for Hart claiming that Proudhon had “statist economic views” it simply shows how far an “anarcho”-capitalist perspective is from genuine anarchism. Proudhon’s economic analysis, his critique of private property and capitalism, flowed from his anarchism and was an integral aspect of it.

To restrict anarchism purely to opposition to the state, Hart is impoverishing anarchist theory and denying its history. Given that anarchism was born from a critique of private property as well as government, this shows the false nature of Hart’s claim that “Molinari was the first to develop a theory of free-market, proprietary anarchism that extended the laws of the market and a rigorous defence of property to its logical extreme.” [Op. Cit., p. 415 and p. 416] Hart shows how far from anarchism Molinari was as Proudhon had turned his anarchist analysis to property, showing that “defence of property” lead to the oppression of the many by the few in social relationships identical to those which mark the state. Moreover, Proudhon, argued the state would always be required to defend such social relations. Privatising it would hardly be a step forward.

Unsurprisingly, Proudhon dismissed the idea that the laissez faire capitalists shared his goals. “The school of Say,” Proudhon argued, was “the chief focus of counter-revolution next to the Jesuits” and “has for ten years past seemed to exist only to protect and applaud the execrable work of the monopolists of money and necessities, deepening more and more the obscurity of a science naturally difficult on the market, while joint-stock (i.e., corporate) defence agencies would become the prevailing market form.”

Notice how he assumes that both a co-operative and corporation would be “equal before the law.” But who determines that law? Obviously not a democratically elected government, as the idea of “one person, one vote” in determining the common law all are subject to is “inefficient.” Nor does he think, like the individualist anarchists, that the law would be judged by juries along with the facts. As we note in section 1.4, he rejects that in favour of it being determined by “Libertarian lawyers and jurists.” Thus the law is unchangeable by ordinary people and enforced by private defence agencies hired to protect the liberty and property of the owning class. In the case of a capitalist economy, this means defending the power of landlords and capitalists against rebel tenants and workers.

This means that Rothbard’s “common Law Code” will be determined, interpreted, enforced and amended by corporations based on the will of the majority of shareholders, i.e. the rich. That hardly seems likely to produce equality before the law. As he argues in a footnote:

“There is a strong a priori reason for believing that corporations will be superior to co-operatives in any given situation. For if each owner receives only one vote regardless of how much money he has invested in a project (and earnings are divided in the same way), there is no incentive to invest more than the next man; in fact, every incentive is the other way. This hampering of investment militates strongly against the co-operative form.”

So if the law is determined by the defence agencies and courts then it will be determined by those who have invested most in these companies. As it is unlikely that the rich will invest in defence
It is a shame that some academics consider only the word Rothbard uses as relevant rather than the content and its relation to anarchist theory and history. If they did, they would soon realise that the expressed opposition of so many anarchists to “anarcho”-capitalism is something which cannot be ignored or dismissed. In other words, a “right-wing” anarchist cannot and does not exist, no matter how often they use that word to describe their ideology. As Bob Black put it, “a right-wing anarchist is just a minarchist who’d abolish the state to his own satisfaction by calling it something else ... They don’t denounce what the state does, they just object to who’s doing it.” [Libertarian as Conservative]

The reason is simple. Anarchist economics and politics cannot be artificially separated, they are linked. Godwin and Proudhon did not stop their analysis at the state. They extended it to social relationships produced by inequality of wealth, i.e. economic power as well as political power. To see why, we need only consult Rothbard’s work. As noted in the last section, for Rothbard the key issue with the “voluntary taxationists” was not who determined the “body of absolute law” but rather who enforced it. In his discussion, he argued that a democratic “defence agency” is at a disadvantage in his “free market” system. As he put it:

“It would, in fact, be competing at a severe disadvantage, having been established on the principle of ‘democratic voting.’ Looked at as a market phenomenon, ‘democratic voting’ (one vote per person) is simply the method of the consumer ‘co-operative.’ Empirically, it has been demonstrated time and again that co-operatives cannot compete successfully against stock-owned companies, especially when both are equal before the law. There is no reason to believe that co-operatives for defence would be any more efficient. Hence, we may expect the old co-operative government to ‘wither away’ through loss of customers and full of complications.” Much the same can be said of “anarcho”-capitalists, incidentally. For Proudhon, “the disciples of Malthus and of Say, who oppose with all their might any intervention of the State in matters commercial or industrial, do not fail to avail themselves of this seemingly liberal attitude, and to show themselves more revolutionary than the Revolution. More than one honest searcher has been deceived thereby.” However, this apparent “anti-statist” attitude of supporters of capitalism is false as pure free market capitalism cannot solve the social question, which arises because of capitalism itself. As such, it was impossible to abolish the state under capitalism. Thus “this inaction of Power in economic matters was the foundation of government. What need should we have of a political organisation, if Power once permitted us to enjoy economic order?” Instead of capitalism, Proudhon advocated the “constitution of Value,” the “organisation of credit,” the elimination of interest, the “establishment of workingmen’s associations” and “the use of a just price.” [The General Idea of the Revolution, p. 225, p. 226 and p. 233]

Clearly, then, the claims that Molinari was an anarchist fail as he, unlike his followers, were aware of what anarchism actually stood for. Hart, in his own way, acknowledges this:

“In spite of his protestations to the contrary, Molinari should be considered an anarchist thinker. His attack on the state’s monopoly of defence must surely warrant the description of anarchism. His reluctance to accept this label stemmed from the fact that the socialists had used it first to describe a form of non-statist society which Molinari definitely opposed. Like many original thinkers, Molinari had to use the concepts developed by others to describe his theories. In his case, he had come to the same political conclusions as the communist anarchists although he had been working within the liberal tradition, and it is therefore not surprising that the terms used by the two schools were not compatible.
It would not be until the latter half of the twentieth century that radical, free-trade liberals would use the word ‘anarchist’ to describe their beliefs.” [Op. Cit., p. 416]

It should be noted that Proudhon was not a communist-anarchist, but the point remains. The aims of anarchism were recognised by Molinari as being inconsistent with his ideology. Consequently, he (rightly) refused the label. If only his self-proclaimed followers in the “latter half of the twentieth century” did the same anarchists would not have to bother with them!

As such, it seems ironic that the founder of “anarcho”-capitalism should have come to the same conclusion as modern day anarchists on the subject of whether his ideas are a form of anarchism or not!

7.2 Is government compatible with anarchism?

Of course not, but ironically this is the conclusion arrived at by Hart’s analyst of the British “voluntaryists,” particularly Auberon Herbert. Voluntaryism was a fringe part of the right-wing individualist movement inspired by Herbert Spencer, a spokesman for free market capitalism in the later half of the nineteenth century. As with Molinari, there is a problem with presenting this ideology as anarchist, namely that its leading light, Herbert, explicitly rejected the label “anarchist.”

Herbert was clearly aware of individualist anarchism and distanced himself from it. He argued that such a system would be “pandemonium.” He thought that people should “not direct our attacks — as the anarchists do — against all government, against government in itself” but “only against the overgrown, the exaggerated, the insolent, unreasonable and indefensible forms of government, which are found everywhere today.” Government should be “strictly limited to its legitimate duties in defence of self-ownership and individ-

appeared until it was rediscovered by the economist Murray Rothbard in the late 1950’s” [“Gustave de Molinari and the Anti-statist Liberal Tradition: Part III”, Op. Cit., p. 88] While this fringe is somewhat bigger than previously, the fact remains that the ideas expounded by Rothbard are just as alien to the anarchist tradition as Molinari’s. It is a shame that Rothbard, like his predecessors, did not call his ideology something other than anarchism. Not only would it have been more accurate, it would also have lead to much less confusion and no need to write this section of the FAQ! As it stands, the only reason why “anarcho”-capitalism is considered a form of “anarchism” by some is because one person (Rothbard) decided to steal the name of a well established and widespread political and social theory and movement and apply it to an ideology with little, if anything, in common with it.

As Hart inadvertently shows, it is not a firm base to build a claim. That anyone can consider “anarcho”-capitalism as anarchist simply flows from a lack of knowledge about anarchism. As numerous anarchists have argued. For example, “Rothbard’s conjunction of anarchism with capitalism,” according to David Wieck, “results in a conception that is entirely outside the mainstream of anarchist theoretical writings or social movements … this conjunction is a self-contradiction.” He stressed that “the main traditions of anarchism are entirely different. These traditions, and theoretical writings associated with them, express the perspectives and the aspirations, and also, sometimes, the rage, of the oppressed people in human society: not only those economically oppressed, although the major anarchist movements have been mainly movements of workers and peasants, but also those oppressed by power in all those social dimensions … including of course that of political power expressed in the state.” In other words, “anarchism represents . . . a moral commitment (Rothbard’s anarchism I take to be diametrically opposite).” [“Anarchist Justice”, in Nomos XIX, Pennock and Chapman (eds.), p. 215, p. 229 and p. 234]
7.3 Can there be a “right-wing” anarchism?

Hart, of course, mentions the individualist anarchists, calling Tucker’s ideas “laissez faire liberalism.” [Op. Cit., p. 87] However, Tucker called his ideas “socialism” and presented a left-wing critique of most aspects of liberalism, particularly its Lockean based private property rights. Tucker based much of his ideas on property on Proudhon, so if Hart dismisses the latter as a socialist then this must apply to the former. Given that he notes that there are “two main kinds of anarchist thought,” namely “communist anarchism which denies the right of an individual to seek profit, charge rent or interest and to own property” and a “right-wing proprietary anarchism, which vigorously defends these rights” then Tucker, like Godwin, would have to be placed in the “left-wing” camp. [“Gustave de Molinari and the Anti-statist Liberal Tradition: Part II”, Op. Cit., p. 427] Tucker, after all, argued that he aimed for the end of profit, interest and rent and attacked private property in land and housing beyond “occupancy and use.”

As can be seen, Hart’s account of the history of “anti-state” liberalism is flawed. Godwin is included only by ignoring his views on property, views which in many ways reflects the later “socialist” (i.e. anarchist) analysis of Proudhon. He then discusses a few individuals who were alone in their opinions even within extreme freemarket right and all of whom knew of anarchism and explicitly rejected the name for their respective ideologies. In fact, they preferred the term “government” to describe their systems which, on the face of it, would be hard to reconcile with the usual “anarchist”-capitalist definition of anarchism as being “no government.” Hart’s discussion of individualist anarchism is equally flawed, failing to discuss their economic views (just as well, as its links to “left-wing” anarchism would be obvious).

However, the similarities of Molinari’s views with what later became known as “anarchist”-capitalism are clear. Hart notes that with Molinari’s death in 1912, “liberal anti-statism virtually disap-
anarchism is simply concerned with government, a claim which is hard to support. This position cannot be maintained, given that both Herbert and Molinari defended the right of capitalists and landlords to force their employees and tenants to follow their orders. Their “governments” existed to defend the capitalist from rebellious workers, to break unions, strikes and occupations. In other words, they were a monopoly of the use of force in a given area to enforce the monopoly of power in a given area (namely, the wishes of the property owner). While they may have argued that this was “defence of liberty,” in reality it is defence of power and authority.

What about if we just look at the political aspects of his ideas? Did Herbert actually advocate anarchism? No, far from it. He clearly demanded a minimal state based on voluntary taxation. The state would not use force of any kind, “except for purposes of restraining force.” He argued that in his system, while “the state should compel no services and exact no payments by force,” it “should be free to conduct many useful undertakings ... in competition with all voluntary agencies ... in dependence on voluntary payments.” [Herbert, Op. Cit.] As such, “the state” would remain and unless he is using the term “state” in some highly unusual way, it is clear that he means a system where individuals live under a single elected government as their common law maker, judge and defender within a given territory.

This becomes clearer once we look at how the state would be organised. In his essay “A Politician in Sight of Haven,” Herbert does discuss the franchise, stating it would be limited to those who paid a voluntary “income tax,” anyone “paying it would have the right to vote; those who did not pay it would be — as is just — without the franchise. There would be no other tax.” The law would be strictly limited, of course, and the “government ... must confine itself simply to the defense of life and property, whether as regards internal or external defense.” In other words, Herbert was a minimal statist, with his government elected by a majority of those who choose to pay their income tax and funded by that (and by any other voluntary taxes

erly a single head — the law ... But it looks as though one might still call this 'a state,' under Rothbard's definition, by satisfying de facto one of his pair of sufficient conditions: 'It asserts and usually obtains a coerced monopoly of provision of defence service (police and courts) over a given territorial area' ... Hobbes's individual sovereign would seem to have become many sovereigns — with but one law, however, and in truth, therefore, a single sovereign in Hobbes's more important sense of the latter term. One might better, and less confusingly, call this a libertarian state than an anarchy.” ["Anarchist Justice", in Nomos XIX, Pennock and Chapman (eds.), pp. 216–7

The obvious recipients of the coercion of the new state would be those who rejected the authority of their bosses and landlords, those who reject the Lockean property rights Rothbard and Herbert hold dear. In such cases, the rebels and any “defence agency” (like, say, a union) which defended them would be driven out of business as it violated the law of the land. How this is different from a state banning competing agencies is hard to determine. This is a “difficulty” argues Wieck, which “results from the attachment of a principle of private property, and of unrestricted accumulation of wealth, to the principle of individual liberty. This increases sharply the possibility that many reasonable people who respect their fellow men and women will find themselves outside the law because of dissent from a property interpretation of liberty.” Similarly, there is the economic results of capitalism. “One can imagine,” Wieck continues, “that those who lose out badly in the free competition of Rothbard’s economic system, perhaps a considerable number, might regard the legal authority as an alien power, state for them, based on violence, and might be quite unmoved by the fact that, just as under nineteenth century capitalism, a principle of liberty was the justification for it all.” [Op. Cit., p. 217 and pp. 217–8]
what is "coercive aggression" and what constitutes what is and what is not legitimate "property." Herbert is considered by "anarcho"-capitalists as one of them. Which brings us to a strange conclusion, that for "anarcho"-capitalists you can have a system of "anarchism" in which there is a government and state — as long as the state does not impose taxation nor stop private police forces from operating!

As Rothbard argues "if a government based on voluntary taxation permits free competition, the result will be the purely free-market system ... The previous government would now simply be one competing defence agency among many on the market." [Power and Market, p. 124] That the government is specifying what is and is not legal does not seem to bother him or even cross his mind. Why should it, when the existence of government is irrelevant to his definition of anarchism and the state? That private police are enforcing a monopoly law determined by the government seems hardly a step in the right direction nor can it be considered as anarchism. Perhaps this is unsurprising, for under his system there would be "a basic, common Law Code" which "all would have to abide by" as well as "some way of resolving disputes that will gain a majority consensus in society ... whose decision will be accepted by the great majority of the public." ["Society without a State," Op. Cit., p. 205]

At least Herbert is clear that this would be a government system, unlike Rothbard who assumes a monopoly law but seems to think that this is not a government or a state. As David Wieck argued, this is illogical for according to Rothbard "all 'would have to' conform to the same legal code" and this can only be achieved by means of "the forceful action of adherents to the code against those who flout it" and so "in his system there would stand over against every individual the legal authority of all the others. An individual who did not recognise private property as legitimate would surely perceive this as a tyranny of law, a tyranny of the majority or of the most powerful — in short, a hydra-headed state. If the law code is itself unitary, then this multiple state might be said to have prop-

they decided to pay). Whether individuals and companies could hire their own private police in such a regime is irrelevant in determining whether it is anarchy.

This can be best seen by comparing Herbert with Ayn Rand. No one would ever claim Rand was an anarchist, yet her ideas were extremely similar to Herbert’s. Like Herbert, Rand supported laissez-faire capitalism and was against the “initiation of force.” Like Herbert, she extended this principle to favour a government funded by voluntary means ["Government Financing in a Free Society," The Virtue of Selfishness, pp. 116–20] Moreover, like Herbert, she explicitly denied being an anarchist and, again like Herbert, thought the idea of competing defence agencies (“governments”) would result in chaos. The similarities with Herbert are clear, yet no "anarcho"-capitalist would claim that Rand was an anarchist, yet they do claim that Herbert was.

This position is, of course, deeply illogical and flows from the non-anarchist nature of “anarcho”-capitalism. Perhaps unsurprisingly, when Rothbard discusses the ideas of the "voluntaryists" he fails to address the key issue of who determines the laws being enforced in society. For Rothbard, the key issue is who is enforcing the law, not where that law comes from (as long, of course, as it is a law code he approves of). The implications of this is significant, as it implies that "anarchism" need not be opposed to either the state nor government! This can be clearly seen from Rothbard’s analysis of voluntary taxation.

Rothbard, correctly, notes that Herbert advocated voluntary taxation as the means of funding a state whose basic role was to enforce Lockean property rights. For Rothbard, the key issue was not who determines the law but who enforces it. For Rothbard, it should be privatised police and courts and he suggests that the “voluntary taxationists have never attempted to answer this problem; they have rather stubbornly assumed that no one would set up a competing defence agency within a State’s territorial limits.” If the state did bar such firms, then that system is not a genuine free
market. However, “if the government did permit free competition in defence service, there would soon no longer be a central government over the territory. Defence agencies, police and judicial, would compete with one another in the same uncoerced manner as the producers of any other service on the market.” [Power and Market, p. 122 and p. 123]

However, this misses the point totally. The key issue that Rothbard ignores is who determines the laws which these private “defence” agencies would enforce. If the laws are determined by a central government, then the fact that citizen’s can hire private police and attend private courts does not stop the regime being statist. We can safely assume Rand, for example, would have had no problem with companies providing private security guards or the hiring of private detectives within the context of her minimal state. Ironically, Rothbard stresses the need for such a monopoly legal system:

“While ‘the government’ would cease to exist, the same cannot be said for a constitution or a rule of law, which, in fact, would take on in the free society a far more important function than at present. For the freely competing judicial agencies would have to be guided by a body of absolute law to enable them to distinguish objectively between defence and invasion. This law, embodying elaborations upon the basic injunction to defend person and property from acts of invasion, would be codified in the basic legal code. Failure to establish such a code of law would tend to break down the free market, for then defence against invasion could not be adequately achieved.” [Op. Cit., p. 123–4]

So if you violate the “absolute law” defending (absolute) property rights then you would be in trouble. The problem now lies in determining who sets that law. Rothbard is silent on how his system of monopoly laws are determined or specified. The “voluntaryists” did propose a solution, namely a central government elected by the majority of those who voluntarily decided to pay an income tax. In the words of Herbert:

“We agree that there must be a central agency to deal with crime — an agency that defends the liberty of all men, and employs force against the uses of force; but my central agency rests upon voluntary support, whilst Mr. Levy’s central agency rests on compulsory support.” [quoted by Carl Watner, “The English Individualists As They Appear In Liberty,” pp. 191–211, Benjamin R. Tucker and the Champions of Liberty, p. 194]

And all Rothbard is concerned over private cops would exist or not! This lack of concern over the existence of the state and government flows from the strange fact that “anarcho”-capitalists commonly use the term “anarchism” to refer to any philosophy that opposes all forms of initiatory coercion. Notice that government does not play a part in this definition, thus Rothbard can analyse Herbert’s politics without commenting on who determines the law his private “defence” agencies enforce. For Rothbard, “an anarchist society” is defined “as one where there is no legal possibility for coercive aggression against the person and property of any individual.” He then moved onto the state, defining that as an “institution which possesses one or both (almost always both) of the following properties: (1) it acquires its income by the physical coercion known as ‘taxation’; and (2) it acquires and usually obtains a coerced monopoly of the provision of defence service (police and courts) over a given territorial area.” [“Society without a State”, in Nomos XIX, Pennock and Chapman (eds.), p. 192]

This is highly unusual definition of “anarchism,” given that it utterly fails to mention or define government. This, perhaps, is understandable as any attempt to define it in terms of “monopoly of decision-making power” results in showing that capitalism is statist (see section 1 for a summary). The key issue here is the term “legal possibility.” That suggests a system of laws which determine
the impetus for both Marxism and anarchosyndicalism follow quote logically.” [The Ethics of Liberty, p. 52]

So some right-libertarians are aware that the current property owners have benefited extensively from violence and state action in the past. Murray Rothbard argues (in The Ethics of Liberty, p. 57) that if the just owners cannot be found for a property, then the property simply becomes again unowned and will belong to the first person to appropriate and utilise it. If the current owners are not the actual criminals then there is no reason at all to dispossess them of their property; if the just owners cannot be found then they may keep the property as the first people to use it (of course, those who own capital and those who use it are usually different people, but we will ignore this obvious point).

Thus, since all original owners and the originally dispossessed are long dead nearly all current title owners are in just possession of their property except for recently stolen property. The principle is simple, dispossess the criminals, restore property to the dispossessed if they can be found otherwise leave titles where they are (as Native American tribes owned the land collectively this could have an interesting effect on such a policy in the USA. Obviously tribes that were wiped out need not apply, but would such right-libertarian policy recognise such collective, non-capitalist ownership claims? We doubt it, but we could be wrong — the Libertarian Party Manifesto states that their “just” property rights will be restored. And who defines “just”? And given that unclaimed federal land will be given to Native Americans, its seems pretty likely that the original land will be left alone).

Of course, that this instantly gives an advantage to the wealthy on the new “pure” market is not mentioned. The large corporations that, via state protection and support, built their empires and industrial base will still be in an excellent position to continue to dominate the market. Wealthy land owners, benefiting from the effects of state taxation and rents caused by the “land monopoly” on farmstead failures, will keep their property. The rich will have
a great initial advantage and this may be more than enough to maintain them in their place. After all, exchanges between worker and owner tend to reinforce existing inequalities, not reduce them (and as the owners can move their capital elsewhere or import new, lower waged, workers from across the world, it's likely to stay that way).

So Rothbard's "solution" to the problem of past force seems to be (essentially) a justification of existing property titles and not a serious attempt to understand or correct past initiations of force that have shaped society into a capitalist one and still shape it today. The end result of his theory is to leave things pretty much as they are, for the past criminals are dead and so are their victims.

However, what Rothbard fails to note is that the results of this state action and coercion are still with us. He totally fails to consider that the theft of productive wealth has a greater impact on society than the theft itself. The theft of productive wealth shapes society in so many ways that all suffer from it (including current generations). This (the externalities generated by theft) cannot be easily undone by individualistic "solutions".

Let us take an example somewhat more useful that the one Rothbard uses (namely, a stolen watch). A watch cannot really be used to generate wealth (although if I steal a watch, sell it and buy a winning lottery ticket, does that mean I can keep the prize after returning the money value of your watch to you? Without the initial theft, I would not have won the prize but obviously the prize money far exceeds the amount stolen. Is the prize money mine?). Let us take a tool of production rather than a watch.

Let assume a ship sinks and 50 people get washed ashore on an island. One woman has foresight to take a knife from the ship and falls unconscious on the beach. A man comes along and steals her knife. When the woman awakes she cannot remember if she had managed to bring the knife ashore with her or not. The man maintains that he brought it with him and no one else saw anything.
The survivors decide to split the island equally between them and work it separately, exchanging goods via barter.

However, the man with the knife has the advantage and soon carves himself a house and fields from the wilderness. Seeing that they need the knife and the tools created by the knife to go beyond mere existing, some of the other survivors hire themselves to the knife owner. Soon he is running a surplus of goods, including houses and equipment which he decides to hire out to others. This surplus is then used to tempt more and more of the other islanders to work for him, exchanging their land in return for the goods he provides. Soon he owns the whole island and never has to work again. His hut is well stocked and extremely luxurious. His workers face the option of following his orders or being fired (i.e. expelled from the island and so back into the water and certain death). Later, he dies and leaves his knife to his son. The woman whose knife it originally was had died long before, childless.

Note that the theft did not involve taking any land. All had equal access to it. It was the initial theft of the knife which provided the man with market power, an edge which allowed him to offer the others a choice between working by themselves or working for him. By working for him they did “benefit” in terms of increased material wealth (and also made the thief better off) but the accumulate impact of unequal exchanges turned them into the effective slaves of the thief.

Now, would it really be enough to turn the knife over to the whoever happened to be using it once the theft was discovered (perhaps the thief made a death-bed confession). Even if the woman who had originally taken it from the ship been alive, would the return of the knife really make up for the years of work the survivors had put in enriching the thief or the “voluntary exchanges” which had resulted in the thief owning all the island? The equipment people use, the houses they live in and the food they eat are all the product of many hours of collective work. Does this mean that the transformation of nature which the knife allowed remain
in the hands of the descendants of the thief or become the collective property of all? Would dividing it equally between all be fair? Not everyone worked equally hard to produce it. So we have a problem — the result of the initial theft is far greater than the theft considered in isolation due to the productive nature of what was stolen.

In other words, what Rothbard ignores in his attempt to undermine anarchist use of history is that when the property stolen is of a productive nature, the accumulative effect of its use is such as to affect all of society. Productive assets produce new property, new values, create a new balance of class forces, new income and wealth inequalities and so on. This is because of the dynamic nature of production and human life. When the theft is such that it creates accumulative effects after the initial act, it is hardly enough to say that it does not really matter any more. If a nobleman invests in a capitalist firm with the tribute he extracted from his peasants, then (once the firm starts doing well) sells the land to the peasants and uses that money to expand his capitalist holdings, does that really make everything all right? Does not the crime transmit with the cash? After all, the factory would not exist without the prior exploitation of the peasants.

In the case of actually existing capitalism, born as it was of extensive coercive acts, the resultant of these acts have come to shape the whole society. For example, the theft of common land (plus the enforcement of property rights — the land monopoly — to vast estates owned by the aristocracy) ensured that working people had no option to sell their labour to the capitalists (rural or urban). The terms of these contracts reflected the weak position of the workers and so capitalists extracted surplus value from workers and used it to consolidate their market position and economic power. Similarly, the effect of mercantilist policies (and protectionism) was to enrich the capitalists at the expense of workers and allow them to build industrial empires.

The accumulative effect of these acts of violation of a “free” market was to create a class society wherein most people “consent” to
be wage slaves and enrich the few. While those who suffered the impositions are long gone and the results of the specific acts have multiplied and magnified well beyond their initial form. And we are still living with them. In other words, the initial acts of coercion have been transmitted and transformed by collective activity (wage labour) into society-wide affects.

Rothbard argues in the situation where the descendants (or others) of those who initially tilled the soil and their aggressors (“or those who purchased their claims”) still extract “tribute from the modern tillers” that this is a case of “continuing aggression against the true owners”. This means that “the land titles should be transferred to the peasants, without compensation to the monopoly landlords.” [Op. Cit., p. 65] But what he fails to note is that the extracted “tribute” could have been used to invest in industry and transform society. Why ignore what the “tribute” has been used for? Does stolen property not remain stolen property after it has been transferred to another? And if the stolen property is used to create a society in which one class has to sell their liberty to another, then surely any surplus coming from those exchanges are also stolen (as it was generated directly and indirectly by the theft).

Yes, anarchist agree with Rothbard — peasants should take the land they use but which is owned by another. But this logic can equally be applied to capitalism. Workers are still living with the effects of past initiations of force and capitalists still extract “tribute” from workers due to the unequal bargaining powers within the labour market that this has created. The labour market, after all, was created by state action (directly or indirectly) and is maintained by state action (to protect property rights and new initiations of force by working people). The accumulative effects of stealing productive resources as been to increase the economic power of one class compared to another. As the victims of these past abuses are long gone and attempts to find their descendants meaningless (because of the generalised effects the thefts in question), anar-
chists feel we are justified in demanding the “expropriation of the expropriators”.

Due to Rothbard’s failure to understand the dynamic and generalising effects that result from the theft of productive resources (i.e. externalities that occur from coercion of one person against a specific set of others) and the creation of a labour market, his attempt to refute anarchist analysis of the history of “actually existing capitalism” also fails. Society is the product of collective activity and should belong to us all (although whether and how we divide it up is another question).

9 Is Medieval Iceland an example of “anarcho”-capitalism working in practice?

Ironically, medieval Iceland is a good example of why “anarcho”-capitalism will not work, degenerating into de facto rule by the rich. It should be pointed out first that Iceland, nearly 1,000 years ago, was not a capitalistic system. In fact, like most cultures claimed by “anarcho”-capitalists as examples of their “utopia,” it was a communal, not individualistic, society, based on artisan production, with extensive communal institutions as well as individual “ownership” (i.e. use) and a form of social self-administration, the thing — both local and Iceland-wide — which can be considered a “primitive” form of the anarchist communal assembly.

As William Ian Miller points out “[p]eople of a communitarian nature... have reason to be attracted [to Medieval Iceland]... the limited role of lordship, the active participation of large numbers of free people... in decision making within and without the homestead. The economy barely knew the existence of markets. Social relations preceded economic relations. The nexus of household, kin, Thing, even enmity, more than the nexus of cash, bound people to each other. The lack of extensive economic differentiation supported a weakly differ-
entiated class system ... [and material] deprivations were more evenly distributed than they would be once state institutions also had to be maintained.” [Bloodtaking and Peacemaking: Feud, Law and Society in Saga Iceland, p. 306]

At this time Iceland “remained entirely rural. There were no towns, not even villages, and early Iceland participated only marginally in the active trade of Viking Age Scandinavia.” There was a “diminished level of stratification, which emerged from the first phase of social and economic development, lent an appearance of egalitarianism — social stratification was restrained and political hierarchy limited.” [Jesse Byock, Viking Age Iceland, p. 2] That such a society could be classed as “capitalist” or even considered a model for an advanced industrial society is staggering.

Kropotkin in Mutual Aid indicates that Norse society, from which the settlers in Iceland came, had various “mutual aid” institutions, including communal land ownership (based around what he called the “village community”) and the thing (see also Kropotkin’s The State: Its Historic Role for a discussion of the “village community”). It is reasonable to think that the first settlers in Iceland would have brought such institutions with them and Iceland did indeed have its equivalent of the commune or “village community,” the Hreppar, which developed early in the country’s history. Like the early local assemblies, it is not much discussed in the Sagas but is mentioned in the law book, the Grágás, and was composed of a minimum of twenty farms and had a five member commission. The Hreppar was self-governing and, among other things, was responsible for seeing that orphans and the poor within the area were fed and housed. The Hreppar also served as a property insurance agency and assisted in case of fire and losses due to diseased livestock.

In addition, as in most pre-capitalist societies, there were “commons”, common land available for use by all. During the summer, “common lands and pastures in the highlands, often called almennings, were used by the region’s farmers for grazing.” This increased
the independence of the population from the wealthy as these “public lands offered opportunities for enterprising individuals to increase their store of provisions and to find saleable merchandise.” [Jesse Byock, Op. Cit., p. 47 and p. 48]

Thus Icelandic society had a network of solidarity, based upon communal life:

“The status of farmers as free agents was reinforced by the presence of communal units called hreppar (sing. hreppr) ... these [were] geographically defined associations of landowners... the hreppr were self-governing ... [and] guided by a five-member steering committee ... As early as the 900s, the whole country seems to have been divided into hreppar ... Hreppar provided a blanket of local security, allowing the landowning farmers a measure of independence to participate in the choices of political life ...

“Through cooperation among their members, hreppar organised and controlled summer grazing lands, organised communal labour, and provided an immediate local forum for settling disputes. Crucially, they provided fire and livestock insurance for local farmers... [They also] saw to the feeding and housing of local orphans, and administered poor relief to people who were recognised as inhabitants of their area. People who could not provide for themselves were assigned to member farms, which took turns in providing for them.” [Byock, Op. Cit., pp. 137–8]

In practice this meant that “each commune was a mutual insurance company, or a miniature welfare state. And membership in the commune was not voluntary. Each farmer had to belong to the commune in which his farm was located and to contribute to its needs.” [Gissurarson quoted by Birgit T. Runolfsson Solvason, Ordered
Anarchy, State and Rent-Seeking: The Icelandic Commonwealth, 930–1262] The Icelandic Commonwealth did not allow farmers not to join its communes and “once attached to the local hreppr, a farm’s affiliation could not be changed.” However, they did play a key role in keeping the society free as the hreppr “was essentially non-political and addressed subsistence and economic security needs. Its presence freed farmers from depending on an overclass to provide comparable services or corresponding security measures.” [Byock, Op. Cit., p. 138]

Therefore, the Icelandic Commonwealth can hardly be claimed in any significant way as an example of “anarcho”-capitalism in practice. This can also be seen from the early economy, where prices were subject to popular judgement at the skuldaping (“payment-thing”) not supply and demand. [Kirsten Hastrup, Culture and History in Medieval Iceland, p. 125] Indeed, with its communal price setting system in local assemblies, the early Icelandic commonwealth was more similar to Guild Socialism (which was based upon guild’s negotiating “just prices” for goods and services) than capitalism. Therefore Miller correctly argues that it would be wrong to impose capitalist ideas and assumptions onto Icelandic society:

“Inevitably the attempt was made to add early Iceland to the number of regions that socialised people in nuclear families within simple households... what the sources tell us about the shape of Icelandic householding must compel a different conclusion.” [Op. Cit., p. 112]

In other words, Kropotkin’s analysis of communal society is far closer to the reality of Medieval Iceland than “anarcho”-capitalist attempts to turn it into a some kind of capitalist utopia.

However, the communal nature of Icelandic society also co-existed (as in most such cultures) with hierarchical institutions, including some with capitalistic elements, namely private property and “private states” around the local godar. The godar were
local chiefs who also took the role of religious leaders. As the Encyclopaedia Britannica explains, “a kind of local government was evolved [in Iceland] by which the people of a district who had most dealings together formed groups under the leadership of the most important or influential man in the district” (the godi). The godi “acted as judge and mediator” and “took a lead in communal activities” such as building places of worship. These “local assemblies… are heard of before the establishment of the althing” (the national thing). This althing led to co-operation between the local assemblies.

Thus Icelandic society had different elements, one based on the local chiefs and communal organisations. Society was marked by inequalities as “[a]mong the landed there were differences in wealth and prominence. Distinct cleavages existed between landowners and landless people and between free men and slaves.” This meant it was “marked by aspects of statelessness and egalitarianism as well as elements of social hierarchy … Although Iceland was not a democratic system, proto-democratic tendencies existed.” [Byock, Op. Cit., p. 64 and p. 65] The Icelandic social system was designed to reduce the power of the wealthy by enhancing communal institutions:

“The society … was based on a system of decentralised self-government … The Viking Age settlers began by establishing local things, or assemblies, which had been the major forum for meetings of freemen and aristocrats in the old Scandinavian and Germanic social order… They [the Icelanders] excluded overlords with coercive power and expended the mandate of the assembly to fill the full spectrum of the interests of the landed free farmers. The changes transformed a Scandinavian decision-making body that mediated between freemen and overlords into an Icelandic self-contained governmental system without overlords. At the core of Icelandic
government was the Althing, a national assembly of freemen.” [Byock, Op. Cit., p. 75]

Therefore we see communal self-management in a basic form, plus co-operation between communities as well. These communitistic, mutual-aid features exist in many non-capitalist cultures and are often essential for ensuring the people’s continued freedom within those cultures (section B.2.5 on why the wealthy undermine these popular “folk-motes” in favour of centralisation). Usually, the existence of private property (and so inequality) soon led to the destruction of communal forms of self-management (with participation by all male members of the community as in Iceland), which are replaced by the rule of the rich.

While such developments are a commonplace in most “primitive” cultures, the Icelandic case has an unusual feature which explains the interest it provokes in “anarcho”-capitalist circles. This feature was that individuals could seek protection from any godi. As the Encyclopaedia Britannica puts it, “the extent of the godord [chieftancy] was not fixed by territorial boundaries. Those who were dissatisfied with their chief could attach themselves to another godi... As a result rivalry arose between the godar [chiefs]; as may be seen from the Icelandic Sagas.” This was because, while there were “a central legislature and uniform, country-wide judicial and legal systems,” people would seek the protection of any godi, providing payment in return. [Byock, Op. Cit., p. 2] These godi, in effect, would be subject to “market forces,” as dissatisfied individuals could affiliate themselves to other godi. This system, however, had an obvious (and fatal) flaw. As the Encyclopaedia Britannica points out:

“The position of the godi could be bought and sold, as well as inherited; consequently, with the passing of time, the godord for large areas of the country became concentrated in the hands of one man or a few men. This was the principal weakness of the old form of government: it
led to a struggle of power and was the chief reason for
the ending of the commonwealth and for the country’s
submission to the King of Norway.”

It was the existence of these hierarchical elements in Icelandic society that explain its fall from anarchistic to statist society. As Kropotkin argued “from chieftainship sprang on the one hand the State and on the other private property.” [Act for Yourselves, p. 85] Kropotkin’s insight that chieftainship is a transitional system has been confirmed by anthropologists studying “primitive” societies. They have come to the conclusion that societies made up of chieftainships or chiefdoms are not states: “Chiefdoms are neither stateless nor state societies in the fullest sense of either term: they are on the borderline between the two. Having emerged out of stateless systems, they give the impression of being on their way to centralised states and exhibit characteristics of both.” [Y. Cohen quoted by Birgit T. Runolfsson Solvason, Op. Cit.] Since the Commonwealth was made up of chiefdoms, this explains the contradictory nature of the society — it was in the process of transition, from anarchy to statism, from a communal economy to one based on private property.

The political transition within Icelandic society went hand in hand with an economic transition (both tendencies being mutually reinforcing). Initially, when Iceland was settled, large-scale farming based on extended households with kinsmen was the dominant economic mode. This semi-communal mode of production changed as the land was divided up (mostly through inheritance claims) between the 10th and 11th centuries. This new economic system based upon individual possession and artisan production was then slowly displaced by tenant farming, in which the farmer worked for a landlord, starting in the late 11th century. This economic system (based on tenant farming, i.e. capitalistic production) ensured that “great variants of property and power emerged.”
So significant changes in society started to occur in the eleventh century, as “slavery all but ceased. Tenant farming ... took [its] place.” Iceland was moving from an economy based on possession to one based on private property and so “the renting of land was a widely established practice by the late eleventh century ... the status of the godar must have been connected with landownership and rents.” This lead to increasing oligarchy and so the mid- to late-twelfth century was “characterised by the appearance of a new elite, the big chieftains who are called storgodar ... [who] struggled from the 1220s to the 1260s to win what had earlier been unobtainable for Icelandic leaders, the prize of overlordship or centralised executive authority.” [Byock, Op. Cit., p. 269 and pp. 3–4]

During this evolution in ownership patterns and the concentration of wealth and power into the hands of a few, we should note that the godi’s and wealthy landowners’ attitude to profit making also changed, with market values starting to replace those associated with honour, kin, and so on. Social relations became replaced by economic relations and the nexus of household, kin and Thing was replaced by the nexus of cash and profit. The rise of capitalist social relationships in production and values within society was also reflected in exchange, with the local marketplace, with its pricing “subject to popular judgement” being “subsumed under central markets.” [Hastrup, Op. Cit., p. 225]

With a form of wage labour (tenant farming) being dominant within society, it is not surprising that great differences in wealth started to appear. Also, as protection did not come free, it is not surprising that a godi tended to become rich also (in Kropotkin’s words, “the individual accumulation of wealth and power”). Powerful godi would be useful for wealthy landowners when disputes over land and rent appeared, and wealthy landowners would be useful for a godi looking for income. Concentrations of wealth, in other words, produce concentrations of social and political power.
The transformation of possession into property and the resulting rise of hired labour was a key element in the accumulation of wealth and power, and the corresponding decline in liberty among the farmers. Moreover, with hired labour springs dependency — the worker is now dependent on good relations with their landlord in order to have access to the land they need. With such reductions in the independence of part of Icelandic society, the undermining of self-management in the various Things was also likely as labourers could not vote freely as they could be subject to sanctions from their landlord for voting the “wrong” way (“The courts were less likely to base judgements on the evidence than to adjust decisions to satisfy the honour and resources of powerful individuals.” [Byock, Op. Cit., p. 185]). Thus hierarchy within the economy would spread into the rest of society, and in particular its social institutions, reinforcing the effects of the accumulation of wealth and power.

The resulting classification of Icelandic society played a key role in its move from relative equality and anarchy to a class society and statism. As Millar points out:

“as long as the social organisation of the economy did not allow for people to maintain retinues, the basic egalitarian assumptions of the honour system... were reflected reasonably well in reality... the mentality of hierarchy never fully extricated itself from the egalitarian ethos of a frontier society created and recreated by juridically equal farmers. Much of the egalitarian ethic maintained itself even though it accorded less and less with economic realities... by the end of the commonwealth period certain assumptions about class privilege and expectations of deference were already well enough established to have become part of the
infatuation extends, and floats in an ideal, sacred interest. *Man*, you see, is not a person, but an ideal, a spook.” [Op. Cit., p.79]

Rand argues that we must evaluate “the facts of reality by man’s consciousness according to a rational standard of value” but who determines that value? She states that “[v]alues are not determined by fiat nor by majority vote” [p. 24] but, however, neither can they be determined by “man” or “man’s consciousness” because “man” does not exist. Individuals exist and have consciousness and because they are unique have different values (but as we argued in section A.2.19, being social creatures these values are generalised across individuals into social, i.e. objective, values). So, the abstraction “man” does not exist and because of this we see the healthy sight of different individuals convincing others of their ideas and theories by discussion, presenting facts and rational debate. This can be best seen in scientific debate.

The aim of the scientific method is to invent theories that explain facts, the theories are not part of the facts but created by the individual’s mind in order to explain those facts. Such scientific “laws” can and do change in light of new information and new thought. In other words, the scientific method is the creation of subjective theories that explain the objective facts. Rand’s method is the opposite — she assumes “man’s nature,” “discovers” what is “good” from those assumptions and draws her theories by deduction from that. This is the exact opposite of the scientific method and, as we noted above, comes to us straight from the Roman Catholic church.

It is the subjective revolt by individuals against what is considered “objective” fact or “common sense” which creates progress and develops ethics (what is considered “good” and “right”) and society. This, in turn, becomes “accepted fact” until the next free thinker comes along and changes how we view the world by presenting new evidence, re-evaluating old ideas and facts or exposing the evil effects associated with certain ideas (and the social relationships they reflect) by argument, fact and passion. Attempts to

This process in turn accelerated the destruction of communal life and the emergence of statism, focused around the godi and wealthy farmers became rulers of the country. In effect, the godi and wealthy farmers became rulers of the country. Political changes simply reflected economic changes from a communalistic, anarchistic society to a statist, propertarian one. Ironically, this process was a natural aspect of the system of competing chiefs recommended by “anarcho”-capitalists:

“In the twelfth and thirteenth centuries Icelandic society experienced changes in the balance of power. As part of the evolution to a more stratified social order, the number of chieftains diminished and the power of the remaining leaders grew. By the thirteenth century six large families had come to monopolise the control and ownership of many of theoriginalchieftaincies.” [Byock, Op. Cit., p. 341]

These families were called storgodar and they “gained control over whole regions.” This process was not imposed, as “the rise in social complexity was evolutionary rather than revolutionary … they simply moved up the ladder.” This political change reflected economic processes, for “[a]t the same time other social transformations were at work. In conjunction with the development of the storgadar elite, the most successful among the baendr [farmers] also moved up a rung on the social ladder, being ‘big farmers’ or Storbaendr.” [Op. Cit., p. 342] Unsurprisingly, it was the rich farmers who initiated the final step towards normal statism and by the 1250s the storbaendr and their followers had grown weary of the storgodar and their quarrels. In the end they accepted the King of Norway’s offer to become part if his kingdom.
The obvious conclusion is that as long as Iceland was not capitalist, it was anarchic and as it became more capitalist, it became more statist.

This process, wherein the concentration of wealth leads to the destruction of communal life and so the anarchistic aspects of a given society, can be seen elsewhere, for example, in the history of the United States after the Revolution or in the degeneration of the free cities of Medieval Europe. Peter Kropotkin, in his classic work *Mutual Aid*, documents this process in some detail, in many cultures and time periods. However, that this process occurred in a society which is used by “anarcho”-capitalists as an example of their system in action reinforces the anarchist analysis of the statist nature of “anarcho”-capitalism and the deep flaws in its theory, as discussed in section 6.

As Miller argues, “[i]t is not the have-nots, after all, who invented the state. The first steps toward state formation in Iceland were made by churchmen... and by the big men content with imitating Norwegian royal style. Early state formation, I would guess, tended to involve redistributions, not from rich to poor, but from poor to rich, from weak to strong.” [Op. Cit., p. 306]

The “anarcho”-capitalist argument that Iceland was an example of their system in practice is derived from the work of David Friedman. Friedman is less gun-ho than many of his followers, arguing in *The Machinery of Freedom*, that Iceland only had some features of an “anarcho”-capitalist society and these provide some evidence in support of his ideology. How a pre-capitalist society can provide any evidence to support an ideology aimed at an advanced industrial and urban economy is hard to say as the institutions of that society cannot be artificially separated from its social base. Ironically, though, it does present some evidence against “anarcho”-capitalism precisely because of the rise of capitalistic elements within it.

Friedman is aware of how the Icelandic Republic degenerated and its causes. He states in a footnote in his 1979 essay “Private “Man’s Nature” — she states that “[i]ndividual rights are the means of subordinating society to moral law” and that “the source of man’s rights is man’s nature.” [Op. Cit., p. 320, p. 322]

She argues that the “intrinsic theory holds that the good is inherent in certain things or actions, as such, regardless of their context and consequences, regardless of any benefit or injury they may cause to the actors and subjects involved.” [Op. Cit., p. 21] According to the *Concise Oxford Dictionary*, “intrinsic” is defined as “inherent,” “essential,” “belonging naturally” and defines “nature” as “a thing’s, or person’s, innate or essential qualities or character.” In other words, if, as Rand maintains, man’s rights are the product of “man’s nature” then such rights are intrinsic! And if, as Rand maintains, such rights are the “extension of morality into the social system” then morality itself is also intrinsic.

Again, her ideology fails to meet its own tests — and opens the way for tyranny. This can be seen by her whole hearted support for wage slavery and her total lack of concern how it, and concentrations of wealth and power, affect the individuals subjected to them. For, after all, what is “good” is “inherent” in capitalism, regardless of the context, consequences, benefits or injuries it may cause to the actors and subjects involved.

The key to understanding her contradictory and illogical ideology lies in her contradictory use of the word “man.” Sometimes she uses it to describe individuals but usually it is used to describe the human race collectively (“man’s nature,” “man’s consciousness”). But “Man” does not have a consciousness, only individuals do. Man is an abstraction, it is individuals who live and think, not “Man.” Such “Man worship” — like Natural Law — has all the markings of a religion.

As Max Stirner argues “liberalism is a religion because it separates my essence from me and sets it above me, because it exalts ‘Man’ to the same extent as any other religion does to God... it sets me beneath Man.” [*The Ego and Its Own*, p. 176] Indeed, he “who is infatuated with Man leaves persons out of account so far as that
In conclusion the doctrine of Natural Law, far from supporting individual freedom, is one of its greatest enemies. By locating individual rights within “Man’s Nature,” it becomes an unchanging set of dogmas. Do we really know enough about humanity to say what are “Natural” and universal Laws, applicable forever? Is it not a rejection of critical thinking and thus individual freedom to do so?

11.6 Why is the notion of “discovery” contradictory?

Ayn Rand indicates the illogical and contradictory nature of the concepts of “discovering” “natural law” and the “natural rights” this “discovery” argument creates when she stated that her theory was “objective.” Her “Objectivist” political theory “holds that good is neither an attribute of ‘things in themselves’ nor man’s emotional state, but an evaluation of the facts of reality by man’s consciousness according to a rational standard of value... The objective theory holds that the good is an aspect of reality in relation to man — and that it must be discovered, not invented, by man.” [Capitalism: The Unknown Ideal, p. 22]

However, this is playing with words. If something is “discovered” then it has always been there and so is an intrinsic part of it. If “good” is “discovered” by “man” then “good” exists independently of people — it is waiting to be “discovered.” In other words, “good” is an attribute of “man as man,” of “things in themselves” (in addition, such a theory also implies that there is just one possible interpretation of what is “good” for all humanity). This can be seen when Rand talks about her system of “objective” values and rights.

When discussing the difference between “subjective,” “intrinsic” and “objective” values Rand noted that “intrinsic” and “subjective” theories “make it possible for a man to believe what is good is independent of man’s mind and can be achieved by physical force.” [Op. Cit., p. 22] In other words, intrinsic and subjective values justify tyranny. However, her “objective” values are placed squarely in Creation and Enforcement of Law: A Historical Case” that the “question of why the system eventually broke down is both interesting and difficult. I believe that two of the proximate causes were increased concentration of wealth, and hence power, and the introduction into Iceland of a foreign ideology — kingship. The former meant that in many areas all or most of the godord were held by one family and the latter that by the end of the Sturlung period the chieftains were no longer fighting over the traditional quarrels of who owed what to whom, but over who should eventually rule Iceland. The ultimate reasons for those changes are beyond the scope of this paper.”

However, from an anarchist point of view, the “foreign” ideology of kingship would be the product of changing socio-economic conditions that were expressed in the increasing concentration of wealth and not its cause. After all, the settlers of Iceland were well aware of the “ideology” of kingship for the 300 years during which the Republic existed. As Byock notes, Iceland “inherited the tradition and the vocabulary of statehood from its European origins ... On the mainland, kings were enlarging their authority at the expense of the traditional rights of free farmers. The emigrants to Iceland were well aware of this process ... available evidence does suggest that the early Icelanders knew quite well what they did not want. In particular they were collectively opposed to the centralising aspects of a state.” [Op. Cit., p. 64–6] Unless some kind of collective and cultural amnesia occurred, the notion of a “foreign ideology” causing the degeneration is hard to accept. Moreover, only the concentration of wealth allowed would-be Kings the opportunity to develop and act and the creation of boss-worker social relationships on the land made the poor subject to, and familiar with, the concept of authority. Such familiarity would spread into all aspects of life and, combined with the existence of “prosperous” (and so powerful) godis to enforce the appropriate servile responses, ensured the end of the relative equality that fostered Iceland’s anarchistic tendencies in the first place.
In addition, as private property is a monopoly of rulership over a given area, the conflict between chieftains for power was, at its most basic, a conflict of who would own Iceland, and so rule it. The attempt to ignore the facts that private property creates rulership (i.e. a monopoly of government over a given area) and that monarchies are privately owned states does Friedman’s case no good. In other words, the system of private property has a built-in tendency to produce both the ideology and fact of Kingship — the power structures implied by Kingship are reflected in the social relations which are produced by private property.

Friedman is also aware that an “objection [to his system] is that the rich (or powerful) could commit crimes with impunity, since nobody would be able to enforce judgement against them. Where power is sufficiently concentrated this might be true; this was one of the problems which led to the eventual breakdown of the Icelandic legal system in the thirteenth century. But so long as power was reasonably dispersed, as it seem to have been for the first two centuries after the system was established, this was a less serious problem.” [Op. Cit.]

Which is quite ironic. Firstly, because the first two centuries of Icelandic society was marked by non-capitalist economic relations (communal pricing and family/individual possession of land). Only when capitalistic social relationships developed (hired labour and property replacing possession and market values replacing social ones) in the 12th century did power become concentrated, leading to the breakdown of the system in the 13th century. Secondly, because Friedman is claiming that “anarcho”-capitalism will only work if there is an approximate equality within society! But this state of affairs is one most “anarcho”-capitalists claim is impossible and undesirable!

They claim there will always be rich and poor. But inequality in wealth will also become inequality of power. When “actually existing” capitalism has become more free market the rich have got richer and the poor poorer. Apparently, according to the “anarcho”-capitalists, in an even “purer” capitalism this process will be re-

11.5 But Natural Law was discovered, not invented!

This statement truly shows the religious nature of the Natural Law cult. To see why its notion of “discovery” is confused, let us consider the Law of Gravity. Newton did not “discover” the law of gravity, he invented a theory which explained certain observed phenomena in the physical world. Later Einstein updated Newton’s theories in ways that allowed for a better explanation of physical reality. Thus, unlike “Natural Law,” scientific laws can be updated and changed as our knowledge changes and grows. As we have already noted, however, “Natural Laws” cannot be updated because they are derived from fixed definitions (Rothbard is pretty clear on this, he states that it is “very true” that natural law is “universal, fixed and immutable” and so are “absolute principles of justice” and that they are “independent of time and place” [The Ethics of Liberty, p. 19]). However, what he fails to understand is that what the “Natural Law” cultists are “discovering” are simply the implications of their own definitions, which in turn simply reflect their own prejudices and preferences.

Since “Natural Laws” are thus “unchanging” and are said to have been “discovered” centuries ago, it’s no wonder that many of its followers look for support in socio-biology, claiming that their “laws” are part of the genetic structure of humanity. But socio-biology has dubious scientific credentials for many of its claims. Also, it has authoritarian implications exactly like Natural Law. Murray Bookchin rightly characterises socio-biology as “suffocatingly rigid; it not only impedes action with the autocracy of a genetic tyrant but it closes the door to any action that is not biochemically defined by its own configuration. When freedom is nothing more than the recognition of necessity...we discover the gene’s tyranny over the greater totality of life...when knowledge becomes dogma (and few movements are more dogmatic than socio-biology) freedom is ultimately denied.” [“Socio-biology or Social Ecology”, in Which way for the Ecology Movement? pp. 49 – 75, p. 60]
other users of the oasis (although probably disliked by others). Thus anarchists desire to treat people as fairly as possible and not replace one form of coercion and domination with another — individuals must never be treated as abstractions (if they have power over you, destroy what creates the relation of domination, not the individual, in other words! And if this power can be removed without resorting to force, so much the better — a point which social and individualist anarchists disagree on, namely whether capitalism can be reformed away or not comes directly from this. As the Individualists think it can, they oppose the use of force. Most social anarchists think it cannot, and so support revolution.

This argument may be considered as “utilitarian” (the greatest good for the greatest number) and so treats people not as “ends in themselves” but as “means to an end”. Thus, it could be argued, “natural law” is required to ensure that all (as opposed to some, or many, or the majority of) individuals are free and have their rights protected.

However, it is clear that “natural law” can easily result in a minority having their freedom and rights respected, while the majority are forced by circumstances (created by the rights/laws produced by applying “natural law” we must note) to sell their liberty and rights in order to survive. If it is wrong to treat anyone as a “means to an end”, then it is equally wrong to support a theory or economic system that results in people having to negate themselves in order to live. A respect for persons — to treat them as ends and never as means — is not compatible with private property.

The simple fact is that there are no easy answers — we need to weight up our options and act on what we think is best. Yes, such subjectivism lacks the “elegance” and simplicity of “natural law” but it reflects real life and freedom far better. All in all, we must always remember that what is “good” for man need not be good for people. “Natural law” fails to do this and stands condemned.

versed! It is ironic that an ideology that denounces egalitarianism as a revolt against nature implicitly requires an egalitarian society in order to work.

In reality, wealth concentration is a fact of life in any system based upon hierarchy and private property. Friedman is aware of the reasons why “anarcho”-capitalism will become rule by the rich but prefers to believe that “pure” capitalism will produce an egalitarian society! In the case of the commonwealth of Iceland this did not happen — the rise in private property was accompanied by a rise in inequality and this lead to the breakdown of the Republic into statism.

In short, Medieval Iceland nicely illustrates David Weick’s comments (as quoted in section 6.3) that “when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing companies.” This is to say that “free market” just results in rule by the rich, and being able to affiliate with “competing” “defence companies” is insufficient to stop or change that process.

This is simply because any defence-judicial system does not exist in a social vacuum. The concentration of wealth — a natural process under the “free market” (particularly one marked by private property and wage labour) — has an impact on the surrounding society. Private property, i.e. monopolisation of the means of production, allows the monopolists to become a ruling elite by exploiting, and so accumulating vastly more wealth than, the workers. This elite then uses its wealth to control the coercive mechanisms of society (military, police, “private security forces,” etc.), which it employs to protect its monopoly and thus its ability to accumulate ever more wealth and power. Thus, private property, far from increasing the freedom of the individual, has always been the necessary precondition for the rise of the state and rule by the rich. Medieval Iceland is a classic example of this process at work.
10 Would laissez-faire capitalism be stable?

Unsurprisingly, right-libertarians combine their support for “absolute property rights” with a whole-hearted support for laissez-faire capitalism. In such a system (which they maintain, to quote Ayn Rand, is an “unknown ideal”) everything would be private property and there would be few (if any) restrictions on “voluntary exchanges.” “Anarcho”-capitalists are the most extreme of defenders of pure capitalism, urging that the state itself be privatised and no voluntary exchange made illegal (for example, children would be considered the property of their parents and it would be morally right to turn them into child prostitutes — the child has the option of leaving home if they object).

As there have been no example of “pure” capitalism it is difficult to say whether their claims about are true (for a discussion of a close approximation see the section 10.3). This section of the FAQ is an attempt to discover whether such a system would be stable or whether it would be subject to the usual booms and slumps. Before starting we should note that there is some disagreement within the right-libertarian camp itself on this subject (although instead of stability they usually refer to “equilibrium” — which is an economics term meaning that all of a societies resources are fully utilised).

In general terms, most right-Libertarians’ reject the concept of equilibrium as such and instead stress that the economy is inherently a dynamic (this is a key aspect of the Austrian school of economics). Such a position is correct, of course, as such noted socialists as Karl Marx and Michal Kalecki and capitalist economists as Keynes recognised long ago. There seems to be two main schools of thought on the nature of disequilibrium. One, inspired by von Mises, maintains that the actions of the entrepreneur/capitalist results in the market co-ordinating supply and demand and another, inspired by Joseph Schumpeter, who question whether markets co-ordinate because entrepreneurs are constantly innovating and creating new markets, products and techniques.

Perhaps it will be argued that domination is only bad when it is involuntary, which means that it is only the involuntary nature of coercion that makes it bad, not the domination it involves. By this argument wage slavery is not domination as workers voluntarily agree to work for a capitalist (after all, no one puts a gun to their heads) and any attempt to overthrow capitalist domination is coercion and so wrong. However, this argument ignores that fact that circumstances force workers to sell their liberty and so violence on behalf of property owners is not (usually) required — market forces ensure that physical force is purely “defensive” in nature. And as we argued in section 2.2, even Rothbard recognised that the economic power associated with one class of people being dispossessed and another empowered by this fact results in relations of domination which cannot be considered “voluntary” by any stretch of the imagination (although, of course, Rothbard refuses to see the economic power associated with capitalism — when its capitalism, he cannot see the wood for the trees — and we are ignoring the fact that capitalism was created by extensive use of coercion and violence — see section 8).

Thus, “Natural law” and attempts to protect individuals rights/liberty and see a world in which people are free to shape their own lives are fatally flawed if they do not recognise that private property is incompatible with these goals. This is because the existence of capitalist property smuggles in power and so domination (the restriction of liberty, the conversion of some into order-givers and the many into order-takers) and so Natural Law does not fulfil its promise that each person is free to pursue their own goals. The unqualified right of property will lead to the domination and degradation of large numbers of people (as the oasis monopoliser so graphically illustrates).

And we stress that anarchists have no desire to harm individuals, only to change institutions. If a workplace is taken over by its workers, the owners are not harmed physically. If the oasis is taken from the monopoliser, the ex-monopoliser becomes like
the democratisation of property rights) is “bad”. Somewhat strange logic, we feel.

However such a position fails to understand why we consider coercion to be wrong/unethical. Coercion is wrong because it subjects an individual to the will of another. It is clear that the victim of coercion is lacking the freedom that the philosopher Isaiah Berlin describes in the following terms:

“I wish my life and decisions to depend on myself, not on external forces of whatever kind. I wish to be an instrument of my own, not of other men’s, acts of will. I wish to be a subject, not an object; to be moved by reasons, by conscious purposes, which are my own, not by causes which affect me, as it were, from outside. I wish to be somebody, not nobody; a doer — deciding, not being decided for, self-directed and not acted upon by external nature or by other mean as if I were a thing, or an animal, or a slave incapable of playing a human role, that is, of conceiving goals and policies of my own and realising them.” [Four Essays on Liberty, p. 131]

Or, as Alan Haworth points out, “we have to view coercion as a violation of what Berlin calls positive freedom.” [Anti-Libertarianism, p. 48]

Thus, if a system results in the violation of (positive) liberty by its very nature — namely, subject a class of people to the will of another class (the worker is subject to the will of their boss and is turned into an order-taker) — then it is justified to end that system. Yes, it is “coercion” is dispossess the property owner — but “coercion” exists only for as long as they desire to exercise power over others. In other words, it is not domination to remove domination! And remember it is the domination that exists in coercion which fuels our hatred of it, thus “coercion” to free ourselves from domination is a necessary evil in order to stop far greater evils occurring (as, for example, in the clear-cut case of the oasis monopoliser).

Of course both actions happen and we suspect that the differences in the two approaches are not important. The important thing to remember is that “anarcho”-capitalists and right-libertarians in general reject the notion of equilibrium — but when discussing their utopia they do not actually indicate this! For example, most “anarcho”-capitalists will maintain that the existence of government (and/or unions) causes unemployment by either stopping capitalists investing in new lines of industry or forcing up the price of labour above its market clearing level (by, perhaps, restricting immigration, minimum wages, taxing profits). Thus, we are assured, the worker will be better off in “pure” capitalism because of the unprecedented demand for labour it will create. However, full employment of labour is an equilibrium in economic terms and that, remember, is impossible due to the dynamic nature of the system. When pressed, they will usually admit there will be periods of unemployment as the market adjusts or that full unemployment actually means under a certain percentage of unemployment. Thus, if you (rightly) reject the notion of equilibrium you also reject the idea of full employment and so the labour market becomes a buyers market and labour is at a massive disadvantage.

The right-libertarian case is based upon logical deduction, and the premises required to show that laissez-faire will be stable are somewhat incredible. If banks do not set the wrong interest rate, if companies do not extend too much trade credit, if workers are willing to accept (real wage related) pay cuts, if workers altruistically do not abuse their market power in a fully employed society, if interest rates provide the correct information, if capitalists predict the future relatively well, if banks and companies do not suffer from isolation paradoxes, then, perhaps, laissez-faire will be stable. So, will laissez-faire capitalism be stable? Let us see by analysing the assumptions of right-libertarianism — namely that there will be full employment and that a system of private banks will stop the business cycle. We will start on the banking system
first (in section 10.1) followed by the effects of the labour market on economic stability (in section 10.2). Then we will indicate, using the example of 19th century America, that actually existing (“impure”) laissez-faire was very unstable.

Explaining booms and busts by state action plays an ideological convenience as it exonerates market processes as the source of instability within capitalism. We hope to indicate in the next two sections why the business cycle is inherent in the system (see also sections C.7, C.8 and C.9).

### 10.1 Would privatising banking make capitalism stable?

It is claimed that the existence of the state (or, for minimal statists, government policy) is the cause of the business cycle (recurring economic booms and slumps). This is because the government either sets interest rates too low or expands the money supply (usually by easing credit restrictions and lending rates, sometimes by just printing fiat money). This artificially increases investment as capitalists take advantage of the artificially low interest rates. The real balance between savings and investment is broken, leading to over-investment, a drop in the rate of profit and so a slump (which is quite socialist in a way, as many socialists also see over-investment as the key to understanding the business cycle, although they obviously attribute the slump to different causes — namely the nature of capitalist production, not that the credit system does not play its part — see section C.7).

In the words of Austrian Economist W. Duncan Reekie, "[t]he business cycle is generated by monetary expansion and contraction ... When new money is printed it appears as if the supply of savings has increased. Interest rates fall and businessmen are misled into borrowing additional funds to finance extra investment activity ... This would be of no consequence if it had been the outcome of [genuine saving] ... -but the change was government induced. The new money..."

The fact that for the vast majority of human existence, people have lived in societies which violated almost all of their so-called “Natural Laws” To take one example, before the late Neolithic, most societies were based on usufruct, or free access to communally held land and other resources [see Murray Bookchin, *The Ecology of Freedom*]. Thus for millennia, all human beings lived in violation of the supposed “Natural Law” of private property — perhaps the chief “law” in the “Libertarian” universe.

If “Natural Law” did exist, then all people would have discovered these “true” laws years ago. To the contrary, however, the debate is still going on, with (for example) fascists and “Liberarians” each claiming “the laws of nature” (and socio-biology) as their own.

### 11.4 Does “Natural Law” actually provide protection for individual liberty?

But, it seems fair to ask, does “natural law” actually respect individuals and their rights (i.e. liberty)? We think not. Why?

According to Rothbard, "the natural law ethic states that for man, goodness or badness can be determined by what fulfils or thwarts what is best for man’s nature." [*The Ethics of Liberty*, p. 10] But, of course, what may be “good” for “man” may be decidedly bad for men (and women). If we take the example of the sole oasis in a desert (see section 4.2) then, according to Rothbard, the property owner having the power of life and death over others is “good” while, if the dispossessed revolt and refuse to recognise his “property”, this is “bad”! In other words, Rothbard’s “natural law” is good for some people (namely property owners) while it can be bad for others (namely the working class). In more general terms, this means that a system which results in extensive hierarchy (i.e. archy, power) is “good” (even though it restricts liberty for the many) while attempts to remove power (such as revolution and
or human, collective or individual.” [Bakunin on Anarchism, p. 227]

Thus anarchism, in contrast to the “natural law” cult, recognises that “natural laws” (like society) are the product of individual evaluation of reality and social life and are, therefore, subject to change in the light of new information and ideas (Society “progresses slowly through the moving power of individual initiative” [Bakunin, The Political Philosophy of Bakunin, p. 166] and so, obviously, do social rights and customs). Ethical or moral “laws” (which is what the “Natural Law” cult is actually about) is not a product of “human nature” or abstract individuals. Rather, it is a social fact, a creation of society and human interaction. In Bakunin’s words, “moral law is not an individual but a social fact, a creation of society” and any “natural laws” are “inherent in the social body” (and so, we must add, not floating abstractions existing in “man’s nature”). [Ibid., p. 125, p. 166]

The case for liberty and a free society is based on the argument that, since every individual is unique, everyone can contribute something that no one else has noticed or thought about. It is the free interaction of individuals which allows them, along with society and its customs and rights, to evolve, change and develop. “Natural Law,” like the state, tries to arrest this evolution. It replaces creative inquiry with dogma, making people subject to yet another god, destroying critical thought with a new rule book.

In addition, if these “Natural Laws” are really what they are claimed to be, they are necessarily applicable to all of humanity (Rothbard explicitly acknowledges this when he wrote that “one of the notable attributes of natural law” is “its applicability to all men, regardless of time or place” [The Ethics of Liberty, p. 42]). In other words, every other law code must (by definition) be “against nature” and there exists one way of life (the “natural” one). The authoritarian implications of such arrogance is clear. That the Dogma of Natural Law was only invented a few hundred years ago, in one part of the planet, does not seem to bother its advocates. Nor does it reach factor owners in the form of wages, rent and interest … the factor owners will then spend the higher money incomes in their existing consumption:investment proportions … Capital goods industries will find their expansion has been in error and malinvestments have been incurred.” [Markets, Entrepreneurs and Liberty, pp. 68–9]

In other words, there has been “wasteful mis-investment due to government interference with the market.” [Op. Cit., p. 69] In response to this (negative) influence in the workings of the market, it is suggested by right-libertarians that a system of private banks should be used and that interest rates are set by them, via market forces. In this way an interest rate that matches the demand and supply for savings will be reached and the business cycle will be no more. By truly privatising the credit market, it is hoped by the business cycle will finally stop.

Unsurprisingly, this particular argument has its weak points and in this section of the FAQ we will try to show exactly why this theory is wrong.

Let us start with Reckie’s starting point. He states that the “main problem” of the slump is “why is there suddenly a cluster of business errors? Businessmen and entrepreneurs are market experts (otherwise they would not survive) and why should they all make mistakes simultaneously?” [Op. Cit., p. 68] It is this “cluster” of mistakes that the Austrians’ take as evidence that the business cycle comes from outside the workings of the market (i.e. is exogenous in nature). Reekie argues that an “error cluster only occurs when all entrepreneurs have received the wrong signals on potential profitability, and all have received the signals simultaneously through government interference with the money supply.” [Op. Cit., p. 74] But is this really the case?

The simple fact is that groups of (rational) individuals can act in the same way based on the same information and this can lead to a collective problem. For example, we do not consider it irrational that everyone in a building leaves it when the fire alarm goes off and that the flow of people can cause hold-ups at exits. Neither
do we think that its unusual that traffic jams occur, after all those
involved are all trying to get to work (i.e. they are reacting to the
same desire). Now, is it so strange to think that capitalists who
all see the same opportunity for profit in a specific market decide
to invest in it? Or that the aggregate outcome of these individually
rational decisions may be irrational (i.e. cause a glut in the market)?

In other words, a “cluster” of business failures may come about
because a group of capitalists, acting in isolation, over-invest in a
given market. They react to the same information (namely super
profits in market X), arrange loans, invest and produce commodi-
ties to meet demand in that market. However, the aggregate result
of these individually rational actions is that the aggregate supply
far exceeds demand, causing a slump in that market and, perhaps,
business failures. The slump in this market (and the potential fail-
ure of some firms) has an impact on the companies that supplied
them, the companies that are dependent on their employees wages/
demand, the banks that supplied the credit and so forth. The accumu-
lative impact of this slump (or failures) on the chain of financial
commitments of which they are but one link can be large and, per-
haps, push an economy into general depression. Thus the claim
that it is something external to the system that causes depression
is flawed.

It could be claimed the interest rate is the problem, that it does
not accurately reflect the demand for investment or relate it to the
supply of savings. But, as we argued in section C.8, it is not at all
clear that the interest rate provides the necessary information to
capitalists. They need investment information for their specific in-
dustry, but the interest rate is cross-industry. Thus capitalists in
market X do not know if the investment in market X is increasing
and so this lack of information can easily cause “mal-investment”
as over-investment (and so over-production) occurs. As they have
no way of knowing what the investment decisions of their com-
petitors are or now these decisions will affect an already unknown
future, capitalists may over-invest in certain markets and the net
monly regarded as human rights. One can object to state power
without believing in “Natural Law.”

11.3 Why is “Natural Law” authoritarian?

Rights, far from being fixed, are the product of social evolution
and human action, thought and emotions. What is acceptable now
may become unacceptable in the future. Slavery, for example, was
long considered “natural.” In fact, John Locke, the “father” of “Nat-
ural Rights,” was heavily involved in the slave trade. He made a
fortune in violating what is today regarded as a basic human right:
not to be enslaved. Many in Locke’s day claimed that slavery was
a “Natural Law.” Few would say so now.

Thomas Jefferson indicates exactly why “Natural Law” is au-
thoritarian when he wrote “[s]ome men look at constitutions with
sanctimonious reverence, and deem them like the ark of the Covenant,
too sacred to be touched. They ascribe to the men of the preceding age
a wisdom more than human, and suppose what they did to be beyond
amendment...laws and institutions must go hand in hand with the
progress of the human mind... as that becomes more developed, more
enlightened, as new discoveries are made, institutions must advance
also, to keep pace with the times... We might as well require a man
to wear still the coat which fitted him when a boy as civilised society
to remain forever under the regimen of their barbarous ancestors.”

The “Natural Law” cult desires to stop the evolutionary process
by which new rights are recognised. Instead they wish to fix social
life into what they think is good and right, using a form of argu-
ment that tries to raise their ideology above critique or thought.
Such a wish is opposed to the fundamental feature of liberty: the
ability to think for oneself. Michael Bakunin writes “the liberty of
man consists solely in this: that he obeys natural laws because he has
himself recognised them as such, and not because they have been
externally imposed upon him by any extrinsic will whatever, divine
11.2 But “Natural Law” provides protection for individual rights from violation by the State. Those who are against Natural Law desire total rule by the state.

The second statement represents a common “Libertarian” tactic. Instead of addressing the issues, they accuse an opponent of being a “totalitarian” (or the less sinister “statist”). In this way, they hope to distract attention from, and so avoid discussing, the issue at hand (while at the same time smearing their opponent). We can therefore ignore the second statement.

Regarding the first, “Natural Law” has never stopped the rights of individuals from being violated by the state. Such “laws” are as much use as a chocolate fire-guard. If “Natural Rights” could protect one from the power of the state, the Nazis would not have been able to murder six million Jews. The only thing that stops the state from attacking people’s rights is individual (and social) power — the ability and desire to protect oneself and what one considers to be right and fair. As the anarchist Rudolf Rocker pointed out:

“Political [or individual] rights do not exist because they have been legally set down on a piece of paper, but only when they have become the ingrown habit of a people, and when any attempt to impair them will be meet with the violent resistance of the populace… .One compels respect from others when he knows how to defend his dignity as a human being,… .The people owe all the political rights and privileges which we enjoy today, in greater or lesser measure, not to the good will of their governments, but to their own strength.” [Anarcho-Syndicalism, p. 64]

Of course, if is there are no “Natural Rights,” then the state has no “right” to murder you or otherwise take away what are com-

Effects of this aggregate mistake can expand throughout the whole economy and cause a general slump. In other words, a cluster of business failures can be accounted for by the workings of the market itself and not the (existence of) government.

This is one possible reason for an internally generated business cycle but that is not the only one. Another is the role of class struggle which we discuss in the next section and yet another is the endogenous nature of the money supply itself. This account of money (proposed strongly by, among others, the post-Keynesian school) argues that the money supply is a function of the demand for credit, which itself is a function of the level of economic activity. In other words, the banking system creates as much money as people need and any attempt to control that creation will cause economic problems and, perhaps, crisis (interestingly, this analysis has strong parallels with mutualist and individualist anarchist theories on the causes of capitalist exploitation and the business cycle). Money, in other words, emerges from within the system and so the right-libertarian attempt to “blame the state” is simply wrong.

Thus what is termed “credit money” (created by banks) is an essential part of capitalism and would exist without a system of central banks. This is because money is created from within the system, in response to the needs of capitalists. In a word, money is endogenous and credit money an essential part of capitalism.

Right-libertarians do not agree. Reekie argues that “[o]nce fractional reserve banking is introduced, however, the supply of money substitutes will include fiduciary media. The ingenuity of bankers, other financial intermediaries and the endorsement and guaranteeing of their activities by governments and central banks has ensured that the quantity of fiat money is immense.” [Op. Cit., p. 73]

Therefore, what “anarcho”-capitalists and other right-libertarians seem to be actually complaining about when they argue that “state action” creates the business cycle by creating excess money is that the state allows bankers to meet the demand
for credit by creating it. This makes sense, for the first fallacy of this sort of claim is how could the state force bankers to expand credit by loaning more money than they have savings. And this seems to be the normal case within capitalism — the central banks accommodate bankers activity, they do not force them to do it. Alan Holmes, a senior vice president at the New York Federal Reserve, stated that:

“In the real world, banks extend credit, creating deposits in the process, and look for the reserves later. The question then becomes one of whether and how the Federal Reserve will accommodate the demand for reserves. In the very short run, the Federal Reserve has little or no choice about accommodating that demand, over time, its influence can obviously be felt.” [quoted by Doug Henwood, Wall Street, p. 220]

(Although we must stress that central banks are not passive and do have many tools for affecting the supply of money. For example, central banks can operate “tight” money policies which can have significant impact on an economy and, via creating high enough interest rates, the demand for money.)

It could be argued that because central banks exist, the state creates an “environment” which bankers take advantage off. By not being subject to “free market” pressures, bankers could be tempted to make more loans than they would otherwise in a “pure” capitalist system (i.e. create credit money). The question arises, would “pure” capitalism generate sufficient market controls to stop banks loaning in excess of available savings (i.e. eliminate the creation of credit money/fiduciary media).

It is to this question we now turn.

As noted above, the demand for credit is generated from within the system and the comments by Holmes reinforce this. Capitalists seek credit in order to make money and banks create it precisely because they are also seeking profit. What right-libertarians actually

Because of the confusion its usage creates, we are tempted to think that the use of “Natural Law” dogma is an attempt to stop thinking, to restrict analysis, to force certain aspects of society off the political agenda by giving them a divine, everlasting quality.

Moreover, such an “individualist” account of the origins of rights will always turn on a muddled distinction between individual rationality and some vague notion of rationality associated with membership of the human species. How are we to determine what is rational for an individual as and individual and what is rational for that same individual as a human being? It is hard to see that we can make such a distinction for “[i]f I violently interfere with Murray Rothbard’s freedom, this may violate the ‘natural law’ of Murray Rothbard’s needs, but it doesn’t violate the ‘natural law’ of my needs.” [L.A. Rollins, The Myth of Natural Rights, p. 28] Both parties, after all, are human and if such interference is, as Rothbard claims, “anthihuman” then why? “If it helps me, a human, to advance my life, then how can it be unequivocally ‘anthihuman’?” [L. A. Rollins, Op. Cit., p. 27] Thus “natural law” is contradictory as it is well within the bounds of human nature to violate it.

This means that in order to support the dogma of “Natural Law,” the cultists must ignore reality. Ayn Rand claims that “the source of man’s rights is...the law of identity. A is A — and Man is Man.” But Rand (like Rothbard) defines “Man” as an “entity of a specific kind — a rational being” [The Virtue of Selfishness, pp. 94–95]. Therefore she cannot account for irrational human behaviours (such as those that violate “Natural Laws”), which are also products of our “nature.” To assert that such behaviours are not human is to assert that A can be not-A, thus contradicting the law of identity. Her ideology cannot even meet its own test.
religion, where “Natural Law” has replaced “God’s Law.” The latter fiction gave the priest power over believers. “Natural Law” is designed to give the Libertarian ideologist power over the people that he or she wants to rule.

How can one be against a “Natural Law” or a “Natural Right”? It is impossible. How can one argue against gravity? If private property, for example, is elevated to such a level, who would dare argue against it? Ayn Rand listed having landlords and employers along with “the laws of nature.” They are not similar: the first two are social relationships which have to be imposed by the state; the “laws of nature” (like gravity, needing food, etc.) are facts which do not need to be imposed. Rothbard claims that “the natural fact is that labour service is indeed a commodity.” [Op. Cit., p. 40] However, this is complete nonsense — labour service as a commodity is a social fact, dependent on the distribution of property within society, its social customs and so forth. It is only “natural” in the sense that it exists within a given society (the state is also “natural” as it also exists within nature at a given time). But neither wage slavery or the state is “natural” in the sense that gravity is natural or a human having two arms is. Indeed, workers at the dawn of capitalism, faced with selling their labour services to another, considered it as decidedly “unnatural” and used the term “wage slavery” to describe it!

Thus, where and when a “fact” appears is essential. For example, Rothbard claims that “[a]n apple, let fall, will drop to the ground; this we all observe and acknowledge to be in the nature of the apple.” [The Ethics of Liberty, p. 9] Actually, we do not “acknowledge” anything of the kind. We acknowledge that the apple was subject to the force of gravity and that is why it fell. The same apple, “let fall” in a space ship would not drop to the floor. Has the “nature” of the apple changed? No, but the situation it is in has. Thus any attempt to generate abstract “natures” requires you to ignore reality in favour of ideals.

object to is the government (via the central bank) accommodating this creation of credit. If only the banks could be forced to maintain a savings to loans ration of one, then the business cycle would stop. But is this likely? Could market forces ensure that bankers pursue such a policy? We think not — simply because the banks are profit making institutions. As post-Keynesianist Hyman Minsky argues, “[b]ecause bankers live in the same expectational climate as businessmen, profit-seeking bankers will find ways of accommodating their customers... Banks and bankers are not passive managers of money to lend or to invest; they are in business to maximise profits...” [quoted by L. Randall Wray, Money and Credit in Capitalist Economies, p. 85]

This is recognised by Reekie, in passing at least (he notes that “fiduciary media could still exist if bankers offered them and clients accepted them” [Op. Cit., p. 73]). Bankers will tend to try and accommodate their customers and earn as much money as possible. Thus Charles P. Kindleberger comments that monetary expansion “is systematic and endogenous rather than random and exogenous” seem to fit far better the reality of capitalism that the Austrian and right-libertarian viewpoint [Manias, Panics, and Crashes, p. 59] and post-Keynesian L. Randall Wray argues that “the money supply ... is more obviously endogenous in the monetary systems which predate the development of a central bank.” [Op. Cit., p. 150]

In other words, the money supply cannot be directly controlled by the central bank since it is determined by private decisions to enter into debt commitments to finance spending. Given that money is generated from within the system, can market forces ensure the non-expansion of credit (i.e. that the demand for loans equals the supply of savings)? To begin to answer this question we must note that investment is “essentially determined by expected profitability.” [Philip Arestis, The Post-Keynesian Approach to Economics, p. 103] This means that the actions of the banks cannot be taken in isolation from the rest of the economy. Money, credit and banks are an essential part of the capitalist system and they cannot be ar-
tificially isolated from the expectations, pressures and influences of that system.

Let us assume that the banks desire to maintain a loans to savings ratio of one and try to adjust their interest rates accordingly. Firstly, changes in the rate of interest “produce only a very small, if any, movement in business investment” according to empirical evidence [Op. Cit., pp. 82–83] and that “the demand for credit is extremely inelastic with respect to interest rates.” [L. Randall Wray, Op. Cit., p. 245] Thus, to keep the supply of savings in line with the demand for loans, interest rates would have to increase greatly (indeed, trying to control the money supply by controlling the monetary bases in this way will only lead to very big fluctuations in interest rates). And increasing interest rates has a couple of paradoxical effects.

According to economists Joseph Stiglitz and Andrew Weiss (in “Credit Rationing in Markets with Imperfect Knowledge”, American Economic Review, no. 71, pp. 393–410) interest rates are subject to what is called the “lemons problem” (asymmetrical information between buyer and seller). Stiglitz and Weiss applied the “lemons problem” to the credit market and argued (and unknowingly repeated Adam Smith) that at a given interest rate, lenders will earn lower return by lending to bad borrowers (because of defaults) than to good ones. If lenders try to increase interest rates to compensate for this risk, they may chase away good borrowers, who are unwilling to pay a higher rate, while perversely not chasing away incompetent, criminal, or malignantly optimistic borrowers. This means that an increase in interest rates may actually increase the possibilities of crisis, as more loans may end up in the hands of defaulters.

This gives banks a strong incentive to keep interest rates lower than they otherwise could be. Moreover, “increases in interest rates make it more difficult for economic agents to meet their debt repayments” [Philip Arestis, Op. Cit., pp. 237–8] which means when interest rates are raised, defaults will increase and place pressures

man nature.” In other words, Rothbard defines humans as having the “distinct and specific properties” that, given his assumptions, will allow his dogma (private state capitalism) to be inferred as the “natural” society for humans.

Rothbard claims that “if A, B, C, etc., have differing attributes, it follows that they have different natures.” [The Ethics of Liberty, p. 9] Does this means that as every individual is unique (have different attributes), they have different natures? Skin and hair colour are different attributes, does this mean that red haired people have different natures than blondes? That black people have different natures than white (and such a “theory” of “natural law” was used to justify slavery — yes, slaves are human but they have “different natures” than their masters and so slavery is okay). Of course Rothbard aggregates “attributes” to species level, but why not higher? Humans are primates, does that mean we have the same natures as monkeys or gorillas? We are also mammals as well, we share many of the same attributes as whales and dogs. Do we have similar natures?

But this is by the way. To continue we find that after defining certain “natures,” Rothbard attempts to derive “Natural Rights and Laws” from them. However, these “Natural Laws” are quite strange, as they can be violated in nature! Real natural laws (like the law of gravity) cannot be violated and therefore do not need to be enforced. The “Natural Laws” the “Libertarian” desires to foist upon us are not like this. They need to be enforced by humans and the institutions they create. Hence, Libertarian “Natural Laws” are more akin to moral prescriptions or juridical laws. However, this does not stop Rothbard explicitly “placing” his “Natural Laws” “alongside physical or ‘scientific’ natural laws.” [The Ethics of Liberty, p. 42]

So why do so many Libertarians use the term “Natural Law?” Simply, it gives them the means by which to elevate their opinions, dogmas, and prejudices to a metaphysical level where nobody will dare to criticise or even think about them. The term smacks of re-
of the fact that unlike gravity their “Natural Laws” can be violated, do they use the term at all? Benjamin Tucker said that “Natural Law” was a “religious” concept — and this provides a clue. To say “Do not violate these rights, otherwise I will get cross” does not have quite the same power as “Do not violate these laws, or you will go to hell”. So to point out that “Natural Law” is not the same as the law of gravity (because it has to be enforced by humans) is not attacking some kind of “straw man” — it is exposing the fact that these “Natural Laws” are just the personal prejudices of those who hold them. If they do not want then to be exposed as such then they should call their laws what they are — personal ethical laws — rather than compare them to the facts of nature.

11.1 Why the term “Natural Law” in the first place?

Murray Rothbard claims that “Natural Law theory rests on the insight... that each entity has distinct and specific properties, a distinct ‘nature,’ which can be investigated by man’s reason” [For a New Liberty, p. 25] and that “man has rights because they are natural rights. They are grounded in the nature of man.” [The Ethics of Liberty, p. 155]

To put it bluntly, this form of “analysis” was originated by Aristotle and has not been used by science for centuries. Science investigates by proposing theories and hypotheses to explain empirical observations, testing and refining them by experiment. In stark contrast, Rothbard invents definitions (“distinct” “natures”) and then draws conclusions from them. Such a method was last used by the medieval Church and is devoid of any scientific method. It is, of course, a fiction. It attempts to deduce the nature of a “natural” society from a priori considerations of the “innate” nature of human beings, which just means that the assumptions necessary to reach the desired conclusions have been built into the definition of “hu-
This is because increasing interest rates may increase savings but it also reduce consumption (“high interest rates also deter both consumers and companies from spending, so that the domestic economy is weakened and unemployment rises” [Paul Ormerod, The Death of Economics, p. 70]). This means that firms can face a drop off in demand, causing them problems and (perhaps) leading to a lack of profits, debt repayment problems and failure. An increase in interest rates also reduces demand for investment goods, which also can cause firms problems, increase unemployment and so on. So an increase in interest rates (particularly a sharp rise) could reduce consumption and investment (i.e. reduce aggregate demand) and have a ripple effect throughout the economy which could cause a slump to occur.

In other words, interest rates and the supply and demand of savings/loans they are meant to reflect may not necessarily move an economy towards equilibrium (if such a concept is useful). Indeed, the workings of a “pure” banking system without credit money may increase unemployment as demand falls in both investment and consumption in response to high interest rates and a general shortage of money due to lack of (credit) money resulting from the “tight” money regime implied by such a regime (i.e. the business cycle would still exist). This was the case of the failed Monetarist experiments on the early 1980s when central banks in America and Britain tried to pursue a “tight” money policy. The “tight” money policy did not, in fact, control the money supply. All it did do was increase interest rates and lead to a serious financial crisis and a deep recession (as Wray notes, “the central bank uses tight money polices to raise interest rates” [Op. Cit., p. 262]). This recession, we must note, also broke the backbone of working class resistance and the unions in both countries due to the high levels of unemployment it generated. As intended, we are sure.

Such an outcome would not surprise anarchists, as this was a key feature of the Individualist and Mutualist Anarchists’ arguments against the “money monopoly” associated with specie.

Lastly, it could be maintained that it is a common “straw man” to maintain that supporters of Natural Law argue that their Laws are like the laws of physics (and so are capable of stopping people’s actions just as the law of gravity automatically stops people flying from the Earth). But that is the whole point — using the term “Natural Law” implies that the moral rights and laws that its supporters argue for are to be considered just like the law of gravity (although they acknowledge, of course, that unlike gravity, their “natural laws” can be violated in nature). Far from saying that the rights they support are just that (i.e. rights they think are good) they try to associate them with universal facts. For example, Lysander Spooner (who, we must stress, used the concept of “Natural law” to oppose the transformation of America into a capitalist society, unlike Rand, Nozick and Rothbard who use it to defend capitalism) stated that:

“the true definition of law is, that it is a fixed, immutable, natural principle; and not anything that man ever made, or can make, unmake, or alter. Thus we speak of the laws of matter, and the laws of mind; of the laws of gravitation, the laws of light, heat, and electricity…etc., etc…. The law of justice is just as supreme and universal in the moral world, as these others are in the mental or physical world; and is as unalterable as are these by any human power. And it is just as false and absurd to talk of anybody’s having the power to abolish the law of justice, and set up their own in its stead, as it would be to talk of their having the power to abolish the law of gravitation, or any other natural laws of the universe, and set up their own will in the place of them.” [A Letter to Grover Cleveland, p. 88]

Rothbard and other capitalist supporters of “Natural Law” make the same sort of claims (as we will see). Now, why, if they are aware
What is the myth of “Natural Law”?

Natural Law, and the related concept of Natural Rights, play an important part in Libertarian and “anarcho”-capitalist ideology. Right-libertarians are not alone in claiming that their particular ideology is based on the “law of nature”. Hitler, for one, claimed the same thing for Nazi ideology. So do numerous other demagogues, religious fanatics, and political philosophers. However, each likes to claim that only their “natural law” is the “real” one, all the others being subjective impositions. We will ignore these assertions (they are not arguments) and concentrate on explaining why natural law, in all its forms, is a myth. In addition, we will indicate its authoritarian implications.

Instead of such myths anarchists urge people to “work it out for themselves” and realise that any ethical code is subjective and not a law of nature. If its a good “code”, then others will become convinced of it by your arguments and their intellect. There is no need to claim its a function of “man’s nature”!

The following books discuss the subject of “Natural Law” in greater depth and are recommended for a fuller discussion of the issues raised in this section:

We should note that these books are written by people associated, to some degree, with right-libertarianism and, of course, we should point out that not all right-libertarians subscribe to “natural law” theories (David Friedman, for example, does not). However, such a position seems to be the minority in right-Libertarianism (Ayn Rand, Robert Nozick and Murray Rothbard, among others, did subscribe to it). We should also point out that the Individualist Anarchist Lysander Spooner also subscribed to “natural laws” (which shows that, as we noted above, the concept is not limited to one particular theory or ideology). We present a short critique of Spooner’s ideas on this subject in section G.7.
investment funds, which obstructs further the possibility of smooth transitions in industrial activity. Because of their past record of profitability, large enterprises have higher credit ratings and easier access to credit facilities, and they are able to put up larger collateral for a loan.” [Michael A. Bernstein, *The Great Depression*, p. 106] As we noted in section C.5.1, the larger the firm, the lower the interest rate they have to pay. Thus banks routinely lower their interest rates to their best clients even though the future is uncertain and past performance cannot and does not indicate future returns. Therefore it seems a bit strange to maintain that the interest rate will bring savings and loans into line if there are different rates being offered.

And, of course, private banks cannot affect the underlying fundamentals that drive the economy — like productivity, working class power and political stability — any more than central banks (although central banks can influence the speed and gentleness of adjustment to a crisis).

Indeed, given a period of full employment a system of private banks may actually speed up the coming of a slump. As we argue in the next section, full employment results in a profits squeeze as firms face a tight labour market (which drives up costs) and, therefore, increased workers’ power at the point of production and in their power of exit. In a central bank system, capitalists can pass on these increasing costs to consumers and so maintain their profit margins for longer. This option is restricted in a private banking system as banks would be less inclined to devalue their money. This means that firms will face a profits squeeze sooner rather than later, which will cause a slump as firms cannot make ends meet. As Reekie notes, inflation “can temporarily reduce employment by postponing the time when misdirected labour will be laid off” but as Austrian’s (like Monetarists) think “inflation is a monetary phenomenon” he does not understand the real causes of inflation and what they imply for a “pure” capitalist system [*Op. Cit.*, p. 67, p. 74]. As Paul Ormerod points out “the claim that inflation is always and everywhere purely caused by increases in the money supply, and monopoly (which included the use of specie as money) as the means by which capitalists ensured that “the labourers ... [are] kept in the condition of wage labourers,” and reduced “to the conditions of servants; and subject to all such extortions as their employers ... may choose to practice upon them”, indeed they became the “mere tools and machines in the hands of their employers”. With the end of this monopoly, “[t]he amount of money, capable of being furnished ... [would assure that all would] be under no necessity to act as a servant, or sell his or her labour to others.” [Lysander Spooner, *A Letter to Grover Cleveland*, p. 47, p. 39, p. 50, p. 41] In other words, a specie based system (as desired by many “anarcho”-capitalists) was considered a key way of maintaining wage labour and exploitation.

Interestingly, since the end of the era of the Gold Standard (and so commodity money) popular debate, protest and concern about money has disappeared. The debate and protest was in response to the effects of commodity money on the economy — with many people correctly viewing the seriously restrictive monetary regime of the time responsible for economic problems and crisis as well as increasing inequalities. Instead radicals across the political spectrum urged a more flexible regime, one that did not cause wage slavery and crisis by reducing the amount of money in circulation when it could be used to expand production and reduce the impact of slumps. Needless to say, the Federal Reserve system in the USA was far from the institution these populists wanted (after all, it is run by and for the elite interests who desired its creation).

That the laissez-faire system was so volatile and panic-ridden suggests that “anarcho”-capitalist dreams of privatising everything, including banking, and everything will be fine are very optimistic at best (and, ironically, it was members of the capitalist class who lead the movement towards state-managed capitalism in the name of “sound money”).
or depression, by way of comparison). Overall, the economy went into a slump, panic or crisis in 1807, 1817, 1828, 1834, 1837, 1854, 1857, 1873, 1882, and 1893 (in addition, 1903 and 1907 were also crisis years).

Part of this instability came from the era’s banking system. “Lack of a central banking system,” writes Richard Du Boff, “until the Federal Reserve act of 1913 made financial panics worse and business cycle swings more severe” [Accumulation and Power, p. 177] It was in response to this instability that the Federal Reserve system was created; and as Doug Henwood notes “the campaign for a more rational system of money and credit was not a movement of Wall Street vs. industry or regional finance, but a broad movement of elite bankers and the managers of the new corporations as well as academics and business journalists. The emergence of the Fed was the culmination of attempts to define a standard of value that began in the 1890s with the emergence of the modern professionally managed corporation owned not by its managers but dispersed public shareholders.” [Wall Street, p. 93] Indeed, the Bank of England was often forced to act as lender of last resort to the US, which had no central bank.

In the decentralised banking system of the 19th century, during panics thousands of banks would hoard resources, so starving the system for liquidity precisely at the moment it was most badly needed. The creation of trusts was one way in which capitalists tried to manage the system’s instabilities (at the expense of consumers) and the corporation was a response to the outlawing of trusts. “By internalising lots of the competitive system’s gaps — by bring more transactions within the same institutional walls — corporations greatly stabilised the economy.” [Henwood, Op. Cit., p. 94]

All during the hey-day of laissez faire we also find popular protests against the money system used, namely specie (in particular gold), which was considered as a hindrance to economic activity and expansion (as well as being a tool for the rich). The Individualist Anarchists, for example, considered the money that there the rate of inflation bears a stable, predictable relationship to increases in the money supply is ridiculous.” And he notes that “[i]ncreases in the rate of inflation tend to be linked to falls in unemployment, and vice versa” which indicates its real causes — namely in the balance of class power and in the class struggle. [The Death of Economics, p. 96, p. 131]

Moreover, if we do take the Austrian theory of the business cycle at face value we are drawn to conclusion that in order to finance investment savings must be increased. But to maintain or increase the stock of loanable savings, inequality must be increased. This is because, unsurprisingly, rich people save a larger proportion of their income than poor people and the proportion of profits saved are higher than the proportion of wages. But increasing inequality (as we argued in section 3.1) makes a mockery of right-libertarian claims that their system is based on freedom or justice.

This means that the preferred banking system of “anarcho”-capitalism implies increasing, not decreasing, inequality within society. Moreover, most firms (as we indicated in section C.5.1) fund their investments with their own savings which would make it hard for banks to loan these savings out as they could be withdrawn at any time. This could have serious implications for the economy, as banks refuse to fund new investment simply because of the uncertainty they face when accessing if their available savings can be loaned to others (after all, they can hardly loan out the savings of a customer who is likely to demand them at any time). And by refusing to fund new investment, a boom could falter and turn to slump as firms do not find the necessary orders to keep going.

So, would market forces create “sound banking”? The answer is probably not. The pressures on banks to make profits come into conflict with the need to maintain their savings to loans ration (and so the confidence of their customers). As Wray argues, “as banks are profit seeking firms, they find ways to increase their liabilities which don’t entail increases in reserve requirements” and "[i]f banks
share the profit expectations of prospective borrowers, they can create credit to allow [projects/investments] to proceed.” [Op. Cit., p. 295, p. 283] This can be seen from the historical record. As Kindleberger notes, “the market will create new forms of money in periods of boom to get around the limit” imposed on the money supply [Op. Cit., p. 63]. Trade credit is one way, for example. Under the Monetarist experiments of 1980s, there was “deregulation and central bank constraints raised interest rates and created a moral hazard — banks made increasingly risky loans to cover rising costs of issuing liabilities. Rising competition from nonbanks and tight money policy forced banks to lower standards and increase rates of growth in an attempt to ‘grow their way to profitability’” [Op. Cit., p. 293]

Thus credit money (“fiduciary media”) is an attempt to overcome the scarcity of money within capitalism, particularly the scarcity of specie money. The pressures that banks face within “actually existing” capitalism would still be faced under “pure” capitalism. It is likely (as Reekie acknowledges) that credit money would still be created in response to the demands of business people (although not at the same level as is currently the case, we imagine). The banks, seeking profits themselves and in competition for customers, would be caught between maintaining the value of their business (i.e. their money) and the needs to maximise profits. As a boom develops, banks would be tempted to introduce credit money to maintain it as increasing the interest rate would be difficult and potentially dangerous (for reasons we noted above). Thus, if credit money is not forthcoming (i.e. the banks stick to the Austrian claims that loans must equal savings) then the rise in interest rates required will generate a slump. If it is forthcoming, then the danger of over-investment becomes increasingly likely. All in all, the business cycle is part of capitalism and not caused by “external” factors like the existence of government.

As Reekie notes, to Austrians “ignorance of the future is endemic” [Op. Cit., p. 117] but you would be forgiven for thinking that this is not the case when it comes to investment. An individual firm can-

10.3 Was laissez-faire capitalism stable?

Firstly, we must state that a pure laissez-faire capitalist system has not existed. This means that any evidence we present in this section can be dismissed by right-libertarians for precisely this fact — it was not “pure” enough. Of course, if they were consistent, you would expect them to shun all historical and current examples of capitalism or activity within capitalism, but this they do not. The logic is simple — if X is good, then it is permissible to use it. If X is bad, the system is not pure enough.

However, as right-libertarians do use historical examples so shall we. According to Murray Rothbard, there was “quasi-laissez-faire industrialisation [in] the nineteenth century” [The Ethics of Liberty, p. 264] and so we will use the example of nineteenth century America — as this is usually taken as being the closest to pure laissez-faire — in order to see if laissez-faire is stable or not.

Yes, we are well aware that 19th century USA was far from laissez-faire — there was a state, protectionism, government economic activity and so on — but as this example has been often used by right-Libertarians’ themselves (for example, Ayn Rand) we think that we can gain a lot from looking at this imperfect approximation of “pure” capitalism (and as we argued in section 8, it is the “quasi” aspects of the system that counted in industrialisation, not the laissez-faire ones).

So, was 19th century America stable? No, it most definitely was not.

Firstly, throughout that century there were a continual economic booms and slumps. The last third of the 19th century (often considered as a heyday of private enterprise) was a period of profound instability and anxiety. Between 1867 and 1900 there were 8 complete business cycles. Over these 396 months, the economy expanded during 199 months and contracted during 197. Hardly a sign of great stability (since the end of world war II, only about a fifth of the time has spent in periods of recession
unemployment will exist in their system — but “temporary” unemployment is not full employment. Of course, you could maintain that all unemployment is “voluntary” and get round the problem by denying it, but that will not get us very far.

So it is all fine and well saying that “libertarian” capitalism would be based upon the maxim “From each as they choose, to each as they are chosen.” [Robert Nozick, *Anarchy, State, and Utopia*, p. 160] But if the labour market is such that workers have little option about what they “choose” to give and fear that they will not be chosen, then they are at a disadvantage when compared to their bosses and so “consent” to being treated as a resource from the capitalist can make a profit from. And so this will result in any “free” contract on the labour market favouring one party at the expense of the other — as can be seen from “actually existing capitalism”.

Thus any “free exchange” on the labour market will usually not reflect the true desires of working people (and who will make all the “adjusting” and end up wanting what they get). Only when the economy is approaching full employment will the labour market start to reflect the true desires of working people and their wage start to approach its full product. And when this happens, profits are squeezed and capitalism goes into slump and the resulting unemployment disciplines the working class and restores profit margins. Thus full employment will be the exception rather than the rule within capitalism (and that is a conclusion which the historical record indicates).

In other words, in a normally working capitalist economy any labour contracts will not create relationships based upon freedom due to the inequalities in power between workers and capitalists. Instead, any contracts will be based upon domination, not freedom. Which prompts the question, how is libertarian capitalism libertarian if it erodes the liberty of a large class of people?

not know whether its investment project will generate the stream of returns necessary to meet the stream of payment commitments undertaken to finance the project. And neither can the banks who fund those projects. Even if a bank does not get tempted into providing credit money in excess of savings, it cannot predict whether other banks will do the same or whether the projects it funds will be successful. Firms, looking for credit, may turn to more flexible competitors (who practice reserve banking to some degree) and the inflexible bank may see its market share and profits decrease. After all, commercial banks “typically establish relations with customers to reduce the uncertainty involved in making loans. Once a bank has entered into a relationship with a customer, it has strong incentives to meet the demands of that customer.” [Wray, *Op. Cit.*, p. 85]

There are example of fully privatised banks. For example, in the United States (“which was without a central bank after 1837”) “the major banks in New York were in a bind between their roles as profit seekers, which made them contributors to the instability of credit, and as possessors of country deposits against whose instability they had to guard.” [Kindleberger, *Op. Cit.*, p. 85]

In Scotland, the banks were unregulated between 1772 and 1845 but “the leading commercial banks accumulated the notes of lessor ones, as the Second Bank of the United States did contemporaneously in [the USA], ready to convert them to specie if they thought they were getting out of line. They served, that is, as an informal controller of the money supply. For the rest, as so often, historical evidence runs against strong theory, as demonstrated by the country banks in England from 1745 to 1835, wildcat banking in Michigan in the 1830s, and the latest experience with bank deregulation in Latin America.” [*Op. Cit.*, p. 82] And we should note there were a few banking “wars” during the period of deregulation in Scotland which forced a few of the smaller banks to fail as the bigger ones refused their money and that there was a major bank failure in the Ayr Bank.

Kendleberger argues that central banking “arose to impose control on the instability of credit” and did not cause the instability
which right-libertarians maintain it does. And as we note in section 10.3, the USA suffered massive economic instability during its period without central banking. Thus, if credit money is the cause of the business cycle, it is likely that a “pure” capitalism will still suffer from it just as much as “actually existing” capitalism (either due to high interest rates or over-investment).

In general, as the failed Monetarist experiments of the 1980s prove, trying to control the money supply is impossible. The demand for money is dependent on the needs of the economy and any attempt to control it will fail (and cause a deep depression, usually via high interest rates). The business cycle, therefore, is an endogenous phenomenon caused by the normal functioning of the capitalist economic system. Austrian and right-libertarian claims that “slump flows boom, but for a totally unnecessary reason: government inspired mal-investment” [Reekie, Op. Cit., p. 74] are simply wrong. Over-investment does occur, but it is not “inspired” by the government. It is “inspired” by the banks need to make profits from loans and from businesses need for investment funds which the banks accommodate. In other words, by the nature of the capitalist system.

10.2 How does the labour market effect capitalism?

In many ways, the labour market is the one that affects capitalism the most. The right-libertarian assumption (like that of mainstream economics) is that markets clear and, therefore, the labour market will also clear. As this assumption has rarely been proven to be true in actuality (i.e. periods of full employment within capitalism are few and far between), this leaves its supporters with a problem — reality contradicts the theory.

The theory predicts full employment but reality shows that this is not the case. Since we are dealing with logical deductions from assumptions, obviously the theory cannot be wrong and so we must identify external factors which cause the business cycle (and so power and gain increased workers’ control, create co-operatives and so reform away capitalism. This was the argument of the Mutualist and Individualist anarchists and it does have its merits. However, it is clear (see section J.5.12) that bosses hate to have their authority reduced and so combat workers’ control whenever they can. The logic is simple, if workers increase their control within the workplace the manager and bosses may soon be out of a job and (more importantly) they may start to control the allocation of profits. Any increase in working class militancy may provoke capitalists to stop/reduce investment and credit and so create the economic environment (i.e. increasing unemployment) necessary to undercut working class power.

In other words, a period of full unemployment is not sufficient to reform capitalism away. Full employment (nevermind any struggle over workers’ control) will reduce profits and if profits are reduced then firms find it hard to repay debts, fund investment and provide profits for shareholders. This profits squeeze would be enough to force capitalism into a slump and any attempts at gaining workers’ self-management in periods of high employment will help push it over the edge (after all, workers’ control without control over the allocation of any surplus is distinctly phoney). Moreover, even if we ignore the effects of full employment may not last due to problems associated with over-investment (see section C.7.2), credit and interest rate problems (see section 10.1) and realisation/aggregate demand disjoints. Full employment adds to the problems associated with the capitalist business cycle and so, if class struggle and workers power did not exist or cost problem, capitalism would still not be stable.

If equilibrium is a myth, then so is full employment. It seems somewhat ironic that “anarcho”-capitalists and other right-libertarians maintain that there will be equilibrium (full employment) in the one market within capitalism it can never actually exist in! This is usually quietly acknowledged by most right-libertarians, who mention in passing that some “temporary”
to maintain a given standard of living. Falling wages may cause the number of workers seeking employment to increase, causing a full further fall in wages and so on (and this is ignoring the effects of lowering wages on demand discussed in section C.9).

The paradox of piece work is an important example of this effect. As Schor argues, “piece-rate workers were caught in a viscous downward spiral of poverty and overwork... When rates were low, they found themselves compelled to make up in extra output what they were losing on each piece. But the extra output produced glutted the market and drove rates down further.” [Juliet C. Schor, The Overworked American, p. 58]

Thus, in the face of reducing wages, the labour market may see an accumulative move away from (rather than towards) full employment. The right-libertarian argument is that unemployment is caused by real wages being too high which in turn flows from the assumption that markets clear. If there is unemployment, then the price of the commodity labour is too high — otherwise supply and demand would meet and the market clear. But if, as we argued above, unemployment is essential to discipline workers then the labour market cannot clear except for short periods. If the labour market clears, profits are squeezed. Thus the claim that unemployment is caused by “too high” real wages is false (and as we argue in section C.9, cutting these wages will result in deepening any slump and making recovery longer to come about).

In other words, the assumption that the labour market must clear is false, as is any assumption that reducing wages will tend to push the economy quickly back to full employment. The nature of wage labour and the “commodity” being sold (i.e. human labour/time/liberty) ensure that it can never be the same as others. This has important implications for economic theory and the claims of right-libertarians, implications that they fail to see due to their vision of labour as a commodity like any other.

The question arises, of course, of whether, during periods of full employment, workers could not take advantage of their market unemployment). In this way attention is diverted away from the market and its workings — after all, it is assumed that the capitalist market works — and onto something else. This “something else” has been quite a few different things (most ridiculously, sun spots in the case of one of the founders of marginalist economics, William Stanley Jevons). However, these days most pro-free market capitalist economists and right-libertarians have now decided it is the state.

In this section of the FAQ we will present a case that maintains that the assumption that markets clear is false at least for one, unique, market — namely, the market for labour. As the fundamental assumption underlying “free market” capitalism is false, the logically consistent superstructure built upon comes crashing down. Part of the reason why capitalism is unstable is due to the commodification of labour (i.e. people) and the problems this creates. The state itself can have positive and negative impacts on the economy, but removing it or its influence will not solve the business cycle.

Why is this? Simply due to the nature of the labour market. Anarchists have long realised that the capitalist market is based upon inequalities and changes in power. Proudhon argued that “[t]he manufacturer says to the labourer, ‘You are as free to go elsewhere with your services as I am to receive them. I offer you so much.’ The merchant says to the customer, ‘Take it or leave it; you are master of your money, as I am of my goods. I want so much.’ Who will yield? The weaker.” He, like all anarchists, saw that domination, oppression and exploitation flow from inequalities of market/economic power and that the “power of invasion lies in superior strength.” [What is Property?, p. 216, p. 215]

This applies with greatest force to the labour market. While mainstream economics and right-libertarian variations of it refuse to acknowledge that the capitalist market is a based upon hierarchy and power, anarchists (and other socialists) do not share this opinion. And because they do not share this understanding with
anarchists, right-libertarians will never be able to understand capitalism or its dynamics and development. Thus, when it comes to the labour market, it is essential to remember that the balance of power within it is the key to understanding the business cycle. Thus the economy must be understood as a system of power.

So how does the labour market effect capitalism? Let us consider a growing economy, on that is coming out of a recession. Such a growing economy stimulates demand for employment and as unemployment falls, the costs of finding workers increase and wage and condition demands of existing workers intensify. As the economy is growing and labour is scare, the threat associated with the hardship of unemployment is weakened. The share of profits is squeezed and in reaction to this companies begin to cut costs (by reducing inventories, postponing investment plans and laying off workers). As a result, the economy moves into a downturn. Unemployment rises and wage demands are moderated. Eventually, this enables the share of profits first of all to stabilise, and then rise. Such an “interplay between profits and unemployment as the key determinants of business cycles” is “observed in the empirical data.” [Paul Ormerod, The Death of Economics, p. 188]

Thus, as an economy approaches full employment the balance of power on the labour market changes. The sack is no longer that great a threat as people see that they can get a job elsewhere easily. Thus wages and working conditions increase as companies try to get new (and keep) existing employees and output is harder to maintain. In the words of economist William Lazonick, labour “that is able to command a higher price than previously because of the appearance of tighter labour markets is, by definition, labour that is highly mobile via the market. And labour that is highly mobile via the market is labour whose supply of effort is difficult for managers to control in the production process. Hence, the advent of tight labour markets generally results in more rapidly rising average costs ...as well as upward shifts in the average cost curve...” [Business Organisation and the Myth of the Market Economy, p. 106]

that capitalists usually go for the later. After all, the sack is an important disciplining device and firing workers can make the remaining employees more inclined to work harder and be more obedient.

And, of course, many employers are not inclined to hire over-qualified workers. This is because, once the economy picks up again, their worker has a tendency to move elsewhere and so it can cost them time and money finding a replacement and training them. This means that involuntary unemployment can easily occur, so reducing tendencies towards full employment even more. In addition, one of the assumptions of the standard marginalist economic model is one of decreasing returns to scale. This means that as employment increases, costs rise and so prices also rise (and so real wages fall). But in reality many industries have increasing returns to scale, which means that as production increases unit costs fall, prices fall and so real wages rise. Thus in such an economy unemployment would increase simply because of the nature of the production process!

Moreover, as we argued in-depth in section C.9, a cut in money wages is not a neutral act. A cut in money wages means a reduction in demand for certain industries, which may have to reduce the wages of its employees (or fire them) to make ends meet. This could produce a accumulative effect and actually increase unemployment rather than reduce it.

In addition, there are no “self-correcting” forces at work in the labour market which will quickly bring employment back to full levels. This is for a few reasons. Firstly, the supply of labour cannot be reduced by cutting back production as in other markets. All we can do is move to other areas and hope to find work there. Secondly, the supply of labour can sometimes adjust to wage decreases in the wrong direction. Low wages might drive workers to offer a greater amount of labour (i.e. longer hours) to make up for any short fall (or to keep their job). This is usually termed the “efficiency wage” effect. Similarly, another family member may seek employment in order...
abolished (or, at the very least, become a minimum state). The aim of the capitalist class is to maximise their profits and to do this they invest in labour saving machinery and otherwise attempt to increase productivity. But increasing productivity means that the prices of goods fall and falling prices mean increasing real wages. It is high real wages that, according to right-libertarians, that cause unemployment. So as a reward for increasing productivity, workers will have to have their money wages cut in order to stop unemployment occurring! For this reason some employers might refrain from cutting wages in order to avoid damage to morale — potentially an important concern.

Moreover, wage contracts involve time — a contract will usually agree a certain wage for a certain period. This builds in rigidity into the market, wages cannot be adjusted as quickly as other commodity prices. Of course, it could be argued that reducing the period of the contract and/or allowing the wage to be adjusted could overcome this problem. However, if we reduce the period of the contract then workers are at a suffer disadvantage as they will not know if they have a job tomorrow and so they will not be able to easily plan their future (an evil situation for anyone to be in). Moreover, even without formal contracts, wage renegotiation can be expensive. After all, it takes time to bargain (and time is money under capitalism) and wage cutting can involve the risk of the loss of mutual good will between employer and employee. And would you give your boss the power to “adjust” your wages as he/she thought was necessary? To do so would imply an altruistic trust in others not to abuse their power.

Thus a “pure” capitalism would be constantly seeing employment increase and decrease as productivity levels change. There exist important reasons why the labour market need not clear which revolve around the avoidance/delaying of wage cuts by the actions of capitalists themselves. Thus, given a choice between cutting wages for all workers and laying off some workers without cutting the wages of the remaining employees, it is unsurprising

In other words, under conditions of full-employment “employers are in danger of losing the upper hand.” [Juliet B. Schor, The Overworked American, p. 75] Schor argues that “employers have a structural advantage in the labour market, because there are typically more candidates ready and willing to endure this work marathon [of long hours] than jobs for them to fill.” [p. 71] Thus the labour market is usually a buyers market, and so the sellers have to compromise. In the end, workers adapt to this inequality of power and instead of getting what they want, they want what they get.

But under full employment this changes. As we argued in section B.4.4 and section C.7, in such a situation it is the bosses who have to start compromising. And they do not like it. As Schor notes, America “has never experienced a sustained period of full employment. The closest we have gotten is the late 1960s, when the overall unemployment rate was under 4 percent for four years. But that experience does more to prove the point than any other example. The trauma caused to business by those years of a tight labour market was considerable. Since then, there has been a powerful consensus that the nation cannot withstand such a low rate of unemployment.” [Op. Cit., pp. 75–76]

So, in other words, full employment is not good for the capitalist system due to the power full employment provides workers. Thus unemployment is a necessary requirement for a successful capitalist economy and not some kind of aberration in an otherwise healthy system. Thus “anarcho”-capitalist claims that “pure” capitalism will soon result in permanent full employment are false. Any moves towards full employment will result in a slump as capitalists see their profits squeezed from below by either collective class struggle or by individual mobility in the labour market.

This was recognised by Individualist Anarchists like Benjamin Tucker, who argued that mutual banking would “give an unheard of impetus to business, and consequently create an unprecedented demand for labour, — a demand which would always be in excess of the
supply, directly contrary of the present condition of the labour mar-
ket." [The Anarchist Reader, pp. 149–150] In other words, full
employment would end capitalist exploitation, drive non-labour in-
come to zero and ensure the worker the full value of her labour —
in other words, end capitalism. Thus, for most (if not all) anarchists
the exploitation of labour is only possible when unemployment ex-
ists and the supply of labour exceeds the demand for it. Any move
towards unemployment will result in a profits squeeze and either
the end of capitalism or an economic slump.

Indeed, as we argued in the last section, the extended periods of
(approximately) full employment until the 1960s had the advantage
that any profit squeeze could (in the short run anyway) be passed
onto working class people in the shape of inflation. As prices rise,
labour is made cheaper and profits margins supported. This option
is restricted under a “pure” capitalism (for reasons we discussed in
the last section) and so “pure” capitalism will be affected by full
employment faster than “impure” capitalism.

As an economy approaches full employment, “hiring new
workers suddenly becomes much more difficult. They are harder to
find, cost more, and are less experiences. Such shortages are extremely
costly for a firm.” [Schor, Op. Cit., p. 75] This encourages a firm
to pass on these rises to society in the form of price rises, so
creating inflation. Workers, in turn, try to maintain their standard
of living. “Every general increase in labour costs in recent years,”
note J. Brecher and J. Costello in the late 1970s, “has followed,
rather than preceded, an increase in consumer prices. Wage increases
have been the result of workers’ efforts to catch up after their
incomes have already been eroded by inflation. Nor could it easily
be otherwise. All a businessman has to do is to make an announcement... Wage rates ... are primarily determined
by contracts” and so cannot be easily adjusted in the short term.
[Common Sense for Bad Times, p. 120]

These full employment pressures will still exist with “pure”
capitalism (and due to the nature of the banking system will
not have the safety value of inflation). This means that periodic
profit squeezes will occur, due to the nature of a tight labour
market and the increased power of workers this generates. This in
turn means that a “pure” capitalism will be subject to periods of
unemployment (as we argued in section C.9) and so still have a
business cycle. This is usually acknowledged by right-libertarians
in passing, although they seem to think that this is purely a
“short-term” problem (it seems a strange “short-term” problem
that continually occurs).

But such an analysis is denied by right-libertarians. For them
government action, combined with the habit of many labour
unions to obtain higher than market wage rates for their members,
creates and exacerbates mass unemployment. This flows from the
deductive logic of much capitalist economics. The basic assump-
tion of capitalism is that markets clear. So if unemployment exists
then it can only be because the price of labour (wages) is too high
(Austrian Economist W. Duncan Reekie argues that unemploy-
ment will “disappear provided real wages are not artificially high”
[Markets, Entrepreneurs and Liberty, p. 72]).

Thus the assumption provokes the conclusion — unemployment
is caused by an unclearing market as markets always clear. And the
cause for this is either the state or unions. But what if the labour
market cannot clear without seriously damaging the power and
profits of capitalists? What if unemployment is required to max-
imise profits by weakening labours’ bargaining position on the
market and so maximising the capitalists power? In that case un-
employment is caused by capitalism, not by forces external to it.

However, let us assume that the right-libertarian theory is cor-
rect. Let us assume that unemployment is all the fault of the selfish
unions and that a job-seeker “who does not want to wait will always
get a job in the unhampered market economy.” [von Mises, Human
Action, p. 595]

Would crushing the unions reduce unemployment? Let us as-
sume that the unions have been crushed and government has been
