In addition, the Makhnovists were following the Russian Anarcho-Syndicalists who argued for "effective soviets organised on collective lines with the direct delegation of workers and peasants .. . and not political chatterboxes gaining entry through party lists and turning the soviets into talking-shops". [The Anarchists in the Russian Revolution, Paul Avrich (ed.), p. 118] This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounted that in early 1920 a chemical factory "put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he — eight (in an open vote)." [quoted by Israel Getzler, Martov, p. 202]

How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be "delegates" of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected as mandated and recallable delegates to a soviet from a workplace they have never visited except, perhaps, to gather votes?

This applies, needless to say, to other areas of life. Anarchists do not think that social life can be reduced to political and economic associations alone. Individuals have many different interests and desires which they must express in order to have a truly free and fulfilling life. Therefore an anarchist society will see the development of numerous voluntary associations and groups to express these interests. For example, there would be consumer groups, musical groups, scientific associations, art associations, clubs, housing co-operatives and associations, craft and hobby guilds, fan clubs, to join a commune (for whatever reason), their freedoms must be respected. However, this also means that they cannot benefit from communal activity and resources (such as a free parks, hospitals, and so forth) and have to pay for their use. As long as they do not exploit or oppress others, an anarchist community would respect their decision (as discussed in section G.2.1, for example).

Many who oppose anarchist self-management in the name of freedom often do so because they desire to oppress and exploit others. In other words, they oppose participatory communities because they (rightly) fear that this would restrict their ability to grow rich off the labour of others (this type of opposition can be seen from history, when rich elites, in the name of liberty, have replaced democratic forms of social decision making with representative or authoritarian ones — see section B.2.5).

It goes without saying that the minority, as in any society, will exist within the ethical norms of the surrounding society and they will be have to adhere to them in the same sense that they have to adhere to not murdering people (few sane people would say that forcing people not to commit murder is a restriction of their liberty). Therefore, while allowing the maximum of individual freedom of dissent, an anarchist community would still have to apply its ethical standards to those beyond that community. Individuals would not be allowed to murder, harm or enslave others and claim that they are allowed to do so because they are not part of the local community (see section I.5.8 on crime in an anarchist society).

Similarly, individuals would not be allowed to develop private property (as opposed to possession) simply because they wanted to. This rejection of private property would not be a restriction on liberty simply because stopping the development of authority hardly counts as an authoritarian act (for an analogy, supporters of capitalism do not think that banning theft is a restriction of liberty and because this view is — currently — accepted by the majority it is enforced on the minority). Regardless of what defenders of capitalism claim, “voluntary bilateral exchanges” affect third parties.
and can harm others indirectly. This can easily be seen from examples like concentrations of wealth which have effects across society or the ecological impacts of consumption and production. This means that an anarchist society would be aware that inequality, and so statism, could develop again and take precautions against it. As Malatesta put it, some "seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas." [Anarchy, p. 43]

The suggestion that denying property ownership is a restriction in freedom is wrong, as it is the would-be capitalist who is trying to ban freedom for others on their property. Members of a free society would simply refuse to recognise the claims of private property—they would simply ignore the would-be capitalist’s pretensions and "keep out" signs. Without a state, or hired thugs, to back up their claims, they would just end up looking silly.

This means that Anarchists do not support the liberty of being a boss (anarchists will happily work with someone but not for someone). Of course, those who desire to create private property against the wishes of others expect those others to respect their wishes. So, when would-be propertarians happily fence off their "property" and exclude others from it, could not these others remember these words from Woody Guthrie’s This Land is Your Land, and act accordingly?

“As I went rumbling that dusty highway
I saw a sign that said private property
But on the other side it didn’t say nothing
This land was made for you and me” While happy to exclude people from “their” property, such owners seem more than happy to use the resources held in common by others. They are the ultimate “free riders,” desiring the benefits of society but rejecting the responsibilities that go with it. In the end, such “individualists” usually end up supporting the state (an institution they claim to

shevik.” [quoted by Peter Arshinov, The History of the Makhnovist Movement, pp. 103–4]

As such, the Makhnovists supported the right of working-class self-determination, as expressed by one delegate to a conference in February 1919:

“No party has a right to usurp governmental power into its hands ... We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers’ wish.” [quoted by Palij, Op. Cit., p. 154]

It should be mentioned that a myth has sprung up fostered by some Leninists that parties were banned from election to these bodies (for example, see Jason Yanowitz’s terrible “On the Makhno Myth” [International Socialist Review, no. 53]). These claims flow from basic ignorance of how the soviets were organised during the revolution combined with a misunderstanding of this Makhnovist proclamation from January 1920:

“Only workers participating in work vital to the people’s economy should be elected to these soviets. The representatives of political organisations have no place in the soviets of workers and peasants given that their participation in a soviet could turn it into a soviet of party political deputies, thereby leading the soviet order to perdition.” [quoted by Alexandre Skirda, Nestor Makhno: Anarchy’s Cossack, p. 164]

When the soviets were formed in Petrograd and other Russian cities in 1917 the initiative had come (unlike in 1905) from political parties and these ensured that they had representatives from political parties within their executive committees (as distinct from
means suggesting the abolition of any of the natural influences that individuals or groups of individuals exert on them. What we want is the abolition of influences which are artificial, privileged, legal, official.” [quoted by Malatesta, Anarchy, p. 51] It is only when representative government replaces self-management that political debate results in “elected dictatorship” and centralisation of power into the hands of one party which claims to speak for the whole of society, as if the latter had one mind.

This freedom of political association has existed in every anarchist revolution. During the Russian Revolution, the Makhnovists organised soviets and regional congresses at every opportunity and these saw delegates elected who were members of different political parties. For example, members of the socialist Left-SR party were active in the Makhnovist movement and attended soviet congresses (for example, the resolution of the February 1919 congress “was written by the anarchists, left Socialist Revolutionaries, and the chairman.” [Michael Palij, The Anarchism of Nestor Makhno, 1918–1921, p. 155]). The Makhnovist Revolutionary Military So- viet created at the Aleksandrovsk congress in late 1919 had three Communists elected to it while there were 18 delegates from workers at that congress, six being Mensheviks and the remaining 12 included Communists [Micheal Malet, Nestor Makhno in the Russian Civil War, p. 111 and p. 124] In the words of the Makhnovist reply to Bolshevik attempt to ban one of their congresses:

“The Revolutionary Military Council... holds itself above the pressure and influence of all parties and only recognises the people who elected it. Its duty is to accomplish what the people have instructed it to do, and to create no obstacles to any left socialist party in the propagation of ideas. Consequently, if one day the Bolshev- vik idea succeeds among the workers, the Revolutionary Military Council ... will necessarily be replaced by another organisation, ‘more revolutionary’ and more Bol-
social custom is discussed in section I.7.3). What the state does is to impose “rights” which do not have such a basis (i.e. those that protect the property of the elite) or “rights” which have been corrupted by wealth and would have been changed because of this corruption had society been free to manage its own affairs.

In summary, individuals will be free not to join a participatory community, and hence free to place themselves outside its decisions and activities on most issues that do not apply to the fundamental ethical standards of a society. Hence individuals who desire to live outside of anarchist communities would be free to live as they see fit but would not be able to commit murder, rape, create private property or other activities that harmed individuals. It should be noted, moreover, that this does not mean that their possessions will be taken from them by “society” or that “society” will tell them what to do with them. Freedom, in a complex world, means that such individuals will not be in a position to turn their possessions into property and thus recreate capitalism (for the distinction between “property” and “possessions,” see section B.3.1). This will not be done by “anarchist police” or by “banning” voluntary agreements, but purely by recognising that “property” is a social creation and by creating a social system that will encourage individuals to stand up for their rights and co-operate with each other to protect their freedom against those seeking to reduce others to the conditions of servants working their property for them.

I.5.8 What about crime?

For anarchists, “crime” can best be described as anti-social acts, or behaviour which harms someone else or which invades their personal space. Anarchists, in other words, “believe that to act criminally means to violate the liberty of others” and so criminals in a free society would be “those who would encroach on personal integrity, the task entrusted to it, without ever overruling its principals, without supplanting them or acting in their place. “The same might be said of all decisions reached in the union: all are restricted to a definite and specific act, whereas in democracy, election implies that the elected candidate has been issued by his [or her] elector with a carte blanche empowering him [or her] to decide and do as he [or she] pleases, in and on everything, without even the hindrance of the quite possibly contrary views of his [or her] principals, whose opposition, in any case, no matter how pronounced, is of no consequence until such time as the elected candidate’s mandate has run its course.

“So there cannot be any possible parallels, let alone confusion, between trade union activity and participation in the disappointing chores of politics.” [No Gods, No Masters, vol. 2, pp. 67–68]

In other words, when individuals are elected to administrative posts they are elected to carry out their mandate, not to carry out their party’s programme. Of course, if the individuals in question had convinced their fellow workers and citizens that their programme was correct, then this mandate and the programme would be identical. However this is unlikely in practice. We would imagine that the decisions of collectives and communes would reflect the complex social interactions and diverse political opinions their members and of the various groupings within the association.

Anarchism will likely contain many different political groupings and ideas. The relative influence of these within collectives and communes would reflect the strength of their arguments and the relevance of their ideas, as would be expected in a free society. As Bakunin argued: “The abolition of this mutual influence would be death. And when we vindicate the freedom of the masses, we are by no
be banned in any way, and their members will have the same rights as everyone else. Individuals who are members of political parties or associations can take part in communal and other assemblies and try to convince others of the soundness of their ideas.

However, there is a key difference between such activity and politics under a capitalist democracy. This is because the elections to positions of responsibility in an anarchist society will not be based on party tickets nor will it involve the delegation of power. Emile Pouget’s description of the difference between the syndicalist union and political elections drives this difference home:

“The constituent part of the trade union is the individual. Except that the union member is spared the depressing phenomenon manifest in democratic circles where, thanks to the veneration of universal suffrage, the trend is towards the crushing and diminution of the human personality. In a democratic setting, the elector can avail of his [or her] only in order to perform an act of abdication: his role is to 'award' his 'vote' to the candidate whom he [or she] wishes to have as his [or her] 'representative.'

“Affiliation to the trade union has no such implication ... In joining the union, the worker merely enters into a contract — which he may at any time abjure — with comrades who are his equals in will and potential ... In the union, say, should it come to the appointment of a trade union council to take charge of administrative matters, such ‘selection’ is not to be compared with ‘election’: the form of voting customarily employed in such circumstances is merely a means whereby the labour can be divided and is not accompanied by any delegation of authority. The strictly prescribed duties of the trade union council are merely administrative. The council performs

liberty and the well being of others.” [Malatesta, At the Café, p. 100 and p. 132]

This definition of crime is similar, of course, to that used in capitalist society but libertarians note that the state defines as “crime” many things which a sane society would not (such as, say, consensual acts of adults in private or expropriation of private property). Similarly, a free society would consider as anti-social many acts which the state defends under capitalism (such as the appropriation of resources or exploitation of others labour). This is to be expected, as social customs evolve and reflect the socio-economic basis of a given society. Hence Malatesta:

“Naturally the crimes we are talking about are anti-social acts, that is those which offend human feelings and which infringe the right of others to equality in freedom, and not the many actions which the penal code punishes simply because they offend against the privileges of the dominant classes.” [Errico Malatesta: His Life and Ideas, pp. 105–6]

Anarchists argue that the root cause for crime is not some perversity of human nature or “original sin” but is due to the type of society by which people are moulded. For example, anarchists point out that by eliminating private property, crime could be reduced significantly, since most crime today is currently motivated by evils stemming from private property such as poverty, homelessness, unemployment, and alienation. Moreover, by adopting anarchist methods of non-authoritarian child rearing and education, most of the remaining crimes could also be eliminated, because they are largely due to the anti-social, perverse, and cruel “secondary drives” that develop because of authoritarian child-rearing practices (see section J.6). However, as long as the few “violates the equal freedom of others ... we must defend ourselves.” [Malatesta, Op. Cit., p. 106]
First, it cannot be said that governments are required to protect people from crime and criminals. Rather, as Alexander Berkman argued, “Does not government itself create and uphold conditions which make for crime? Does not the invasion and violence upon which all governments rest cultivate the spirit of intolerance and persecution, of hatred and more violence?” Crime, then, “is the result of economic conditions, of social inequality, of wrongs and evils of which government and monopoly are parents. Government and law can only punish the criminal. They neither cure nor prevent crime. The only real cure for crime is to abolish its causes, and the government can never do because it is there to preserve those very causes.” This suggests that crimes “resulting from government, from its oppression and injustice, from inequality and poverty, will disappear under Anarchy. These constitute by far the greatest percentage of crime.” [What is Anarchism?, p. 151] Nor should we forget that today we are subject to rule by the anti-social, for the “owners and rulers” are “criminals” who are “powerful and have organised their dominance on a stable basis” (“Who is more of a thief than the owners who get wealthy stealing the produce of the workers’ labour?”). [Malatesta, At the Café, p. 100 and p. 130]

“Crime”, therefore, cannot be divorced from the society within which it occurs. Society, in Emma Goldman’s words, gets the criminals it deserves. For example, anarchists do not think it unusual nor unexpected that crime exploded under the pro-free market capitalist regimes of Thatcher and Reagan. Crime, the most obvious symptom of social crisis, took 30 years to double in Britain (from 1 million incidents in 1950 to 2.2 million in 1979). However, between 1979 and 1992 the crime rate more than doubled, exceeding the 5 million mark in 1992. These 13 years were marked by a government firmly committed to the “free market” and “individual responsibility.” It was entirely predictable that the social disruption, atomisation of individuals, and increased poverty caused by freeing capitalism from social controls would rip society apart and increase criminal activity. Also unsurprisingly (from an anarchist libertarian ideas, anarchists would reply that such arguments are flawed. In terms of the former, it is equating state imposed censorship with the active disobedience of a free people. Rather than the government imposing a ban, members of a free society would simply discuss the issue at hand and, if considered appropriate, actively and collectively boycott those supporting attempts to enslave them. Without electricity, paper, distribution networks and so on, reactionaries would find it hard to publish or broadcast. As for the latter, there is no contradiction as it is hardly contradictory to support and encourage freedom while, at the same time, resisting attempts to enslave you! As such, this suggestion makes the same logical error Engels made in his diatribe against anarchism, namely considering it “authoritarian” to destroy authority (see section H.4.7). Similarly, it is hardly authoritarian to resist those seeking to impose their authority on you or their supporters! This perspective seems to assume that the true “libertarian” approach is to let others impose their rule on you as stopping them is “authoritarian”! A truly strange way of understanding our ideas...

To conclude, based upon both theory and practice, we can say that anarchism will not endanger freedom of expression. Indeed, by breaking up the capitalist oligopoly which currently exists and introducing workers’ self-management of the media, a far wider range of opinions will become available in a free society. Rather than reflect the interests of a wealthy elite, the media would reflect the interests of society as a whole and the individuals and groups within it.

I.5.10 What about political parties, interest groups and professional bodies?

Political parties and other interest groups will exist in an anarchist society as long as people feel the need to join them. They will not
part of a planned religious persecution. This is not true, if they were martyrs then they were martyrs to their pro-fascist politics and not their faith ("The political role of the Church was ignored when the religious victims were made into martyrs"). Significantly, the Catholic Church "said nothing when the nationalists shot sixteen of the Basque clergy, including the arch-priest of Mondragon" (the nationalists also killed some twenty Protestant ministers). In 2003 when John Paul II beatified a teacher killed in July 1936 he "still made no mention of the Basque priests killed by the nationalists." [Beevor, Op. Cit., p. 270, p. 92 and p. 527] Clearly a priest being murdered by fascists backed by the Vatican is ineligible for sainthood.

Given the actual role of the Catholic Church during this period it is surprising the Catholic hierarchy would seek to bring attention to it. Perhaps it is confident that the media will not mention these awkward facts, although this context explains the deaths and church-burning in 1936. As we noted in section A.2.18, it appears that killing working class people is not worthy of comment but assassinating members of the ruling elite (and its servants) is. So the fact that the burning of churches and killing of clergy is well known but the pro-fascist activities of the church (a product of both its reactionary politics and position in the ruling elite) which provoked it is not should come as no surprise.

In summary, then, a free society would have substantial freedom of speech along with other fundamental freedoms (including freedom of worship and of association). Such freedoms would be respected, supported and encouraged for all shades of political opinion, from the left through to the right. The only exception would be if an organisation were actively supporting those seeking to impose their rule on a free people and in such cases some restrictions may be decided upon (their nature would depend on the state of the struggle, with them decreasing as the danger decreased).

To those who claim that refusing freedom of speech to counter-revolutionaries equates to statism or implies a contradiction in viewpoint), under these pro-market governments we also saw a reduction in civil liberties, increased state centralisation, and the destruction of local government. As Malatesta put it, the classical liberalism which these governments represented could have had no other effect, for "the government’s powers of repression must perforce increase as free competition results in more discord and inequality." [Anarchy, p. 47]

Hence the apparent paradox of governments with flowing rhetoric about "individual rights," the "free market" and "getting the state off our backs" increasing state power and reducing rights while holding office during a crime explosion is no paradox at all. "The conjuncture of the rhetoric of individual freedom and a vast increase in state power," argues Carole Pateman, "is not unexpected at a time when the influence of contract doctrine is extending into the last, most intimate nooks and crannies of social life. Taken to a conclusion, contract undermines the conditions of its own existence. Hobbes showed long ago that contract — all the way down — requires absolutism and the sword to keep war at bay." [The Sexual Contract, p. 232]

Capitalism, and the contract theory on which it is built, will inevitably rip apart society. It is based upon a vision of humanity as isolated individuals with no connection other than that of money. Such a vision cannot help but institutionalise anti-social acts. As Kropotkin argued "it is not love and not even sympathy upon which Society is based in mankind. It is the conscience — be it only at the stage of an instinct — of human solidarity. It is the unconscious recognition of the force that is borrowed by each man [and woman] from the practice of mutual aid; of the close dependency of every one’s happiness upon the happiness of all; and of the sense of justice, or equity, which brings the individual to consider the rights of every other individual as equal to his [or her] own." [Mutual Aid, p. 16]

The social atomisation required and created by capitalism destroys the basic bonds of society – namely human solidarity – and hierarchy crushes the individuality required to understand that we
share a common humanity with others and so understand why we must be ethical and respect others' rights. Significantly, as Richard Wilkinson and Kate Pickett note in *The Spirit Level: Why More Equal Societies Almost Always Do Better*, more unequal societies have more crime and bigger prison populations (equality, as well as reducing crime, consistently deliver other advantages for people).

We are not saying, however, that anarchists reject the concept of individual responsibility. While recognising that rape, for example, is the result of a social system which represses sexuality and is based on patriarchy (i.e., rape has more to do with power than sex), anarchists do not “sit back” and say “it’s society’s fault.” Individuals have to take responsibility for their own actions and recognise that consequences of those actions. Part of the current problem with “law codes” is that individuals have been deprived of the responsibility for developing their own ethical code, and so are less likely to develop “civilised” social standards (see section I.7.3).

Therefore, while anarchists reject the ideas of law and a specialised justice system, they are not blind to the fact that anti-social action may not totally disappear in a free society. Nor are they blind to the fact that, regardless of our hopes about a free society reducing crime, we will not create it over-night (“all the bad passions ... will not disappear at a stroke. There will still be for a long time those who will feel tempted to impose their will on others with violence, who will wish to exploit favourable circumstances to create privileges for themselves” [Malatesta, *At the Café*, p. 131]). Therefore, some sort of justice system would still be necessary to deal with the remaining crimes and to adjudicate disputes between people.

This does not, it must be stressed, signify some sort of contradiction within anarchism. Anarchists have never advocated the kind of “freedom” which assumes that people can do what they want. When people object to anarchy, they often ask about those who would steal, murder, rape and so forth and seem to assume that wealth, as well as its power in education, but in return he expected the priesthood to act virtually as another arm of the state.” In other words, “Nationalist Spain was little more than an open prison for all those who did not sympathise with the regime” and the “population was encouraged to accuse people as part of its patriotic duty. Concierges and caretakers became police spies ... and priests noted those who did not turn up to mass.” [Beevor, *Op. Cit.*, p. 452, p. 453 and p. 454] All with the firm support of the Catholic Church.

Rather than an attempt to repress religion as such, the attacks on the Catholic Church in republican areas it was a product of popular hostility to a corrupt institution, one which was deeply reactionary, pro-fascist and a major landowner in its own right. This means that an awareness of the nature and role of the Church “does not leave much doubt as to why practically all the churches in Catalonia and eastern Aragon were burnt at the outbreak of war.” The anti-clerical movement was a “popular movement and a native Spanish movement. It has its roots not in Marx or Bakunin, but in the condition of the Spanish people themselves.” [Orwell, *Op. Cit.*, p. 300 and p. 315] While under Franco “the relentless purging of ‘reds and atheists’ was to continue for years” in the Republican areas “the worse of the violence was mainly a sudden and quickly spent reaction of suppressed fear, exacerbated by desires of revenge for the past.” [Beevor, *Op. Cit.*, p. 91]

So the burning of churches in Spain had very little to do with anarchist atheism and much, much more to do with the Catholic Church’s social role in Spain, its reactionary position, its hatred of the unions and social protest and the fact it supported the fascist coup. It does not imply an opposition to freedom of speech by libertarian socialists but was rather an expression of popular opposition to a ruling class and pro-fascist organisation.

One last point to make on this issue. Given the actual role of the Church during this period and its wholehearted support for fascism in the 1920s onwards, it seems strange that the Catholic Church has declared the murdered priests in Spain to be martyrs,
Unsurprisingly, then, those priests who had not supported the right, those who had treated the working class the same as the rich, were spared. In the Basque Country, where the church supported the Republic, not a single church was burnt. Nor were synagogues or Protestant church targeted. In Barcelona “the Quakers established canteens which were staffed by refugee women.” [Gabriel Jackson, The Spanish Republic and the Civil War, 1931–1939, p. 446]

It should also be stressed that the repression in the fascist zone was much worse than that in the Republican one. Of a ecclesiastical community of 115,000, 6,845 were killed (“the vast majority during the summer of 1936”). This is in stark contrast to right-wing claims at the time. It should be mentioned that in the province of Seville, the fascist repression killed 8,000 during 1936 alone. In Cordoba, 10,000 were killed during the war — a tenth of the population. Once an area was captured by nationalist forces, after the initial killing of captured troops, union and party leaders, a “second and more intense wave of slaughter would begin” (“in fact anyone who was even suspected of having voted for the Popular Front was in danger”). This was organised by “local committees, usually consisting of leading right-wingers, such as the major landowner, the local Civil Guard commander, a Falangist and quite often the priest”. This was “clearly not just a question of revenge, they were also motivated by the idea of establishing a reign of terror”. This did not, of course, hinder “the unqualified backing of the Vatican and the Spanish Church for General Franco” while “the Catholic press abroad sprang to the support of the nationalist rising”. Obviously killing (many, many more) left-wingers in the name of god is of no concern to the Catholic hierarchy nor did it stop “the Church’s official support for Franco”. [Beevor, Op. Cit., p. 92, p. 101, p. 99, p. 104, p. 250, p. 269 and p. 270]

Under Franco, everyone had to “submit themselves to the authority of the Church as well as to their temporal masters. Franco had been extremely generous in restoring all the Church’s privileges and such people would be free to act as they like. This is, needless to say, an utter misunderstanding of both our ideas and freedom in general. Simply put, if people impose themselves by force on others then “they will be the government” and “we will oppose them with force” for “if today we want to make a revolution against the government, it is not in order to submit ourselves supinely to new oppressors.” [Malatesta, Op. Cit., p. 99] This applies to defending a free society against organised counter-revolution and against those within it conducting anti-social (“criminal”) activities. The principle is the same, it is just the scale which is different.

It should be remembered that just because the state monopolises or organises a (public) service, it does not mean that the abolition of the state means the abolition of what useful things it provided. For example, many states own and run the train network but the abolition of the state does not mean that there will no longer be any trains! In a free society management of the railways would be done by the rail workers themselves, in association with the community. The same applies to anti-social behaviour and so we find Kropotkin, for example, pointing to how “voluntary associations” would “substitute themselves for the State in all its functions,” including “mutual protection” and “defence of the territory.” [Anarchism, p. 284]

This applies to what is termed justice, namely the resolution of disputes and anti-social acts (“crime”). Anarchists argue that “people would not allow their wellbeing and their freedom to be attacked with impunity, and if the necessity arose, they would take measures to defend themselves against the anti-social activities of a few. But to do so, what purpose is served by people whose profession is the making of laws; while other people spend their lives seeking out and inventing law-breakers?” [Malatesta, Anarchy, pp. 43–4] This means that in a free society the resolution of anti-social behaviour would rest in the hands of all, not in a specialised body separate from and above the masses. As Proudhon put it, an anarchy would see the “police,
judiciary, administration, everywhere committed to the hands of the workers.” [General Idea of the Revolution, p. 281] And so:

“Let each household, each factory, each association, each municipality, each district, attend to its own police, and administer carefully its own affairs, and the nation will be policed and administered. What need have we to be watched and ruled, and to pay, year in and year out, ... millions? Let us abolish prefects, commissioners, and policemen too.” [Op. Cit., p. 273]

Precisely how this will work will be determined by free people based on the circumstances they face. All we can do is sketch out likely possibilities and make suggestions.

In terms of resolving disputes between people, it is likely that some form of arbitration system would develop. The parties involved could agree to hand their case to a third party (for example, a communal jury or mutually agreed individual or individuals). There is the possibility that the parties cannot agree (or if the victim were dead), then the issue could be raised at a communal assembly and a “court” appointed to look into the issue. These “courts” would be independent from the commune, their independence strengthened by popular election instead of executive appointment of judges, by protecting the jury system by random selection of citizens, and so “all disputes ... will be submitted to juries which will judge not only the facts but the law, the justice of the law [or social custom], its applicability to the given circumstances, and the penalty or damage to be inflicted because of its infraction”. [Benjamin Tucker, The Individualist Anarchists, p. 160] For Tucker, the jury was a “splendid institution, the principal safeguard against oppression.” [Liberty, vol. 1, no. 16, p. 1]

As Malatesta suggested, “when differences were to arise between men [sic!], would not arbitration voluntarily accepted, or pressure of public opinion, be perhaps more likely to establish where the right
It is in this context we must discuss what some could point to as an example of anarchists denying freedom of speech and association, namely the burning of churches during the Spanish Revolution. In fact, some would use this as evidence of anarchist intolerance of religion and to those who disagree with them. Anarchists reject such charges.

As is well known, after the successful defeat of the fascist-military coup in mid-July 1936, Catholic Churches were burned and members of the Catholic Church were killed. However, these acts were not acts against freedom of religion or speech. Rather they are popular acts against both the oppressive and reactionary role of the Catholic Church in Spanish society as well as its active support for fascism throughout the 1920s and 1930s, including Franco’s coup. As historian Paul Preston summarises:

“religion was an issue which could be used to mobilise mass peasant support behind the interests of the oligarchy. Having lost the political hegemony in April 1931, the ruling classes clung all the more to the Church as one of the key redoubts of their social and economic dominance. Equally, the Church hierarchy, as a major landowner, had a somewhat similar view of the value of an alliance with the new political formation being created to defend oligarchical agrarian interests. Not surprisingly, throughout the Republic, the clergy used both pulpit and confessional to defend the existing socio-economic order and to make electoral propaganda for the successive political organisations of the Right.”

[The Coming of the Spanish Civil War, pp. 42–3]

The Catholic Church “was the bulwark of the country’s conservative forces” and no more than 15 days after the announcement of the Republic in 1931, the Primate of Spain “issued a pastoral denouncing the new government’s intention to establish freedom of worship and to
Such a body would not have a monopoly on protecting others, but would simply be on call if required. It would no more be a monopoly of defence (i.e. a “police force”) than the current fire service is a monopoly. Individuals are not banned from putting out fires today because the fire service exists, similarly individuals will be free to help stop anti-social crime by themselves, or in association with others, in an anarchist society.

Of course there are anti-social acts which occur without witnesses and so the “guilty” party cannot be readily identified. If such acts did occur we can imagine an anarchist community taking two courses of action. The injured party may look into the facts themselves or appoint an agent to do so or, more likely, an ad hoc group would be elected at a community assembly to investigate specific crimes of this sort (subject to control and recall by the community). Once the investigating body thought it had enough evidence it would inform the community as well as the affected parties and then organise a court. Of course, a free society will produce different solutions to such problems, solutions no-one has considered yet and so these suggestions are just that, suggestions.

As is often stated, prevention is better than cure. This is as true of crime as of disease and so crime is best fought by rooting out its causes as opposed to punishing those who act in response to these causes. As Emma Goldman argued, crime “is naught but misdirected energy. So long as every institution of today, economic, political, social, moral conspires to misdirect human energy into wrong channels; so long as most people are out of place doing things they hate to do, living a life they loathe to live, crime will be inevitable, and all the laws on the statues can only increase, but never do away with, crime” [Red Emma Speaks, p. 71] Erich Fromm, decades later, made the same point:

“It would seem that the amount of destructiveness to be found in individuals is proportionate to the amount to which expansiveness of life is curtailed. By this we do

[Red Emma Speaks, p. 71]
papers, radio stations, etc., and obviously they would play an increased role in a free society. But they would not be the only media. Associations, political parties, industrial syndicates, and so on would have their own media and/or would have access to the resources run by communication workers syndicates, so ensuring that a wide range of opinions can be expressed.

Secondly, the “ultimate” power in a free society will be the individuals of which it is composed. This power will be expressed in communal and workplace assemblies that can recall delegates and revoke their decisions. It is doubtful that these assemblies would tolerate a set of would-be bureaucrats determining what they can or cannot read, see, or hear.

Thirdly, individuals in a free society would be interested in hearing different viewpoints and discussing them. This is the natural side-effect of critical thought (which self-management would encourage), and so they would have a vested interest in defending the widest possible access to different forms of media for different views. Having no vested interests to defend, a free society would hardly encourage or tolerate the censorship associated with the capitalist media ("I listen to criticism because I am greedy. I listen to criticism because I am selfish. I would not deny myself another’s insights" [For Ourselves, The Right to be Greedy, Thesis 113]).

Therefore, anarchism will increase freedom of speech in many important ways, particularly in the workplace (where it is currently denied under capitalism). This will be a natural result of a society based on maximising freedom and the desire to enjoy life: “We claim the right of discussing ... whatever subject interests us. If free speech and free press mean anything, they mean freedom of discussion.” [Goldman, Op. Cit., p. 203]

We would also like to point out that during both the Spanish and Russian revolutions, freedom of speech was protected within anarchist areas. For example, the Makhnovists in the Ukraine “fully applied the revolutionary principles of freedom of speech, of thought, of the Press, and of political association. In all the cities and towns occu-
eliminate it, it is necessary for this task to be entrusted to those who are exposed to and suffer the consequences of crime, in other words the whole public, and not those to whom the existence of crime is a source of power and earnings.” [At the Café, p. 135]

An anarchist system of justice, we should note, would have a lot to learn from aboriginal societies simply because they are examples of social order without the state. Indeed many of the ideas we consider as essential to justice today can be found in such societies. As Kropotkin argued, “when we imagine that we have made great advances in introducing, for instance, the jury, all we have done is to return to the institutions of the so-called ‘barbarians’ after having changed it to the advantage of the ruling classes.” [The State: Its Historic Role, p. 18] Like aboriginal justice (as documented by Rupert Ross in Returning to the Teachings: Exploring Aboriginal Justice) anarchists contend that justice be achieved by the teaching and healing of all involved. Public condemnation of the wrongdoing would be a key aspect of this process, but the wrong doer would remain part of the community and so see the effects of their actions on others in terms of grief and pain caused. It would be likely that wrong doers would be expected to try to make amends for their act by community service or helping victims and their families.

So, from a practical viewpoint, almost all anarchists oppose prisons on both practical grounds and ethical grounds. Prisons have numerous negative affects on society as well as often re-enforcing criminal (i.e. anti-social) behaviour. Anarchists use the all-to-accurate description of prisons as “Universities of Crime” wherein the first-time criminal learns new techniques and have adapt to the prevailing ethical standards within them. Hence, prisons would have the effect of increasing the criminal tendencies of those sent there and so prove to be counter-productive. In addition, prisons do not affect the social conditions which promote of communication, then only the views which the government supported would get access to the media.

This is an important point and it needs to be addressed. However, before doing so, we should point out that under capitalism the major media are effectively controlled by the wealthy. As we argued in section D.3, the media are not the independent defenders of freedom that they like to portray themselves as. This is hardly surprising, since newspapers, television companies, and so forth are capitalist enterprises owned by the wealthy and with managing directors and editors who are also wealthy individuals with a vested interest in the status quo. Hence there are institutional factors which ensure that the “free press” reflects the interests of capitalist elites.

However, in democratic capitalist states there is little overt censorship. Radical and independent publishers can still print their papers and books without state intervention (although market forces ensure that this activity can be difficult and financially unrewarding). Under socialism, it is argued, because “society” owns the means of communication and production, this liberty will not exist. Instead, as can be seen from all examples of “actually existing socialism,” such liberty is crushed in favour of the ruling elites’ point of view.

As anarchism rejects the state, we can say that this danger does not exist under libertarian socialism. However, since social anarchists argue for the communalisation of production, could not restrictions on free speech still exist? We argue no, for three reasons.

Firstly, publishing houses, radio stations, and so on will be run by their workers directly. They will be supplied by other syndicates, with whom they will make agreements, and not by “central planning” officials (who would not exist). In other words, there is no bureaucracy of officials allocating (and so controlling) resources and so the means of communication. Hence, anarchist self-management will ensure that there is a wide range of opinions in different magazines and papers. There would be community
dom of others. That is oppression, that is exploitation, that is the embryo of the state and capitalism.

We can recommend the section “Crime and Punishment” by Malatesta (Errico Malatesta: His Life and Ideas) as well as Kropotkin’s essays “Law and Authority” and “Prisons and their moral influence on prisoners” (both within the Anarchism collection). Emma Goldman’s “Prisons: A social crime and Failure” (Red Emma Speaks), de Cleyre’s “Crime and Punishment” (The Voltairine de Cleyre Reader) and Colin Ward’s “How Deviant Dare you get?” (Anarchy in Action) are also worth reading. A useful collection of writings on this issue are found in Under the Yoke of the State: Selected Anarchist Responses to Prisons and Crime (edited by the Dawn Collective).

I.5.9 What about Freedom of Speech under Anarchism?

Free speech in an anarchist society would be far greater than under capitalism. This is obvious, anarchists argue, because we “fight against oppression and tyranny for a future in which they will be neither masters nor slaves, neither rich nor poor, neither oppressors nor oppressed … the freedom of each is rooted in the freedom of all, and that in this universal freedom is the guarantee of liberty, self-development, autonomy, and free speech for each and everyone.” [Emma Goldman, A Documentary History of the American Years, p. 104] As such, libertarian socialism would be marked by extensive freedom of speech but also freedom of the press, of the media and so forth.

Some, however, express the idea that all forms of socialism would endanger freedom of speech, press, and so forth. The usual formulation of this argument is in relation to state socialism and goes as follows: if the state (or “society”) owned all the means

many forms of crime. Simply put, prison “does not improve the prisoner … it does not prevent him from committing more crimes. It does not then achieve any of the ends it has set itself” [Kropotkin, Anarchism, p. 228] Moreover, they are a failure in terms of their impact on those subject to them: “We know what prisons mean — they mean broken down body and spirit, degradation, consumption, insanity”. [Voltairine de Cleyre, quoted by Paul Avrich, An American Anarchist, p. 146] The Makhnovists took the usual anarchist position on prisons:

“Prisons are the symbol of the servitude of the people, they are always built only to subjugate the people, the workers and peasants … Free people have no use for prisons. Wherever prisons exist, the people are not free … In keeping with this attitude, [the Makhnovists] demolished prisons wherever they went.” [Peter Arshinov, The History of the Makhnovist Movement, p. 153]

With the exception of Benjamin Tucker, no major anarchist writer supported the institution. Few anarchists think that private prisons (like private policemen) are compatible with their notions of freedom. However, all anarchists are against the current “justice” system which seems to them to be organised around revenge and punishing effects and not fixing causes.

However, there are psychopaths and other people in any society who are too dangerous to be allowed to walk freely. Restraint in this case would be the only option and such people may have to be isolated from others for their own, and others, safety. Perhaps mental hospitals would be used, or an area quarantined for their use created (perhaps an island, for example). However, such cases (we hope) would be rare and “should be cared for according to the most humane methods of treating the mentally afflicted.” [Voltairine de Cleyre, The Voltairine de Cleyre Reader, p. 160]
The one thing that needs to be avoided is the creation of a professional and specialised “justice” system as this would be a key means by which the state could reconstitute itself. As Malatesta explained, “the major damage caused by crime is not so much the single and transitory instance of the violation of the rights of a few individuals, but the danger that it will serve as an opportunity and pretext for the constitution of an authority that, with the outward appearance of defending society will subdue and oppress it.” In other words, it “would truly be a great piece of foolishness to protect oneself from a few violent people, a few idlers and some degenerates, by opening a school for idleness and violence” [Op. Cit., p. 101 and p. 132]

The libertarian perspective on crime does not rest on an idealised vision of people. “We do not believe”, as Malatesta suggested, “in the infallibility, nor even the general goodness of the masses”, rather “we believe even less in the infallibility and goodness of those who seize power and legislate” and so we must “avoid the creation of bodies specialising in police work”. [Errico Malatesta: His Life and Ideas, p. 109 and p. 108] As George Barrett argued:

“All that we can say is that ... disputes are very much better settled without the interference of authority. If the two [parties] were reasonable, they would probably mutually agree to allow their dispute to be settled by some mutual friend whose judgement they could trust. But if instead of taking this sane course they decide to set up a fixed authority, disaster will be the inevitable result. In the first place, this authority will have to be given power wherewith to enforce its judgement in such matters. What will then take place? The answer is quite simple. Feeling it is a superior force, it will naturally in each case take to itself the best of what is disputed, and allot the rest to its friends.

“What a strange question is this. It supposes that two people who meet on terms of equality and disagree could not be reasonable or just. But, on the other hand, it supposes that a third party, starting with an unfair advantage, and backed up by violence, will be the incarnation of justice itself. Common-sense should certainly warn us against such a supposition, and if we are lacking in this commodity, then we may learn the lesson by turning to the facts of life. There we see everywhere Authority standing by, and in the name of justice and fair play using its organised violence in order to take the lion’s share of the world’s wealth for the governmental class.” [Objections to Anarchism, pp. 349–50]

So instead of prisons and a legal code based on the concept of punishment and revenge, anarchists support the use of public opinion and pressure to stop anti-social acts and the need to therapeutically rehabilitate those who commit them. Rather than a parasitic legal system which creates and defends inequality and privilege, anarchists agree with Kropotkin: “Liberty, equality, and practical human sympathy are the most effective barriers we can oppose to the anti-social instinct of certain among us”. [Op. Cit., p. 218] “We want justice, not rigid, but elastic”, argued Tucker, “we want justice, not stern, but tempered with mercy, with eyes sharp enough to detect causes, conditions, and circumstances; we want justice, not superficial, but profound.” The current system of rigid law imposed by the state and implemented by a judge was false and “no such justice is wanted in any civilised community.” [Op. Cit., Vol. 13, No. 5, p. 4]

In summary, then, anarchists have spent considerable time discussing the issue. Somewhat ironically, given that many think the issue of crime is the weakest point of the anarchist case, the outlines of a solution to this problem are well established in anarchist theory, both in terms of what not to do and in terms of combating both crime and its causes. Anarchy is based on people being free but freedom does not mean the “freedom” to violate the equal free-
cultivation and fertilisation … collectivists built chicken coups, barns, and other facilities for the care and feeding of the community’s animals. Federations of collectives co-ordinated the construction of roads, schools, bridges, canals and dams. Some of these remain to this day as lasting contributions of the collectives to the infrastructure of rural Spain. The collectivists also arranged for the transfer of surplus produce from wealthier collectives to those experiencing shortages, either directly from village to village or through mechanisms set up by regional committees.” [The Free Women of Spain, pp. 106–7]

As well as this inter-collective solidarity, the rural collectives also supplied food to the front-line troops:

“The collectives voluntarily contributed enormous stocks of provisions and other supplies to the fighting troops. Utiel sent 1,490 litres of oil and 300 bushels of potatoes to the Madrid front (in addition to huge stocks of beans, rice, buckwheat, etc.). Forales de Tujana sent great quantities of bread, oil, flour, and potatoes to the front, and eggs, meat, and milk to the military hospital.

“The efforts of the collectives take on added significance when we take into account that their youngest and most vigorous workers were fighting in the trenches. 200 members of the little collective of Vilaboi were at the front; from Viledecans, 60; Amposta, 300; and Calande, 500.” [Jose Peirats, The Anarchist Collectives, p. 120]

Therefore, as well as significant economic achievements, the collectives ensured social and political ones too. Solidarity was practised and previously marginalised people took direct and full management of the affairs of their communities, transforming them to meet their own needs and desires.

the Commons with sheep and cattle, so that the inferior Tenants and poor labourers can hardly keep a cow but half starve her.” [quoted by Maurice Dobb, Studies in the Development of Capitalism, p. 173] The working class is only “left alone” to starve.

As discussed in section F.8, the enclosures were part of a wider state-imposition of capitalism onto society. Of course, enclosure was often justified by supporters of capitalism by the increased productivity which, they claim, resulted from it (in effect, repeating Locke’s earlier, and flawed, argument — see section B.3.4). There are three objections to this. First, it cannot be assumed that increased productivity could not be achieved by keeping the commons and by the commoners applying the improved techniques and technologies that contributed to any post-enclosure increased productivity. Second, it ignores the key issue of liberty and replaces it with property (increases in wealth being considered more important than reducing the freedom of the working class). Third, and more importantly, this paternalistic rationale for coercion and state action does not fit well with such apologist’s opposition to (certain forms of) state intervention today (such as taxation or popular land reform). If the “ends justify the means” (which is what their arguments boil down to) when applied to the rural working class, then they have little basis for opposing taxation of the wealthy elite or pro-worker land-reform in a democracy or a popular social revolution.

To conclude. The “tragedy of the commons” argument is conceptually flawed and empirically wrong (unsurprising, given that no actual empirical evidence was presented to support the argument). Sadly, this has not stopped Hardin, or those inspired by his arguments, from suggesting policies based on a somewhat dubious understanding of history and humanity. Perhaps this is not that surprising, given that Hardin’s assumptions (which drive his conclusions) are based not on actual people nor historical evidence but rather by fundamental components of capitalist economic theory. While under capitalism, and the short-termism imposed by mar-
ket forces, you could easily imagine that a desire for profit would outweigh a person’s interest in the long-term survival of their community, such a perspective is relatively recent in human history.

In fact, communal ownership produces a strong incentive to protect such resources for people are aware that their offspring will need them and so be inclined to look after them. By having more resources available, they would be able to resist the pressures of short-termism and so resist maximising current production without regard for the future. Capitalist owners have the opposite incentive for, as argued in section E.3, unless they maximise short-term profits then they will not be around in the long-term (so if wood means more profits than centuries-old forests then the trees will be chopped down). By combining common ownership with decentralised and federated communal self-management, anarchism will be more than able to manage resources effectively, avoiding the pitfalls of both privatisation and nationalisation.

I.6.1 How can property “owned by everyone in the world” be used?

First, we need to point out the fallacy normally lying behind this objection. It is assumed that because everyone owns something, then everyone has to be consulted in what it is used for. This, however, applies the logic of private property to non-capitalist social forms. While it is true that everyone owns collective “property” in an anarchist society, it does not mean that everyone uses it. Carlo Cafiero, one of the founders of communist-anarchism, stated the obvious:

“The common wealth being scattered right across the planet, while belonging by right to the whole of humanity, those who happen to be within reach of that wealth and in a position to make use of it will utilise...
Peirats summed up the accomplishments of the agricultural collectives as follows:

“In distribution the collectives’ co-operatives eliminated middlemen, small merchants, wholesalers, and profiteers, thus greatly reducing consumer prices. The collectives eliminated most of the parasitic elements from rural life, and would have wiped them out altogether if they were not protected by corrupt officials and by the political parties. Non-collectivised areas benefited indirectly from the lower prices as well as from free services often rendered by the collectives (laundries, cinemas, schools, barber and beauty parlours, etc.).” [Op. Cit., p. 114]

Leval emphasised the following achievements (among others):

“In the agrarian collectives solidarity was practised to the greatest degree. Not only was every person assured of the necessities, but the district federations increasingly adopted the principle of mutual aid on an inter-collective scale. For this purpose they created common reserves to help out villages less favoured by nature. In Castile special institutions for this purpose were created. In industry this practice seems to have begun in Hospitalet, on the Catalan railways, and was applied later in Alcoy. Had the political compromise not impeded open socialisation, the practices of mutual aid would have been much more generalised ... A conquest of enormous importance was the right of women to livelihood, regardless of occupation or function. In about half of the agrarian collectives, the women received the same wages as men; in the rest the women received less, apparently on the principle that they rarely live alone ... In all the agrarian collectives’ co-operatives eliminated middlemen, small merchants, wholesalers, and profiteers, thus greatly reducing consumer prices. The collectives eliminated most of the parasitic elements from rural life, and would have wiped them out altogether if they were not protected by corrupt officials and by the political parties. Non-collectivised areas benefited indirectly from the lower prices as well as from free services often rendered by the collectives (laundries, cinemas, schools, barber and beauty parlours, etc.).” [Op. Cit., p. 114]

Anarchists, therefore, think that those who use a part of society’s wealth have the most say in what happens to it (e.g., workers control the means of production they use and the work they do when using it). This does not mean that those using it can do what they like to it. Users would be subject to recall by local communities if they are abusing their position (for example, if a workplace were polluting the environment, then the local community could act to stop or, if need be, close down the workplace). Thus use rights (or usufruct) replace property rights in a free society, combined with a strong dose of “think globally, act locally.”

It is no coincidence that societies that are stateless are also without private property. As Murray Bookchin pointed out “an individual appropriation of goods, a personal claim to tools, land, and other resources ... is fairly common in organic [i.e. aboriginal] societies ... But primary to both of these seemingly contrasting relationships is the practice of usufruct.” Such stateless societies are based upon “the principle of usufruct, the freedom of individuals in a community to appropriate resources merely by the virtue of the fact they are using them ... Such resources belong to the user as long as they are being used. Function, in effect, replaces our hallowed concept of possession.”
The future stateless society anarchists hope for would also be based upon such a principle. In effect, critics of social anarchism confuse property with possession and think that abolishing property automatically abolishes possession and use rights. However, as argued in section B.3, property and possession are distinctly different. In the words of Charlotte Wilson:

"Property is the domination of an individual, or a coalition of individuals, over things; it is not the claim of any person or persons to the use of things — this is, usufruct, a very different matter. Property means the monopoly of wealth, the right to prevent others using it, whether the owner needs it or not. Usufruct implies the claim to the use of such wealth as supplies the users needs. If any individual shuts of a portion of it (which he is not using, and does not need for his own use) from his fellows, he is defrauding the whole community."

Thus an anarchist society has a simple and effective means of deciding how communally owned resources are used, one based on possession and usufruct. The key thing to remember, as discussed in section I.3.3, is that socialisation means that access is free: users of a resource are not subjected to hierarchical social relationships in order to use it. Socialisation does not mean that people can, say, wander into someone’s workplace and simply take away a machine or computer. Rather, it means that when someone joins a workplace they are sharing in the use of a common resource and do so as a free and equal associate rather than as an obedient wage-slave. If a resource is not being used, then they have free access to use it. If it is being used then it will be managed by those who use it, with access granted in agreed ways which ensure egalitarian, and so free, relationships and outcomes.

Gaston Leval pointed out that “the Peasant Federation of Levant ... produced more than half of the total orange crop in Spain: almost four million kilos (1 kilo equals about 2 and one-fourth pounds). It then transported and sold through its own commercial organisation (no middlemen) more than 70% of the crop. (The Federation’s commercial organisation included its own warehouses, trucks, and boats. Early in 1938 the export section established its own agencies in France: Marseilles, Perpignan, Bordeaux, Cherbourg, and Paris.) Out of a total of 47,000 hectares in all Spain devoted to rice production, the collective in the Province of Valencia cultivated 30,000 hectares.”

“Preoccupation with cultural and pedagogical innovations was an event without precedent in rural Spain. The Amposta collectivists organised classes for semi-literates, kindergartens, and even a school of arts and professions. The Seròs schools were free to all neighbours, collectivists or not. Grau installed a school named after its most illustrious citizen, Joaquin Costa. The Calanda collective (pop. only 4,500) schooled 1,233 children. The best students were sent to the Lyceum in Caspe, with all expenses paid by the collective. The Alcoriza (pop. 4,000) school was attended by 600 children. Many of the schools were installed in abandoned convents. In Granadella (pop. 2,000), classes were conducted in the abandoned barracks of the Civil Guards. Graus organised a print library and a school of arts and professions, attended by 60 pupils. The same building housed a school of fine arts and high grade museum. In some villages a cinema was installed for the first time. The Penalba cinema was installed in a church. Viladecana built an experimental agricultural laboratory."
ity of rural life. From a purely economic viewpoint, production increased and as historian Benjamin Martin summarises: “Though it is impossible to generalise about the rural land take-overs, there is little doubt that the quality of life for most peasants who participated in co-operatives and collectives notably improved.” [The Agony of Modernisation, p. 394] Another historian, Antony Beevor, notes that “[i]n terms of production and improved standards for the peasants, the self-managed collectives appear to have been successful. They also seem to have encouraged harmonious community relations.” [The Spanish Civil War, p. 95]

More importantly, however, this improvement in the quality of life included an increase in freedom as well as in consumption. To re-quote the member of the Becite collective in Aragón: “it was marvellous . . . to live in a collective, a free society where one could say what one thought, where if the village committee seemed unsatisfactory one could say. The committee took no big decisions without calling the whole village together in a general assembly. All this was wonderful.” [quoted by Ronald Fraser, Blood of Spain, p. 288] As Beevor suggests, “self-managed collectives were much happier when no better off than before. What mattered was that the labourers ran their own collectives — a distinct contrast to the disasters of state collectivisation in the Soviet Union.” [Op. Cit., p. 95] Here are a few examples provided by Jose Peirats:

“In Montblanc the collective dug up the old useless vines and planted new vineyards. The land, improved by modern cultivation with tractors, yielded much bigger and better crops . . . Many Aragón collectives built new roads and repaired old ones, installed modern flour mills, and processed agricultural and animal waste into useful industrial products. Many of these improvements were first initiated by the collectives. Some villages, like Calanda, built parks and baths. Almost all collectives es-

As for deciding what a given area of commons is used for, that falls to the local communities who live next to them. If, for example, a local self-managed factory wants to expand and eat into the commons, then the local community who uses (and so controls) the local commons would discuss it and come to an agreement concerning it. If a minority really objects, they can use direct action to put their point across. But anarchists argue that rational debate among equals will not result in too much of that. Or suppose an individual wanted to set up an allotment in a given area, which had not been allocated as a park. Then he or she would notify the community assembly by appropriate means (e.g. on a notice board or newspaper), and if no one objected at the next assembly or in a set time-span, the allotment would go ahead, as no one else desired to use the resource in question.

Other communities would be confederated with this one, and joint activity would also be discussed by debate, with a community (like an individual) being free not to associate if they so desire. Other communities could and would object to ecologically and individually destructive practices. The interrelationships of both ecosystems and freedom is well known, and its doubtful that free individuals would sit back and let some amongst them destroy their planet.

Therefore, those who use something control it. This means that “users groups” would be created to manage resources used by more than one person. For workplaces this would (essentially) be those who worked there (with, possibly, the input of consumer groups and co-operatives). Housing associations made up of tenants would manage housing and repairs. Resources that are used by associations within society, such as communally owned schools, workshops, computer networks, and so forth, would be managed on a day-to-day basis by those who use them. User groups would decide access rules (for example, time-tables and booking rules) and how they are used, making repairs and improvements. Such groups would be accountable to their local community. Hence,
if that community thought that any activities by a group within it was destroying communal resources or restricting access to them, the matter would be discussed at the relevant assembly. In this way, interested parties manage their own activities and the resources they use (and so would be very likely to have an interest in ensuring their proper and effective use), but without private property and its resulting hierarchies and restrictions on freedom.

Lastly, let us examine clashes of use rights, i.e. cases where two or more people, communes or syndicates desire to use the same resource. In general, such problems can be resolved by discussion and decision making by those involved. This process would be roughly as follows: if the contesting parties are reasonable, they would probably mutually agree to allow their dispute to be settled by some mutual friend whose judgement they could trust, or they would place it in the hands of a jury, randomly selected from the community or communities in question. This would take place only if they could not come to an agreement between themselves to share the resource in question.

On thing is certain, however, such disputes are much better settled without the interference of authority or the re-creation of private property. If those involved do not take the sane course described above and instead decide to set up an authority, disaster will be the inevitable result. In the first place, this authority will have to be given power to enforce its judgement in such matters. If this happens, the new authority will undoubtedly keep for itself the best of what is disputed (as payment for services rendered, of course!). If private property were re-introduced, such authoritarian bodies would develop sooner, rather than later, with two new classes of oppressors being created — the property owners and the enforcers of “justice.” Ultimately, it is strange to think that two parties who meet on terms of equality and disagree could not be reasonable or just, and that a third party with power backed up by violence will be the incarnation of justice itself. Common sense should warn us against such an illusion and, if common sense is

These federations had many tasks. They ensured the distribution of surplus produce to the front line and to the cities, cutting out middlemen and ensuring the end of exploitation. They also arranged for exchanges between collectives to take place. In addition, the federations allowed the individual collectives to pool resources together in order to improve the infrastructure of the area (building roads, canals, hospitals and so on) and invest in means of production which no one collective could afford. In this way individual collectives pooled their resources, increased and improved the means of production ad the social and economic infrastructure of their regions. All this, combined with an increase of consumption in the villages and towns as well as the feeding of militia men and women fighting the fascists at the front.

Rural collectivisations allowed the potential creative energy that existed among the rural workers and peasants to be unleashed, an energy that had been wasted under private property. The popular assemblies allowed community problems and improvements to be identified and solved directly, drawing upon the ideas and experiences of everyone and enriched by discussion and debate. To quote one participant: “We were always prepared to adapt our ideas in every area of collective life if things did not work. That was the advantage of our collectives over state-created ones like those in Russia. We were free. Each village could do as it pleased. There was local stimulus, local initiative.” [quoted by Ronald Fraser, Blood of Spain, p. 357] As we discuss in the next section, this enabled rural Spain to be transformed from one marked by poverty and fear into one of increased well-being and hope.

I.8.6 What did the agricultural collectives accomplish?

Most basically, self-management in collectives combined with co-operation in rural federations allowed an improvement in qual-
federations were created at congresses to which the collectives in an area sent delegates. These congresses agreed a series of general rules about how the federation would operate and what commitments the affiliated collectives would have to each other. The congress elected an administration council, which took responsibility for implementing agreed policy. The Levant Federation was organised as follows:

“The 900 Collectives were brought together in 54 cantonal federations which grouped themselves and at the same time subdivided into five provincial federations which at the top level ended in the Regional Comite … [This] was nominated directly by the annual congresses answerable to them and to the hundreds of peasant delegates chosen by their comrades … . It was also on their initiative that the Levante Federation was divided into 26 general sections in accordance with specialisations in work and other activities. Those 26 sections constituted a whole which embraced probably for the first time in history outside the State and governmental structures, the whole of social life.” [Gaston Leval, *Collectives in the Spanish Revolution*, p. 154]

The Aragón Federation statues were agreed at its founding congress in mid-February 1937 by 500 delegates. These stated that there would be “as many county federations” as deemed “necessary for the proper running of the collectives” and the Federation would “hold its ordinary congress at intervals of six months, in addition to whatever extraordinary ones … deemed appropriate.” New collectives could join after “consent in general assembly of the inhabitants of the collective”. The federation aimed to “coordinate the economic potential of the region and … be geared towards solidarity in accordance with the norms of autonomy and federalism.” [quoted by Jose Peirats, *The CNT in the Spanish Revolution*, vol. 1, p. 240]

I.6.2 Doesn’t communal ownership involve restricting individual liberty?

This point is expressed in many different forms. John Henry MacKay (an individualist anarchist) put the point as follows:

“Would you [the social anarchist], in the system of society which you call ‘free Communism’ prevent individuals from exchanging their labour among themselves by means of their own medium of exchange? And further: Would you prevent them from occupying land for the purpose of personal use?’ … [The] question was not to be escaped. If he answered ‘Yes!’ he admitted that society lacking, then history shows that using authority or property to solve disputes is not wise!

And, we should note, it is equally as fallacious, as Leninists suggest, that only centralisation can ensure common access and common use. Centralisation, by removing control from the users into a body claiming to represent “society”, replaces the dangers of abuse by a small group of workers with the dangers of abuse by a bureaucracy invested with power and authority over all. If members of a commune or syndicate can abuse their position and restrict access for their own benefit, so can the individuals who make up the bureaucracy gathered round a centralised body (whether that body is, in theory, account-able by election or not). Indeed, it is far more likely to occur as the experience of Leninism shows beyond doubt. Thus decentralisation is the key to common ownership and access, not centralisation.

Communal ownership needs communal structures in order to function. Use rights, and discussion among equals, replace property rights in a free society. Freedom cannot survive if it is caged behind laws enforced by public or private states.
had the right of control over the individual and threw overboard the autonomy of the individual which he had always zealously defended; if on the other hand he answered ‘No!’ he admitted the right of private property which he had just denied so emphatically.” [Patterns of Anarchy, p. 31]

However, anarchist theory has a simple and clear answer to this question. To see what this answer is, it simply a case of remembering that use rights replace property rights in an anarchist society. In other words, individuals can exchange their labour as they see fit and occupy land for their own use. This in no way contradicts the abolition of private property, because occupancy and use is directly opposed to private property (see section B.3). Socialisation is rooted in this concept of “occupancy and use” and this means that in a free communist society individuals can occupy and use whatever land and such tools and equipment as they need — they do not have to join the free communist society (see section I.5.7). If they do not, however, they cannot place claims on the benefits others receive from co-operation and communal life.

This can be seen from Charlotte Wilson’s discussions on anarchism written a few years before MacKay published his “inescapable” question. She asks the question: “Does Anarchism ... then ... acknowledge ... no personal property?” She answers by noting that “every man [or woman] is free to take what he [or she] requires” and so “it is hardly conceivable that personal necessaries and conveniences will not be appropriated” by individual’s for their personal consumption and use. For “[w]hen property is protected by no legal enactments, backed by armed force, and is unable to buy personal service, its resuscitation on such a scale as to be dangerous to society is little to be dreaded. The amount appropriated by each individual ... must be left to his [or her] own conscience, and the pressure exercised upon him [or her] by the moral sense and distinct interests of his [or her] neighbours.” This system of

elected. The Assemblies were open for everyone to participate in the proceedings. Democracy embraced all social life. In most cases, even the ‘individualists’ who were not members of the collective could participate in the discussions, and they were listened to by the collectivists.” [The Anarchist Collectives, p 119fn]

Work was “usually done in groups on a co-operative basis. In smaller collectives, all workers gathered to discuss the work needed to be done and how to allocate it. In larger collectives, representatives of each work group would gather at regular intervals. General assemblies of the collective met on a weekly, biweekly, or monthly basis, and took up issues ranging from hours and wages to the distribution of food and clothing.” [Martha A. Ackelsberg in Free Women of Spain, p. 106] It was in these face-to-face assemblies that decisions upon the distribution of resources were decided both within and outwith the collective. Here, when considering the importance of mutual aid, appeals were made to an individual’s sense of empathy. As one activist remembered:

“There were, of course, those who didn’t want to share and who said that each collective should take care of itself. But they were usually convinced in the assemblies. We’d try to speak to them in terms they understood. We’d ask, ‘Did you think it was fair when the cacique [local boss] let people starve if there wasn’t enough work?’ and they said, ‘Of course not.’ They would eventually come around. Don’t forget, there were three hundred thousand collectivists [in Aragon], but only ten thousand of us had been members of the CNT. We had a lot of educating to do.” [quoted by Ackelsberg, Op. Cit., p. 107]

In addition, regional federations of collectives were formed in many areas of Spain (for example, in Aragón and the Levant). The
only they or their families would work the land, without employing wage labour. In areas like Catalonia, where the tradition of petty peasant ownership prevailed, the land holdings were scattered. There were no great estates. Many of these peasants, together with the CNT, organised collectives, pooling their land, animals, tools, chickens, grain, fertiliser, and even their harvested crops.

"Privately owned farms located in the midst of collectives interfered with efficient cultivation by splitting up the collectives into disconnected parcels. To induce owners to move, they were given more or even better land located on the perimeter of the collective.

"The collectivist who had nothing to contribute to the collective was admitted with the same rights and the same duties as the others. In some collectives, those joining had to contribute their money (Girondella in Catalonia, Lagunarrotta in Aragón, and Cervera del Maestra in Valencia)." [The Anarchist Collectives, p. 112]

Dolgoff observed that "supreme power was vested in, and actually exercised by, the membership in general assemblies, and all power derived from, and flowed back to, the grass roots organisations of the people." [Op. Cit., p 119fn] Peirats also noted that the collectives were "fiercely democratic" as regards decision-making. For example, in Ademuz "assemblies were held every Saturday" while in Alcolea de Cinca "they were held whenever necessary." [Anarchists in the Spanish Revolution, p. 146] Eyewitness Gaston Leval summarised this explosion in self-management as follows:

"Regular general membership meetings were convoked weekly, bi-weekly, or monthly ... and these meetings were completely free of the tensions and recriminations which inevitably emerge when the power of decisions is vested in a few individuals — even if democratically

"usufruct" would also apply to the "instruments of production — land included", being "free to all workers, or groups of workers" for "as long as long and capital are unappropriated, the workers are free, and that, when these have a master, the workers also are slaves." [Anarchist Essays, p. 24 and p. 21] This is because, as with all forms of anarchism, communist-anarchism bases itself on the distinction between property and possession.

In other words, possession replaces private property in a free society. This applies to those who decide to join a free communist society and those who desire to remain outside. This is clear from the works of many leading theorists of free communism (as indicated in section G.2.1), none of whom thought the occupying of land for personal use (or a house or the means of production) entailed the "right of private property." For example, looking at land we find both Kropotkin and Proudhon arguing along the same lines. For the former: "Who, then, can appropriate for himself the tiniest plot of ground ... without committing a flagrant injustice?" [Conquest of Bread, p. 90] For the latter: "The land cannot be appropriated". Neither denied that individuals could use the land or other resources, simply that it could not be turned into private property. Thus Proudhon: "Every occupant is, then, necessarily a possessor or usufructuary, — a function that excludes proprietorship." [What is Property?, p. 103 and p. 98] Obviously John Henry MacKay, unlike Kropotkin, had not read his Proudhon! As Wilson argued:

"Proudhon’s famous dictum, ‘Property is theft’, is the key to the equally famous enigma ... ‘From each according to his capacities, to each according to his needs’. When the workers clearly understand that in taking possession of railways and ships, mines and fields, farm buildings and factories, raw material and machinery, and all else they need for their labour, they are claiming the right to use freely for the benefit of society, what social labour
has created, or utilised in the past, and that, in return for their work, they have a just right to take from the finished product whatever they personally require.” [Op. Cit., pp. 20–1]

This can be seen from libertarian communist William Morris and his account of Proudhon. Morris classed the French anarchist as “the most noteworthy figure” of a group of “Socialist thinkers who serve as a kind of link between the Utopians and the school of ... scientific Socialists.” As far as his critique of property went, Morris argued that in What is Property? Proudhon’s “position is that of a Communist pure and simple.” [Political Writings, p. 569 and p. 570]

Unsurprisingly, then, we find Kropotkin arguing that “[a]ll things belong to all, and provided that men and women contribute their share of labour for the production of necessary objects, they are entitled to their share of all that is produced by the community at large.” He went on to state that “free Communism ... places the products reaped or manufactured in common at the disposal of all, leaving to each the liberty to consume them as he [or she] pleases in his [or her] own home.” [The Place of Anarchism in Socialist Evolution, p. 6 and p. 7] This obviously implies a situation of “occupancy and use” (with those who are actually using a resource controlling it).

This support for possession does not, of course, imply any contradiction with communism as MacKay suggested. The aim of communism is to place the fruits of society at the disposal of society, to be used and consumed as the members of that society desire. As such, individuals are not stopped from taking and using the goods produced and, obviously, this automatically means “excluding” others from using and consuming them. This in no way implies the recreation of private property in any meaningful sense. Significantly, this perspective has been pretty commonplace in human society and numerous authors have pointed out “how many

collectivised industry than as a direct hierarchised executive.” The federation of collectives created “the first social security system in Spain” (which included retirement pay, free medicines, sick and maternity pay) and a compensation fund was organised “to permit the economically weaker collectives to pay their workers, the amount each collective contributed being in direct proportion to the number of workers employed.” [quoted by Fraser, Op. Cit., p. 229]

As can be seen, the industrial collectives co-ordinated their activity in many ways, with varying degrees of success. As would be expected, mistakes were made and different solutions found as an anarchist society can hardly be produced “overnight” (as discussed in section H.2.5, anarchists have always been aware that social transformation takes time). So it is hardly surprising that the workers of the CNT faced numerous problems and had to develop their self-management experiment as objective conditions allowed them to. Unfortunately, thanks to fascist aggression and Communist Party and Republican back-stabbing, the experiment did not last long enough to fully answer all the questions we have about the viability of the solutions tried. Given time, however, we are sure they would have solved the problems they faced for the social experimentation which was conducted was not only highly successful but also rich in promise.

I.8.5 How were the Spanish agricultural co-operatives organised and co-ordinated?

Jose Peirats described collectivisation among the peasantry as follows:

“The expropriated lands were turned over to the peasant syndicates, and it was these syndicates that organised the first collectives. Generally the holdings of small property owners were respected, always on the condition that
anarchist objection) was that the union became like a large firm” and its “structure grew increasingly rigid.” [Ronald Fraser, Blood of Spain, p. 222] According to one militant, “From the outside it began to look like an American or German trust” and the workers found it difficult to secure any changes and “felt they weren’t particularly involved in decision making.” [quoted by Fraser, Op. Cit., p. 222 and p. 223] However, this did not stop workers re-electing almost all posts at the first Annual General Assembly.

In the end, the major difference between the union-run industry and a capitalist firm organisationally appeared to be that workers could vote for (and recall) the industry management at relatively regular General Assembly meetings. While a vast improvement on capitalism, it is hardly the best example of participatory self-management in action. However, it must be stressed that the economic problems caused by the Civil War and Stalinist led counter-revolution obviously would have had an effect on the internal structure of any industry and so we cannot say that the form of organisation created was totally responsible for any marginalisation that took place.

The other important form of co-operation was what we will term confederalisation. This system was based on horizontal links between workplaces (via the CNT union) and allowed a maximum of self-management and mutual aid. This form of co-operation was practised by the Badalona textile industry (and had been defeated in the woodworkers’ union). It was based upon each workplace being run by its elected management, selling its own production, getting its own orders and receiving the proceeds. However, “everything each mill did was reported to the union which charted progress and kept statistics. If the union felt that a particular factory was not acting in the best interests of the collectivised industry as a whole, the enterprise was informed and asked to change course.” This system ensured that the “dangers of the big ‘union trust’ as of the atomised collective were avoided.” [Fraser, Op. Cit., p. 229] According to one militant, the union “acted more as a socialist control of languages lack any verb for unilateral ownership.” [David Graeber, Possibilities, p. 23]

For example, a group of friends go on a picnic and share the food stuffs they bring. If someone takes an apple from the common bounty and eats it, then obviously it is no longer available for others to eat. However, this does not change the common ownership of foodstuffs the picnic is based on. Similarly, in a communist society people would still have their own homes and, of course, would have the right to restrict entry to just those whom they have invited. People would not come in from the street and take up residence in the main bedroom on the dubious rationale that it is not being used as the inhabitant is watching TV in the lounge, is on holiday or visiting friends.

Thus communism is based on the obvious fact that individuals will “appropriate” (use) the products of society to satisfy their own needs (assuming they can find someone who needs to produce it). What it does, though, is to deprive individuals of the ability to turn possession into private property and, as a result, subjugate others to their will by means of wage labour or landlordism.

In other words, possession (personal “property”) is not transformed into social property. Hence the communist support for individuals not joining the commune, working their land or tools and living by their own hands. Being based on possession, this is utterly compatible with communist principles and the abolition of private property. This is because people are using the resources in question and for that simple reason are exercising the same rights as the rest of communist society. Thus the case of the non-member of free communism is clear — they would also have access to what they possessed and used such as the land, housing and means of production. The difference is that the non-communists would have to barter with the rest of society for goods rather than take what they need from the communal stores.

To re-iterate, the resources non-communists use do not become private property because they are being used and they revert
back into common ownership once they are no longer occupied and used. In other words, possession replaces property. Thus communist-anarchists agree with Individualist Anarchist John Beverley Robinson when he wrote:

“There are two kinds of land ownership, proprietorship or property, by which the owner is absolute lord of the land to use it or hold it out of use, as it may please him; and possession, by which he is secure in the tenure of land which he uses and occupies, but has no claim on it at all if he ceases to use it. For the secure possession of his crops or buildings or other products, he needs nothing but the possession of the land he uses.” [Patterns of Anarchy, p. 273]

This system, we must note, was used in the rural collectives during the Spanish Revolution, with people free to remain outside the collective working only as much land and equipment as they could “occupy and use” by their own labour. Similarly, the individuals within the collective worked in common and took what they needed from the communal stores (see section I.8).

MacKay’s comments raise another interesting point. Given that Individualist Anarchists oppose the current system of private property in land, their system entails that “society has the right of control over the individual.” If we look at the “occupancy and use” land system favoured by the likes of Tucker, we discover that it is based on restricting property in land (and so the owners of land). As discussed in section G.1.2, the likes of Tucker looked forward to a time when public opinion (i.e., society) would limit the amount of land which individuals could acquire and so, from MacKay’s perspective, controlling their actions and violating their autonomy. Which, we must say, is not surprising as individualism requires the supremacy of the rest of society over the individual in terms of rules relating to the ownership and use of possessions (or “prop-

with better facilities and co-ordination … For us, socialisation must correct these deficiencies and systems of organisation in every industry … To socialise an industry, we must consolidate the different units of each branch of industry in accordance with a general and organic plan which will avoid competition and other difficulties impeding the good and efficient organisation of production and distribution.” [quoted by Souchy, Anarchist Collectives, p. 83]

As Souchy pointed out, this document is very important in the evolution of collectivisation, because it indicates a realisation that “workers must take into account that partial collectivisation will in time degenerate into a kind of bourgeois co-operativism.” [Op. Cit., p. 83] Thus many collectives did not compete with each other for profits, as surpluses were pooled and distributed on a wider basis than the individual collective.

This process went on in many different unions and collectives and, unsurprisingly, the forms of co-ordination agreed to lead to different forms of organisation in different areas and industries, as would be expected in a free society. However, the two most important forms can be termed syndicalisation and confederationalism (we will ignore the forms created by the collectivisation decree as these were not created by the workers themselves).

Syndicalisation (our term) meant that the CNT’s industrial union ran the whole industry. This solution was tried by the wood-workers’ union after extensive debate. One section of the union, “dominated by the FAI, maintained that anarchist self-management meant that the workers should set up and operate autonomous centres of production so as to avoid the threat of bureaucratisation.” However, those in favour of syndicalisation won the day and production was organised in the hands of the union, with administration posts and delegate meetings elected by the rank and file.

However, the “major failure … (and which supported the original
theory and the programme of the CNT). Gaston Leval gives the example of Hospitalet del Llobregat with regards to this process:

“Local industries went through stages almost universally adopted in that revolution ... [I]n the first instance, comites nominated by the workers employed in them [were organised]. Production and sales continued in each one. But very soon it was clear that this situation gave rise to competition between the factories ... creating rivalries which were incompatible with the socialist and libertarian outlook. So the CNT launched the watchword: 'All industries must be ramified in the Syndicates, completely socialised, and the regime of solidarity which we have always advocated be established once and for all.'

“The idea won support immediately.” [Collectives in the Spanish Revolution, pp. 291–2]

Another example was the woodworkers' union which had a massive debate on socialisation and decided to do so (the shopworkers' union had a similar debate, but the majority of workers rejected socialisation). According to Ronald Fraser a “union delegate would go round the small shops, point out to the workers that the conditions were unhealthy and dangerous, that the revolution was changing all this, and secure their agreement to close down and move to the union-built Double-X and the 33 EU.” [Ronald Fraser, Blood of Spain, p. 222]

A plenum of syndicates met in December of 1936 and formulated norms for socialisation in which the inefficiency of the capitalist industrial system was analysed. The report of the plenum stated:

“The major defect of most small manufacturing shops is fragmentation and lack of technical/commercial preparation. This prevents their modernisation and consolidation into better and more efficient units of production,

property”) — as the Individualist Anarchists themselves implicitly acknowledge.

MacKay goes on to state that “every serious man must declare himself for Socialism, and thereby for force and against liberty, or for Anarchism, and thereby for liberty and against force.” [Op. Cit., p. 32] Which, we must note, is a strange statement for, as indicated in section G.1, individualist anarchists like Benjamin Tucker considered themselves socialists and opposed capitalist private property (while, confusingly, many of them calling their system of possession "property").

However, MacKay’s statement begs the question: does private property support liberty? He does not address or even acknowledge the fact that private property will inevitably lead to the owners of such property gaining control over the individuals who use, but do not own, it and so denying them liberty (see section B.4). As Proudhon argued:

“The purchaser draws boundaries, fences himself in, and says, 'This is mine; each one by himself, each one for himself.' Here, then, is a piece of land upon which, henceforth, no one has right to step, save the proprietor and his friends; which can benefit nobody, save the proprietor and his servants. Let these multiply, and soon the people . . . will have nowhere to rest, no place of shelter, no ground to till. They will die of hunger at the proprietor's door, on the edge of that property which was their birth-right; and the proprietor, watching them die, will exclaim, 'So perish idlers and vagrants.'” [Op. Cit., p. 118]

Of course, as Proudhon suggested, the non-owner can gain access to the property by becoming a servant, by selling their liberty to the owner and agreeing to submit to the owner’s authority. Little wonder that he argued that the “second effect of property is despotism.” [Op. Cit., p. 259] As discussed in section G.4.1, this points
to a massive contradiction in any form of individualist anarchism which defends private property which goes beyond possession and generates wage-labour. This is because both the state and the property owner both assume sole authority over a given area and all within it. Little wonder Emile Pouget, echoing Proudhon, argued that:

“Property and authority are merely differing manifestations and expressions of one and the same ‘principle’ which boils down to the enforcement and enshrinement of the servitude of man. Consequently, the only difference between them is one of vantage point: viewed from one angle, slavery appears as a property crime, whereas, viewed from a different angle, it constitutes an authority crime.” [No Gods, No Masters, vol. 2, p. 66]

So the issue changes if someone claims more resources than they can use as individuals or as a co-operative group. If they are attempting to restrict access to others of resources they are not using then the others are entitled to simply ignore the pretensions of the would-be monopoliser. Without a state to enforce capitalist property rights, attempts to recreate private property will flounder in the laughter of their neighbours as these free people defend their liberty by ignoring the would-be capitalist’s attempts to subjugate the labour of others for their own benefit by monopolising the means of life. Unsurprisingly, MacKay does not address the fact that private property requires extensive force (i.e. a state) to protect it against those who use it or could use it but do not own it.

So MacKay ignores two important aspects of private property. Firstly, that private property is based upon force, which must be used to ensure the owner’s right to exclude others (the main reason for the existence of the state). And secondly, he ignores the anti-libertarian nature of “property” when it creates wage labour — the...

I.8.4 How were the Spanish industrial collectives co-ordinated?

The methods of co-operation tried by the collectives varied considerably. Initially, there were very few attempts to co-ordinate economic activities beyond the workplace. This is hardly surprising, given that the overwhelming need was to restart production, convert a civilian economy to a wartime one and to ensure that the civilian population and militias were supplied with necessary goods. This lead to a situation of anarchist mutualism developing, with many collectives selling the product of their own labour on the market.

This lead to some economic problems as there existed no framework of institutions between collectives to ensure efficient co-ordination of activity and so lead to pointless competition between collectives (which led to even more problems). As there were initially no confederations of collectives nor mutual/communal banks this lead to the continuation of any inequalities that initially existed between collectives (due to the fact that workers took over rich and poor capitalist firms) and it made the many ad hoc attempts at mutual aid between collectives difficult and often of an ad hoc nature.

Given that the CNT programme of libertarian communism recognised that a fully co-operative society must be based upon production for use, CNT militants fought against this system of mutualism and for inter-workplace co-ordination. They managed to convince their fellow workers of the difficulties of mutualism by free debate and discussion within their unions and collectives. Given this the degree of socialisation varied over time (as would be expected). Initially, after the defeat of Franco’s forces, there was little formal co-ordination and organisation. The most important thing was to get production started again. However, the needs of co-ordination soon became obvious (as predicted in anarchist
words, the revolution saw the abolition of wage-labour but not of the wages system. Thus capitalism was replaced by mutualism, not the socialism desired by most anarchists (namely libertarian communism). As economic and political development are closely related, the fact that the CNT did not carry out the political aspect of the revolution meant that the revolution in the economy was doomed to failure. As Leval stressed, in "the industrial collectives, especially in the large towns, matters proceeded differently as a consequence of contradictory factors and of opposition created by the co-existence of social currents emanating from different social classes." [Gaston Leval, *Collectives in the Spanish Revolution*, pp. 227–8 and p. 227]

That the initial forms of the revolution were not as expected should, perhaps, be unsurprising. After all, no social transformation ever exactly matches the hopes of those who had advocated it and the people had more pressing matters to attend to such as restarting production and fighting Franco. So it is utterly understandable that the collectives only embodied some and not all aspects of aims of the CNT and FAI! Moreover, social change does not produce instant perfect transformations and the workers “had to build new circuits of consumption and distribution, new types of social relations between the proletariat and the peasantry, and new modes of production.” [Abel Paz, *Durruti in the Spanish Revolution*, p. 451] That process was started, even if it were initially incomplete. That a wider goal was envisioned by these organisations can be seen from the fact that union activists sought to extend the degree of socialisation. So, and again in line with libertarian theory, the collectives also expressed a desire to co-operate within and across industries (see section I.3.5). These attempts at federation and co-ordination will be discussed in next section, along with some of the conclusions that can be drawn from these experiments. For, as would be expected, this attempt to introduce libertarian socialism had its drawbacks as well as successes.

"Property — not the claim to use, but to a right to prevent others from using — enables individuals who have appropriated the means of production, to hold in subjection all those who possess nothing ... and who must work that they may live. No work is possible without land, materials, and tools machinery; thus the masters of those things are the masters also of the destitute workers, and can live in idleness upon their labor... We look for the socialisation of wealth, not to restraints imposed by authority upon property, but to the removal, by direct personal action of the people themselves, of the restraints which secure property against the claims of popular justice. For authority and property are both manifestations of the egoistical spirit of domination.” [Op. Cit., pp. 57–8]

Therefore, it seems that in the name of “liberty” John Henry MacKay and a host of other “individualists” end up supporting authority and (effectively) some kind of state. This is hardly surprising as private property is the opposite of personal possession, not its base. In summary, then, far from communal property restricting individual liberty (or even personal use of resources) it is in fact its only defence. That is why all anarchists would agree with Emma Goldman that “it is our endeavour to abolish private property,
State ... we aim to free men from tyrants and government.” [A Documentary History of the American Years, vol. 1, p. 181]

the Barcelona Metal Workers’ Union to take over temporary control of the enterprises ... A few weeks after July 19th, there was the first general assembly of the firm’s workers ... It elected an enterprise committee (Comite de Empresa) to take control of the firm on a more permanent basis... . Each of the four sections of the firm — the three factories and the office staff — held their own general assemblies at least once a week. There they discussed matters ranging from the most important affairs to the most trivial.” [Robert Alexander, The Anarchists in the Spanish Civil War, vol. 1, p. 469 and p. 532]

In summary, the collectives in Spain were marked by workplace self-management. They successfully implemented the long-standing libertarian goal of turning industry from an autocracy to a democracy, of replacing wage-labour with free-labour based on the association of equals (see section I.3.1). However, it would be a mistake to assume (as many do, particularly Marxists) that the CNT and FAI considered the creation of self-managed collectives as the end of the revolution. Far from it. While they embodied such key libertarian principles as workers’ self-management, they were fundamentally a product of both anarchist ideas and the specific situation in which they were created. Rather than seek a market system of producer co-operatives, the CNT was committed to the full socialisation of the economy and the creation of libertarian communism. The collectives were, as a result, seen as development towards that goal rather than as an end in themselves. Moreover, as historian Ronald Fraser notes, it “was doubtful that the CNT had seriously envisaged collectivisation of industry ... before this time.” [The Blood of Spain, p. 212] CNT policy was opposed to the collectivisation decree of the Catalonian government, for example, which formalised (and controlled) the spontaneous gains of the revolution as expressed by the collectives.

Therefore, the collectives were (initially) a form of “self-management straddling capitalism and socialism, which we maintain would not have occurred had the Revolution been able to extend itself fully under the direction of our syndicates.”
of Workers Associations. But not even the CNT had the right to do as it pleased. Everything had to be decided and ratified by the workers themselves through conferences and congresses.” [Augustin Souchy, The Anarchist Collectives, p. 67]

In Catalonia “every factory elected its administrative committee composed of its most capable workers. Depending on the size of the factory, the function of these committees included inner plant organisation, statistics, finance, correspondence, and relations with other factories and with the community … Several months after collectivisation the textile industry of Barcelona was in far better shape than under capitalist management. Here was yet another example to show that grass roots socialism from below does not destroy initiative. Greed is not the only motivation in human relations.” [Souchy, Op. Cit., p 95]

Thus the individual collective was based on a mass assembly of those who worked there. This assembly nominated administrative staff who were mandated to implement the decisions of the assembly and who had to report back, and were accountable, to that assembly. For example, in Castellon de la Plana “[e]very month the technical and administrative council presented the general assembly of the Syndicate with a report which was examined and discussed if necessary, and finally introduced when this majority thought it of use. Thus all the activities were known and controlled by all the workers. We find here a practical example of libertarian democracy.” [Gaston Leval, Collectives in the Spanish Revolution, p. 303] Power rested at the base of the collective, with “all important decisions [being] taken by the general assemblies of the workers” which “were widely attended and regularly held … if an administrator did something which the general assembly had not authorised, he was likely to be deposed at the next meeting.” An example of this process can be seen from the Casa Riviera company. After the defeat of the army coup “a control committee (Comite de Control) was named by

I.7 Won’t Libertarian Socialism destroy individuality?

No. Libertarian socialism only suppresses individuality for those who are so shallow that they cannot separate their identity from what they own. However, be that as it may, this is an important objection to any form of socialism and, given the example of “socialist” Russia, needs to be discussed more.

The basic assumption behind this question is that capitalism encourages individuality, but this assumption can be faulted on many levels. As Kropotkin noted, “individual freedom [has] remained, both in theory and in practice, more illusory than real” and that the “want of development of the personality (leading to herd-psychology) and the lack of individual creative power and initiative are certainly one of the chief defects of our time. Economical individualism has not kept its promise: it did not result in any striking development of individuality.” [Ethics, p. 27 and p. 28] In effect, modern capitalism has reduced individuality to a parody of what it could and should be (see section I.7.4). Little wonder Emma Goldman argued that:

“The oft repeated slogan of our time is … that ours is an era of individualism … Only those who do not probe beneath the surface might be led to entertain this view. Have not the few accumulated the wealth of the world? Are they not the masters, the absolute kings of the situation? Their success, however, is due not to individualism, but the inertia, the craveness, the utter submission of the mass. The latter wants but to be dominated, to be
led, to be coerced. As to individualism, at no time in human history did it have less chance of expression, less opportunity to assert itself in a normal, healthy manner.”

[Anarchism and Other Essays, pp. 70–1]

So we see a system which is apparently based on “egotism” and “individualism” but whose members are free be standardised individuals, who hardly express their individuality at all. Far from increasing individuality, capitalism standardises it and so restricts it — that it survives at all is more an expression of the strength of humanity than any benefits of the capitalist system. This impoverishment of individuality is hardly surprising in a society based on hierarchical institutions which are designed to assure obedience and subordination. Given this, it comes as no surprise to find libertarian communists like Kropotkin suggesting that “as for knowing what will be the essence of individual development, I do not think it could be along individualist lines. Individual — yes, without doubt, but individualist — I have my doubts. That would mean: narrow egoism — regressive evolution and even that would be limited to a certain number.” [Kropotkin, quoted by Ruth Kinna, “Kropotkin’s theory of Mutual Aid in Historical Context”, pp. 259–283, International Review of Social History, No. 40, p. 268]

So, can we say that libertarian socialism will increase individuality or is this conformity and lack of “individualism” a constant feature of the human race? In order to make some sort of statement on this, we have to look at non-hierarchical societies and organisations. We will discuss tribal cultures as an example of non-hierarchical societies in section I.7.1. Here, however, we indicate how anarchist organisations will protect and increase an individual’s sense of self.

Anarchist organisations and tactics are designed to promote individuality. They are decentralised, participatory organisations and so they give those involved the “social space” required to express themselves and develop their abilities and potential in ways re-

I.8.3 How were Spanish industrial collectives organised?

Martha A. Ackelsberg gives us an excellent short summary of how the industrial collectives where organised:

“Pre-existing structures of worker organisation made possible a workers’ take-over of much of the industrial economy, especially in Catalonia … Factory committees formed to direct production and co-ordinate with other units within the same industry. Union organisations co-ordinated both the production and distribution of manufactured goods across industries and regions … In most collectivised industries, general assemblies of workers decided policy, while elected committees managed affairs on a day-to-day basis.” [Free Women of Spain, p. 100]

The collectives were based on workers’ democratic self-management of their workplaces, using productive assets that were under the custodianship of the entire working community and administered through federations of workers’ associations:

“The collectives organised during the Spanish Civil War were workers’ economic associations without private property. The fact that collective plants were managed by those who worked in them did not mean that these establishments became their private property. The collective had no right to sell or rent all or any part of the collectivised factory or workshop. The rightful custodian was the CNT, the National Confederation
but also the structures necessary to not only fight capitalism, but to replace it.

In summary, then, anarchism gained mass support by anarchists participating in mass struggles and movements, showing that its ideas and ideals were applicable to working class experiences. In fact, to even wonder why anarchism gained support in Spain is, to some degree, to implicitly assume, with Marxists of various shades, that only state socialism reflects the needs of working class people. Discussing the question why the social democratic or Communist movements did not replace anarchism in Spain, historian J. Romero Maura correctly pointed out that this “is based on the false assumption that the anarcho-syndicalist conception of the workers’ struggle in pre-revolutionary society was completely at odds with what the real social process signified (hence the constant reference to ‘religious’ ‘messianic’ models as explanations).” After discussing and refuting five common suggestions for the success of anarchism in Spain, he concluded that the “explanation of Spanish anarcho-syndicalism’s success in organising a mass movement with a sustained revolutionary elan should initially be sought in the very nature of the anarchist conception of society and of how to achieve revolution.” [Op. Cit. p. 78 and p. 65]

It was the revolutionary nature of the CNT that created a militant membership who were willing and able to use direct action to defend their liberty. Unlike the Marxist led German workers, organised in a centralised fashion and trained in the obedience required by hierarchy, who did nothing to stop Hitler, the Spanish working class (like their comrades in anarchist unions in Italy) took to the streets to stop fascism.

The revolution in Spain did not “just happen”; it was the result of nearly seventy years of persistent anarchist agitation and revolutionary struggle, including a long series of strikes, protests, boycotts, uprisings and other forms of direct action that prepared the peasants and workers organise popular resistance to the attempted

stricted under capitalism. As Gaston Leval noted in his book on the anarchist collectives during the Spanish Revolution, “so far as collective life is concerned, the freedom of each is the right to participate spontaneously with one’s thought, one’s will, one’s initiative to the full extent of one’s capacities. A negative liberty is not liberty; it is nothingness.” [Collectives in the Spanish Revolution, p. 346]

By being able to take part in and manage the decision making processes which directly affect you, your ability to think for yourself is increased and so you are constantly developing your abilities and personality. The spontaneous activity described by Leval has important psychological impacts. Thus Erich Fromm: “In all spontaneous activity, the individual embraces the world. Not only does his [sic] individual self remain intact; it becomes stronger and more solidified. For the self is as strong as it is active.” [Escape from Freedom, p. 225]

Therefore, individuality does not atrophy within an anarchist organisation as it does under capitalism. It will become stronger as people participate and act within the social organisation. In other words, individuality requires community. As German philosopher and sociologist Max Horkheimer once observed, “individuality is impaired when each man decides to fend for himself... The absolutely isolated individual has always been an illusion. The most esteemed personal qualities, such as independence, will to freedom, sympathy, and the sense of justice, are social as well as individual virtues. The fully developed individual is the consummation of a fully developed society.” [The Eclipse of Reason, p. 135]

The sovereign, self-sufficient individual is as much a product of a healthy community as it is from individual self-realisation and the fulfilment of desire. There is a tendency for community to enrich and develop individuality, with this tendency being seen throughout human history. This suggests that the abstract individualism of capitalism is more the exception than the rule in social life. In other words, history indicates that by working together with others as equals individuality is strengthened far more than
in the so-called “individualism” associated with capitalism. Hence the need, as Murray Bookchin put it, to “arrest the ravaging and simplification of the human spirit, of human personality, of human community, of humanity’s idea of the good.” [The Ecology of Freedom, p. 409]

Communal support for individuality is hardly surprising as individuality is a product of the interaction between social forces and individual attributes. The more an individual cuts themselves off from social life, the more likely their individuality will suffer. This can be seen from the 1980’s when neo-liberal governments supporting the individualism associated with free market capitalism were elected in both Britain and the USA. The promotion of market forces lead to social atomisation, social disruption and a more centralised state. As this swept across society, the resulting disruption of social life ensured that many individuals became impoverished ethically and culturally as society became increasingly privatised. Two decades later, David Cameron, the leader of the Conservative party, complained of a broken society in Britain while, of course, skilfully avoiding discussing the neo-liberal reforms imposed by his predecessor Thatcher which made it so.

In other words, many of the characteristics which we associate with a developed individuality (namely ability to think, to act, to hold your own opinions and standards and so forth) are (essentially) social skills and are encouraged by a well developed community. Remove that social background and these valued aspects of individuality are undermined by lack of use, fear of authority, atomisation and limited social interaction. Taking the case of workplaces, for example, surely it is an obvious truism that a hierarchical working environment will marginalise the individual and ensure that they cannot express their opinions, exercise their thinking capacities to the full or manage their own activity. This will have in impact in all aspects of an individual’s life.

Hierarchy in all its forms produces oppression and a crushing of individuality (see section B.1). In such a system, as left-wing clas- and so dividing the workers into numerous different unions, the CNT united all workers in a workplace into the same organisation, all trades, skilled and unskilled, were in a single organisation and so solidarity was increased and encouraged as well as increasing their fighting power by eliminating divisions within the workforce. All the unions in an area were linked together into a local federation, the local federations into a regional federation and so on. As J. Romero Maura argued, the “territorial basis of organisation linkage brought all the workers from one area together and fomented working-class solidarity over and above corporate [industry or trade] solidarity.” [Op. Cit. p. 75]

Thus the structure of the CNT encouraged class solidarity and consciousness. In addition, being based on direct action and self-management, the union ensured that working people became accustomed to managing their own struggles and acting for themselves, directly. This prepared them to manage their own personal and collective interests in a free society (as seen by the success of the self-managed collectives created in the revolution). Thus the process of self-managed struggle and direct action prepared people for the necessities of the social revolution and the an anarchist society — it built, as Bakunin argued, the seeds of the future in the present.

In other words, “the route to radicalisation … came from direct involvement in struggle and in the design of alternative social institutions.” Every strike and action empowered those involved and created a viable alternative to the existing system. For example, while the strikes and food protests in Barcelona at the end of the First World War “did not topple the government, patterns of organisation established then provided models for the anarchist movement for years to follow.” [Martha A. Ackelsberg and Myrna Margulies Breithart, “Terrains of Protest: Striking City Women”, pp. 151–176, Our Generation, vol. 19, No. 1, p. 164] The same could be said of every strike, which confirmed Bakunin’s and Kropotkin’s stress on the strike as not only creating class consciousness and confidence
the CNT went much further than those of any social democrat: with its emphasis on true equality, autogestion [self-management] and working class dignity, anarcho-syndicalism made demands the capitalist system could not possibly grant to the workers.” [J. Romero Maura, “The Spanish case”, pp. 60–83, Anarchism Today, D. Apter and J. Joll (eds.), p. 79]

Strikes, due to the lack of strike funds, depended on mutual aid to be won, which fostered a strong sense of solidarity and class consciousness in the CNT membership. Strikes did not just involve workers. For example, workers in Jerez responded to bosses importing workers from Malaga “with a weapon of their own — a boycott of those using strike-breakers. The most notable boycotts were against landowners near Jerez who also had commercial establishments in the city. The workers and their wives refused to buy there, and the women stationed themselves nearby to discourage other shoppers.” [Mintz, Op. Cit., p. 102]

The structure and tactics of the CNT encouraged the politicisation, initiative and organisational skills of its members. It was a federal, decentralised body, based on direct discussion and decision making from the bottom up (“The CNT tradition was to discuss and examine everything”, as one militant put it). In addition, the CNT created a viable and practical example of an alternative method by which society could be organised. A method which was based on the ability of ordinary people to direct society themselves and which showed in practice that special ruling authorities are undesirable and unnecessary. This produced a revolutionary working class the likes of which the world has rarely seen. As Jose Peirats pointed out, “above the union level, the CNT was an eminently political organisation..., a social and revolutionary organisation for agitation and insurrection.” [Anarchists in the Spanish Revolution, p. 239] The CNT was organised in such a way as to encourage solidarity and class consciousness. Its organisation was based on the sindicato unico (one union) which united all workers of the same workplace in the same union. Instead of organising by trade,
something very positive, very complex, and above all eminently social, since it can be realised only by society and only under conditions of strict equality and solidarity.” Hierarchical power, by necessity, kills individual freedom as it is “characteristic of privilege and of every privileged position to kill the minds and hearts of men” and “power and authority corrupt those who exercise them as much as those who are compelled to submit to them.” [The Political Philosophy of Bakunin, p. 266, p. 268, p. 269 and p. 249]

A libertarian re-organisation of society will be based upon, and encourage, a self-empowerment and self-liberation of the individual and by participation within self-managed organisations individuals will educate themselves for the responsibilities and joys of freedom. As Carole Pateman points out, “participation develops and fosters the very qualities necessary for it; the more individuals participate the better able they become to do so.” [Participation and Democratic Theory, pp. 42–43] This, of course, implies a mutually interactive transformation of individuals, their social relationships and organisations (in the words of Spanish anarchist Garcia Oliver: “Who hasn’t been changed by the revolution? It wouldn’t be worth making it just to continue being the same.” [quoted by Abel Paz, Durruti in the Spanish Revolution, p. 498]).

Such a re-organisation (as we will see in section J.2) is based upon the tactic of direct action. This tactic also encourages individuality by encouraging the individual to fight for themselves, by their own self-activity, that which they consider to be wrong. As Voltairine de Cleyre put it:

“Every person who ever thought he had a right to assert, and went boldly and asserted it, himself, or jointly with others that shared his convictions, was a direct actionist …

“Every person who ever had a plan to do anything, and went and did it, or who laid his plan before others, and won their co-operation to do it with him, without going in all walks of life and so ensured that ordinary people saw that anarchism was practical and relevant to them.

This was the great strength of the Spanish Anarchist movement. It was a movement “that, in addition to possessing a revolutionary ideology [sic], was also capable of mobilising action around objectives firmly rooted in the life and conditions of the working class ... It was this ability periodically to identify and express widely felt needs and feelings that, together with its presence at community level, formed the basis of the strength of radical anarchism, and enabled it to build a mass base of support.” [Nick Rider, “The practice of direct action: the Barcelona rent strike of 1931”, pp. 79–105, For Anarchism, David Goodway (Ed.), p. 99]

Historian Temma Kaplan stressed this in her work on the Andalusian anarchists. She argued that the anarchists were “rooted in” social life and created “a movement firmly based in working-class culture.” They “formed trade unions, affinity groups such as housewives’ sections, and broad cultural associations such as workers’ circles, where the anarchist press was read and discussed.” Their “great strength ... lay in the merger of communal and militant trade union traditions. In towns where the vast majority worked in agriculture, agricultural workers’ unions came to be identified with the community as a whole ... anarchism ... show[ed] that the demands of agricultural workers and proletarians could be combined with community support to create an insurrectionary situation ... It would be a mistake ... to argue that ‘village anarchism’ in Andalusia was distinct from militant unionism, or that the movement was a surrogate religion.” [Anarchists of Andalusia: 1868–1903, p. 211, p. 207 and pp. 204–5]

The Spanish anarchists, before and after the CNT was formed, fought in and out of the factory for economic, social and political issues. This refusal of the anarchists to ignore any aspect of life ensured that they found many willing to hear their message, a message based around the ideas of individual liberty. Such a message could do nothing but radicalise workers for “the demands of
centro [local union hall] became the gathering place to discuss social issues and to dream and plan for the future. Those who aspired to learn to read and write would sit around ... studying.” [Mintz, Op. Cit., p. 160] One anarchist militant described it as follows:

“With what joy the orators were received whenever a meeting was held. ... We spoke that night about everything: of the ruling inequality of the regime and of how one had a right to a life without selfishness, hatred, without wars and suffering. We were called on another occasion and a crowd gathered larger than the first time. That’s how the pueblo started to evolve, fighting the present regime to win something by which they could sustain themselves, and dreaming of the day when it would be possible to create that society some depict in books, others by word of mouth. Avid for learning, they read everything, debated, discussed, and chatted about the different modes of perfect social existence.” [Perez Cordon, quoted by Mintz, Op. Cit., p. 158]

Newspapers and periodicals were extremely important. By 1919, more than 50 towns in Andalusia had their own libertarian newspapers. By 1934 the CNT had a membership of around one million and the anarchist press covered all of Spain. In Barcelona the CNT published a daily, Solidaridad Obrera (Worker Solidarity), with a circulation of 30,000. The FAI’s magazine Tierra y Libertad (Land and Liberty) had a circulation of 20,000. In Gijon there was Vida Obrera (Working Life), in Seville El Productor (The Producer) and in Saragossa Accion y Cultura (Action and Culture), each with a large circulation. There were many more.

As well as leading struggles, organising unions, and producing books, papers and periodicals, the anarchists also organised libertarian schools, cultural centres, co-operatives, anarchist groups (the FAI), youth groups (the Libertarian Youth) and women’s organisations (the Free Women movement). They applied their ideas to external authorities to please do the thing for them, was a direct actionist. All co-operative experiments are essentially direct action.

“Every person who ever in his life had a difference with anyone to settle, and want straight to the other persons involved to settle it ... was a direct actionist. Examples of such action are strikes and boycotts ...

“These actions ... are the spontaneous retorts of those who feel oppressed by a situation.” [The Voltairine de Cleyre Reader, pp. 47–8]

Therefore, anarchist tactics base themselves upon self-assertion and this can only develop individuality. Self-activity can only occur when there is a independent, free-thinking self. As self-management is based upon the principle of direct action (“all co-operative experiments are essentially direct action”) we can suggest that individuality will have little to fear from an anarchist society. Indeed, anarchists strongly stress the importance of individuality within a society. To quote communist-anarchist J. Burns-Gibson:

"To destroy individuality is to destroy society. For society is only realised and alive in the individual members. Society has no motive that does not issue from its individual members, no end that does not centre in them, no mind that is not theirs. ‘Spirit of the age,’ ‘public opinion,’ ‘commonweal or good,’ and like phrases have no meaning if they are thought of as features of something that hovers or floats between man and woman. They name what resides in and proceeds from individuals. Individuality and community, therefore, are equally constitutive of our idea of human life.” [quoted by William R. McKercher, Freedom and Authority, p. 31]
Little wonder, then, that anarchism “recognises and values individuality which means character, conduct and the springs of conduct, free initiative, creativeness, spontaneity, autonomy.” [J. Burnside-Gibson, quoted by McKercher, Op. Cit., p. 31f] As Kropotkin put it, anarchism “seeks the most complete development of individuality combined with the highest development of voluntary association in all its aspects … ever changing, ever modified.” [Anarchism, p. 123]

For anarchists real liberty requires social equality. For “[i]f individuals are to exercise the maximum amount of control over their own lives and environment then authority structures in these areas must be so organised that they can participate in decision making,” [Pateman, Op. Cit., p. 43] Hence individuality will be protected, encouraged and developed in an anarchist society far more than in a class ridden, hierarchical society like capitalism. As Kropotkin argued:

"[Libertarian] Communism is the best basis for individual development and freedom; not that individualism which drives men to the war of each against all ... but that which represents the full expansion of man's [and woman's] faculties, the superior development of what is original in him [or her], the greatest fruitfulness of intelligence, feeling and will.” [Op. Cit., p. 141]

It is because wonders are so enriching to life, and none is more wonderful than individuality, that anarchists oppose capitalism in the name of socialism — libertarian socialism, the free association of free individuals.

I.7.1 Do tribal cultures indicate that communalism defends individuality?

Yes. In many tribal cultures (or aboriginal cultures), we find a strong respect for individuality. As anthropologist Paul Radin was the individual standing of the faistain open assembly.” [quoted by Stuart Christie, We, the Anarchists, p. 62]

This explains the success of anarchism in the CNT. Anarchist ideas, principles and tactics, submitted to the union assemblies, proved to be good ideas and were not thrown out. The structure of the organisation, in other words, decisively influenced the content of the decisions reached as ideas, tactics, union policy and so on were discussed by the membership and those which best applied to the members’ lives were accepted and implemented. The CNT assemblies showed the validity of Bakunin’s arguments for self-managed unions as a means of ensuring workers’ control of their own destinies and organisations. As he put it, the union “sections could defend their rights and their autonomy [against union bureaucracy] in only one way: the workers called general membership meetings ... In these great meetings of the sections, the items on the agenda were amply discussed and the most progressive opinion prevailed.” [Bakunin on Anarchism, p. 247] The CNT was built on such “popular assemblies,” with the same radicalising effect. It showed, in practice, that bosses (capitalist as well as union ones) were not needed — workers can manage their own affairs directly. As a school for anarchism it could not be bettered as it showed that anarchist principles were not utopian. The CNT, by being based on workers’ self-management of the class struggle, prepared its members for self-management of the revolution and the new society.

The Spanish Revolution also shows the importance of anarchist education and media. In a country with a very high illiteracy rate, huge quantities of literature on social revolution were disseminated and read out at meetings for those who could not read. Anarchist ideas were widely discussed: “There were tens of thousands of books, pamphlets and tracts, vast and daring cultural and popular educational experiments (the Ferrer schools) that reached into almost every village and hamlet throughout Spain.” [Sam Dolgoff, The Anarchist Collectives, p. 27] The discussion of political, economic and social ideas was continuous, and “the
in Spain ensured that anarchist ideas became commonplace and accepted in a large section of the population.

This acceptance of anarchism cannot be separated from the structure and tactics of the CNT and its fore-runners. The practice of direct action and solidarity encouraged workers to rely on themselves, to identify and solve their own problems. The decentralised structure of the anarchist unions had an educational effect of their members. By discussing issues, struggles, tactics, ideals and politics in their union assemblies, the members of the union educated themselves and, by the process of self-management in the struggle, prepared themselves for a free society. The very organisational structure of the CNT ensured the dominance of anarchist ideas and the political evolution of the union membership. As one CNT militant from Casas Viejas put it, new members “asked for too much, because they lacked education. They thought they could reach the sky without a ladder ... they were beginning to learn ... There was good faith but lack of education. For that reason we would submit ideas to the assembly, and the bad ideas would be thrown out.” [quoted by Jerome R. Mintz, The Anarchists of Casas Viejas, p. 27]

It was by working in the union meetings that anarchists influenced their fellow workers. The idea that the anarchists, through the FAI, controlled the CNT is a myth. Not all anarchists in the CNT were members of the FAI, for example. Almost all FAI members were also rank-and-file members of the CNT who took part in union meetings as equals. Anarchists were not members of the FAI indicate this. Jose Borras Casacarosa confirmed that “[o]ne has to recognise that the FAI did not intervene in the CNT from above or in an authoritarian manner as did other political parties in the unions. It did so from the base through militants ... the decisions which determined the course taken by the CNT were taken under constant pressure from these militants.” Jose Campos noted that FAI militants “tended to reject control of confederal committees and only accepted them on specific occasions ... if someone proposed a motion in assembly, the other FAI members would support it, usually successfully. It pointed out, “respect for the individual, irrespective of age or sex” was one of “the outstanding features of aboriginal civilisation” as well as “the amazing degree of social and political integration achieved by them” and “a concept of personal security.” [quoted by Murray Bookchin, Remaking Society, p. 48] Murray Bookchin commented on Radin’s statement:

“respect for the individual, which Radin lists first as an aboriginal attribute, deserves to be emphasised, today, in an era that rejects the collective as destructive of individuality on the one hand, and yet, in an orgy of pure egotism, has actually destroyed all the ego boundaries of free-floating, isolated, and atomised individuals on the other. A strong collectivity may be even more supportive of the individual as close studies of certain aboriginal societies reveal, than a ‘free market’ society with its emphasis on an egoistic, but impoverished, self.” [Op. Cit., p. 48]

This individualisation associated with tribal cultures was also noted by historian Howard Zinn. He quotes fellow historian Gary Nash describing Iroquois culture (which appears typical of most Native American tribes):

“No laws and ordinances, sheriffs and constables, judges and juries, or courts or jails — the apparatus of authority in European societies — were to be found in the northeast woodlands prior to European arrival. Yet boundaries of acceptable behaviour were firmly set. Though priding themselves on the autonomous individual, the Iroquois maintained a strict sense of right and wrong.” [quoted by Zinn, A People’s History of the United States, p. 21]

This respect for individuality existed in a society based on communistic principles. As Zinn notes, in the Iroquois “land was owned...
in common and worked in common. Hunting was done together, and the catch was divided among the members of the village. Houses were considered common property and were shared by several families. The concept of private ownership of land and homes was foreign to the Iroquois.” In this communal society women “were important and respected” and families were matrilineal. Power was shared between the sexes (unlike the European idea of male domination). Similarly, children “while taught the cultural heritage of their people and solidarity with the tribe, were also taught to be independent, not to submit to overbearing authority. They were taught equality of status and the sharing of possessions.” As Zinn stresses, Native American tribes “paid careful attention to the development of personality, intensity of will, independence and flexibility, passion and potency, to their partnership with one another and with nature.” [Op. Cit., p. 20 and pp. 21–2]

Thus tribal societies indicate that community defends individuality, with communal living actually encouraging a strong sense of individuality. This is to be expected, as equality is the only condition in which individuals can be free and so in a position to develop their personality to its full. Furthermore, this communal living took place within an anarchist environment:

“The foundation principle of Indian government had always been the rejection of government. The freedom of the individual was regarded by practically all Indians north of Mexico as a canon infinitely more precious than the individual’s duty to his [or her] community or nation. This anarchistic attitude ruled all behaviour, beginning with the smallest social unity, the family. The Indian parent was constitutionally reluctant to discipline his [or her] children. Their every exhibition of self-will was accepted as a favourable indication of the development of maturing character...” [Van Every, quoted by Zinn, Op. Cit., p. 136]

I.8.2 How were the anarchists able to obtain mass popular support in Spain?

Revolutionary anarchism was introduced in Spain in 1868 by Giuseppi Fanelli, an associate of Michael Bakunin, and found fertile soil among both the workers and the peasants. Those historians who gleefully note that Bakunin sent someone who did not speak Spanish to spread his message in Spain forget how close the Latin languages are to each other. Fanelli was more than able to be understood by his Spanish and Catalan speaking hosts who, it should be noted, were already familiar with Proudhon’s ideas.

The key reason why Bakunin’s ideas gained such ready support in Spain was that they reflected ideas that they had already developed themselves. The peasants supported anarchism because of the rural tradition of Iberian collectivism which had existed for generations. The urban workers supported it because its ideas of direct action, solidarity and free federation of unions corresponded to their needs in their struggle against capitalism and the state. Neither needed to be told that capitalism was oppressive and exploitative or that the state existed to defend this class system. In addition, many Spanish workers were well aware of the dangers of centralisation and the republican tradition in Spain was very much influenced by federalist ideas (coming, in part, from Proudhon’s work as popularised by Pi y Margall, soon to become the President of the first Republic). The movement spread back and forth between countryside and cities as urban based union organisers and anarchist militants visited villages and peasants and landless agricultural workers came to industrial cities, like Barcelona, looking for work.

Therefore, from the start anarchism in Spain was associated with the labour movement (as Bakunin desired) and so anarchists had a practical area to apply their ideas and spread the anarchist message. By applying their principles in everyday life, the anarchists
approximately 90% of farm land in the hands of the bourgeoisie. [Fraser, Op. Cit., p. 37] So by 1936 agriculture was predominately capitalist, with Spanish agribusiness employing large numbers of labourers who either did not own enough land to support themselves or where landless. The labour movement in the Spanish countryside in the 1930s was precisely based on this large population of rural wage-earners (the socialist UGT land workers union had 451,000 members in 1933, 40% of its total membership, for example). In Russia at the time of the revolution of 1917, agriculture mostly consisted of small farms on which peasant families worked mainly for their own subsistence, bartering or selling their surplus.

Therefore the Spanish Revolution cannot be dismissed as a product of pre-industrial society. The urban collectivisations occurred predominately in the most heavily industrialised part of Spain and indicate that anarchist ideas are applicable to modern societies. Indeed, comforting Marxist myths aside, the CNT organised most of the unionised urban working class and, internally, agricultural workers were a minority of its membership (by 1936, the CNT was making inroads in Madrid, previously a socialist stronghold while the UGT main area of growth in the 1930s was with, ironically, rural workers). The revolution in Spain was the work (mostly) of rural and urban wage labourers (joined with poor peasants) fighting a well developed capitalist system.

In summary, then, the anarchist revolution in Spain has many lessons for revolutionaries in developed capitalist countries and cannot be dismissed as a product of industrial backwardness. The main strength lay of the anarchist movement was in urban areas and, unsurprisingly, the social revolution took place in both the most heavily industrialised areas as well as on the land.

In addition, Native American tribes also indicate that communal living and high standards of living can and do go together. For example, during the 1870s in the Cherokee Nation “land was held collectively and life was contented and prosperous” with the US Department of the Interior recognising that it was “a miracle of progress, with successful production by people living in considerable comfort, a level of education ‘equal to that furnished by an ordinary college in the States,’ flourishing industry and commerce, an effective constitutional government, a high level of literacy, and a state of ‘civilisation and enlightenment’ comparable to anything known: ‘What required five hundred years for the Britons to accomplish in this direction they have accomplished in one hundred years,’ the Department declared in wonder.” [Noam Chomsky, Year 501, p. 231]

Senator Henry Dawes of Massachusetts visited in 1883 and described what he found in glowing terms: “There was not a pauper in that nation, and the nation did not owe a dollar. It built its own capitol … and it built its schools and its hospitals.” No family lacked a home. In spite of this (or, perhaps, more correctly, because of this), Dawes recommended that the society must be destroyed: “They have got as far as they can go, because they own their land in common … there is no enterprise to make your home any better than that of your neighbours. There is no selfishness, which is the bottom of civilisation. Till this people will consent to give up their lands, and divide them among their citizens so that each can own the land he cultivates, they will not make much more progress.” [quoted by Chomsky, Op. Cit., p. 231–2] The introduction of capitalism — as usual by state action — resulted in poverty and destitution, again showing the link between capitalism and high living standards is not clear cut, regardless of claims otherwise.

Undoubtedly, having access to the means of life ensured that members of such cultures did not have to place themselves in situations which could produce a servile character structure. As they did not have to follow the orders of a boss they did not have to learn to obey others and so could develop their own abilities to govern
themselves. This self-government allowed the development of a custom in such tribes called “the principle of non-interference” in anthropology. This is the principle of defending someone’s right to express the opposing view and it is a pervasive principle in the tribal world, and it is so much so as to be safely called a universal.

The principle of non-interference is a powerful principle that extends from the personal to the political, and into every facet of daily life (significantly, tribal groups “respect the personality of their children, much as they do that of the adults in their communities.” [Bookchin, *The Ecology of Freedom*, p. 115]). Most people today, used as they are to hierarchy everywhere, are aghast when they realise the extent to which it is practised, but it has proven itself to be an integral part of living anarchy. It means that people simply do not limit the activities of others, period (unless that behaviour is threatening the survival of the tribe). This in effect makes absolute tolerance a custom (the difference between law and custom is important to point out: Law is dead, and Custom lives — see section I.7.3). This is not to idealise such communities as they are must be considered imperfect anarchist societies in many ways (mostly obviously in that many eventually evolved into hierarchical systems so suggesting that informal hierarchies, undoubtedly a product of religion and other factors, existed).

As people accustomed to authority we have so much baggage that relates to “interfering” with the lives of others that merely visualising the situation that would eliminate this daily pastime for many is impossible. But think about it. First of all, in a society where people do not interfere with each other’s behaviour, people tend to feel trusted and empowered by this simple social fact. Their self-esteem is already higher because they are trusted with the responsibility for making learned and aware choices. This is not fiction; individual responsibility is a key aspect of social responsibility.

Therefore, given the strength of individuality documented in tribes with no private property, no state and little or no other

archist organisational principles are not applicable to industrial areas, and if at all, only in primitive agrarian societies or in isolated experimental communities.” [The Anarchist Collectives, pp. 7–8] According to Augustin Souchy:

“It is no simple matter to collectivise and place on firm foundations an industry employing almost a quarter of a million textile workers in scores of factories scattered in numerous cities. But the Barcelona syndicalist textile union accomplished this feat in a short time. It was a tremendously significant experiment. The dictatorship of the bosses was toppled, and wages, working conditions and production were determined by the workers and their elected delegates. All functionaries had to carry out the instructions of the membership and report back directly to the men on the job and union meetings. The collectivisation of the textile industry shatters once and for all the legend that the workers are incapable of administrating a great and complex corporation.” [Op. Cit., p. 94]

Moreover, Spain in the 1930s was not a backward, peasant country, as is sometimes supposed. Between 1910 and 1930, the industrial working class more than doubled to over 2,500,000. This represented just over 26% of the working population (compared to 16% twenty years previously). In 1930, only 45% of the working population were engaged in agriculture. [Ronald Fraser, *The Blood of Spain*, p. 38] In Catalonia alone, 200,000 workers were employed in the textile industry and 70,000 in metal-working and machinery manufacturing. This was very different than the situation in Russia at the end of World War I, where the urban working class made up only 10% of the population.

Capitalist social relations had also penetrated the rural economy by the 1930s with agriculture oriented to the world market and
I.8.1 Is the Spanish Revolution inapplicable as a model for modern societies?

Quite the reverse. More urban workers took part in the revolution than in the countryside. So while it is true that collectivisation was extensive in rural areas, the revolution also made its mark in urban areas and in industry.

In total, the “regions most affected” by collectivisation were Catalonia and Aragón, where about 70 per cent of the workforce was involved. The total for the whole of Republican territory was nearly 800,000 on the land and a little more than a million in industry. In Barcelona workers’ committees took over all the services, the oil monopoly, the shipping companies, heavy engineering firms such as Volcano, the Ford motor company, chemical companies, the textile industry and a host of smaller enterprises ... Services such as water, gas and electricity were working under new management within hours of the storming of the Atarazanas barracks ... a conversion of appropriate factories to war production meant that metallurgical concerns had started to produce armed cars by 22 July ... The industrial workers of Catalonia were the most skilled in Spain ... One of the most impressive feats of those early days was the resurrection of the public transport system at a time when the streets were still littered and barricaded.” Five days after the fighting had stopped, 700 tramcars rather than the usual 600, all painted in the black-and-red colours of the CNT-FAI, were operating in Barcelona. [Antony Beevor, *The Spanish Civil War*, pp. 91-2]

About 75% of Spanish industry was concentrated in Catalonia, the stronghold of the anarchist labour movement, and widespread collectivisation of factories took place there. As Sam Dolgoff rightly observed, this “refutes decisively the allegation that anarchism will defend individuality and even develop it in ways blocked by capitalism? At the very least we can say “possibly”, and that is enough to allow us to question that dogma that capitalism is the only system based on respect for the individual.

I.7.2 Do anarchists worship the past or the “noble savage”?

No. However, this is a common attack on socialists by supporters of capitalism and on anarchists by Marxists. Both claim that anarchism is “backward looking”, opposed to “progress” and desire a society based on inappropriate ideas of freedom. In particular, ideological capitalists maintain that all forms of socialism base themselves on the ideal of the “noble savage” (see, for example, free market capitalist guru Frederick von Hayek’s work *Fatal Conceit: The Errors of Socialism*).

Anarchists are well aware of the limitations of the “primitive communist” societies they have used as examples of anarchistic tendencies within history or society. They are also aware of the problems associated with using any historical period as an example of “anarchism in action.” Take for example the “free cities” of Medieval Europe, which was used by Kropotkin as an example of the potential of decentralised, confederated communes. He was sometimes accused of being a “Medievalist” (as was William Morris) while all he was doing was indicating that capitalism need not equal progress and that alternative social systems have existed which have encouraged freedom in ways capitalism restricts.

In a similar way, Marxists often accuse Proudhon of being “petty-bourgeois” and looking backward to a pre-industrial society of artisans and peasants. Of course, nothing could be further from the truth. Proudhon lived in a France which was predominantly pre-industrial and based on peasant and artisan production.
fore, based his socialist ideas on the needs of working people as they required them at the time. When Proudhon did look at large-scale production (such as railways, factories and so on) he proposed co-operative associations to run them. These associations would maintain the dignity of the worker by maintaining the essential feature of artisan and peasant life, namely the control of work and product by the labourer. Thus he used “the past” (artisan production) to inform his analysis of current events (industrialisation) to create a solution to the social problem which built upon and extended a freedom crushed by capitalism (namely workers’ self-management in production). Rather than being backward looking and worshipping a past which was disappearing, Proudhon analysed the present and past, drew any positive features he could from both and applied them to the present and the future (see also section I.3.8). Unlike Marx, who argued that industrialisation (i.e. proletarianisation) was the pre-conditions of socialism, Proudhon wanted justice and freedom for working class people during his lifetime, not some (unspecified) time in the future after capitalism had fully developed.

Again it is hardly surprising to find that many supporters of capitalism ignore the insights that can be gained by studying tribal cultures and the questions they raise about capitalism and freedom. Instead, they duck the issues raised and accuse socialists of idealising the “noble savage.” As indicated, nothing could be further from the truth. Indeed, this claim has been directed towards Rousseau (often considered the father of socialist and anarchist idealisation of the “noble savage”) even though he explicitly asked “must societies be totally abolished? Must meum and tuum be annihilated, and must we return again to the forests to live among bears? This is a deduction in the manner of my adversaries, which I would as soon anticipate as let them have the shame of drawing.” Similarly, Rousseau is often thought of idealising “natural man” but he actually wrote that “men in a state of nature, having no moral relations or determinate obligations one with another, could not be either good or

For more information about the social revolution, Sam Dolgoff’s anthology The Anarchist Collectives is an excellent starting place. Gaston Leval’s Collectives in the Spanish Revolution is another essential text. Jose Peirats’ Anarchists in the Spanish Revolution and his three volume quasi-official history The CNT in the Spanish Revolution are key works. Vernon Richards’ Lessons of the Spanish Revolution is an excellent critical anarchist work on the revolution and the role of the anarchists. Spain 1936–1939: Social Revolution and Counter-Revolution (edited by Vernon Richards) is a useful collection of articles from the time. Abel Paz’s Durruti in the Spanish Revolution is a classic biography of Spanish anarchism’s most famous militant (this is an expanded version of his earlier Durruti: The People Armed). Emma Goldman’s opinions on the Spanish Revolution are collected in Vision on Fire.

Robert Alexander’s The Anarchists in the Spanish Civil War is a good general overview of the anarchist’s role in the revolution and civil war, as is Burnett Bolloten’s The Spanish Civil War. Daniel Guérin’s anthology No Gods, No Masters as two sections on the Spanish Revolution, one specifically on the collectives. Noam Chomsky’s excellent essay “Objectivity and Liberal Scholarship” indicates how liberal books on the Spanish Civil War can be misleading, unfair and essentially ideological in nature (this classic essay can be found in Chomsky on Anarchism, The Chomsky Reader, and American Power and the New Mandarins). George Orwell’s Homage to Catalonia cannot be bettered as an introduction to the subject (Orwell was in the POUM militia at the Aragón Front and was in Barcelona during the May Days of 1937). This classic account is contained along with other works by Orwell about the conflict in the anthology Orwell in Spain. Murray Bookchin’s The Spanish Anarchists is a useful history, but ends just as the revolution breaks out and so needs to be completed by his To Remember Spain and the essay...
this example in some detail in section I.5.12 and so will not do so here. We simply stress that this section of the FAQ is just an introduction to what happened and does not (indeed, cannot) discuss all aspects of the revolution. We just present an overview, bringing out the libertarian aspects of the revolution, the ways workers’ self-management was organised, how the collectives organised and what they did.

Needless to say, many mistakes were made during the revolution. We point out and discuss some of them in what follows. Moreover, much of what happened did not correspond exactly with what many people consider as the essential steps in a communist (libertarian or otherwise) revolution. Nor, it must be stressed, did much of it reflect the pre-revolution stated aims of the CNT itself.

Economically, for example, the collectives themselves were an unexpected development, one which was based on libertarian principles but also reflected the reality of the situation the CNT militants found themselves in. Much the same can be said of the fact that few collectives reached beyond mutualism or collectivism in spite of the CNT seeking a libertarian communist economy. Politically, the fear of a fascist victory made many anarchists accept collaboration with the state as a lesser evil. However, to dismiss the Spanish Revolution because it did not meet the ideals laid out by a handful of revolutionaries beforehand would be sectarian and elitist nonsense. No working class revolution is pure, no mass struggle is without its contradictions, no attempt to change society is perfect. “It is only those who do nothing who make no mistakes,” as Kropotkin so correctly pointed out. [Anarchism, p. 143] The question is whether the revolution creates a system of institutions which will allow those involved to discuss the problems they face, change the decisions reached and correct any mistakes they make. In this, the Spanish Revolution clearly succeeded, creating organisations based on the initiative, autonomy and power of working class people.

bad, virtuous or vicious.” [The Social Contract and Discourses, p. 112 and p. 64] Rousseau failed to understand that his adversaries, both then and now, seem to know no shame and will happily suggest that he advocated the exact opposite of what he actually wrote. Anarchists are also subject to this (particularly by Marxists), particularly when we look through history, draw libertarian currents from it and are then denounced as backward looking utopians.

What libertarian socialists point out from this analysis of history is that the atomised individual associated with capitalist society is not “natural” and that capitalist social relationships help to weaken individuality. All the many attacks on libertarian socialist analysis of past societies are a product of capitalists attempts to deny history and state that “Progress” reaches its final resting place in capitalism. As David Watson argues:

“When we consider people living under some of the harshest, most commanding conditions on earth, who can nevertheless do what they like when the notion occurs to them, we should be able to witness the contemporary doubt about civilisation’s superiority without growing indignant. Primitivism, after all, reflects not only a glimpse of life before the rise of the state, but also a legitimate response to real conditions of life under civilisation …. Most people do not live in aboriginal societies, and most tribal peoples themselves now face wholly new contexts which will have to be confronted in new ways if they are to survive as peoples. But their lifeways, their histories, remind us that other modes of being are possible. Reaffirmation of our primal past offers insight into our history — not the only possible insight, to be sure, but one important, legitimate entry point for a reasoned discussion about (and an impassioned reaction to) this world we must leave behind.” [Beyond Bookchin, p. 240]
This essential investigation of history and modern society to see what other ways of living have and do exist is essential. It is too easy to forget that what exists under modern capitalism has not always existed (as neo-classical economics does with its atomistic and ahistoric analysis, for example). It is also useful to remember what many people now consider as “normal” was not always the case. As we discussed in section F.8.6, the first generation of industrial wage slaves hated the system, considering it both tyranny and unnatural. Studying history, previous cultures and the process of hierarchical society and the resistance of the oppressed to it can enrich our analysis and activity in the here and now and help us to envision an anarchist society, the problems it could face and possible solutions to them.

If the challenge for anarchists is to smash power-relations and domination, it would make sense to get to the root of the problem. Hierarchy, slavery, coercion, patriarchy, and so on far outdate capitalism and it is hardly enough to just analyse the economic system of capitalism, which is merely the current and most insidious form of hierarchical civilisation. Similarly, without looking to cultures and communities that functioned quite well before the rise of the state, hierarchies and classes, anarchists do not really have much solid ground to prove to people that anarchy is desirable or possible. For this reason, historical analysis and the celebration of the positive aspects of tribal and other societies is essential.

Moreover, as George Orwell pointed out, attacks that reject this critical analysis as worshipping the “noble savage” miss the point:

“In the first place he [the defender of modern life] will tell you that it is impossible to ‘go back’ ... and will then accuse you of being a medievalist and begin to descant upon the horrors of the Middle Ages ... As a matter of fact, most attacks upon the Middle Ages and the past generally by apologists of modernity are beside the point, because their essential trick is to project a modern man, Changes are also evident in social relations. The former barriers which used to separate men and woman arbitrarily have been destroyed. In the cafes and other public places there is a mingling of the sexes which would have been completely unimaginable before. The revolution has introduced a fraternal character to social relations which has deepened with practice and show clearly that the old world is dead.” [Durruti: The People Armed, p. 243]

The social transformation empowered individuals and these, in turn, transformed society. Anarchist militant Enriqueta Rovira presents a vivid picture of the self-liberation the revolution generated:

“The atmosphere then, the feelings were very special. It was beautiful. A feeling of — how shall I say it — of power, not in the sense of domination, but in the sense of things being under our control, of under anyone’s. Of possibility. We had everything. We had Barcelona: It was ours. You’d walk out in the streets, and they were ours — here, CNT; there, comite this or that. It was totally different. Full of possibility. A feeling that we could, together, really do something. That we could make things different.” [quoted by Martha A. Ackelsberg and Myrna Margulies Breithart, “Terrains of Protest: Striking City Women”, pp. 151–176, Our Generation, vol. 19, No. 1, pp. 164–5]

Moreover, the transformation of society that occurred during the revolution extended to all areas of life and work. For example, the revolution saw “the creation of a health workers’ union, a true experiment in socialised medicine. They provided medical assistance and opened hospitals and clinics.” [Juan Gomez Casas, Anarchist Organisation: The History of the FAI, p. 192] We discuss
word for their activities) but it seems that almost every political perspective has done this (including liberal, so-called right-wing “libertarian”, Stalinist, Trotskyist, Marxist, and so on). So any attempt to investigate what actually occurred in Spain and the anarchists’ role in it is subject to a great deal of difficulty. Moreover, the positive role that Anarchists played in the revolution and the positive results of our ideas when applied in practice are also downplayed, if not ignored. Indeed, the misrepresentations of the Spanish Anarchist movement are downright amazing (see Jerome R. Mintz’s wonderful book The Anarchists of Casa Viejas and J. Romero Maura’s article “The Spanish case” [Anarchism Today, J. Joll and D. Apter (eds.)] for a refutation of many of the standard assertions and distortions about the Spanish anarchist movement by historians). The myths generated by Marxists of various shades are, perhaps needless to say, the most extensive (see the appendix on “Marxists and Spanish Anarchism” for a reply to some of the more common ones).

All we can do here is present a summary of the social revolution that took place and attempt to explode a few of the myths that have been created around the work of the CNT and FAI during those years. We must stress that this can be nothing but a short introduction to the Spanish Revolution. We concentrate on the economic and political aspects of the revolution as we cannot cover everything. However, we must mention the social transformations that occurred all across non-fascist Spain. The revolution saw the traditional social relationships between men and women, adults and children, individual and individual transformed, revolutionised in a libertarian way. CNT militant Abel Paz gave a good idea of what happened:

“Industry is in the hands of the workers and all the production centres conspicuously fly the red and black flags as well as inscriptions announcing that they have really become collectives. The revolution seems to be universal.

with his squeamishness and his high standard of comfort, into an age when such things were unheard of. But notice that in any case this is not an answer. For dislike of the mechanised future does not imply the smallest reverence for any period of the past ... When one pictures it merely as an objective; there is no need to pretend that it has ever existed in space and time.” [The Road to Wigan Pier, p. 183]

We should also note that such attacks on anarchist investigations of past cultures assumes that these cultures have no good aspects at all and so indicates a sort of intellectual “all or nothing” approach to modern life. The idea that past (and current) civilisations may have got some things right and others wrong and should be investigated is rejected for a totally uncritical “love it or leave” approach to modern society. Of course, the well known “free market” capitalist love of 19th century capitalist life and values (specifically the grim reality of Victorian Britain or Gilded Age America) warrants no such claims of “past worship” by the supporters of the system. Therefore attacks on anarchists as supporters of the “noble savage” ideal indicate more about the opponents of anarchism and their fear of looking at the implications of the system they support than about anarchist theory.

I.7.3 Is the law required to protect individual rights?

No, far from it. It is obvious that, as Kropotkin put it, “[n]o society is possible without certain principles of morality generally recognised. If everyone grew accustomed to deceiving his fellow-men; if we never could rely on each other’s promise and words; if everyone treated his fellow as an enemy, against whom every means of warfare is justified — no society could exist.” [Anarchism, p. 73] However, this
does not mean that a legal system (with its resultant bureaucracy, vested interests and inhumanity) is the best way to protect individual rights within a society.

What anarchists propose instead of the current legal system (or an alternative law system based on religious or “natural” laws) is custom — namely the development of living “rules of thumb” which express what a society considers as right at any given moment. However, the question arises, if an agreed set of principles are used to determine the just outcome, in what way would this differ from laws?

The difference is that the “order of custom” would prevail rather than the “rule of law”. Custom is a body of living institutions that enjoys the support of the body politic, whereas law is a codified (read dead) body of institutions that separates social control from moral force. This, as anyone observing modern Western society can testify, alienates everyone. A just outcome is the predictable, but not necessarily the inevitable, outcome of interpersonal conflict because in an anarchistic society people are trusted to do it themselves. Anarchists think people have to grow up in a social environment free from the confusions generated by a fundamental discrepancy between morality, and social control, to fully appreciate the implications. However, the essential ingredient is the investment of trust, by the community, in people to come up with functional solutions to interpersonal conflict. This stands in sharp contrast with the present situation of people being infantilised by the state through a constant bombardment of fixed social structures removing all possibility of people developing their own unique solutions.

Therefore, anarchist recognise that social custom changes with society. What was once considered “normal” or “natural” may become to be seen as oppressive and hateful. This is because the “conception of good or evil varies according to the degree of intelligence or of knowledge acquired. There is nothing unchangeable about it.” [Kropotkin, Op. Cit., p. 92] Only by removing the dead hand of

of the fittest,’ by the universal practice of mutual aid, and replaced rivalry by the principle of solidarity ...

“This experience, in which about eight million people directly or indirectly participated, opened a new way of life to those who sought an alternative to anti-social capitalism on the one hand, and totalitarian state bogus socialism on the other.” [Op. Cit., pp. 6–7]

Thus about eight million people directly or indirectly participated in the libertarian based new economy during the short time it was able to survive the military assaults of the fascists and the attacks and sabotage of the Communists and Republican state. This in itself suggests that libertarian socialist ideas are of a practical nature.

Lest the reader think that Leval and Bookchin are exaggerating the accomplishments and ignoring the failures of the Spanish collectives, in the following subsections we will present specific details and answer some objections often raised by misinformed critics. We will try to present an objective analysis of the revolution, its many successes, its strong and weak points, the mistakes made and possible lessons to be drawn from the experience, both from the successes and the failures. However, this will hardly do justice to the collectivisation as it “assumed an infinite diversity of forms from village to village, and even in the different firms collectivised in the cities … there was an element of improvisation and of the exceptional wartime conditions experienced by the country (i.e., the war against fascism) and the arrangements had their flaws as well as their good points.” [Jose Peirats, The CNT in the Spanish Revolution, vol. 1, p. 223]

This libertarian influenced revolution has (generally) been ignored by historians, or its existence mentioned in passing. Some so-called historians and “objective investigators” have slandered it and lied about (when not ignoring) the role anarchists played in it. Communist histories are particularly unreliable (to use a polite

3327
Anarchist and CNT activist Gaston Leval comments that in those areas which defeated the fascist uprising on the 19th of July 1936 a profound social revolution took place based, mostly, on anarchist ideas:

“In Spain, during almost three years, despite a civil war that took a million lives, despite the opposition of the political parties … this idea of libertarian communism was put into effect. Very quickly more than 60% of the land was collectively cultivated by the peasants themselves, without landlords, without bosses, and without instituting capitalist competition to spur production. In almost all the industries, factories, mills, workshops, transportation services, public services, and utilities, the rank and file workers, their revolutionary committees, and their syndicates reorganised and administered production, distribution, and public services without capitalists, high-salaried managers, or the authority of the state.

“Even more: the various agrarian and industrial collectives immediately instituted economic equality in accordance with the essential principle of communism, ‘From each according to his ability and to each according to his needs.’ They co-ordinated their efforts through free association in whole regions, created new wealth, increased production (especially in agriculture), built more schools, and bettered public services. They instituted not bourgeois formal democracy but genuine grass roots functional libertarian democracy, where each individual participated directly in the revolutionary reorganisation of social life. They replaced the war between men, ‘survival
some mischief!” The state forces an individual into a relationship with a governing body. This means, as anarchist J. B. Smith put it, “taking away from the individual his [or her] direct interest in life and in his surroundings … blunting his [or her] moral sense … teaching that he [or she] must never rely on himself [or herself] … [but] upon a small part of men who are elected to do everything … [which] destroys to a large extent his [or her] perception of right and wrong.” [quoted by William R. McKercher, Freedom and Authority, p. 48 and p. 67f]

Individual rights, for anarchists, are best protected in a social environment based on the self-respect and sympathy. Custom, because it is based on the outcome of numerous individual actions and thought reflects (and so encourages the development of) individual ethical standards and so a generalised respect for others. Thus, “under anarchism all rules and laws will be little more than suggestions for the guidance of juries which will judge not only the facts but the law, the justice of the law, its applicability to the given circumstances, and the penalty or damage to be inflicted because if its infraction … under Anarchism the law will be so flexible that it will shape itself to every emergency and need no alteration. And it will be regarded as just in proportion to its flexibility, instead of as now in proportion to its rigidity.” [Benjamin Tucker, The Individualist Anarchists, pp. 160–1] Tucker, like other individualist Anarchists, believed that the role of juries had been very substantial in the English common-law tradition and that they had been gradually emasculated by the state. This system of juries, based on common-law/custom could be the means of ensuring justice in a free society.

Tolerance of other individuals depends far more on the attitudes of the society in question that on its system of laws. In other words, even if the law does respect individual rights, if others in society disapprove of an action then they can and will act to stop it (or restrict individual rights). All that the law can do is try to prevent this occurring but given the power of social custom this is often

I.8 Does revolutionary Spain show that libertarian socialism can work in practice?

Yes. Revolutionary Spain “shows you what human beings are like when they are trying to behave as human beings and not as cogs in the capitalist machine.” [George Orwell, Orwell in Spain, p. 254] At the heart of the transformation were the CNT (the National Confederation of Labour, an anarcho-syndicalist union) and the FAI (Iberian Anarchist Federation). As Murray Bookchin put it:

“In Spain, millions of people took large segments of the economy into their own hands, collectivised them, administered them, even abolished money and lived by communistic principles of work and distribution — all of this in the midst of a terrible civil war, yet without producing the chaos or even the serious dislocations that were and still are predicted by authoritarian ‘radicals.’ Indeed, in many collectivised areas, the efficiency with which an enterprise worked by far exceeded that of a comparable one in nationalised or private sectors. This ‘green shoot’ of revolutionary reality has more meaning for us than the most persuasive theoretical arguments to the contrary. On this score it is not the anarchists who are the ‘unrealistic day-dreamers,’ but their opponents who have turned their backs to the facts or have shamelessly concealed them.” [‘Introductory
pleasing the boss. Competition acts to extinguish the Promethean fire of rebellion.” [Op. Cit., p. 130]

In section I.4.11 we noted that when an artistic task is turned into a contest, children’s work reveal significantly less spontaneity and creativity. In other words, competition reduces creativity and so individuality because creativity is “anti-conformist at its core: it is nothing if not a process of idiosyncratic thinking and risk-taking. Competition inhibits this process.” Competition, therefore, will result in a narrowing of our lives, a failing to experience new challenges in favour of trying to win and be “successful.” It turns “life into a series of contests and turns us into cautious, obedient people. We do not sparkle as individuals or embrace collective action when we are in a race.” [Kohn, Op. Cit., p. 130 and p. 131]

So, far from defending individuality, capitalism places a lot of barriers (both physical and mental) in the path of individuals who are trying to express their freedom. Anarchism exists precisely because capitalism has not created the free society it supporters claimed it would.

limited in scope and has to wait until people recognise the need for change. Needless to say, governments can, and have, been far more at the forefront of denying and ignoring individual rights and so appealing to it for justice is, to say the least, problematic!

As such, anarchists are well aware that social custom can be oppressive and, as discussed in section I.5.6, argue for direct action by oppressed minorities to combat any tendency towards “dictatorship by the majority”. Anarchists, as Kropotkin suggested, are “the last to underrate the part which the self-assertion of the individual has played in the evolution of mankind.” However, this “has often been, and continually is, something quite different from, and far larger and deeper than, the petty, unintelligent narrow-mindedness which, with a large class of writers goes for ‘individualism’ and ‘self-assertion.’” There are “two classes of revolted individuals”, those who rise up and aim to “purify the old institutions [of mutual aid], or to work out a higher form of commonwealth, based on the same Mutual Aid principles” and those who sought to “break down the protective institutions of mutual support, with no other intention but to increase their own wealth and their own powers.” [Mutual Aid, pp. 18–9]

We aim to support and encourage the former.

However, while recognising the potential tyranny of custom anarchists stress that, firstly, this is a natural part of human society and, secondly, it palls into insignificance compared to the actual tyranny of the state and the laws it imposes on society in the interests of the few. Facts which, needless to say, ruling elites are at pains to hide. As Kropotkin explained “all our religious, historical, juridical, and social education is imbued with the idea that human beings, if left to themselves, would revert to savagery; that without authority men would eat one another; for nothing, they say, can be expected from the ‘multitude’ but brutishness and the warring of each against all. Men would perish if above them soared not the elect … These saviours prevent, we are told, the battle of all against all.” This, he argued, was nonsense as “a scientific study of societies and institutions brings us to quite different views. It proves that usages and
customs created by mankind for the sake of mutual aid, mutual defence, and peace in general, were precisely elaborated by the 'nameless multitude.' And it was these customs that enabled man to survive in his struggle for existence in the midst of extremely hard natural conditions.” The notion that the state was merely the instrument of the people is hardly supported by history nor current practice, for what the state and its laws have done is to “fix, or rather to crystallise in a permanent form, such customs as already were in existence” and adding to them “some new rules — rules of inequality and servile submission of the masses in the interest of the armed rich and the warlike minorities.” [Evolution and Environment, pp. 48–9] Unsurprisingly, then, the state perverts social customs for its own, and the interests of the economically and socially powerful:

“as society became more and more divided into two hostile classes, one seeking to establish its domination, the other struggling to escape, the strife began. Now the conqueror was in a hurry to secure the results of his actions in a permanent form, he tried to place them beyond question, to make them holy and venerable by every means in his power. Law made its appearance under the sanction of the priest, and the warriors club was placed at its service. Its office was to render immutable such customs as were to the advantage of the dominant minority... If law, however, presented nothing but a collection of prescriptions serviceable to rulers, it would find some difficulty in insuring acceptance and obedience. Well, the legislators confounded in one code the two currents of custom... the maxims which represent principles of morality and social union wrought out as a result of life in common, and the mandates which are meant to ensure external existence to inequality. Customs, absolutely essential to the very being of society, are, in the code, cleverly intermingled with usages imposed by the ruling caste, and

individuality. Little wonder, then, that a system apparently based upon “egotism” and “individualism” ends up weakening individuality.

As regards the fourth point, the effects of competition on individuality are equally as destructive. Indeed, a “culture dedicated to creating standardised, specialised, predictable human components could find no better way of grinding them out than by making every possible aspect of life a matter of competition. ‘Winning out’ in this respect does not make rugged individualists. It shapes conformist robots.” [George Leonard, quoted by Alfie Kohn, No Contest: The Case Against Competition, p. 129] Why is this?

Competition is based upon outdoing others and this can only occur if you are doing the same thing they are. However, individuality is the most unique thing there is and “unique characteristics by definition cannot be ranked and participating in the process of ranking demands essential conformity.” The extensive research into the effects of competition suggests that it in fact “encourages rank conformity” as well as undermining the “substantial and authentic kind of individualism” associated by such free thinkers as Thoreau. [Alfie Kohn, Op. Cit., p. 130 and p. 129] As well as impoverishing individuality by encouraging conformity, competition also makes us less free thinking and rebellious:

“Attitude towards authorities and general conduct do count in the kinds of competitions that take place in the office or classroom. If I want to get the highest grades in class, I will not be likely to challenge the teacher’s version of whatever topic is being covered. After a while, I may cease to think critically altogether... If people tend to ‘go along to get along,’ there is even more incentive to go along when the goal is to be number one. In the office or factory where co-workers are rivals, beating out the next person for a promotion means
entities ... lead to depression of initiative and servility of mind.” [Anarchism, p. 285] As far as point two goes, we have discussed it above and will not repeat ourselves (see section I.7). The last two points are worth discussing more thoroughly, and we will do so here.

Taking the third point first, when this kind of “greed” becomes the guiding aspect of an individual’s life (and the society they live in) they usually end up sacrificing their own ego to it. Instead of the individual dominating their “greed,” “greed” dominates them and so they end up being possessed by one aspect of themselves. This “selfishness” hides the poverty of the ego who practices it. As libertarian Marxist psychiatrist Erich Fromm argued:

“Selfishness if not identical with self-love but with its very opposite. Selfishness is one kind of greediness. Like all greediness, it contains an insatiability, as a consequence of which there is never any real satisfaction. Greed is a bottomless pit which exhausts the person in an endless effort to satisfy the need without ever reaching satisfaction ... this type of person is basically not fond of himself, but deeply dislikes himself:

“The puzzle in this seeming contradiction is easy to solve. Selfishness is rooted in this very lack of fondness for oneself ... He does not have the inner security which can exist only on the basis of genuine fondness and affirmation.” [The Fear of Freedom, pp. 99–100]

In other words, the “selfish” person allows their greed to dominate their ego and they sacrifice their personality feeding this new God. This was clearly seen by Max Stirner who denounced this as a “one-sided, unopened, narrow egoism” which leads the ego being “ruled by a passion to which he brings the rest as sacrifices” [The Ego and Its Own, p. 76]. Like all “spooks,” capitalism results in the self-negation of the individual and so the impoverishment of

both claim equal respect from the crowd ... Such was the law; and it has maintained its two-fold character to this day.” [Kropotkin, Anarchism, p. 205]

In other words, the law has “has used Man’s social feelings to get passed not only moral precepts which were acceptable to Man, but also orders which were useful only to the minority of exploiters against whom he would have rebelled.” [Kropotkin quoted by Malatesta, Anarchy, pp. 24–5]

Therefore anarchists argue that state institutions are not only unneeded to create an ethical society (i.e. one based on respecting individuality) but actively undermines such a society. That the economically and politically powerful assert that a state is a necessary condition for a free society and individual space is hardly surprising for, as Malatesta put it, a ruling elite “cannot maintain itself for long without hiding its true nature behind a pretence of general usefulness ... it cannot impose acceptances of the privileges of the few if it does not pretend to be the guardian of the rights of all.” [Op. Cit., p. 24] Thus laws “exist to keep up the machinery of government which serves to secure to capital the exploitation and monopoly of wealth produced” and “to facilitate the exploitation of the worker by the capitalist.” And people “who long for freedom begin the attempt to obtain it by entreating their masters to be kind enough to protect them by modifying the laws which these masters themselves have created!” [Kropotkin, Op. Cit., p. 200 and p. 210]

Therefore, it's important to remember why the state exists and so whatever actions and rights it promotes for the individual it exists to protect the powerful against the powerless. Any human rights recognised by the state are a product of social struggle and exist because of pass victories in the class war and not due to the kindness of ruling elites. In addition, capitalism itself undermines the ethical foundations of any society by encouraging people to grow accustomed to deceiving their fellows and treating them as a competitor, against whom every means of action is justified. Hence capitalism
undermines the basic social context and customs within which individuals develop and need to become fully human and free. Little wonder that a strong state has always been required to introduce a free market — firstly, to protect wealth from the increasingly dispossessed and secondly, to try to hold society together as capitalism destroys the social fabric which makes a society worth living in.

For more on this issue, Kropotkin’s classic essay “Law and Authority” cannot be bettered (contained in Anarchism and Words of a Rebel).

I.7.4 Does capitalism protect individuality?

Given that many people claim that any form of socialism will destroy liberty (and so individuality) it is worthwhile to consider whether capitalism actually does protect individuality. The answer must be no. Capitalism creates a standardisation which helps to distort individuality and the fact that individuality does exist under capitalism says more about the human spirit than capitalist social relationships.

So, why does a system apparently based on the idea of individual profit result in such a deadening of the individual? There are four main reasons:

1) capitalism produces a hierarchical system which crushes self-government in many areas of life;
2) there is the lack of community which does not provide the necessary supports for the encouragement of individuality;
3) there is the psychological impact of “individual profit” when it becomes identified purely with monetary gain (as in capitalism);
4) the effects of competition in creating conformity and mindless obedience to authority.

We have discussed point one on many occasions (see, for example, section B.4). As Emma Goldman put it, under capitalism, the individual “must sell his [or her] labour” and so their “inclination and judgement are subordinated to the will of a master.” This, naturally, represses individual initiative and the skills needed to know and express ones own mind. This “condemns millions of people to be mere nonentities, living corpses without originality or power of initiative … who pile up mountains of wealth for others and pay for it with a grey, dull and wretched existence for themselves.” “There can be no freedom in the large sense of the word,” Goldman stressed, “so long as mercenary and commercial considerations play an important part in the determination of personal conduct.” [Red Emma Speaks, p. 50] Hence Bookchin:

“With the hollowing out of community by the market system … we witness the concomitant hollowing out of personality itself. Just as the spiritual and institutional ties that linked human beings together into vibrant social relations are eroded by the mass market, so the sinews that make for subjectivity, character and self-definition are divested of form and meaning. The isolated, seemingly autonomous ego of ‘modernity’ turns out to be the mere husk of a once fairly rounded individual whose very completeness as an ego was possible because he or she was rooted in a fairly rounded and complete community.” [The Ecology of Freedom, p. 211]

As regards point one, given the social relationships it is based on, capitalism cannot foster individuality but only harm it. As Kropotkin argued, “obedience towards individuals or metaphysical
terminology, with its traditional connotations, does not reflect the sweep and the multi-dimensional nature of the struggle ... [and] fail to encompass the cultural and spiritual revolt that is taking place along with the economic struggle.” [Post-Scarcity Anarchism, pp. 151–2]

For anarchists, exploitation and class rule are just part of a wider system of domination and hierarchy. Material gains, therefore, can never completely make-up for oppressive social relationships. As the anarchist character created by anarchist science-fiction writer Ursula Le Guin put it, capitalists “think if people have enough things they will be content to live in prison.” [The Dispossessed, p. 120] Anarchists disagree — and the experience of social revolt in the “affluent” 1960s proves their case.

This is unsurprising for, ultimately, the “antagonism [between classes] is spiritual rather than material. There will never be a sincere understanding between bosses and workers... because the bosses above all want to remain bosses and secure always more power at the expense of the workers, as well as by competition with other bosses, whereas the workers have had their fill of bosses and don’t want any more.” [Malatesta, Op. Cit., p. 79]

J.1.1 Why are social struggles important?

Social struggle is an expression of the class struggle, namely the struggle of working class people against their exploitation, oppression and alienation and for their liberty from capitalist and state. It is what happens when one group of people have hierarchical power over another: where there is oppression, there is resistance and where there is resistance to authority you will see anarchy in action. For this reason anarchists are in favour of, and are involved within, social struggles. Ultimately they are a sign of individuals as-

I.8.7 Were the rural collectives created by force?

No, they were not. The myth that the rural collectives were created by “terror,” organised and carried out by the anarchist militia, was started by the Stalinists of the Spanish Communist Party. More recently, certain right-wing “libertarians” have warmed up and repeated these Stalinist fabrications. Anarchists have been disproving these allegations since 1936 and it is worthwhile to do so again here. As Vernon Richards noted: “However discredited Stalinism may appear to be today the fact remains that the Stalinist lies and interpretation of the Spanish Civil War still prevail, presumably because it suits the political prejudices of those historians who are currently interpreting it.” [“Introduction”, Gaston Leval, Collectives in the Spanish Revolution, p. 11] Here we shall present evidence to refute claims that the rural collectives were created by force.

Firstly, we should point out that rural collectives were created in many different areas of Spain, such as the Levant (900 collectives), Castile (300) and Estremadera (30), where the anarchist militia did not exist. In Catalonia, for example, the CNT militia passed through many villages on its way to Aragón and only around 40 collectives were created unlike the 450 in Aragón. In other words, the rural collectivisation process occurred independently of the existence of anarchist troops, with the majority of the 1,700 rural collectives created in areas without a predominance of anarchist militias.

One historian, Ronald Fraser, seems to imply that collectives were imposed upon the Aragón population. As he put it, the “collectivisation, carried out under the general cover, if not necessarily the direct agency, of CNT militia columnns, represented a revolutionary minority’s attempt to control not only production but consumption for egalitarian purposes and the needs of the war.” Notice that he does not suggest that the anarchist militia actually imposed the collec-
tives, a claim for which there is little or no evidence. Moreover, Fraser presents a somewhat contradictory narrative to the facts he presents. On the one hand, he suggests that “[a] obligatory collectivisation was justified, in some libertarians’ eyes, by a reasoning closer to war communism than to libertarian communism.” On the other hand, he presents extensive evidence that the collectives did not have a 100% membership rate. How can collectivisation be obligatory if people remain outside the collectives? Similarly, he talks of how some CNT militia leaders justified “[f]orced collectivisation” in terms of the war effort while acknowledging the official CNT policy of opposing forced collectivisation, an opposition expressed in practice as only around 20 (i.e., 5%) of the collectives were total. [Blood of Spain, p. 370, p. 349 and p. 366] This is shown in his own book as collectivists interviewed continually note that people remained outside their collectives!

Thus Fraser’s attempts to paint the Aragón collectives as a form of “war communism” imposed upon the population by the CNT and obligatory for all fails to co-incidence with the evidence he presents.

Fraser states that “[t]here was no need to dragoon them [the peasants] at pistol point [into collectives]: the coercive climate, in which ‘fascists’ were being shot, was sufficient. ‘Spontaneous’ and ‘forced’ collectives existed, as did willing and unwilling collectivists within them.” [Op. Cit., p. 349] Therefore, his implied suggestion that the Aragón collectives were imposed upon the rural population is based upon the insight that there was a “coercive climate” in Aragón at the time. Of course a civil war against fascism would produce a “coercive climate” particularly near the front line. However, the CNT can hardly be blamed for that. As historian Gabriel Jackson summarised, while such executions took place the CNT did not conduct a general wave of terror:

“the anarchists made a constant effort to separate active political enemies from those who were simply bourgeois actually obscurantist. It not only shares in the bourgeois tendency to render material egotism and class interest the centrepieces of history it also denigrates all attempts to transcend this image of humanity as a mere economic being. … by depicting them as mere ‘marginalia’ at best, as ‘well-intentioned middle-class ideology’ at worse, or sneeringly, as ‘diversionary,’ ‘utopian,’ and ‘unrealistic’ … Capitalism, to be sure, did not create the ‘economy’ or ‘class interest,’ but it subverted all human traits — be they speculative thought, love, community, friendship, art, or self-governance — with the authority of economic calculation and the rule of quantity. Its ‘bottom line’ is the balance sheet’s sum and its basic vocabulary consists of simple numbers.” [Murray Bookchin, The Modern Crisis, pp. 125–126]

In other words, issues such as freedom, justice, individual dignity, quality of life and so on cannot be reduced to the categories of capitalist economics. Anarchists think that any radical movement which does so fails to understand the nature of the system it is fighting against (indeed, economic reductionism plays into the hands of capitalist ideology). So, when anarchists take part in and encourage social struggle they do not aim to restrict or reduce them to economic issues (however important these are). The anarchist knows that the individual has more interests than just material ones and we consider it essential to take into account the needs of the emotions, mind and spirit just as much as those of the belly:

“The class struggle does not centre around material exploitation alone but also around spiritual exploitation. In addition, entirely new issues emerge: coercive attitudes, the quality of work, ecology (or stated in more general terms, psychological and environmental oppression)... Terms like ‘classes’ and ‘class struggle,’ conceived of almost entirely as economic categories and relations, are too one-sided to express the universalisation of the struggle. Use these limited expressions if you like (the target is still a ruling class and a class society), but this
Therefore, social struggle is an important thing for anarchists and we take part in it as much as we can. Moreover, anarchists do more than just take part. We are fighting to get rid of the system that causes the problems which people fight against. We explain anarchism to those who are involved in struggle with us and seek to show the relevance of anarchism to people’s everyday lives through such struggles and the popular organisations which they create. By so doing we try to popularise the ideas and methods of anarchism, namely solidarity, self-management and direct action.

Anarchists do not engage in abstract propaganda (become an anarchist, wait for the revolution — if we did that, in Malatesta’s words, “that day would never come.” [Op. Cit., p. 195]). We know that our ideas will only win a hearing and respect when we can show both their relevance to people’s lives in the here and now and show that an anarchist world is both possible and desirable. In other words, social struggle is the “school” of anarchism, the means by which people become anarchists and anarchist ideas are applied in action. Hence the importance of social struggle and anarchist participation within it.

Before discussing issues related to social struggle, it is important to point out here that anarchists are interested in struggles against all forms of oppression and do not limit ourselves to purely economic issues. The hierarchical and exploitative nature of the capitalist economy is only part of the story — other forms of oppression are needed in order to keep it going (not to mention those associated with the state) and have resulted from its workings (in addition to those inherited from previous hierarchical and class systems). Domination, exploitation, hierarchy and oppression do not remain in the workplace. They infest our homes, our friendships and our communities. They need to be fought everywhere, not just in work.

Therefore, anarchists are convinced that human life and the struggle against oppression cannot be reduced to mere money and, indeed, the “proclivity for economic reductionism is now by birth or ideology or economic function. Anarchist political committees wanted to know what the accused monarchists or conservatives had done, not simply what they thought or how they voted ... There is no inherent contradiction involved in recognising both that the revolution included some violence and that its social and economic results ... were approved of by the majority of peasants in an area.” [quoted in Jose Peirats, The CNT in the Spanish Revolution, vol. 1, p. 146]

This was a life and death struggle against fascism, in which the fascists were systematically murdering vast numbers of anarchists, socialists and republicans in the areas under their control. It is hardly surprising that some anarchist troops took the law into their own hands and murdered some of those who supported and would help the fascists. Given what was going on in fascist Spain, and the experience of fascism in Germany and Italy, the CNT militia knew exactly what would happen to them and their friends and family if they lost.

The question does arise, however, of whether the climate was made so coercive by the war and the nearness of the anarchist militia that individual choice was impossible. The facts speak for themselves. At its peak, rural collectivisation in Aragón embraced around 70% of the population in the area saved from fascism. Around 30% of the population felt safe enough not to join a collective, a sizeable percentage. If the collectives had been created by anarchist terror or force, we would expect a figure of 100% membership. This was not the case, indicating the basically voluntary nature of the experiment (we should point out that other figures suggest a lower number of collectivists which makes the forced collectivisation argument even less likely). Historian Antony Beevor (while noting that there “had undoubtedly been pressure, and no doubt force was used on some occasions in the fervour after the rising”) just stated the obvious when he wrote.
that “the very fact that every village was a mixture of collectivists and individualists shows that peasants had not been forced into communal farming at the point of a gun.” [The Spanish Civil War, p. 206] In addition, if the CNT militia had forced peasants into collectives we would expect the membership of the collectives to peak almost overnight, not grow slowly over time:

“At the regional congress of collectives, held at Caspe in mid-February 1937, nearly 80,000 collectivists were represented from ‘almost all the villages of the region.’ This, however, was but a beginning. By the end of April the number of collectivists had risen to 140,000; by the end of the first week of May to 180,000; and by the end of June to 300,000.” [Graham Kelsey, “Anarchism in Aragón,” pp. 60–82, Spain in Conflict 1931–1939, Martin Blinkhorn (ed.), p. 61]

If the collectives had been created by force, then their membership would have been 300,000 in February, 1937, not increasing steadily to reach that number four months later. Neither can it be claimed that the increase was due to new villages being collectivised, as almost all villages had sent delegates in February. This indicates that many peasants joined the collectives because of the advantages associated with common labour, the increased resources it placed at their hands and the fact that the surplus wealth which had in the previous system been monopolised by the few was used instead to raise the standard of living of the entire community.

The voluntary nature of the collectives is again emphasised by the number of collectives which allowed people to remain outside. There “were few villages which were completely collectivised.” [Beevor, Op. Cit., p. 94] One eye-witness in Aragón, an anarchist schoolteacher, noted that the forcing of smallholders into a collective “wasn’t a widespread problem, because there weren’t more oppressed people] unite and struggle for their interests.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 191]

Therefore, “we as anarchists and workers, must incite and encourage” workers and other oppressed people “to struggle, and join them in their struggle.” [Malatesta, Op. Cit., p. 190] This is for three reasons. Firstly, struggle helps generate libertarian ideas and movements which could help make existing society more anarchistic and less oppressive. Secondly, struggle creates people, movements and organisations which are libertarian in nature and which, potentially, can replace capitalism with a more humane society. Thirdly, because anarchists are part of the oppressed and so have an interest in taking part in and showing solidarity with struggles and movements that can improve our life in the here and now (“an injury to one is an injury to all”).

As we will see in section J.2 anarchists encourage direct action within social struggles as well as arguing for anarchist ideas and theories. However, what is important to note here is that social struggle is a sign that people are thinking and acting for themselves and working together to change things. Howard Zinn is completely correct:

“civil disobedience ... is not our problem. Our problem is civil obedience. Our problem is that numbers of people all over the world have obeyed the dictates of the leaders of their government and have gone to war, and millions have been killed because of this obedience ... . Our problem is that people are obedient all over the world in the face of poverty and starvation and stupidity, and war, and cruelty. Our problem is that people are obedient while the jails are full of petty thieves, and all the while the grand thieves are running the country. That’s our problem.” [Failure to Quit, p. 45]
and, like other oppressed people, fight for our freedom and to make our life better in the here and now. It is not in some distant tomorrow that we want to see the end of oppression, exploitation and hierarchy. It is today, in our own life, that the anarchist wants to win our freedom, or at the very least, to improve our situation, reduce oppression, domination and exploitation as well as increasing individual liberty for “every blow given to the institutions of private property and to the government, every exaltation of the conscience of man, disruption of the present conditions, every lie unmasked, every part of human activity taken away from the control of the authorities, every augmentation of the spirit of solidarity and initiative is a step towards Anarchism.” [Errico Malatesta, Towards Anarchism, p. 75]

We are aware that we often fail to do so, but the very process of struggle can help create a more libertarian aspect to society:

“Whatever may be the practical results of the struggle for immediate gains, the greatest value lies in the struggle itself. For thereby workers [and other oppressed sections of society] learn that the bosses interests are opposed to theirs and that they cannot improve their conditions, and much less emancipate themselves, except by uniting and becoming stronger than the bosses. If they succeed in getting what they demand, they will be better off: they will earn more, work fewer hours and will have more time and energy to reflect on the things that matter to them, and will immediately make greater demands and have greater needs. If they do not succeed they will be led to study the reasons of their failure and recognise the need for closer unity and greater activity and they will in the end understand that to make victory secure and definite, it is necessary to destroy capitalism. The revolutionary cause, the cause of moral elevation and emancipation of the workers [and other oppressed sections of society] must benefit by the fact that workers [and other

than twenty or so villages where collectivisation was total and no one was allowed to remain outside.” [quoted by Fraser, Op. Cit., p. 366] Instead of forcing the minority in a village to agree with the wishes of the majority, the vast majority (95%) of Aragón collectives stuck to their libertarian principles and allowed those who did not wish to join to remain outside.

So, only around 20 were “total” collectives (out of 450) and around 30% of the population felt safe enough not to join. In other words, in the vast majority of collectives those joining could see that those who did not were safe. These figures indicate of the basically spontaneous and voluntary nature of the movement as do the composition of the new municipal councils created after July 19th. As Graham Kesley notes: “What is immediately noticeable from the results is that although the region has often been branded as one controlled by anarchists to the total exclusion of all other forces, the CNT was far from enjoying the degree of absolute domination often implied and inferred.” [Anarchosyndicalism, Libertarian Communism and the State, p. 198]

In his account of the rural revolution, Burnett Bolloten noted that it “embraced more than 70 percent of the population” in liberated Aragón and that “many of the 450 collectives of the region were largely voluntary” although “it must be emphasised that this singular development was in some measure due to the presence of militiamen from the neighbouring region of Catalonia, the immense majority of whom were members of the CNT and FAI.” [The Spanish Civil War, p. 74] This, it should be noted, was not denied by anarchists. As Gaston Leval pointed out, “it is true that the presence of these forces ... favoured indirectly these constructive achievements by preventing active resistance by the supporters of the bourgeois republic and of fascism.” [Collectives in the Spanish Revolution, p. 90]

So the presence of the militia changed the balance of class forces in Aragón by destroying the capitalist state (i.e. the local bosses — caciques — could not get state aid to protect their property) and
many landless workers took over the land. The presence of the militia ensured that land could be taken over by destroying the capitalist "monopoly of force" that existed before the revolution (the power of which will be highlighted below) and so the CNT militia allowed the possibility of experimentation by the Aragónese population. This class war in the countryside is reflected by Bolloten: "If the individual farmer viewed with dismay the swift and widespread collectivisation of agriculture, the farm workers of the Anarchosyndicalist CNT and the Socialist UGT saw it as the commencement of a new era." [Op. Cit., p. 63] Both were mass organisations and supported collectivisation.

Therefore, anarchist militias allowed the rural working class to abolish the artificial scarcity of land created by private property (and enforced by the state). The rural bosses obviously viewed with horror the possibility that they could not exploit day workers’ labour (as Bolloten pointed out “the collective system of agriculture threaten[ed] to drain the rural labour market of wage workers.” [Op. Cit., p. 62]). Little wonder the richer peasants and landowners hated the collectives. A report on the district of Valderrobes which indicates popular support for the collectives:

“Collectivisation was nevertheless opposed by opponents on the right and adversaries on the left. If the eternally idle who have been expropriated had been asked what they thought of collectivisation, some would have replied that it was robbery and others a dictatorship. But, for the elderly, the day workers, the tenant farmers and small proprietors who had always been under the thumb of the big landowners and heartless usurers, it appeared as salvation.” [quoted by Bolloten, Op. Cit., p. 71]

However, many historians ignore the differences in class that existed in the countryside and explain the rise in collectives in Aragón (and ignore those elsewhere) as the result of the CNT militia. For example, Fraser:

J.1 Are anarchists involved in social struggles?

Yes. Anarchism, above all else, is a movement which aims to not only analyse the world but also to change it. Therefore anarchists aim to participate in and encourage social struggle. Social struggle includes strikes, marches, protests, demonstrations, boycotts, occupations and so on. Such activities show that the “spirit of revolt” is alive and well, that people are thinking and acting for themselves and against what authorities want them to do. This, in the eyes of anarchists, plays a key role in helping create the seeds of anarchy within capitalism.

Anarchists consider socialistic tendencies to develop within society as people see the benefits of co-operation and particularly when mutual aid develops within the struggle against authority, oppression and exploitation. Anarchism, as Kropotkin argued, “originated in everyday struggles.” [Environment and Revolution, p.58] Therefore, anarchists do not place anarchy abstractly against capitalism but see it as a tendency within and against the system — a tendency created by struggle and which can be developed to such a degree that it can replace the dominant structures and social relationships with new, more liberatory and humane ones. This perspective indicates why anarchists are involved in social struggles — they are an expression of these tendencies within but against capitalism which can ultimately replace it.

However, there is another reason why anarchists are involved in social struggle — namely the fact that we are part of the oppressed
chists is to challenge social hierarchies everywhere, including in the home. As Durruti put it:

“When will you stop thinking like the bourgeoisie, that women are men’s servants? It’s enough that society is divided into classes. We’re not going to make even more classes by creating differences between men and women in our own homes!” [quoted by Abel Paz, Durruti in the Spanish Revolution, p. 341]

So we have an interactive process of struggle and transformation of both society and the individuals within it. In the sections that follow we will discuss the forms of self-activity and self-organisation which anarchists think will stimulate and develop the imagination of those oppressed by hierarchy, build anarchy in action and help create a free society.

“Very rapidly collectives ... began to spring up. It did not happen on instructions from the CNT leadership — no more than had the [industrial] collectives in Barcelona. Here, as there, the initiative came from CNT militants; here, as there, the ‘climate’ for social revolution in the rearguard was created by CNT armed strength: the anarcho-syndicalists’ domination of the streets of Barcelona was re-enacted in Aragón as the CNT militia columns, manned mainly by Catalan anarcho-syndicalist workers, poured in. Where a nucleus of anarcho-syndicalists existed in a village, it seized the moment to carry out the long-awaited revolution and collectivised spontaneously. Where there was none, villagers could find themselves under considerable pressure from the militias to collectivise.” [Op. Cit., p. 347]

Fraser implies that the revolution was mostly imported into Aragón from Catalonia. However, as he himself notes, the CNT column leaders (except Durruti) “opposed” the creation of the Council of Aragón (a confederation for the collectives). Hardly an example of Catalan CNT imposed social revolution! Moreover, the Aragón CNT was a widespread and popular organisation, suggesting that the idea that the collectives were imported into the region by the Catalan CNT is simply false. Fraser states that in “some [of the Aragónese villages] there was a flourishing CNT, in others the UGT was strongest, and in only too many there was no unionisation at all.” [Op. Cit., p. 350 and p. 348] The question arises of how extensive was that strength. The evidence shows that the rural CNT in Aragón was extensive, strong and growing, so making the suggestion of imposed collectives a false one. In fact, by the 1930s the “authentic peasant base of the CNT ... lay in Aragón.” CNT growth in Zaragoza “provided a springboard for a highly effective libertarian agitation in lower Aragón, particularly
among the impoverished labourers and debt-ridden peasantry of the dry steppes region.” [Murray Bookchin, *The Spanish Anarchists*, p. 203]

Graham Kelsey, in his social history of the CNT in Aragón between 1930 and 1937, provides more evidence on this matter. He points out that as well as the “spread of libertarian groups and the increasing consciousness among CNT members of libertarian theories … contribu[ting] to the growth of the anarchosyndicalist movement in Aragón” the existence of “agrarian unrest” also played an important role in that growth. This all lead to the “revitalisation of the CNT network in Aragón”. So by 1936, the CNT had built upon the “foundations laid in 1933” and “had finally succeeded in translating the very great strength of the urban trade-union organisation in Zaragoza into a regional network of considerable extent.” [Op. Cit., pp. 80–81, p. 82 and p. 134]

Kelsey notes the long history of anarchism in Aragón, dating back to the late 1860s. However, before the 1910s there had been little gains in rural Aragón by the CNT due to the power of local bosses (called caciques):

“Local landowners and small industrialists, the caciques of provincial Aragón, made every effort to enforce the closure of these first rural anarchosyndicalist cells [created after 1915]. By the time of the first rural congress of the Aragónese CNT confederation in the summer of 1923, much of the progress achieved through the organisation’s considerable propaganda efforts had been countered by repression elsewhere.” [“Anarchism in Aragón”, Op. Cit., p. 62]

A CNT activist indicated the power of these bosses and how difficult it was to be a union member in Aragón:

“Repression is not the same in the large cities as it is in the villages where everyone knows everybody else and “revolution is in vain unless inspired by its ultimate ideal. Revolutionary methods must be in tune with revolutionary aims … In short, the ethical values which the revolution is to establish must be initiated with the revolutionary activities … The latter can only serve as a real and dependable bridge to the better life if built of the same material as the life to be achieved.” [Red Emma Speaks, p. 404]

In other words, anarchist activity is more than creating libertarian alternatives and resisting hierarchy, it is about building the new world in the shell of the old not only with regards to organisations and self-activity, but also within the individual. It is about transforming yourself while transforming the world (both processes obviously interacting and supporting each other) for while “we associate ourselves with others in working for … social revolution, which for us means the destruction of all monopoly and all government, and the direct seizure by the workers of the means of production” we do not forget that “the first aim of Anarchism is to assert and make good the dignity of the individual human being.” [Charlotte Wilson, *Anarchist Essays*, p. 43 and p. 51]

By direct action, self-management and self-activity we can make the words first heard in Paris, 1968 a living reality:

“All power to the imagination!” Words, we are sure, previous generations of anarchists would have whole-heartedly agreed with. There is a power in humans, a creative power, a power to alter what is into what should be. Anarchists try to create alternatives that will allow that power to be expressed, the power of imagination. Such a social movement will change how we act as individuals, with anarchists seeking to apply our principles in our daily lives as much as our daily struggles. This means that libertarians must change how we relate to our comrades and fellow workers by applying our egalitarian ideals everywhere. Part of the task of anar-
might be the work of the people themselves.” [quoted by Jeremy Jennings, *Syndicalism in France*, p. 18]). Such activity may be done by individuals (for example, propaganda work), but usually anarchists emphasise collective activity. This is because most of our problems are of a social nature, meaning that their solutions can only be worked on collectively. Individual solutions to social problems are doomed to failure, at best slowing down what they are opposed to (most obviously, ethical consumerism as discussed in section E.5). In addition, collective action gets us used to working together, promoting the experience of self-management and building organisations that will allow us to actively manage our own affairs. Also, and we would like to emphasise this, it can be *fun* to get together with other people and work with them, it can be fulfilling and empowering.

Anarchists do not ask those in power to give up that power. No, we promote forms of activity and organisation by which all the oppressed can liberate themselves by their own hands. In other words, we do not think that those in power will altruistically renounce that power or their privileges. Instead, the oppressed must take the power *back* into their own hands by their own actions. We must free ourselves, no one else can do it for use.

Here we will discuss anarchist ideas on struggle, what anarchists actually (and, almost as importantly, do not) do in the here and now and the sort of alternatives anarchists try to build within statism and capitalism in order to destroy them. As well as a struggle against oppression, anarchist activity is also struggle for freedom. As well as fighting against material poverty, anarchists combat spiritual poverty. By resisting hierarchy we emphasise the importance of *living* and of *life as art*. By proclaiming “*Neither Master nor Slave*” we urge an ethical transformation, a transformation that will help create the possibility of a truly free society. This point was stressed by Emma Goldman after she saw the defeat of the Russian Revolution by a combination of Leninist politics and capitalist armed intervention:

However, while there were some successes in organising rural unions, even in 1931 “propaganda campaigns which led to the establishment of scores of village trade-union cells, were followed by a counter-offensive from village caciques which forced them to close.” [Op. Cit., p. 67] Even in the face of this repression the CNT grew and “from the end of 1932” there was “a successful expansion of the anarchosyndicalist movement into several parts of the region where previously it had never penetrated.” [Kesley, *Anarchosyndicalism, Libertarian Communism and the State*, p. 185] This growth was built upon in 1936, with increased rural activism which had slowly eroded the power of the caciques (which in part explains their support for the fascist coup). After the election of the Popular Front, years of anarchist propaganda and organisation paid off with “dramatic growth in rural anarchosyndicalist support” in the six weeks after the general election. This “was emphasised” in the Aragón CNT’s April congress’s agenda and it was decided to direct “attention to rural problems” while the agreed programme was “exactly what was to happen four months later in liberated Aragón.” In its aftermath, a series of intensive propaganda campaigns was organised through each of the provinces of the regional confederation. Many meetings were held in villages which had never before heard anarcho-syndicalist propaganda. This was very successful and by the beginning of June, 1936, the number of Aragón unions had topped 400, compared to only 278 one month earlier. [Kesley, “Anarchism in Aragón”, Op. Cit., pp. 75–76]

This increase in union membership reflected increased social struggle by the Aragónese working population and their attempts
to improve their standard of living, which was very low for most of the population. A journalist from the conservative Catholic Heraldo de Aragón visited lower Aragón in the summer of 1935 and noted “[t]he hunger in many homes, where the men are not working, is beginning to encourage the youth to subscribe to misleading teachings.” [quoted by Kesley, Op. Cit., p. 74] Little wonder, then, the growth in CNT membership and social struggle Kesley indicates:

“Evidence of a different kind was also available that militant trade unionism in Aragón was on the increase. In the five months between mid-February and mid-July 1936 the province of Zaragoza experienced over seventy strikes, more than had previously been recorded in any entire year, and things were clearly no different in the other two provinces . . . the great majority of these strikes were occurring in provincial towns and villages. Strikes racked the provinces and in at least three instances were actually transformed into general strikes.” [Op. Cit., p. 76]

So in the spring and summer of 1936 there was a massive growth in CNT membership which reflected the growing militant struggle by the urban and rural population of Aragón. Years of propaganda and organising had ensured this growth in libertarian influence, a growth which was reflected in the creation of collectives in liberated Aragón during the revolution. Therefore, the construction of a collectivised society was founded directly upon the emergence, during the five years of the Second Republic, of a mass trade-union movement infused by anarchist principles. These collectives were constructed in accordance with the programme agreed at the Aragón CNT conference of April 1936 which reflected the wishes of the rural membership of the unions within Aragón (and due to the rapid growth of the CNT afterwards obviously reflected popular feelings in the area):

In other words, anarchism is not primarily a vision of a better future, but the actual social movement which is fighting within the current unjust and unfree society for that better future and to improve things in the here and now. Without standing up for yourself and what you believe is right, nothing will change. Thus anarchy can be found “wherever free thought breaks loose from the chains of dogma; wherever the spirit of inquiry rejects the old formulas, wherher the human will asserts itself through independent actions; wherever honest people, rebelling against all enforced discipline, join freely together in order to educate themselves, and to reclaim, without any master, their share of life, and the complete satisfaction of their needs.” [Elisée Reclus, quoted by John P. Clark and Camille Martin (ed.), Anarchy, Geography, Modernity, p. 62]

For anarchists, the future is already appearing in the present and is expressed by the creativity of working class self-activity. Anarchy is not some-day-to-be-achieved utopia, it is a living reality whose growth only needs to be freed from constraint. As such anarchist activity is about discovering and aiding emerging trends of mutual aid which work against capitalist domination, so the Anarchist “studies society and tries to discover its tendencies, past and present, its growing needs, intellectual and economic, and in his [or her] ideal he merely points out in which direction evolution goes.” [Peter Kropotkin, Anarchism, p. 47] Indeed, as we discussed in section I.2.3, the future structures of a free society are created in the struggles against oppression today.

The kinds of activity outlined in this section are a general overview of anarchist work. It is by no means exclusive — we are sure to have left something out. However, the key aspect of real anarchist activity is direct action — self-activity, self-help, self-liberation and solidarity (“We wish,” as French syndicalist Fernand Pelloutier wrote, “that the emancipation of the people
This section discusses what anarchists get up to. There is little point thinking about the world unless you also want to change it for the better. And by trying to change it, you change yourself and others, making radical change more of a possibility. Therefore anarchists give their whole-hearted support to attempts by ordinary people to improve their lives by their own actions. We urge “emancipation through practical action” recognising that the “collective experience” gained in “the collective struggle of the workers against the bosses” will transform how they see the world and the world itself. [Bakunin, *The Basic Bakunin*, p. 103] Ultimately, “[t]he true man does not lie in the future, an object of longing, but lies, existent and real, in the present.” [Stirner, *The Ego and Its Own*, p. 327]

Anarchism is more than just a critique of statism and capitalism or a vision of a freer, better way of life. It is first and foremost a movement, the movement of working class people attempting to change the world. Therefore the kind of activity we discuss in this section of the FAQ forms the bridge between capitalism and anarchism. By self-activity and direct action, people can change both themselves and their surroundings. They develop within themselves the mental, ethical and spiritual qualities which can make an anarchist society a viable option. As Noam Chomsky argues:

“Only through their own struggle for liberation will ordinary people come to comprehend their true nature, suppressed and distorted within institutional structures designed to assure obedience and subordination. Only in this way will people develop more humane ethical standards, ‘a new sense of right’, ‘the consciousness of their strength and their importance as a social factor in the life of their time’ and their capacity to realise the strivings of their ‘inmost nature.’ Such direct engagement in the work of social reconstruction is a prerequisite for coming to perceive this ‘inmost nature’ and is the indispens-

“libertarian dominance in post-insurrection Aragón itself reflected the predominance that anarchists had secured before the war; by the summer of 1936 the CNT had succeeded in establishing throughout Aragón a mass trade-union movement of strictly libertarian orientation, upon which widespread and well-supported network the extensive collective experiment was to be founded.” [Kesley, *Op. Cit.*, p. 61]

Additional evidence that supports a high level of CNT support in rural Aragón can be provided by the fact that it was Aragón that was the centre of the December 1933 insurrection organised by the CNT. As Bookchin noted, “only Aragón rose on any significant scale, particularly Saragossa … many of the villages declared libertarian communism and perhaps the heaviest fighting took place between the vineyard workers in Rioja and the authorities”. [Op. Cit., p. 238] It is unlikely for the CNT to organise an insurrection in an area within which it had little support or influence. According to Kesley, “it was precisely those areas which had most important in December 1933” which were in 1936 “seeking to create a new pattern of economic and social organisation, to form the basis of libertarian Aragón.” [Anarchosyndicalism, Libertarian Communism and the State, p. 161]

So the majority of collectives in Aragón were the product of CNT (and UGT) influenced workers taking the opportunity to create a new form of social life, a form marked by its voluntary and directly democratic nature. For from being unknown in rural Aragón, the CNT was well established and growing at a fast rate: “Spreading out from its urban base … the CNT, first in 1933 and then more extensively in 1936, succeeded in converting an essentially urban organisation into a truly regional confederation.” [Kesley, *Op. Cit.*, p. 184]

The evidence suggests that historians like Fraser are wrong to imply that the Aragón collectives were created by the CNT militia and enforced upon a unwilling population. The Aragón collectives were the natural result of years of anarchist activity within rural Aragón and directly related to the massive growth in the CNT be-
tween 1930 and 1936. Thus Kesley is correct to state that libertarian communism and agrarian collectivisation “were not economic terms or social principles enforced upon a hostile population by special teams of urban anarchosyndicalists.” [Op. Cit., p. 161] This is not to suggest that there were no examples of people joining collectives involuntarily because of the “coercive climate” of the front line nor that there were villages which did not have a CNT union within them before the war and so created a collective because of the existence of the CNT militia. It is to suggest that these can be considered as exceptions to the rule.

Moreover, the way the CNT handled such a situation is noteworthy. Fraser indicates such a situation in the village of Alloza. In the autumn of 1936, representatives of the CNT district committee had come to suggest that the villagers collectivise (we would like to stress here that the CNT militia which had passed through the village had made no attempt to create a collective there). A village assembly was called and the CNT members explained their ideas and suggested how to organise the collective. However, who would join and how the villagers would organise the collective was left totally up to them (the CNT representatives “stressed that no one was to be maltreated”). Within the collective, self-management was the rule and one member recalled that “[o]nce the work groups were established on a friendly basis and worked their own lands, everyone got on well enough.” “There was no need for coercion, no need for discipline and punishment … A collective wasn’t a bad idea at all.” [Fraser, Op. Cit., p. 360] This collective, like the vast majority, was voluntary and democratic: “I couldn’t oblige him to join; we weren’t living under a dictatorship.” [quoted by Fraser, Op. Cit., p. 362] In other words, no force was used to create the collective and the collective was organised by local people directly.

Of course, as with any public good (to use economic jargon), all members of the community had to pay for the war effort and feed the militia. As Kelsey notes, “[t]he military insurrection had come at a critical moment in the agricultural calendar. Throughout

Section J — What do anarchists do?
class people can manage and run society but also that we can improve the quality of life and increase freedom. Given the time and breathing space, the experiment would undoubtedly have ironed out its problems. Even in the very difficult environment of a civil war (and with resistance of almost all other parties and unions) the workers and peasants of Spain showed that a better society is possible. They gave a concrete example of what was previously just a vision, a world which was more humane, more free, more equitable and more civilised than that run by capitalists, managers, politicians and bureaucrats.

lower Aragón there were fields of grain ready for harvesting ... At the assembly in Albalate de Cinca the opening clause of the agreed programme had required everyone in the district, independent farmers and collectivists alike, to contribute equally to the war effort, thereby emphasising one of the most important considerations in the period immediately following the rebellion.” [Op. Cit., p. 164] In addition, the collectives controlled the price of crops in order to ensure that speculation and inflation were controlled. However, these policies as with the equal duties of individualists and collectivists in the war effort were enforced upon the collectives by the war.

Lastly, in support of the popular nature of the rural collectives, we will indicate the effects of the suppression of the collectives in August 1937 by the Communists, namely the collapse of the rural economy. This sheds considerable light on the question of popular attitudes.

In October 1937, the Communist-controlled Regional Delegation of Agrarian Reform acknowledged that “in the majority of villages agricultural work was paralysed causing great harm to our agrarian economy.” This is confirmed by Jose Silva, a Communist Party member and general secretary of the Institute of Agrarian Reform, who commented that after Lister had attacked Aragón, “labor in the fields was suspended almost entirely, and a quarter of the land had not been prepared at the time for sowing.” At a meeting of the agrarian commission of the Aragonese Communist Party (October 9th, 1937), Silva emphasised “the little incentive to work of the entire peasant population” and that the situation brought about by the dissolution of the collectives was “grave and critical.” [quoted by Bolloten, Op. Cit., p. 530] Jose Peirats explained the reasons for this economic collapse as a result of popular boycott:

“When it came time to prepare for the next harvest, smallholders could not by themselves work the property on which they had been installed [by the communists]. Dispossessed peasants, intransient collectivists, refused
to work in a system of private property, and were even less willing to rent out their labour.” [Anarchists in the Spanish Revolution, p. 258]

If the collectives were unpopular, created by anarchist force, then why did the economy collapse after the suppression? If Lister had overturned a totalitarian anarchist regime, why did the peasants not reap the benefit of their toil? Could it be because the collectives were essentially a spontaneous Aragónese development and supported by most of the population there? This analysis is supported by historian Yaacov Oved:

“Those who were responsible for this policy [of attacking the Aragón collectives], were convinced that the farmers would greet it joyfully because they had been coerced into joining the collectives. But they were proven wrong. Except for the rich estate owners who were glad to get their land back, most of the members of the agricultural collectives objected and lacking all motivation they were reluctant to resume the same effort in the agricultural work. This phenomenon was so widespread that the authorities and the communist minister of agriculture were forced to retreat from their hostile policy.” [“Communismo Libertario” and Communalism in the Spanish Collectivisations (1936–1939), pp. 53–4]

Even in the face of Communist repression, most of the collectives kept going. This, if nothing else, proves that the collectives were popular institutions. “Through the widespread reluctance of collectivists to co-operate with the new policy,” Oved argues, “it became evident that most members had voluntarily joined the collectives and as soon as the policy was changed a new wave of collectives was established. However, the wheel could not be turned back. An atmosphere...
starting production after the fascist uprising made attempts at co-ordination seem of secondary importance to the collectives, the competition that initially occurred between workplaces helped the state to undermine self-management (for example, the state “was actively using its control of finances to contain and stifle radical change” [Graham Kesley, Anarchosyndicalism, Libertarian Communism and the State, p. 172]). As there was no People’s Bank or federal body to co-ordinate credit and production, state control of credit and the gold reserves made it easier for the Republican state to undermine the revolution by controlling the collectives and (effectively) nationalising them in time (Durruti and a few others planned to seize the gold reserves but were advised not to by Abad de Santillán).

This attack on the revolution started when the Catalan State issued a decree legalising (and so controlling) the collectives in October 1936 (the infamous “Collectivisation Decree”). The counter-revolution also withheld funds for collectivised industries, even war industries, until they agreed to come under state control. The industrial organisation created by this decree was a compromise between anarchist ideas and those of other parties (particularly the communists) and in the words of Gaston Leval, “the decree had the baneful effect of preventing the workers’ syndicates from extending their gains. It set back the revolution in industry.” [The Anarchist Collectives, p. 54]

And lastly, that an economic revolution can only succeed if the existing state is destroyed. As Kropotkin argued, “a new form of economic organisation will necessarily require a new form of political structure.” [Anarchism, p. 181] Capitalism needs the state, socialism needs anarchy. Without the new political structure, the new economic organisation cannot develop to its full potential. Due to the failure to consolidate the revolution politically, it was lost economically. The decree “legalising” collectivisation “distorted everything right from the start.” [Leval, Collectives in the Spanish Revolution, p. 227] This helped undermine the revolution by en-

of distrust prevailed between the collectives and the authorities and every initiative was curtailed” [Op. Cit., p. 54]

Jose Peirats summed up the situation after the communist attack on the collectives and the legalisation of the collectives as follows:

“It is very possible that this second phase of collectivisation better reflects the sincere convictions of the members. They had undergone a severe test and those who had withstood it were proven collectivists. Yet it would be facile to label as anti-collectivists those who abandoned the collectives in this second phase. Fear, official coercion and insecurity weighed heavily in the decisions of much of the Aragônese peasantry.” [Op. Cit., p. 258]

While the collectives had existed, there was a 20% increase in production (and this is compared to the pre-war harvest which had been “a good crop” [Fraser, Op. Cit.p. 370]). After the destruction of the collectives, the economy collapsed. Hardly the result that would be expected if the collectives were forced upon an unwilling peasantry (the forced collectivisation by Stalin in Russia resulted in a famine). Only the victory of fascism made it possible to restore the so-called “natural order” of capitalist property in the Spanish countryside. The same land-owners who welcomed the Communist repression of the collectives also, we are sure, welcomed the fascists who ensured a lasting victory of property over liberty.

So, overall, the evidence suggests that the Aragon collectives, like their counterparts in the Levante, Catalonia and so on, were popular organisations, created by and for the rural population and, essentially, an expression of a spontaneous and popular social revolution. Claims that the anarchist militia created them by force of arms are false. While acts of violence did occur and some acts of coercion did take place (against CNT policy, we may add) these were the exceptions to the rule. Bolloten’s summary best fits the facts:

3426

3375
“But in spite of the cleavages between doctrine and practice that plagued the Spanish Anarchists whenever they collided with the realities of power, it cannot be overemphasised that notwithstanding the many instances of coercion and violence, the revolution of July 1936 distinguished itself from all others by the generally spontaneous and far-reaching character of its collectivist movement and by its promise of moral and spiritual renewal. Nothing like this spontaneous movement had ever occurred before.” [Op. Cit., p. 78]

I.8.8 But did the Spanish collectives innovate?

Yes. In contradiction to the old capitalist claim that no one will innovate unless private property exists, the workers and peasants exhibited much more incentive and creativity under libertarian socialism than they had under the private enterprise system. This is apparent from Gaston Leval’s description of the results of collectivisation in Cargagente in the southern part of the province of Valencia:

“The climate of the region is particularly suited for the cultivation of oranges ... All of the socialised land, without exception, is cultivated with infinite care. The orchards are thoroughly weeded. To assure that the trees will get all the nourishment needed, the peasants are incessantly cleaning the soil. ‘Before,’ they told me with pride, ‘all this belonged to the rich and was worked by miserably paid labourers. The land was neglected and the owners had to buy immense quantities of chemical fertilisers, although they could have gotten much better yields by cleaning the soil ...’ With pride, they showed me trees that had been grafted to produce better fruit.
"I was especially impressed with the replies to my questions as to what actually had the workers gained by the collectivisation... the answer always was, first, greater freedom. And only secondly, more wages and less time of work. In two years in Russia [1920–21] I never heard any workers express this idea of greater freedom." [Vision on Fire, p. 62]

As predicted in anarchist theory, and borne out by actual experience, there exists large untapped reserves of energy and initiative in the ordinary person which self-management can call forth. The collectives proved Kropotkin’s argument that co-operative work is more productive and that if the economists wish to prove “their thesis in favour of private property against all other forms of possession, should not the economists demonstrate that under the form of communal property land never produces such rich harvests as when the possession is private. But this they could not prove; in fact, it is the contrary that has been observed.” [The Conquest of Bread, p. 146]

Beyond this five important lessons can be derived from the actual experience of a libertarian socialist economy:

Firstly, that an anarchist society cannot be created overnight, but is a product of many different influences as well as the objective conditions. In this the anarchist collectives confirmed the ideas of anarchist thinkers like Bakunin and Kropotkin (see section I.2.2). The collectives although, as mentioned in section I.8.3, based on key libertarian principles they were a somewhat unexpected development. They reflected objective circumstances facing the revolution as well as libertarian theory and, with regards the latter, were somewhat limited. However, they were organisations created from below by the revolution and so capable of development and progress.

The lesson from every revolution is that the mistakes made in the process of liberation by people themselves are always minor...
(in which we present more examples when refuting the charge that workers’ control would stifle innovation).

The substantial evidence available, of which these examples are but a small number, proves that the membership of the collectives showed a keen awareness of the importance of investment and innovation in order to increase production, to make work both lighter and more interesting and that the collectives allowed that awareness to be expressed freely. The collectives indicate that, given the chance, everyone will take an interest in their own affairs and express a desire to use their minds to improve their lives and surroundings. In fact, capitalism distorts what innovation exists under hierarchy by channelling it purely into how to save money and maximise investor profit, ignoring other, more important, issues. As Gaston Leval suggested, self-management encouraged innovation:

“The theoreticians and partisans of the liberal economy affirm that competition stimulates initiative and, consequently, the creative spirit and invention without which it remains dormant. Numerous observations made by the writer in the Collectives, factories and socialised workshops permit him to take quite the opposite view. For in a Collective, in a grouping where each individual is stimulated by the wish to be of service to his fellow beings, research, the desire for technical perfection and so on are also stimulated. But they also have as a consequence that other individuals join those who were first to get together. Furthermore, when, in present society, an individualist inventor discovers something, it is used only by the capitalist or the individual employing him, whereas in the case of an inventor living in a community not only is his discovery taken up and developed by others, but is immediately applied for the common good. I am convinced that this superiority...”

I.8.14 What economic lessons were learned from the revolution?

The most important economic lesson from the revolution is the fact that working class people took over the management of industry and did an amazing job of keeping (and improving!) production in the face of the direst circumstances (a factor often overlooked by the opponents of anarchism and the revolution). Not only did workers create a war industry from almost nothing in Catalonia, they also improved working conditions and innovated with new techniques and processes. The Spanish Revolution shows that self-management is possible and that the constructive powers of people inspired by an ideal can transform society.

Self-management allowed a massive increase in innovation and new ideas. The Spanish Revolution is clear proof of the anarchist case against hierarchy and validates Isaac Puente words that in “a free collective each benefits from accumulated knowledge and specialised experiences of all, and vice versa. There is a reciprocal relationship wherein information is in continuous circulation.” [The Anarchist Collectives, p. 32] The workers, freed from economic autocracy, started to transform their workplaces and how the produced goods.

From the point of view of individual freedom, it is clear that self-management allowed previously marginalised people to take an active part in the decisions that affected them. Egalitarian organisations provided the framework for a massive increase in participation and individual self-government, which expressed itself in the extensive innovations carried out by the Collectives. The Collectives indicate, in Stirner’s words, that “[o]nly in the union can you assert yourself as unique, because the union does not possess you, but you possess it or make it of use to you.” [The Ego and Its Own, p. 312] A fact Emma Goldman confirmed from her visits to collectives and discussions with their members:
name ... Anti-Fascism is the new slogan by which the working class is being betrayed.” [Workers Free Press, October 1937]

Thirdly, the argument of the CNT that Libertarian Communism had to wait until after the war was a false one. Fascism can only be defeated by ending the system that spawned it (i.e. capitalism). In addition, in terms of morale and inspiration, the struggle against fascism could only be effective if it were also a struggle for something better — namely a free society. To fight fascism for a capitalist democracy which had repressed the working class would hardly inspire those at the front. Similarly, the only hope for workers’ self-management was to push the revolution as far as possible, i.e. to introduce libertarian communism while fighting fascism. The idea of waiting for libertarian communism ultimately meant sacrificing it for the war effort. This would, by necessity, mean the end of the revolutionary spirit and hope which could inspire and sustain the war effort. Why would people fight for a return to the status quo? A status quo that they had rebelled against before the start of the civil war and which had provoked the fascist coup in the first place.

Fourthly, the role of anarchists in a social revolution is to always encourage organisation “from below” (to use one of Bakunin’s favourite expressions), revolutionary organisations which can effectively smash the state. Bakunin himself argued (see section I.8.11) in favour of workers’ councils, complemented by community assemblies (the federation of the barricades) and a self-managed militia. This model is still applicable today and was successfully applied in Aragón by the CNT.

Therefore, the political lessons gained from the experience of the CNT come as no surprise. They simply repeat long standing positions within anarchist theory. As anarchists have argued since Bakunin, no revolution is possible unless the state is smashed, capital expropriated and a free federation of workers’ associations created as the framework of libertarian socialism. Rather than refuting anarchism, the experience of the Spanish Revolution confirms it.

Therefore the actual experiences of self-management in Spain supports the points made in section I.4.11. Freed from hierarchy, individuals will creatively interact with the world to improve their circumstances. For the human mind is an active agent and unless crushed by authority it can no more stop thinking and acting than the Earth can stop revolving round the Sun. In addition, the Collectives indicate that self-management allows ideas to be enriched by discussion.

The experience of self-management proved Bakunin’s point that society is collectively more intelligent than even the most intelligent individual simply because of the wealth of viewpoints, experience and thoughts contained there. Capitalism impoverishes individuals and society by its artificial boundaries and authority structures.

I.8.9 Why, if it was so good, did it not survive?

Just because something is good does not mean that it will survive. For example, the Warsaw Ghetto uprising against the Nazis failed but that does not mean that the uprising was a bad cause or that the Nazi regime was correct, far from it. Similarly, while the experiments in workers’ self-management and free communes undertaken across Republican Spain is one of the most important social experiments in a free society ever undertaken, this cannot change the fact that Franco’s forces and the Communists had access to more and better weapons.

Faced with the aggression and terrorism of Franco, and behind him the military might of Fascist Italy and Nazi Germany, the treachery of the Communists, and the aloofness of the Western “democratic” states (whose policy of “non-intervention” was
strangely ignored when their citizens aided Franco) it is amazing
the revolution lasted as long as it did.

This does not excuse the actions of the anarchists themselves. As is well known, the CNT co-operated with the other anti-fascist parties and trade unions on the Republican side ultimately leading to anarchists joining the government (see next section). This co-operation helped ensure the defeat of the revolution. While much of the blame can be placed at the door of the would-be “leaders” (who like most leaders started to think themselves irreplaceable), it must be stated that the rank-and-file of the movement did little to stop them. Most of the militant anarchists were at the front-line (and so excluded from union and collective meetings) and so could not influence their fellow workers (it is no surprise that the radical “Friends of Durruti” anarchist group were mostly ex-militia men). However, it seems that the mirage of anti-fascist unity proved too much for the majority of CNT members (see section I.8.12).

A few anarchists still maintain that the Spanish anarchist movement had no choice and that collaboration (while having unfortunate effects) was the only choice available. This view was defended by Sam Dolgoff and finds some support in the writings of Gaston Leval, August Souchy and other participants in the revolution. However, it seems that the mirage of anti-fascist unity proved too much for the majority of CNT members (see section I.8.12).

The second important lesson is on the nature of anti-fascism. The CNT leadership, along with many (if not most) of the rank-and-file, were totally blinded by the question of anti-fascist unity, leading them to support a “democratic” state against a “fascist” one. While the basis of a new world was being created around them by the working class, inspiring the fight against fascism, the CNT leaders collaborated with the system that spawns fascism. While the anti-fascist feelings of the CNT leadership were sincere, the same cannot be said of their “allies” (who seemed happier attacking the gains of the semi-revolution than fighting fascism). As the Friends of Durruti make clear:

“Democracy defeated the Spanish people, not Fascism.” [Op. Cit., p. 30] To be opposed to fascism is not enough, you also have to be anti-capitalist. As Durruti stressed, “no government in the world fights fascism to the death. When the bourgeoisie sees power slipping from its grasp, it has recourse to fascism to maintain itself.” [quoted by Vernon Richards, Op. Cit., p. 193f]

In Spain, anti-fascism destroyed the revolution, not fascism. As the Scottish Anarchist Ethel McDonald argued at the time: “Fascism is not something new, some new force of evil opposed to society, but is only the old enemy, Capitalism, under a new and fearful sounding...
they considered the greater evil, namely fascism. This inevitably lead the way to counter-revolution, the destruction of the militias and collectives, as they was no means by which these groups could co-ordinate their activities independently of the state. The continued existence of the state ensured that economic confederalism between collectives (i.e. extending the revolution under the direction of the syndicates) could not develop naturally nor be developed far enough in all places. Due to the political compromises of the CNT the tendencies to co-ordination and mutual aid could not develop freely (see next section).

It is clear that the defeat in Spain was due to a failure not of anarchist theory and tactics but a failure of anarchists to apply their theory and tactics. Instead of destroying the state, the CNT-FAI ignored it. For a revolution to be successful it needs to create organisations which can effectively replace the state and the market; that is, to create a widespread libertarian organisation for social and economic decision-making through which working class people can start to set their own agendas. Only by going down this route can the state and capitalism be effectively smashed.

In building the new world we must destroy the old one. Revolutions may be, as Engels suggested, “authoritarian” by their very nature, but only in respect to institutions, structures and social relations which promote injustice, hierarchy and inequality. As discussed in section I.7.4, it is not “authoritarian” to destroy authority and not tyrannical to dethrone tyrants! Revolutions, above all else, must be libertarian in respect to the oppressed. That is, they must develop structures that involve the great majority of the population, who have previously been excluded from decision-making on social and economic issues. In fact, a revolution is the most libertarian thing ever.

As the Friends of Durruti argued a “revolution requires the absolute domination of the workers’ organisations.” [“The Friends of Durruti accuse”, Class War on the Home Front, Wildcat Group (ed.), p. 34] Only this, the creation of viable anarchist social organ-

Militia column at the Aragón Front) summed up the successes of the revolution as well as its objective limitations:

“Always expecting to be stabbed in the back, always knowing that if we created problems, only the enemy across the lines would stand to gain. It was a tragedy for the anarcho-syndicalist movement; but it was a tragedy for something greater — the Spanish people. For it can never be forgotten that it was the working class and peasantry which, by demonstrating their ability to run industry and agriculture collectively, allowed the republic to continue the struggle for thirty-two months. It was they who created a war industry, who kept agricultural production increasing, who formed militias and later joined the army. Without their creative endeavour, the republic could not have fought the war ...” [quoted by Ronald Fraser, Blood of Spain, p. 394]

So, regardless of its benefits, regardless of its increase in liberty and equality, the revolution was defeated. This should not blind us to its achievements or the potential it expressed. Rather, it should be used both as a source of inspiration and lessons.

I.8.10 Why did the CNT collaborate with the state?

As is well know, in September 1936 the CNT joined the Catalan government, followed by the central government in November. This flowed from the decision made on July 21st to not speak of Libertarian Communism until after Franco had been defeated. In other words, to collaborate with other anti-fascist parties and unions in a common front against fascism. This decision, initially, involved the CNT agreeing to join a “Central Committee of Anti-Fascist Militias”
proposed by the leader of the Catalan government, Louis Companys. This committee was made up of representatives of various anti-fascist parties and groups. From this it was only a matter of time until the CNT joined an official government as no other means of co-ordinating activities existed (see section I.8.13).

The question must arise, why did the CNT decide to collaborate with the state, forsake its principles and, in its own way, contribute to the counter-revolution and the loosing of the war. This is an important question. Indeed, it is one Marxists always throw up in arguments with anarchists or in anti-anarchist diatribes. Does the failure of the CNT to implement anarchism after July 19th mean that anarchist politics are flawed? Or, rather, does the experience of the CNT and FAI during the Spanish revolution indicate a failure of anarchists rather than of anarchism, a mistake made under difficult objective circumstances and one which anarchists have learnt from? Needless to say, anarchists argue that the latter is correct. In other words, as Vernon Richards argued, "the basis of [this] criticism is not that anarchist ideas were proved to be unworkable by the Spanish experience, but that the Spanish anarchists and syndicalists failed to put their theories to the test, adopting instead the tactics of the enemy." [Lessons of the Spanish Revolution, p. 14]

So, why did the CNT collaborate with the state during the Spanish Civil War? Simply put, rather than being the fault of anarchist theory (as Marxists like to claim), its roots can be discovered in the situation facing the Catalan anarchists on July 20th. The objective conditions facing the leading militants of the CNT and FAI influenced the decisions they took, decisions which they later justified by mis-using anarchist theory.

What was the situation facing the Catalan anarchists on July 20th? Simply put, it was an unknown situation, as the report made by the CNT to the International Workers Association made clear:

"How else could libertarian communism be brought about? It would always signify dissolution of the old parties dedicated to the idea of power, or at least make it impossible for them to pursue their politics aimed at seizure of power. There will always be pockets of opposition to new experiences and therefore resistance to joining 'the spontaneity of the unanimous masses.' In addition, the masses would have complete freedom of expression in the unions and in the economic organisations of the revolution as well as their political organisations in the district and communities." [Anarchist Organisation: the History of the FAI, p. 188f]

Instead of this "collaboration" from the bottom up, by means of a federation of workers’ associations, community assemblies and militia columns as argued for by anarchists from Bakunin onwards, the CNT and FAI committees favoured “collaboration” from the top down. The leaders ignored the state and co-operated with other trade unions officials as well as political parties in the Central Committee of Anti-Fascist Militias. In other words, they ignored their political ideas in favour of a united front against what
the Spanish Revolution, p. 34] Which means that only by working with the state, politicians and capitalists can an anarchist revolution be truly libertarian! Furthermore:

“This argument contains ... two fundamental mistakes, which many of the leaders of the CNT-FAI have since recognised, but for which there can be no excuse, since they were not mistakes of judgement but the deliberate abandonment of the principles of the CNT. Firstly, that an armed struggle against fascism or any other form of reaction could be waged more successfully within the framework of the State and subordinating all else, including the transformation of the economic and social structure of the country, to winning the war. Secondly, that it was essential, and possible, to collaborate with political parties — that is politicians — honestly and sincerely, and at a time when power was in the hands of the two workers organisations ...

“All the initiative ... was in the hands of the workers. The politicians were like generals without armies floundering in a desert of futility. Collaboration with them could not, by any stretch of the imagination, strengthen resistance to Franco. On the contrary, it was clear that collaboration with political parties meant the recreation of governmental institutions and the transferring of initiative from the armed workers to a central body with executive powers. By removing the initiative from the workers, the responsibility for the conduct of the struggle and its objectives were also transferred to a governing hierarchy, and this could not have other than an adverse effect on the morale of the revolutionary fighters.” [Richards, Op. Cit., p. 42]

“Levante was defenceless and uncertain ... We were in a minority in Madrid. The situation in Andalusia was unknown ... There was no information from the North, and we assumed the rest of Spain was in the hands of the fascists. The enemy was in Aragón, at the gates of Catalonia. The nervousness of foreign consular officials led to the presence of a great number of war ships around our ports.” [quoted by Jose Peirats, Anarchists in the Spanish Revolution, p. 180]

Anarchist historian Jose Peirats noted that according to the report “the CNT was in absolute control of Catalonia in July 19, 1936, but its strength was less in Levante and still less in central Spain where the central government and the traditional parties were dominant. In the north of Spain the situation was confused. The CNT could have mounted an insurrection on its own ‘with probable success’ but such a take-over would have led to a struggle on three fronts: against the fascists, the government and foreign capitalism. In view of the difficulty of such an undertaking, collaboration with other antifascist groups was the only alternative.” [Op. Cit., p. 179] In the words of the CNT report itself:

“The CNT showed a conscientious scrupulousness in the face of a difficult alternative: to destroy completely the State in Catalonia, to declare war against the Rebels [i.e. the fascists], the government, foreign capitalism, and thus assuming complete control of Catalan society; or collaborating in the responsibilities of government with the other antifascist groups.” [quoted by Robert Alexander, The Anarchists in the Spanish Civil War, vol. 2, p. 1156]

Moreover, as Gaston Leval later argued, given that the “general preoccupation” of the majority of the population was “to defeat the
fascists ... the anarchists would, if they came out against the state, provoke the antagonism ... of the majority of the people, who would accuse them of collaborating with Franco.” Implementing an anarchist revolution would, in all likelihood, also result in “the instant closing of the frontier and the blockade by sea by both fascists and the democratic countries. The supply of arms would be completely cut off, and the anarchists would rightly be held responsible for the disastrous consequences.” [The Anarchist Collectives, p. 52 and p. 53]

While the supporters of Lenin and Trotsky will constantly point out the objective circumstances in which their heroes made their decisions during the Russian Revolution, they rarely mention those facing the anarchists in Spain on the 20th of July, 1936. It seems hypocritical to point to the Russian Civil War as the explanation of all of the Bolsheviks’ crimes against the working class (indeed, humanity) while remaining silent on the forces facing the CNT-FAI at the start of the Spanish Civil War. The fact that if the CNT had decided to implement libertarian communism in Catalonia they would have to face the fascists (commanding the bulk of the Spanish army), the Republican government (commanding the rest) plus those sections in Catalonia which supported the republic is rarely mentioned. Moreover, when the decision to collaborate was made it was immediately after the defeat of the army uprising in Barcelona — the situation in the rest of the country was uncertain and when the social revolution was in its early days. Stuart Christie indicates the dilemma facing the leadership of the CNT at the time:

“The higher committees of the CNT-FAI-FTJL in Catalonia saw themselves caught on the horns of a dilemma: social revolution, fascism or bourgeois democracy. Either they committed themselves to the solutions offered by social revolution, regardless of the difficulties involved in fighting both fascism and international capitalism, or, the wave of collectivisation and what happened in Aragón, that the decision would have been different and the first step would have made to turn this plenum into the basis of a free federation of workers associations — i.e. the framework of a self-managed society — which could have smashed the state and ensured no other appeared to take its place.

So the basic idea of anarchism, the need to create a federation of workers councils, was ignored. In the name of “antifascist” unity, the CNT worked with parties and classes which hated both them and the revolution. In the words of Sam Dolgoff “both before and after July 19th, an unwavering determination to crush the revolutionary movement was the leitmotif behind the policies of the Republican government; irrespective of the party in power.” [The Anarchist Collectives, p. 40] Without creating a means to organise the “social power” of the working class, the CNT was defenceless against these parties once the state had re-organised itself.

To justify their collaboration, the leaders of the CNT-FAI argued that not to do so would have lead to a civil war within the civil war, so allowing Franco easy victory. In practice, while paying lip service to the revolution, the Communists and republicans attacked the collectives, murdered anarchists, restricted supplies to collectivised industries (even war industries) and disbanded the anarchist militias after refusing to give them weapons and ammunition (preferring to arm the Civil Guard in the rearguard in order to crush the CNT and the revolution). By collaborating, a civil war was not avoided. One occurred anyway, with the working class as its victims, as soon as the state felt strong enough.

Garcia Oliver (the first ever, and hopefully last, “anarchist” minister of justice) stated in 1937 that collaboration was necessary and that the CNT had “renounced revolutionary totalitarianism, which would lead to the strangulation of the revolution by anarchist andConfederal [CNT] dictatorship. We had confidence in the word and in the person of a Catalan democrat” Company (who had in the past jailed anarchists). [quoted by Vernon Richards, Lessons of
Militias created on July 20th, 1936, was, in fact, an organ of class collaboration and a handicap to the revolution. [Revolution and Counter-Revolution in Spain, p. 85 and p. 83] Stuart Christie was correct to call it an “artificial and hybrid creation,” a “compromise, an artificial political solution, an officially sanctioned appendage of the Generalidad government” which “drew the CNT-FAI leadership inexorably into the State apparatus, until then its principal enemy.” [Op. Cit., p. 105] Only a true federation of delegates from the fields, factories and workplaces could have been the framework of a true organisation of (to use Bakunin’s expression) “the social (and, by consequence, anti-political) power of the working masses.” [Michael Bakunin: Selected Writings, pp. 197–8]

Therefore, the CNT forgot a basic principle of anarchism, namely “the destruction ... of the States.” Instead, like the Paris Commune, the CNT thought that “in order to combat ... reaction, they had to organise themselves in reactionary Jacobin fashion, forgetting or sacrificing what they themselves knew were the first conditions of revolutionary socialism.” The real basis of the revolution, the basic principle of anarchism, was that the “future social organisation must be made solely from the bottom upwards, by the free association or federation of workers, firstly in their unions, then in communes, regions, nations and finally in a great federation, international and universal.” [Bakunin, Op. Cit., p. 198, p. 202 and p. 204] By not doing this, by working in a top-down compromise body rather than creating a federation of workers’ councils, the CNT leadership could not help eventually sacrificing the revolution in favour of the war.

Of course, if a full plenum of CNT unions and barrios defence committees, with delegates invited from UGT and unorganised workplaces, had taken place there is no guarantee that the decision reached would have been in line with anarchist theory. The feelings for antifascist unity were strong. However, the decision would have been fully discussed by the rank and file of the union, under the influence of the revolutionary anarchists who were later to join the militias and leave for the front. It is likely, given through fear of fascism (or of the people), they sacrificed their anarchist principles and revolutionary objectives to bolster, to become, part of the bourgeois state ... Faced with an imperfect state of affairs and preferring defeat to a possibly Pyrrhic victory, the Catalan anarchist leadership renounced anarchism in the name of expediency and removed the social transformation of Spain from their agenda.

“But what the CNT-FAI leaders failed to grasp was that the decision whether or not to implement Libertarian Communism, was not theirs to make. Anarchism was not something which could be transformed from theory into practice by organisational decree ... [the] spontaneous defensive movement of 19 July had developed a political direct of its own.” [We, the Anarchists!, p. 99]

Given that the pro-fascist army still controlled a third or more of Spain (including Aragón) and that the CNT was not the dominant force in the centre and north of Spain, it was decided that a war on three fronts would only aid Franco. Moreover, it was a distinct possibility that by introducing libertarian communism in Catalonia, Aragón and elsewhere, the workers’ militias and self-managed industries would have been starved of weapons, resources and credit. That isolation was a real problem can be seen from Abad de Santillán’s later comments on why the CNT joined the government:

“The Militias Committee guaranteed the supremacy of the people in arms ... but we were told and it was repeated to us endlessly that as long as we persisted in retaining it, that is, as long as we persisted in propping up the power of the people, weapons would not come to Catalonia, nor would we be granted the foreign currency to obtain them from abroad, nor would we be supplied...
with the raw materials for our industry. And since losing the war meant losing everything and returning to a state like that prevailed in the Spain of Ferdinand VII, and in the conviction that the drive given by us and our people could not vanish completely from the new economic life, we quit the Militias Committee to join the Generalidad government.” [quoted by Christie, Op. Cit., p. 109]

It was decided to collaborate and reject the basic ideas of anarchism until the war was over. A terrible mistake, but one which can be understood given the circumstances in which it was made. This is not, we stress, to justify the decision but rather to explain it and place it in context. Ultimately, the experience of the Civil War saw a blockade of Republic by both “democratic” and fascist governments, the starving of the militias and self-managed collectives of resources and credit as well as a war on two fronts when the State felt strong enough to try and crush the CNT and the semi-revolution its members had started. Most CNT members did not think that when faced with the danger of fascism, the liberals, the right-wing socialists and communists would prefer to undermine the anti-fascist struggle by attacking the CNT. They were wrong and, in this, history proved Durruti totally correct:

“For us it is a matter of crushing Fascism once and for all. Yes, and in spite of the Government.

“No government in the world fights Fascism to the death. When the bourgeoisie sees power slipping from its grasp, it has recourse to Fascism to maintain itself. The liberal government of Spain could have rendered the fascist elements powerless long ago. Instead it compromised and dallied. Even now at this moment, there are men in this Government who want to go easy on the rebels. You can never tell, you know — he laughed — the present Govern-

The most obvious problem, of course, was that collaboration with the state ensured that a federation of workers’ associations could not be created to co-ordinate the struggle against fascism and the social revolution. As Stuart Christie argues: “By imposing their leadership from above, these partisan committees suffocated the mushrooming popular autonomous revolutionary centres — the grassroots factory and local revolutionary committees — and prevented them from proving themselves as an efficient and viable means of co-ordinating communications, defence and provisioning. They also prevented the Local Revolutionary committees from integrating with each other to form a regional, provincial and national federal network which would facilitate the revolutionary task of social and economic reconstruction.” [We, the Anarchists!, pp. 99–100] Without such a federation, it was only a matter of time before the CNT joined the bourgeois government.

Rather than being “a regime of dual power” and the “most important” of the “new organs of power” as many Trotskyists, following Felix Morrow, maintain, the Central Committee of Anti-Fascist
I.8.13 What political lessons were learned from the revolution?

The most important political lesson learned from the Spanish Revolution is that a revolution cannot compromise with existing power structures. In this, it just confirmed anarchist theory and the basic libertarian position that a social revolution will only succeed if it follows an anarchist path and does not seek to compromise in the name of fighting a “greater evil.” As Kropotkin put it, a “revolution that stops half-way is sure to be soon defeated.” [The Great French Revolution, vol. 2, p. 553]

On the 20th of July, after the fascist coup had been defeated in Barcelona, the CNT sent a delegation of its members to meet the leader of the Catalan Government. A plenum of CNT union shop stewards, in the light of the fascist coup, agreed that libertarian communism would be postpone until Franco had been defeated (the rank and file ignored them and collectivised their workplaces). They organised a delegation to visit the Catalan president to discuss the situation:

“The delegation ... was intransigent ... Either Companys [the Catalan president] must accept the creation of a Central Committee [of Anti-Fascist Militias] as the ruling organisation or the CNT would consult the rank and file and expose the real situation to the workers. Companys backed down.” [our emphasis, Abel Paz, Durruti: The People Armed, p. 216]

The CNT committee members used their new-found influence in the eyes of Spain to unite with the leaders of other organisations/parties but not the rank and file. This process lead to the creation of the Central Committee of Anti-Fascist Militias, in which political parties as well as labour unions were represented. This committee was not made up of mandated delegates from workplaces, but the rank and file. The central committee was not permanent, its members were elected in a plenum of delegates from all the different unions of the various political parties. The central committee was not an instrument of political parties, but a political party in itself. The CNT commissioned a project to create a Central Committee of Anti-Fascist Militias, in which political parties as well as labour unions were represented. This committee was not made up of mandated delegates from workplaces, but the rank and file. The central committee was not permanent, its members were elected in a plenum of delegates from all the different unions of the various political parties. This desire to push the revolution further was not limited to Dur-ruti, as can be seen from this communication from the Catalan CNT leadership in August 1936. It also expresses the fears driving the decisions which had been made:

“Reports have also been received from other regions. There has been some talk about the impatience of some comrades who wish to go further than crushing fascism, but for the moment the situation in Spain as a whole is extremely delicate. In revolutionary terms, Catalonia is an oasis within Spain.

“Obviously no one can foresee the changes which may follow the civil war and the conquest of that part of Spain which is still under the control of mutinous reactionar-ies.” [quoted by Jose Peirats, Op. Cit., pp. 151–2]

Isolation, the uneven support for a libertarian revolution across Spain and the dangers of fascism were real problems, but they do not excuse the libertarian movement for its mistakes. The biggest of these mistakes was forgetting basic anarchist ideas and an anar-chist approach to the problems facing the Spanish people. If these ideas had been applied in Spain, the outcome of the Civil War and Revolution could have been different.

In summary, while the decision to collaborate is one that can be understood (due to the circumstances under which it was made), it cannot be justified in terms of anarchist theory. Indeed, as we argue in the next section, attempts by the CNT leadership to justify the decision in terms of anarchist principles are not convincing and cannot be done without making a mockery of anarchism.

organisation. The union plenums could and did reject the calls made by the leadership of the CNT. Support for “anti-fascist unity” was widespread among the CNT membership (in spite of the activities and arguments of large minority of anarchists) and was reflected in the policy of collaboration pursued by the organisation. While the CNT higher committees were transformed into a bureaucratic leadership, increasingly isolated from the rank and file, it cannot be argued that their power was absolute nor totally at odds with the wishes of the membership. Ironically, but unsurprisingly, the divergences from the CNT’s previous libertarian organisational principles confirmed anarchist theory, becoming a drag on the revolution and a factor in its defeat.

As we argued in section I.8.11, the initial compromise with the state, the initial betrayal of anarchist theory and CNT policy, contained all the rest. Moreover, rather than refute anarchism, the experience of the CNT after it had rejected anarchist theory confirmed it — centralised, hierarchical organisations hindered and ultimately destroyed the revolution. The experience of the CNT and FAI suggests that those, like Leninists, who argue for more centralisation and for “democratic” hierarchical structures have refused to understand, let alone learn from, history. The increased centralisation within the CNT aided and empowered the leadership (a minority) and disempowered the membership (the majority). Rather than federalism hindering the revolution, it, as always, was centralism which did so.

Therefore, in spite of a sizeable minority of anarchists within the CNT and FAI arguing against the dominant policy of “anti-fascist unity” and political collaboration, this policy was basically agreed to by the CNT membership and was not imposed upon them. The membership of the CNT could, and did, reject suggestions of the leadership and so, in spite of the centralisation of power that occurred in the CNT due to the policy of collaboration, it cannot be argued that this policy was alien to the wishes of the rank- and-file however lamentable the results of that position were.
for anti-fascist unity dominated the minds of the libertarian movement.

In the early stages, the majority of rank-and-file militants believed that the war would be over in a matter of weeks. After all, a few days had been sufficient to rout the army in Barcelona and other industrial centres. This inclined them to, firstly, tolerate (indeed, support) the collaboration of the CNT with the “Central Committee of Anti-Fascist Militias” and, secondly, to start expropriating capitalism in the belief that the revolution would soon be back on track (the opportunity to start introducing anarchist ideas was simply too good to waste, regardless of the wishes of the CNT leadership). They believed that the revolution and libertarian communism, as debated and adopted by the CNT’s Zaragoza Congress of May that year, was an inseparable aspect of the struggle against fascism and proceeded appropriately. The ignoring of the state, rather than its destruction, was seen as a short-term compromise, soon to be corrected. Sadly, there were wrong — collaboration had a logic all its own, one which got worse as the war dragged on (and soon it was too late).

Which, we must note indicates the superficial nature of most Marxist attacks on anarchism using the CNT as the key evidence. After all, it was the anarchists and anarchist influenced members of the CNT who organised the collectives, militias and started the transformation of Spanish society. They did so inspired by anarchism and in an anarchist way. To praise their actions, while attacking “anarchism”, shows a lack of logic. Indeed, these actions have more in common with anarchist ideas than the actions and rationales of the CNT leadership. Thus, to attack “anarchism” by pointing to the anti-anarchist actions of a few leaders while ignoring the anarchist actions of the majority is flawed.

Therefore, to summarise, it is clear that while the internal structure of the CNT was undermined and authoritarian tendencies increased by its collaboration with the state, the CNT was not transformed into a mere appendage to the higher committees of the or-

**I.8.11 Was the decision to collaborate a product of anarchist theory?**

Marxist critics of Anarchism point to CNT’s decision to collaborate with the bourgeois state against Franco as the key proof that libertarian socialism is flawed. Such a claim, anarchists reply, is false for rather than being the product of anarchist ideology, the decision was made in light of the immediate danger of fascism and the situation in other parts of the country. The fact is that the circumstances in which the decision to collaborate was made are rarely mentioned by Marxists. To quote a sadly typical Marxist diatribe:

“This question of state power, and which class holds it, was to prove crucial for revolutionaries during the Spanish Civil War and in particular during the revolutionary upheavals in Catalonia. Here anarchism faced its greatest test and greatest opportunity, yet it failed the former and therefore missed the latter.

“When the government in the region under the leadership of Companys admitted its impotence and offered to dissolve, effectively handing power to the revolutionary forces, the anarchists turned them down. CNT leader and FAI ... militant Garcia Oliver explained, ‘The CNT and the FAI decided on collaboration and democracy, renouncing revolutionary totalitarianism which would lead to the strangulation of the revolution by the anarchist and Confederal dictatorship. We had to choose, between Libertarian Communism, which meant anarchist dictatorship, and democracy, which meant collaboration.’ The choice was between leaving the state intact and paving the way for Franco’s victory or building a workers’ government in Catalonia which could act as a focal point for the defeat of Franco and the creation of the structures of a new workers’ state.
In choosing the former the anarchists were refusing to distinguish between a capitalist state and a workers’ state ... The movement that started by refusing to build a workers’ state ended up by recognising a capitalist one and betraying the revolution in the process.” [Pat Stack, “Anarchy in the UK?”, Socialist Review, no. 246]

There are four key flaws in this kind of argument. First, there is the actual objective situation in which the decision to collaborate was made in. Strangely, for all his talk of anarchists ignoring “material conditions” when we discuss the Russian revolution, Stack fails to mention any when he discusses Spain. As such, his critique is pure idealism, without any attempt to ground it in the objective circumstances facing the CNT and FAI. Second, the quote provided as the only evidence for Stack’s analysis dates from a year after the decision was made. Rather than reflect the actual concerns of the CNT and FAI at the time, they reflect the attempts of the leaders of an organisation which had significantly departed from its libertarian principles to justify their actions. While this obviously suits Stack’s idealist analysis of events, its use is flawed for that reason. Thirdly, clearly the decision of the CNT and FAI ignored anarchist theory. As such, it seems ironic to blame anarchism when anarchists ignores its recommendations, yet this is what Stack does. Lastly, there is the counter-example of Aragón, which clearly refutes Stack’s case.

To understand why the CNT and FAI made the decisions it did, it is necessary to do what Stack fails to do, namely to provide some context. The decision to ignore anarchist theory, ignore the state rather than smashing it and work with other anti-fascist organisations was made immediately after the army had been defeated on the streets of Barcelona on the 20th of July, 1936. As we indicated in the last section, the decision of the CNT to collaborate with the state was driven by the fear of isolation. The possibility that by declaring libertarian communism it would have had to fight the and so were not active in their unions as before, there were various groups (such as Catalan Libertarian Youth, the Friends of Durruti, other FAI groups, and so on) which were opposed to collaboration and argued their case openly in the streets, collectives, organisational meetings and so on. Moreover, outside the libertarian movement the two tiny Trotskyist groups also argued against collaboration, as did sections of the POUM. Therefore it is impossible to state that the CNT membership were unaware of the arguments against the dominant policy. Also the Catalan CNT’s higher committees, for example, after the May Days of 1937 could not get union assemblies or plenums to expel the Friends of Durruti nor to get them to withhold financial support for the Libertarian Youth, who opposed collaboration vigorously in their publications, nor get them to call upon various groups of workers to stop distributing opposition publications in the public transit system or with the daily milk. [Abe Bluestein, “Translator’s Note”, Juan Gomez Casas, Anarchist Organisation: The History of the FAI, p. 10]

This suggests that in spite of centralising tendencies, the higher committees of the CNT were still subject to some degree of popular influence and control and should not be seen as having dictatorial powers over the organisation. While many decisions were presented as fait accompli to the union plenums (often called by the committees at short notice), in violation of past CNT procedures, the plenums could not be railroaded into ratifying any decision the committees wanted. The objective circumstances associated with the war against Franco and fascism convinced most CNT members and libertarian activists that working with other parties and unions within the state was the only feasible option. Also to do otherwise, they thought, was to weaken the war effort by provoking another Civil War in the anti-Franco camp. While such a policy did not work (when it was strong enough the Republican state did start a civil war against the CNT which gutted the struggle against fascism) it cannot be argued that it was imposed upon the membership nor that they did not hear opposing positions. Sadly, the call
CNT and FAI (probably because they thought the war would be over after a few weeks or months). As visiting French anarchist Sebastian Faure noted, while “effective participation in central authority has had the approval of the majority within the unions and in the groups affiliated to the FAI, that decision has in many places encountered the opposition of a fairly substantial minority. Thus there has been no unanimity.” [quoted by Jose Peirats, The CNT in the Spanish Revolution, vol. 1, p. 183] In the words of Peirats:

“Were all of the militants of the same mind? … Excepting some vocal minorities which expressed their protests in their press organs and through committees, gatherings, plenums and assemblies, the dismal truth is that the bulk of the membership was in thrall to a certain fatalism which was itself a direct consequence of the tragic realities of the war.” [Op. Cit., p. 181]

And:

“We have already seen how, on the economic plane, militant anarchism forged ahead, undaunted, with its work of transforming the economy. It is not to be doubted — for to do so would have been to display ignorance of the psychology of the libertarian rank and file of the CNT — that a muffled contest, occasionally erupting at plenums and assemblies and manifest in some press organs broke out as soon as the backsliding began. In this connection, the body of opinion hostile to any possible deviation in tactics and principles was able to count throughout upon spirited champions.” [Op. Cit., p. 210]

Thus, within the libertarian movement, there was a substantial minority who opposed the policy of collaboration and made their opinions known in various publications and meetings. While many (if not most) revolutionary anarchists volunteered for the militias Republican government and foreign interventions as well as the military coup influenced the decision reached by the militants of Catalan anarchism. They concluded that pursuing implementing anarchism in the situation they faced would only aid Franco and result in a quick defeat.

As such, the real choice facing the CNT was not “between leaving the state intact ... or building a workers’ government in Catalonia which could act as a focal point for the defeat of Franco” but rather something drastically different: Either work with other anti-fascists against Franco so ensuring unity against the common enemy and pursue anarchism after victory or immediately implement libertarian communism and possibly face a conflict on two fronts, against Franco and the Republic (and, possibly, imperialist intervention against the social revolution). This situation made the CNT-FAI decided to collaborate with other anti-fascist groups in the Catalan Central Committee of Anti-Fascist Militias. To downplay these objective factors and the dilemma they provoked and instead simply blame the decision on anarchist politics is a joke.

Similarly, the Garcia Oliver quote provided by Stack dated from July 1937. They were made as justifications of CNT-FAI actions and were designed for political effect. As such, they simply cannot be taken at face value for these two reasons. It is significant, though, that rather than discuss the actual problems facing the CNT Marxists like Stack prefer to ritualistically trot out a quote made over a year later. They argue that it exposes the bankruptcy of anarchist theory. So convinced of this, they rarely bother discussing the problems facing the CNT after the defeat of the military coup nor do they compare these quotes to the anarchist theory they claim inspired them.

There are good reasons for this. Firstly, if they presented the objective circumstances the CNT found itself it then their readers may see that the decision, while wrong, is understandable and had nothing to do with anarchist theory. Secondly, by comparing this
quote to anarchist theory their readers would soon see how at odds
they are with each other. Indeed, Garcia Oliver invoked anarchism
to justify conclusions that were the exact opposite to what that
theory actually recommends!

So what can be made of Garcia Oliver’s argument? As Abel Paz
noted ”[i]t is clear that the explanations given ... were designed for
their political effect, hiding the atmosphere in which these decisions
were taken. These declarations were made a year later when the CNT
were already far removed from their original positions. It is also the
period when they had become involved in the policy of collaboration
which led to them taking part in the Central Government. But in a
certain way they shed light on the unknown factors which weighted
so heavily on these who took part in the historic Plenum.” [Durruti:
The People Armed, p. 215]

For example, when the decision was made, the revolution had
not started yet. The street fighting had just ended and the Plenum
decided “not to speak about Libertarian Communism as long as part
of Spain was in the hands of the fascists.” [Mariano R. Vesquez,
quoted by Paz, Op. Cit., p. 214] The revolution took place from be-
low in the days following the decision, independently of the wishes
of the Plenum. In the words of Abel Paz:

“...when the workers reached their workplaces ... they
found them deserted ... The major centres of production
had been abandoned by their owners ... The CNT and
its leaders had certainly not foreseen this situation; if
they had, they would have given appropriate guidance
to the workers when they called off the General Strike
and ordered a return to work. What happened next was
the result of the workers’ spontaneous decision to take
matters into their own hands.

“Finding the factories deserted, and no instructions from
their unions, they resolved to operate the machines them-

cision to collaborate on their memberships (as, for example, Vernon
Richards seems to imply in his Lessons of the Spanish Revolu-
tion). While it is true that the committees presented many deci-
sions as a fait accompli the rank-and-file of the CNT and FAI did
not simply follow orders nor ratify all of the decisions blindly.

In any revolutionary situation decisions have to be made quickly
and sometimes without consulting the base of the organisation.
However, such decisions must be accountable to the membership
who must discuss and ratify them (this was the policy within the
CNT militias, for example). The experience of the CNT and FAI
in countless strikes, insurrections and campaigns had proven the
decimalised, federal structure was more than capable of pursuing
the class war — revolution is no exception as it is the class war
in its most concentrated form. In other words, the organisational
principles of the CNT and FAI were more than adequate for a rev-
olutionary situation.

The centralising tendencies, therefore, cannot be blamed on the
exceptional circumstances of the war. Rather, it was the policy of
collaboration which explains them. Unlike the numerous strikes
and revolts that occurred before July 19th, 1936, the CNT higher
committees had started to work within the state structure. This,
by its very nature, must generate hierarchical and centralising ten-
dencies as those involved must adapt to the state’s basic structure
and form. The violations of CNT policy flowed from the initial de-
cision to compromise in the name of “anti-fascist unity” and a vicious
circle developed — each compromise pushed the CNT leadership
further into the arms of the state, which increased hierarchical ten-
dencies, which in turn isolated these higher committees from the
membership, which in turn encouraged a conciliatory policy by
those committees.

This centralising and hierarchical tendency did not mean that
the higher committees of the CNT simply imposed their will on
the rest of the organisation. It is very clear that the decision to
collaborate had, initially, the passive support of the majority of the
or local levels. In both instances, sovereignty resided always with the assemblies of workers whether in their unions or in their groups.

“...This sense of rigorous, everyday federalist procedure was abruptly amended from the very outset of the revolutionary phase... This amendment of the norms of the organisation was explained away by reference to the exceptional turn of events, which required a greater agility of decisions and resolutions, which is to say a necessary departure from the circuitous procedures of federalist practice which operated from the bottom upwards.” [The CNT in the Spanish Revolution, vol. 1, p. 213]

In other words, the CNT had become increasingly hierarchical, with the higher committees becoming transformed into executive bodies rather than administrative ones as “it is safe to assert that the significant resolutions in the organisation were adopted by the committees, very rarely by the mass constituency. Certainly, circumstances required quick decisions from the organisation, and it was necessary to take precautions to prevent damaging leaks. These necessities tempted the committees to abandon the federalist procedures of the organisation.” [Jose Peirats, Anarchists in the Spanish Revolution, p. 188]

Ironically, rather than the “anarchist leaders” of the CNT failing to “seize power” as Trotsky and his followers lament (see last section), they did — in their own organisations. Such a development proved to be a disaster and re-enforced the anarchist critique against hierarchical and centralised organisations. The CNT higher committees became isolated from the membership, pursued their own policies and compromised and paralysed the creative work being done by the rank and file — as predicted in anarchist theory. However, be that as it may, as we will indicate below, it would be false to assert that these higher committees simply imposed the de-

The rank and file of the CNT, on their own initiative, took advantage of the collapse of state power to transform the economy and social life of Catalonia. Paz stressed that “no orders were given for expropriation or collectivisation — which proved that the union, which represented the will of their members until July 18th, had now been overtaken by events” and the “union leaders of the CNT committees were confronted with a revolution that they had not foreseen ... the workers and peasants had bypassed their leaders and taken collective action.” [Op. Cit., p. 40 and p. 56] As historian Ronald summarises the “revolutionary initiative had sprung not from the CNT’s leading committees — how could it when the libertarian revolution had been officially ‘postponed’? — but from individual CNT unions impelled by the most advanced syndicalist militants.” So while the Catalan CNT “had ‘put off’ libertarian revolution ... daily, the revolution in Barcelona was taking root in CNT collectives and union-run industries.” [Blood of Spain, p. 139 and p. 179]

As the revolution had not yet begun and the CNT Plenum had decided not to call for its start, it is difficult to see how “libertarian communism” (i.e. the revolution) could “lead to the strangulation of the revolution” (i.e. libertarian communism). In other words, this particular rationale put forward by Garcia Oliver could not reflect the real thoughts of those present at the CNT plenum and so, obviously, was a later justification for the CNT’s actions. Moreover, the decision made then clearly stated that Libertarian Communism would be back on the agenda once Franco was defeated. Oliver’s comments were applicable after Franco was defeated just as much as on July 20th, 1936.

Similarly, Libertarian Communism is based on self-management, by its nature opposed to dictatorship. According to the CNT’s resolution at its congress in Zaragoza in May, 1936, “the foundation of this administration will be the Commune” which is “autonomous” and “federated at regional and national levels.” The commune “will undertake to adhere to whatever general norms [that] may be agreed by majority vote after free debate.” [quoted by Jose Peirats, The
So, to conclude, rather than show the failure of anarchism, the experience of the Spanish Revolution indicates the failure of anarchists to apply their ideas in practice. Faced with extremely difficult circumstances, they compromised their ideas in the name of anti-fascist unity. Their compromises confirmed rather than refuted anarchist theory as they led to the defeat of both the revolution and the civil war.

I.8.12 Was the decision to collaborate imposed on the CNT’s membership?

A few words have to be said about the development of the CNT and FAI after the 19th of July, 1936. It is clear that both changed in nature and were not the same organisations as they were before that date. Both organisations became more centralised and bureaucratic, with the membership excluded from many major decisions. As Peirats suggested:

“In the CNT and among militant anarchists there had been a tradition of the most scrupulous respect for the deliberations and decisions of the assemblies, the grassroots of the federalist organisation. Those who held administrative office had been merely the mandatories of those decisions. The regular motions adopted by the National congresses spelled out to the Confederation and its representative committees ineluctable obligations of a basic and general nature incumbent upon very affiliated member regardless of locality or region. And the forming of such general motions was the direct responsibility of all of the unions by means of motions adopted at their respective general assemblies. Similarly, the Regional or Local Congresses would establish the guidelines of requirement and problems that obtained only at regional...
party *over* the working class. Rather than the working class being “central” to the running of a revolutionary regime, Trotsky saw the party taking that position. What sort of “victory” is possible when the party has dictatorial power over the working class and the “sovereign ruler” of society? Simply the kind of “victory” that leads to Stalinism. Rather than seeing working class organisations as the means by which working people run society, Leninists see them purely in instrumental terms — the means by which the party can seize power. As the Russian Revolution proved beyond doubt, in a conflict between workers’ power and party power Leninists will suppress the former to ensure the latter.

To paraphrase Stack, the most important lesson from both the Russian and Spanish revolutions is that whatever ideals and gut instincts individual Leninists may have, Leninism, both in word and deed, fails to provide a roadworthy vehicle for human liberation. Only Anarchism, which sees the centrality of the working class self-management of the class struggle and revolution, is capable of ensuring the creation of a real, free, socialist society.

Lastly, it could be argued that our critique of the standard Leninist attack on Spanish anarchism is similar to that presented by Leninists to justify Bolshevik authoritarianism during the Russian Revolution. After all, Leninists like Stack point to the objective circumstances facing Lenin’s regime — its isolation, civil war and economic problems — as explaining its repressive actions. Yet any similarity is superficial as the defeat of the Revolution in Spain was due to anarchists **not** applying our ideas whole, while, in Russia, it was due to the Bolsheviks **applying** their ideology. The difficulties that faced the Russian Revolution pushed the Bolsheviks further down the road they where already travelling down (not to mention that Bolshevik ideology significantly contributed to making many of these problem worse). As we discuss in section H.6, the notion that “objective circumstances” explains Bolshevik tyranny is simply unconvincing, particularly given the role Bolshevik ideology played in this process.

Thus anarchism has always been clear on what to do with the state, and it is obviously not what the CNT did to it! The CNT ignored these recommendations and so given that it did **not** destroy the Spanish Anarchists or the failings of anarchism suggests an extremely superficial perspective. This is particularly the case when we look at both the history of the CNT and anarchist theory. This can clearly been seen from the report made by the CNT to the **International Workers Association** to justify the decision to forget anarchist theory and collaborate with bourgeois parties and join the government. The report states that “the CNT, loyal to its ideals and its purely anarchist nature, did not attack the forms of the State, nor try publicly to penetrate or dominate it ... none of the political or juridical institutions were abolished.” [quoted by Robert Alexander, *The Anarchists in the Spanish Civil War*, vol. 2, p. 1156] In other words, according to this report, “anarchist” ideas do not, in fact, mean the destruction of the state, but rather the **ignoring** of the state. That this is nonsense, concocted to justify the CNT leaderships’ betrayal of its ideals, is clear. To prove this we just need to look at Bakunin and Kropotkin and look at the activities of the CNT **before** the start of the war.

According to anarchist ideas, to quote Bakunin, “*the revolution must set out from the first to radically and totally destroy the State*” and that the “*natural and necessary consequence of this destruction*” will include the “*dissolution of army, magistracy, bureaucracy, police and priesthood*” as well as the “*confiscation of all productive capital and means of production on behalf of workers’ associations, who are to put them to use*”. The state would be replaced by “*the federative Alliance of all working men’s associations*” which “*will constitute the Commune.*” These communes, in turn, would “*constitute the federation of insurgent associations ... and organise a revolutionary force capable of defeating reaction.*” [Michael Bakunin: *Selected Writings*, pp. 170–1] For Kropotkin, the “*Commune ... must break the State and replace it by the Federation.*” [Words of a Rebel, p. 83]
the state, nor create a federation of workers’ councils, then how can anarchist theory be blamed? It seems strange to point to the failure of anarchists to apply their politics as an example of the failure of those politics, yet this is what the likes of Stack are doing.

Nor had the CNT always taken this perspective. Before the start of the Civil War, the CNT had organised numerous insurrections against the state. For example, in the spontaneous revolt of CNT miners in January 1932, the workers “seized town halls, raised the black-and-red flags of the CNT, and declared communismo libertario.” In Tarassa, the same year, the workers again “seiz[ed] town halls” and the town was “swept by street fighting.” The revolt in January 1933 began with “assaults by Anarchist action groups … on Barcelona’s military barracks … Serious fighting occurred in working-class barrios and the outlying areas of Barcelona … Uprising occurred in Tarassa, Sardanola-Ripollet, Lerida, in several pueblos in Valencia province, and in Andalusia.” In December 1933, the workers “reared barricades, attacked public buildings, and engaged in heavy street fighting … many villages declared libertarian communism.” [Murray Bookchin, The Spanish Anarchists, p. 225, p. 226, p. 227 and p. 238]

It seems that the CNT leadership’s loyalty to “its ideals and its purely anarchist nature” which necessitated “not attack[ing] the forms of the State” was a very recent development!

As can be seen, the rationales later developed to justify the betrayal of anarchist ideas and the revolutionary workers of Spain have no real relationship to anarchist theory. They were created to justify a non-anarchist approach to the struggle against fascism, an approach based on ignoring struggle from below and instead forging alliances with parties and unions at the top. This had been not always been the case. Throughout the 1930s the UGT and Socialist Party had rejected the CNT’s repeated calls for a revolutionary alliance from below in favour of a top-down “Workers’ Alliance” which, they believed, would be the only way which would allow them to control the labour movement. The CNT, rightly, rejected

gests that he simply has no appreciation of the dynamics of the Spanish Revolution and prefers abstract sloganeering to a serious analysis of the problems facing it. He ends by summarising:

“The most important lesson … is that whatever ideals and gut instincts individual anarchists may have, anarchism, both in word and deed, fails to provide a roadworthy vehicle for human liberation. Only Marxism, which sees the centrality of the working class under the leadership of a political party, is capable of leading the working class to victory.” [Op. Cit.]

As a useful antidote to these claims, we need simply quote Trotsky on what the Spanish anarchists should have done. In his words: “Because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.” Hardly an example of “workers’ power”! Or, as he put it earlier in the same year, a “revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.” Ultimately, it was the case that the failure of the Spanish Revolution confirmed for Trotsky the truism that the “revolutionary dictatorship of a proletarian party … is an objective necessity … The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution.” Rather than seeing, as anarchist do, workers’ councils as being key, Trotsky considered the party, in fact the “dictatorship of a party”, as being the decisive factor. [our emphasis, Writings of Leon Trotsky 1936–37, p. 514, p. 488 and pp. 513–4] At best, such organs would be used to achieve party power and would simply be a fig-leaf for its rule (see section H.3.8).

Clearly, the leading Marxist at the time was not arguing for the “centrality of the working class under the leadership of a political party.” He was arguing for the dictatorship of a “revolutionary”
the Friends of Durutti [sic!]. As [Trotskyist] Felix Morrow points out, ‘They represented a conscious break with the anti-statism of traditional anarchism. They explicitly declared the need for democratic organs of power, juntas or soviets, in the overthrow of capitalism, and the necessary state measures of repression against the counter-revolution.’ The failure of the Spanish anarchists to understand exactly that these were the stark choices, workers’ power, or capitalist power followed by reaction.” [Op. Cit.]

That Stack could not bother to spell Durruti’s name correctly shows how seriously we should take this analysis. The FoD were an anarchist grouping within the CNT and FAI which, like a large minority of others, strongly and consistently opposed the policy of anti-fascist unity. Rather than signify a “conscious break” with anarchism, it signified a conscious return to it. This can be clearly seen when we compare their arguments to those of Bakunin. As noted by Stack, the FoD argued for “juntas” in the overthrow of capitalism and to defend against counter-revolution. Yet this was exactly what revolutionary anarchists have argued for since Bakunin (see section H.2.1 for details). The continuity of the ideas of the FoD with the pre-Civil War politics of the CNT and the ideas of revolutionary anarchism are clear. As such, the FoD were simply arguing for a return to the traditional positions of anarchism and cannot be considered to have broken with it. If Stack or Morrow knew anything about anarchism, then they would have known this.

As such, the failure of the Spanish anarchists was not the “stark choice” between “workers’ power” and “capitalist power” but rather the making of the wrong choice in the real dilemma of introducing anarchism (which would, by definition, be based on workers’ power, organisation and self-management) or collaborating with other anti-fascist groups in the struggle against the greater enemy of Franco (i.e. fascist reaction). That Stack does not see this sug-

such a position in favour of an alliance from the bottom up yet, in July 1936, the need for unity was obvious and the UGT was not changing its position. So while in Barcelona the state has been destroyed in all but name, “in Madrid, thanks to the Socialist Party, bourgeois structures were left intact and even fortified: a semi-dead state received a new lease of life and no dual power was created to neutralise it.” [Abel Paz, Durruti in the Spanish Revolution, p. 462]

Rather than trying to cement a unity with other organisations at the top level in July 1936, the leadership of the CNT should have applied their anarchist ideas by inciting the oppressed to enlarge and consolidate their gains (which they did anyway). This would have liberated all the potential energy within the country (and elsewhere), energy that clearly existed as can be seen from the spontaneous collectivisations that occurred after the fateful Plenum of July 20th and the creation of volunteer workers’ militia columns sent to liberate those parts of Spain which had fallen to Franco.

The role of anarchists, therefore, was that of “inciting the people to abolish capitalistic property and the institutions through which it exercises its power for the exploitation of the majority by a minority” and “to support, to incite and encourage the development of the social revolution and to frustrate any attempts by the bourgeois capitalist state to reorganise itself, which it would seek to do.” This would involve “seeking to destroy bourgeois institutions through the creation of revolutionary organisms.” [Vernon Richards, Lessons of the Spanish Revolution, p. 44, p. 46 and p. 193] In other words, to encourage, the kind of federation of communities and workplaces Bakunin and Kropotkin had called for.

Indeed, such an organisation already existing in embryo in the CNT’s barrios defence committees which had led and co-ordinated the struggle against the military coup throughout Barcelona. “The Neighbourhood Committees, which had diverse names but all shared a libertarian outlook, federated and created a revolutionary Local Co-ordination Committee.” They “became Rev-
olutionary Committees and formed what was called the ‘Federation of Barricades.’ It was the Committees that held power in Barcelona that evening.” [Paz, Op. Cit., p. 470 and p. 445] Rather than collaborate with political parties and the UGT at the top, in the Central Committee of Anti-Fascist Militias, the CNT should have developed these organs of community self-organisation:

“Power lay in the street on July 20, represented by the people in arms … Life took on a new momentum and it both destroyed and created as the people worked to resolve practical necessities born from a collective life that lived — and wanted to continue living — in the street … The street and the people in arms were the living force of the revolution … The Defence Committees, now transformed into Revolutionary Committees, back up this force. They organised what was called the ‘Federation of Barricades.’ Militants, standing resolutely behind these barricades, represented them in the Revolutionary Committees.” [Paz, Op. Cit., pp. 450–1]

Later, a delegate meeting from the various workplaces (whether previously unionised or not) would have had to be arranged to organise, to re-quote Bakunin, “the federal Alliance of all working men’s associations” which would “constitute the Commune” and complement the “federation of the barricades.” [Op. Cit., p. 170] In more modern terminology, a federation of workers’ councils combined with a federation of workers’ militias and community assemblies. Without this, the revolution was doomed as was the war against Franco. A minority of anarchists did see this genuinely libertarian solution at the time, but sadly they were a minority. For example, the members of the Nosotros Group, which included Durruti, thought “it was necessary to transcend the alliance between the CNT and the political parties and create an authentic revolutionary organisation. That organisation would rest directly on Barcelona’s how could anarchism have “failed” during the Spanish Revolution when it was ignored in Catalonia (for fear of fascism) and applied in Aragón? How can it be argued that anarchist politics were to blame when those very same politics had formed the Council of Aragón? It cannot. Simply put, the Spanish Civil War showed the failure of certain anarchists to apply their ideas in a difficult situation rather than the failure of anarchism. As Emma Goldman argued, the “contention that there is something wrong with Anarchism … because the leading comrades in Spain failed Anarchism seems to be very faulty reasoning … the failure of one or several individuals can never take away from the depth and truth of an ideal.” [Vision on Fire, p. 299]

To use the Catalan CNT to generalise about anarchism is false as it, firstly, requires a dismissal of the objective circumstances the decision was made in and, secondly, it means ignoring anarchist theory and history. It also gives the impression that anarchism as a revolutionary theory must be evaluated purely from one event in its history. The experiences of the Makhnovists in the Ukraine, the USI and UAI in the factory occupations of 1920 and fighting fascism in Italy, the insurrections of the CNT during the 1930s, the Council of Aragón created by the CNT in the Spanish Revolution and so on, are all ignored. Hardly convincing, although handy for Marxists. As is clear from, for example, the experiences of the Makhnovists and the Council of Aragón, that anarchism has been applied successfully on a large scale, both politically and economically, in revolutionary situations.

Equally flawed are any attempts to suggest that those anarchists who remained true to libertarian theory somehow, by so doing, rejected it and moved towards Marxism. This is usually done to the anarchist group the Friends of Durruti (FoD). In the words of Pat Stack:

“Interestingly the one Spanish anarchist group that developed the most sophisticated critique of all this was
columns which would leave Aragón as the war evolved. They needed to co-ordinate themselves, although he also warned themselves an anti-fascist political front like the type existing in other parts of Spain. They needn’t make the same error as their compatriots elsewhere … The popular assembly must be sovereign.” After a CNT regional assembly militants decided to “form the Aragón Defence Council and the Aragón Federation of Collectives.” [Paz, Op. Cit., pp. 540–1] This exposes as false the claim that anarchism failed during the Spanish Civil War. In Aragón, the CNT did follow the ideas of anarchism, abolishing both the state and capitalism. If they had done this in Catalonia, the outcome of the Civil War may have been different.

The continuity of what happened in Aragón with the ideas of anarchism and the CNT’s 1936 Zaragoza Resolution on Libertarian Communism is obvious. The formation of the Regional Defence Council was an affirmation of commitment to the principles of libertarian communism. This principled stand for revolutionary social and economic change stands at odds with the claims that the Spanish Civil War indicates the failure of anarchism. After all, as we will see, the CNT-FAI organised along those lines in Aragón.

Concern that Catalonia would be isolated from the rest of the Republic was foremost in the minds of many in the CNT and FAI. The fear that if libertarian communism was implemented then a civil war within the anti-fascist forces would occur (so aiding Franco) was a real one. Unfortunately, the conclusion draw from that fear, namely to win the war against Franco before talking about the revolution, was the wrong one. After all, a civil war within the Republican side did occur, when the state had recovered enough to start it. Similarly, with the fear of a blockade by foreign governments. This happened away, confirming the analysis of activists like Durruti.

Organising a full and proper delegate meeting in the first days of the revolution would have allowed all arguments and suggestions to be discussed by the whole membership of the CNT and, perhaps, a different decision may have been reached on the subject of collaboration. After all, many CNT members were applying anarchist politics by fighting fascism via a revolutionary war. This can be seen by the rank and file of the CNT and FAI ignoring the decision to “postpone” the revolution in favour of an anti-fascist war. All across Republican Spain, workers and peasants started to expropriate capital and the land, placing it under workers’ self-management. They did so on their own initiative. It is also possible, as discussed in the next section, that anti-fascist unity would have prevailed and so the some decision would have been reached.

Be that as it may, by thinking they could postpone the revolution until after the war, the CNT leadership made two mistakes. Firstly, they should have known that their members would hardly miss
this opportunity to implement libertarian ideas so making their decision redundant (and a statist backlash inevitable). Secondly, they abandoned their anarchist ideas, failing to understand that the struggle against fascism would never be effective without the active participation of the working class. Such participation could never be achieved by placing the war before the revolution and by working in top-down, statist structures or within a state.

Indeed, the mistake made by the CNT, while understandable, cannot be justified given that their consequences had been predicted by numerous anarchists beforehand, including Kropotkin. Decades earlier in an essay on the Paris Commune, the Russian anarchist refuted the two assumptions of the CNT leadership — first, of placing the war before the revolution and, second, that the struggle could be waged by authoritarian structures or a state. He explicitly attacked the mentality and logic of those who argued “Let us first make sure of victory, and then see what can be done”:

“Make sure of victory! As if there were any way of transforming society into a free commune without laying hands upon property! As if there were any way of defeating the enemy so long as the great mass of the people is not directly interested in the triumph of the revolution, in witnessing the arrival of material, moral and intellectual well-being for all! They sought to consolidate the Commune first of all while postponing the social revolution for later on, while the only effective way of proceeding was to consolidate the Commune by the social revolution!” [Words of a Rebel, p. 97]

Kropotkin’s argument was sound, as the CNT discovered. By waiting until victory in the war they were defeated (as Abel Paz suggested, the workers of Spain “had to build a new world to secure and defend their victory.” [Op. Cit., p. 451]). Kropotkin also indicated the inevitable effects of the CNT’s actions in co-operating with the state and joining representative bodies:

“Paris … sent her devoted sons to the Hotel-de-Ville [town hall]. Indeed, immobilised there by fetters of red tape, forced to discuss when action was needed, and losing the sensitivity that comes from continual contact with the masses, they saw themselves reduced to impotence. Paralysed by their distancing from the revolutionary centre — the people — they themselves paralysed the popular initiative.” [Op. Cit., pp. 97–8]

Which, in a nutshell, was what happened to the leading militants of the CNT who collaborated with the state. Kropotkin was proved right, as was anarchist theory from Bakunin onwards. As Vernon Richards argued, “there can be no excuse” for the CNT’s decision, as “they were not mistakes of judgement but the deliberate abandonment of the principles of the CNT.” [Op. Cit., pp. 41–2] It seems difficult to blame anarchist theory for the decisions of the CNT when that theory argues the opposite position. That enemies of anarchism quote Garcia Oliver’s words from 1937 to draw conclusions about anarchist theory says more about their politics than about anarchism!

Moreover, while the experience of Spain confirms anarchist theory negatively, it also confirms it positively by the creation of the Regional Defence Council of Aragón. The Council of Aragón was created by a meeting of delegates from CNT unions, village collectives and militia columns to protect the new society based on libertarian communism the people of Aragón were building. The meeting also decided to press for the setting up of a National Defence Committee which would link together a series of regional bodies that were organised on principles similar to the one now established in Aragón. Durruti stressed that the collectives “had to build their own means of self-defence and not rely on the libertarian

History supports Bakunin’s arguments, as it indicates that any attempt at taking social and economic issues into political parties has resulting in wasted energy and their watering down into, at best, reformism and, at worse, the simple ignoring of them by politicians once in office (see section J.2.6). Only by rejecting the artificial divisions of capitalist society can we remain true to our ideals of liberty, equality and solidarity. Every example of radicals using electioneering has resulted in them being changed by the system instead of them changing it. They have become dominated by capitalist ideas and activity (what is usually termed “realistic” and “practical”) and by working within capitalist institutions they have, to use Bakunin’s words, “filled in at a single stroke the abyss ... between the proletariat and the bourgeoisie” that economic and social struggle creates and, worse, “have tied the proletariat to the bourgeois towline.” [Op. Cit., p. 290]

In addition, so-called “economic” struggles do not occur in a vacuum. They take place in a social and political context and so, necessarily, there can exist an separation of political and economic struggles only in the mind. Strikers or eco-warriors, for example, face the power of the state enforcing laws which protect the power of employers and polluters. This necessarily has a “political” impact on those involved in struggle. By channelling any “political” conclusions drawn by those involved in struggle into electoral politics, this development of political ideas and discussion will be distorted into discussions of what is possible in the current system, and so the radical impact of direct action and social struggle is weakened. Given this, is it surprising that anarchists argue that the people “must organise their powers apart from and against the State.” [Bakunin, The Political Philosophy of Bakunin, p. 376]

To conclude, anarchists are only “apolitical” about bourgeois elections and the dubious liberty and benefits associated with pick-serting their autonomy and disgust at an unfair system. As Howard Zinn stresses:

“Both the source and the solution of our civil liberties problems are in the situations of every day: where we live, where we work, where we go to school, where we spend most of our hours. Our actual freedom is not determined by the Constitution or by [the Supreme] Court, but by the power the policeman has over us in the street or that of the local judge behind him; by the authority of our employers [if we are working]; by the power of teachers, principals, university president, and boards of trustees if we are students; by the welfare bureaucracy if we are poor [or unemployed]; by prison guards if we are in jail; by landlords if we are tenants; by the medical profession or hospital administration if we are physically or mentally ill.

“Freedom and justice are local things, at hand, immediate. They are determined by power and money, whose authority over our daily lives is much less ambiguous than decisions of the Supreme Court. Whatever claim we ... can make to liberty on the national level ... on the local level we live at different times in different feudal fiefdoms where our subordination is clear.” [Failure to Quit, pp. 53–4]

These realities of wealth and power will remain unshaken unless counter-forces appear on the very ground our liberty is restricted — on the street, in workplaces, at home, at school, in hospitals and so on. For the “only limit to the oppression of government is the power with which people show themselves capable of opposing it.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 196]

Social struggles for improvements are also important indications of the spirit of revolt and of people supporting each other in the
continual assertion of their (and our) freedom. They show people standing up for what they consider right and just, building alternative organisations, creating their own solutions to their problems—and are a slap in the face of all the paternal authorities which dare govern us. Hence their importance to anarchists and all people interested in extending freedom.

In addition, social struggle helps break people from their hierarchical conditioning. Anarchists view people not as fixed objects to be classified and labelled, but as human beings engaged in making their own lives. We live, love, think, feel, hope, dream, and can change ourselves, our environment and social relationships. Social struggle is the way this is done collectively. Such struggle promotes attributes within people which are crushed by hierarchy (attributes such as imagination, organisational skills, self-assertion, self-management, critical thought, self-confidence and so on) as people come up against practical problems in their struggles and have to solve them themselves. This builds self-confidence and an awareness of individual and collective power. By seeing that their boss, the state and so on are against them they begin to realise that they live in a class ridden, hierarchical society that depends upon their submission to work. As such, social struggle is a politicising experience.

Struggle allows those involved to develop their abilities for self-rule through practice and so begins the process by which individuals assert their ability to control their own lives and to participate in social life directly. These are all key elements of anarchism and are required for an anarchist society to work (“Self-management of the struggle comes first, then comes self-management of work and society” [Alfredo Bonnano, “Self-Management”, pp. 35–37, Anarchist: A Journal of Desire Armed, no. 48, p. 35]). So self/activity is a key factor in self-liberation, self-education and the creating of anarchists. In a nutshell, people learn in struggle:

Such an argument just reproduces the artificially created division of labour between mental and physical activity of capitalism within working class organisations and within anti-capitalist movements. We say that we should not separate out politics into some form of specialised activity that only certain people (i.e. our “representatives”) can do. Instead, anarchists argue that political struggles, ideas and debates must be brought into the social and economic organisations of our class where they must be debated freely by all members as they see fit and that political and economic struggle and change must go hand in hand. Rather than being something other people discuss on behalf of working class people, anarchists, argue that politics must no longer be in the hands of so-called experts (i.e. politicians) but instead lie in the hands of those directly affected by it. Also, in this way the social struggle encourages the political development of its members by the process of participation and self-management.

In other words, political issues must be raised in economic and social organisations and discussed there, where working class people have real power. As Bakunin put it, “the proletariat itself will pose” political and philosophical questions in their own organisations and so the political struggle (in the widest scene) will come from the class struggle, for “[w]ho can entertain any doubt that out of this ever-growing organisation of the militant solidarity of the proletariat against bourgeois exploitation there will issue forth the political struggle of the proletariat against the bourgeoisie?” Anarchists simply think that the “policy of the proletariat” should be “the destruction of the State” rather than working within it and we argue for a union of political ideas and social organisation and activity. This is essential for promoting radical politics as it “digs a chasm between the bourgeoisie and the proletariat and places the proletariat outside the activity and political conniving of all parties within the State … in placing itself outside all bourgeois politics, the proletariat necessarily turns against it.” So, by “placing the proletariat outside the politics in the State and of the bourgeois world, [the working class
as such which distinguishes the Anarcho-Syndicalist from the modern labour parties, both in principle and tactics, but the form of this struggle and the aims which it has in view ... their efforts are also directed, even today, at restricting the activities of the state ... The attitude of Anarcho-Syndicalism towards the political power of the present-day state is exactly the same as it takes towards the system of capitalist exploitation” and “pursue the same tactics in their fight against ... the state.” [Op. Cit., pp. 73–4]

As historian Bob Holton suggests, the notion that syndicalism is apolitical “is certainly a deeply embedded article of faith among those marxists who have taken Lenin’s strictures against syndicalism at face value. Yet it bears little relation to the actual nature of revolutionary industrial movements ... Nor did syndicalists neglect politics and the state. Revolutionary industrial movements were on the contrary highly ‘political’ in that they sought to understand, challenge and destroy the structure of capitalist power in society. They quite clearly perceived the oppressive role of the state whose periodic intervention in industrial unrest could hardly have been missed.” For example, the “vigorous campaign against the ‘servile state’ certainly disproves the notion that syndicalists ignored the role of the state in society. On the contrary, their analysis of bureaucratic state capitalism helped to make considerable inroads into prevailing Labourist and state socialist assumptions that the existing state could be captured by electoral means and used as an agent of through-going social reform.” [British Syndicalism, 1900–1914, pp. 21–2 and p. 204]

Thus anarchism is not indifferent to or ignores political struggles and issues. Rather, it fights for political change and reforms as it fights for economic ones — by direct action and solidarity. If anarchists “reject any participation in the works of bourgeois parliaments, it is not because they have no sympathy with political struggles in general, but because they are firmly convinced that parliamentary activity is for the workers the very weakest and most hopeless form of the political struggle.” [Rocker, Op. Cit., p. 76] Anarchists reject the idea that political and economic struggles can be divided.

“In our opinion all action which is directed toward the destruction of economic and political oppression, which serves to raise the moral and intellectual level of the people; which gives them an awareness of their individual rights and their power, and persuades them themselves to act on their own behalf ... brings us closer to our ends and is therefore a good thing. On the other hand all activity which tends to preserve the present state of affairs, that tends to sacrifice man against his will for the triumph of a principle, is bad because it is a denial of our ends. [Malatesta, Op. Cit., p. 69]

A confident working class is an essential factor in making successful and libertarian improvements within the current system and, ultimately, in making a revolution. Without that self-confidence people tend to just follow “leaders” and we end up changing rulers rather than changing society. So part of our job as anarchists is to encourage people to fight for whatever small reforms are possible at present, to improve our/their conditions, to give people confidence in their ability to start taking control of their lives, and to point out that there is a limit to whatever (sometimes temporary) gains capitalism will or can concede. Hence the need for a revolutionary change.

Only this can ensure that anarchist ideas are the most popular ones for if we think a movement is, all things considered, a positive or progressive one then we should not abstain but should seek to popularise anarchist ideas and strategies within it. In this way we create “schools of anarchy” within the current system and lay the foundations of something better. Revolutionary tendencies and movements, in other words, must create the organisations that contain, in embryo, the society of the future (see section H.1.6). These organisations, in turn, further the progress of radical change by providing social spaces for the transformation of individuals (via the use of direct action, practising self-management and solidar-
ity, and so on). Therefore, social struggle aids the creation of a free society by accustoming people to govern themselves within self-managed organisations and empowering the (officially) disempowered via the use of direct action and mutual aid.

Hence the importance of social (or class) struggle for anarchists (which, we may add, goes on all the time and is a two-sided affair). Social struggle is the means of breaking the normality of capitalist and statist life, a means of developing the awareness for social change and the means of making life better under the current system. The moment that people refuse to bow to authority, its days are numbered. Social struggle indicates that some of the oppressed see that by using their power of disobedience they can challenge, perhaps eventually end, hierarchical power.

Ultimately, anarchy is not just something you believe in, it is not a cool label you affix to yourself, it is something you do. You participate. If you stop doing it, anarchy crumbling. Social struggle is the means by which we ensure that anarchy becomes stronger and grows.

J.1.2 Are anarchists against reforms?

No, we are not. While most anarchists are against reformism (namely the notion that we can somehow reform capitalism and the state away) we are most definitely in favour of reforms (i.e. improvements in the here and now). Anarchists are radicals; as such, we seek the root causes of societal problems. Reformists seek to ameliorate the symptoms of societal problems, while anarchists focus on the causes.

This does not mean, however, that we ignore struggles for reforms in the here and now. The claim that anarchists are against such improvements are often put forth by opponents of anarchism in an effort to paint us as irrelevant extremists with no practical outlet for our ideas beyond abstract calls for revolution. This is not the threatened interests of the possessing classes. It would, therefore, be absurd for them to overlook the importance of the political struggle. Every event that affects the life of the community is of a political nature. In this sense every important economic action ... is also a political action and, moreover, one of incomparably greater importance than any parliamentary proceeding.” In other words, “just as the worker cannot be indifferent to the economic conditions of his life in existing society, so he cannot remain indifferent to the political structure of his country. Both in the struggle for his daily bread and for every kind of propaganda looking towards his social liberation he needs political rights and liberties, and he must fight for these himself with all his strength whenever the attempt is made to wrest them from him.” So the “focal point of the political struggle lies, then, not in the political parties, but in the economic [and social] fighting organisations of the workers.” [Rocker, Op. Cit., p. 77, p. 74 and p. 77] Hence the comments in the CNT’s newspaper Solidaridad Obrera:

“Does anyone not know that we want to participate in public life? Does anyone not know that we have always done so? Yes, we want to participate. With our organisations. With our papers. Without intermediaries, delegates or representatives. No. We will not go to the Town Hall, to the Provincial Capitol, to Parliament.” [quoted by Jose Pierats, Anarchists in the Spanish Revolution, p. 173]

Indeed, Rudolf Rocker makes the point very clear. “It has often been charged against Anarcho-Syndicalism,” he wrote, “that it has no interest in the political structure of the different countries, and consequently no interest in the political struggles of the time, and confines its activities entirely to the fight for purely economic demands. This idea is altogether erroneous and springs either from outright ignorance or wilful distortion of the facts. It is not the political struggle...
real needs and common aspirations.” For “so long as we have capitalism and government, the job of anarchists is to fight both, and at the same time encourage people to take what steps they can to run their own lives.” [“Anarchists and Voting”, pp. 176–87, The Raven, No. 14, p. 179]

Part of this process will be the discussion of political, social and economic issues in whatever self-managed organisations people create in their communities and workplaces (as Bakunin argued) and the use of these organisations to fight for (political, social and economic) improvements and reforms in the here and now using direct action and solidarity. This means, as Rudolf Rocker pointed out, anarchists desire a unification of political and economic struggles as the two as inseparable:

“Within the socialist movement itself the Anarchists represent the viewpoint that the war against capitalism must be at the same time a war against all institutions of political power, for in history economic exploitation has always gone hand in hand with political and social oppression. The exploitation of man by man and the domination of man over man are inseparable, and each is the condition of the other.” [Anarcho-Syndicalism, p. 11]

Such a unification must take place on the social and economic field, not the political, as that is where the working class is strongest. So anarchists are well aware of the need to fight for political issues and reforms, and so are “not in any way opposed to the political struggle, but in their opinion this struggle ... must take the form of direct action, in which the instruments of economic [and social] power which the working class has at its command are the most effective. The most trivial wage-fight shows clearly that, whenever the employers find themselves in difficulties, the state steps in with the police, and even in some cases with the militia, to protect true. Libertarians are well aware that we can act to make our lives better while, at the same time, seeking to remove the root causes of the problems we face. (see, for example, Emma Goldman’s account of her recognition of how false it was deny the need for short-term reforms in favour of revolution. [Living My Life, vol. 1, p. 52]). In the words of the revolutionary syndicalist Emile Pouget:

“Trade union endeavour has a double aim: with tireless persistence, it must pursue betterment of the working class’s current conditions. But, without letting themselves become obsessed with this passing concern, the workers should take care to make possible and imminent the essential act of comprehensive emancipation: the expropriation of capital.

“At present, trade union action is designed to win partial and gradual improvements which, far from constituting a goal, can only be considered as a means of stepping up demands and wresting further improvements from capitalism ...

“This question of partial improvements served as the pretext for attempts to sow discord in the trades associations. Politicians ... have tried to ... stir up ill-feeling and to split the unions into two camps, by categorising workers as reformists and as revolutionaries. The better to discredit the latter, they have dubbed them ‘the advocates of all or nothing’ and they have falsely represented them as supposed adversaries of improvements achievable right now.

“The most that can be said about this nonsense is that it is witless. There is not a worker ... who, on grounds of principle or for reasons of tactics, would insist upon working ten hours for an employer instead of eight hours, while earning six francs instead of seven ...
“What appears to afford some credence to such chicanery is the fact that the unions, cured by the cruel lessons of experience from all hope in government intervention, are justifiably mistrustful of it. They know that the State, whose function is to act as capital’s gendarme, is, by its very nature, inclined to tip the scales in favour of the employer side. So, whenever a reform is brought about by legal avenues, they do not fall upon it with the relish of a frog devouring the red rag that conceals the hook, they greet it with all due caution, especially as this reform is made effective only if the workers are organised to insist forcefully upon its implementation.

“The trade unions are even more wary of gifts from the government because they have often found these to be poison gifts … Wanting real improvements … instead of waiting until the government is generous enough to bestow them, they wrest them in open battle, through direct action.

“If, as sometimes is the case, the improvement they seek is subject to the law, the trade unions strive to obtain it through outside pressure brought to bear upon the authorities and not by trying to return specially mandated deputies to Parliament, a puerile pursuit that might drag on for centuries before there was a majority in favour of the yearned-for reform.

“When the desired improvement is to be wrestled directly from the capitalist, the trades associations resort to vigorous pressure to convey their wishes. Their methods may well vary, although the direct action principle underlies them all …

“But, whatever the improvement won, it must always represent a reduction in capitalist privileges and be a par-
rent conditions of social organisation ... Under this delusion ... the workers subject to [this] influence were supposed to disengage themselves systematically from all political and social concerns and questions about the state, property, and so forth ... [This] completely subordinated the proletariat to the bourgeoisie which exploits it and for which it was to remain an obedient and mindless tool.” [Statism and Anarchy, p. 174]

In addition, Bakunin argued that the labour movement (and so the anarchist movement) would have to take into account political ideas and struggles but to do so in a working class way:

“The International does not reject politics of a general kind; it will be compelled to intervene in politics so long as it is forced to struggle against the bourgeoisie. It rejects only bourgeois politics.” [The Political Philosophy of Bakunin, p. 313]

To state the obvious, anarchists only reject working class “political action” if you equate (as did the early Marxists) “political action” with electioneering, standing candidates for Parliament, local town councils and so on — what Bakunin termed bourgeois politics. We do not reject “political action” in the sense of direct action to effect political changes and reforms. As two American syndicalists argued, libertarians use “the term ‘political action’ ... in its ordinary and correct sense. Parliamentary action resulting from the exercise of the franchise is political action. Parliamentary action caused by the influence of direct action tactics ... is not political action. It is simply a registration of direct action.” They also noted that syndicalists “have proven time and again that they can solve the many so-called political questions by direct action.” [Earl C. Ford and William Z. Foster, Syndicalism, p. 19f and p. 23]

So, anarchists reject capitalist politics (i.e. electioneering), but we do not ignore politics, wider political discussion or political

tial expropriation. So ... the fine distinction between ‘reformist’ and ‘revolutionary’ evaporates and one is led to the conclusion that the only really reformist workers are the revolutionary syndicalists.” [No Gods, No Masters, vol. 2, pp. 71–3]

Pouget was referring to revolutionary unions but his argument can be generalised to all social movements.

By seeking improvements from below by direct action, solidarity and the organisation of those who directly suffer the injustice, anarchists can make reforms more substantial, effective and long lasting than “reforms” made from above by reformists. By recognising that the effectiveness of a reform is dependent on the power of the oppressed to resist those who would dominate them, anarchists seek change from the bottom-up and so make reforms real rather than just words gathering dust in the law books.

For example, a reformist sees poverty and looks at ways to lessen the destructive and debilitating effects of it: this produced things like the minimum wage, affirmative action, the projects in the USA and similar reforms in other countries. An anarchist looks at poverty and says, “what causes this?” and attacks that source of poverty, rather than the symptoms. While reformists may succeed in the short run with their institutional panaceas, the festering problems remain untreated, dooming reform to eventual costly, inevitable failure — measured in human lives, no less. Like a quack that treats the symptoms of a disease without getting rid of what causes it, all the reformist can promise is short-term improvements for a condition that never goes away and may ultimately kill the sufferer. The anarchist, like a real doctor, investigates the causes of the illness and treats them while fighting the symptoms.

Therefore, anarchists are of the opinion that ”[w]hile preaching against every kind of government, and demanding complete freedom, we must support all struggles for partial freedom, because we are con-
vinced that one learns through struggle, and that once one begins to enjoy a little freedom one ends by wanting it all. We must always be with the people ... [and] get them to understand ... [what] they may demand should be obtained by their own efforts and that they should despece and detest whoever is part of, or aspires to, government.” [Malatesta, Errico Malatesta: His Life and Ideas p. 195]

So, anarchists are not opposed to struggles for reforms and improvements in the here and now. Indeed, few anarchists think that an anarchist society will occur without a long period of anarchist activity encouraging and working within social struggle against injustice. Thus Malatesta’s words:

"the subject is not whether we accomplish Anarchism today, tomorrow or within ten centuries, but that we walk towards Anarchism today, tomorrow and always.”

[Towards Anarchism, p. 75]

So, when fighting for improvements anarchists do so in an anarchist way, one that encourages self-management, direct action and the creation of libertarian solutions and alternatives to both capitalism and the state.

J.1.3 Why are anarchists against reformism?

Firstly, it must be pointed out that the struggle for reforms within capitalism is not the same as reformism. Reformism is the idea that reforms within capitalism are enough in themselves and attempts to change the system are impossible (and not desirable). As such all anarchists are against this form of reformism — we think that the system can be (and should be) changed and until that happens any reforms, no matter how essential, will not get to the root of social problems.

In addition, particularly in the old social democratic labour movement, reformism also meant the belief that social reforms political and social organisation which aim at the direct participation of the people, with the consequent weakening of the power, as well as of the social role, of government in the life of the community.” [“Anarchists and Voting”, pp. 176–87, The Raven, No. 14, pp. 177–8]

We discuss what new forms of economic and social organisations that this could involve in section J.5.

J.2.10 Does rejecting electioneering mean that anarchists are apolitical?

No. Far from it. The “apolitical” nature of anarchism is Marxist nonsense. As it desires to fundamentally change society, anarchism can be nothing but political. However, anarchism does reject (as we have seen) “normal” political activity as ineffectual and corrupting. However, many (particularly Marxists) imply this rejection of the con of capitalist politics means that anarchists concentrate on purely “economic” issues like wages, working conditions and so forth. By so doing, Marxists claim that anarchists leave the political agenda to be dominated by capitalist ideology, with disastrous results for the working class.

This view, however, is utterly wrong. Indeed, Bakunin explicitly rejected the idea that working people could ignore politics and actually agreed with the Marxists that political indifference only led to capitalist control of the labour movement:

"[some of] the workers in Germany … [were organised in] a kind of federation of small associations… 'Self-help’ … was its slogan, in the sense that labouring people were persistently advised not to anticipate either deliverance or help from the state and the government, but only from their own efforts. This advice would have been excellent had it not been accompanied by the false assurance that liberation for the labouring people is possible under cur-
So, far from doing nothing, by not voting the anarchist actively encourages alternatives. As the British anarchist John Turner argued, we “have a line to work upon, to teach the people self-reliance, to urge them to take part in non-political [i.e. non-electoral] movements directly started by themselves for themselves ... as soon as people learn to rely upon themselves they will act for themselves ... We teach the people to place their faith in themselves, we go on the lines of self-help. We teach them to form their own committees of management, to repudiate their masters, to despise the laws of the country.” [quoted by John Quail, The Slow Burning Fuse, p. 87] In this way we encourage self-activity, self-organisation and self-help — the opposite of apathy and doing nothing.

Ultimately, what the state and capital gives, they can also take away. What we build by our own self-activity can last as long as we want it to and act to protect it:

“The future belongs to those who continue daringly, consistently, to fight power and governmental authority. The future belongs to us and to our social philosophy. For it is the only social ideal that teaches independent thinking and direct participation of the workers in their economic struggle. For it is only through the organised economic strength of the masses that they can and will do away with the capitalist system and all the wrongs and injustices it contains. Any diversion from this stand will only retard our movement and make it a stepping stone for political climbers.” [Emma Goldman, Vision on Fire, p. 92]

In short, what happens in our communities, workplaces and environment is too important to be left to politicians — or the ruling elite who control governments. Anarchists need to persuade “as many people as possible that their freedom ... depends not on the right to vote or securing a majority of votes ... but on evolving new forms of could be used to transform capitalism into socialism. In this sense, only Individualist anarchists and Mutualists can be considered reformist as they think their system of mutual banking can reform capitalism into a free system. However, in contrast to Social Democracy, such anarchists think that such reforms cannot come about via government action, but only by people creating their own alternatives and solutions by their own actions:

“But experience testifies and philosophy demonstrates, contrary to that prejudice, that any revolution, to be effective, must be spontaneous and emanate, not from the heads of the authorities but from the bowels of the people: that government is reactionary rather than revolutionary: that it could not have any expertise in revolutions, given that society, to which that secret is alone revealed, does not show itself through legislative decree but rather through the spontaneity of its manifestations: that, ultimately, the only connection between government and labour is that labour, in organising itself, has the abrogation of government as its mission.” [Proudhon, No Gods, No Master, vol. 1, p. 52]

So, anarchists oppose reformism because it takes the steam out of revolutionary movements by providing easy, decidedly short-term “solutions” to deep social problems. In this way, reformists can present the public with they’ve done and say “look, all is better now. The system worked.” Trouble is that over time, the problems will only continue to grow because the reforms did not tackle them in the first place. To use Alexander Berkman’s excellent analogy:

“If you should carry out [the reformers’] ideas in your personal life, you would not have a rotten tooth that aches pulled out all at once. You would have it pulled out a little to-day, some more next week, for several months
or years, and by then you would be ready to pull it out altogether, so it should not hurt so much. That is the logic of the reformer. Don’t be ‘too hasty,’ don’t pull a bad tooth out all at once.” [What is Anarchism?, p. 64]

Rather than seek to change the root cause of the problems (namely in a hierarchical, oppressive and exploitative system), reformists try to make the symptoms better. In the words of Berkman again:

“Suppose a pipe burst in your house. You can put a bucket under the break to catch the escaping water. You can keep on putting buckets there, but as long as you do not mend the broken pipe, the leakage will continue, no matter how much you may swear about it … until you repair the broken social pipe.” [Op. Cit., pp. 67–8]

What reformism fails to do is fix the underlying root causes of the real problems society faces. Therefore, reformists try to pass laws which reduce the level of pollution rather than work to end a system in which it makes economic sense to pollute. Or they pass laws to improve working conditions and safety while failing to get rid of the wage slavery which creates the bosses whose interests are served by them ignoring those laws and regulations. The list is endless. Ultimately, reformism fails because reformists “believe in good faith that it is possible to eliminate the existing social evils by recognising and respecting, in practice if not in theory, the basic political and economic institutions which are the cause of, as well as the prop that supports these evils.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 82]

Revolutionaries, in contrast to reformists, fight both symptoms and the root causes. They recognise that as long as the cause of the evil remains, any attempts to fight the symptoms, however necessary, will never get to the root of the problem. There is no doubt

landless workers, sick and tired of waiting for the politicians to act, started to occupy the land. The government “resorted to the time-tested procedure of expelling the peasants with the Civil Guard.” The peasants responded with a “dramatic rebellion” which forced the politicians to “legalise the occupied farms. This proved once again that the only effective reforms are those imposed by force from below. Indeed, direct action was infinitely more successful than all the parliamentary debates that took place between 1931 and 1933 about whether to institute the approved Agrarian Reform law.” [Abel Paz, Durruti in the Spanish Revolution, p. 391]

The second strategy of building alternatives flows naturally from the first. Any form of campaign requires organisation and by organising in an anarchist manner we build organisations that “bear in them the living seed of the new society which is replace the old world.” [Bakunin, Op. Cit., p. 255] In organising strikes in the workplace and community we can create a network of activists and union members who can encourage a spirit of revolt against authority. By creating assemblies where we live and work we can create an effective countering power to the state and capital. Such a union, as the anarchists in Spain and Italy proved, can be the focal point for recreating self-managed schools, social centres and so on. In this way the local community can ensure that it has sufficient independent, self-managed resources available to educate its members. Also, combined with credit unions (or mutual banks), cooperative workplaces and stores, a self-managed infrastructure could be created which would ensure that people can directly provide for their own needs without having to rely on capitalists or governments. In the words of a C.N.T. militant:

“We must create that part of libertarian communism which can be created within bourgeois society and do so precisely to combat that society with our own special weapons.” [quoted by Kelsey, Op. Cit., p. 79]
protagonists in this struggle are the community and the State — the community as an organic and inclusive body and the State as the representatives of a tyrannical minority ... The General Strike of the future must be organised as a strike of the community against the State. The result of that strike will not be in doubt.” [Herbert Read, Anarchy and Order, p. 52]

Such a counter-power would focus the attention of those in power far more than a ballot in a few years time (particularly as the state bureaucracy is not subject to even that weak form of accountability). As Noam Chomsky argues, "within the constraints of existing state institutions, policies will be determined by people representing centres of concentrated power in the private economy, people who, in their institutional roles, will not be swayed by moral appeals but by the costs consequent upon the decisions they make — not because they are 'bad people,' but because that is what the institutional roles demands.” He continues: “Those who own and manage the society want a disciplined, apathetic and submissive public that will not challenge their privilege and the orderly world in which it thrives. The ordinary citizen need not grant them this gift. Enhancing the Crisis of Democracy by organisation and political engagement is itself a threat to power, a reason to undertake it quite apart from its crucial importance in itself as an essential step towards social change.” [Turning the Tide, pp. 251–2]

In this way, by encouraging social protest, any government would think twice before pursuing authoritarian, destructive and unpopular policies. In the final analysis, governments can and will ignore the talk of opposition politicians, but they cannot ignore social action for very long. In the words of a Spanish anarchosyndicalist, anarchists “do not ask for any concessions from the government. Our mission and our duty is to impose from the streets that which ministers and deputies are incapable of realising in parliament.” [quoted by Graham Kelsey, Anarchosyndicalism, Libertarian Communism and the State, p. 79] This was seen after the Popular Front was elected February 1936 and the Spanish

that we have to fight the symptoms, however revolutionaries recognise that this struggle is not an end in itself and should be considered purely as a means of increasing working class strength and social power within society until such time as capitalism and the state (i.e. the root causes of most problems) can be abolished.

Reformists also tend to objectify the people whom they are "helping": they envision them as helpless, formless masses who need the wisdom and guidance of the “best and the brightest” to lead them to the Promised Land. Reformists mean well, but this is altruism borne of ignorance, which is destructive over the long run. Freedom cannot be given and so any attempt to impose reforms from above cannot help but ensure that people are treated as children, incapable of making their own decisions and, ultimately, dependent on bureaucrats to govern them. This can be seen from public housing. As Colin Ward argues, the “whole tragedy of publicly provided non-profit housing for rent and the evolution of this form of tenure in Britain is that the local authorities have simply taken over, though less flexibly, the role of the landlord, together with all the dependency and resentment that it engenders.” [Housing: An Anarchist Approach, p. 184] This feature of reformism was skilfully used by the right-wing to undermine publicly supported housing and other aspects of the welfare state. The reformist social-democrats reaped what they had sown.

Reformism often amounts to little more than an altruistic contempt for the masses, who are considered as little more than victims who need to be provided for by state. The idea that we may have our own visions of what we want is ignored and replaced by the vision of the reformists who enact legislation for us and make “reforms” from the top-down. Little wonder such reforms can be counter-productive — they cannot grasp the complexity of life and the needs of those subject to them. Reformists effectively say, “don’t do anything, we’ll do it for you.” You can see why anarchists would loathe this sentiment; anarchists are the consummate do-it-yourselfers, and there’s nothing reformists hate more than
people who can take care of themselves, who will not let them “help” them.

Reformists may mean well, but they do not grasp the larger picture — by focusing exclusively on narrow aspects of a problem, they choose to believe that is the whole problem. In this wilfully narrow examination of pressing social ills, reformists are, more often than not, counter-productive. The disaster of the urban rebuilding projects in the United States (and similar projects in Britain which moved inter-city working class communities into edge of town developments during the 1950s and 1960s) are an example of reformism at work: upset at the growing slums, reformists supported projects that destroyed the ghettos and built brand-new housing for working class people to live in. They looked nice (initially), but they did nothing to address the problem of poverty and indeed created more problems by breaking up communities and neighbourhoods.

Logically, it makes no sense. Why dance around a problem when you can attack it directly? Reformists dilute social movements, softening and weakening them over time. The AFL-CIO labour unions in the USA, like the ones in Western Europe, killed the labour movement by narrowing and channelling labour activity and taking power from the workers themselves, where it belongs, and placing it the hands of a bureaucracy. The British Labour Party, after over 100 years of reformist practice, has done little more than manage capitalism, seen most of its reforms undermined by right-wing governments (and by the following Labour governments!) and the creation of a leadership of the party (in the shape of New Labour) which was in most ways as right-wing as the Conservative Party (if not more so, as shown once they were in power). Bakunin would not have been surprised.

Also, it is funny to hear left-wing “ revolutionaries” and “radicals” put forward the reformist line that the capitalist state can help working people (indeed be used to abolish itself!). Despite the fact that leftists blame the state and capitalism for most of the
calling direct action and building alternatives where we live and work.

Taking the first strategy, anarchists say that by using direct action we can force politicians to respect the wishes of the people. For example, if a government or boss tries to limit free speech, then anarchists would try to encourage a free speech fight to break the laws in question until such time as they are revoked. If a government or landlord refuses to limit rent increases or improve safety requirements for accommodation, anarchists would organise squats and rent strikes. In the case of environmental destruction, anarchists would support and encourage attempts at halting the damage by mass trespassing on sites, blocking the routes of developments, organising strikes and so on. If a boss refuses to introduce an 8 hour day, then workers should form a union and go on strike or simply stop working after 8 hours. Unlike laws, the boss cannot ignore direct action. Similarly, strikes combined with social protest would be effective means of stopping authoritarian laws being passed. For example, anti-union laws would be best fought by strike action and community boycotts (and given the utterly ineffectual defence pursued by pro-labour parties using political action to stop anti-union laws who can seriously say that the anarchist way would be any worse?). Collective non-payment of taxes would ensure the end of unpopular government decisions. The example of the poll tax rebellion in the UK in the late 1980s shows the power of such direct action. The government could happily handle hours of speeches by opposition politicians but they could not ignore social protest (and we must add that the Labour Party which claimed to oppose the tax happily let the councils controlled by them introduce the tax and arrest non-payers).

The aim would be to spread struggles and involve as many people as possible, for it is “merely stupid for a group of workers — even for the workers organised as a national group — to invite the making of a distinction between themselves and the community. The real
action breaks down apathy and gets results. It is the first steps towards real freedom, towards a free and just society. Unsurprisingly, then, anarchists are the first to point out that not voting is not enough: we need to actively struggle for an alternative to both voting and the current system. Just as the right to vote was won after a long series of struggles, so the creation of a free, decentralised, self-managed, libertarian socialist society will be the product of social struggle.

Anarchists are the last people to deny the importance of political liberties or the importance in winning the right to vote. The question we must ask is whether it is a more a fitting tribute to the millions of people who used direct action, fought and suffered for the right to vote to use that victory to endorse a deeply unfair and undemocratic system or to use other means (indeed the means they used to win the vote) to create a system based upon true popular self-government? If we are true to our (and their) desire for a real, meaningful democracy, we would have to reject political action in favour of direct action.

This obviously gives an idea of what anarchists do instead of voting, we agitate, organise and educate. Or, to quote Proudhon, the “problem before the labouring classes ... consists not in capturing, but in subduing both power and monopoly, — that is, in generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the state and subjugate them.” For, “to combat and reduce power, to put it in its proper place in society, it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave.” [System of Economical Contradictions, p. 398 and p. 397]

We do this by organising what Bakunin called “antipolitical social power of the working classes.” [Bakunin on Anarchism, p. 263] This activity which bases itself on the two broad strategies of
at the same time, arguing that welfare for the rich should be abolished long before welfare for the many is even thought about. See section J.5.15 for more discussion on the welfare state and anarchist perspectives on it.

Instead of encouraging working class people to organise themselves and create their own alternatives and solutions to their problem (which can supplement, and ultimately replace, whatever welfare state activity which is actually useful), reformists and other radicals urge people to get the state to act for them. However, the state is not the community and so whatever the state does for people you can be sure it will be in its interests, not theirs. As Kropotkin put it:

“We maintain that the State organisation, having been the force to which the minorities resorted for establishing and organising their power over the masses, cannot be the force which will serve to destroy these privileges ... the economic and political liberation of man will have to create new forms for its expression in life, instead of those established by the State.

“Consequently, the chief aim of Anarchism is to awaken those constructive powers of the labouring masses of the people which at all great moments of history came forward to accomplish the necessary changes ...”

“This is also why the Anarchists refuse to accept the functions of legislators or servants of the State. We know that the social revolution will not be accomplished by means of laws. Laws only follow the accomplished facts ... a law remains a dead letter so long as there are not on the spot the living forces required for making of the tendencies expressed in the law an accomplished fact.

“On the other hand ... the Anarchists have always advised taking an active part in those workers’ organ-

of ones choice,’ but on evolving new forms of political and social organisation which aim at the direct participation of the people, with the consequent weakening of the power, as well of the social role, of government in the life of the community.” [“Anarchists and Voting”, pp. 176–87, The Raven, no. 14, pp. 177–8]

We discuss what this could involve in the next section.

J.2.9 What do anarchists do instead of voting?

While anarchists reject electioneering and voting, it does not mean that we are politically apathetic. Indeed, part of the reason why anarchists reject voting is because we think that voting is not part of the solution, it is part of the problem. This is because it endorses an unjust and unfree political system and makes us look to others to fight our battles for us. It blocks constructive self-activity and direct action. It stops the building of alternatives in our communities and workplaces. Voting breeds apathy and apathy is our worse enemy.

Given that we have had universal suffrage for some time in the West and we have seen the rise of Labour and Radical parties aiming to use that system to effect change in a socialistic direction, it seems strange that we are probably further away from socialism than when they started. The simple fact is that these parties have spent so much time trying to win elections that they have stopped even thinking about creating socialist alternatives in our communities and workplaces. That is in itself enough to prove that electioneering, far from eliminating apathy, in fact helps to create it.

So, because of this, anarchists argue that the only way to not waste your vote is to spoil it! We are the only political movement which argues that nothing will change unless you act for yourself, take back the power and fight the system directly. Only direct
ernment will come into power and seek to abolish previous social gains (such as abortion rights, welfare programmes, union rights, and so forth) they seem to forget that so-called left-wing administrations have also undermined such reforms. In response to queries by the left on how anarchists would seek to defend such reforms if their abstentionism aided the victory of the right, anarchists reply by asking the left how they seek to defend such reforms when their “left-wing” government starts to attack them.

Ultimately, voting for other politicians will make little difference. The reality is that politicians are puppets. As we argued in section J.2.2, real power in the state does not lie with politicians, but instead within the state bureaucracy and big business. Faced with these powers, we have seen left-wing governments from Spain to New Zealand introduce right-wing policies. So even if we elected a radical party, they would be powerless to change anything important and soon be forced to attack us in the interests of capitalism. Politicians come and go, but the state bureaucracy and big business remain forever! Simply put, we cannot expect a different group of politicians to react that differently to the same economic and political pressures and influences.

Therefore we cannot rely on voting for the lesser evil to safe us from the possible dangers of a right-wing election victory. All we can hope for is that no matter who gets in, the population will resist the government because it knows and can use its real power: direct action. For the “only limit to the oppression of government is the power with which the people show themselves capable of opposing it.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 196]

Hence Vernon Richards:

“If the anarchist movement has a role to play in practical politics it is surely that of suggesting to, and persuading, as many people as possible that their freedom from the Hitlers, Francos and the rest, depends not on the right to vote or securing a majority of votes ‘for the candidate...”

Therefore, while seeking reforms, anarchists are against reformism and reformists. Reforms are not seen as an end in themselves but rather a means of changing society from the bottom-up and a step in that direction:

"Each step towards economic freedom, each victory won over Capitalism will be at the same time a step towards political liberty — towards liberation from the yoke of the State ... And each step towards taking from the State any one of its powers and attributes will be helping the masses to win a victory over Capitalism.” [Kropotkin, Op. Cit., p. 95]

However, no matter what, anarchists “will never recognise the institutions; we will take or win all possible reforms with the same spirit that one tears occupied territory from the enemy’s grasp in order to keep advancing, and we will always remain enemies of every government.” Therefore, it is “not true to say” that anarchists “are systematically opposed to improvements, to reforms. They oppose the reformists on the one hand because their methods are less effective for securing reforms from government and employers, who only give in through fear, and because very often the reforms they prefer are those..."
which not only bring doubtful immediate benefits, but also serve to consolidate the existing regime and to give the workers a vested interest in its continued existence.” [Malatesta, Op. Cit., p. 81 and p. 83]

Only working class people, by our own actions and organisations, getting the state and capital out of the way can produce an improvement in our lives, indeed it is the only thing that will lead to real changes for the better. Encouraging people to rely on themselves instead of the state or capital can lead to self-sufficient, independent, and, hopefully, more rebellious people. Working class people, despite having fewer options in a number of areas in our lives, due both to hierarchy and restrictive laws, still are capable of making choices about our actions, organising our own lives and are responsible for the consequences of our decisions. We are also more than able to determine what is and is not a good reform to existing institutions and do not need politicians informing us what is in our best interests (particularly when it is the right seeking to abolish those parts of the state not geared purely to defending property). To think otherwise is to infantilise us, to consider us less fully human than other people and reproduce the classic capitalist vision of working class people as means of production, to be used, abused, and discarded as required. Such thinking lays the basis for paternalistic interventions in our lives by the state, ensuring our continued dependence and inequality — and the continued existence of capitalism and the state. Ultimately, there are two options:

“The oppressed either ask for and welcome improvements as a benefit graciously conceded, recognise the legitimacy of the power which is over them, and so do more harm than good by helping to slow down, or divert ... the processes of emancipation. Or instead they demand and impose improvements by their action, and welcome them as partial victories over the class enemy,

"I think a way to behave is to think not in terms of representative government, not in terms of voting, not in terms of electoral politics, but thinking in terms of organising social movements, organising in the workplace, organising in the neighborhood, organising collectives that can become strong enough to eventually take over — first to become strong enough to resist what has been done to them by authority, and second, later, to become strong enough to actually take over the institutions ... the crucial question is not who is in office, but what kind of social movement do you have. Because we have seen historically that if you have a powerful social movement, it doesn’t matter who is in office. Whoever is in office, they could be Republican or Democrat, if you have a powerful social movement, the person in office will have to yield, will have to in some ways respect the power of social movements ... voting is not crucial, and organising is the important thing.” [An Interview with Howard Zinn on Anarchism: Rebels Against Tyranny]

Of course, all the parties claim that they are better than the others and this is the logic of this question — namely, we must vote for the lesser evil as the right-wing in office will be terrible. But what this forgets is that the lesser evil is still an evil. What happens is that instead of the greater evil attacking us, we get the lesser evil doing what the right-wing was going to do. Let us not forget it was the “lesser evil” of the Democrats (in the USA) and Labour (in the UK) who first introduced, in the 1970s, the monetarist and other policies that Reagan and Thatcher made their own in the 1980s.

This is important to remember. The central fallacy in this kind of argument is the underlying assumption that “the left” will not implement the same kind of policies as the right. History does not support such a perspective and it is a weak hope to place a political strategy on. As such, when people worry that a right-wing gov-
Vernon Richards argued, “could persuade half the electorate to abstain from voting this would, from an electoral point of view, contribute to the victory of the Right. But it would be a hollow victory, for what government could rule when half the electorate by not voting had expressed its lack of confidence in all governments?” The party in office would have to rule over a country in which a sizeable minority, even a majority, had rejected government as such. This would mean that the politicians “would be subjected to real pressures from people who believed in their own power” and acted accordingly. So anarchists call on people not to vote, but instead organise themselves and be conscious of their own power. Only this “can command the respect of governments, can curb the power of government as millions of crosses on bits of paper never will.” [The Impossibilities of Social Democracy, p. 142]

For, as Emma Goldman pointed out, “if the Anarchists were strong enough to swing the elections to the Left, they must also have been strong enough to rally the workers to a general strike, or even a series of strikes ... In the last analysis, the capitalist class knows too well that officials, whether they belong to the Right or the Left, can be bought. Or they are of no consequence to their pledge.” [Vision on Fire, p. 90] The mass of the population, however, cannot be bought off and if they are willing and able to resist then they can become a power second to none. Only by organising, fighting back and practicing solidarity where we live and work can we really change things. That is where our power lies, that is where we can create a real alternative. By creating a network of self-managed, pro-active community and workplace organisations we can impose by direct action that which politicians can never give us from Parliament. Only such a movement can stop the attacks upon us by whoever gets into office. A government (left or right) which faces a mass movement based upon direct action and solidarity will always think twice before proposing cuts or introducing authoritarian laws. Howard Zinn expressed it well:

Reformism encourages the first attitude within people and so ensures the impoverishment of the human spirit. Anarchism encourages the second attitude and so ensures the enrichment of humanity and the possibility of meaningful change. Why think that ordinary people cannot arrange their lives for themselves as well as Government people can arrange it not for themselves but for others?

J.1.4 What attitude do anarchists take to “single-issue” campaigns?

Firstly, we must note that anarchists do take part in “single-issue” campaigns, but do not nourish false hopes in them. This section explains what anarchists think of such campaigns.

A “single-issue” campaign are usually run by a pressure group which concentrates on tackling issues one at a time. For example, C.N.D. (The Campaign for Nuclear Disarmament) is a classic example of “single-issue” campaigning with the aim of getting rid of nuclear weapons as the be-all and end-all of its activity. For anarchists, however, single-issue campaigning can be seen as a source of false hopes. The possibilities of changing one aspect of a totally inter-related system and the belief that pressure groups can compete fairly with transnational corporations, the military and so forth, in their influence over decision making bodies can both be seen to be optimistic at best.

In addition, many “single-issue” campaigns desire to be “apolitical”, concentrating purely on the one issue which unites the campaign and so refuse to analyse or discuss wider issues and the root
causes of the issue in question (almost always, the system we live under). This means that they end up accepting the system which causes the problems they are fighting against. At best, any changes achieved by the campaign must be acceptable to the establishment or be so watered down in content that no practical long-term good is done. This can be seen from the green movement, where groups like Greenpeace and Friends of the Earth accept the status quo as a given and limit themselves to working within it. This often leads to them tailoring their “solutions” to be “practical” within a fundamentally anti-ecological political and economic system, so slowing down (at best) ecological disruption.

For anarchists these problems all stem from the fact that social problems cannot be solved as single issues. As Larry Law argued:

“single issue politics ... deals with the issue or problem in isolation. When one problem is separated from all other problems, a solution really is impossible. The more campaigning on an issue there is, the narrower its perspectives become ... As the perspective of each issue narrows, the contradictions turn into absurdities ... What single issue politics does is attend to ‘symptoms’ but does not attack the ‘disease’ itself. It presents such issues as nuclear war, racial and sexual discrimination, poverty, starvation, pornography, etc., as if they were aberrations or faults in the system. In reality such problems are the inevitable consequence of a social order based on exploitation and hierarchical power ... single issue campaigns lay their appeal for relief at the feet of the very system which oppresses them. By petitioning they acknowledge the right of those in power to exercise that power as they choose.” [Bigger Cages, Longer Chains, pp. 17–20].

Single issue politics often prolong the struggle for a free society by fostering illusions that it is just parts of the capitalist system that are the problem, and that these parts will be forced to attack us (due to the pressure from capital and state) and that we have to rely on our own organisations and power to defend ourselves, we can promote working class self-confidence in its own abilities, and encourage the rejection of capitalism, the state and hierarchical leadership as well as the use of direct action.

Finally, we must add, it is not required for radicals to associate themselves with the farce of parliamentary propaganda in order to win people over to our ideas. Non-anarchists will see us use direct action, see us act, see the anarchistic alternatives we create and see our propaganda. Non-anarchists can be reached quite well without taking part in, or associating ourselves with, parliamentary action.

J.2.8 Will abstentionism lead to the right winning elections?

Possibly. However anarchists don’t just say “don’t vote”, we say “organise” as well. Apathy is something anarchists have no interest in encouraging.

The reasons why people abstain is more important than the act. The idea that the USA is closer to anarchy because around 50% of people do not vote is nonsense. Abstentionism in this case is the product of apathy and cynicism, not political ideas. So anarchists recognise that apathetic abstentionism is not revolutionary or an indication of anarchist sympathies. It is produced by apathy and a general level of cynicism at all forms of political ideas and the possibility of change.

That is why anarchist abstentionism always stresses the need for direct action and organising economically and socially to change things, to resist oppression and exploitation. In such circumstances, the effect of an electoral strike would be fundamentally different than an apathy induced lack of voting. “If the anarchists”,

3458

3503
This failure, for anarchists, is not surprising, considering the reasons why we reject this tactic. Given that this tactic does not attack hierarchy or dependence on leaders, does not attack the ideology and process of voting, it will obviously fail to present a real alternative to the voting population (who will turn to other alternatives available at election time and not embrace direct action). Also the sight of a so-called “socialist” or “radical” government managing capitalism, imposing cuts, breaking strikes and generally attacking its supporters will damage the credibility of any form of socialism and discredit all socialist and radical ideas in the eyes of the population. If the experience of the Labour Government in Britain during the 1970s and New Labour after 1997 are anything to go by, it may result in the rise of the far-right who will capitalise on this disillusionment.

By refusing to argue that no government is “on our side,” radicals who urge us to vote reformist “without illusions” help to disarm theoretically the people who listen to them. Working class people, surprised, confused and disorientated by the constant “betrayals” of left-wing parties may turn to right wing parties (who can be elected) to stop the attacks rather than turn to direct action as the radical minority within the working class did not attack voting as part of the problem. How many times must we elect the same party, go through the same process, the same betrayals before we realise this tactic does not work? Moreover, if it is a case of having to experience something before people reject it, few state socialists take this argument to its logical conclusion. We rarely hear them argue we must experience the hell of fascism or Stalinism or the nightmare of free market capitalism in order to ensure working class people “see through” them.

Anarchists, in contrast, say that we can argue against reformist politics without having to associate ourselves with them by urging people to vote for them. By arguing for abstentionism we can help to theoretically arm the people who will come into conflict with these parties once they are in office. By arguing that all govern-

Which are wrong, not the whole of it, and that those at the top of the system can, and will, act in our interests. While such campaigns can do some good, practical, work and increase knowledge and education about social problems, they are limited by their very nature and can not lead to extensive improvements in the here and now, never mind a free society.

Therefore, anarchists often support and work within single-issue campaigns, trying to get them to use effective methods of activity (such as direct action), work in an anarchistic manner (i.e. from the bottom up) and to try to “politicise” them into questioning the whole of the system. However, anarchists do not let themselves be limited to such activity as a social revolution or movement is not a group of single-issue campaigns but a mass movement which understands the inter-related nature of social problems and so the need to change every aspect of life.

J.1.5 Why do anarchists try to generalise social struggles?

Basically, we do it in order to encourage and promote solidarity. This is the key to winning struggles in the here and now as well as creating the class consciousness necessary to create an anarchist society. At its most simple, generalising different struggles means increasing the chances of winning them. Take, for example, when one trade or one workplace goes on strike while the others continue to work:

“Consider yourself how foolish and inefficient is the present form of labour organisation in which one trade or craft may be on strike while the other branches of the same industry continue to work. Is it not ridiculous that when the street car workers of New York, for instance, quit work, the employees of the subway, the cab and
omnibus drivers remain on the job? … It is clear, then, that you compel compliance [from your bosses] only when you are determined, when your union is strong, when you are well organised, when you are united in such a manner that the boss cannot run his factory against your will. But the employer is usually some big company that has mills or mines in various places... If it cannot operate... in Pennsylvania because of a strike, it will try to make good its losses by continuing... and increasing production [elsewhere]... In that way the company... breaks the strike.” [Alexander Berkman, What is Anarchism?, pp. 199–200]

By organising all workers in one union (after all they all have the same boss) it increases the power of each trade considerably. It may be easy for a boss to replace a few workers, but a whole workforce would be far more difficult. By organising all workers in the same industry, the power of each workplace is correspondingly increased. Extending this example to outside the workplace, its clear that by mutual support between different groups increases the chances of each group winning its fight. As the IWW. put it: “An injury to one is an injury to all.” By generalising struggles, by practising mutual aid we can ensure that when we are fighting for our rights and against injustice we will not be isolated and alone. If we don’t support each other, groups will be picked off one by one. and if we go into struggle, there will be no one there to support us and we are more likely to be defeated.

Therefore, from an anarchist point of view, the best thing about generalising struggles is that as well as increasing the likelihood of success (“Solidarity is Strength”) it leads to an increased spirit of solidarity, responsibility and class consciousness. This is because by working together and showing solidarity those involved get to understand their common interests and that the struggle is disturbing the facts, hiding what they believe or supporting a party they are opposed to. If this means being less popular in the short run, then so be it. Attacking nationalism, capitalism, religion, or a host of other things can alienate people but few revolutionaries would be so opportunistic as to hold their tongues on these. In the long run being honest about your ideas is the best way of producing a movement which aims to get rid of a corrupt social system. Starting such a movement with half-truths is doomed to failure.

Secondly, anarchists reject the basis of this argument. The logic underlying it is that by being disillusioned by their reformist leaders and party, voters will look for new, “better” leaders and parties. However, this fails to go to the root of the problem, namely the dependence on leaders which hierarchical society creates within people. Anarchists do not want people to follow the “best” leadership, they want them to govern themselves, to be self-active, manage their own affairs and not follow any would-be leaders. If you seriously think that the liberation of the oppressed is the task of the oppressed themselves (as Leninists claim to do) then you must reject this tactic in favour of ones that promote working class self-activity.

The third reason we reject this tactic is that it has been proven to fail time and time again. What most of its supporters seem to fail to notice is that voters have indeed put reformist parties into office many times. Lenin suggested this tactic in 1920 and there has been no general radicalisation of the voting population by this method, nor even in reformist party militants in spite of the many Labour Party governments in Britain which all attacked the working class. Moreover, the disillusionment associated with the experience of reformist parties often expresses itself as a demoralisation with socialism as such, rather than with the reformist’s watered down version of it. If Lenin’s position could be persuasive to some in 1920 when it was untried, the experience of subsequent decades should show its weakness.
J.2.7 Surely we should vote for reformist parties in order to expose them?

Some Leninist socialists (like the British Socialist Workers Party and its offshoots) argue that we should urge people to vote for Labour and other social democratic parties. In this they follow Lenin’s 1920 argument against the anti-Parliamentarian left that revolutionaries “help” elect such parties as many workers still follow their lead so that they will be “convinced by their own experience that we are right,” that such parties “are absolutely good for nothing, that they are petty-bourgeois and treacherous by nature, and that their bankruptcy is inevitable.” If we “want the masses to follow us,” we need to “support” such parties “in the same way as the rope supports a hanged man.” In this way, by experiencing the reformists in official, “the majority will soon become disappointed in their leaders and will begin to support communism.” [The Lenin Anthology, p. 603, p. 605 and p. 602]

This tactic is suggested for two reasons. The first is that revolutionaries will be able to reach more people by being seen to support popular, trade union based, parties. If they do not, then they are in danger of alienating sizeable sections of the working class by arguing that such parties will be no better than explicitly pro-capitalist ones. The second, and the more important one, is that by electing reformist parties into office the experience of living under such a government will shatter whatever illusions its supporters had in them. The reformist parties will be given the test of experience and when they betray their supporters to protect the status quo it will radicalise those who voted for them, who will then seek out real socialist parties (namely the likes of the SWP and ISO).

Libertarians reject these arguments for three reasons.

Firstly, it is deeply dishonest as it hides the true thoughts of those who support the tactic. To tell the truth is a revolutionary act. Radicals should not follow the capitalist media by telling half-truths, not against this injustice or that boss but against all injustice and all bosses.

This sense of increased social awareness and solidarity can be seen from the experience of the C.N.T. in Spain during the 1930s. The C.N.T. organised all workers in a given area into one big union. Each workplace was a union branch and were joined together in a local area confederation. The result was that the territorial basis of the unions brought all the workers from one area together and fomented class solidarity over and before industry-loyalties and interests. This can also be seen from the experiences of the syndicalist unions in Italy and France as well. The structure of such local federations also situates the workplace in the community where it really belongs.

Also, by uniting struggles together, we can see that there are really no “single issues” — that all various different problems are inter-linked. For example, ecological problems are not just that, but have a political and economic basis and that economic and social domination and exploitation spills into the environment. Inter-linking struggles means that they can be seen to be related to other struggles against capitalist exploitation and oppression and so encourage solidarity and mutual aid. What goes on in the environment, for instance, is directly related to questions of domination and inequality within human society, that pollution is often directly related to companies cutting corners to survive in the market or increase profits. Similarly, struggles against sexism or racism can be seen as part of a wider struggle against hierarchy, exploitation and oppression in all their forms. As such, uniting struggles has an important educational effect above and beyond the benefits in terms of winning struggles.

Murray Bookchin presents a concrete example of this process of linking issues and widening the struggle:

“Assume there is a struggle by welfare mothers to increase their allotments ... Without losing sight of the
concrete issues that initially motivated the struggle, revolutionaries would try to catalyse an order of relationships between the mothers entirely different from [existing ones] ... They would try to foster a deep sense of community, a rounded human relationship that would transform the very subjectivity of the people involved ... Personal relationships would be intimate, not merely issue-orientated. People would get to know each other, to confront each other; they would explore each other with a view of achieving the most complete, unalienated relationships. Women would discuss sexism, as well as their welfare allotments, child-rearing as well as harassment by landlords, their dreams and hopes as human beings as well as the cost of living.

“From this intimacy there would grow, hopefully, a supportive system of kinship, mutual aid, sympathy and solidarity in daily life. The women might collaborate to establish a rotating system of baby sitters and child-care attendants, the co-operative buying of good food at greatly reduced prices, the common cooking and partaking of meals, the mutual learning of survival skills and the new social ideas, the fostering of creative talents, and many other shared experiences. Every aspect of life that could be explored and changed would be one part of the kind of relationships ...

“The struggle for increased allotments would expand beyond the welfare system to the schools, the hospitals, the police, the physical, cultural, aesthetic and recreational resources of the neighbourhood, the stores, the houses, the doctors and lawyers in the area, and so on — into the very ecology of the district.

a non-working class leadership acting for people. This replaces self-management in social struggle and within the party itself. Electoralism strengthens the leaders dominance over the party and the party over the people it claims to represent. The real causes and solutions to the problems we face are mystified by the leadership and rarely discussed in order to concentrate on the popular issues that will get them elected. Ultimately, radicals “instead of weakening the false and enslaving belief in law and government ... actually work to strengthen the people’s faith in forcible authority and government.” [Berkman, Op. Cit., p. 100] Which has always proved deadly to encouraging a spirit of revolt, self-management and self-help – the very keys to creating change in a society. Thus this 1870 resolution of the Spanish section of the First International seems to have been proven to be correct:

“Any participation of the working class in the middle class political government would merely consolidate the present state of affairs and necessarily paralyse the socialist revolutionary action of the proletariat. The Federation [of unions] is the true representative of labour, and should work outside the political system.” [quoted by Jose Pierats, Anarchists in the Spanish Revolution, p. 169]

Instead of trying to gain control of the state, for whatever reasons, anarchists try to promote a culture of resistance within society that makes the state subject to pressure from outside (see section J.2.9). And, we feel, history has proven us right time and time again.
will determine how the character of the successful candidates will change. In other words, in contrast to Marxists and other radicals, anarchists present a materialist, scientific analysis of the dynamics of electioneering and its effects on radicals. Like most forms of idealism, the arguments of Marxists and other radicals flounder on the rocks of reality.

However, many radicals refuse to learn this lesson of history and keep trying to create a new party which will not repeat the saga of compromise and betrayal which all other radical parties have suffered. And they say that anarchists are utopian! “You cannot dive into a swamp and remain clean.” [Berkman, Op. Cit., p. 99]

Such is the result of rejecting (or “supplementing” with electioneering) direct action as the means to change things, for any social movement "to ever surrender their commitment to direct action for 'working within the system' is to destroy their personality as socially innovative movements. It is to dissolve back into the hopeless morass of 'mass organisations' that seek respectability rather than change.” [Murray Bookchin, Toward an Ecological Society, p. 47]

Moreover, the use of electioneering has a centralising effect on the movements that use it. Political actions become considered as parliamentary activities made for the population by their representatives, with the ‘rank and file’ left with no other role than that of passive support. Only the leaders are actively involved and the main emphasis falls upon them and it soon becomes taken for granted that they should determine policy. Conferences become little more than rallies with politicians freely admitting that they will ignore any conference decisions as and when required. Not to mention the all-too-common sight of politicians turning round and doing the exact opposite of what they promised. In the end, party conferences become simply like parliamentary elections, with party members supporting this leader against another.

Soon the party reflects the division between manual and mental labour so necessary for the capitalist system. Instead of working class self-activity and self-determination, there is a substitution of

“What I have said on this issue could be applied to every issue — unemployment, bad housing, racism, work conditions — in which an insidious assimilation of bourgeois modes of functioning is masked as ‘realism’ and ‘actuality.’ The new order of relationships that could be developed from a welfare struggle ... [can ensure that the] future penetrates the present; it recasts the way people ‘organise’ and the goals for which they strive.” [Post-Scarcity Anarchism, pp. 153–4]

As the anarchist slogan puts it: “Resistance is Fertile.” Planting the seed of autonomy, direct action and self-liberation can result, potentially, in the blossoming of free individuals due to the nature of struggle itself (see section A.2.7) Therefore, the generalisation of social struggle is not only a key way of winning a specific fight, it can (and should) also spread into different aspects of life and society and play a key part in developing free individuals who reject hierarchy in all aspects of their life.

Social problems are not isolated from each other and so struggles against them cannot be. The nature of struggle is such that once people start questioning one aspect of society, the questioning of the rest soon follows. So, anarchists seek to generalise struggles for these three reasons — firstly, to ensure the solidarity required to win; secondly, to combat the many social problems we face as people and to show how they are inter-related; and, thirdly, to encourage the transformation of those involved into unique individuals in touch with their humanity, a humanity eroded by hierarchical society and domination.
J.2 What is direct action?

Direct action, to use Rudolf Rocker’s words, is “every method of immediate warfare by the workers [or other sections of society] against their economic and political oppressors. Among these the outstanding are: the strike, in all its graduations from the simple wage struggle to the general strike; the boycott; sabotage in all its countless forms; anti-militarist propaganda, and in particularly critical cases ... armed resistance of the people for the protection of life and liberty.”

[Anarcho-Syndicalism, p. 78]

Not that anarchists think that direct action is only applicable within the workplace. Far from it. Direct action must occur everywhere! So, in non-workplace situations, direct action includes rent strikes, consumer boycotts, occupations (which, of course, can include sit-down strikes by workers), eco-tage, individual and collective non-payment of taxes, blocking roads and holding up construction work of an anti-social nature and so forth. Also direct action, in a workplace setting, includes strikes and protests on social issues, not directly related to working conditions and pay. Such activity aims to ensure the “protection of the community against the most pernicious outgrowths of the present system. The social strike seeks to force upon the employers a responsibility to the public. Primarily it has in view the protection of the customers, of whom the workers themselves [and their families] constitute the great majority”

Basically, direct action means that instead of getting someone else to act for you (e.g. a politician), you act for yourself. Its essential feature is an organised protest by ordinary people to make a

This, sadly, is the end result of all such attempts. Ultimately, supporters of using political action can only appeal to the good intentions and character of their candidates. Anarchists, however, present an analysis of state structures and other influences that parties involved will be shaped by the environment they are working within and not vice versa.

History is littered with examples of radical parties becoming a part of the system. From Marxian Social Democracy at the turn of the 19th century to the German Green Party in the 1980s, we have seen radical parties, initially proclaiming the need for direct action and extra-parliamentary activity denouncing these activities once in power. From only using parliament as a means of spreading their message, the parties involved end up considering votes as more important than the message. Janet Biehl sums up the effects on the German Green Party of trying to combine radical electioneering with direct action:

“the German Greens, once a flagship for the Green movement worldwide, should now be considered stink normal, as their de facto boss himself declares. Now a repository of careerists, the Greens stand out only for the rapidity with which the old cadre of careerism, party politics, and business-as-usual once again played itself out in their saga of compromise and betrayal of principle. Under the superficial veil of their old values — a very thin veil indeed, now — they can seek positions and make compromises to their heart’s content ... They have become ‘practical,’ ‘realistic’ and ‘power-orientated.’ This former New Left ages badly, not only in Germany but everywhere else. But then, it happened with the S.P.D. [The German Social Democratic Party] in August 1914, then why not with Die Grunen in 1991? So it did.” [“Party or Movement?”, Greenline, no. 89, p. 14]
So the “political power which they had wanted to conquer had gradually conquered their Socialism until there was scarcely anything left of it.” [Rocker, Op. Cit., p. 55]

Not that these arguments are the result of hindsight, we must add. Bakunin was arguing in the early 1870s that the “inevitable result [of using elections] will be that workers’ deputies, transferred to a purely bourgeois environment, and into an atmosphere of purely bourgeois political ideas … will become middle class in their outlook, perhaps even more so than the bourgeois themselves.” As long as universal suffrage “is exercised in a society where the people, the mass of workers, are economically dominated by a minority holding exclusive possession the property and capital of the country” elections “can only be illusory, anti-democratic in their results.” [The Political Philosophy of Bakunin, p. 216 and p. 213] This meant that “the election to the German parliament of one or two workers … from the Social Democratic Party” was “not dangerous” and, in fact, was “highly useful to the German state as a lightning-rod, or a safety-valve.” Unlike the “political and social theory” of the anarchists, which “leads them directly and inexorably to a complete break with all governments and all forms of bourgeois politics, leaving no alternative but social revolution,” Marxism, he argued, “inexorably enmeshes and entangles its adherents, under the pretext of political tactics, in endless accommodation with governments and the various bourgeois political parties — that is, it thrusts them directly into reaction.” [Bakunin, Statism and Anarchy, p. 193 and pp. 179–80] In the case of the German Social Democrats, this became obvious in 1914, when they supported their state in the First World war, and after 1918, when they crushed the German Revolution.

So history proved Bakunin’s prediction correct (as it did with his prediction that Marxism would result in elite rule). Simply put, for anarchists, the net effect of socialists using bourgeois elections would be to put them (and the movements they represent) into the quagmire of bourgeois politics and influences. In other words, the change by their own efforts. Thus Voltairine De Cleyre’s excellent statement on this topic:

“Every person who ever thought he had a right to assert, and went boldly and asserted it, himself, or jointly with others that shared his convictions, was a direct actionist. Some thirty years ago I recall that the Salvation Army was vigorously practicing direct action in the maintenance of the freedom of its members to speak, assemble, and pray. Over and over they were arrested, fined, and imprisoned; but they kept right on singing, praying, and marching, till they finally compelled their persecutors to let them alone. The Industrial Workers [of the World] are now conducting the same fight, and have, in a number of cases, compelled the officials to let them alone by the same direct tactics.

“Every person who ever had a plan to do anything, and went and did it, or who laid his plan before others, and won their co-operation to do it with him, without going to external authorities to please do the thing for them, was a direct actionist. All co-operative experiments are essentially direct action.

“Every person who ever in his life had a difference with anyone to settle, and went straight to the other persons involved to settle it, either by a peaceable plan or otherwise, was a direct actionist. Examples of such action are strikes and boycotts; many persons will recall the action of the housewives of New York who boycotted the butchers, and lowered the price of meat; at the present moment a butter boycott seems looming up, as a direct reply to the price-makers for butter.

“These actions are generally not due to any one’s reasoning overmuch on the respective merits of directness or in-
directness, but are the spontaneous retorts of those who feel oppressed by a situation. In other words, all people are, most of the time, believers in the principle of direct action, and practisers of it.” [The Voltairine De Cleyre Reader, pp. 47–8]

So direct action means acting for yourself against injustice and oppression. It can, sometimes, involve putting pressure on politicians or companies, for example, to ensure a change in an oppressive law or destructive practices. However, such appeals are direct action simply because they do not assume that the parties in question will act for us — indeed the assumption is that change only occurs when we act to create it. Regardless of what it is, “if such actions are to have the desired empowerment effect, they must be largely self-generated, rather than being devised and directed from above” and be “ways in which people could take control of their lives” so that it “empowered those who participated in it.” [Martha Ackelsberg, Free Women of Spain, p. 55]

So, in a nutshell, direct action is any form of activity which people themselves decide upon and organise themselves which is based on their own collective strength and does not involve getting intermediates to act for them. As such direct action is a natural expression of liberty, of self-government, for direct action “against the authority in the shop, direct action against the authority of the law, direct action against the invasive, meddlesome authority of our moral code, is the logical, consistent method of Anarchism.” [Emma Goldman, Red Emma Speaks, pp. 76–7] It is clear that by acting for yourself you are expressing the ability to govern yourself. Thus it is a means by which people can take control of their own lives. It is a means of self-empowerment and self-liberation.

Anarchists reject the view that society is static and that people’s consciousness, values, ideas and ideals cannot be changed. Far from it and anarchists support direct action because it actively encourages the transformation of those who use it. Direct action
“In former days the Socialists ... claimed that they meant to use politics only for the purpose of propaganda ... and took part in elections in order to have an opportunity to advocate Socialism.

“It may seem a harmless thing but it proved the undoing of Socialism. Because nothing is truer than the means you use to attain your object soon themselves become your object ... Little by little they changed their attitude. Instead of electioneering being merely an educational method, it gradually became their only method to secure political office, to get elected to legislative bodies and other government positions. The change naturally led the Socialists to tone down their revolutionary ardour; it compelled them to soften their criticism of capitalism and government in order to avoid persecution and secure more votes ... they have ceased to be revolutionists; they have become reformers who want to change things by law ... And everywhere, without exception, they have followed the same course, everywhere they have forsaken their ideals, have duped the masses ... There is a deeper reason for this constant and regular betrayal [than individual scoundrels being elected] ... no man turns scoundrel or traitor overnight.

“It is power which corrupts ... The filth and contamination of politics everywhere proves that. Moreover, even with the best intentions Socialists in legislative bodies or in governments find themselves entirely powerless to accomplishing anything of a socialistic nature ... The demoralisation and vitiation take place little by little, so gradually that one hardly notices it himself ... [The elected Socialist] finds himself in a strange and unfriendly atmosphere ... and he must participate in the business that is being transacted. Most of that is the means of creating a new consciousness, a means of self-liberation from the chains placed around our minds, emotions and spirits by hierarchy and oppression.

As direct action is the expression of liberty, the powers that be are vitally concerned only when the oppressed use direct action to win its demands, for it is a method which is not easy or cheap to combat. Any hierarchical system is placed into danger when those at the bottom start to act for themselves and, historically, people have invariably gained more by acting directly than could have been won by playing ring around the rosy with indirect means. Direct action tore the chains of open slavery from humanity. Over the centuries it has established individual rights and modified the life and death power of the master class. Direct action won political liberties such as the vote and free speech. Used fully, used wisely and well, direct action can forever end injustice and the mastery of humans by other humans.

In the sections that follow, we will indicate why anarchists are in favour of direct action and why they are against electioneering as a means of change.

J.2.1 Why do anarchists favour using direct action to change things?

Simply because it is effective and it has a radicalising impact on those who practice it. As it is based on people acting for themselves, it shatters the dependency and marginalisation created by hierarchy. This is key:

“What is even more important about direct action is that it forms a decisive step toward recovering the personal power over social life that the centralised, over-bearing bureaucracies have usurped from the people ... we not only gain a sense that we can control the course of social events again; we recover a new sense of selfhood and personality without which a truly free society, based in self-activity and self-
management, is utterly impossible.” [Murray Bookchin, Toward an Ecological Society, p. 47]

By acting for themselves, people gain a sense of their own power and abilities. This is essential if people are to run their own lives. As such, direct action is the means by which individuals empower themselves, to assert their individuality, to make themselves count as individuals by organising and acting collectively. It is the opposite of hierarchy, within which individuals are told again and again that they are nothing, are insignificant and must dissolve themselves into a higher power (the state, the company, the party, the people, etc.) and feel proud in participating in the strength and glory of this higher power. Direct action, in contrast, is the means of asserting your individual opinion, interests and happiness, of fighting against self-negation:

“man has as much liberty as he is willing to take. Anarchism therefore stands for direct action, the open defiance of, and resistance to, all laws and restrictions, economic, social and moral. But defiance and resistance are illegal. Therein lies the salvation of man. Everything illegal necessitates integrity, self-reliance, and courage. In short, it calls for free independent spirits, for men who are men, and who have a bone in their back which you cannot pass your hand through.” [Emma Goldman, Red Emma Speaks, pp. 75–6]

In addition, because direct action is based around individuals solving their own problems, by their own action, it awakens those aspects of individuals crushed by hierarchy and oppression — such as initiative, solidarity, imagination, self-confidence and a sense of individual and collective power, that what you do matters and that you with others like you can change the world. Direct action is the means by which people can liberate themselves and educate themselves in the ways of and skills required for self-management and liberty:

have lived in that isolator which is called a National Assembly to realise how the men who are most completely ignorant of the state of the country are almost always those who represent it.” There was “ignorance of daily facts” and “fear of the people” (“the sickness of all those who belong to authority”) for “the people, for those in power, are the enemy.” [The Anarchist Reader, p. 111] Ultimately, as syndicalist Emile Pouget argued, this fate was inevitable as any socialist politician “could not break the mould; he is only a cog in the machine of oppression and whether he wishes it or not he must, as minister, participate in the job of crushing the proletariat.” [quoted by Jennings, Op. Cit., p. 36]

These days, few enter Parliament as radicals like Proudhon. The notion of using elections for radical change is rare. Such a development in itself shows the correctness of the anarchist critique of electioneering. At its most basic, electioneering results in the party using it becoming more moderate and reformist — it becomes the victim of its own success. In order to gain votes, the party must appear “moderate” and “practical” and that means working within the system:

“Participation in the politics of the bourgeois States has not brought the labour movement a hair’s-breadth nearer to Socialism, but thanks to this method, Socialism has almost been completely crushed and condemned to insignificance ... Participation in parliamentary politics has affected the Socialist Labour movement like an insidious poison. It destroyed the belief in the necessity of constructive Socialist activity, and, worse of all, the impulse to self-help, by inoculating people with the ruinous delusion that salvation always comes from above.” [Rudolf Rocker, Anarcho-Syndicalism, p. 54]

This corruption does not happen overnight. Alexander Berkman indicated how it slowly developed:
are elected to office the radicals will happily do what they claimed
the right-wing would have done. In 1899, for example, the Social-
ist Alexandre Millerand joined the French Government. Nothing
changed. During industrial disputes strikers “appealed to Millerand
for help, confident that, with him in the government, the state would
be on their side. Much of this confidence was dispelled within a few
years. The government did little more for workers than its predeces-
sors had done; soldiers and police were still sent in to repress seri-
ous strikes.” [Peter N. Stearns, Revolutionary Syndicalism and
French Labour, p. 16] Aristide Briand, another socialist politi-
cian was the Minister of the Interior in 1910 and “broke a general
strike of railwaymen by use of the most draconian methods. Having
declared a military emergency he threatened all strikers with court
martial.” [Jeremy Jennings, Syndicalism in France p. 36] These
events occurred, it should be noted, during the period when so-
cial democratic parties were self-proclaimed revolutionaries and
arguing against anarcho-syndicalism by using the argument that
working people needed their own representatives in office to stop
troops being used against them during strikes!

Looking at the British Labour government of 1945 to 1951 we
find the same actions. What is often considered the most left-wing
Labour government ever used troops to break strikes in every year
it was in office, starting with a dockers’ strike days after it became
the new government. Again, in the 1970s, Labour used troops to
break strikes. Indeed, the Labour Party has used troops to break
strikes more often than the Conservative Party.

Many blame the individuals elected to office for these betrayals,
arguing that we need to elect better politicians, select better
leaders. For anarchists nothing could be more wrong as its the means
used, not the individuals involved, which is the problem. Writing
of his personal experience as a member of Parliament, Proudhon
recounted that “[a]s soon as I set foot in the parliamentary Sinai, I
ceased to be in touch with the masses; because I was absorbed by my
legislative work, I entirely lost sight of the current events ... One must

“Direct action meant that the goal of ... these activities
was to provide ways for people to get in touch with their
own powers and capacities, to take back the power of
naming themselves and their lives ... we learn to think
and act for ourselves by joining together in organisations
in which our experience, our perception, and our activity
can guide and make the change. Knowledge does not prece-
de experience, it flows from it ... People learn to be free
only by exercising freedom. [As one Spanish Anarchist
put it] 'We are not going to find ourselves ... with people
ready-made for the future ... Without continued exercise
of their faculties, there will be no free people ... The ex-
ternal revolution and the internal revolution presuppose
one another, and they must be simultaneous in order to
be successful.’” [Martha Ackelsberg, Free Women of
Spain, pp. 54–5]

So direct action, to use Bookchin’s words, is “the means whereby
each individual awakens to the hidden powers within herself and
himself, to a new sense of self-confidence and self-competence; it is
the means whereby individuals take control of society directly.” [Op.
Cit., p. 48]

In addition, direct action creates the need for new forms of social
organisation. These new forms of organisation will be informed
and shaped by the process of self-liberation, so be more anarchistic
and based upon self-management. Direct action, as well as liber-
ating individuals, can also create the free, self-managed organisa-
tions which can replace the current hierarchical ones (see section
I.2.3). For example, for Kropotkin, unions were “natural organs for
the direct struggle with capitalism and for the composition of the fu-
81] In other words, direct action helps create the new world in the
shell of the old:
“direct action not only empowered those who participated in it, it also had effects on others … [it includes] exemplary action that attracted adherents by the power of the positive example it set. Contemporary examples … include food or day-care co-ops, collectively run businesses, sweat equity housing programmes, women’s self-help health collectives, urban squats or women’s peace camps [as well as traditional examples as industrial unions, social centres, etc.]. While such activities empower those who engage in them, they also demonstrate to others that non-hierarchical forms of organisation can and do exist — and that they can function effectively.” [Ackelsberg, Op. Cit., p. 55]

Also, direct action such as strikes encourage and promote class consciousness and class solidarity. According to Kropotkin, “the strike develops the sentiment of solidarity” while, for Bakunin, it “is the beginnings of the social war of the proletariat against the bourgeoisie … Strikes are a valuable instrument from two points of view. Firstly, they electrify the masses, invigorate their moral energy and awaken in them the feeling of the deep antagonism which exists between their interests and those of the bourgeoisie … secondly they help immensely to provoke and establish between the workers of all trades, localities and countries the consciousness and very fact of solidarity: a twofold action, both negative and positive, which tends to constitute directly the new world of the proletariat, opposing it almost in an absolute way to the bourgeois world.” [quoted by Caroline Cahm, Kropotkin and the Rise of Revolutionary Anarchism 1872–1886, p. 256 and pp. 216–217]

Direct action, therefore, helps to create anarchists and anarchist alternatives within capitalism and statism. As such, it plays an essential role in anarchist theory and activity. For anarchists, direct action “is not a ‘tactic’ ... it is a moral principle, an ideal, a sensibility.
them. These non-voters are often disproportionately left-leaning, compared with those who did vote. So, anarchist abstentionism is a means of turning this negative reaction to an unjust system into positive activity.

So, anarchist opposition to electioneering has deep political implications which Luigi Galleani addressed when he wrote:

“The anarchists’ electoral abstentionism implies not only a conception that is opposed to the principle of representation (which is totally rejected by anarchism), it implies above all an absolute lack of confidence in the State ... Furthermore, anarchist abstentionism has consequences which are much less superficial than the inert apathy ascribed to it by the sneering careerists of ‘scientific socialism’ [i.e. Marxism]. It strips the State of the constitutional fraud with which it presents itself to the gullible as the true representative of the whole nation, and, in so doing, exposes its essential character as representative, procurer and policeman of the ruling classes.

“Distrust of reforms, of public power and of delegated authority, can lead to direct action [in the class struggle] ... It can determine the revolutionary character of this ... action; and, accordingly, anarchists regard it as the best available means for preparing the masses to manage their own personal and collective interests; and, besides, anarchists feel that even now the working people are fully capable of handling their own political and administrative interests.” [Op. Cit., pp. 13–14]

Therefore abstentionism stresses the importance of self-activity and self-libertarian as well as having an important educational effect in highlighting that the state is not neutral but serves to protect class rule and that meaningful change only comes from below, by

It should imbue every aspect of our lives and behaviour and outlook.” [Bookchin, Op. Cit., p. 48]

J.2.2 Why do anarchists reject voting as a means for change?

Simply because electioneering does not work. History is littered with examples of radicals being voted into office only to become as, or even more, conservative than the politicians they replaced.

As we have discussed previously (see section B.2) any government is under pressure from two sources of power, the state bureaucracy and big business. This ensures that any attempts at social change would be undermined and made hollow by vested interests, assuming they even reached that level to begin with (the de-radicalising effects of electioneering is discussed in section J.2.6). Here we will highlight the power of vested interests within democratic government.

For anarchists, the general nature of the state and its role within society is to ensure “the preservation of the economic ‘status quo,’ the protection of the economic privileges of the ruling class, whose agent and gendarme it is”. [Luigi Galleani, The End of Anarchism?, p. 28] As such, the state and capital restricts and controls the outcome of political action of the so-called sovereign people as expressed by voting.

Taking capital to begin with, if we assume that a relatively reformist government were elected it would soon find itself facing various economic pressures. Either capital would disinvest, so forcing the government to back down in the face of economic collapse, or the government in question would control capital leaving the country and so would soon be isolated from new investment and its currency would become worthless. Either is an effective weapon to control democratically elected governments as before ensure that the economy would be severely damaged and the promised
“reforms” would be dead letters. Far fetched? No, not really. As discussed in section D.2.1 such pressures were inflicted on the 1974 Labour Government in Britain and we see the threat reported everyday when the media reports on what “the markets” think of government policies or when loans are given only guarantee that the country is structurally adjusted in-line with corporate interests and bourgeois economic dogma.

As far as political pressures go, we must remember that there is a difference between the state and government. The state is the permanent collection of institutions that have entrenched power structures and interests. The government is made up of various politicians. It is the institutions that have power in the state due to their permanence, not the representatives who come and go. In other words, the state bureaucracy has vested interests and elected politicians cannot effectively control them:

“Such a bureaucracy consists of armed forces, police forces, and a civil service. These are largely autonomous bodies. Theoretically they are subordinate to a democratically elected Parliament, but the Army, Navy, and Air Forces are controlled by specially trained officers who from their schooldays onwards are brought up in a narrow caste tradition, and who always, in dealing with Parliament, can dominate that body by their superior technical knowledge, professional secrecy, and strategic bluff. As for the bureaucracy proper, the Civil Service, anyone who has had any experience of its inner workings knows the extent to which it controls the Cabinet, and through the Cabinet, Parliament itself. We are really ruled by a secret shadow cabinet ... All these worthy servants of the State are completely out of touch with the normal life of the nation.” [Herbert Read, Anarchy and Order, p. 100]
As an aside, it should be noted that while “in a society of rich and poor nothing is more necessary” than a bureaucracy as it is “necessary to protect an unfair distribution of property” it would be wrong to think that it does not have its own class interests: “Even if you abolish all other classes and distinctions and retain a bureaucracy you are still far from the classless society, for the bureaucracy is itself the nucleus of a class whose interests are totally opposed to the people it supposedly serves.” [Op. Cit., p. 99 and p. 100]

In addition to the official bureaucracies and their power, there is also the network of behind the scenes agencies which are its arm. This can be termed “the permanent government” and “the secret state”, respectively. The latter, in Britain, is “the security services, MI5, Special Branch and the secret intelligence service, MI6.” Other states have their equivalents (the FBI, CIA, and so on in the USA). By the former, it is meant “the secret state plus the Cabinet Office and upper echelons of Home and Foreign and Commonwealth Offices, the Armed Forces and Ministry of Defence ... and the so-called ‘Permanent Secretaries Club,’ the network of very senior civil servants — the ‘Mandarins.’” In short, the upper-echelons of the bureaucracy and state apparatus. Add to this “its satellites”, including M.P.s (particularly right-wing ones), “agents of influence” in the media, former security services personnel, think tanks and opinion forming bodies, front companies of the security services, and so on. [Stephen Dorril and Robin Ramsay, Smear! Wilson and the Secret State, pp. X-XI]

These bodies, while theoretically under the control of the elected government, can effectively (via disinformation, black operations, bureaucratic slowdowns, media attacks, etc.) ensure that any government trying to introduce policies which the powers that be disagree with will be stopped. In other words the state is not a neutral body, somehow rising above vested interests and politics. It is, and always will be, a institution which aims to protect specific sections of society as well as its own.

significant reforms. The only real response to the problems of representative democracy is to urge people not to vote. Such anti-election campaigns can be a valuable way of making others aware of the limitations of the current system, which is a necessary condition for their seriously considering the anarchist alternative of using direct action and build alternative social and economic organisations. The implications of abstentionism are discussed in the next section.

J.2.5 Why do anarchists support abstentionism and what are its implications?

At its most basic, anarchists support abstentionism because "participation in elections means the transfer of one’s will and decisions to another, which is contrary to the fundamental principles of anarchism." [Emma Goldman, Vision on Fire, p. 89] For, as Proudhon stressed, in a statist democracy, the people “is limited to choosing, every three or four years, its chiefs and its imposters.” [quoted by George Woodcock, Pierre-Joseph Proudhon, p. 152]

If you reject hierarchy then participating in a system by which you elect those who will govern you is almost like adding insult to injury! For, as Luigi Galleani pointed out, “whoever has the political competence to choose his own rulers is, by implication, also competent to do without them.” [The End of Anarchism?, p. 37] In other words, because anarchists reject the idea of authority, we reject the idea that picking the authority (be it bosses or politicians) makes us free. Therefore, anarchists reject governmental elections in the name of self-government and free association. We refuse to vote as voting is endorsing authoritarian social structures. We are (in effect) being asked to make obligations to the state, not our fellow citizens, and so anarchists reject the symbolic process by which our liberty is alienated from us.

Anarchists are aware that elections serve to legitimate government. We have always warned that since the state is an integral
An example of this “secret state” at work can be seen in the campaign against Harold Wilson, the Labour Prime Minister of Britain in the 1970s, which resulted in his resignation (as documented by Stephen Dorril and Robin Ramsay). Left-wing Labour M.P. Tony Benn was subjected to intense pressure by “his” Whitehall advisers during the same period:

“In early 1975, the campaign against Benn by the media was joined by the secret state. The timing is interesting. In January, his Permanent Secretary had 'declared war' and the following month began the most extraordinary campaign of harassment any major British politician has experienced. While this is not provable by any means, it does look as though there is a clear causal connection between withdrawal of Prime Ministerial support, the open hostility from the Whitehall mandarins and the onset of covert operations.” [Dorril and Ramsay, Op. Cit., p. 279]

This is not to forget the role of the secret state in undermining reformist and radical organisations and movements. This involvement goes from pure information gathering on “subversives”, to disruption and repression. Taking the example of the US secret state, Howard Zinn notes that in 1975:

“congressional committees ... began investigations of the FBI and CIA.

“The CIA inquiry disclosed that the CIA had gone beyond its original mission of gathering intelligence and was conducting secret operations of all kinds ... [for example] the CIA — with the collusion of a secret Committee of Forty headed by Henry Kissinger — had worked to 'destabilize' the [democratically elected, left-wing] Chilean government ...”

It may be argued that if a new political group is radical enough it will be able to use state power for good purposes. While we discuss this in more detail in section J.2.6, let us consider a specific case, that of the Greens as many of them believe that the best way to achieve their aims is to work within the current political system.

By pledging to use the electoral system to achieve change, Green parties necessarily commit themselves to formulating their proposals as legislative agendas. But once legislation is passed, the coercive mechanisms of the state will be needed to enforce it. Therefore, Green parties are committed to upholding state power. However, our analysis in section B.2 indicated that the state is a set of hierarchical institutions through which a ruling elite dominates society and individuals. And, as we have seen in section E, ecologists, feminists, and peace activists – who are key constituencies of the Green movement – all need to dismantle hierarchies and domination in order to achieve their respective aims. Therefore, since the state is not only the largest and most powerful hierarchy but also serves to maintain the hierarchical form of all major institutions in society (since this form is the most suitable for achieving ruling-class interests), the state itself is the main obstacle to the success of key constituencies of the Green movement. Hence it is impossible in principle for a parliamentary Green party to achieve the essential objectives of the Green movement. A similar argument would apply to any radical party whose main emphasis was social justice, which like the goals of feminists, radical ecologists, and peace activists, depends on dismantling hierarchies.

As we argued in the previous section, radical parties are under pressure from economic and state bureaucracies that ensure that even a sincere radical party would be powerless to introduce signif-
those whose energies might otherwise have gone into more radical and effective forms of activism. Principles were ignored in favour of having some influence, so producing watered-down legislation which tinkered with the system rather than transforming it.

As discussed in section H.3.9, the state is more complicated than the simple organ of the economically dominant class pictured by Marxists. There are continual struggles both inside and outside the state bureaucracies, struggles that influence policies and empower different groups of people. This can produce clashes with the ruling elite, while the need of the state to defend the system as a whole causes conflict with the interests of sections of the capitalist class. Due to this, many radical parties believe that the state is neutral and so it makes sense to work within it — for example, to obtain labour, consumer, and environmental protection laws. However, this reasoning ignores the fact that the organisational structure of the state is not neutral. To quote Brian Martin:

“The basic anarchist insight is that the structure of the state, as a centralised administrative apparatus, is inherently flawed from the point of view of human freedom and equality. Even though the state can be used occasionally for valuable ends, as a means the state is flawed and impossible to reform. The non-reformable aspects of the state include, centrally, its monopoly over ‘legitimate’ violence and its consequent power to coerce for the purpose of war, internal control, taxation and the protection of property and bureaucratic privilege.

“The problem with voting is that the basic premises of the state are never considered open for debate, much less challenge. The state’s monopoly over the use of violence for war is never at issue. Neither is the state’s use of violence against revolt from within. The state’s right to extract economic resources from the population is never questioned. Neither is the state’s guarantee of either pri-

“The investigation of the FBI disclosed many years of illegal actions to disrupt and destroy radical groups and left-wing groups of all kinds. The FBI had sent forged letters, engaged in burglaries ... opened mail illegally, and in the case of Black Panther leader Fred Hampton, seems to have conspired in murder ...”

“The investigations themselves revealed the limits of government willingness to probe into such activities ... [and they] submitted its findings on the CIA to the CIA to see if there was material the Agency wanted omitted.” [A People’s History of the United States, pp. 542–3]

Also, the CIA secretly employs several hundred American academics to write books and other materials to be used for propaganda purposes, an important weapon in the battle for hearts and minds. In other words, the CIA, FBI (and their equivalents in other countries) and other state bodies can hardly be considered neutral bodies, who just follow orders. They are a network of vested interests, with specific ideological viewpoints and aims which usually place the wishes of the voting population below maintaining the state-capital power structure in place.

Therefore we cannot expect a different group of politicians to react in different ways to the same economic and institutional influences and interests. Its no coincidence that left-wing, reformist parties have introduced right-wing, pro-capitalist (“Thatcherite/Reaganite”) policies similar to those right-wing, explicitly pro-capitalist parties have. This is to be expected as the basic function of any political system is to manage the existing state and economic structures and a society’s power relationships. It is not to alter them radically, The great illusion of politics is the notion that politicians have the power to make whatever changes they like. Looking at the international picture, the question obviously arises as to what real control do the politicians have over the international economy and its institutions or the pattern
of world trade and investment. These institutions have great
drive financial crises during the neo-liberal era).

This can be seen most dramatically in the military coup in Chile
against the democratically re-elected (left-wing) Allende govern-
ment by the military, aided by the CIA, US based corporations and
and business environment was made healthy for profits (see
section C.11). An extreme example, we know, but an important
one for any believer in freedom or the idea that the state machine
is somehow neutral and can be captured and used by left-wing par-
ties — particularly as the fate of Chile has been suffered by many
other reformist governments across the world.

Of course there have been examples of quite extensive reforms
which did benefit working class people in major countries. The
New Deal in the USA and the 1945–51 Labour Governments spring
to mind. Surely these indicate that our claims are false? Simply put,
no, they do not. Reforms can be won from the state when the dan-
gers of not giving in outweigh any weakening of ruling class power
implied in the reforms. In the face of economic crisis and working
class protest, the ruling elite often tolerates changes it would oth-
erwise fight tooth-and-nail in other circumstances. Reforms will
be allowed if they can be used to save the capitalist system and the
state from its own excesses and even improve their operation or if
not bending will mean being broke in the storm of social protest.
After all, the possibility of getting rid of the reforms when they
are no longer required will always exist as long as class society
remains.

This can be seen from the reformist governments of 1930s USA
and 1940s UK. Both faced substantial economic problems and both
were under pressure from below, by waves of militant working

J.2.4 Surely voting for radical parties will be
effective?

There is no doubt that voting can lead to changes in policies, which
can be a good thing as far as it goes. However, such policies are
formulated and implemented within the authoritarian framework
of the hierarchical capitalist state — a framework which itself is
never open to challenge by voting. On the contrary, voting legiti-
mates the state framework ensuring that social change will be (at
best) mild, gradual, and reformist rather than rapid and radical. In-
deed, the “democratic” process has resulted in all successful politi-
cal parties becoming committed to “more of the same” or tinkering
with the details at best (which is usually the limits of any policy
changes). This seems unlikely to change.

Given the need for radical systemic changes as soon as possible
due to the exponentially accelerating crises of modern civilisation,
working for gradual reforms within the electoral system must be
seen as a potentially deadly tactical error. Electioneering has al-
ways been the death of radicalism. Political parties are only radical
when they do not stand a chance of election. However, many social
activists continue to try to use elections, so participating in the sys-
tem which disempowers the majority and so helps create the social
problems they are protesting against. It should be a widely recog-
nised truism in radical circles that elections empower the politi-
cians and not the voters. Thus elections focus attention to a few
leaders, urging them to act for rather than acting for ourselves
(see section H.1.5). If genuine social change needs mass participa-
tion then, by definition, using elections will undermine that. This
applies to within the party as well, for working "within the system"
disempowers grassroots activists, as can be seen by the Green party
in Germany during the early eighties. The coalitions into which the
Greens entered with Social Democrats in the German legislature
often had the effect of strengthening the status quo by co-opting

3476

3485
the expansion of state power. Rather than seeing the system as one of ruler and ruled, people see at least the possibility of using state power to serve themselves. As electoral participation has increased, the degree of resistance to taxation, military service, and the immense variety of laws regulating behaviour, has been greatly attenuated” [Op. Cit., p. 126]

Ironically, voting has legitimated the growth of state power to such an extent that the state is now beyond any real popular control by the form of participation that made that growth possible. Nevertheless, the idea that electoral participation means popular control of government is so deeply implanted in people’s psyches that even the most overtly sceptical radical often cannot fully free themselves from it.

Therefore, voting has the important political implication of encouraging people to identify with state power and to justify the status quo. In addition, it feeds the illusion that the state is neutral and that electing parties to office means that people have control over their own lives. Moreover, elections have a tendency to make people passive, to look for salvation from above and not from their own self-activity. As such it produces a division between leaders and led, with the voters turned into spectators of activity, not the participants within it.

All this does not mean, obviously, that anarchists prefer dictatorship or an “enlightened” monarchy. Far from it, democratising state power can be an important step towards abolishing it. All anarchists agree with Bakunin when he argued that “the most imperfect republic is a thousand times better that even the most enlightened monarchy.” [quoted by Daniel Guerin, Anarchism, p. 20]

It simply means that anarchists refuse to join in with the farce of electioneering, particularly when there are more effective means available for changing things for the better. Anarchists reject the idea that our problems can be solved by the very institutions that cause them in the first place!

class struggle which could have developed beyond mere reformism. The waves of sit-down strikes in the 1930s ensured the passing of pro-union laws which allowed workers to organise without fear of being fired. This measure also partly integrated the unions into the capitalist-state machine by making them responsible for controlling “unofficial” workplace action (and so ensuring profits). The nationalisation of roughly 20% of the UK economy during the Labour administration of 1945 (the most unprofitable sections of it as well) was also the direct result of ruling class fear. As Conservative M.P. Quintin Hogg acknowledged in the House of Commons on the 17th February 1943: “If you do not give the people reform they are going to give you revolution”. Memories of the near revolutions across Europe after the First World War were obviously in many minds, on both sides. Not that nationalisation was particularly feared as “socialism.” Indeed it was argued that it was the best means of improving the performance of the British economy. As anarchists at the time noted “the real opinions of capitalists can be seen from Stock Exchange conditions and statements of industrialists than the Tory Front bench” and from these it be seen “that the owning class is not at all displeased with the record and tendency of the Labour Party.” [Neither Nationalisation nor Privatisation, Vernon Richards (ed.), p. 9]

History confirms Proudhon’s argument that the state “can only turn into something and do the work of the revolution insofar as it will be so invited, provoked or compelled by some power outside of itself that seizes the initiative and sets things rolling,” namely by “a body representative of the proletariat be formed in Paris ... in opposition to the bourgeoisie’s representation.” [Le Représentant du Peuple, 5th May 1848] So, if extensive reforms have implemented by the state, just remember what they were in response to militant pressure from below and that we could have got so much more. In general, things have little changed since this anarchist argument against electioneering was put forward in the 1880s:
in the electoral process, the working class will always be cheated and deceived ... if they did manage to send, one, or ten, or fifty of them to Parliament, they would become spoiled and powerless. Furthermore, even if the majority of Parliament were composed of workers, they could do nothing. Not only is there the senate ... the chiefs of the armed forces, the heads of the judiciary and of the police, who would be against the parliamentary bills advanced by such a chamber and would refuse to enforce laws favouring the workers (it has happened); but furthermore laws are not miraculous; no law can prevent the capitalists from exploiting the workers; no law can force them to keep their factories open and employ workers at such and such conditions, nor force shopkeepers to sell as a certain price, and so on.” [S. Merlino, quoted by Galleani, Op. Cit., p. 13]

As any worker will tell you, just because there are laws on such things as health and safety, union organising, working hours or whatever, it does not mean that bosses will pay any attention to them. While firing people for joining a union is illegal in America, it does not stop bosses doing so. Similarly, many would be surprised to discover that the 8 hour working day was legally created in many US states by the 1870s but workers had to strike for it in 1886 as it is not enforced. Ultimately, political action is dependent on direct action to be enforced where it counts (in the workplace and streets). And if only direct action can enforce a political decision once it is made, then it can do so beforehand so showing the limitations in waiting for politicians to act.

Anarchists reject voting for other reasons. The fact is that electoral procedures are the opposite of direct action. They are based on getting someone else to act on your behalf. Therefore, far from empowering people and giving them a sense of confidence and ability, electioneering dis-empowers them by creating a “leader” during the May ’68 revolt in France, for example, helped diffuse the revolutionary situation, as did the elections during the Argentine revolt against neo-liberalism in the early 2000s.

So by turning political participation into the “safe” activities of campaigning and voting, elections have reduced the risk of more radical direct action as well as building a false sense of power and sovereignty among the general population. Voting disempowers the grassroots by diverting energy from grassroots action. After all, the goal of electoral politics is to elect a representative who will act for us. Therefore, instead of taking direct action to solve problems ourselves, action becomes indirect, though the government. This is an insidiously easy trap to fall into, as we have been conditioned in hierarchical society from day one into attitudes of passivity and obedience, which gives most of us a deep-seated tendency to leave important matters to the “experts” and “authorities.” Kropotkin described well the net effect:

“Vote! Greater men that you will tell you the moment when the self-annihilation of capital has been accomplished. They will then expropriate the few usurpers left ... and you will be freed without having taken any more trouble than that of writing on a bit of paper the name of the man whom the heads of your faction of the party told you to vote for!” [quoted by Ruth Kinna, “Kropotkin’s theory of Mutual Aid in Historical Context”, pp. 259–283, International Review of Social History, No. 40, pp. 265–6]

Anarchists also criticise elections for giving citizens the false impression that the government serves, or can serve, the people. As Martin reminds us “the founding of the modern state a few centuries ago was met with great resistance: people would refuse to pay taxes, to be conscripted or to obey laws passed by national governments. The introduction of voting and the expanded suffrage have greatly aided
ment of the apparatus…If there was any possibility that the apparatus could effect a change in the system then they would dismantle it immediately. In other words the political system is an integral state institution, designed and refined to perpetuate its own existence. Ruling authority fixes the agenda by which the public are allowed to enter the political arena and that’s the fix they’ve settled on.” [Some Recent Attacks, p. 87]

We are taught from an early age that voting in elections is right and a duty. In US schools, for example, children elect class presidents and other officers. Often mini-general elections are held to “educate” children in “democracy.” Periodically, election coverage monopolises the media. We are made to feel guilty about shirking our “civic responsibility” if we do not vote. Countries that have no elections, or only rigged elections, are regarded as failures. As a result, elections have become a quasi-religious ritual. Yet, in reality, “elections in practice have served well to maintain dominant power structures such as private property, the military, male domination, and economic inequality. None of these has been seriously threatened through voting. It is from the point of view of radical critics that elections are most limiting.” [“Democracy without Elections”, pp. 123–36, Reinventing Anarchy, Again, Howard J. Ehrlich (ed.), p. 124]

Elections serve the interests of state power in other ways. First, voting helps to legitimize government; hence suffrage has often been expanded at times when there was little popular demand for it but when mass support of government was crucial, as during a war or revolution. Second, it comes to be seen as the only legitimate form of political participation, thus making it likely that any revolts by oppressed or marginalised groups will be viewed by the general public as illegitimate. It helps focus attention away from direct action and building new social structures back into institutions which the ruling class can easily control. The general election figure from which changes are expected to flow. As Brian Martin observes:

“All the historical evidence suggests that parties are more a drag than an impetus to radical change. One obvious problem is that parties can be voted out. All the policy changes they brought in can simply be reversed later.

“More important, though, is the pacifying influence of the radical party itself. On a number of occasions, radical parties have been elected to power as a result of popular upsurges. Time after time, the ‘radical’ parties have become chains to hold back the process of radical change.” [“Democracy without Elections”, pp. 123–36, Reinventing Anarchy, Again, Howard J. Ehrlich (ed.), p. 124]

This can easily be seen from the history of various left-wing parties. Labour or socialist parties, elected in periods of social turbulence, have often acted to reassure the ruling elite by dampening popular action that could have threatened capitalist interests. For example, the first action undertaken by the Popular Front elected in France in 1936 was to put an end to strikes and occupations and generally to cool popular militancy, which was the Front’s strongest ally in coming to power. The Labour government elected in Britain in 1945 got by with as few reforms as it could, refusing to consider changing basic social structures and simply replaced wage-labour to a boss with wage-labour to the state via nationalisation of certain industries. It did, however, manage to find time within the first days of taking office to send troops in to break a dockers’ strike (this was no isolated event: Labour has used troops to break strikes far more often than the Conservatives have).

These points indicate why existing power structures cannot effectively be challenged through elections. For one thing, elected representatives are not mandated, which is to say they are not tied
in any binding way to particular policies, no matter what promises they have made or what voters may prefer. Around election time, the public’s influence on politicians is strongest, but after the election, representatives can do practically whatever they want, because there is no procedure for instant recall. In practice it is impossible to recall politicians before the next election, and between elections they are continually exposed to pressure from powerful special-interest groups — especially business lobbyists, state bureaucracies and political party power brokers.

Under such pressure, the tendency of politicians to break campaign promises has become legendary. Generally, such promise breaking is blamed on bad character, leading to periodic “throw-the-bastards-out” fervour — after which a new set of representatives is elected, who also mysteriously turn out to be bastards! In reality it is the system itself that produces “bastards,” the sell-outs and shady dealing we have come to expect from politicians. In light of modern “democracy”, it is amazing that anyone takes the system seriously enough to vote at all. In fact, voter turnout in the US and other nations where “democracy” is practiced in this fashion is typically low. Nevertheless, some voters continue to participate, pinning their hopes on new parties or trying to reform a major party. For anarchists this activity is pointless as it does not get at the root of the problem, it is the system which produces “bastards,” and the system we have come to expect from politicians. In light of modern “democracy”, it is amazing that anyone takes the system seriously enough to vote at all. In fact, voter turnout in the US and other nations where “democracy” is practiced in this fashion is typically low. Nevertheless, some voters continue to participate, pinning their hopes on new parties or trying to reform a major party. For anarchists this activity is pointless as it does not get at the root of the problem, it is the system which produces “bastards,” and the system we have come to expect from politicians. In light of modern “democracy”, it is amazing that anyone takes the system seriously enough to vote at all. Nevertheless, some voters continue to participate, pinning their hopes on new parties or trying to reform a major party. For anarchists this activity is pointless as it does not get at the root of the problem, it is the system which produces “bastards,” and the system we have come to expect from politicians.

The problem of elections in a statist system, even on a local scale, means that the vast majority of anarchists reject voting as a means of change. Instead we wholeheartedly support direct action as the means of getting improvements in the here and now as well as the means of creating an alternative to the current system.

J.2.3 What are the political implications of voting?

At its most basic, voting implies agreement with the status quo. It is worth quoting the Scottish libertarian socialist James Kelman at length on this:

“State propaganda insists that the reason why at least 40 percent of the voting public don’t vote at all is because they have no feelings one way or the other. They say the same thing in the USA, where some 85 percent of the population are apparently ‘apolitical’ since they don’t bother registering a vote. Rejection of the political system is inadmissible as far as the state is concerned … Of course the one thing that does happen when you vote is that someone else has endorsed an unfair political system … A vote for any party or any individual is always a vote for the political system. You can interpret your vote in whichever way you like but it remains an endorse-
This did not mean that the Alliance was imposing a foreign theory onto the members of the unions, because the "programs of one and the other ... differ only in the degree of their revolutionary development ... The program of the Alliance represents the fullest unfolding of the International." [Bakunin on Anarchism, p. 157] Nor did it imply that anarchists think that unions and other forms of popular organisations should be controlled by anarchists. Far from it! Anarchists are the strongest supporters of the autonomy of all popular organisations. As we indicated in section J.3.6, anarchists desire to influence popular organisations by the strength of our ideas within the rank and file and not by imposing our ideas on them.

In addition to these major points of disagreement, there are minor ones as well. For example, many anarchists dislike the emphasis syndicalists place on the workplace and see "in syndicalism a shift in focus from the commune to the trade union, from all of the oppressed to the industrial proletariat alone, from the streets to the factories, and, in emphasis at least, from insurrection to the general strike." [Bookchin, Op. Cit., p. 123] However, most anarcho-syndicalists are well aware that life exists outside the workplace and so this disagreement is largely one of emphasis. Similarly, many anarchists disagreed with the early syndicalist argument that a general strike was enough to create a revolution. They argued, with Malatesta in the forefront, that while a general strike would be "an excellent means for starting the social revolution" it would be wrong to think that it made "armed insurrection unnecessary" since the "first to die of hunger during a general strike would not be the bourgeois, who dispose of all the stores, but the workers." In order for this not to occur, the workers would need to "take over production" which are protected by the police and armed forces and this meant "insurrection." [Malatesta, The Anarchist Reader, pp. 223–4] Again, however, most modern syndicalists accept this to be the case and see the "expropriatory general strike," in the words of French syndicalist Pierre Besnard, as "clearly insurrectional." [quoted by Vernon Richards, 3521]
J.3 What kinds of organisation do anarchists build?

Anarchists are well aware of the importance of building organisations. Organisations allow those within them to multiply their strength and activity, becoming the means by which an individual can see their ideas, hopes and dreams realised. This is as true for getting the anarchist message across as for building a home, running a hospital or creating some useful product. Anarchists support two types of organisation — organisations of anarchists and popular organisations which are not made up exclusively of anarchists such as industrial unions, co-operatives and community assemblies.

Here we will discuss the kinds, nature and role of the first type of organisation, namely explicitly anarchist organisations. In addition, we discuss anarcho-syndicalism, a revolutionary unionism which aims to create an anarchist society by anarchist tactics, as well as why many anarchists are not anarcho-syndicalists. The second type of organisations, popular ones, are discussed in section J.5. Both forms of organisation, however, share the anarchist commitment to confederalism, decentralisation, self-management and decision making from the bottom up. In such organisations the membership plays the decisive role in running them and ensuring that power remains in their hands. They express the anarchist vision of the power and creative efficacy people have when they are self-reliant, when they act for themselves and manage their own lives directly. Only by organising in this way can we create a new world, a world worthy of human beings and unique individuals.

the case that labour unions are by nature reformist, they cannot be expected to be enough in themselves when creating a free society. Hence the need for anarchists to organise as anarchists as well as alongside their fellow workers as workers in order to spread anarchist ideas on tactics and aims. This activity within existing unions does not necessarily mean attempting to “reform” the union in a libertarian manner (although some anarchists would support this approach). Rather it means working with the rank and file of the unions and trying to create autonomous workplace organisations, independent of the trade union bureaucracy and organised in a libertarian way.

This involves creating anarchist organisations separate from but which (in part) work within the labour movement for anarchist ends. Let us not forget that the syndicalist organisation is the union, it organises all workers regardless of their politics. A “union” which just let anarchists join would not be a union, it would be an anarchist group organised in the workplace. As anarcho-syndicalists themselves are aware, an anarcho-syndicalist union is not the same as a union of anarcho-syndicalists. How can we expect an organisation made up of non-anarchists be totally anarchist? Due to this, tendencies always appeared within syndicalist unions that were reformist and because of this most anarchists, including many anarcho-syndicalists we must note, argue that there is a need for anarchists to work within the rank and file of the unions to spread their anarchist ideals and aims, and this implies anarchist organisations separate from the labour movement, even if that movement is based on syndicalist unions.

As Bakunin argued, the anarchist organisation “is the necessary complement to the International [i.e. the union federation]. But the International and the Alliance [the anarchist federation], while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses ... regardless of nationality or religious and political beliefs, into one compact body: the Alliance, on the other hand, tries to give these masses a really revo-
taking the role of both anarchist group and labour union. Thus a key difference between anarcho-syndicalists and other anarchists is over the question of the need for a specifically anarchist organisation. While most anarchists are sympathetic to anarcho-syndicalism, few totally subscribe to anarcho-syndicalist ideas in their pure form. This is because, in its pure form, syndicalism rejects the idea of anarchist groups and instead considers the union as the focal point of social struggle and anarchist activism. However, an anarcho-syndicalist may support a specific anarchist federation to work within the union and outside.

So anarchists critical of anarcho-syndicalism are also active in the labour movement, working with the rank and file while keeping their own identity as anarchists and organising as anarchists. Thus Malatesta: "In the past I deplored that the comrades isolated themselves from the working-class movement. Today I deplore that many of us, falling into the contrary extreme, let themselves be swallowed up in the same movement." [Op. Cit., p. 225] In the eyes of other anarchists anarcho-syndicalism in its "pure" (revolutionary syndicalist) form makes the error of confusing the anarchist and union movement and so ensures that the resulting movement can do neither work well: "Every fusion or confusion between the anarchist movement and the trade union movement ends, either in rendering the later unable to carry out its specific task or by weakening, distorting, or extinguishing the anarchist spirit." [Malatesta, Errico Malatesta: His Life and Ideas, p. 123]

Most anarchists agree with Malatesta when he argued that "anarchists must not want the Trade Unions to be anarchist, but they must act within their ranks in favour of anarchist aims, as individuals, as groups and as federations of groups... [I]n the situation as it is, and recognising that the social development of one's workmates is what it is, the anarchist groups should not expect the workers' organisation to act as if they were anarchist, but should make every effort to induce them to approximate as much as possible to the anarchist method." [Op. Cit., pp. 124–5] Given that it appears to be

Anarchist organisation in all its forms reflects our desire to "build the new world in the shell of the old" and to empower the individual. We reject the notion that it does not really matter how we organise to change society. Indeed, nothing could be further from the truth. We are all the products of the influences and social relationships in our lives, this is a basic idea of (philosophical) materialism. Thus the way our organisations are structured has an impact on us. If the organisation is centralised and hierarchical (no matter how "democratically" controlled officials or leaders are) then those subject to it will, as in any hierarchical organisation, see their abilities to manage their own lives, their creative thought and imagination eroded under the constant stream of orders from above. This in turn justifies the pretensions to power of those at the top, as the capacity of self-management of the rank and file is weakened by authoritarian social relationships. This means anarchist organisations are structured so that they allow everyone the maximum potential to participate. Such participation is the key for a free organisation. As Malatesta argued:

"The real being is man, the individual. Society or the collectivity... if it is not a hollow abstraction, must be made up of individuals. And it is in the organism of every individual that all thoughts and human actions inevitably have their origin, and from being individual they become collective thoughts and acts when they are or become accepted by many individuals. Social action, therefore, is neither the negation nor the complement of individual initiative, but is the resultant of initiatives, thoughts and actions of all individuals who make up society." [Anarchy, p. 36]

Anarchist organisations exist to allow this development and expression of individual initiatives. This empowering of the individual is an important aspect of creating viable solidarity for sheep
cannot express solidarity, they only follow the shepherd. Therefore, “to achieve their ends, anarchist organisations must, in their constitution and operation, remain in harmony with the principles of anarchism; that is, they must know how to blend the free action of individuals with the necessity and the joy of co-operation which serve to develop the awareness and initiative of their members and a means of education for the environment in which they operate and of a moral and material preparation for the future we desire.” [Malatesta, The Anarchist Revolution, p. 95]

As such, anarchist organisations reflect the sort of society anarchists desire. We reject as ridiculous the claim of Leninists that the form of organisation we build is irrelevant and therefore we must create highly centralised parties which aim to become the leadership of the working class. No matter how “democratic” such organisations are, they just reflect the capitalist division of labour between brain and manual work and the Liberal ideology of surrendering our ability to govern ourselves to an elected elite. In other words, they just mirror the very society we are opposed to and so will soon produce the very problems within so-called anti-capitalist organisations which originally motivated us to oppose capitalism in the first place (see section H.5). Given this, anarchists regard “the Marxist party as another statist form that, if it succeeded in ‘seizing power,’ would preserve the power of one human being over another, the authority of the leader over the led. The Marxist party ... was a mirror image of the very society it professed to oppose, an invasion of the camp of revolutionaries by bourgeois values, methods, and structures.” [The Spanish Anarchists, pp. 179–80] As can be seen from the history of the Russian Revolution, this was the case with the Bolsheviks soon taking the lead in undermining workers’ self-management, soviet democracy and, finally, democracy within the ruling party itself (see section H.6).

From an anarchist (i.e. materialist) point of view, this was highly predictable — after all, “facts are before ideas; yes, the ideal, as Proudhon said, is but a flower whose root lies in the material conditions of movement (at the rank and file level, of course) is essential to gain influence for anarchist ideas, just as is working with unorganised workers. But this does not mean that the unions are revolutionary by their very nature, as syndicalism implies. As history shows, and as syndicalists themselves are aware, the vast majority of unions are reformist. Non-syndicalist anarchists argue there is a reason for that and syndicalist unions are not immune to these tendencies just because they call themselves revolutionary. Due to these tendencies, non-syndicalist anarchists stress the need to organise as anarchists first and foremost in order to influence the class struggle and encourage the creation of autonomous workplace and community organisations to fight that struggle. Rather than fuse the anarchist and working class movement, non-syndicalist anarchists stress the importance of anarchists organising as anarchists to influence the working class movement.

All this does not mean that purely anarchist organisations or individual anarchists cannot become reformist. Of course they can (just look at the Spanish FAI which along with the CNT co-operated with the state during the Spanish Revolution). However, unlike syndicalist unions, the anarchist organisation is not pushed towards reformism due to its role within society. That is an important difference — the institutional factors are not present for the anarchist federation as they are for the syndicalist union federation.

The second reason why many anarchists are not anarcho-syndicalists is the question of whether syndicalist unions are sufficient in themselves to create anarchy. Pierre Monatte, a French syndicalist, argued that “Syndicalism, as the [CGT’s] Congress of Amiens proclaimed in 1906, is sufficient unto itself” as “the working class, having at last attained majority, means to be self-sufficient and to rely on no-one else for its emancipation.” [The Anarchist Reader, p. 219] This idea of self-sufficiency means that the anarchist and the syndicalist movement must be fused into one, with syndicalism
“The problem of collective bargaining foreshadowed the difficulty of maintaining syndicalist principles in developed capitalist societies. Many organisations within the international syndicalist movement initially repudiated collective agreements with employers on the grounds that by a collaborative sharing of responsibility for work discipline, such agreements would expand bureaucratisation within the unions, undermine revolutionary spirit, and restrict the freedom of action that workers were always to maintain against the class enemy. From an early date, however, sometimes after a period of suspicion and resistance, many workers gave up this position. In the early decades of the century it became clear that to maintain or gain a mass membership, syndicalist unions had to accept collective bargaining.” [Marcel van der Linden and Wayne Thorpe, Op. Cit., p. 19]

Thus, for most anarchists, “the Trade Unions are, by their very nature reformist and never revolutionary. The revolutionary spirit must be introduced, developed and maintained by the constant actions of revolutionaries who work from within their ranks as well as from outside, but it cannot be the normal, natural definition of the Trade Unions function.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 117]

This does not mean that anarchists should not work within labour organisations. Nor does it mean rejecting anarcho-syndicalist unions as an anarchist tactic. Far from it. Rather it is a case of recognising these organisations for what they are, reformist organisations which are not an end in themselves but one (albeit, important) means of preparing the way for the achievement of anarchism. Neither does it mean that anarchists should not try to make labour organisations as anarchistic as possible or have anarchist objectives. Working within the labour existence.” [Bakunin, God and the State, p. 9] So it is unsurprising that hierarchical parties helped to maintain a hierarchical society. In the words of the famous Sonvillier Circular: “How could one want an egalitarian and free society to issue from an authoritarian organisation? It is impossible.” [quoted in Bakunin on Anarchism, p. 45]

We must stress here that anarchists are not opposed to organisation and are not opposed to organisations of anarchists (i.e. political organisations, although anarchists generally reject the term “party” due to its statist and hierarchical associations). Murray Bookchin made it clear when he wrote that the “real question at issue here is not organisation versus non-organisation, but rather what kind of organisation” Anarchist organisations are “organic developments from below ... They are social movements, combing a creative revolutionary lifestyle with a creative revolutionary theory ... As much as is humanly possibly, they try to reflect the liberated society they seek to achieve” and “co-ordination between groups ... discipline, planning, and unity in action ... achieved voluntarily, by means of a self-discipline nourished by conviction and understanding.” [Post-Scarcity Anarchism, pp. 138–9]

Ultimately, centralised organisations are undemocratic and, equally as important, ineffective. Hierarchical organisations kill people’s enthusiasm and creativity, where plans and ideas are not adopted because they are the best but simply because they are what a handful of leaders think are best for everyone else. Really effective organisations are those which make decisions based frank and open co-operation and debate, where dissent is not stifled and ideas are adopted because of their merit and not imposed from the top-down by a few party leaders. This is why anarchists stress federalist organisation. It ensures that co-ordination flows from below and there is no institutionalised leadership. By organising in a way that reflects the kind of society we want, we train ourselves in the skills and decision making processes required to make a free and classless society work.
Means and ends are united and this ensures that the means used will result in the desired ends. Simply put, libertarian means must be used if you want libertarian ends (see section H.1.6 for further discussion).

In the sections that follow, we discuss the nature and role of anarchist organisation. Anarchists would agree with Situationist Guy Debord that a “revolutionary organisation must always remember that its objective is not getting people to listen to speeches by expert leaders, but getting them to speak for themselves.” We organise their groups accordingly. In section J.3.1 we discuss the basic building block of specifically anarchist organisations, the “affinity group.”

Sections J.3.2, J.3.3, J.3.4 and J.3.5, we discuss the main types of federations of affinity groups anarchist create to help spread our message and influence. Then section J.3.6 highlights the role these organisations play in our struggles to create an anarchist society. In section J.3.7, we analyse Bakunin’s unfortunate expression “Invisible Dictatorship” in order to show how many Marxists distort Bakunin’s ideas on this matter. Finally, in sections J.3.8 and J.3.9 we discuss anarcho-syndicalism and other anarchists attitudes to it.

Anarchist organisations, therefore, aim to enrich social struggle by their ideas and suggestions but also, far more importantly, enrich the libertarian idea by practical experience and activity. In other words, a two way process by which life informs theory and theory aids life. The means by which this social dynamic is created and developed is the underlying aim of anarchist organisation and is reflected in its theoretical role. The power of ideas cannot be underestimated, for “if you have an idea you can communicate it to a million people and lose nothing in the process, and the more the idea is propagated the more it acquires in power and effectiveness.” [Malatesta, Op. Cit., p. 46] The right idea at the right time, one that reflects the needs of individuals and of required social change, can have a transforming effect on society. That is why organisations tendency towards reformism simply because the majority of their members will be non-revolutionary if the union grows in size in non-revolutionary times (as can be seen from the development of the Swedish syndicalist union the SAC).

So, if the union’s militant strategy succeeds in winning reforms, more and more workers will join it. This influx of non-libertarians must, in a self-managed organisation, exert a de-radicalising influence on the unions politics and activities in non-revolutionary times. The syndicalist would argue that the process of struggling for reforms combined with the educational effects of participation and self-management will reduce this influence and, of course, they are right. However, non-syndicalist anarchists would counter this by arguing that the libertarian influences generated by struggle and participation would be strengthened by the work of anarchist groups and, without this work, the de-radicalising influences would outweigh the libertarian ones. In addition, the success of a syndicalist union must be partly determined by the general level of class struggle. In periods of great struggle, the membership will be more radical than in quiet periods and it is quiet periods which cause the most difficulties for syndicalist unions. With a moderate membership the revolutionary aims and tactics of the union will also become moderate. As one academic writer on French syndicalism put it, syndicalism “was always based on workers acting in the economic arena to better their conditions, build class consciousness, and prepare for revolution. The need to survive and build a working-class movement had always forced syndicalists to adapt themselves to the exigencies of the moment.” [Barbara Mitchell, “French Syndicalism: An Experiment in Practical Anarchism”, pp. 25–41, Revolutionary Syndicalism, Marcel van der Linden and Wayne Thorpe (eds.), p. 25]

As can be seen from the history of many syndicalist unions (and, obviously, mainstream unions too) this seems to be the case — the libertarian tendencies are outweighed by the de-radicalising ones. This can also be seen from the issue of collective bargaining:
the most successful anarcho-syndicalist union) suffered from the problem of reformism, causing the anarchists in the union to organise the FAI in 1927 to combat it (which it did, very successfully). According to Jose Peirats, the “participation of the anarchist group in the mass movement CNT helped to ensure that CNT’s revolutionary nature.” This indicates the validity of Malatesta’s arguments concerning the need for anarchists to remain distinct of the unions organisationally while working within them — just as Peirat’s comment that “[b]linked by participation in union committees, the FAI became incapable of a wider vision” indicates the validity of Malatesta’s warnings against anarchists taking positions of responsibility in unions! [Anarchists in the Spanish Revolution, p. 241 and pp. 239–40]

Moreover, even the structure of syndicalist unions can cause problems: “In modelling themselves structurally on the bourgeois economy, the syndicalist unions tended to become the organisational counterparts of the very centralised apparatus they professed to oppose. By pleading the need to deal effectively with the tightly knit bourgeois and state machinery, reformist leaders in syndicalist unions often had little difficulty in shifting organisational control from the bottom to the top.” [Murray Bookchin, The Spanish Anarchists, p. 123]

In addition, as the syndicalist unions grow in size and influence their initial radicalism is usually watered-down. This is because, “since the unions must remain open to all those who desire to win from the masters better conditions of life, whatever their opinions may be ..., they are naturally led to moderate their aspirations, first so that they should not frighten away those they wish to have with them, and because, in proportion as numbers increase, those with ideas who have initiated the movement remain buried in a majority that is only occupied with the petty interests of the moment.” [Errico Malatesta, Anarchism and Syndicalism, p. 150] Which, ironically given that increased self-management is seen as a way of reducing tendencies towards bureaucracy, means that syndicalist unions have a

that anarchists create to spread their message are so important and why we devote a whole section to them.

**J.3.1 What are affinity groups?**

Affinity groups are the basic organisation which anarchists create to spread the anarchist idea. The term “affinity group” comes from the Spanish F.A.I. (Iberian Anarchist Federation) and refers to the organisational form devised in their struggles for freedom (from “grupo de afinidad”). At its most basic, it is a (usually small) group of anarchists who work together to spread their ideas to the wider public, using propaganda, initiating or working with campaigns and spreading their ideas within popular organisations (such as unions) and communities. It aims not to be a “leadership” but to give a lead, to act as a catalyst within popular movements. Unsurprisingly it reflects basic anarchist ideas:

> “Autonomous, communal and directly democratic, the group combines revolutionary theory with revolutionary lifestyle in its everyday behaviour. It creates a free space in which revolutionaries can remake themselves individually, and also as social beings.” [Murray Bookchin, Post-Scarcity Anarchism, p. 144]

The reason for this is simple, for a “movement that sought to promote a liberatory revolution had to develop liberatory and revolutionary forms. This meant ... that it had to mirror the free society it was trying to achieve, not the repressive one it was trying to overthrow. If a movement sought to achieve a world united by solidarity and mutual aid, it had to be guided by these precepts; if it sought to achieve a decentralised, stateless, non-authoritarian society, it had to be structured in accordance with these goals.” [Bookchin, The Spanish Anarchists, p. 180]
The aim of an anarchist organisation is to promote a sense of
community, of confidence in one’s own abilities, to enable all to be
involved in the identification, initiation and management of group
needs, decisions and activities. They must ensure that individuals
are in a position (both physically, as part of a group, and mentally,
as an individual) to manage their own lives and take direct action
in the pursuit of individual and communal needs and desires. Anar-
chist organisation is about empowering all, to develop “integral” or
whole individuals and a community that encourages individuality
(not abstract “individualism”) and solidarity. It is about collective
decision making from the bottom up, that empowers those at the
“base” of the structure and only delegates the work of co-ordinating
and implementing the members decisions (and not the power of
making decisions for people). In this way the initiative and power
of the few (government) is replaced by the initiative and empower-
ment of all (anarchy). Affinity groups exist to achieve these aims
and are structured to encourage them.

The local affinity group is the means by which anarchists co-
ordinate their activities in a community, workplace, social move-
ment and so on. Within these groups, anarchists discuss their
ideas, politics and hopes, what they plan to do, organise propa-
ganda work, discuss how they are going to work within wider or-
ganisations like unions, how their strategies fit into their long term
plans and goals and so on. It is the basic way that anarchists work
out their ideas, pull their resources and get their message across
to others. There can be affinity groups for different interests and
activities (for example a workplace affinity group, a community
affinity group, an anarcha-feminist affinity group, etc., could all
exist within the same area, with overlapping members). Moreover,
as well as these more “political” activities, the “affinity group” also
stresses the “importance of education and the need to live by Anar-
chist precepts — the need … to create a counter-society that could pro-
vide the space for people to begin to remake themselves.” [Bookchin,
Op. Cit., p. 180] In other words, “affinity groups” aim to be the
role of unionism as a seller of labour power means that it often has
to make compromises, compromises it has to make its members
agree to. This necessitates a tendency for power to be taken from
the rank and file of the unions and centralised in the hands of offi-
cials at the top of the organisation. This ensures that “the workers
organisation becomes what it must perform be in a capitalist society
— a means not of refusing to recognise and overthrowing the bosses,
but simply for hedging round and limiting the bosses’ power.” [Errico
Malatesta, The Anarchist Revolution, p. 29]

Anarcho-syndicalists are aware of this problem. That is why
their unions are decentralised, self-managed and organised from
the bottom up in a federal manner. As Durruti argued:

“No anarchists in the union committees unless at the
ground level. In these committees, in case of conflict with
the boss, the militant is forced to compromise to arrive at
an agreement. The contracts and activities which come
from being in this position, push the militant towards bu-
reaucracy. Conscious of this risk, we do not wish to run it.
Our role is to analyse from the bottom the different dan-
gers which can beset a union organisation like ours. No
militant should prolong his job in committees, beyond
the time allotted to him. No permanent and indispens-
able people.” [quoted by Abel Paz, Durruti: The Peo-
ple Armed, p. 183]

However, structure is rarely enough in itself to undermine the
bureaucratic tendencies created by the role of unions in the capitalist
economy. While such libertarian structures can slow down the
tendency towards bureaucracy, non-syndicalist anarchists argue
that they cannot stop it. They point to the example of the French
CGT which had become reformist by 1914 (the majority of other
syndicalist unions were crushed by fascism or communism before
they had a chance to develop fully). Even the Spanish CNT (by far
agreements and act. Moreover, these organisations must be autonomous, self-governing, be libertarian in nature and be independent of all parties and organisations (including anarchist ones). The similarity with anarcho-syndicalist ideas is striking.

So why, if this is the case, are many anarchists not anarcho-syndicalists? There are two main reasons for this. First, there is the question of whether unions are, by their nature, revolutionary organisations. Second, whether syndicalist unions are sufficient to create anarchy by themselves. We will discuss each in turn.

As can be seen from any country, the vast majority of unions are deeply reformist and bureaucratic in nature. They are centralised, with power resting at the top in the hands of officials. This suggests that in themselves unions are not revolutionary. As Malatesta argued, this is to be expected for “all movements founded on material and immediate interests (and a mass working class movement cannot be founded on anything else), if the ferment, the drive and the unremitting efforts of men [and women] of ideas struggling and making sacrifices for an ideal future are lacking, tend to adapt themselves to circumstances, foster a conservative spirit, and fear of change in those who manage to improve their conditions, and often end up by creating new privileged classes and serving to support and consolidate the system one would want to destroy.” [Op. Cit., pp. 113-4]

If we look at the role of the union within capitalist society we see that in order for it to work, it must offer a reason for the boss to recognise and negotiate with it. This means that the union must be able to offer the boss something in return for any reforms it gets, namely labour discipline. In return for an improvement in wages or conditions, the union must be able to get workers to agree to submit to the contracts the union signs with their boss. In other words, they must be able to control their members — stop them fighting the boss — if they are to have anything with which to bargain with. This results in the union becoming a third force in industry, with interests separate than the workers which it claims to represent. The

“living germs” of the new society in all aspects, not purely in a structurally way.

So affinity groups are self-managed, autonomous groupings of anarchists who unite and work on specific activities and interests. This means that “[i]n an anarchist organisation the individual members can express any opinion and use any tactic which is not in contradiction with accepted principles and which does not harm the activities of others.” [Errico Malatesta, The Anarchist Revolution, p. 102] Such groups are a key way for anarchists to co-ordinate their activity and spread their message of individual freedom and voluntary co-operation. However, the description of what an “affinity group” is does not explain why anarchists organise in that way. Essentially, these affinity groups are the means by which anarchists actually intervene in social movements and struggles in order to win people to the anarchist idea and so help transform them from struggles against injustice into struggles for a free society. We will discuss the role these groups play in anarchist theory in section J.3.6.

These basic affinity groups are not seen as being enough in themselves. Most anarchists see the need for local groups to work together with others in a confederation. Such co-operation aims to pull resources and expand the options for the individuals and groups who are part of the federation. As with the basic affinity group, the anarchist federation is a self-managed organisation:

“Full autonomy, full independence and therefore full responsibility of individuals and groups; free accord between those who believe it is useful to unite in co-operating for a common aim; moral duty to see through commitments undertaken and to do nothing that would contradict the accepted programme. It is on these bases that the practical structures, and the right tools to give life to the organisation should be built and designed. Then the groups, the federations of groups, the
federations of federations, the meetings, the congresses, the correspondence committees and so forth. But all this must be done freely, in such a way that the thought and initiative of individuals is not obstructed, and with the sole view of giving greater effect to efforts which, in isolation, would be either impossible or ineffective.” [Malatesta, Op. Cit., p. 101]

To aid in this process of propaganda, agitation, political discussion and development, anarchists organise federations of affinity groups. These take three main forms, “synthesis” federations (see section J.3.2), “Platformist” federations (see section J.3.3 while section J.3.4 has criticism of this tendency) and “class struggle” groups (see section J.3.5). All the various types of federation are based on groups of anarchists organising themselves in a libertarian fashion. This is because anarchists try to live by the values of the future to the extent that this is possible under capitalism and try to develop organisations based upon mutual aid, in which control would be exercised from below upward, not downward from above. We must also note here that these types of federation are not mutually exclusive. Synthesis type federations often have “class struggle” and “Platformist” groups within them (although, as will become clear, Platformist federations do not have synthesis groups within them) and most countries have different federations representing the different perspectives within the movement. Moreover, it should also be noted that no federation will be a totally “pure” expression of each tendency. “Synthesis” groups merge into “class struggle” ones, Platformist groups do not subscribe totally to the Platform and so on. We isolate each tendency to show its essential features. In real life few, if any, federations will exactly fit the types we highlight. It would be more precise to speak of organisations which are descended from a given tendency, for example the French Anarchist Federation is mostly influenced by the synthesis tradition but it

Goldman supported anarcho-syndicalist organisations and even, like Malatesta, helped form such revolutionary union federations (namely, the FORA in Argentina) and urged anarchists to take a leading role in organising unions. So when we use the term “non-syndicalist anarchist” we are not suggesting that these anarchists reject all aspects of anarcho-syndicalism. Rather, they are critical of certain aspects of anarcho-syndicalist ideas while supporting the rest.

In the past, a few communist-anarchists did oppose the struggle for improvements within capitalism as “reformist.” However, these were few and far between and with the rise of anarcho-syndicalism in the 1890s, the vast majority of communist-anarchists recognised that only by encouraging the struggle for reforms would people take them seriously as this showed the benefits of anarchist tactics and organisation in practice so ensuring anarchist ideas grow in influence. Thus syndicalism was a healthy response to the rise of “abstract revolutionarism” that infected the anarchist movement during the 1880s, particularly in France and Italy. Thus communist-anarchists agree with syndicalists on the importance of struggling for and winning reforms and improvements within capitalism by direct action and solidarity.

Similarly, anarchists like Malatesta also recognised the importance of mass organisations like unions. As he argued, “to encourage popular organisations of all kinds is the logical consequence of our basic ideas ... An authoritarian party, which aims at capturing power to impose its ideas, has an interest in the people remaining an amorphous mass, unable to act for themselves and therefore easily dominated ... But we anarchists do not want to emancipate the people; we want the people to emancipate themselves ... we want the new way of life to emerge from the body of the people and correspond to the state of their development and advance as they advance.” [Errico Malatesta: His Life and Ideas, p. 90] This can only occur when there are popular organisations, like trade unions, within which people can express themselves, come to common
was Big Bill Haywood who was a leader of the IWW and a leading member of the US Socialist Party. Marxist-syndicalists are generally in favour of more centralisation within syndicalist unions (the IWW was by far the most centralised syndicalist union) and often argue that a political party is required to complement the work of the union. Needless to say, anarcho-syndicalists disagree, arguing that centralisation kills the spirit of revolt and weakens a union’s real strength and that political parties are both ineffectual when compared to militant unionism and a constant source of corruption. [Rocker, Op. Cit., pp. 55–60] So not all syndicalists are anarchists, leading those anarchists who are syndicalists often use the term “anarcho-syndicalism” to indicate that they are both anarchists and syndicalists as well as to stress the libertarian roots and syndicalism. In addition, not all anarchists are syndicalists. We discuss the reasons for this in the next section.

For more information on anarcho-syndicalist ideas, Rudolf Rocker’s *Anarcho-Syndicalism* is still the classic introduction to the subject. The collection of articles by British syndicalist Tom Brown entitled *Syndicalism* is also worth reading. Daniel Guerin’s *No Gods, No Masters* contains articles by leading French syndicalist thinkers.

### J.3.9 Why are many anarchists not anarcho-syndicalists?

Before discussing why many anarchists are not anarcho-syndicalists, we must clarify a few points first. Let us be clear, non-syndicalist anarchists usually support the ideas of workplace organisation and struggle, of direct action, of solidarity and so on. Thus most non-syndicalist anarchists do not disagree with anarcho-syndicalists on these issues. Indeed, many even support the creation of syndicalist unions. Thus many anarcho-communists like Alexander Berkman, Errico Malatesta and Emma Goldman is not, strictly speaking, 100% synthesis. Lastly, we must also note that the term “class struggle” anarchist group in no way implies that “synthesis” and “Platformist” groups do not support the class struggle or take part in it, they most definitely do — it is simply a technical term to differentiate between types of organisation!

It must be stressed anarchists do not reduce the complex issue of political organisation and ideas into one organisation but instead recognise that different threads within anarchism will express themselves in different political organisations (and even within the same organisation). A diversity of anarchist groups and federations is a good sign and expresses the diversity of political and individual thought to be expected in a movement aiming for a society based upon freedom. All we aim to do is to paint a broad picture of the similarities and differences between the various perspectives on organising in the movement and indicate the role these federations play in libertarian theory, namely of an aid in the struggle, not a new leadership seeking power.

### J.3.2 What are “synthesis” federations?

The “synthesis” federation acquired its name from the work of Vo-line (a Russian exile) and leading French anarchist Sebastien Faure in the 1920s. Voline published in 1924 a paper calling for “the anarchist synthesis” and was also the author of the article in Faure’s *Encyclopedie Anarchiste* on the very same topic. Its roots lie in the Russian revolution and the Nabat federation created in the Ukraine during 1918 whose aim was “organising all of the life forces of anarchism; bringing together through a common endeavour all anarchists seriously desiring of playing an active part in the social revolution which is defined as a process (of greater or lesser duration) giving rise to a new form of social existence for the organised masses.” [No Gods, No Masters, vol. 2, p. 117]
The “synthesis” organisation is based on uniting all kinds of anarchists in one federation as there is, to use the words of the Nabat, “validity in all anarchist schools of thought. We must consider all diverse tendencies and accept them.” The synthesis organisation attempts to get different kinds of anarchists “joined together on a number of basic positions and with the awareness of the need for planned, organised collective effort on the basis of federation.” [quoted in “The Reply by Several Russian Anarchists”, pp. 32–6, Constructive Anarchism, G. P. Maximoff (ed.), p. 32] These basic positions would be based on a synthesis of the viewpoints of the members of the organisation, but each tendency would be free to agree their own ideas due to the federal nature of the organisation.

An example of this synthesis approach is provided by the differing assertions that anarchism is a theory of classes (as stated by the Platform, among others), that anarchism is a humanitarian ideal for all people and that anarchism is purely about individuals (and so essentially individualist and having nothing to do with humanity or with a class). The synthesis of these positions would be to “state that anarchism contains class elements as well as humanism and individualist principles ... Its class element is above all its means of fighting for liberation; its humanitarian character is its ethical aspect, the foundation of society; its individualism is the goal of humanity.” [Op. Cit., p. 32]

So, as can be seen, the “synthesis” tendency aims to unite all anarchists (be they individualist, mutualist, syndicalist or communist) into one common federation. Thus the “synthesis” viewpoint is “inclusive” and obviously has affinities with the “anarchism without adjectives” approach favoured by many anarchists (see section A.3.8). However, in practice many “synthesis” organisations are more restrictive (for example, they could aim to unite all social anarchists) and so there can be a difference between the general idea of the synthesis and how it is concretely applied.

The basic idea behind the synthesis is that the anarchist movement (in most countries, at most times, including France...
for and Against, pp. 82–3] A self-managed society can only be created by self-managed means, and as only the practice of self-management can ensure its success, the need for libertarian popular organisations is essential. Syndicalism is seen as the key way working people can prepare themselves for revolution and learn to direct their own lives. In this way syndicalism creates a true politics of the people, one that does not create a parasitic class of politicians and bureaucrats ("We wish to emancipate ourselves, to free ourselves", Pelloutier wrote, "but we do not wish to carry out a revolution, to risk our skin, to put Pierre the socialist in the place of Paul the radical" [quoted by Jeremy Jennings, Syndicalism in France, p. 17]).

This does not mean that syndicalists do not support organisations spontaneously created by workers’ in struggle (such as workers’ councils, factory committees and so on). Far from it. Syndicalists have played important roles in these kinds of organisation (as can be seen from the Russian Revolution, the factory occupations in Italy in 1920, the British Shop Steward movement and so on). This is because syndicalism acts as a catalyst to militant labour struggles and serves to counteract class-collaborationist tendencies by union bureaucrats and "socialist" politicians. Part of this activity must involve encouraging self-managed organisations where none exist and so syndicalists support and encourage all such spontaneous movements, hoping that they turn into the basis of a syndicalist union movement or a successful revolution. Moreover, most anarcho-syndicalists recognise that it is unlikely that every worker, nor even the majority, will be in syndicalist unions before a revolutionary period starts. This means new organisations, created spontaneously by workers in struggle, would have to be the framework of social struggle and the post-capitalist society rather than the syndicalist union as such. All the syndicalist union can do is provide a practical example of how to organise in a libertarian way within capitalism and statism and support spontaneously created organisations.

in the 1920s and Russia during the revolution and at this time) is divided into three main tendencies: communist anarchism, anarcho-syndicalism, and individualist anarchism. This division can cause severe damage to the movement simply because of the many (and often redundant) arguments and diatribes on why “my anarchism is best” can get in the way of working in common in order to fight our common enemies (state, capitalism and authority). The “synthesis” federations are defined by agreeing what is the common denominator of the various tendencies within anarchism and agreeing a minimum programme based on this for the federation. This would allow a “certain ideological and tactical unity among organisations” within the “synthesis” federation. [Op. Cit., p. 35] Moreover, as well as saving time and energy for more important tasks, there are technical and efficiency reasons for unifying into one organisation, namely allowing the movement to have access to more resources and being able to co-ordinate them so as to maximise their use and impact.

The “synthesis” federation, like all anarchist groups, aims to spread anarchist ideas within society as a whole. They believe that their role is to “assist the masses only when they need such assistance … the anarchists are part of the membership in the economic and social mass organisations [such as trade unions]. They act and build as part of the whole. An immense field of action is opened to them for ideological [sic!], social and creative activity without assuming a position of superiority over the masses. Above all they must fulfil their ideological and ethical influence in a free and natural manner … [they] offer ideological assistance, but not in the role of leaders.” [Op. Cit., p. 33] This, as we shall see in section J.3.6, is the common anarchist position as regards the role of an anarchist group.

The great strength of “synthesis” federations, obviously, is that they allow a wide and diverse range of viewpoints to be expressed within the organisation which can allow the development of political ideas and theories by constant discussion and debate. They al-
low the maximum amount of resources to be made available to individuals and groups within the organisation by increasing the number of members. This is why we find the original promoters of the “synthesis” arguing that “that first step toward achieving unity in the anarchist movement which can lead to serious organisation is collective ideological work on a series of important problems that seek the clearest possible collective solution,” discussing “concrete questions” rather than “philosophical problems and abstract dissertations” and “suggest that there be a publication for discussion in every country where the problems in our ideology [sic!] and tactics can be fully discussed, regardless of how ‘acute’ or even ‘taboo’ it may be. The need for such a printed organ, as well as oral discussion, seems to us to be a ‘must’ because it is the practical way to try to achieve ‘ideological unity’, ‘tactical unity’, and possibly organisation … A full and tolerant discussion of our problems … will create a basis for understanding, not only among anarchists, but among different conceptions of anarchism.” [Op. Cit., p. 35]

The “synthesis” idea for anarchist organisation was taken up by those who opposed the Platform (see next section). For both Faure and Voline, the basic idea was the same, namely that the various tendencies in anarchism must co-operate and work in the same organisation. However, there are differences between Voline’s and Faure’s points of view. The latter saw these various tendencies as a wealth in themselves and advocated that each tendency would gain from working together in a common organisation. From Voline’s point of view, the emergence of these various tendencies was historically needed to discover the in-depth implications of anarchism in various settings (such as the economical, the social and individual life). However, it was the time to go back to anarchism as a whole, an anarchism considerably empowered by what each tendency could give it, and in which tendencies as such should dissolve. Moreover, these tendencies co-existed in every anarchist at various levels, so all anarchists should aggregate in an organisation where these tendencies would disappear (both individually and order to reform them and make them syndicalist. This approach was favoured by French and British syndicalists, plus a few American ones. However, these two approaches are not totally in opposition. Many of the dual unions were created by syndicalists who had first worked within the existing trade unions. Once they got sick of the bureaucratic union machinery and of trying to reform it, they split from the reformist unions and formed new, revolutionary, ones. Similarly, dual unionists will happily support trade unionists in struggle and often be “two carders” (i.e. members of both the trade union and the syndicalist one). See section J.5.3 for more on anarchist perspectives on existing trades unions.

Syndicalists no matter what tactics they prefer, favour autonomous workplace organisations, controlled from below. Both tend to favour syndicalists forming networks of militants to spread anarchist syndicalist ideas within the workplace. Indeed, such a network (usually called “Industrial Networks” — see section J.5.4 for more details) would be an initial stage and essential means for creating syndicalist unions. These groups would encourage syndicalist tactics and rank and file organisation during struggles and so create the potential for building syndicalist unions as libertarian ideas spread and are seen to work.

Syndicalists think that such an organisation is essential for the successful creation of an anarchist society as it builds the new world in the shell of the old, making a sizeable majority of the population aware of anarchism and the benefits of anarchist forms of organisation and struggle. Moreover, they argue that those who reject syndicalism “because it believes in a permanent organisation of workers” and urge “workers to organise ‘spontaneously’ at the very moment of revolution” promote a “con-trick, designed to leave ‘the revolutionary movement,’ so called, in the hands of an educated class … [or] so-called ‘revolutionary party’ … [which] means that the workers are only expected to come in the fray when there’s any fighting to be done, and in normal times leave theorising to the specialists or students.” [Albert Meltzer, Anarchism: Arguments
addition, most anarcho-syndicalists support community organisations and struggle alongside the more traditional industry based approach usually associated within syndicalism. While we have concentrated on the industrial side here (simply because this is a key aspect of syndicalism) we must stress that syndicalism can and does lend itself to community struggles. It is a myth that anarcho-syndicalism ignores community struggles and organisation, as can be seen from the history of the Spanish CNT for example (see section J.5.1).

It must be stressed that a syndicalist union is open to all workers regardless of their political opinions (or lack of them). The union exists to defend workers’ interests as workers and is organised in an anarchist manner to ensure that their interests are fully expressed. This means that an syndicalist organisation is different from an organisation of syndicalists. What makes the union syndicalist is its structure, aims and methods. Obviously things can change (that is true of any organisation which has a democratic structure) but that is a test revolutionary and anarcho-syndicalists welcome and do not shirk from. As the union is self-managed from below up, its militancy and political content is determined by its membership. As Pouget put it, the union “offers employers a degree of resistance in geometric proportion with the resistance put up by its members.” [Op. Cit., p. 71] That is why syndicalists ensure that power rests in the members of the union.

Syndicalists have two main approaches to building revolutionary unions –

“dual unionism” and

“boring from within.” The former approach involves creating new, syndicalist, unions, in opposition to the existing trade unions. This approach was historically and is currently the favoured way of building syndicalist unions (American, Italian, Spanish, Swedish and numerous other syndicalists built their own union federations in the heyday of syndicalism between 1900 and 1920). “Boring from within” simply means working within the existing trade unions in organisationally, i.e. there would not be an “anarcho-syndicalist” specific tendency inside the organisation, and so forth).

The “synthesis” federation would be based on complete autonomy (within the basic principles of the Federation and Congress decisions, of course) for groups and individuals, so allowing all the different trends to work together and express their differences in a common front. The various groups would be organised in a federal structure, combining to share resources in the struggle against state, capitalism and other forms of oppression. This federal structure is organised at the local level through a “local union” (i.e. the groups in a town or city), at the regional level (i.e. all groups in, say, Strathclyde are members of the same regional union) up to the “national” level (i.e. all groups in Scotland, say) and beyond.

As every group in the federation is autonomous, it can discuss, plan and initiate an action (such as campaign for a reform, against a social evil, and so on) without having to wait for others in the federation (or have to wait for instructions). This means that the local groups can respond quickly to issues and developments. This does not mean that each group works in isolation. These initiatives may gain federal support if local groups see the need. The federation can adopt an issue if it is raised at a federal conference and other groups agree to co-operate on that issue. Moreover, each group has the freedom not to participate on a specific issue while leaving others to do so. Thus groups can concentrate on what they are interested in most.

The programme and policies of the federation would be agreed at regular delegate meetings and congresses. The “synthesis” federation is managed at the federal level by “relations committees” made up of people elected and mandated at the federation congresses. These committees would have a purely administrative role, spreading information, suggestions and proposals coming from groups and individuals within the organisation, looking after the finances of the federation and so on. They do not have any more rights than any other member of the federation (i.e. they could not make
a proposal as a committee, just as members of their local group or as individuals). These administrative committees are accountable to the federation and subject to both mandates and recall.

Most national sections of the International Anarchist Federation (IFA) are good examples of successful federations which are heavily influenced by “synthesis” ideas (such as the French and Italian federations). Obviously, though, how effective a “synthesis” federation is depends upon how tolerant members are of each other and how seriously they take their responsibilities towards their federations and the agreements they make.

Of course, there are problems with most forms of organisation, and the “synthesis” federation is no exception. While diversity can strengthen an organisation by provoking debate, a too diverse grouping can often make it difficult to get things done. Platformist and other critics of the “synthesis” federation argue that it can be turned into a talking shop and any common programme difficult to agree, never mind apply. For example, how can mutualists and communists agree on the ends, never mind the means, their organisation supports? One believes in co-operation within a (modified) market system and reforming capitalism away, while the other believes in the abolition of commodity production and money, seeing revolution as the means of so doing. Ultimately, all they could do would be to agree to disagree and thus any joint programmes and activity would be somewhat limited. It could, indeed, be argued that both Voline and Faure forgot essential points, namely what is this common denominator between the different kinds of anarchism, how do we achieve it and what is in it? For without this agreed common position, many synthesist organisations do end up becoming little more than talking shops, escaping from any social or organisational perspective. This seems to have been the fate of many groups in Britain and America during the 1960s and 1970s, for example.

It is this (potential) disunity that lead the authors of the Platform to argue that “[s]uch an organisation having incorporated het-

“With this object in view, Syndicalism works in two directions: first, by undermining the existing institutions; secondly, by developing and educating the workers and cultivating their spirit of solidarity, to prepare them for a full, free life, when capitalism shall have been abolished.

“Syndicalism is, in essence, the economic expression of Anarchism.” [Red Emma Speaks, p. 91]

Which, in turn, explains why syndicalist unions are structured in such an obviously libertarian way. It reflects the importance of empowering every worker by creating a union which is decentralised and self-managed, a union which every member plays a key role in determining its policy and activities. Participation ensures that the union becomes a “school for the will” (to use Pouget’s expression) and allows working people to learn how to govern themselves and do so without the state. After the revolution, the union can easily be transformed into the body by which production is organised. The aim of the union is workers’ self-management of production and distribution after the revolution, a self-management which the union is based upon in the here and now. The syndicalist union is seen as “the germ of the Socialist economy of the future, the elementary school of Socialism in general” and we need to “plant these germs while there is yet time and bring them to the strongest possible development, so as to make the task of the coming social revolution easier and to insure its permanence.” [Rocker, Op. Cit., p. 59]

Thus, as can be seen, syndicalism differs from trade unionism in its structure, its methods and its aims. Its structure, method and aims are distinctly anarchist. Little wonder leading syndicalist theorist Fernand Pelloutier argued that the trade union, “governing itself along anarchic lines,” must become “a practical schooling in anarchism.” [No Gods, No Masters, vol. 2, p. 55 and p. 57]
a position which is “political” in the wider sense of course! This
is obviously identical to the usual anarchist position (see section
J.2.10).

Which indicates an importance difference between syndicalism
and trade unionism. Syndicalism aims at changing society rather
than just working within it. Thus syndicalism is revolutionary
while trade unionism is reformist. For syndicalists the union “has a
double aim: with tireless persistence, it must pursue betterment of the
working class’s current conditions. But, without letting themselves
become obsessed with this passing concern, the workers should take
care to make possible and imminent the essential act of comprehen-
sive emancipation: the expropriation of capital.” Thus syndicalism
aims to win reforms by direct action and by this struggle bring the
possibilities of a revolution, via the general strike, closer. Indeed
any “desired improvement is to be wrested directly from the capitalist”
and “must always represent a reduction in capitalist privileges and be a
2, p. 71 and p. 73] Thus Emma Goldman:

“Of course Syndicalism, like the old trade unions, fights
for immediate gains, but it is not stupid enough to
pretend that labour can expect humane conditions from
inhumane economic arrangements in society. Thus it
merely wrests from the enemy what it can force him to
yield; on the whole, however, Syndicalism aims at, and
concentrates its energies upon, the complete overthrow
of the wage system.

“Syndicalism goes further: it aims to liberate labour from
every institution that has not for its object the free develop-
ment of production for the benefit of all humanity. In
short, the ultimate purpose of Syndicalism is to recon-
struct society from its present centralised, authoritative
and brutal state to one based upon the free, federated
erogeneous theoretical and practical elements, would only be a me-
chanical assembly of individuals each having a different conception
of all the questions of the anarchist movement, an assembly which
would inevitably disintegrate on encountering reality.” [The Organ-
isational Platform of the Libertarian Communists, p. 12] The
Platform suggested “Theoretical and Tactical Unity” as a means of
overcoming this problem, but that term provoked massive disagree-
ment in anarchist circles (see section J.3.4). In reply to the Platform,
supporters of the “synthesis” counter by pointing to the fact that
“Platformist” groups are usually very small, far smaller that “syn-
thesis” federations (for example, compare the size of the French
Anarchist Federation with, say, the Irish Workers Solidarity
Movement or the French-language Alternative Libertaire). This
means, they argue, that the Platform does not, in fact, lead to a
more effective organisation, regardless of the claims of its support-
ers. Moreover, they argue that the requirements for “Theoretical
and Tactical Unity” help ensure a small organisation as differences
would express themselves in splits rather than constructive activ-
ity. Needless to say, the discussion continues within the movement
on this issue!

What can be said is that this potential problem within “synthesi-
sim” has been the cause of some organisations failing or becoming
little more than talking shops, with each group doing its own thing
and so making co-ordination pointless as any agreements made
would be ignored. Most supporters of the synthesis would argue
that this is not what the theory aims for and that the problem lies in
misunderstanding it rather than in the theory itself (as can be seen
from mainland European, “synthesis” inspired federations can be
very successful). Non-supporters are more critical, with some sup-
porting the “Platform” as a more effective means of organising to
spread anarchist ideas and influence (see the next section). Other
social anarchists create the “class struggle” type of federation (this
is a common organisational form in Britain, for example) as dis-
cussed in section J.3.5.
J.3.3 What is the “Platform”? 

The Platform is a current within anarcho-communism which has specific suggestions on the nature and form which an anarchist federation should take. Its roots lie in the Russian anarchist movement, a section of which, in 1926, published “The Organisational Platform of the Libertarian Communists” when in exile from the Bolshevik dictatorship. The authors of the work included Nestor Makhno, Peter Arshinov and Ida Mett. At the time it provoked intense debate (and still does in many anarchist circles) between supporters of the Platform (usually called “Platformists”) and those who oppose it (which includes other communist-anarchists, anarcho-syndicalists and supporters of the “synthesis”). We will discuss why many anarchists oppose the Platform in the next section. Here we discuss what the Platform argued for.

Like the “synthesis” federation (see last section), the Platform was created in response to the experiences of the Russian Revolution. The authors of the Platform (like Voline and other supporters of the “synthesis”) had participated in that Revolution and saw all their work, hopes and dreams fail as the Bolshevik state triumphed and destroyed any chances of socialism by undermining soviet democracy, workers’ self-management of production, trade union democracy as well as fundamental individual freedoms and rights (see the section H.6 for details). Moreover, the authors of the Platform had been leading activists in the Makhnovist movement in the Ukraine which had successfully resisted both White and Red armies in the name of working class self-determination and anarchism (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). Facing the same problems of the Bolshevik government, the Makhnovists had actively encouraged popular self-management and organisation, freedom of speech and of association, and so on, whereas the Bolsheviks had not. Thus they were aware that anarchist ideas not only

ists, the workers were to be everything, the rest, nothing.” [Geoffrey Ostergaard, The Tradition of Workers’ Control, p. 38]

Therefore syndicalism is “consciously anti-parliamentary and anti-political. It focuses not only on the realities of power but also on the key problem of achieving its disintegration. Real power in syndicalist doctrine is economic power. The way to dissolve economic power is to make every worker powerful, thereby eliminating power as a social privilege. Syndicalism thus ruptures all the ties between the workers and the state. It opposes political action, political parties, and any participant in political elections. Indeed it refuses to operate in the framework of the established order and the state. It “turns to direct action — strikes, sabotage, obstruction, and above all, the revolutionary general strike. Direct action not only perpetuates the militancy of the workers and keeps alive the spirit of revolt, but awakens in them a greater sense of individual initiative. By continual pressure, direct action tests the strength of the capitalist system at all times and presumably in its most important arena — the factory, where ruled and ruler seem to confront each other most directly.” [Murray Bookchin, The Spanish Anarchists, p. 121]

This does not mean that syndicalism is “apolitical” in the sense of ignoring totally all political issues. This is a Marxist myth. Syndicalists follow other anarchists by being opposed to all forms of authoritarian/capitalist politics but do take a keen interest in “political” questions as they relate to the interests of working people. Thus they do not “ignore” the state, or the role of the state. Indeed, syndicalists (like all libertarians) are well aware that the state exists to protect capitalist property and power and that we need to combat it as well as fight for economic improvements. In short, syndicalism is deeply political in the widest sense of the word, aiming for a radical change in political, economic and social conditions and institutions. Moreover, it is political in the narrower sense of being aware of political issues and aiming for political reforms along with economic ones. It is only “apolitical” when it comes to supporting political parties and using bourgeois political institutions,
unions are sufficient in themselves to create libertarian socialism and rejects anarchist groups along with political parties. However, the dividing line can be unclear and, just to complicate things even more, some syndicalists support political parties and are not anarchists (there have been a few Marxist syndicalists, for example) but we will ignore these in our discussion. We will use the term syndicalism to describe what each branch has in common.

The syndicalist union is a self-managed industrial union (see section J.5.2) which is committed to direct action and refuses links with political parties, even labour or “socialist” ones. A key idea of syndicalism is that of union autonomy — the idea that the workers’ organisation is capable of changing society by its own efforts, that it must control its own fate and not be controlled by any party or other outside group (including anarchist federations). This is sometimes termed “workerism” (from the French “ouvrierisme”), i.e. workers’ control of the class struggle and their own organisations. Rather than being a cross-class organisation like the political party, the union is a class organisation and is so uniquely capable of representing working class aspirations, interests and hopes. “The syndicat,” Emile Pouget wrote, “groups together those who work against those who live by human exploitation: it brings together interests and not opinions.” [quoted by Jeremy Jennings, Syndicalism in France, pp. 30–1] There is, then, “no place in it for anybody who was not a worker. Professional middle class intellectuals who provided both the leadership and the ideas of the socialist political movement, were therefore at a discount. As a consequence the syndicalist movement was, and saw itself as, a purely working class form of socialism.” Syndicalism “appears as the great heroic movement of the proletariat, the first movement which took seriously” the argument “that the emancipation of the working class must be the task of labour unaided by middle class intellectuals or by politicians and aimed to establish a genuinely working class socialism and culture, free of all bourgeois taints. For the syndical-

For anyone familiar with the anarchist movement in many countries, these words will still strike home. Thus the Platform still appears to many anarchists a relevant and important document, even if they are not Platformists.

The author’s of the Platform proposed a solution to this problem, namely the creation of a new type of anarchist organisation. This organisation would be based upon communist-anarchist ideas exclusively, while recognising syndicalism as a principal method of struggle. Like most anarchists, the Platform placed class and class struggle as the centre of their analysis, recognising that the “social and political regime of all states is above all the product of class struggle … The slightest change in the course of the battle of classes, in the relative locations of the forces of the class struggle, produces continuous modifications in the fabric and structure of society.” Again, like most anarchists, the Platform aimed to “transform the present bourgeois capitalist society into a society which assures the workers the products of the labours, their liberty, independence, and social and political equality”, one based on “workers organisations of production and consumption, united federatively and self-administering.” The “birth, the blossoming, and the realisation of anarchist ideas have their roots in the life and the struggle of the working masses and are inseparable bound to their fate.” [Op. Cit., p. 14, p. 15, p. 19 and p. 15] Again, most anarchists (particularly social anarchists) would agree — anarchist ideas will (and have) wither when isolated from working class life since only working class people, the vast majority, can create a free society and anarchist ideas are expressions of working class experience (remove the experience and the ideas do not develop as they should).

In order to create such a free society it is necessary, argue the Platformists, “to work in two directions: on the one hand towards the selection and grouping of revolutionary worker and peasant forces on a libertarian communist theoretical basis (a specifically libertarian communist organisation); on the other hand, towards regrouping reorganisation of social life on the basis of free communism through the collective revolutionary action of the working classes themselves. It takes the view that only the economic organisations of the proletariat are appropriate for the realisation of this task and turns therefore to the workers in their capacity as producers and generators of social value, in opposition to the modern political labour parties, which for constructive economic purpose do not come into consideration.” [quoted by Wayne Thorpe, “The Workers Themselves”, p. 322]

The word “syndicalism” is an English rendering of the French for “revolutionary trade unionism” (“syndicalisme revolutionarie”). In the 1890s many anarchists in France started to work within the trade union movement, radicalising it from within. As the ideas of autonomy, direct action, the general strike and political independence of unions which where associated with the French Confederation Generale du Travail (CGT, or General Confederation of Labour) spread across the world (partly through anarchist contacts, partly through word of mouth by non-anarchists who were impressed by the militancy of the CGT), the word ”syndicalism” was used to describe movements inspired by the example of the CGT. Thus “syndicalism,” “revolutionary syndicalism” and “anarcho-syndicalism” all basically mean “revolutionary unionism” (the term “industrial unionism” used by the IWW essentially means the same thing).

The main difference is between revolutionary syndicalism and anarcho-syndicalism, with anarcho-syndicalism arguing that revolutionary syndicalism concentrates too much on the workplace and, obviously, stressing the anarchist roots and nature of syndicalism more than the former. In addition, anarcho-syndicalism is often considered compatible with supporting a specific anarchist organisation to complement the work of the revolutionary unions. Revolutionary syndicalism, in contrast, argues that the syndicalist
that Bakunin was inconsistent in some ways, as would be expected from a theorist breaking new ground, and this applies to his ideas on how anarchist groups should work within and the role they should play in popular movements. Most of his ideas are valid, once we place them into context, some are not. Anarchists embrace the valid ones and voice their opposition to the others.

In summary, any apparent contradiction between the “public” and “private” Bakunin disappears once we place his comments into context within both the letters he wrote and his overall political theory. As Brian Morris argues, those who argue that Bakunin was in favour of despotism only come to “these conclusions by an incredible distortion of the substance of what Bakunin was trying to convey in his letters to Richard and Nechaev” and “[o]nly the most jaundiced scholar, or one blinded by extreme antipathy towards Bakunin or anarchism, could interpret these words as indicating that Bakunin conception of a secret society implied a revolutionary dictatorship in the Jacobin sense, still less a ‘despotism’” [Bakunin: The Philosophy of Freedom, p. 144 and p. 149]

J.3.8 What is anarcho-syndicalism?

Anarcho-syndicalism (as mentioned in section A.3.2) is a form of anarchism which applies itself (primarily) to creating industrial unions organised in an anarchist manner, using anarchist tactics (such as direct action) to create a free society. To quote “The Principles of Revolutionary Syndicalism” of the International Workers Association:

“Revolutionary Syndicalism is that movement of the working classes founded on the basis of class war, which strives for the union of manual and intellectual workers in economic fighting organisations, in order to prepare for and realise in practice their liberation from the yoke of wage-slavery and state oppression. Its goal is the revolutionary workers and peasants on an economic base of production and consumption (revolutionary workers and peasants organised around production [i.e. syndicalism]; workers and free peasants cooperatives).” Again, most anarchists would agree with this along with the argument that “anarchism should become the leading concept of revolution … The leading position of anarchist ideas in the revolution suggests an orientation of events after anarchist theory. However, this theoretical driving force should not be confused with the political leadership of the statist parties which leads finally to State Power.” [Op. Cit., p. 20 and p. 21]

This “leadership of ideas” (as it has come to be known) would aim at developing and co-ordinating libertarian feelings already existing within social struggle. “Although the masses,” explained the Platform, “express themselves profoundly in social movements in terms of anarchist tendencies and tenets, these ... do however remain dispersed, being uncoordinated, and consequently do not lead to the ... preserving [of] the anarchist orientation of the social revolution.” [Op. Cit., p. 21] The Platform argued that a specific anarchist organisation was required to ensure that the libertarian tendencies initially expressed in any social revolution or movement (for example, free federation, self-management in mass assemblies, mandating of delegates, decentralisation, etc.) do not get undermined by statists and authoritarians who have their own agendas. This would be done by actively working in mass organisation and winning people to libertarian ideas and practices by argument (see section J.3.6).

However, these principles do not, in themselves, determine a Platformist organisation. After all, most anarcho-syndicalists and non-Platformist communist-anarchists would agree with these positions. The main point which distinguishes the Platform is its position on how an anarchist organisation should be structured and work. This is sketched in the “Organisational Section,” the shortest and most contentious part of the whole work. They called this
the General Union of Anarchists and where they introduced the concepts of

“Theoretical and Tactical Unity” and “Collective Responsibility,” concepts which are unique to the Platform. Even today within the anarchist movement these are contentious ideas so it is worth exploring them in a little more detail.

By “Theoretical Unity” the Platform meant any anarchist organisation must come to an agreement on the theory upon which it is based. In other words, that members of the organisation must agree on a certain number of basic points, such as class struggle, social revolution and libertarian communism, and so on. An organisation in which half the members thought that union struggles were important and the other half that they were a waste of time would not be effective as the membership would spend all their time arguing with themselves. While most Platformists admit that everyone will not agree on everything, they think it is important to reach as much agreement as possible, and to translate this into action. Once a theoretical position is reached, the members have to argue it in public (even if they initially opposed it within the organisation but they do have the right to get the decision of the organisation changed by internal discussion). Which brings us to “Tactical Unity” by which the Platform meant that the members of an organisation should struggle together as an organised force rather than as individuals. Once a strategy has been agreed by the Union, all members would work towards ensuring its success (even if they initially opposed it). In this way resources and time are concentrated in a common direction, towards an agreed objective.

Thus “Theoretical and Tactical Unity” means an anarchist organisation that agrees specific ideas and the means of applying them. The Platform’s basic assumption is that there is a link between coherency and efficiency. By increasing the coherency of the organisation by making collective decisions and applying them, the Platform argues that this will increase the influence of anarchist ideas. Without this, they argue, more organised groups (such as Leninist

Moving on to the second issue, the question of why Bakunin favoured secret organisation. At the time many states where despotic monarchies, with little or no civil rights. As he argued, “nothing but a secret society would want to take this [arousing a revolution] on, for the interests of the government and of the government classes would be bitterly opposed to it.” [Michael Bakunin: Selected Writings, p. 188] For survival, Bakunin considered secrecy an essential. As Juan Gomez Casas noted: “In view of the difficulties of that period, Bakunin believed that secret groups of convinced and absolutely trustworthy men were safer and more effective. They would be able to place themselves at the head of developments at critical moments, but only to inspire and to clarify the issues.” [Op. Cit., p. 22] Even Marxists, faced with dictatorial states, have organised in secret and as George R. Esenwein points out, the “claim that Bakunin’s organisation scheme was not the product of a ‘hard-headed realism’ cannot be supported in the light of the experiences of the Spanish Allianceists. It is beyond doubt that their adherence to Bakunin’s program greatly contributed to the FRE’s [Spanish section of the First International] ability to flourish during the early part of the 1870s and to survive the harsh circumstances of repression in the period 1874–1881.” [Op. Cit., p. 224] So Bakunin’s personal experiences in Tsarist Russia and other illiberal states shaped his ideas on how revolutionaries should organise (and let us not forget that he had been imprisoned in the Peter and Paul prison for his activities).

This is not to suggest that all of Bakunin’s ideas on the role and nature of anarchist groups are accepted by anarchists today. Most anarchists would reject Bakunin’s arguments for secrecy, for example (particularly as secrecy cannot help but generate an atmosphere of deceit and, potentially, manipulation). Anarchists remember that anarchism did not spring fully formed and complete from Bakunin’s (or any other individual’s) head. Rather it was developed over time and by many individuals, inspired by many different experiences and movements. As such, anarchists recognise
Bakunin did not create a hierarchical organisation with himself at the top. The evidence suggests that the Alliance “was not a compulsory or authoritarian body.” In Spain, it “acted independently and was prompted by purely local situations. The copious correspondence between Bakunin and his friends... was at all times motivated by the idea of offering advice, persuading, and clarifying. It was never written in a spirit of command, because that was not his style, nor would it have been accepted as such by his associates.” Moreover, there “is no trace or shadow or hierarchical organisation in a letter from Bakunin to Mora... On the contrary, Bakunin advises ‘direct’ relations between Spanish and Italian Comrades.” The Spanish comrades also wrote a pamphlet which “ridiculed the fable of orders from abroad.” [Casa, Op. Cit., p. 25 and p. 40] This is confirmed by George R. Esenwein who argues that “[w]hile it is true that Bakunin’s direct intervention during the early days of the International’s development in Spain had assured the pre-dominance of his influence in the various federations and sections” of the organisation, “it cannot be said that he manipulated it or otherwise used the Spanish Alliance as a tool for his own subversive designs.” Thus, “though the Alliance did exist in Spain, the society did not bear any resemblance to the nefarious organisation that the Marxists depicted.” [Anarchist Ideology and the Working Class Movement in Spain, p. 42] Indeed, as Max Nettlau points out, those Spaniards who did break with the Alliance were persuaded of its “hierarchical organisation ... not by their own direct observation, but by what they had been told about the conduct of the organisation” in other countries. [quoted by Casa, Op. Cit., pp. 39–40]. In addition, if Bakunin did run the Alliance under his own personal dictatorship we would expect it to change or dissolve upon his death. However, “the Spanish Alliance survived Bakunin, who died in 1876, yet with few exceptions it continued to function in much the same way it had during Bakunin’s lifetime.” [Esenwein, Op. Cit., p. 43]
recognising each member’s rights to independence, free opinion, individual liberty and initiative, requires each member to undertake fixed organisation duties, and demands execution of communal decisions.” [Op. Cit., p. 33 and pp. 33–4]

As part of their solution to the problem of anarchist organisation, the Platform suggested that each group would have “its secretariat, executing and guiding theoretically the political and technical work of the organisation.” Moreover, the Platform urged the creation of an “executive committee of the Union” which would “be in charge” of “the execution of decisions taken by the Union with which it is entrusted; the theoretical and organisational orientation of the activity of isolated organisations consistent with the theoretical positions and the general tactical lines of the Union; the monitoring of the general state of the movement; the maintenance of working and organisational links between all the organisations in the Union; and with other organisation.” The rights, responsibilities and practical tasks of the executive committee are fixed by the congress of the Union. [Op. Cit., p. 34]

This suggestion, unsurprisingly, meet with strong disapproval by most anarchists, as we will see in the next section, who argued that this would turn the anarchist movement into a centralised, hierarchical party similar to the Bolsheviks. Needless to say, supporters of the Platform reject this argument and point out that the Platform itself is not written in stone and needs to be discussed fully and modified as required. In fact, few, if any, Platformist groups, do have this “secretariat” structure (it could, in fact, be argued that there are no actual “Platformist” groups, rather groups influenced by the Platform, namely on the issues of “Theoretical and Tactical Unity” and “Collective Responsibility”).

Similarly, most modern day Platformists reject the idea of gathering all anarchists into one organisation. The original Platform seemed to imply that the General Union would be an umbrella organisation, made up of different groups and individuals. Most Platformists would argue that not only will there never be one or-

“Everything was done in broad daylight, openly, for everyone to see ... The Alliance had regular weekly open meetings and everyone was urged to participate in the discussions ... The old procedure where members sat and passively listened to speakers talking down to them from their pedestal was discarded.

“It was established that all meetings be conducted by informal round-table conversational discussions in which everybody felt free to participate: not to be talked at, but to exchange views.” [Op. Cit., pp. 405–6]

Moreover, we find Bakunin being out-voted within the Alliance, hardly what we would expect if they were top-down dictatorships run by him as Marxists claim. The historian T.R. Ravindranathan indicates that after the Alliance was founded “Bakunin wanted the Alliance to become a branch of the International [Worker’s Association] and at the same time preserve it as a secret society. The Italian and some French members wanted the Alliance to be totally independent of the IWA and objected to Bakunin’s secrecy. Bakunin’s view prevailed on the first question as he succeeded in convincing the majority of the harmful effects of a rivalry between the Alliance and the International. On the question of secrecy, he gave way to his opponents.” [Bakunin and the Italians, p. 83]

Moreover, if Bakunin did seek to create a centralised, hierarchical organisation, as Marxists claim, he did not do a good job. We find him complaining that the Madrid Alliance was breaking up (“The news of the dissolution of the Alliance in Spain saddened Bakunin. he intensified his letter-writing to Alliance members whom he trusted ... He tried to get the Spaniards to reverse their decision” [Juan Gomez Casa, Anarchist Organisation, pp. 37–8]). While the “Bakuninist” Spanish and Swiss sections of the IWA sent delegates to its infamous Hague congress, the “Bakuninist” Italian section did not. Of course, Marxists could argue that these facts show Bakunin’s cunning nature, but the more obvious explanation is that
Having shown that the role of Bakunin’s revolutionary organisations is drastically different than that suggested by the selective quotations of Marxists, we need to address two more issues. One, the so-called hierarchical nature of Bakunin’s organisations and, two, their secret nature. Taking the issue of hierarchy first, we can do no better than quote Richard B. Saltman’s summary of the internal organisation of these groups:

“The association’s ‘single will,’ Bakunin wrote, would be determined by ‘laws’ that every member ‘helped to create,’ or at a minimum ‘equally approved’ by ‘mutual agreement.’ This ‘definite set of rules’ was to be ‘frequently renewed’ in plenary sessions wherein each member had the ‘duty to try and make his view prevail,’ but then he must accept fully the decision of the majority. Thus the revolutionary association’s ‘rigorously conceived and prescribed plan,’ implemented under the ‘strictest discipline,’ was in reality to be ‘nothing more or less than the expression and direct outcome of the reciprocal commitment contracted by each of the members towards the others.’” [Op. Cit., p. 115]

While many anarchists would not totally agree with this set-up (although we think that most supporters of the “Platform” would) all would agree that it is not hierarchical. If anything, it appears quite democratic in nature. Moreover, comments in Bakunin’s letters to other Alliance members support the argument that his revolutionary associations were more democratic in nature than Marxists suggest. In a letter to a Spanish comrade we find him suggesting that “all [Alliance] groups… should… from now on accept new members not by majority vote, but unanimously.” [Op. Cit., p. 386] In a letter to Italian members of the IWMA he argued that in Geneva the Alliance did not resort to “secret plots and intrigues.” Rather:

Organisation which encompasses everyone, they do not think it necessary. Instead they envisage the existence of a number of organisations, each internally unified, each co-operating with each other where possible, a much more amorphous and fluid entity than a General Union of Anarchists.

As well as the original Platform, most Platformists place the Manifesto of Libertarian Communism by Georges Fontenis and Towards a Fresh Revolution by the “Friends of Durruti” as landmark texts in the Platformist tradition. A few anarcho-syndicalists question this last claim, arguing that the “Friends of Durruti” manifesto has strong similarities with the CNT’s pre-1936 position on revolution and thus is an anarcho-syndicalist document, going back to the position the CNT ignored after July 19th, 1936. Alexandre Skirda’s book Facing the Enemy contains the key documents on the original Platformists (including the original draft Platform, supplementary documents clarifying issues and polemics against critiques). There are numerous Platformist and Platformist influenced organisations in the world today, such as the Irish Workers Solidarity Movement and Italian Federation of Anarchist Communists.

In the next section we discuss the objections that most anarchists have towards the Platform.

J.3.4 Why do many anarchists oppose the “Platform”?

When the “Platform” was published it provoked a massive amount of debate and comment, the majority of it critical. Most of famous anarchists rejected the Platform. Indeed, only Nestor Makhno (who co-authored the work) supported its proposals, with (among others) Alexander Berkman, Emma Goldman, Voline, G.P. Maximoff, Luigi Fabbri, Camilo Berneri and Errico Malatesta rejecting its suggestions on how anarchists should organise. Some argued
that the Platform was trying to “Bolshevise” anarchism (“They are only one step away from bolshevism.” ["The Reply by Several Russian Anarchists", pp. 32–6, Constructive Anarchism, G.P. Maximoff (ed.), pp. 36]). Others, such as Malatesta, suggested that the authors were too impressed by the apparent “success” of the Bolsheviks in Russia. Since then, it has continued to provoke a lot of debate in anarchist circles. So why do so many anarchists oppose the Platform?

While many of the anti-Platformists made points about most parts of the Platform (both Maximoff and Voline pointed out that while the Platform denied the need of a “Transitional Period” in theory, it accepted it in practice, for example) the main bone of contention was found in the “Organisational Section” with its call for “Tactical and Theoretical Unity,” “Collective Responsibility” and group and executive “secretariats” guiding the organisation. Here most anarchists found ideas they considered incompatible with libertarian ideas. We will concentrate on this issue as it is usually considered as the most important.

Today, in some quarters of the libertarian movement, the Platformists are often dismissed as “would-be leaders.” Yet this was not where Malatesta and other critics of the Platform took issue. Malatesta and Maximoff both argued that, to use Maximoff’s words, anarchists should “go into the masses... , work[ing] with them, struggle for their soul, and attempt to win it ideologically [sic!] and give it guidance.” So the question was “not the rejection of leadership, but making certain it is free and natural.” [Constructive Anarchism, p. 19] Moreover, as Maximoff noted, the “synthesis” anarchists came to the same conclusion. Thus all sides of the debate accepted that anarchists should take the lead. The question, as Malatesta and the others saw it, was not whether to lead, but rather how you should lead — a fairly important distinction.

Malatesta posed two alternatives, either you “provide leadership by advice and example leaving people themselves to ... adopt our methods and solutions if these are, or seem to be, better than those

So rather than seek power, the anarchists would seek influence based on the soundness of their ideas, what anarchists today term the “leadership of ideas” in other words. Thus the anarchist federation “unleashes their [the peoples] will and gives wider opportunity for their self-determination and their social-economic organisation, which should be created by them alone from the bottom upwards ... The [revolutionary] organisation ... [must] not in any circumstances ... ever be their master ... What is to be the chief aim and pursue of this organisation? To help the people towards self-determination on the lines of the most complete equality and fullest human freedom in every direction, without the least interference from any sort of domination ... that is without any sort of government control.” [Op. Cit., p. 191]

This analysis can be seen from Bakunin’s discussion on union bureaucracy and how anarchists should combat it. Taking the Geneva section of the IWMA, Bakunin notes that the construction workers’ section “simply left all decision-making to their committees ... In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership.” To combat this bureaucracy, the union “sections could only defend their rights and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies ... In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed.” Given that Bakunin considered “the federative Alliance of all the workers’ associations” would “constitute the Commune” by means of delegates with “always responsible, and revocable mandates”, we can easily see that the role of the anarchist federation would be to intervene in general assemblies of these associations and ensure, through debate, that the most progressive opinion prevailed. [Bakunin on Anarchism, p. 246, p. 247 and p. 153]
Therefore, from both the fuller context provided by the works and letters selectively quoted by Marxists and his other writings, we find that rather than being a secret authoritarian, Bakunin was, in fact, trying to express how anarchists could “naturally influence” the masses and their revolution:

“We are the most pronounced enemies of every sort of official power ... We are the enemies of any sort of publicly declared dictatorship, we are social revolutionary anarchists ... if we are anarchists, by what right do we want to influence the people, and what methods will we use? Denouncing all power, with what sort of power, or rather by what sort of force, shall we direct a people’s revolution? By a force that is invisible ... that is not imposed on anyone ... [and] deprived of all official rights and significance.” [Michael Bakunin: Selected Writings, pp. 191–2]

Continually opposing “official” power, authority and influence, Bakunin used the term “invisible, collective dictatorship” to describe the “natural influence” of organised anarchists on mass movements. Rather than express a desire to become a dictator, it in fact expresses the awareness that there is an “uneven” political development within the working class, an unevenness that can only be undermined by discussion within the mass assemblies of popular organisations. Any attempt to by-pass this “unevenness” by seizing or being elected to positions of power (i.e. by “official influence”) would be doomed to failure and result in dictatorship by a party — “triumph of the Jacobins or the Blanquists [or the Bolsheviks, we must add] would be the death of the Revolution.” [Op. Cit., p. 169] suggested and carried out by others” or you can “direct by taking over command, that is by becoming a government.” He asked the Platformists: “In which manner do you wish to direct?” While he thought, from his knowledge of Makhno and his work, that the answer would be the first option, he was “assailed by doubt that [Makhno] would also like to see, within the general movement, a central body that would, in an authoritarian manner, dictate the theoretical and practical programme for the revolution.” This was because of the “Executive Committee” in the Platform which would “give ideological and organisational direction to the association.” [The Anarchist Revolution, p. 108 and p. 110]

Maximoff made the same point, arguing that the Platform implied that anarchists in the unions are responsible to the anarchist federation, not to the union assemblies that elected them. As he put it, according to the Platform anarchists “are to join the Trades Unions with ready-made recipes and are to carry out their plans, if necessary, against the will of the Unions themselves.” This was just one example of a general problem, namely that the Platform “places its Party on the same height as the Bolsheviks do, i.e., it places the interests of the Party above the interests of the masses since the Party has the monopoly of understanding these interests.” [Constructive Anarchism, p. 19 and p. 18] This flowed from the Platform arguing that anarchists must “enter into revolutionary trade unions as an organised force, responsible to accomplish work in the union before the general anarchist organisation and orientated by the latter.” However, Maximoff’s argument may be considered harsh as the Platform also argued that anarchism “aspire neither to political power nor dictatorship” and so they would hardly be urging the opposite principles within the trade union movement. [The Organisational Platform of the Libertarian Communists, p. 25 and p. 21] If we take the Platform’s comments within a context informed by the “leadership of ideas” concept (see section J.3.6) then what they meant was simply that the anarchist group would convince the union members of the validity of their ideas by argument
which was something Maximoff did not disagree with. In short, the disagreement becomes one of unclear (or bad) use of language by the Platform’s authors.

Despite many efforts and many letters on the subject (in particular between Malatesta and Makhno) the question of “leadership” could not be clarified to either side’s satisfaction, in part because there was an additional issue in dispute. This was the related issue of organisational principles (which in themselves make up the defining part of the original Platform). Malatesta argued that this did not conform with anarchist methods and principles, and so could not “help bring about the triumph of anarchism.” [The Anarchist Revolution, p. 97] This was because of two main reasons, the first being the issue of the Platform’s “secretariats” and “executive committee” and the issue of “Collective Responsibility.” We will take each in turn.

With an structure based round “secretariats” and “executive committees” the “will of the [General Union of Anarchists] can only mean the will of the majority, expressed through congresses which nominate and control the Executive Committee and decide on all important issues. Naturally, the congresses would consist of representatives elected by the majority of member groups … So, in the best of cases, the decisions would be taken by a majority of a majority, and this could easily, especially when the opposing opinions are more than two, represent only a minority.” This, Malatesta argued, “comes down to a pure majority system, to pure parliamentarianism” and so non-anarchist in nature. [Op. Cit., p. 100]

As long as a Platformist federation is based on “secretariats” and “executive committees” directing the activity and development of the organisation, this critique is valid. In such a system, as these bodies control the organisation and members are expected to follow their decisions (due to “theoretical and tactical unity” and “collective responsibility”) they are, in effect, the government of the association. While this government may be elected and accountable, it is still a government simply because these bodies have executive
in the first place, and at the present time, carry out a broadly based popular propaganda ... and by the power of this propaganda and also by organisation among the people themselves join together separate popular forces into a mighty strength capable of demolishing the State.” [Michael Bakunin: Selected Writings, pp. 193–4]

The key aspect of this is the notion of “natural” influence. In a letter to a Spanish member of the Alliance we find Bakunin arguing that it “will promote the Revolution only through the natural but never official influence of all members of the Alliance.” [Bakunin on Anarchism, p. 387] This term was also used in his public writings, with Bakunin arguing that the “very freedom of every individual results from th[e] great number of material, intellectual, and moral influences which every individual around him and which society ... continually exercise on him” and that “everything alive ... intervene[s] ... in the life of others ... [so] we hardly wish to abolish the effect of any individual’s or any group of individuals’ natural influence upon the masses.” [The Basic Bakunin, p. 140 and p. 141]

Thus “natural influence” simply means the effect of communicating which others, discussing your ideas with them and winning them over to your position, nothing more. This is hardly authoritarian, and so Bakunin contrasts this “natural” influence with “official” influence, which replaced the process of mutual interaction between equals with a fixed hierarchy of command and thereby induced the “transformation of natural influence, and, as such, the perfectly legitimate influence over man, into a right.” [quoted by Richard B. Saltman, The Social and Political Thought of Michael Bakunin, p. 46]

As an example of this difference, consider the case of a union militant (as will become clear, this is the sort of example Bakunin had in mind). As long as they are part of the rank-and-file, arguing power. As Maximoff argued, individual initiative in the Platform “has a special character ... Each organisation (i.e. association of members with the right to individual initiative) has its secretariat which ... directs the ideological, political and technical activities of the organisation ... In what, then, consists the self-reliant activities of the rank-and-file members? Apparently in one thing: initiative to obey the secretariat and carry out its directives.” [Op. Cit., p. 18] This seems to be the logical conclusion of the structure suggested by the Platform. “The spirit,” argued Malatesta, “the tendency remains authoritarian and the educational effect would remain anti-anarchist.” [Op. Cit., p. 98]

Malatesta, in contrast, argued that an anarchist organisation must be based on the “[full autonomy, full independence and therefore the full responsibility of individuals and groups” with all organisational work done “freely, in such a way that the thought and initiative of individuals is not obstructed.” The individual members of such an organisation “express any opinion and use any tactic which is not in contradiction with accepted principles and which does not harm the activities of others.” Moreover, the administrative bodies such organisations nominate would “have no executive powers, have no directive powers” leaving it up to the groups and their federal meetings to decide their own fates. The congresses of such organisations would be “free from any kind of authoritarianism, because they do not lay down the law; they do not impose their own resolutions on others ... and do not become binding and enforceable except on those who accept them.” [Op. Cit., p. 101, p. 102 and p. 101] Such an organisation does not exclude collective decisions and self-assumed obligations, rather it is based upon them.

Most groups inspired by the Platform, however, seem to reject this aspect of its organisational suggestions. Instead of “secretariats” and “executive committees” they have regular conferences and meetings to reach collective decisions on issues and practice unity that way. Thus the really important issue is of “theoretical and tac-
tical unity” and “collective responsibility,” rather than the structure suggested by the Platform. Indeed, this issue was the main topic in Makhno’s letter to Malatesta, for example, and so we would be justified in saying that this is the key issue dividing “Platformists” from other anarchists.

So in what way did Malatesta disagree with this concept? As we mentioned in the last section, the Platform defined the idea of “Collective Responsibility” as “the entire Union will be responsible for the political and revolutionary activity of each member; in the same way, each member will be responsible for the political and revolutionary activity of the Union.” To which Malatesta replied:

“But if the Union is responsible for what each member does, how can it leave to its members and to the various groups the freedom to apply the common programme in the way they think best? How can one be responsible for an action if it does not have the means to prevent it? Therefore, the Union and in its name the Executive Committee, would need to monitor the action of the individual member and order them what to do and what not to do; and since disapproval after the event cannot put right a previously accepted responsibility, no-one would be able to do anything at all before having obtained the go-ahead, the permission of the committee. And, on the other hand, can an individual accept responsibility for the actions of a collectivity before knowing what it will do and if he cannot prevent it doing what he disapproves of?” [Op. Cit., p. 99]

In other words, the term “collective responsibility” (if taken literally) implies a highly inefficient and somewhat authoritarian mode of organisation. Before any action could be undertaken, the organisation would have to be consulted and this would crush individual, group and local initiative. The organisation would respond slowly used the words ‘invisible’ and ‘collective’ to denote the underground movement exerting this influence in an organised manner.” [Bakunin on Anarchism, p. 182]

This analysis is confirmed by other passages from Bakunin’s letters. In a letter to the Nihilist Sergi Nechaev (within which Bakunin indicates exactly how far apart politically they were — which is important as, from Marx onwards, many of Bakunin’s opponents quote Nechaev’s pamphlets as if they were “Bakuninist,” when in fact they were not) we find him arguing that:

“These [revolutionary] groups would not seek anything for themselves, neither privilege nor honour nor power ... [but] would be in a position to direct popular movements ... and lead the people towards the most complete realisation of the social-economic ideal and the organisation of the fullest popular freedom. This is what I call the collective dictatorship of a secret organisation.

“The dictatorship ... does not reward any of the members that comprise the groups, or the groups themselves, with any profit or honour or official power. It does not threaten the freedom of the people, because, lacking any official character, it does not take the place of State control over the people, and because its whole aim ... consists of the fullest realisation of the liberty of the people.

“This sort of dictatorship is not in the least contrary to the free development and the self-development of the people, nor its organisation from the bottom upward ... for it influences the people exclusively through the natural, personal influence of its members, who have not the slightest power, ... and ... try ... to direct the spontaneous revolutionary movement of the people towards ... the organisation of popular liberty... This secret dictatorship would
Similarly, when we look at the situations where Bakunin uses the terms “invisible” or “collective” dictatorship (usually in letters to comrades) we find the same thing — the explicit denial in these same letters that Bakunin thought the revolutionary association should take governmental power. For example, in a letter to Albert Richard (a fellow member of the “Alliance of Social Democracy”) Bakunin stated that “[t]here is only one power and one dictatorship whose organisation is salutary and feasible: it is that collective, invisible dictatorship of those who are allied in the name of our principle.” He then immediately adds that “this dictatorship will be all the more salutary and effective for not being dressed up in any official power or extrinsic character.” Earlier in the letter he argued that anarchists must be “like invisible pilots in the thick of the popular tempest... steer[ing] it [the revolution] not by any open power but by the collective dictatorship of all the allies — a dictatorship without insignia, titles or official rights, and all the stronger for having none of the paraphernalia of power.” Explicitly opposing “Committees of Public Safety and official, overt dictatorship” he explains his idea of a revolution based on “workers hav[ing] joined into associations ... armed and organised by streets and quartiers, the federative commune.” [Op. Cit., p. 181, p. 180 and p. 179] Hardly what would be expected from a would-be dictator. As Sam Dolgoff suggested:

“an organisation exercising no overt authority, without a state, without official status, without the machinery of institutionalised power to enforce its policies, cannot be defined as a dictatorship ... Moreover, if it is borne in mind that this passage is part of a letter repudiating in the strongest terms the State and the authoritarian statism of the ‘Robespierres, the Dantons, and the Saint-Justs of the revolution,’ it is reasonable to conclude that Bakunin used the word ‘dictatorship’ to denote preponderant influence or guidance exercised largely by example ... In line with this conclusion, Bakunin to developing situations, if at all, and this response would not be informed by first hand knowledge and experience. Moreover, this form of organisation implies a surrendering of individual judgement, as members would have to “submit to the decisions of the majority before they have even heard what those might be.” [Malatesta, Op. Cit., 101] In the end, all a member could do would be to leave the organisation if they disagree with a tactic or position and could not bring themselves to further it by their actions.

This structure also suggests that the Platform’s commitment to federalism is in words only. As most anarchists critical of the Platform argued, while its authors affirm federalist principles they, in fact, “outline a perfectly centralised organisation with an Executive Committee that has responsibility to give ideological and organisational direction to the different anarchist organisations, which in turn will direct the professional organisations of the workers.” [“The Reply by Several Russian Anarchists”, Op. Cit., pp. 35–6]

Thus it is likely that “Collective Responsibility” taken to its logical conclusion would actually hinder anarchist work by being too bureaucratic and slow. However, let us assume that by applying collective responsibility as well as tactical and theoretical unity, anarchist resources and time will be more efficiently utilised. What is the point of being “efficient” if the collective decision reached is wrong or is inapplicable to many areas? Rather than local groups applying their knowledge of local conditions and developing theories and policies that reflect these conditions (and co-operating from the bottom up), they may be forced to apply inappropriate policies due to the “Unity” of the Platformist organisation. It is true that Makhno argued that the “activities of local organisations can be adapted, as far as possible, to suit local conditions” but only if they are “consonant with the pattern of the overall organisational practice of the Union of anarchists covering the whole country.” [The Struggle Against the State and Other Essays, p. 62] Which still begs the question on the nature of the Platform’s unity (however, it does suggest that the Platform’s position may be less extreme than
might be implied by the text, as we will discuss). That is why anarchists have traditionally supported federalism and free agreement within their organisations, to take into account the real needs of localities.

If we do not take the Platform’s definition of “Collective Responsibility” literally or to its logical extreme (as Makhno’s comments suggest) then the differences between Platformists and non-Platformists may not be that far. As Malatesta pointed out in his reply to Makhno’s letter:

“I accept and support the view that anyone who associates and co-operates with others for a common purpose must feel the need to co-ordinate his [or her] actions with those of his [or her] fellow members and do nothing that harms the work of others … and respect the agreements that have been made … [Moreover] I maintain that those who do not feel and do not practice that duty should be thrown out of the association.

Perhaps, speaking of collective responsibility, you mean precisely that accord and solidarity that must exist among members of an association. And if that is so, your expression amounts … to an incorrect use of language, but basically it would only be an unimportant question of wording and agreement would soon be reached.” [Op. Cit., pp. 107–8]

This, indeed, seems to be the way that most Platformist organisations do operate. They have agreed broad theoretical and tactical positions on various subjects (such as, for example, the nature of trade unions and how anarchists relate to them) while leaving it to local groups to act within these guidelines. Moreover, the local groups do not have to report to the organisation before embarking on an activity. In other words, most Platformist groups do not take

wrote (he was sexist), Marx and Engels (their comments against Slavs spring to mind, along with numerous other racist comments) and so on. But, of course, this never happens to non-anarchist thinkers when Marxists write their articles and books.

However, to return to our main argument, that of the importance of context. Significantly, whenever Bakunin uses the term “invisible” or “collective” dictatorship he also explicitly states his opposition to government power and in particular the idea that anarchists should seize it. For example, a Leninist quotes the following passage from “a Bakuninist document” to show “the dictatorial ambitions of Bakunin” and that the “principle of anti-democracy was to leave Bakunin unchallenged at the apex of power”: “It is necessary that in the midst of popular anarchy, which will constitute the very life and energy of the revolution, unity of thought and revolutionary action should find an organ. This organ must be the secret and worldwide association of the international brethren.” [Derek Howl, “The legacy of Hal Draper”, pp. 137–49, International Socialist, no. 52, p. 147]

However, in the sentence immediately before those quoted, Bakunin stated that “[t]his organisation rules out any idea of dictatorship and custodial control.” Strange that this part of the document was not quoted! Nor is Bakunin quoted when he wrote, in the same document, that “[w]e are the natural enemies of those revolutionaries — future dictators, regimentors and custodians of revolution — who … [want] to create new revolutionary States just as centralist and despotic as those we already know.” Not mentioned either is Bakunin’s opinion that the “revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations … organised from the bottom upwards by means of revolutionary delegations … [who] will set out to administer public services, not to rule over peoples.” [Michael Bakunin: Selected Writings, p. 172, p. 169 and p. 172] Selective quoting is only convincing to those ignorant of the subject.
Marxists quote Bakunin’s terms “invisible dictatorship” and “collective dictatorship” out of context, using it to “prove” that anarchists are secret authoritarians, seeking dictatorship over the masses. More widely, the question of Bakunin and his “invisible dictatorship” finds its way into sympathetic accounts of anarchist ideas. For example, Peter Marshall writes that it is “not difficult to conclude that Bakunin’s invisible dictatorship would be even more tyrannical than a ... Marxist one” and that it expressed a “profound authoritarian and dissimulating streak in his life and work.” [Demanding the Impossible, p. 287] So, the question of setting the record straight about this aspect of Bakunin’s theory is of more importance than just correcting a few Leninists. In addition, to do so will help clarify the concept of “leadership of ideas” we discussed in the last section. For both these reasons, this section, while initially appearing somewhat redundant and of interest only to academics, is of a far wider interest.

Anarchists have two responses to claims that Bakunin (and, by implication, all anarchists) seek an “invisible” dictatorship and so are not true libertarians. Firstly, and this is the point we will concentrate upon in this section, Bakunin’s expression is taken out of context and when placed within context it takes on a radically different meaning than that implied by critics of anarchism. Secondly, even if the expression means what the critics claim it does, it does not refute anarchism as a political theory. This is because anarchists are not Bakuninists (or Proudhonists or Kropotkinites or any other person-ist). We recognise other anarchists for what they are, human beings who said lots of important and useful things but, like any other human being, made mistakes and often do not live up to all of their ideas. For anarchists, it is a question of extracting the useful parts from their works and rejecting the useless (as well as the downright nonsense!). Just because Bakunin said something, it does not make it right! This common-sense approach to politics seems to be lost on Marxists. Indeed, if we take the logic of these Marxists to its conclusion, we must reject everything Rousseau

The Platform doesn’t go into detail about how collective responsibility works in practice. There are issues it leaves untouched such as the question of people who oppose the majority view. We would argue that obviously people who oppose the view of the majority have a right to express their own views, however in doing so they must make clear that they don’t represent the view of the organisation. If a group of people within the organisation oppose the majority decision they have the right to organise and distribute information so that their arguments can be heard within the organisation as a whole. Part of our anarchism is the belief that debate and disagreement, freedom and openness strengthens both the individual and the group to which she or he belongs.”

While many anarchists are critical of Platformist groups for being too centralised for their liking, it is the case that the Platform has influenced many anarchist organisations, even non-Platformist ones (this can be seen in the “class struggle” groups discussed in the next section). This influence has been both ways, with the criticism the original Platform was subjected to having had an effect on how Platformist groups have developed. This, of course, does not imply that there is little or no difference between Platformists and other anarchists. Platformist groups tend to stress “collective responsibility” and “theoretical and tactical unity” more than others, which has caused problems when Platformists have worked within “synthesis” organisations (as was the case in France, for example, which resulted in much bad-feeling between Platformists and others).
Constructive Anarchism by the leading Russian anarcho-syndicalist G.P. Maximoff gathers all the relevant documents in one place. As well as Maximoff’s critique of the Platform, it includes the “synthesis” reply, Malatesta’s review and subsequent exchange of letters between him and Makhno. The Anarchist Revolution also contains Malatesta’s article and the exchange of letters between him and Makhno.

J.3.5 Are there other kinds of anarchist federation?

Yes. Another type of anarchist federation is what we term the “class struggle” group. Many local anarchist groups in Britain, for example, organise in this fashion. They use the term “class struggle” to indicate that their anarchism is based on collective working class resistance as opposed to reforming capitalism via lifestyle changes and the support of, say, co-operatives (many “class struggle” anarchists do these things, of course, but they are aware that they cannot create an anarchist society by so doing). We follow this use of the term here. And just to stress the point again, our use of “class struggle” to describe this type of anarchist group does not imply that “synthesis” or “Platformist” do not support the class struggle. They do!

This kind of group is half-way between the “synthesis” and the “Platform.” The “class struggle” group agrees with the “synthesis” in so far as it is important to have a diverse viewpoints within a federation and that it would be a mistake to try to impose a common line on different groups in different circumstances as the Platform does. However, like the “Platform,” the class struggle group recognises that there is little point in creating a forced union between totally different strands of anarchism. Thus the “class struggle” group rejects the idea that individualist or mutualist anarchists should be part of the same organisation as anarchist communists or “It is in fact a question of education for freedom, of making people who are accustomed to obedience and passivity consciously aware of their real power and capabilities. One must encourage people to do things for themselves.” [Op. Cit., pp. 178–9]

This “pushing” people to “do it themselves” is another key role for any anarchist organisation. The encouragement of direct action is just as important as anarchist propaganda and popular participation within social struggle and popular organisations.

As such social struggle developments, the possibility of revolution becomes closer and closer. While we discuss anarchists ideas on social revolution in section J.7, we must note here that the role of the anarchist organisation does not change. As Bookchin argued, anarchists “seek to persuade the factory committees, assemblies” and other organisations created by people in struggle “to make themselves into genuine organs of popular self-management, not to dominate them, manipulate them, or hitch them to an all-knowing political party.” [Op. Cit., p. 140] In this way, by encouraging self-management in struggle, anarchist lay the foundations of a self-managed society.

J.3.7 Doesn’t Bakunin’s “Invisible Dictatorship” prove that anarchists are secret authoritarians?

No. While Bakunin did use the term “invisible dictatorship”, it does not prove that Bakunin or anarchists are secret authoritarians. The claim otherwise, often made by Leninists and other Marxists, expresses a distinct, even wilful, misunderstanding of Bakunin’s ideas on the role revolutionaries should play in popular movements.
Equally as important as how anarchists intervene in social struggles and popular organisations and the organisation of those struggles and organisations, there is the question of the nature of that intervention. We would like to quote the following by the British libertarian socialist group Solidarity as it sums up the underlying nature of anarchist action and the importance of a libertarian perspective on social struggle and change and how politically aware minorities work within them:

"Meaningful action, for revolutionaries, is whatever increases the confidence, the autonomy, the initiative, the participation, the solidarity, the egalitarian tendencies and the self-activity of the masses and whatever assists in their demystification. Sterile and harmful action is whatever reinforces the passivity of the masses, their apathy, their cynicism, their differentiation through hierarchy, their alienation, their reliance on others to do things for them and the degree to which they can therefore be manipulated by others — even by those allegedly acting on their behalf." [Maurice Brinton, *For Workers' Power*, p. 154]

Part of this “meaningful action” involves encouraging people to “act for yourselves” (to use Kropotkin’s words). As we noted in section A.2.7, anarchism is based on self-liberation and self-activity is key aspect of this. Hence Malatesta’s argument:

“Our task is that of ‘pushing’ the people to demand and to seize all the freedom they can and to make themselves responsible for providing their own needs without waiting for orders from any kind of authority. Our task is that of demonstrating the uselessness and harmfulness of government, provoking and encouraging by propaganda and action, all kinds of individual and collective activities.

syndicalists or that anarcho-pacifists should join forces with non-pacifists. Thus the “class struggle” group acknowledges that an organisation which contains viewpoints which are dramatically opposed can lead to pointless debates and paralysis of action due to the impossibilities of overcoming those differences.

Instead, the “class struggle” group agrees a common set of “aims and principles” which are the basic terms of agreement within the federation. If an individual or group does not agree with this statement then they cannot join. If they are members and try to change this statement and cannot get the others to agree its modification, then they are morally bound to leave the organisation. In other words, there is a framework within which individuals and groups apply their own ideas and their interpretation of agreed policies. It means that individuals in a group and the groups within a federation have something to base their local activity on, something which has been agreed collectively. There would be a common thread to activities and a guide to action (particularly in situations where a group or federation meeting cannot be called). In this way individual initiative and co-operation can be reconciled, without hindering either. In addition, the “aims and principles” shows potential members where the anarchist group was coming from.

In this way the “class struggle” group solves one of the key problems with the “synthesis” grouping, namely that any such basic statement of political ideas would be hard to agree and be so watered down as to be almost useless (for example, a federation combining individualist and communist anarchists would find it impossible to agree on such things as the necessity for revolution, communal ownership, and so on). By clearly stating its ideas, the “class struggle” group ensures a common basis for activity and discussion.

Such a federation, like all anarchist groups, would be based upon regular assemblies locally and in frequent regional, national, etc., conferences to continually re-evaluate policies, tactics, strategies and goals. In addition, such meetings prevent power from collect-
ing in the higher administration committees created to co-ordinate activity. The regular conferences aim to create federation policies on specific topics and agree common strategies. Such policies, once agreed, are morally binding on the membership, who can review and revise them as required at a later stage but cannot take action which would hinder their application (they do not have to apply them, if they consider them as a big mistake).

For example, minorities in such a federation can pursue their own policies as long as they clearly state that theirs is a minority position and does not contradict the federation’s aims and principles. In this way the anarchist federation combines united action and dissent, for no general policy will be applicable in all circumstances and it is better for minorities to ignore policies which they know will make even greater problems in their area. As long as their actions and policies do not contradict the federation’s basic political ideas, then diversity is an essential means for ensuring that the best tactic and ideas are be identified.

**J.3.6 What role do these groups play in anarchist theory?**

The aim of anarchist groups and federations is to spread libertarian ideas within society and within social movements. They aim to convince people of the validity of anarchist ideas and analysis, of the need for a libertarian transformation of society and of themselves by working with others as equals. Such groups are convinced that (to use Murray Bookchin’s words) “anarchism cannot remain a mere mood or tendency, wafting in the air like a cultural ambience. It must be organised — indeed well-organised — if it is effectively articulate and spread this new sensibility; it must have a coherent theory and extensive literature; it must be capable of duelling with the authoritarian movements that try to denature the intuitive libertarian impulses of our time and channel social unrest into hierar-

**Cit., p. 90** Bakunin’s words with regards the first International Workers Association indicate this clearly:

“It must be a people’s movement, organised from the bottom up by the free, spontaneous action of the masses. There must be no secret governmentalism, the masses must be informed of everything … All the affairs of the International must be thoroughly and openly discussed without evasions and circumlocutions.” [Bakunin on Anarchism, p. 408]

Given this, anarchists reject the idea of turning the organs created in the class struggle and revolutionary process into hierarchical structures. By turning them from organs of self-management into organs for nominating “leaders,” the constructive tasks and political development of the revolution will be aborted before they really begin. The active participation of all will become reduced to the picking of new masters and the revolution will falter. For this reason, anarchists “differ from the Bolshevik type of party in their belief that genuine revolutionaries must function within the framework of the forms created by the revolution, not within forms created by the party.” This means that “an organisation is needed to propagate ideas systematically — and not ideas alone, but ideas which promote the concept of self-management.” In other words, there “is a need for a revolutionary organisation — but its function must always be kept clearly in mind. Its first task is propaganda … In a revolutionary situation, the revolutionary organisation presents the most advanced demands: it is prepared at every turn of events to formulate — in the most concrete fashion — the immediate task that should be performed to advance the revolutionary process. It provides the boldest elements in action and in the decision-making organs of the revolution.” [Murray Bookchin, Post-Scarcity Anarchism, p. 140] What it does not do is to supplant those organs or decision-making process by creating institutionalised, hierarchical leadership structures.
when I intervene at union meetings I do it as someone who is exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the FAI or not.” [quoted by Abel Paz, *Durruti: The People Armed*, p. 137]

This shows the nature of the “leadership of ideas.” Rather than be elected to a position of power or responsibility, the anarchist presents their ideas at mass meetings and argues his or her case. This means obviously implies a two-way learning process, as the anarchist learns from the experiences of others and the others come in contact with anarchist ideas. Moreover, it is an egalitarian relationship, based upon discussion between equals rather than urging people to place someone into power above them. It ensures that everyone in the organisation participates in making, understands and agrees with the decisions reached. This obviously helps the political development of all involved (including, we must stress, the anarchists). As Durruti argued: “the man [or woman] who alienates his will, can never be free to express himself and follow his own ideas at a union meeting if he feel dominated by the feeblest orator ... As long as a man doesn’t think for himself and doesn’t assume his own responsibilities, there will be no complete liberation of human beings.” [quoted by Paz, *Op. Cit.*, p. 184]

Because of our support for the “leadership of ideas”, anarchists think that all popular organisations must be open, fully self-managed and free from authoritarianism. Only in this way can ideas and discussion play an important role in the life of the organisation. Since anarchists “do not believe in the good that comes from above and imposed by force” and “want the new way of life to emerge from the body of the people and advance as they advance. It matters to us therefore that all interests and opinions find their expression in a conscious organisation and should influence communal life in proportion to their importance.” [Malatesta, *Op. chical forms of organisation.” [“Looking Back at Spain,” pp. 53–96, Dimitrios I. Roussopoulos (ed.), *The Radical Papers*, p. 90]

These groups and federations play a key role in anarchist theory. This is because anarchists are well aware that there are different levels of knowledge and consciousness in society. While people learn through struggle and their own experiences, different people develop at different speeds, that each individual is unique and is subject to different influences. As one pamphlet by the British *Anarchist Federation* puts it, the “experiences of working class life constantly lead to the development of ideas and actions which question the established order ... At the same time, different sections of the working class reach different degrees of consciousness.” [*The Role of the Revolutionary Organisation*, p. 13] This can easily be seen from any group of individuals of the same class or even community. Some are anarchists, others Marxists, some social democrats/labourites, others conservatives, others liberals, most “apolitical,” some support trade unions, others are against and so on.

Because we are aware that we are one tendency among many, anarchists organise as anarchists to influence social struggle. Only when anarchists ideas are accepted by the vast majority will an anarchist society be possible. We wish, in other words, to win the most widespread understanding and influence for anarchist ideas and methods in the working class and in society, primarily because we believe that these alone will ensure a successful revolutionary transformation of society. Hence Malatesta:

“anarchists, convinced of the validity of our programme, must strive to acquire overwhelming influence in order to draw the movement towards the realisation of our ideals. But such influence must be won by doing more and better than others, and will be useful if won in that way ... we must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement to prevent it being lim-
Anarchist organisation exists to help the process by which people come to anarchist conclusions. It aims to make explicit the feelings and thoughts that people have (such as, wage slavery is hell, that the state exists to oppress people and so on) by exposing as wrong common justifications for existing society and social relationships by a process of debate and providing a vision of something better. In other words, anarchist organisations seek to explain and clarify what is happening in society and show why anarchism is the only real solution to social problems. As part of this, we also have combat wrong ideas such as Liberalism, Social Democracy, Leninism, right-wing populism and so on, indicating why these proposed solutions are false. In addition, an anarchist organisation must also be a ‘collective memory’ for the oppressed, keeping alive and developing the traditions of the labour and radical movements as well as anarchism so that new generations of libertarians have a body of experience to build upon and use in their struggles.

Anarchist organisations see themselves in the role of aidsers, not leaders. As Voline argued, the minority which is politically aware “should intervene. But, in every place and under all circumstances, … [they] should freely participate in the common work, as true collaborators, not as dictators. It is necessary that they especially create an example, and employ themselves … without dominating, subjugating, or oppressing anyone … Accordingly to the libertarian thesis, it is the labouring masses themselves, who, by means of the various
To quote the UK Anarchist Federation, again “the [libertarian] organisation is not just a propaganda group: above all it must actively work in all the grassroots organisations of the working class such as rank and file [trade union] groups, tenants associations, squatters and unemployed groups as well as women’s, black and gay groups.” It “respects the independence of working class movements and (unlike others) does not try to subordinate them to the revolutionary organisation. This does not mean that it does not seek to spread its ideas in these movements.” [Op. Cit., p. 15 and p. 16] Such an organisation is not vanguardist in the Leninist sense as it recognises that socialist politics derive from working class experience, rather than bourgeois intellectuals (as Lenin and Karl Kautsky argued), and that it does not aim to dominate popular movements but rather work within them as equals.

So while we recognise that “advanced” sections do exist within the working class and that anarchists are one such section, we also recognise that central characteristic of anarchism is that its politics are derived from the concrete experience of fighting capitalism and statism directly — that is, from the realities of working class life. This means that anarchists must also learn from working class people in struggle. If we recognise that anarchist ideas are the product of working class experience and self-activity and that these constantly change and develop in light of new experiences and struggles then anarchist theory must be open to change by learning from non-anarchists. Not to recognise this fact is to open the door to vanguardism and dogma. Because of this fact, anarchists argue that the relationship between anarchists and non-anarchists must be an egalitarian one, based on mutual interaction and the recognition that no one is infallible or have all the answers — including anarchists! With this in mind, while we recognise the presence of “advanced” groups within the working class (which obviously reflects the uneven development within it), anarchists aim

class organisations, factory committees, industrial and agricultural unions, co-operatives, et cetera, federated ... should apply themselves everywhere, to solving the problems of waging the Revolution ... As for the 'elite' [i.e. the politically aware], their role, according to the libertarians, is to help the masses, enlighten them, teach them, give them necessary advice, impel them to take initiative, provide them with an example, and support them in their action — but not to direct them governmentally.” [The Unknown Revolution, pp. 177–8]

This role is usually called providing a “leadership of ideas”. Anarchists stress the difference of this concept with authoritarian notions of “leadership” such as Leninist ones. While both anarchist and Leninist organisations exist to overcome the problem of “uneven development” within the working class, the aims, role and structure of these groups could not be more different (as discussed in section H.5, anarchists reject the assumptions and practice of vanguardism as incompatible with genuine socialism).

Anarchist groups are needed for, no matter how much people change through struggle, it is not enough in itself (if it were, we would be living in an anarchist society now!). So anarchists stress, as well as self-organisation, self-liberation and self-education through struggle developing libertarian socialist thought, the need for anarchist groups to work within popular organisations and in the mass of the population in general. These groups would play an important role in helping to clarify the ideas of those in struggle and undermining the internal and external barriers against these ideas.

The first of these are what Emma Goldman termed the “internal tyrants,” the “ethical and social conventions” of existing, hierarchical society which accustom people to authoritarian social relationships, injustice, lack of freedom and so on. [Red Emma Speaks, pp. 164–5] External barriers are what Chomsky terms “the Manufacture of Consent,” the process by which the population at large are influenced to accept the status quo and the dominant elites view-
point via the education system and media. It is this “manufacture of consent” which helps explain why, relatively speaking, there are so few anarchists even though we argue that anarchism is the natural product of working class life. While, objectively, the experiences of life drives working class people to resist domination and oppression, they enter that struggle with a history behind them, a history of education in capitalist schools, of consuming capitalist media, and so on.

This means that while social struggle is radicalising, it also has to combat years of pro-state and pro-capitalist influences. So even if an anarchist consciousness springs from the real conditions of working class life, because we live in a class society there are numerous counter-tendencies that inhibit the development of that consciousness (such as religion, current morality, the media, pro-business and pro-state propaganda, state and business repression and so on). This explains the differences in political opinion within the working class, as people develop at different speeds and are subject to different influences and experiences. However, the numerous internal and external barriers to the development of anarchist opinions created our “internal tyrants” and by the process of “manufacturing consent” can be, and are, weaken by rational discussion as well as social struggle and self-activity. Indeed, until such time as we have “learned to defy them all [the internal tyrants], to stand firmly on [our] own ground and to insist upon [our] own unrestricted freedom” we can never be free or successfully combat the “manufacture of consent.” [Goldman, Op. Cit., p. 140] And this is where the anarchist group can play a part, for there is an important role to be played by those who have been through this process already, namely to aid those going through it.

Of course the activity of an anarchist group does not occur in a vacuum. In periods of low class struggle, where there is little collective action, anarchist ideas will seem utopian and so dismissed by most. In these situations, only a few will become anarchists simply because the experiences of working people do not bred confidence that an alternative to the current system is possible. In addition, if anarchist groups are small, many who are looking for an alternative may join other groups which are more visible and express a libertarian sounding rhetoric (such as Leninist groups, who often talk about workers’ control, workers’ councils and so on while meaning something distinctly different from what anarchists mean by these terms). However, as the class struggle increases and people become more inclined to take collective action, they can become empowered and radicalised by their own activity and be more open to anarchist ideas and the possibility of changing society. In these situations, anarchist groups grow and the influence in anarchist ideas increases. This explains why anarchist ideas are not as widespread as they could be. It also indicates another important role for the anarchist group, namely to provide an environment and space where those drawn to anarchist ideas can meet and share experiences and ideas during periods of reaction.

The role of the anarchist group, therefore, is not to import a foreign ideology into the working class, but rather to help develop and clarify the ideas of those working class people who are moving towards anarchism and so aid those undergoing that development. They would aid this development by providing propaganda which exposes the current social system (and the rationales for it) as bankrupt as well as encouraging resistance to oppression and exploitation. The former, for Bakunin, allowed the “bringing [off] a more just general expression, a new and more congenial form to the existent instincts of the proletariat … [which] can sometimes facilitate and precipitate development … [and] give them an awareness of what they have, of what they feel, of what they already instinctively desire, but never can it give to them what they don’t have.” The latter “is the most popular, the most potent, and the most irresistible form of propaganda” and “awake[s] in the masses all the social-revolutionary instincts which reside deeply in the heart of every worker” so allowing instinct to become transformed into “reflected socialist thought.”
of production in order to win improvements in the here and now and strengthen tendencies towards anarchism by showing that direct action and libertarian organisation is effective and can win partial expropriations of capitalist and state power. So while there are slight differences in terminology and practice, all anarchists would support the ideas of industrial organisation and struggle we have outlined above.

J.5.3 What attitude do anarchists take to existing unions?

As noted in the last section, anarchists desire to create organisations in the workplace radically different from the existing unions. The question now arises, what attitude do anarchists take to trade unions?

Before answering that question, we must stress that anarchists, no matter how hostile to trade unions as bureaucratic, reformist institutions, are in favour of working class struggle. This means that when trade union members or other workers are on strike anarchists will support them (unless the strike is reactionary — for example, no anarchist would support a strike which is racist in nature). This is because anarchists consider it basic to their politics that you do not scab and you do not crawl. So, when reading anarchist criticisms of trade unions do not for an instant think we do not support industrial struggles — we do, we are just very critical of the unions that are sometimes involved.

So, what do anarchists think of the trade unions?

For the most part, one could call the typical anarchist opinion toward them as one of “hostile support.” It is hostile insofar as anarchists are well aware of how bureaucratic these unions are and how they continually betray their members. Given that they are usually little more than “business” organisations, trying to sell their members labour-power for the best deal possible, it is unsurprising...
J.4 What trends in society aid anarchist activity?

In this section we will examine some modern trends which we regard as being potential openings for anarchists to organise and which point in an anarchist direction. These trends are of a general nature, partly as a product of social struggle, partly as a response to economic and social crisis, partly involving people’s attitudes to big government and big business, partly in relation to the communications revolution we are currently living through, and so on.

Of course, looking at modern society we see multiple influences, changes which have certain positive aspects in some directions but negative ones in others. For example, the business-inspired attempts to decentralise or reduce (certain) functions of governments should in the abstract be welcomed by anarchists for they lead to the reduction of government. In practice such a conclusion is deeply suspect simply because these developments are being pursued to increase the power and influence of capital as well as to increase wage-labour to, and exploitation by, the economic master class and to undermine working class power and autonomy. As such, there are as anti-libertarian as the status quo (as Proudhon stressed, anarchism is “the denial of Government and of Property.” [General Idea of the Revolution, p. 100]). Similarly, increases in self-employment can be seen, in the abstract, as reducing wage slavery. However, if, in practice, this increase is due to corporations encouraging “independent” contractors in order to cut wages and worsen working conditions, increase job insecurity and undermine paying for health and other employee packages then it is native to the malaise of official trade unionism. How anarchists aim to encourage such new forms of workplace organisation and struggle will be discussed in the section J.5.4.

One last point. We noted that many anarchists, particularly communist-anarchists, consider unions, even anarchosyndicalist ones, as having a strong reformist tendency (as discussed in section J.3.9). However, all anarchists recognise the importance of autonomous class struggle and the need for organisations to help fight that struggle. Thus anarchist-communists, instead of trying to organise industrial unions, apply the ideas of industrial unionism to workplace struggles. They would agree with the need to organise all workers into a mass assembly and to have elected, recallable administration committees to carry out the strikers wishes. This means that while such anarchists do not call their practical ideas “anarcho-syndicalism” nor the workplace assemblies they desire to create “unions,” there are extremely similar in nature and so we can discuss both using the term “industrial unionism”. The key difference is that many (if not most) anarcho-communists consider that permanent workplace organisations that aim to organise all workers would become reformist. Because of this they also see the need for anarchist to organise as anarchists in order to spread the anarchist message within them and keep their revolutionary aspects at the forefront.

Spontaneously created organisations of workers in struggle play an important role in both communist-anarchist and anarchosyndicalist theory. Since both advocate that it is the workers, using their own organisations who will control their own struggles (and, eventually, their own revolution) in their own interests, not a vanguard party of elite political theorists, this is unsurprising. It matters little if the specific organisations are revolutionary industrial unions, factory committees, workers councils, or other labour formations. The important thing is that they are created and run by workers themselves. Meanwhile, anarchists are industrial guerrillas waging class war at the point...
preparing for and the practical carrying out of the reconstruction of social life ... It has, therefore, a double purpose: 1. As the fighting organisation of the workers against their employers to enforce the demands of the workers for the safeguarding of their standard of living; 2. As the school for the intellectual training of the workers to make them acquainted with the technical management of production and economic life in general, so that when a revolutionary situation arises they will be capable of taking the socio-economic organism into their own hands and remaking it according to Socialist principles.”

So “[a]t the same time that syndicalism exerts this unrelenting pressure on capitalism, it tries to build the new social order within the old. The unions and the ‘labour councils’ are not merely means of struggle and instruments of social revolution; they are also the very structure around which to build a free society. The workers are to be educated in the job of destroying the old property and in the task of reconstructing a stateless, libertarian society. The two go together.”

[Murray Bookchin, The Spanish Anarchists, p. 121] The industrial union is seen as prefiguring the future society, a society which (like the union) is decentralised and self-managed in all aspects.

Given the fact that workers wages have been stagnating (or, at best, falling behind productivity increases) across the world as the trade unions have been weakened and marginalised (partly because of their own tactics, structure and politics) it is clear that there exists a great need for working people to organise to defend themselves. The centralised, top-down trade unions we are accustomed to have proved themselves incapable of effective struggle (and, indeed, the number of times they have sabotaged such struggle are countless — a result not of “bad” leaders but of the way these unions organise and their role within capitalism). Hence anarchists support industrial unionism as an effective alter-

is hardly a positive sign. Obviously increases in self-employment would be different if it were the result of an increase in the number of co-operatives, for example.

Thus few anarchists celebrate many apparently “libertarian” developments as they are not the product of social movements and activism, but are the product of elite lobbying for private profit and power. Decreasing the power of the state in (certain) areas while leaving (or increasing) the power of capital is a retrograde step in most, if not all, ways. Needless to say, this “rolling back” of the state does not bring into question its role as defender of property and the interests of the capitalist class — nor could it, as it is the ruling class who introduces and supports these developments.

In this section, we aim to discuss tendencies from below, not above — tendencies which can truly “roll back” the state rather than reduce its functions purely to that of the armed thug of property. The tendencies we discuss here are not the be all nor end all of anarchist activism or tendencies. We discuss many of the more traditionally anarchist “openings” in section J.5 (such as industrial and community unionism, mutual credit, co-operatives, modern schools and so on) and so will not do so here. However, it is important to stress here that such “traditional” openings are not being downplayed — indeed, much of what we discuss here can only become fully libertarian in combination with these more “traditional” forms of “anarchy in action.”

For a lengthy discussion of anarchistic trends in society, we recommend Colin Ward’s classic book Anarchy in Action. Ward covers many areas in which anarchistic tendencies have been expressed, far more than we can cover here. The libertarian tendencies in society are many. No single work could hope to do them justice.
J.4.1 Why is social struggle a good sign?

Simply because it shows that people are unhappy with the existing society and, more importantly, are trying to change at least some part of it. It suggests that certain parts of the population have reflected on their situation and, potentially at least, seen that by their own actions they can influence and change it for the better.

Given that the ruling minority draws its strength by the acceptance and acquiescence of the majority, the fact that a part of that majority no longer accepts and acquiesces is a positive sign. After all, if the majority did not accept the status quo and acted to change it, the class and state system could not survive. Any hierarchical society survives because those at the bottom follow the orders of those above it. Social struggle suggests that some people are considering their own interests, thinking for themselves and saying “no” and this, by its very nature, is an important, indeed, the most important, tendency towards anarchism. It suggests that people are rejecting the old ideas which hold the system up, acting upon this rejection and creating new ways of doing thinks.

“Our social institutions,” argued Alexander Berkman, “are founded on certain ideas; as long as the latter are generally believed, the institutions built upon them are safe. Government remains strong because people think political authority and legal compulsion necessary. Capitalism will continue as long as such an economic system is considered adequate and just. The weakening of the ideas which support the evil and oppressive present-day conditions means the ultimate breakdown of government and capitalism.” [What is Anarchism?, p. xii]

Social struggle is the most obvious sign of this change of perspective, this change in ideas, this progress towards freedom.

Social struggle is expressed by direct action. We have discussed both social struggle (section J.1) and direct action (section J.2) before and some readers may wonder why we are covering this again

This implies that as well as being decentralised and organised from the bottom up, the industrial union differs from the normal trade union by having no full-time officials. All union business is conducted by elected fellow workers who do their union activities after work or, if it has to be done during work hours, they get the wages they lost while on union business. In this way no bureaucracy of well paid officials is created and all union militants remain in direct contact with their fellow workers. Given that it is their wages, working conditions and so on that are effected by their union activity they have a real interest in making the union an effective organisation and ensuring that it reflects the interests of the rank and file. In addition, all part-time union “officials” are elected, mandated and recallable delegates. If the fellow worker who is elected to the local labour council or other union committee is not reflecting the opinions of those who mandated him or her then the union assembly can countermand their decision, recall them and replace them with someone who will reflect these decisions. In short, “the Syndicalist stands firmly by these things — mass meetings, delegates not bosses, the right of recall ... Syndicalism is organised from the bottom upwards ... all power comes from below and is controlled from below. This is a revolutionary principle.” [Brown, Op. Cit., p. 85]

As can be seen, industrial unionism reflects anarchist ideas of organisation — it is organised from the bottom up, it is decentralised and based upon federation and it is directly managed by its members in mass assemblies. It is anarchist applied to industry and the needs of the class struggle. By supporting such forms of organisations, anarchists are not only seeing “anarchy in action”, they are forming effective tools which can win the class war. By organisng in this manner, workers are building the framework of a co-operative society within capitalism:

“the syndicate ... has for its purpose the defence of the interests of the producers within existing society and the
on the local conditions, one cannot wonder that the inertia of the apparatus of organisation renders a quick attack quite impossible, and there thus arises a state of affairs where the energetic and intellectually alert groups no longer serve as patterns for the less active, but are condemned by these to inactivity, inevitably bringing the whole movement to stagnation. Organisation is, after all, only a means to an end. When it becomes an end in itself, it kills the spirit and the vital initiative of its members and sets up that domination by mediocrity which is the characteristic of all bureaucracies.” [Anarcho-Syndicalism, p. 61]

Centralised unions ensure that it is the highest level of union officialdom which decides when workers are allowed to strike. Instead of those affected acting, “the dispute must be reported to the district office of the union (and in some cases to an area office) then to head office, then back again ... The worker is not allowed any direct approach to, or control of the problem.” [Brown, Op. Cit., p. 34] The end result is that “through the innate conservatism of officialdom” officials in centralised unions “ordinarily use their great powers to prevent strikes or to drive their unions’ members back to work after they have struck in concert with other workers.” The notion that a centralised organisation will be more radical “has not developed in practice” and the key problem “is due not to the autonomy of the unions, but to the lack of it.” [Earl C. Ford and William Z. Foster, Syndicalism, p. 38] So the industrial union “is based on the principles of Federalism, on free combination from below upwards, putting the right of self-determination ... above everything else” and so rejects centralism as an “artificial organisation from above downwards which turns over the affairs of everybody in a lump to a small minority” and is “always attended by barren official routine” as well as “lifeless discipline and bureaucratic ossification.” [Rocker, Op. Cit., p. 60]

Social struggle means that people come into opposition with the boss and other authorities such as the state and the dominant morality. This challenge to existing authorities generates two related processes: the tendency of those involved to begin taking over the direction of their own activities and the development of solidarity with each other. Firstly, in the course of a struggle, such as a strike, occupation, boycott, and so on, the ordinary life of people, in which they act under the constant direction of the bosses or state, ceases, and they have to think, act and co-ordinate their
actions for themselves. This reinforces the expression towards autonomy that the initial refusal that lead to the struggle indicates. Secondly, in the process of struggle those involved learn the importance of solidarity, of working with others in a similar situation, in order to win. This means the building of links of support, of common interests, of organisation. The practical need for solidarity to help win the struggle is the basis for the solidarity required for a free society to be viable.

Therefore the real issue in social struggle is that it is an attempt by people to wrestle at least part of the power over their own lives away from the managers, state officials and so on who currently have it and exercise it themselves. This is, by its very nature, anarchistic and libertarian. Thus we find politicians and, of course, managers and property owners, often denouncing strikes and other forms of direct action. This is logical. As direct action challenges the real power-holders in society and because, if carried to its logical conclusion, it would remove them, social struggle and direct action can be considered in essence a revolutionary process.

Moreover, the very act of using direct action suggests a transformation within the people using it. “Direct action’s very powers to fertilise,” argued Pouget, “reside in such exercises in imbuing the individual with a sense of his own worth and in extolling such worth. It marshals human resourcefulness, tempers characters and focuses energies. It teaches self-confidence! And self-reliance! And self-mastery! And shifting for oneself!” Moreover, “direct action has an unmatched educational value: It teaches people to reflect, to make decisions and to act. It is characterised by a culture of autonomy, an exaltation of individuality and is a fillip to initiative, to which it is the leaven. And this superabundance of vitality and burgeoning of ‘self’ in no way conflicts with the economic fellowship that binds the workers one with another and far from being at odds with their common interests, it reconciles and bolsters these: the individual’s independence and activity can only erupt into splendour and intensity by sending

members. In a trade union the higher up the pyramid a man is the more power he wields; in a Syndicate the higher he is the less power he has.

“The factory Syndicate has full autonomy over its own affairs.” [Syndicalism, pp. 35–36]

Such federalism exists to co-ordinate struggle, to ensure that solidarity becomes more than a word written on banners. We are sure that many radicals will argue that such decentralised, confederal organisations would produce confusion and disunity. However, anarchists maintain that the statist, centralised form of organisation of the trades unions would produce indifference instead of involvement, heartlessness instead of solidarity, uniformity instead of unity, and elites instead of equality. The centralised form of organisation has been tried and tried again — it has always failed. This is why the industrial union rejects centralisation, for it “takes control too far away from the place of struggle to be effective on the workers’ side.” [Brown, Op. Cit., p. 34] Centralisation leads to disempowerment, which in turn leads to indifference, not solidarity. Rudolf Rocker reminds us of the evil effects of centralism when he wrote:

“For the state centralisation is the appropriate form of organisation, since it aims at the greatest possible uniformity in social life for the maintenance of political and social equilibrium. But for a movement whose very existence depends on prompt action at any favourable moment and on the independent thought and action of its supporters, centralism could but be a curse by weakening its power of decision and systematically repressing all immediate action. If, for example, as was the case in Germany, every local strike had first to be approved by the Central, which was often hundreds of miles away and was not usually in a position to pass a correct judgement
the Marxist UGT, when the other union scabs when workers are on strike).

In industrial unionism, the membership, assembled in their place of work, are the ones to decide when to strike, when to pay strike pay, what tactics to use, what demands to make, what issues to fight over and whether an action is “official” or “unofficial”. In this way the rank and file is in control of their union and, by confederating with other assemblies, they co-ordinate their forces with their fellow workers. As syndicalist activist Tom Brown made clear:

“The basis of the Syndicate is the mass meeting of workers assembled at their place of work ... The meeting elects its factory committee and delegates. The factory Syndicate is federated to all other such committees in the locality ... In the other direction, the factory, let us say engineering factory, is affiliated to the District Federation of Engineers. In turn the District Federation is affiliated to the National Federation of Engineers ... Then, each industrial federation is affiliated to the National Federation of Labour ... how the members of such committees are elected is most important. They are, first of all, not representatives like Members of Parliament who air their own views; they are delegates who carry the message of the workers who elect them. They do not tell the workers what the 'official' policy is; the workers tell them.

“Delegates are subject to instant recall by the persons who elected them. None may sit for longer than two successive years, and four years must elapse before his [or her] next nomination. Very few will receive wages as delegates, and then only the district rate of wages for the industry ... "

“It will be seen that in the Syndicate the members control the organisation — not the bureaucrats controlling the its roots deep into the fertile soil of common agreement.” [Op. Cit., p. 2 and p. 5]

Social struggle is the beginning of a transformation of the people involved and their relationships to each other. While its external expression lies in contesting the power of existing authorities, its inner expression is the transformation of people from passive and isolated competitors into empowered, self-directing, self-governing co-operators. Moreover, this process widens considerably what people think is “possible.” Through struggle, by collective action, the fact people can change things is driven home, that they have the power to govern themselves and the society they live in. Thus struggle can change people’s conception of “what is possible” and encourage them to try and create a better world. As Kropotkin argued:

“since the times of the [first] International Working Men’s Association, the anarchists have always advised taking an active part in those workers’ organisations which carry on the direct struggle of labour against capital and its protector — the State.

“Such a struggle ... permits the worker to obtain some temporary improvements ..., while it opens his [or her] eyes to the evil that is done by capitalism and the State ..., and wakes up his [or her] thoughts concerning the possibility of organising consumption, production, and exchange without the intervention of the capitalist and the State.” [Anarchism, p. 171]

In other words, social struggle has a radicalising and politicising effect, an effect which brings into a new light existing society and the possibilities of a better world (direct action, in Pouget’s words, “develops the feeling for human personality as well as the spirit of initiative ... it shakes people out of their torpor and steers them to consciousness.” [Op. Cit., p. 5]). The practical need to
unite and resist the boss also helps break down divisions within the working class. Those in struggle start to realise that they need each other to give them the power necessary to get improvements, to change things. Thus solidarity spreads and overcomes divisions between black and white, male and female, heterosexual and homosexual, trades, industries, nationalities and so on. The real need for solidarity to win the fight helps to undermine artificial divisions and show that there are only two groups in society, the oppressed and the oppressors. Moreover, struggle as well as transforming those involved is also the basis for transforming society as a whole simply because, as well as producing transformed individuals, it also produces new forms of organisation, organisations created to co-ordinate their struggle and which can, potentially at least, become the framework of a libertarian socialist society (see section I.2.3).

Thus anarchists argue that social struggle opens the eyes of those involved to self-esteem and a sense of their own strength, and the groupings it forms at its prompting are living, vibrant associations where libertarian principles usually come to the fore. We find almost all struggles developing new forms of organisation, forms which are often based on direct democracy, federalism and decentralisation. If we look at every major revolution, we find people creating mass organisations such as workers’ councils, factory committees, neighbourhood assemblies and so on as a means of taking back the power to govern their own lives, communities and workplaces. In this way social struggle and direct action lay the foundations for the future. By actively taking part in social life, people are drawn into creating new forms of organisation, new ways of doing things. In this way they educate themselves in participation, in self-government, in initiative and in asserting themselves. They begin to realise that the only alternative to management by others is self-management and organise to achieve it.

Given that remaking society has to begin at the bottom, this finds its expression in direct action, individuals taking the initiative and tries, so that the whole industry — and if necessary the whole working class — could strike as one man.” If that were done “would any strike be lost?” [Berkman, Op. Cit., p. 82] In practice, of course, the activities of these dual federations would overlap: labour councils would support an industry wide strike or action while industrial unions would support action conducted by its member unions called by labour councils.

However, industrial unionism should not be confused with a closed shop situation where workers are forced to join a union when they become a wage slave in a workplace. While anarchists do desire to see all workers unite in one organisation, it is vitally important that workers can leave a union and join another. The closed shop only empowers union bureaucrats and gives them even more power to control (and/or ignore) their members. As anarchist unionism has no bureaucrats, there is no need for the closed shop and its voluntary nature is essential in order to ensure that a union be subject to “exit” as well as “voice” for it to be responsive to its members wishes. As Albert Meltzer argued, the closed shop means that “the [trade union] leadership becomes all-powerful since once it exerts its right to expel a member, that person is not only out of the union, but out of a job.” Anarcho-syndicalism, therefore, “rejects the closed shop and relies on voluntary membership, and so avoids any leadership or bureaucracy.” [Anarchism: Arguments for and against, p. 56] Without voluntary membership even the most libertarian union may become bureaucratic and unresponsive to the needs of its members and the class struggle (also see Tom Wetzel’s excellent article “The Origins of the Union Shop”, [Ideas & Action no. 11]). Needless to say, if the union membership refuses to work with non-union members then that is a different situation. Then this is an issue of free association (as free association clearly implies the right not to associate). This issue rarely arises and most syndicalist unions operate in workplaces with other unions (the exceptions arise, as happened frequently in Spanish labour history with
different workplaces in the same industry as well as between different workplaces in the same locality.

So industrial unionism is different from ordinary trade unionism (usually called business unionism by anarchists and syndicalists as it treats the union’s job purely as the seller of its members’ labour power). It is based on unions managed directly by the rank and file membership rather than by elected officials and bureaucrats. The industrial union is not based on where the worker lives (as is the case with many trade unions). Instead, the union is based and run from the workplace. It is there that union meetings are held, where workers are exploited and oppressed and where their economic power lies. Industrial unionism is based on local branch autonomy, with each branch managing its own affairs. No union officials have the power to declare strikes “ unofficial” as every strike is decided upon by the membership is automatically “ official” simply because the branch decided it in a mass meeting.

Power in such an organisation would be decentralised into the hands of the membership, as expressed in local workplace assemblies. To co-ordinate strikes and other forms of action, these autonomous branches are part of a federal structure. The mass meeting in the workplace mandates delegates to express the wishes of the membership at “ labour councils” and “ industrial federations.” The labour council (“ Brouse du Travail”, in French) is the federation of all workplace branches of all industries in a geographical area (say, for example, in a city or region) and it has the tasks of, among other things, education, propaganda and the promotion of solidarity between the different workplaces in its area. Due to the fact it combines all workers into one organisation, regardless of industry or union, the labour council plays a key role in increasing class consciousness and solidarity. The industrial federation organises all workplaces in the same industry so ensuring that workers in one part of the country or world are not producing goods so that the bosses “ can supply the market and lose nothing by the strike”. So these federations are “organised not by craft or trade but by industries using the power they have just generated by collective action and organisation to change things by their own efforts. Social struggle is therefore a two way transformation — the external transformation of society by the creation of new organisations and the changing of the power relations within it and the internal transformation of those who take part in the struggle. This is key:

“Whatever may be the practical results of the struggle for immediate gains, the greatest value lies in the struggle itself. For thereby workers learn that the bosses interests are opposed to theirs and that they cannot improve their conditions, and much less emancipate themselves, except by uniting and becoming stronger than the bosses. If they succeed in getting what they demand, they will be better off … and immediately make greater demands and have greater needs. If they do not succeed they will be led to study the causes of their failure and recognise the need for closer unity and greater activism and they will in the end understand that to make their victory secure and definitive, it is necessary to destroy capitalism. The revolutionary cause, the cause of the moral elevation and emancipation of the workers must benefit by the fact that workers unite and struggle for their interests.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 191]

Hence Nestor Makhno’s comment that “[i]n fact, it is only through that struggle for freedom, equality and solidarity that you reach an understanding of anarchism.” [The Struggle Against the State and other Essays, p. 71] The creation of an anarchist society is a process and social struggle is the key anarchistic tendency within society which anarchists look for, encourage and support. Its radicalising and transforming nature is the key to the growth of anarchist ideas, the creation of libertarian structures
J.4.2 Won’t social struggle do more harm than good?

It is often argued that social struggle, resisting the powerful and the wealthy, will just do more harm than good. Employers often use this approach in anti-union propaganda, for example, arguing that creating a union will force the company to close and move to less “militant” areas.

There is some truth in this. Yes, social struggle can lead to bosses moving to more compliant workforces — but this also happens in periods lacking social struggle too! If we look at the down-sizing mania that gripped the U.S. in the 1980s and 1990s, we see companies firing tens of thousands of people during a period when unions were weak, workers scared about losing their jobs and class struggle basically becoming mostly informal, atomised and “underground.” Moreover, this argument actually indicates the need for anarchism. It is a damning indictment of any social system that it requires people to kow-tow to their masters otherwise they will suffer economic hardship. It boils down to the argument “do what you are told, otherwise you will regret it.” Any system based on that maxim is an affront to human dignity!

Anarchists propose a different kind of workplace organisation, one that is organised in a different manner than the mainstream unions. We will call this new kind of organisation “industrial unionism” (although perhaps industrial syndicalism, or just syndicalism, might be a better name for it). Some anarchists (particularly communist-anarchists) reject calling these workplace organisations “unions” and instead prefer such terms as workplace resistance groups, workplace assemblies and workers councils. No matter what they are called, all class struggle anarchists support the same organisational structure we are going to outline. It is purely for convenience that we term this industrial unionism.

An industrial union is a union which organises all workers in a given workplace and so regardless of their actual trade everyone would be in the one union. On a building site, for example, bricklayers, plumbers, carpenters and so on would all be a member of the Building Workers Union. Each trade may have its own sections within the union (so that plumbers can discuss issues relating to their trade for example) but the core decision making focus would be an assembly of all workers employed in a workplace. As they all have the same employer, the same exploiter, it is logical for them to have the same union.

It is organised by the guiding principle that workers should directly control their own organisations and struggles. It is based upon workplace assemblies because workers have “tremendous power” as the “creator of all wealth” but “the strength of the worker is not in the union meeting-hall; it is in the shop and factory, in the mill and mine. It is there that he [or she] must organise; there, on the job.” It is there that workers “decide the matters at issue and carry their decisions out through the shop committees” (whose members are “under the direction and supervision of the workers” and can be “recalled at will”). These committees are “associated locally, regionally and nationally” to produce “a power tremendous in its scope and potentialities.” [Berkman, Op. Cit., pp. 205–6] This confederation is usually organised on two directions, between
worrying about what the people’s reaction might be, as expressed
and organised in their community assemblies and federations.

J.5.2 Why do anarchists support industrial
unionism?

Simply because it is effective in resisting capitalist exploitation and
winning reforms, ending capitalist oppression and expresses our
ideas on how industry will be organised in an anarchist society.
For workers “have the most enormous power in their hands, and, if
they once become thoroughly conscious of it and used it, nothing could
withstand them; they would only have to stop labour, regard the prod-
uct of labour as theirs, and enjoy it. This is the sense of the labour
disturbances which show themselves here and there.” [Max Stirner,
The Ego and Its Own, p. 116] Industrial unionism is simply lib-
ertarian workplace organisation and is the best way of organising
and exercising this power.

Before discussing why anarchists support industrial unionism,
we must point out that the type of unionism anarchists support has
very little in common with that associated with reformist unions
like the TUC in Britain or the AFL-CIO in the USA (see next sec-
tion). In such unions, as Alexander Berkman pointed out, the “rank
and file have little say. They have delegated their power to leaders,
and these have become the boss ... Once you do that, the power you
have delegated will be used against you and your interests every time.”
[What is Anarchism?, p. 205] Reformist unions, even if they do
organise by industry rather than by trade or craft, are top-heavy
and bureaucratic. Thus they are organised in the same manner as
capitalist firms or the state — and like both of these, the officials
at the top have different interests than those at the bottom. Little
wonder anarchists oppose such forms of unionism as being counter
to the interests of their members. The long history of union offi-
cials betraying their members is proof enough of this.

and being little more than apologetics for an evil social system that
treated human beings as things. The same can be said for the argu-
ment that social struggles within capitalism do more harm than
good. It betrays a slave mentality unfitting for human beings (al-
though fitting for those who desire to live of the backs of workers
or desire to serve those who do).

Moreover, this kind of argument ignores a few key points.
Firstly, by resistance the conditions of the oppressed can be
maintained or even improved. If the boss knows that their
decisions will be resisted they may be less inclined to impose
speed-ups, longer hours and so on. If, on the other hand, they
know that their employees will agree to anything then there is
every reason to expect them to impose all kinds of oppressions,
just as a state will impose draconian laws if it knows that it can
get away with it. History is full of examples of non-resistance pro-
ducing greater evils in the long term and of resistance producing
numerous important reforms and improvements (such as higher
wages, shorter hours, the right to vote for working class people
and women, freedom of speech, the end of slavery, trade union
rights and so on).

So social struggle has been proven time and time again to gain
successful reforms. For example, before the 8 hour day movement
of 1886 in America most companies argued they could not intro-
duce that reform without doing bust. However, after displaying a
militant mood and conducting an extensive strike campaign, hun-
dreds of thousands of workers discovered that their bosses had
been lying and they got shorter hours. Indeed, the history of the
labour movement shows what bosses say they can afford and the
reforms workers can get via struggle are somewhat at odds. Given
the asymmetry of information between bosses and workers, this
is unsurprising as workers can only guess at what is available and
bosses like to keep their actual finances hidden. Even the threat of
labour struggle can be enough to gain improvements. For exam-
ple, Henry Ford’s $5 day is often used as an example of capitalism
rewarding good workers. However, this substantial pay increase was largely motivated by the unionisation drive by the **Industrial Workers of the World** among Ford workers in the summer of 1913. [Harry Braverman, *Labour and Monopoly Capitalism*, p. 144] More recently, it was the mass non-payment campaign against the poll-tax in Britain during the late 1980s and early 1990s which helped ensure its defeat. In the 1990s, France also saw the usefulness of direct action. Two successive prime ministers (Edouard Balladur and Alain Juppe) tried to impose large scale neo-liberal “reform” programmes that swiftly provoked mass demonstrations and general strikes amongst students, workers, farmers and others. Confronted by crippling disruptions, both governments gave in.

Secondly, and in some ways more importantly, the radicalising effect of social struggle can open new doors for those involved, liberate their minds, empower them and create the potential for deep social change. Without resistance to existing forms of authority a free society cannot be created as people adjust themselves to authoritarian structures and accept “what is” as the only possibility. By resisting, people transform and empower themselves as well as transforming society. New possibilities can be seen (possibilities before dismissed as “utopian”) and, via the organisation and action required to win reforms, the framework for these possibilities (i.e. of a new, libertarian, society) created. The transforming and empowering effect of social struggle is expressed well by the Nick DiGaetano, a one-time Wobbly who had joined during the 1912 Lawrence strike and then became a UAW-CIO shop floor militant:

“the workers of my generation from the early days up to now [1958] had what you might call a labour insurrection in changing from a plain, humble, submissive creature into a man. The union made a man out of him ... I am not talking about the benefits ... I am talking about the working conditions and how they affected the men in the plant ... Before they were submissive. Today they

"The union: in it combine spontaneously the workers from factories and all places of collective exploitation.

“And the free municipality: an assembly ... where, again in spontaneity, inhabitants ... combine together, and which points the way to the solution of problems in social life ...

“Both kinds of organisation, run on federal and democratic principles, will be sovereign in their decision making, without being beholden to any higher body, their only obligation being to federate one with another as dictated by the economic requirement for liaison and communications bodies organised in industrial federations.

“The union and the free municipality will assume the collective or common ownership of everything which is under private ownership at present [but collectively used] and will regulate production and consumption (in a word, the economy) in each locality.

“The very bringing together of the two terms (communism and libertarian) is indicative in itself of the fusion of two ideas: one of them is collectivist, tending to bring about harmony in the whole through the contributions and co-operation of individuals, without undermining their independence in any way; while the other is individualist, seeking to reassure the individual that his independence will be respected.”

]*Liberatarian Communism*, pp. 6–7*

The combination of community unionism, along with industrial unionism (see next section), will be the key to creating an anarchist society. Community unionism, by creating the free commune within the state, allows us to become accustomed to managing our own affairs and seeing that an injury to one is an injury to all. In this way a social power is created in opposition to the state. The town council may still be in the hands of politicians, but neither they nor the central government would be able to move without
couraged people to pursue the same extra-legal channels of activism that they had developed under the monarchy.” [Pamela Beth Radcliff, From mobilization to civil war, pp. 287–288 and p. 289]

In these ways, grassroots movements from below were created, with direct democracy and participation becoming an inherent part of a local political culture of resistance, with people deciding things for themselves directly and without hierarchy. Such developments are the embryonic structures of a world based around participation and self-management, with a strong and dynamic community life. For, as Martin Buber argued, "[t]he more a human group lets itself be represented in the management of its common affairs ... the less communal life there is in it and the more impoverished it becomes as a community." [Paths in Utopia, p. 133]

Anarchist support and encouragement of community unionism, by creating the means for communal self-management, helps to enrich the community as well as creating the organisational forms required to resist the state and capitalism. In this way we build the anti-state which will (hopefully) replace the state. Moreover, the combination of community unionism with workplace assemblies (as in Puerto Real), provides a mutual support network which can be very effective in helping winning struggles. For example, in Glasgow, Scotland in 1916, a massive rent strike was finally won when workers came out in strike in support of the rent strikers who had been arrested for non-payment. Such developments indicate that Isaac Puente was correct:

"Libertarian Communism is a society organised without the state and without private ownership. And there is no need to invent anything or conjure up some new organisation for the purpose. The centres about which life in the future will be organised are already with us in the society of today: the free union and the free municipality [or Commune].

Other labour historians note the same radicalising process elsewhere (modern day activists could give more examples!):

"The contest [over wages and conditions] so pervaded social life that the ideology of acquisitive individualism, which explained and justified a society regulated by market mechanisms and propelled by the accumulation of capital, was challenged by an ideology of mutualism, rooted in working-class bondings and struggles ... Contests over pennies on or off existing piece rates had ignited controversies over the nature and purpose of the American republic itself." [David Montgomery, The Fall of the House of Labour, p. 171]

This radicalising effect is far more dangerous to authoritarian structures than better pay, more liberal laws and so on as they need submissiveness to work. Little wonder that direct action is usually denounced as pointless or harmful by those in power or their spokespersons for direct action will, taken to its logical conclusion, put them out of a job! Struggle, therefore, holds the possibility of a free society as well as of improvements in the here and now. It also changes the perspectives of those involved, creating new ideas and values to replace the ones of capitalism.

Thirdly, it ignores the fact that such arguments do not imply the end of social struggle and working class resistance and organisation, but rather its extension. If, for example, your boss argues that they will move to Mexico if you do not "shut up and put up" then the obvious solution is to make sure the workers in Mexico are also organised! Bakunin argued this basic point over one hundred years ago, and it is still true: "in the long run the relatively
tolerable position of workers in one country can be maintained only on condition that it be more or less the same in other countries.” The “conditions of labour cannot get worse or better in any particular industry without immediately affecting the workers in other industries, and that workers of all trades are inter-linked with real and indissoluble ties of solidarity.” Ultimately, “in those countries the workers work longer hours for less pay; and the employers there can sell their products cheaper, successfully competing against conditions where workers working less earn more, and thus force the employers in the latter countries to cut wages and increase the hours of their workers.”

[Bakunin’s solution was to organise internationally, to stop this undercutting of conditions by solidarity between workers. As history shows, his argument was correct. Thus it is not social struggle or militancy which perhaps could have negative results, just isolated militancy, struggle which ignores the ties of solidarity required to win, extend and keep reforms and improvements. In other words, our resistance must be as transnational as capitalism is.

The idea that social struggle and working class organisation are harmful was expressed constantly in the 1970s and 80s. With the post-war Keynesian consensus crumbling, the “New Right” argued that trade unions (and strikes) hampered growth and that wealth redistribution (i.e. welfare schemes which returned some of the surplus value workers produced back into our own hands) hindered “wealth creation” (i.e. economic growth). Do not struggle over income, they argued, let the market decide and everyone will be better off.

This argument was dressed up in populist clothes. Thus we find the right-wing guru F.A. von Hayek arguing that, in the case of Britain, the “legalised powers of the unions have become the biggest obstacle to raising the standards of the working class as a whole. They are the chief cause of the unnecessarily big differences between the best- and worse-paid workers.” He maintained that “the elite of the British working class ... derive their relative advantages by keeping

In Gijon, the CNT “reinforced its populist image by ... its direct consumer campaigns. Some of these were organised through the federation’s Anti-Unemployment Committee, which sponsored numerous rallies and marches in favour of ‘bread and work.’ While they focused on the issue of jobs, they also addressed more general concerns about the cost of living for poor families. In a May 1933 rally, for example, demonstrators asked that families of unemployed workers not be evicted from their homes, even if they fell behind on the rent.” The “organisers made the connections between home and work and tried to draw the entire family into the struggle.” However, the CNT’s “most concerted attempt to bring in the larger community was the formation of a new syndicate, in the spring of 1932, for the Defence of Public Interests (SDIP). In contrast to a conventional union, which comprised groups of workers, the SDIP was organised through neighbourhood committees. Its specific purpose was to enforce a generous renters’ rights law of December 1931 that had not been vigorously implemented. Following anarchosyndicalist strategy, the SDIP utilised various forms of direct action, from rent strikes, to mass demonstrations, to the reversal of evictions.” This last action involved the local SDIP group going to a home, breaking the judge’s official eviction seal and carrying the furniture back in from the street. They left their own sign: “opened by order of the CNT.” The CNT’s direct action strategies “helped keep political discourse in the street, and en-
A similar concern for community organising and struggle was expressed in Spain. While the collectives during the revolution are well known, the CNT had long organised in the community and around non-workplace issues. As well as neighbourhood based defence committees to organise and co-ordinate struggles and insurrections, the CNT organised various community based struggles. The most famous example of this must be the rent strikes during the early 1930s in Barcelona. In 1931, the CNT’s Construction Union organised a “Economic Defence Commission” to organise against high rents and lack of affordable housing. Its basic demand was for a 40% rent decrease but it also addressed unemployment and the cost of food. The campaign was launched by a mass meeting on May 1st, 1931. A series of meetings were held in the various working class neighbourhoods of Barcelona and in surrounding suburbs. This culminated in a mass meeting held at the Palace of Fine Arts on July 5th which raised a series of demands for the movement. By July, 45,000 people were taking part in the rent strike and this rose to over 100,000 by August. As well as refusing to pay rent, families were placed back into their homes from which they had been evicted. The movement spread to a number of the outlying towns which set up their own Economic Defence Commissions. The local groups co-ordinated actions their actions out of CNT union halls or local libertarian community centres. The movement faced increased state repression but in many parts of Barcelona landlords had been forced to come to terms with their tenants, agreeing to reduced rents rather than facing the prospect of having no income for an extended period or the landlord simply agreed to forget the unpaid rents from the period of the rent strike. [Nick Rider, “The Practice of Direct Action: the Barcelona rent strike of 1931”, For Anarchism, David Goodway (ed.), pp. 79–105] As Abel Paz summarised:

“Unemployed workers did not receive or ask for state aid ... The workers’ first response to the economic cri-
3.2% in the 1970s, 2.8% in the 1980s and 1.9% in the first half of the 1990s). [Larry Elliot and Dan Atkinson, *The Age of Insecurity*, p. 236] Given that the free-market right proclaims higher economic growth is the only way to make workers better off, growth rates have steadily fallen internationally since the domination of their ideology. Thus growth of output per head in the USA, Europe, Japan and the OECD countries between 1979 to 1990 was lower than in 1973–9, and 1990–2004 lower still. The deregulation, privatisation, anti-union laws and other neo-liberal policies have “failed to bring an increase in the growth rate.” [Andrew Glyn, *Capitalism Unleashed*, p. 131] What growth spurts there have been were associated with speculative bubbles (in the American economy, dot.com stocks in the late 1990s and housing in the 2000s) which burst with disastrous consequences.

So the rate of “wealth creation” (economic growth) has steadily fallen as unions were “reformed” in line with von Hayek’s ideology (and lower growth means that the living standards of the working class as a whole do not rise as fast as they did under the “exploitation” of the “monopolistic” trade unions).

If we look at the differences between the highest and lowest paid workers, we find that rather than decrease, they have in fact shown “a dramatic widening out of the distribution with the best-workers doing much better” since Thatcher was elected in 1979 [Andrew Glyn and David Miliband (eds.), *Paying for Inequality*, p. 100] This is important, as average figures can hide how badly those in the bottom (80%) are doing. In an unequal society, the gains of growth are monopolised by the few and we would expect rising inequality over time alongside average growth. In America inequality has dramatically increased since the 1970s, with income and wealth growth in the 1980s going predominately to the top 20% (and, in fact, mostly to the top 1% of the population). The bottom 80% of the population saw their wealth grow by 1.2% and their income by 23.7% in the 1980s, while for the top 20% the respective figures were 98.2% and 66.3% (the figures for the top 1% were 61.6% and

### In Chile during 1925

“a grass roots movement of great significance emerged,” the tenant leagues (ligas do arrendatarios). The movement pledged to pay half their rent beginning the 1st of February, 1925, at huge public rallies (it should also be noted that “Anarchist labour unionists had formed previous ligas do arrendatarios in 1907 and 1914.”). The tenants leagues were organised by ward and federated into a city-wide council. It was a vast organisation, with 12,000 tenants in just one ward of Santiago alone. The movement also “press[ed] for a law which would legally recognise the lower rents they had begun paying .. . the leagues voted to declare a general strike ... should a rent law not be passed.” The government gave in, although the landlords tried to get around it and, in response, on April 8th “the anarchists in Santiago led a general strike in support of the universal rent reduction of 50 percent.” Official figures showed that rents “fell sharply during 1915, due in part to the rent strikes” and for the anarchists “the tenant league movement had been the first step toward a new social order in Chile.” [Peter DeShazo, *Urban Workers and Labor Unions in Chile 1902–1927*, p. 223, p. 327, p. 223, p. 225 and p. 226] As one Anarchist newspaper put it:

> “This movement since its first moments had been essentially revolutionary. The tactics of direct action were preached by libertarians with highly successful results, because they managed to instil in the working classes the idea that if landlords would not accept the 50 percent lowering of rents, they should pay nothing at all. In libertarian terms, this is the same as taking possession of common property. It completes the first stage of what will become a social revolution.” [quoted by DeShazo, *Op. Cit.*, p. 226]
As one participant put it: “The initial vocabulary was simply: Let’s do things for ourselves, and do them right. Let’s decide for ourselves. Let’s decide democratically, and if we do, then let’s explicitly agree that we’re all equals here, that there are no bosses … We lead ourselves. We lead together. We lead and decide amongst ourselves … no one invented it … It just happened. We met one another on the corner and decided, enough! … Let’s invent new organisational forms and reinvent society.” Another notes that this was people who “begin to solve problems themselves, without turning to the institutions that caused the problems in the first place.” The neighbourhood assemblies ended a system in which “we elected people to make our decisions for us … now we will make our own decisions.”

While the “anarchist movement has been talking about these ideas for years” the movement took them up “from necessity.” [Marina Sitrin (ed.), Horizontalism: Voices of Popular Power in Argentina, p. 41 and pp. 38–9]

The idea of community organising has long existed within anarchism. Kropotkin pointed to the directly democratic assemblies of Paris during the French Revolution: These were “constituted as so many mediums of popular administration, it remained of the people, and this is what made the revolutionary power of these organisations.” This ensured that the local revolutionary councils “which sprang from the popular movement was not separated from the people.” In this popular self-organisation “the masses, accustoming themselves to act without receiving orders from the national representatives, were practising what was described later on as Direct Self-Government.” These assemblies federated to co-ordinate joint activity but it was based on their permanence: “that is, the possibility of calling the general assembly whenever it was wanted by the members of the section and of discussing everything in the general assembly.” In short, “the Commune of Paris was not to be a governed State, but a people governing itself directly — when possible — without intermediaries, without masters” and so “the principles of anarchism … had their origin, not in theoretic speculations, but in the deeds of the Great
population had a below average increase in their income.” [Towards an Inclusive Democracy, p. 113]

The reason for this rising inequality is not difficult to determine. When workers organise and strike, they can keep more of what they produce in their own hands. The benefits of productivity growth, therefore, can be spread. With unions weakened, such gains will accumulate in fewer hands and flood upwards. This is precisely what happened. Before (approximately) 1980 and the neo-liberal assault on unions, productivity and wages rose hand-in-hand in America, afterward productivity continued to rise while wages flattened. In fact, the value of the output of an average worker “has risen almost 50 percent since 1973. Yet the growing concentration of income in the hands of a small minority had proceeded so rapidly that we’re not sure whether the typical American has gained anything from rising productivity.” Rather than “trickle down” “the lion’s share of economic growth in America over the past thirty years has gone to a small, wealthy minority.” In short: “The big winners … have been members of a very narrow elite: the top 1 percent or less of the population.” [Paul Krugman, The Conscience of a Liberal, p. 124, p. 244 and p. 8]

Looking at America, after the Second World War the real income of the typical family (“exploited” by “monopolistic” trade unions) grew by 2.7% per year, with “incomes all through the income distribution grew at about the same rate.” Since 1980 (i.e., after working people were freed from the tyranny of unions), “medium family income has risen only about 0.7 percent a year” Median household income “grew modestly” from 1973 to 2005, the total gain was about 16%. Yet this “modest gain” may “overstate” how well American families were doing, as it was achieved in part through longer working hours. For example, “a gain in family income that occurs because a spouse goes to work isn’t the same thing as a wage increase. In particular it may carry hidden costs that offset some of the gains in money.” This stagnation is, of course, being denied by the right. Yet, as Krugman memorably puts it: “Modern economists debate whether American
tor could develop, along with a communal confederation of community unions and their co-operative banks.

Such community unions have been formed in many different countries in recent years to fight against numerous attacks on the working class. In the late 1980s and early 1990s groups were created in neighbourhoods across Britain to organise non-payment of the Conservative government’s Community Charge (popularly known as the poll tax, this tax was independent on income and was based on the electoral register). Federations of these groups were created to co-ordinate the struggle and pull resources and, in the end, ensured that the government withdrew the hated tax and helped push Thatcher out of government. In Ireland, similar groups were formed to defeat the privatisation of the water industry by a similar non-payment campaign in the mid-1990s.

However, few of these groups have been taken as part of a wider strategy to empower the local community but the few that have indicate the potential of such a strategy. This potential can be seen from two examples of libertarian community organising in Europe, one in Italy and another in Spain, while the neighbourhood assemblies in Argentina show that such popular self-government can and does develop spontaneously in struggle.

In Southern Italy, anarchists organised a very successful Municipal Federation of the Base (FMB) in Spezzano Albanese. This organisation, in the words of one activist, is “an alternative to the power of the town hall” and provides a “glimpse of what a future libertarian society could be.” Its aim is “the bringing together of all interests within the district. In intervening at a municipal level, we become involved not only in the world of work but also the life of the community ... the FMB make counter proposals [to Town Hall decisions], which aren’t presented to the Council but proposed for discussion in the area to raise people’s level of consciousness. Whether they like it or not the Town Hall is obliged to take account of these proposals.” In addition, the FMB also supports co-operatives within it, so creating a communalised, self-managed economic sector within median income has risen or fallen since the early 1970s. What’s really telling is the fact that we’re even having this debate.” So while the average values may have went up, because of “rising inequality, good performance in overall numbers like GDP hasn’t translated into gains for ordinary workers.” [Op. Cit., p. 55, pp. 126–7, p. 124 and p. 201]

Luckily for American capitalism a poll in 2000 found that 39% of Americans believe they are either in the wealthiest 1% or will be there “soon”! [Glyn, Op. Cit., p. 179] In fact, as we discussed in section B.7.2, social mobility has fallen under neo-liberalism — perhaps unsurprisingly as it is easier to climb a hill than a mountain. This is just as important as the explosion in inequality as the “free-market” right argue that dynamic social mobility makes up for wealth and income inequality. As Krugman notes, Americans “may believe that anyone can succeed through hard work and determination, but the facts say otherwise.” In reality, mobility is “highest in the Scandinavian countries, and most results suggest that mobility is lower in the United States than it is in France, Canada, and maybe even in Britain. Not only don’t Americans have equal opportunity, opportunity is less equal here than elsewhere in the West.” Without the blinkers of free market capitalist ideology this should be unsurprising: “A society with highly unequal results is, more or less inevitably, a society with highly unequal opportunity, too.” [Op. Cit., p. 247 and p. 249]

Looking at the claim that trade union members gained their “relative advantage by keeping workers who are worse off from improving their position” it would be fair to ask whether the percentage of workers in low-paid jobs decreased in Britain after the trade union reforms. In fact, the percentage of workers below the Low Pay Unit’s definition of low pay (namely two-thirds of men’s median earnings) increased — from 16.8% in 1984 to 26.2% in 1991 for men, 44.8% to 44.9% for women. For manual workers it rose by 15% to 38.4%, and for women by 7.7% to 80.7% (for non-manual workers the figures were 5.4% rise to 13.7% for men and a 0.5% rise to
If unions were gaining at the expense of the worse off, you would expect a decrease in the number in low pay, not an increase. An OECD study concluded that “[t]ypically, countries with high rates of collective bargaining and trade unionisation tend to have low incidence of low paid employment.” [OECD Employment Outlook, 1996, p. 94] Within America, we also discover that higher union density is associated with fewer workers earning around the minimum wage and that “right-to-work” states (i.e., those that pass anti-union laws) “tend to have lower wages, lower standard of living, and more workers earning around the minimum wage.” It is hard not to conclude that states “passed laws aimed at making unionisation more difficult would imply that they sought to maintain the monopoly power of employers at the expense of workers.” [Oren M. Levin-Waldman, “The Minimum Wage and Regional Wage Structure: Implications for Income Distribution”, pp. 635–57, Journal of Economic Issues, Vol. XXXVI, No. 3, p. 639 and p. 655]

As far as von Hayek’s prediction on wage flexibility leading to the “average worker’s income” rising fastest in a country where relative wages are flexible, it has been proved totally wrong. Between 1967 and 1971, real wages grew (on average) by 2.95% per year in the UK (nominal wages grew by 8.94%) [P. Armstrong, A. Glyn and J. Harrison, Capitalism Since World War II, p. 272]. In comparison, real household disposable income grew by just 0.5 percent between June 2006 and 2007. Average weekly earnings rose 2.9% between April 2006 and 2007 while inflation rose by 3.6% (Retail Prices Index) and 2.8% (Consumer Prices Index). [Elliot and Atkinson, The Gods That Failed, p. 163] This is part of a general pattern, with UK Real Wages per employee being an average 3.17% per year between 1960 and 1974, falling to 1.8% between 1980 and 1999. In America, the equivalent figures are 2.37% and 1.02%. [Eckhard Hein and Thorsten Schulten, Unemployment, Wages and Collective Bargaining in the European Union, p. 9] Looking at the wider picture, during the early 1970s when strikes and union
fought, not ignored. In addition, due to their small size, they are rarely viable experiments in communal living and nearly always fail after a short time (for a good summary of Kropotkin’s attitude to such communities, which can be taken as typical, see Graham Purchase’s *Evolution & Revolution* [pp. 122–125]). Dropping out will not stop capitalism and the state and while such communities may try to ignore the system, they will find that the system will not ignore them — they will come under competitive and ecological pressures from capitalism whether they like it or not assuming they avoid direct political interference.

So the alternatives we discuss here are attempts to create anarchist alternatives within capitalism and which aim to change it (either by revolutionary or evolutionary means). They are based upon challenging capitalism and the state, not ignoring them by dropping out. Only by a process of direct action and building alternatives which are relevant to our daily lives can we revolutionise and change both ourselves and society.

**J.5.1 What is community unionism?**

Community unionism is our term for the process of creating participatory communities (called “communes” in classical anarchism) within the current society in order to transform it.

Basically, a community union is the creation of interested members of a community who decide to form an organisation to fight against injustice and improvements locally. It is a forum by which inhabitants can raise issues that affect themselves and others and provide a means of solving these problems. As such, it is a means of directly involving local people in the life of their own communities and collectively solving the problems facing them as both individuals and as part of a wider society. In this way, local people take part in deciding what effects them and their community and create a self-managed “dual power” to the local and national state.
So we have a stark contrast between the assertions of the right and the reality their ideology helped create. The reason for this difference is not hard to discover. As economist Paul Krugman correctly argues unions “raise average wages for their membership; they also, indirectly and to a lesser extent, raise wages for similar workers … as nonunionised employers try to diminish the appeal of union drives to their workers … unions tend to narrow income gaps among blue-collar workers, by negotiating bigger wage increases for their worse-paid members … And nonunion employers, seeking to forestall union organisers, tend to echo this effect.” He argues that “if there’s a single reason blue-collar workers did so much better in the fifties than they had in the twenties, it was the rise of unions” and that unions “were once an important factor limiting income inequality, both because of their direct effect in raising their members’ wages and because the union pattern of wage settlements … was … reflected in the labour market as a whole.” With the smashing of the unions came rising inequality, with the “sharpest increases in wage inequality in the Western world have taken place in the United States and in Britain, both of which experience sharp declines in union membership.” Unions restrict inequality because “they act as a countervailing force to management.” [Op. Cit., p. 51, p. 49, p. 149 and p. 263]

So under the neo-liberal regime instigated by Thatcher and Reagan the power, influence and size of the unions were reduced considerably and real wage growth fell considerably — which is the exact opposite of von Hayek’s predictions. Flexible wages and weaker unions have harmed the position of all workers (Proudhon: “Contrary to all expectation! It takes an economist not to expect these things” [System of Economical Contradictions, p. 203]). So comparing the claims of von Hayek to what actually happened after trade union “reform” and the reduction of class struggle suggests that claims that social struggle is self-defeating are false (and self-serving, considering it is usually bosses, employer supported parties and economists who make these claims). A lack of social and on induction therefrom as to the future.” It is “representative … of the creative, instructive power of the people themselves who aimed at developing institutions of common law in order to protect them from the power-seeking minority.” Anarchism bases itself on those tendencies that are created by the self-activity of working class people and while developing within capitalism are in opposition to it — such tendencies are expressed in organisational form as unions and other forms of workplace struggle, co-operatives (both productive and credit), libertarian schools, and so on. For anarchism was “born among the people — in the struggles of real life and not in the philosopher’s studio” and owes its “origin to the constructive, creative activity of the people … and to a protest — a revolt against the external force which had thrust itself upon” social institutions. [Anarchism, p. 158, p. 147, p. 150 and p. 149] This “creative activity” is expressed in the organisations created in the class struggle by working people, some of which we discuss in this section of the FAQ. Therefore, the alternatives anarchists support should not be viewed in isolation of social struggle and working class resistance to hierarchy — the reverse in fact, as these alternatives are almost always expressions of that struggle.

Lastly, we should note we do not list all the forms of organisation anarchists create. For example, we have ignored solidarity groups (for workers on strike or in defence of struggles in other countries) and organisations which are created to campaign against or for certain issues or reforms. Anarchists are in favour of such organisations and work within them to spread anarchist ideas, tactics and organisational forms. However, these interest groups (while very useful) do not provide a framework for lasting change as do the ones we highlight below (see section J.1.4 for more details on anarchist opinions on such “single issue” campaigns). We have also ignored what have been called “intentional communities.” This is when a group of individuals squat or buy land and other resources within capitalism and create their own anarchist commune in it. Most anarchists reject this idea as capitalism and the state must be
when it came, would be essentially brought about by the working class. Revolutionaries needed to gather great strength and must beware of underestimating the strength of reaction” and so anarchists “logically decided that revolutionaries had better organise along the lines of labour organisations.” [“The Spanish case”, pp. 60–83, Anarchism Today, D. Apter and J. Joll (eds.), p. 66]

As will quickly become obvious in this discussion (as if it had not been so before!) anarchists are firm supporters of “self-help,” an expression that has been sadly corrupted (like freedom) by the right in recent times. Like freedom, self-help should be saved from the clutches of the right who have no real claim to that expression. Indeed, anarchism was created from and based itself upon working class self-help – for what other interpretation can be gathered from Proudhon’s 1848 statement that “the proletariat must emancipate itself”? [quoted by George Woodcock, Pierre-Joseph Proudhon, p. 125] So Anarchists have great faith in the abilities of working class people to work out for themselves what their problems are and act to solve them.

Anarchist support and promotion of alternatives is a key aspect of this process of self-liberation, and so a key aspect of anarchism. While strikes, boycotts, and other forms of high profile direct action may be more “sexy” than the long and hard task of creating and building social alternatives, these are the nuts and bolts of creating a new world as well as the infrastructure which supports the other activities. These alternatives involve both combative organisations (such as community and workplace unions) as well as more defensive and supportive ones (such as co-operatives and mutual banks). Both have their part to play in the class struggle, although the combative ones are the most important in creating the spirit of revolt and the possibility of creating an anarchist society.

We must also stress that anarchists look to organic tendencies within social struggle as the basis of any alternatives we try to create. As Kropotkin put it, anarchism is based “on an analysis of tendencies of an evolution that is already going on in society, struggle has been correlated with low economic growth and often stagnant (even declining) wages. So while social struggle may make capital flee and other problems, lack of it is no guarantee of prosperity (quite the reverse, if the last quarter of the 20th century is anything to go by). Indeed, a lack of social struggle will make bosses be more likely to cut wages, worsen working conditions and so on – after all, they feel they can get away with it! Which brings home the fact that to make reforms last it is necessary to destroy capitalism.

Of course, no one can know that struggle will make things better. It is a guess; no one can predict the future. Not all struggles are successful and many can be very difficult. If the “military is a role model for the business world” (in the words of an ex-CEO of Hill & Knowlton Public Relations), and it is, then any struggle against it and other concentrations of power may, and often is, difficult and dangerous at times. [quoted by John Stauber and Sheldon Rampton in Toxic Sludge Is Good For You!, p. 47] But, as Zapata once said, “better to die on your feet than live on your knees!” All we can say is that social struggle can and does improve things and, in terms of its successes and transforming effect on those involved, well worth the potential difficulties it can create. Moreover, without struggle there is little chance of creating a free society, dependent as it is on individuals who refuse to bow to authority and have the ability and desire to govern themselves. In addition, social struggle is always essential, not only to win improvements, but to keep them as well. In order to fully secure improvements you have to abolish capitalism and the state. Not to do so means that any reforms can and will be taken away (and if social struggle does not exist, they will be taken away sooner rather than later). Ultimately, most anarchists would argue that social struggle is not an option — we either do it or we put up with the all the petty (and not so petty) impositions of authority. If we do not say “no” then the powers that be will walk all over us.
As the history of neo-liberalism shows, a lack of social struggle is fully compatible with worsening conditions. Ultimately, if you want to be treated as a human being you have to stand up for your dignity — and that means thinking and rebelling. As Bakunin argued in *God and the State*, human freedom and development is based on these. Without rebellion, without social struggle, humanity would stagnate beneath authority forever and never be in a position to be free. So anarchists agree wholeheartedly with the Abolitionist Frederick Douglass:

“If there is no struggle, there is no progress. Those who profess to favour freedom, and yet depreciate agitation, are men who want crops without ploughing up the ground. They want rain without thunder and lightning. They want the ocean without the awful roar of its many waters.

“This struggle may be a moral one; or it may be a physical one; or it may be both moral and physical; but it must be a struggle. Power concedes nothing without a demand. It never did and it never will. Find out just what a people will submit to, and you have found out the exact amount of injustice and wrong which will be imposed upon them; and these will continue till they are resisted with either words or blows, or with both. The limits of tyrants are prescribed by the endurance of those whom they oppress.”

*[The Life and Writings of Frederick Douglass, vol. 2, p. 437]*

Of course, being utterly wrong has not dented von Hayek’s reputation with the right nor stopped him being quoted in arguments in favour of flexibility and free market reforms (what can we expect? The right still quote Milton Friedman whose track-record was equally impressive). Still, why let the actual development of the economies influenced by von Hayek’s ideology get in the way? confederal network based upon mutual aid and solidarity. In other words, they are **anarchist** in both spirit and structure and so create a practical bridge between now and the future free society.

Anarchists consider the building of alternatives as a key aspect of their activity under capitalism. This is because they, like all forms of direct action, are “**schools of anarchy**” and also because they make the transition to a free society easier. “**Through the organisations set up for the defence of their interests,**” in Malatesta’s words, “the workers develop an awareness of the oppression they suffer and the antagonism that divides them from the bosses and as a result begin to aspire to a better life, become accustomed to collective struggle and solidarity and win those improvements that are possible within the capitalist and state regime.”

*[The Anarchist Revolution, p. 95]* By creating viable examples of “**anarchy in action**” we can show that our ideas are practical and convince people that they are not utopian. Therefore this section of the FAQ will indicate the alternatives anarchists support and why we support them.

The approach anarchists take to this activity could be termed **“social unionism”** — the collective action of groups to change certain aspects (and, ultimately, all aspects) of their lives. This takes many different forms in many different areas (some of which, not all, are discussed here) — but they share the same basic aspects of collective direct action, self-organisation, self-management, solidarity and mutual aid. These are a means “of raising the morale of the workers, accustom them to free initiative and solidarity in a struggle for the good of everyone and render them capable of imagining, desiring and putting into practice an anarchist life.”

*[Malatesta, Op. Cit., p. 28]* Kropotkin summed up the anarchist perspective well when he argued that working class people had “to form their own organisations for a direct struggle against capitalism” and to “take possession of the necessaries for production, and to control production.”

*[Memiors of a Revolutionist, p. 359]* As historian J. Romero Maura correctly summarised, the “**anarchist revolution**, 

3624 3657
do nothing for you. But you can do everything for yourselves.” [‘Aux Pariotes’, La Représentant du Peuple, No. 33] This was echoed by Bakunin (see section H.2.8) while for revolutionary syndicalists the aim was “to constitute within the bourgeois State a veritable socialist (economic and anarchic) State.” [Fernand Pelloutier, quoted by Jeremy Jennings, Syndicalism in France, p. 22] By so doing we help create the environment within which individuals can manage their own affairs and develop their abilities to do so. In other words, we create “schools of anarchism” which lay the foundations for a better society as well as promoting and supporting social struggle against the current system. Make no mistake, the alternatives we discuss in this section are not an alternative to direct action and the need for social struggle — they are an expression of social struggle and a form of direct action. They are the framework by which social struggle can build and strengthen the anarchist tendencies within capitalist society which will ultimately replace it.

Therefore it is wrong to think that libertarians are indifferent to making life more bearable, even more enjoyable, under capitalism. A free society will not just appear from nowhere, it will be created be individuals and communities with a long history of social struggle and organisation. For as Wilheim Reich so correctly pointed out:

“Quite obviously, a society that is to consist of ‘free individuals,’ to constitute a ‘free community’ and to administer itself, i.e. to ‘govern itself,’ cannot be suddenly created by decrees. It has to evolve organically.” [The Mass Psychology of Fascism, p. 241]

It is this organic evolution that anarchists promote when they create libertarian alternatives within capitalist society. These alternatives (be they workplace or community unions, co-operatives, mutual banks, and so on) are marked by certain common features such as being self-managed, being based upon equality, decentralised and working with other groups and associations within a Perhaps it is fortunate that he once argued that economic theories can “never be verified or falsified by reference to facts. All that we can and must verify is the presence of our assumptions in the particular case.” [Individualism and Economic Order, p. 73] With such a position all is saved — the obvious problem is that capitalism is still not pure enough and the “reforms” must not only continue but be made deeper… As Kropotkin stressed, “economists who continue to consider economic forces alone … without taking into account the ideology of the State, or the forces that each State necessarily places at the service of the rich … remain completely outside the realities of the economic and social world.” [quoted by Ruth Kinna, “Fields of Vision: Kropotkin and Revolutionary Change”, pp. 67–86, SubStance, Vol. 36, No. 2, pp. 72–3]

And, needless to say, while three decades of successful capitalist class war goes without mention in polite circles, documenting its results gets you denounced as advocating “class war”! It is more than pass the time when working class people should make that a reality — particularly given the results of not doing so.

J.4.3 Are the new social movements a positive development for anarchists?

When assessing the revolutionary potential of our own era, we must note again that modern civilisation is under constant pressure from the potential catastrophes of social breakdown, ecological destruction, and proliferating weapons of mass destruction. These crises have drawn attention as never before to the inherently counter-evolutionary nature of the authoritarian paradigm, making more and more people aware that the human race is headed for extinction if it persists in outmoded forms of thought and behaviour. This awareness produces a favourable climate for the reception of new ideas, and thus an opening for radical educational efforts aimed at creating the mass transformation of consciousness
J.5 What alternative social organisations do anarchists create?

Anarchism is all about “do it yourself”: people helping each other out in order to secure a good society to live within and to protect, extend and enrich their personal freedom. As such anarchists are keenly aware of the importance of building alternatives to both capitalism and the state in the here and now. Only by creating practical alternatives can we show that anarchism is a viable possibility and train ourselves in the techniques and responsibilities of freedom:

“If we put into practice the principles of libertarian communism within our organisations, the more advanced and prepared we will be on that day when we come to adopt it completely.” [C.N.T. member, quoted by Graham Kelsey, *Anarchosyndicalism, Libertarian Communism and the State*, p. 79]

This idea (to quote the IWW) of “building a new world in the shell of the old” is a long standing one in anarchism. Proudhon during the 1848 revolution “propose[d] that a provisional committee be set up” in Paris and “liaise with similar committees” elsewhere in France. This would be “a body representative of the proletariat ..., a state within the state, in opposition to the bourgeois representatives.” He proclaimed to working class people that “a new society be founded in the heart of the old society” for “the government can
big marketplace, it is being subverted by activists — an example of anarchistic trends within society worrying the powers that be.

A good example of this powerful tool is the incredible speed and range at which information travels the Internet about events concerning Mexico and the Zapatistas. When Alexander Cockburn wrote an article exposing a Chase Manhattan Bank memo about Chiapas and the Zapatistas in *Counterpunch*, only a small number of people read it because it is only a newsletter with a limited readership. The memo, written by Rordion Roett, argued that “the [Mexican] government will need to eliminate the Zapatistas to demonstrate their effective control of the national territory and of security policy”. In other words, if the Mexican government wants investment from Chase, it would have to crush the Zapatistas. This information was relatively ineffective when just confined to print but when it was uploaded to the Internet, it suddenly reached a very large number of people. These people in turn co-ordinated protests against the U.S and Mexican governments and especially Chase Manhattan. Chase was eventually forced to attempt to distance itself from the Roett memo that it commissioned. Since then net-activism has grown.

Ronfeldt’s research and opinion should be flattering for the Left. He is basically arguing that the efforts of activists on computers not only has been very effective (or at least has that potential), but more importantly, argues that the only way to counter this work is to follow the lead of social activists. Activists should understand the important implications of Ronfeldt’s work: government elites are not only watching these actions (big surprise) but are also attempting to work against them. Thus Netwars and copyleft are good examples of anarchistic trends within society, using communications technology as a means of co-ordinating activity across the world in a libertarian fashion for libertarian goals.

Direct democracy is the other side of decentralisation. In order for an organisation to spread power horizontally rather than concentrating it at the apex of a hierarchy, all of its members have to have an equal voice in making the decisions that affect them. Hence decentralisation implies self-management. So, anarchists argue, the peace movement implies anarchism because world peace is impossible without both decentralisation and direct democracy (“a federated people would be a people organised for peace; what would they do with armies?” [Proudhon, *Du Principe Fédératif*, pp. 320–1]). As Benello correctly argued, the “anarchist perspective has an unparalleled relevance today because prevailing nuclear policies can be considered as an ultimate stage in the divergence between the interests of governments and their peoples . . . the implications when revealed serve to raise fundamental questions regarding the advisability of entrusting governments with questions of life and death . . . There is thus a pressing impetus to re-think the role, scale, and structure of national governments.” Moreover, “[s]o long as profits are tied to defence production, speaking truth to the elites involved is not likely to get very far” as “it is only within the boundaries of the profit system that the corporate elites would have any space to move.” [Op. Cit., p. 138 and p. 34] Thus the peace movement implicitly contains a libertarian critique of both forms of the power system — the political and economical.

In addition, certain of the practical aspects of the peace movement also suggest anarchistic elements. The use of non-violent direct action to protest against the war machine can only be viewed as a positive development by anarchists. Not only does it use effective, anarchistic methods of struggle it also radicalises those involved, making them more receptive to anarchist ideas and analysis.

If we look at the implications of “nuclear free zones” we can detect anarchistic tendencies within them. A nuclear free zone involves a town or region declaring an end of its association with the nuclear military industrial complex. They prohibit the research,
production, transportation and deployment of nuclear weapons as well as renouncing the right to be defended by nuclear power. This movement was popular in the 1980s, with many areas in Europe and the Pacific Basin declaring that they were nuclear free zones. As Benello pointed out, “[t]he development of campaigns for nuclear free zones suggests a strategy which can educate and radicalise local communities. Indeed, by extending the logic of the nuclear free zone idea, we can begin to flesh out a libertarian municipalist perspective which can help move our communities several steps towards autonomy from both the central government and the existing corporate system.” While the later development of these initiatives did not have the radicalising effects that Benello hoped for, they did “represent a local initiative that does not depend on the federal government for action. Thus it is a step toward local empowerment ... Steps that increase local autonomy change the power relations between the centre and its colonies ... The nuclear free zone movement has a thrust which is clearly congruent with anarchist ideas ... The same motives which go into the declaration of a nuclear free zone would dictate that in other areas where the state and the corporate systems services are dysfunctional and involve excessive costs, they should be dispensed with.” [Op. Cit., p. 137 and pp. 140–1]

The social justice movement is composed of people seeking fair and compassionate solutions to problems such as poverty, unemployment, economic exploitation, discrimination, poor housing, lack of health insurance, wealth and income inequalities, and the like. In the aftermath of decades of especially single-minded pursuit of this priority by neo-liberal administrations, the United States, for example, is reaping the grim harvest: wages stagnate, personal debt soars, homelessness stalks the streets; social welfare budgets are slashed to the bone while poverty, unemployment, and underemployment grow; sweatshops mushrooming in the large cities; millions of Americans without any health insurance while others face rocketing costs; obscene wealth inequalities and falling social mobility; and so on. Britain under the neo-liberal policies complex). In other words, activism and activists’ power and influence has been fuelled by the advent of the information revolution. Through computer and communication networks, especially via the Internet, grassroots campaigns have flourished, and the most importantly, government elites have taken notice.

Ronfeldt specialises in issues of national security, especially in the areas of Latin American and the impact of new informational technologies. Ronfeldt and another colleague coined the term “netwar” in a Rand document entitled “Cyberwar is Coming!”. Ronfeldt’s work became a source of discussion on the Internet in mid-March 1995 when Pacific News Service correspondent Joel Simon wrote an article about Ronfeldt’s opinions on the influence of netwars on the political situation in Mexico after the Zapatista uprising. According to Simon, Ronfeldt holds that the work of social activists on the Internet has had a large influence — helping to co-ordinate the large demonstrations in Mexico City in support of the Zapatistas and the proliferation of EZLN communiqués across the world via computer networks. These actions, Ronfeldt argues, have allowed a network of groups that oppose the Mexican Government to muster an international response, often within hours of actions by it. In effect, this has forced the Mexican government to maintain the facade of negotiations with the EZLN and has on many occasions, actually stopped the army from just going in to Chiapas and brutally massacring the Zapatistas.

Given that Ronfeldt was an employee of the Rand Corporation his comments indicate that the U.S. government and its military and intelligence wings are very interested in what the Left is doing on the Internet. Given that they would not be interested in this if it were not effective, we can say that this use of the “Information Super-Highway” is a positive example of the use of technology in ways un-planned of by those who initially developed it (let us not forget that the Internet was originally funded by the U.S. government and military). While the internet is being hyped as the next
but no one may subtract from. Placing software under GPL means that every contributor is assured that she, and all other uses, will be able to run, modify and redistribute the code indefinitely. Unlike commercial software, copyleft code ensures an increasing knowledge base from which individuals can draw from and, equally as important, contribute to. In this way everyone benefits as code can be improved by everyone, unlike commercial code.

Many will think that this essentially anarchistic system would be a failure. In fact, code developed in this way is far more reliable and sturdy than commercial software. Linux, for example, is a far superior operating system than DOS precisely because it draws on the collective experience, skill and knowledge of thousands of developers. Apache, the most popular web-server, is another freeware product and is acknowledged as the best available. The same can be said of other key web-technologies (most obviously PHP) and projects (Wikipedia springs to mind, although that project while based on co-operative and free activity is owned by a few people who have ultimate control). While non-anarchists may be surprised, anarchists are not. Mutual aid and co-operation are beneficial in the evolution of life, why not in the evolution of software? For anarchists, this “gift economy” at the heart of the communications revolution is an important development. It shows both the superiority of common development as well as the walls built against innovation and decent products by property systems. We hope that such an economy will spread increasingly into the “real” world.

Another example of co-operation being aided by new technologies is Netwar. This refers to the use of the Internet by autonomous groups and social movements to co-ordinate action to influence and change society and fight government or business policy. This use of the Internet has steadily grown over the years, with a Rand corporation researcher, David Ronfeldt, arguing that this has become an important and powerful force (Rand is, and has been since its creation in 1948, a private appendage of the military industrial

of Thatcher, Major and Blair experienced a social deterioration similar to that in the US.

It is not difficult to show that the major problems concerning the social justice movement can all be traced back to the hierarchy and domination. For, given the purpose of hierarchy, the highest priority of the elites who control the state is necessarily to maintain their own power and privileges, regardless of the suffering involved for subordinate classes.

In short, social injustice is inherent in the exploitative functions of the state, which are made possible by the authoritarian form of state institutions. Similarly, the authoritarian structure of capitalist companies gives rise to social injustice due to exploitation producing massive income differentials and wealth disparity between owners/management and labour. Hence the success of the social justice movement, like that of the feminist, ecology, and peace movements, depends on dismantling hierarchies. This means not only that these movements all imply anarchism but that they are related in such a way that it is impossible to conceive one of them achieving its goals in isolation from any of the others. To take just one example, let us consider the relationship between social justice and peace, which can be seen by examining a specific social justice issue: labour rights.

The production of advanced weapons systems is highly profitable for capitalists, which is why more technologically complex and precise weapons keep getting built with government help (with the public paying the tab by way of taxes). Now, we may reasonably argue that it is a fundamental human right to be able to choose freely whether or not one will personally contribute to the production of technologies that could lead to the extinction of the human race. Yet because of the authoritarian form of the capitalist corporation, rank-and-file workers have virtually no say in whether the companies for which they work will produce such technologies. (To the objection that workers can always quit if they don’t like company policy, the reply is that they may
not be able to find other work and therefore that the choice is not genuinely free). Hence the only way that ordinary workers can obtain the right to be consulted on life-or-death company policies is to control the production process themselves, through self-management as production for need and use will never come from the employer. The owners of production in a capitalist society will never begin to take social priorities into account in the production process. The pursuit of ever greater profits is not compatible with social justice and responsibility.

For these reasons, the peace and social justice movements are fundamentally linked through their shared need for a worker-controlled economy. Moreover, extreme poverty makes military service one of the few legal options open for many individuals to improve their social situation. These considerations illustrate further links between the peace and social justice movements — and between those movements and anarchism, which is the conceptual “glue” that can potentially unite all the new social movement in a single anti-authoritarian coalition.

**J.4.4 What is the “economic structural crisis”?**

There is an ongoing structural crisis in the global capitalist economy. Compared to the post-war “Golden Age” of 1950 to 1973, the period from 1974 has seen a continual worsening in economic performance in the West and for Japan. For example, growth is lower, unemployment is far higher, labour productivity lower as is investment. Average rates of unemployment in the major industrialised countries have risen sharply since 1973, especially after 1979. Unemployment “in the advanced capitalist countries … increased by 56 per cent between 1973 and 1980 (from an average 3.4 per cent to 5.3 per cent of the labour force) and by another 50 per cent since then (from 5.3 per cent of the labour force in 1980 to 8.0 per cent in 1994).”

Job insecurity has increased with, for example, the USA, having the tended. When the returns were uncertain and difficult to capture, private firms were unwilling to invest, and government played the decisive role. And not for want of trying, for key players in the military first tried to convince businesses and investment bankers that a new and potentially profitable business opportunity was presenting itself, but they did not succeed and it was only when the market expanded and the returns were more definite that the government receded. While the risks and development costs were socialised, the gains were privatised. All of which make claims that the market would have done it anyway highly unlikely.

Looking beyond state aid to the computer industry we discover a “do-it-yourself” (and so self-managed) culture which was essential to its development. The first personal computer, for example, was invented by amateurs who wanted their own cheap machines. The existence of a “gift” economy among these amateurs and hobbyists was a necessary precondition for the development of PCs. Without this free sharing of information and knowledge, the development of computers would have been hindered and so socialistic relations between developers and within the working environment created the necessary conditions for the computer revolution. If this community had been marked by commercial relations, the chances are the necessary breakthroughs and knowledge would have remained monopolised by a few companies or individuals, so hindering the industry as a whole.

Encouragingly, this socialistic “gift economy” is still at the heart of computer/software development and the Internet. For example, the Free Software Foundation has developed the General Public Licence (GPL). GPL, also known as “copyleft”, uses copyright to ensure that software remains free. Copyleft ensures that a piece of software is made available to everyone to use and modify as they desire. The only restriction is that any used or modified copyleft material must remain under copyleft, ensuring that others have the same rights as you did when you used the original code. It creates a commons which anyone may add to,
Of course there is no denying that the implications of improved communications and information technology are ambiguous, implying Big Brother as well the ability of progressive and radical movements to organise. However, the point is only that the information revolution in combination with the other social developments could (but will not necessarily) contribute to a social paradigm shift. Obviously such a shift will not happen automatically. Indeed, it will not happen at all unless there is strong resistance to governmental and corporate attempts to limit public access to information, technology (e.g. encryption programs), censor peoples’ communications and use of electronic media and track them on-line.

This use of the Internet and computers to spread the anarchist message is ironic. The rapid improvement in price-performance ratios of computers, software, and other technology today is often used to validate the faith in free market capitalism but that requires a monumental failure of historical memory as not just the Internet but also the computer represents a spectacular success of public investment. As late as the 1970s and early 1980s, according to Kenneth Flamm’s *Creating the Computer*, the federal government was paying for 40 percent of all computer-related research and 60 to 75 percent of basic research. Even such modern-seeming gadgets as video terminals, the light pen, the drawing tablet, and the mouse evolved from Pentagon-sponsored research in the 1950s, 1960s and 1970s. Even software was not without state influence, with databases having their root in US Air Force and Atomic Energy Commission projects, artificial intelligence in military contracts back in the 1950s and airline reservation systems in 1950s air-defence systems. More than half of IBM’s Research and Development budget came from government contracts in the 1950s and 1960s.

The motivation was national security, but the result has been the creation of comparative advantage in information technology for the United States that private firms have happily exploited and ex-worse job insecurity since the depression of the 1930s. [Takis Fotopoulous, *Towards and Inclusive Democracy*, p. 35 and p. 141]

In addition, the world economy have become far less stable with regular financial crises sweeping the world of de-regulated capitalism every few years or so.

This crisis is not confined to the economy. It extends into the ecological and the social, with the quality of life and well-being decreasing as GDP grows (as we noted in section C.10, economic factors cannot, and do not, indicate human happiness). However, here we discuss economic factors. This does not imply that the social and ecological crises are unimportant or are reducible to the economy. Far from it. We concentrate on the economic factor simply because this is the factor usually stressed by the establishment and it is useful to indicate the divergence of reality and hype we are currently being subjected to.

Ironically enough, as Marxist Robert Brenner points out, “as the neo-classical medicine has been administered in even stronger doses, the economy has performed steadily less well. The 1970s were worse than the 1960s, the 1980s worse than the 1970s, and the 1990s have been worse than the 1980s.” [“The Economics of Global Turbulence”, *New Left Review*, no. 229, p. 236] This is ironic because during the crisis of Keynesianism in the 1970s the right argued that too much equality and democracy harmed the economy, and so us all worse-of in the long run (due to lower growth, sluggish investment and so on). However, after decades of pro-capitalist governments, rising inequality, increased freedom for capital and its owners and managers, the weakening of trade unions and so on, economic growth has become worse!

If we look at the USA in the 1990s (usually presented as an economy that “got it right”) we find that the “cyclical upturn of the 1990s has, in terms of the main macro-economic indicators of growth — output, investment, productivity, and real compensation — has been even less dynamic than its relatively weak predecessors of the 1980s and the 1970s (not to mention those of the 1950s and 1960s).” [Brenner,
Of course, the economy is presented as a success — inequality is growing, the rich are getting richer and wealth is concentrating into fewer and fewer hands and so for the rich and finance capital, it can be considered a “Golden Age” and so is presented as such by the media. As economist Paul Krugman summarises, in America while the bulk of the population are working longer and harder to make ends meet “the really big gains went to the really, really rich.” In fact, “only the top 1 percent has done better since the 1970s than it did in the generation after World War II. Once you get way up the scale, however, the gains have been spectacular — the top tenth of a percent saw its income rise fivefold, and the top .01 percent of American is seven times richer than they were in 1973.” Significantly, the top 0.1% of Americans, a class with a minimum income of about $1.3 million and an average of about $3.5 million, receives more than 7 percent of all income — up from just 2.2 percent in 1979.” [The Conscience of a Liberal, p. 129 and p. 259]

So it is for this reason that it may be wrong to term this slow rot a “crisis” as it is hardly one for the ruling elite as their share in social wealth, power and income has steadily increased over this period. However, for the majority it is undoubtedly a crisis (the term “silent depression” has been accurately used to describe this). Unsurprisingly, when the chickens came home to roost under the Bush Junta and the elite faced economic collapse, the state bailed them out.

The only countries which saw substantial and dynamic growth after 1973 where those which used state intervention to violate the eternal “laws” of neo-classical economics, namely the South East Asian countries (in this they followed the example of Japan which had used state intervention to grow at massive rates after the war). Of course, before the economic crisis of 1997, capitalist ideologues argued that these countries were classic examples of “free market” economies. Right-wing icon F.A von Hayek asserted that “South Korea and other newcomers” had “discovered the benefits of free markets.” [1980s Unemployment and the Unions, p. 113] In 1995, make possible nearly instantaneous sharing and public dissemination of information by members of various progressive and radical movements all over the globe – a phenomenon that tends to reduce the effectiveness of repression by central authorities. The electronic-media and personal-computer revolutions also make it more difficult for elitist groups to maintain their previous monopolies of knowledge. Copy-left software and text, user-generated and shared content, file-sharing, all show that information, and its users, reaches its full potential when it is free. In short, the advent of the Information Age is potentially extremely subversive.

The very existence of the Internet provides anarchists with a powerful argument that decentralised structures can function effectively in a highly complex world. For the net has no centralised headquarters and is not subject to regulation by any centralised regulatory agency, yet it still manages to function effectively. Moreover, the net is also an effective way of anarchists and other radicals to communicate their ideas to others, share knowledge, work on common projects and co-ordinate activities and social struggle. By using the Internet, radicals can make their ideas accessible to people who otherwise would not come across anarchist ideas. In addition, and far more important than anarchists putting their ideas across, the fact is that the net allows everyone with access to express themselves freely, to communicate with others and get access (by visiting webpages and joining mailing lists and newsgroups) and give access (by creating webpages and joining in with on-line arguments) to new ideas and viewpoints. This is very anarchistic as it allows people to express themselves and start to consider new ideas, ideas which may change how they think and act.

Obviously we are aware that the vast majority of people in the world do not have access to telephones, never mind computers, but computer access is increasing in many countries, making it available, via work, libraries, schools, universities, and so on to more and more working class people.
resources.” He goes on to note that there is “a streak of independence and individuality in American culture which I think is a very good thing. This ‘Don’t tread on me’ feeling is in many respects a healthy one. It’s healthy up to the point where it atomises and keeps you from working together with other people. So it’s got its healthy side and its negative side. It’s the negative side that’s emphasised naturally in the propaganda and indoctrination.” [Keeping the Rabble in Line, pp. 279–80]

As opinion polls show, most people direct their dislike and distrust of institutions equally to Big Business, which shows that people are not stupid. Unfortunately, as Goebbels was well aware, tell a lie often enough and people start to believe it. Given the funds available to big business, its influence in the media, its backing of “think-tanks,” the use of Public Relations companies, the support of economic “science,” its extensive advertising and so on, it says a lot for the common sense of people that so many see big business for what it is. You simply cannot fool all the people all of the time!

However, these feelings can easily be turned into cynicism as well as a hopelessness that things can change for the better and that you cannot help change society. Or, even worse, they can be twisted into support for right, authoritarian, populism. The job for anarchists is to combat this and help point the healthy distrust people have for government and business towards a real solution to society’s problems, namely a decentralised, self-managed anarchist society.

J.4.7 What about the communications revolution?

Another important factor working in favour of anarchists is the existence of a sophisticated global communications network and a high degree of education and literacy among the populations of the core industrialised nations. Together these two developments

the Heritage Foundation (a right-wing think-tank) released its index of economic freedom. Four of the top seven countries were Asian, including Japan and Taiwan. All the Asian countries struggling just a few years later qualified as “free.” Yet, as mentioned in section C.10.1, such claims were manifestly false: “it was not laissez-faire policies that induced their spectacular growth. As a number of studies have shown, the expansion of the Asian Tigers was based on massive state intervention that boosted their export sectors, by public policies involving not only heavy protectionism but even deliberate distortion of market prices to stimulate investment and trade.” [Fotopoulos, Op. Cit., p. 115] Moreover, for a long period these countries also banned unions and protest, but then for the right “free markets” always seem compatible with lack of freedom for workers to organise.

Needless to say, after the crisis of the late 1990s, the free-marketeers discovered the statism that had always been there and danced happily on the grave of what used to be called “the Asian miracle”. It was perverse to see the supporters of “free-market” capitalism concluding that history was rendering its verdict on the Asian model of capitalism while placing into the Memory Hole the awkward fact that until the crisis they themselves had taken great pains to deny that such a model existed! Such hypocrisy is not only truly sickening, it also undermines their own case for the wonders of “the market.” For until the crisis appeared, the world’s investors — which is to say “the market” — saw nothing but golden opportunities ahead for these “free” economies. They showed their faith by shoving billions into Asian equity markets, while foreign banks contentedly handed out billions in loans. If Asia’s problems were systemic and the result of these countries’ statist policies, then investors’ failure to recognise this earlier is a blow against the market, not for it.

So, as can be seen, the global economy has been marked by an increasing stagnation, the slowing down of growth, weak (and jobless) recoveries, speculative bubbles driving what growth there is.
and increasing financial instability producing regular and deepening crisis. This is despite (or, more likely, because of) the free market reforms imposed and the deregulation of finance capital (we say “because of” simply because neo-classical economics argue that pro-market reforms would increase growth and improve the economy, but as we noted in section C.1 such economics has little basis in reality and so their recommendations are hardly going to produce positive results). Of course as the ruling class have been doing well this underlying slowdown has been ignored and obviously claims of crisis are only raised when economic distress reach the elite.

Crisis (particularly financial crisis) has become increasingly visible, reflecting the underlying weakness of the global economy (rising inequality, lack of investment in producing real goods in favour of speculation in finance, etc.). This underlying weakness has been hidden by the speculator performance of the world’s stock markets, which, ironically enough, has helped create that weakness to begin with! As one expert on Wall Street argues, “Bond markets … hate economic strength … Stocks generally behave badly just as the real economy is at its strongest … Stocks thrive on a cool economy, and wither in a hot one.” In other words, real economic weakness is reflected in financial strength. Unsurprisingly, then, “[w]hat might be called the rentier share of the corporate surplus — dividends plus interest as a percentage of pre-tax profits and interest — has risen sharply, from 20–30% in the 1950s to 60% in the 1990s.” [Doug Henwood, Wall Street, p. 124 and p. 73]

This helps explain the stagnation which has afflicted the economies of the west. The rich have been placing more of their ever-expanding wealth in stocks, allowing this market to rise in the face of general economic torpor. Rather than being used for investment, surplus is being funnelled into the finance market (retained earnings in the US have decreased as interest and dividend payments have increased [Brenner, Op. Cit., p. 210]). However, such markets do concentrate wealth very successfully even if Obstructing pollution and health regulations; defunding product safety laws; opening national parks to logging and mining, or closing them entirely; reducing taxes for the rich; eliminating the capital gains tax; allowing companies to fire striking workers; making it easier for big telecommunications companies to dominate the media; limiting companies’ liability for unsafe products — the objective here is obviously to help big business and the wealthy do what they want without government interference, helping the rich get richer and increasing “freedom” for private power combined with a state whose sole role is to protect that “liberty.”

Such right-wing tendencies do not have anarchistic elements. The “anti-government” propaganda of big business is hardly anarchistic. What anarchists try to do is point out the hypocritical and contradictory nature of such rhetoric. The arguments against big government are equally applicable to business. If people are capable of making their own decisions, then why should this capability be denied in the workplace? As Noam Chomsky points out, while there is a “leave it alone” and “do your own thing” current within society, it in fact “tells you that the propaganda system is working full-time, because there is no such ideology in the US. Business, for example, doesn’t believe it. It has always insisted upon a powerful interventionist state to support its interests — still does and always has — back to the origins of American society. There’s nothing individualistic about corporations. Those are big conglomerate institutions, essentially totalitarian in character, but hardly individualistic. Within them you’re a cog in a big machine. There are few institutions in human society that have such strict hierarchy and top-down control as a business organisation. Nothing there about ‘Don’t tread on me.’ You’re being tread on all the time. The point of the ideology is to try to get other people, outside of the sectors of co-ordinated power, to fail to associate and enter into decision-making in the political arena themselves. The point is to atomise everyone else while leaving powerful sectors integrated and highly organised and of course dominating
J.4.6 What are implications of anti-government and anti-big business feelings?

Public opinion polls show increasing feelings of disappointment and lack of confidence in governments and big business.

Some of the feelings of disappointment with government can be blamed on the anti-big-government rhetoric of conservatives and right-wing populists. Of course the Right would never dream of really dismantling the state, as is evident from the fact that government was as bureaucratic and expensive under “conservative” administrations. So this “decentralist” element of right-wing rhetoric is a con (and quickly jettisoned as required by the capitalist class). The “anti-Government” rhetoric is combined with the pro-business, pro-private tyranny, racist, anti-feminist, and homophobic hogwash disseminated by right-wing radio and TV propagandists and the business-backed media which shows that capitalism is not genuinely anti-authoritarian (nor could it ever be), as a social system based on liberty must entail.

When a right-wing politician, economist or business “leader” argues that the government is too big, they are rarely thinking of the same government functions you are. You may be thinking of subsidies for tobacco farmers or defence firms; they are thinking about pollution controls. You may be thinking of reforming welfare for the better; their idea is to dismantle the welfare state (for working class people). Moreover, with their support for “family values”, “wholesome” television, bans on abortion and so on, their victory would see an increased level of government intrusion in many personal spheres as well as increased state support for the power of the boss over the worker and the landlord over the tenant.

If you look at what the Right has done and is doing, rather than what it is saying, you quickly see the ridiculous of claims of right-wing “libertarianism” (as well as who is really in charge).

“The US financial system performs dismally at its advertised task, that of efficiently directing society’s savings towards their optimal investment pursuits. The system is stupendously expensive, gives terrible signals for the allocation of capital, and has surprisingly little to do with real investment.” [Henwood, Op. Cit., p. 3]

As most investment comes from internal funds, the rise in the rentiers share of the surplus has meant less investment and so the stagnation of the economy. The weakening economy has increased financial strength, which in turn leads to a weakening in the real economy. A vicious circle, and one reflected in the slowing of economic growth over the last 30 years.

The increasing dominance of finance capital has, in effect, created a market for government policies. As finance capital has become increasingly global in nature governments must secure, protect and expand the field of profit-making for financial capital and transnational corporations, otherwise they will be punished by disinvestment by global markets (i.e. finance capital). These policies have been at the expense of the underlying economy in general, and of the working class in particular:

“Rentier power was directed at labour, both organised and unorganised ranks of wage earners, because it regarded rising wages as a principal threat to the stable order. For obvious reasons, this goal was never stated very clearly, but financial markets understood the centrality of the struggle: protecting the value of their capital required the suppression of labour incomes.” [William Greider, One World, Ready or Not, p. 302]

For example, “the practical effect of finance capital’s hegemony was to lock the advanced economies and their governments in a malignant spiral, restricting them to bad choices. Like bondholders in general, the new governing consensus explicitly assumed that faster economic growth was dangerous — threatening to the stable financial order — so nations were effectively blocked from measures that
might reduce permanent unemployment or ameliorate the decline in wages ... The reality of slow growth, in turn, drove the governments into their deepening indebtedness, since the disappointing growth inevitably undermined tax revenues while it expanded the public welfare costs. The rentier regime repeatedly instructed governments to reform their spending priorities — that is, withdraw benefits from dependent citizens.” [Greider, Op. Cit., pp. 297–8]

Of course, industrial capital also hates labour, so there is a basis of an alliance between the two sides of capital, even if they do disagree over the specifics of the economic policies implemented. Given that a key aspect of the neo-liberal reforms was the transformation of the labour market from a post-war sellers’ market to a nineteenth century buyers’ market with its related effects on workplace discipline, wage claims and proneness to strike, industrial capital could not but be happy even if its members quibbled over details. Doug Henwood correctly argues that “Liberals and populists often search for potential allies among industrialists, reasoning that even if financial interests suffer in a boom, firms that trade in real, rather than fictitious, products would thrive when growth is strong. In general, industrialists are less sympathetic to these arguments. Employers in any industry like slack in the labour market; it makes for a pliant workforce, one unlikely to make demands or resist speedups.” In addition, “many non-financial corporations have heavy financial interests.” [Op. Cit., p. 123 and p. 135]

Thus the general stagnation afflicting much of the world, a stagnation which regularly develop into open crisis as the needs of finance undermine the real economy which, ultimately, it is dependent upon. The contradiction between short term profits and long term survival inherent in capitalism strikes again.

Crisis, as we have noted above, has appeared in areas previously considered as strong economies and it has been spreading. An important aspect of this crisis is the tendency for productive capacity to outstrip effective demand, which arises in large part from the imbalance between capitalists’ need for a high rate of profit...
This confederal system of self-managing communities could also protect jobs as the “globalisation of capital threatens local industries. A way has to be found to keep capital at home and so preserve the jobs and the communities that depend upon them. Protectionism is both undesirable and unworkable. But worker-ownership or workers’ co-operatives are alternatives.” [Gambone, Op. Cit., pp. 12–13] Local communities could provide the necessary support structures which could protect co-operatives from the corrupting effects of working in the capitalist market (see section J.5.11). They could also demand that rather than nationalise or bailout failing companies (or, for that matter, privatise state services or public works), they should be turned over (as Proudhon constantly argued) to workers co-operatives by aiding “the Labour Unions to enter into a temporary possession of the industrial concerns”, anarchists would provide “an effective means to check the State Nationalisation” in the period before a social revolution when “State phases which we are traversing now seems to be unavoidable.” [quoted by Ruth Kinna, “Fields of Vision: Kropotkin and Revolutionary Change”, pp. 67–86, Sub-stance, Vol. 36, No. 2, p. 77] In this way, economic liberty (self-management) could replace capitalism (wage slavery) and show that anarchism is a practical alternative to the chaos and authoritarianism of capitalism, even if these examples are initially fragmentally and limited in nature.

However, these developments should not be taken in isolation of collective struggle in the workplace or community. It is in the class struggle that the real potential for anarchy is created. The work of such organisations as Food Not Bombs! and the creation of local currencies and co-operatives are supplementary to the important task of creating workplace and community organisations that can create effective resistance to both state and capitalists, resistance that can overthrow both (see sections J.5.2 and J.5.1 respectively). “Volunteer and service credit systems and alternative currencies by themselves may not be enough to replace the corporate capitalist system. Nevertheless, they can help build the economic strength of local and their simultaneous need to ensure that workers have enough wealth and income so that they can keep buying the products on which those profits depend. Inequality has been increasing particularly in neo-liberal countries like the UK and USA, which means that the economy faces as realisation crisis (see section C.7), a crisis which was avoided in the short-term by deepening debt for working people (debt levels more than doubled between the 1950s to the 1990s, from 25% to over 60%). In 2007, the chickens came hole to roost with a global credit crunch much worse than the previous finance crises of the neo-liberal era.

Over-investment has been magnified due to the East-Asian Tigers and China which, thanks to their intervention in the market (and repressive regimes against labour), ensured they were a more profitable place to invest than elsewhere. Capital flooded into the area, ensuring a relative over-investment was inevitable. As we argued in section C.7.2, crisis is possible simply due to the lack of information provided by the price mechanism — economic agents can react in such a way that the collective result of individually rational decisions is irrational. Thus the desire to reap profits in the Tiger economies resulted in a squeeze in profits as the aggregate investment decisions resulted in over-investment, and so over-production and falling profits.

In effect, the South East Asian economies suffered from the “fallacy of composition.” When you are the first Asian export-driven economy, you are competing with high-cost Western producers and so your cheap workers, low taxes and lax environmental laws allow you to under-cut your competitors and make profits. However, as more tigers joined into the market, they end up competing against each other and so their profit margins would decrease towards their actual cost price rather than that of Western firms. With the decrease in profits, the capital that flowed into the region flowed back out, thus creating a crisis (and proving, incidentally, that free markets are destabilising and do not secure the best of all
possible outcomes). Thus, the rentier regime, after weakening the Western economies, helped destabilise the Eastern ones too.

So, in the short-run, many large corporations and financial companies solved their profit problems by expanding production into “underdeveloped” countries so as to take advantage of the cheap labour there (and the state repression which ensured that cheapness) along with weaker environmental laws and lower taxes. Yet gradually they are running out of third-world populations to exploit. For the very process of “development” stimulated by the presence of Transnational Corporations in third-world nations increases competition and so, potentially, over-investment and, even more importantly, produces resistance in the form of unions, rebellions and so on, which tend to exert a downward pressure on the level of exploitation and profits.

This process reflects, in many ways, the rise of finance capital in the 1970s. In the 1950s and 1960s, existing industrialised nations experienced increased competition from Japan and Germany. As these nations re-industrialised, they placed increased pressure on the USA and other nations, reducing the global “degree of monopoly” and forcing them to compete with lower cost producers. In addition, full employment produced increasing resistance on the shop floor and in society as a whole (see section C.7.1), squeezing profits even more. Thus a combination of class struggle and global over-capacity resulted in the 1970s crisis. With the inability of the real economy, especially the manufacturing sector, to provide an adequate return, capital shifted into finance. In effect, it ran away from the success of working people asserting their rights at the point of production and elsewhere. This, combined with increased international competition, ensured the rise of finance capital which in return ensured the current stagnationist tendencies in the economy (tendencies made worse by the rise of the Asian Tiger economies in the 1980s).

From the contradictions between finance capital and the real economy, between capitalists’ need for profit and human needs, and not-hungry. The repression directed towards FNB by local police forces and governments also demonstrates the effectiveness of their activity and the possibility that it may radicalise those who get involved with the organisation. Charity is obviously one thing, mutual aid is something else. FNB is a politicised movement from below, based on solidarity, not charity as, in Kropotkin’s words, charity “bears a character of inspiration from above, and, accordingly, implies a certain superiority of the giver upon the receiver.” [Mutual Aid, p. 222]

The last example of how economic stagnation can generate libertarian tendencies can be seen from the fact that, “[h]istorically, at times of severe inflation or capital shortages, communities have been forced to rely on their own resources. During the Great Depression, many cities printed their own currency; this works to the extent that a community is able to maintain a viable internal economy which provides the necessities of life, independent of transactions with the outside.” [Benello, Op. Cit., p. 150]

These local currencies could be the basis of a mutual bank (see section J.5.5), providing interest-free loans to workers to form co-operatives and so build libertarian alternatives to capitalist firms, so eliminating the profits of capitalists by allowing workers to exchange the product of their labour with other workers. Moreover, “local exchange systems strength local communities by increasing their self-reliance, empowering community members, and helping to protect them from the excesses of the global market.” [Frank Lindenfield, Economics for Anarchists, Social Anarchism, no. 23, p. 24] In this way self-managing communes could be created, communes that replace hierarchical, top-down, government with collective decision making of community affairs based on directly democratic community assemblies. These self-governing communities and economies could federate together to co-operate on a wider scale and so create a counter-power to that of state and capitalism.
nomic structural crisis” has resulted in the erosion of the welfare state (at least for the working class, for the elite state aid is never far away). This development has potential libertarian possibilities. “The decline of the state,” argues L. Gambone, “makes necessary a revitalisation of the notions of direct action and mutual aid. Without Mama State to do it for us, we must create our own social services through mutual aid societies.” [Syndicalism in Myth and Reality, p. 12] As we argue in more depth in section J.5.16, such a movement of mutual aid has a long history in the working class and, as it is under our control, it cannot be withdrawn from us to enrich and empower the ruling class as state run systems have been. Thus the decline of state run social services could, potentially, see the rise of a network of self-managed, working class alternatives (equally, of course, it could see the end of all services to the weakest sections of our society — which possibility comes about depends on what we do in the here and now. See section J.5.15 for an anarchist analysis of the welfare state).

Food Not Bombs! (FNB) is an excellent example of practical libertarian alternatives being generated by the economic crisis we are facing. FNB is a community-based group which helps the homeless through the direct action of its members. It also involves the homeless in helping themselves. It serves free food in public places to expose the plight of the homeless, the callousness of the system and our capacity to solve social problems through our own actions without government or capitalism. The constant harassment of FNB by the police, middle classes and the government illustrates their callousness to the plight of the poor and the failure of their institutions to build a society which cares for people more than money and property (and the police and prisons to protect them). The fact is that in the US many working and unemployed people have no feeling that they are entitled to basic human needs such as medicine, clothes, shelter, and food. FNB encourages poor people to make these demands, provides a space in which these demands can be voiced, and helps to breakdown the wall between hungry

between over-capacity and demand, and others, there has emerged what appears to be a long-term trend toward permanent stagnation of the capitalist economy with what growth spurts which do exist being fuelled by speculative bubbles as well as its benefits being monopolised by the few (so refuting the notion of “trickle down” economics). This trend has been apparent for several decades, as evidenced by the continuous upward adjustment of the rate of unemployment officially considered to be “normal” or “acceptable” during those decades, and by other symptoms as well such as falling growth, lower rates of profit and so on.

This stagnation has become even more obvious by the development of deep crisis in many countries at the end of the 2000s. This caused central banks to intervene in order to try and revive the real economies that have suffered under their rentier inspired policies since the 1970s. Such action may just ensure continued stagnation and reflated bubbles rather than a real-up turn. One thing is true, however, and that is the working class will pay the price of any “solution” — unless they organise and get rid of capitalism and the state. Ultimately, capitalism need profits to survive and such profits come from the fact that workers do not have economic liberty. Thus any “solution” within a capitalist framework means the increased oppression and exploitation of working class people.

J.4.5 Why is this “economic structural crisis” important to social struggle?

The “economic structural crisis” we outlined in the last section has certain implications for anarchists and social struggle. Essentially, as C. George Benello argued, “[i]f economic conditions worsen ... then we are likely to find an openness to alternatives which have not been thought of since the depression of the 1930s… It is important to plan for a possible economic crisis, since it is not only practical,
but also can serve as a method of mobilising a community in creative ways.” [From the Ground Up, p. 149]

In the face of economic stagnation and depression, attempts to generate more profits (i.e., increase exploitation) by increasing the authority of the boss grow. In addition, more people find it harder to make ends meet, running up debts to survive, face homelessness if they are made unemployed, and so on. This makes exploitation ever more visible and tend to push oppressed strata together in movements that seek to mitigate, and even remove, their oppression. As the capitalist era has worn on, these strata have become increasingly able to rebel and gain substantial political and economic improvements, which have, in addition, lead to an increasing willingness to do so because of rising expectations (about what is possible) and frustration (about what actually is). It is true that libertarians, the left and labour have suffered setbacks since the 1970s, but with increasing misery of the working class due to neoliberal policies (and the “economic structural crisis” they create), it is only a matter of time before there is a resurgence of radicalism.

Anarchists will be in the forefront of this resurgence. For, with the discrediting and eventual fall of authoritarian state capitalism (“Communism”) in Eastern Europe, the anti-authoritarian faction of the left will increasingly be seen as its only credible one. Thus the ongoing structural crisis of the global capitalist economy, combined with the other developments springing from what Takis Fotopoulos calls (in his book Towards an Inclusive Democracy) a “multidimensional crisis” (which includes economic, political, social, ecological and ideological aspects), could (potentially) lead to a new international anti-authoritarian alliance linking together the new (and not so new) social movements in the West (feminism, the Green movement, rank-and-file labour militancy, etc.) with non-authoritarian liberation movements in the Third World and new movements in formerly Stalinist countries. However, this is only likely to happen if anarchists take the lead in promoting alternatives and working with the mass of the population. Ways in which anarchist can do this are discussed in some detail in section J.5.

Thus the “economic structural crisis” can aid social struggle by placing the contrast of “what is” with what “could be” in a clear light. Any crisis brings forth the contradictions in capitalism, between the production of use values (things people need) and of exchange value (capitalist profits), between capitalism’s claims of being based on liberty and the authoritarianism associated with wage labour (“The general evidence of repression poses an ancient contradiction for capitalism: while it claims to promote human freedom, it profits concretely from the denial of freedom, most especially freedom for the workers employed by capitalist enterprise.” [William Greider, One World, Ready or Not, p. 388]) and so on. It shakes to the bone popular faith in capitalism’s ability to “deliver the goods” and gets more and more people thinking about alternatives to a system that places profit above and before people and planet. The crisis also, by its very nature, encourages workers and other oppressed sections of the population to resist and fight back, which in turn generates collective organisation (such as unions or workplace-based assemblies and councils), solidarity and direct action — in other words, collective self-help and the awareness that the problems of working class people can only be solved by ourselves, by our own actions and organisations. The 1930s in the USA is a classic example of this process, with very militant struggles taking place in very difficult situations (see Howard Zinn’s A People’s History of the United States or Jeremy Brecher’s Strike! for details).

In other words, the “economic structural crisis” gives radicals a lot potential to get their message across, even if the overall environment may make success seem difficult at times!

As well as encouraging workplace organisation due to the intensification of exploitation and authority provoked by the economic stagnant/depression, the “economic structural crisis” can encourage other forms of libertarian alternatives. For example, the “eco-
public utilities, industries and services, “under fixed conditions, to responsible companies, not of capitalists, but of workmen.” Municipalities would take the initiative in setting up public works but actual control would rest with workers’ co-operatives for “it becomes necessary for the workers to form themselves into democratic societies, with equal conditions for all members, on pain of a relapse into feudalism.” [General Idea of the Revolution, p. 151 and p. 276–7] Thus, for example, rather than nationalise or privatise railways, they should be handed over workers’ co-operatives to run. The same with welfare services and such like: “the abolition of the State is the last term of a series, which consists of an incessant diminution, by political and administrative simplification the number of public functionaries and to put into the care of responsible workers societies the works and services confided to the state.” [Proudhon, Carnets, vol. 3, p. 293]

Not only does this mean that we can get accustomed to managing our own affairs collectively, it also means that we can ensure that whatever “safety-nets” we have do what we want and not what capital wants. In the end, what we create and run by ourselves will be more responsive to our needs, and the needs of the class struggle, than reformist aspects of the capitalist state. This much, we think, is obvious. And it is ironic to see elements of the “radical” and “revolutionary” left argue against this working class self-help (and so ignore the long tradition of such activity in working class movements) and instead select for the agent of their protection a state run by and for capitalists!

There are two traditions of welfare within society, one of “fraternal and autonomous associations springing from below, the other that of authoritarian institutions directed from above.” [Ward, Op. Cit., p. 123] While sometimes anarchists are forced to defend the latter against the greater evil of “free market” capitalism, we never forget the importance of creating and strengthening the former. As Chomsky suggests, libertarians have to “defend some state institutions from the attack against them [by private power], while trying that they are bureaucratic and that the interests of the bureaucracy are at odds with those of its membership. However, our attitude is “supportive” in that even the worse trade union represents an attempt at working class solidarity and self-help, even if the organisation is now far removed from the initial protests and ideas that set the union up. For a worker to join a trade union means recognising, to some degree, that he or she has different interests from their boss (“if the interests of labour and capital are the same, why the union?” [Alexander Berkman, What is Anarchism?, p. 76]).

There is no way to explain the survival of unions other than the fact that there are different class interests and workers have understood that to promote their own interests they have to organise collectively. No amount of conservatism, bureaucracy or backwardness within the unions can obliterate this. The very existence of trade unions testifies to the existence of some level of basic class consciousness and the recognition that workers and capitalists do not have the same interests. Claims by trade union officials that the interests of workers and bosses are the same theoretically disarms both the union and its members and so weakens their struggles (after all, if bosses and workers have similar interests then any conflict is bad and the decisions of the boss must be in workers’ interests!). That kind of nonsense is best left to the apologists of capitalism (see section F.3.2).

It is no surprise, then, the “extreme opposition to the existing political and economic power” to unions as they “not only suspected every labour organisation of aiming to improve the condition of its members within the limits of the wage system, but they also looked upon the trade union as the deeply enemy of wage-slavery — and they were right. Every labour organisation of sincere character must needs wage war upon the existing economic conditions, since the continuation of the same is synonymous with the exploitation and enslavement of labour.” [Max Baginski, “Aim and Tactics of the Trade-Union Movement”, pp. 297–306, Anarchy! An Anthology of Emma Goldman’s Mother Earth, Peter Glassgold (ed.), pp. 302–3] Thus
anarchist viewpoints on this issue reflect the contradictory nature of trade unions — on the one hand they are products of workers’ struggle, but on the other they are bureaucratic, unresponsive, centralised and their full-time officials have no real interest in fighting against wage labour as it would put them out of a job. Indeed, the very nature of trade unionism ensures that the interests of the union (i.e. the full-time officials) come into conflict with the people they claim to represent.

This can best be seen from the disgraceful activities of the TGWU with respect to the Liverpool dockers in Britain. The union officials (and the TUC itself) refused to support their members after they had been sacked in 1995 for refusing to cross a picket line. The dockers organised their own struggle, contacting dockers’ unions across the world and organised global solidarity actions. Moreover, a network of support groups sprung up across Britain to gather funds for their struggle (and, we are proud to note, anarchists have played their role in supporting the strikers). Many trade unionists could tell similar stories of betrayal by “their” union.

This occurs because trade unions, in order to get recognition from a company, must be able to promise industrial peace. They need to enforce the contracts they sign with the bosses, even if this goes against the will of its members. Thus trade unions become a third force in industry, somewhere between management and the workers and pursuing its own interests. This need to enforce contracts soon ensures that the union becomes top-down and centralised — otherwise its members would violate the unions agreements. They have to be able to control their members — which usually means stopping them fighting the boss — if they are to have anything to bargain with at the negotiation table. This may sound odd, but the point is that the union official has to sell the employer labour discipline and freedom from unofficial strikes as part of its side of the bargain otherwise the employer will ignore them.

The nature of trade unionism, then, is to take power away from out of local members and centralise it into the hands of officials at domination — wage labour — and needs many repressive measures in order to exist and survive). Anarchists are of the opinion that changing the boss for the state (or vice versa) is only a step sideways, not forward! After all, it is not working people who control how the welfare state is run, it is politicians, “experts”, bureaucrats and managers who do so (“Welfare is administered by a top-heavy governmental machine which ensures that when economies in public expenditure are imposed by its political masters, they are made in reducing the service to the public, not by reducing the cost of administration.” [Ward, Op. Cit. p. 10]). Little wonder we have seen elements of the welfare state used as a weapon in the class war against those in struggle (for example, in Britain during the miners strike in 1980s the Conservative Government made it illegal to claim benefits while on strike, so reducing the funds available to workers in struggle and helping bosses force strikers back to work faster).

Anarchists consider it far better to encourage those who suffer injustice to organise themselves and in that way they can change what they think is actually wrong, as opposed to what politicians and “experts” claim is wrong. If sometimes part of this struggle involves protecting aspects of the welfare state (“expanding the floor of the cage”) so be it — but we will never stop there and will use such struggles as a stepping stone in abolishing the welfare state from below by creating self-managed, working class, alternatives. As part of this process anarchists also seek to transform those aspects of the welfare state they may be trying to “protect”. They do not defend an institution which is paternalistic, bureaucratic and unresponsive. For example, if we are involved in trying to stop a local state-run hospital or school from closing, anarchists would try to raise the issue of self-management and local community control into the struggle in the hope of going beyond the status quo.

In this, we follow the suggestion made by Proudhon that rather than “fatten certain contractors,” libertarians should be aiming to create “a new kind of property” by “granting the privilege of running”
ernments which obviously benefited the people, unless we saw the immediate possibility of people carrying them out for themselves. This would not inhibit us from declaring at the same time that what initiatives governments take would be more successfully taken by the people themselves if they put their minds to the same problems ... to build up a hospital service or a transport system, for instance, from local needs into a national organisation, by agreement and consent at all levels is surely more economical as well as efficient than one which is conceived at top level [by the state] ... where Treasury, political and other pressures, not necessarily connected with what we would describe as needs, influence the shaping of policies.” So “as long as we have capitalism and government the job of anarchists is to fight both, and at the same time encourage people to take what steps they can to run their own lives.” [“Anarchists and Voting”, pp. 176–87, The Raven, No. 14, p. 179]

Ultimately, unlike the state socialist/liberal left, anarchists reject the idea that the cause of socialism, of a free society, can be helped by using the state. Like the right, the left see political action in terms of the state. All its favourite policies have been statist — state intervention in the economy, nationalisation, state welfare, state education and so on. Whatever the problem, the left see the solution as lying in the extension of the power of the state. They continually push people in relying on others to solve their problems for them. Moreover, such state-based “aid” does not get to the core of the problem. All it does is fight the symptoms of capitalism and statism without attacking their root causes — the system itself.

Invariably, this support for the state is a move away from working class people, from trusting and empowering them to sort out their own problems. Indeed, the left seem to forget that the state exists to defend the collective interests of the ruling class and so could hardly be considered a neutral body. And, worst of all, they have presented the right with the opportunity of stating that freedom from the state means the same thing as the freedom of the market (so ignoring the awkward fact that capitalism is based upon the top of the organisation. Thus union officials sell out their members because of the role trade unions play within society, not because they are nasty individuals (although some are). They behave as they do because they have too much power and, being full-time and highly paid, are unaccountable, in any real way, to their members. Power — and wealth — corrupts, no matter who you are (see Chapter XI of Alexander Berkman’s What is Anarchism? for an excellent introduction to anarchist viewpoints on trade unions).

While, in normal times, most workers will not really question the nature of the trade union bureaucracy, this changes when workers face some threat. Then they are brought face to face with the fact that the trade union has interests separate from theirs. Hence we see trade unions agreeing to wage cuts, redundancies and so on — after all, the full-time trade union official’s job is not on the line! But, of course, while such a policy is in the short term interests of the officials, in the longer term it goes against their interests — who wants to join a union which rolls over and presents no effective resistance to employers? Little wonder Michael Moore had a chapter entitled “Why are Union Leaders So F#!@ing Stupid?” in his book Downsize This! — essential reading on how moronic trade union bureaucrats can actually be. Sadly trade union bureaucracy seems to afflict all who enter it with short-sightedness — although the chickens do, finally, come home to roost, as the bureaucrats of the AFL, TUC and other trade unions are finding out in this era of global capital and falling membership. So while the activities of trade union leaders may seem crazy and short-sighted, these activities are forced upon them by their position and role within society — which explains why they are so commonplace and why even radical leaders end up doing exactly the same thing in time.

However, few anarchists would call upon members of a trade union to tear-up their membership cards. While some anarchists have nothing but contempt (and rightly so) for trade unions (and so do not work within them — but will support trade union members in struggle), the majority of anarchists take a more pragmatic
viewpoint. If no alternative syndicalist union exists, anarchists will work within the existing unions (perhaps becoming shop-stewards — few anarchists would agree to be elected to positions above this in any trade union, particularly if the post were full-time), spreading the anarchist message and trying to create a libertarian undercurrent which would hopefully blossom into a more anarchistic labour movement. So most anarchists “support” the trade unions only until we have created a viable libertarian alternative. Thus we will become trade union members while trying to spread anarchist ideas within and outwith them. This means that anarchists are flexible in terms of our activity in the unions. For example, many IWW members were “two-carders” which meant they were also in the local AFL branch in their place of work and turned to the IWW when the AFL hierarchy refused to back strikes or other forms of direct action.

Anarchist activity within trade unions reflects our ideas on hierarchy and its corrupting effects. We reject the response of left-wing social democrats, Stalinists and mainstream Trotskyists to the problem of trade union betrayal, which is to try and elect ‘better’ officials. They see the problem primarily in terms of the individuals who hold the posts so ignoring the fact that individuals are shaped by the environment they live in and the role they play in society. Thus even the most left-wing and progressive individual will become a bureaucrat if they are placed within a bureaucracy.

We must note that the problem of corruption does not spring from the high-wages officials are paid (although this is a factor), but from the power they have over their members (which partly expresses itself in high pay). Any claim that electing “radical” full-time officials who refuse to take the high wages associated with the position will be better is false. The hierarchical nature of the trade union structure has to be changed, not side-effects of it. As the left has no problem with hierarchy as such, this explains why they support this form of “reform.” They do not actually want to undercut whatever dependency the members have on leadership,

preliminaries to dismantling it. Unless people are willing to tolerate that level of complexity, they’re going to be of no use to people who are suffering and who need help, or, for that matter, to themselves.”

[Expanding the Floor of the Cage]

Thus, even though we know the welfare state is a cage and part of an instrument of class power, we have to defend it from a worse possibility – namely, the state as “pure” defender of capitalism with working people with few or no rights. At least the welfare state does have a contradictory nature, the tensions of which can be used to increase our options. And one of these options is its abolition from below!

For example, with regards to municipal housing, anarchists will be the first to agree that it is paternalistic, bureaucratic and hardly a wonderful living experience. However, in stark contrast with the right who desire to privatise such estates, anarchists think that “tenants control” is the best solution as it gives us the benefits of individual ownership along with community (and so without the negative points of property, such as social atomisation). The demand for “tenant control” must come from below, by the “collective resistance” of the tenants themselves, perhaps as a result of struggles against “continuous rent increases” leading to “the demand ... for a change in the status of the tenant.” Such a “tenant take-over of the municipal estate is one of those sensible ideas which is dormant because our approach to municipal affairs is still stuck in the grooves of nineteenth century paternalism.” [Ward, Op. Cit., p. 73]

And it is here that we find the ultimate irony of the right-wing, “free market” attempts to abolish the welfare state — neo-liberalism wants to end welfare from above, by means of the state (which is the instigator of this individualistic “reform”). It does not seek the end of dependency by self-liberation, but the shifting of dependency from state to charity and the market. In contrast, anarchists desire to abolish welfare from below. This the libertarian attitude to those government policies which actually do help people. While anarchists would “hesitate to condemn those measures taken by gov-
Lazonick, as did Pateman, indicates the contradictory nature of welfare provisions within capitalism. On the one hand, they are introduced to help control the working class (and to improve long term economic development). On the other hand, these provisions can be used by working class people as weapons against capitalism and give themselves more options than “work or starve” (the fact that the attacks on welfare in the UK during the 1990s — called, ironically enough, welfare to work — involves losing benefits if you refuse a job is not a surprising development). Thus we find that welfare acts as a kind of floor under wages. In the US, the two have followed a common trajectory (rising together and falling together). And it is this, the potential benefits welfare can have for working people, that is the real cause for the current capitalist attacks upon it. As Noam Chomsky summarises:

“State authority is now under severe attack in the more democratic societies, but not because it conflicts with the libertarian vision. Rather the opposite: because it offers (weak) protection to some aspects of that vision. Governments have a fatal flaw: unlike the private tyrannies, the institutions of state power and authority offer to the public an opportunity to play some role, however limited, in managing their own affairs.” [Chomsky on Anarchism, p. 193]

Because of this contradictory nature of welfare, we find anarchists like Noam Chomsky arguing that (using an expression popularised by South American rural workers unions) “we should ‘expand the floor of the cage.’ We know we’re in a cage. We know we’re trapped. We’re going to expand the floor, meaning we will extend to the limits what the cage will allow. And we intend to destroy the cage. But not by attacking the cage when we’re vulnerable, so they’ll murder us... You have to protect the cage when it’s under attack from even worse predators from outside, like private power. And you have to expand the floor of the cage, recognising that it’s a cage. These are all they want to replace the leaders with “better” ones (i.e. themselves or members of their party) and so endlessly call upon the trade union bureaucracy to act for its members. In this way, they hope, trade unionists will see the need to support a “better” leadership — namely themselves. Anarchists, in stark contrast, think that the problem is not that the leadership of the trade unions is weak, right-wing or does not act but that the union’s membership follows them. Thus anarchists aim at undercutting reliance on leaders (be they left or right) by encouraging self-activity by the rank and file and awareness that hierarchical leadership as such is bad, not individual leaders. Anarchists encourage rank and file self-activity, not endless calls for trade union bureaucrats to act for us (as is unfortunately far too common on the left).

Instead of “reform” from above (which is doomed to failure), anarchists work at the bottom and attempt to empower the rank and file of the trade unions. It is self-evident that the more power, initiative and control that lies on the shop floor, the less the bureaucracy has. Thus anarchists work within and outwith the trade unions in order to increase the power of workers where it actually lies: at the point of production. This is usually done by creating networks of activists who spread anarchist ideas to their fellow workers (see next section). Hence Malatesta:

“The anarchists within the unions should strive to ensure that they remain open to all workers of whatever opinion or party on the sole condition that there is solidarity in the struggle against the bosses. They should oppose the corporatist spirit and any attempt to monopolise labour or organisation. They should prevent the Unions from becoming the tools of the politicians for electoral or other authoritarian ends; they should preach and practice direct action, decentralisation, autonomy and free initiative. They should strive to help members learn how to
participate directly in the life of the organisation and to do without leaders and permanent officials.

“They must, in short, remain anarchists, remain always in close touch with anarchists and remember that the workers’ organisation is not the end but just one of the means, however important, of preparing the way for the achievement of anarchism.” [The Anarchist Revolution, pp. 26–7]

As part of this activity anarchists promote the ideas of Industrial Unionism we highlighted in the last section — namely direct workers control of struggle via workplace assemblies and recallable committees — during times of struggle. However, anarchists are aware that economic struggle (and trade unionism as such) “cannot be an end in itself, since the struggle must also be waged at a political level to distinguish the role of the State.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 115] Thus, as well as encouraging worker self-organisation and self-activity, anarchist groups also seek to politicise struggles and those involved in them. Only this process of self-activity and political discussion between equals within social struggles can ensure the process of working class self-liberation and the creation of new, more libertarian, forms of workplace organisation.

The result of such activity may be a new form of workplace organisation (either workplace assemblies or an anarcho-syndicalist union) or a reformed, more democratic version of the existing trade union (although few anarchists believe that the current trade unions can be reformed). Either way, the aim is to get as many members of the current labour movement to become anarchists as possible or, at the very least, take a more libertarian and radical approach to their unions and workplace struggle.

“The municipal tenant is trapped in a syndrome of dependence and resentment, which is an accurate reflection of his housing situation. People care about what is theirs, what they can modify, alter, adapt to changing needs and improve themselves. They must have a direct responsibility for it ... The tenant take-over of the municipal estate is one of those obviously sensible ideas which is dormant because our approach to municipal affairs is still stuck in the groves of nineteenth-century paternalism.” [Anarchy in Action, p. 73]

Looking at state supported education, Ward argues that the “universal education system turns out to be yet another way in which the poor subsidise the rich.” Which is the least of its problems, for “it is in the nature of public authorities to run coercive and hierarchical institutions whose ultimate function is to perpetuate social inequality and to brainwash the young into the acceptance of their particular slot in the organised system.” [Op. Cit., p. 83 and p. 81] The role of state education as a means of systematically indoctrinating the working class is reflected in William Lazonick words:

“The Education Act of 1870 ... [gave the] state ... the facilities ... to make education compulsory for all children from the age of five to the age of ten. It had also erected a powerful system of ideological control over the next generation of workers ... [It] was to function as a prime ideological mechanism in the attempt by the capitalist class through the medium of the state, to continually reproduce a labour force which would passively accept [the] subjection [of labour to the domination of capital]. At the same time it had set up a public institution which could potentially be used by the working class for just the contrary purpose.” [“The Subjection of Labour to Capital: The rise of the Capitalist System”, Radical Political Economy Vol. 2, p. 363]
but as mechanisms of social control. Syndicalists took a leading part in resisting such legislation on the grounds that it would increase capitalist discipline over labour, thereby undermining working class independence and self-reliance.” [Bob Holton, *British Syndicalism: 1900–1914*, p. 137]

Anarchists view the welfare state much as some feminists do. While they note, to quote Carole Pateman, the “patriarchal structure of the welfare state” they are also aware that it has “also brought challenges to patriarchal power and helped provide a basis for women’s autonomous citizenship.” She goes on to note that “for women to look at the welfare state is merely to exchange dependence on individual men for dependence on the state. The power and capriciousness of husbands is replaced by the arbitrariness, bureaucracy and power of the state, the very state that has upheld patriarchal power.” This “will not in itself do anything to challenge patriarchal power relations.” [*The Disorder of Women*, p. 195 and p. 200]

Thus while the welfare state does give working people more options than having to take any job or put up with any conditions, this relative independence from the market and individual capitalists has come at the price of dependence on the state — the very institution that protects and supports capitalism in the first place. And has we have became painfully aware in recent years, it is the ruling class who has most influence in the state — and so, when it comes to deciding what state budgets to cut, social welfare ones are first in line. Given that such programmes are controlled by the state, not working class people, such an outcome is hardly surprising. Not only this, we also find that state control reproduces the same hierarchical structures that the capitalist firm creates.

Unsurprisingly, anarchists have no great love of such state welfare schemes and desire their replacement by self-managed alternatives. For example, taking municipal housing, Colin Ward writes:

### J.5.4 What are industrial networks?

Industrial networks are the means by which revolutionary industrial unions and other forms of libertarian workplace organisation can be created. The idea of Industrial Networks originated with the British section of the anarcho-syndicalist *International Workers Association* in the late 1980s. It was developed as a means of promoting libertarian ideas within the workplace, so creating the basis on which a workplace movement based upon the ideas of industrial unionism (see section J.5.2) could grow and expand.

The idea is very simple. An Industrial Network is a federation of militants in a given industry who support the ideas of anarchism and/or anarcho-syndicalism, namely direct action, solidarity and organisation from the bottom up (the difference between purely anarchist networks and anarcho-syndicalist ones will be highlighted later). It would “initially be a political grouping in the economic sphere, aiming to build a less reactive but positive organisation within the industry. The long term aim ... is, obviously, the creation of an anarcho-syndicalist union.” [*Winning the Class War*, p. 18]

The Industrial Network would be an organisation of groups of libertarians within a workplace united on an industrial basis. They would pull their resources together to fund a regular bulletin and other forms of propaganda which they would distribute within their workplaces. These bulletins and leaflets would raise and discuss issues related to work, how to fight back and win as well as placing workplace issues in a social and political context. This propaganda would present anarchist ideas of workplace organisation and resistance as well as general anarchist ideas and analysis. In this way anarchist ideas and tactics would be able to get a wider hearing and anarchists can have an input as anarchists into workplace struggles.

Traditionally, many syndicalists and anarcho-syndicalists advocated the **One Big Union** strategy, the aim of which was to organise all workers into one organisation representing the whole
working class. Today, however, most anarcho-syndicalists, like other revolutionary anarchists, advocate workers assemblies for decision making during struggles which are open to all workers (union members or not) as they recognise that they face dual unionism (which means there are more than one union within a given workplace or country). This was the case, historically, in all countries with a large syndicalist union movement there were also socialist unions. Therefore most anarcho-syndicalists do not expect to ever get a majority of the working class into a revolutionary union before a revolutionary situation develops. In addition, revolutionary unions do not simply appear, they develop from previous struggles and require a lot of work and experience of which the Industrial Networks are but one aspect. The most significant revolutionary unions (such as the IWW, USI and CNT) were originally formed by unions and union militants with substantial experience of struggle behind them, some of whom were part of existing trade union bodies.

Thus industrial networks are intended to deal with the actual situation that confronts us, and provide a strategy for moving from our present reality toward our ultimate goals. The role of the anarchist group or syndicalist union would be to call workplace assemblies and their federation into councils, argue for direct workers control of struggle by these mass assemblies, promote direct action and solidarity, put across anarchist ideas and politics and keep things on the boil, so to speak. When one has only a handful of anarchists and syndicalists in a workplace or scattered across several workplaces there is a clear need for developing ways for these fellow workers to effectively act in union, rather than be isolated and relegated to more general agitation. A handful of anarchists cannot meaningfully call a general strike but we can agitate around specific industrial issues and organise our fellow workers to do something about them. Through such campaigns we demonstrate the advantages of rank-and-file unionism and direct action, show our fellow workers that our ideas are not mere abstract the-

can be laid at the claims about the evil effects of welfare which the rich and large corporations wish to save others (but not themselves) from. Such altruism is truly heart warming. For those in the United States or familiar with it, the same can be said of the hysterical attacks on “socialised medicine” and health-care reform funded by insurance companies and parroted by right-wing ideologues and politicians.

Thirdly, anarchists are just as opposed to capitalism as they are the state. This means that privatising state functions is no more libertarian than nationalising them. In fact, less so as such a process reduces the limited public say state control implies in favour of more private tyranny and wage-labour. As such, attempts to erode the welfare state without other, pro-working class, social reforms violates the anti-capitalist part of anarchism. Similarly, the introduction of a state supported welfare system rather than a for-profit capitalist run system (as in America) would hardly be considered any more a violation of libertarian principles as the reverse happening. In terms of reducing human suffering, though, most anarchists would oppose the latter and be in favour of the former while aiming to create a third (self-managed) alternative.

Fourthly, we must note that while most anarchists are in favour of collective self-help and welfare, we are opposed to the state. Part of the alternatives anarchists try and create are self-managed and community welfare projects (see next section). Moreover, in the past, anarchists and syndicalists were at the forefront in opposing state welfare schemes. This was because they were introduced by socialists but by liberals and other supporters of capitalism to undercut support for radical alternatives and to aid long term economic development by creating the educated and healthy population required to use advanced technology and fight wars. Thus we find that:

“Liberal social welfare legislation ... were seen by many [British syndicalists] not as genuine welfare reforms,
favourofreducingthesizeofthestateandincreasingindividualre-
sponsibility and freedom but, on the other, we are well aware that
this rollback is part of an attack on the working class and tends to
increase the power of the capitalists over us as the state’s (direct)
influence is reduced. Thus anarchists appear to be on the horns of
a dilemma — or, at least, apparently.

So what attitude do anarchists take to the welfare state and at-
tacks on it?

First we must note that this attack on “welfare” is somewhat
selective. While using the rhetoric of “self-reliance” and “individ-
ualism,” the practitioners of these “tough love” programmes have
made sure that the major corporations continue to get state hand-
outs and aid while attacking social welfare. In other words, the
current attack on the welfare state is an attempt to impose market
discipline on the working class while increasing state protection
for the ruling class. Therefore, most anarchists have no problem
defending social welfare programmes as these can be considered
as only fair considering the aid the capitalist class has always re-
ceived from the state (both direct subsidies and protection and in-
direct support via laws that protect property and so on). And, for
all their talk of increasing individual choice, the right-wing remain
silent about the lack of choice and individual freedom during work-
ing hours within capitalism.

Secondly, most of the right-wing inspired attacks on the welfare
state are inaccurate. For example, Noam Chomsky notes that the
‘correlation between welfare payments and family life is real, though
it is the reverse of what is claimed [by the right]. As support for the
poor has declined, unwed birth-rates, which had risen steadily from
the 1940s through the mid-1970s, markedly increased. ‘Over the last
three decades, the rate of poverty among children almost perfectly
correlates with the birth-rates among teenage mothers a decade later,’
Mike Males points out: ‘That is, child poverty seems to lead to teenage
childbearing, not the other way around.’” [“Rollback III”, Z Maga-
azine, April, 1995] The same charge of inaccurate scare-mongering
ory but can be implemented here and now, attract new members
and supporters, and further develop our capacity to develop revolu-
tionary unions in our workplaces. Thus the creation of Industrial
Networks and the calling for workplace assemblies is a recogni-
tion of where we are now — with anarchist ideas very much in
the minority. Calling for workers assemblies is not an anarchist
tactic per se, we must add, but a working class one developed and
used plenty of times by workers in struggle (indeed, it was how the
current trade unions were created). It also puts the onus on the re-
formists unions by appealing directly to their members as workers
and exposing their bureaucrat organisations and reformist politics
by creating an effective alternative to them.

A few anarchists reject the idea of Industrial Networks and in-
stead support the idea of “rank and file” groups which aim to
put pressure on the current trade unions to become more militant
and democratic. Some even think that such groups can be used to
11
reform the trade-unions into libertarian, revolutionary organ-
isations — called “boring from within” — but most reject this as
utopian, viewing the trade union bureaucracy as unremarkable as
the state’s (and it is likely that rather than change the trade union,
“boring from within” would change the syndicalists by watering
down their ideas). Moreover, opponents of “rank and file” groups
argue that they direct time and energy away from practical and
constructive activity and instead waste them [b]y constantly argu-
ing for changes to the union structure ... the need for the leadership
to be more accountable, etc., [and so] they not only [offer] false hope
but [channel] energy and discontent away from the real problem —
3689] 3752

Supporters of the “rank and file” approach fear that the Indus-
trial Networks will isolate anarchists from the mass of trade union
members by creating tiny “pure” syndicalist groups. Such a claim
is rejected by supporters of Industrial Networks who argue that
rather than being isolated from the majority of trade unionists they
would be in contact with them where it counts, in the workplace and in struggle rather than in trade union meetings which many workers do not even attend:

“*We have no intention of isolating ourselves from the many workers who make up the rest of the rank and file membership of the unions. We recognise that a large proportion of trade union members are only nominally so as the main activity of social democratic unions is outside the workplace ... **We aim to unite and not divide workers***

“It has been argued that social democratic unions will not tolerate this kind of activity, and that we would be all expelled and thus isolated. So be it. We, however, don’t think that this will happen until ... workplace militants had found a voice independent of the trade unions and so they become less useful to us anyway. Our aim is not to support social democracy, but to show it up as irrelevant to the working class.” [Op. Cit., p. 19]

Whatever the merits and disadvantages of both approaches are, it seems likely that the activity of both will overlap in practice with Industrial Networks operating within trade union branches and “rank and file” groups providing alternative structures for struggle.

As noted above, there is a slight difference between anarcho-syndicalist supporters of Industrial Networks and communist-anarchist ones. This is to do with how they see the function and aim of these networks. In the short run, both agree that such networks should agitate in their industry and call mass assemblies to organise resistance to capitalist exploitation and oppression. They disagree on who can join the network groups and what their medium term aims should be. Anarcho-syndicalists aim for the Industrial Networks to be the focal point for the building of permanent syndicalist unions and so aim for the Industrial

ties directly to create them (see section J.5.1 for more details). Using the catalyst of specific issues of local interest, anarchists could propose the creation of a community assembly to discuss the issues in question and organise action to solve them. Rather than stand in local elections, anarchists should encourage people to create these institutions themselves and empower themselves by collective self-activity. As Kropotkin argued, “**laws can only follow the accomplished facts; and even if they do honestly follow them — which is usually not the case — a law remains a dead letter so long as there are not on the spot the living forces required for making the tendencies expressed in the law an accomplished fact.” [Anarchism, p. 171] Most anarchists, therefore, think it is far more important to create the “living forces” within our communities directly than waste energy in electioneering and the passing of laws creating or “legalising” community assemblies. In other words, community assemblies can only be created from the bottom up, by non-electoral means, a process which Libertarian Muncipalism confuses with electioneering.

So, while Libertarian Municpalism does raise many important issues and correctly stresses the importance of community activity and self-management, its emphasis on electoral activity undercuts its liberatory promise. For most anarchists, community assemblies can only be created from below, by direct action, and (because of its electoral strategy) a Libertarian Municipalist movement will end up being transformed into a copy of the system it aims to abolish.

**J.5.15 What attitude do anarchists take to the welfare state?**

The period of neo-liberalism since the 1980s has seen a rollback of the state within society by the right-wing in the name of “freedom,” “individual responsibility” and “efficiency.” The position of anarchists to this process is mixed. On the one hand, we are all in
the 1980s successfully centralised power away from local councils to undercut their ability to resist the imposition of its neo-liberal policies.

The counter-argument to this is that even if there is no chance of such candidates being elected, their standing for elections would serve a valuable educational function. The answer to this is: perhaps, but would it be more valuable than direct action? Would its educational value, if any, outweigh the disadvantages of electioneering discussed in section J.2? Given the ability of major media to marginalise alternative candidates, we doubt that such campaigns would have enough educational value to outweigh these disadvantages. Moreover, being an anarchist does not make one immune to the corrupting effects of electioneering. History is littered with radical, politically aware movements using elections and ending up becoming part of the system they aimed to transform. Most anarchists doubt that Libertarian Municipalism will be any different — after all, it is the circumstances the parties find themselves in which are decisive, not the theory they hold. Why would libertarians be immune to this but not Marxists or Greens?

Lastly, most anarchists question the whole process on which Libertarian Municipalism bases itself on. The idea of communes is a key one of anarchism and so strategies to create them in the here and now are important. However, to think that using alienated, representative institutions to abolish these institutions is wrong. As Italian activists who organised a neighbourhood assembly by non-electoral means argue “[t]o accept power and to say that the others were acting in bad faith and that we would be better, would force non-anarchists towards direct democracy. We reject this logic and believe that organisations must come from the grassroots.” [“Community Organising in Southern Italy”, pp. 16–19, Black Flag no. 210, p. 18]

Thus Libertarian Municipalism reverses the process by which community assemblies will be created. Instead of anarchists using elections to build such bodies, they must work in their communi-
Both schemes revolve around creating an alternative form of currency and credit within capitalism in order to allow working class people to work outside the capitalist money system by creating a new circulating medium. In this way, it is hoped, workers would be able to improve their living and working conditions by having a source of community-based (very low interest) credit and so be less dependent on capitalists and the capitalist banking system. Supporters of mutualism considered it as the ideal way of reforming capitalism away for by making credit available to the ordinary worker at very cheap rates, the end of wage slavery could occur as workers would work for themselves by either purchasing the necessary tools required for their work or by buying the capitalists out.

Mutual credit, in short, is a form of credit co-operation, in which individuals pull their resources together in order to benefit themselves as individuals and as part of a community. It has the following key aspects:

- **Co-operation**: No-one owns the network. It is controlled by its members democratically.
- **Non-exploitative**: No interest is charged on account balances or credit. At most administrative costs are charged, a result of it being commonly owned and managed.
- **Consent**: Nothing happens without it, there is no compulsion to trade.
- **Labour-Notes**: They use their own type of money as a means of aiding “honest exchange.”

It is hoped, by organising credit, working class people will be able to work for themselves and slowly but surely replace capitalism with a co-operative system based upon self-management. While LETS schemes do not have such grand schemes, historically organisations, which by their very nature disenfranchise those who do not work in industry (such as housewives, the old, and so on). And, of course, there is far more to life than work and so any future society organised purely around workplace organisations is reproducing capitalism’s insane glorification of economic activity, at least to some degree. So, in this sense, Libertarian Municipalism has a very valid point — a free society will be created and maintained within the community as well as in the workplace. However, this perspective was hardly alien to such anarchist thinkers as Proudhon, Bakunin and Kropotkin who all placed communes at the centre of their vision of a free society.

Secondly, Bookchin and other Libertarian Municipalists are correct to argue that anarchists should work in their local communities. Many anarchists are doing just that and are being very successful as well. However, most anarchists reject the idea of a “confederal municipalist movement running candidates for municipal councils with demands for the institution of public assemblies” as viable means of “struggle toward creating new civic institutions out of old ones (or replacing the old ones altogether).” [Bookchin, Op. Cit., p. 229 and p. 267]

The most serious objection to this has to do with whether politics in most cities has already become too centralised, bureaucratic, inhumanly scaled, and dominated by capitalist interests to have any possibility of being taken over by anarchists running on platforms of participatory democratisation. Merely to pose the question seems enough to answer it. There is no such possibility in the vast majority of cities, and hence it would be a waste of time and energy for anarchists to support libertarian municipalist candidates in local elections — time and energy that could be more profitably spent in direct action. If the central governments are too bureaucratic and unresponsive to be used by Libertarian Municipalists, the same can be said of local ones too — particularly as the local state has become increasingly controlled by the central authorities (in the UK, for example, the Conservative government of
democratic institutions. And if this kind of activity brings anarchists into city councils, there is no reason why such a politics should be construed as parliamentary, particularly if it is confined to the civic level and is consciously posed against the state.” [Op. Cit., p. 21]

In short, Libertarian Municipalism “depends upon libertarian leftists running candidates at the local level, calling for the division of municipalities into wards, where popular assemblies can be created that bring people into full and direct participation in political life … municipalities would [then] confederate into a dual power to oppose the nation-state and ultimately dispense with it and with the economic forces that underpin statism as such.” [Democracy and Nature no. 9, p. 158] This would be part of a social wide transformation, whose “[m]inimal steps … include initiating Left Green municipalist movements that propose neighbourhood and town assemblies — even if they have only moral functions at first — and electing town and city councillors that advance the cause of these assemblies and other popular institutions. These minimal steps can lead step-by-step to the formation of confederal bodies … Civic banks to fund municipal enterprises and land purchases; the fostering of new ecologically-orientated enterprises that are owned by the community.” Thus Bookchin saw Libertarian Municipalism as a process by which the state can be undermined by using elections as the means of creating popular assemblies. Part of this would be the “municipalisation of property” which would “bring the economy as a whole into the orbit of the public sphere, where economic policy could be formulated by the entire community.” [From Urbanisation to Cities, p. 266 and p. 235]

In evaluating Bookchin’s proposal, several points come to mind.

Firstly, it is clear that Libertarian Municipalism’s arguments in favour of community assemblies is important and cannot be ignored. Bookchin was right to note that, in the past, many anarchists placed far too much stress on workplace struggles and workers’ councils as the framework of a free society. Many of the really important issues that affect us cannot be reduced to workplace or-
mutualism aimed at working within and transforming capitalism to socialism. At the very least, LETS schemes reduce the power and influence of banks and finance capital within society as mutualism ensures that working people have a viable alternative to such parasites.

These ideas have had a long history within the socialist movement, originating in Britain in the early 19th century when Robert Owen and other Socialists raised the idea of labour notes and labour-exchanges as both a means of improving working class conditions within capitalism and of reforming capitalism into a society of confederated, self-governing communities. Such “Equitable Labour Exchanges” were “founded at London and Birmingham in 1832” with “Labour notes and the exchange of small products.” [E. P. Thompson, The Making of the English Working Class, p. 870] Apparently independently of these attempts in Britain at what would later be called mutualism, Proudhon arrived at the same ideas decades later in France: “The People’s Bank quite simply embodies the financial and economic aspects of the principle of modern democracy, that is, the sovereignty of the People, and of the republican motto, ‘Liberty, Equality, Fraternity.’” [Selected Writings of P-J Proudhon, p. 75] Similarly, in the USA (partly as a result of Joshua Warren’s activities, who got the idea from Robert Owen) there was extensive discussion on labour notes, exchanges and free credit as a means of protecting workers from the evils of capitalism and ensuring their independence and freedom from wage slavery. When Proudhon’s works appeared in North America, the basic arguments were well known and they were quickly adopted by radicals there.

Therefore the idea that mutual banking using labour money as a means to improve working class living conditions, even, perhaps, to achieve industrial democracy, self-management and the end of capitalism has a long history in Socialist thought. Unfortunately this aspect of socialism became less important with the rise of Marxism (which called these early socialists “utopian”). Attempts
at such credit unions and alternative exchange schemes were generally replaced with attempts to build working class political parties and so constructive socialistic experiments and collective working class self-help was replaced by working within the capitalist state. Fortunately, history has had the last laugh on Marxism with working class people yet again creating anew the ideas of mutualism (as can be seen by the growth of LETS and other schemes of community money).

J.5.6 Why are mutual credit schemes important?

Mutual credit schemes are important because they are a way to improve working class life under capitalism and ensure that what money we do have is used to benefit ourselves rather than the elite. By organising credit, we retain control over it and so rather than being used to invest in capitalist schemes it can be used for socialist alternatives.

For example, rather than allow the poorest to be at the mercy of loan sharks a community, by organising credit, can ensure its members receive cheap credit. Rather than give capitalist banks bundles of cash to invest in capitalist firms seeking to extract profits from a locality, it can be used to fund a co-operative instead. Rather than invest pension schemes into the stock market and so help undermine workers pay and living standards by increasing rentier power, it can be used to invest in schemes to improve the community and its economy. In short, rather than bolster capitalist power and so control, mutual credit aims to undermine the power of capitalist banks and finance by placing as much money as much possible in working class hands.

This point is important, as the banking system is often considered "neutral" (particularly in capitalist economics). However, as Malatesta correctly argued, it would be "a mistake to believe ... that managed, and directly democratic communities — of confederated municipalities or 'communes' — speaks almost intuitively, and in the best works of Proudhon and Kropotkin, consciously, to the transforming role of libertarian municipalism as the framework of a libertarian society." "Theses on Libertarian Municipalism", pp. 9–22, The Anarchist Papers, Dimitrios I. Roussopoulos (ed.), p. 10] He also pointed out that, historically, the city has been the principle countervailing force to imperial and national states, haunting them as a potential challenge to centralised power and continuing to do so today, as can be seen in the conflicts between national government and municipalities in many countries.

Despite the libertarian potential of urban politics, “urbanisation” — the growth of the modern megalopolis as a vast wasteland of suburbs, shopping malls, industrial parks, and slums that foster political apathy and isolation in realms of alienated production and private consumption – is antithetical to the continued existence of those aspects of the city that might serve as the framework for a libertarian municipalism: “When urbanisation will have effaced city life so completely that the city no longer has its own identity, culture, and spaces for consociation, the bases for democracy — in whatever way the word is defined — will have disappeared and the question of revolutionary forms will be a shadow game of abstractions.” Despite this danger Bookchin argued that a libertarian politics of local government is still possible, provided anarchists get our act together:

"The Commune still lies buried in the city council; the sections still lie buried in the neighbourhood; the town meeting still lies buried in the township; confederal forms of municipal association still lie buried in regional networks of towns and cities." [Op. Cit., p. 16 and p. 21]

What would anarchists do electorally at the local level? Bookchin proposed that libertarians stand in local elections in order to change city and town charters to make them participatory: “An organic politics based on such radical participatory forms of civic association does not exclude the right of anarchists to alter city and town charters such that they validate the existence of directly..."
the ideology spoon-fed children during their “education” and re-
inforced by the media.

For more information on Modern Schools see Paul Avrich’s The Modern School Movement: Anarchism and education in the United States, Emma Goldman’s essays “Francisco Ferrer and the Modern School” (in Anarchism and Other Essays) and “The Social Importance of the Modern School” (in Red Emma Speaks) as well as A.S Neil’s Summerhill. For a good introduction to an-
arist viewpoints on education see “Kropotkin and technical edu-
cation: an anarchist voice” by Michael Smith (in For Anarchism, 
David Goodway (ed.),) and Michael Bakunin’s “All-Round Educa-
tion” (in The Basic Bakunin). For an excellent summary of the advantages and benefits of co-operative learning, see Alfie Kohn’s No Contest.

J.5.14 What is Libertarian Municipalism?

As we noted in section J.2, most anarchists reject participating in electoral politics. A notable exception was Murray Bookchin who not only proposed voting but also a non-parliamentary electoral strategy for anarchists. He repeated this proposal in many of his later works, such as From Urbanisation to Cities, and has made it — at least in the USA — one of the many alternatives anarchists are involved in.

According to Bookchin, “the proletariat, as do all oppressed sec-
tors of society, comes to life when it sheds its industrial habits in the free and spontaneous activity of communising, or taking part in the political life of the community.” In other words, Bookchin thought that democratisation of local communities may be as strategically important, or perhaps more important, to anarchists than workplace struggles. Since local politics is humanly scaled, Bookchin argued that it can be participatory rather than parliamentary. Or, as he put it, the “anarchic ideal of decentralised, stateless, collectively

the banks are, or are in the main, a means to facilitate exchange; they are a means to speculate on exchange and currencies, to invest capital and to make it produce interest, and to fulfil other typically capitalist operations.” [Errico Malatesta: His Life and Ideas, p. 100] Within capitalism, money is still to a large degree a commod-
ity which is more than a convenient measure of work done in the production of goods and services. It can and does go anywhere in the world where it can get the best return for its owners, and so it tends to drain out of those communities that need it most (why else would a large company invest in a community unless the money it takes out of the area handsomely exceeds that put it?). It is the means by which capitalists can buy the liberty of working people and get them to produce a surplus for them (wealth is, after all, “a power invested in certain individuals by the institutions of society, to compel others to labour for their benefit.” [William Godwin, The An-
arist Writings of William Godwin, p. 130]). From this con-
sideration alone, working class control of credit and money is an important part of the class struggle as having access to alternative sources of credit can increase working class options and power.

As we discussed in section B.3.2, credit is also an important form of social control — people who have to pay their mortgage or visa bill are more pliable, less likely to strike or make other forms of po-
litical trouble. Credit also expands the consumption of the masses in the face of stagnant or falling wages so blunting the impact of increasing exploitation. Moreover, as an added bonus, there is a profit to be made as the “rich need a place to earn interest on their surplus funds, and the rest of the population makes a juicy lending target.” [Doug Henwood, Wall Street, p. 65]

Little wonder that the state (and the capitalists who run it) is so concerned to keep control of money in its own hands or the hands of its agents. With an increase in mutual credit, interest rates would drop, wealth would stay more in working class com-
munities, and the social power of working people would increase (for people would be more likely to struggle for higher wages and

3746

3695
better conditions — as the fear of debt repayments would be less). By the creation of community-based credit unions that do not put their money into “Capital Markets” or into capitalist Banks working class people can control their own credit, their own retirement funds, and find ways of using money as a means of undermining capitalist power and supporting social struggle and change. In this way working people are controlling more and more of the money supply and using it in ways that will stop capital from using it to oppress and exploit them.

An example of why this can be important can be seen from the existing workers’ pension fund system which is invested in the stock market in the hope that workers will receive an adequate pension in their old age. However, the only people actually winning are bankers and big companies. Unsurprisingly, the managers of these pension fund companies are investing in those firms with the highest returns, which are usually those who are downsizing or extracting most surplus value from their workforce (which in turn forces other companies to follow the same strategies to get access to the available funds in order to survive). Basically, if your money is used to downsize your fellow workers or increase the power of capital, then you are not only helping to make things harder for others like you, you are also helping making things worse for yourself. No person is an island, and increasing the clout of capital over the working class is going to affect you directly or indirectly. As such, the whole scheme is counter-productive as it effectively means workers have to experience insecurity, fear of downsizing and stagnating wages during their working lives in order to have slightly more money when they retire (assuming that they are fortunate enough to retire when the stock market is doing well rather than during one of its regular periods of financial instability, of course).

This highlights one of the tricks the capitalists are using against us, namely to get us to buy into the system through our fear of old age. Whether it is going into lifelong debt to buy a home or putting on respect for labour, reason, equality, and freedom and a social environment wherein each human individual will enjoy full freedom and really by, de jure and de facto, the equal of every other.

“Does this environment exist? No. Then it must be established... [otherwise] in the existing social environment... on leaving [libertarian] schools they [the student] would enter a society governed by totally opposite principles, and, because society is always stronger than individuals, it would prevail over them ... [and] demoralise them.”

[The Basic Bakunin. p. 174]

Because of this, Modern Schools must be part of a mass working class revolutionary movement which aims to build as many aspects of the new world as possible in the old one before, ultimately, replacing it. Otherwise they are just useful as social experiments and their impact on society marginal. Thus, for anarchists, this process of education is part of the class struggle, not in place of it and so “the workers [must] do everything possible to obtain all the education they can in the material circumstances in which they currently find themselves ... [while] concentr[ating] their efforts on the great question of their economic emancipation, the mother of all other emancipations.” [Bakunin, Op. Cit., p. 175]

Before finishing, we must stress that hierarchical education (like the media), cannot remove the effects of actual life and activity in shaping/changing people and their ideas, opinions and attitudes. While education is an essential part of maintaining the status quo and accustoming people to accept hierarchy, the state and wage slavery, it cannot stop individuals from learning from their experiences, ignoring their sense of right and wrong, recognising the injustices of the current system and the ideas that it is based upon. This means that even the best state (or private) education system will still produce rebels – for the experience of wage slavery and state oppression (and, most importantly, struggle) is shattering to
“Higher education, for the privileged few, should be for the general public, as every human has a right to know; and science, which is produced by observers and workers of all countries and ages, ought not be restricted to class.”

Thus Modern Schools are based on encouraging self-education in a co-operative, egalitarian and libertarian atmosphere in which the pupil (regardless of age) can develop themselves and their interests to the fullest of their abilities. In this way Modern Schools seek to create anarchists by a process of education which respects the individual and gets them to develop their own abilities in a conducive setting.

Modern Schools have been a constant aspect of the anarchist movement since the late 1890s. The movement was started in France by Louise Michel and Sebastien Faure, where Francisco Ferrer became acquainted with them. He founded his Modern School in Barcelona in 1901, and by 1905 there were 50 similar schools in Spain (many of them funded by anarchist groups and trade unions and, from 1919 onward, by the C.N.T. – in all cases the autonomy of the schools was respected). In 1909, Ferrer was falsely accused by the Spanish government of leading an insurrection and executed in spite of world-wide protest and overwhelming proof of his innocence. His execution, however, gained him and his educational ideas international recognition and inspired a Modern School progressive education movement across the globe.

However, for most anarchists, Modern Schools are not enough in themselves to produce a libertarian society. They agree with Bakunin:

“For individuals to be moralised and become fully human ... three things are necessary: a hygienic birth, all-round education, accompanied by an upbringing based

our money in the stock market, we are being encouraged to buy into the system which exploits us and so put its interests above our own. This makes us more easily controlled. We need to get away from living in fear and stop allowing ourselves to be deceived into behaving like “stakeholders” in a Plutocratic system where most shares really are held by an elite. As can be seen from the use of pension funds to buy out firms, increase the size of transnationals and downsize the workforce, such “stakeholding” amounts to sacrificing both the present and the future while others benefit.

The real enemies are not working people who take part in such pension schemes. It is the people in power, those who manage the pension schemes and companies, who are trying to squeeze every last penny out of working people to finance higher profits and stock prices — which the unemployment and impoverishment of workers on a world-wide scale aids. They control the governments of the world. They are making the “rules” of the current system. Hence the importance of limiting the money they have available, of creating community-based credit unions and mutual risk insurance co-operatives to increase our control over our money which can be used to empower ourselves, aid our struggles and create our own alternatives (see section B.3.2 for more anarchist views on mutual credit and its uses). Money, representing as it does the power of capital and the authority of the boss, is not “neutral” and control over it plays a role in the class struggle. We ignore such issues at our own peril.

J.5.7 Do most anarchists think mutual credit is sufficient to abolish capitalism?

The short answer is no, they do not. While the Individualist and Mutualist Anarchists do think that mutual banking is the only sure way of abolishing capitalism, most anarchists do not see it as an
end in itself. Few think that capitalism can be reformed away in the manner assumed by Proudhon or Tucker.

In terms of the latter, increased access to credit does not address the relations of production and market power which exist within the economy and so any move for financial transformation has to be part of a broader attack on all forms of capitalist social power in order to be both useful and effective. In short, assuming that Individualist Anarchists do manage to organise a mutual banking scheme it cannot be assumed that as long as firms use wage-labour that any spurt in economic activity will have a long term effect of eliminating exploitation. What is more likely is that an economic crisis would develop as lowering unemployment results in a profits squeeze (as occurred in, say, the 1970s). Without a transformation in the relations of production, the net effect would be the usual capitalist business cycle.

For the former, for mutualists like Proudhon, mutual credit was seen as a means of transforming the relations of production (as discussed in section G.4.1, unlike Proudhon, Tucker did not oppose wage-labour and just sought to make it non-exploitative). For Proudhon, mutual credit was seen as the means by which co-operatives could be created to end wage-labour. The organisation of labour would combine with the organisation of credit to end capitalism as workers would fund co-operative firms and their higher efficiency would soon drive capitalist firms out of business. Thus “the Exchange Bank is the organisation of labour’s greatest asset” as it allowed “the new form of society to be defined and created among the workers.” [Proudhon, Correspondance, vol. 2, pp. 307–8] “To organise credit and circulation is to increase production,” Proudhon stressed, “to determine the new shapes of industrial society.” [Op. Cit., vol. 6, p. 372] So, overtime, co-operative credit would produce co-operative production while associated labour would increase the funds available to associated credit. For Proudhon the “organisation of credit and organisation of labour amount to one and the same” and by recognising this the workers

The Modern School bases itself on libertarian education techniques. Libertarian education, very broadly, seeks to produce children who will demand greater personal control and choice, who think for themselves and question all forms of authority:

“We don’t hesitate to say we want people who will continue to develop. People constantly capable of destroying and renewing their surroundings and themselves: whose intellectual independence is their supreme power, which they will yield to none; always disposed for better things, eager for the triumph of new ideas, anxious to crowd many lives into the life they have. It must be the aim of the school to show the children that there will be tyranny as long as one person depends on another.” [Ferrer, quoted by Harper, Op. Cit., p. 100]

Thus the Modern School insists that the child is the centre of gravity in the education process — and that education is just that, not indoctrination:

“I want to form a school of emancipation, concerned with banning from the mind whatever divides people, the false concepts of property, country and family so as to attain the liberty and well-being which all desire. I will teach only simple truth. I will not ram dogma into their heads. I will not conceal one iota of fact. I will teach not what to think but how to think.” [Ferrer, quoted by Harper, Op. Cit., pp. 99–100]

The Modern School has no rewards or punishments, exams or mark — the everyday tortures of conventional schooling. And because practical knowledge is more useful than theory, lessons were often held in factories, museums or the countryside. The school was also used by parents, and Ferrer planned a Popular University.
his relation to his fellow[s].” [Red Emma Speaks, pp. 141–2, p. 140 and p. 145] It would be an education for freedom, not for subservience:

“Should the notion of freedom but awaken in man, free men dream only of freeing themselves now and for all time: but instead, all we do is churn out learned men who adapt in the most refined manner to every circumstance and fall to the level of servile, submissive souls. For the most part, what are our fine gentlemen brimful of intellect and culture? Sneering slavers and slaves themselves.” [Max Stirner, No Gods, No Masters, vol. 1, p. 12]

The Modern School Movement (also known as the Free School Movement) over the past century has been an attempt to represent part of this concern about the dangers of state and church schools and the need for libertarian education. The idea of libertarian education is that knowledge and learning should be linked to real life processes as well as personal usefulness and should not be the preserve of a special institution. Thus Modern Schools are an attempt to establish an environment for self development in an overly structured and rationalised world. An oasis from authoritarian control and as a means of passing on the knowledge to be free:

“The underlying principle of the Modern School is this: education is a process of drawing out, not driving in; it aims at the possibility that the child should be left free to develop spontaneously, directing his own efforts and choosing the branches of knowledge which he desires to study … the teacher … should be a sensitive instrument responding to the needs of the child … a channel through which the child may attain so much of the ordered knowledge of the world as he shows himself ready to receive and assimilate.” [Goldman, Op. Cit., p. 146]

“would soon have wrested alienated capital back again, through their organisation and competition.” [No Gods, No Masters, vol. 1, pp. 59–60]

Bakunin, while he was “convinced that the co-operative will be the preponderant form of social organisation in the future” and could “hardly oppose the creation of co-operatives associations” now as we find them necessary in many respects,” argued that Proudhon’s hope for gradual change by means of mutual banking and the higher efficiency of workers’ co-operatives were unlikely to be realised. This was because such claims “do not take into account the vast advantage that the bourgeoisie enjoys against the proletariat through its monopoly on wealth, science, and secular custom, as well as through the approval — overt or covert but always active — of States and through the whole organisation of modern society. The fight is too unequal for success reasonably to be expected.” [The Basic Bakunin, p. 153 and p. 152] Thus capitalism “does not fear the competition of workers’ associations – neither consumers’, producers’, nor mutual credit associations — for the simple reason that workers’ organisations, left to their own resources, will never be able to accumulate sufficiently strong aggregations of capital capable of waging an effective struggle against bourgeois capital.” [The Political Philosophy of Bakunin, p. 293]

So, for most anarchists, it is only in combination with other forms of working class self-activity and self-management that mutualist institutions could play an important role in the class struggle. In other words, few anarchists think that mutualist credit or co-operatives are enough in themselves to end capitalism. Revolutionary action is also required — such as the expropriation of capital by workers associations.

This does not mean anarchists reject co-operation under capitalism. By creating a network of mutual banks to aid in creating co-operatives, union organising drives, supporting strikes (either directly by gifts/loans or funding consumer co-operatives which could supply food and other essentials free or at a reduced cost),
mutualism can be used as a means of helping build libertarian alternatives within the capitalist system. Such alternatives, while making life better under the current system, also play a role in overcoming that system by aiding those in struggle. Thus Bakunin:

“let us co-operate in our common enterprise to make our lives a little bit more supportable and less difficult. Let us, wherever possible, establish producer-consumer co-operatives and mutual credit societies which, though under the present economic conditions they cannot in any real or adequate way free us, are nevertheless important inasmuch they train the workers in the practices of managing the economy and plant the precious seeds for the organisation of the future.” [Bakunin on Anarchism, p. 173]

So while few anarchists think that mutualism would be enough in itself, it can play a role in the class struggle. As a compliment to direct action and workplace and community struggle and organisation, mutualism has an important role in working class self-liberation. For example, community unions (see section J.5.1) could create their own mutual banks and money which could be used to fund co-operatives and support social struggle. In this way a healthy communalised co-operative sector could develop within capitalism, overcoming the problems of isolation facing workplace co-operatives (see section J.5.11) as well as providing solidarity for those in struggle.

Mutual banking can be a way of building upon and strengthening the anarchistic social relations within capitalism. For even under capitalism and statism, there exists extensive mutual aid and, indeed, anarchistic and communistic ways of living. For example, communistic arrangements exist within families, between friends and lovers and within anarchist organisations. Mutual credit could be a means of creating a bridge between this alternative (gift) “economy” and capitalism. The mutualist alternative economy would

customed to wage labour and workplace authority). They looked to children, hoping that “the elementary school could be used to break the labouring classes into those habits of work discipline now necessary for factory production … Putting little children to work at school for very long hours at very dull subjects was seen as a positive virtue, for it made them habituated, not to say naturalised, to labour and fatigue.” [quoted by Juliet B. Schor, The Overworked American, p. 61]

Thus supporters of Modern Schools recognise that the role of education is an important one in maintaining hierarchical society — for government and other forms of hierarchy (such as wage labour) must always depend on the opinion of the governed. Francisco Ferrer (the most famous libertarian educator) argued that:

“Rulers have always taken care to control the education of the people. They know their power is based almost entirely on the school and they insist on retaining their monopoly. The school is an instrument of domination in the hands of the ruling class.” [quoted by Clifford Harper, Anarchy: A Graphic Guide, p. 100]

Little wonder, then, that Emma Goldman argued that “modern methods of education” have “little regard for personal liberty and originality of thought. Uniformity and imitation is [its] motto.” The school “is for the child what the prison is for the convict and the barrack for the soldier — a place where everything is being used to break the will of the child, and then to pound, knead, and shape it into a being utterly foreign to itself.” Hence the importance of Modern Schools. It is a means of spreading libertarian education within a hierarchical society and undercut one of the key supports for that society — the education system. Instead of hierarchical education, Modern schools exist to “develop the individual through knowledge and the free play of characteristic traits, so that [the child] may become a social being, because he had learned to know himself, to know
and mental freedom. The aim of such education is to ensure that the "industrial worker, the man [sic!] of action and the intellectual would all be rolled into one." [Proudhon, quoted by Steward Edward, *The Paris Commune*, p. 274]

Anyone involved in radical politics, constantly and consistently challenges the role of the state’s institutions and their representatives within our lives. The role of bosses, the police, social workers, the secret service, managers, doctors and priests are all seen as part of a hierarchy which exists to keep us, the working class, subdued. It is relatively rare, though, for the left-wing to call into question the role of teachers. Most left wing activists and a large number of libertarians believe that education is always good.

Those involved in libertarian education believe the contrary. They believe that national education systems exist only to produce citizens who will be blindly obedient to the dictates of the state, citizens who will uphold the authority of government even when it runs counter to personal interest and reason, wage slaves who will obey the orders of their boss most of the time and consider being able to change bosses as freedom. They agree with William Godwin (one of the earliest critics of national education systems) when he wrote that “the project of a national education ought to be discouraged on account of its obvious alliance with national government … Government will not fail to employ it to strengthen its hand and perpetuate its institutions … Their views as instigator of a system will not fail to be analogous to their views in their political capacity.” [quoted by Colin Ward, *Anarchy in Action*, p. 81]

With the growth of industrialism in the 19th century state schools triumphed, not through a desire to reform but as an economic necessity. Industry did not want free thinking individuals, it wanted workers, instruments of labour, and it wanted them punctual, obedient, passive and willing to accept their disadvantaged position. According to Nigel Thrift, many employers and social reformers became convinced that the earliest generations of workers were almost impossible to discipline (i.e. to get ac-

help strength communities and bonds of trust between individuals, and this would increase the scope of the communistic sector as more and more people help each other without the medium of exchange. In other words, mutualism will help the gift economy that exists within capitalism to grow and develop.

### J.5.8 What would a modern system of mutual banking look like?

One scenario for an updated system of mutual banking would be for a community to begin issuing an alternative currency accepted as money by all individuals within it. Let us call this currency-issuing association a “mutual barter clearinghouse,” or just “clearinghouse” for short.

The clearinghouse would have a twofold mandate: first, to extend credit at cost to members; second, to manage the circulation of credit-money within the system, charging only a small service fee (one percent or less) sufficient to cover its costs of operation, including labour costs involved in issuing credit and keeping track of transactions, insuring itself against losses from uncollectable debts, and so forth. Some current experiments in community money use labour time worked as their basis (thus notes would be marked one-hour) while others have notes tied to the value of the state currency (thus, say, a Scottish town would issue pounds assumed to be the same as a British pound note).

The clearinghouse would be organised and function as follows. People could join the clearinghouse by pledging a certain amount of property (including savings) as collateral. On the basis of this pledge, an account would be opened for the new member and credited with a sum of mutual pounds equivalent to some fraction of the assessed value of the property pledged. The new member would agree to repay this amount plus the service fee into their account by a certain date. The mutual pounds could then be transferred...
through the clearinghouse to the accounts of other members, who have agreed to receive mutual money in payment for all debts or work done.

The opening of this sort of account is, of course, the same as taking out a “loan” in the sense that a commercial bank “lends” by extending credit to a borrower in return for a signed note pledging a certain amount of property as security. The crucial difference is that the clearinghouse does not purport to be “lending” a sum of money that it already has, as is fraudulently claimed by commercial banks. Instead it honestly admits that it is creating new money in the form of credit. New accounts can also be opened simply by telling the clearinghouse that one wants an account and then arranging with other people who already have balances to transfer mutual money into one’s account in exchange for goods or services.

Another form of mutual credit are LETS systems. In this a number of people get together to form an association. They create a unit of exchange (which is equal in value to a unit of the national currency usually), choose a name for it and offer each other goods and services priced in these units. These offers and wants are listed in a directory which is circulated periodically to members. Members decide who they wish to trade with and how much trading they wish to do. When a transaction is completed, this is acknowledged with a “cheque” made out by the buyer and given to the seller. These are passed on to the system accounts administration which keeps a record of all transactions and periodically sends members a statement of their accounts. The accounts administration is elected by, and accountable to, the membership and information about balances is available to all members.

Unlike the first system described, members do not have to present property as collateral. Members of a LETS scheme can go into “debt” without it, although “debt” is the wrong word as members are not so much going into debt as committing themselves to do some work within the system in the future and by so doing

Such schemes, as noted above, are just forms of self-exploitation, getting workers to help their robbers and so not a development anarchists seek to encourage. We have discussed this here just to be clear that, firstly, such forms of structural reforms are not self-management, as managers and owners still have the real power, and, secondly, even if such forms are somewhat liberatory and more efficient, market forces will not select them precisely because the latter is dependent on the former. Thirdly, they would still be organised for exploitation as workers would not be controlling all the goods they produced. As with an existing capitalist firm, part of their product would be used to pay interest, rent and profit. For anarchists “self-management is not a new form of mediation between workers and their bosses ... [it] refers to the very process by which the workers themselves overthrow their managers and take on their own management and the management of production in their own workplace.” [Dolgoff, Op. Cit., p. 81] Hence our support for co-operatives, unions and other self-managed structures created and organised from below by and for working class people by their own collective action.

J.5.13 What are Modern Schools?

Modern schools are alternative schools, self-managed by students, teachers and parents which reject the authoritarian schooling methods of the modern “education” system. Such schools have been a feature of the anarchist movement since the turn of the 20th century while interest in libertarian forms of education has existed in anarchist theory from the beginning. All the major anarchist thinkers, from Godwin through Proudhon, Bakunin and Kropotkin to modern activists like Colin Ward, have stressed the importance of libertarian (or rational) education, education that develops all aspects of the student (mental and physical – and so termed integral education) as well as encouraging critical thought
ated workers work if they were neither oppressed, exploited nor alienated will always fail.

For a firm to establish committed and participatory relations internally, it must have external supports — particularly with providers of finance (which is why co-operatives benefit from credit unions and co-operating together). The price mechanism proves self-defeating to create such supports and that is why we see “participation” more fully developed within Japanese and German firms (although it is still along way from fully democratic workplaces), who have strong, long term relationships with local banks and the state which provides them with the support required for such activities. As William Lazonick notes, Japanese industry had benefited from the state ensuring “access to inexpensive long-term finance, the sine qua non of innovating investment strategies” along with a host of other supports, such as protecting Japanese industry within their home markets so they could “develop and utilise their productive resources to the point where they could attain competitive advantage in international competition.” [Op. Cit., p. 305] The German state provides its industry with much of the same support.

Therefore, “participation” within capitalist firms will have little or no tendency to spread due to the actions of market forces. In spite of such schemes almost always being more efficient, capitalism will not select them because they empower workers and make it hard for capitalists to generate and control their profits. Hence capitalism, by itself, will have no tendency to produce more libertarian organisational forms within industry. Those firms that do introduce such schemes will be the exception rather than the rule (and the schemes themselves will be marginal in most respects and subject to veto from above). For such schemes to spread, collective action is required (such as state intervention to create the right environment and support network or — from an anarchist point of view — union and community direct action).

they are creating spending power. The willingness of members to incur such a commitment could be described as a service to the community as others are free to use the units so created to trade themselves. Indeed, the number of units in existence exactly matches the amount of real wealth being exchanged. The system only works if members are willing to spend. It runs on trust and builds up trust as the system is used.

It is likely that a fully functioning mutual banking system would incorporate aspects of both these systems. The need for collateral may be used when members require very large loans while the LETS system of negative credit as a commitment to future work would be the normal function of the system. If the mutual bank agrees a maximum limit for negative balances, it may agree to take collateral for transactions that exceed this limit. However, it is obvious that any mutual banking system will find the best means of working in the circumstances it finds itself.

J.5.9 How does mutual credit work?

Let us consider an example of how business would be transacted using mutual credit within capitalism. There are two possibilities, depending on whether the mutual credit is based upon whether the creditor can provide collateral or not. We will take the case with collateral first.

Suppose that A, an organic farmer, pledges as collateral a certain plot of land that she owns and on which she wishes to build a house. The land is valued at, say, £40,000 in the capitalist market and by pledging the land, A is able to open a credit account at the clearinghouse for, say, £30,000 in mutual money. She does so knowing that there are many other members of the system who are carpenters, electricians, plumbers, hardware suppliers, and so on who are willing to accept mutual pounds in payment for their products or services.
It is easy to see why other subscriber-members, who have also obtained mutual credit and are therefore in debt to the clearing-house, would be willing to accept such notes in return for their goods and services. They need to collect mutual currency to repay their debts. Why would someone who is not in debt for mutual currency be willing to accept it as money?

To see why, let us suppose that B, an underemployed carpenter, currently has no account at the clearinghouse but that he knows about it and the people who operate and use it. After examining its list of members and becoming familiar with the policies of the new organisation, he is convinced that it does not extend credit frivolously to untrustworthy recipients who are likely to default. He also knows that if he contracts to do the carpentry on A’s new house and agrees to be paid for his work in mutual money, he will then be able to use it to buy groceries, clothes, and other goods and services from various people in the community who already belong to the system.

Thus B will be willing, and perhaps even eager (especially if the economy is in recession and regular money is tight) to work for A and receive payment in mutual credit. For he knows that if he is paid, say, £8,000 in mutual money for his labour on A’s house, this payment constitutes, in effect, 20 percent of a mortgage on her land, the value of which is represented by her mutual credit. B also understands that A has promised to repay this mortgage by producing new value — that is, by growing organic fruits and vegetables and selling them to other members of the system — and that it is this promise to produce new wealth which gives her mutual credit its value as a medium of exchange.

To put this point slightly differently, A’s mutual credit can be thought of as a lien against goods or services which she will create in the future. As security of this guarantee, she agrees that if she is unable for some reason to fulfil her obligation, the land she has pledged will be sold to other members. In this way, a value sufficient to cancel her debt (and probably then some) will be returned...
imum return on their investment. This would be endangered by workers’ control, even though it is more efficient and productive, as control over the surplus rests with the workers and not a management elite with similar interests and aims as the owners—an egalitarian workplace would produce an egalitarian distribution of surplus, in other words (as proven by the experience of workers’ co-operatives). In the words of one participant of the GE workers’ control project: “If we’re all one, for manufacturing reasons, we must share in the fruits equitably, just like a co-op business.” [quoted by Noble, Op. Cit., p. 295] Such a possibility is one few owners would agree to.

Thirdly, to survive within the “free” market means to concentrate on the short term. Long term benefits, although greater, are irrelevant. A free market requires profits now and so a firm is under considerable pressure to maximise short-term profits by market forces. Participation requires trust, investment in people and technology and a willingness to share the increased value added that result from workers’ participation with the workers who made it possible. All these factors would eat into short term profits in order to return richer rewards in the future. Encouraging participation thus tends to increase long term gains at the expense of short-term ones (to ensure that workers do not consider participation as a con, they must experience real benefits in terms of power, conditions and wage rises). For firms within a free market environment, they are under pressure from shareholders and their financiers for high returns as soon as possible. If a company does not produce high dividends then it will see its stock fall as shareholders move to those companies that do. Thus the market forces companies to act in such ways as to maximise short term profits.

If faced with a competitor which is not making such investments (and which is investing directly into deskillng technology or intensifying work loads which lowers their costs) and so wins them market share, or a downturn in the business cycle which shrinks their profit margins and makes it difficult for the firm to meet its com-
resents her willingness to do some work for other members of the bank at some future date.

The mutual bank does not have to worry about the negative balance, as this does not create a loss within the group as the minuses which have been incurred have already created wealth (pluses) within the system and it stays there. It is likely, of course, that the mutual bank would agree an upper limit on negative balances and require some form of collateral for credit greater than this limit, but for most exchanges this would be unlikely to be relevant.

It is important to remember that mutual money has no intrinsic value, since they cannot be redeemed (at the mutual bank) in gold or anything else. All they are promises of future labour. They are a mere medium for the facilitation of exchange used to facilitate the increase production of goods and services (as discussed in section G.3.6, it is this increase which ensures that mutual credit is not inflationary). This also ensures enough work for all and, ultimately, the end of exploitation as working people can buy their own means of production and so end wage-labour by self-employment and co-operation.

For more information on how mutual banking is seen to work see the collection of Proudhon’s works collected in Proudhon’s Solution to the Social Problem. William B. Greene’s Mutual Baking and Benjamin Tucker’s Instead of a Book should also be consulted.

J.5.10 Why do anarchists support co-operatives?

Support for co-operatives is a common feature in anarchist writings. In fact, support for democratic workplaces is as old as use of the term anarchist to describe our ideas. So why do anarchists support co-operatives? It is because they are the only way to guar-
suggest, on the other hand, that when the goals of profit-making and efficient production fail to coincide with the requirements of continued dominance, capital will resort to more ancient means: legal, political, and, if need be, military. Always, behind all the careful accounting, lies the threat of force. This system of domination has been legitimated in the past by the ideological invention that private ownership of the means of production and the pursuit of profit via production are always ultimately beneficial to society. Capitalism delivers the goods, it is argued, better, more cheaply, and in larger quantity, and in so doing, fosters economic growth ... The story of the Pilot Program — and it is but one among thousands like it in U.S. industry — raises troublesome questions about the adequacy of this mythology as a description of reality.” [Forces of Production, pp. 321–2]

Hierarchical organisation (domination) is essential to ensure that profits are controlled by a few and can, therefore, be allocated by them in such a way to ensure their power and privileges. By undermining such authority, workers’ control also undermines that power to maximise profits in a certain direction even though it increases “profits” (the difference between prices and costs) in the abstract. As workers’ control starts to extend (or management sees its potential to spread) into wider areas such as investment decisions, how to allocate the surplus (i.e. profits) between wages, investment, dividends, management pay and so on, then they will seek to end the project in order to ensure their power over both the workers and the surplus they, the workers, produce (this is, of course, related to the issue of lack of control by investors in co-operatives raised in the last section).

As such, the opposition by managers to workers’ control will be reflected by those who actually own the company who obviously would not support a regime which will not ensure the max-
efficiency and productivity (i.e. maximise the difference between
prices and costs) it (potentially) reduces the power of management
and owners to allocate that surplus as they see fit. Indeed, it can
be argued that hierarchical control of production exists solely to
provide for the accumulation of capital in a few hands, not for ef-
ficiency or productivity (see Stephan A. Margin, “What do Bosses
do? The Origins and Functions of Hierarchy in Capitalist Production”,

As David Noble argues, power is the key to understanding capi-
talism, not the drive for profits as such:

“In opting for control [over the increased efficiency of
workers’ control] ... management ... knowingly and, it
must be assumed, willingly, sacrificed profitable produc-
tion... . [This] illustrates not only the ultimate manage-
ment priority of power over both production and profit
within the firm, but also the larger contradiction between
the preservation of private power and prerogatives, on
the one hand, and the social goals of efficient, quality,
and useful production, on the other ...

“It is a common confusion, especially on the part of those
trained in or unduly influenced by formal economics
(liberal and Marxist alike), that capitalism is a system
of profit-motivated, efficient production. This is not true,
nor has it ever been. If the drive to maximise profits,
through private ownership and control over the process
of production, has served historically as the primary
means of capitalist development, it has never been the
end of that development. The goal has always been
domination (and the power and privileges that go with
it) and the preservation of domination. There is little
historical evidence to support the view that, in the final
analysis, capitalists play by the rules of the economic
game imagined by theorists. There is ample evidence to
antee freedom in production and so “the co-operative system ... car-
ries within it the germ of the future economic order.” [Bakunin, The
Philosophy of Bakunin, p. 385]

Anarchists support all kinds of co-operatives: housing, food,
consumer, credit and workplace ones. All forms of co-operation
are useful as they accustom their members to work together for
their common benefit as well as ensuring extensive experience in
managing their own affairs. As such, all forms of co-operatives are
(to some degree) useful examples of self-management and anarchy
in action. Here we will concentrate on producer co-operatives as
only these can replace the capitalist mode of production. They are
examples of a new mode of production, one based upon associated,
not wage, labour. As long as wage-labour exists within industry
and agriculture then capitalism remains and no amount of other
kinds of co-operatives will end it. If wage slavery exists, then so
will exploitation and oppression and anarchy will remain but a
hope.

Co-operatives are the “germ of the future” for two reasons.
Firstly, co-operatives are based on one worker, one vote. In
other words those who do the work manage the workplace within
which they do it (i.e. they are based on workers’ self-management).
Thus co-operatives are an example of the “horizontal” directly
democratic organisation that anarchists support and so are an
example of “anarchy in action” (even if in an imperfect way)
within capitalism. Secondly, they are an example of working
class self-help and self-activity. Instead of relying on others to
provide work, co-operatives show that production can be carried
on without the existence of a class of masters employing a class of
order takers.

Workplace co-operatives also present evidence of the viability
of an anarchist economy. It is well established that co-operatives are
usually more productive and efficient than their capitalist equiva-
lents. This indicates that hierarchical workplaces are not required
in order to produce useful goods and indeed can be harmful. It
also indicates that the capitalist market does not actually allocate
resources efficiently nor has any tendency to do so.
So why should co-operatives be more efficient? Firstly, there
are the positive effects of increased liberty. Co-operatives, by abol-
ishing wage slavery, obviously increase the liberty of those who
work in them. Members take an active part in the management
of their working lives and so authoritarian social relations are re-
placed by libertarian ones. Unsurprisingly, this liberty also leads
to an increase in productivity – just as wage labour is more pro-
ductive than slavery, so associated labour is more productive than
wage slavery. As Kropotkin argued: “the only guarantee not to be
robbed of the fruits of your labour is to possess the instruments of
labour ... man really produces most when he works in freedom, when
he has a certain choice in his occupations, when he has no overseer
to impede him, and lastly, when he sees his work bringing profit to
him and to others who work like him, but bringing in little to idlers.”
[The Conquest of Bread, p. 145]
There are also the positive advantages associated with participa-
tion (i.e. self-management, liberty in other words). Within a self-
managed, co-operative workplace, workers are directly involved in
decision making and so these decisions are enriched by the skills,
experiences and ideas of all members of the workplace. In the
words of Colin Ward:

“You can be in authority, or you can be an authority, or you can have
authority. The first derives from your rank in some chain of command, the second derives
special knowledge, and the third from special wisdom. But knowledge and wisdom are not distributed in or-
der of rank, and they are no one person’s monopoly in any undertaking. The fantastic inefficiency of any
hierarchical organisation — any factory, office, university, warehouse or hospital — is the outcome of two almost
invariable characteristics. One is that the knowl-

pay cut or increase their pace of work simply to enhance the prof-
its of capitalists. Simply put, profit maximisation is not equivalent
to efficiency. Getting workers to work longer, more intensely or
in more unpleasant conditions can increase profits but it does not
yield more output for the same inputs. Workers’ control would
curtail capitalist means of enhancing profits by changing the qual-
ity and quantity of work. It is this requirement which also aids
in understanding why capitalists will not support workers’ con-
trol — even though it is more efficient, it reduces capitalist power
in production. Moreover, demands to change the nature of work-
ers’ inputs into the production process in order to maximise profits
for capitalists would provoke a struggle over the intensity of work,
working hours, and over the share of value added going to workers,
management and owners and so destroy the benefits of participa-
tion.
Thus power within the workplace plays a key role in explaining
why workers’ control does not spread — it reduces the ability of
bosses to extract more unpaid labour from workers.
The second reason is related to the first. It too is based on the
power structure within the company but the power is related to
control over the surplus produced by the workers rather than the
ability to control how much surplus is produced in the first place
(i.e. power over workers). Hierarchical management is the way to
ensure that profits are channelled into the hands of a few. By cen-
tralising power, the surplus value produced by workers can be dis-
tributed in a way which benefits those at the top (i.e. management
and capitalists). This explains the strange paradox of workers’ con-
trol experiments being successful but being cancelled by manage-
ment. This is easily explained once the hierarchical nature of cap-
itl production (i.e. of wage labour) is acknowledged. Workers’
control, by placing (some) power in the hands of workers, under-
mines the authority of management and, ultimately, their power
to control the surplus produced by workers and allocate it as they
see fit. Thus, while workers’ control does reduce costs, incr
but there has been no tendency for them to spread. This contra-
dicts “free market” capitalist economic theory which states that those firms which introduce more efficient techniques will pros-
per and competitive market forces will ensure that other firms will introduce the technique.

This has not happened for three reasons.

Firstly, the fact is that within “free market” capitalism keeping (indeed strengthening) skills and power in the hands of the workers makes it harder for a capitalist firm to maximise profits (i.e. unpaid labour). It strengthens the power of workers, who can use that power to gain increased wages (i.e. reduce the amount of surplus value they produce for their bosses). Workers’ control also leads to a usurpation of capitalist prerogatives — including their share of revenues and their ability to extract more unpaid labour during the working day. While in the short run workers’ control may lead to higher productivity (and so may be toyed with), in the long run, it leads to difficulties for capitalists to maximise their profits:

“given that profits depend on the integrity of the labour exchange, a strongly centralised structure of control not only serves the interests of the employer, but dictates a minute division of labour irrespective of considerations of productivity. For this reason, the evidence for the superior productivity of ‘workers control’ represents the most dramatic of anomalies to the neo-classical theory of the firm: worker control increases the effective amount of work elicited from each worker and improves the co-
ordination of work activities, while increasing the soli-
darity and delegitimising the hierarchical structure of ultimate authority at its root; hence it threatens to in-
crease the power of workers in the struggle over the share of total value.” [Gintz, Op. Cit., p. 264]

A workplace which had extensive workers participation would hardly see the workers agreeing to reduce their skill levels, take a

edge and wisdom of the people at the bottom of the pyramid finds no place in the decision-making leadership hierarchy of the institution. Frequently it is devoted to making the institution work in spite of the formal leadership structure, or alternatively to sabotaging the ostensible function of the institution, because it is none of their choosing. The other is that they would rather not be there anyway: they are there through economic necessity rather than through identification with a common task which throws up its own shifting and functional leadership.

“Perhaps the greatest crime of the industrial system is the way it systematically thwarts the investing genius of the majority of its workers.” [Anarchy in Action, p. 41]

Also, as workers also own their place of work, they have an interest in developing the skills and abilities of their members and, obviously, this also means that there are few conflicts within the workplace. Unlike capitalist firms, there is no conflict between bosses and wage slaves over work loads, conditions or the division of value created between them. All these factors will increase the quality, quantity and efficiency of work, increase efficient utilisation of available resources and aids the introduction of new techniques and technologies.

Secondly, the increased efficiency of co-operatives results from the benefits associated with co-operation itself. Not only does co-
operation increase the pool of knowledge and abilities available within the workplace and enriches that source by communication and interaction, it also ensures that the workforce are working together instead of competing and so wasting time and energy. As Alfie Kohn notes (in relation to investigations of in-firm co-
operation):
“Dean Tjosvold … conducted [studies] at utility companies, manufacturing plants, engineering firms, and many other kinds of organisations. Over and over again, Tjosvold has found that ‘co-operation makes a work force motivated’ whereas ‘serious competition undermines co-ordination’ … Meanwhile, the management guru … T. Edwards Demming, has declared that the practice of having employees compete against each other is ‘unfair [and] destructive. We cannot afford this nonsense any longer … [We need to] work together on company problems [but] annual rating of performance, incentive pay, [or] bonuses cannot live with team work … What takes the joy out of learning … [or out of] anything? Trying to be number one.” [No Contest, p. 240]

Thirdly, there are the benefits associated with increased equality. Studies prove that business performance deteriorates when pay differentials become excessive. In a study of over 100 businesses (producing everything from kitchen appliances to truck axles), researchers found that the greater the wage gap between managers and workers, the lower their product’s quality. [Douglas Cowherd and David Levine, “Product Quality and Pay Equity,” Administrative Science Quarterly, No. 37, pp. 302–30] Businesses with the greatest inequality were plagued with a high employee turnover rate. Study author David Levine said: “These organisations weren’t able to sustain a workplace of people with shared goals.” [quoted by John Byrne, “How high can CEO pay go?” Business Week, April 22, 1996] The negative effects of income inequality can also be seen on a national level as well. Economists Torsten Persson and Guido Tabellini conducted a thorough statistical analysis of historical inequality and growth, and found that nations with more equal incomes generally experience faster productive growth. [“Is Inequality Harmful for Growth?”, American Economic Review]

product quality went up; scrap rate, machine downtime, worker absenteeism and turnover when down, and conflict on the floor dropped off considerably. Yet, little more than a year into the program — following a union demand that it be extended throughout the shop and into other GE locations — top management abolished the program out of fear of losing control over the workforce. Clearly, the company was willing to sacrifice gains in technical and economic efficiency in order to regain and insure management control.” [Progress Without People, p. 65f]

Simply put, managers and capitalists can see that workers’ control experiments expose the awkward fact that they are not needed, that their role is not related to organising production but exploiting workers. They have no urge to introduce reforms which will ultimately make themselves redundant. Moreover, most enjoy the power that comes with their position and have no desire to see it ended. This also places a large barrier in the way of workers’ control. Interestingly, this same mentality explains why capitalists often support fascist regimes: “The anarchist Luigi Fabbri termed fascism a preventative counter-revolution; but in his essay he makes the important point that the employers, particularly in agriculture, were not so much moved by fear of a general revolution as by the erosion of their own authority and property rights which had already taken place locally: ‘The bosses felt they were no longer bosses.’” [Adrian Lyttelton, “Italian Fascism”, pp. 81–114, Fascism: a Reader’s Guide, p. 91]

However, it could be claimed that owners of stock, being concerned by the bottom-line of profits, could force management to introduce participation. By this method, competitive market forces would ultimately prevail as individual owners, pursuing profits, re-organise production and participation spreads across the economy. Indeed, there are a few firms that have introduced such schemes
is scarcely a study in the entire literature which fails to demonstrate that satisfaction in work is enhanced or ... productivity increases occur from a genuine increase in worker’s decision-making power. Findings of such consistency ... are rare in social research.” [Paul B. Lumberg, quoted by Herbert Gintis, “The nature of Labour Exchange and the Theory of Capitalist Production”, Radical Political Economy, vol. 1, Samuel Bowles and Richard Edwards (eds.), p. 252] In spite of these findings, a “shift toward participatory relationships is scarcely apparent in capitalist production” and this is “not compatible with the neo-classical assertion as to the efficiency of the internal organisation of capitalist production.” [Gintz, Op. Cit., p. 252] Economist William Lazonick indicates the reason when he writes that “[m]any attempts at job enrichment and job enlargement in the first half of the 1970s resulted in the supply of more and better effort by workers. Yet many ‘successful’ experiments were cut short when the workers whose work had been enriched and enlarged began questioning traditional management prerogatives inherent in the existing hierarchical structure of the enterprise.” [Competitive Advantage on the Shop Floor, p. 282]

This is an important result, as it indicates that the ruling sections within capitalist firms have a vested interest in not introducing such schemes, even though they are more efficient methods of production. As can easily be imagined, managers have a clear incentive to resist participatory schemes (as David Schweickart notes, such resistance, "often bordering on sabotage, is well known and widely documented" [Op. Cit., p. 229]). As an example of this David Noble discusses a scheme run by General Electric in the late 1960s:

“After considerable conflict, GE introduced a quality of work life program ... which gave workers much more control over the machines and the production process and eliminated foremen. Before long, by all indicators, the program was succeeding — machine use, output and..." [Paul B. Lumberg, quoted by Herbert Gintis, “The nature of Labour Exchange and the Theory of Capitalist Production”, Radical Political Economy, vol. 1, Samuel Bowles and Richard Edwards (eds.), p. 252] In spite of these findings, a “shift toward participatory relationships is scarcely apparent in capitalist production” and this is “not compatible with the neo-classical assertion as to the efficiency of the internal organisation of capitalist production.” [Gintz, Op. As can easily be imagined, managers have a clear incentive to resist participatory schemes (as David Schweickart notes, such resistance, "often bordering on sabotage, is well known and widely documented" [Op. Cit., p. 229]). As an example of this David Noble discusses a scheme run by General Electric in the late 1960s:

“After considerable conflict, GE introduced a quality of work life program ... which gave workers much more control over the machines and the production process and eliminated foremen. Before long, by all indicators, the program was succeeding — machine use, output and..." [Paul B. Lumberg, quoted by Herbert Gintis, “The nature of Labour Exchange and the Theory of Capitalist Production”, Radical Political Economy, vol. 1, Samuel Bowles and Richard Edwards (eds.), p. 252] In spite of these findings, a “shift toward participatory relationships is scarcely apparent in capitalist production” and this is “not compatible with the neo-classical assertion as to the efficiency of the internal organisation of capitalist production.” [Gintz, Op. Cit., p. 252] Economist William Lazonick indicates the reason when he writes that “[m]any attempts at job enrichment and job enlargement in the first half of the 1970s resulted in the supply of more and better effort by workers. Yet many ‘successful’ experiments were cut short when the workers whose work had been enriched and enlarged began questioning traditional management prerogatives inherent in the existing hierarchical structure of the enterprise.” [Competitive Advantage on the Shop Floor, p. 282]

This is an important result, as it indicates that the ruling sections within capitalist firms have a vested interest in not introducing such schemes, even though they are more efficient methods of production. As can easily be imagined, managers have a clear incentive to resist participatory schemes (as David Schweickart notes, such resistance, "often bordering on sabotage, is well known and widely documented" [Op. Cit., p. 229]). As an example of this David Noble discusses a scheme run by General Electric in the late 1960s:

“After considerable conflict, GE introduced a quality of work life program ... which gave workers much more control over the machines and the production process and eliminated foremen. Before long, by all indicators, the program was succeeding — machine use, output and..." [Paul B. Lumberg, quoted by Herbert Gintis, “The nature of Labour Exchange and the Theory of Capitalist Production”, Radical Political Economy, vol. 1, Samuel Bowles and Richard Edwards (eds.), p. 252] In spite of these findings, a “shift toward participatory relationships is scarcely apparent in capitalist production” and this is “not compatible with the neo-classical assertion as to the efficiency of the internal organisation of capitalist production.” [Gintz, Op. Cit., p. 252] Economist William Lazonick indicates the reason when he writes that “[m]any attempts at job enrichment and job enlargement in the first half of the 1970s resulted in the supply of more and better effort by workers. Yet many ‘successful’ experiments were cut short when the workers whose work had been enriched and enlarged began questioning traditional management prerogatives inherent in the existing hierarchical structure of the enterprise.” [Competitive Advantage on the Shop Floor, p. 282]

This is an important result, as it indicates that the ruling sections within capitalist firms have a vested interest in not introducing such schemes, even though they are more efficient methods of production. As can easily be imagined, managers have a clear incentive to resist participatory schemes (as David Schweickart notes, such resistance, "often bordering on sabotage, is well known and widely documented" [Op. Cit., p. 229]). As an example of this David Noble discusses a scheme run by General Electric in the late 1960s:

“After considerable conflict, GE introduced a quality of work life program ... which gave workers much more control over the machines and the production process and eliminated foremen. Before long, by all indicators, the program was succeeding — machine use, output and..." [Paul B. Cit., p. 252] Economist William Lazonick indicates the reason when he writes that “[m]any attempts at job enrichment and job enlargement in the first half of the 1970s resulted in the supply of more and better effort by workers. Yet many ‘successful’ experiments were cut short when the workers whose work had been enriched and enlarged began questioning traditional management prerogatives inherent in the existing hierarchical structure of the enterprise.” [Competitive Advantage on the Shop Floor, p. 282]
management incomes and their own directly and who, no doubt, are predisposed to see their elected managers as being workers like themselves and accountable to them. Such an egalitarian atmosphere will have a positive impact on production and efficiency as workers will see that the value they create is not being accumulated by others but distributed according to work actually done (and not control over power). In the Mondragon co-operatives, for example, the maximum pay differential is 9 to 1 (increased from 3 to 1 after much debate in a response to outside pressures from capitalist firms hiring away workers) while (in the USA) the average CEO is paid well over 100 times the average worker (up from 41 times in 1960).

Therefore, we see that co-operatives prove the advantages of (and the inter-relationship between) key anarchist principles such as liberty, equality, solidarity and self-management. Their application, whether all together or in part, has a positive impact on efficiency and work — and, as we will discuss in section J.5.12, the capitalist market actively blocks the spread of these more egalitarian and efficient productive techniques instead of encouraging them. Even by its own standards, capitalism stands condemned — it does not encourage the efficient use of resources and actively places barriers in their development.

From all this it is clear to see why co-operatives are supported by anarchists. We are “convinced that the co-operative could, potentially, replace capitalism and carries within it the seeds of economic emancipation ... The workers learn from this precious experience how to organise and themselves conduct the economy without guardian angels, the state or their former employers.” [Bakunin, Bakunin on Anarchism, p. 399] Co-operatives give us a useful insight into the possibilities of a free, socialist, economy. Even within the hierarchical capitalist economy, co-operatives show us that a better future is possible and that production can be organised in a co-operative fashion and that by so doing we can reap the individual and social benefits of working together as equals.

Capitalist introduced and supported “workers’ control” is very like the situation when a worker receives stock in the company they work for. If it goes a little way toward redressing the gap between the value produced by that person’s labour and the wage they receive for it, that in itself cannot be a totally bad thing (although this does not address the issue of workplace hierarchy and its social relations). The real downside of this is the “carrot on a stick” enticement to work harder — if you work extra hard for the company, your stock will be worth more. Obviously, though, the bosses get rich off you, so the more you work, the richer they get, the more you are getting ripped off. It is a choice that anarchists feel many workers cannot afford to make — they need or at least want the money — but we believe that it does not work as workers simply end up working harder, for less. After all, stocks do not represent all profits (large amounts of which end up in the hands of top management) nor are they divided just among those who labour. Moreover, workers may be less inclined to take direct action, for fear that they will damage the value of “their” company’s stock, and so they may find themselves putting up with longer, more intense work in worse conditions.

Be that as it may, the results of such capitalist experiments in “workers’ control” are interesting and show why self-management will not spread by market forces. According to one expert: “There
David Noble provides a good summary of the problems associated with experiments in workers’ self-management within capitalist firms:

“Participation in such programs can indeed be a liberating and exhilarating experience, awakening people to their own untapped potential and also to the real possibilities of collective worker control of production. As one manager described the former pilots [workers in a General Electric program]: ‘These people will never be the same again. They have seen that things can be different.’ But the excitement and enthusiasm engendered by such programs, as well as the heightened sense of commitment to a common purpose, can easily be used against the interests of the work force. First, that purpose is not really ‘common’ but is still determined by management alone, which continues to decide what will be produced, when, and where. Participation in production does not include participation in decisions on investment, which remains the prerogative of ownership. Thus participation is, in reality, just a variation of business as usual — taking orders — but one which encourages obedience in the name of co-operation.

“Second, participation programs can contribute to the creation of an elite, and reduced, work force, with special privileges and more ‘co-operative’ attitudes toward management — thus at once undermining the adversary stance of unions and reducing membership ...

“Third, such programs enable management to learn from workers — who are now encouraged by their co-operative spirit to share what they know — and, then, in Taylorist tradition, to use this knowledge against the workers. As one former pilot reflected, ‘They learned from the guys on

However, this does not mean that all aspects of the co-operative movement find favour with anarchists. As Bakunin pointed out, “there are two kinds of co-operative: bourgeois co-operation, which tends to create a privileged class, a sort of new collective bourgeois organised into a stockholding society: and truly Socialist co-operation, the co-operation of the future which for this very reason is virtually impossible of realisation at present.” [Op. Cit., p. 385] In other words, while co-operatives are the germ of the future, in the present they are often limited by the capitalist environment they find themselves, narrow their vision to just surviving within the current system and so adapt to it.

For most anarchists, the experience of co-operatives has proven without doubt that, however excellent in principle and useful in practice, if they are kept within capitalism they cannot become the dominant mode of production and free the masses (see section J.5.11). In order to fully develop, co-operatives must be part of a wider social movement which includes community and industrial unionism and the creation of an anarchistic social framework which can encourage “truly Socialist co-operation” and discourage “bourgeois co-operation.” As Murray Bookchin correctly argued: “Removed from a libertarian municipalist [or other anarchist] context and movement focused on achieving revolutionary municipalist goals as a dual power against corporations and the state, food [and other forms of] co-ops are little more than benign enterprises that capitalism and the state can easily tolerate with no fear of challenge.” [Democracy and Nature, no. 9, p. 175]

So while co-operatives are an important aspect of anarchist ideas and practice, they are not the be all or end all of our activity. Without a wider social movement which creates all (or at least most) of the future society in the shell of the old, co-operatives will never arrest the growth of capitalism or transcend the narrow horizons of the capitalist economy.
J.5.11 If workers really want self-management then why are there so few co-operatives?

Supporters of capitalism suggest that producer co-operatives would spring up spontaneously if workers really wanted them. To quote leading propertarian Robert Nozick, under capitalism “it is open to any wealthy radical or group of workers to buy an existing factory or establish a new one, and to … institute worker-controlled, democratically-run firms.” If “they are superior, by market standards, to their more orthodox competitors” then “there should be little difficulty in establishing successful factories of this sort.” Thus there is “a means of realising the worker-control scheme that can be brought about by the voluntary actions of people in a free [sic!] society.” [Anarchy, State, and Utopia, pp. 250–2] So if such co-operatives were really economically viable and desired by workers, they would spread until eventually they undermined capitalism. Propertarians conclude that since this is not happening, it must be because workers’ self-management is either economically inefficient or is not really attractive to workers, or both.

David Schweickart has decisively answered this argument by showing that the reason there are not more producer co-operatives is structural:

“A worker-managed firm lacks an expansionary dynamic. When a capitalist enterprise is successful, the owner can increase her profits by reproducing her organisation on a larger scale. She lacks neither the means nor the motivation to expand. Not so with a worker-managed firm. Even if the workers have the means, they lack the incentive, because enterprise growth would bring in new workers with whom the increased proceeds would have to be shared. Co-operatives, even when prosperous, do not spontaneously grow. But if this is so,
the environment and breaking the path-dependency which stops economic liberty from flowering to its full potential.

J.5.12 If self-management were more efficient then surely the market would force capitalists to introduce it?

Some supporters of capitalism argue that if self-management really were more efficient than hierarchy, then capitalists would be forced to introduce it by the market. As propertarian Robert Nozick argued, if workers’ control meant that “the productivity of the workers in a factory rises ... then the individual owners pursuing profits will reorganise the productive process. If the productivity of workers remains the same ... then in the process of competing for labourers firms will alter their internal work organisation.” This meant that “individual owners pursuing profits ... will reorganise the productive process.” [Anarchy, State, and Utopia, p. 248] As this has not happened then self-management cannot be more efficient.

While such a notion seems plausible in theory, in practice it is flawed as “there is a vast quantity of empirical evidence demonstrating that participatory workplaces tend to be places of higher morale and greater productivity than authoritarian workplaces.” [David Schweickart, Against Capitalism, p. 228] So Nozick’s thought experiment is contradicted by reality. Capitalism places innumerable barriers to the spread of worker empowering structures within production, in spite (perhaps, as we will see, because) of their (well-documented) higher efficiency and productivity. This can be seen from the fact that while the increased efficiency associated with workers’ participation and self-management has attracted the attention of many capitalist firms, the few experiments conducted have failed to spread even though they were extremely successful. This is due to the nature of capitalist production and the social relationships it produces.

This means that in, say, a mutualist economy there would be more firms of a smaller size supplying a given market compared to capitalism. So a free economy, with the appropriate institutional framework, need not worry about unemployment for while individual co-operatives may not expand as fast as capitalist firms, more co-operatives would be set up (see section I.3.1 for why the neo-classical analysis of co-operatives which Nozick implicitly invokes is false). In short, the environment within which a specific workplace operates is just as important as its efficiency.

This is important, as the empirical evidence is strong that self-management is more efficient than wage-slavery. As economist Geoffrey M. Hodgson summarises, support for “the proposition that participatory and co-operatives firms enjoy greater productivity and longevity comes from a large amount of ... case study and econometric evidence” and “the weight of testimony” is “in favour or [indicates] a positive correlation between participation and productivity.” [“Organizational Form and Economic Evolution: A critique of the Williamsonian hypothesis”, pp. 98–115, Democracy and Efficiency in Economic Enterprises, U. Pagano and R. E. Rowthorn (eds.), p. 100] This is ignored by the likes of Nozick in favour of thought-experiments rooted in the dubious assumptions of bourgeois economics. He implicitly assumed that because most firms are hierarchical today then they must be more efficient. In short, Nozick abused economic selection arguments by simply assuming,
without evidence, that the dominant form of organisation is, *ipso facto*, more efficient. In reality, this is not the case.

The question now becomes one of explaining why, if co-operation is more efficient than wage-slavery, does economic liberty not displace capitalism? The awkward fact is that individual efficiency is not the key to survival as such an argument “ignores the important point that the selection of the ‘fitter’ in evolution is not simply relative to the less successful but is dependent upon the general circumstances and environment in which selection takes place.” Moreover, an organism survives because it birth rate exceeds its death rate. If more capitalist firms secure funding from capitalist banks then, obviously, it is more likely for them to secure dominance in the economy simply because there are more of them rather than because they are more efficient. As such, large numbers do not imply greater efficiency as the “rapid flow of new entrants of hierarchical form” may “swamp the less hierarchical firms even if other selection processes are working in favour of the latter.” [Hodgson, *Op. Cit.*, p. 100 and p. 103] Thus:

> “The degree of fitness of any organism can only be meaningfully considered in relation to its environment ... the market may help to select firms that are fit for the market, but these surviving firms needn’t be the most ‘efficient’ in some absolute sense. In fact, the specification of ‘the market’ as a selection process is incomplete because the market is only one institution of many needed to specify an environment.” [Michael J. Everett and Alanson P. Minkler, “Evolution and organisational choice in nineteenth-century Britain”, pp. 51–62, *Cambridge Journal of Economics* vol. 17, No. 1, p. 53]

As an obvious example there are the difficulties co-operatives can face in finding access to credit facilities required by them from capitalist banks and investors. As Tom Cahill notes, co-operatives

> justice without too many great upheavals.” [The Basic Bakunin, p. 153]

Until then, co-operatives will exist within capitalism but not replace it by market forces — only a social movement and collective action can fully secure their full development. This means that while anarchists support, create and encourage co-operatives within capitalism, we understand “the impossibility of putting into practice the co-operative system under the existing conditions of the predominance of bourgeois capital in the process of production and distribution of wealth.” Because of this, most anarchists stress the need for more combative organisations such as industrial and community unions and other bodies “formed,” to use Bakunin’s words, “for the organisation of toilers against the privileged world” in order to help bring about a free society. [The Political Philosophy of Bakunin, p. 385]

Finally, we must note an irony with Nozick’s argument, namely the notion that capitalism (his “free society”) allows a “voluntary” path to economic liberty. The irony is two-fold. First, the creation of capitalism was the result of state action (see section F.8). While working class people are expected to play by the rules decreed by capitalism, capitalists have never felt the urge to do so. It is this state coercion which helped create the path-dependency which stops “the market” selecting more efficient and productive ways of production. Secondly, Nozick’s own theory of (property) rights denies that stolen wealth can be legitimately transferred. In other words, expecting workers to meekly accept previous coercion by seeking investors to fund their attempts at economic liberty, as Nozick did, is implicitly accepting that theft is property. While such intellectual incoherence is to be expected from defenders of capitalism, it does mean that propertarians really have no ground to oppose working class people following the advice of libertarians and expropriating their workplaces. In other words, transforming
rise in the size of wage labour being used and the fact that the credit union has, since 1992, invested in non-co-operative firms). These externalities imposed upon isolated co-operatives within capitalism (which would not arise within a fully co-operative context) block local moves towards anarchism. The idea that co-operation will simply win out in competition within well developed capitalist economic systems is just wishful thinking. Just because a system is more liberatory, just and efficient does not mean it will survive or prosper in an authoritarian economic and social environment.

So both theory and history suggests that isolated co-operatives will more likely adapt to capitalist realities than remain completely true to their co-operative promise. For most anarchists, therefore, co-operatives can reach their full potential only as part of a social movement aiming to change society. Only as part of a wider movement of community and workplace unionism, with mutual-ist banks to provide long terms financial support and commitment, can co-operatives be communalised into a network of solidarity and support that will reduce the problems of isolation and adaptation. Hence Bakunin:

“We want co-operation too ... But at the same time, we know that it prosper, developing itself fully and freely, embracing all human industry, only when it is based on equality, when all capital and every instrument of labour, including the soil, belong to the people by right of collective property ... Once this is acknowledged we hardly oppose the creation of co-operative associations; we find them necessary in many respects ... they accustom the workers to organise, pursue, and manage their interests themselves, without interference either by bourgeois capital or by bourgeois control ... [they must be] founded on the principle of solidarity and collectivity rather than on bourgeois exclusivity, then society will pass from its present situation to one of equality and

in the nineteenth century “had the specific problem of... giving credit” while “competition with price cutting capitalist firms... highlighting the inadequate reservoirs of the under-financed co-ops.” [“Co-operatives and Anarchism: A contemporary Perspective”, pp 235–58, For Anarchism, Paul Goodway (ed.), p. 239] This points to a general issue, namely that there are often difficulties for co-operatives in raising money:

“Co-operatives in a capitalist environment are likely to have more difficulty in raising capital. Quite apart from ideological hostility (which may be significant), external investors will be reluctant to put their money into concerns over which they will have little or no control – which tends to be the case with a co-operative. Because co-operatives in a capitalist environment face special difficulties, and because they lack the inherent expansionary dynamic of a capitalist firm, it is hardly surprising that they are far from dominant.” [Schweickart, Op. Cit., p 240]

In addition, the “return on capital is limited” in co-operatives. [Tom Cahill, Op. Cit., p. 247] This means that investors are less-likely to invest in co-operatives, and so co-operatives will tend to suffer from a lack of investment. So despite “the potential efficiency of such [self-managed] workplaces”, capitalism “may be systematically biased against participatory workplaces” and as “a result the economy can be trapped in a socially suboptimal position.” Capital market issues, amongst others, help explain this as such firms “face higher transaction costs for raising equity and loans.” [David I. Levine and Laura D’Andrea Tyson, “Participation, Productivity, and the Firm’s Environment”, pp. 183–237, Paying for Productivity, Alan S. Blinder (ed.), pp. 235–6 and p. 221]

Tom Cahill outlines the investment problem when he writes that the “financial problem” is a major reason why co-operatives
failed in the past, for “basically the unusual structure and aims of co-operatives have always caused problems for the dominant sources of capital. In general, the finance environment has been hostile to the emergence of the co-operative spirit.” He also notes that they were “unable to devise structuring to maintain a boundary between those who work and those who own or control ... It is understood that when outside investors were allowed to have power within the co-op structure, co-ops lost their distinctive qualities.” [Op. Cit., pp. 238–239] So even if co-operative do attract investors, the cost of so doing may be to transform the co-operatives into capitalist firms. So while all investors experience risk, this “is even more acute” in co-operatives “because investors must simultaneously cede control and risk their entire wealth. Under an unlimited liability rule, investors will rationally demand some control over the firm’s operations to protect their wealth. Since [co-operatives] cannot cede control without violating one of the organisation’s defining tenets, investors will demand an investment premium, a premium not required from equity investments.” [Everett and Minkler, Op. Cit., p. 52] Needless to say, such a premium is a strain on a co-operative and makes it harder to survive simply because it has higher costs for debt repayment. If such external investment is not forthcoming, then the co-operative is dependent on retained earnings and its members’ savings which, unsurprisingly, are often insufficient.

All of which suggests that Nozick’s assertion that “don’t say that its against the class interest of investors to support the growth of some enterprise that if successful would end or diminish the investment system. Investors are not so altruistic. They act in personal and not their class interests” is false. [Op. Cit., pp. 252–3] Nozick is correct, to a degree, but he forgets that class interest is a fusion of individual interests. Given a choice between returns from investments in capitalist firms because a management elite has similar interests in maximising unpaid labour and workers in a co-operative which controls any surplus, the investor will select the competitive selection depends on the economic context, and while the institutional context of a capitalist system may be more conducive for the capitalist firm, a different context may favour the co-operative firm.” [Economics and Utopia, p. 288]

As discussed in section I.3.5, Proudhon was well aware that for mutualism to prosper and survive an appropriate institutional framework was required (the “agro-industrial federation” and mutual banking). So an organisation’s survival also depends on the co-evolution of supporting informal constraints. If a co-operative is isolated within a capitalist economy, without co-operative institutions around it, it comes as no great surprise to discover that they find it difficult to survive never mind displace its (usually larger and well-established) capitalist competitors.

Yet in spite of these structural problems and the impact of previous state interventions, co-operatives do exist under capitalism but just because they can survive in such a harsh environment it does not automatically mean that they shall replace that economy. Co-operatives face pressures to adjust to the dominant mode of production. The presence of wage labour and investment capital in the wider economy will tempt successful co-operatives to hire workers or issue shares to attract new investment. In so doing, however, they may end up losing their identities as co-operatives by diluting ownership (and so re-introducing exploitation by having to pay non-workers interest) or by making the co-operative someone’s boss (which creates “a new class of workers who exploit and profit from the labour of their employees. And all this fosters a bourgeois mentality.” [Bakunin, Bakunin on Anarchism, p. 399]).

Hence the pressures of working in a capitalist market may result in co-operatives pursuing activities which may result in short term gain or survival, but are sure to result in harm in the long run. Far from co-operatives slowly expanding within and changing a capitalist environment it is more likely that capitalist logic will expand into and change the co-operatives that work in it (this can be seen from the Mondragon co-operatives, where there has been a slight
However, “there are several good reasons why more efficient firms need not always be selected in a competitive and ‘evolutionary’ process.” [Hodgson, Op. Cit., p. 99] So it is not efficiency as such which explains the domination of capitalist firms for “empirical studies suggest that co-operatives are at least as productive as their capitalist counterparts,” with many having “an excellent record, superior to conventionally organised firms over a long period.” [Jon Elster, Op. Cit., p. 96] So all things being equal, co-operatives are more efficient than their capitalist counterparts — but when co-operatives compete in a capitalist economy, all things are not equal. As David Schweickart argues:

“Even if worker-managed firms are preferred by the vast majority, and even if they are more productive, a market initially dominated by capitalist firms may not select for them. The common-sense neo-classical dictum that only those things that best accord with people’s desires will survive the struggle of free competition has never been the whole truth with respect to anything; with respect to workplace organisation it is barely a half-truth.” [Op. Cit., p. 240]

It is illuminating, though, to consider why Nozick ignored the substantial empirical evidence that participation is more efficient than hierarchy and, as a result, why “market criteria” does not result in the more productive and efficient co-operative production displacing the authoritarian workplace. Far better, it must be supposed, to just assume that the dominant form of workplace is more “efficient” and implicitly invoke a quasi-Darwinian individualistic selection mechanism in an ahistorical and institution-less framework. So people like Nozick who suggest that because worker co-operatives are few in number that means they are forced out by competition because they are inefficient miss the point. A key reason for this lack of co-operative firms, argues Hodgson, “is that former. Moreover, lack of control by investors plays its role as they cannot simply replace the management in a co-operative — that power lies in the hands of the workforce. The higher premiums required by investors to forsake such privileges place a burden on the co-operative, so reducing their likelihood of getting funds in the first place or surviving and, needless to say, increasing the risk that investors face. Thus the personal and class interest of investors merge, with the personal desire to make money ensuring that the class position of the individual is secured. This does not reflect the productivity or efficiency of the investment — quite the reverse! — it reflects the social function of wage labour in maximising profits and returns on capital (see next section for more on this). In other words, the personal interests of investors will generally support their class interests (unsurprisingly, as class interests are not independent of personal interests and will tend to reflect them!).

There are other structural problems as well. Co-operatives face the negative externalities generated by the capitalist economy they operate within. For one thing, since their pay levels are set by members’ democratic vote, co-operatives tend to be more egalitarian in their income structure. This means that in a capitalist environment, co-operatives are in constant danger of having their most skilled members hired away by capitalist firms who can, due to their resources, out-bid the co-operative. While this may result in exploitation of the worker, the capitalist firm has the resources to pay higher wages and so it makes sense for them to leave (“As to the employer who pays an engineer twenty times more than a labourer, it is simply due to personal interest; if the engineer can economise $4000 a year on the cost of production; the employer pays him $800 ... He parts with an extra $40 when he expects to gain $400 by it; and this is the essence of the Capitalist system.” [Kropotkin, The Conquest of Bread, p. 165]). However, in a co-operative system there would not be the inequalities of economic wealth (created by capi-
alist firms and finance structures) which allows such poaching to happen.

There are cultural issues as well. As Jon Elster points out, it is a “truism, but an important one, that workers’ preferences are to a large extent shaped by their economic environment. Specifically, there is a tendency to adaptive preference formation, by which the actual mode of economic organisation comes to be perceived as superior to all others.” ["From Here to There", pp. 93–111, Socialism, Paul, Miller Jr., Paul, and Greenberg (eds.), p. 110] In other words, people view “what is” as given and feel no urge to change to “what could be.” In the context of creating alternatives within capitalism, this can have serious effects on the spread of alternatives and indicates the importance of anarchists encouraging the spirit of revolt to break down this mental apathy.

This acceptance of “what is” can be seen, to some degree, by some companies which meet the formal conditions for co-operatives, for example ESOP owned firms in the USA, but lack effective workers’ control. ESOP (Employee Stock Ownership Plans) enable a firm’s workforce to gain the majority of a company’s shares but the unequal distribution of shares amongst employees prevents the great majority of workers from having any effective control or influence on decisions. Unlike real co-operatives (based on “one worker, one vote”) these firms are based on “one share, one vote” and so have more in common with capitalist firms than co-operatives.

Finally, there is the question of history, of path dependency. Evolutionary systems are path dependent, with historical events pushing development in specific directions. Thus, if there were barriers against or encouragement for certain forms of organisational structure in the past then the legacy of this will continue to dominate due to the weight of history rather than automatically being replaced by new, more efficient, forms.

This can be seen from co-operatives, as “labour managed firms were originally at a substantial disadvantage compared to their capitalist counterparts” as the law “imposed additional risks and costs” on them while “early financial instruments were ill-suited to the establishment and continuation of worker co-operatives. The subsequent coevolution of firms and supporting institutions involved a path-dependent process where labour-managed firms were at a continual disadvantage, even after many of the earlier impediments were removed.” [Hodgson, Op. Cit., p. 103] “Historically,” argue Everett and Minkler “both company and co-operative law were incompatible with democratic decision-making by workers.” The law ensured that the “burden was more costly” to labour-managed firms and these “obstacles led to an environment dominated by investor-controlled firms (capitalist firms) in which informal constraints (behaviours and routines) emerged to reinforce the existing institutions. A path-dependent process incorporating these informal constraints continued to exclude [their] widespread formation.” When the formal constraints which prevented the formation of co-operatives were finally removed, the “informal constraints” produced as a result of these “continued to prevent the widespread formation” of co-operatives. So the lack of co-operatives “can thus be explained quite independently of any of the usual efficiency criteria.” [Op. Cit., p. 58 and p. 60] Nor should we forget that the early industrial system was influenced by the state, particularly by rewarding war related contracts to hierarchical firms modelled on the military and that the state rewarded contracts to run various state services and industries to capitalist firms rather than, as Proudhon urged, to workers associations.
that anarchists must especially devote their attention.” Unless people think and act for themselves, no social revolution is possible and anarchy will remain just an opposition tendency within authoritarian societies. Practically, this means the encouragement of self-management and direct action. Anarchists thus “push the people to expropriate the bosses and put all goods in common and organise their daily lives themselves, through freely constituted associations, without waiting for orders from outside and refusing to nominate or recognise any government or constituted body in whatever guise … even in a provisional capacity, which ascribes to itself the right to lay down the law and impose with force its will on others.” [Malatesta, Errico Malatesta: His Life and Ideas, pp. 160–1 and p. 197]

This is because, to quote Bakunin, anarchists do “not accept, even in the process of revolutionary transition, either constituent assemblies, provisional governments or so-called revolutionary dictatorships; because we are convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.” [Michael Bakunin: Selected Writings, p. 237]

The history of every revolution confirms Kropotkin (who echoed Proudhon) that “revolutionary government” is a contradiction in terms. Government bodies mean “the transferring of initiative from the armed workers to a central body with executive powers. By removing the initiative from the workers, the responsibility for the conduct of the struggle and its objectives [are] also transferred to a governing hierarchy, and this could have no other than an adverse effect on the morale of the revolutionary fighters.” [Richards, Op. Cit., pp. 42–3]

Such a centralisation of power means the suppression of local initiatives, the replacing of self-management with bureaucracy and the creation of a new, exploitative and oppressive class of officials and party hacks. Only when power rests in the hands of everyone can a social revolution exist and a free society created. If this is not done, if the state replaces the self-managed associations of a free people, all that happens is the replacement of one class system by another.

J.5.16 Are there any historical examples of collective self-help?

Yes, in all societies we see working class people joining together to practice mutual aid and solidarity. This takes many forms, such as trade and industrial unions, credit unions and friendly societies, co-operatives and so on, but the natural response of working class people to the injustices of capitalism was to practice collective “self-help” in order to improve their lives and protect their friends, communities and fellow workers.

There are, as Colin Ward stresses, “in fact several quite separate traditions of social welfare: the product of totally different attitudes to social needs … One of these traditions is that of a service given grudgingly and punitively by authority, another is the expression of social responsibility, or of mutual aid and self-help. One is embodied in institutions, the other in associations.” [Anarchy in Action, p. 112] Anarchists, needless to say, favour the latter. Unfortunately, this “great tradition of working class self-help and mutual aid was written off, not just as irrelevant, but as an actual impediment, by the political and professional architects of the welfare state … The contribution that the recipients had to make to all this theoretical bounty was ignored as a mere embarrassment — apart, of course, for paying for it … The socialist ideal was rewritten as a world in which everyone was entitled to everything, but where nobody except the providers had any actual say about anything. We have been learning for years, in the anti-welfare backlash, what a vulnerable utopia

...
that was.” This self-managed working class self-help was the “welfare road we failed to take.” [Ward, Social Policy: an anarchist response, p. 11–2 and p. 9]

Anarchists would argue that self-help is the natural side effect of freedom. There is no possibility of radical social change unless people are free to decide for themselves what their problems are, where their interests lie and are free to organise for themselves what they want to do about them. Self-help is a natural expression of people taking control of their own lives and acting for themselves. Anyone who urges state action on behalf of people is no socialist and any one arguing against self-help as “bourgeois” is no anti-capitalist. It is somewhat ironic that it is the right who have monopolised the rhetoric of “self-help” and turned it into yet another ideological weapon against working class direct action and self-liberation (although, saying that, the right generally likes individualised self-help — given a strike, squatting or any other form of collective self-help movement they will be the first to denounce it):

“The political Left has, over the years, committed an enormous psychological error in allowing this kind of language [“self-help”, “mutual aid”, “standing on your own two feet” and so on] to be appropriated by the political Right. If you look at the exhibitions of trade union banners from the last century, you will see slogans like Self Help embroidered all over them. It was those clever Fabians and academic Marxists who ridiculed out of existence the values by which ordinary citizens govern their own lives in favour of bureaucratic paternalising, leaving those values around to be picked up by their political opponents.” [Ward, Talking Houses, p. 58]

We cannot be expected to provide an extensive list of working class collective self-help and social welfare activity here, all we can
man acquires power over his own life and in which he not only ‘discovers’ himself, but, more meaningfully, formulates his selfhood in all its social dimensions.’ [Bookchin, Op. Cit., p. 104]

J.7.5 What is the role of anarchists in a social revolution?

All the great social revolutions have been spontaneous. Indeed, it is cliché that the revolutionaries are usually the most surprised when a revolution breaks out. Nor do anarchists assume that a revolution will initially be totally libertarian in nature. All we assume is that there will be libertarian tendencies which anarchists work within to try and strengthen. Therefore the role of anarchists and anarchist organisations is to push a revolution towards a social revolution by encouraging the tendencies we discussed in the last section and by arguing for anarchist ideas and solutions. In the words of Vernon Richards:

“We do not for one moment assume that all social revolutions are necessarily anarchist. But whatever form the revolution against authority takes, the role of anarchists is clear: that of inciting the people to abolish capitalistic property and the institutions through which it exercises its power for the exploitation of the majority by a minority.” [Lessons of the Spanish Revolution, p. 44]

For anarchists, our role in a social revolution is clear — we try to spread anarchist ideas and encourage autonomous organisation and activity by the oppressed. For example, during the Russian Revolution anarchists and anarcho-syndicalists played a key role in the factory committee movement for workers’ self-management. They combated Bolshevik attempts to substitute state control for workers’ self-management and encouraged workplace occupations and
Dolgoff, like all anarchists, urged workers to “finance the establishment of independent co-operative societies of all types, which will respond adequately to their needs” and that such a movement “could constitute a realistic alternative to the horrendous abuses of the ‘establishment’ at a fraction of the cost.” [Op. Cit., p. 74 and pp. 74–75] In this way a network of self-managed, communal, welfare associations and co-operatives could be built — paid for, run by and run for working class people. Such a system “would not ... become a plaything of central government financial policy.” [Ward, Op. Cit., p. 16] Such a network could be initially build upon, and be an aspect of, the struggles of both workers in and claimants, patients, tenants, and other users of the current welfare state. So a “multiplicity of mutual aid organisations amongst claimants, patients, victims, represents the most potent lever for change in transforming the welfare state into a genuine welfare society, in turning community care into a caring community.” [Ward, Anarchy in Action, p. 125]

The creation of such a co-operative, community-based, welfare system will not occur over night, nor will it be easy. But it is possible, as history shows. It will, of course, have its problems, but as Colin Ward notes, “the standard argument against a localist and decentralised point of view, is that of universalism: an equal service to all citizens, which it is thought that central control achieves. The short answer to this is that it doesn’t!” [Colin Ward, Social Policy, p. 16] He notes that richer areas generally get a better service from the welfare state than poorer ones, thus violating the claims of equal service. A centralised system (be it state or private) will most likely allocate resources which reflect the interests and (lack issues, interests and needs. Social life will become transformed, as will many aspects of personal life and personal relationships. We cannot say in which way, bar there will be a general libertarian movement in all aspects of life as women resist and overcome sexism, gays resist and end homophobia, the young will expect to be treated as individuals, not property, and so on.

Society will become more diverse, open, free and libertarian in nature. And, hopefully, it and the struggle that creates it will be fun — anarchism is about making life worth living and so any struggle must reflect that. The use of fun in the struggle is important. There is no incongruity in conducting serious business and having fun. We are sure that this will piss off the “serious” Left no end. The aim of revolution is to emancipate individuals not abstractions like “the proletariat,” “society,” “history” and so on. Having fun is part and parcel of that liberation. As Emma Goldman argued (and was paraphrased in the 1970s to “If I cannot dance, it is not my revolution!”), anarchism stands for “release and freedom from conventions and prejudice” and so she could “not believe” that it “should demand the denial of life and joy” (“If it meant that, I did not want it”): “I want freedom, the right to self-expression, everybody’s right to beautiful, radiant things.” [Living My Life, vol. 1, p. 56] As Bookchin suggested: “Can we resolve the anarchic, intoxicating phase that opens all the great revolutions of history merely into an expression of class interest and the opportunity to redistribute social wealth?” [Bookchin, Op. Cit., p. 189f]

Therefore a social revolution involves a transformation of society from the bottom up by the creative action of working class people. This transformation would be conducted through self-managed organisations which will be the basis for abolishing hierarchy, state and capitalism: “There can be no separation of the revolutionary process from the revolutionary goal. A society based on self-administration must be achieved by means of self-administration ... If we define ‘power’ as the power of man over man, power can only be destroyed by the very process in which
of struggle against existing society ... The future assemblies of people in the block, the neighbourhood or the district — the revolutionary sections to come — will stand on a higher social level than all the present-day committees, syndicates, parties and clubs adorned by the most resounding 'revolutionary' titles. They will be the living nuclei of utopia in the decomposing body of bourgeois society ... The specific gravity of society ... must be shifted to its base — the armed people in permanent assembly.” [Murray Bookchin, Post-Scarcity Anarchism, pp. 104–5]

Such organisations are required because “freedom has its forms ... a liberatory revolution always poses the question of what social forms will replace existing ones. At one point or another, a revolutionary people must deal with how it will manage the land and the factories from which it requires the means of life. It must deal with the manner in which it will arrive at decisions that affect the community as a whole. Thus if revolutionary thought is to be taken at all seriously, it must speak directly to the problems and forms of social management.” [Bookchin, Op. Cit., p. 86] If this is not done, capitalism and the state will not be destroyed and the social revolution will fail. Only by destroying hierarchical power, by abolishing state and capitalism by self-managed organisations, can individuals free themselves and society.

As well as these economic and political changes, there would be other changes as well — far too many to chronicle here. For example: “We will see to it that all empty and under-occupied houses are used so that no one will be without a roof over his [or her] head. We will hasten to abolish banks and title deeds and all that represents and guarantees the power of the State and capitalist privilege. And we will try to reorganise things in such a way that it will be impossible for bourgeois society to be reconstituted.” [Malatesta, Op. Cit., p. 165] Similarly, free associations will spring up on a whole range of
one is subject to the requirements of politics and the other places profits before people. As we have discussed the welfare state in the last section, it is worthwhile to quickly discuss privatised welfare and why anarchists reject this option even more than state welfare.

Firstly, all forms of private healthcare/welfare have to pay dividends to capitalists, fund advertising, reduce costs to maximise profits by standardising the “caring” process — i.e. McDonaldisation — and so on, all of which inflates prices and produces substandard service across the industry as a whole. According to Alfie Kohn, “[m]ore hospitals and clinics are being run by for-profit corporations; many institutions, forced to battle for ‘customers,’ seem to value a skilled director of marketing more highly than a skilled caregiver. As in any other economic sector, the race for profits translates into pressure to reduce costs, and the easiest way to do it here is to cut back on services to unprofitable patients, that is, those who are more sick than rich … The result: hospital costs are actually higher in areas where there is more competition for patients.” [No Contest, p. 240] In the UK, attempts to introduce “market forces” into the National Health Service has also lead to increased costs as well as inflating the size and cost of its bureaucracy.

Looking at Chile, hyped by those who desire to privatise Social Security, we find similar disappointing results (well, disappointing for the working class at least, as we will see). Seemingly, Chile’s private system has achieved impressive average returns on investment. However, once commissions are factored in, the real return for individual workers is considerably lower. For example, although the average rate of return on funds from 1982 through 1986 was 15.9 percent, the real return after commissions was a mere 0.3 percent! Between 1991 and 1995, the pre-commission return was 12.9 percent, but with commissions it fell to 2.1 percent. According to Doug Henwood, the “competing mutual funds have vast sales forces, and the portfolio managers all have their vast fees. All in all, administrative costs … are almost 30% of revenues, compared to well under 1% for the U.S. Social Security system.” [Wall Street, p.

Thus we have a dual framework of revolution, the federation of insurgent associations, communes and provinces in the name of the same principles and to organise a revolutionary force capable of defeating reaction … it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution … There can no longer be any successful revolution unless the political revolution is transformed into social revolution … Since revolution everywhere must be created by the people, and supreme control must always belong to the people organised in a free federation of agricultural and industrial associations … organised from the bottom upwards by means of revolutionary delegation.” [Michael Bakunin: Selected Writings, pp. 170–2]
and government finally eliminated in favour of freedom (both individual and collective).

Ultimately, anarchism means creating positive alternatives to those existing institutions which provide some useful function. For example, we propose self-management as an alternative to capitalist production. We propose self-governing communes to organise social life instead of the state. “One only destroys, and effectively and permanently,” argued Malatesta, “that which one replaces by something else; and to put off to a later date the solution of problems which present themselves with the urgency of necessity, would be to give time to the institutions one is intending to abolish to recover from the shock and reassert themselves, perhaps under other names, but certainly with the same structure.” [Op. Cit., p. 159] This was the failure of the Spanish Revolution, which ignored the state rather than abolish it via new, self-managed organisations (see section I.8.13). It must be stressed that this was not due to anarchist theory (see section I.8.11).

Hence a social revolution would see the “[o]rganisation of social life by means of free association and federations of producers and consumers, created and modified according to the wishes of their members, guided by science and experience, and free from any kind of imposition which does not spring from natural needs, to which everyone, convinced by a feeling of overriding necessity, voluntarily submits.” [Malatesta, Op. Cit., p. 184] A revolution organises itself from the bottom up, in a self-managed way. As Bakunin summarised:

> “the federative Alliance of all working men’s associations ... will constitute the Commune ... The Commune will be organised by the standing federation of the Barriques and by the creation of a Revolutionary Communal Council composed of one or two delegates from each barricade ... vested with plenary but accountable and removable mandates ... all provinces, communes and associations ... reorganising on revolutionary lines ... [would

In addition, the private pension fund market is dominated by a handful of companies.

Even if commission costs were lowered (by regulation), the impressive returns on capital seen between 1982 and 1995 (when the real annual return on investment averaged 12.7 percent) are likely not to be sustained. These average returns coincided with boom years in Chile, complemented by government’s high borrowing costs. Because of the debt crisis of the 1980s, Latin governments were paying double-digit real interest rates on their bonds — the main investment vehicle of social security funds. In effect, government was subsidising the “private” system by paying astronomical rates on government bonds. Another failing of the system is that only a little over half of Chilean workers make regular social security contributions. While many believe that a private system would reduce evasion because workers have a greater incentive to contribute to their own personal retirement accounts, 43.4 percent of those affiliated with the new system in June of 1995 did not contribute regularly. [Stephen J. Kay, “The Chile Con: Privatizing Social Security in South America,” The American Prospect no. 33, pp. 48–52] All in all, privatisation seems to be beneficial only to middle-men and capitalists, if Chile is anything to go by. As Henwood argues, while the “infusion of money” resulting from privatising social security “has done wonders for the Chilean stock market” “projections are that as many as half of future retirees will draw a poverty-level pension.” [Henwood, Op. Cit., pp. 304–5]

Suffice to say, all you really need to know about privatisation of pensions and healthcare in Chile is that the military dictatorship which imposed it excluded the military from its dubious benefits. Such altruism is truly touching.

So, anarchists reject private welfare as a con (and an even bigger one than state welfare). As Colin Ward suggests, it “is the question of how we get back on the mutual aid road instead of commercial health insurance and private pension schemes.” [Social Policy, p. 17] As anarchists are both anti-state and anti-capitalist, swapping
private power for the state power is, at best, a step sideways. Usually, it is worse for capitalist companies are accountable only to their owners and the profit criteria. This means, as Chomsky suggests, “protecting the state sector today is a step towards abolishing the state because it maintains a public arena in which people can participate and organise, and affect policy, and so on, though in limited ways. If that’s removed, we’d go back to a ... private dictatorship, but that’s hardly a step towards liberation.” [Chomsky on Anarchism, p. 213] Instead anarchists try to create real alternatives to hierarchy, be it state or capitalist, in the here and now which reflect our ideas of a free and just society. For, when it boils down to it, freedom cannot be given, only taken and this process of self-liberation is reflected in the alternatives we build to help win the class war.

The struggle against capitalism and statism requires that we build for the future and, moreover, we should remember that “he who has no confidence in the creative capacity of the masses and in their capability to revolt doesn’t belong in the revolutionary movement. He should go to a monastery and get on his knees and start praying. Because he is no revolutionist. He is a son of a bitch.” [Sam Dolgoff, quoted by Ulrike Heider, Anarchism: left, right, and green, p. 12]

take control of Town Hall and proclaim the free commune. Once this occurs, self-management spreads to all areas of life and the people exercise their sovereign executive power through the popular assembly.” This free commune “is the basic unit of libertarian communism ... and, federated, it provides the basic structure of the new society in all its aspects: administrative, economic and political.” [quoted by Abel Paz, Durrutu in the Spanish Revolution, p. 312]

Such a destruction of the state does not involve violence against individuals, but rather the end of hierarchical organisations, positions and institutions. It would involve, for example, the disbanding of the police, army, navy, state officialdom, etc. It would mean the transformation of police stations, military bases, the offices used by the bureaucracy into something more useful (or, as in the case of prisons, their destruction). Town halls would be occupied and used by community and industrial groups, for example. Offices of the mayor could be turned into crèches. Police stations, if they have not been destroyed, could be turned into storage centres for goods (William Morris, in his utopian novel News from Nowhere, imagined the Houses of Parliament being turned into a manure storage facility). And so on. Those who used to work in such occupations would be asked to pursue a more fruitful way of life or leave the community. In this manner, all harmful and useless institutions would be destroyed or transformed into something of benefit to society.

In addition, as well as the transformation/destruction of the buildings associated with the old state, the decision making process for the community previously usurped by the state would come back into the hands of the people. Alternative, self-managed organisations would be created in every community to manage community affairs. From these community assemblies, confederations would spring up to co-ordinate joint activities and interests. These neighbourhood assemblies and confederations would be means by which power would be dissolved in society
omy by their own actions, organisations and initiative from the bottom-up:

“To destroy radically this oppression without any danger of it re-emerging, all people must be convinced of their right to the means of production, and be prepared to exercise this basic right by expropriating the landowners, the industrialists and financiers, and putting all social wealth at the disposal of the people.” [Malatesta, Op. Cit., p. 167]

However, the economic transformation is but part of the picture. As Kropotkin argued, “throughout history we see that each change in the economic relations of a community is accompanied by a corresponding change in what may be called political organisation... Thus, too, it will be with Socialism. If it contemplates a new departure in economics it must be prepared for a new departure in what is called political organisation.” [Op. Cit., p. 39] Thus the anarchist social revolution also aims to abolish the state and create a confederation of self-governing communes to ensure its final elimination. This destruction of the state is essential as “those workers who want to free themselves, or even only to effectively improve their conditions, will be forced to defend themselves from the government... which by legalising the right to property and protecting it with brute force, constitutes a barrier to human progress, which must be beaten down... if one does not wish to remain indefinitely under present conditions or even worse.” Therefore, “[f]rom the economic struggle one must pass to the political struggle, that is to the struggle against government.” [Malatesta, Op. Cit., p. 195]

Thus a social revolution will have to destroy the state bureaucracy and its forces of violence and coercion (the police, armed forces, intelligence agencies, and so on). If this is not done then the state will come back and crush the revolution. As the CNT newspaper put it in the 1930s, the “first step in the social revolution is to

J.6 What methods of child rearing do anarchists advocate?

Anarchists have long been aware of the importance of child rearing and education. We are aware that child rearing should aim to develop “a well-rounded individuality” and not “a patient work slave, professional automaton, tax-paying citizen, or righteous moralist.” In this section of the FAQ we will discuss anarchist approaches to child rearing bearing in mind “that it is through the channel of the child that the development of the mature man [or woman] must go, and that the present ideas of... educating or training... are such as to stifle the natural growth of the child.” [Emma Goldman, Red Emma Speaks, p. 131 and p. 130]

If one accepts the thesis that the authoritarian family is the breeding ground for both individual psychological problems and political reaction, it follows that anarchists should try to develop ways of raising children that will not psychologically cripple them but instead enable them to accept freedom and responsibility while developing natural self-regulation. We will refer to children raised in such a way as “free children.”

Work in this field is still in its infancy (no pun intended). Wilhelm Reich was the main pioneer in this field (an excellent, short introduction to his ideas can be found in Maurice Brinton’s The Irrational in Politics). In Children of the Future, Reich made numerous suggestions, based on his research and clinical experience, for parents, psychologists, and educators striving to develop libertarian methods of child rearing (although he did not use the term “libertarian”).
In this and the following sections we will summarise Reich’s main ideas as well as those of other libertarian psychologists and educators who have been influenced by him, such as A.S. Neill and Alexander Lowen. We will examine the theoretical principles involved in raising free children and will illustrate their practical application with concrete examples. Finally, we will examine the anarchist approach to the problems of adolescence.

Such an approach to child rearing is based upon the insight that children “do not constitute anyone’s property: they are neither the property of the parents nor even of society. They belong only to their own future freedom.” [Michael Bakunin, The Political Philosophy of Bakunin, p. 327] As such, what happens to a child when they are growing up shapes the person they become and the society they live in. The key question for people interested in freedom is whether “the child [is] to be considered as an individuality, or as an object to be moulded according to the whims and fancies of those about it?” [Emma Goldman, Op. Cit., p. 130] Libertarian child rearing is the means by which the individuality of the child is respected and developed.

This is in stark contrast to standard capitalist claim that children are the property of their parents. If we accept that children are the property of their parents then we are implicitly stating that a child’s formative years are spent in slavery, hardly a relationship which will promote the individuality and freedom of the child or the wider society. Little wonder that most anarchists reject such assertions. Instead we argue that the “rights of the parents shall be confined to loving their children and exercising over them ... authority [that] does not run counter to their morality, their mental development, or their future freedom.” Being someone’s property (i.e. slave) runs counter to all these and “it follows that society, the whole future of which depends upon adequate education and upbringing of children ... has not only the right but also the duty to watch over them.” Hence child rearing should be part of society, a communal process by which children learn what it means to be an individuality.
services and arrangements for production and exchange ... and to organise common defence against the enemies of the Revolution.”  

[Michael Bakunin: Selected Writings, p. 179]  

As can be seen, an essential part of a social revolution is the “expropriation of landowners and capitalists for the benefit of all.”  

[Malatesta, Op. Cit., p. 198] This would be done by workers occupying their workplaces and placing them under workers’ self-management. As Voltairine de Cleyre argued in 1910 “the weapon of the future will be the general strike” and its it not clear that “it must be the strike which will stay in the factory, not go out? which will guard the machines and allow no scab to touch them? which will organise, not to inflict deprivation on itself, but on the enemy? which will take over industry and operate it for the workers, not for franchise holder, stockholders, and officeholders?”  

[“A Study of the General Strike in Philadelphia”, pp. 307–14, Anarchy! An Anthology of Emma Goldman’s Mother Earth, Peter Glassgold (ed.), p. 311] Individual self-managed workplaces would then federate on a local and industrial basis into workers’ councils to co-ordinate joint activity, discuss common interests and issues as well as ensuring common ownership and universalising self-management: “We must push the workers to take possession of the factories, to federate among themselves and work for the community, and similarly the peasants should take over the land and the produce usurped by the landlords, and come to an agreement with the industrial workers on the necessary exchange of goods.”  

[Malatesta, Op. Cit., p. 165] In this way capitalism is replaced by new economic system based the end of hierarchy, on self-managed work. These workplace assembles and local, regional, etc., federations would start to organise production to meet human needs rather than capitalist profit. While most anarchists would like to see the introduction of communist relations begin as quickly as possible in such an economy, most are realistic enough to recognise that tendencies towards libertarian communism will be depend on local conditions. As Malatesta argued:

We wish to re-iterate again that a great deal of work remains to be done in this field. Therefore our comments should be regarded merely as tentative bases for further reflection and research by those involved with raising and educating children. There is, and cannot be, any “rule book” for raising free children, because to follow an inflexible rule book is to ignore the fact that each child and their environment is unique and therefore demands unique responses from their parents. Hence the principles of libertarian child rearing to which we will refer should not be thought of as rules, but rather, as experimental hypotheses to be tested by parents within their own situation by applying their intelligence and deriving their own individual conclusions.

Bringing up children must be like education, and based on similar principles, namely “upon the free growth and development of the innate forces and tendencies of the child. In this way alone can we hope for the free individual and eventually also for a free community, which shall make interference and coercion of human growth impossible.”  

[Goldman, Op. Cit., p. 139] Indeed, child rearing and education cannot be separated as life itself is an education and so must share the same principles and be viewed as a process of “development and exploration, rather than as one of repressing a child’s instincts and inculcating obedience and discipline.”  

[Martha A. Ackelsberg, Free Women of Spain, p. 166] Moreover, the role of parental example is very important to raising free children. Children often learn by mimicking their parents — children do what their parents do, not as they say. If their mother and father lie to each other, scream, fight and so on, then the child
will probably do so as well. Children’s behaviour does not come out thin air, they are a product of the environment they are brought up in. Children can only be encouraged by example, not by threats and commands. So how parents act can be an obstacle to the development of a free child. Parents must do more than just say the right things, but also act as anarchists in order to produce free children.

The sad fact is that most modern people have lost the ability to raise free children, and regaining this ability will be a long process of trial and error as well as parent education in which it is to be hoped that each succeeding generation will learn from the failures and successes of their predecessors and so improve. In the best-case scenario, over the course of a few generations the number of progressive parents will continue to grow and raise ever freer children, who in turn will become even more progressive parents themselves, thus gradually changing mass psychology in a libertarian direction. Such changes can come about very fast, as can be seen from various communes all over the world where society is organised according to libertarian principles. As Reich put it:

“We have learned that instead of a jump into the realm of the Children of the Future, we can hope for no more than a steady advance, in which the healthy new overlaps the sick old structure, with the new slowly outgrowing the old.” [Children of the Future, pp. 38–39]

By means of freedom-based child rearing and education, along with other methods of consciousness raising, as well as encouraging resistance to the existing social order anarchists hope to prepare the psychological foundation for a social paradigm shift, from authoritarian to libertarian institutions and values. And indeed, a gradual cultural evolution toward increasing freedom does seem to exist. For example, as A.S. Neill suggested there is “a slow trend to freedom, sexual and otherwise. In my boyhood, a woman went bathing wearing stockings and a long dress. Today, women show legs

took over their workplaces, peasants seized their land, new forms of social life (soviets, factory committees, co-operatives, etc.) were formed and people lost their previous submissive attitudes to authority by using direct action to change their lives for the better (see section A.5.4). Similarly, the Spanish Revolution occurred after the 19th of July, 1936, when workers again took over their workplaces, peasants formed collectives and militias were organised to fight fascism (see section A.5.6).

Secondly, “there must be a rapid modification of outgrown economical and political institutions, an overthrow of the injustices accumulated by centuries past, a displacement of wealth and political power.” [Kropotkin, Op. Cit., p. 25] This aspect is the key one. Without the abolition of the state and capitalism, no real revolution has taken place. As Bakunin argued, “the program of social revolution” is “the abolition of all exploitation and all political or juridical as well as governmental and bureaucratic oppression, in other words, to the abolition of all classes through the equalisation of economic conditions, and the abolition of their last buttress, the state.” That is, “the total and definitive liberation of the proletariat from economic exploitation and state oppression.” [Statism and Anarchy, pp. 48–9]

We should stress here that, regardless of what Marxists may say, anarchists see the destruction of capitalism occurring at the same time as the destruction of the state. We do not aim to abolish the state first, then capitalism as Engels asserted we did (see section H.2.4). This perspective of a simultaneous political and economic revolution is clearly seen when Bakunin wrote that a city in revolt would “naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour and every kind of capital and building; armed and organised by streets and quartiers, they will form the revolutionary federation of all the quartiers, the federative commune.” All “the revolutionary communes will then send representatives to organise the necessary
assemblies and action committees of the 1968 revolt in France, the
neighbourhood assemblies and occupied workplaces of the 2001
revolt in Argentina, and so on. These bodies were hardly uniform
in structure and some were more anarchistic than others, but the
tendency towards self-management and federation existed in them
all. This tendency towards anarchistic solutions and organisation
is not unsurprising, for, as Nestor Makhno argued, "[i]n carrying
through the revolution, under the impulsion of the anarchism that is
innate in them, the masses of humanity search for free associations.
Free assemblies always command their sympathy. The revolutionary
anarchist must help them to formulate this approach as best they can."
[The Struggle Against the State and Other Essays, p. 85]

In addition, we must stress that we are discussing an anarchist
social revolution in this section. As we noted in section I.2.2, an-
archists recognise that any revolution will take on different forms
in different areas and develop in different ways and at different
speeds. We leave it up to others to describe their vision of revolu-
tion (for Marxists, the creation of a "workers' state" and the seizure
of power by the "proletarian" vanguard or party, and so on).

So what would a libertarian revolution involve?

Firstly, a revolution “is not the work of one day. It means a whole
period, mostly lasting for several years, during which the country is
in a state of effervescence; when thousands of formerly indifferent
spectators take a lively part in public affairs.” It “criticises and re-
pudiates the institutions which are a hindrance to free development
... it boldly enters upon problems which formerly seemed insoluble.” [Kropotkin, Op. Cit., pp. 25–6] Thus, it would be a process
in which revolutionary attitudes, ideas, actions and organisations
spread in society until the existing system is overthrown and a new
one takes its place. It does not come overnight. Rather it is an ac-
cumulative development, marked by specific events of course, but
fundamentally it goes on in the fabric of society.

So the real Russian revolution occurred during the period be-
tween the 1917 February and October insurrections when workers
and bodies. Children are getting more freedom with every generation.
Today, only a few lunatics put cayenne pepper on a baby’s thumb
to stop sucking. Today, only a few countries beat their children in
school.” [Summerhill, p. 115]

Most anarchists believe that we must practice what we preach
and so the anarchist revolution begins at home. As anarchists raise
their own children in capitalist society and/or are involved in the
raising and education of the children of other parents, we can prac-
tice in part libertarian principles even before the revolution. As
such, we think it is important to discuss libertarian child rearing.

J.6.1 What are the main obstacles to raising
free children?

The biggest obstacle is the training and character of most parents,
physicians, and educators. Individuals within a hierarchical so-
ciety create psychological walls/defences around themselves and
these will obviously have an effect both on the mental and phys-
cical state of the individual and so their capacity for living a free
life and experiencing pleasure. Such parents then try (often un-
consciously) to stifle the life-energy in children. There are, for ex-
ample, the child’s natural vocal expressions (shouting, screaming,
bellowing, crying, etc.) and natural body motility. As Reich noted:

“Small children go through a phase of development
characterised by vigorous activity of the voice muscula-
ture. The joy the infant derives from loud noises (crying,
shrieking, and forming a variety of sounds) is regarded
by many parents as pathological aggressiveness. The
children are accordingly admonished not to scream,
to be ‘still,’ etc. The impulses of the voice apparatus
are inhibited, its musculature becomes chronically
contracted, and the child becomes quiet, ‘well-brought-
up,’ and withdrawn. The effect of such mistreatment is soon manifested in eating disturbances, general apathy, pallor of the face, etc. Speech disturbances and retardation of speech development are presumably caused in this manner. In the adult we see the effects of such mistreatment in the form of spasms of the throat. The automatic constrictions of the glottis and the deep throat musculature, with subsequent inhibition of the aggressive impulses of the head and neck, seems to be particularly characteristic.” [Children of the Future, p. 128]

“Clinical experience has taught us,” Reich concluded, “that small children must be allowed to ‘shout themselves out’ when the shouting is inspired by pleasure. This might be disagreeable to some parents, but questions of education must be decided exclusively in the interests of the child, not in those of the adults.” [Op. Cit., p. 128]

Besides deadening life energy in the body, such stifling also inhibits the anxiety generated by the presence of anti-social, cruel, and perverse impulses within the psyche — for example, destructiveness, sadism, greed, power hunger, brutality, etc. (impulses referred to by Reich as “secondary” drives). In other words, this reduces our ability to empathise with others and so the internal ethical guidelines we all develop are blunted, making us more likely to express such secondary, anti-social, drives. So, ironically, these secondary drives result from the suppression of the primary drives and the sensations of pleasure associated with them. These secondary drives develop because the only emotional expressions that can get through a person’s defences are distorted, harsh, and/or mechanical. In other words, compulsive morality (i.e. acting according to externally imposed rules) becomes necessary to control the secondary drives which compulsion itself creates. By such processes, authoritarian child-rearing becomes self-justifying:

This, of course, presents a somewhat wide vision of the revolutionary process. We will need to give some more concrete examples of what a social revolution would involve. However, before so doing, we stress that these are purely examples drawn from previous revolutions and are not written in stone. Every revolution creates its own forms of organisation and struggle. The next one will be no different. As we argued in section 1.2, an anarchist revolution will create its own forms of freedom, forms which will share features with organisations generated in previous revolutions, but which are unique to this one. Thus the Paris Commune of 1871 had mandated and recallable delegates as did the Russian soviets of 1905 and 1917, but the first was based on geographical delegation and the later on workplaces. All we do here is give a rough overview of what we expect (based on previous revolutions) to see occur in a future social revolution. We are not predicting the future. As Kropotkin put it:

“A question which we are often asked is: ‘How will you organise the future society on Anarchist principles?’ If the question were put to ... someone who fancies that a group of men [or women] is able to organise society as they like, it would seem natural. But in the ears of an Anarchist, it sounds very strangely, and the only answer we can give to it is: ‘We cannot organise you. It will depend upon you what sort of organisation you choose.’” [Act for Yourselves, p. 32]

And organise themselves they have. In every social revolution, the oppressed have created many different self-managed organisations. These bodies include the directly democratic neighbourhood Sections of the Great French Revolution, the neighbourhood clubs of the 1848 French Revolution and the Paris Commune, the workers councils and factory committees of the Russian and German revolutions, the industrial and rural collectives of the Spanish Revolution, the workers councils of the Hungarian revolution of 1956,
J.7.4 What would a social revolution involve?

Social revolution necessitates putting anarchist ideas into daily practice. Therefore it implies that direct action, solidarity and self-management become increasingly the dominant form of living in a society. It implies the transformation of society from top to bottom. We can do no better than quote Errico Malatesta on what revolution means:

“The Revolution is the creation of new living institutions, new groupings, new social relationships; it is the destruction of privileges and monopolies; it is the new spirit of justice, of brotherhood, of freedom which must renew the whole of social life, raise the moral level and the material conditions of the masses by calling on them to provide, through their direct and conscious action, for their own futures. Revolution is the organisation of all public services by those who work in them in their own interest as well as the public’s; Revolution is the destruction of all of coercive ties; it is the autonomy of groups, of communes, of regions; Revolution is the free federation brought about by a desire for brotherhood, by individual and collective interests, by the needs of production and defence; Revolution is the constitution of innumerable free groupings based on ideas, wishes, and tastes of all kinds that exist among the people; Revolution is the forming and disbanding of thousands of representative, district, communal, regional, national bodies which, without having any legislative power, serve to make known and to co-ordinate the desires and interests of people near and far and which act through information, advice and example. Revolution is freedom proved in the crucible of facts — and lasts so long as freedom lasts.” [Errico Malatesta: His Life and Ideas, p. 153]

“Psychoanalysts have failed to distinguish between primary natural and secondary perverse, cruel drives, and they are continuously killing nature in the new-born while they try to extinguish the ‘brutish little animal.’ They are completely ignorant of the fact that it is exactly this killing of the natural principle which creates the secondary perverse and cruel nature, human nature so called, and that these artificial cultural creations in turn make compulsive moralism and brutal laws necessary.” [Reich, Op. Cit., p. 17–18]

Moralism, however, can never get at the root of the problem of secondary drives, but in fact only increases the pressure of crime and guilt. The real solution is to let children develop what Reich calls natural self-regulation. This can be done only by not subjecting them to punishment, coercion, threats, moralistic lectures and admonitions, withdrawal of love, etc. in an attempt to inhibit their spontaneous expression of natural life-impulses. The systematic development of the emphatic tendencies of the young infant is the best way to “socialise” and restrict activities that are harmful to the others. As A.S. Neill pointed out “self-regulation implies a belief in the goodness of human nature; a belief that there is not, and never was, original sin.” [Summerhill, p. 103]

According to Neill, children who are given freedom from birth and not forced to conform to parental expectations spontaneously learn how to keep themselves clean and develop social qualities like courtesy, common sense, an interest in learning, respect for the rights of others, and so forth. However, once the child has been armoured through authoritarian methods intended to force it to develop such qualities, it becomes out of touch with its living core and therefore no longer able to develop self-regulation. In this stage it becomes harder and harder for the pro-social emotions to shape the developing mode of life of the new member of society.
At that point, when the secondary drives develop, parental authoritarianism becomes a necessity. This oppression produces an inability to tolerate freedom. The vast majority of people develop this automatically from the way they are raised and is what makes the whole subject of bringing up children of crucial importance to anarchists. Reich concluded that if parents do not suppress nature in the first place, then no anti-social drives will be created and no authoritarianism will be required to suppress them: "What you so desperately and vainly try to achieve by way of compulsion and admonition is there in the new-born infant ready to live and function. Let it grow as nature requires, and change our institutions accordingly." [Op. Cit., p. 47] So in order to raise psychologically healthy children, parents need to acquire self-knowledge, particularly of how internal conflicts develop in family relationships, and to free themselves as much as possible from neurotic forms of behaviour. The difficulty of parents acquiring such self-knowledge and sufficiently de-conditioning themselves is obviously another obstacle to raising self-regulated children.

However, the greatest obstacle is the fact that twisting mechanisms set in so very early in life, i.e., soon after birth. Hence it is important for parents to obtain a thorough knowledge of what rigid suppressions are and how they function, so that from the beginning they can prevent (or at least decrease) them from forming in their children. Finally, Reich cautioned that it is crucial to avoid any mixing of concepts: “One cannot mix a bit of self-regulation with a bit of moral demand. Either we trust nature as basically decent and self-regulatory or we do not, and then there is only one way, that of training by compulsion. It is essential to grasp the fact that the two ways of upbringing do not go together.” [Op. Cit., p. 46]

be destroyed, along with the institutions that are based on such ideas. We do not mean, as can be clearly seen, the destruction of people or wealth. Nor do we imply the glorification of violence — quite the reserve, as anarchists seek to limit violence to that required for self-defence against oppression and authority.

Therefore a social revolution may involve some violence. It may also mean no violence at all. It depends on the revolution and how widely anarchist ideas are spread. One thing is sure, for anarchists social revolution is not synonymous violence. Indeed, violence usually occurs when the ruling class resists the action of the oppressed — that is, when those in authority act to protect their social position.

The wealthy and their state will do anything in their power to prevent having a large enough percentage of anarchists in the population to simply “ignore” the government and property out of existence. If things got that far, the government would suspend the legal rights, elections and round up influential subversives. The question is, what do anarchists do in response to these actions? If anarchists are in the majority or near it, then defensive violence would likely succeed. For example, “the people armed” crushed the fascist coup of July 19th, 1936 in Spain and resulted in one of the most important experiments in anarchism the world has ever seen (see section A.5.6). This should be contrasted with the aftermath of the factory occupations in Italy in 1920 and the fascist terror which crushed the labour movement (see section A.5.5). In other words, you cannot just ignore the state even if the majority are acting, you need to abolish it and organise self-defence against attempts to re-impose it or capitalism.

We discuss the question of self-defence and the protection of the revolution in section J.7.6.
of the real revolution. The age long misery and indignity suffered by the masses burst into disorder and tumult, the humiliation and injustice meekly borne for decades find vents in acts of fury and destruction. That is inevitable, and it is solely the master class which is responsible for this preliminary character of revolution. For it is even more true socially than individually that ‘whoever sows the wind will reap the whirlwind’; the greater the oppression and wretchedness to which the masses had been made to submit, the fiercer will rage the social storm. All history proves it, but the lords of life have never hearkened to its warning voice.” [Op. Cit., p. 195]

“Most people have very confused notions about revolution,” Berkman suggested. “To them it means just fighting, smashing things, destroying. It is the same as if rolling up your sleeves for work should be considered the work itself that you have to do. The fighting bit of the revolution is merely the rolling up of your sleeves.” The task of the revolution is the “destruction of the existing conditions” and “conditions are not destroyed [by] breaking and smashing things. You can’t destroy wage slavery by wrecking the machinery in the mills and factories ... You won’t destroy government by setting fire to the White House.” To think of revolution “in terms of violence and destruction is to misinterpret and falsify the whole idea of it. In practical application such a conception is bound to lead to disastrous results.” For what is there to destroy? “The wealth of the rich? Nay, that is something we want the whole of society to enjoy.” The means of production are to be made “useful to the entire people” and “serve the needs of all.” Thus the aim of revolution is “to take over things for the general benefit, not to destroy them. It is to reorganise conditions for public welfare ... to reconstruct and rebuild.” [Op. Cit., pp. 183–4]

Thus when anarchists like Bakunin speak of revolution as “destruction” they mean that the idea of authority and obedience must

J.6.2. What are some examples of libertarian child-rearing methods?

According to Reich, the problems of parenting a free child actually begin before conception, with the need for a prospective mother to free herself as much as possible from chronic muscular tensions. It has been found in many studies that not only the physical health of the mother can influence the foetus. Various psychological stresses influence the chemical and hormonal environment, affecting the foetus.

Immediately after birth it is important for the mother to establish contact with her child. This means, basically, constant loving attention to the baby, expressed by plenty of holding, cuddling, playing, etc., and especially by breast feeding. By such “orgonotic” contact (to use Reich’s term), the mother is able to establish the initial emotional bonding with the new born, and a non-verbal understanding of the child’s needs. This is only possible, however, if she is in touch with her own emotional and cognitive internal processes: *’Orgonotic contact is the most essential experiential and emotional element in the interrelationship between mother and child, particularly prenatally and during the first days and weeks of life. The future fate of the child depends on it. It seems to be the core of the new-born infant’s emotional development.”* [Children of the Future, p. 99] It is important for the father to establish orgonotic contact as well.

Reich amaintained that the practice of bottle feeding is harmful, particularly if it completely replaces breast feeding from the day of birth, because it eliminates one of the most important forms of establishing physical and emotional contact between mother and child. This lack of contact can then contribute in later life to “oral” forms of neurotic character structure or traits (see Chapter 9 of Alexander Lowen’s Physical Dynamics of Character Structure). Another harmful practice in infant care is the compulsive-
neurotic method of feeding children on schedule, invented by Pirquet in Vienna, which was devastatingly wrong and harmful to countless children. Frustration of oral needs through this practice (which is fortunately less in vogue now than it was fifty years ago), is guaranteed to produce neurotic armouring in infants. As Reich put it: “As long as parents, doctors, and educators approach infants with false, unbending behaviour, inflexible opinions, condescension, and officiousness, instead of with orgonotic contact, infants will continue to be quiet, withdrawn, apathetic, ‘autistic,’ ‘peculiar,’ and, later, ‘little wild animals,’ whom the cultivated feel they have to ‘tame.’” [Op. Cit. p. 124]

Another harmful practice is allowing the baby to “cry itself out.” Thus: “Parking a baby in a baby carriage in the garden, perhaps for hours at a time, is a dangerous practice. No one can know what agonising feelings of fear and loneliness a baby can experience on waking up suddenly to find himself alone in a strange place. Those who have heard a baby’s screams on such occasions have some idea of the cruelty of this stupid custom.” [Neill, Summerhill, p. 336] Indeed, in The Physical Dynamics of Character Structure, Alexander Lowen has traced specific neuroses, particularly depression, to this practice. Hospitals also have been guilty of psychologically damaging sick infants by isolating them from their mothers, a practice that has undoubtedly produced untold numbers of neurotics and psychopaths.

Neill summed up the libertarian attitude toward the care of infants as follows: "Self-regulation means the right of a baby to live freely without outside authority in things psychic and somatic. It means that the baby feeds when it is hungry; that it becomes clean in habits only when it wants to; that it is never stormed at nor spanked; that it is always loved and protected." Obviously self-regulation does not mean leaving the baby alone when it heads toward a cliff or starts playing with an electrical socket. Libertarians do not advocate a lack of common sense. We recognise that adults must override an infant’s will when it is a question of pro-
“The so-called sympathetic Seattle strike was an attempted revolution. That there was no violence does not alter the fact ... The intent, openly and covertly announced, was for the overthrow of the industrial system; here first, then everywhere ... True, there were no flashing guns, no bombs, no killings. Revolution, I repeat, doesn’t need violence. The general strike, as practised in Seattle, is of itself the weapon of revolution, all the more dangerous because quiet. To succeed, it must suspend everything; stop the entire life stream of a community ... That is to say, it puts the government out of operation. And that is all there is to revolt — no matter how achieved.” [quoted by Howard Zinn, A People’s History of the United States, pp. 370–1]

If the strikers had occupied their workplaces and local communities had created popular assemblies then the attempted revolution would have become an actual one without any use of violence at all. In Italy, a year later, the occupations of the factories and land started. As Malatesta pointed out, “in Umanita Nova [the daily anarchist newspaper] we ... said that if the movement spread to all sectors of industry, that is workers and peasants followed the example of the metallurgists, of getting rid of the bosses and taking over the means of production, the revolution would succeed without shedding a single drop of blood.” Thus the “occupation of the factories and the land suited perfectly our programme of action.” [Errico Malatesta: His Life and Ideas, p. 135] Sadly the workers followed their socialist trade union leaders and stopped the occupations rather than spreading them.

These events indicate the strength of ordinary people and the relative weakness of government and capitalism — they only work when they can force people to respect them. After all, a government is “only a handful of men” and is strong “when the people are with it. Then they supply the government with money, with an army protecting their physical safety: “Only a fool in charge of young children would allow unbarred bedroom windows or an unprotected fire in the nursery. Yet, too often, young enthusiasts for self-regulation come to my school as visitors, and exclaim at our lack of freedom in locking poison in a lab closet, or our prohibition about playing on the fire escape. The whole freedom movement is marred and despised because so many advocates of freedom have not got their feet on the ground.” [Op. Cit., p. 105 and p. 106]

Nevertheless, the libertarian position does not imply that a child should be punished for getting into a dangerous situation. Nor is the best thing to do in such a case to shout in alarm (unless that is the only way to warn the child before it is too late), but simply to remove the danger without any fuss: “Unless a child is mentally defective, he will soon discover what interests him. Left free from excited cries and angry voices, he will be unbelievably sensible in his dealing with material of all kinds.” [Neil, Op. Cit., p. 108] Provided, of course, that he or she has been allowed self-regulation from the beginning, and thus has not developed any irrational, secondary drives.

The way to raise a free child becomes clear when one considers how an unfree child is raised. Thus imagine the typical infant whose upbringing A.S. Neill described:

“His natural functions were left alone during the diaper period. But when he began to crawl and perform on the floor, words like naughty and dirty began to float about the house, and a grim beginning was made in teaching him to be clean.

“Before this, his hand had been taken away every time it touched his genitals; and he soon came to associate the genital prohibition with the acquired disgust about faeces. Thus, years later, when he became a travelling salesman, his story repertoire consisted of a balanced number of sex and toilet jokes.
“Much of his training was conditioned by relatives and neighbours. Mother and father were most anxious to be correct — to do the proper thing — so that when relatives or next-door neighbours came, John had to show himself as a well-trained child. He had to say **Thank you** when Auntie gave him a piece of chocolate; and he had to be most careful about his table manners; and especially, he had to refrain from speaking when adults were speaking ...

“All his curiosity about the origins of life were met with clumsy lies, lies so effective that his curiosity about life and birth disappeared. The lies about life became combined with fears when at the age of five his mother found him having genital play with his sister of four and the girl next door. The severe spanking that followed (Father added to it when he came home from work) forever conveyed to John the lesson that sex is filthy and sinful, something one must not even think of.” [Op. Cit., p. 96–7]

Of course, parents’ ways of imparting negative messages about sex are not necessarily this severe, especially in our allegedly enlightened age. However, it is not necessary for a child to be spanked or even scolded or lectured in order to acquire a sex-negative attitude. Children are very intuitive and will receive the message “sex is bad” from subtle parental cues like facial expressions, tone of voice, embarrassed silence, avoidance of certain topics, etc. Mere “toleration” of sexual curiosity and play is far different in its psychological effects from positive affirmation.

Along the same lines, to prevent the formation of sex-negative attitudes means that nakedness should never be discouraged: “The baby should see its parents naked from the beginning. However, the child should be told when he is ready to understand that some people don’t like to see children naked and that, in the presence of such people, revolution is possible. History has shown that we are right. It will do so again.

**J.7.3 Doesn’t revolution mean violence?**

While many try and paint revolutions (and anarchists) as being violent by their very nature, the social revolution desired by anarchists is essentially non-violent. This is because, to quote Bakunin, “[i]n order to launch a radical revolution, it is ... necessary to attack positions and things and to destroy property and the State, but there will be no need to destroy men and to condemn ourselves to the inevitable reaction which is unfailingly produced in every society by the slaughter of men.” [Michael Bakunin: Selected Writings, pp. 168–9]

Equally, to destroy the institution of private property there is no need to destroy the actual useful things monopolised by the few:

“How to smash the tyranny of capital? Destroy capital? But that would be to destroy all the riches accumulated on earth, all primary materials, all the instruments of labour, all the means of labour ... Thus capital cannot and must not be destroyed. It must be preserved ... there is but a single solution — the **intimate and complete union of capital and labour** ... the workers must obtain not individual but collective property in capital ... the collective property of capital ... is the absolutely necessary conditions of the emancipation of **labour and of the workers**.” [The Basic Bakunin, pp. 90–1]

The essentially non-violent nature of anarchist ideas of social revolution can be seen from the Seattle General Strike of 1919. Here is a quote from the Mayor of Seattle (we do not think we need to say that he was not on the side of the strikers):

"How to smash the tyranny of capital? Destroy capital? But that would be to destroy all the riches accumulated on earth, all primary materials, all the instruments of labour, all the means of labour ... Thus capital cannot and must not be destroyed. It must be preserved ... there is but a single solution — the **intimate and complete union of capital and labour** ... the workers must obtain not individual but collective property in capital ... the collective property of capital ... is the absolutely necessary conditions of the emancipation of **labour and of the workers**.” [The Basic Bakunin, pp. 90–1]
als grow aware of latent powers within themselves that nourish their previously suppressed creativity, sense of self-worth, and solidarity. They learn that society is neither immutable nor sanctified, as inflexible custom had previously taught them; rather, it is malleable and subject, within certain limits, to change according to human will and desire.” [The Third Revolution, vol. 1, pp. 6–7]

In short, “it is only through the struggle for freedom, equality and solidarity that you will reach an understanding of anarchism.” [Nestor Makhno, The Struggle Against the State and Other Essays, p. 71]

So, social revolutions are possible. Anarchists anticipate successful revolts within certain circumstance. People who are in the habit of taking orders from bosses are not capable of creating a new society. Tendencies towards freedom, self-management, cooperation and solidarity are not simply an act of ethical will which overcomes the competitive and hierarchical behaviour capitalism generates within those who live in it. Capitalism is, as Malatesta noted, based on competition — and this includes within the working class. However,

co-operation is stimulated within our class by our struggles to survive in and resist the system. This tendency for co-operation generated by struggle against capitalism also produces the habits required for a free society — by struggling to change the world (even a small part of it), people also change themselves. Direct action produces empowered and self-reliant people who can manage their own affairs themselves. It is on the liberating effects of struggle, the tendencies towards individual and collective self-management and direct action it generates, the needs and feelings for solidarity and creative solutions to pressing problems it produces that anarchists base their positive answer on whether social...
from “sin.” It is surely no coincidence that such religions are enthusiastic promoters of the sex-negative morality and disciplinarian child rearing practices that keep supplying them with recruits.

What is worse, however, is that punishment actually creates “problem children.” This is so because the parent arouses more and more hatred (and diminishing trust in other human beings) in the child with each spanking, which is expressed in still worse behaviour, calling for more spankings, and so on, in a vicious circle. In contrast, the “self-regulated child does not need any punishment,” Neill argued, “and he does not go through this hate cycle. He is never punished and he does not need to behave badly. He has no use for lying and for breaking things. His body has never been called filthy or wicked. He has not needed to rebel against authority or to fear his parents. Tantrums he will usually have, but they will be short-lived and not tend toward neurosis.” [Op. Cit., p. 166]

We could cite many further examples of how libertarian principles of child-rearing can be applied in practice, but we must limit ourselves to these few. The basic principles can be summed up as follows: Get rid of authority, moralising, and the desire to “improve” and “civilise” children. Allow them to be themselves, without pushing them around, bribing, threatening, admonishing, lecturing, or otherwise forcing them to do anything. Refrain from action unless the child, by expressing their “freedom” restricts the freedom of others and explain what is wrong about such actions and never mechanically punish.

This is, of course, a radical philosophy, which few parents are willing to follow. It is quite amazing how people who call themselves libertarians in political and economic matters draw the line when it comes to their behaviour within the family — as if such behaviour had no wider social consequences!

**“So tumultuous socially and psychologically are revolutions in general that they constitute a standing challenge to ideologues, including sociobiologists, who assert that human behaviour is fixed and human nature predetermined. Revolutionary changes reveal a remarkable flexibility in ‘human nature,’ yet few psychologists have elected to study the social and psychological tumult of revolution as well as the institutional changes it so often produces. Thus much must be said with fervent emphasis: **to continue to judge the behaviour of a people during and after a revolution by the same standards one judged them by beforehand is completely myopic.**”

“I wish to argue that the capacity of a revolution to produce far-reaching ideological and moral changes in a people stems primarily from the opportunity it affords ordinary, indeed oppressed, people to exercise popular self-management — to enter directly, rapidly, and exhilaratingly into control over most aspects of their social and personal lives. To the extent that an insurrectionary people takes over the reins of power from the formerly hallowed elites who oppressed them and begins to restructure society along radically populist lines, individu-
resulted in the overthrow of the Newtonian paradigm was due to simultaneous progress in mathematics, physics, astronomy and other sciences that all influenced, reacted on, and cross-fertilised each other (see Thomas Kuhn’s *The Structure of Scientific Revolutions*). Similarly, if there is going to be a “paradigm shift” in the social realm, i.e. from hierarchical to non-hierarchical institutions, it is likely to emerge from the convergence of a number of different socio-economic and political developments at the same time. In a hierarchical society, the oppression authority produces also generates resistance, and so hope. The “instinct for freedom” cannot be repressed forever.

That is why anarchists stress the importance of direct action (section J.2) and self-help (section J.5). By the very process of struggle, by practising self-management, direct action and solidarity, people create the necessary “paradigm shift” in both themselves and society as a whole. Thus the struggle against authority is the school of anarchy — it encourages libertarian tendencies in society and the transformation of individuals into anarchists (“Only freedom or the struggle for freedom can be the school for freedom.” [Malatesta, *Errico Malatesta: His Life and Ideas*, p. 59]). In a revolutionary situation, this process is accelerated. It is worth quoting Murray Bookchin at length on this subject:

“*Revolutions are profoundly educational processes, indeed veritable cauldrons in which all kinds of conflicting ideas and tendencies are sifted out in the minds of a revolutionary people ...*

“*Individuals who enter into a revolutionary process are by no means the same after the revolution as they were before it began. Those who encounter a modicum of success in revolutionary times learn more within a span of a few weeks or months than they might have learned over their lifetime in non-revolutionary times. Conventional ideas fall away with extraordinary rapidity; val-

J.6.3 If children have nothing to fear, how can they be good?

Obedience that is based on fear of punishment, this-worldly or other-worldly, is not really goodness, it is merely cowardice. True morality (i.e. respect for others and one-self) comes from inner conviction based on experience, it cannot be imposed from without by fear. Nor can it be inspired by hope of reward, such as praise or the promise of heaven, which is simply bribery. If children are given as much freedom as possible from the day of birth, if parents respect them as individuals and give a positive example as well as not being forced to conform to parental expectations, they will spontaneously learn the basic principles of social behaviour, such as cleanliness, courtesy, and so forth. But they must be allowed to develop them at their own speed, at the natural stage of their growth, not when parents think they should develop them. What is “natural” timing must be discovered by observation, not by defining it a priori based on one’s own expectations.

Can a child really be taught to keep themselves clean without being punished for getting dirty? According to many psychologists, it is not only possible but vitally important for the child’s mental health to do so, since punishment will give the child a fixed and repressed interest in their bodily functions. As Reich and Lowen have shown various forms of compulsive and obsessive neuroses can be traced back to the punishments used in toilet training. As Neill observed: “When the mother says naughty or dirty or even tut tut, the element of right and wrong arises. The question becomes a moral one — when it should remain a physical one.” He suggested that the wrong way to deal with a child who likes to play with faeces is to tell him he is being dirty. The right way “is to allow him to live out his interest in excrement by providing him with mud or clay. In this way, he will sublimate his interest without re-
expression. He will live through his interest; and in doing so, kill it.”
[Summerhill, p. 174]

Similarly, sceptics will probably question how children can be induced to eat a healthy diet without threats of punishment. The answer can be discovered by a simple experiment: set out on the table all kinds of foods, from sweets and ice cream to whole wheat bread, lettuce, sprouts, and so on, and allow the child complete freedom to choose what is desired or to eat nothing at all if he or she is not hungry. Parents will find that the average child will begin choosing a balanced diet after about a week, after the desire for prohibited or restricted foods has been satisfied. This is an example of what can be called “trusting nature.” That the question of how to “train” a child to eat properly should even be an issue says volumes about how little the concept of freedom for children is accepted or even understood, in our society. Unfortunately, the concept of “training” still holds the field in this and most other areas.

The disciplinarian argument that that children must be forced to respect possessions is also defective, because it always requires some sacrifice of a child’s play life (and childhood should be devoted to play, not to “preparing for adulthood,” because playing is what children spontaneously do). The libertarian view is that a child should arrive at a sense of value out of his or her own free choice. This means not scolding or punishing them for breaking or damaging things. As they grow out of the stage of preadolescent indifference to possessions, they learn to respect it naturally.

“But shouldn’t a child at least be punished for stealing?” it will be asked. Once again, the answer lies in the idea of trusting nature. The concept of “mine” and “yours” is adult, and children naturally develop it as they become mature, but not before. This means that normal children will “steal” — though that is not how they regard it. They are simply trying to satisfy their acquisitive impulses; or, if they are with friends, their desire for adventure. In a society so thoroughly steeping in the idea of respect for property as ours, it is no doubt difficult for parents to resist societal pressure to punish goes as follows: authoritarian institutions reward and select people with an authoritarian type of personality for the most influential positions in society; such types of people have both (a) an interest in perpetuating authoritarian institutions (from which they benefit) and (b) the power to perpetuate them; hence they create a self-sustaining and tightly closed system which is virtually impervious to the influence of non-authoritarian types. Therefore, institutional change presupposes individual change, which presupposes institutional change, and so on. Unless it can be shown, then, that institutions and human psychology can both be changed at the same time, hope for a genuine social revolution (instead of just another rotation of elites) appears to be unrealistic.

Connected with this problem is the fact that the psychological root of the hierarchical society is addiction to power — over other people, over nature, over the body and human emotions — and that this addiction is highly contagious. That is, as soon as any group of people anywhere in the world becomes addicted to power, those within range of their aggression also feel compelled to embrace the structures of power, including centralised control over the use of deadly force, in order to protect themselves from their neighbours. Once these structures of power are adopted, authoritarian institutions become self-perpetuating.

In this situation, fear becomes the underlying emotion behind the conservatism, conformity, and mental inertia of the majority, who in that state become vulnerable to the self-serving propaganda of authoritarian elites alleging the necessity of the state, strong leaders, militarism, “law and order,” capitalists, rulers, etc. The simultaneous transformation of institutions and individual psychology becomes even more difficult to imagine.

Serious as these obstacles may be, they do not warrant despair. To see why, let us note first that “paradigm shifts” in science have not generally derived from new developments in one field alone but from a convergence of cumulative developments in several different fields at once. For example, the Einsteinian revolution which
It should also be noted that those who proclaim that a revolution is inherently authoritarian like, say, Engels (see section H.4.7) are confused. They fail to see that it is hardly “authoritarian” to stop someone ruling you! It is an act of liberation to free oneself from those oppressing you. Malatesta comments reflect well the position of revolutionary anarchists with regards to the use of force:

“We neither seek to impose anything by force nor do we wish to submit to a violent imposition.

“We intend to use force against government, because it is by force that we are kept in subjection by government.

“We intend to expropriate the owners of property because it is by force that they withhold the raw materials and wealth, which is the fruit of human labour, and use it to oblige others to work in their interest.

“We shall resist with force whoever would wish by force, to retain or regain the means to impose his will and exploit the labour of others ...

“With the exception of these cases, in which the use of violence is justified as a defence against force, we are always against violence, and for self-determination.” [Op. Cit., p. 56]

This is the reason why most anarchists are revolutionaries. They do not think it against the principles of anarchism and consider it the only real means of creating a free society — a society in which the far greater, and permanent, violence which keeps the majority of humanity in servitude can be ended once and for all.

J.7.2 Is social revolution possible?

One objection to the possibility of social revolution is based on what we might call “the paradox of social change.” This argument

children for “stealing.” The reward for such trust, however, will be a child who grows into a healthy adolescent who respects the possessions of others, not out of a cowardly fear of punishment but from his or her own self-nature.

Most parents believe that, besides taking care of their child’s physical needs, the teaching of ethical/moral values is their main responsibility and that without such teaching the child will grow up to be a “little wild animal” who acts on every whim, with no consideration for others. This idea arises mainly from the fact that most people in our society believe, at least passively, that human beings are naturally bad and that unless they are “trained” to be good they will be lazy, mean, violent, or even murderous. This, of course, is essentially the idea of “original sin” and because of its widespread acceptance, nearly all adults believe that it is their job to “improve” children. Yet according to libertarian psychologists there is no original sin. In fact, it would be more accurate to say that there is “original virtue.” Wilhelm Reich found that externally imposed, compulsive morality actually causes immoral behaviour by creating cruel and perverse “secondary drives.” Neill put it this way: “I find that when I smash the moral instruction a bad boy has received, he becomes a good boy.” [, p. 250]

Unconscious acceptance of some form of the idea of original sin is the main recruiting tool of organised religions, as people who believe they are born “sinners” feel a strong sense of guilt and need for redemption. Parents should eliminate any need for redemption by telling the child that he is born good, not born bad. This will help keep them from falling under the influence of life-denying religions, which are inimical to the growth of a healthy character structure. Citing ethnological studies, Reich argued the following:

“Among those primitive peoples who lead satisfactory, unimpaired sexual lives, there is no sexual crime, no sexual perversion, no sexual brutality between man and woman; rape is unthinkable because it is unnecessary in
their society. Their sexual activity flows in normal, well-ordered channels which would fill any cleric with indignation and fear ... They love the human body and take pleasure in their sexuality. They do not understand why young men and women should not enjoy their sexuality. But when their lives are invaded by the ascetic, hypocritical morass and by the Church, which bring them ‘culture’ along with exploitation, alcohol, and syphilis, they begin to suffer the same wretchedness as ourselves. They begin to lead ‘moral’ lives, i.e. to suppress their sexuality, and from then on they decline more and more into a state of sexual distress, which is the result of sexual suppression. At the same time, they become sexually dangerous; murders of spouses, sexual diseases, and crimes of all sorts start to appear.” [Children of the Future, p. 193]

Such crimes in our society would be greatly reduced if libertarian child rearing practices were widely followed. These are obviously important considerations for anarchists, who are frequently asked to explain how crime can be prevented in an anarchist society. The answer is that if people are not suppressed during childhood there will be far less anti-social behaviour, because the secondary-drive structure that leads to it will not be created in the first place. In other words, the solution to the so-called crime problem is not more police, more laws, or a return to the disciplinarianism of “traditional family values,” as conservatives claim, but depends mainly on getting rid of such values.

There are other problems as well with the moralism taught by organised religions. One danger is making the child a hater: “If a child is taught that certain things are sinful, his love of life must be changed to hate. When children are free, they never think of another child as being a sinner.” [Neill, Op. Cit., p. 245] From the idea that certain people are sinners, it is a short step to the idea that certain

Nor do revolutionary anarchists think that revolution is in contradiction to the principles of anarchism. As Malatesta put it, “For two people to live in peace they must both want peace; if one insists on using force to oblige the other to work for him and serve him, then the other, if he wishes to retain his dignity as a man and not be reduced to abject slavery, will be obliged, in spite of his love of peace, to resist force with adequate means.” [Errico Malatesta: His Life and Ideas, p. 54] Under any hierarchical system, those in authority do not leave those subject to them in peace. The boss does not treat his/her workers as equals, working together by free agreement without differences in power. Rather, the boss orders the worker about and uses the threat of sanctions to get compliance. Similarly with the state. Under these conditions, revolution cannot be authoritarian — for it is not authoritarian to destroy authority! To quote Rudolf Rocker:

“We ... know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.” [“Anarchism and Sovietism”, pp. 53–74, The Poverty of Statism, Albert Meltzer (ed.), p. 73]
“That is why it is no prophecy to foresee that some day it must come to decisive struggle between the masters of life and the dispossessed masses.

“As a matter of fact, that struggle is going on all the time.

“There is a continuous warfare between capital and labour. That warfare generally proceeds within so-called legal forms. But even these erupt now and then in violence, as during strikes and lockouts, because the armed fist of government is always at the service of the masters, and that fist gets into action the moment capital feels its profits threatened: then it drops the mask of ‘mutual interests’ and ‘partnership’ with labour and resorts to the final argument of every master, to coercion and force.

“It is therefore certain that government and capital will not allow themselves to be quietly abolished if they can help it; nor will they miraculously ‘disappear’ of themselves, as some people pretend to believe. It will require a revolution to get rid of them.” [Op. Cit., p. 174]

However, all anarchists are agreed that any revolution should be as non-violent as possible. Violence is the tool of oppression and, for anarchists, violence is only legitimate as a means of self-defence against authority. Therefore revolutionary anarchists do not seek “violent revolution” — they are just aware that when people refuse to kow-tow to authority then that authority will use violence against them. This use of violence has been directed against non-violent forms of direct action and so those anarchists who reject revolution will not avoid state violence directed against them unless they renounce all forms of resistance to state and capitalist authority. So when it comes to effective action by the subjects of an authority, the relevant question quickly becomes how much does our freedom depend on us not exercising it?

classes or races of people are more “sinful” than others, leading to prejudice, discrimination, and persecution of minorities as an outlet for repressed anger and sadistic drives — drives that are created in the first place by moralistic training during early childhood. Once again, the relevance for anarchism is obvious.

A further danger of religious instruction is the development of a fear of life: “Religion to a child most always means only fear. God is a mighty man with holes in his eyelids: He can see you wherever you are. To a child, this often means that God can see what is being done under the bedclothes. And to introduce fear into a child’s life is the worst of all crimes. Forever the child says nay to life; forever he is an inferior; forever a coward.” [Neill, Op. Cit., p. 246] People who have been threatened with fear of an afterlife in hell can never be entirely free of neurotic anxiety about security in this life. In turn, such people become easy targets of ruling-class propaganda that plays upon their material and emotional insecurity, e.g. the rationalisation of imperialist wars, the Military-Industrial Complex, increased state powers, and so on as necessary to “preserve jobs”, for security against external threats and so forth.

J.6.3 But how will a free child ever learn unselfishness?

Another common objection to self-regulation is that children can only be taught to be “unselfish” through punishment and admonition. Again, however, such a view comes from a distrust of nature and is part of the common attitude that nature is mere “raw material” to be shaped by human beings according to their own wishes. The libertarian attitude is that empathy for others develops at the proper time:

“To ask a child to be unselfish is wrong. Every child is an egoist and the world belongs to him. When he has
an apple, his one wish is to eat that apple. The chief result of mother’s encouraging him to share it with his little brother is to make him hate the little brother. Altruism comes later — comes naturally — if the child is not taught to be unselfish. It probably never comes at all if the child has been forced to be unselfish. By suppressing the child’s selfishness, the mother is fixing that selfishness forever.” [Neill, *Summerhill*, pp. 250–251]

Unfulfilled wishes live on in the unconscious so children who are pressured too hard — “taught” — to be unselfish will, while conforming outwardly with parental demands, unconsciously repress part of their real, selfish wishes, and these repressed infantile desires will make the person selfish (and possibly neurotic) throughout life. Moreover, telling children that what they want to do is “wrong” or “bad” is equivalent to teaching them to hate themselves, and it is a well-known principle of psychology that people who do not love themselves cannot love others. Thus moral instruction, although it aims to develop altruism and love for others, is actually self-defeating, having just the opposite result. Moreover, such attempts to produce “unselfish” children (and so adults) actually works against developing the individuality of the child and they developing their own abilities (in particular their ability of critical thought). As Erich Fromm put it:

“No to be selfish implies not to do what one wishes, to give up one’s own wishes for the sake of those in authority... Aside from its obvious implication, it means ‘don’t love yourself,’ ‘don’t be yourself’, but submit yourself to something more important than yourself, to an outside power or its internalisation, ‘duty.’ ‘Don’t be selfish’ becomes one of the most powerful ideological tools in suppressing spontaneity and the free development of personality. Under the pressure of this slogan one is asked for of the population, the regime would have continued. Faced with a massive popular revolt, the Commissars realised that it was better to renounce (some) power than have it all taken from them (and they were right, as this allowed many of them to become part of the new, private capitalist, ruling class). Thus mass rebellion, the start of any true revolution, was required.

The argument that the state is too powerful to be defeated has been proven wrong time and time again. Every revolution has defeated a military machine which previously had been proclaimed to be unbeatable (most obviously, the people armed in Spain defeated the military in two-thirds of the country). Ultimately, the power of the state rests on its troops following orders. If those troops rebel, then the state is powerless. That is why anarchists have always produced anti-militarist propaganda urging troops to join strikers and other people in revolt. Revolutionary anarchists argue that any state can be defeated, if the circumstances are right and the work of anarchists is to encourage those circumstances.

In addition, revolutionary anarchists argue that even if anarchists did not support revolutionary change, this would not stop such events happening. Revolutions are the product of developments in human society and occur whether we desire them or not. They start with small rebellions, small acts of refusal by individuals, groups, workplaces and communities, then grow. These acts of rebellion are inevitable in any hierarchical society, as is their spreading wider and wider. Revolutionary anarchists argue that anarchists must, by the nature of our politics and our desire for freedom, support such acts of rebellion and, ultimately, social revolution. Not to do so means ignoring people in struggle against our common enemy and ignoring the means by which anarchists ideas and attitudes will grow within existing society. Thus Alexander Berkman was right when he wrote:
say, use co-operatives to run public services and industries as well as civil disobedience and non-payment of taxes, is seen as the best way to creating anarchy. This may take time, they argue, but such gradual change will be more successful in the long run.

Most revolutionary anarchists agree on the importance of building libertarian alternatives in the here and now. They would agree with Bakunin when he argued that such organisations as libertarian unions, co-operatives and so on are essential “so that when the Revolution, brought about by the natural force of circumstances, breaks out, there will be a real force at hand which knows what to do and by virtue thereof is capable of taking the Revolution into its own hands and imparting to it a direction salutary for the people: a serious, international organisation of worker’s organisations of all countries, capable of replacing the departing political world of the States and the bourgeoisie.” [The Political Philosophy of Bakunin, p. 323]

Thus, for most anarchists, the difference of evolution and revolution is one of little import — anarchists should support libertarian tendencies within society as they support revolutionary situations when they occur.

However, revolutionary anarchists argue that, ultimately, capitalism cannot be reformed away nor will the state wither away under the onslaught of libertarian institutions and attitudes. Neither mutual banking (see section J.5.7) nor co-operatives (see section J.5.11) can out-compete capitalist institutions. This means that these alternatives, will important, are insufficient to the task of creating a free society. This suggests that while libertarian tendencies within capitalism may make life better under that system, they cannot get rid of it. This requires a social revolution, they argue. Such anarchists agree with Alexander Berkman that there “is no record of any government or authority, of any group or class in power having given up its mastery voluntarily. In every instance it required the use of force, or at least the threat of it.” [What is Anarchism?, p. 174]

Even the end of State capitalism (“Communism”) in Eastern Europe did not contradict this argument. Without the mass action every sacrifice and for complete submission: only those acts are ‘unselfish’ which do not serve the individual but somebody or something outside himself.” [Man for Himself, p. 127]

While such “unselfishness” is ideal for creating “model citizens” and willing wage slaves, it is not conducive for creating anarchists or even developing individuality. Little wonder Bakunin celebrated the urge to rebel and saw it as the key to human progress! Fromm goes on to note that selfishness and self-love, “far from being identical, are actually opposites” and that “selfish persons are incapable of loving others . . . [or] loving themselves.” [Op. Cit., p. 131] Individuals who do not love themselves, and so others, will be more willing to submit themselves to hierarchy than those who do love themselves and are concerned for their own, and others, welfare. Thus the contradictory nature of capitalism, with its contradictory appeals to selfish and unselfish behaviour, can be understood as being based upon lack of self-love, a lack which is promoted in childhood and one which libertarians should be aware of and combat.

Indeed, much of the urge to “teach children unselfishness” is actually an expression of adults’ will to power. Whenever parents feel the urge to impose directives on their children, they would be wise to ask themselves whether the impulse comes from their own power drive or their own selfishness. For, since our culture strongly conditions us to seek power over others, what could be more convenient than having a small, weak person at hand who cannot resist one’s will to power? Instead of issuing directives, libertarians believe in letting social behaviour develop naturally, which it will do after other people’s opinions becomes important to the child. As Neill pointed out:

“Everyone seeks the good opinion of his neighbours. Unless other forces push him into unsocial behaviour, a
child will naturally want to do that which will cause him to be well-regarded, but this desire to please others develops at a certain stage in his growth. The attempt by parents and teachers to artificially accelerate this stage does the child irreparable damage.” [Op. Cit., p. 256]

Therefore, parents should allow children to be “selfish” and “ungiving”, free to follow their own childish interests throughout their childhood. Every interpersonal conflict of interest should be grounds for a lesson in dignity on one side and consideration on the other. Only by this process can a child develop their individuality. By so doing they will come to recognise the individuality of others and this is the first step in developing ethical concepts (which rest upon mutual respect for others and their individuality).

J.6.4 Isn’t “libertarian child-rearing” just another name for spoiling the child?

No. This objection confuses the distinction between freedom and license. To raise a child in freedom does not mean letting him or her walk all over you or others; it does not mean never saying “no.” It is true that free children are not subjected to punishment, irrational authority, or moralistic admonitions, but they are not “free” to violate the rights of others. As Neill put it: “in the disciplined home, the children have no rights. In the spoiled home, they have all the rights. The proper home is one in which children and adults have equal rights.” Or again: “To let a child have his own way, or do what he wants to at another’s expense, is bad for the child. It creates a spoiled child, and the spoiled child is a bad citizen.” [Summerhill, p. 107 and 167]

There will inevitably be conflicts of will between parents and children, and the healthy way to resolve them is discussion and

“Perhaps you still hold the opinion that no reform is possible without a helping coup de main, without what used to be called a revolution but which is quite simply a jolt. I confess that my most recent studies have led me to abandon this view, which I understand and would willingly discuss, since for a long time I held it myself. I do not think that this is what we need in order to succeed, and consequently we must not suggest revolutionary action as the means of social reform because this supposed means would simply be an appeal to force and to arbitrariness. In brief, it would be a contradiction.” [Selected Writings of Pierre-Joseph Proudhon, p. 151]

Also they point to the fact that the state is far better armed than the general population, better trained and (as history proves) more than willing to slaughter as many people as required to restore “order.” In face of this power, they argue, revolution is doomed to failure.

Those opposed to revolution come from all tendencies of the movement. Traditionally, Individualist anarchists are usually against the idea of revolution, as was Proudhon. However, with the failure of the Russian Revolution and the defeat of the CNT-FAI in Spain, some social anarchists have rethought support for revolution. Rather than seeing revolution as the key way of creating a free society they consider it doomed to failure as the state is too strong a force to be overcome by insurrection. Instead of revolution, such anarchists support the creation of alternatives, such as co-operatives, mutual banks and so on, which will help transform capitalism into libertarian socialism by “burn[ing] Property little by little” via “some system of economics” which will “put back into society ... the wealth which has been taken out of society by another system of economics.” [Proudhon, Op. Cit., p. 151]

Such alternative building, combined with pressurising the state to,
Thus anarchists influence social struggle, the revolutionary process, by encouraging anarchistic tendencies within those who are not yet anarchists but are instinctively acting in a libertarian manner. Anarchists spread our message to those in struggle and support libertarian tendencies in it as far as we can. In this way, more and more people will become anarchists and anarchy will become increasingly possible (we discuss the role of anarchists in a social revolution in section J.7.4). For anarchists, a social revolution is the end product of years of struggle. It is marked by the transformation of a given society, the breaking down of all forms of oppression and the creation of new ways of living, new forms of self-managed organisation, a new attitude to life itself. Moreover, we do not wait for the future to introduce such transformations in our daily life. Rather, we try and create as many anarchistic tendencies in today’s society as possible in the firm belief that in so doing we are pushing the creation of a free society nearer.

So anarchists, including revolutionary ones, try to make the world today more libertarian and so bring us closer to freedom. Few anarchists think of anarchy as something in (or for) the distant future, rather it is something we try and create in the here and now by living and struggling in a libertarian manner. Once enough people do this, then a more extensive change towards anarchy (i.e. a revolution) is possible.

J.7.1 Why are most anarchists revolutionaries?

While most anarchists do believe that a social revolution is required to create a free society, some reject the idea. This is because they think that revolutions are by their very nature coercive and so are against anarchist principles. In the words of Proudhon (in reply to Marx):
As for those who equate “discipline” in the home with “obedience,” the latter is usually required of a child to satisfy the adults’ desire for power. Self-regulation means that there are no power games being played with children, no loud voice saying “You’ll do it because I say so, or else!” But, although this irrational, power-seeking kind of authority is absent in the libertarian home, there still remains what can be called a kind of “authority,” namely adult protection, care, and responsibility, as well as the insistence on one’s own rights. As Neill observed: “Such authority sometimes demands obedience but at other times gives obedience. Thus I can say to my daughter, ‘You can’t bring that mud and water into our parlour.’ That’s no more than her saying to me, ‘Get out of my room, Daddy. I don’t want you here now,’ a wish that I, of course, obey without a word.” [Op. Cit., p. 156]. So there will still be “discipline” in the libertarian home, but it will be of the kind that protects the individual rights of each family member.

Raising children in freedom also does not imply giving them a lot of toys, money, and so on. Reich’s followers have argued that children should not be given everything they ask for and that it is better to give them too little than too much. Under constant bombardment by commercial advertising campaigns, parents today generally tend to give their children far too much, with the result that the children stop appreciating gifts and rarely value any of their possessions. This same applies to money, which, if given in excess, can be detrimental to children’s creativity and play life. If children are not given too many toys, they will derive creative joy out of making their own toys out of whatever free materials are at hand — a joy of which they are robbed by overindulgence. Psychologists point out that parents who give too many presents are often trying to compensate for giving too little love.

There is less danger in rewarding children than there is in punishing them, but rewards can still undermine a child’s morale. This is because, firstly, rewards are superfluous and in fact often decrease motivation and creativity, as several psychological studies have shown. As for those who equate “discipline” in the home with “obedience,” the latter is usually required of a child to satisfy the adults’ desire for power. Self-regulation means that there are no power games being played with children, no loud voice saying “You’ll do it because I say so, or else!” But, although this irrational, power-seeking kind of authority is absent in the libertarian home, there still remains what can be called a kind of “authority,” namely adult protection, care, and responsibility, as well as the insistence on one’s own rights. As Neill observed: “Such authority sometimes demands obedience but at other times gives obedience. Thus I can say to my daughter, ‘You can’t bring that mud and water into our parlour.’ That’s no more than her saying to me, ‘Get out of my room, Daddy. I don’t want you here now,’ a wish that I, of course, obey without a word.” [Op. Cit., p. 156]. So there will still be “discipline” in the libertarian home, but it will be of the kind that protects the individual rights of each family member.

Raising children in freedom also does not imply giving them a lot of toys, money, and so on. Reich’s followers have argued that children should not be given everything they ask for and that it is better to give them too little than too much. Under constant bombardment by commercial advertising campaigns, parents today generally tend to give their children far too much, with the result that the children stop appreciating gifts and rarely value any of their possessions. This same applies to money, which, if given in excess, can be detrimental to children’s creativity and play life. If children are not given too many toys, they will derive creative joy out of making their own toys out of whatever free materials are at hand — a joy of which they are robbed by overindulgence. Psychologists point out that parents who give too many presents are often trying to compensate for giving too little love.

There is less danger in rewarding children than there is in punishing them, but rewards can still undermine a child’s morale. This is because, firstly, rewards are superfluous and in fact often decrease motivation and creativity, as several psychological studies have shown.
here and now, social struggle based on direct action, solidarity and self-managed organisations. While Berkman concentrated on the labour movement, his comments are applicable to all social movements:

“In the daily struggle of the proletariat such an organisation [a syndicalist union] would be able to achieve victories about which the conservative union, as at present built, cannot even dream ... Such a union would soon become something more than a mere defender and protector of the worker. It would gain a vital realisation of the meaning of unity and consequent power, of labour solidarity. The factory and shop would serve as a training camp to develop the worker’s understanding of his [or her] proper role in life, to cultivate his [or her] self-reliance and independence, teach him [or her] mutual help and co-operation, and make him [or her] conscious of his [or her] responsibility. He [or she] will learn to decide and act on his [or her] own judgement, not leaving it to leaders or politicians to attend to his [or her] affairs and look out for his [or her] welfare ... He [or she] will grow to understand that present economic and social arrangements are wrong and criminal, and he [or she] will determine to change them. The shop committee and union will become the field of preparation for a new economic system, for a new social life.” [Op. Cit., pp. 206–7]

In other words, the struggle against authority, exploitation, oppression and domination in the here and now is the start of the social revolution. It is this daily struggle, Bakunin stressed, which creates free people and the organisations it generates “bear ... the living seed of the new society which is to replace the old one. They are creating not only the ideas, but also the facts of the future itself.”

have shown (see section I.4.11). Creative people work for the pleasure of creating; monetary interests are not central (or necessary) to the creative process. Secondly, rewards send the wrong message, namely, that doing the deed for which the reward is offered is not worth doing for its own sake and the pleasure associated with productive, creative activity. Thirdly, rewards tend to reinforce the worst aspects of the competitive system, leading to the attitude that money is the only thing which can motivate people to do the work that needs doing in society.

These are just a few of the considerations that enter into the distinction between spoiling children and raising them in freedom. In reality, it is the punishment and fear of a disciplinarian home that spoils children in the most literal sense, by destroying their childhood happiness and creating warped personalities. As adults, the victims of disciplinarianism will generally be burdened with one or more anti-social secondary drives such as sadism, destructive urges, greed, sexual perversions, etc., as well as repressed rage and fear. The presence of such impulses just below the surface of consciousness causes anxiety, which is automatically defended against by psychological walls which leave the person stiff, frustrated, bitter and burdened with feelings of inner emptiness. In such a condition people easily fall victim to the capitalist gospel of super-consumption, which promises that money will enable them to fill the inner void by purchasing commodities — a promise that, of course, is hollow.

The neurotically enclosed person also tends to look for scapegoats on whom to blame his or her frustration and anxiety and against whom repressed rage can be vented. Reactionary politicians know very well how to direct such impulses against minorities or “hostile nations” with propaganda designed to serve the interests of the ruling elite. Most importantly, however, the respect for authority combined with sadistic impulses which is acquired from a disciplinarian upbringing typically produces a submissive/authoritarian personality — a man or woman who blindly follows
the orders of “superiors” while at the same time desiring to exercise authority on “subordinates,” whether in the family, the state bureaucracy, or the company. Ervin Staub’s Roots of Evil includes interviews of imprisoned SS men, who, in the course of extensive interviews (meant to determine how ostensibly “normal” people could perform acts of untold ruthlessness and violence) revealed that they overwhelmingly came from authoritarian, disciplinarian homes.

In this way, the “traditional” (e.g., authoritarian, disciplinarian, patriarchal) family is the necessary foundation for authoritarian civilisation, reproducing it and its attendant social evils from generation to generation.

J.6.5 What is the anarchist position on teenage sexual liberation?

One of the biggest problems of adolescence is sexual suppression by parents and society in general. The teenage years are the time when sexual energy is at its height. Why, then, the absurd demand that teenagers “wait until marriage,” or at least until leaving home, before becoming sexually active? Why are there laws in “advanced” countries like the United States that allow a 19-year-old “boy” who makes love with his 17-year-old girlfriend, with her full consent, to be arrested by the girl’s parents (!) for “statutory rape”?

To answer such questions, let us recall that the ruling class is not interested in encouraging mass tendencies toward liberty, independence and pleasure not derived from commodities but instead supports whatever contributes to mass submissiveness, docility, dependence, helplessness, and respect for authority — traits that perpetuate the hierarchies on which ruling-class power and privileges depend.

rather it is a process — a process which is occurring at this moment. So a social revolution is not something in the future which we wait for but an process which is occurring in the here and now which we influence along side other tendencies as well as objective factors. This means that “evolution and revolution are not two separate and different things. Still less are they opposites ... Revolution is merely the boiling point of evolution.” [Berkman, Op. Cit., p. 179] This means how we act now matters as we shape the future by our struggles today. As German Anarchist Gustav Landauer put it:

“The State is not something that can be destroyed by a revolution, but it is a condition, a certain relationship between human beings, a mode of human behaviour; we destroy it by contracting other relationships, by behaving differently.” [quoted by George Woodcock, Anarchism, p. 421]

This does not mean that anarchists do not recognise that a revolution will be marked by, say, specific events (such as a general strike, wide scale occupations of land, housing, workplaces, actual insurrections and so on). Of course not. It means that we place these events in a process, within social movements recognising that they do not occur in isolation from history nor the evolution of ideas and movements within society.

Berkman echoed this point when he argued that while “a social revolution is one that entirely changes the foundation of society, its political, economic and social character” such a change “must first take place in the ideas and opinions of the people, in the minds of men [and women].” This means that “the social revolution must be prepared. Prepared in these sense of furthering evolutionary process, of enlightening the people about the evils of present-day society and convincing them of the desirability and possibility, of the justice and practicability of a social life based on liberty.” [Op. Cit., p. 180–1] Such preparation would be the result of social struggle in the
Moreover, such a revolution does not appear as if by magic. Rather, it is the case that revolutions “are not improvised. They are not made at will by individuals nor even by the most powerful associations. They come independently of all will and all conspiracies, and are always brought on by the natural force of circumstance.” [Bakunin, The Political Philosophy of Bakunin, p. 323]

Revolutions break-out when the conditions are ripe and cannot be artificially produced (by, say, a union leadership proclaiming out of the blue such-and-such a day for a general strike). However, the actions of individuals and associations can make revolution more likely by their propaganda, struggles and organising so that when the circumstances change, people are able and willing to act in a revolutionary manner (by, say, spontaneously going on strike and their unions expanding the struggle into a general strike). This means that there is no mechanical, objective, process at work but rather something which we can influence but not command.

Revolutions are a product of social evolution and of the social struggle which is an inevitable part of it:

“The oppressed masses … have never completely resigned themselves to oppression and poverty, and who today more than ever show themselves thirsting for justice, freedom and wellbeing, are beginning to understand that they will not be able to achieve their emancipation except by union and solidarity with all the oppressed, with the exploited everywhere in the world. And they also understand that the indispensable condition for their emancipation which cannot be neglected is the possession of the means of production, of the land and of the instruments of labour.” [Malatesta, Anarchy, p. 33]

Thus any social revolution proceeds from the daily struggles of working class people (just as anarchism does). It is not an event, as sex is one of the most intense forms of pleasure and one of the most prominent contributors for intimacy and bonding with people emotionally, repression of sexuality is the most powerful means of psychologically crippling people and giving them a submissive/authoritarian character structure (as well as alienating people from each other). As Reich observed, such a character is composed of a mixture of “sexual impotence, helplessness, a need for attachments, a nostalgia for a leader, fear of authority, timidity, and mysticism” and “people structured in this manner are incapable of democracy. All attempts to build up or maintain genuine democratically directed organisations come to grief when they encounter these character structures. They form the psychological soil of the masses in which dictatorial strivings and bureaucratic tendencies of democratically elected leaders can develop.” Sexual suppression “produces the authority-fearing, life-fearing vassal, and thus constantly creates new possibilities whereby a handful of men in power can rule the masses.” [The Sexual Revolution, p. 82]

No doubt most members of the ruling elite are not fully conscious that their own power and privileges depend on the mass perpetuation of sex-negative attitudes. Nevertheless, they unconsciously sense it. Sexual freedom is the most basic and powerful kind, and every conservative or reactionary instinctively shudders at the thought of the “social chaos” it would unleash — that is, the rebellious, authority-defying type of character it would nourish. This is why “family values,” and “religion” (i.e. discipline and compulsive sexual morality) are the mainstays of the conservative/reactionary agenda. Thus it is crucially important for anarchists to address every aspect of sexual suppression in society. This means affirming the right of adolescents to an unrestricted sex life.

There are numerous arguments for teenage sexual liberation. For example, many teen suicides could be prevented by removing the restrictions on adolescent sexuality. This becomes clear from ethnological studies of sexually unrepressive tribal peoples:
“All reports, whether by missionaries or scholars, with or without the proper indignation about the ‘moral depravity’ of ‘savages,’ state that the puberty rites of adolescents lead them immediately into a sexual life; that some of these primitive societies lay great emphasis on sexual pleasure; that the puberty rite is an important social event; that some primitive peoples not only do not hinder the sexual life of adolescents but encourage it in every way, as, for instance, by arranging for community houses in which the adolescents settle at the beginning of puberty in order to be able to enjoy sexual intercourse. Even in those primitive societies in which the institution of strict monogamous marriage exists, adolescents are given complete freedom to enjoy sexual intercourse from the beginning of puberty to marriage. None of these reports contains any indication of sexual misery or suicide by adolescents suffering from unrequited love (although the latter does of course occur). The contradiction between sexual maturity and the absence of genital sexual gratification is non-existent.” [Reich, Op. Cit., p. 85]

Teenage sexual repression is also closely connected with crime. If there are teenagers in a neighbourhood who have no place to pursue intimate sexual relationships, they will do it in dark corners, in cars or vans, etc., always on the alert and anxious lest someone discover them. Under such conditions, full gratification is impossible, leading to a build-up of tension and frustration. Thus they feel unsatisfied, disturb each other, become jealous and angry, get into fights, turn to drugs as a substitute for a satisfying sex life, vandalise property to let off “steam” (repressed rage), or even murder someone. As Reich noted, “juvenile delinquency is the visible expression of the subterranean sexual crisis in the lives of children and adolescents. And it may be predicted that no society will ever succeed in solving this problem, the problem of juvenile psychopathology, unless...”
J.7 What do anarchists mean by social revolution?

In anarchist theory, *social revolution* means far more than just revolution. For anarchists, a true revolution is far more than just a change in the political makeup, structure or form of a society. It must transform all aspects of a society — political, economic, social, interpersonal relationships, and so on — and the individuals who comprise it. Indeed, these two transformations go hand in hand, complementing each other and supporting each other. People, while transforming society, transform themselves. As Alexander Berkman put it:

“there are revolutions and revolutions. Some revolutions change only the governmental form by putting a new set of rulers in place of the old. These are political revolutions, and as such they are often meet with little resistance. But a revolution that aims to abolish the entire system of wage slavery must also do away with the power of one class to oppress another. That is, it is not any more a mere change of rulers, of government, not a political revolution, but one that seeks to alter the whole character of society. That would be a social revolution.”

[What is Anarchism?, p. 176]

It means two related things. First, it means transforming all parts of society and not just tinkering with certain aspects of the current system. Where political revolution means, in essence, changing bosses, social revolution means changing society, a transfor-

that society can muster the courage and acquire the knowledge to regulate the sexual life of its children and adolescents in a sex-affirmative manner.” [Op. Cit., p. 271]

For these reasons, it is clear that a solution to the “gang problem” also depends on adolescent sexual liberation. We are not suggesting, of course, that gangs themselves suppress sexual activity. Indeed, one of their main attractions to teens is undoubtedly the hope of more opportunities for sex as a gang member. However, gangs’ typical obsessiveness with the promiscuous, pornographic, sadistic, and other “dark” aspects of sex shows that by the time children reach gang age they have already developed unhealthy secondary drives due to the generally sex-negative and repressive environment in which they have grown up. The expression of such drives is not what anarchists mean by “sexual freedom.” Rather, anarchist proposals for teenage liberation are based on the premise that a libertarian childhood is the necessary condition for a healthy sexual freedom in adolescence.

Applying these insights to our own society, it is clear that teenagers should have ample access to a private room where they can be undisturbed with their sexual partners. Parents should also encourage the knowledge and use of contraceptives and safe sex in general as well as respect for the other person involved in the relationship. This does not mean encouraging promiscuity or sex for the sake of it. Rather, it means encouraging teenagers to know their own minds and desires, refusing to be pressured by anyone into anything. As can be seen from experience of this anarchist activist during the 1930s:

“One time, a companero from the Juventudes [libertarian youth organisation] came over to me and said, ‘you, who say you’re so liberated. You’re not so liberated.’ (I’m telling you this so you’ll see the mentality of these men.) ‘Because if I ask you to give me a kiss, you wouldn’t.”
“I just stood there staring at him, and thinking to myself, ‘How do I get out of this one?’ And then I said to him, ‘Listen, when I want to go to bed with a guy, I’m the one that has to choose him. I don’t go to bed with just anyone. You don’t interest me as a man. I don’t feel anything for you… Why should you want me to ‘liberate myself,’ as you put it, by going to bed with you? That’s no liberation for me. That’s just making love simply for the sake of making love.’ ‘No,’ I said to him, ‘love is something that has to be like eating: if you’re hungry, you eat, and if you want to go to bed with a guy, then… Besides, I’m going to tell you something else… Your mouth doesn’t appeal to me… And I don’t like to make love with a guy without kissing him.’

“He was left speechless! But I did it with a dual purpose in mind… because I wanted to show him that that’s not the way to educate companeros… That’s what the struggle of women was like in Spain — even with men from our own group — and I’m not even talking about what it was like with other guys.” [quoted by Martha A. Ackelsberg, Free Women of Spain, pp. 116–7]

So respecting yourself and others, it must be stressed, is essential. As Maurice Brinton pointed out, attempts at sexual liberation will encounter two kinds of responses from established society — direct opposition and attempts at recuperation. The second response takes the form of “first alienating and reifying sexuality, and then of frenetically exploiting this empty shell for commercial ends. As modern youth breaks out of the dual stranglehold of repressive traditional morality and of the authoritarian patriarchal family it encounters a projected image of free sexuality which is in fact a manipulatory distortion of it.” This can be seen from the use of sex in advertising to the successful development of sex into a major consumer industry. However, such a development is the opposite of the healthy
decree of a central authority.” [The Sexual Revolution, p. 279] That was a Leninist illusion. Rather, it will be established from the bottom up, by the gradual process of ever more widespread dissemination of knowledge about the adverse personal and social effects of sexual repression, and the benefits of libertarian child-rearing and educational methods.

A society in which people are capable of sexual happiness will be one where they prefer to “make love, not war,” and so will provide the best guarantee for the general security. Then the anarchist project of restructuring the economic and political systems will proceed spontaneously, based on a spirit of joy rather than hatred and revenge. Only then can it be defended against reactionary threats, because the majority will be on the side of freedom and capable of using it responsibly, rather than unconsciously longing for an authoritarian father-figure to tell them what to do.

Therefore, concern and action upon sexual liberation, libertarian child rearing and libertarian education are key parts of social struggle and change. In no way can they be considered as “distractions” from “important” political and economic issues as some “serious” revolutionaries like to claim. As Martha A. Ackelsberg notes in relation to the practical work done by the Mujeres Libres group during the Spanish Revolution:

“Respecting children and educating them well was vitally important to the process of revolutionary change. Ignorance made people particularly vulnerable to oppression and suffering. More importantly, education prepared people for social life. Authoritarian schools (or families), based upon fear, prepared people to be submissive to an authoritarian government [or within a capitalist workplace]. Different schools and families would be necessary to prepare people to live in a society without domination.” [Free Women of Spain, p. 133]

sexuality desired by anarchists. This is because “sex is presented as something to be consumed. But the sexual instinct differs from certain other instincts” as it can be satisfied only by “another human being, capable of thinking, acting, suffering. The alienation of sexuality under the conditions of modern capitalism is very much part of the general alienating process, in which people are converted into objects (in this case, objects of sexual consumption) and relationships are drained of human content. Undiscriminating, compulsive sexual activity, is not sexual freedom — although it may sometimes be a preparation for it (which repressive morality can never be). The illusion that alienated sex is sexual freedom constitutes yet another obstacle on the road to total emancipation. Sexual freedom implies a realisation and understanding of the autonomy of others.” [“The Irrational in Politics”, pp. 257–92, For Workers’ Power, p. 277]

Therefore, anarchists see teenage sexual liberation as a means of developing free individuals as well as reducing the evil effects of sexual repression (which, we must note, also helps dehumanise individuals by encouraging the objectification of others, and in a patriarchal society particularly of women).

J.6.6 But isn’t this concern with sexual liberation just a distraction from revolution?

It would be insulting to teenagers to suggest that sexual freedom is, or should be, their only concern. Many teens have a well-developed social conscience and are keenly interested in problems of economic exploitation, poverty, social breakdown, environmental degradation, and the like. The same can be said of people of any age!

It is essential for anarchists to guard against the attitude typically found in Marxist-Leninist parties that spontaneous discussions about sexual problems are a “diversion from the class struggle.” Such an attitude is economistic (not to mention covertly as-
cetic), because it is based on the premise that economic class must be the focus of all revolutionary efforts toward social change. No doubt transforming the economy is important, but without mass sexual liberation no working class revolution be complete as there will not be enough people around with the character structures necessary to create a lasting self-managed society and economy (i.e., people who are capable of accepting freedom with responsibility). Instead, the attempt to force the creation of such a system without preparing the necessary psychological soil for its growth will lead to a reversion to some new form of hierarchy and exploitation. Equally, society would be “free” in name only if repressive social morals existed and people were not able to express themselves as they so desire.

Moreover, for many people breaking free from the sexual suppression that threatens to cripple them psychologically is a major issue in their lives. For this reason, few of them are likely to be attracted to the anarchist “freedom” movement if its exponents limit themselves to dry discussions of surplus value, alienated labour, and so forth. Instead, addressing sexual questions and problems must be integrated into a multi-faceted attack on the total system of domination. People should feel confident that anarchists are on the side of sexual pleasure and are not revolutionary ascetics demanding self-denial for the “sake of the revolution.” Rather, it should be stressed that the capacity for full sexual enjoyment is the essential part of the revolution. Indeed, “incessant questioning and challenge to authority on the subject of sex and of the compulsive family can only complement the questioning and challenge to authority in other areas (for instance on the subject of who is to dominate the work process — or the purpose of work itself). Both challenges stress the autonomy of individuals and their domination over important aspects of their lives. Both expose the alienated concepts which pass for rationality and which govern so much of our thinking and behaviour. The task of the conscious revolutionary is to make both challenges explicit, to point out their deeply subversive content, and to explain their inter-relation.” [Maurice Brinton, “The Irrational in Politics”, pp. 257–92, For Workers’ Power, p. 278]

We noted previously that in pre-patriarchal society, which rests on a communistic/communal social order, children have complete sexual freedom and that the idea of childhood asceticism develops as such societies turn toward patriarchy in the economic and social structure (see section B.1.5). This sea-change in social attitudes toward sexuality allows the authority-oriented character structure to develop instead of the formerly non-authoritarian ones. Ethnological research has shown that in pre-patriarchal societies the general nature of work life in the community corresponds with the free development of children and adolescents — that is, there are no rules coercing children and adolescents into specific forms of sexual life, and this creates the psychological basis for voluntary integration into the community and voluntary discipline in all forms of collective activity. This supports the premise that widespread sex-positive attitudes are a necessary condition of a viable libertarian socialism.

Psychology also clearly shows that every impediment to free expression of children by parents, teachers, or administrative authorities must be stopped. As anarchists, our preferred way of doing so is by direct action. Thus we should encourage all to feel that they have every chance of building their own personal lives. This will certainly not be an obstacle to or a distraction from their involvement in the anarchist movement. On the contrary, if they can gradually solve the problems facing their private lives, they will work on other social projects with greatly increased pleasure and concentration.

Besides engaging in direct action, anarchists can also support legal protection free expression and sexuality (repeal of the insane statutory rape laws and equal rights for gays, for example), just as they support legislation that protects workers’ right to strike, family leave, and so forth. However, as Reich observed, “under no circumstances will the new order of sexual life be established by the

Another. This is because the state is an instrument of minority rule — it can never become an instrument of majority empowerment as its centralised, hierarchical and authoritarian nature excludes such a possibility (see section H.3.7 for more discussion on this issue).

Therefore an important role of anarchists is to undermine hierarchical organisation by creating self-managed ones, by keeping the management and direction of a struggle or revolution in the hands of those actually conducting it. It is their revolution, not a party’s and so they should control and manage it. They are the ones who have to live with the consequences of it. As Bakunin argued, social revolution “should not only be made for the people’s sake; it should also be made by the people.” [No Gods, No Masters, vol. 1, p. 141]

“The revolution is safe, it grows and becomes strong,” correctly argued Alexander Berkman, “as long as the masses feel that they are direct participants in it, that they are fashioning their own lives, that they are making the revolution, that they are the revolution. But the moment that their activities are usurped by a political party or are centred in some special organisation, revolutionary effort becomes limited to a comparatively small circle from which the large masses are practically excluded. The natural result is that popular enthusiasm is dampened, interest gradually weakens, initiative languishes, creativeness wanes, and the revolution becomes the monopoly of a clique which presently turns dictator.” [What is Anarchism?, p. 213] The history of every revolution proves this point, we feel, and so the role of anarchists is clear — to keep a revolution revolutionary by encouraging libertarian ideas, organisation, tactics and activity.

Anarchists, therefore, organise to influence social struggle in a libertarian manner and our role in any social revolution is to combat authoritarian tendencies and parties while encouraging working class self-organisation, self-activity and self-management (how we organise to achieve this is described in section I.3). Only by the spreading of libertarian ideas and values within society, encouraging libertarian forms of social organisation (i.e., self-management,
decentralisation, federalism, etc.) and continually warning against centralising power into a few hands can a revolution become more than a change of masters.

J.7.6 How could an anarchist revolution defend itself?

To some, particularly Marxists, this section may seem in contradiction with anarchist ideas. As we discussed in section H.2.1, Marxists tend to assume, incorrectly, that anarchists are either against defending a revolution or see no need to. However, as will become very clear, nothing could be further from the truth. Anarchists have always argued for defending a revolution — by force, if necessary. Anarchists argue that Marx (and Marxists) confuse self-defence by “the people armed” with the state, a confusion which has horrific implications (as the history of the Russian Revolution shows).

So how would an anarchist revolution (and by implication, society) defend itself? Firstly, we should note that it will not defend itself by creating a centralised body, a new state. If it did this then the revolution will have failed and a new class society would have been created (a society based on state bureaucrats and oppressed workers as in the Soviet Union). Thus we reject the Marxist notion of a so-called “workers” or “revolutionary” state as confused in the extreme (as should be obvious from our analysis in section H). Rather, we seek libertarian means to defend a libertarian revolution. What would these libertarian means be?

In short, this would involve the “creation of a voluntary militia, without powers to interfere as militia in the life of the community, but only to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution.” The creation of a free militia would be part of the general social transformation as the “most powerful
means for defending the revolution remains always that of taking away from the bourgeois the economic means on which their power rests, and of arming everybody (until such time as one will have managed to persuade everybody to throw away their arms as useless and dangerous toys), and of interesting the mass of the population in the victory of the revolution.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 166 and p. 173] As Bakunin stressed:

“let us suppose ... it is Paris that starts [the revolution] ... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and quartiers, they will form the revolutionary federation of all the quartiers, the federative commune ... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services ... and to organise common defence against the enemies of the Revolution, together with propaganda, the weapon of revolution, and practical revolutionary solidarity with friends in all countries against enemies in all countries.” [Michael Bakunin: Selected Writings, pp. 178–9]

So anarchists have always seen the necessity to defend a revolution. There is no theoretical contradiction implied by this for while anarchism “is opposed to any interference with your liberty” and “against all invasion and violence”, it recognises that when “any one attacks you, then it is he who is invading you, he who is employing violence against you. You have a right to defend yourself. More than that, it is your duty, as an anarchist to protect your liberty, to resist coercion and compulsion ... In other words, the social revolution will attack no one, but it will defend itself against invasion from
any quarter.” [Alexander Berkman, What is Anarchism?, p. 231] These militias, in other words, do not seek to impose a revolution, for you cannot impose freedom or force people to be free against their will: “The power of the people in arms can only be used in the defence of the revolution and the freedoms won by their militancy and their sacrifices.” [Vernon Richards, Lessons of the Spanish Revolution, p. 44]

Such activity, Berkman stressed, “must be in consonance with th[e] spirit [of anarchism]. Self-defence excludes all acts of coercion, of persecution or revenge. It is concerned only with repelling attack and depriving the enemy of opportunity to invade you.” Any defence would be based on “the strength of the revolution ... First and foremost, in the support of the people ... If they feel that they themselves are making the revolution, that they have become masters of their lives, that they have gained freedom and are building up their welfare, then in that very sentiment you have the greatest strength of the revolution ... Let them believe in the revolution, and they will defend it to the death.” Thus the “armed workers and peasants are the only effective defence of the revolution.” [Op. Cit., pp. 231–2] Malatesta stressed that a government is not required to defend freedom:

“But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple,

As can be seen, anarchist theory has always addressed the necessity of defending a social revolution and proposed a solution — the voluntary, self-managed militia organised by the free communes and federations of workers’ associations. The militias would be unified and co-ordinated by federations of communes while delegates from each militia unit would co-ordinate the actual fighting. In times of peace the militia members would be living and working among the rest of the populace, and, thus, they would tend to have the same outlook and interests as their fellows. Moreover, in the case of foreign intervention, the importance of international solidarity is important (“a social revolution cannot be a revolution in one nation alone. It is by nature an international revolution.” [Bakunin, Op. Cit., p. 49]). Thus any foreign intervention would face the problems of solidarity actions and revolts on its own doorstep and not dare send its troops abroad for long, if at all. Ultimately, the only way to support a revolution is to make your own.

Within the revolutionary area, it is the actions of liberated people that will defend it. Firstly, the population would be armed and so counter-revolutionaries would face stiff opposition to their attempts to recreate authority. Secondly, they would face liberated individuals who would reject and resist their attempts. Thus, as we discuss in section I.5.11, any authoritarian would face the direct action of a free people, of free individuals, who would refuse to cooperate with the would-be authorities and join in solidarity with their friends and fellow workers to resist them. The only way a counter-revolution could spread internally is if the mass of the population had become alienated from the revolution and this is impossible in an anarchist revolution as power remains in their hands. A free society need not fear internal counter-revolutionaries gaining support.
History, as well as theory, points to such libertarian forms of self-defence. In all the major revolutions which anarchists took part in they formed militias to defend freedom. For example, anarchists in many Russian cities formed “Black Guards” to defend their expropriated houses and revolutionary freedoms. In the Ukraine, Nestor Makhno helped organise a peasant-worker army to defend the social revolution against authoritarians of right and left. In the Spanish Revolution, the CNT organised militias to free those parts of Spain under fascist rule after the military coup in 1936.

These anarchist militias were as self-managed as possible, with any “officers” elected and accountable to the troops and having the same pay and living conditions as them. Nor did they impose their ideas on others. When a militia liberated a village, town or city they called upon the population to organise their own affairs, as they saw fit. All the militia did was present suggestions and ideas to the population. For example, when the Makhnovists passed through a district they would put on posters announcing:

“The freedom of the workers and the peasants is their own, and not subject to any restriction. It is up to the workers and peasants to act, to organise themselves, to agree among themselves in all aspects of their lives, as they themselves see fit and desire ... The Makhnovists can do no more than give aid and counsel ... In no circumstances can they, nor do they wish to, govern.” [quoted by Peter Marshall, Demanding the Impossible, p. 473]

Needless to say, the Makhnovists counselled the workers and peasants “to set up free peasants’ and workers’ councils” as well as to expropriate the land and means of production. They argued that “[f]reedom of speech, of the press and of assembly is the right of every toiler and any gesture contrary to that freedom constitutes an act of counter-revolution.” [No Gods, No Masters, vol. 2, pp. 157–8]

*Fictitious Splits In The International*, available at: http://www.marxists.org/archive/marx/works/1864iwma/1872-e.htm

The Makhnovists also organised regional congresses of peasants and workers to discuss revolutionary and social issues. The army’s declared principles were voluntary enlistment, the election of officers and self-discipline according to the rules adopted by each unit themselves. Remarkably effective, the Makhnovists were the force that defeated Denikin’s army and helped defeat Wrangel. After the Whites were defeated, the Bolsheviks turned against the Makhnovists and betrayed them. However, while they existed the Makhnovists defended the freedom of the working class to organise themselves against both right and left statists (see Voline’s *The Unknown Revolution*, Peter Arshinov’s *History of the Makhnovist Movement* or Alexandre Skirda’s *Nestor Makhno Anarchy’s Cossack* for more information).

A similar situation developed in Spain. After defeating the fascist military coup on 19th of July, 1936, the anarchists organised self-managed militias to liberate those parts of Spain under Franco. These groups were organised in a libertarian fashion from the bottom up:

“The establishment of war committees is acceptable to all confederal militias. We start from the individual and form groups of ten, which come to accommodations among themselves for small-scale operations. Ten such groups together make up one centuria, which appoints a delegate to represent it. Thirty centurias make up one column, which is directed by a war committee, on which the delegates from the centurias have their say … although every column retains its freedom of action, we arrive at co-ordination of forces, which is not the same thing as unity of command.” [Op. Cit., pp. 256–7]

Like the Makhnovists, the anarchist militias in Spain were not only fighting against reaction, they were fighting for a better world.
As Durruti argued: “Our comrades on the front know for whom and for what they fight. They feel themselves revolutionaries and they fight, not in defence of more or less promised new laws, but for the conquest of the world, of the factories, the workshops, the means of transportation, their bread and the new culture.” [Op. Cit., p. 248] When they liberated towns and villages, the militia columns urged workers and peasants to collectivise the land and means of production, to re-organise life in a libertarian fashion. All across anti-Fascist Spain workers and peasants did exactly that. The militias only defended the workers’ and peasants’ freedom to organise their own lives as they saw fit and did not force them to create collectives or dictate their form.

In this, the CNT was not only following the suggestions of the likes of Bakunin and Malatesta, it was implementing its own stated policies. Thus before the revolution we find leading FAI member D. A. Santillan arguing that the “local Council of Economy will assume the mission of defence and raise voluntary corps for guard duty and if need be, for combat” in the “cases of emergency or danger of a counter-revolution.” These Local Councils would be a federation of workplace councils and would be members of the Regional Council of the Economy which, like the Local Council, would be “constitute[d] by delegations or through assemblies.” [After the Revolution, p. 80 and pp. 82–83] Thus defence of a free society is based on the federation of workers’ councils and so directly controlled by the revolutionary population. This can also be seen in the Spanish CNT’s 1936 resolution on Libertarian Communism in the section entitled “Defence of the Revolution”:

“We acknowledge the necessity to defend the advances made through the revolution ... So ... the necessary steps will be taken to defend the new regime, whether against the perils of a foreign capitalist invasion ... or against counter-revolution at home. It must be remembered that a standing army constitutes the greatest danger for the

*The Threatening Catastrophe and How to Avoid It*, Martin Lawrence Ltd., undated.

... revolution, since its influence could lead to dictatorship, which would necessarily kill off the revolution ... The people armed will be the best assurance against any attempt to restore the system destroyed from either within or without ... Let each Commune have its weapons and means of defence ... the people will mobilise rapidly to stand up to the enemy, returning to their workplaces as soon as they may have accomplished their mission of defence...

“1. The disarming of capitalism implies the surrender of weaponry to the communes which be responsible for ensuring defensive means are effectively organised nationwide.

“2. In the international context, we shall have to mount an intensive propaganda drive among the proletariat of every country so that it may take an energetic protest, calling for sympathetic action against any attempted invasion by its respective government. At the same time, our Iberian Confederation of Autonomous Libertarian Communes will render material and moral assistance to all the world’s exploited so that these may free themselves forever from the monstrous control of capitalism and the State.” [quoted by Jose Peirats, *The CNT in the Spanish Revolution*, vol. 1, p. 110]

Which was precisely what the CNT did do in July 1936 when faced with the fascist coup. Unfortunately, like the Makhnovists, the CNT militias were betrayed by their so-called allies on the left. The anarchist troops were not given enough arms and were left on the front to rot in inaction. The “unified” command by the Republican State preferred not to arm libertarian troops as they would use these arms to defend themselves and their fellow workers against the Republican and Communist led counter-revolution. Ultimately,
the “people in arms” won the revolution and the “People’s Army” which replaced it lost the war (see José Peirats’ *The CNT in the Spanish Revolution*, Abel Paz’s *Durruti in the Spanish Revolution*, Vernon Richard’s *Lessons of the Spanish Revolution* or Noam Chomsky’s *Objectivity and Liberal Scholarship*).

While the cynic may point out that, in the end, these revolutions and militias were defeated, it does not mean that their struggle was in vain or a future revolution will not succeed. That would be like arguing in 1940 that democracy is inferior to fascism because most democratic states had been (temporarily) defeated by the Axis powers. It does not mean that these methods will fail in the future or that we should embrace apparently more “successful” approaches which end in the creation of a society the total opposite of what we desire (means determine ends, after all, and statist means will create statist ends and apparent “successes” — like Bolshevism — are the greatest of failures in terms of our ideas and ideals). All we are doing here is pointing how anarchists have defended revolutions in the past and that these methods were successful for a long time in face of tremendous opposition forces.

Thus, in practice, anarchists have followed libertarian theory and created self-managed forms of self-defence against attempts to re-enslave a free people. In the end, an anarchist revolution can be defended only by applying its ideas as widely as possible. Its defence rests in those who make it. If the revolution is an expression of their needs, desires and hopes then it will be defended with the full passion of a free people. Such a revolution may be defeated by superior force, who can tell? But the possibility is that it will not and that is what makes it worth trying. To not act because of the possibility of failure is to live half a life.

Anarchism calls upon everyone to live the kind of life they deserve as unique individuals and desire as human beings. Individually we can make a difference, together we can change the world.

This bibliography lists all the books quoted in the FAQ. However, details for some of these books is missing. This information will also be added to over time. Some books are listed in more than one edition. This is due to the process of revising the FAQ for publication and using the most recent versions of books quoted. Once the revision is complete, the old details will be removed.

The bibliography is split into four sections: Anthologies of Anarchist authors; books by anarchists and other libertarians; books about anarchism, anarchists and anarchist history by non-libertarians; and books by non-anarchists/libertarians.

frankness among members and proscription of any Jesuitical methods in their relationships ... When a member has to say anything against another member, this must be done at a general meeting and in his presence. **General fraternal control** of each other ... Everyone’s personal intelligence vanished like a river in the sea in the collective intelligence and all members obey unconditionally the decisions of the latter.

“All members are equal; they know all their comrades and discuss and decide with them all the most important and essential questions bearing on the programme of the society and the progress of the cause. The decision of the general meeting is absolute law... The society chooses an Executive Committee from among their number consisting of three or five members who should organise the branches of the society and manage its activities in all the regions of the [Russian] Empire on the basis of the programme and general plan of action adopted by the decision of the society as a whole... This Committee is elected for an indefinite term. If the society ... the People’s Fraternity is satisfied with the actions of the Committee, it will be left as such; and while it remains a Committee each member ... and each regional group have to obey it unconditionally, except in such cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all ... have participated equally in the discussion of them... In such a case members of the group must halt the execution of the Committee’s orders and call the Committee to judgement before the general meeting ... If the general meeting is discontented with the Committee, it can always substitute another one for it... Any member or

context — and the awkward fact that Marxists have also favoured secret groupings in the face of similar regimes.

Second, it should be noted that in 1865–6 Bakunin was just becoming an anarchist and this period “represents the transition from the revolutionary nationalism of his middle-years to the revolutionary anarchism of his last period.” The “rituals” of the International Brotherhood were not reflected in later organisations because, as Bakunin admitted to a recruit, “they aren’t necessary. We invented that for the Italians”. In other words, they reflected the revolutionary traditions of the democratic conspiracies of that country rather than his own ideas, something confirmed by James Guillaume, his associate in the Alliance of Social Democracy, who recounted this, Bakunin’s group in the First International, “had little resemblance to ‘the classic type of secret society where one had to obey orders coming from above.” Bakunin’s organisation was nothing more than a ‘free association of men who were uniting for collective action, without formalities, without ceremonies or mysterious rites.’” As for the Brotherhood, “the constitution thus laid down was to be regarded as provisional; for when the Brotherhood attained a membership of seventy, a constituent assembly was to be convened which would determine the definite rules and programme of the organisation.” [E.H. Carr, Michael Bakunin, p. 320, p. 316, p. 357 and p. 315]

Third, this summary is simply inaccurate. To show this, we shall quote from Bakunin’s letter to the Russian Nihilist Sergy Nechayev in which he explains the differences in their ideas. He discusses the “principles and mutual conditions” for a “new society” of revolutionaries in Russia (noting that this was an “outline of a plan” which “must be developed, supplemented, and sometimes altered according to circumstances”):

“Equality among all members and the unconditional and absolute solidarity — one for all and all for one — with the obligation for each and everyone to help each other, support and save each other... Complete
McNally then quotes "one historian" on Bakunin. It should be noted that not even providing a name makes evaluating the accuracy of the historian’s work impossible and so leaves the reader in the dark as to whether the historian does provide a valid account of Bakunin’s ideas. However, after investigation the historian in question is George Lichtheim whom McNally feels provides "the most reliable guides to early socialist thought" presumably because his account chimes with all the standard Marxist prejudices, assumptions and errors about anarchism (significantly McNally ignores Lichtheim’s statement that Bakunin’s supported “anti-authoritarian collectivism”). A socialist, Lichtheim opposed Marxist-Leninism while presenting a sceptical but superficial account of anarchism. This can be seen from the words McNally quotes:

“The International Brotherhood he founded in Naples in 1865–66 was as conspiratorial and dictatorial as he could make it, for Bakunin’s libertarianism stopped short of the notion of permitting anyone to contradict him. The Brotherhood was conceived on the Masonic model, with elaborate rituals, a hierarchy, and a self-appointed directory consisting of Bakunin and a few associates.” [A Short History of Socialism, p. 126]

First, it should be noted that Bakunin considered secret societies as necessary because, at the time, most countries were monarchies and did not have basic civil liberties. Bakunin had been imprisoned by the Tsar for his activities during the 1848 revolution and so had personal experience of the fate of revolutionaries who were caught by these regimes. As Murray Bookchin argues, “Bakunin’s emphasis on conspiracy and secrecy can be understood only against the social background of Italy, Spain, and Russia the three countries in Europe where conspiracy and secrecy were matters of sheer survival.” [The Spanish Anarchists, p. 24] McNally ignores the historical

Rowbotham, Sheila, Hidden from History: 300 Years of Women’s Oppression and the fight against it, Pluto Press, London, 1977.

not aim to seize political power (unlike Marxists) and so it “rule[d] out any idea of dictatorship and custodial control.” All it could do was to “assist the birth of the revolution by sowing ideas corresponding to the instincts of the masses” and act “as intermediaries between the revolutionary idea and the popular instinct.” It “help[s] the people towards self-determination on the lines of the most complete equality and the fullest freedom in every direction, without the least interference from any sort of domination.” [Michael Bakunin: Selected Writings, p. 172 and p. 191] The “sole aim of a secret society must be, not the creation of an artificial power outside the people, but the rousing, uniting and organising of the spontaneous power of the people”. It “does not foist upon the people any new regulations, orders, styles of life, but merely unleashes its will and gives wide scope to its self-determination and social organisation, which must be created by itself from below and not above. The organisation must accept in all sincerity the idea that it is a servant and a helper, but never a commander, of the people, never under any pretext its manager, not even under the pretext of the people’s welfare.” The secret society “acts on the people only by the natural personal influence of its members who are not invested with any power” and so this “does not threaten the liberty of the people because it is free from all official character. It is not placed above the people like state power because its whole aim, defined by its programme, consists of the fullest realisation of the liberty of the people.” [quoted by Michael Confino, Daughter of a Revolutionary, p. 250, pp. 258–9 and p. 261]

As we discuss in more detail in section J.3.7, the key to understanding the role of Bakunin’s secret societies is to recognise that rather than seek to be elected into positions of power, they would work within popular organisations at the base and argue their ideas and win others over to them (i.e., their “natural personal influence”). This is why Bakunin considered such organisations as being no danger to popular liberty — by not having power they could not force their ideas onto others, unlike a new state regime. All this is ignored by McNally.
As noted in section 4, Proudhon had already raised the idea of recallable delegates in the 1848 revolution and it was his followers who applied them in 1871. Given McNally’s praise of the Paris Commune and the Russian soviets, it seems strange that Bakunin’s comments with regards to revolutionary social organisation with its obvious parallels to both should not be mentioned. Perhaps because to do so would totally undermine his case? Thus rather than being “overwhelmingly elitist and authoritarian” Bakunin’s ideas on a future society have marked similarities to the actual structures created by working people in struggle and are marked by libertarian and self-managed visions and concepts — as anyone familiar with Bakunin’s work would know.

The key difference between Bakunin and Lenin is that for the former turning the soviets into a state (even a so-called “workers’ state”) as desired by the latter would mean that power moved from the bottom to the top, empowering the few at the expense of the many. Given that Lenin’s aim was the creation of a Bolshevik government it comes as no surprise that this “central slogan” of the revolution was quickly violated (see section H.1.7). As Bakunin once put it, there is the “Republic-State” and there is “the system of the Republic-Commune, the Republic-Federation, i.e. the system of Anarchism. This is the politics of the Social Revolution, which aims at the abolition of the State and establishment of the economic, entirely free organisation of the people — organisation from bottom to top by means of federation.” [The Political Philosophy of Bakunin, p. 314] The difference is fundamental and not simply a question of words (see section H.2.1).

The question now arises of how Bakunin thought revolutionaries should influence both working class struggle and revolution. While not completely libertarian, Bakunin’s ideas on this issue are different than McNally’s summary would suggest.

The aim of the political grouping was to exercise a “natural influence” on the members of unions and associations, seeking to convince them of the validity of anarchist ideas. The political group did

The Life and Death of Leon Trotsky, Haymarket Books, Chicago, 2016

How is this federation of workers councils based on elected, mandated and recallable delegates organised from the bottom-up “elitist and authoritarian”? Compare this to McNally’s own words on the soviets of the Russian Revolution:

“The Russian revolution was based upon a wholly new kind of social organisation, the workers’ council or soviet. These councils, based on elected delegates from the workplace and the neighbourhoods, became the new decision-making bodies of Russia. They were organs of direct democracy whose delegates, like those of the Paris Commune, could be recalled by the electors. The soviets represented a new form of mass democracy. It was for this reason that Lenin and Trotsky made the demand for ‘All power to the soviets!’ the central slogan of the Russian revolution.”
posed the Russian Empire and he wished “the destruction of the Empire of All the Russias” and supported national liberation struggles of nationalities oppressed by Russia (and any other imperialist nation). [The Basic Bakunin, p. 162] Unlike Proudhon, he supported Polish National liberation although he recognised that “its leading parties, which are still drawn primarily from the gentry, have been unable to renounce their state-centred program” and hoped that the national movement would embrace economic change and seek the “liberation and renewal of their homeland in social revolution”. [Statism and Anarchy, p. 40]

McNally moves on to “Bakunin’s organisational methods”, stating that they “were overwhelmingly elitist and authoritarian.” This assertion completely misunderstands Bakunin’s ideas on how revolutionaries should organise and influence working class organisations as well as the revolutionary process. Before turning to these, we must discuss Bakunin’s views on social organisation as these indicate what his “utopia” (to use McNally’s word) would be like and place his ideas on how anarchists should organise into context. If this is not done then Bakunin cannot be understood nor how later anarchists revised his ideas.

We must start by pointing out that Bakunin’s viewpoints on the organisational methods of mass working class organisations and those of political groupings were somewhat different. As we show in section 9, Bakunin had what would now be termed a syndicalist position on the labour movement and so he rejected organising political parties and electioneering (“political action”) in favour of “the development and organisation\85 of the social (and, by consequence, anti-political) power of the working masses as much in the towns as in the countryside.” [Michael Bakunin: Selected Writings, pp. 197–8] This was reflected in his ideas on social revolution as expressed in 1868:

“the federative Alliance of all working men’s associations\85 will constitute the Commune ... by the creation

---

Proudhon, Bakunin supported trade unions and strikes, equality for women and revolution as well as being far more explicit in support for the collectivisation of property.

This can be seen from Bakunin’s last book in which he argued that the International Working Men’s Association “has shown the proletariat the objective it must achieve and at the same time has indicated to it the ways and means of organising a popular force”, namely “a voluntary alliance of agricultural and factory worker associations, communes, provinces and nations” organised “from below upwards”. Socialism would be created “only through concerted action by the proletariat of all countries, whose organisation first on an economic basis is precisely the object of the International”, by means of “factory, artisan, and agrarian sections”. A “federal organisation, from below upwards, of workers’ associations, groups, communes, districts, and, ultimately, regions and nations” was needed “for real as opposed to fictitious freedom”. This “popular federation” would be “based on emancipated labour and collective property” as the “mode of future production” would be “producers’ cooperatives” and “all forms of land and capital must become collective property”. He also “demand[ed], along with liberty, the equality of rights and obligations for men and women.” [Statism and Anarchy, p. 32, p. 33, p. 49, p. 51, p. 13, p. 22, p. 201 and p. 219]

So Bakunin disagreed with Proudhon on many subjects. He did share Proudhon’s support for industrial self-management, self-organisation in workers’ associations, his hatred of capitalism and his vision of a decentralised, libertarian, federal, “from below” socialist society. It is true that, as McNally notes, “Bakunin shared [Proudhon’s] anti-semitism” but he fails to mention Marx and Engels’ many racist remarks against Slavs and other peoples. Also it is not true that Bakunin “was a Great Russian chauvinist convinced that the Russians were ordained to lead humanity into [the] anarchist utopia.” Rather, Bakunin (being Russian) hoped Russia would have a libertarian revolution, but he also hoped the same for France, Spain, Italy and all countries in Europe (indeed, the world). He op-
South during the American Civil War is related to the revolutionary anarchist position.

To conclude, with the exception of his sexism McNally’s account of Proudhon’s ideas is either completely false (on small-scale property, democracy, racial equality) or, at best, half-truths turned into full-lies (his anti-Semitism and position of strikes). The scale of the distortion is simply staggering, suggesting he never consulted a single book by Proudhon. In terms of Proudhon’s sexism and anti-Semitism, dismissing a theory based on the personal failings of those who advocate it only convinces the superficial. Proudhon rejected many of the assumptions of his times, yet he did not rise above all of them. As George Lichtheim suggests (in a passage McNally could not bring himself to quote), “[i]n all these respects Proudhon simply reflected the milieu from which he had sprung. His mental crudities were commonplace and not peculiar to him. Half peasant, half townsman, he was the embodiment of the average French workingman of his day”. [The Origins of Socialism, p. 87] Subsequent anarchists (including Bakunin) overcame the limitations of Proudhon the man by using Proudhon the theorist. McNally, by personalising the matter, seeks to deny the significant contributions Proudhon made to socialism (as can be seen by the Paris Commune). If he were more confident in his own political tradition he would not have to do this as Leninism should be able to convince by presenting an accurate account of the ideas of others and showing their weaknesses. That McNally did not do this for Proudhon shows that, for all his flaws, his argument that socialism needs to be decentralised, federal and self-managed still rings true. The failure of the Bolshevik regime confirms this.

5. Why are McNally’s comments on Bakunin a distortion of his ideas?

McNally then moves on to Bakunin whom he states “shared most of Proudhon’s views.” The truth is somewhat different. Unlike

Leon Trotsky on China, Monad Press, New York, 2002

How Did Stalin Defeat the Opposition?, available at: http://www.marxists.org/archive/trotsky/works/1935-sta.htm

Understandable given the culture they lived in. In other words, Proudhon, Marx and Engels were people of their times and so it is unsurprising that certain of their opinions shock and disgust us. The question is, are these views at the core of their politics or do they reflect personal bigotries in contradiction with them? In all three cases, the answer is obvious and so such attacks on Proudhon fail to convince particularly if they are generalised to all anarchists, as if Proudhon’s opposition to strikes or his sexism were remotely applicable to the likes of Bakunin, Kropotkin or Goldman!

Also, it is somewhat ironic that McNally mentions Proudhon’s alleged “support” for the South as the Leninist tradition he places his own politics is renown for supporting various dictatorships during wars. For example, during the Vietnam war the various Leninist groups called for victory to North Vietnam, a Stalinist dictatorship while during both Gulf Wars they called for victory to Iraq, another dictatorship. In other words, they “tolerated” and “supported” anti-working class regimes, dictatorships and repression of democracy. They stress that they do not politically support these regimes, rather they wish these states to win in order to defeat the greater evil of imperialism. In practice, of course, such a division is hard to defend — for a state to win a war it must repress its own working class and so, in calling for a victory for a dictatorship, they must support the repression and actions that state requires to win the war (as an explosion of resistance, class struggle and revolt in the “lesser imperialist power” will undermine its war machine and so lead to its defeat). The notion that such calls do not mean support for the regime is false and so McNally’s comments against Proudhon as well as being inaccurate also smack of hypocrisy — his political tradition has sided with repressive dictatorships during wars in the name of wider political aims and theory. In contrast, anarchists have consistently raised the idea of

“No war but the class war” in such conflicts (see section A.3.4). Proudhon’s position of refusal to side with either the North or the
situation in Russia after the emancipation of the serfs (1861) is analogous. Liberated serfs without land would be helpless. Economic guarantees must be developed alongside political ones. The corollaries of equality before the law are racial equality, equality of condition, and an approach toward equality of fortunes.” [“The Federal Idea in French Political Thought”, Publius, vol. 5, No. 3, p. 41]

There is an obvious flaw in his position, namely that “Proudhon suggests that nothing will have been gained if the blacks were freed only to become wage earners, as if the condition of the wage-earner were not closer to the realisation of personal autonomy than the condition of a well-treated slave.” [Nelson, Op. Cit., p. 43] Yet his fears should not be ignored as the Southern states “enacted ‘black codes’ which made the freed slaves like serfs” after the end of the Civil War. [Zinn, Op. Cit., p. 199] As one Black newspaper put it: “The slaves were made serfs and chained to the soil … Such was the boasted freedom acquired by the coloured man at the hands of the Yankees.” [quoted by Zinn, Op. Cit., pp. 196–7] However, these reservations about Proudhon’s arguments — which did contain relevant concerns — do not make McNally’s comments any more accurate. That he repeats someone else’s mistakes do not matter as he should have taken the time to verify the claims by consulting Proudhon’s own works — particularly given the serious nature of the assertions being made.

As can be seen, the notion that Proudhon was “a rabid racist” cannot be supported. While he undoubtedly made the occasion racist remark (usually anti-Jewish), this was not reflected in his political ideas. Similarly, if, as Lichtheim suggests “dislike of Germans, Italians, Poles” is considered important, then why are similar dislikes of other nationalities by Marx and Engels not worthy of note? Neither was free from anti-Semitic and other racist comments but anarchists consider these as relatively unimportant as they are un-

Watson, Andrew, *From Red to Green: Green Politics and environmentalism cannot save the environment. A socialist politics can*, Privately Published, 1990.

Weisbrot, Mark, *Globalisation for Whom?*, available at: http://www.cepr.net/Globalization.html

meant that blacks should be “as free as the whites by nature and human dignity.” Therefore “the principle of equality before the law must have as corollaries: 1) the principle of equality of races, 2) the principle of equal conditions and 3) the principle of increasingly similar, although never completely equal, fortunes.” This meant that “[i]n a federal republic, the proletariat and slavery both seem unacceptable; the tendency must be to abolish them both.” So, Proudhon argued, “grant equal political rights to both the emancipated blacks and those kept in servitude until now” and proclaim them “fellow citizens and equals”. “The federative principle,” he summarised, “here appears closely related to that of the social equality of races and the equilibrium of fortunes. The political problem, the economic problem and the problem of races are one and the same problem, and the same theory and jurisprudence can resolve that problem.” [quoted by McKay, Op. Cit., p. 25]

As can be seen, McNally and Lichtheim completely distort Proudhon’s actual position. A more accurate account of this is given by academic Ralph Nelson:

“...But it would be naive to think that it is just the peculiar institution of slavery that Proudhon detests. He finds in the North also the principle of inequality and class distinction. If he is critical of both sides in the war, it is because the federative principle is incompatible with inequality, whether the agrarian variety of master and slave or the modern version of capital and labour ...

“Proudhon didn’t really believe that the Union side would emancipate the Negro, but would fix on deportation as the solution to the problem. The union could be saved only by the liberation of the Negroes, granting them full citizenship, and by a determination to stop the growth of the proletariat. For what is gained for the former slaves, if emancipation means that they will become members of the proletariat? He notes that the
self-image and rhetoric of America far better than the grim reality).
Indeed, abolition of slavery was raised as a war aim only in 1862
as a way of boosting the North’s chances of winning.

Proudhon recognised this obvious fact, arguing consistently ap-
plying the federal principle would mean “progressively raising the
Black peoples’ condition to the level of the Whites.” However, the
North “cares no more than the South about a true emancipation,
which renders the difficulty insoluble even by war and threatens to
destroy the confederation.” Rather than express “tolerance” for slavery
he wrote “the enslaving of one part of the nation is the very negation
of the federative principle.” [Property is Theft!, pp. 698-9f] Both
sides were “fighting only over the type of servitude” and so both
must “be declared equally guilty blasphemers and betrayers of the
federative principle and banned from all nations.” The union could
only be saved if the North “grants the blacks their civil rights” and
pursues radical economic reform by “providing possessions for the
wage-workers and organising, alongside political guarantees, a sys-
tem of economic guarantees.” This last was key, for the slaves had
“acquired the right of use and habitation on American soil.” Justice
demanded that both the freed slaves and wage workers must be
given means of production (land, tools, workplaces) and other eco-
nomic guarantees as “the conversion of black slaves to the proletariat”
would mean that “black servitude will only change its form” rather
than ended. Both “slavery and the proletariat are incompatible with
republican values.” [quoted by Iain McKay, “Neither Washington
nor Richmond: Proudhon on Racism & the Civil War”, Anarch-
Syndicalist Review, no. 60, pp. 25–6]

Proudhon stressed “with regard to black workers, that physi-
ologists and ethnographers recognise them as part of the same species
as whites; that religion declares them, along with the whites, the chil-
dren of God and the church, redeemed by the blood of the same Christ
and therefore spiritual brothers; that psychology sees no difference be-
tween the constitution of the Negro conscience and that of the white,
no more than between the comprehension of one and the other.” This

thing wrote before or after it. That this was a one-off rant suggests
that when it was written something caused Proudhon’s (culturally
reflective, but still inexcusable) anti-Semitic feelings to intensify
so resulting in this rant. Significantly, Proudhon’s beloved mother
died that very month (December 1847) which suggests that it re-
lected an outlet for the deep despair he must have been feeling.
Given that he never expressed this view before 1847 nor afterwards
it should be considered as a quickly forgotten aberration produced
by the pressures of a family crisis rather than something indicative
of his politics.

So quoting a single rant from his private notebook presents a
false impression of Proudhon’s ideas on race. To imply that a never
repeated comment made in a private notebook and completely un-
known until over a century later was part of his public work or a
central aspect of Proudhon’s ideas presents a completely false im-
pression of both them and their influence — particularly given his
discussion of race in The Federative Principle, to which we now
turn.

McNally and Lichtheim proclaim that Proudhon “publicly” ex-
pressed “tolerance for slavery”, “opposed emancipation for the Amer-
ican blacks and backed the cause of the southern slave owners” be-
cause he was a racist. This is not the case, as can be seen from
the extended discussion on slavery in the only major work written
during the American Civil War, The Federative Principle. First,
though, it must be stressed that the American Civil War had very
little to do with slavery and far more to do with conflicts within
the US ruling class. As Howard Zinn noted, the war “was not over
slavery as a moral institution ... It was not a clash of peoples ... but
of elites. The northern elite wanted economic expansion — free land,
free labour, a free [national] market, a high protective tariff for man-
ufacturers, a bank of the United States. The slave interests opposed
all that” [A People’s History of the United States, pp. 188–9]
Slavery was never the driver for the war, regardless of how this
has retroactively become the main cause (because this fits into the
is incorrect to extend this to a rejection of anarchism as such — particularly given the obvious contradiction of this position with the rest of his ideas. As noted in section 3, other anarchists rejected these reactionary ideas and consistently applied libertarian principles to within the family.

Lastly, McNally states that Proudhon “was a rabid racist reserving his greatest hatred for Jews, whose ‘extermination’ he advocated. He opposed emancipation for the American blacks and backed the cause of the southern slave owners during the American Civil War.” To support his claims, he quotes George Lichtheim (whom he considers as having “written quite accurately”) stating that Proudhon expressed “tolerance for slavery (he publicly sided with the South during the American civil war)” and “he believed in inherent inequalities among the races”. It will come as no surprise that this is either completely false or not entirely true.

Let us take the question of Proudhon’s anti-Semitism. It is true that Proudhon made the occasional anti-Semitic remark in his writings but as Robert Graham correctly summarises “anti-semitism formed no part of Proudhon’s revolutionary programme.” [“Introduction”, General Idea of the Revolution, p. xxxvi] In terms of the claim that he advocated the “extermination” of the Jews what McNally does not mention is that this comes from a single entry in his private Notebooks and was unknown until a hundred years after his death. The intellectual dishonesty of this should be clear and, unsurprisingly, he does not prove that this was anything more than a passing rant nor that Proudhon held this view before 1847 or after, either publicly or privately. In terms of the former, it is the case that Proudhon’s anti-Semitism is limited to a few passing Jewish stereotypes (which, sadly, reflected French culture at the time) in a few of his minor articles and books. A reader consulting his most important works would not come across a single anti-Semitic remark and many proclamations in favour of racial equality.

This does not mean that this private remark should not be condemned — it should — but it does not follow that we reject every-
Appendix: Anarchism and Marxism

This appendix exists to refute some of the many anti-anarchist diatribes produced by Marxists. While we have covered why anarchists oppose Marxism in section H, we thought it would be useful to reply to Marxist webpages and books whose content is not explicitly covered in that section. In this way we hope to indicate that Marxism is a flawed theory, flawed even to the extent of not being able to present a honest critique of anarchism. This consistent attempt to smear anarchism and distort its history and ideas is no coincidence — rather it is required in order to present Marxism as the only viable form of socialism and, more importantly, to hide the fact that much of the populist Marxist rhetoric was, in fact, said by anarchists first and latter stolen by Marxists to hide the authoritarian basis of their politics.

One last point. We are aware that we repeat many of our arguments in these appendices. That, unfortunately, is avoidable for two reasons. Firstly, Marxists usually repeat the same false assertions against anarchism and so we have to answer them each time they appear. Marxists seem to subscribe to the point of view that repeating an error often enough makes it true. Secondly, we have tried to make each appendix as self-contained as possible and that meant repeating certain material and arguments to achieve this. We hope the reader understands.
strat and not indicating that there are different forms of it (reflecting different class interests), McNally is confusing the issue. He fails to inform his readers that while Proudhon repeatedly attacked the former he advocated the latter. To use terms McNally should be familiar with, Proudhon attacked bourgeois democracy in favour of working-class democracy rooted in mandates, recall, decentralisation and federalism — what would be better termed “self-management” but which Proudhon came to call “labour democracy” which would be “the IDEA of the new Democracy.” In the state, “universal suffrage is the strangulation of the public conscience, the suicide of popular sovereignty, the apostasy of the Revolution” and to “make the vote for all intelligent, moral, democratic, it is necessary... to make the citizens vote by categories of functions, in accordance with the principle of the collective force”. This federative democracy would be applied in the community (communes) and industry (“the agricultural-industrial federation”), indeed all areas including the military where it was necessary to “abolish military conscription, organise a citizens’ army” based on “the right of the citizens to appoint the hierarchy of their military chiefs, the simple soldiers and national guards appointing the lower ranks of officers, the officers appointing their superiors.” [Op. Cit., pp. 724–5, pp. 676–7, p. 711, p. 407 and p. 443]

As can be seen, Proudhon’s position on democracy is not quite what McNally suggests. Under a centralised social system it simply meant the people “is confined to choosing its bosses and its charlatans every three or four years.” The issue for Proudhon was to create a system which allowed the people to govern itself and not hand power over to a few leaders — particularly when the majority often pass that power to demagogues like Louis-Napoleon. It was the case “that the only way to organise democratic government is to abolish government” for the State “is the external constitution of the social power... the people does not govern itself... We affirm ... that the people, that society, that the mass, can and ought to govern itself by itself... We deny government and the State, because we affirm that

Reply to errors and distortions in David McNally’s pamphlet “Socialism from Below”

In chapter three of his pamphlet Socialism from Below, David McNally decides to expose (what he calls) “The Myth Of Anarchist Libertarianism.” In reality, his account is so distorted and, indeed, dishonest that all it proves is that Marxists will go to extreme lengths to attack anarchist ideas. As Brain Morris points out, defending the Leninist tradition and ideology “implies ... a compulsive need to rubbish anarchism.” [Ecology & Anarchism, p. 128] McNally’s pamphlet is a classic example of this. As we will prove, his “case” is a mishmash of illogical assertions, lies and, when facts do appear, their use is almost always a means of painting a false picture of reality.

It must be stressed that there is nothing new or original in McNally’s pamphlet. It is simply an unthinking repetition of previous Marxists attacks on anarchism, starting with Marx’s dishonest diatribe against Proudhon The Poverty of Philosophy, and is mostly based on Hal Draper’s The Two Souls of Socialism (McNally states he “should also record here a debt of inspiration of [this] now-out-of-print pamphlet by Draper”). While McNally’s errors are commonplace within what passes for Marxist scholarship, this does not excuse his repeating of them without first checking their accuracy (or, more correctly, their inaccuracy). If more Marxists took the time to validate their prejudices and assumptions against what Proudhon, Bakunin and other anarchists wrote then it would be possible to have a real discussion on what genuine socialism (one, as Proudhon and Bakunin stressed long before Marxists appropriated the term, “from below”) entails.

It must be noted that since this appendix was first written in 2000, David McNally has distanced himself from his pamphlet’s critique of anarchism. In an end-note in a book written in 2006 he described this welcome rethink:
While it seems unlikely this was in response to reading our critique, it does show that it was correct. Unfortunately it took McNally over 20 years to acknowledge that his essay from 1984 gave a distinctly distorted account of anarchism (a distortion originally circulated in Marxist circles in the 1960s with Draper’s pamphlet). Perhaps significantly, McNally no longer seems to be associated with the sister organisations of the British Socialist Workers Party (a group whose distortions of anarchism are many and infamous). Sadly, the damage has been done and his and Draper’s flawed account of anarchism (and Marxism) has become all-too-commonplace within radical circles — even in libertarian circles, some take these assertions on Proudhon and Bakunin at face value and do not seek to verify the claims made. This is unfortunate for, as we will see, while sometimes correct (for example, Proudhon’s disgusting anti-feminism) most of the claims are false or, at best, half-truths turned into full-lies by ignoring context or other relevant facts.

We hope that this reply will ensure today’s radicals will gain a fuller understanding of the ideas — and limitations! — of Proudhon and Bakunin and, more importantly, how they influenced subsequent anarchists and the development of libertarian ideas. It will also allow an informed discussion between Marxists and Anarchists on their areas of agreement and disagreement. McNally now argues that “it may be more helpful to try and defend a common political vision — such as socialism from below or libertarian socialism — as a point of reference” rather than fixate over labels like “Marxism”.

So, clearly, McNally is hardly presenting a fair summary of either Proudhon’s private notebooks, letters or his published works. This can be seen from his justly famous manifesto issued during the 1848 revolution which presents a better notion of his “ideal society”. It advocated “democratically organised workers’ associations” along with “universal suffrage and as a consequence of universal suffrage, we want implementation of the imperative mandate” otherwise “the people, in electing representatives, does not appoint mandatories but rather abjure their sovereignty!” This “is assuredly not socialism: it is not even democracy”. He also demanded: “Freedom of association”, “Freedom of assembly” and “Freedom of the press”. [Property is Theft!, p. 377 and p. 379]

Do all these quotes suggest a man who “violently opposed democracy”? Of course not. Proudhon opposed certain types of democracy (centralised, hierarchical, top-down, statist democracy) and was in favour of another kind (decentralised, federal, bottom-up, libertarian democracy). So when looking at quotes by Proudhon ripped from their context it is important to ask whether he is attacking the centralised, hierarchical democracy of the state or the decentralised, participatory democracy of federated self-managed workplaces and communes? By taking of “democracy” in the ab-
cial council within its own territory, is the only natural and legitimate representative of the Sovereign, and that therefore each locality should act directly and by itself in administering the interests which it includes, and should exercise full sovereignty in relation to them.” [Op. Cit., p. 595]

“Workers’ Associations are the locus of a new principle and model of production that must replace present-day corporations ... The principle that prevailed there, in place of that of employers and employees ... is participation, that is, the MUTUALITY of services supplementing the force of division and the force of collectivity.

“There is mutuality, in fact, when in an industry, all the workers, instead of working for an owner who pays them and keeps their product, work for one another ... extend the principle of mutuality that unites the workers of each group to all the Workers’ Associations as a unit, and you will have created a form of civilisation that, from all points of view — political, economic, aesthetic — differs completely from previous civilisations ...” [Op. Cit., p. 616]

“groups that comprise the confederation... would be ... self-governing, self-judging and self-administering in complete sovereignty... universal suffrage form its basis” [Op. Cit., p. 716]

“under the democratic constitution, insofar we can judge from its most salient ideas and most authentic aspirations, the political and the economic are one and the same, a sole and single system based upon a single principle, mutuality ... no longer do we have the abstraction of people’s sovereignty as in the ’93 [French] Constitution and the others that followed it, and in Rousseau’s Social or “anarchism.” [Op. Cit., p. 347] As we noted in our critique of his pamphlet, the term “socialism from below” has a distinctly anarchist feel to it, a feel distinctly at odds with Leninist ideology and practice. Moreover, as shown below, Lenin explicitly denounced “from below” as an anarchist idea — and his practice once in power showed that “from above” is part and parcel of Leninism in action. Sadly, most Leninists are unaware of this.

Finally, many Marxists reject Leninism: some for the original ideas of Marxism, such as the Socialist Party of Great Britain and its sister parties and some, like the council communists, for extension of them in the direction of revolutionary anarchist conclusions. As such, this critique should not be taken for a blanket rejection of all Marxists but rather a specific form of it, namely Leninism. Nor should it be taken for a blanket rejection of everything Marx or Marxists have argued. There any many forms of anarchism and many forms of Marxism, some of which are closer than others.

Many of the issues discussed in this appendix are also explored in section H of the FAQ and that should also be consulted.

1. Introduction

McNally begins by noting that “Anarchism is often considered to represent [a] current of radical thought that is truly democratic and libertarian. It is hailed in some quarters as the only true political philosophy [of] freedom.” Needless to say, he thinks that the “reality is quite different” and argues that “[f]rom its inception anarchism has been a profoundly anti-democratic doctrine. Indeed the two most important founders of anarchism, Pierre-Joseph Proudhon and Michael Bakunin, developed theories that were elitist and authoritarian to the core.” We will discover the truth of this assertion later.

First we must note that McNally uses the typical Marxist approach to attacking anarchism — namely to attack anarchists rather
than anarchism as such. British Anarchist Albert Meltzer summarised the flaws in this perspective well:

“Marxist-Leninists, faced with Anarchism, find that by its nature it undermines all the suppositions basic to Marxism. Marxism was held out to be the basic working class philosophy (a belief which has utterly ruined the working class movement everywhere). It holds that the industrial proletariat cannot owe its emancipation to anyone but themselves alone. It is hard to go back on that and say that the working class is not yet ready to dispense with authority placed over it ... Marxism normally tries to refrain from criticising anarchism as such — unless driven to doing so, when it exposes its own authoritarianism ... and concentrates its attacks not on Anarchism, but on Anarchists.” [Anarchism: Arguments for and Against, p. 62]

So when reading this or any critique of anarchism always remember that few people are completely consistent libertarians and determine whether the words written reflect a flaw in anarchism as such or whether they reflect a personal flaw of the thinker in question. Once this common-sense position is taken it quickly becomes clear that anything valid in McNally’s critique highlights the flaws of individuals who did not consistently rise to the levels implied by their ideas. This, most obviously, is the case with Proudhon’s sexism which is in contradiction with his support for liberty, equality and federalism. Unsurprisingly, his contemporary Joseph D’jacque wrote a critique of Proudhon’s sexist views in 1857, urging him to renounce “this gender aristocracy that would bind us to the old regime” and “speak out against man’s exploitation of woman.”: “Do not describe yourself as an anarchist, or be an anarchist through and through” [“On Being Human”, pp. 68–71, Anarchism: A Documentary History of Libertarian Ideas, Vol. 1, Robert Graham

of eligibility. It is the same with all public functions, whether of administration or instruction.” [Property is Theft!, p. 118]

“In order that association may be real, he who participates in it must do so ... as an active factor; he must have a deliberative voice in the council ... everything regarding him, in short, should be regulated in accordance with equality. But these conditions are precisely those of the organisation of labour.” [Op. Cit., p. 2156]

“In the republic, everyone reigns and governs ... Representatives are plenipotentiaries with the imperative mandate and are recallable at will ... Here is the republic! Here is the People’s sovereignty! [Op. Cit., p. 279]

“At present we are a quasi-democratic Republic: all the citizens are permitted, every third or fourth year, to elect, first, the Legislative Power, second, the Executive Power. The duration of this participation in the Government for the popular collectivity is brief; forty-eight hours at the most for each election. For this reason the correlative of the Government remains nearly the same as before, almost the whole Country. The President and the Representatives, once elected, are the masters; all the rest obey. They are subjects, to be governed ...” [Op. Cit., p. 573]

“In place of laws, we will put contracts [i.e. free agreement]. — No more laws voted by a majority, nor even unanimously; each citizen, each commune or corporation [i.e., self-managed industry], makes its own laws.” [Op. Cit., p. 591]

“Unless democracy is a fraud, and the sovereignty of the People a joke, it must be admitted that each citizen in the sphere of his industry, each municipal, district or provin-
Trotsky from 1918 to 1923. Then it becomes the case that socialism no longer “depends upon the existence of democratic organisation that can control society from below” nor “presupposes that workers are running the state.” If, in 1861, Proudhon expressed his frustration at those on the left who made exceptions to democracy for illogical reasons (the creation of a feudal Poland) what would have been his views of socialists who made exceptions for the Bolshevik regime?

Even without the context for the quotes McNally presents, anyone with a basic grasp of anarchist ideas would know that he fails to quote the many statements Proudhon made in favour of democracy. Why should the apparently anti-democratic quotes represent anarchism and not the pro-democratic ones? Which ones are more in line with anarchist theory and practice? Surely the pro-democratic ones. Hence we find Proudhon arguing that “[i]n democratising us, revolution has launched us on the path of industrial democracy” and that his People’s Bank “embodies the financial and economic aspects of modern democracy, that is, the sovereignty of the People, and of the republican motto, Liberty, Equality, Fraternity.”

We have already mentioned Proudhon’s support for workers’ self-management of production and his People’s Bank was also democratic in nature: “A committee of thirty representatives shall be set up to see to the management of the Bank … They will be chosen by the General Meeting … [which] shall consist of not more than one thousand nominees of the general body of associates and subscribers … elected according to industrial categories and in proportion to the number of subscribers and representatives there are in each category.” [Selected Writings of Pierre-Joseph Proudhon, p. 63, p. 75 and p. 79] Thus, instead of bourgeois democracy Proudhon proposes industrial and communal democracy:

“every industry needs … leaders, instructors, superintendents, etc. … they must be chosen from the workers by the workers themselves, and must fulfil the conditions

[ed.], p. 71] Later anarchists like Bakunin and Kropotkin likewise applied anarchist principles consistently on this issue, a fact McNally cannot bring himself to admit.

Second, McNally lamely notes that “[w]hile later anarchists may have abandoned some of the excesses of their founding fathers their philosophy remains hostile to ideas of mass democracy and workers’ power.” Thus, we have the acknowledgement that not all anarchists share the same ideas and that anarchist theory has developed since 1876 (the year of Bakunin’s death). This is to be expected as anarchists are not Proudhonists or Bakuninists — we do not name ourselves after one person, rather we take what is useful from libertarian writers and ignore the rubbish. Malatesta’s words are applicable here: “We follow ideas and not men, and rebel against this habit of embodying a principle in a man.” [Errico Malatesta: His Life and Ideas, p. 199] However, this is beside the point as McNally’s account of the ideas of Proudhon and Bakunin is simply false — indeed, so false as to make you wonder if he is simply incompetent as a scholar or seeks to present a patchwork of lies as fact and “theory.”

Third, McNally’s approach rests on selective quoting, lack of context and an unwillingness to research the assertions he is making. This is important as we are discussing thinkers who wrote over a period of many decades and whose works and letters reflected the highs and lows of a person’s life as well as the social movement they were part of. This means that in the depths of personal crisis or the repression of popular movements even the most consistent thinker can write passages which are in contradiction to the thrust of the works they are best known for. To quote such words from, say, private letters and ignore the books and articles which reflect a thinker’s ideas best and which influenced others presents a false picture, particularly if the context within which the letters were written are unmentioned. So it would be a distortion of the ideas of Marx and Engels to quote the numerous anti-Semitic insults against specific individuals from their private letters. As would be
expected, they were men of their age and expressed themselves in ways which today are, rightly, considered unacceptable (for those interested in such matters, Peter Fryer’s essay “Engels: A Man of his Time” should be consulted [John Lea and Geoff Pilling (eds.), The condition of Britain: Essays on Frederick Engels]). However, their few public racist comments could be considered worthy of note — although, if so, then they should, like those of Proudhon and Bakunin, be placed in the context of their other ideas and the culture they lived in rather than being used as an excuse to ignore their contributions to socialism. Sadly, McNally — like many Marxists — fails to do this, preferring dismissive finger-pointing instead.

Lastly, McNally ignores the anti-democratic, authoritarian and elitist aspects of his own political tradition. Given that leading Bolsheviks like Lenin, Trotsky and Zinoviev publicly advocated party dictatorship and one-man management of production, it is a distortion to ignore this when discussing “Socialism from Below”. Simply put, while anarchists have consistently advocated communal and industrial self-management since 1840 to today, the Marxist tradition has not.

McNally’s pamphlet, as will become clear, does not present anything new. It simply repeats what is sadly all-too-often the received wisdom about anarchists and anarchism in Marxist circles. As such, it is worth the time and effort to reply to. Not only will it show the limitations of the Marxist position on anarchism, it will also afford us the opportunity to show that not only is anarchism a more genuine “Socialism from Below” than Leninism but also that many of the ideas Marxists consider as their own were first argued by Proudhon and Bakunin.

In short, we will show why “Anarchism is often considered to represent current of radical thought that is truly democratic and libertarian” by contrasting what McNally asserts about it and what anarchist thinkers actually advocated. This will, unfortunately, produce a reply longer than the initial claims but this is unavoidable. We need to provide extensive quotes and arguments simply in order to
expression of the middle-class and proletarian masses. If it is not precisely the product of the national will, it is undoubtedly that of the national permission.” [Op. Cit., p. 110] McNally for all his talk of democracy does not tackle — does not even raise! — the question of what happens if the majority make authoritarian and repressive decisions, as it did in December 1851 and 1852. If, as the Republicans of Proudhon’s time argued, the voice of the people is the voice of God did that make Louis-Napoleon’s Presidency, coup and then Empire all legitimate? Proudhon argued no and, moreover, placed the underlying principle of democracy — freedom — above its expression within the (bourgeois) state. His writings explored how to secure mass participation in social life while minimising the possibility of tyranny. Thus the “federative system puts a stop to the agitation of the masses, to all the ambitions and incitements of demagogoy” [Property is Theft!, p. 708]

By stripping away the context, McNally turns his lament for the destruction of political freedom into a demand for it. The dishonesty is striking. It also raises some problems for McNally’s stated political position of being in favour of “democracy” — if anarchists are to be denounced because they “reject any decision-making process in which the majority of people democratically determine the policies they will support” then McNally is in a bind. The French people democratically determined to create an Empire and destroy what was left of their Republic. Presumably it would be “elitism” for him, like Proudhon, to denounce the decision and despair at those who made it? As we discuss in section 7, the anarchist position on democracy is driven precisely by the obvious fact that majorities can be wrong and oppressive. This does not imply “elitism”, quite the reverse.

We should also note that Marx dismissed the peasants as “a class of barbarians standing half outside of society” [Capital, vol. 3, p. 949] “In countries like France” the peasants “constitute far more than half of the population” but, he argued, they “cannot represent themselves, they must be represented. Their representative must at the

show the weakness of McNally’s assertions and to indicate where his own tradition advocated notions he — inaccurately — attacks anarchism for.

2. Is anarchism the politics of the “small property owner”?

McNally does start out by acknowledging that “anarchism developed in opposition to the growth of capitalist society. What’s more, anarchist hostility to capitalism centred on defence of the liberty of the individual.” However, he then distorts this actual historical development by arguing that “the liberty defended by the anarchists was not the freedom of the working class to make collectively a new society. Rather, anarchism defended the freedom of the small property owner — the shopkeeper, artisan and tradesman — against the encroachments of large-scale capitalist enterprise.”

Such a statement is, to say the least, a total distortion of the facts of the situation. Nor is it original. McNally is simply repeating Marx’s assertions against Proudhon who, Marx claimed, “wants to soar as the man of science above the bourgeois and the proletarians” but “is merely the petty bourgeois, continually tossed back and forth between capital and labour, political economy and communism.” [Collected Works, vol. 6, p. 178] It should be noted that Marx had not always thought this of the Frenchman:

“Not only does Proukhon write in the interest of the proletarians he is himself a proletarian, an ouvrier [worker]. His work [What is Property?] is a scientific manifesto of the French proletariat.” [Op. Cit., vol. 4, p. 41]

The change in perspective is unsurprising given that Marx thought his own ideology was that of the proletariat (whether the proletariat knew it or not) and, given his disagreements with Proudhon, the Frenchman had to represent some other class.
However, if we reject the assumption that classes only have one theory associated with them, then the weakness of the Marxist assertion becomes clear — particularly given that today there are no mass Marxist parties in spite of the fact that now, unlike in Marx’s day, the proletariat is the majority of the working class in most of the world’s countries.

It is important to remember that at the end of the 1840s over 80% of the population of France and Germany were peasants or artisans — what Marxists term the “petit-bourgeois”. As Marx and Engels admitted in The Communist Manifesto, in “countries like France” the peasants “constitute far more than half of the population.” This remained the case well after Proudhon’s death in 1865, with Marx commenting in the early 1870s that “the peasant forms a more or less considerable majority ... in the countries of the West European continent.” [The Marx-Engels Reader, p. 493 and p. 543] As Proudhon himself noted in 1851, in “a population of 36 millions, there are 24 millions occupied with agriculture” and of the remaining 12 million there where only 6 million “composing in part the wage-working class” [Property is Theft!, p. 558]

This social context is important and it is difficult to understand the positions thinkers took unless it taken into account. In the words of anarchist Gustav Landauer, Proudhon’s socialism “of the years 1848 to 1851 was the socialism of the French people in the years 1848 to 1851. It was the socialism that was possible and necessary at that moment. Proudhon was not a Utopian and a prophet; not a Fourier and not a Marx. He was a man of action and realisation.” [For Socialism, p. 108] Historian K. Steven Vincent makes the same point, arguing that Proudhon’s “social theories may not be reduced to a socialism for only the peasant class, nor was it a socialism only for the petite bourgeoisie; it was a socialism of and for French workers. And in the mid-nineteenth century ... most French workers were still artisans... French labour ideology largely resulted from the real social experiences and aspirations of skilled workers ... Proudhon’s thought was rooted in the same fundamental reality, and

This is the context for this quote — a cry of despair at a people which so willingly voted to destroy a republic and their own freedom. These two plebiscites in favour of Louis-Napoleon’s coup and autocratic rule resulted in “Proudhon’s faith in the people” falling “to its lowest level” and “no epithet was too severe for the classes in whom he had seen the great hope of humanity.” [George Woodcock, Pierre-Joseph Proudhon, p. 184] This becomes obvious when you read the full context of the words McNally quotes:

“You still worship the people ... you should absolutely demolish this false religion. It is necessary to serve freedom and morals for themselves ... without scorning the people, which is only uncivilised [sauvage] and that we have to civilise, do not make it your sovereign. I saw, on December 7th, 1851, when paving stones of the boulevard were still red with blood, these honest people rush to small theatres, content, merry, without regret nor remorse. That once I had surprised it, for five years, in red-handed indifference, immorality, imperialist plot, ingratitude for its initiators! Ah! admittedly, it did not mislead me; but cowardice, even when predicted, is always hideous to see. I will strike these people, I warn you, until I made them embarrassed of the alleged dogma of its sovereignty; because it is not enough for us to re-examine the incompetents of ’48, we must re-examine their idol...” [Correspondance de P-J Proudhon, vol. V, p. 111]

Is McNally really suggesting that Proudhon’s position was incorrect and that he should have proclaimed popular support of the military coup and its repression of those defending the Republic as an example of civilised behaviour and the people’s sovereignty? As Proudhon lamented, “the truth” was that “the people have the government which it prefers, and the bourgeoisie the government that it deserves” and “Napoleon III is the legitimate, authentic
(the anarchists were its first victims in early 1918) — and breaking strikes and other forms of labour protest in association with the Red Army.

If Proudhon’s one-off, never repeated, scribbles in a private notebook mean anarchism is “elitist and authoritarian to the core” and “hostile to ideas of mass democracy and workers’ power” what does it mean for Bolshevism which actually created a regime based on party dictatorship, political police and the militarisation of labour which its leading thinkers defended and justified at length in books and articles written to influence the international workers’ movement? McNally, of course, does not mention these awkward facts so does not raise, never mind answer, the question.

However, reading the context of quotes McNally provides which can be tracked down, it is difficult to take his summary seriously. We turn to this now and will show that his readers would be justified in questioning his claims on Proudhon. Simply put, once the context of the quotes he provides is understood then it becomes clear McNally is quoting selectively in order to attribute ideas to Proudhon he did not, in fact, hold. The dishonesty is shocking.

This can be seen when McNally presents another unattributed quote: “The masses, he wrote are ‘only savages … whom it is our duty to civilise, and without making them our sovereign.’” Let us provide both the source and the context McNally is keen to avoid. First, the quote is from a letter written by Proudhon on the 11th of December 1852 and it is quoted by J. Hampden Jackson who also helpfully presents the context which McNally strips, namely a few days after the plebiscite which saw an overwhelming majority of French men vote to end the Second Republic, create the Second Empire and convert the President into an Emperor. This was exactly one year on from the President’s military coup which saw him impose a new constitution and extend his tenure by ten years, an act again endorsed by a vast majority in a plebiscite. As Hampden notes: “The people of France had spoken. It remained for Proudhon to point the moral”. [Marx, Proudhon and European Socialism, p. 103]

The fruits of this union included the Paris Commune, an event in which the followers of Proudhon played an important role and which both McNally and Marx praise (see section 12 for more discussion on this).

In short, Marx’s earlier summation of Proudhon was correct — his ideas reflected the ideas and interests of the French working
Proudhon addressed himself to both the peasant/artisan and the proletariat. This is to be expected from a libertarian form of socialism as, at the time of his writing, the majority of working people were peasants and artisans and, as noted above, this predominance of artisan/peasant workers in the French economy lasted well after his (and Marx’s) death. Not to take into account the artisan/peasant would have meant the dictatorship of a minority of working people over the rest of them (as we discuss in section H.1.1 this was also a key reason for Bakunin’s rejection of Marx’s “dictatorship of the proletariat”). Given that in chapter 4 of his pamphlet McNally states that Marxism aims for a “democratic and collective society ... based upon the fullest possible political democracy” his attack on Proudhon’s concern for the artisan and peasant is doubly strange. Either you support the “fullest possible political democracy” and so your theory must take into account artisans and peasants or you restrict political democracy and replace it with rule by the few.

Unsurprisingly, then, Proudhon argued in 1841 that he “preach[ed] emancipation to the proletarians; association to the workers.” [Op. Cit., p. 157] However, as McNally notes, he “oppose[d] trade unions.” and did not see them as the means of achieving this for it was “not by such methods that the workingmen will attain to wealth and — what is a thousand times more precious than wealth — liberty.” [Proudhon, System of Economical Contradictions, p. 150] However, this did not mean that he was rejected the idea that the working class (in its three sections of wage-workers, artisan and peasants) would liberate itself. While fundamentally a reformist, Proudhon recognised that self-liberation was only genuine form of liberation and so had “always thought that the proletariat must emancipate itself without the help of the government.” [Property is Theft!, 306] Given this, it is unsurprising that Proudhon saw social change as coming from “below” by the collective action of the working class:

The same applies to when McNally suggested that Proudhon “looked forward to a ‘general inquisition’ and the condemnation of ‘several million people’ to forced labour”. With no means to see whether this is selective quoting or not, McNally disarms his readers. However, we must note a certain irony here as he does not, of course, mention that Marx and Engels advocated “industrial armies, especially for agriculture” to ensure the “[e]qual liability of all to labour” in the Communist Manifesto. [Selected Writings, p. 53] Nor does McNally mention the Bolshevik’s introduction of the “militarisation of labour” in 1919 and 1920 with Trotsky its leading advocate. The “very principle of compulsory labour service is for the Communist quite unquestionable ... The only solution of economic difficulties from the point of view of both principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power ... and to introduce strict order into the work of its registration, mobilisation and utilisation.” The “introduction of compulsory labour service is unthinkable without the application ... of the methods of militarisation of labour”. This is the “State compulsion without which the replacement of capitalist economy by the Socialist will for ever remain an empty sound.” The “Labour State considers itself empowered to send every worker to the place his work is necessary” and had “the right to lay its hand upon the worker who refuses to execute his labour duty”. This “presents the inevitable method of organisation and disciplining of labour-power during the period of transition from capitalism to Socialism.” [Trotsky, Terrorism and Communism, p. 135, p. 137, p. 141, p. 142 and p. 143] As can be seen Trotsky did not, as McNally would wish to suggest, think this was a result of the Civil War but rather a matter of principle.

McNally also fails to note that in December 1917 the Bolshevik regime created the Cheka, a political police force, to repress opposition to it from both the left and right as well as from reactionary forces and workers. At its worse, it even utilised torture and the shooting of unarmed prisoners. However, its main task was repression of opposition organisations — including other socialists
archists throughout their lives nor consistently libertarian when they were. Nor was anarchism born complete and ready made in 1840 when Proudhon proclaimed himself an anarchist in *What is Property?*. He developed his libertarian ideas over time and, unsurprisingly, we would discover passages in his published works at odds with his subsequent, better developed, ideas. This applies even more to his private notebooks in which we would expect ideas to be sketched which he later rejected — perhaps sketching ideas he disagreed with precisely to clarify his thoughts.

While difficult to be completely sure, it seems likely that McNally is selectively referring Proudhon’s Notebooks from 1845 when he was clarifying his ideas on the idea of universal association. As one historian notes, Proudhon did envision some kind of national council at this time and the passages on how it would be selected “are not consistent. In some sections he suggested that the leaders of the association were to be chosen by the members, presumably by election ... In yet other passages, Proudhon rather immodestly pictured himself in the director's role. One must be extremely cautious not to draw too many implications from these infrequent references to the council and its method of selection. Proudhon did not ... have any designs for a small dictatorial elite” as this would “fly in the face of his sincere concern for individual liberty”. So it is to his published works we must turn to see how the conclusions of these private notes and speculations. Interestingly, in a book published in 1843 Proudhon “referred to the important role that government was to perform” but in the introduction to a later edition he indicated that “he had changed his mind on this issue on the role of government” and “he insisted that reform should not — could not — come ‘from above’; rather it could only ‘from below, from the spontaneity of the masses, and not from the initiative of the government’ ... this change had already occurred by 1846” when he was “vehemently attacking other socialists such as Blanc for trumpeting reform initiated ‘from above’”. [Vincent, *Op. Cit.*, p. 146 and pp. 143–4]

“*If you possess social science, you know that the problem of association consists in organising ... the producers, and by this organisation subjecting capital and subordinating power. Such is the war that you have to sustain: a war of labour against capital; a war of liberty against authority; a war of the producer against the non-producer; a war of equality against privilege ... to conduct the war to a successful conclusion ... it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave.”* [Op. Cit., p. 225]

During the 1848 revolution he urged “a provisional committee be set up to orchestrate exchange, credit and commerce between workers” which would “liaise with similar committees set up in the main cities of France” and “under the aegis of these committees, a body representative of the proletariat be formed in Paris ... in opposition to the bourgeoisie’s representation.” This ensured that “a new society be founded in the heart of the old society”. He later stressed the “organisation of popular societies was the pivot of democracy, the cornerstone of republican order” and these “clubs ... assemblies, popular societies” would ensure “the organisation of universal suffrage in all its forms, of the very structure of Democracy itself” [Op. Cit., p. 321, pp. 407 and 461] As Daniel Gu’rin summarised, “in the midst of the 1848 Revolution,” Proudhon “sketched out a minimum libertarian program: progressive reduction in the power of the State, parallel development of the power of the people from below, through what he called clubs” which today we “would call councils.” [Anarchism, pp. 152–3]

Clearly, even if he (wrongly) rejected trade unionism Proudhon did support, to quote McNally, the “the freedom of the working class to make collectively a new society.” Indeed, as one historian
notes, there was “close similarity between the associational ideal of Proudhon ... and the program of the Lyon Mutualists” and that there was “a remarkable convergence [between these ideas], and it is likely that Proudhon was able to articulate his positive program more coherently because of the example of the silk workers of Lyon. The socialist ideal that he championed was already being realised, to a certain extent, by such workers.” [Vincent, Op. Cit., p. 164]

Proudhon simply rejected revolution, trade unions or state-backed reforms as the means of achieving socialism and instead argued for a reformist strategy based primarily on the creation of cooperative workplaces and banks. He linked his politics to workers self-activity and argued that “the proof” of his mutualist ideas was shown in the “current practice, revolutionary practice” of “those labour associations ... which have spontaneously ... been formed in Paris and Lyon” during the 1848 revolution which show that the “organisation of credit and organisation of labour amount to one and the same.” If all workers “organise themselves along similar lines, it is obvious that, as masters of labour, constantly generating fresh capital through work, they would soon have wrested alienated capital back again, through their organisation and competition.” This would apply to “small-scale” as well as “large-scale property and large industries”. [Op. Cit., pp. 374–5] Thus Proudhon places his ideas firmly in the actions of working people resisting wage slavery (i.e. the proletariat) and not exclusively in the “small property owner” (i.e., artisans and peasants).

So regardless of McNally’s claims, Proudhon was not fixated upon “small property”. As we discuss in section 4, Proudhon’s recognition of differences in the working class was reflected in his position on property. His proposals for a libertarian society included social ownership, workers’ self-management of large scale workplaces as well as artisan and peasant production and explicitly and repeatedly argued for “the complete emancipation of the worker ... the abolition of the wage worker.” [quoted by Vincent, Op. Cit., p. 222] Rather than being backward looking and aiming the developing working class” it was for the opposite reason: “As things are at present, which do you think will win [in a strike]? ... [the bosses as] the match is clearly unequal”. At best strikes would “lead to a general price increase”. [Selected Writings of Pierre-Joseph Proudhon, p. 182 and p. 181] Worse, as well as distorting Proudhon’s position McNally fails to mention that Proudhon opposition to trade unions and strikes as counter-productive was not shared by subsequent anarchists like Bakunin, Kropotkin, Malatesta, Goldman, and so on (see section 9). Why should Proudhon (the odd man out in anarchist theory with regards to this issue) be taken as defining that theory? Such an argument is simply dishonest and presents a false picture of the facts.

Next McNally states that Proudhon “violently opposed democracy” and presents a series of non-referenced quotes to prove his case. Such a technique is useful for McNally as it allows him quote Proudhon without regard to when and where Proudhon made these comments and so their context. It also makes it difficult, if not impossible, for the reader to discover both. This is a deeply problematic technique, particularly given the seriousness of the charges being made. However, the reasons why he pursued this approach become understandable when the statements are tracked down as it becomes clear that McNally is quoting Proudhon completely out of context and so twisting his words into the opposite of what he meant.

He suggests that Proudhon’s “notes for an ideal society involved the suppression of elections, of a free press, and of public meetings of more than 20 people.” The word “notes” gives the game way, as he is not referring to any work produced in Proudhon’s lifetime but rather his notebooks which were published a hundred years after his death, in the 1960s, and unknown until then. Private notebooks are hardly the best source for determining a person’s ideas as they are the means by which a thinker explores ideas, some of which he may later conclude are deeply flawed. Moreover, as we note in section 6, neither Proudhon nor Bakunin were not an-
have the free disposition of his person and his arms may be tolerated; but that the workers should undertake, by combinations, to do violence to monopoly society cannot permit. Authority, in shooting down the miners, found itself in the position of Brutus placed between his paternal love and his consular duties: he had to sacrifice either his children or the republic. The alternative was horrible, I admit; but such is the spirit and letter of the social compact, such is the tenor of the charter ... the police function, instituted for the defence of the proletariat, is directed entirely against the proletariat.” [Property is Theft!, pp. 221–2]

The key words here are “[a]s long as labour is not sovereign” and, unsurprisingly, when Marx quoted this passage in Poverty of Philosophy he omitted it, so changing Proudhon’s meaning completely. So while Proudhon opposed trade unions in favour of other forms of working class self-organisation (co-operatives) it does not follow that he supported the breaking of strikes when he reported when it happened. Rather he was noting that such things were inevitable under capitalism and that this system had to be replaced by one based on workers’ self-management of production.

It is significant that the French syndicalists whom McNally is so keen to praise and differentiate from “classical anarchists” considered Proudhon (like Bakunin) one of their influences. Similarly, the French trade unionists who joined with their British counterparts to create the International Working Men’s Association were followers of the French anarchist. Both groups of trade unionists saw the state repress their strikes so this would be a strange paradox indeed if McNally’s account of Proudhon’s position on police strike-breaking were correct. As it is not, there is no paradox.

McNally correctly states that Proudhon “oppose[d] trade unions” but rather than it being because he “feared the organised power of

exclusively at the artisan/peasant, Proudhon’s ideas looked to the present and the future by looking at both the artisan/peasant and proletariat (i.e. to the whole of the working class in France at the time). As Daniel Gu’rin summarised:

“Proudhon really moved with the times and realised that it is impossible to turn back the clock. He was realistic enough to understand that ‘small industry is as stupid as petty culture’ ... With regard to large-scale modern industry requiring a large workforce, he was resolutely collectivist: ‘In future, large-scale industry and wide culture must be the fruit of association.’ ‘We have no choice in the matter,’ he concluded, and waxed indignant that anyone had dared to suggest that he was opposed to technical progress ... Property must be abolished ... The means of production and exchange must be controlled neither by capitalist companies nor by the State ... they must be managed by associations of workers” [Anarchism, p. 45]

The notion that anarchism is the politics of the “small property owner” is even harder to maintain when we move from Proudhon’s reformist anarchism to the revolutionary anarchism of Bakunin and Kropotkin. While there is a similar commitment to a decentralised, federal socialism “from below” rooted in social and economic self-management, the means are different: revolution is embraced, along with labour unions and direct action. Where Proudhon differs from later anarchists like Bakunin, Kropotkin, Malatesta and Goldman is that this working class self-activity is reformist in nature, that is seeking alternatives to capitalism which can reform it away rather than alternatives that can fight and destroy it. However, this embrace of social revolution and class struggle by anarchists like Bakunin rests on the same principle of working class self-emancipation.
Hence we find Bakunin arguing that “revolution is only sincere, honest and real in the hands of the masses” and so socialism can be achieved “by the development and organisation, not of the political but of the social (and, by consequence, anti-political) power of the working masses” who must “organise and federate spontaneously, freely, from the bottom up, by their own momentum according to their real interest, but never according to any plan laid down in advance and imposed upon the ignorant masses by some superior intellects.” Social change would be achieved only by “the complete solidarity of individuals, sections and federations in the economic struggle of the workers of all countries against their exploiters.” [Michael Bakunin: Selected Writings, p. 237, pp. 197–8 and p. 177]

Unlike Proudhon, he saw the means for achieving the social revolution in the labour movement as trade unions (organised from the bottom up, of course) were “the natural organisation of the masses” as “workers’ solidarity in their struggle against the bosses” was the means by which workers could emancipate itself “through practical action.” Thus the key to working-class self-liberation was “trades-unions, organisation, and the federation of resistance funds” [The Basic Bakunin, p. 139 and p. 103] In short, what became known as a syndicalist position (see section 9 for a discussion of McNally’s false counterpoising of anarchism and syndicalism) as the “organisation of the trade sections and their representation by the Chambers of Labour . . . bear in themselves the living seeds of the new society which is to replace the old world. They are creating not only the ideas, but also the facts of the future itself.” [Bakunin on Anarchism, p. 255] Moreover, as we show in the next section, like Proudhon, Bakunin argued that an anarchist society would be based on “the collective ownership of producers’ associations, freely organised and federated in the communes, and by the equally spontaneous federation of these communes.” [Michael Bakunin: Selected Writings, p. 197] As Kropotkin summarised:

Clearly McNally distorts Proudhon’s ideas on the question of property. That he may have been aware of the actual facts in shown by his qualification that Proudhon’s critique of capitalism was “largely backward-looking in character.” The utility of which qualification is clear — it allows him to ignore the substantial evidence against his assertion by muttering that he never said that Proudhon was always “backward-looking”...

McNally goes too far when he asserts that Proudhon “so feared the organised power of the developing working class that he went so far as to oppose trade unions and support police strike-breaking.” There is, of course, a deep irony in McNally attacking Proudhon on this matter given that the Bolshevik regime he supports and considers as a “workers’ state” repeatedly used not only its political police (the infamous Cheka) but also the Red Army to break strikes (see section H.6.3). This was done to secure Bolshevik power over the working class (see section 8).

It must also be stressed that while Proudhon did oppose trade unions (as we noted in section 2 he argued the working class would be better served using other means to liberate itself) it was not the case he supported police strike-breaking. As the editor of a collection of Marx’s works had to admit that “[t]o give Proudhon his due, he was not so much justifying the actions of the French authorities as exposing the contradictions he saw as an inevitable evil of the present social order” [quoted by Iain McKay, “Introduction”, Property is Theft!, p. 65] As Proudhon himself put it:

“workers’ strikes are ILLEGAL. And it is not only the penal code which says this, but the economic system, the necessity of the established order. As long as labour is not sovereign, it must be a slave; society is possible only on this condition. That each worker individually should
individual and remain unorganised. These words are set in italics, as if you had lifted them from somewhere in my books. And then, on the back of this alleged quotation, you set about answering me that society, or the State that stands for it, has the right to buy back all property assets ... But it does not follow at all from my speaking on the basis of socialism in order to reject the buy back of such assets as nonsensical, illegitimate and poisonous that I want to see individual ownership and non-organisation of the instruments of labour endure for all eternity. I have never penned nor uttered any such thing; and have argued the opposite a hundred times over. I make no distinction ... between real ownership and phoney ownership ... I deny all kinds of proprietary domain. I deny it, precisely because I believe in an order wherein the instruments of labour will cease to be appropriated and instead become shared; where the whole earth will be depersonalised ...

"There is a more straightforward, more effective and infinitely less onerous and less risky way of transferring ownership, of achieving Liberty, Equality and Fraternity ...

"Capital having been divested of its power of usury, economic solidarity is gradually created, and with it, an equality of wealth.

"Next comes the spontaneous, popular formation of groups, workshops or workers' associations;

"Finally, the last to be conjured and formed is the overarching group, comprising the nation in its entirety, what you term the State because you invest it in a representative body outside of society, but which, to

"the chief aim of Anarchism is to awaken those constructive powers of the labouring masses ... since the times of the International Working Men's Association, the Anarchists have always advised taking an active part in those workers' organisations which carry on the direct struggle of Labour against Capital and its protector, — the State

"Such a struggle ... better than any other indirect means, permits the worker to obtain some temporary improvements in the present conditions of work, while it opens his eyes to the evil that is done by Capitalism and the State that supports it, and wakes up his thoughts concerning the possibility of organising consumption, production, and exchange without the intervention of the capitalist and the State.” [Direct Struggle Against Capital, p. 189]

And McNally asserts that "the liberty defended by the anarchists was not the freedom of the working class to make collectively a new society"! Only someone ignorant of anarchist theory or with a desire to deceive could make such an assertion. Needless to say, McNally’s claim that anarchism is the politics of the "small property owner" would be even harder to justify if he mentioned Kropotkin’s communist anarchism. However, like Proudhon’s and Bakunin’s support for collective ownership by workers associations it goes unmentioned — for obvious reasons.

3. Does anarchism “glorify values from the past”?

McNally asserts, regardless of the facts, that anarchism “represented the anguished cry of the small property owner against the inevitable advance of capitalism. For that reason, it glorified values from the past: individual property, the patriarchal family, racism.” The reality is very different. We will take each issue in turn.
First, we should note that unlike Marx, anarchists did not think that capitalism was inevitable or an essential phase society had to go through before we could reach a free society. Neither Proudhon nor Bakunin shared Marx’s viewpoint that socialism (and the struggle for socialism) had to be postponed until capitalism had developed sufficiently so that the “centralisation of the means of production and the socialisation of labour reach a point at which they become incompatible with their capitalist integument.” [Capital, vol. 1, p. 929] As McNally states, socialism was once the “banner under which millions of working people resisted the horrors of the factory system and demanded a new society of equality, justice, freedom and prosperity.” Unfortunately, the Marxist tradition viewed such horrors as essential, unavoidable and inevitable and any form of working class struggle — such as the Luddites — which resisted the development of capitalism was denounced. So much for Marxism being in favour of working class “self-emancipation” — if working class resistance to oppression and exploitation which does not fit into its scheme for “working class self-emancipation” then it is the product of ignorance or non-working class influences. This can be seen from McNally’s position on anarchism.

Thus, rather than representing “the anguished cry of the small property owner against the inevitable advance of capitalism” anarchism is rather the cry of the oppressed against capitalism and the desire to create a free society in the here and now and not some time in the future once “the proletariat” was the majority of the working classes. To quote German Anarchist Gustav Landauer:

“Karl Marx and his successors thought they could make no worse accusation against the greatest of all socialists, Proudhon, than to call him a petit-bourgeois and petit-peasant socialist, which was neither incorrect nor insulting, since Proudhon showed splendidly to the people of his nation and his time, predominately small farmers and craftsmen, how they could achieve socialism imme-

Proudhon termed this vision of a self-managed economy “an industrial democracy” or “the industrial republic” and argued that “Workers’ Associations are the locus of a new principle and model of production that must replace present-day corporations”. When “in an industry, all the workers, instead of working for an owner who pays them and keeps their product, work for one another and thereby contribute to a common product from which they share the profit” then, when you “extend the principle of mutuality that unites the workers of each group to all the Workers’ Associations as a unit, and you will have created a form of civilisation that, from all points of view — political, economic, aesthetic — differs completely from previous civilisations” [Op. Cit., p. 610 and p. 616] Compare this, the anarchist position, on industrial democracy with Lenin’s who, in 1921 went so far as to suggest, somewhat disingenuously given the reality of party dictatorship at the time, that “Democracy is a category proper only to the political sphere”. [Collected Works, vol. 32, p. 26]

As can be seen, rather than base his “utopia” on “small, private property” Proudhon based it on the actual state of the French economy – one marked by both artisan and large-scale production. The latter he desired to see transformed from the individual property of the few (capitalists) into the collective property of workers’ associations and placed under workers’ self-management. The former, as it did not involve wage-labour, was non-capitalist and was compatible with a system of undivided (collective) ownership and divided use (possession). While Proudhon’s vision may be considered as (in part or in whole) undesirable, contradictory and unstable, it is not “backward-looking in character” nor based on “small, private property”. That Proudhon himself publicly rejected the assertion he stood for private ownership is of note:

“You have me saying, and I really do not know where you could have found this, that ownership of the instruments of labour must forever stay vested in the in-
would be “a destruction of property.” Ten years later, in 1851, he argued that “[e]very industry, operation or enterprise which by its nature requires the employment of a large number of workers of different specialities, is destined to become a society or company of workers.” Thus “every individual employed in the association … has an undivided share in the property of the company” as well as “the right to fill any position” for “all positions are elective, and the by-laws subject to the approval of the members.” This means that “the collective force, which is a product of the community, ceases to be a source of profit to a small number of managers and speculators: it becomes the property of all the workers.” Thus there would be a new form of economic organisation based on “the co-operation of all who take part in the collective work” with “equal conditions for all members” [Op. Cit., p. 153, p. 149, p. 583, pp. 585–6]

Public utilities would be under the “initiative of communes and departments” with “workers companies … carrying the works out.” This decentralisation, this “direct, sovereign initiative of localities, in arranging for public works that belong to them, is a consequence of the democratic principle and the free contract.” Land and housing would see rental payments being “carried over to the account of the purchase” of the resource used and once the property “has been entirely paid for, it shall revert immediately to the commune.” In the case of housing, such payments would result in “a proportional undivided share in the house [the tenant] lives in, and in all buildings erected for rental, and serving as a habitation for citizens.” The land and housing would become socialised as the property “thus paid for shall pass under the control of the communal administration” and for “repairs, management, and upkeep of buildings, as well as for new constructions, the communes shall deal with bricklayers companies or building workers associations.” In short: “Capitalist and landlord exploitation stopped everywhere, wage labour abolished, equal and just exchange guaranteed.” [Op. Cit., pp. 594–5, p. 576, p. 578, p. 576 and p. 596]

As noted in the previous section, Proudhon’s theory reflected both artisan/peasant interests and those of wage workers — as would be expected from a socialist aiming to transform his society to a free one. The disastrous results of Bolshevik rule in Russia should indicate the dangers of ignoring the vast bulk of a nation (i.e. the peasants) when trying to create a revolutionary change in society. McNally confuses a desire to achieve socialism now with backward looking opposition to capitalism. Proudhon looked at the current state of society, not backwards, as McNally suggests. Indeed, he lambasted those radicals during the 1848 who sought to repeat the glories of the Great French Revolution rather than look to the future:

“It is by ’93 and all of its discord that we are being ruled ... The democrats of ’93, conjuring up a republic with their high school memories [of Ancient Rome], after devouring one another, set the revolution back by half a century ... The democrats of 1848, building the republic on their parliamentary memories, have also set the revolution back by half a century ... they are only imitators; they thought themselves statesmen because they were following the old models!

“So what is this queer preoccupation which, in time of revolution, bedazzles the most steadfast minds, and, when their burning aspirations carry them forward into the future, has them constantly harking back the past? How does it come about that the People, just when it is making the break with established institutions, takes another plunge and gets further immersed in tradition? Society does not repeat itself: but one would
have thought it was walking backwards ... Could it not turn its gaze in the direction in which it is going?

"[...]"

"In order to organise the future, a general rule confirmed by experience, the reformers always start out with their gaze fixed upon the past. Hence the contradiction forever discovered in their actions: hence also the immeasurable danger of revolutions." [Property is Theft!, p. 308]

Secondly, it is not true that Proudhon or Bakunin "glorified" individual property. Proudhon, as is well know, argued that "property is theft" and that "property is despotism." He was well aware of the negative side effects of individual property and sought to end it: “instead of inferring ... that property should be shared by all, I demand, in the name of general security, its entire abolition.” However, just as he was against capitalism, Proudhon was also against state socialism: "Either competition, — that is, monopoly and what follows; or exploitation by the State, — that is, dearness of labour and continuous impoverishment; or else, in short, a solution based upon equality, — in other words, the organisation of labour, which involves the negation of political economy and the end of property." [Property is Theft!, p. 87, p. 133, p. 91 and p. 202]

He was well aware that replacing private property by state property would not liberate the working class for what he termed “Community” (usually, if not accurately, translated as “communism”), would enserf the worker to the state. Instead, Proudhon wanted to abolish property and replace it with possession. As he put it in 1840’s What is Property?, while property had to be “collective and undivided” its use could be divided by means of “possession”. [Op. Cit., p. 137] Thus workers would control the means of production they used as well as the goods they created:

“property in product ... does not carry with it property in the means of production; that seems to me to need no fur
like the revenue, to the proprietor. [Property is Theft!, p. 195, p. 248, p. 253] Would this “misery” happen if workers managed their own work? Of course not.

Marx ignored this, proclaiming that there is “no individual exchange without the antagonism of classes.” Yet a system of worker-managed workplaces exchanging the product of their labour with peasant farmers would not be marked by classes for these “relations are not relations between individual and individual, but between worker and capitalist, between farmer and landlord, etc.” Marx ignores the nature of Proudhon’s ideas, favouring the assertion he “borrows from economists the necessity of eternal relations” and forgets that economic relations “are historical and transitory products.” [Op. Cit., p. 144, p. 159, p. 178 and p. 166] Strangely, Marx forgot to quote Proudhon arguing that the “present form” of how labour was organised “is inadequate and transitory” and that “the radical vice of political economy, consists, in general terms, in affirming as a definitive state a transitory condition, — namely, the division of society into patricians and proletarians”. [Op. Cit., p. 170 and p. 174]

So McNally, like Marx, distorts Proudhon’s position. While many later anarchists — the communist-anarchists — rejected Proudhon’s market socialism in favour of libertarian communism, the notion that his “opposition to capitalism was largely backward-looking in character” and that “small, private property the basis of his utopia” is just nonsense. To quote Proudhon from 1841: “We must apply on a large scale the principle of collective production” [Op. Cit., p. 140] As K. Steven Vincent correctly summarises:

“As we discuss in the section 4, Proudhon repeatedly noted his position and refuted those who claimed he supported individual property. He also recognised that private property was not completely without merit as it gave its holder a measure of autonomy and protection against the state and other social forces. It was precisely this autonomy which he wished all to share rather than under capitalism where workers “sold their arms and parted with their liberty” to the capitalist or landlord. [Op. Cit., p. 212] However, recognising this – and the dangers of state socialism — hardly equates to glorification of private property.

It is true that Proudhon did oppose the forced socialisation of artisan workplaces and peasant land. He considered having control over the means of production, housing, etc. by those who use it as a key means of maintaining freedom and independence. Thus we find him arguing in 1851 that “it is evident that if the peasants think well to associate, they will associate”. [Op. Cit., p. 584] However, the issue was different for modern industry:

“In such cases, it is one of two things; either the worker, necessarily a piece-worker, will be simply the employee of the proprietor-capitalist-entrepreneur; or he will participate in the chances of loss or gain of the establishment, he will have a voice in the council, in a word, he will become an associate.”
“In the first case the worker is subordinated, exploited: his permanent condition is one of obedience and poverty. In the second case he resumes his dignity as a man and citizen, he may aspire to comfort, he forms a part of the producing organisation, of which he was before but the slave; as, in the town, he forms a part of the sovereign power, of which he was before but the subject.” [Op. Cit., p. 583]

Thus capitalism had to be replaced with associations “due to the immorality, tyranny and theft suffered”. [Op. Cit., p. 584] This aspect of his ideas is continual throughout his political works and played a central role in his social theory. Thus to say that Proudhon “glorified” individual property distorts his position. As he argued in 1848:

“under universal association, ownership of the land and of the instruments of labour is social ownership ... We want the mines, canals, railways handed over to democratically organised workers’ associations ... We want these associations to be models for agriculture, industry and trade, the pioneering core of that vast federation of companies and societies woven into the common cloth of the democratic and social Republic.” [Op. Cit., pp. 377–8]

As the experience of workers under Lenin indicates (see section H.3.13), collective ownership by the state does not end wage labour, exploitation and oppression and so Proudhon’s arguments in favour of socialisation and possession and against capitalist and state ownership were proven right. As the forced collectivisation of the peasantry under Stalin shows, Proudhon’s respect for artisan/peasant possessions was a very sensible and humane position to take. Unless McNally supports the forced collectivisation of peasant

the organisation of labour and the distribution of wealth, I shall interrogate political economy as the depository of the secret thoughts of humanity” [System of Economical Contradictions, p. 128]

It worthwhile noting that the System of Economic Contradictions Proudhon was discussing was not some new utopian scheme, as Marx implied, but rather capitalism: “We will reserve this subject [the future organisation of labour] for the time when, the theory of economic contradictions being finished, we shall have found in their general equation the programme of association, which we shall then publish in contrast with the practice and conceptions of our predecessors”. This analysis was essential in order to base ideas of social transformation on current tendencies. So rather than abstractly contrast a “utopia” to capitalism, Proudhon stressed the need to first analyse and understand the current system and so “to unfold the system of economical contradictions is to lay the foundations of universal association.” [Op. Cit., p. 311 and p. 132]

While Marx asserted that Proudhon wished “to take us back to the journeymen or, at most, to the master craftsman of the Middle Ages” there is nothing in his work to support such claims. Unsurprisingly, then, rather than provide a quote from Proudhon confirming this aspiration Marx makes many an assertion such as that individual exchange “is consistent only with the small-scale industry of past centuries .. . or else with large-scale industry and all its train of misery and anarchy.” [Op. Cit., p. 190, p. 138] Yet this forgets that under capitalism, workers do not own or control their work but in a mutualist society they would do both. As Proudhon argued, “the pace of mechanical progress” under capitalism has “no other effect” than to “make the chains of serfdom heavier, render life more and more expensive, and deepen the abyss which separates the class that commands and enjoys from the class that obeys and suffers.” This was because people “work under a master” and so “under the regime of property, the surplus of labour, essentially collective, passes entirely,
they must also wish to bring back all the other conditions of industry of former times.” [Collected Works, vol. 6, p. 137]

Compare this to Proudhon’s position expounded with similar words in System of Economic Contradictions:

“M. de Sismondi, like all men of patriarchal ideas, would like the division of labour, with machinery and manufactures, to be abandoned, and each family to return to the system of primitive indivision, — that is, to each one by himself, each one for himself, in the most literal meaning of the words. That would be to retrograde; it is impossible.” [Property is Theft!, p. 194]

As we will show, this was not an isolated statement: Proudhon consistently supported not only large-scale industry but also socialised ownership. Indeed, the Frenchman was critical of those socialists (whom he rightly labelled “utopian”) who replaced analysis of capitalism and its tendencies with visions of an ideal system:

“It is important, then, that we should resume the study of economic facts and practices, discover their meaning, and formulate their philosophy. Until this is done, no knowledge of social progress can be acquired, no reform attempted. The error of socialism has consisted hitherto in perpetuating religious reverie by launching forward into a fantastic future instead of seizing the reality which is crushing it; as the wrong of the economists has been in regarding every accomplished fact as an injunction against any proposal of reform.

“For my own part, such is not my conception of economic science, the true social science. Instead of offering a priori arguments as solutions of the formidable problems of
As important for modern political economy as Sieyès’ work *Qu’est-ce que le tiers ‘tat*? for modern politics.” [Collected Works, vol. 4, p. 32]

As Rocker argued, Marx changed his tune to “conceal from everyone just what he owed to Proudhon and any means to that end was admissible.” [Marx and Anarchism] This can be seen from the comments we quote above which clearly show a Proudhonian influence in their recognition that possession replaces property in a socialist society and that associated labour is its economic basis. However, it is still significant that Proudhon’s analysis initially provoked such praise by Marx — an analysis which McNally obviously does not understand.

Moving on from Proudhon, we discover Bakunin also opposing individual property and arguing that “the land, the instruments of work and all other capital [will] become the collective property of society and by utilised only by the workers, in other words by the agricultural and industrial associations.” [Michael Bakunin: Selected Writings, p. 174] With regards to peasants and artisans Bakunin also desired voluntary collectivisation. “In a free community,” he argued, “collectivism can only come about through the pressure of circumstances, not by imposition above but by a free spontaneous movement from below.” Rather than being a defender of “individual property” as McNally implies, Bakunin was a clear and consistent supporter of collective property (as organised in workers’ associations and communes) and supported peasant and artisan property only in the sense of being against forced collectivisation as this would result in “propelling [the peasants] into the camp of reaction.” [Bakunin on Anarchism, p. 200 and p. 197] Expropriation of capital was considered a key aspect of social revolution:

“let us suppose … it is Paris that starts [the revolution] … Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers

the weakness of McNally’s position can be seen from the very large Jewish anarchist movement in both Europe and America which placed Proudhon and Bakunin in their pantheon of influences.

4. Why are McNally’s comments on Proudhon a distortion of his ideas?

McNally does attempt to provide some evidence for his remarks. He turns to Pierre-Joseph Proudhon, “widely proclaimed ‘the father of anarchism.’” As he correctly notes, Proudhon was a “printer by vocation” and “strongly opposed the emergence of capitalism in France.” However, McNally claims that Proudhon’s “opposition to capitalism was largely backward-looking in character” as he “did not look forward to a new society founded upon communal property which would utilise the greatest inventions of the industrial revolution. Instead, Proudhon considered small, private property the basis of his utopia. His was a doctrine designed not for the emerging working class, but for the disappearing petit bourgeoisie of craftsmen, small traders and rich peasants.” Unfortunately McNally has got his facts wrong.

To be fair to McNally, he is simply repeating what Marxists have been asserting about Proudhon since Marx wrote *The Poverty of Philosophy*. In that work, Marx claimed to be replying to Proudhon’s *System of Economic Contradictions* but, in reality, the bulk of the work is inaccurate diatribe and its few valid points are swamped by selective quoting, false attribution and the repetition of points Proudhon made but in such a way as to suggest he argued the opposite. This last method of distortion can be seen when Marx implies that Proudhon wished to return to a pre-industrial economy based on small-scale private property:

“Those who, like Sismondi, wish to return to the correct proportions of production, while preserving the present basis of society, are reactionary, since, to be consistent,
anti-feminism should not be used for a blanket rejection of all his ideas given the otherwise appealing nature of his vision of a federated self-managed society — nor anarchism as such. So to state, as McNally does, that “anarchism” glorifies the patriarchal family simply staggers belief. Only someone ignorant of both logic and anarchist theory could make such an assertion.

Finally, we turn to the claim that anarchism “glorified ... racism”. While it is undoubtedly true that both Proudhon and Bakunin made a few racist comments, it does not follow that anarchism as a political theory is racist. Few would suggest that because Marx and Engels made racist comments that this makes Marxism inherently racist (see section 6 for a few examples of racist comments by the founders of Marxism). The same with anarchism — particularly given that both Proudhon and Bakunin made anti-racist statements in their writings. Thus we find Proudhon arguing in 1851 that in an anarchist society there will “no longer be nationality, no longer fatherland, in the political sense of the words: they will mean only places of birth. Whatever a man’s race or colour, he is really a native of the universe; he has citizen’s rights everywhere.” [Property is Theft!, p. 567] Bakunin echoed this in 1867, arguing that “all collective and individual morality rests essentially upon respect for humanity” and this meant “the recognition of human right and human dignity in every man, of whatever race, colour, degree of intellectual development, or even morality.” [Bakunin on Anarchism, p. 146] That these comments, and others like them, are the ones consistent with Anarchist principles is obvious.

So a few anti-Semitic and anti-German remarks, made in passing, does not equate to people who “glorified ... racism” nor a theory which is inherently racist. Rather, it means someone who expressed personal bigotries which failed to live up to their stated ideals. Yet rather than admit the obvious, McNally exaggerates Proudhon’s and Bakunin’s flaws while remaining silent on similar ones in Marx and Engels as well as the lack of them in the likes of Kropotkin, Malatesta, Rocker, Goldman, and so on. Ultimately, have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and quartiers, they will form the revolutionary federation of all the quartiers, the federative commune ... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services ... and to organise common defence against the enemies of the Revolution, together with propaganda, the weapon of revolution, and practical revolutionary solidarity with friends in all countries against enemies in all countries.” [Michael Bakunin: Selected Writings, pp. 178–9]

Given how often Bakunin stressed the need for union struggles and collective labour property, it is easy to conclude that McNally did no research into anarchism before writing about it. So we discover him arguing that “resistance funds and trade unions” are “the only efficacious weapons” the workers have against the bourgeoisie and this needed “the organisation of the international strength of the workers of all countries.” This movement aimed for a society “based on equality” where “all capital and every instrument of labour, including the soil, belong to the people, by right of collective property.” States “must be abolished, for their only mission is to protect individual property, that is, to protect the exploitation by some privileged minority, of the collective labour of the masses of the people” and a “just human society” must be created, one “free of political domination and economic exploitation, founded only on collective labour which is guaranteed by collective property.” He repeatedly proclaimed his support for “the great principle of collective property” and argued that “the collective property of capital” was one of “the absolutely necessary conditions for the emancipation of labour and of the workers”. [The Basic Bakunin, p. 153, p. 196 and p. 85] The social revolution would see “the passing of all the land,
capital and means of production into the hands of the international federation of free workers’ associations.” Land “belongs to those who have cultivated it with their own hands — to the rural communes” while “capital and all tools of labour belong to the city workers — to the workers’ associations.” Anarchism would be “nothing else but a free federation of workers — agricultural workers as well as factory workers and associations of craftsmen.” [The Political Philosophy of Bakunin, p. 344 and p. 410]

Clearly neither Proudhon nor Bakunin “glorified” individual property. Hence Daniel Gu’rin’s summary:

“Proudhon and Bakunin were ‘collectivists,’ which is to say they declared themselves without equivocation in favour of the common exploitation, not by the State but by associated workers of the large-scale means of production and of the public services. Proudhon has been quite wrongly presented as an exclusive enthusiast of private property … At the Bale congress [of the First International] in 1869, Bakunin … all[ied] himself with the statist Marxists … to ensure the triumph of the principle of collective property.” [‘From Proudhon to Bakunin’, The Radical Papers, Dimitrios I. Roussopoulos (ed.), p. 32]

Thirdly, while it is true that Proudhon did glorify the patriarchal family, the same cannot be said of Bakunin. Unlike Proudhon, he argued that “[e]qual rights must belong to both men and women,” that women must “become independent and free to forge their own way of life” and that “[o]nly when private property and the State will have been abolished will the authoritarian juridical family disappear.” He opposed the “absolute domination of the man” in marriage, urged “the full sexual freedom of women” and argued that the cause of women’s liberation was “indissolubly tied to the common cause of all the exploited workers — men and women.” An anarchist society’s organisations would be populated by people elected “by the universal suffrage of both sexes” and so it would be based on “[e]qual political, social, and economic rights, as well as equal obligations, for women.” [Bakunin on Anarchism, pp. 396–7, p. 78 and p. 93] In short:

“Abolition of the patriarchal family law, based exclusively upon the right to inherit property and also upon the equalisation of man and women in point of political, economic, and social rights.” [The Political Philosophy of Bakunin, p. 343]

It should be redundant to note that Bakunin’s position was shared by the likes of Kropotkin, Malatesta, Berkman, Chomsky and Ward but, clearly, it is not — and best not ponder where such noted anarchists as Emma Goldman, Lucy Parsons, Voltairine de Cleyre and Louise Michel “glorified … the patriarchal family”!

Andr’ L’o, a feminist libertarian and future Communard, pointed out the obvious contradiction in Proudhon’s position in 1869 which these anarchists also saw:

“These so-called lovers of liberty, if they are unable to take part in the direction of the state, at least they will be able to have a little monarchy for their personal use, each in his own home … Order in the family without hierarchy seems impossible to them — well then, what about in the state?” [quoted by Carolyn J. Eichner, “‘Vive La Commune!’ Feminism, Socialism, and Revolutionary Revival in the Aftermath of the 1871 Paris Commune”, Journal of Women’s History, vol. 15, No. 2, p. 75]

These anarchists, and many others, extended anarchist ideas to the one area of life where Proudhon excluded liberty: the family. Unsurprisingly, both during and after his lifetime, anarchists subjected it to an immanent critique (i.e., using Proudhon’s own concepts against his own position) and so while repulsive, Proudhon’s
of his constituents” [The Marx-Engels Readers, p. 632 and p. 633]
As well as arguing that “federalism is the political form of humanity”, Proudhon also argued that the “legislative power is not distinguished from the executive power.” [Property is Theft!, p. 678 and p. 674]
As he put it in 1848:

“It is up to the National Assembly, through organisation of its committees, to exercise executive power, just the way it exercises legislative power ... Besides universal suffrage and as a consequence of universal suffrage, we want implementation of the imperative mandate [mandat imp’ratif]. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.” [Op. Cit., pp. 378–9]

This applies to the economic goals of the Commune, with Marx suggesting that it “wanted to make individual property a truth by transforming the means of production, land, capital, now chiefly the means of enslaving and exploiting labour, into mere instruments of free and associated labour” and “this is Communism”. Engels, twenty years later, painted a picture of Proudhon being opposed to association (except for large-scale industry) and stated that “to combine all these associations in one great union” was “the direct opposite of the Proudhon doctrine” and so “the Commune was the grave of the Proudhon school of socialism.” [Op. Cit., p. 635 and p. 626] Yet they must have been aware of Proudhon’s support for large-scale industry and workers associations (section 4) as expressed, for example, in his 1863 call for an “agricultural-industrial federation” or his 1846 comment that “to unfold the system of economic contradictions is to lay the foundations of universal association” [Op. Cit., p. 712 and p. 179] As he put it in 1848:

“As well as arguing that “federalism is the political form of humanity”
(and Marx’s during the 1848 revolution) ideas on how revolutionaries should organise. Thus we find Lenin arguing in What is to be Done? for “a powerful and strictly secret organisation, which concentrates in its hands all the threads of secret activities, an organisation which of necessity must be a centralised organisation” because the revolutionary movement would “benefit by the fact that a ‘dozen’ experienced revolutionaries, no less professionally trained than the police, will centralise all the secret side of the work – prepare leaflets, work out approximate plans and appoint bodies of leaders for each urban district, for each factory district and for each educational institution, etc.” Under Tsarism, the “only serious organisational principle the active workers of our movement can accept is strict secrecy, strict selection of members, and the training of professional revolutionaries.” [The Essential Lenin, p. 158, p. 149 and p. 162]

The parallels with Bakunin’s system are clear and are predominately the result of the identical political conditions both revolutionaries experienced. While anarchists are happy to indicate and oppose the non-libertarian aspects of Bakunin’s ideas, it is hard for the likes of the McNally to attack Bakunin while embracing Lenin’s ideas on the party, justifying their more “undemocratic” aspects as a result of the objective conditions of Tsarism. Worse, in 1920 these principles were agreed by the Communist International, including the necessity of both legal and illegal structures within the party for “the Communist parties must learn to combine legal and illegal activity in a planned way. However, the legal work must be placed under the actual control of the illegal party at all times.” [Proceedings and Documents of the Second Congress 1920, vol. 1, p. 198–9] Anarchists have, since Bakunin’s death, rejected his ideas that anarchists should organise in a centralised fashion (see section J.3).

Therefore, McNally has a problem. On the one hand, he denounces Bakunin’s ideas of a centralised, secret top-down organisation of revolutionaries. On the other, the party structure that Lenin recommends is also a tightly disciplined, centralised, top-down structure with a membership limited to those who are will-concourse of all individual energies in view of a common goal: the well-being, the freedom and the security of all. The communal revolution, begun by popular initiative on March 18, begins a new era of experimental, positive, scientific politics.

“It is the end of the old governmental and clerical world, of militarism and bureaucracy, of exploitation, speculation, monopolies and privileges to which the proletariat owe their servitude and the Fatherland its misfortunes and disasters.” [“Declaration to the French People”, pp. 789–791, Property is Theft, pp. 789–790]

The links with Proudhon’s ideas cannot be clearer. Little wonder, then, that during the Commune anarchist James Guillaume stated that “the Paris Revolution is federalist ... in the sense given it years ago by the great socialist, Proudhon.” It is “above all the negation of the nation and the State.” [contained in The Paris Commune of 1871: The View From the Left, Eugene Schulkind (ed.), p. 191] Bakunin, for his part, rightly argued that its “general effect was so striking that the Marxists themselves, who saw their ideas upset by the uprising, found themselves compelled to take their hats off to it. They went further, and proclaimed that its programme and purpose where their own, in face of the simplest logic ... This was a truly farcical change of costume, but they were bound to make it, for fear of being overtaken and left behind in the wave of feeling which the rising produced throughout the world.” [Michael Bakunin: Selected Writings, p. 261]

To see why, we need simply to compare Marx’s reporting of the Commune with Proudhon’s words. Marx stated, correctly, that the Commune “was formed of the municipal councillors, chosen by universal suffrage in the various wards of the town, responsible and revocable at short terms” and was “a working, not a parliamentary, body, executive and legislative at the same time”. The delegates would “revocable and bound by the mandat imperatif (formal instructions)
“The only limit to the autonomy of the Commune should be the equal right to autonomy for all communes adhering to the contract, whose association shall insure French unity ... The choice by election or competition of magistrates and communal functionaries of all orders, as well as the permanent right of control and revocation.

“The absolute guarantee of individual freedom and freedom of conscience.

“The permanent intervention of citizens in communal affairs by the free manifestation of their ideas, the free defence of their interests ...

“The organisation of urban defence and the National Guard, which elects its chiefs and alone watches over the maintenance of order in the city ...

“Paris wants nothing else as a local guarantee, on condition, of course, of finding in the great central administration — the delegation of federated Communes — the realisation and the practice of the same principles. But as an element of its autonomy, and profiting by its freedom of action, within its borders it reserves to itself the right to operate the administrative and economic reforms called for by the populace as it wills; to create the institutions needed to develop and spread instruction, production, exchange and credit; to universalise power and property in keeping with the needs of the moment, the wishes of those concerned and the facts furnished by experience.

“Unity, as it has been imposed on us until today by the Empire, the monarchy or parliamentarism is nothing but unintelligent, arbitrary or onerous centralisation.

“Political unity, as Paris wants it, is the voluntary association of all local initiatives, the spontaneous and free
comrades also wrote a pamphlet which “ridiculed the fable of orders from abroad.” [Juan Gomez Casa, Anarchist Organisation, p. 25 and p. 40] This is confirmed by George R. Esenwein, who argues that “[w]hile it is true that Bakunin’s direct intervention during the early days of the International’s development in Spain had assured the pre-dominance of his influence in the various federations and sections” of the organisation, “it cannot be said that he manipulated it or otherwise used the Spanish Alliance as a tool for his own subversive designs.” Thus, “though the Alliance did exist in Spain, the society did not bear any resemblance to the nefarious organisation that the Marxists depicted.” [Op. Cit., p. 42] Indeed, as Max Nettlau points out, those Spaniards who did break with the Alliance were persuaded of its “hierarchical organisation … not by their own direct observation, but by what they had been told [by Marxists] about the conduct of the organisation” in other countries. [quoted by Casa, Op. Cit., pp. 39–40]

In summary, McNally’s comments are a distortion of Bakunin’s ideas and activities. He misrepresents one aspect of Bakunin’s ideas while ignoring those aspects which support working class self-organisation and self-management. Ironically, he ignores the awkward fact that Bakunin’s and Lenin’s ideas on how revolutionaries should organise were similar (as to be expected given similar circumstances) but with the key difference that Lenin, unlike Bakunin, sought state power for the professional revolutionaries (see section H.3.11).

6. Are these “quirks of personality” or “rooted in the very nature of anarchist doctrine”?

After chronicling the failings of, and distorting the facts about, two individuals, McNally tries to generalise. “These characteristics of Bakunin and Proudhon,” he argues, “were not mere quirks of personality. Their elitism, authoritarianism and support for backward-looking and narrow-minded causes are rooted in the very

12. Why is Marxist “class analysis” of anarchism contradictory?

Another ironic aspect of McNally’s pamphlet is its demonisation of anarchism combined with praise for the Paris Commune and the Russian Soviets. This is because key aspects of both revolutionary forms were predicted by Proudhon and Bakunin. For example, McNally’s and Marx’s praise for revocable mandates in the Commune was advocated by Proudhon in 1840s (see section 4). Bakunin also advocated this in the late 1860s along with a federation of delegates from workplaces which showed a marked similarity with the Russian soviets (see section 5).

Indeed, the Paris Commune (in both its economic and political aspects) showed a clear inspiration from Proudhon’s works. In the words of George Woodcock, there are “demands in the Commune’s Manifesto to the French People of the 19th April, 1871, that might have been written by Proudhon himself.” [Pierre-Joseph Proudhon: A Biography, p. 276] K. Steven Vincent also points out that the declaration “is strongly federalist in tone, and it has a marked proudhonian flavour.” [Pierre-Joseph Proudhon and the Rise of French Republican Socialism, p. 232] Moreover, the desire to replace wage labour with associated labour by the creation of co-operatives expressed during the Commune clearly showed the influence of Proudhon. Marx mentions a “rough sketch of national organisation which the Commune had no time to develop” but does not quote from it. [The Marx-Engels Reader, p. 633] This is perhaps unsurprising as the Commune’s declaration clearly shows its anarchist roots and tendencies:

“The absolute autonomy of the Commune extended to all localities in France and assuring to each one its full rights, and to every Frenchman the full exercise of his faculties and abilities as man, citizen and producer.”
In addition, the Communists are “the most advanced and resolute section of the working-class parties” and “they have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions, and the general results of the proletarian movement”. [The Marx-Engels Reader, p. 481 and p. 484] This, needless to say, places “bourgeois ideologists” and party leaders (like Marx, Engels, Lenin and Trotsky) in a privileged position within the party, labour movement and society as a whole. Had not Marx and Engels argued in The Holy Family that the “question is not what this or that proletarian, or even the whole of the proletariat at the moment considers as its aim. The question is what the proletariat is, and what, consequent on that being, it will be compelled to do.” [quoted by Murray Bookchin, The Spanish Anarchists, p. 280] As Murray Bookchin argued:

“These lines and others like them in Marx’s writings were to provide the rationale for asserting the authority of Marxist parties and their armed detachments over and even against the proletariat. Claiming a deeper and more informed comprehension of the situation than ‘even the whole of the proletariat at the given moment,’ Marxist parties went on to dissolve such revolutionary forms of proletarian organisation as factory committees and ultimately to totally regiment the proletariat according to lines established by the party leadership.” [Op. Cit., p. 289]

Unlike Lenin and Trotsky, Marx and Engels rarely drew the obvious conclusions from their arguments (although their contempt for working class socialist thinkers — like Proudhon — was legendary) but the elitism was there. It is to Bakunin’s merit that he recognised the danger long before the likes of Lenin and Trotsky (see section 15) made it explicit.

nature of anarchist doctrine.” Thus McNally claims that these failings of Proudhon and Bakunin are not personal failings but rather political. They, he suggests, represent the reactionary core of anarchist politics but makes no attempt to show that this is the case. Worse, many of his claims about “anarchist doctrine” are simply untrue and, once corrected, leave little left other than “quirks of personality”.

Take, for example, Proudhon’s position on the American Civil War. Let us assume that McNally’s assertion is correct (as shown in section 4 it is not) and he supported the South. Bakunin “supported the Union in the struggle between the states”. [Paul Avrich, Anarchist Portraits, p. 20] What does this mean for “anarchist doctrine”? Which of the two represented the “real” anarchist position? So the question remains why Proudhon’s refusal to support either side during the American Civil War (his actual position) is an example of “anarchist doctrine” while Bakunin’s support of the North is not. Proudhon, to raise another obvious example, did not share Bakunin’s interest in secret societies (nor did Kropotkin, Goldman, etc.). What does this tell us about “the very nature of anarchist doctrine”? Could Bakunin’s position not be better explained by him being imprisoned in a Tsarist dungeon? Could it be that rather than attack anarchism, McNally simply attacks the failings of individual anarchists?

Unlike Proudhon, Bakunin and other revolutionary anarchists supported both unions and strikes and, as Kropotkin summarised, anarchists “do not seek to constitute, and invite the working men not to constitute, political parties in the parliaments. Accordingly, since the foundation of the International Working Men’s Association in 1864–1866, they have endeavoured to promote their ideas directly amongst the labour organisations and to induce those unions to a direct struggle against capital, without placing their faith in parliamentary legislation”. How can Proudhon’s position represent “the very nature of anarchist doctrine” when he was the only one to hold it? Similarly, Kropotkin simply (and rightly) dismissed
While anarchists are aware of the need for groups of like minded individuals to influence the class struggle and spread anarchist ideas, we reject the idea that such ideas have to be “injected” into the working class from outside. Rather, as we argued in section J.3, anarchist ideas are developed within the class struggle by working people themselves. Anarchist groups exist because we are aware that there is an uneven development of ideas within our class and to aid the spreading of libertarian ideas it is useful for those with those ideas to work together. However, being aware that our ideas are the product of working class life and struggle we are also aware that we have to learn from that struggle. It is because of this that anarchists stress self-management of working class struggle and organisation from below (anarchists are, to use Bakunin’s words, “convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction” [Michael Bakunin: Selected Writings, p. 237]). Only when this happens can new ways of life be created and truly develop freely. It also explains anarchist opposition to political groups seizing power — that will only result in old dogmas crushing the initiative of people in struggle and the new forms of life they create. That is why anarchists stress the importance of revolutionaries using “natural influence” (i.e. arguing their ideas in popular organisations and convincing by reason) — doing so allows new developments and ideas to be expressed and enriched by existing ones and vice versa.

One last point. It could be argued that similar comments to Lenin’s arguments can be found in Marx and Engels and so Marxism as such rather than just Leninism does not believe in proletarian self-emancipation. After all, had not The Manifesto of the Communist Party proclaimed that “a small section of the ruling class cuts itself adrift, and joins the revolutionary class” and this “portion of the bourgeois ideologists” have “raised themselves to the level of comprehending theoretically the historical movement as a whole.”

While anarchists are aware of the need for groups of like minded individuals to influence the class struggle and spread anarchist ideas, we reject the idea that such ideas have to be “injected” into the working class from outside. Rather, as we argued in section J.3, anarchist ideas are developed within the class struggle by working people themselves. Anarchist groups exist because we are aware that there is an uneven development of ideas within our class and to aid the spreading of libertarian ideas it is useful for those with those ideas to work together. However, being aware that our ideas are the product of working class life and struggle we are also aware that we have to learn from that struggle. It is because of this that anarchists stress self-management of working class struggle and organisation from below (anarchists are, to use Bakunin’s words, “convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction” [Michael Bakunin: Selected Writings, p. 237]). Only when this happens can new ways of life be created and truly develop freely. It also explains anarchist opposition to political groups seizing power — that will only result in old dogmas crushing the initiative of people in struggle and the new forms of life they create. That is why anarchists stress the importance of revolutionaries using “natural influence” (i.e. arguing their ideas in popular organisations and convincing by reason) — doing so allows new developments and ideas to be expressed and enriched by existing ones and vice versa.

working class (a “state in the proper sense of the word”) rather than the semi-state promised in such works as The State and Revolution (a work whose promises, as we note in section H.1.7, were forsaken completely within six months of the Bolshevik seizure of power). This was required to ensure that the party could “combat” spontaneous movements in the working class which questioned the privileged position of the party — both ideologically (in terms of its advanced ideas) and politically (its holding of power). This privileged position for the party engenders a perspective which can (and did) justify party dictatorship over the proletariat. Given Lenin’s position that the working class cannot formulate its own “ideology” by its own efforts, of its incapacity to move beyond “trade union consciousness” independently of the party, the clear implication is that the party could in no way be bound by the predominant views of the working class as these are, by definition non-socialist, bourgeois even. As the party embodies “socialist consciousness” (and this arises outside the working class and its struggles) then opposition of the working class to the party signifies a failure of the class to resist alien influences, a failure that the party must fight to ensure that this failure does not spread to the revolution itself — the proletariat, in short, must be repressed in its own interests by the “proletarian” dictatorship.

Therefore McNally’s comments that Leninism is a valid expression of Marx’s idea of proletarian self-emancipation is false. In reality, Lenin rejected the idea that working class people can emancipate themselves and, therefore, any claim that this tradition stands for proletarian self-emancipation is false. Rather Leninism, for all its rhetoric, has no vision of working class self-activity leading to self-liberation — it denies it can happen and that is why it stresses the role of the party and its need to take centralised power into its own hands. Of course, it never entered Lenin’s mind that if bourgeois ideology imposes itself onto the working class it also imposes itself on the party as well — more so as they are bourgeois intellectuals in the first place.

cated all quotes in this section come from Rosdolsky’s work). As will be seen, on almost every issue McNally raises against Proud- hon and Bakunin we find similar comments by Marx and Engels.

Unsurprisingly, given the times, Marx and Engels made numerous anti-Semitic remarks both in private and public. During the 1848 revolution, the paper Marx edited (Neue Rheinische Zeitung) published the reports of Dr. Cller-Telling who expressed “an all too maniacal hatred” of Jews. Engels wrote “very unpleasant passages on the (Polish) Jews” [193, 116], describing them as “the very incarnation of haggling, avarice and sordidness” and “the meanest of all races” with “its lust for profit.” The Austrian Jews had "exploited the revolution and are now being punished for it" while “anyone who knows how powerful” they were. He generalised by suggesting that “Jews are known to be cheated cheats everywhere” and, according to Marx, they had put themselves “at the head of the counter-revolution” and so the revolution had “to throw them back into their ghetto” [quoted 192, 203,196] Marx’s paper “did not dissociate itself from the anti-Semitic ‘popular opinion’” and its articles resulted in some of its backers who were Jewish demanding the return of their money as it preached “religious hatred.” [201, 191]

Yet the despicable attitude expressed against Jews in Neue Rheinische Zeitung is the least of the issues of concern here given the opinions expressed over Slavs by the founders of Marxism. Thus we find Engels asserting that the Slavs have been “forced to attain the first stage of civilisation only by means of a foreign yoke, are not viable and will never be able to achieve any kind of independence” and that the conquerors should be grateful to the Germans for “having given themselves the trouble of civilising the stubborn Czechs and Slovenes, and introducing among them trade, industry, a tolerable degree of agriculture, and culture!” [Marx-Engels Collected Works, vol. 8, p 238] Worse, Engels proclaimed that “one day we shall take a bloody revenge on the Slavs for this cowardly and base betrayal of the revolution.”
and “hatred of the Russians was, and still is, the first revolutionary
passion of the Germans”. The revolution could only be secured
“against these Slavs peoples by the most decisive acts of terrorism”
and “a war of annihilation and ruthless terrorism, not in the
interests of Germany but in the interests of the revolution!” There
would be “a bloody revenge in the Slav barbarians” and a war
which will “annihilate all these small pig-headed nations
even to their very names” and “will not only cause reactionary
classes and dynasties to disappear from the face of the earth,
but also entire reactionary peoples. And that too is an advance.”
[quoted, 85, 86]

In short, Engels advocated ethnic cleansing in the name of the
revolution against those whom he considered “nonhistoric” peo-
ples. This was recognised by leading Marxist Karl Kautsky who,
rightly, denounced him for advocating that “they had to be extermi-
nated” [quoted 90] Regardless of what drove these rants, as Rosdol-
sky rightly states “it no way nullifies the fact that they made entire
peoples the object of this hatred and proclaimed a ‘war of annihila-
tion’ against them.” [87]

Ignoring the genocidal ethnic cleansing proclaimed against the
Slavs (bar Poles) and other “nonhistoric” people, Engels wrote of
the war which “broke out over Texas” between Mexico and the USA
and how it was good that “that magnificent California was snatched
from the lazy Mexicans, who did not know what to do with it” by “the
energetic Yankees.” [quoted, 159] He failed to mention that the re-
volt of 1836 over Texas which was the root of the 1846 war was
conducted by “planters, owners of Negro slaves, and their main
reason for revolting was that slavery had been abolished in Mex-
ico in 1829.” [160] In fact in 1845 a majority of voters in the Re-
public of Texas approved a proposed constitution that specifically
endorsed slavery and the slave trade and was later accepted by
the U.S. Congress. Unlike Engels, Northern abolitionists attacked this
war as an attempt by slave-owners to strengthen the grip of slavery
and ensure their influence in the federal government and publicly
be argued that Lenin sees “subordination” as being “to the armed
vanguard of all the exploited ... i.e., to the proletariat” and so there
is no contradiction. However, this is not the case as he confuses
the rule of the party with the rule of the class: “We cannot imagine
democracy, not even proletarian democracy, without representative

Thus “subordination” is not to the working class itself (i.e. direct
democracy or self-management). Rather it is the “subordination” of
the majority to the minority, of the working class to “its” represen-
tatives. Thus we have a vision of a “socialist” society in which the
majority have not revolutionised themselves and are subordinated
to “their” party. Such a subordination, however, ensures that a so-
cialist consciousness cannot develop as only the process of self-
management generates the abilities required for self-management
(“Only freedom or the struggle for freedom can be the school for free-
don.” [Malatesta, Errico Malatesta: His Life and Ideas, p. 59]).

Lenin saw the revolution as the means by which the mass of the
people will recognise that the vanguard party represents their in-
terests and so vote it into power. However, as “there can be no
talk of an independent ideology being developed by the masses of the
workers in the process of their movement” any clash between the
party and masses simply mean that the latter are wrong and “the
armed vanguard” needs “to combat spontaneity” — literally, as
we showed in section H.6.3. As Lenin admitted in 1920:

“Without revolutionary coercion directed against the
avowed enemies of the workers and peasants, it is im-
possible to break down the resistance of these exploiters.
On the other hand, revolutionary coercion is bound to be
employed towards the wavering and unstable elements
among the masses themselves.” [Collected Works,
vol. 42, p. 170]

As we indicate in section H.3.8, this perspective meant that
Leninist theorists ended up arguing for a state separate from the
As we discuss in section H.5, this is a deeply anti-socialist position which, due to its privileging of the party, creates the theoretical justification for the anti-democratic actions of the Bolsheviks we sketched in section 8. This perspective states that the party has a better understanding of what the interests of the people are than the people themselves. If they reject the party then it means that they simply do not understand their own class interests and so they have become “declassed”, to use Lenin’s term. The party, due to it being the repository of what socialism is, then has the right — the duty — to ignore the masses for to do otherwise “means strengthening bourgeois ideology”. That this is self-serving circular logic is an understatement but it is self-serving circular logic which, in revolutionary Russia, destroyed socialism in favour of state-capitalism and party dictatorship.

For this notion of working class passivity is not confined to the “early” Lenin of What is to Be Done? infamy (not that there is any evidence that Lenin later repudiated the ideas expressed there — see section H.5.4). It can be found in his apparently more “libertarian” work The State and Revolution which argues that “we do not indulge in ‘dreams’ of dispensing at once … with all subordination; these anarchist dreams … are totally alien to Marxism … we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and ‘managers’”. Nowhere is the notion that working class people, during the process of mass struggle, direct action and revolution, revolutionise themselves (see sections A.2.7 and J.7.2, for example). Instead, we find a vision of people as they are under capitalism (“human nature as it is now”) and no vision of self-emancipation of the working class and the resulting changes that implies for those who are transforming society by their own action. Perhaps it will declared their wish for the defeat of the American forces. Henry David Thoreau was jailed for his refusal to pay taxes to support the war, penning his famous essay Civil Disobedience. [Howard Zinn, A People’s History of the United States, pp. 155–7] Rosdolsky rightly comments on how “inappropriate, in fact perverse, was Engels’ illustration.” [160]

So we find distinct parallels between McNally’s attacks on Proudhon and the many racist and anti-Semitic remarks by Marx and Engels (as listed by Peter Fryer in his “Engels: A Man of his Time” [John Lea and Geoff Pilling (eds.), The condition of Britain: Essays on Frederick Engels]) as well as their siding with slave states against abolitionist ones. Nor did Marx, it must be noted, denounce Proudhon’s racism or sexism (he also failed to comment on the Paris Commune being elected by male universal suffrage, thinking nothing of the exclusion of half the population while proclaiming its democratic nature). Strangely, most Marxists (rightly) condemning Proudhon for his bigotries are silent about this — as silent as they are on the awkward facts that Proudhon did not actually support the Southern States in the American Civil War and that a one-off, never repeated, comment made in a private notebook simply cannot be taken as expressing his political ideas (see section 4 for details).

The fact is, once we correct McNally’s errors, we discover that the vast majority of Proudhon’s and Bakunin’s positions are not “backward-looking and narrow-minded”, quite the reverse. Where a position is so (Proudhon’s position to trade unions and feminism being the most obvious examples) then we quickly discover that subsequent anarchists publicly rejected it. Most of the position’s McNally paints as “anarchist doctrine” were not actually held by either Proudhon or Bakunin (such as, opposition to industry and collectively-owned and managed property). Rather than take examples which are common to most anarchist theorists — and so actually reflective of “anarchist doctrine” — McNally takes only a few positions held by one, at most two, major anarchist thinkers.
Worse, these positions are tangential to the core of their ideas and, indeed, directly opposed to them (such as infrequently expressed bigotries against specific peoples being in obvious conflict to their other, more common, support for racial equality). From this minority of examples McNally generalises a theory — and so violates the basic principles of the scientific method!

So McNally’s position leaves something to be desired. Why is Proudhon’s opposition to trade unions and strikes an example “anarchist doctrine” while Bakunin’s (and Kropotkin’s, Malatesta’s, Berkman’s, Goldman’s, etc.) support for both is not? Why is Proudhon’s sexism “anarchist doctrine” but Bakunin’s (and Kropotkin’s, Goldman’s, Malatesta’s, etc.) support for women’s liberty and equality is not? Why proclaim Bakunin “shared most of Proudhon’s views” when anyone who did the most basic research would quickly conclude that in these two issues (and others!) Bakunin rightly rejected the positions McNally raises with regards to Frenchman’s ideas? Worse, many of the positions McNally attacks Proudhon for are simply inaccurate — he simply did not hold the ideas McNally so confidently asserts he did.

Moreover, as Daniel Gu’rin notes “[m]any of these masters were not anarchists throughout their lives and their complete works include passages which have nothing to do with anarchism.” Bakunin, for example, was only an anarchist from around 1864 to his death in 1876 while “in the second part of his career Proudhon’s thinking took a conservative turn”. [Anarchism, p. 6] As such, the positions McNally, rightly, attacks (once his errors are corrected!) are clearly “quirks of personality” rather than somehow “rooted in the very nature of anarchist doctrine.” This can be seen from the awkward fact that no later anarchists advocated them. Not to mention the awkward fact that Marx and Engels shared similar views as those McNally attacks Proudhon and Bakunin for having (even if, in reality, they did not hold the positions McNally claims they did).

These examples in themselves prove the weakness of McNally’s claims and the low levels of scholarship which lay behind them.

is to be Done? Lenin argued that “the working class, exclusively by their own effort, is able to develop only trade union consciousness … The theory of socialism [i.e. Marxism] … grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals … the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.” This meant that “Social Democratic [i.e. socialist] consciousness … could only be brought to them [the workers] from without.” Speaking on behalf of workers, he asked that the “intellectuals must talk to us, and tell us more about what we do not know and what we can never learn from our factory and ‘economic’ experience, that is, you must give us political knowledge.” [Essential Works of Lenin, pp. 74–5 and p. 108]

Thus, rather than believe in working class self-emancipation, Lenin thought the opposite. Without the radical bourgeois to provide the working class with “socialist” ideas, a socialist movement, let along society, was impossible. Hardly what you would consider self-emancipation. As Lenin put it:

“Since there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement, the only choice is: either bourgeois or socialist ideology. There is no middle course … Hence, to belittle socialist ideology in any way, to deviate from it in the slightest degree means strengthening bourgeois ideology. There is a lot of talk about spontaneity, but the spontaneous development of the labour movement leads to its becoming subordinated to bourgeois ideology … Hence our task, the task of Social-Democracy, is to combat spontaneity, to divert the labour movement from its spontaneous, trade unionist striving to go under the
Similarly, Bakunin continually quoted Marx’s (and so Tristan’s) words from the Preamble to the General Rules of the First International: “That the emancipation of the workers must be accomplished by the workers themselves.” Far more than Marx, Bakunin argued that workers’ can only free themselves by a “single path, that of 
emancipation through practical action” namely “workers’ solidarity in their struggle against the bosses” by “trades-unions, organisation, and the federation of resistance funds”. The “collective experience” workers gain in the “collective struggle of the workers against the bosses” will ensure they “will necessarily come to realise that there is an irreconcilable antagonism between the henchmen of reaction and [their] own dearest human concerns. Having reached this point, [the worker] will recognise [themselves] to be a revolutionary socialist.” [The Basic Bakunin, p. 92 and p. 103]

In contrast Marx placed his hopes for working class self-emancipation on a political party which would conquer “political power.” As history soon proved, Marx was mistaken on two levels. First, as Bakunin predicted, political action by socialist parties resulted in the political system changing the party rather than vice versa, that it “inexorably enmeshes its adherents, under the pretext of political tactics, in endless accommodations with governments and the various bourgeois political parties — that is, it thrusts them directly into reaction.” [Statism and Anarchy, p. 180] Second, “political power” can only be seized by a minority (i.e. the party, not the class it claims to represent) and if the few have the power, the rest are no longer free (i.e. they no longer govern themselves). That the many elect the few who issue them orders does not signify emancipation!

However, this is beside the point. McNally proudly places his ideas in the Leninist tradition. It is thus somewhat ironic that McNally claims that Marxism is based on self-emancipation of the working class while claiming Leninism as a form of Marxism as Lenin explicitly stated the opposite, namely that the working class could not liberate itself by its own actions. In his 1902 book What

Indeed, it is amazing that the SWP/ISO printed this diatribe — it obviously shows their contempt for facts, history and the intelligence of their desired audience.

7. Are anarchists against democracy?

McNally asserts the following:

“Originating in the revolt of small property owners against the centralising and collectivising trends in capitalist development (the tendency to concentrate production in fewer and fewer large workplaces), anarchism has always been rooted in a hostility to democratic and collectivist practices. The early anarchists feared the organised power of the modern working class. To this day, most anarchists defend the ‘liberty’ of the private individual against the democratically made decisions of collective groups.”

As indicated in section 3, the notion that anarchists are against large-scale industry or collective property is simply an invention. Both Proudhon and Bakunin, for example, argued for collective management and ownership of the means of production by the workers themselves. Indeed, workers’ self-management of production and collective ownership were raised in the very first anarchist book, Proudhon’s What is Property? and both have remained an key aspect of anarchism ever since. Proudhon put it well: “Large industry and high culture come to us by big monopoly and big property: it is necessary in the future to make them rise from the association.” [quoted by [K. Steven Vincent, Pierre-Joseph Proudhon and the Rise of French Republican Socialism, p. 156] So workers’ associations running workplaces is at the heart of anarchism, an easy fact to discover if you bother to read Proudhon and Bakunin — as is the fact that Bakunin supported revolutionary trade unionism as
the means of producing a social revolution (see section 9). So much for “fear[ing] the organised power of the modern working class”!

So the premise of his assertion is factually incorrect. What of the conclusion, the idea that anarchists support the liberty to ignore “the democratically made decisions of collective groups”? Here McNally takes a grain of truth to create a lie.

First, however, we need to ask an obvious question: what does “democracy” mean? Or, more correctly, what kind of democracy are we talking about? If quoting Lenin is not too out of place, in a section of his pamphlet The Proletarian Revolution and the Renegade Kautsky in section entitled “How Kautsky Turned Marx Into A Common Liberal”, Lenin stated it was “natural for a liberal to speak of ‘democracy’ in general; but a Marxist will never forget to ask: ‘for what class?’” [The Lenin Anthology, p. 465]

So the question is not whether anarchists support “democracy” or not but what kind of democracy and for whom. For if McNally is right (and he is) and there are two kinds of socialism (one “from above” and one “from below”) then there are multiple kinds of democracy: centralised and decentralised; unitarian and federal, top-down and bottom-up; bourgeois and workers. That is why Proudhon talked of the workers democracy (“D’mocratie ouvrière”) in his last work, contrasting it to the democracy (the left-Jacobin bourgeois-republican democracy which included the state socialists), but the elements of which he had been expounding upon since the 1840s.

A close reading of Proudhon shows that his main opposition to “democracy” was that it was, paradoxically, not democratic enough as it referred to the Jacobin notion that the whole nation as one body should elect a government. In such a regime “the People reigns and does not govern, which is to deny the Revolution.” [Property is Theft!, p. 267] He sought a social organisation in which people had meaningful control over their own lives — as individuals and as groups, collectives. This was not possible under a centralised democracy and so “universal suffrage provides us, ...
will empower the leaders of the party over the members and lead to bureaucratic tendencies. In short, the means urged inevitably produced a "from above" mentality and the descent into reformism — a descent Lenin only noticed with the outbreak of war in 1914 and the siding of German Social Democracy with its state in the imperialist slaughter.

As Bakunin predicted, using bourgeois institutions will corrupt “revolutionary” and radical parties and tie the working class to the current system. Lenin’s analysis of anarchist influence as being the off-spring of opportunist tendencies in mainstream parties may be right, but if so it is a natural development as the tactics supported by Marxists from Marx onwards inevitably lead to opportunist tendencies developing. What Lenin could not comprehend was that opportunism was the symptom and electioneering was the disease — using the same means (electioneering) with different parties/individuals (“Communists” instead of “Social Democrats”) and thinking that opportunism would not return was idealistic nonsense.

Sadly for his readers, McNally did not discuss any of this and preferred to present an inaccurate account of the syndicalist position on political struggles. Perhaps this is understandable, for an accurate account would mention the debates of the First International and have to draw the obvious conclusion: Bakunin — and the syndicalists — were right.

11. Why is McNally’s claim that Leninism supports working class self-emancipation wrong?

McNally claims that Marx “was the first major socialist thinker to make the principle of self-emancipation — the principle that socialism could only be brought into being by the self-mobilisation and self-organisation of the working class — a fundamental aspect of the socialist project.” This is not entirely true as “Proudhon insisted that the revolution could only come from below, through the action of the workers themselves.” [K. Steven Vincent, Pierre-Joseph Proudhon, p. 123] Nor was it possible as long as workers did not control their work and workplaces. This meant, as discussed in section 4, he argued for a decentralised, federal bottom-up system of communal and workplace associations based on elected, mandated and recallable delegates:

“we are all voters; we can choose the most worthy … we can follow them step-by-step in their legislative acts and their votes; we will make them transmit our arguments and our documents; we will suggest our will to them, and when we are discontented, we will recall and dismiss them.

“The choice of talents, the imperative mandate … and permanent revocability are the most immediate and incontestable consequences of the electoral principle. It is the inevitable program of all democracy. [Property is Theft!, p. 273]

As we noted in section 5, Bakunin had identical ideas on the need for a decentralised, federal, bottom-up social organisation based on elected, mandated and recallable delegates. Rather than express “hostility to democratic and collectivist practices”, anarchists have always sought to discover which social forms allow genuine democratic and collectivist practices to flourish — a “democracy” which reduces the masses to simply picking their masters every few years while workers were employed by bosses would not promote libertarian values. Hence the support for workers’ self-management of production by democratic associations, communal self-government and social-economic federalism
even the casual reader would find in the works of Proudhon and Bakunin but which McNally fails to mention.

Anarchists are well aware that support for democratic collectives in the workplace and community is a necessary but not sufficient condition for individual freedom (to quote McNally, the “challenge is to restore to socialism its democratic essence, its passionate concern with human freedom”). This is because collectives can make bad decisions, the majority can — and does — act oppressively towards the minority. For example, the United States has seen numerous votes on the issue of homosexual rights which saw the majority of voters or their representatives reject equality. That the majority are against equality for gays does not make it right — anymore than previous majorities against equality for women and blacks were right. If a majority vote for a right-wing party which promises to make strikes illegal would McNally accept that decision and urge trade unionists to obey the democratic decisions of the collectivity? Would a referendum result make it any more just and worthy of respect? What if the majority vote to ban the teaching of evolution in all schools? And, finally, what if the majority vote in favour of authoritarian regimes? This is no idle question, it happened in, for example, France in 1851 and 1852 (much to Proudhon’s disgust).

Perhaps it is not surprising, then, that the right often invoke the “silent majority” against the progressive minorities seeking change. The term was popularised (though not first used) by U.S. President Richard Nixon in 1969 when he asked for the support of “the great silent majority of my fellow Americans”, those who felt threatened by attacks on “traditional values” during the 1960s — the civil rights, women’s and peace movements as well as student rebellions, the counter-culture, wildcat strikes, and so on. Nixon, it should be noted, won a landslide victory in the 1972 Presidential election and took 49 of 50 states. The Thatcher government, likewise, invoked its democratic credentials (in spite of never receiving an actual majority of support) when launching state repression against...

one scourge more ... which threatens the proletariat.”
[Property is Theft!, p. 226]

The syndicalists, like Bakunin, argued the same — although, unlike the Frenchman, saw the trade union movement as the means of social transformation. It is almost redundant to note that history has proven the validity of anarchist anti-electioneering ideas. For example, as we argue in section J.2.6, the net result of the Marxists use of electioneering (“political action”) was the de-radicalising of their movement and theory and its becoming yet another barrier to working class self-liberation. Rather than syndicalism not giving “real direction to attempts by workers to change society” it was Marxism in the shape of Social Democracy which did that. Indeed, at the turn of twentieth century more and more radicals turned to Syndicalism and Industrial Unionism as the means of by-passing the dead-weight of Social Democracy (i.e. orthodox Marxism), its reformism, its opportunism and its bureaucracy.

This was recognised by Lenin, if in his own way. Anarchism, he suggested, “was not infrequently a kind of penalty for the opportunist sins of the working-class movement.” [Collected Works, vol. 31, p. 32] His claim that anarchist and syndicalist support in the working class is the result of the opportunist nature of the Social Democratic Parties has an element of truth. Obviously militants sick to death of the reformist, corrupt and bureaucratic “working class” parties will seek a revolutionary alternative and find libertarian socialism. However, Lenin seeks to explain the symptoms (opportunism) and not the disease itself (Parliamentarianism). Nowhere does he see the rise of “opportunist” tendencies in the Marxist parties as the result of the tactics and organisational struggles they used. Indeed, Lenin desired the new Communist Parties to practice electioneering (“political action”). Anarchists rather point out that given the nature of the means, the ends surely follow. Working in a bourgeois environment (Parliament) will result in bourgeoisifying and de-radicalising the party. Working in a centralised environment...
Marx and Engels, in contrast, favoured “political action” and completely failed, unlike Bakunin, to recognise the dangers of reformism in the tactic. Indeed, in 1891 Engels proudly announced that the Brussels Congress of the Second International “proved a brilliant success for us … And, best of all, the anarchists have been shown the door, just as they were at the Hague Congress. ‘The new, incomparably larger and avowedly Marxist International is beginning again at the precise spot where its predecessor ended.” [Collected Works, vol. 49, p. 238]

McNally, like most Leninists, is keen to distance Marx and Engels from Social Democracy and so does not note their repeated comments — both before and after the Paris Commune that socialism could come about peacefully by utilising elections (see section H.3.10). Engels in 1847, for example, argued that the “first, fundamental condition for the introduction of community of property is the political liberation of the proletariat through a democratic constitution” and so the revolution’s had to “inaugurate a democratic constitution and thereby … the political rule of the proletariat” as in “America, where a democratic constitution has been introduced” [Collected Works, vol. 6, p. 102, p. 350 and p. 356] In contrast, Proudhon had concluded the year before that the state could not be captured and reformed and socialism could only be created by proletarian self-organisation:

“Thus power [i.e. the state] … finds itself inevitably enchain to capital and directed against the proletariat ... The problem before the labouring classes, then, consists, not in capturing, but in subduing both power and monopoly — that is, in generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the State and subjugate them. Every proposition of reform which does not satisfy this condition is simply

strikes (particularly the 1984–85 miners’ strike) and imposing the most draconian anti-union laws in the Western World. Their trade union “reforms” included forcing a paper ballot of members before taking strike action, so replacing the mass union meeting with the atomised democracy of the bourgeois state. Many Tory politicians wish to go further and impose yet more legislation which would outlaw strikes unless a majority of trade union members take part in the ballot as well as the majority voting for strike action (rather than just the majority of those voting in the ballot) — in the interests of “democracy”, of course, as it would stop “unrepresentative” minorities disrupting the (non-union) majority.

Needless to say, this is a condition they never suggest for the electing of politicians for good reason: “democratic” government usually means government by those elected by a minority of a population. For example, in the 2012 London Mayor election the successful candidate received just over 50% of a 38% turn-out, meaning that the successful candidate represented a mere 20% of the city’s population. It should also be stressed that this minority of voters did not actually make decisions — that rested in the hands of one person, the mayor. In other words, power over a city of ten million rested in the hands a person elected by 20% of those eligible to vote. The same can be said of U.S. elections, particularly Presidential ones. So democracy can easily mean government by the largest minority although, in practice, it means government of the few elected by the largest minority of the minority who bother to vote. None of which is very democratic and confirms Proudhon’s critique that “nothing resembles a monarchy more than a r‘publique unitaire” [quoted by Vincent, Op. Cit., p. 211]

“So invoking “democracy” is problematic, given its wide number of uses. At its most basic, the majority can be wrong (as can be seen from the numerous crooks, incompetents, authoritarians and demagogues who have managed to win the popular vote). The aim, of course, is to change the views of the majority but that cannot be done by simply obeying its unjust opinions but rather challeng-
ing them by direct action — or “ignoring” them to use McNally’s term. As we note in section H.2.11, all progressive movements — whether trade unionism, civil rights activism, feminism and gay rights — started out as minorities (and sometimes remained so!) but managed, by direct action and protest (i.e., ignoring the wishes of the majority) to change perspectives and make society more freedom and just (see Kropotkin’s essay “Revolutionary Minorities” in Words of a Rebel for further discussion). Malatesta put it well:

“We do not recognise the right of the majority to impose the law on the minority, even if the will of the majority in somewhat complicated issues could really be ascertained. The fact of having the majority on one’s side does not in any way prove that one must be right. Indeed, humanity has always advanced through the initiative and efforts of individuals and minorities … [W]e are even more opposed to domination of the majority by a minority. It would be absurd to maintain that one is right because one is in a minority … [I]t is not a question of being right or wrong; it is a question of freedom, freedom for all, freedom for each individual so long as he does not violate the equal freedom of others … it is necessary that majority and minority should succeed in living together peacefully and profitably by mutual agreement and compromise, by the intelligent recognition of the practical necessities of communal life and of the usefulness of concessions which circumstances make necessary.” [Errico Malatesta: His Life and Ideas, p. 72]

So, yes, anarchists do defend the liberty of individuals to rebel against the decisions of collective groups (we should point out that Marxists usually use such expressions as a euphemism for the state, but here we will take it at face value). This is for two very good reasons. Firstly, the majority is not always right. Secondly, simply

insignificance … Participation in parliamentary politics has affected the Socialist Labour movement like an insidious poison. It destroyed the belief in the necessity of constructive Socialist activity, and, worse of all, the impulse to self-help, by inoculating people with the ruinous delusion that salvation always comes from above.” [Op. Cit., p. 54]

Rocker’s last point is important, given that McNally seeks to appropriate the idea of “from below” for Marxism. He is well aware of the results of socialist electioneering, reporting how by the start of the 20th century “most European socialists… came to the view that socialism would be achieved gradually, through the slow transformation of capitalism into a kind of welfare capitalism under which workers would prosper” and “[g]one was Marx’s notion that socialism could only come into being through a revolutionary transformation of society from below. In its place developed the view that capitalism would slowly grow over into socialism.” However, he significantly fails to note that these parties considered themselves as Marxist and had been following the strategy Marx and Engels had advocated.

It would have been informative to his readership if McNally had found time to discuss this awkward fact. One of the key differences between Marx and Bakunin in the First International was over “political action”: the forming of political parties and standing in elections. Bakunin argued that “it is usually enough for these men of the people to enter government for them to become members of the bourgeoisie in their turn, sometimes scorning the people from whom they came more than do the natural-born members of the bourgeoisie.” The need was “the organisation of the might of the workers, the unification of the proletariat of the entire world” by “eliminating from its program all bourgeois political schemes” in favour of “workers’ solidarity in their struggle against the bosses. It means trades unions, organisation, and the federation of resistance funds.”
would be replaced by *Bourses du Travail* (local federation of unions) and the Trades Unions Congress, with the latter being formed by delegates “from all parts of France” and “from all trades, from all professions” and “having to decide upon points previously discussed by the comrades who had sent them.” The similarities to soviets — and Bakunin’s ideas (see section 5) — are clear. Nor did they ignore the need to defend a revolution and like revolutionary anarchists (see section H.2.1) argued for the unions to form “bands” to “watch over the security of the committees” and “sought to arm themselves” in order to “counterbalance the military and other forces” which “held them under the yoke.” The trade unions distributed arms and in each syndicate “a group for defence was formed” which entered “into relation with like groups in the same district, and with distant centres” by means of an “organisation of defence, with a Trade Union and Federal basis.” These “Syndicalist battalions were not a force external to the people. They were the people themselves” who “had the common-sense to arm themselves in order to protect their conquered liberty.” [Emile Pataud and Emile Pouget, *How We Shall Bring About the Revolution*, pp. 79–83, p. 94, pp. 128–9, p. 69 and pp. 155–7]

As we argued in section J.2.10, anarchist support for direct action and opposition to taking part in elections does not mean we are “apolitical” or reject political action. Anarchists have always been clear — we reject “political action” which is bourgeois in nature in favour of “political action” based on the organisations, action and solidarity of working class people. This is because electioneering corrupts those who take part, watering down their radical ideas and making them part of the system they were meant to change. As Rocker summarised:

“Participation in the politics of the bourgeois States has not brought the labour movement a hair’s-breadth nearer to Socialism, but thanks to this method, Socialism has almost been completely crushed and condemned to because progress is guaranteed by individual liberty — by dissent. That is what McNally is attacking here — the right of individuals and groups to dissent, to express themselves and live their own lives. As we argue in section A.2.11, most anarchists are in favour of direct democracy in free associations. However, we agree with Carole Pateman when she argues:

“The essence of liberal social contract theory is that individuals ought to promise to, or enter an agreement to, obey representatives, to whom they have alienated their right to make political decisions ... Promising ... is an expression of individual freedom and equality, yet commits individuals for the future. Promising also implies that individuals are capable of independent judgement and rational deliberation, and of evaluating and changing their own actions and relationships; promises may sometimes justifiably be broken. However, to promise to obey is to deny or limit, to a greater or lesser degree, individuals’ freedom and equality and their ability to exercise these capacities. To promise to obey is to state that, in certain areas, the person making the promise is no longer free to exercise her capacities and decide upon her own actions, and is no longer equal, but subordinate.” [The Problem of Political Obligation, p. 19]

She indicates an obvious truth which McNally ignores:

“Even if it is impossible to be unjust to myself, I do not vote for myself alone, but along with everyone else. Questions about injustice are always appropriate in political life, for there is no guarantee that participatory voting will actually result in decisions in accord with the principles of political morality.” [Op. Cit., p. 160]
Thus, for anarchists, a democracy which does not involve individual rights to dissent, to disagree and to practice civil disobedience would violate freedom and equality, the very values McNally claims to be at the heart of Marxism. He is essentially arguing that the minority becomes the slave of the majority — with no right of dissent when the majority is wrong or being unjust and restricting the freedom democracy is meant to be based upon, reflect and defend. In effect, he wishes the minority to be subordinate, not equal, to the majority. Anarchists, in contrast, because we support self-management also recognise the importance of dissent and individuality — in essence, because we are in favour of self-management (“democracy” does not do the concept justice) we also favour the individual freedom that is its rationale. We support the liberty of private individuals because we believe in self-management (“democracy”) so passionately.

Then there is the question of which “collective groups” make the democratic decision. This is a key issue for anyone concerned about freedom for its answer determines what kind of democracy we are talking about — a meaningful one which empowers all or a formal one which restricts what democracy is meant to be about?

For example, during debates on Scottish Independence some commentators suggest that limiting the vote on whether Scotland should withdraw from the UK to just those who lived there was “undemocratic” as the consequences impacted on those who lived in England, Wales and Northern Ireland. However, expanding the vote would have meant that the democratic decision of those in Scotland — a small minority of the total population of the UK — would have been irrelevant to the final decision. This can be generalised to all nation states which contain distinct cultural or ethnic groupings within it. Can it be considered “democratic” to favour “collective groups” which ensure the marginalisation of minorities who wish to govern themselves?

This applies with equal force to the labour movement. In terms of strike action, which “collective groups” get to decide? Is it a sub-

They also note that syndicalists “have proven time and again that they can solve the many so-called political questions by direct action.” [Earl C. Ford and William Z. Foster, Syndicalism, pp. 19f and p. 23] A historian of the British syndicalist movement reiterates this point:

“Nor did syndicalists neglect politics and the state. Revolutionary industrial movements were on the contrary highly ‘political’ in that they sought to understand, challenge and destroy the structure of capitalist power in society. They quite clearly perceived the oppressive role of the state whose periodic intervention in industrial unrest could hardly have been missed.” [Bob Holton, British Syndicalism: 1900–1914, pp. 21–2]

This awareness that the state could not be ignored but had to be fought is reflected in the 1909 French syndicalist novel How We Shall Bring About the Revolution which discussed how the Chamber of Deputies was “invaded from all sides” by the crowd during the revolution, which “threatened with death any deputies who should dare sit again.” The “General Strikers were on watch” and “in order to guard against any aggressive action by the fallen power, or any effort to re-establish Parliamentarianism, a certain number of their comrades should remain permanently at the Palais Bourdon” and “oppose by force any counter-revolutionary measures.” Guards were also used in “the Police Offices, the Government Offices, the Elys’e, etc.” after “having taken them by assault.” The town hall “was not neglected” and “was occupied” in a similar fashion. Thus there was a “definite intention of disorganising the State, of dismantling and thoroughly disabling it” to ensure it was “impossible for the Government to recover itself, or rally around any point whatever.” Thus the general strike “very soon changed into an insurrectional strike” and “the General Strikers occupied the centres of Government action, and expelled the representative of the State. The state
“Anarcho-Syndicalists, then, are not in any way opposed to the political struggle, but in their opinion this struggle, too, must take the form of direct action, in which the instruments of economic power which the working class has at its command are the most effective...

“The focal point of the political struggle lies, then, not in the political parties, but in the economic fighting organisations of the workers. It as the recognition of this which impelled the Anarcho-Syndicalists to centre all their activity on the Socialist education of the masses and on the utilisation of their economic and social power. Their method is that of direct action in both the economic and the political struggles of the time. That is the only method which has been able to achieve anything at all in every decisive moment in history.”

Rocker’s work, *Anarcho-Syndicalism*, was written in 1938 and is considered the standard introduction to that theory. McNally wrote his pamphlet in the 1980s and did not bother to consult the classic introduction to the ideas he claims to be refuting. That in itself indicates the worth of his pamphlet and any claims it has for being remotely accurate with respect to anarchism and syndicalism.

Syndicalists, then, do reject working class “political action” only if you think “political action” means simply bourgeois politics — that is, electioneering, standing candidates for Parliament, local town councils and so on. It does not reject “political action” in the sense of direct action to effect political changes and reforms. As syndicalists Ford and Foster argued, syndicalists use “the term ‘political action’ … in its ordinary and correct sense. Parliamentary action resulting from the exercise of the franchise is political action. Parliamentary action caused by the influence of direct action tactics … is not political action. It is simply a registration of direct action.”

The anarchist position is clear — the appropriate group makes the decision. Thus federalism allows “free combination from below upward, putting the right of self-determination of every member above everything else and recognising only the organic agreement of all on the basis of like interests and common convictions.” [Rocker, *Op. Cit.*, p. 60] Unsurprisingly, then, we discover that the most militant British union was that of the miners which had, due to syndicalist influence, a decentralised, federal structure based on autonomous branches. And, as Rocker notes, while the German
unions made no attempt to resist the Nazi seizure of power, the anarcho-syndicalist CNT rose in insurrection and stopped Franco across two-thirds of Spain in 1936.

Simply put, Marxism (as McNally presents it here) flies in the face of how societies change and develop. New ideas start with individuals and minorities and spread by argument and by force of example. McNally is urging the end of the free expression of individuality. For example, who would seriously defend a society that “democratically” decided that, say, homosexuals should not be allowed the freedom to associate? Or that inter-racial marriage was against “Natural Law”? Or that trade unions and strikes should be outlawed as the acts of “selfish” minorities? Or that socialists were dangerous subversives and should be banned? He would, we hope (like all sane people), recognise the rights of individuals to rebel against the majority when the majority violate the spirit of association, the spirit of freedom and equality which should give democracy its rationale. However, if he did then he would have to also admit the correctness of the anarchist position.

So McNally fails to understand the rationale for democratic decision making — it is not based on the idea that the majority is always right but that individual freedom requires democracy to express and defend itself. By placing the collective above the individual, McNally undermines democracy and replaces it with little more than tyranny by the majority — or, more likely, those who claim to represent the majority. It also, ironically, places him on the wrong side within his own political tradition.

If we take McNally’s comments seriously then we must conclude that those members of the German Social Democratic Party who opposed their party’s role in supporting the First World War were acting inappropriately. Rather than express their opposition to the war and act to stop it, according to McNally’s “logic”, they should have remained in their party (after all, leaving the party meant ignoring the democratic decision of a collective group), accepted the democratic decision of the collective and supported the Imperialist
different countries, and consequently no interest in the political struggles of the time, and confines its activities to the fight for purely economic demands. This idea is altogether erroneous and springs either from outright ignorance or wilful distortion of the facts. It is not the political struggle as such which distinguishes the Anarcho-Syndicalists from the modern labour parties, both in principle and in tactics, but the form of this struggle and the aims which it has in view...

“The attitude of Anarcho-Syndicalism toward the political power of the present-day state is exactly the same as it takes toward the system of capitalist exploitation... [and so] Anarcho-Syndicalists pursue the same tactics in their fight against that political power which finds its expression in the state...

“For just as the worker cannot be indifferent to the economic conditions of his life in existing society, so he cannot remain indifferent to the political structure of his country... It is, therefore, utterly absurd to assert that the Anarcho-Syndicalists take no interest in the political struggles of the time... But the point of attack in the political struggle lies, not in the legislative bodies, but in the people... If they, nevertheless, reject any participation in the work of bourgeois parliaments, it is not because they have no sympathy with political struggles in general, but because they are firmly convinced that parliamentary activity is for the workers the very weakest and the most hopeless form of the political struggle...

“But, most important of all, practical experience has shown that the participation of the workers in parliamentary activity cripples their power of resistance and dooms to futility their warfare against the existing system...
hand with anarchists - as they have done in Spain - they have obtained, on the one hand, immediate results (an eight-hour day in certain trades in Catalonia), and on the other have made good propaganda for the social revolution - the one to come, not from the efforts of those highly-placed gentlemen, but from below, from workmen’s organisations.” [“Anarchists and Trade Unions”, Direct Struggle Against Capital, pp. 391–2]

We will leave the matter here and point interested readers to our extended discussion of the links between anarchism and syndicalism in section H.2.8. However, the inaccuracy of McNally’s statement should be clear as we have shown that according to him “syndicalism” (i.e. Bakunin’s ideas) is “much superior to classical anarchism” (i.e. Bakunin’s ideas)! How spurious his argument actually is can be seen from his comments about syndicalism and its relation to anarchism.

10. Do syndicalists reject working class political action?

McNally, after getting the relationship between “classical anarchism” and syndicalism completely wrong (see last section), moves on to an equally flawed argument against syndicalism. He states that “by rejecting the idea of working class political action, syndicalism has never been able to give real direction to attempts by workers to change society.” However, syndicalists (like all anarchists) are clear what kind of politics they reject — bourgeois politics (i.e. the running of candidates in elections). It is worth quoting Rudolf Rocker at length on McNally’s claim:

“It has often been charged against Anarcho-Syndicalism that it has no interest in the political structure of the slaughter in the name of party democracy. Indeed, the minority of anti-war Social-Democratic representatives in the German Parliament did precisely that, refusing to vote against war credits in 1914 in the name of party discipline (presumably because, as good Marxists, they thought only “anarchists defend the ‘liberty’ of the private individual against the democratically made decisions of collective groups”, to use McNally’s words). It took until 1915 for Karl Liebknecht to do the right thing. If quoting Trotsky is not too out of place: “Do not fear to remain in a minority — even a minority of one, like Liebknecht’s one against a hundred and ten”. [History of the Russian Revolution, vol. 1, p. 293] Common sense as well as political principle indicates that Liebknecht’s (belated) defence of socialist internationalism against the democratically made decision of the Social-Democratic representatives (and wider party) was right — and his principled dissent helped turn the tide against the jingoism of the majority.

Another obvious example is provided by Lenin who, just before the party’s seizure of power in 1917, was so frustrated with the conservativism of his own party’s central committee that he, “by way of protest resigns from the Central Committee” after his “furious criticism” had no effect. Rather than abide by the rules of his own party and the majority of its governing body “by announcing his resignation … Lenin obviously wanted to make it possible to free himself in case of need from internal discipline of the Central Committee”. This meant the “withdrawing completely beyond the limits of party legality” and the threat of resigning gave him “greater freedom to develop his offensive along internal lines.” [Op. Cit., vol. 3, p. 131] Perhaps McNally is of the opinion that a private individual should not ignore the democratically made decisions of collective bodies — unless the individual in question is Lenin!

We are sure that McNally would reject the notion that Liebknecht and Lenin were wrong — in these cases the rights of minorities (even of one) take precedence over the “democratic decisions of collectives.” This is because the majority is not always
right and it is only through the dissent of individuals and minorities that the opinion of the majority can be moved towards the right one. Thus his comments are fallacious.

Progress is determined by those who dissent and rebel against the status quo and the decisions of the majority. That is why anarchists support the right of dissent in self-managed groups — in fact, dissent, refusal, revolt by individuals and minorities is a key aspect of self-management. Given that Leninists do not support self-management (rather they, at best, support the Lockean notion of electing a government as being “democracy”) it is hardly surprising they, like Locke, view dissent as a danger and something to denounce. Anarchists, on the other hand, recognizing that self-management’s (i.e. direct democracy’s) rationale and base is in individual freedom, recognize and support the rights of individuals to rebel against what they consider as unjust impositions (hence our recognition of the possibility of “the tyranny of the majority” — see section I.5.6). As history shows, the anarchist position is the correct one — without rebellion, numerous minorities would never have improved their position. Indeed, McNally’s comments is just a reflection of the standard capitalist diatribe against strikers and protestors — they do not need to protest, for they live in a “democracy.”

So, yes, anarchists do support individual freedom to resist even democratically made decisions simply because democracy has to be based on individual liberty. Without the right of dissent, democracy becomes a joke and little more than a numerical justification for tyranny (usually of the few who make up the so-called “democratically elected” government). Thus McNally’s latter claim that the “challenge is to restore to socialism its democratic essence, its passionate concern with human freedom” seems farcical — after all, he has just admitted that Marxism aims to eliminate individual freedom in favour of “collective groups” (i.e. the government). Unless of course he means freedom for the abstraction “humanity” rather than concrete freedom of the individual to govern themselves as

(As an aside, ironically enough, Engels distorted diatribe against Bakunin and the general strike was later used against more radical Marxists like Rosa Luxemburg — usually claimed by Leninists as part of their tradition — by the reformists in Social Democratic Parties. For orthodox Marxists, the mass strike was linked to anarchism and Engels had proven that only political action — i.e. electioneering — could lead to working class emancipation. This appeal to authority lead Luxemburg to the innovative tactic of suggesting Engels was correct against the anarchist general strike but not against her mass strike! That this involved distorting the anarchist position — as Engels had done — should go without saying — see section H.3.5.)

It should be stressed that Bakunin’s position on revolutionary class struggle waged by workers’ organisations became the basis of revolutionary anarchism. Thus we find, for example, Emma Goldman arguing that in the First International “Bakunin and the Latin workers” forged ahead “along industrial and Syndicalist lines” and so syndicalism “is, in essence, the economic expression of Anarchism” and “[l]ike Anarchism, Syndicalism prepares the workers along direct economic lines, as conscious factors in the great struggles of to-day, as well as conscious factors in the task of reconstructing society.” The “most powerful weapon” for liberation was “the conscious, intelligent, organised, economic protest of the masses through direct action and the general strike.” [Red Emma Speaks, p. 89, p. 91 and p. 60] Kropotkin summarised the libertarian perspective well in 1907:

“Workmen’s organisations are the real force capable of accomplishing the social revolution -\196 after the awakening of the proletariat has been accomplished, first by individual action, then by collective action, by strikes and revolts extending more and more; and where workmen’s organisations have not allowed themselves to be dominated by the gentlemen who advocate ‘the conquest of political power’, but have continued to walk hand in
themselves.” [Roads to Freedom, p. 52] J. Romero Maura correctly summarised that for the “Bakuninists” in the First International, the “anarchist revolution, when it came, would be essentially brought about by the working class. Revolutionaries needed to gather great strength and must beware of underestimating the strength of reaction” and so they “logically decided that revolutionaries had better organise along the lines of labour organisations.” [“The Spanish case”, pp. 60–83, Anarchism Today, D. Apter and J. Joll (eds.), p. 66]

We could go on but as leading syndicalist activist and thinker Rudolf Rocker summarised:

“Modern Anarcho-syndicalism is a direct continuation of those social aspirations which took shape in the bosom of the First International and which were best understood and most strongly held by the libertarian wing of the great workers’ alliance.” [Anarcho-Syndicalism, p. 54]

Perhaps, in the face of such evidence (and the writings of Bakunin himself!), Marxists like McNally could claim that the sources we quote are either anarchists or “sympathetic” to anarchism. To counter this we will quote Marx and Engels. According to Marx, Bakunin’s theory consisted of urging the working class to “only organise themselves by trades-unions” and “not occupy itself with politics.” Engels asserted that in the “Bakuninist programme a general strike is the lever employed by which the social revolution is started” and that they admitted “this required a well-formed organisation of the working class”. [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 48, p. 132 and p. 133] Ignoring the misrepresentations of Marx and Engels about the theories of their enemies, we can state that they got the basic point of Bakunin’s ideas — the centrality of trade union organisation and struggle as well as the use of strikes as the means of starting a social revolution.

individuals and as part of freely joined self-managed associations? For those who really seek to restore to socialism its passionate concern for freedom the way it clear — anarchism. Hence Murray Bookchin’s comments:

“Here is the nub of the problem [with] ... Marxism ... its perspectives are orientated not towards concrete, existential freedom, but towards an abstract freedom — freedom for ‘Society’, for the ‘Proletariat’, for categories rather than for people.” [Post Scarcity Anarchism, p. 148]

Anarchism, on the other hand, favours freedom for people and that implies two things — individual freedom and self-management (direct democracy) in free associations. Any form of “democracy” not based on individual freedom would be so contradictory as to be useless as a means to human freedom (and vice versa, any form of “individual freedom” — such a liberalism — which denies self-management would be little more than a justification for minority rule and a denial of human freedom). Ultimately, McNally’s attack on anarchism fails simply because the majority is not always right and dissent a key to progress. That he forgets these basic facts of life indicates the depths to which Marxists will sink to distort the truth about anarchism.

Not that those in the Bolshevik tradition have any problem with individuals ignoring the democratic decisions of collective groups. The Bolsheviks were very happy to let individuals ignore and revoke the democratic decisions of collective groups — as long as the individuals in question were the leaders of the Bolshevik Party. As the examples we provide later (in section 8) indicate, leading lights in the Leninist tradition happily placed the rights of the party before the rights of working people to decide their own fate. Thus McNally comments are strange in the extreme. Both anarchists and Leninists share a belief that individuals can and should have the right to ignore decisions made by groups.
However, Leninists seem to think only the government and leadership of the Party should have that right while anarchists think all should. Unlike the egalitarian support for freedom and dissent for all anarchists favour, Leninists have an elitist support for the right of those in power to ignore the wishes of those they govern. Thus the history of Marxists parties in power expose McNally as a hypocrite and as we argue in section 14, Leninist ideology provides the rationale for such action. Thus his attempt to portray anarchism as “anti-democratic” is somewhat ironic.

McNally states that anarchists “oppose even the most democratic forms of collective organisation of social life. As the Canadian anarchist writer George Woodcock explains: ‘Even were democracy possible, the anarchist would still not support it ... Anarchists do not advocate political freedom. What they advocate is freedom from politics ...’ That is to say, anarchists reject any decision-making process in which the majority of people democratically determine the policies they will support.”

It is perhaps understandable that McNally fails to provide a reference for Woodcock’s quote given that the two parts come from different chapters of the pamphlet Anarchy or Chaos. The first part (“Even were democracy possible, the anarchist would still not support it”) appears in chapter 3 on page 20 while the second (“Anarchists do not advocate political freedom. What they advocate is freedom from politics ...”) comes from chapter 15, page 108. In other words, McNally skips most of the pamphlet and ignores such trivial discussions as anarchist support for organisation and so collective decision making, the links between anarchism and syndicalism (including a chapter explaining syndicalist ideas), revolutionary anarchist support for collective property in the means of production and products (libertarian communism) as well as what was meant by “political freedom” and “democracy”.

It is useful, then, to present what Woodcock actually argued in order to understand what anarchism stands for. First, it should be stressed that Woodcock is very specific about what he meant see “capital and all tools of labour belong to the city workers — to the workers associations. The whole organisation of the future should be nothing but a free federation of workers — agricultural workers as well as factory workers and associations of craftsmen.” [The Political Philosophy of Bakunin, p. 300 an p. 410] This position was common to all revolutionary anarchists (see sections H.2.2 and H.2.7).

What is ridiculous about McNally’s comments is that all historians who take the time to read Bakunin’s works note the obvious links between his ideas and syndicalism. Let us present a few examples here (many writers also point to syndicalist aspects in Proudhon’s ideas as well but we will concentrate on Bakunin). Thus we discover Caroline Cahm pointing out “the basic syndicalist ideas of Bakunin” and that he “argued that trade union organisation and activity in the International [Working Men’s Association] were important in the building of working-class power in the struggle against capital ... He also declared that trade union based organisation of the International would not only guide the revolution but also provide the basis for the organisation of the society of the future.” Indeed, he “believed that trade unions had an essential part to play in the developing of revolutionary capacities of the workers as well as building up the organisation of the masses for revolution.” [Kropotkin and the Rise of Revolutionary Anarchism, p. 219, p. 215 and p. 216] George R. Esenwein noted that syndicalism “had deep roots in the Spanish libertarian tradition. It can be traced to Bakunin’s revolutionary collectivism” and the class struggle was “central to Bakunin’s theory.” [Anarchist Ideology and the Working Class Movement in Spain, p. 209 and p. 20] The syndicalists “viewed themselves as the descendants of the federalist wing of the First International, personified above else by Mikhail Bakunin.” [Wayne Thorpe, “The Workers Themselves”, pp. xiii-xiv] “Hardly any of these ideas [associated with syndicalism] are new”, stated Bertrand Russell “almost all are derived from the Bakunist [sic!] section of the old International” and this was “often recognised by Syndicalists
hold sway over the proletariat, a general strike can result only in a great cataclysm which forces society to shed its old skin.” He raised the possibility that this could “arrive before the proletariat is sufficiently organised” and dismissed it the “necessities of the struggle impel the workers to support one another” and the “more active the struggle becomes … the stronger and more extensive this federation of proletarians must become.” Thus strikes “indicate a certain collective strength already” and “each strike becomes the point of departure for the formation of new groups.” [The Basic Bakunin, pp. 149–50]

For Bakunin, like the later syndicalists, “the natural organisation of the masses … is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association” and once “every occupation … is represented within the International [Working-Men’s Association], its organisation, the organisation of the masses of the people will be complete.” [Op. Cit., p. 139] Thus “unions create that conscious power without which no victory is possible” while strikes “create, organise, and form a workers’ army, an army which is bound to break down the power of the bourgeoisie and the State, and lay the ground for a new world.” [The Political Philosophy of Bakunin, p. 379 and pp. 384–5] The “organisation of the trade sections and their representation by the Chambers of Labour … bear in themselves the living seeds of the new society which is to replace the old world. They are creating not only the ideas, but also the facts of the future itself.” [Bakunin on Anarchism, p. 255]

And yet McNally proclaims that Bakunin “shared most of Proudhon’s views” and so, by implication, “so feared the organised power of the developing working class that he went so far as to oppose trade unions”! Rather than be against the “freedom of the working class to make collectively a new society”, Bakunin repeatedly argued that “the new social order” would be attained “through the social (and therefore anti-political) organisation and power of the working masses of the cities and villages.” This would by democracy: “for democracy puts forward the will of the majority as the supreme law, and declares that society must be governed, and the individual, whether he agrees or not, be coerced by that will.” Thus he is not discussing democratic decision making within free associations but rather the majority passing laws which all must obey. As indicated above, this is not an unproblematic situation. Woodcock indicates this by noting the “laws against bigamy, abortion, homosexual practices, transvestism, and other [so-called] sexual deviations, as well as the semi-official persecution of the unmarried mother and the bastard child, protect the institution of the family”. Thus “laws protecting the state [or the wishes of the majority] find their way into every sphere of life, and involve the prohibition of activities that, at first consideration, would appear to have no bearing on the social structure.” [Op. Cit., p. 20 and p. 107]

So it is essential to remember that democracy and freedom need not go hand-in-hand — majorities can, and do, restrict the freedom of individuals in repressive and unjust ways. So while democracy is a necessary condition for freedom it is not sufficient for, ultimately, the defining feature of democracy is not that the majority is always right but rather that a ruling minority cannot be trusted to not abuse its position and power. This is why Woodcock states “Anarchists seek neither the good of a minority, nor the good of the majority, but the good of all.” He also notes that in so-called democracies it is usually the handful of people who make up the “democratically elected” government who make the decisions and so it is “not even of the majority [who rule] but of the privileged few who forms its ruling class”. [Op. Cit., p. 20] This awareness informs his comments on political freedom which McNally shamefully ignores:

“Political freedom the right to vote, trial by jury, freedom of speech and press — does not constitute real freedom. Indeed it masks the unfree nature of the society from which it springs. The right to vote means the right to choose whether one will have a brewer or a lawyer
for a master. It does not mean the right to do without a master. Trial by jury means the right to be judged by a handful of petty tradesmen, in accordance with the laws of a society based on property and class ... Political freedom in a class society is virtually meaningless ... it is strictly limited in the interests of the controlling class, and its availability is in relation to the class and economic position of the man concerned ... Democratic freedoms, then, are relative to wealth. But this is not the full measure of the relationship. In reality the rich enjoy a far greater freedom than that ... In a class society the ruling class are always free owing to their control of the means of production, of the money that in an acquisitive society is the way to all enjoyment. The ruled are not free because lack of control of production, and the benefits of money, liberal education, etc., proceeding there from ... Moreover, political freedom in a class society (and all political societies are by definition class societies), is relative to the security of that society. The ruling class give just so much political freedom as it is worthwhile and possible to give to keep the people out of mischief ... Political freedom, at its best, can only be limited, as it maintains the power of property, which, by conferring the right of exploitation, limits the freedom of the exploited, who are the majority of the population ... “Political freedom is thus, in fact, an ingenious delusion, by which the governing classes give the people the comforting belief that they themselves have made the chains that bind them and that for this reason the chains are necessary and good. It gives men certain liberties that the ruling classes find it wise to concede as a cheap way of buying security, but its very retention of a political sys-

outlook does believe in collective working class action to change society. Syndicalists look to trade union action — such as general strikes — to overthrow capitalism. Although some syndicalist viewpoints share a superficial similarity with anarchism — particularly with its hostility to politics and political action — syndicalism is not truly a form of anarchism. By accepting the need for mass, collective action and decision-making, syndicalism is much superior to classical anarchism.”

The weakness of McNally’s position can be seen from comparing his summary of syndicalism’s key ideas with “classical anarchism”, namely Bakunin’s revolutionary anarchism. This passage by Bakunin expresses almost all the ideas McNally ascribes to syndicalism:

“Toilers count no longer on anyone but yourselves. Do not demoralise and paralyse your growing strength by being duped into alliances with bourgeois Radicalism ... Abstain from all participation in bourgeois Radicalism and organise outside of it the forces of the proletariat. The bases of this organisation ... are the workshops and the federation of workshops ... instruments of struggle against the bourgeoisie, and their federation, not only national, but international ... when the hour of revolution sounds, you will proclaim the liquidation of the State and of bourgeois society, anarchy, that is to say the true, frank people’s revolution.” [quoted by K.J. Kenafick, Michael Bakunin and Karl Marx, pp. 120–1]

Bakunin, therefore, stressed trade union action, arguing as “strikes spread from one place to another, they come close to turning into a general strike. And with the ideas of emancipation that now
but rather that party dictatorship and one-man management were necessary to achieve a successful revolution and that an economic regime which was obvious state-capitalism was socialism. Little wonder Leninists had so much difficulty in recognising Stalinism was a new class system — to do so would have been to raise awkward questions about the similar — if less brutal — regime under Lenin and Trotsky.

To conclude, both anarchism and Leninism have a critical position on democracy. Lenin argued that “formal democracy must be subordinate to the revolutionary interest” and in a sense he was right. [Collected Works, vol. 32, p. 86] As we indicated in section 7, anarchists argue that minorities should ignore (or rebel against) the majority if it is oppressing the minority — for progress to be achieved the “revolutionary interest” (freedom) must come first. Only in this way can the liberatory promise of democracy be secured in the face of any potential dictatorship of the majority. The Leninist position is that a minority can ignore the majority only if it is the party leadership for it is they, the vanguard, who determine what the “revolutionary interest” is and, as a result, Leninism — for all its rhetoric — is fundamentally an anti-democratic ideology simply because this justifies party dictatorship as everyone is “backward” compared to the vanguard. McNally distorts the anarchist position while proclaiming the democratic credentials of Leninism. The facts are otherwise.

9. Why is McNally wrong on the relation of syndicalism to anarchism?

After slandering anarchism, McNally turns towards another form of libertarian socialism, namely syndicalism. It is worth quoting him in full as his comments are truly ridiculous:

“There is … another trend which is sometimes associated with anarchism. This is syndicalism. The syndicalist

‘Anarchists do not advocate political freedom. What they advocate is freedom from politics, freedom from the institution of government, freedom from coercion, freedom from the law’s interference in the lives of individual men and women, freedom from economic domination and inequality … Only a society based on control from above has need of coercion. A society based on co-operation can do without oppression and restriction because it is based on the voluntary agreement between its members.” [Op. Cit. pp. 105–8]

Ultimately, if you define political freedom as the freedom to elect a government then, obviously, anarchists do not aim for it because we aim to end all governments! As is clear from the pamphlet McNally shamefully rips quotes from. The dishonesty is clear.

Given McNally’s assertions about anarchism opposing collective property and being undemocratic, it is useful to also quote Woodcock’s words on what anarchism is based on and what it logically implies. He stresses that “few anarchists contend that absolute individual freedom is possible, or, indeed, desirable … man is a social being, depending for his well-being on working and living together in society … The freedom anarchists seek, then, is a reciprocal freedom, a freedom of men and women recognising each other’s rights, a freedom based on justice.” [Op. Cit., p. 105] Therefore:

“Anarchism … is based on the concepts of freedom and justice, justice being that reciprocity of freedom without which no real individual freedom is possible. The social principles that follow from these concepts are mutual aid, or co-operation, and communism, or common ownership of the means of production … In the anarchist view these principles are expressed concretely in the administration

tem, which means government, which means coercion, must in the end destroy political freedom itself.

“Anarchists do not advocate political freedom. What they advocate is freedom from politics, freedom from the institution of government, freedom from coercion, freedom from the law’s interference in the lives of individual men and women, freedom from economic domination and inequality … Only a society based on control from above has need of coercion. A society based on co-operation can do without oppression and restriction because it is based on the voluntary agreement between its members.” [Op. Cit. pp. 105–8]
of economic and functional affairs by voluntary associations of the workers for the purpose of running the factories and the farms and providing the necessary social services such as posts, drainage, roads, etc. Each industry would be administered by its own workers who are the most competent people for that purpose... who, having expert knowledge of their professions, are obviously better fitted to do this than politicians chosen according to the methods of parliamentary democracy.” [Op. Cit., p. 91]

The means used to create such a society would be “prosecuting the economic struggle... an organisation on an economic basis which will embrace all the workers, according to their industries and workplaces... The syndicate [union], organised and governed by the workers themselves... [also] contain[s] the germ of the functional organisation upon which the new society can be built after the revolution.” Anarchists wish “that the people themselves take their destiny into their own hands and carry through the social revolution.” [Op. Cit., p. 89]

All of which, to state the obvious, is at odds with McNally’s claims about anarchism.

To summarise: Anarchists are not opposed to people in free associations democratically determining the policies they will support (see sections I.3.1 and I.5.1 for more details on this). The minority can then decide to abide by the decision, protest against it or, if all else fails, to leave the association if they cannot tolerate the decisions being made. What we do oppose is the assumption that the majority is always right and that (non-repressive or non-oppressive) minorities should submit to the decisions of the majority no matter how wrong they are. We feel that history is on our side — it is only by the freedom to dissent, by the direct action of minorities to defend and extend their freedoms that society progresses. We also feel that theory is on our side — ma-

This raises numerous questions, the most obvious is who (which individual or group) decides which is and is not in the common interests? Another is, what is to stop this privileged person or group placing their interests above “the common interests” and repressing those who object in the name of those very same “common interests”? Moreover, as everyone is — by definition! — “backward” in comparison to the vanguard in its own eyes, Lenin’s position ensures that “compulsion” can be used by the party against all who it considers an danger to its power — including the proletariat it claims to be the ruling class. Hence the destruction of soviet, workplace, union and armed forces democracy and, of course, the creation of bodies of armed men (such as the political police, the Cheka) separate from the people (i.e., a state in the normal sense of the word — see section H.3.8).

In short, the notion that dictatorship does not contradict democracy is simply nonsense — self-serving nonsense, of course — and which could have no other impact than a negative one of socialism. What would stop, say, a Stalin proclaiming that his regime was simply using coercion against the backward sections of the masses in the common interest and that those who objected were placing their own interests above it? It is the crudest form of idealism to hope that the socialist principles of the ruling elite will overcome the pressures of their position in the social hierarchy and, unsurprisingly, it did not happen.

“If we perish”, Lenin said privately to Trotsky in 1921, “it is all the more important to preserve our ideological line and give a lesson to our continuators. This should never be forgotten, even in hopeless circumstances”. [quoted by Brinton, “The Bolsheviks and Workers’ Control”, For Workers’ Power, p. 372] Hence the comments made by Zinoviev at the Second Congress of the Communist International, Trotsky in Terrorism and Communism and Lenin in innumerable speeches and articles. Sadly for McNally’s case, the lesson that the Bolsheviks wanted to give to the world revolutionary movement was not the importance of freedom and democracy
as that class could not be trusted to make the right decisions (i.e. know what its "real" interests were). At best they would be allowed to vote for the government, but even this right could be removed if they voted for the wrong people as shown above. For Leninists, revolutionary consciousness is not generated by working class self-activity in the class struggle, but is embodied in the party ("Since there can there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement the only choice is: either bourgeois or socialist ideology" [Lenin, The Essential Works of Lenin, 82]). The conclusions of this position are obvious: the important issues facing the working class are to be determined not by the workers ourselves, but by the leadership of the party, who are the (self-appointed) "vanguard of the proletariat".

The nature of the relationship between the party and the working class is clear. We remain incapable of achieving revolutionary consciousness and have to be led by the vanguard — using state coercion, if need be. As Lenin argued:

"it must he made clear that democracy under the Soviet system does not contradict dictatorship ... Unity of will must not be a catchword, a symbol. We demand it in practice. This is how unity of will was expressed during the [civil] war — anybody who placed his own interests (or the interests of his village or group) above the common interests, was branded as a self-seeker and was shot; this was justified by the moral consciousness of the working class that it must achieve victory. We spoke about these shootings openly; we said that we made no secret of coercion, because we realised that we could not emerge from the old society without resorting to compulsion as far as the backward section of the proletariat was concerned ..." [Op. Cit., vol. 30 pp. 509–10]

Majority rule without individual and minority rights is a violation of the principle of freedom and equality which democracy is said to be built on. Democracy should be an expression of individual liberty but in McNally’s hands it is turned into bourgeois liberalism. Little wonder Marxism has continually failed to produce a free society. It has no conception of the relationship of individual freedom to democracy and vice versa.

Finally, we must point out a slight irony in McNally’s claim, namely that Marxists usually claim that they seek a society similar to that anarchists seek but have different means to achieve it. In the words of Marx:

"What all socialists understand by anarchy is this: once the aim of the proletarian movement, the abolition of classes, has been attained, the power of the State ... disappears, and the functions of government are transformed into simple administrative functions." [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 76]

Or, as the Communist Manifesto put it, “the free development of each is the condition for the free development of all” [The Marx-Engels Reader, p. 491] So, Marxists and anarchists seek the same society, one of individual freedom which means that McNally’s comments about anarchism also apply (once the state “withers away”, which it never will) to Marxism. But, of course, McNally fails to mention this aspect of Marxism and its conflict with anarchism — but, then, he fails to discuss what anarchism actually stands for nor does he present an accurate account of its views of democracy and democratic decision making.

8. Are Leninists in favour of democracy?

McNally’s attack on anarchism for being anti-democratic, authoritarian and elitist is somewhat ironic given that the Leninist tradi-
tion he places himself in did destroy democracy during the Russian Revolution — whether in the soviet, the workplace, the union or the military — and replaced it with party dictatorship. This means that his attack on anarchism can be turned back on his own politics, with much more justification and evidence.

We need to understand the importance of comparing the rhetoric of Bolshevism to its reality as we can have repeated pronouncements about “democracy” made while, at the same time, the necessity of party dictatorship is both being practised and advocated. Thus Lenin repeatedly contrasted the higher form of democracy expressed by the soviets to bourgeois democracy. In his 1918 polemic against leading Social-Democrat Karl Kautsky who was accusing the Bolsheviks of being undemocratic, Lenin argued that the “only view that corresponds to Marxism” was expounded by Plekhanov (the father of Russian Marxism) at the Second Congress of the Russian Social Democratic Party in 1903, namely “in the revolution the proletariat would, if necessary, disenfranchise the capitalists and disperse any parliament that was found to be counter-revolutionary.” [Collected Works, vol. 28, p. 280] Which raises the obvious question, found to be counter-revolutionary by whom? The proletariat? No, according to Plekhanov it was the party:

“Every democratic principle must be considered not by itself, abstractly, but in relation to ... the success of the revolution [as this] is the highest law. And if the success of the revolution demands a temporary limitation on the working of this or that democratic principle, then it would be criminal to refrain from such a limitation. ... the principle of universal suffrage must be considered from the point of view of what I have designated the fundamental principle of democracy. It is hypothetically possible that we might ... speak out against universal suffrage ... If in a burst of revolutionary enthusiasm

As we discuss in section H.3.9, anarchists argue that the state cannot be considered as simply an instrument of economic class but, rather, has interests of its own. As such, concentrations of political power will produce a new class system and become independent of the masses of people and even of economically dominant classes like capitalists. This is why anarchists stress direct democracy (self-management) in free federations of free associations. It is the only way to ensure that power remains in the hands of the people and is not turned into an alien power above them. Thus Marxist support for statist forms of organisation will inevitably undermine the liberatory nature of the revolution. As we note in section 14, that is anarchists have long argued for the need for social transformation “from below”.

Second, as indicated in section H.5, their idea of the party being the “vanguard” of the working class, combined with its desire for centralised power, makes the dictatorship of the party over the proletariat inevitable. Lenin’s belief that working class people could not liberate themselves explains his continual emphasis on representative democracy and centralism as well as the Bolshevik’s easy slide into both practicing and advocating party dictatorship — simply put, the party must have power over the working class.
their anti-democratic activities started before its beginning at the end of May 1918.

Bolshevik authoritarianism had two main causes.

First, the obvious change in its social position — it became part of the state and, as a result, viewed society — and the working class — from above, as rulers. So as Marxism is “centralist” and aims for “conscious, democratic, proletarian centralism” it will inevitably lead to a new class system being created. [The Lenin Anthology, p. 348] This is not necessarily because Leninists seek dictatorship for themselves (although they do aim for party power — see section H.3.11) but rather it is because of the nature of the state machine. In the words of Murray Bookchin:

“Anarchist critics of Marx pointed out with considerable effect that any system of representation would become a statist interest in its own right, one that at best would work against the interests of the working classes (including the peasantry), and that at worst would be a dictatorial power as vicious as the worst bourgeois state machines. Indeed, with political power reinforced by economic power in the form of a nationalised economy, a ‘workers’ republic’ might well prove to be a despotism (to use one of Bakunin’s more favourite terms) of unparalleled oppression …

“Republican institutions, however much they are intended to express the interests of the workers, necessarily place policy-making in the hands of deputies and categorically do not constitute a ‘proletariat organised as a ruling class.’ If public policy, as distinguished from administrative activities, is not made by the people mobilised into assemblies and confederally co-ordinated by agents on a local, regional, and national basis, then a democracy in the precise sense of the term does not exist. The powers that people enjoy under such circumstances

the people chose a very fine parliament then we would be bound to make it a long parliament; and if the elections turned out unsuccessfully, then we would have to try to disperse it. [quoted by Samuel H. Baron, Plekhanov: The Father of Russian Marxism, p. 242]

As we will discover, the dispersing of elected bodies by the party was not limited to bourgeois Parliaments: soviets were also subject to this policy. Perhaps this is unsurprising, given that before seizing power Lenin had repeatedly equated the power of the Bolsheviks with that of the proletariat. Thus “Bolshevik power” was “one and the same thing” as “proletarian revolutionary power” and so the Second All-Russian Congress “gave a majority to the Bolshevik Party and put it in power.” [The Lenin Anthology, p. 413 and p. 419] While problematic (it substitutes the party for the class), it could be argued that as the party was supported by the majority of workers (but not peasants) then the Bolshevik government was democratic. Which is true, in the limited bourgeois sense. The question is what would happen if the workers turned against the party — would it give up its power as required by a movement committed to democracy? Unfortunately for McNally, the answer was: no.

Before discussing this, we must present some context and discuss the Bolshevik regime from the democratic perspective of one-person, one-vote. Before seizing power, Lenin protested that the Bolsheviks “must pass a resolution demanding equal suffrage (both in the Soviets and at trade union congresses), branding the slightest departure from equality as a fraud … We cannot tolerate a fraud of democracy if we call ourselves ‘democrats’. We are not democrats but unprincipled people if we tolerate this‼” [Collected Works, vol. 25, p. 304] After winning around 25% of the votes in the elections to the Constituent Assembly he was happy with a Soviet Constitution which saw the All-Russian Congress of Soviets being composed...
of representatives of urban soviets (one delegate for 25,000 voters) and of representatives of the rural congresses of soviets (one delegate for 125,000 inhabitants). In other words, a worker’s vote was 5 times more important than a peasant’s vote. That this ensured a Bolshevik majority in the Third and Fourth All-Russian Congresses may explain this embrace of unequal suffrage in 1918 after the votes in the Constituent Assembly had been counted.

Given that the Bolsheviks disbanded the Constituent Assembly in spite of it being elected by universal suffrage (i.e., by democracy) McNally would, undoubtedly, argue — as Lenin did — that soviet democracy was much superior. Ignoring the awkward issue of unequal suffrage between workers and peasants, the fact is that the Bolsheviks also disbanded soviets which elected non-Bolshevik majorities. Martov, the leader of the left-Mensheviks, recounted in June 1918 how in those “places where we were in the majority, the soviets will be liquidated”. When “workers demanded new elections” the demands were “stubbornly resisted” and the issue “escalated to workers’ strikes and the suppression of workers’ demonstrations by armed forces”. If the protests succeeded, then elections resulted in “a majority to the Mensheviks and SRs” and in those cases Bolshevik Military Revolutionary Councils ensured “the soviets were disbanded by armed force or the opposition delegates were expelled as ‘counter-revolutionaries’ from the soviets” (although “Bolshevik investigators themselves could not succeed in implicating even one Menshevik in the conspiracy trials”). The disbanding of soviets was “applied to the used congresses of peasant soviets.” [“Iulii Martov’s Letter to A.N. Stein”, pp. 78–82, The Structure of Soviet History, Ronald Grigor Suny (ed.), p. 78] Martov gave amongst many the example of Tula and a leading Bolshevik there informed his Party’s Central Committee in early 1918 about the means being used there:

“After the transfer of power to the soviet, a rapid about-face began in the mood of the workers. The Bolshevik deputies began to be recalled one after another, and soon

Denikin, the counter-revolution was defeated.” [Lenin’s Moscow, p. 58, p. 65, p. 128 and p. 101]

To stress the point, Lenin, Zinoviev and Trotsky were all clearly arguing for party power, not workers’ power, and that party dictatorship is inevitable in every revolution. This position was not put in terms of the problems facing the Russian Revolution but rather were expressed in universal terms and unsurprisingly, then “[f]rom the first days of Bolshevik power there was only a weak correlation between the extent of ‘peace’ and the mildness or severity of Bolshevik rule, between the intensity of the war and the intensity of proto-war communist measures … Considered in ideological terms there was little to distinguish the ‘breathing space’ (April-May 1918) from the war communism that followed.” Unsurprisingly, then, “the breathing space of the first months of 1920 after the victories over Kolchak and Denikin ... saw their intensification and the militarisation of labour” and, in fact, “no serious attempt was made to review the aptness of war communist policies.” Ideology “constantly impinged on the choices made at various points of the civil war ... Bolshevik authoritarianism cannot be ascribed simply to the Tsarist legacy or to adverse circumstances.” [Richard Sakwa, Soviet Communists in Power, p. 24, p. 27 and p. 30]

As we discuss in section H.6.2, Bolshevik ideology and the decisions it inspired helped make the difficult circumstances the revolution was facing worse. Their centralised vision of socialism could not help but produce economic mismanagement as well as a new class of bureaucrats. The inherent tendencies of Bolshevism were revealed by the civil war, a war which only accelerated the development of what was implicit (and, often, not so implicit) in Bolshevik ideology and its vision of socialism, the state and the role of the party. Therefore, in practice, Leninism has proven to be profoundly anti-democratic. In terms of McNally’s argument, to not discuss in detail Bolshevik authoritarianism and blame it on the impact of the civil war is dishonest, particularly given the awkward fact that

4032

4049
before the civil war started and when he looked back at this time from April 1920, he reiterated his position ("Dictatorial powers and one-man management are not contradictory to socialist democracy") while also stressing that this was not forced upon the Bolsheviks by civil war. It was time to build socialism and the “whole attention of the Communist Party and the Soviet government is centred on peaceful economic development, on problems of the dictatorship and of one-man management”. “When we tackled them for the first time in 1918, there was no civil war and no experience to speak of” and so it was “not only experience” of civil war, argued Lenin “but something more profound … that has induced us now, as it did two years ago, to concentrate all our attention on labour discipline.” Lenin stressed that we “need more discipline, more individual authority and more dictatorship.” [Collected Works, vol. 30, p. 503, p. 504 and p. 514]

The same can be said of the arguments for party dictatorship, which were raised at the Second Congress of the Communist International and aimed to influence the revolutionary movement across the globe. Trotsky wrote his infamous Terrorism and Communism as part of this debate between socialists and, to quote syndicalist-turned-Bolshevik Alfred Rosmer, it “dealt with the theoretical and practical problems posed by the revolution, the civil war and the building of the new society” and it “formed a sort of introduction and commentary on the Theses prepared for the Congress.” As we show in section 15, this work acknowledged that party dictatorship was a necessity of a successful revolution, the need for one-man management as well as the militarisation of labour (needless to say, we also show how — McNally’s claims notwithstanding — Trotsky did not reject these positions in the 1920s and 1930s). In addition, the congress took place in July 1920 when the civil war appeared to have been won, with Rosmer recalling that when he had arrived in “June 1920” in Russia “the civil war was virtually at an end” for “[a]fter the triple blow struck at the interventionist forces, after the destruction of Kolchak, Yudenich and
and “electoral fraud gave the Bolsheviks a huge majority of congress delegates” for the fifth All-Russian Soviet Congress in July 1918. The “number of legitimately elected Left SR delegates was roughly equal to that of the Bolsheviks.” The Left-SRs expected a majority but did not include “roughly 399 Bolsheviks delegates whose right to be seated was challenged by the Left SR minority in the congress’s credentials commission.” Without these dubious delegates, the Left SRs and SR Maximalists would have outnumbered the Bolsheviks by around 30 delegates. This ensured “the Bolshevik’s successful fabrication of a large majority in the Fifth All-Russian Congress of Soviets.” [Alexander Rabinowitch, The Bolsheviks in Power, p. 396, p. 288, p. 442 and p. 308]

This was reflected in Lenin’s 1917 argument that the “Bolsheviks have no right to await the Congress of Soviets. They ought to seize the power right now” [quoted by Trotsky, The History of the Russian Revolution, vol. 3, pp. 132–2] The important thing was party power and the soviets were seen as only a means to that end and so perhaps their fate once the Bolsheviks had reached their goal is unsurprising. Hence we see Lenin, in his polemic against Kautsky, pointing with no apparent concerns to the fact that “97 per cent of the total number of delegates [to the Sixth All-Russian Soviet Congress] were Bolsheviks” as an example of his party’s popular support! [Collected Works, vol. 28, p. 303] It should be noted that the delegates to the congress were elected not by workers and peasants but rather by the appropriate soviet body below it. In other words, Bolshevik gerrymandered and packed soviets elected Bolsheviks to the national congress.

Perhaps unsurprisingly, given the reality of their regime, Bolshevik rhetoric started to change. By the end of 1918 the necessity of party dictatorship started to appear in party material and, as Victor Serge noted in the 1930s, “the degeneration of Bolshevism” was apparent by that time “since at the start of 1919 I was horrified to read an article by Zinoviev ... on the monopoly of the party in power”. [The Serge-Trotsky Papers, p. 188] It must be stressed for this iron rule of the workers, of this workers’ vanguard, we should not have been able to hold out for two months, let alone two years”. [Op. Cit., vol. 30, p. 498]

Simply put, if counter-revolution is considered inevitable by your ideology then explaining Bolshevik authoritarianism by it is unconvincing — particularly if that authoritarianism started before the start of the civil war at the end of May 1918 and continued after its end. So “the effective conclusion of the Civil War at the beginning of 1920 was followed by a more determined and comprehensive attempt to apply these so-called War Communism policies rather than their relaxation” and so the “apogee of the War Communism economy occurred after the Civil War was effectively over.” With the fighting over Lenin “forcefully raised the introduction of one-man management . . . Often commissars fresh from the Red Army were drafted into management positions in the factories.” By the autumn of 1920, one-man management was in 82% of surveyed workplaces. This “intensification of War Communism labour policies would not have been a significant development if they had continued to be applied in the same haphazard manner as in 1919, but in early 1920 the Communist Party leadership was no longer distracted by the Civil War from concentrating its thoughts and efforts on the formulation and implementation of its labour policies.” While the “experience of the Civil War was one factor predisposing communists towards applying military methods” to the economy in early 1920, “ideological considerations were also important.” [Jonathan Aves, Workers Against Lenin, p. 2, p. 17, p. 15, p. 30, p. 17 and p. 11] Unsurprisingly, then, the defeat of Wrangel in November 1920 saw no changes in Bolshevik policy nor the Bolshevik use of coercion against workers and peasants calling and protesting for the re-introduction of freedom and democracy.

So there is a continuity between Bolshevik policies before, during and after the civil war which McNally does not mention. Take one-man management, for example. This was advocated by Lenin
cess.” In fact, it was “the most intense, furious, desperate class war and civil war. Not a single great revolution in history has taken place without civil war. And only a ‘man in a muffler’ can think that civil war is conceivable without an ‘exceptionally complicated situation.’” “If the situation were not exceptionally complicated there would be no revolution.” [Op. Cit., vol. 26, pp. 118–9] Thus McNally’s assertion that for “the germ cell of socialism to grow [in Russia], it required several essential ingredients. One was peace. The new workers’ state could not establish a thriving democracy so long as it was forced to raise an army and wage war to defend itself” is simply incredible. It also raises an important question with regards Leninist ideas: if Bolshevik politics and its organisational form cannot survive during a period of disruption and complicated circumstances (i.e., a revolution) then it is clearly a theory to be avoided at all costs.

The leading Bolsheviks all argued that the specific problems their latter day followers blame for their authoritarianism were natural results of any revolution and, consequently, unavoidable. In addition, there is a slight irony in this standard but flawed excuse for Bolshevik authoritarianism as Leninists like to suggest that anarchists do not recognise the possibility of counter-revolution and so reject the idea of defending a revolution. As we discuss in section H.2.1, this is simply untrue — the anarchist rejection of “the dictatorship of the proletariat” has nothing to do with defending revolution. As Bakunin stressed, “the sole means of opposing the reactionary forces of the state” was the “organising of the revolutionary force of the people.” [Statism and Anarchy, p. 156] So given that Leninists mock anarchists for their supposed naivety over the dangers of counter-revolution, it seems ironic that McNally uses what he is supposed to consider an inevitable aspect of revolution to explain (excuse would be the better word) the degeneration of the Bolshevik revolution. Long after 1917, Lenin repeated his earlier comments by stating “history teaches us that no big question has ever been settled and no revolution accomplished without a series of wars.” [Op. Cit., vol. 31, p. 494] He was adamant that “were it not

that Serge’s horror was well hidden and, as noted in section H.1.2

he joined the Bolsheviks and publicly defended this monopoly of power as a necessity of revolution. Lenin admitted the reality in 1919:

“We are reproached with having established a dictatorship of one party and ... a united Socialist front is proposed, we say, ‘Yes, it is a dictatorship of one party! This is what we stand for and we shall not shift from that position ...’” [Op. Cit., vol. 29, p. 535]

Not only did the Bolsheviks not shift from that position, they recommended this position to the world revolutionary movement at the Second Congress of the Second International in 1920. In the words of Zinoviev:

“Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.” [Proceedings and Documents of the Second Congress 1920, vol. 1, pp. 151–2]

“We must have a state organisation” he argued, “and only the party can direct it, because a state political organisation is one that encompasses the best working-class elements of the entire country.” [Op. Cit., p. 154] Elsewhere that year he argued that “soviet rule in Russia could not have been maintained for three years — not even three weeks — without the iron dictatorship of the Communist Party.
Any class conscious worker must understand that the dictatorship of the working class can be achieved only by the dictatorship of its vanguard, i.e., by the Communist Party ... All questions of economic reconstruction, military organisation, education, food supply — all these questions, on which the fate of the proletarian revolution depends absolutely, are decided in Russia before all other matters and mostly in the framework of the party organisations ... Control by the party over soviet organs, over the trade unions, is the single durable guarantee that any measures taken will serve not special interests, but the interests of the entire proletariat.” [quoted by Oskar Anweiler, The Soviets, pp. 239–40] In short: “The chief conclusion of the proletarian revolution is the need for an iron, organised and monolithic Party.” [Zinoviev, quoted by Robert Service, The Bolshevik Party in Revolution, p. 144] Lenin dismissed the notion that workers could govern themselves:

“In the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers ... What happens is that the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat ... the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts ... that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard ... Such is the basic mechanism of the dictatorship of the proletariat, and the essentials of transition from capitalism to communism ... for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [Collected Works, vol. 32, pp. 20–1]
his tradition aims at “workers’ power” and a “direct and active democracy”!

Of course McNally tries to blame the destruction of democracy in Russia on the Civil War: “By 1920, the very face of Russia had changed. Workers’ democracy, in the meaningful sense of the term, had disappeared – as had most of the working class through death or retreat to the countryside.” This meant the rise of Stalinism for “[a]ls workers’ democracy disintegrated, a new bureaucracy rose to power” However, this is hard to accept, given that the undermining of democracy began before the civil war started and continued after it had finished (for example, the onslaught on soviet democracy and attempts to impose one-man management in the workplace and armed forces predate the start of the civil war at the end of May 1918). Moreover, as we indicate in section 13, the Bolshevik state was marked by bureaucracy from the start.

Both these developments did not occur by accident, they were due to the nature of Bolshevik ideology and the kind of centralised structures it favoured. Trotsky is typical. In April 1918 he argued that once elected the government was to be given total power to make decisions and appoint people as required as it is “better able to judge in the matter than” the masses. The sovereign people were expected to simply obey their public servants until such time as they “dismiss that government and appoint another.” Trotsky raised the question of whether it was possible for the government to act “against the interests of the labouring and peasant masses?” And answered no! Yet it is obvious that Trotsky’s claim that “there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members” is just nonsense. [Leon Trotsky Speaks, p. 113] The history of trade unionism is full of examples of committees betraying their membership. Needless to say, the subsequent history Lenin’s government showed that there can be “antagonism” between rulers and ruled and that appointments are always a key way to further elite interests. Need-

This, of course, did not stop the Bolsheviks also claiming their regime was far more democratic than any other. In 1920, Zinoviev as head of the Communist International wrote a letter to the Industrial Workers of the World, a revolutionary labour union, which stated that the “Russian Soviet Republic ... is the most highly centralised government that exists. It is also the most democratic government in history. For all the organs of government are in constant touch with the working masses, and constantly sensitive to their will.” [Proceedings and Documents of the Second Congress 1920, vol. 2, p. 928] Lenin, in his diatribe against Left-Wing Communism made a similar claim and proclaimed the soviets “democratic institutions, the like of which even the best democratic republics of the bourgeois have never known” while also suggesting that it was “ridiculously absurd, and stupid” to make “a contrast, in general, between the dictatorship of the masses and the dictatorship of the leaders.” He also pointed to “non-Party workers’ and peasants’ conferences” as means by which the party secured its rule and so the Bolsheviks would have to “support, develop and extend” non-Party conferences “to be able to observe the temper of the masses, come closer to them, meet their requirements, promote the best among them to state posts”. [The Lenin Anthology, p. 573] Yet if the soviets were so democratic, then why were the non-Party Congresses needed at all? Perhaps because “the dictatorship of the leaders” is not the same as “dictatorship of the masses” and so the Soviets were irrelevant due to the party dictatorship?

Perhaps unsurprisingly given the fate of the soviets in 1918, the Bolsheviks disbanded these “non-Party” conferences because “[d]uring the disturbances” of late 1920, “they provided an effective platform for criticism of Bolshevik policies.” Their frequency was decreased and they “were discontinued soon afterward.” [Richard Sakwa, Soviet Communists in Power, p. 203] Lenin summarised the reasons for this policy:
“Non-Party conferences are not a fetish. They are valuable if they help us to come closer to the impassive masses — the millions of working people still outside politics. They are harmful if they provide a platform for the Mensheviks and Socialist Revolutionaries masquerading as ‘non-party’ men. They are helping the mutinies, and the whiteguards. The place for Mensheviks and Socialist-Revolutionaries, avowed or in non-party guise, is not at a non-Party conference but in prison ... We can and must find other methods of testing the mood of the masses and coming closer to them. We suggest that those who want to play the parliamentary, constituent assembly and non-Party conference game, should go abroad ... ” [Op. Cit., vol. 32, p. 362]

In other words, the conferences were used by the proletariat to express its opinions and these were found to be lacking in the eyes of its vanguard. Like soviet democracy, they threatened the rule of the party and as Lenin suggested in 1920 “[w]hoever brings about even the slightest weakening of the iron discipline of the party of the proletariat (especially during its dictatorship) is actually aiding the bourgeoisie against the proletariat.” [The Lenin Anthology, p. 570] So any conflict between the vanguard and the proletariat would, by this logic, necessitates the victory of the former over the latter — in the latter’s interests, of course. As Trotsky put it in 1921:

“The Workers’ Opposition has come out with dangerous slogans, making a fetish of democratic principles. They place the workers’ right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers’ democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to delegates voted down the list, as did the Party faction in the union ... The Central Committee of the Party disregarded every one of the votes and appointed a Metalworkers’ Committee of its own. So much for ‘elected and revocable delegates.’ Elected by the union rank and file and revocable by the Party leadership!” [M. Brinton, “The Bolsheviks and Workers’ Control”, For Workers’ Power, , p. 375] The same year also saw the Bolshevik disperse provincial trade unions conferences in Vologda and Vitebsk “because they had anti-communist majorities.” [Aves, Op. Cit., p. 176]

A similar onslaught by the party against democracy also occurred in the armed forces. Trotsky simply abolished the soldier’s committees and elected officers in early 1918, stating that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree.” This destruction of military democracy was compared to the concurrent push by the Bolsheviks to introduce “one-man” management in production, as workplace democracy “is not the last word in the economic constructive work of the proletariat”. The “next step must consist in self-limitation of the collegiate principle” and its replacement by “[p]olitical collegiate control by the Soviets”, i.e. the state control Lenin had repeatedly advocated in 1917. Moreover “for executive functions we must appoint technical specialists.” He ironically called this the working class “throwing off the one-man management principles of its masters of yesterday” and failed to recognise it was imposing the one-man management principles of new masters. As with Lenin, the destruction of workers’ power at the point of production was of little concern for what mattered was that “with power in our hands, we, the representatives of the working class” would introduce socialism. [“Work, Discipline, and Order to save the Socialist Soviet Republic”, How the Revolution Armed, vol. 1, p. 47, p. 37 and p. 38]

Thus the Bolshevik tradition clearly placed the power of the party above the ability of working people to elect their own representatives, managers and officer. And McNally claims that
by state-capitalism (an awkward fact McNally cannot bring himself to mention, never mind admit to). “In the shops where one-man management (Lenin’s own preference) replaced collegial management,” notes Diane Koenker, “workers faced the same kinds of authoritarian management they thought existed only under capitalism.” The “overall management of industry in 1921 was no more democratic than it had been in 1914; indeed, it was much more highly centralised, hierarchical, and bureaucratic.” [Labour Relations in Socialist Russia, p. 177 and p. 190]

Needless to say, the Bolsheviks also combated independent trade unions with the same methods. As one historian summarises, “So- viets and trade unions with non-Bolshevik majorities, and there was a definite revival in the electoral fortunes of the opposition in the spring of 1918, were dispersed” and by the “beginning of 1920 non-Bolshevik controlled trade union organisations no longer existed at the national level”. [Jonathan Aves, “The Demise of Non-Bolshevik Trade Unionism in Moscow: 1920–21”, pp. 101–33, Revolutionary Russia, vol. 2, no. 1, pp. 101–2 and p. 103] By the end of 1920, the Bolsheviks had broken the both Menshevik-influenced printers and anarchist-influenced bakers union, with the offices of the former “occupied by soldiers. Eleven members of the [union] board where arrested along with twenty-nine members of the Council of Representatives, factory committees and ordinary unionists … five were also members of the Moscow soviet. After being held without trial most were sentenced to terms between six months and two years in prison. The disbandment was approved by the plenum of the Moscow trade union council” which “also voted to disband the bakers’ section. The leading anarchist members of the section … and … an SR Maximalist … and two other members … were barred from office and arrested to stand trial.” [Jonathan Aves, Workers Against Lenin, pp. 68–9] In May 1921, to present another example, the All-Russian Congress of the Metalworkers’ Union met and the “Central Committee of the [Communist] Party handed down to the Party faction in the union a list of recommended candidates for union (sic!) leadership. The metalworkers’
It is churlish, but essential, to note that previous revolutionary movements had transformed one form of class society into another and so we must note, as well as refuting McNally’s claim that Leninism is a democratic tradition, Lenin’s comments display a distinct confusion over the nature of a social revolution (rather than a political one). Yes, previous revolutions may have utilised the dictatorship of individuals but these revolutions have been revolutions from one class system to another. The “revolutionary” classes in question were minority classes and so elite rule would not in any way undermine their class nature. Not so with a socialist revolution which must be based on mass participation (in every aspect of society, economic, political, social) if it is to achieve its goals – namely a classless society. Little wonder, with such theoretical confusion, that the Russian revolution ended in Stalinism – the means used determined the ends. Unsurprisingly enough, the Bolshevik imposition of one-management simply transformed private-capitalism into state-capitalism, that is one form of class society into another (see section H.3.13). After the end of the Civil War Lenin summarised his position: “Industry is indispensable, democracy is not. Industrial democracy breeds some utterly false ideas.” [Op. Cit., vol. 32, p. 61–2]

This system of state-appointed “one-man” managers armed with “dictatorial” powers was not considered as opposed to socialism, as McNally implies. Lenin stressed in 1919 that the “organisation of

the communist activity of the proletariat and the entire policy of the Communists have new acquired a final, lasting form.” [Op. Cit., vol. 30, p. 144] Moreover, after the end of the civil war he combated the idea of workers’ control as (rightly!) a syndicalist and anarchist deviation within the party at odds with Marxism:

“Syndicalism hands over to the mass of non-Party workers… the management of their industries… thereby making the Party superfluous… Why have a Party, if industrial management is to be appointed… by trade unions nine-tenths of whose members are non-Party workers?” [Op. Cit., vol. 32, p. 50]

He went so far as to admit that he thought “the syndicalist deviation” (i.e., giving the proletariat economic democracy, the power to elect their own workplace managers and economic conferences) “leads to the collapse of the dictatorship of the proletariat.” [Op. Cit., vol. 32, p. 86] This was a theme to which he repeatedly returned:

“Does every worker know how to run the state?… this is not true… If we say that it is not the Party but the trade unions that put up the candidates and administrate, it may sound very democratic… It will be fatal for the dictatorship of the proletariat… To govern you need an army of steeled revolutionary Communists. We have it, and it is called the Party. All this syndicalist nonsense about mandatory nominations of producers must go into the wastepaper basket. To proceed on those lines would mean thrusting the Party aside and making the dictatorship of the proletariat in Russia impossible.” [Op. Cit., pp. 61–2]

In short, the economic relations favoured by the Bolsheviks were identical to that of capitalism except that the boss was replaced by a state-appointed bureaucrat, private-capitalism
Fraser’s and Hugh’s omission is extremely serious — it gives a radically false impression of anarchist politics. Their comments could lead a reader to think that anarchists, as Marxists claim, do not believe in defending a revolution. As can be seen from the actual resolutions of the Saragossa conference, this is not the case. Indeed, given that the congress was explicitly discussing, along with many other issues, the question of “defence of the revolution” their omission seriously distorts the CNT’s position and anarchist theory. As seen, the congress supported the need to arm the people and to keep those arms under the control of the communes (as well as the role of “Confederal Defence Forces” and the efficient organisation of forces on a national level). Given that Thomas quotes extensively from the Saragossa resolution on libertarian communism we can only surmise that he forgot to read the section entitled “Defence of the Revolution.”

Hugh and Thomas omissions, however, ensure that anarchism is presented as an utopian and naive theory, unaware of the problems facing society. In reality, the opposite is the case — the Spanish anarchists were well aware of the need to arm the people and resist counter-revolution and fascism by force. Regardless of Thomas’ claims, it is clear that the CNT and FAI realised the danger of fascism existed and passed appropriate resolutions outlining how to organise an effective means of self-defence (indeed, as early as February 14 of that year, the CNT had issued a prophetic manifesto warning that right-wing elements were ready to provoke a military coup [Murray Bookchin, The Spanish Anarchists, p. 273]). To state otherwise, while quoting from the document that discusses the issue, must be considered a deliberate lie.

However, to return to our main point — Eric Hobsbawm’s thesis that the Spanish anarchists were an example of “pre-political” groups — the “primitive rebels” of his title.

Essentially, Hobsbawm describes the Spanish Anarchists — particularly the Andalusian anarchists — as modern-day secular mystics who, like the millenarians of the Middle Ages, were guided “under universal association, ownership of the land and of the instruments of labour is social ownership … We want the mines, canals, railways handed over to democratically organised workers’ associations … We want these associations to be models for agriculture, industry and trade, the pioneering core of that vast federation of companies and societies woven into the common cloth of the democratic and social Republic.” [Op. Cit., pp. 777–8]

Given that Marx described the Commune as “essentially a working-class government”, “the political form at last discovered under which to work out the economic emancipation of labour” and “will be forever celebrated as the glorious harbinger of a new society”, it is strange that McNally terms Proudhon’s and Bakunin’s ideas as those of the past. [Op. Cit., pp. 634–5 and p. 652] It seems the height of hypocrisy for McNally to attack Proudhon while praising the Paris Commune.

So the awkward fact is that anarchists had been advocating these forms since Proudhon in the 1840s and they were developed by Bakunin in the 1860s. Nothing similar can be found in Marx until the Commune which suggests, as Anarchist K.J. Kenafick stated, “that the programme [the Commune] set out is … the system of Federalism, which Bakunin had been advocating for years, and which had first been enunciated by Proudhon. The Proudhonists … exercised considerable influence in the Commune. This ‘political form’ was therefore not ‘at last’ discovered; it had been discovered years ago; and now it was proven to be correct by the very fact that in the crisis the Paris workers adopted it almost automatically, under the pressure of circumstance, rather than as the result of theory, as being the form most suitable to express working class aspirations.” [Michael Bakunin and Karl Marx, pp. 212–3]

Little wonder few Marxists (like Marx himself) directly quote from the Commune’s declaration. It would be difficult to attack
anarchism (as “petty-bourgeois”) while proclaiming the Paris Commune as the first example of “the dictatorship of the Proletariat.” The decentralised, federalist nature of the Commune cannot be squared with the usual Marxist instance on centralisation and the claim that federalism “as a principle follows logically from the petty-bourgeois views of anarchism. Marx was a centralist” and to “confuse Marx’s views ... with Proudhon’s federalism is positively monstrous!” While there may be “not a trace of federalism” in Marx’s “observations on the experience of the Commune”, the Commune itself was distinctly federalist in its aspirations. If Marx “upheld democratic centralism, the republic — one and indivisible” the same cannot be said of the Communards themselves. [Lenin, “The State and Revolution”, The Lenin Anthology, p. 348, p. 347 and p. 361] As Paul Avrich noted, the “influence of Proudhon — unquestionably greater than that of Marx — was reflected in the title of ‘Federals’ by which the Communards were known.” [Anarchist Portraits, p. 232]

This is not to suggest that the Commune was a perfect example of anarchism in action — far from it. As we indicate in section A.5.1, while it wished federalism outside of Paris it was not federalist within its boundaries. If, as Marx put it, “the Paris Commune took the management of the revolution in its own hands” then its structure simply was not up to its tasks. [Op. Cit., p. 636] As Bakunin put it, while the Commune was “a bold and outspoken negation of the State”, the Communards had set up “a revolutionary government” within Paris and so organised “themselves in reactionary Jacobin fashion, forgetting or sacrificing what they themselves knew were the first conditions of revolutionary socialism”, rather than “by the free association or federation of workers, firstly in their unions, then in the communes, regions and nationally in a great federation, international and universal” organised “solely from the bottom upwards.” [Michael Bakunin: Selected Writings, p. 199, p. 202 and p. 206] Building on Bakunin’s comments, Kropotkin argued that while “proclaiming the free Commune, the people of Paris proclaimed an essential anarchist principle” but “they...

Mintz sums up by stating “[c]ontrary to exaggerated accounts of anarchist zeal, most thoughtful obreros conscientes believed in moderation, not abstinence.” [Op. Cit., p. 88] Unfortunately Mintz’s work, the product of years of living with and talking to the people actually involved in the movement, does not seem to have made much impact on the historians. Unsurprising, really, as history is rarely about the actions, ideas and hopes of working people.

As can be seen, historians seem to delight in misrepresenting the ideas and actions of the Spanish Anarchists. Sometimes, as just seen, the distortions are quite serious, extremely misleading and ensure that anarchism cannot be understood or viewed as a serious political theory (we can understand why Marxists historians would seek this). Sometimes they can be subtle as when Ronald Fraser states that at the CNT’s Saragossa congress in 1936 “the proposal to create a libertarian militia to crush a military uprising was rejected almost scornfully, in the name of traditional anti-militarism.” [Blood of Spain, p. 101] Hugh Thomas makes the same claim, stating at “there was no sign that anyone [at the congress] realised that there was a danger of fascism; and no agreement, in consequence, on the arming of militias, much less the organisation of a revolutionary army as suggested by Juan Garcia Oliver.” [The Spanish Civil War, p. 181]

However, what Fraser and Thomas omit to tell the reader is that this motion “was defeated by one favouring the idea of guerrilla warfare.” [Peter Marshal, Demanding the Impossible, p. 460] The Saragossa resolution itself stated that a “permanent army constitutes the greatest danger for the revolution ... The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces ... Each Commune should have its arms and elements of defence.” [quoted by Robert Alexander, The Anarchists in the Spanish Civil War, vol. 1, p. 64]

Moreover, academic mockery of anarchist attempts to combat alcoholism (and not alcohol as such) forgets the social context. Being academics they may not have experienced wage labour directly and so do not realise the misery it can cause. People turn to drink simply because their jobs are so bad and seek escape from the drudgery of their everyday lives. As Bakunin argued, “confined in their life like a prisoner in his prison, without horizon, without outlet ... the people would have the singularly narrow souls and blunted instincts of the bourgeois if they did not feel a desire to escape; but of escape there are but three methods — two chimerical and a third real. The first two are the dram-shop and the church, debauchery of the body or debauchery of the mind; the third is social revolution.” [God and the State, p. 16] So to combat alcoholism was particularly important as many workers turned to alcohol as a means of escaping the misery of life under capitalism. Thus Bookchin:

”[T]o abstain from smoking, to live by high moral standards, and to especially adjure the consumption of alcohol was very important at the time. Spain was going through her own belated industrial revolution during the period of anarchist ascendency with all its demoralising features. The collapse of morale among the proletariat, with rampant drunkenness, venereal disease, and the collapse of sanitary facilities, was the foremost problem which Spanish revolutionaries had to deal with ... On this score, the Spanish anarchists were eminently successful. Few CNT workers, much less a committed anarchist, would have dared show up drunk at meetings or misbehave overtly with their comrades. If one considers the terrible working and living conditions of the period, alcoholism was not as serious a problem in Spain as it was in England during the industrial revolution.” [“In-

stopped mid-course” and gave “themselves a Communal Council copied from the old municipal councils.” Thus the Paris Commune did not “break with the tradition of the State, of representative government, and it did not attempt to achieve within the Commune that organisation from the simple to the complex it inaugurated by proclaiming the independence and free federation of the Communes.” Kropotkin continually stressed that the revolutionaries were isolated from the masses and shut-up in the town hall which lead to disaster as the Commune council became “immobilised ... by red tape” and lost “the sensitivity that comes from continued contact with the masses ... Paralysed by their distancing from the revolutionary centre \96- the people \96 they themselves paralysed the popular initiative.” [Words of a Rebel, p. 97, p. 93 and p. 97]

So the Commune applied aspects of anarchism but not all. However, the main thrust of the revolt was federalist in nature — something Marxists tend to forget to mention. Anarchists argued that the Commune should have rejected the Municipal Council and instead organised a workers’ council. Anarchist ideas, then, as can be seen from the Paris Commune and the soviets were the ideas of the future — and of working class self-liberation and self-organisation. And ones that Marx and his followers paid lip service to.

(We say lip service for Marx’s praise for the Commune did not stop him recommending the labour movement to stand candidates in national elections nor did Lenin quoting Marx’s statement that the future proletarian state, like the Paris Commune, would abolish the distinction between executive and administrative powers mean he honoured it. Immediately after the October Revolution the Bolsheviks established an executive power above the soviets, namely the Council of People’s Commissars. Those who quote Lenin’s The State and Revolution as proof of his democratic nature usually fail to mention this little fact. In practice that work was little more than an election manifesto to be broken as required, as we shown in section H.1.7)
In fact, the Paris Commune was primarily the work of artisans (the bulk of the Parisian workers at the time). This is reflected in Marx’s comments in 1866 that the French workers were “corrupted” by Proudhon’s “sham criticism and sham opposition to the Utopians (he himself is only a petty-bourgeois utopian . . .),” “particularly those of Paris, who as workers in luxury trades are strongly attached, without knowing it [!], to the old rubbish.” The “Parisian gentlemen had their heads full of the emptiest Proudhonist phrases” and so “Proudhon did enormous mischief.” [Marx, Engels and Lenin, Anarchism and Anarcho-syndicalism, pp. 45–6] Five years later, these workers (still obviously influenced by “the old rubbish” and their heads still full of “Proudhonist phrases”) created the political form of “the economic emancipation of labour.” This is not explained by Marxists, who also do not trouble themselves to explain how can the Paris Commune be the “Dictatorship of the Proletariat” when 35 members of the Commune’s council were artisans and only 4 or 5 were industrial workers (i.e. proletarians).

Can the fact that Proudhon-influenced artisans were, according to McNally and Marx, social strata of the past, were backward looking, etc. be reconciled with the claim that the Paris Commune was the political form of proletarian emancipation? No, not from a Marxist class analysis. Hence Marxists ignoring the real nature of the Parisian working class when discussing the commune. However, from an anarchist perspective — which sees the artisan, peasant and proletariat forming a common class of working people — the development of the Paris Commune is no surprise. It is the work of people seeking to end wage labour and the threat of wage labour now rather than sometime in the future once capitalism has fully developed. Thus McNally’s (and Marx’s) support for the Commune makes a mockery of his attacks on anarchism as the theory of the artisans and peasants for it was the artisans who created the first model of their “proletarian” state and applied what they say they consider the foundations of “proletarian” democracy — electing mandated and recallable delegates. That the “petty-bourgeois”

spontaneous and often disconnected they would bring, not only the abolition of piece-work, but ‘the day,’ so near at hand that sexual intercourse and alcohol were abandoned by enthusiasts till it should dawn.” [Spain: 1808–1975, p. 444]

Mintz, an American anthropologist who actually stayed with the campesino’s for a number of years after 1965, actually asked them about such claims. As he put it, the “level-headed anarchists were astonished by such descriptions of supposed Spanish puritanism by over-enthusiastic historians.” [Op. Cit., p. 6] As one anarchist put it, “[o]f course, without any work the husband couldn’t provide any food at dinnertime, and so they were angry at each other, and she wouldn’t have anything to do with him. In that sense, yes, there were no sexual relations.” [quoted, Op. Cit., p. 7]

Mintz traces the citations which allowed the historians to arrive at such ridiculous views to a French social historian, Angel Marraud, who observed that during the general strike of 1902 in Moron, marriages were postponed to after the promised division of the lands. As Mintz points out, “as a Frenchman, Maraud undoubtedly assumed that everyone knew a formal wedding ceremony did not necessarily govern the sexual relations of courting couples.” [Op. Cit., p. 6f]

As for abstinence and puritanism, nothing could be further from the truth. As Mintz argues, the anarchists considered alcoholism as being “responsible for much of the social malaise among many workers . . . Excessive drinking robbed the worker of his senses and deprived his family of food. Anarchist newspapers and pamphlets hammered out the evil of this vice.” However, “[p]roscriptions were not of a puritanical order” (and so there was no desire to “impose” such things on people) and quotes an anarchist who stated that “coffee and tobacco were not prohibited, but one was advised against using them. Men were warned against going to a brothel. It was not a matter of morality but of hygiene.” As for vegetarianism, it
nity, accounts for mass mobilisations carried on by the Andalusian anarchists at the end of the nineteenth century.” She also notes that the “[i]n a secular age, the taint of religion is the taint of irrationality.” [Anarchists of Andalusia: 1868–1903, pp. 210–12 and p. 211] Thus, the Andalusian anarchists had a clear idea who their enemies were, namely the ruling class of the region. She also points out that, for all their revolutionary elan, the anarchists developed a rational strategy of revolution, channelling their energies into organising a trade union movement that could be used as a vehicle for social and economic change. Moreover, as well as a clear idea of how to change society they had a clear vision of what sort of society they desired — one built around collective ownership and federations of workers’ associations and communes.

Therefore the idea that anarchism can be explained in “religious” terms is fundamentally flawed. It basically assumes that the Spanish workers were fundamentally irrational, unable to comprehend the sources of their unhappiness nor able to define their own political goals and tactics and instead looked to naive theories which reinforced their irrationalities. In actuality, like most people, they were sensible, intelligent human beings who believed in a better life and were willing to apply their ideas in their everyday life. That historians apply patronising attitudes towards them says more about the historians than the campesinos.

This uncomprehending attitude to historians can be seen from some of the more strange assertions they make against the Spanish Anarchists. Gerald Brenan, Eric Hobsbawm and Raymond Carr, for example, all maintained that there was a connection between anarchist strikes and sexual practices. Carr’s description gives a flavour:

“Austere puritans, they sought to impose vegetarianism, sexual abstinence, and atheism on one of the most backward peasantry of Europe ... Thus strikes were moments of exaltation as well as demands for better conditions; Proudhon advocated this 23 years before Marx did is, of course, left unsaid.

As indicated, McNally’s arguments do not hold water. Ironically, if anarchism was the death-cry of the artisan and peasant then it is strange, to say the least, that this theory so influenced the Paris Commune which McNally praises so much. We therefore suggest that rather than being a backward-looking cry of despair for those disappearing under the wheels of rising capitalism, anarchism was in fact a theory developed from the struggles and self-activity of those currently suffering capitalist and state oppression — namely the artisans, peasants and industrial proletariat (i.e. the working class as a whole). In other words, it is a philosophy and theory for the future, not of the past. This can be seen from the libertarian aspects of the Paris Commune, aspects Marx immediately tried to appropriate for his own theories (which, unfortunately, were swamped by the authoritarian elements that existed already).

In addition the “old rubbish” the Parisian workers supported was very much ahead of its time. In 1869 the delegate of the Parisian Construction Workers’ Trade Union argued that “[a]ssociation of the different corporations [labour unions] on the basis of town or country ... leads to the commune of the future ... Government is replaced by the assembled councils of the trade bodies, and by a committee of their respective delegates.” In addition, “a local grouping which allows the workers in the same area to liaise on a day to day basis” and “a linking up of the various localities, fields, regions, etc.” (i.e. international trade or industrial union federations) would ensure that “labour organises for present and future by doing away with wage slavery” [No Gods, No Masters, vol. 1, p. 184] Such a vision of workers’ councils and associated labour has obvious similarities with the spontaneously created soviets of the 1905 Russian Revolution. These, too, were based on assembled councils of workers’ delegates. Of course they were differences but the basic idea and vision are identical.
Therefore to claim that anarchism represents the past presents Marxists with a few problems given the nature of the Paris Commune and its obvious libertarian nature. If it is claimed that the Parisian artisans defended “not their present, but their future interests” and so “desert[ed] their own standpoint to place themselves at that of the proletariat” (the class they are being “tranfer[ed]” into by the rise of capitalism) then, clearly, anarchist ideas are “future,” proletarian, ideas as it is that class interest artisans serve “[i]f by chance they are revolutionary.” [Marx and Engels, “The Communist Manifesto”, The Marx-Engels Reader, p. 482]

Whichever way you look at it, McNally’s claims on the class nature of anarchism do not stand up to close analysis. Proudhon addressed both artisan/peasant and wage-worker in his works. He addressed both the current and the future working class. Bakunin did likewise. Moreover, both were part of the workers movement. Proudhon was working class, the son of an artisan and peasant who was a printer by trade, and took part in the debates and polemics of the French socialist movement as well as the 1848 Revolution. Bakunin joined the First International, taking an active part in its debates and championing the syndicalist ideas which had evolved from Proudhon’s mutualism in France, Belgium, Spain and Italy. As Paul Avrich suggests, as “early as the 1860’s and 1870’s, the followers of Proudhon and Bakunin in the First International were proposing the formation of workers’ councils designed both as a weapon of class struggle against capitalists and as the structural basis of the future libertarian society” [The Russian Anarchists, p. 73] Therefore it is not surprising that Proudhon and Bakunin predicted aspects of the Paris Commune — they were expressing the politics of the future. As is clear from their writings, which still remain fresh today. This is reflected in another comment by McNally, who writes that “all major trends in Russian socialism had believed that a bourgeois democratic revolution — a revolution against Czarism and for the establishment not of socialism but merely of liberal capitalism — counted for their attraction to anarchist teaching. Diaz del Moral was mystified by expressions of animosity directed toward him, but the workers considered him to be a senorito, a landowner who does not labour … Although he was both scholarly and sympathetic, Diaz del Moral could not comprehend the hunger and the desperation of the campesinos around him … To Diaz del Moral, campesino ignorance, passion, ecstasy, illusion, and depression, not having a legitimate basis in reality, could be found only in the roots of their racial heritage.” [Op. Cit., pp. 5–6]

Hence the “religious” nature of anarchism — it was one of the ways an uncomprehending member of the middle-class could explain working class discontent and rebellion. Unfortunately, this “explanation” has become common place in history books (partly reflected academics class interest too and lack of understanding of working class interests, needs and hopes).

As Mintz argues, “at first glance the religious model seems to make anarchism easier to understand, particularly in the absence of detailed observation and intimate contact. The model was, however, also used to serve the political ends of anarchism’s opponents. Here the use of the terms ‘religious’ and ‘millenarian’ stamp anarchist goals as unrealistic and unattainable. Anarchism is thus dismissed as a viable solution to social ills.” He continues by arguing that the “oversimplifications posited became serious distortions of anarchist belief and practice” (as we shall see). [Op. Cit., p. 5 and p. 6]

Temma Kaplan’s critique of the “religious” view is also worth mentioning. She argues that “the millenarium theory is too mechanistic to explain the complex pattern of Andalusian anarchist activity. The millenarian argument, in portraying the Andalusian anarchists as fundamentally religious, overlooks their clear comprehension of the social sources of their oppression.” She concludes that “the degree of organisation, not the religiosity of workers and the commu-
argument is Eric Hobsbawm’s *Primitive Rebels*, who was a member of the British Communist Party at the time. While the obvious Stalinist nature of the author may be thought enough to alert the intelligent of its political biases, its basic thesis is repeated by many Marxists.

Before discussing Hobsbawm in more detail, it would be useful to refute some of the more silly things so-called serious historians have asserted about Spanish Anarchism. Indeed, it would be hard to find another social or political movement which has been more misrepresented or its ideas and activities so distorted by historians whose attitudes seem more supported by ideological conviction rather than history or investigation of social life.

One of the most common descriptions of Spanish anarchism is that it was “religious” or “millenarian” in nature. Hobsbawm himself accepts this conceptualisation, along with historians and commentators like Gerald Brenan and Franz Brokenau (who, in fact, did state “Anarchism is a religious movement”). Such use of religion was largely due to the influence of Juan Diaz del Moral, a lawyer and historian who was also a landowner. As Jerome R. Mintz points out, “according to Diaz del Moral, the moral and passionate obreros conscientes [conscious workers – i.e. workers who considered themselves to be anarchists] absorbed in their pamphlets and newspapers were akin to frenzied believers in a new religion.” [The Anarchists of Casas Viejas, p. 5f] However, such a perspective was formed by his class position and privileges which could not help but reflect them:

“Diaz del Moral ascribed to the campesinos [of Andalusia] racial and cultural stereotypes that were common saws of his class. The sole cause for the waves of rural unrest, Diaz del Moral asserted, could be found in the psychology of the campesinos … He believed that the Andalusian field workers had inherited a Moorish tendency toward ecstasy and millenarianism that ac-

would have to precede a workers’ revolution in Russia. In 1906, Leon Trotsky developed a dissenting view. Only the working class of Russia, Trotsky argued, would be willing and able to carry through the fight for democratic reforms and for a democratic republic. But why, he asked, should the workers be expected to stop at that point? Why should they not extend the fight for democratic rights into a struggle for workers’ control and socialist democracy?” In reality, the idea that working people should extend a revolution from political to economic goals was raised by both Proudhon and Bakunin long before Trotsky and, moreover, was advocated by Kropotkin the year before Trotsky introduced it into Marxism.

Thus Proudhon argued that the 1848 revolution “had been made ‘without an idea’ and that it had unfortunately satisfied itself with the proclamation of purely political palliatives” and “he did not believe that such political reforms would solve the social problem.” [K. Steven Vincent, *Op. Cit.*, p. 169] Bakunin took up, as with so many other things, Proudhon’s argument and, as we discuss in section H.1.1, a key part of Bakunin’s critique of Marxism was precisely that it looked to political change before social and economic transformation, the latter coming as a result of “political action” allowed by the previous political revolution. Thus “[t]o win political freedom first can signify no other thing but to win this freedom only, leaving for the first days at least economic and social relations in the same old state, — that is, leaving the proprietors and capitalists with their insolent wealth, and the workers with their poverty.” [The Political Philosophy of Bakunin, p. 294] This meant that anarchists aimed to ensure any revolution was “simultaneously universal, social, philosophical, economic and political revolution”. The “revolution as we understand it will … set about the … complete destruction of the State … The natural and necessary upshot of that destruction” will include the “[d]issolution of the army, magistracy, bureaucracy, police and clergy” and “[a]ll productive capital and instruments of labour … be[ing] confiscated for the benefit of toilers associations, which will have to put them to use in collective production” as well
as the "[s]eizure of all Church and State properties." The "federated Alliance of all labour associations ... will constitute the Commune." The people "must make the revolution everywhere, and ... ultimate direction of it must at all times be vested in the people organised into a free federation of agricultural and industrial associations ... organised from the bottom up." [No Gods, No Masters, vol. 1 pp. 152–6]

This was echoed by Kropotkin in 1905:

“The Russian people — the working men — having compelled the autocrat to abdicate his despotic power, must compel him now to give body to his abdication by sending away the troops upon which rest his power and the power of bureaucracy, the power of unbridled capitalism.

“The people must arm itself; otherwise the Tsar, the bureaucrats and the capitalists will crush it down ... the Russian working men must not forget their own demands. To guarantee the individual against police arbitrariness is necessary for all. But he who works and produces riches with his own hands requires something else... If you are compelled tomorrow, after the Constitution has been proclaimed, to return to the factories the same slaves as you have been before, then you will have been betrayed ...

“Don’t expect anything from would-be saviours. But in every factory, every building yard, every workshop, and every mine, establish yourselves the order of things which, by common accord, you will find proper to establish. But remember this: Don’t allow others to interfere! It is your affair, and you have to settle it.

***Accomplish yourselves a revolution in the organisation of labour as you have accomplished it in the general administration of the Russian State.***

is clear from Trotsky’s writings, he embraced party dictatorship (i.e. “socialism from above”) and considered this as quite compatible (indeed, an essential aspect) of his Leninist ideology. That McNally fails to indicate this and, indeed, asserts the exact opposite of the facts shows that it is not only anarchism he is ignorant about.

# Marxists and Spanish Anarchism

In this appendix of our FAQ we discuss and reply to various analyses of Spanish anarchism put forward by Marxists, particularly Marxist-Leninists of various shades. The history and politics of Spanish Anarchism is not well known in many circles, particularly Marxist ones, and the various misrepresentations and distortions that Marxists have spread about that history and politics are many. This appendix is an attempt to put the record straight with regards the Spanish Anarchist movement and point out the errors associated with the standard Marxist accounts of that movement, its politics and its history.

Hopefully this appendix will go some way towards making Marxists (and others) investigate the actual facts of anarchism and Spanish anarchist history rather than depending on inaccurate secondary material (usually written by their comrades). As such, it is a supplement to section I.8 and provides some background information on the Social Revolution of 1936.

Part of this essay is based on the article “Trotskyist Lies on Anarchism” which appeared in Black Flag issue no. 211 and Tom Wetzel’s article Workers’ Power and the Spanish Revolution.

1. Were the Spanish Anarchists “Primitive Rebels”?

The thesis that the Spanish Anarchists were “primitive rebels,” with a primitive understanding of the nature of revolution is a common one amongst Marxists. One of the main sources for this kind of
As such, the roots of Trotsky’s “fatal error” can be traced further back than the rise of Stalin. Its real roots lie with the idea of a “workers’ state” and so with the ideas of Marx and Engels. As Bakunin argued against Marx (and anarchists have repeated since) the state is, by its nature, a centralised and top-down machine. By creating a “revolutionary” government, power is automatically transferred from the working class into the hands of a few people at the top. As they have the real, de facto, power in the state, it is inevitable that they will implement “socialism from above” as that is how the state is structured. As Bakunin argued, all states “are in essence only machines governing the masses from above” by a “privileged minority, allegedly knowing the genuine interests of the people better than the people themselves.” The idea of a state being run “from below” makes as much sense as “dry rain.” Little wonder Bakunin argued for a “federal organisation, from the bottom upward, of workers’ associations, groups, city and village communes, and finally of regions and peoples” as “the sole condition of a real and not fictitious liberty.” In other words: “Where all rule, there are no more ruled, and there is no State.” [The Political Philosophy of Bakunin, p. 211, p. 210 and p. 223] Only this, the destruction of every state and its replacement by a free federation of workers’ councils, can ensure a real “socialism from below”.

Therefore, rather than signifying the working class running society directly, the “workers’ state” actually signifies the opposite — namely, that the working class has delegated that power and responsibility to others, namely the government. As Leninism supports the idea of a “workers’ state” then it is inevitably and logically tied to the idea of “socialism from below.” Given that Lenin himself argued that “only from below” was an anarchist principle, we can easily see what the “fatal error” of Trotsky actually was. By rejecting anarchism he automatically rejected real “socialism from below.”

Sadly for McNally, Trotsky did not, as he asserts, embrace the “democratic essence” of Leninism in the 1920s or 30s. Rather, as

“Don’t trust those who will tell you: ‘Not yet! It is too soon!’ No, it is not too soon; it is just the time for it.” [“The Revolution in Russia”, Direct Struggle Against Capital, pp. 456–7]

As with the Paris Commune and the soviets, yet another key aspect of McNally’s Marxism was first advocated by anarchists. As Emma Goldman noted in 1918, the Bolsheviks where “adopting Anarchist Revolutionary tactics” and, unlike in 1905, in 1917 they “no longer believe” that “the industrialisation of Russia and the historic mission of the bourgeoisie as a necessary evolutionary process before the Russian masses could come into their own” and now accepted “the point of view held by the Anarchists since Bakunin; namely, that once the masses become conscious of their economic power, they make their own history” and so revolution “means a fundamental social and economic change, something which has its roots in the needs and hopes of the people and which must not end until the disinherited of the earth come into their own. In a word, the Russian people saw in the overthrow of the autocracy the beginning and not the finale of the Revolution.” For the toiler, the Russian Revolution “can mean nothing … unless it sets the land fee and joins to the dethroned Tsar his partner, the dethroned land-owner, the capitalist.” [“The Truth About the Bolsheviki”, Writings of Emma Goldman, p. 163 and p. 165]

So when Victor Serge, like McNally, stated that by concluding the “self-evident truth” that “the Russian Revolution cannot confine itself to changing the political order” in 1917 but that it had to take in “a social character” by expropriating capital and land he was unknowingly “on the line” advocated by Lenin we must remember that this was not “the line” pioneered by Trotsky but rather the one raised by Kropotkin and other anarchists during the 1905 revolution (and rejected at the time by all Marxists) and that this had been argued for since the late 1860s by Bakunin and other libertarians. [Memoirs of a Revolutionary, p. 60]
This confusion associated with Marxist “class analysis” of anarchism was also present in Lenin. Given that anarchism is apparently associated with the petty-bourgeois we find a strange contradiction in Lenin’s work. On the one hand Lenin argued that Russia “despite the more petty-bourgeois composition of her population as compared with the other European countries” anarchist influence was “negligible during the two revolutions (of 1905 and 1917)”. The lack of influence in Russia, he claimed, was due to Bolshevism having “waged a most ruthless and uncompromising struggle against opportunism” for anarchism was “a penalty for the opportunist sins of the working-class movement.” On the other he admitted that, in the developed capitalist nations, syndicalism was “a profoundly proletarian and mass movement” and that it is “the duty of all Communists to do everything to help all proletarian mass elements to abandon anarchism … the measure in which genuinely Communist parties succeed in winning mass proletarian elements … away from anarchism, is a criterion of the success of those Parties.” [Collected Works, vol. 31, p. 31, p. 32, p. 200 and p. 201]

Thus, in the most capitalist nations, ones with a more widespread and developed proletariat, the anarchist and syndicalist movements were more firmly developed and had closer connections with the masses than in Russia. Moreover, these movements were also quite revolutionary as well and should be won to Bolshevism. But anarchism is the politics of the petit-bourgeois and so should have been far smaller in Western countries than in Russia due to the larger numbers of artisans and peasants in the latter. The opposite was the case, thus suggesting that Lenin’s analysis is wrong.

We can point to another explanation of these facts. Rather than the Bolsheviks “struggle against opportunism” being the reason why anarchism was “negligible” in 1917–18 in Russia (it was not, in fact) but had mass appeal in Western Europe perhaps it was the fact that anarchism was a product of working class struggle in advanced capitalist countries while Bolshevism was a product and elsewhere “as workers’ states” in spite of being “brutally undemocratic state capitalist tyrannies.” Given that the SWP/ISO and a host of other Leninist groups still argue that Lenin’s brutally undemocratic state capitalist tyranny was some kind of “workers’ state” McNally’s comments seem deeply ironic. As such, Trotsky’s defence of Stalinism as a “degenerated workers’ state” is not as surprising nor as puzzling as McNally tries to claim. If, as he argues, “[t]o talk of a workers’ state is necessarily to talk of workers’ power and workers’ democracy” then Lenin’s regime had ceased to be a “workers’ state” (if such a thing could exist) by the spring of 1918 at the latest. For anarchists (and libertarian Marxists) the similarities are all too clear between the regime under Lenin and that under Stalin. That McNally cannot see the obvious similarities suggests a lack of objectivity and a weak commitment to the principles of “socialism from below”

He sums up his account of the post-Second War World Trotskyists by arguing that “the movement Trotsky had created fell victim to the ideology of socialism from above.” Unfortunately for his claims, this is not the case. As proven above, Trotsky had consistently argued for the dictatorship of the party between 1920 and 1940 and so Trotskyism had always been based on “the ideology of socialism from above.” Trotsky had argued for party dictatorship simply because democratic mass organisations would allow the working class to express their “wavering” and “vacillations.” Given that, according to those who follow Bolshevik ideas, the working class is meant to run the so-called “workers’ state” Trotsky’s arguments are extremely significant. He explicitly acknowledged that under Bolshevism the working class does not actually manage their own fates but rather the vanguard party does. This is cannot be anything but “socialism from above.” If, as McNally argues, Trotsky’s “fatal error” in not recognising that Stalinism was state capitalism came from “violating the principles of socialism from below,” then this “fatal error” is at the heart of the Leninist tradition.
racy, undermined union democracy and repressed all revolutionary elements outside of the party, argued for the introduction of “one-man management” as well as repressing peasants and striking and protesting workers long before the start of the Russian Civil War in late May 1918. In short, the Bolsheviks had introduced much of which McNally denounces as “Stalinism” before the war he uses to excuse them for all responsibility for its rise. As Maurice Brinton rightly states:

“there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practices of Stalinism ... The more one uneartns about this period the more difficult it becomes to define — or even to see — the ‘gulf’ allegedly separating what happened in Lenin’s time from what happened later. Real knowledge of the facts also makes it impossible to accept ... that the whole course of events was ’historically inevitable’ and ’objectively determined’. Bolshevik ideology and practice were themselves important and sometimes decisive factors in the equation, at every critical stage of this critical period [between 1917 and 1921]”

[“The Bolsheviks and Workers’ Control”, For Workers’ Power, p. 376]

To draw a sharp distinction between Stalinism and Bolshevism is difficult, if not impossible, to make based on McNally’s own criteria. That Stalinism was more brutal, more unequal, more despotic is true but that does not change the similarities in social relationships between the two — both were dictatorial state capitalist regimes. That the repression did not extend to within the Bolshevik party is a weak hook to hang a theory on.

During his analysis of the failure of orthodox Trotskyism, McNally states that after the second world war “the Trotskyist movement greeted” the various new Stalinist regimes in Eastern Europe of bourgeois struggle (for Parliament, a liberal republic, etc.) in Tsarist Russia? Similarly, perhaps the reason why Bolshevism did not develop the same opportunist tendencies as in other Social-Democratic movements was because it did not work in an environment which encouraged them. After all, unlike the German Social Democrats, the Bolsheviks were illegal for long periods of time and worked in an absolutist monarchy. The influences that corrupted the German Social Democrats were not at work in the Tsarist regime simply because there was no genuine Parliamentarianism for the party to get corrupted by. Thus, Bolshevism, perhaps at best, was applicable to Tsarist conditions and anarchism to Western ones.

However, contrary to Lenin, Russian anarchism was far from “negligible” during 1917–18 and was growing in influence within the Russian working class which was the real reason why the Bolsheviks suppressed them before the start of the civil war. As Emma Goldman noted, a claim such as Lenin’s “does not tally with the incessant persecution of Anarchists which began in [April] 1918, when Leon Trotsky liquidated the Anarchist headquarters in Moscow with machine guns. At that time the process of elimination of the Anarchists began.” [Trotsky Protests Too Much”, Writings of Emma Goldman, p. 265] This fact of anarchist influence during the revolution does not contradict our earlier analysis. This is because the Russian anarchists, rather than appealing to the petit-bourgeois, were influencing exactly the same workers, sailors and soldiers the Bolsheviks were. Indeed, the Bolsheviks often had to radicalize their activities and rhetoric to counter anarchist influence. As Alexander Rabinowitch in his study of the July uprising of 1917 notes:

“At the rank-and-file level, particularly within the [Petrograd] garrison and at the Kronstadt naval base, there was in fact very little to distinguish Bolshevik from Anarchist ... The Anarchist-Communists and the Bolsheviks
competed for the support of the same uneducated, depressed and dissatisfied elements of the population, and the fact is that in the summer of 1917, the Anarchist-Communists, with the support they enjoyed in a few important factories and regiments, possessed an undeniable capacity to influence the course of events. Indeed, the Anarchist appeal was great enough in some factories and military units to influence the actions of the Bolsheviks themselves.” [Prelude to Revolution, p. 64]

This is hardly what would be expected if anarchism was “petit-bourgeois” as Marxists assert.

It could, in fact, be argued that the Bolsheviks gained the support of so many workers during the summer of 1917 because they sounded and acted like anarchists and not like Marxists and lost it, by the summer of 1918, because, once in power, they reverted to acting like Marxists and their centralised policies were simply not solving the problems facing the revolution. At the time many considered the Bolsheviks as anarchists and one fellow Marxist (an ex-Bolshevik turned Menshevik) thought Lenin had “made himself a candidate for one European throne that has been vacant for thirty years — the throne of Bakunin!” [quoted by Rabinowitch, Op. Cit., p. 40] As Alexander Berkman argued, the “Anarchist mottoes proclaimed by the Bolsheviks did not fail to bring results. The masses relied to their flag.” [What is Anarchism?, p. 120] Indeed, as we note in section H.5.12, the Bolshevik party in the summer of 1917 was far from the disciplined vanguard party of Leninist myth and far more like a federation of local groups which could — and did — ignore the party’s central committee and its conservatism. It was in 1918, faced with the realities of holding state power in the face of popular discontent and counter-revolution that Lenin’s long desired model of a centralised, top-down, disciplined party came to be — a development which contributed to the degeneration of the regime away from socialism and towards state capitalism.

For anarchists, we stress, the Bolshevik substitution of party power for workers power did not come as a surprise. The state is the delegation of power — as such, it means that the idea of a “workers’ state” expressing “workers’ power” is a logical impossibility (see section H.3.7). If workers are running society then power rests in their hands. If a state exists then power rests in the hands of the handful of people at the top, not in the hands of all. The state was designed for minority rule. No state can be an organ of working class (i.e. majority) self-management due to its basic nature, structure and design.

For this reason anarchists from Bakunin onwards have argued for a bottom-up federation of workers’ councils as the agent of revolution and the means of managing society after capitalism and the state have been abolished. If these organs of workers’ self-management are co-opted into a state structure (as happened in Russia) then their power will be handed over to the real power in any state — the government (in this case, the Council of People’s Commissars). They will quickly become mere rubberstamps of the organisation which holds the reigns of power, the vanguard party and its central committee.

McNally rewrites history by arguing that it was “Stalin’s counter-revolution” which saw “communist militants ... executed, peasants slaughtered, the last vestiges of democracy eliminated.” The SWP/ISO usually date this “counter-revolution” to 1928 (the defeat of the Left Opposition and the first Five Year Plan). However, long before this date there was no “vestiges” of meaningful democracy left — as Trotsky himself made clear in his comments in favour of party dictatorship between 1920 and 1923. Indeed, Trotsky had supported the repression of the Kronstadt revolt which had called for soviet democracy. McNally ignores this and instead argues that Trotsky “acknowledged that the soviets had been destroyed, that union democracy had disappeared, that the Bolshevik party had been stripped of its revolutionary character” under Stalinism. Yet, as we discuss in section H.6, the Bolsheviks had already destroyed soviet democ-
signed for that and no state has ever been). Sadly for his argument, both Lenin and Trotsky argued against the idea of workers’ democracy and, in stark contrast, argued that the dictatorship of the party was essential for a successful revolution. Indeed, they both explicitly argued against the idea that a mass, democratic organisation could run society during a revolution. The need for party power was raised explicitly to combat the fact that the workers’ could change their minds and vote against the vanguard party. As such, the founding fathers of the SWP/ISO political tradition explicitly argued that a workers’ state had to reject workers power and democracy in order to ensure the victory of the revolution. Clearly, according to McNally’s own argument, his own politics cannot be considered as “socialism from below” as it explicitly argued that a workers’ state did not “necessarily” mean workers’ power or democracy.

As indicated above, for the period McNally himself selects (the 1920s and 1930s), Trotsky consistently argued that the Bolshevik tradition the SWP/ISO places itself was based on the “Leninist principle” of party dictatorship. For McNally to talk about Trotsky keeping “socialism from below” alive is, therefore, truly amazing. It either indicates a lack of awareness of Trotsky’s ideas or a desire to deceive. To be fair to McNally, the notion that Trotsky’s Opposition supported genuine workers’ democracy seems to be a common fallacy in SWP circles. Thus Chris Harman asserted that the “alternative to Stalinism” in the late 1920s was “returning to genuine workers’ democracy and consciously linking the fate of Russia to the fate of the world revolution” (while allowing “a limited development of heavy industry”) and it was the “historical merit of the Left Opposition” that “it framed a policy along these lines.” [Chris Harman, Bureaucracy and Revolution in Eastern Europe, p. 19] Clearly McNally is not the only Leninist unable — or unwilling — to discover the grim truth about the Left Opposition or, for that matter, the reality of Bolshevik rule.

Moreover, this stealing of anarchist slogans and tactics in 1917 was forced upon the Bolsheviks by the working class. On Lenin’s own admission, the masses of peasants and workers were “a hundred times further to the left” than the Bolsheviks. Trotsky himself notes that the Bolsheviks “lagged behind the revolutionary dynamic ... The masses at the turning point were a hundred times to the left of the extreme left party.” [History of the Russian Revolution, Vol. 1, p. 403] Indeed, one leading Bolshevik stated in June 1917 (in response to a rise in anarchist influence), “[b]y fencing ourselves off from the Anarchists, we may fence ourselves off from the masses.” [quoted by Rabinowitch, Op. Cit., p. 102] That, in itself, indicates the weakness of Lenin’s class analysis of anarchism.

Rather than the Russian experience refute the claim that anarchism is a working class theory, it reinforces it — the Bolsheviks would not have succeeded if they had used traditional Marxist slogans and tactics (as was the fate of the Mensheviks). Instead, much to the dismay of their more orthodox comrades, the Bolsheviks embraced traditional anarchist ideas and tactics and thereby gained increased influence in the working class. After the Bolshevik seizure of power in the name of the soviets, anarchist influence increased as more working people recognised that what the Bolsheviks meant by their slogans was different than what working people thought they meant (see section A.5.4). So the experience of the Russian Revolution re-enforces the fact that Marxist “class analysis” of anarchism fails to convince. Far from proving that libertarian socialism is non-proletarian, that Revolution proved that it was: just as it confirmed the prophetic correctness of the views of the founders of anarchism and, in particular, their critique of Marxism.

To conclude, the usual Marxist “class analysis” of anarchism is somewhat confused. On the one hand, it claims that anarchism is backward looking and the politics of the petit-bourgeois being destroyed by the rise and development of capitalism. On the other hand Marxists point to events and organisations created in work-
ing class struggle which were predicted and/or influenced by anarchist ideas and ideals, not Marxist ones. That indicates better than any other argument that Marxists are wrong about anarchism and their “class analysis” nothing more than distortions and bigotry. Based on the evidence and the contradictions it provokes in Marxist ideology, we have to argue that McNally is simply wrong. Rather than being an ideology of the petit-bourgeois anarchism is, in fact, a political theory of the working class (artisans, peasants and proletariat). Rather than a backward looking theory, anarchism is a theory of the present and future — it has a concrete and radical critique of current society, a vision of the future and a theory how to get there which appeals to working people in struggle. Such is obviously the conclusion when you read anarchist theory and see how Marxists have appropriated aspects of it which they had previously denounced. Sadly, as we note in section H.3.5, this appropriation has been selective and had not made Leninism any more libertarian, its pre-revolution rhetoric aside.

13. If Marxism is “socialism from below,” why do anarchists reject it?

McNally claims that Marxism is “socialism from below.” In his text he indicates support for the Paris Commune and the soviets of the Russian Revolution. He states that the “democratic and socialist restructuring of society remains ... the most pressing task confronting humanity. And such a reordering of society can only take place on the basis of the principles of socialism from below. Now more than ever, the liberation of humanity depends upon the self-emancipation of the world working class... The challenge is to restore to socialism its democratic essence, its passionate concern with human freedom.”

So, if this is the case, why the hostility between anarchists and Marxists? Surely it is a question of semantics? No, for while Leninists pay lip-service to such developments of working class self-activity and self-organisation as workers’ councils (soviets), fac-

become enemies of the people, whether they want to or not”. [Op. Cit., p. 181 and p. 51]

Clearly the Bolshevik experience confirmed Bakunin’s critique of Marxism while the Makhnovist insurrectionary army in the Ukraine confirmed the validity of the anarchist alternative (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?” for details). As such, it is ironic to read McNally state that “[f]throughout the 1920s and until his death .. . Trotsky fought desperately to build a revolutionary socialist movement based on the principles of Marx and Lenin.” Leaving Marx to one side for the moment, McNally’s comments are correct simply because in his advocacy of party power and dictatorship (for a “socialism from above,” to use McNally’s term) Trotsky was indeed following Lenin’s principles and Bolshevik orthodoxy. As noted in the last section, Lenin had been arguing from a “socialism” based on “above” and “below” since at least 1905 (which, to show their Marxist orthodoxy, he linked to Engels and his arguments against Bakunin.) The reality of Bolshevik rule (as indicated in section 8) showed that pressure “from above” by a “revolutionary” government easily crushes pressure “from below” in the name, as Trotsky constantly stressed throughout the 1920s and 1930s, of the advanced political ideas of the Bolshevik party leaders. Yet despite Lenin and Trotsky’s dismissal of democracy, McNally argues that democracy is the core need of socialism:

“A workers’ state, according to Marx and Lenin, is a state based upon workers’ control of society. It depends upon the existence of democratic organisation that can control society from below. A workers’ state presupposes that workers are running the state. To talk of a workers’ state is necessarily to talk of workers’ power and workers’ democracy.”

Which, as far as it goes, is correct (for anarchists, of course, the idea that a state can be run from below is utopian — it is not de-
privileges of the governing minority and the political and economic slavery of the masses”. Bakunin recognised the elitism inherent in Trotsky’s privileging of the party (the vanguard) and argued that while it was claimed “those elected will be passionately committed as well as learned socialists” the reality would be that “the pseudo-popular state will be nothing but the highly despotic government of the masses by a new and very small aristocracy of real or pretended scholars. The people are not learned, so they will be liberated in entirety form the cares of government and included in entirety in the governed herd. A fine liberation!” The new government would “begin to look upon the whole workers\92 world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people.” Rather than securing the freedom of the people “no dictatorship can have any other objective than to perpetuate itself, and that it can engender only slavery in the people who endure it”. [Statism and Anarchy, p. 136, p. 198, p. 13, p. 24, p. 136, p. 137, pp. 178–9, p. 178 and p. 179]

Economically, the workers would remain oppressed and exploited as the Marxists would “concentrate the reins of government in a strong hand, because the ignorant people require strong supervision. They will create a single state bank, concentrating in their own hands all commercial, industrial, agricultural, and even scientific, production, and will divide the people into two armies, one industrial and one agrarian, under the direct command of state engineers, who will form a new privileged scientific and political class.” The state bureaucracy would become the new ruling class, “a new bureaucratic aristocracy” who are “corrupted by state service”, and as soon as “they enter state service … the iron logic of their position, the force of circumstances inherent in certain hierarchical and profitable relationships, makes itself felt and … [they] become bureaucrats from head to toe … The demands of a certain position always prove stronger than sentiments, intentions, or good impulses … They have to become members of the bureaucratic class … they

tory committees, workers’ control, revocable and mandated delegates they do so in order to ensure the election of their party into positions of power (i.e. the government). Rather than see such developments as working people’s direct management of their own destinies and as a means of creating a self-managed (i.e. free) society as anarchists do, Leninists see them as a means for their party to take over state power. Nor do they see them as a framework by which working class people can take back control of their own lives. Rather, they see them, at best, as typical bourgeois forms — namely the means by which working people can delegate their power to a new group of leaders, i.e. as a means to elect a socialist government into power. The nature of the regimes they wish to create are centralised in nature, so reducing meaningful democracy to picking a few leaders and, even worse, producing the natural conditions under which a bureaucracy can flourish — both conditions for creating a new ruling elite (the bureaucracy).

This attitude can be seen from Lenin’s perspectives on the Russian soviets during the 1905 Russian Revolution. Rather than seeing them as a means of working class self-government, he saw them purely as a means of gaining influence for his party:

‘the Party ... has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers’ Deputies ... to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement ... the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets ... for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actu-
Such a perspective indicates well the difference between anarchism and Leninism. Anarchists do not seek power for their own organisations. Rather they see self-managed organisation created by working class people in struggle as a means of eliminating hierarchy within society, of directly involving the mass of people in the decisions that affect them. In other words, as a means of creating the organisations through which people can change both themselves and the world by their own direct action and the managing of their own struggles, lives, communities and workplaces. Leninists view working class self-organisation as a means of gaining power for their own party (which they identify with the power of the working class — see section H.3.11). Mass organisations, which could be schools for self-management and freedom, are instead subjected to an elitist leadership of intellectual ideologues. The party soon substitutes itself for the mass movement, and the party leadership substitutes itself the party. This is the inevitable result of a vision of socialism rooted in being “fully and unreservedly in favour of a strong state power and of centralism.” [Op. Cit., vol. 26, p. 116]

Lenin’s view of the soviets was instrumental: he regarded them merely as a means of getting the workers to support the Bolshevik Party and ensuring his party seized state power. Indeed, he constantly confused soviet power with party power, seeing the former as the means to the latter and the latter as the key to creating socialism (see section H.3.11). Given his vanguardist ideology (see section H.5) this is unsurprising and, indeed, understandable — flawed assumptions will produce incorrect conclusions. What is missing from his vision is the idea of socialism as being based on working class self-activity, self-management, self-government and, ultimately, self-emancipation (section 11 refutes McNally’s claims that Leninism is based on working class self-emancipation). “Lenin” as one historian concluded, “believed that the transition to socialism

ally become superfluous.” [Collected Works, vol. 12, pp. 143–4]
does not, however, lessen the guilt of Leon Trotsky as one of the actors in the revolutionary drama” [“Trotsky Protests Too Much”, Writings of Emma Goldman, pp. 251–2]

Ante Ciliga saw the similarities first-hand while in prison in the Soviet Union, noting that the Trotskyists “who were in prison for anti-Stalinism could find nothing better to do than to indulge in Stalinism themselves [in their political groups] while in prison. This absurdity was only apparent; it merely served to prove that between Trotskyism and Stalinism there were many points in common”. The outlook of the Trotskyist majority “was not very different from that of the Stalinist bureaucracy; they were slightly more polite and human, that was all.” [Op. Cit., p. 218 and p. 263] This is unsurprising given, as indicated, the same Bolshevik political legacy and same class position (Trotskyists were labelled “the bureaucracy in exile”). It may have been that if the Trotskyists had won the inter-bureaucracy struggle in the mid-1920s then the Soviet Union would have avoided the horrors of Stalinism but it would have remained a state capitalist party dictatorship and, as such, a class system in which the few exploit, oppress and repress the many. That this few would have exploited the many less ruthlessly and aimed to impose similar regimes internationally rather than concentrating on building “socialism in one country” does not mean much.

Needless to say, Goldman had no difficulty in recognising that Bolshevik Russia was “State Capitalism” in the early 1920s (i.e., when Trotsky was still part of the ruling class). [My Disillusionment in Russia, p. 247] McNally argues that “[b]y making the nature of property ownership the criterion of workers’ state” rather than “workers’ power and workers’ democracy” Trotsky had “committed an error that was seriously to disorient the Trotskyist movement in later years. For, unwittingly, Trotsky had broken from the most basic precepts of socialism from below.” Yet what alternative did he have? After all, both workers’ democracy and power had

was guaranteed ultimately, not by the self-activity of workers, but by the ‘proletarian’ character of state power.” [A. S. Smith, Red Petrograd, pp. 261–2] Worse, the ‘proletarian’ character of the state was determined by the party in government and, as we indicated in section 8, the party determined what was and was not “proletarian” so allowing — indeed, justifying — party dictatorship. This gap in his politics, this confusion of party with class, helped undermine the revolution and create the dictatorship of the bureaucracy. Little wonder that by the end of 1918, the Bolsheviks ruled the newly established soviet state entirely alone and had turned the soviets into docile instruments of their party apparatus rather than forms of working class self-government. Perhaps needless to say, this reality came to be reflected in Bolshevik ideology and the assertion that a socialist revolution required a party dictatorship was embedded into it at this time — where it remained (Trotsky, for example, arguing this position throughout the 1920s and 1930s, as shown in section 15).

So despite its radical language, Leninism is totally opposed to the nature of revolt and rebellion. It seeks to undermine what makes these activities and the organisations they create potentially revolutionary (their tendencies towards self-management, decentralisation, solidarity, direct action, free activity and co-operation) by using them to build the party and, ultimately, a centralised, hierarchical state structure on the corpse of these once revolutionary forms of working class self-organisation and self-activity. This applies both to the social organisations of the working class and to their economic ones as Leninists view nationalisation (i.e., state ownership and control) as the basis of socialism rather than, as anarchists do, socialisation and workers self-management of production. The Leninist position can only produce a new ruling class (the bureaucracy) in a new class system (state capitalism). As Kropotkin predicted:
“The state organisation, having always been ... the instrument for establishing monopolies in favour of the ruling minorities, cannot be made to work for the destruction of these monopolies. The anarchists consider, therefore, that to hand over to the state all the main sources of economical life — the land, the mines, the railways, banking, insurance, and so on — as also the management of all the main branches of industry, in addition to all the functions already accumulated in its hands (education, state-supported religions, defence of the territory, etc.), would mean to create a new instrument of tyranny. State capitalism would only increase the powers of bureaucracy and capitalism. True progress lies in the direction of decentralisation, both territorial and functional, in the development of the spirit of local and personal initiative, and of free federation from the simple to the compound, in lieu of the present hierarchy from the centre to the periphery.” [Direct Struggle Against Capital, pp. 164–5]

While Leninists point to Lenin’s The State and Revolution as proof of Leninism’s “socialism from below” credentials, anarchists note that, firstly, its promises were either not applied or quickly abandoned and, secondly, its vision of socialism is impoverished. As we discuss the first objection in section H.1.7, we will note here that Lenin’s work postulated a centralised proletarian state rooted in representative rather than delegate institutions as well as a “socialism” modelled on capitalist institutions which the workers were expected to “control” rather than self-management of production. Thus Lenin’s pointing to the postal service, in which workers are usually employed by the State under capitalism, as “an example of the socialist economic system” and argued that we needed to “organise the whole economy on the lines of the postal service” simply transferred economic power to the state bureaucracy. [Collected

the “basic elements of socialism from below”). For Trotsky, as for Stalin, the dictatorship of the party was a fundamental principle of Bolshevism and one which was above democracy (which, by its very nature, expresses the “vacillation of the masses”). Compare McNally’s words on Stalinism to Trotsky’s position:

““For [Stalin’s] group, ‘socialism’ lost all foundation in organs of workers’ democracy, soviets ... They came increasingly to identify socialism with a bureaucratic monopoly of power which allowed no place for organs of mass democracy ... Gone was the commitment to workers’ democracy and international socialism ... Stalin undertook to reshape the entire nature and direction of Russian society ... the elimination of all dissent; the liquidation of all forms of democracy and of genuine working class organisation ... “

Given that the identification of socialism with the party’s “monopoly of power” as well as removal of “the commitment to workers’ democracy” occurred under Lenin and that Trotsky’s defended this, the question arises was there any fundamental difference between Leninism and Stalinism? As Victor Serge admitted, “a good many Oppositionists rallied to the [Stalinist] ‘general line’ and renounced their errors since, as they put it, ‘After all, it is our programme that is being applied’” [Op. Cit., p. 252]

Hence Emma Goldman:

“In point of truth I see no marked difference between the two protagonists of the benevolent system of the dictatorship except that Leon Trotsky is no longer in power to enforce its blessings, and Josef Stalin is ... Stalin did not come down as a gift from heaven to the hapless Russian people. He is merely continuing the Bolshevik traditions, even if in a more relentless manner ... I admit, the dictatorship under Stalin’s rule has become monstrous. That
namely party dictatorship rather than working class freedom. This is because such a position means denying exactly what workers' democracy is meant to be all about — namely that working people can recall and replace their delegates when those delegates do not follow the wishes and mandates of the electors. If the governors determine what is and what is not in the “real” interests of the masses and “overcome” (i.e. repress) the governed, then we have dictatorship, not democracy.

Trotsky was hardly alone in his views given that they were Bolshevik orthodoxy. Amazingly enough, even in the Russian prison camps in the late 1920s and early 1930s, “almost all the Trotskyists continued to consider that ‘freedom of party’ would be ‘the end of the revolution.’ ‘Freedom to choose one’s party — that is Menshevism,’ was the Trotskyists’ final verdict.” This was because it had been “condemned formerly by Lenin, by Trotsky” as well as by other Opposition Groups. [Ante Ciliga, The Russian Enigma, p. 280] As Left Oppositionist Victor Serge pointed out “the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late.” [The Serge-Trotsky Papers, p. 181] Sadly, like Trotsky’s The Revolution Betrayed, Serge’s later Memoirs paint a different picture by asserting one of its “great fundamental ideas” was “working-class democracy”! [Memoirs of a Revolutionary, p. 252]

As can be seen, McNally does not present a remotely accurate account of Trotsky’s ideas during the 1920s and 1930s. All of which makes McNally’s comments deeply ironic. He argues that “Stalin had returned to an ideology resembling authoritarian pre-Marxian socialism. Gone was socialism’s democratic essence. Stalin’s ‘Marxism’ was a variant of socialism from above” Clearly, Trotsky’s Marxism was also a variant of “socialism from above” and without “socialism’s democratic essence” (unless you think that party dictatorship can somehow be reconciled with democracy or expresses one of

Works, vol. 25 pp. 426–7] Anarchists, in contrast, argue that working class bodies like trade unions must take into their “hands the management of production” and co-operatives “for production and for distribution, both in industry and agriculture” were expressing aspects of “communist society” for “Socialist forms of life could find a much easier realisation” by means of these bodies “than by a State organisation”. [The Conquest of Bread, pp. 22–23] As Maurice Brinton documents in great detail in his classic The Bolsheviks and Workers’ Control, the Leninist vision of socialism was never based on workers management of the economy (see section H.3.14). Politically, the Bolsheviks placed an executive power (their own) over the Soviets and so centralised power into the hands of a few party leaders.

So as well as differences in the political nature of a socialist society, the role of organisations created in, by and for the class struggle and the nature of socialist organisation, anarchists and Marxists disagree with the economic nature of the future society. McNally claims that in Russia “[c]ontrol of the factories was taken over by the workers” but this is a total distortion of what actually happened. Throughout 1917, it was the workers themselves, not the Bolshevik Party, which raised the issue of workers’ self-management and control. As S.A. Smith puts it, the “factory committees launched the slogan of workers’ control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up.” [Op. Cit., p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers’ raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a “trade union conscious” in this and so many other cases and, worse, they hindered the movement of workers trying to control, and then manage, the factories they worked in. As Maurice Brinton correctly argued, “it is ridiculous to claim — as so many do today — that in 1917 the Bolsheviks really stood for the full, total and direct control by working people of the factories, mines, building sites or other enterprises in which they
worked, i.e. that they stood for workers’ self-management.” [“The Bolsheviks and Workers’ Control”, For Workers’ Power, p. 328] Rather, Lenin identified “workers’ control” as something totally different:

“When we say: ‘workers’ control’, always juxtaposing this slogan to dictatorship of the proletariat, always putting it immediately after the latter, we thereby explain what kind of state we mean ... if we are speaking of a proletarian state, that is, of the proletarian dictatorship, then workers’ control can become the country-wide, all-embracing, omnipresent, most precise and most conscientious accounting of the production and distribution of goods.” [Collected Works, vol. 26, p. 105]

By this Lenin meant the “power” to oversee the books, to check the implementation of decisions made by others, rather than fundamental decision making by the workers themselves. As he argued, when “the proletariat is victorious it will do the following, it will set economists, engineers, agronomists, and so forth, to work under the control of the workers’ organisations on drawing up a ‘plan’, on verifying it, on devising labour-saving methods of centralisation, on devising the simplest, cheapest, most convenient and universal measures and methods of control. For this we shall pay the economists, statisticians and technicians good money ... but we shall not give them anything to eat if they do not perform this work conscientiously and entirely in the interests of the working people.” “The important thing,” he stressed “will not be even the confiscation of the capitalists’ property, but country-wide, all-embracing workers’ control over the capitalists and their possible supporters ... by the workers’ control of the workers’ state.” The economy would be state-run based on the structures inherited from capitalism: “Compulsory syndication, i.e., compulsory amalgamation in associations under state control — for violent revolution or for the dictatorship which is an inevitable consequence of revolutionary victory” [Op. Cit., pp. 92–3]

Given that the so-called “dictatorship of the proletariat” is meant to be the means by which the proletariat coerce the former ruling elite, it is strange to read Trotsky argue that coercion becomes unnecessary if the toiling masses have a high level of political development. Why would the ruling elite stop their attempts at counter-revolution in those circumstances? That seems unlikely so we can only conclude that the coercion (like the dictatorship) is directed against the “toiling masses” by the ruling party. This is confirmed the following year (1939) when Trotsky repeats the same dictatorial ideas of 1921 by indicating — yet again — that he viewed democracy as a threat to the revolution and saw the need for party power over workers’ freedom:

“The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves ... if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the proletariat is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself.” [“The Moralists and Sycophants against Marxism”, pp. 53–66, Their Morals and Ours, p. 59]

Needless to say, by definition everyone is “backward” when compared to the “vanguard of the proletariat.” Moreover, as it is this “vanguard” which is “armed with the resources of the state” and not the proletariat as a whole we are left with one obvious conclusion,
olution is ‘made’ directly by a minority. The success of a revolution is possible, however, only where this minority finds more or less support, or at least friendly neutrality, on the part of the majority. The shift in different stages of the revolution, like the transition from revolution to counterrevolution, is directly determined by changing political relations between the minority and the majority, between the vanguard and the class.” [“Hue and Cry Over Kronstadt”, Lenin and Trotsky, Kronstadt, p. 85] Given that Kronstadt had rebelled against the Bolshevik dictatorship for soviet democracy, Trotsky’s argument suggests that for him the rule of the party (the “minority … the vanguard”) is more important than soviet democracy (see the appendix on “What was the Kronstadt Rebellion?” for more details of this key event in the history of the Russian Revolution). In other words, if the majority come to reject the minority then the former shows lack of sufficient class awareness and so the latter needs, as in Kronstadt, to use state power to secure its ruling position. This is implicit in the following strange comment:

“It is true that some of them [the critics of Bolshevism] recognise the revolution and the dictatorship \(\checkmark\) in words. But this does not help matters. They wish for a revolution which will not lead to dictatorship or for a dictatorship which will get along without the use of force. Of course, this would be a very ‘pleasant’ dictatorship. It requires, however, a few trifles: an equal and, moreover, an extremely high, development of the toiling masses. But in such conditions the dictatorship would in general be unnecessary. Some Anarchists, who are really liberal pedagogues, hope that in a hundred or a thousand years the toilers will have attained so high a level of development that coercion will prove unnecessary. Naturally, if capitalism could lead to such a development, there would be no reason for overthrowing capitalism. There would be no need either

this is what capitalism has prepared the way for” [Op. Cit., vol. 26, p. 118, pp. 107–8 and p. 108] Thus others — a few planners at the top of a centralised state — would determine the plans, not the workers themselves, and primarily the “control” would be exercised over the capitalists whom Lenin thought should remain in position for an indefinite period after the revolution. Rather than workers’ managing their own workplaces and economy Leninism meant “the organisation of really democratic control, i.e., control from ‘below’, control by the workers and the poor peasants over the capitalists” [Op. Cit., vol. 25, p.353] Unsurprisingly, then, in 1922, he even suggested granting legislative power to the State Planning Commission to ensure its decisions ‘could not be rejected by ordinary procedure in Soviet bodies, but would need a special procedure to be reconsidered” as it was “a body of experienced people, experts, representatives of science and technology” and so was “actually in a better position to form a correct judgment of affairs”. [Op. Cit., vol. 36, p. 598]

So Lenin’s commitment to workers’ control was limited and as Maurice Brinton correctly summarised:

‘Nowhere in Lenin’s writings is workers’ control ever equated with fundamental decision-taking (i.e. with the initiation of decisions) relating to production ... He envisioned a period during which, in a workers state, the bourgeois would still retain the formal ownership and effective management of most of the productive apparatus ... capitalists would be coerced into co-operation. ‘Workers’ control’ was seen as the instrument of this coercion.” [Op. Cit., pp. 314–5]

Thus the capitalists would remain and wage slavery would continue but workers could “control” those who had the real power and gave the orders (the capitalists were later replaced by “one-man management” by state bureaucrats but the lack of effective
power remained — see section H.3.14). In other words, no vision of workers’ self-management in production (and so real socialism) and the reduction of “socialism” to a warmed up variation of state capitalism with (in theory, but not in practice) a dash of liberal democracy in the form of “control” of those with the real power by those under them in the hierarchy. This is to be expected because, as S.A. Smith correctly argues, Lenin’s proposals were “thoroughly statist and centralist in character” and that he used “the term [‘workers’ control’] in a very different sense from that of the factory committees.” [Op. Cit., p. 154] As can be seen from McNally’s pamphlet, Leninists still follow this tradition and hide the grim reality that their tradition advocates an economic regime drastically different from the workers’ self-management their words imply to most readers. Using the same slogans as others (“workers’ control” or “socialism from below”, for example) but meaning something radically different by it can only breed confusion.

Given Lenin’s lack of concern about the revolutionising of the relations of production (a lack not shared by the Russian workers, we must stress) it is hardly surprising that Lenin considered the first task of the Bolshevik revolution was to build state capitalism. “State capitalism,” he wrote, “is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps”. [Collected Works, vol. 24, p. 259] The aim was to ensure that “[a]ll citizens are transformed into hired employees of the state” and the “whole of society will have become a single office and a single factory, with equality of labour and pay.” [Op. Cit., vol. 25, pp. 473–4] For Lenin, the “domination of the proletariat consists in the fact that the landowners and capitalists have been deprived of their property … The victorious proletariat has abolished property … and therein lies its domination as a class. The prime thing is the question of property.” [Op. Cit., vol. 30, p. 456] Hence his support for centralisation and “one-man management” — if the issue is property then working class power in production cannot be con-

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history … The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution … Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [Op. Cit., pp. 513–4]

Which was, let us not forget, his argument in 1920. Such remarkable consistency on this point over a 17 year period and one which cannot be overlooked if you seek to present an accurate account of Trotsky’s ideas during this period. Significantly, this was the year after his apparent (and much belated) embrace of soviet democracy for the USSR in The Revolution Betrayed and so that work must be considered as a temporary aberration, quickly rejected. His advice on what to do during the Spanish Revolution followed this pattern: “Because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.” [our emphasis, Op. Cit., p. 514] So much for workers’ power!

The following year saw Trotsky produce an article defending the suppression of the Kronstadt revolt which proclaimed that a “revo-
old Bolshevism" then it “would begin with the restoration of democracy in the trade unions and the Soviets” and it “would be able to, and would have to, restore freedom of Soviet parties.” Yet it was precisely the Bolsheviks who decreed that other parties within the Soviets were not genuine Soviet parties after all and repressed them. What guarantee exists that once the Bolsheviks had been revived (i.e., his faction took over) they did not conclude, as before, the necessity of party dictatorship? None. After all, did he not suggest that the “dictatorship of the Bolshevik party proved one of the most powerful instruments of progress in history”? [The Revolution Betrayed, pp. 238–9 and p. 104]

This limited support for Soviet Democracy was short-lived. Writing in 1937, ten years after the Platform was published and a year after The Revolution Betrayed, Trotsky was reiterating the privileged position of the party. In his essay “Bolshevism and Stalinism” he argued quite explicitly that “the proletariat can take power only through its vanguard” and that “the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity.” Only with “support of the vanguard by the class” can there be the “conquest of power” and it was in “this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard.” Thus, rather than the working class as a whole seizing power, it is the “vanguard” which takes power – “a revolutionary party, even after seizing power … is still by no means the sovereign ruler of society.” Note, the party is “the sovereign ruler of society,” not the working class. Nor can it be said that he was not clear who held power in his system: state power is required to govern the masses, who cannot exercise power themselves as “[t]hose who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the Bolshevik leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Writings 1936–37, p. 490, p. 488 and p. 495] Later that same year he repeated this position clearly and unambiguously:

considered as a necessary condition for socialism. Little wonder Soviet Russia never progressed beyond state capitalism — it could not as the fundamental aspect of capitalism, wage labour, was never replaced by workers’ self-management of production. Lenin, in short, was firmly in the same tradition as those “certain utopians” whose call that “the Government seize trade, industry and agriculture, to add them to its attributes and to make the French nation a nation of wage-workers” Proudhon rejected during the 1848 revolution as “expropriation by the State” was “still wage-labour.” [Property is Theft!, p. 22 and p. 377]

Writing in May 1917, Lenin took the viewpoint that state capitalism “is a complete material preparation for socialism, the threshold of socialism” and so socialism “is nothing but the next step forward from state capitalist monopoly.” It is “merely state-capitalist monopoly which is made to serve the interests of the whole people and has to that extent ceased to be capitalist monopoly.” [Op. Cit., vol. 25, p. 359 and p. 358] Rather than seeing “workers’ control” as workers managing production directly by means of their own class organisations, he always saw it in terms of workers’ “controlling” those who did within institutions inherited from capitalism. It simply meant “the country-wide, all-embracing, omnipresent, most precise and most conscientious accounting of the production and distribution of goods.” He clarified what he meant, arguing for “country-wide, all-embracing workers’ control over the capitalists” who would still manage production. Significantly, he considered that “as much as nine-tenths of the socialist apparatus” required for this “country-wide book-keeping, country-wide accounting of the production and distribution of goods” would be achieved by nationalising the “big banks,” which “are the state apparatus which we need to bring about socialism” (indeed, this was considered “something in the nature of the skeleton of socialist society”). This structure would be taken intact from capitalism for “the modern state possesses an apparatus which has extremely close connection with the banks and [business] syndicates … this

As discussed in section H.6.2, this was what the Bolsheviks did do, using the institutions inherited from Tsarism as framework for “socialism”. They believed that this economic structure would be made to serve the many rather than the few by a change in the political regime for “given a really revolutionary-democratic state, state-monopoly capitalism inevitably and unavoidably implies a step, and more than one step, towards socialism!” [Op. Cit., vol. 25, pp. 357–8] Yet a centralised state (never mind party dictatorship!) is hardly “a really revolutionary-democratic” anything other than in Bolshevik rhetoric. Surely, then, such an centralised economic structure would simply become a step, and more than a step, towards rule by the bureaucracy? And, sadly, that was the case so confirming anarchist warnings that state socialism would produce a new class system with the bureaucracy replacing the capitalist elite.

Yet even this is too generous, given the two obvious flaws in Lenin’s position. First, in-so-far-as a social organisation is “revolutionary-democratic” then it is not a state and, as Lenin’s regime showed, any new state will not remain so for long. Second, Lenin seems to have forgotten the Marxist theory of base and superstructure. The base is the economic forces and relations of production while the superstructure is the culture, institutions and state. In Marxist theory, while some mutual influences are sometimes admitted, the base determines the superstructure. Given this, surely an economic structure created under a class system would be far more likely to produce an undemocratic superstructure (state) than the opposite? Surely a centralised economic structure would produce concentrations of economic and bureaucratic power and so it would be far more consistent

In reality, the necessity of a party dictatorship was embraced by leading Bolsheviks like Trotsky and proclaimed to the world Socialist movement. The prohibition of opposition parties was not lamented at the time but rather raised to a principle (a Leninist principle, no less!) and implemented after victory in the civil war was secure. Facations were banned — with Trotsky’s wholehearted support — precisely because, as he later noted, they had replaced the struggle of parties. Nor was Trotsky boldered by state repression of opposition when he was in charge. For example a series of (unofficial) strikes broke out in July and August 1923 in Moscow and Petrograd and this “gave a new lease of life to the Mensheviks” and so “the GPU carried out a massive round up of Mensheviks, and as many as one thousand were arrested in Moscow alone.” [Tony Cliff, Trotsky, vol. 3, p. 25] When it was the turn of the ex-Bolsheviks in the Workers’ Group, Trotsky “was not at all eager to defend” them and “did not protest when their adherents were thrown into prison. Nor was he at all eager to support their demand for soviet democracy in that extreme form” [Isaac Deutscher, The Prophet Unarmed, pp. 108–9] It should be noted that rather than “extreme” a better word would have been “genuine” as the Workers’ Group, unlike Trotsky, did call for a multi-party workers’ democracy — and paid the price. Indeed, the “New Course Resolution” even went so far as to say that “it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat, as for instance the Workers’ Truth and Workers’ Group.” [The Challenge of the Left Opposition (1923–25), p. 408]

It would be remiss to not note how limited Trotsky’s position was: being limited to the Soviet Union it does not automatically negate his arguments previously made to the international socialist movement. Moreover, given the revisionism of the origins of the Bolshevik dictatorship it is legitimate to ponder how honest Trotsky’s statement is. He stated that if “the Soviet bureaucracy is overthrown by a revolutionary party having all the attributes of the
class may create several parties ... An example of only one party corres-
ponding to one class is not to be found in the whole course of political
history -\96 provided, of course, you do not take the police appearance
for the reality.” That the need for the dictatorship of the vanguard
was justified precisely in terms of the backwardness of the class
and other parties was forgotten. Likewise, the acknowledgement
of party dictatorship as a principle of Leninism was overlooked in
favour of the suggestion that the civil war resulted in the opposi-
tion parties being “forbidden one after the other” and while this was
“obviously in conflict with the spirit of Soviet democracy, the leaders
of Bolshevism regarded [it] not as a principle, but as an episodic act
of self-defence.” [Op. Cit., p. 34, p. 252 and p. 96] It would be
churlish to note that the final abolition of opposition parties — like
factions within the ruling party — occurred after the end of the
civil war.

These awkward facts did not stop Trotsky from suggesting a
fundamental difference between the Leninist and Stalinist dictator-
ships:

“To be sure, during the first period of the Soviet era the
Bolshevik party also exercised a monopoly. But to iden-
tify these two phenomena would be to take appearance
for reality. The prohibition of opposition parties was a
temporary measure dictated by conditions of civil war,
blockade, intervention and famine. The ruling party, rep-
resenting in that period a genuine organisation of the
proletarian vanguard, was living a full-blooded inner
life. A struggle of groups and factions to a certain de-
gree replaced the struggle of parties. At present, when
socialism has conquered ‘finally and irrevocably,’ the for-
mination of factions is punished with concentration camp
or firing squad. The prohibition of other parties, from be-
ing a temporary evil, has been erected into a principle.”
be used by the working class to achieve their liberation (they are not created for the mass participation that real socialism requires, quite the reverse in fact). Sadly, Lenin failed to understand this and called the centralised, bureaucratic monstrosity the Bolsheviks created “socialism”.

In contrast, anarchists view the socialist economy as being based on workers’ self-management of production and the workplace turned into an association of equals. Above the individual workplace, federations of factory committees would co-ordinate activities and ensure wide scale co-operation is achieved. Thus anarchists see a new form of economic structure developing, one based on workers’ organisations created in the process of struggle against capitalism. Rather than embrace bourgeois notions of “democracy” (i.e. the election of leaders into positions of power) like Marxists do, anarchists dissolve hierarchical power by promoting workers’ self-management and association. While Marxism ends up as state capitalism pure and simple (as can be seen by the experience of Russia under Lenin and then Stalin) anarchism destroys the fundamental social relation of capitalism — wage labour — via association and workers’ self-management of production.

So while both Leninists and anarchists claim to support factory committees and “workers’ control” we have decidedly different notions of what we mean by this. The Leninists see them as a means of workers’ to supervise (a closer translation of the Russian expression) those who have the real power in the economy and so perpetuate wage slavery with the state replacing the capitalist. Anarchists, in contrast, see them as a means of expressing workers self-organisation, self-management and self-government — as a means of abolishing wage slavery and so capitalism by eliminating hierarchical authority. The difference could not be more striking. Indeed, it would be correct to state that the Leninist tradition is not, in fact, socialist as it identifies socialism as the natural development of capitalism and not as a new form of economy which will social and economic democracy to qualify as genuinely socialist — would have meant raising questions over the nature of the Bolshevik regime between 1918 and 1923 when he was at its commanding heights. Hence clearly incorrect assertions like: “The dictatorship of a class does not mean by a long shot that its entire mass always participates in the management of the state” [Writings 1933–34, p. 124]

In 1936 Trotsky finally appeared to revise his ideas in The Revolution Betrayed, although his revisionism in terms of democracy was combined with revisionism in the events of the Russian Revolution. It would be fair to suggest that McNally’s account of Trotsky’s ideas may be based on this work for in stark contrast to his early arguments he now stated that “[b]ureaucratic autocracy must give place to Soviet democracy. A restoration of the right of criticism, and a genuine freedom of elections, are necessary conditions for the further development of the country. This assumes a revival of freedom of Soviet parties, beginning with the party of Bolsheviks”. [The Revolution Betrayed, p. 273] Given his previous comments on the matter, the reader would be justified in wondering whether, rather than a sincere change of heart, Trotsky’s position was a limited and temporary aberration (Anarchist-turned-Bolshevik Victor Serge, who later broke with Trotsky over this issue, stated that he “had prevailed on him to include in” this book “a declaration of freedom for all parties accepting the Soviet system.” [Memoirs of a Revolutionary, p. 348]).

The evidence suggests the latter, that it was a temporary aberration — particularly given the misleading account of the rise of the Bolshevik dictatorship. Thus we find Trotsky suggesting that it was 1924–26 that saw “the complete suppression of party and Soviet democracy” when, as noted above, he was publicly acknowledging the reality of party dictatorship in 1920. He also forgot the ideas of his own Opposition from 1927 and in 1936 it was no longer was it a case of the necessity of a single party as “a class has many parts’ -\96 some look forward and some back -\96 [and so] one and the same
its numerical growth by the lowering of its political level”. There was “the demand of party democracy” for the dictatorship of the proletariat is “inconceivable without a ruling proletarian party” but nothing on working class freedom or democracy. Perhaps this is unsurprising: “What we mean by the restoration of party democracy is that the real revolutionary, proletarian core of the party win the right to curb the bureaucracy and to really purge the party”. In other words, the first act of the successful Opposition would have been the reduction in numbers of those who had some kind of meaningful vote. Rest assured, though, because the new party regime “means that the party directs the proletarian dictatorship but does not strangle the mass organisations of the toilers” and the secret ballot is “one of the most important means to discipline the entire apparatus and subordinate it to the party”. [Writings 1930–31, p. 241, p. 244, p. 247, pp. 255–6, p. 70 and p. 130] Clearly “socialism’s democratic essence” was, at best, applicable to within the ruling party — or at least what remained of it after the purges.

In 1932, he was arguing that the "same class can rule with the help of different political systems and methods according to circumstances. So the bourgeoisie on its historical road carried through its rule under absolute monarchy, bonapartism, parliamentary republic and fascist dictatorship ... the Soviet regime means the rule of the proletariat, irrespective of how broad the stratum on whose hands the power is immediately concentrated." This was justification for his denial that there was "a small group in the Kremlin who exercise oligarchical powers" ("No, that is not so"). [Writings 1932, p. 217] Trotsky seemed to have forgotten that the bourgeoisie was a minority class which controlled the economic life of a country. Given this, it is not surprising that it could still rule under dictatorships. The same cannot be said of the working class — particularly if, as under Lenin and Trotsky, its democratic control of work and so the economy was replaced by one-man management. Yet Trotsky had no alternative to make such an obviously wrong assertion — to acknowledge the truth, that socialism needs meaningful workers’ develop away from capitalism by means of associated labour and workers’ self-management of production (see section H.3.12).

So anarchists and Leninism may often use similar words and expressions but they aim for different things. Leninists seek party power over a state capitalist economy and favour centralised political and economic structures. Sadly, they seem unaware that this will simply generate a new ruling class, the bureaucracy as centralised structures mean placing power at the top of society. The new layer of rulers this produces need the means to enforce their decisions and to gather and process the information needed to make their decisions, which is why bureaucracy grows. However, by the nature of bureaucracy the servants of the government quickly become the masters due to their control over information, resources and so on. This is why anarchists advocate federalism, to combat the obvious dangers of centralisation. The Bolshevik regime confirmed the wisdom of the libertarian position as the new state soon saw a new bureaucratic system quickly emerge around it. The size and power of the bureaucracy “grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between ‘people’ and ‘officials,’ which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about ‘bureaucratic excesses,’ lack of contact with voters, and new proletarian bureaucrats grew louder and louder.” [Oskar Anweiler, The Soviets, p. 242] So the rise of a state bureaucracy started immediately with the seizure of power by the Bolsheviks, particularly as the state’s functions grew to include economic as well as political ones. Instead of the state starting to “wither away” it grew:

“The old state’s political apparatus was ‘smashed,’ but in its place a new bureaucratic and centralised system emerged with extraordinary rapidity. After the transfer of government to Moscow in March 1918 it continued to expand ... As the functions of the state expanded so
did the bureaucracy, and by August 1918 nearly a third of Moscow’s working population were employed in offices. The great increase in the number of employees ... took place in early to mid-1918 and, thereafter, despite many campaigns to reduce their number, they remained a steady proportion of the falling population” [Richard Sakwa, “The Commune State in Moscow in 1918,” pp. 429–449, Slavic Review, vol. 46, no. 3/4, pp. 437–8]

While Lenin started to be concerned about the growth of the bureaucracy after 1920 and Trotsky argued that the Stalinist regime rested on this caste, neither had the theoretical framework to understand exactly why and how the centralisation and statist structures they favoured produced the bureaucracy they denounced. By not understanding the need for federalism they ensured that the socialistic tendencies being built by the Russian people were crushed under the weight of the bureaucratic machine which centralisation needs to function. That this bureaucracy soon became the ruling class is as unsurprising as Trotsky’s inability to recognise the state capitalist nature of Stalinism (nor his and Lenin’s role in producing such a regime in the first place).

Russia, Lenin once said, “was accustomed to being ruled by 150,000 land owners. Why can 240,000 Bolsheviks not take over the task?” [Op. Cit., vol. 21, p. 336] The idea of socialism as working class self-management and self-government was lost on him — and the possibility real socialism was soon lost to the Russian working class when the Tsar was replaced by the autocratic rule of the Bolshevik Party. “Workers’ power” cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks (and Social Democrats before them).

Thus Malatesta’s comments that the “important, fundamental dis-sension” between anarchists and Marxists is that the latter “are authoritarians, anarchists are libertarians. Marxists “want power ... and once in power wish to impose their programme on the people ...
on China, p. 251] 1927 also saw the publication of the Platform of the Opposition, in which Trotsky still did not question the issue of Party dictatorship. Indeed, it was actually stressed in that document and so while it urged a “consistent development of a workers’ democracy in the party, the trade unions, and the soviets” and to “convert the urban soviets into real institutions of proletarian power” it contradicted itself by, ironically, attacking Stalin for weakening the party’s dictatorship. In its words, the “growing replacement of the party by its own apparatus is promoted by a ‘theory’ of Stalin’s which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” It stressed that “the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry” and “[n]obody who sincerely defends the line of Lenin can entertain the idea of ‘two parties’ or play with the suggestion of a split. Only those who desire to replace Lenin’s course with some other can advocate a split or a movement along the two-party road”. Given this: “We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party.” [The Challenge of the Left Opposition (1926–7), p. 384, p. 395, p. 439 and p. 441]

The Platform was as anti-democratic economically as it was politically, asserting that “nationalisation of the means of production was a decisive step toward the socialist reconstruction of that whole social system which is founded upon the exploitation of man by man” and that the “appropriation of surplus value by a workers’ state is not, of course, exploitation” yet makes no call for workers’ management of production (unsurprisingly as one-man management had been raised by Lenin in early 1918 and became Bolshevik orthodoxy as Trotsky had explained in 1920). The Platform does acknowledge that “we have a workers’ state with bureaucratic distortions” and so its “swollen and privileged administrative apparatus devours a very considerable part of our surplus value” and “the grow-

Anarchists instead maintain, that government cannot be other than harmful, and by its very nature it defends either an existing privileged class or creates a new one.” [Errico Malatesta: His Life and Ideas, p. 142] Therefore anarchists seek to influence people by the power of our ideas within popular organisations. We see such organisations as the means by which working people can take control of their own lives and start to create a free, libertarian socialist society — in other words, as we sketch in section I.2.3, the structures of a free society are created in the struggle against hierarchy today and, moreover, people become able to govern themselves by the very process of that struggle. A self-managed society can only be created by self-management, in short, and any tendencies to undermine popular self-management in favour of hierarchical power of a party will subvert a revolution and create an end drastically at odds with the ideals of those who take part in it.

Similarly, anarchists reject the Leninist idea of highly centralised “vanguard” parties. As the anarchists of Trotwatch explain, such a party leaves much to be desired:

“In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.” [Carry on Recruiting!, p. 41]

As we discuss in section H.5.9, such an organisation can never create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create (see section H.1.6. To build organisations which are statist/capitalistic in structure cannot do other than reproduce the very problems of statism/capitalism into them and so undermine their liberatory potential. As Murray Bookchin put it:
“The ‘glorious party,’ when there is one, almost invariably lags behind the events ... In the beginning ... it tends to have an inhibitory function, not a ‘vanguard’ role. Where it exercises influence, it tends to slow down the flow of events, not ‘co-ordinate’ the revolutionary forced. This is not accidental. The party is structured along hierarchical lines that reflect the very society it professes to oppose ... Its membership is schooled in obedience ... The party’s leadership, in turn, is schooled in habits born of command, authority, manipulation ... Its leaders lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, lacking any direct knowledge of local problems, responds sluggishly and prudently ...

“The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns — as they do in all revolutions. The party is efficient in only one respect — in moulding society in its own hierarchical imagine if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of ‘withering away,’ the state controlled by the ‘glorious party’ preserves the very conditions which ‘necessitate’ the existence of a state — and a party to ‘guard’ it.” [Post-Scarcity Anarchism, pp. 123–6]
and, in the period of the dictatorship, it could not be otherwise”, the Party was “obliged to monopolise the direction of political life” and it was “incontestable that factions [within the Party] are a scourge in the present situation”. Of course, there was talk of “workers’ democracy” but the “New Course Resolution” was clear that that term in fact meant only internal party democracy: “Workers’ democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions”. [The Challenge of the Left Opposition (1923–25), p. 87, p. 89 and p. 460]

This applied to the banning of factions within the Communist party, with Trotsky keen to stress at the 13th Party Congress in 1924 that “party democracy in no way implies freedom for factional groupings which are extremely dangerous for the ruling party, since they threaten to split or divide the government and the state apparatus as a whole. I believe this is undisputed and indisputable”. He linked his position to the 10th Party Congress “where Valdimir Ilyich [Lenin] personally” made the same points and re-iterated his position: “I have never recognised freedom for groupings inside the party, nor do I now recognise it”. [Op. Cit., p. 170 and p. 171] He declared his faith in the Party:

“Comrades, none of us wants to be or can be right against the party. In the last analysis the party is always right, because the party is the only historical instrument that the working class possesses for the solution of its fundamental tasks ... I know that no one can be right against the party. It is only possible to be right only with the party and through it because history has not created any other way to determine the correct position ... the party, in the last analysis, is always right”. [Op. Cit., p. 179]

He did acknowledge that “even the party itself can make occasional mistakes” but argued that the duty of a party member was...
chism truly represents “socialism from below” (as we will see next section, we have been talking about “from below” since the 1840s while Marxist use of the terminology dates from much later). This is no coincidence. Moreover, as shown in section H.6.2, these differences are important as Bolshevik ideology, once its advocates held power at the top of a centralises state structure and started to apply it, impacted negatively on the Russian revolution and ensured its failure (i.e., it was not creating socialism even if a self-proclaimed “communist” party remained in power at the end of the civil war in 1920). The issue is clear — either you aim for a socialist society and use socialist methods to get there or you do not. Those who do seek real socialism (as opposed to warmed up state capitalism) would be advised to recognise this and study closely what Leninists actually mean by the slogans they use rather than taking them at face value.

14. Why is McNally’s use of the term “socialism from below” dishonest?

McNally argues that Marxism can be considered as “socialism from below.” Indeed, that is the name of his pamphlet. However, his use of the term is somewhat ironic for two reasons. First, because the expression “from below” can be found in the writings of Bakunin and Proudhon, not Marx. Second, because Lenin explicitly attacked the idea of “from below” as an anarchist principle.

In terms of the first point, the expression “from below” was constantly on the lips of Bakunin and Proudhon. Indeed, it was a defining part of their ideas. Thus we find Proudhon attacking the state socialism of Louis Blanc in 1846 because he “is never tired of appealing to authority, and socialism loudly declares itself anarchistic; M. Blanc places power above society, and socialism tends to subordinate it to society; M. Blanc makes social life descend from above, and socialism maintains that it springs up and grows from below” [Property is Theft!, p. 205] He re-iterated this during the 1848 revolution:

So even limited industrial democracy was considered too much by Trotsky in 1921. In late March 1921, he re-iterated this position in relation to the crushing of the Kronstadt revolt for soviet democracy by asserting that the “economic, political, and national independence of Russia is possible only under the dictatorship of the soviets. The backbone of this dictatorship is the Communist Party. There is no other party that can play this part, nor can there be.” [Lenin and Trotsky, Kronstadt, p. 73]

Trotsky repeated this call again in 1922 when he stated plainly that “we maintain the dictatorship of our party!” [The First Five Years of the Communist International, vol. 2, p. 255] Writing in the following year, he argued that “[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work.” He stressed that “[o]ur party is the ruling party ... To allow any changes whatever in this field, to allow the idea of a partial ... curtailment of the leading role of our party would mean to bring into question all the achievements of the revolution and its future.” He indicated the fate of those who did question this: “Whoever makes an attempt on the party’s leading role will, I hope, be unanimously dumped by all of us on the other side of the barricade.” [Leon Trotsky Speaks, p. 158 and p. 160] Which, of course, was exactly what the Bolsheviks had done to other socialists (anarchists and others) and working class militants and strikers after they had taken power (see section H.6 for details).

At this point, it will be argued that this was before the rise of Stalinism and his activities in the Left Opposition. As McNally suggests, many argue that these developments saw Trotsky finally rejecting the idea of party dictatorship and re-embracing what McNally terms the “democratic essence” of Leninism. Unfortunately, yet again, this argument suffers from the flaw that it is false.

Let us start with the so-called “New Course” of December 1923, in which Trotsky stated that “[w]e are the only party in the country
This dismissal of working-class democracy was party orthodoxy, as can be seen from the awkward fact that Trotsky continued to argue for party dictatorship after the end of the civil war in November 1920. Thus we discover him in early in 1921 arguing again for Party dictatorship at the Communist Party’s Tenth Party Congress. His comments made there against the Workers’ Opposition within the Communist Party make his position clear:

“The Workers’ Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers’ right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers’ democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers’ democracy.” [quoted by Samuel Farber, Before Stalinism, p. 209]

It should be noted that Trotsky was being too generous to the Workers’ Opposition, for “while demanding more freedom of initiative for the workers” in economic matters, “it was quite content to leave untouched the state of affairs in which a few hundred thousand imposed their will on many millions” and it “had no wish to disturb the communist party’s monopoly of political power.” [Leonard Schapiro, The Origin of the Communist Autocracy, p. 294]
Thus “experience testifies and philosophy demonstrates … that any revolution, to be effective, must be spontaneous and emanate, not from the heads of the authorities but from the bowels of the people: that government is reactionary rather than revolutionary: that it could not have any expertise in revolutions, given that society, to which that secret is alone revealed, does not show itself through legislative decree but rather through the spontaneity of its manifestations: that, ultimately, the only connection between government and labour is that labour, in organising itself, has the abrogation of government as its mission”. [No Gods, No Masters, vol. 1., p. 52]

“The Revolution from above,” Proudhon stressed, “is the intervention of power in everything; it is the absolutist initiative of the State, the pure governmentalism of … [state-socialist] Louis Blanc. The Revolution from above is the negation of collective activity, of popular spontaneity … What serious and lasting Revolution was not made from below, by the people? How did the Revolution of 1789 come about? How was that of February made? The Revolution from above has never been other than the oppression of the wills of those below.” [quoted by George Woodcock, Pierre-Joseph Proudhon, p. 143]

Proudhon, then, placed his hopes for introducing socialism in alternative institutions created by working class people themselves and “insisted that the revolution could only come from below, through the action of the workers themselves.” [K. Steven Vincent, Pierre-Joseph Proudhon and the Rise of French Republican Socialism, p. 157] Bakunin did likewise, seeing the labour movement as the means of ensuring that an anarchist revolution would come “from below.” As he put it, “liberty can be created only by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward.” [Statism and Anarchy, p. 179]

Elsewhere he wrote that “future social organisation must be made solely from the bottom upwards, by the free association or federation...
when it has taken power into its own hands... I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.”

In this, as with party dictatorship, he was simply repeating Bolshevik orthodoxy — Lenin had been arguing for state-appointed one-man management (armed with “dictatorial” authority) since the spring of 1918. Ignoring all the euphemisms for party dictatorship ("the collective will of the workers") and obvious questions (like, if this were the case, how Trotsky could argue that it was the proletariat which had “taken power into its own hands”), the fact is that he was simply wrong. It does matter if workplaces are run by their workers or not for if they do not then someone else does. Replacing capitalists with state bureaucrats just changes the face of the boss — as anarchists have been arguing since Proudhon. Trotsky did not deny how authoritarian this regime was:

“Both economic and political compulsion are only forms of the expression of the dictatorship of the working class in two closely connected regions... the road to Socialism lies through a period of the highest possible intensification of the principle of the State... Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction... No organisation except the army has ever controlled man with such severe compulsion as does the State organisation of the working class in the most difficult period of transition. It is just for this reason that

of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.”

[Michael Bakunin: Selected Writings, p. 206] As he wrote in 1868:

“I hate Communism because it is the negation of liberty and because for me humanity is unthinkable without liberty. I am not a Communist, because Communism concentrates and swallows up in itself for the benefit of the State all the forces of society, because it inevitably leads to the concentration of property in the hands of the State... I want to see society and collective or social property organised from below upwards, by way of free associations, not from above downwards, by means of any kind of authority whatsoever... That is the sense in which I am a Collectivist and not a Communist.” [quoted by K.J. Kenafick, Michael Bakunin and Karl Marx, pp. 67–8]

Anarchists, argued Bakunin, opposed the state because “all State rule, all governments being by their very nature placed outside the people, must necessarily seek to subject it to customs and purposes entirely foreign to it. We therefore declare ourselves to be foes... of all State organisations as such, and believe that the people can be happy and free, when, organised from below upwards by means of its own autonomous and completely free associations, without the supervision of any guardians, it will create its own life.” [Marxism, Freedom and the State, p. 63] This applied to the so-called “workers’ state” because “every state, even the pseudo-People’s State concocted by Mr. Marx, is in essence only a machine ruling the masses from above, through a privileged minority of conceited intellectuals who imagine that they know what the people need and want better than do the people themselves.” [Bakunin on Anarchism, p. 338] The revolution would see “an end to all masters and to domination of every kind, and the free construction of popular life in accordance with
popular needs, not from above downward, as in the state, but from below upward, by the people themselves, dispensing with all governments and parliaments — a voluntary alliance of agricultural and factory worker associations, communes, provinces, and nations; and, finally, universal human brotherhood triumphing on the ruins of all the states.” [Statism and Anarchy, p. 33]

No such idea is present in Marx. Rather, he saw a revolution as consisting of the election of a socialist party into government. At its best, for example when he was reporting on the Paris Commune, this vision had libertarian (“from below”) aspects — perhaps unsurprisingly, given its obviously Proudhon-inspired federalism (which Marx could not bring himself to mention). However, at its worse this was not only reformist in the sense of utilising bourgeois elections (see section H.3.10) but also “from above” in nature. In 1850, for example, he argued that the workers must “not only strive for a single and indivisible German republic, but also within this republic for the most determined centralisation of power in the hands of the state authority.” This was because “the path of revolutionary activity” can “proceed only from the centre.” This meant that the workers must be opposed to a “federative republic” and “must not allow themselves to be misguided by the democratic talk of freedom for the communities, of self-government, etc.” This centralisation of power was essential to overcome local autonomy, which would allow “every village, every town and every province” to put “a new obstacle in the path” of the revolution due to “local and provincial obstinacy.” Decades later, Marx dismissed Bakunin’s vision of “the free organisation of the worker masses from bottom to top” as “nonsense.” [Marx-Engels Reader, p. 509 and p. 547]

As we discuss in section H.3.2, the idea of “socialism from below” is a distinctly anarchist notion, one found in the works of Proudhon and Bakunin, not Marx. It is ironic, given his distorted account of Proudhon and Bakunin, that McNally uses their words to describe Marxism!

He argued against those who suggested that the dictatorship should be carried out by the whole class: “It is not easy to understand what actually they imagine when they say this. The dictatorship of the proletariat, in its very essence, signifies the immediate supremacy of the revolutionary vanguard, which relies upon the heavy masses, and, where necessary, obliges the backward tail to dress by the head.” [Op. Cit., p. 110] This rejection of democracy also applied to workplace democracy:

“our Party Congress ... expressed itself in favour of the principle of one-man management in the administration of industry ... It would be the greatest possible mistake ... to consider this decision as a blow to the independence of the working class ... It would consequently be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers, and not at all in the form in which individual economic enterprises are administered ... we took our stand, and continue to do so on purely Marxist views of the revolutionary problems and creative duties of the proletariat.
“In the hands of the party is concentrated the general control ... it has the final word in all fundamental questions ... the last word belongs to the Central Committee of the party ... Such a regime is possible only in the presence of the unquestioned authority of the party, and the faultlessness of its discipline ...

“The exclusive role of the Communist Party under the conditions of a victorious proletarian revolution is quite comprehensible. The question is of the dictatorship of a class. In the composition of that class there enter various elements, heterogeneous moods, different levels of development. Yet the dictatorship pre-supposes unity of will, unity of direction, unity of action. By what other path then can it be attained? The revolutionary supremacy of the proletariat pre-supposes within the proletariat itself the political supremacy of a party, with a clear programme of action and a faultless internal discipline.

“The policy of coalitions contradicts internally the regime of the revolutionary dictatorship. We have in view ... a coalition of Communists with other 'Socialist' organisations, representing different stages of backwardness and prejudice of the labouring masses.

“[ ...]

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the

Secondly, and far more seriously for McNally, Lenin repeatedly dismissed the idea of “from below” as not Marxist. In 1904, during the debate over the party split into Bolsheviks and Mensheviks, Lenin stated that the argument "bureaucracy versus democracy is in fact centralism versus autonomy; it is the organisational principle of revolutionary Social-Democracy as opposed to the organisational principle of opportunist Social-Democracy. The latter strives to proceed from the bottom upward, and, therefore, wherever possible ... upholds autonomism and 'democracy,' carried (by the overzealous) to the point of anarchism. The former strives to proceed from the top downward.” [Collected Works, vol. 7, pp. 396–7] Lenin repeated this argument during the near revolution of 1905, mocking the Mensheviks for only wanting “pressure from below” which was “pressure by the citizens on the revolutionary government.” Instead, he argued for “pressure ... from above as well as from below,” where “pressure from above” was “pressure by the revolutionary government on the citizens.”

How you can have “socialism from below” when your “organisational principle” is “from the top downward” and “renunciation of pressure also from above is anarchism.” [Op. Cit., vol. 8, p. 474, p. 478, p. 480 and p. 481] He returned to this theme, explicitly stating that it was an “anarchist stand” to be for “action only from below, not ‘from below and from above’”. [Op. Cit., vol. 9, p. 77]
of the state) and “pressure from below” (the people) it would be the former which would tend to win? And that this was the case in the Russian Revolution, with the Bolshevik state crushing all forms of working class protest? As we discuss in section H.6, the “the utilisation of the revolutionary governmental power” simply produced a “dictatorship over the proletariat” as Bakunin (see section H.1.1) and other anarchists had long predicted.

In other words, Marxism is based on idea that the government pressuring the citizens is acceptable. As we discuss in the next section, Trotsky recognised this and openly proclaimed the need for party dictatorship to resist the pressures from below (dismissed as “wavering” and “vacillation” by the backward masses). As we discuss in section H.5, the vanguardism of Leninism privileges the party and its leadership and lays the foundation for “socialism from below.” A given ideological premise will lead to certain conclusions in practice — conclusions Lenin and Trotsky were not shy in explicitly stating.

Little wonder McNally fails to mention Lenin’s support for revolutionary action “from above” for in practice Leninism substituted the rule (and then dictatorship) of the party for that of the working class as a whole. Lenin always stressed that the “Bolsheviks must assume power” and they “can and must take state power into their own hands.” He raised the question of “will the Bolsheviks dare take over full state power alone?” and answered it: “I have already had occasion ... to answer this question in the affirmative.” Moreover, “a political party ... would have no right to exist, would be unworthy of the name of party ... if it refused to take power when opportunity offers.” He equated rule by the party with rule by the class, noting that “proletarian revolutionary power” and “Bolshevik power” are “now one the same thing ” and indicated that once in power the Bolsheviks “shall be fully and unreservedly in favour of a strong state power and of centralism.” [Op. Cit., vol. 26, p. 19, p. 90, p. 179 and p. 116] In this confusion, we must note, Lenin followed Engels who argued that “each political party sets out to establish its rule in the

15. Did Trotsky keep alive Leninism’s “democratic essence”?

McNally argues that “[d]uring the terrible decades of the 1920s and 1940s ... the lone voice of Leon Trotsky kept alive some of the basic elements of socialism from below” and suggests it “was Trotsky’s great virtue to insist against all odds that socialism was rooted in the struggle for human freedom.” By the mid-1920s “the programme of the Left Opposition” which Trotsky lead had as one of its “two central planks” that “democracy had to be re-established in the Bolshevik party and in the mass organisations such as the trade unions and the soviets.” In short:

“Throughout the 1920s and until his death at the hands of Stalinist agent in 1940, Trotsky fought desperately to build a revolutionary socialist movement based on the principles of Marx and Lenin.”

There is one slight flaw with this argument, namely that it is not actually true. All through the 1920s and 1930s Trotsky, rather than argue for “socialism’s democratic essence”, continually argued for party dictatorship. That McNally asserts the exact opposite suggests that the ideas of anarchism are not the only ones he is ignorant of. To prove our case, we simply need to provide a chronological account of Trotsky’s actual ideas.

We shall begin in early 1920 when he argued that the “working class cannot be left wandering round all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers” and that “[d]eserters from labour ought to be formed into punitive battalions or put into concentration camps”. [quoted by Maurice Brinton, “The Bolsheviks and Workers’ Control”, For Workers’ Power, p. 61] Is “human freedom” (to use McNally’s words) compatible with Trotsky’s suggestions? This was no isolated comment and in July of that year we discover him arguing that:
be exercised by the few) combined with bad politics (the confusion of party power with people power, unthinking prejudices in favour of centralism, ignoring the need for only “from below”, etc.). As the Russian anarchist Sergven argued in 1918 while the Bolshevik regime was building state capitalism:

“"The proletariat is being gradually enserfed by the state. The people are being transformed into servants over whom there has arisen a new class of administrators — a new class born mainly form the womb of the so-called intelligentsia ... We do not mean to say ... that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from centralisation. It cannot be otherwise.”” [The Anarchists in the Russian Revolution, pp. 123–4]

Thus McNally’s use of the term “from below” is dishonest on two levels. Firstly, it is of anarchist origin and, secondly, it was repudiated by Lenin himself (who urged revolution “from below” and “from above”, thus laying the groundwork for a new class system based around the Party). It goes without saying that either McNally is ignorant of his subject (and if so, why write a pamphlet on it?) or he knew these facts and decided to suppress them. Either way it shows the bankruptcy of Marxism — it uses libertarian rhetoric for non-libertarian ends while distorting the real source of those ideas. That Lenin dismissed this rhetoric and the ideas behind them as “anarchist” says it all. McNally’s (and the SWP/ISO’s) use of this rhetoric and imagery is therefore deeply dishonest.

state, so the German Social-Democratic Workers’ Party is striving to establish its rule, the rule of the working class.” [Collected Works, vol. 23, p. 372] Such confusion is deadly to a true “revolution from below” and justifies the use of repression against the working class based on the advanced ideas of the vanguard party.

McNally, of course, stresses the impact of the civil war on the degeneration of Bolshevism but comments like these were not caused by circumstantial factors as can be seen from Lenin’s work Left-Wing Communism. In this 1920 tract, written for the Second Congress of the Communist International, Lenin lambasted those Marxists who argued for direct working class power against the idea of party rule (i.e. the various council communists around Europe) and argued that “the Communists’ correct understanding of his tasks” lies in “correctly gauging the conditions and the moment when the vanguard of the proletariat can successfully assume power, when it will be able — during and after the seizure of power — to win adequate support from sufficiently broad strata of the working class and of the non-proletarian working masses, and when it is able thereafter to maintain, consolidate, and extend its rule by educating, training and attracting ever broader masses of the working people.” Note, the vanguard (the party) seizes power, not the masses and he stressed that the “mer presentation of the question — ‘dictatorship of the party or dictatorship of the class: dictatorship (party) of the leaders or dictatorship (party) of the masses?’ — testifies to most incredible and hopelessly muddled thinking” and “[t]o go so far ... as to contrast, in general, the dictatorship of the masses with a dictatorship of the leaders is ridiculously absurd, and stupid.” [The Lenin Anthology, p. 575, p. 567 and p. 568] He then explained the nature of Bolshevik rule:

“In Russia today, the connection between leaders, party, class and masses ... are concretely as follows: the dictatorship is exercised by the proletariat organised in the Soviets and is guided by the Communist Party ... The
Party, which holds annual congresses ..., is directed by a Central Committee of nineteen elected at the congress, while the current work in Moscow has to be carried on by [two] still smaller bodies ... which are elected at the plenary sessions of the Central Committee, five members of the Central Committee to each bureau. This, it would appear, is a full-fledged 'oligarchy.' No important political or organisational question is decided by any state institution in our republic [sic!] without the guidance of the Party’s Central Committee.

“In its work, the Party relies directly on the trade unions, which ... have a membership of over four million and are formally non-Party. Actually, all the directing bodies of the vast majority of the unions ... are made up of Communists, and carry out all of the directives of the Party. Thus ... we have a formally non-communist ... very powerful proletarian apparatus, by means of which the Party is closely linked up with the class and the masses, and by means of which, under the leadership of the Party, the class dictatorship of the class is exercised.” [Op. Cit., pp. 571–2]

This was “the general mechanism of the proletarian state power viewed 'from above,' from the standpoint of the practical realisation of the dictatorship” and so “all this talk about 'from above' or 'from below,' about 'the dictatorship of leaders' or 'the dictatorship of the masses,'” is “ridiculous and childish nonsense.” [Op. Cit., p. 573]

The links with his comments from 1904 and 1905 are clear, as clear as his explanation of the lessons he thought that the world communist movement had to learn from the Bolshevik revolution. The notion that Leninism stands for “socialism from below” in untenable.

Lenin, of course, did not bother to view “proletarian” state power “from below,” from the viewpoint of the proletariat. If he had, perhaps he would have recounted the numerous strikes and protests broken by the Cheka under martial law, the gerrymandering and disbanding of soviets, the imposition of “one-man management” onto the workers in production, the turning of the unions into agents of the state/party and the elimination of working class freedom by party power (see section 8). All of which suggests that there are fundamental differences, at least for the masses, between “from above” and “from below.”

Anarchists, in contrast, recognise that parties and classes are different and only self-management in popular organisations from below upwards can ensure that a social revolution remains in the hands of all and not a source of power for the few. Thus “All Power to the Soviets,” for anarchists, means exactly that — not a euphemism for “All Power to the Party.” As Russian anarchist Voline argued, “for, the anarchists [in 1917] declared, if 'power' really should belong to the soviets, it could not belong to the Bolshevik Party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.” Marxist confusion of the difference between working class power and party power, combined with the nature of centralised power and an ideology which privileges the party over the working class (see section 11) cannot help but lead to the rise of a ruling bureaucracy, pursuing “from above” their own power and privileges. “All political power inevitably creates a privileged situation for the men who exercise it,” argued Voline. “Thus is violates, from the beginning, the equalitarian principle and strikes at the heart of the Social Revolution” and “becomes the source of other privileges ... power is compelled to create a bureaucratic and coercive apparatus indispensible to all authority ... Thus it forms a new privileged caste, at first politically and later economically.” [The Unknown Revolution, p. 213 and p. 249]

The concept of revolution “from above” is one that inevitably leads to a new form of class rule — rule by bureaucracy. This is not because the Bolsheviks were “bad people” — rather it is to do with the nature of centralised power (which by its very nature can only
state the obvious, appointment from above, the dismantling of
self-government, and so on are “in accordance with the principles”
of Trotskyism. These comments were not made in the heat of the
civil war, but afterward during peacetime. Notice Trotsky admits
that a “social revolution” had swept through the Tsarist army. His
actions, he also admits, reversed that revolution and replaced its
organs of “self-government” with ones identical to the old regime.
When that happens it is usually called by its true name, namely
counter-revolution.

For a Trotskyist, therefore, to present themselves as a supporter
of self-managed militias is the height of hypocrisy. The Stalinists
repeated the same arguments used by Trotsky and acted in ex-
actly the same way in their campaign against the CNT and POUM
militias. Certain acts have certain ramifications, no matter who
does them or under what government. In other words, abolishing
democracy in the army will generate autocratic tendencies which
will undermine socialistic ones no matter who does it. The same
means cannot be used to serve different ends as there is an in-
trinsic relationship between the instruments used and the results
obtained — that is why the bourgeoisie do not encourage democ-
racy in the army or the workplace! Just as the capitalist work-
place is organised to produce proletarians and capital along with
cloth and steel, the capitalist army is organised to protect and rein-
force minority power. The army and the capitalist workplace are
not simply means or neutral instruments. Rather they are social
structures which generate, reinforce and protect specific social
relations. This is what the Russian masses instinctively realised
and conducted a social-revolution in both the army and workplace
to transform these structures into ones which would enhance
rather than crush freedom and working class autonomy. The Bol-
sheviks reversed these movements in favour of structures which re-
produced capitalist social relationships and justified it in terms
of “socialism.” Unfortunately, capitalist means and organisations
would only generate capitalist ends.

by the irrational belief that it was possible to will profound social
change. The actions of the Spanish anarchist movement, therefore,
can be explained in terms of millenarian behaviour — the belief
that it was able to jump start to utopia via an act of will.

The Spanish farm and industrial workers, it is argued, were un-
able to grasp the complexities of the economic and political struc-
tures that dominated their lives and so were attracted to anarchism.
According to Hobsbawm, anarchism is marked by “theoretical primit-
itivism” and a primitive understanding of revolution and this ex-
plained why anarchism was popular with Spanish workers, par-
ticularly farm workers. According to Hobsbawm, anarchism told
the workers that by spontaneously rising up together they could
overthrow the forces of repression and create the new millennium.

Obviously, we cannot refute Hobsbawm’s claims of anarchism’s
“theoretical primitivism” in this appendix, the reader is invited to
consult the main FAQ. Moreover, we cannot stress more that Hob-
sbawm’s assertion that anarchists believe in spontaneous, overnight
uprisings is false. Rather, we see revolution as a process in which
day-to-day struggle and organisation play a key role — it is not
seen as occurring independently of the on-going class struggle or
social evolution. While we discuss in depth the nature of an anar-
chist social revolution in section J.7, we can present a few quotes
by Bakunin to refute Hobsbawm’s claim:

“Revolutions are not improvised. They are not made at
will by individuals. They come about through the force
of circumstances and are independent of any deliberate
ill or conspiracy.” [quoted by Brian Morris, Bakunin:
The Philosophy of Freedom, p. 139]

“It is impossible to rouse people by artificial means. Pop-
ular revolutions are born by the actual force of events
... It is impossible to bring about such a revolution ar-
tificially. It is not even possible to speed it up at all
significantly ... There are some periods in history when
revolutions are quite simply impossible; there are other periods when they are inevitable.” [Michael Bakunin: Selected Writings, p. 183]

As Brian Morris correctly argues, “Bakunin denies that a social revolution could be made by the will of individuals, independent of social and economic circumstances. He was much less a voluntarist than his Marxist critics make out … he was … aware that the social revolution would be a long process that may take many years for its realisation.” [Bakunin: The Philosophy of Freedom, pp. 138–9] To aid the process of social revolution, Bakunin supported the need for “pioneering groups or associations of advanced workers who were willing to initiate this great movement of self-emancipation.” However, more is needed — namely popular working class organisations — “what is the organisation of the masses? … It is the organisation by professions and trades … The organisation of the trade sections … bear in themselves the living seed of the new society which is to replace the old world. They are creating not only the ideas but also the facts of the future itself.” [Bakunin on Anarchism, p. 252 and p. 255]

Therefore, Bakunin saw revolution as a process which starts with day-to-day struggle and creation of labour unions to organise that struggle. As he put it himself:

“What policy should the International [Workers’ Association] follow during the somewhat extended time period that separates us from this terrible social revolution … the International will give labour unrest in all countries an essentially economic character, with the aim of reducing working hours and increasing salary, by means of the association of the working masses … It will [also] propagandise its principles … Lastly, the International will expand and organise across frontiers of all countries, so that when the revolution — brought

If a “circumstantial” factor exists in this rationale, it is the claim that the soldiers were “politically ill-educated.” However, every mass movement or revolution starts with those involved being “politically ill-educated.” The very process of struggle educates them politically. A key part of this radicalisation is practising self-management and self-organisation — in other words, in participating in the decision making process of the struggle, by discussing ideas and actions, by hearing other viewpoints, electing and mandating delegates. To remove this ensures that those involved remain “politically ill-educated” and, ultimately, incapable of self-government. It also contains the rationale for continuing party dictatorship:

“If some people … have assumed the right to violate everybody’s freedom on the pretext of preparing the triumph of freedom, they will always find that the people are not yet sufficiently mature, that the dangers of reaction are ever-present, that the education of the people has not yet been completed. And with these excuses they will seek to perpetuate their own power.” [Errico Malatesta, Errico Malatesta: His Life and Ideas, p. 52]

As can be seen from their arguments for party dictatorship, this was a conclusion which Lenin, Trotsky and other leading Bolsheviks did draw (see, for example, section 12).

In addition, Trotsky’s rationale refutes any claim that Bolshevism is somehow “fundamentally” democratic. The ramifications of it were felt everywhere in the soviet system as the Bolsheviks ignored the “wrong” democratic decisions made by the working masses and replaced their democratic organisations with appointees from above. Indeed, Trotsky admits that the “Red Army was built from above, in accordance with the principles of the dictatorship of the working class.” [“The Path of the Red Army”, How the Revolution Armed, vol. I, p. 8] Which means, to
“There was and could be no question of controlling troops by means of elected committees and commanders who were subordinate to these committees and might be replaced at any moment ... [The old army] had carried out a social revolution within itself, casting aside the commanders from the landlord and bourgeois classes and establishing organs of revolutionary self-government, in the shape of the Soviets of Soldiers’ Deputies. These organisational and political measures were correct and necessary from the standpoint of breaking up the old army. But a new army capable of fighting could certainly not grow directly out of them ... The attempt made to apply our old organisational methods to the building of a Red Army threatened to undermine it from the very outset ... the system of election could in no way secure competent, suitable and authoritative commanders for the revolutionary army. The Red Army was built from above, in accordance with the principles of the dictatorship of the working class. Commanders were selected and tested by the organs of the Soviet power and the Communist Party. Election of commanders by the units themselves — which were politically ill-educated, being composed of recently mobilised young peasants — would inevitably have been transformed into a game of chance, and would often, in fact, have created favourable circumstances for the machinations of various intriguers and adventurers. Similarly, the revolutionary army, as an army for action and not as an arena of propaganda, was incompatible with a regime of elected committees, which in fact could not but destroy all centralised control.” [“The Path of the Red Army”, How the Revolution Armed, vol. I, pp. 7–8]

about by the force of circumstances — breaks out, the International will be a real force and will know what it has to do. Then it will be able to take the revolution into its own hands and give it a direction that will benefit the people: an earnest international organisation of workers’ associations from all countries, capable of replacing this departing world of States and bourgeoisie.” [The Basic Bakunin, pp. 109–10]

However, while quoting Bakunin refutes part of his thesis, Hobsbawm does base his case on some actual events of Spanish Anarchist history. Therefore we need to look at these cases and show how he gets these wrong. Without an empirical basis, his case obviously falls even without quotes by Bakunin. Luckily the important examples he uses have been analysed by people without the ideological blinkers inherent in Leninism.

While we shall concentrate on just two cases — Casa Viejas in 1933 and the Jerez rising of 1892 — a few general points should be mentioned. As Jerome Mintz notes, Hobsbawm’s “account is based primarily on a preconceived evolutionary model of political development rather than on data gathered in field research. The model scales labour movements in accord with their progress toward mass parties and central authority. In short, he explains how anarchosyndicalists were presumed to act rather than what actually took place, and the uprising at Casa Viejas was used to prove an already established point of view. Unfortunately, his evolutionary model misled him on virtually every point.” [Op. Cit., p. 271] We should also note his “model” is essentially Marxist ideology – namely, Marx’s assertion that his aim for mass political parties expressed the interests of the working class and all other visions were the products of sectarians. Mintz also points out that Hobsbawm does not live up to his own model:

“While Hobsbawm’s theoretical model is evolutionary, in his own treatment anarchism is often regarded as un-
changing from one decade to the other. In his text, attitudes and beliefs of 1903–5, 1918–20, 1933, and 1936 are lumped together or considered interchangeable. Of course during these decades the anarchosyndicalists had developed their programs and the individuals involved had become more experienced.” [Op. Cit., p. 271f]

Hobsbawm believed that Casas Viejas was the classic “anarchist” uprising — “utopian, millenarian, apocalyptic, as all witnesses agree it to have been.” [Primitive Rebels, p. 90] As Mintz states, “the facts prove otherwise. Casas Viejas rose not in a frenzy of blind millenarianism but in response to a call for a nation-wide revolutionary strike. The insurrection of January 1933 was hatched by faistas [members of the FAI] in Barcelona and was to be fought primarily there and in other urban centres. The uprisings in the countryside would be diversionary and designed to keep the civil guard from shifting reinforcements. The faista plot was then fed by intensive newspaper propaganda, by travelling orators, and by actions undertaken by the [CNT] defence committees. Representatives of the defence committees from Casas Viejas and Medina had received instructions at a regional meeting held days before. On January 11, the anarchosyndicalists of Casas Viejas believed that they were joining their companeros who had already been at the barricades since January 8.” [Op. Cit., p. 272]

Hobsbawm argued that the uprising occurred in accordance with an established economic pattern:

“Economic conditions naturally determined the timing and periodicity of the revolutionary outbreaks — for instance, social movements tended to reach a peak intensity during the worse months of the year — January to March, when farm labourers have least work (the march on Jerez in 1892 and the rising of Casas Viejas in 1933 both occurred early in January), March–July, when the

feat of proletarian control of that organisation. The question Morrow raises of who would control the army, the working class or the bourgeois failed to realise the real question — who was to control the army, the working class, the bourgeois or the state bureaucracy. Trotsky ensured that it would be the latter — indeed, the repression of strikes and other working class protest by the Red Army and Cheka under Lenin and Trotsky shows that this was the case (see section H.6.3).

Hence Morrow’s own arguments indicate the anti-revolutionary nature of Trotskyism — unless, of course, we decide to look only at what people say and not what they do.

Of course some Trotskyists know what Trotsky actually did when he held power and try and present apologetics for his obvious destruction of soldiers’ democracy. One argues that the “Red Army, more than any other institution of the civil war years, embodied the contradiction between the political consciousness and circumstantial coercion. On the one hand the creation of a Red Army was a retreat: it was a conscripted not a voluntary army; officers were appointed not elected ... But the Red Army was also filled with a magnificent socialist consciousness.” [John Rees, “In Defence of October”, International Socialism, no. 52, pp. 3–82, p. 46]

This argument is somewhat weak for two reasons.

Firstly, the regressive features of the Red Army appeared before the start of the Civil War. It was a political decision to organise in this way, a decision not justified at the time in terms of circumstantial necessity. Indeed, far from it (like most of the other Bolshevik policies of the period). Rather it was justified under the rather dubious rationale that workers did not need to fear the actions of a workers’ state. Circumstances were not mentioned at all nor was the move considered as a retreat or as a defeat. It was not even considered as a matter of principle.

This perspective was reiterated by Trotsky after the end of the Civil War. Writing in 1922, he argued that:
ranks the Army is recruited”). [“Work, Discipline, Order”, How the Revolution Armed, vol. I, pp. 46–7] Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the appointment of members of the commanding staff by the organs of the Soviet Power.” [“Work, Discipline, Order,” Op. Cit., vol. 1, p. 47]

Of course, most workers’ are well aware that the administration of a trade union usually works against them during periods of struggle. Indeed, so are most Trotskyists as they often denounce the betrayals by that administration. Thus Trotsky’s own analogy indicates the fallacy of his argument. Elected officials do not necessarily reflect the interests of those who elected them. That is why anarchists have always supported delegation rather than representation combined with decentralisation, strict accountability and the power of instant recall. In a highly centralised system (as created by the Bolsheviks and as exists in most social democratic trade unions) the ability to recall an administration is difficult as it requires the agreement of all the people. Thus there are quite a few grounds for fearing the appointment of commanders by the government — no matter which party makes it up.

If, as Morrow argues, the “simple, concrete slogan of elected soldier’s committees was the only road for securing proletariat control of the army” then Trotsky’s regime in the Red Army ensured the de-

proceeding harvest has been exhausted and times are lean.” [Op. Cit., p. 79]

Mintz states the obvious:

“In reality, most agricultural strikes took place in May and June, the period of the harvest and the only time of the year when the campesinos had any leverage against the landowners. The uprising at Casas Viejas occurred in January precisely because it was not an agricultural strike. The timing of the insurrection, hurriedly called to coincide with a planned railway strike that would make it difficult for the government to shift its forces, was determined by strategic rather than economic considerations.” [Op. Cit., p. 273]

As for the revolt itself, Hobsbawm asserts that:

“Secure from the outside world, [the men] put up the red and black flag of anarchy and set about dividing the land. They made no attempt to spread the movement or kill anyone.” [Op. Cit., p. 274]

Which, as Mintz clearly shows, was nonsense:

“As is already evident, rather than securing themselves from the rest of world, the uprising at Casas Viejas was a pathetic attempt to join in an ill-fated national insurrection. With regard to his second point, there was neither the time nor the opportunity to ‘set about dividing the land.’ The men were scattered in various locations guarding roads and paths leading to the town. There were no meetings or discussions during this brief period of control. Only a few hours separated the shooting at the barracks and the entrance of the small [government] rescue
force from Alcala. Contrary to Hobsbawm’s description of peaceful enterprise, at the outset the anarchists surrounding the barracks had fired on the civil guards, mortally wounding two men.” [Op. Cit., p. 274]

As can be seen, Hobsbawm was totally wrong about the uprising itself and so it cannot be used as evidence for his thesis. On other, less key issues, he was equally wrong. Mintz gives an excellent summary:

“Since kinship is a key feature in ‘primitive’ societies, according to Hobsbawm, it was a major factor in the leadership of the sindicato [union] in Casas Viejas. There is no evidence that kinship had anything to do with leadership in the anarchist movement in Casa Viejas or anywhere else. The reverse would be closer to the truth. Since the anarchists expressed belief in universal brotherhood, kinship ties were often undermined. In times of strike or in carrying out any decision of the collective membership, obreros conscientes sometimes had to act counter to their kinship demands in order to keep faith with the movement and with their companeros. Hobsbawm’s specific examples are unfortunately based in part on errors of fact...

“Hobsbawm’s model [also] requires a charismatic leader. Accordingly, the inspired leader of the uprising is said to be ‘old Curro Cruz (‘Six Fingers’) who issued the call for revolution ... ‘

[...]

“This celebration of Seisdedo’s role [‘Six Fingers’], however, ignores the unanimous view of townspeople of every class and political persuasion, who assert that the old Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with.” [The Bolsheviks and Workers’ Control, p. 37]

He notes that “[f]or years, Trotskyist literature has denounced these reactionary facets of the Red Army as examples of what happened to it ‘under Stalinism.’” [Op. Cit., p. 37f] This claim was, amazingly enough, also made by Trotsky himself. In 1935 he re-wrote history by arguing that “[i]n the fire of the cruel struggle [of the Civil War], there could not be even a question of a privileged position for officers: the very word was scrubbed out of the vocabulary.” Only “after the victories had been won and the passage made to a peaceful situation” did “the military apparatus” try to “become the most influential and privileged part of the whole bureaucratic apparatus” with “the Stalinist bureaucracy ... gradually over the succeeding ten to twelve years” ensuring for them “a superior position” and giving them “ranks and decorations.” [“How Did Stalin Defeat the Opposition?,” Writings, 1935–36, pp. 175–6]

In fact, “ranks and decorations” and “superior” positions were introduced by Trotsky before the outbreak of the Civil War in May 1918. Having been responsible for such developments you would think he would remember them!

On March 28th, 1918, Trotsky gave a report to the Moscow City Conference of the Communist Party. In this report he stated that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree” and that the Bolsheviks “faced the task of creating a regular Army.” Why the change? Simply because the Bolshevik Party held power (“political power is in the hands of the same working class from whose
and removable mandates.” This would complement “the federative Alliance of all working men’s [and women’s] associations ... which will constitute the Commune.” [Michael Bakunin: Selected Writings, pp. 170–1] That is exactly why the CNT militia organised in this fashion (and, we must note, they were only applying the organisational principles of the CNT and FAI — i.e. anarchism — to the militias). The militia columns were organised in a libertarian fashion from the bottom up:

“The establishment of war committees is acceptable to all confederal militias. We start from the individual and form groups of ten, which come to accommodations among themselves for small-scale operations. Ten such groups together make up one centuria, which appoints a delegate to represent it. Thirty centurias make up one column, which is directed by a war committee, on which the delegates from the centurias have their say... although every column retains its freedom of action, we arrive at co-ordination of forces, which is not the same thing as unity of command.” [No Gods, No Masters, vol. 2, pp. 256–7]

In other words, Morrow is arguing for an anarchist solution to the problem of defending the revolution and organising those who were fighting fascism. We say anarchist for good reason. What is ironic about Morrow’s comments and description of “workers’ control of the army” is that these features were exactly those eliminated by Trotsky when he created the Red Army in 1918! Indeed, Trotsky acted in exactly the same way as Morrow attacks the Stalinists for acting (and they used many of the same arguments as Trotsky did to justify it).

As Maurice Brinton correctly summarises:

“Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red man was apolitical and had nothing to do with the uprising... every observer and participant in the uprising agrees that Seisdedos was not the leader and was never anything other than a virtuous charcoal burner with but a slight interest in anarchosyndicalism. [...] “Should the role of charismatic leader be given to someone else in the town? This was not a case of mistaken identity. No single person in Casas Viejas could lay claim to dominating the hearts and minds of the men...The sindicato was governed by a junta. Among the cast of characters there is no sign of charismatic leadership...” [Op. Cit., pp. 274–6]

Mintz sums up by stating “Hobsbawm’s adherence to a model, and the accumulation of misinformation, led him away from the essential conflicts underlying the tragedy and from the reality of the people who participated in it.” [Op. Cit., p. 276]

The Jerez uprising of 1892 also fails to provide Hobsbawm with any empirical evidence to support his claims. Indeed, as in Casas Viejas, the evidence actually works against him. The actual events of the uprising are as follows. Just before midnight of 8th January 1892, several hundred workers entered the town of Jerez crying “Long live the revolution! Long live Anarchy!” Armed with only rocks, sticks, scythes and other farm equipment, they marched toward the city jail with the evident intention of releasing its prisoners—whoincludedmanypoliticalprisoners,victims of the government’s recent anti-anarchist campaign. A few people were killed and the uprising dispersed by a regiment of mounted troops.

Hobsbawm claims this revolt as evidence for his “primitive rebels” thesis. As historian George R. Esenwein argues:

“[T]he Jerez incident cannot be explained in terms of this model. What the millenarian view fails to do in
this instance is to credit the workers with the ability to define their own political goals. This is not to deny that there were millenarian aspects of the rising, for the mob action of the workers on the night of 8 January indicates a degree of irrationalism that is consistent with millenarian behaviour. But... the agitators seem to have had a clear motive in mind when they rose: they sought to release their comrades from the local jail and thereby demonstrate their defiance of the government’s incessant persecution of the International [Workers’ Association] movement. However clumsily and crudely they expressed their grievance, the workers were patently aiming to achieve this objective and not to overthrow the local government in order to inaugurate the birth of a libertarian society.” [Anarchist Ideology and the Working Class Movement in Spain: 1868–1898, p. 184]

Similarly, many Marxists (and liberal historians) point to the “cycle of insurrections” that occurred during the 1930s. They usually portray these revolts as isolated insurrections organised by the FAI who appeared in villages and proclaimed libertarian communism. The picture is one of disorganisation, millenarianism and a believe in spontaneous revolution inspired by a few militants and their daring actions. Nothing could be further from the truth. The “cycle of insurrections” was far more complex that this, as Juan Gomez Casas makes clear:

“Between 1932 and 1934 ... the Spanish anarchists tried to destroy the existing social order through a series of increasingly violent strikes and insurrections, which were at first spontaneous, later co-ordinated.” [Anarchist Organisation: The History of the FAI, p. 135]

11. Why is Morrow’s comments against the militarisation of the Militias ironic?

Morrow denounces the Stalinist militarisation of the militias (their “campaign for wiping out the internal democratic life of the militias”) as follows:

“The Stalinists early sought to set an ‘example’ by handing their militias over to government control, helping to institute the salute, supremacy of officers behind the lines, etc... “The example was wasted on the CNT masses ... The POUM reprinted for distribution in the militias the original Red Army Manual of Trotsky, providing for a democratic internal regime and political life in the army.” [Op. Cit., p. 126]

Morrow states that he supported the “democratic election of soldiers’ committees in each unit, centralised in a national election of soldiers’ delegates to a national council.” Moreover, he attacks the POUM leadership because it “forbade election of soldiers’ committees” and argued that the “simple, concrete slogan of elected soldier’s committees was the only road for securing proletariat control of the army.” Thus the POUM ensured its “ten thousand militiamen were controlled bureaucratically by officials appointed by the Central Committee of the party, election of soldiers’ committees being expressly forbidden.” [Op. Cit., p. 127, p. 128 and pp. 136–7]

Again, Morrow is correct. A revolutionary working class militia does require self-management, the election of delegates, soldiers’ councils and so on. Bakunin, for example, argued that the fighters on the barricades would take a role in determining the development of the revolution as the “Commune will be organised by the standing federation of the Barricades ... composed of one or two delegates from each barricade ... vested with plenary but accountable
And:

“Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional governments, nor so-called revolutionary dictatorships: because we are persuaded that revolution is sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction.” [Op. Cit., p. 160]

As can be seen, Bakunin’s vision is precisely, to use Morrow’s words, “all power to the working class, and democratic organs of the workers, peasants and combatants, as the expression of the workers’ power.” Thus the Friends of Durruti’s program is not a “break” with anarchism (as we discussed in more detail in section 8) but rather in the tradition started by Bakunin — in other words, an anarchist program. It is Leninism, as can be seen, which rejects this “revolutionary program” in favour of all power to the representatives of the working class (i.e. party) which it confuses with the working class as a whole.

Given that Morrow asserts that “all power to the working class” was an “essential” point of “a revolutionary program” we can only conclude that Trotskyism does not provide a revolutionary program — rather it provides a program based, at best, on representative government in which the workers’ delegate their power to a minority or, at worse, on party dictatorship over the working class (the experience of Bolshevik Russia would suggest the former quickly becomes the latter, and is justified by Bolshevik ideology).

By his own arguments, here as in so many other cases, Morrow indicates that Trotskyism is not a revolutionary movement or theory.

Stuart Christie stresses this point when he wrote “[i]t has been widely assumed that the cycle of insurrections which began in … January 1933 were organised and instigated by the FAI … In fact the rising had nothing to do with the FAI. It began as an entirely spontaneous local affair directed against a local employer, but quickly mushroomed into a popular movement which threatened to engulf the whole of Catalonia and the rest of Spain … [CNT militant] Arturo Parera later confirmed that the FAI had not participated in the aborted movement ‘as an organisation.’” [We, the Anarchists, p. 66] While the initial revolts, such as those of the miners of Alto Lobregat in January 1932, were spontaneous acts which caught the CNT and FAI by surprise, the following insurrections became increasingly organised and co-ordinated by those organisations. The January 1933 revolt, as noted above, was based around a planned strike by the CNT railway workers union. The revolt of December 1933 was organised by a National Revolutionary Committee. Both revolts aimed at uprisings all across Spain, based on the existing organisations of the CNT — the unions and their “Defence committees”. Such a degree of planning belies any claims that Spanish Anarchists were “primitive rebels” or did not understand the complexities of modern society or what was required to change it.

Ultimately, Hobsbawm’s thesis and its underlying model represents Marxist arrogance and sectarianism. His model assumes the validity of the Marxist claim that true working class movements are based on mass political parties based on hierarchical, centralised, leadership and those who reject this model and political action (electioneering) are sects and sectarians. It was for this reason that Marx, faced with the increased influence of Bakunin, overturned the First International’s original basis of free discussion with his own concept of what a real workers’ movement should be.

Originally, because the various sections of the International worked under different circumstances and had attained different degrees of development, the theoretical ideals which reflected the real movement would also diverge. The International, therefore,
was open to all socialist and working class tendencies. The general policies of the International would be, by necessity, based on conference decisions that reflected the free political development that flowed from local needs. These decisions would be determined by free discussion within and between sections of all economic, social and political ideas. Marx, however, replaced this policy with a common program of "political action" (i.e. electioneering) by mass political parties via the fixed Hague conference of 1872. Rather than having this position agreed by the normal exchange of ideas and theoretical discussion in the sections guided by the needs of the practical struggle, Marx imposed what he considered as the future of the workers movement onto the International — and denounced those who disagreed with him as sectarian. The notion that what Marx considered as necessary might be another sectarian position imposed on the workers' movement did not enter his head nor that of his followers — as can be seen, Hobsbawm (mis)interpreted anarchism and its history thanks to this Marxist model and vision.

However, once we look at the anarchist movement without the blinkers created by Marxism, we see that rather than being a movement of "primitive rebels" Spanish Anarchism was a movement of working class people using valid tactics to meet their own social, economic and political goals — tactics and goals which evolved to meet changing circumstances. Seeing the rise of anarchism and anarcho-syndicalism as the political expression of the class struggle, guided by the needs of the practical struggle they faced naturally follows when we recognise the Marxist model for what it is — just one possible interpretation of the future of the workers' movement rather than the future of that movement. Moreover, as the history of Social Democracy indicates, the predictions of Bakunin and the anarchists within the First International were proved correct. Therefore, rather than being "primitive rebels" or sectarian politics forced upon the working class, anarchism reflected the pol-

"[T]he federated Alliance of all labour associations ... will constitute the Commune ... there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade ... these deputies being invested with binding mandates and accountable and revocable at all times... An appeal will be issued to all provinces, communes and associations inviting them to follow the example set ... [and] to reorganise along revolutionary lines ... and to then delegate deputies to an agreed place of assembly (all of those deputies invested with binding mandates and accountable and subject to recall), in order to found the federation of insurgent associations, communes and provinces... Thus it is through the very act of extrapolation and organisation of the Revolution with an eye to the mutual defences of insurgent areas that the ... Revolution, founded upon ... the ruins of States, will emerge triumphant...

"Since it is the people which must make the revolution everywhere, and since the ultimate direction of it must at all times be vested in the people organised into a free federation of agricultural and industrial organisations ... being organised from the bottom up through revolutionary delegation ..." [No God, No Masters, vol. 1, pp. 155–6]
guard.” [“Stalinism and Bolshevism”, Writings 1936–7, p. 426]

Thus, rather than the working class as a whole seizing power, it is the “vanguard” which takes power — “a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society.” [Op. Cit., p. 424] So much for “workers’ power” — unless you equate that with the “power” to give your power, your control over your own affairs, to a minority who claim to represent you. Indeed, Trotsky even attacks the idea that workers’ can achieve power directly via organs of self-management like workers’ councils (or soviets):

“Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Op. Cit., p. 430]

In other words, the dictatorship of the proletariat is, in fact, expressed by “the party dictatorship.” In this Trotsky follows Lenin who asserted that:

“The very presentation of the question — ‘dictatorship of the Party or dictatorship of the class, dictatorship (Party) of the leaders or dictatorship (Party) of the masses?’ — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties...” [Left-wing Communism: An Infantile Disorder, pp. 25–6]

As has been made clear above, the FoD being anarchists aimed for a society of generalised self-management, a system in which working people directly controlled their own affairs and so society. As these words by Lenin and Trotsky indicate they did not

2. How accurate is Felix Morrow’s book on the Spanish Revolution?

It is fair to say that most Marxists in Britain base their criticisms of the Spanish Anarchism, particularly the revolution of 1936, on the work of Trotskyist Felix Morrow. Morrow’s book Revolution and Counter-Revolution in Spain, first published in 1938, actually is not that bad — for some kinds of information. However, it is basically written as Trotskyist propaganda. All too often Morrow is inaccurate, and over-eager to bend reality to fit the party line. This is particularly the case when discussing the actions and ideas of the CNT and FAI and when discussing the activities of his fellow Trotskyists in Spain, the Bolshevik-Leninists. We discuss the first set of inaccuracies in the following sections, here we mention the second, Morrow’s comments on the Spanish Trotskyists.

The Bolshevik-Leninists, for example, an obscure sect who perhaps numbered 20 members at most, are, according to Morrow, transformed into the only ones who could save the Spanish Revolution — because they alone were members of the Fourth International, Morrow’s own organisation. As he put it:

“Only the small forces of the Bolshevik-Leninists... clearly pointed the road for the workers.” [Felix Morrow, Revolution and Counter-Revolution in Spain, p. 191]

“Could that party [the party needed to lead the revolution] be any but a party standing on the platform of the Fourth International?” [Op. Cit., p. 248]

And so on. As we will make clear in the following discussion, Morrow was as wrong about this as he was about anarchism.
The POUM — a more significant Marxist party in Spain, though still tiny compared to the anarchists — is also written up as far more important than it was, and slagged off for failing to lead the masses to victory (or listening to the Bolshevik-Leninists). The Fourth Internationalists "offered the POUM the rarest and most precious form of aid: a consistent Marxist analysis" [Op. Cit., p. 105] (never mind Spanish workers needing guns and solidarity!). But when such a programme — prepared in advance — was offered to the POUM by the Fourth International representative — only two hours after arriving in Spain, and a quarter of an hour after meeting the POUM [Op. Cit., p. 139] — the POUM were not interested. The POUM have been both attacked (and claimed as their own) by Trotskyists ever since.

It is Morrow’s attacks on anarchism, though, that have most readily entered leftist folklore — even among Marxists who reject Leninism. Some of Morrow’s criticisms are fair enough — but these were voiced by anarchists long before Morrow put pen to paper. Morrow, in fact, quotes and accepts the analyses of anarchists like Camillo Berneri ("Berner had been right" etc. [Op. Cit., p. 153]), and praises anarchists like Durruti ("the greatest military figure produced by the war" [Op. Cit., p. 224]) — then sticks the boot into anarchism. Indeed, Durruti’s analysis is praised but he is transformed into "no theoretician, but an activist leader of masses... his words express the revolutionary outlook of the class-conscious workers." [Op. Cit., p. 250] Of course, his words, activity and "outlook" (i.e. political analysis) did not spring out of thin air but rather, to state the obvious, were informed by and reflected his anarchist politics, history, activity and vision (which in turn reflected his experiences and needs as a member of the working class). Morrow obviously wanted to have his cake and eat it.

Typically for today’s left, perhaps, the most quoted sections of Morrow’s book are the most inaccurate. In the next eight sections we discuss some of the most inaccurate claims. After that we point out that Morrow’s analysis of the militias is deeply ironic given

In theory and practice the FoD were miles ahead of the Bolshevik-Leninists — as to be expected, as the FoD were anarchists.

10. What does the Friends of Durruti’s programme tell us about Trotskyism?

Morrow states that the FoD’s “slogans included the essential points of a revolutionary program: all power to the working class, and democratic organs of the workers, peasants and combatants, as the expression of the workers’ power.” [Op. Cit., p. 133] It is useful to compare Leninism to these points to see if that provides a revolutionary program.

Firstly, as we argue in more detail in section 11, Trotsky abolished the democratic organs of the Red Army. Lenin’s rule also saw the elimination of the factory committee movement and its replacement with one-man management appointed from above (see section 17 and Maurice Brinton’s The Bolsheviks and Workers’ Control for details). Both these events occurred before the start of the Russian Civil War in May 1918. Moreover, neither Lenin nor Trotsky considered workers’ self-management of production as a key aspects of socialism. On this level, Leninism in power did not constitute a "revolutionary program.”

Secondly, Leninism does not call for “all power to the working class” or even “workers’ power” to manage their own affairs. To quote Trotsky, in an article written in 1937, “the proletariat can take power only through its vanguard.” The working classes’ role is one of supporting the party:

"Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power. In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the van-
He stresses that the FoD “were not in any way beholden to Spanish Trotskyism is transparent from several documents” and notes that while the POUM and Trotskyists displayed “an interest” in “bringing the Friends of Durruti under their influence” this was “something in which they never succeeded.” [Op. Cit., p. 96 and p. 110]

Pre-May, 1937, Baliush himself states that the FoD “had no contact with the POUM, nor with the Trotskyists.” [Op. Cit., p. 104] Post-May, this had not changed as witness E. Wolf letter to Trotsky in July 1937 which stated that it “will be impossible to achieve any collaboration with them ... Neither the POUMists nor the Friends would agree to the meeting [to discuss joint action].” [Op. Cit., pp. 97–8]

In other words, the Friends of Durruti did not establish “close contacts” with the Bolshevik-Leninists after the May Days of 1937. While the Bolshevik-Leninists may have wished for such contacts, the FoD did not (they probably remembered their fellow anarchists and workers imprisoned and murdered when Trotsky was in power in Russia). They were, of course, contacts of a limited kind but no influence or significant co-operation. Little wonder Balius stated in 1946 that the “alleged influence of the POUM or the Trotskyists upon us is untrue.” [quoted, Op. Cit., p. 104]

It is hardly surprising that the FoD were not influenced by Trotskyism. After all, they were well aware of the policies Trotsky introduced when he was in power. Moreover, the program of the Bolshevik-Leninists was similar in rhetoric to the anarchist vision — they differed on the question of whether they actually meant “all power to the working class” or not (see section 12 and 13). And, of course, the Trotskyists activities during the May Days amounted to little more that demanding that the workers’ do what they were already doing (as can be seen from the leaflet they produced — as George Orwell noted, “it merely demanded what was happening already” [Homage to Catalonia, p. 221]). As usual, the “vanguard of the proletariat” were trying to catch up with the proletariat.

Trotsky’s actions as leader of the Red Army. Then we discuss some of Morrow’s inaccurate assertions about anarchism in general.

Of course, some of the errors we highlight in Morrow’s work are the product of the conditions in which it was written — thousands of miles from Spain in America, dependent on papers produced by Spanish Marxists, Anarchists and others. We cannot blame him for such mistakes (although we can blame the Trotskyist publisher who reprints his account without indicating his factual errors and the Marxist writers who repeat his claims without checking their accuracy). We do, however, blame Morrow for his errors and mis-representations of the activities and politics of the Spanish Anarchists and anarchism in general. These errors derive from his politics and inability to understand anarchism or provide an honest account of it.

By the end of our discussion we hope to show why anarchists argue that Morrow’s book is deeply flawed and its objectively skewed by the authors politics and so cannot be taken at face value. Morrow’s book may bring comfort to those Marxists who look for ready-made answers and are prepared to accept the works of hacks at face-value. Those who want to learn from the past — instead of re-writing it — will have to look elsewhere.

3. Did a “highly centralised” FAI control the CNT?

According to Morrow, “Spanish Anarchism had in the FAI a highly centralised party apparatus through which it maintained control of the CNT” [Op. Cit., p. 100]

In reality, the FAI — the Iberian Anarchist Federation — was founded, in 1927, as a confederation of regional federations (including the Portuguese Anarchist Union). These regional federations, in turn, co-ordinated local and district federations of highly autonomous anarchist affinity groups. In the words of Murray Bookchin:
“Like the CNT, the FAI was structured along confederal lines: the affinity groups were linked together in a Local Federation and the Local Federation in District and Regional Federations. A Local Federation was administered by an ongoing secretariat, usually of three persons, and a committee composed of one mandated delegate from each affinity group. This body comprised a sort of local executive committee. To allow for a full expression of rank-and-file views, the Local Federation was obliged to convene assemblies of all the faistas in its area. The District and Regional Federations, in turn, were simply the Local federation writ large, replicating the structure of the lower body. All the Local Districts and Regional Federations were linked together by a Peninsular Committee whose tasks, at least theoretically, were administrative... [A FAI secretary] admits that the FAI ‘exhibited a tendency towards centralism’...Yet it must also be emphasised that the affinity groups were far more independent than any comparable bodies in the Socialist Party, much less the Communist...the FAI was not an internally repressive organisation... Almost as a matter of second nature, dissidents were permitted a considerable amount of freedom in voicing and publishing material against the leadership and established policies.” [The Spanish Anarchists, pp. 197–8]

And:

“Most writers on the Spanish labour movement seem to concur in the view that, with the departure of the moderates, the CNT was to fall under the complete domination of the FAI... But is this appraisal correct? The FAI...was more loosely joined as an organisation than many of its admirers and critics seem to recognise. It has no

isation and upon anarcho-syndicalist ideology” and “[a]t all times the Group articulated an anarcho-syndicalist ideology, although it also voiced radical criticism of the CNT and FAI leadership. But it is a huge leap from that to claiming that the Group espoused marxist positions.” [Op. Cit., p. 61 and p. 95]

One last comment. Morrow states that the “CNT leadership...expelled the Friends of Durruti” [Op. Cit., p. 189] This is not true. The CNT leadership did try to expel the FoD. However, as Balius points out, the “higher committees order[ed] our expulsion, but this was rejected by the rank and file in the trade union assemblies and at a plenum of FAI groups held in the Casa CNT-FAI.” [quoted by Agustin Guillamon, Op. Cit., p. 73] Thus the CNT leadership could never get their desire ratified by any assembly of unions or FAI groups. Unfortunately, Morrow gets his facts wrong (and also presents a somewhat false impression of the relationship of the CNT leadership and the rank and file).

9. Were the Friends of Durruti influenced by Trotskyists?

Morrow implies that the Bolshevik-Leninists “established close contacts with the anarchist workers, especially the ‘Friends of Durruti’” [Op. Cit., p. 139] The truth, as usual, is somewhat different.

To prove this we must again turn to Guillamon’s work in which he dedicates a chapter to this issue. He brings this chapter by stating:

“It requires only a cursory perusal of El Amigo del Pueblo or Balius’s statements to establish that the Friends of Durruti were never marxists, nor influenced at all by the Trotskyists or the Bolshevik-Leninist Section. But there is a school of historians determined to maintain the opposite and hence the necessity for this chapter.” [Op. Cit., p. 94]
that the junta was not seen as a form of delegated power by rather as a means of defending the revolution like the CNT’s defence committees and under the direct control of the union assemblies.

It may be argued that the FoD did not actually mean this sort of structure. Indeed, their manifesto states that they are “introducing a slight variation in anarchism into our program. The establishment of a Revolutionary Junta.” Surely this implies that they saw themselves as having moved away from anarchism and CNT policy? As can be seen from Baluís’ comments during and after the revolution, the FoD were arguing for “all power to the unions” and stating that “apolitical anarchism had failed.” However, “apolitical” anarchism came about post-July 19th when the CNT-FAI (ignoring anarchist theory and CNT policy and history) ignored the state machine rather than destroying it and supplanting it with libertarian organs of self-management. The social revolution that spontaneously occurred after July 19th was essentially economic and social (i.e. “apolitical”) and not “anti-political” (i.e. the destruction of the state machine). Such a revolution would soon come to grief on the shores of the (revitalised) state machine — as the FoD correctly argued had happened.

To state that they had introduced a variation into their anarchism makes sense post-July 1936. The “apolitical” line of the CNT-FAI had obviously failed and a new departure was required. While it is clear that the FoD’s “new” position was nothing of the kind, it was elemental anarchist principles, it was “new” in respect to the policy the CNT (“anarchism”) had conducted during the Civil War — a policy they justified by selective use of anarchist theory and principles. In the face of this, the FoD could claim they were presenting a new variation in spite of its obvious similarities to prewar CNT policies and anarchist theory. Thus the claim that the FoD saw their ideas as some sort of departure from traditional anarchism cannot be maintained, given the obvious links this “new” idea had with the past policies and structure of the CNT. As Guillamon makes it clear, the FoD made “their stand within the organis-

bureaucratic apparatus, no membership cards or dues, and no headquarters with paid officials, secretaries, and clerks... They jealously guarded the autonomy of their affinity groups from the authority of higher organisational bodies — a state of mind hardly conducive to the development of a tightly knit, vanguard organisation.

“The FAI, moreover, was not a politically homogeneous organisation which followed a fixed ‘line’ like the Communists and many Socialists. It had no official program by which all faistas could mechanically guide their actions.” [Op. Cit., p. 224]

So, while the FAI may have had centralising tendencies, a “highly centralised” political party it was not. Further, many anarcho-syndicalists and affinity groups were not in the FAI (though most seem to have supported it), and many FAI members put loyalty to the CNT (the anarcho-syndicalist union federation) first. For instance, according to the minutes of the FAI national plenum of January-February 1936:

“The Regional Committee [of Aragon, Rioja, and Navarra] is completely neglected by the majority of the militants because they are absorbed in the larger activities of the CNT”

And:

“One of the reasons for the poor condition of the FAI was the fact that almost all the comrades were active in the defence groups of the CNT” (report from the Regional Federation of the North).

These are internal documents and so unlikely to be lies. [Juan Gomez Casas, Anarchist Organisation: the History of the FAI, p. 165 and p. 168]
Anarchists were obviously the main influence in the CNT. Indeed, the CNT was anarcho-syndicalist long before the FAI was founded — from its creation in 1910 the CNT had been anarcho-syndicalist and remained so for 17 years before the FAI existed. However, Morrow was not the only person to assert “FAI control” of the CNT. In fact, the claim of “FAI control” was an invention of a reformist minority within the organisation — people like Angel Pestana, ex-CNT National Secretary, who wanted to turn the CNT into a politically “neutral” union movement. Pestana later showed what he meant by forming the Syndicalist Party and standing for Parliament (the Cortes). Obviously, in the struggle against the reformists, anarcho-syndicalists — inside the FAI or not — voted for people they trusted to run CNT committees. The reformists (called Treinistas) lost, split from the CNT (taking about 10% of the membership with them), and the myth of “FAI dictatorship” was born.

Rather than accept that the membership no longer supported them, the Treinistas consoled themselves with tales that a minority, the FAI, had taken control of the CNT.

In fact, due to its decentralised and federal structure, the FAI could not have had the sort of dominance over the CNT that is often attributed to it. At union congresses, where policies and the program for the movement were argued out:

“[D]elegates, whether or not they were members of the FAI, were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions.”

[Juan Gomez Casas, *Anarchist Organisation: The History of the FAI*, p. 121]

The union committees were typically rotated out of office frequently and committeemen continued to work as wage-earners.

“Political” here meaning “state-political” — a common anarchist use of the word. According to Fraser, the “proposed revolutionary junta was to be composed of combatants from the barricades.” [Ibid.] This echoes Bakunin’s comment that the “Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Communal Council composed of one or two delegates from each barricade ... vested with plenary but accountable and removable mandates.” [Op. Cit., pp. 170–1]

As can be seen, rather than calling for power to a party or looking to form a government (i.e. being “politically orientated”) the FoD were calling for “all power to the unions.” This meant, in the context of the CNT, all power to the union assemblies in the workplace. Decision making would flow from the bottom upwards rather than being delegated to a “revolutionary” government as in Trotskyism. To stress the point, the FoD did not represent a “break” with anarchism or the CNT tradition. To claim otherwise means to misunderstand anarchist politics and CNT history.

Our analysis, we must note, also makes a mockery of Guillaumol’s claim that because the FoD thought that libertarian communism had to be “impose[d]” and “defended by force of arms” their position represented an “evolution within anarchist thought processes.” [Op. Cit., p. 95] As has been made clear above, from Bakunin onwards revolutionary anarchism has been aware of the need for an insurrection to create an anarchist society by destroying both the state and capitalism (i.e. to “impose” a free society upon those who wish hierarchy to continue and are in a position of power) and for that revolution to be defended against attempts to defeat it. Similarly, his claim that the FoD’s “revolutionary junta” was the equivalent of what “others call the vanguard or the revolutionary party” cannot be defended given our discussion above — it is clear

‘all power to the Soviets’, we were calling for all power to the unions.” [quoted by Ronald Fraser, *Blood of Spain*, p. 381]
This can be seen from the comments made after the end of the war by the Franco-Spanish Group of The Friends of Durruti. They clearly argued for a return to the principles of anarchism and the pre-war CNT. They argued not only for workers’ self-organisation and self-management as the basis of the revolution but also to the pre-war CNT idea of a workers’ alliance from the bottom up rather than a UGT-style one at the top (see section 5).

In their words:

“**A revolution requires the absolute domination of the workers’ organisations as was the case in July, 1936, when the CNT-FAI were masters ... We incline to the view that it is necessary to form a Revolutionary Alliance; a Workers’ Front; where no one would be allowed to enter and take their place except on a revolutionary basis ...**” [“The Friends of Durruti Accuse”, *Class War on the Home Front*, Wildcat Group (ed.), p. 34]

As can be seen, rather than a “revolutionary government” the FoD were consistently arguing for a federation of workers’ associations as the basis of the revolution. In this they were loyally following Bakunin’s basic arguments and the ideas of anarchism. Rather than the FoD breaking with anarchism, it is clear that it was the leading committees of the CNT and FAI which actually broke with the politics of anarchism and the tactics, ideas and ideals of the CNT.

Lastly there are the words of Jaime Balius, one of the FoD’s main activists, who states in 1976 that:

“We did not support the formation of Soviets; there were no grounds in Spain for calling for such. We stood for ‘all power to the trade unions’. In no way were we politically orientated ... Ours was solely an attempt to save the revolution; at the historical level it can be compared to Kronstadt because if there the sailors and workers called for

In a movement so closely based on the shop floor, the FAI could not maintain influence for long if they ignored the concerns and opinions of co-workers. Moreover, only a minority of the anarcho-syndicalist activists in the CNT belonged to the FAI and, as Juan Gomez Casas points out in his history of the FAI, FAI militants frequently had a prior loyalty to the CNT. Thus his summation seems correct:

“As a minority organisation, the FAI could not possibly have had the kind of control attributed to it ... in 1931 ... there were fifty CNT members for each member of a FAI group. The FAI was strongly federalist, with its groups at the base freely associated. It could not dominate an organisation like the CNT, which had fifty times as many members and was also opposed to hierarchy and centralism. We know that FAI militants were also CNT militants, and frequently they were loyal first to the CNT. Their influence was limited to the base of the organisation through participation in the plenums of militants or unions meetings.” [Op. Cit., p. 133]

He sums up by arguing:

“The myth of the FAI as conqueror and ruler of the CNT was created basically by the Treinistas” [Op. Cit., p. 134]

Therefore, Morrow is re-cycling an argument which was produced by the reformist wing of the CNT after it had lost influence in the union rank-and-file. Perhaps he judges the FAI by his own standards? After all, the aim of Leninists is for the vanguard party to control the labour unions in their countries. Anarchists reject such a vision and believe in union autonomy — influence of political parties and groups should only exist in as much as they influence the rank-and-file who control the union. Rather than aim to
control the CNT, the FAI worked to influence its membership. In the words of Francisco Ascaso (friend of Durruti and an influential anarchist militant in the CNT and FAI in his own right):

“There is not a single militant who as a 'FAIista' intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers’ union and when I intervene at union meetings I do it as someone who us exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the FAI or not.” [quoted by Abel Paz, Durruti: The People Armed, p. 137]

In other words, the FAI “controlled” the CNT only to the extent it influenced the membership — who, in fact, controlled the organisation. We must also note that Ascaso’s comment echoes Bakunin’s that the “purpose of the Alliance [i.e. anarchist federation] is to promote the Revolution ... it will combat all ambition to dominate the revolutionary movement of the people, either by cliques or individuals. The Alliance will promote the Revolution only through the NATURAL BUT NEVER OFFICIAL INFLUENCE of all members of the Alliance.” [Bakunin on Anarchism, p. 387]

Regardless of Morrow’s claims, the FAI was a federation of autonomous affinity groups in which, as one member put it, “[e]ach FAI group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding ... they had no ... opportunity or jurisdiction ... to foist a party line upon the grass-roots.” [Francisco Carrasquer, quoted by Stuart Christie, We, the Anarchists!, p. 28] There was co-ordination in a federal structure, of course, but that did not create a “highly centralised” party-like organisation. Morrow judged the FAI according to his own standards, squeezing it into his ideological vision of the world rather than reporting the reality of the situation (see Stuart Christie’s work for a more detailed refutation of the usual Marxist and Liberal inventions of the activities and nature of the FAI).

During the war itself a CNT national plenum of regions, in September 1936, called for a National Defence Council, with majority union representation and based on Regional Defence Councils. The Defence Council of Aragon, set up soon after, was based on these ideas. The need for co-ordinated revolutionary defence and attack is just common sense — and had been reflected in CNT theory, policy and structure for decades.

An understanding of the basic ideas of anarchist theory on revolution combined with the awareness of the CNT’s juntas (administrative councils or committees) had “defence committees” associated with them makes it extremely clear that rather than being a “conscious break with the anti-statism of traditional anarchism” the FoD’s programme was, in fact, a conscious return to the anti-statism of traditional anarchism and the revolutionary program and vision of the pre-Civil War CNT.

This is confirmed if we look at the activities of the CNT in Aragon where they formed the “Defence Council of Aragon” in September 1936. In the words of historian Antony Beevor, “[i]n late September delegates from the Aragonese collectives attended a conference at Bujaraloz, near where Durruti’s column was based. They decided to establish a Defence Council of Aragon, and elected as president Joaquin Ascaso.” [Op. Cit., p. 96] In February 1937, the first congress of the regional federation of collectives was held at Caspe to co-ordinate the activities of the collectives — an obvious example of a regional economic council desired by the FoD. Morrow does mention the Council of Aragon — “the anarchist-controlled Council for the Defence of Aragon” [Op. Cit., p. 111] — however, he strangely fails to relate this fact to anarchist politics. After all, in Aragon the CNT-FAI remained true to anarchism, created a defence council and a federation of collectives. If Morrow had discussed the events in Aragon he would have had to draw the conclusion that the FoD were not a “conscious break with the traditional anti-statism of anarchism” but rather were an expression of it.
eration, then to the national confederation. In addition to the juntas, however, there were two major committee systems established as adjuncts to the juntas that had developed some autonomy: the comites pro presos, or committees for political prisoners, which worked for the release of prisoners and raised money for the relief of their families; and the comites de defensa, or defence committees, whose task was to stockpile weapons for the coming battle and to organise the shock troops who would bear the brunt of the fighting.” [The Anarchists of Casas Viejas, p. 141]

Thus we see that the CNT had its “juntas” (which means council or committee and so does not imply any authoritarianism) as well as “defence committees” which were elected by democratic vote in the union organisations decades before the FoD existed. The Defence Committees (or councils) were a CNT insurgent agency in existence well before July 1936 and had, in fact, played a key role in many insurrections and strikes, including the events of July 1936. In other words, the “break” with anarchism Morrow presents was, in fact, an exact reproduction of the way the CNT had traditionally operated and acted — it is the same program of a “workers defence council” and “union management of the economy” that the CNT had advocated prior to the outbreak of the Civil War. The only “break” that did occur post 19th of July was that of the CNT and FAI ignoring its politics and history in favour of “anti-fascist unity” and a UGT “Workers’ Alliance” with all anti-fascist unions and parties (see section 20).

Moreover, the CNT insurrection of December 1933 had been coordinated by a National Revolutionary Committee [No Gods, No Masters, vol. 2, p. 235]. D.A. Santillan argued that the “local Council of Economy will assume the mission of defence and raise voluntary corps for guard duty and if need be, for combat” in the “cases of emergency or danger of a counter-revolution.” [After the Revolution, 4179]

In addition, Morrow’s picture of the FAI implicitly paints the CNT as a mere “transmission belt” for that organisation (and so a re-production of the Bolshevik position on the relationship of the labour unions and the revolutionary party). Such a picture, however, ignores the CNT’s character as a non-hierarchical, democratic (self-managed) mass movement which had many tendencies within it. It also fails to understand the way anarchists seek to influence mass organisations — not by assuming positions of power but by convincing their fellow workers’ of the validity of their ideas in policy making mass assemblies (see section J.3.6 for more details).

In other words, Morrow’s claims are simply false and express a total lack of understanding of the nature of the CNT, the FAI and their relationship.

4. What is the history of the CNT and the Communist International?

Morrow states that the “tide of the October Revolution had, for a short time, overtaken the CNT. It had sent a delegate to the Comintern [Communist International] Congress in 1921. The anarchists had then resorted to organised fraction work and recaptured it.” He links this to the FAI by stating “[t]henceforward … the FAI … maintained control of the CNT.” [Op. Cit., p. 100] Given that the FAI was formed in 1927 and the CNT disassociated itself with the Comintern in 1922, five years before the FAI was created, “thenceforward” does not do the FAI’s ability to control the CNT before it was created justice!

Partly it is the inability of the Communist Party and its Trotskyist off-shoots to dominate the CNT which explains Morrow’s comments. Seeing anarchism as “petty bourgeois” it is hard to combine this with the obvious truth that a mass, revolutionary, workers’ union could be so heavily influenced by anarchism rather than Marxism. Hence the need for FAI (or anarchist) “control” of the CNT. It allows Trotskyists ignore dangerous ideological questions. As J. Romero Maura notes, the question why anarchism
influenced the CNT “in fact raises the problem why the reformist social democratic, or alternatively the communist conceptions, did not impose themselves on the CNT as they managed to in most of the rest of Europe. This question ... is based on the false assumption that the anarcho-syndicalist conception of the workers’ struggle in pre-revolutionary society was completely at odds with what the real social process signified (hence the constant reference to religious’, ‘messianic’, models as explanations).” He argues that the “explanation of Spanish anarcho-syndicalist success in organising a mass movement with a sustained revolutionary elan should initially be sought in the very nature of the anarchist concept of society and of how to achieve revolution.” [J. Romero Maura, “The Spanish Case”, in Anarchism Today, D. Apter and J. Joll (eds.), p. 78 and p. 65] Once we do that, we can see the weakness of Morrow’s (and others) “Myth of the FAI” — having dismissed the obvious reason for anarchist influence, namely its practicality and valid politics, there can only be “control by the FAI.”

However, the question of affiliation of the CNT to the Comintern is worth discussing as it indicates the differences between anarchists and Leninists. As will be seen, the truth of this matter is somewhat different to Morrow’s claims and indicates well his distorted vision.

Firstly to correct a factual error. The CNT in fact sent two delegations to the Comintern. At its 1919 national congress, the CNT discussed the Russian Revolution and accepted a proposition that stated it “declares itself a staunch defender of the principles upheld by Bakunin in the First International. It declares further that it affiliates provisionally to the Third International on account of its predominantly revolutionary character, pending the holding of the International Congress in Spain, which must establish the foundations which are to govern the true workers’ International.” [No Gods, No Masters, vol. 2, pp. 220–1] It went on to re-state its long-standing anarchist aims:

... placed above or outside the labouring masses ... ever succeeds in emancipating them ... Effective emancipation can only be achieved by the direct, widespread, and independent action of those concerned, of the workers themselves, grouped, not under the banner of a political party ... but in their own class organisations (productive workers’ unions, factory committees, co-operatives, etcetera) on the basis of concrete action and self-government.” [The Unknown Revolution, p. 197]

Anarchists oppose representative organs of power as these are governments and so based on minority power and subject to bureaucratic deformations which ensure un-accountability from below. Anarchists argue “that, by its very nature, political power could not be exercised except by a very restricted group of men at the centre. Therefore this power — the real power — could not belong to the soviets. It would actually be in the hands of the party.” [Voline, Op. Cit., p. 213]

Thus Morrow’s argument is flawed on the basic point that he does not understand anarchist theory or the nature of an anarchist revolution (also see section 12).

Secondly, and more importantly given the Spanish context, the FoD’s vision has a marked similarity to pre-Civil War CNT organisation, policy and vision. This means that the idea of a National Defence Council was not the radical break with the CNT that some claim. Before the civil war the CNT had long has its defence groups, federated at regional and national level. Historian Jerome Mintz provides a good summary:

“The policies and actions of the CNT were conducted primarily by administrative juntas, beginning with the sindicato, whose junta consisted of a president, secretary, treasurer, and council members. At each step in the confederation, a representative [sic! — delegate] was sent to participate at the next organisational level — from sindicato to the district to the regional confed-
like the defence of the revolution, should be concentrated in the hands of working class organisations — whether labour unions or new organs of spontaneous creation, such as free councils, etc., which, as an expression of the will of the workers themselves, from below up, should construct the revolutionary social community.” [quoted in The May Days in Barcelona, Vernon Richards (ed.), p. 71]

Camillo Berneri sums up the anarchist perspective clearly when he wrote:

“The Marxists … foresee the natural disappearance of the State as a consequence of the destruction of classes by the means of 'the dictatorship of the proletariat,' that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but the propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration — corporate organisations [i.e. industrial unions], communal institutions, both regional and national — freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrative centralisation.” [“Dictatorship of the Proletariat and State Socialism”, Cienfuegos Press Anarchist Review, no. 4, p. 52]

In other words, anarchists do support democratic organs of power when they are directly democratic (i.e. self-managed). “The basic idea of Anarchism is simple,” argued Voline, “no party
CNT. Actually, Nin and Maurin represented virtually no one but the Lerida local federation (their stronghold). Their actions and clams were disavowed by a plenum of the CNT the following August.

How did Nin and Maurin manage to get into a position to be sent to Russia? Simply because of the repression the CNT was under at the time. This was the period when Catalan bosses hired gun men to assassinate CNT militants and members and the police exercised the notorious practice known as ley de fugas (shot while trying to escape). In such a situation, the normal workings of the CNT came under must stress and “with the best known libertarian militants imprisoned, deported, exiled, if not murdered outright, Nin and his group managed to hoist themselves on to the National Committee ... Pestana’s report not being available, it was decided that a further delegation should be sent ... in response to Moscow’s invitation to the CNT to take part in the foundation of the Red International of Labour Unions.” [Ignacio de Llorens, The CNT and the Russian Revolution, p. 8] Juan Gomez Casas confirms this account:

“At a plenum held in Lerida in 1921, while the CNT was in disarray [due to repression] in Catalonia, a group of Bolsheviks was designated to represent the Spanish CNT in Russia ... The restoration of constitutional guarantees by the Spanish government in April 1922, permitted the anarcho-syndicalists to meet in Saragossa in June 11 ... [where they] confirmed the withdrawal of the CNT from the Third International and the entrance on principle into the new [revolutionary syndicalist] International Working Men’s Association.” [Anarchist Organisation: History of the FAI, p. 61]

We should note that along with pro-Bolshevik Nin and Maurin was anarchist Gaston Leval. Leval quickly got in touch with Russian and other anarchists, helping some imprisoned Russia anarchists get deported after bringing news of their hunger strike to rank-and-file assemblies to make the guiding decisions for a socialised economy.

This leaves point one of their programme, the call for a “Revolutionary Junta or National Defence Council.” It is here that Morrow and a host of other Marxists claim the FoD broke with anarchism towards Marxism. Nothing could be further from the truth.

Firstly, anarchists have long supported the idea of workers’ councils (or soviets) as an expression of working class power to control their own lives (and so society) — indeed, far longer than Marxists. Thus we find Bakunin arguing that the “future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.” Anarchists “attain this goal ... by the development and organisation, not of the political but of the social (and, by consequence, anti-political) power of the working masses.” [Michael Bakunin: Selected Writings, p. 206 and p. 198] These councils of workers’ delegates (workers’ councils) would be the basis of the commune and defence of the revolution:

“the federative Alliance of all working men’s associations ... constitute the Commune .... Commune will be organised by the standing federation of the Barricades... [The federation of insurgent associations, communes and provinces ... [would] organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Op. Cit., pp. 170–1]

This perspective can be seen in the words of the German anarcho-syndicalist H. Ruediger (member of the IWA’s secretariat in 1937) when he argued that for anarchists “social re-organisation,
This programme basically mimics the pre-war CNT policy and organisation and so cannot be considered as a “break” with anarchist or CNT politics or tradition.

Firstly, we should note that the “municipality” was a common CNT expression to describe a “commune” which was considered as “all the residents of a village or hamlet meeting in assembly (council) with full powers to administer and order local affairs, primarily production and distribution.” In the cities and town the equivalent organisation was “the union” which “brings individuals together, grouping them according to the nature of their work … First, it groups the workers of a factory, workshop or firm together, this being the smallest cell enjoying autonomy with regard to whatever concerns it alone … The local unions federate with one another, forming a local federation, composed of the committee elected by the unions, and of the general assembly that, in the last analysis, holds supreme sovereignty.” [Issac Puente, Libertarian Communism, p. 25 and p. 24]

In addition, the “national federations [of unions] will hold as common property the roads, railways, buildings, equipment, machinery and workshops” and the “free municipality will federate with its counterparts in other localities and with the national industrial federations.” [Op. Cit., p. 29 and p. 26] Thus Puente’s classic pre-war pamphlet is almost identical to points two and three of the FoD Programme.

Moreover, the “Economic Council” urged by the FoD in point two of their programme is obviously inspired by the work of Abad Diego de Santillan, particularly his book After the Revolution (El Organismo Economico de la Revolucion). Discussing the role of the “Federal Council of Economy”, de Santillan says that it “receives its orientation from below and operates in accordance with the resolutions of the regional and national assemblies.” [p. 86] Just as the CNT Congresses were the supreme policy-making body in the CNT itself, they envisioned a similar body emanating from the assembled international delegates. By embarrassing Lenin and Trotsky, Leval helped save his comrades from the prison camp and so saved their lives.

By the time Leval arrived back in Spain, Pestana’s account of his experiences had been published — along with accounts of the Bolshevik repression of workers, the Kronstadt revolt, the anarchist movement and other socialist parties. These accounts made it clear that the Russian Revolution had become dominated by the Communist Party and the “dictatorship of the proletariat” little more that dictatorship by the central committee of that party. Indeed, leading Bolshevik Grigory Zinoviev had openly admitted this at the Comintern’s Second Congress in 1920:

"[T]oday, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class ... [T]he dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.” [Proceedings and Documents of the Second Congress 1920, vol. 2, p. 928 and pp. 151–2]

Unsurprisingly, then, Pestana report was negative in terms of both the new regime and on whether the CNT should remain affiliated. [“Report on the action taken by the delegate Angel Pestana at the second congress of the third international which was presented by him to the Confederacion Nacional del Trabajo”, Revolutionary Russia, Vol. 8, No. 1, pp. 39–103]

Moreover, the way the two internationals operated violated basic libertarian principles. Firstly, the “Red Labour International
completely subordinated trade unions to the Communist Party.” [Peirats, *Anarchists in the Spanish Revolution*, p. 38] This completely violated the CNT principle of unions being controlled by their members (via self-management from the bottom up). Secondly, the congresses’ methodology in its debates and decision-making were alien to the CNT tradition. In that organisation self-management was its pride and glory and its gatherings and congresses reflected this. Pestana could not fathom the fierce struggle surrounding the make-up of the chairmanship of the Comintern congress:

“Pestana says that he was particularly intrigued by the struggle for the chairmanship. He soon realised that the chair was the congress, and that the Congress was a farce. The chairman made the rules, presided over deliberations, modified proposals at will, changed the agenda, and presented proposals of his own. For a start, the way the chair handled the gavel was very inequitable. For example, Zinoviev gave a speech which lasted one and one-half hours, although each speaker was supposedly limited to ten minutes. Pestana tried to rebut the speech, but was cut off by the chairman, watch in hand. Pestana himself was rebutted by Trotsky who spoke for three-quarters of an hour, and when Pestana wanted to answer Trotsky’s attack on him, the chairman declared the debate over.” [Op. Cit., pp. 37–8]

In addition, “[i]n theory, every delegate was free to table a motion, but the chair itself selected the ones that were ‘interesting.’ Proportional voting [by delegation or delegate] had been provided for, but was not implemented. The Russian Communist Party ensured that it enjoyed a comfortable majority.” Peirats continues by noting that “[t]o top it all, certain important decisions were not even made in the congress hall, but were made begin the scenes.” That was how the

“This body will be organised as follows: members of the revolutionary Junta will be elected by democratic vote in the union organisations. Account is to be taken of the number of comrades away at the front ... The Junta will steer clear of economic affairs, which are the exclusive preserve of the unions.

“The functions of the revolutionary Junta are as follows:

“II — All economic power to the syndicates.

“Since July the unions have supplied evidence of the great capacity for constructive labour... It will be the unions that structure the proletarian economy.

“An Economic Council may also be set up, taking into consideration the natures of the Industrial Unions and Industrial federations, to improve on the co-ordination of economic activities.

“III — Free municipality.

[...] 

“The Municipality shall take charge of those functions of society that fall outside the preserve of the unions. And since the society we are going to build shall be composed exclusively of producers, it will be the unions, no less, that will provide sustenance for the municipalities...

“The Municipalities will be organised at the level of local, comarcal and peninsula federations. Unions and municipalities will maintain liaison at local, comarcal and national levels.” [Towards a Fresh Revolution, pp. 24–5]
Morrow, of course, would have had a fit if anarchists pointed to the example of the Social Democrat’s who crushed the German Revolution or Stalin’s Russia as examples that “rule by an elite lies concealed in the heart of Marxist philosophy.” It does not spring into Morrow’s mind that those anarchists he praises are the ones who show the revolutionary heart of anarchism. This can best be seen from his comments on the Friends of Durruti, who we argue were not evolving towards “Marxism” but rather were trying to push the CNT and FAI back to its pre-Civil War politics and strategy. Moreover, as we argue in section 12, anarchism has always argued for self-managed working class organisations to carry out and defend a revolution. The FoD were simply following in the tradition founded by Bakunin.

In other words, we will show that they did not “break with” anarchism – rather they refused to compromise their anarchism in the face of “comrades” who thought winning the war meant entering the government. This is clear from their leaflets, paper and manifesto. Moreover, as will become obvious, their “break” with anarchism actually just restates pre-war CNT policy and organisation.

For example, their leaflets, in April 1937, called for the unions and municipalities to “replace the state” and for no retreat:

“We have the organs that must supplant a State in ruins. The Trade Unions and Municipalities must take charge of economic and social life.” [quoted by Agustin Guillamon, Op. Cit., p. 38]

This clearly is within the CNT and anarcho-syndicalist tradition. Their manifesto, in 1938, repeated this call (“the state cannot be retained in the face of the unions”), and made three demands as part of their programme. It is worth quoting these at length:

“I — Establishment of a Revolutionary Junta or National Defence Council.

resolution that “[i]n forthcoming world congresses of the Third International, the national trade union organisations affiliated to it are to be represented by delegates from each country’s Communist Party” was adopted. He also noted that “[o]bjections to this decision were quite simply ignored.” [No Gods, No Masters, vol. 2, p. 224]

Many of the syndicalist delegates to this “pantomime” congress later meet in Berlin and founded the anarcho-syndicalist International Workers Association based on union autonomy, self-management and federalism. Unsurprisingly, once Pestana and Leval reported back to their organisation, the CNT rejected the Bolshevik Myth and re-affirmed the libertarian principles it had proclaimed at its 1919 congress. At a plenum of the CNT in 1922, the organisation withdrew its provisional affiliation and voted to join the syndicalist International formed in Berlin. As one historian summarises:

“The CNT withdrew from the Profintern because, in line with revolutionary syndicalist doctrine, the vast majority of its members opposed party political influence in the unions. The weakness of the communist-syndicalist position was amply demonstrated when a lull in the repression carried out against the CNT in early 1922 led to the release of the detained militants; as a result they were abruptly removed from their positions and their policy towards Moscow overturned … Furthermore, the CNT was not alone: the other founder members of the [syndicalist] IWMA had rejected the Profintern for the same reasons. Although anarchists were influential in some, but by no means all, of the IWMA’s member organisations, these were not anarchist but revolutionary syndicalist. [Leading CNT militant Salvador] Segui could have been speaking for all of them when he proclaimed at Zaragoza that the CNT’s split from the Profintern resulted from the fact that ‘a chasm separates us from Rus-
“Due to the ongoing repression borne by the CNT, its flirtation with Communism lasted longer than would
once were friends of mine is that not enough? ... So where is this marxism of mine? Is it because my roots are not
in the factory? ... The time has come to clarify my position. It is not good enough to say that the matter has
already been agreed. The truth must shine through. As far as I am concerned, I call upon all the comrades who
have used the press to hang this label upon me to spell out what makes me a marxist.” [El Amigo del Pueblo,
no. 4, p. 3]

As can be seen, the FoD were not Marxists. Two more questions arise. Were they a “break” with anarchism (i.e. moving towards
Marxism) and were they influenced by the Spanish Trotskyists. We turn to these questions in the next two sections.

8. Did the Friends of Durruti “break with” anarchism?

Morrow claims that the Friends of Durruti (FoD) “represented a conscious break with the anti-statism of traditional anarchism. They explicitly declared the need for democratic organs of power, juntas or soviets, in the overthrow of capitalism.” [Op. Cit., p. 247] The truth of the matter is somewhat different.

Before discussing his assertion in more detail a few comments are required. Typically, in Morrow’s topsy-turvy world, all anarchists like the Friends of Durruti (Morrow also includes the Libertarian Youth, the “politically awakened” CNT rank and file, local FAI groups, etc.) who remained true to anarchism and stuck to their guns (often literally) — represented a break with anarchism and a move towards Marxism, the revolutionary vanguard party (no doubt part of the 4th International), and a fight for the “workers state.” Those anarchists, on the other hand, who compromised for “anti-fascist unity” (but mainly to try and get weapons to fight Franco) are the real anarchists because “class collaboration … lies concealed in the heart of anarchist philosophy.” [Op. Cit., p. 101]
nor by the POUM. Its ideology and watchwords were quintessentially in the CNT idiom: it cannot be said that they displayed a marxist ideology at any time ... They were against the abandonment of revolutionary objectives and of anarchism’s fundamental and quintessential ideological principles, which the CNT-FAI leaders had thrown over in favour of anti-fascist unity and the need to adapt to circumstances.” [p. 107]

In other words, they wanted to return the CNT “to its class struggle roots.” [Ibid.] Indeed, Balius (a leading member of the group and writer of its 1938 pamphlet Towards a Fresh Revolution) was moved to challenge the charges of “marxist” levelled at him:

“I will not repay defamatory comment in kind. But what I cannot keep mum about is that a legend of marxism has been woven about my person and I should like the record put straight ... It grieves me that at the present time there is somebody who dares call me a Marxist when I could refute with unanswerable arguments those who hang such an unjustified label on me. As one who attends our union assemblies and specific gatherings, I might speak of the loss of class sensibility which I have observed on a number of occasions. I have heard it said that we should be making politics — in as many words, comrades — in an abstract sense, and virtually no one protested. And I, who have been aghast at countless such instances, am dubbed a marxist just because I feel, myself to be a one hundred percent revolutionary ... On returning from exile in France in the days of Primo de Rivera ... I have been a defender of the CNT and the FAI ever since. In spite of my paralysis, I have done time in prison and been taken in manacles to Madrid for my fervent and steadfast championship of our organisations and for fighting those who otherwise have been the case. Angel Pestana, its only delegate to attend the second Comintern Congress in Moscow, in the summer of 1920, could not have been more disappointed by his experience. Arrested and held in Italy for two months on his return journey and then imprisoned in Barcelona for 15 more months, he was prevented for a long time from sharing his conclusions with his comrades but his stay in prison was largely used to prepare his report on Communism. In June 1922, at long last, Pestana was able to put forward his views in a national gathering at Zaragoza, where, by an overwhelming majority ... the CNT duly broke its links with the Comintern. It was ludicrous to expect that a federalist mass organization of this stamp would be prepared to subordinate its initiatives to a small [Spanish Communist Party] that itself was blindly following Moscow’s dictates. Furthermore, Anarcho-Syndicalists were by then aware of the bitter attacks levelled against the Bolsheviks by leading European Anarchists and the growing frustration of many Leftists with the authoritarian and repressive character of the Soviet state. The brief romance with the Comintern of the CNT, the largest working-class force in Spain, thus ended.” [Francisco J. Romero Salvado, “The Comintern Fiasco in Spain: The Borodin Mission and the Birth of the Spanish Communist Party”, pp. 153–177, Revolutionary Russia, Vol. 21, No. 2, p. 166]

As can be seen, Morrow’s comment presents radically false image of what happened during this period. Rather than resort to “fraction work” to “recapture” the CNT, the policies of the CNT in 1919 and 1922 were identical. Moreover, the decision to disaffiliate from the Comintern was made by a confederal meeting of mandated delegates representing the rank-and-file as was the original.
The anarchists did not “capture” the CNT, rather they continued to influence the membership of the organisation as they had always done. Lastly, the concept of “capture” displays no real understanding of how the CNT worked — each syndicate was autonomous and self-managed. There was no real officialdom to take over, just administrative posts which were unpaid and conducted after working hours. To “capture” the CNT was impossible as each syndicate would ignore any unrepresentative minority which tried to do so.

However, Morrow’s comments allow us to indicate some of the key differences between anarchists and Leninists — the CNT rejected the Comintern because it violated its principles of self-management, union autonomy and equality and built party domination of the union movement in its place.

5. Why did the CNT not join the Workers’ Alliance?

Morrow in his discussion of the struggles of the 1930s implies that the CNT was at fault in not joining the Socialist UGT’s “Workers’ Alliance” (Alianza Obrera). These were first put forward by the Marxist-Leninists of the BOC (Workers and Peasants Bloc — later to form the POUM) after their attempts to turn the CNT into a Bolshevik vanguard failed [Paul Preston, The Coming of the Spanish Civil War, p. 154]. Socialist Party and UGT interest began only after their election defeat in 1933. By 1934, however, there existed quite a few alliances, including one in Asturias in which the CNT participated. Nationally, however, the CNT refused to join the UGT and this, he implies, lead to the defeat of the October 1934 uprising (see next section for a discussion of this rebellion).

However, Morrow fails to provide any relevant historical background to understand the CNT’s decision. Moreover, their reasons why they did not join have a striking similarity to Morrow’s own arguments against the “Workers’ Alliance” (which may explain why Morrow does not mention them). In effect, the CNT is

The Friends of Durruti were formed, in March 1937, by anarchist militants who had refused to submit to Communist-controlled “militarisation” of the workers’ militias. During the Maydays — the government attack against the revolution two months later — the Friends of Durruti were notable for their calls to stand firm and crush the counter-revolution. During and after the May Days, the leaders of the CNT asserted that the FoD were Marxists (which was quite ironic as it was the CNT leaders who were acting as Marxists in Spain usually did by joining with bourgeois governments). This was a slander, pure and simple.

The best source to refute claims that the FoD were Marxists (or becoming Marxist) or that they were influenced by, or moved towards, the Bolshevik-Leninists is Agustin Guillamon’s book The Friends of Durruti Group: 1937–1939. Guillamon is a Marxist (of the “left-communist” kind) and no anarchist (indeed he states that the “Spanish Revolution was the tomb of anarchism as a revolutionary theory of the proletariat.” [p. 108]). That indicates that his account can be considered objective and not anarchist wishful thinking. Here we use his work to refute the claims that the FoD were Marxists. Section 9 discusses their links (or lack of them) with the Spanish Trotskyists.

So were the FoD Marxists? Guillamon makes it clear — no, they were not. In his words, “[t]here is nothing in the Group’s theoretical tenets, much less in the columns of El Amigo del Pueblo [their newspaper], or in their various manifestos and handbills to merit the description ‘marxist’ being applied to the Group [by the CNT leadership]. They were simply an opposition to the CNT’s leadership’s collaborationist policy, making their stand within the organisation and upon anarcho-syndicalist ideology.” [p. 61] He stresses this in his conclusion:

“The Friends of Durruti was an affinity group, like many another existing in anarcho-syndicalist quarters. It was not influenced to any extent by the Trotskyists,
their union halls and who arrested CNT and FAI militants the night before the uprising. Moreover, the people organising the revolt had been repressing the CNT for months previously. Obviously attempts by Catalan Fascists to become a government should be supported by socialists, including Trotskyists. Moreover, the UGT and PSOE had worked with the quasi-fascist Primo do Rivera dictatorship during the 1920s. The hypocrisy is clear. So much for the CNT standing “to one side, arguing that this was a ‘struggle between politicians’ and did not concern the workers even though this was a strike against a move to incorporate fascism into the government.”

His comments that “the anarchists … work[ed] trains which brought the Moorish troops under Franco to suppress the Asturias insurrection” is just plain silly. It was not anarchists who ran the trains, it was railway workers — under martial law — some of whom were in the CNT and some of whom were anarchists but, in fact, were mostly in the UGT and some of whom were state socialists of various kinds. Moreover, as noted above the Moorish troops under Franco arrived by sea and not by train. And, of course, no mention of the fact that the CNT-FAI in the strategically key port of Gijon was denied arms by the Socialists and Communists, which allowed the Moorish troops to disembark without real resistance.

Morrow has a lot to answer for.

7. Were the Friends of Durruti Marxists?

It is sometimes claimed that the Friends of Durruti Group which formed during the Spanish Revolution were Marxists or represented a “break” with anarchism and a move towards Marxism. Both these assertions are false. We discuss whether the Friends of Durruti (FoD) represented a “break” with anarchism in the following section. Here we indicate that claims of the FoD being Marxists are false.
UGT to retain their jobs. So far as the Socialists were concerned, the CNT’s appeals for solidarity had fallen on deaf ears...

“In Seville, however, the strike began to take on very serious dimensions... on July 20, a general strike broke out in Seville and serious fighting erupted in the streets. This strike ... stemmed from the walkout of the telephone workers ... pitched battles took place in the countryside around the city between the Civil Guard and the agricultural workers. Maura, as minister of interior, decided to crush the ‘insurrection’ ruthlessly. Martial law was declared and the CNT’s headquarters was reduced to shambles by artillery fire. After nine days, during which heavily armed police detachments patrolled the streets, the Seville general strike came to an end. The struggle in the Andalusian capital left 40 dead and some 200 wounded.” [Murray Bookchin, The Spanish Anarchists, pp. 221–2]

Elsewhere, “[d]uring a Barcelona building strike CNT workers barricaded themselves in and said they would only surrender to regular troops. The army arrived and then machine-gunned them as soon as they surrendered.” [Antony Beevor, The Spanish Civil War, p. 33] In other words, the republican-socialist government repressed the CNT with violence as well as using the law to undermine CNT activities and strikes.

Morrow fails to discuss this history of violence against the CNT. He mentions in passing that the republican-socialist coalition government “[i]n crushing the CNT, the troops broadened the repression to the whole working class.” He states that “[u]nder the cover of putting down an anarchist putsch in January 1933, the Civil Guard ‘mopped up’ various groups of trouble makers. And encounter with peasants at Casas Viejas, early in January 1933, became a cause celebre which shook the government to its foundations.” However, his ac-

sponsible for its failure cannot withstand a close examination of the events. Indeed, by providing the facts which Morrow does not provide we can safely say that the failure of the revolt across Spain rested squarely with the PSOE and UGT. It was badly organised, they failed to co-operate or even communicate with CNT when aid was offered, they relied upon the enemies of the CNT in Catalonia and refused arms to the CNT in both Madrid and Asturias (so allowing the government force, the main force of which landed by sea, easy access to Asturias). All in all, even if the minority of railway workers in the CNT had joined the strike it would have, in all probability, resulted in the same outcome.

Unfortunately, Morrow’s assertions have become commonplace in the ranks of the Left and have become even more distorted in the hands of his Trotskyist readers. For example, we find Nick Wrack arguing that the “Socialist Party called a general strike and there were insurrectionary movements in Asturias and Catalonia, In Madrid and Catalonia the anarchist CNT stood to one side, arguing that this was a ‘struggle between politicians’ and did not concern the workers even though this was a strike against a move to incorporate fascism into the government.” He continues, “[i]n Asturias the anarchist militants participated under the pressure of the masses and because of the traditions of unity in that area. However, because of their abstentionist stupidity, the anarchists elsewhere continued to work, even working trains which brought the Moorish troops under Franco to suppress the Asturias insurrection.” [“Marxism, Anarchism and the State”, pp. 31–7, Militant International Review, no. 46, p. 34]

Its hard to work out where to start in this travesty of history. We will start with the simple errors. The CNT did take part in the struggle in Madrid. As Paul Preston notes, in Madrid the “Socialists and Anarchists went on strike” [The Coming of the Spanish Civil War, p. 174] In Catalonia, as indicated above, the “insurrectionary movement” in Catalonia was organised and lead by Catalan Fascists, who shot upon CNT members when they tried to open
declared martial law — placing the railway workers in a dangerous position. Secondly, as Jerome R. Mintz points out, railway workers “were represented by two competing unions — the Sindicato Nacional Ferroviario of the UGT ... and the CNT-affiliated FNIIFF ... The UGT ... controlled the large majority of the workers. [In 1933] Trifon Gomez, secretary of the UGT union, did not believe it possible to mobilise the workers, few of whom had revolutionary aspirations.” [The Anarchists of Casa Viejas, p. 178] Outside of Catalonia, the majority of the railway workers belonged to the UGT [Sam Dolgoff, The Anarchist Collectives, p. 90f] Asturias (the only area where major troop transportation was needed) does not border Catalonia — apparently the army managed to cross Spain on a rail network manned by a minority of its workers.

However, these points are of little import when compared to the fact that Asturias the main government attack was, as we mentioned above, from a sea borne landing of Foreign Legion and Moroccan troops. Troops from Morocco who land by sea do not need trains. Indeed, The ports of Aviles and Gijon were the principle military bases for launching the repression against the uprising.

The real failure of the Asturias revolt did not lie with the CNT, it lay (unsurprisingly enough) with the Socialists and Communists. Despite CNT pleas the Socialists refused arms, Gjon fell after a bloody struggle and became the main base for the crushing of the entire region (“Arriving at the ports of Aviles and Gijon on October 8, these troops were able to overcome the resistance of the local fishermen and stevedores. The revolutionary committees here were Anarchist dominated. Though they had joined the rising and accepted the slogan UHP [Unity, Proletarian Brothers], the Socialists and Communists of Oviedo clearly distrusted them and had refused arms to their delegate the day before.” [Gabriel Jackson, Op. Cit., p. 157]).

This Socialist and Communist sabotage of Anarchist resistance was repeated in the Civil War, less than two years later.

As can be seen, Morrow’s account of the October Insurrection of 1934 leaves a lot to be desired. The claim that the CNT was re-
repressed by the government which the Socialist Party was a member of.

In other words, and to state the obvious, the socialists had been part of a government which repressed CNT revolts and syndicates, imprisoned and killed their members, passed laws to restrict their ability to strike and use direct action and provided scabs during strikes. Little wonder that Peirats states "[i]t was difficult for the CNT and the FAI to get used to the idea of an alliance with their Socialist oppressors." [Anarchists in the Spanish Revolution, p. 94]

It is only in this context can we understand the events of 1934 and the refusal of the CNT to run into the UGT’s alliance. Morrow, needless to say, does not present this essential context and so the reader cannot understand why the CNT acted as it did in response to Socialist appeals for “unity.” Instead, Morrow implies that CNT-FAI opposition to “workers alliances” were due to them believing “all governments were equally bad.” [p. 29] Perhaps if Morrow had presented an honest account of the repression the republican-socialist government had inflicted on the CNT then the reader could make an informed judgement on why anarchist opposition to the socialist proposals existed. Rather than being sectarian or against labour unity, they had been at receiving end of extensive socialist scabbing and state repression.

Moreover, as well as the recent history of socialist repression and scabbing, there was also the experience of a similar alliance between the CNT and UGT that had occurred in 1917. The first test of the alliance came with a miners strike in Andalusia, and a “CNT proposal for a joint general strike, to be initiated by UGT miners and railway workers, had been rejected by the Madrid Socialists … the miners, after striking for four months, returned to work in defeat.” Little wonder that “the pact was in shreds. It was to be eliminated completely when a general strike broke out in Barcelona over the arrests of the CNT leaders and the assassination of Layret. Once again the CNT called upon the UGT for support. Not only was
sional troops. The other areas of Spain could not be denuded of their garrisons in case there were other revolutionary outbreaks. Franco therefore called upon Colonel Yague to lead a force of Moorish regulars to help re-conquer the province from the rebels.” [The Origins of Franco's Spain, pp. 190–1] Stanley G. Payne gives a more detailed account of the state’s attack:

“Army reinforcements were soon being rushed toward the region ... Eduardo Lopez Ochoa ... head[ed] the main relief column ... he began to make his way eastward [from Galicia] with a modest force of some 360 troops in trucks, half of whom had to be detached on the way to hold the route open. Meanwhile ... in the main Asturian coastal city of Gijon ... reinforcements first arrived by sea on the seventh, followed by larger units from the Moroccan Protectorate on the tenth.” [Spain’s First Democracy, p. 219]

No mention of trains in these accounts, so indicating that Morrow’s assertions are false. The main attack on Asturias, and so the transportation of troops and goods, was by sea, not by trains.

In addition, these historians point to other reasons for the defeat of the revolt — the amazingly bad organisation of it by the Socialist Party. Raymond Carr sums up the overwhelming opinion of the historians when he says that "[a]s a national movement the revolution was a fiasco.” [Op. Cit., p. 633] Hugh Thomas states that the revolt in Catalonia was "crushed nearly as quickly as the general strike had been in Madrid.” [The Spanish Civil War, p. 136] Brenan correctly argues that "[f]rom the moment that Barcelona capitulated and the rising in Madrid fizzled out, the miners were of course doomed.” [Op. Cit., p. 286] The failure of both these revolts was directly attributable to the policies and actions of the Socialists who controlled the “Workers’ Alliances” in both areas. Hence historian Paul Heywood:

"The alliance, to be revolutionary, must be genuinely working class. It must be the result of an agreement between the workers’ organisation, and those alone. No party, however, socialist it may be, can belong to a workers’ alliance, which should be built from its foundations, in the enterprises where the workers struggle. Its representative bodies must be the workers’ committee chosen in the shops, the factories, the mines and the villages. We must reject any agreement on a national level, between National Committees, but rather favour an alliance carried out at the base by the workers themselves. Then and only then, can the revolutionary drive come to life, develop and take root.” [quoted by Abel Paz, Durruti: The People Armed, p. 154]

In the Central Region, Orobon Fernandez argued along similar lines in Madrid’s La Tierra:

"Revolutionary proletarian democracy is direct management of society by the workers, a certain bulwark against
party dictatorships and a guarantee of the development of the revolution’s forces and undertakings... what matters must is that general guidelines are laid down so that these may serve as a platform of the alliance and furnish a combative and constructive norm for the united forces... [These include:] acceptance of revolutionary proletarian democracy, which is to say, the will of the majority of the proletariat, as the common denominator and determining factor of the new order of things... immediate socialisation of the means of production, transportation, exchange, accommodation and finance... federated according to their area of interest and confederated at national level, the municipal and industrial organisations will maintain the principle of unity in the economic structure.” [quoted by Jose Peirats, The CNT in the Spanish Revolution, vol. 1, pp. 74–5]

The May 1936 Saragossa congress of the CNT passed a resolution concerning revolutionary alliances which was obviously based on these arguments. It stated that in order “to make the social revolution an effective reality, the social and political system regulating the life of the country has to be utterly destroyed” and that the “new revolutionary order will be determined by the free choice of the working class.” [quoted by Jose Peirats, Op. Cit., p. 100]

Only such an alliance, from the bottom up and based on workers’ self-management could be a revolutionary one. Indeed, any pact not based on this but rather conducted between organisations would be a pact the CNT and the bureaucracy of the UGT — and remove any possibility of creating genuine bodies of working class self-management (as the history of the Civil War proved). Indeed, Morrow seems to agree:

“The broad character of the proletarian insurrection was explained by the Communist Left (Trotskyist). It devoted

Morrow states that the “backbone of the struggle was broken ... when the refusal of the CNT railroad workers to strike enabled the government to transport goods and troops.” [Morrow, Op. Cit., p. 30] Yet in Asturias (the only area where major troop transportation was needed) the main government attack was from a sea borne landing of Foreign Legion and Moroccan troops — against the port and CNT stronghold (15 000 affiliates) of Gijon (and, we must stress, the Socialists and Communists refused to provide the anarchists of these ports with weapons to resist the troop landings). Hence his claim seems somewhat at odds with the actual events of the October uprising.

Moreover, he seems alone in this claim. No other historian (for example, Hugh Thomas in The Spanish Civil War, Raymond Carr in Spain: 1808–1975, Paul Preston in The Coming of the Spanish Civil War, Gerald Brenan, The Spanish Labyrinth, Gabriel Jackson, The Spanish Republic and the Civil War: 1931–1939) makes this claim. But, of course, these are not Trotskyists and so can be ignored. However, for objective readers such an omission might be significant.

Indeed, when these other historians do discuss the crushing of the Asturias they all stress the fact that the troops came from the sea. For example, Paul Preston notes that “[w]ith CEDA approval, Franco ... insisted on the use of troops from Africa ... they shipped Moorish mercenaries to Asturias.” [The Coming of the Spanish Civil War, p. 177] Gabriel Jackson argues that the government “feared to send in the regular Army because of the strong possibility that the Spanish conscripts would refuse to fire on the revolutionaries — or even desert to them. The War Minister ..., acting on the advice of Generals Franco and Goded, sent in contingents of the Morrish regu-lares and of the Foreign Legions.” These troops arrived “at the ports of Aviles and Gijon.” [The Spanish Republic and the Civil War: 1931–1939, p. 157]

Richard A. H. Robinson argues that it “was soon decided that the [Asturias] rebellion could only be crushed by experienced, profes-
the participation of Anarchist and Trotskyist groups who offered to help make a revolutionary coup in Madrid.” [The Coming of the Spanish Civil War, p. 174] Moreover, “when delegates travelled secretly to Madrid to try to co-ordinate support for the revolutionary Asturian miners, they were rebuffed by the UGT leadership.” [Graham Kelsey, Anarchism in Aragon, p. 73]

Therefore, in two of the three centres of the revolt, the uprising was badly organised. In Catalonia, the revolt was led by fascist Catalan Nationalists who arrested and shot at CNT militants. In Madrid, the CNT backed the strike and was ignored by the Socialists. The revolt itself was badly organised and quickly repressed (thanks, in part, to the actions of the Socialists themselves). Little wonder Peirats asks:

“Although it seems absurd, one constantly has to ask whether the Socialists meant to start a true revolution [in October 1934] in Spain. If the answer is affirmative, the questions keep coming: Why did they not make the action a national one? Why did they try to do it without the powerful national CNT? Is a peaceful general strike revolutionary? Was what happened in Asturias expected, or were orders exceeded? Did they mean only to scare the Radical-CEDA government with their action?” [The Anarchists in the Spanish Revolution, pp 95–6]

As can be seen, this closely follows Durruti’s arguments. Bar the reference of “labour parties,” Morrow’s “indispensable instrument” is identical to Durruti’s and other anarchist’s arguments against taking part in the “Workers’ Alliances” created by the UGT and the creation of genuine alliances from the bottom-up. Thus Morrow faults the CNT for trying to force the UGT to form a real workers’ alliance by not taking part in what Morrow himself admits were “little more than liaison committees between the leadership”! Also, Morrow argues that “[w]ithout developing soviets — workers’ councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie” and he asks “[h]ow could party agreements be the substitute for the necessary vast network of workers’ councils?” [Op. Cit., p. 89 and p. 114]

Which was, of course, the CNT-FAI’s argument. It seems strange that Morrow faults the CNT for trying to create real workers’ councils, the “indispensable instrument” of the revolution, by not taking part in a “party agreements” urged by the UGT which would undermine real attempts at rank-and-file unity from below.
Of course, Morrow’s statement that “labour parties and unions” should be represented by delegates as well as “the shop and street” contradicts claims it would be democratic. After all, that it would mean that some workers would have multiple votes (one from their shop, their union and their party). Moreover, it would mean that parties would have an influence greater than their actual support in the working class — something a minuscule group like the Spanish Trotskyists would obviously favour as would the bureaucrats of the Socialist and Communist Parties. Little wonder the anarchists urged a workers’ alliance made up of actual workers rather than an organisation which would allow bureaucrats, politicians and sects more influence than they actually had or deserved.

In addition, the “Workers’ Alliances” were not seen by the UGT and Socialist Party as an organisation of equals. Rather, in words of historian Paul Preston, “from the first it seemed that the Socialists saw the Alianza Obrera was a possible means of dominating the workers movement in areas where the PSOE and UGT were relatively weak.” [Op. Cit., p. 154] The Socialist Party only allowed regional branches of the Alianza Obrera to be formed only if they could guarantee Party control would never be lost. [Adrian Schubert “The Epic Failure: The Asturian Revolution of October 1934”, in Revolution and War in Spain, Paul Preston (ed.), p. 127] Raymond Carr argues that the Socialists, “in spite of professions to the contrary, wished to keep socialist domination of the Alianza Obrera” [Spain: 1808–1975, pp. 634-5] And only one month after the first alliance was set up, one of its founder members — the Catalan Socialist Union — left in protest over PSOE domination. [Preston, The Coming of the Spanish Civil War, p. 157] In Madrid, the Alianza was “dominated by the Socialists, who imposed their own policy.” [Op. Cit., p. 154] Indeed, as Jose Peirats notes, in Asturias where the CNT had joined the Alliance, “despite the provisions of the terms of the alliance to which the CNT had subscribed, the order for the uprising was issued by the socialists. In Oviedo a specifically socialist, revolutionary committee was secretly at work in Oviedo.

“As usual, the Socialists emerged as unreliable allies of the Anarchists. A revolutionary committee, established by the CNT and FAI to co-ordinate their own operations, was denied direly needed weapons by the UGT. The arms, as it turned out, had been conveniently intercepted by government troops. But even if they had been available, it is almost certain that the Socialists would not have shared them with the Anarchists. Indeed, relationships between the two major sectors of the labour movement had already been poisoned by the failure of the Socialist Youth and the UGT to keep the CNT adequately informed of their plans or confer with Anarchosyndicalist delegates. Despite heavy fighting in Madrid, the CNT and FAI were obliged to function largely on their own. When, at length, a UGT delegate informed the revolutionary committee that Largo Caballero was not interested in common action with the CNT, the committee disbanded.” [Op. Cit., p. 246]

Bookchin correctly states that “Abad de Santillan was to observe with ample justification that Socialist attempts to blame the failure of the October Insurrection on Anarchist abstention was a shabby falsehood” and quotes Santillan:

“Can there be talk of abstention of the CNT and censure of it by those who go on strike without warning our organisation about it, who refuse to meet with the delegates of the National Committee [of the CNT], who consent to let the Lerrous-Gil Robles Government take possession of the arms deposits and let them go unused before handing them over to the Confederation and the FAI?” [Ibid.]

Historian Paul Preston confirms that in Madrid “Socialists and Anarchists went on strike...” and that “the Socialists actually rejected
during this time. The uprising was organised by Catalan fascists who continued to direct their blows against the CNT. As Abel Paz argues, “[f]or the rank and file Catalan worker ... the insurgents ... were actually orienting their action in order to destroy the CNT. After that, how could they collaborate with the reactionary movement which was directing its blows against the working class? Here was the paradox of the Catalan uprising of October 6, 1934.” [Durruti: The People Armed, p. 158]

In other words, during the Catalan revolt, “the CNT had a difficult time because the insurgents were its worst enemies.” [Peirats, The Anarchists in the Spanish Revolution, p. 98] However, the complexity of the actual situation does not bother the reader of Morrow’s work as it is not reported. Little wonder, as Peirats argues, the “absurd contention according to which the confederal proletariat of Catalonia betrayed their brethren in Asturias melts away in the face of a truthful narration of the facts.” [The CNT in the Spanish Revolution, vol. 1, p. 86]

In summary, therefore, Morrow expected the membership of the Catalan CNT and FAI to join in a struggle started and directed by Catalan fascists, whose leaders in the government were arresting and shooting their members, censoring their press, closing their union offices and refusing them a role in the revolt as self-organised forces. We think that sums up the validity of Trotskyism as a revolutionary theory quite well.

In Madrid, the revolt was slightly less farcical. Here the CNT joined the general strike. However, the UGT gave the government 24 hours notice of the general strike, allowing the state to round up the Socialist “leaders,” seize arm depots and repress the insurrection before it got started [Morrow, Op. Cit., p. 30]. As Bookchin argues, the “massive strike in Madrid, which was supported by the entire left, founded for want of arms and a revolutionary sense of direction.” [Op. Cit., p. 245] He continues:

which contained no CNT representatives.” [The CNT in the Spanish Revolution, vol. 1, p. 78] Largo Caballero’s desire for trade union unity in 1936 was from a similar mould — “[t]he clear implication was that proletarian unification meant Socialist take-over” Little wonder Preston states that “[i]f the use that he [Caballero] made of the Alianza Obreras in 1934 had revealed anything, it was that the domination of the working class movement by the UGT meant far more to Largo Caballero than any future prospect of revolution.” [Preston, Op. Cit., p. 270]

As can be seen, the CNT’s position seemed a sensible one given the nature and activities of the “Workers’ Alliance” in practice. Also it seems strange that, if unity was the UGT’s aims, that a CNT call, made by the national plenary in February 1934, for information and for the UGT to clearly and publicly state its revolutionary objectives, met with no reply. [Peirats, Op. Cit., p. 75] In addition, the Catalan Workers’ Alliance called a general strike in March 1934 the day after the CNT’s — hardly an example of workers’ unity. [Norman Jones, “Regionalism and Revolution in Catalonia”, Revolution and War in Spain, Paul Preston (ed.), p. 102]

Thus, the reasons why the CNT did not join in the UGT’s “Workers’ Alliance” are clear. As well as the natural distrust towards organisations that had repressed them and provided scabs to break their strikes just one year previously, there were political reasons for opposing such an alliance. Rather than being a force to ensure revolutionary organisations springing from the workplace, the “Workers’ Alliance” was little more than pacts between the bureaucrats of the UGT and various Marxist Parties. This was Morrow’s own argument, which also provided the explanation why such an alliance would weaken any real revolutionary movement. To requote Morrow, “[w]ithout developing soviets — workers’ councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie.” [Op. Cit., p. 89]
That is exactly what happened in July, 1936, when the CNT did forsake its anarchist politics and joined in a "Workers’ Alliance" type organisation with other anti-fascist parties and unions to set up the “Central Committee of Anti-Fascist Militias” (see section 20). Thus Morrow himself provides the explanation of the CNT’s political rationale for being wary of the UGT’s “Workers’ Alliance” while, of course, refusing to provide the historical context the decision was made.

However, while the CNT’s refusal to join the "Workers’ Alliance" outside of Asturias may have been principled (and sensible), it may be argued that they were the only organisation with revolutionary potential (indeed, this would be the only argument Trotskyists could put forward to explain their hypocrisy). Such an argument would be false for two reason.

Firstly, such Alliances may have potentially created a revolutionary situation but they would have hindered the formation of working class organs of self-management such as workers’ councils (soviets). This was the experience of the Central Committee of Anti-Fascist Militias and of the Asturias revolt — in spite of massive revolutionary upheaval such councils based on delegates from workplace and community assembles were not formed.

Secondly, the CNT policy of “Unity, yes, but by the rank-and-file” was a valid method of “from the bottom up solidarity.” This can be seen from just two examples — Aragon in 1934 and Madrid in 1936. In Aragon, there was a “general strike that had totally paralysed the Aragonese capital throughout April 1935, ending … on 10 May… the Zaragoza general strike had been a powerful advertisement of the value of a united working-class front … [However,] no formal agreement … had been reached in Zaragoza. The pact there has been created on a purely circumstantial basis with a unity of trade-union action achieved in quite specific circumstances and generated to a considerable extent by the workers themselves.” [Graham Kelsey, Anarchism in Aragon, p. 72] In Madrid, April 1936 (in the words of Morrow himself) “the CNT declared a general strike
them in the previous months. This had been the work of the Generalitat’s counsellor for public order, Josep Dencas, leader of the quasi-fascist, ultra-nationalist party Estat Catala.” [The Coming of the Spanish Civil War, p. 176]

This is confirmed by anarchist accounts of the rising. As Peirats points out:

“On the eve of the rebellion the Catalan police jailed as many anarchists as they could put their hands on ... The union offices had been shut for some time. The press censor had completely blacked out the October 6th issue of Solidaridad Obrera ... When the woodworkers began to open their offices, they were attacked by the police, and a furious gunfight ensured. The official radio ... reported ... that the fight had already began against the FAI fascists ... In the afternoon large numbers of police and escamots turned out to attack and shut down the editorial offices of Solidaridad Obrera.” [Peirats, Op. Cit., pp. 98–9]

In other words, the first shots fired in the Catalan revolt were against the CNT by those in revolt against the central government!

Why were the first shots of the revolt directed at the members of the CNT? Simply because they were trying to take part in the revolt in an organised and coherent manner as urged by the CNT’s Regional Committee itself. In spite of the mass arrests of anarchists and CNT militants the night before by the Catalan rebels, the CNT’s Catalan Regional Committee issued a clandestine leaflet that stated that the CNT “must enter the battle in a manner consistent with its revolutionary anarchist principles ... The revolt which broke out this morning must acquire the characteristics of a popular act through the actions of the proletariat ... We demand the right to

in Madrid ... The UGT had not been asked to join the strike, and at first had denounced it ... But the workers came out of all the shops and factories and public services ... because they wanted to fight, and only the anarchists were calling them to struggle.” [Op. Cit., p. 41]

Thus Morrow’s comments against the CNT refusing to join the Workers’ Alliance do not provide the reader with the historical context required to make an informed judgement of the CNT’s decision. Moreover, they seem hypocritical as the CNT’s reasons for refusing to join is similar to Morrow’s own arguments against the Workers’ Alliance. In addition, the CNT’s practical counter-proposal of solidarity from below had more revolutionary potential as it was far more likely to promote rank-and-file unity plus the creation of self-managed organisations such as workers’ councils. The Workers’ Alliance system would have hindered such developments.

6. Was the October 1934 revolt sabotaged by the CNT?

Again, following Morrow, Marxists have often alleged that the Socialist and Workers Alliance strike wave, of October 1934, was sabotaged by the CNT. To understand this allegation, you have to understand the background to October 1934, and the split in the workers’ movement between the CNT and the UGT (unions controlled by the reformist Socialist Party, the PSOE).

Socialist conversion to “revolution” occurred only after the elections of November 1933. In the face of massive and bloody repression (see last section), the CNT-FAI had agitated for a mass abstention at the polling booth. Faced with this campaign, the republicans and socialists lost and all the laws they had passed against the CNT were used against themselves. When cabinet seats were offered to the non-republican (fascist or quasi-fascist) right, in October 1934, the PSOE/UGT called for a general strike. If the CNT, nationally, failed to take part in this – a mistake recognised by many anarchist writers – this was not (as reading Morrow sug-
gests) because the CNT thought “all governments were equally bad” [Morrow, Op. Cit., p. 29], but because of well-founded, as it turned out, mistrust of Socialist aims.

A CNT call, on the 13th of February 1934, for the UGT to clearly and publicly state its revolutionary objectives, had met with no reply. As Peirats argues, “[t]hat the absence of the CNT did not bother them [the UGT and Socialist Party] is clear from their silence in regards to the [CNT’s] National Plenary’s request.” [Peirats, Anarchists in the Spanish Revolution, p. 96] Rhetoric aside, the Socialist Party’s main aim in October seems to have been to force new elections, so they could again form a (mildly reformist) coalition with the Republicans (their programme for the revolt was written by right-wing socialist Indalecio Prieto and seemed more like an election manifesto prepared by the Liberal Republicans than a program for revolutionary change). This was the viewpoint of the CNT, for example. Thus, the CNT, in effect, was to be used as cannon-fodder to help produce another government that would attack the CNT.

As we discussed in the last section, the UGT backed “Workers Alliances” were little better. To repeat our comments again, the Socialist Party (PSOE) saw the alliances as a means of dominating the workers movement in areas where the UGT was weak. The Socialist “Liaison Committee”, for instance, set up to prepare for insurrection, only allowed regional branches to take part in the alliances if they could guarantee Party control (see last section). Raymond Carr argues that the Socialists, “in spite of professions to the contrary, wished to keep socialist domination of the Alianza Obrera.” [Spain: 1808–1975, pp. 634–5] Only one month after the first alliance was set up, one of its founder members — the Socialist Union of Catalonia — left in protest over PSOE domination.

During October the only real centre of resistance was in Asturias (on the Spanish north coast). However, before discussing that area, we must mention Madrid and Barcelona. According to Morrow, Catalonia “should have been the fortress of the uprising” and that

"[t]erribly discredited for their refusal to join the October revolt, the anarchists sought to apologise by pointing to the repression they were undergoing at the time from Companys.” [Op. Cit., p. 30 and p. 32] Morrow fails, however and yet again, to mention a few important facts.

Firstly, the uprising in Catalonia was pushed for and lead by Estat Catala which had “temporary ascendancy over the other groups in the Esquerra” (the Catalan Nationalist Party which was the Catalan government). “Companys felt obliged to yield to Dencas’ [the leader of Estat Catala] demand that Catalonia should take this opportunity for breaking with Madrid.” [Gerald Brenan, The Spanish Labyrinth, pp. 282–3] Estat Catala “was a Youth movement ... and composed mostly of workmen and adventurers — men drawn from the same soil as the sindicatos libres [boss created anti-CNT yellow unions] of a dozen years before — with a violent antagonism to the Anarcho-Syndicalists. It had a small military organisation, the escamots, who wore green uniforms. It represented Catalan Nationalism in its most intransigent form: it was in fact Catalan Fascism.” [Op. Cit., p. 282] Gabriel Jackson calls Estat Catala a “quasi-fascist movement within the younger ranks of the Esquerra.” [The Spanish Republic and the Civil War: 1931–1939, p. 150] Ronald Fraser terms it “the extreme nationalist and proto-fascist” wing of the party. [Blood of Spain, p. 535] Hugh Thomas notes “the fascist colouring of Dencas ideas.” [The Spanish Civil War, p. 135]

In other words, Morrow attacks the CNT for not participating in a revolt organised and led by Catalan Fascists (or, at best, near fascists)!

Secondly, far from being apologetics, the repression the CNT was suffering from Dencas police forces was very real and was occurring right up to the moment of the revolt. In the words of historian Paul Preston:

"[T]he Anarchists bitterly resented the way in which the Generalitat had followed a repressive policy against
was divided into wards, each of which elected delegates to supply and distribution committees... The La Felguera commune... proved to be so successful, indeed so admirable, that surrounding communities invited the La Felguera Anarchists to advise them on reorganising their own social order. Rarely were comparable institutions created by the Socialists and, where they did emerge, it was on the insistence of the rank-and-file workers.” [Op. Cit., p. 250]

In other words, the Asturias uprising saw anarchists yet again applying their ideas with great success in a revolutionary situation. As Bookchin argues:

“Almost alone, the Anarchists were to create viable revolutionary institutions structured around workers’ control of industry and peasants’ control of land. That these institutions were to be duplicated by Socialist workers and peasants was due in small measure to Anarchist example rather than Socialist precept. To the degree that the Asturian miners and industrial workers in various communities established direct control over the local economy and structured their committees along libertarian lines, these achievements were due to Anarchist precedents and long years of propaganda and education.” [Op. Cit., p. 250–1]

Unlike their Socialist and Communist allies, the anarchists in Asturias took the Alianza’s slogan “Unity, Proletarian Brothers” seriously. A key factor in the defeat of the uprising (beyond its isolation due to socialist incompetence elsewhere — see section 6) was the fact that “[s]o far as the Aviles and Gijon Anarchists were concerned... their Socialist and Communist ‘brothers’ were to honour the slogan only in the breach. When Anarchist delegates from the seaports arrived in Oviedo on October 7, pleading for arms to resist the imminent landings of government troops, their requests were totally ignored by Socialists and Communists who, as [historian Gabriel]

It was for these reasons that the CNT and its militias were organised from the bottom up in a self-managed way. It was the only way socialists and a socialist society could be created — that is why anarchists are anarchists, we recognise that a socialist (i.e. libertarian) society cannot be created by authoritarian organisations. As the justly famous Sonvillier Circular argued ”[h]ow could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible.” [quoted by Brian Morris, Bakunin: The Philosophy of Freedom, p. 61] Just as the capitalist state cannot be utilised by the working class for its own ends, capitalist/statist organisational principles such as appointment, autocratic management, centralisation and delegation of power and so on cannot be utilised for social liberation. They are not designed to be used for that purpose (and, indeed, they were developed in the first place to stop it and enforce minority rule!).

As such, Kropotkin was right to argue that it was “a tragic error” to think that “the old organisation, slowly developed in the course of history to crush freedom, to crush the individual, to establish oppression on a legal basis, to create monopolists, to lead minds astray by accustoming them to servitude — will lend itself perfectly to new functions: that it will become the instrument, the framework, to germinate a new life, to establish freedom and equality on economic foundations, to eradicate monopolies, to awaken society and march to the conquest of a future of freedom and equality!” [Modern Science and Anarchy, p. 275]

In addition, to abolish democracy on the pretext that people are not ready for it ensures that it will never exist. Anarchists, in contrast, argue that ”[o]nly freedom or the struggle for freedom can be the school for freedom.” [Malatesta, Op. Cit., p. 59]

Secondly, how can a “socialist consciousness” be encouraged, or continue to exist, without socialist institutions to express it? Such a position is idealistic nonsense, expressing the wishful notion that the social relationships people experiences does not impact on those involved. In effect, Rees is arguing that as long
as the leaders have the “right ideas” it does not matter how an organisation is structured. However, how people develop, the ideas they have in their heads, are influenced by the relations they create with each other — autocratic organisations do not encourage self-management or socialism, they produce bureaucrats and subjects.

An autocratic organisation cannot encourage a socialist consciousness by its institutional life, only in spite of it. For example, the capitalist workplace encourages a spirit of revolt and solidarity in those subject to its hierarchical management and this is expressed in direct action — by resisting the authority of the boss. It only generates a socialist perspective via resistance to it. Similarly with the Red Army. Education programs to encourage reading and writing does not generate socialists, it generates soldiers who are literate. If these soldiers do not have the institutional means to manage their own affairs, a forum to discuss political and social issues, then they remain order takers and any socialist conscious will wither and die.

The Red Army was based on the fallacy that the structure of an organisation is unimportant and it is the politics of those in charge that matter (Marxists make a similar claim for the state, so we should not be too surprised). However, it is no coincidence that bourgeois structures are always hierarchical — self-management is a politically educational experience which erodes the power of those in charge and transforms those who do it. It is to stop this development, to protect the power of the ruling few, that the bourgeois always turn to centralised, hierarchical structures — they reinforce elite rule. You cannot use the same form of organisation and expect different results — they are designed that way for a reason! To twitter on about the Red Army being “filled with a magnificent socialist consciousness” while justifying the elimination of the only means by which that consciousness could survive, prosper and grow indicates a complete lack of socialist politics and any understanding of materialist philosophy.

factory workers and assemblies composed of peasants. The ambience of these fairly decentralised structures, their improvisatory character and libertarian spirit, fostered an almost festive atmosphere in Anarchist-held areas.” [Op. Cit., p. 249] Bookchin quotes an account which compares anarchist La Felguera with Marxist Sama, towns of equal size and separated only by the Nalon river:

"[The October Insurrection] triumphed immediately in the metallurgical and in the mining town… Sama was organised along military lines. Dictatorship of the proletariat, red army, Central Committee, discipline. authority … La Felguera opted for communismo libertario: the people in arms, liberty to come and go, respect for the technicians of the Duro-Felguera metallurgical plant, public deliberations of all issues, abolition of money, the rational distribution of food and clothing. Enthusiasm and gaiety in La Felguera; the sullenness of the barracks in Sama. The bridges [of Sama] were held by a corp of guards complete with officers and all. No one could enter or leave Sama without a safe-conduct pass, or walk through the streets without passwords. All of this was ridiculously useless, because the government troops were far away and the Sama bourgeoisie disarmed and neutralised… The workers of Sama who did not adhere to the Marxist religion preferred to go to La Felguera, where at least they could breathe. Side by side there were two concepts of socialism: the authoritarian and the libertarian; on each bank of the Nalon, two populations of brothers began a new life: with dictatorship in Sama; with liberty in La Felguera.” [Op. Cit., pp. 249–50]

Bookchin notes that "[i]n contrast to the severely delimited Marxist committee in Sama, La Felguera workers met in popular assembly, where they socialised the industrial city’s economy. The population
revolt has not been as widely known as it should be and this is an ideal opportunity to discuss it. Combined with the other insurrections of the 1930s it clearly indicates that anarchism is a valid form of revolutionary theory.

While the CNT was the minority union in Asturias, it had a considerable influence of its own (the CNT had over 22,000 affiliates in the area and the UGT had 40,000). The CNT had some miners in their union (the majority were in the UGT) but most of their membership was above ground, particularly in the towns of Aviles and Gijon. The regional federation of the CNT had joined the Socialist Party dominated “Alianza Obrera,” unlike the other regional federations of the CNT.

When the revolt started, the workers organised attacks on barracks, town halls and other sources of state authority (just as the CNT revolts of 1932 and 1933 had). Bookchin indicates that "[s]tructurally, the insurrection was managed by hundreds of small revolutionary committees whose delegates were drawn from unions, parties, the FAI and even anti-Stalinist Communist groups. Rarely, if at all, were there large councils (or 'soviets') composed of delegates from factories." [The Spanish Anarchists, p. 249] This, incidentally, indicates that Morrow’s claims that in Asturias “the Workers’ Alliances were most nearly like soviets, and had been functioning for a year under socialist and Communist Left leadership” are false. [Op. Cit., p. 31] The claims that the Asturias uprising had established soviets was simply Communist and government propaganda.

In fact, the Socialists “generally functioned through tightly knit committees, commonly highly centralised and with strong bureaucratic proclivities. In Asturias, the UGT tried to perpetuate this form wherever possible ... But the mountainous terrain of Asturias made such committees difficult to co-ordinate, so that each one became an isolated miniature central committee of its own, often retaining its traditional authoritarian character.” The anarchists, on the other hand, “favoured looser structures, often quasi-councils composed of

Moreover, one of the basic principles of the anarchist militia was equality between all members. Delegates received the same pay, ate the same food, wore the same clothes as the rest of the unit. Not so in the Red Army. Trotsky thought, when he was in charge of it, that inequality was “in some cases ... quite explicable and un-avoidable” and that "[e]very Red Army warrior fully accepts that the commander of his unit should enjoy certain privileges as regards lodging, means of transport and even uniform.” [“More Equality!”, How the Revolution Armed, vol II, p. 116]

Of course, Trotsky would think that, being the head commander of the Army. Unfortunately, because soldier democracy had been abolished by decree, we have no idea whether the rank and file of the Red Army agreed with him. For Trotsky, privilege “is, in itself, in certain cases, inevitable” but “[o]stentatious indulgence in privilege is not just evil, it is a crime.” Hence his desire for “more” equality rather than equality — to aim for “eliminating the most abnormal [!] phenomena, softening [!] the inequality that exists” rather than abolish it as they did in the CNT militias. [Op. Cit., p. 117 and p. 119]

But, of course, such inequalities that existed in the Red Army are to be expected in an autocratically run organisation. The inequality inherent in hierarchy, the inequality in power between the order giver and order taker, will, sooner or later, be reflected in material inequality. As happened in the Red Army (and all across the “workers’ state”). All Trotsky wanted was for those in power to be respectable in their privilege rather than showing it off. The anarchist militias did not have this problem because being libertarian, delegates were subject to recall and power rested with the rank and file, not an elected government.

As another irony of history, Morrow quotes a Bolshevik-Leninist leaflet (which “points the road”) as demanding "[e]qual pay for officers and soldiers.” [Op. Cit., p. 191] Obviously these good Trotskyists had no idea what their hero actually wrote on this subject or did when in power. We have to wonder how long their egalitarian
demands would have survived once they had acquired power — if the experience of Trotsky in power is anything to go by, not very long.

Trotsky did not consider how the abolition of democracy and its replacement with an autocratic system would effect the morale or consciousness of the soldiers subject to it. He argued that in the Red Army “the best soldier does not mean at all the most submissive and uncomplaining.” Rather, “the best soldier will nearly always be sharper, more observant and critical than the others... by his critical comments, based on facts accessible to all, he will pretty often undermine the prestige of the commanders and commissars in the eyes of the mass of the soldiers.” However, not having a democratic army the soldiers could hardly express their opinion other than rebellion or by indiscipline. Trotsky, however, adds a comment that makes his praise of critical soldiers seem less than sincere. He states that “counter-revolutionary elements, agents of the enemy, make conscious and skilful use of the circumstances I have mentioned [presumably excessive privilege rather than critical soldiers, but who can tell] in order to stir up discontent and intensify antagonism between rank and file and the commanding personnel.”

"Self-discipline meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander." [Op. Cit., p. 96]

Thus the Makhnovists indicate the validity of anarchist theory. They organised the self-defence of their region, refused to form of a “revolutionary” government and so the life of the region, its social and revolutionary development followed the path of self-activity of the working people who did not allow any authorities to tell them what to do. They respected freedom of association, speech, press and so on while actively encouraging workers’ and peasants’ self-management and self-organisation.

Moving to the Spanish movement, the various revolts and uprisings organised by the CNT and FAI that occurred before 1936 were marked by a similar revolutionary developments as the Makhnovists. We discuss the actual events of the revolts in 1932 and 1933 in more detail in section 14 and so will not repeat ourselves here. However, all were marked by the anarchist movement attacking town halls, army barracks and other sources of state authority and urging the troops to revolt and side with the masses (the anarchists paid a lot of attention to this issue — like the French syndicalists they produced anti-militarist propaganda arguing that soldiers should side with their class and refuse orders to fire on strikers and to join popular revolts). The revolts also saw workers taking over their workplaces and the land, trying to abolish capitalism while trying to abolish the state. In summary, they were insurrections which combined political goals (the abolition of the state) and social ones (expropriation of capital and the creation of self-managed workplaces and communes).

The events in Asturias in October 1934 gives a more detailed account of nature of these insurrections. The anarchist role in this
important role in it. As Arshinov argues, “[w]hoever studies the Russian Revolution should learn it [Trotsky’s order no. 1824] by heart.” [Op. Cit., p. 123] Obviously the Bolsheviks considered that soviet system was threatened if soviet conferences were called and the “dictatorship of the proletariat” was undermined if the proletariat took part in such events.

In addition, the Makhnovists “full applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power.” Indeed, the “only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statists was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people.” [Op. Cit., p. 153 and p. 154]

The army itself, in stark contrast to the Red Army, was fundamentally democratic (although, of course, the horrific nature of the civil war did result in a few deviations from the ideal — however, compared to the regime imposed on the Red Army by Trotsky, the Makhnovists were much more democratic movement). Arshinov proves a good summary:

“The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline.

Voluntary enlistment meant that the army was composed only of revolutionary fighters who entered it of their own free will.

The electoral principle meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.

“[The demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war. Thus on all sides the masses were pushed away gradually from actual participation in the leadership of the country.” [The Revolution Betrayed, p. 90]

Obviously Trotsky had forgotten who created the regime in the Red Army in the first place! He also seems to have forgotten that after militarising the Red Army, he turned his power to militarising workers (starting with the railway workers). He also forgets that Lenin had been arguing that workers’ must “unquestioningly obey the single will of the leaders of labour” from April 1918 along with granting “individual executives dictatorial power (or ‘unlimited powers’)” and that “the appointment of individuals, dictators with unlimited powers” was, in fact, “in general compatible with the fundamental principles of Soviet government” simply because “the history of revolutionary movements” had “shown” that “the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes.” He notes that “[u]ndoubtedly, the dictatorship of individuals was compatible with bourgeois democracy.” [ “The Immediate Tasks of the Soviet Government”, Collected Works, vol. 27, pp. 267–9]

In other words, Lenin urged the creation of, and implemented, bourgeois forms of workplace management based on the appointment of managers from above. To indicate that this was not in contradiction with Soviet principles, he points to the example of bourgeois revolutions! As if bourgeois methods do not reflect bourgeois interests and goals. In addition, these “dictators” were given the same autocratic powers Trotsky claimed the demobilisation of the Red Army four years later had “persistently introduced
everywhere.” Yes, “on all sides the masses were pushed away gradually from actual participation in the leadership of the country” but the process had started immediately after the October Revolution and was urged and organised by Lenin and Trotsky before the Civil War had started.

Lenin’s support for appointment of (”dictatorial”) managers from above makes Trotsky’s 1922 comment that the “Red Army was built from above, in accordance with the principles of the dictatorship of the working class” take on a new light. [”The Path of the Red Army”, How the Revolution Armed, vol. I, p. 8] After all, Lenin argued for an economy system built from above via the appointment of managers before the start of the Civil War. The Red Army was created from above via the appointment of officers before the start of the Civil War. Things had certainly changed since Lenin had argued in The State and Revolution that ”[a]ll officials, without exception, [would be] elected and subject to recall at any time.” This would “serve as the bridge between capitalism and socialism.” [The Essential Lenin, p. 302] One major difference, given Trotsky’s rationales, seems to be that the Bolsheviks were now in power and so election and recall without exception could be forgotten and replaced by appointment.

In summary, Trotsky’s argument against functional democracy in the Red Army could, and was, used to justify the suppression of any democratic decision or organisation of the working class the Bolshevik government disapproved of. He used the same argument, for example, to justify the undermining of the Factory Committee movement and the struggle for workers’ control in favour of one-man management — the form of management in the workplace was irrelevant as the workers’ were now citizens of a workers’ state and under a workers’ government (see section 17). Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic for long (and to remain the sovereign power in society, any state will have to eliminate it or, at themselves to propagating the idea of free communes.” [Op. Cit., p. 87] Makhno played an important role in abolishing the holdings of the landed gentry. The local soviet and their district and regional congresses equalised the use of the land between all sections of the peasant community. [Op. Cit., pp. 53–4]

Moreover, the Makhnovists took the time and energy to involve the whole population in discussing the development of the revolution, the activities of the army and social policy. They organised numerous conferences of workers’, soldiers’ and peasants’ delegates to discuss political and social issues. They organised a regional congress of peasants and workers when they had liberated Aleksandrovsk. When the Makhnovists tried to convene the third regional congress of peasants, workers and insurgents in April 1919 and an extraordinary congress of several regions in June 1919 (including Red Army soldiers) the Bolsheviks viewed them as counter-revolutionary, tried to ban them and declared their organisers and delegates outside the law. For example, Trotsky issued order 1824 which stated the June 1919 congress was forbidden, that to inform the population of it was an act of high treason and all delegates should be arrested immediately as were all the spreading the call. [Op. Cit., p. 98–105 and p. 122–31]

The Makhnovists replied by holding the conferences anyway and asking ”[c]an there exist laws made by a few people who call themselves revolutionaries, which permit them to outlaw a whole people who are more revolutionary than they are themselves?” and ”[w]hose interests should the revolution defend: those of the Party or those of the people who set the revolution in motion with their blood?” Makhno himself stated that he “consider[ed] it an inviolable right of the workers and peasants, a right won by the revolution in motion with their blood.” [Op. Cit., p. 103 and p. 129] These actions by the Bolsheviks should make the reader ponder if the elimination of workers’ democracy during the civil war can fully be explained by the objective conditions facing Lenin’s government or whether Leninist ideology played an
If we look at the Russian Revolution, we see anarchist theory gain its most wide scale influence in those parts of the Ukraine protected by the Makhnovist army. The Makhnovists fought against White (pro-Tsarist), Red and Ukrainian Nationalists in favour of a system of “free soviets” in which the “working people themselves must freely choose their own soviets, which are to carry out the will and desires of the working people themselves. that is to say, administrative, not ruling councils.” As for the economy, the “land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised.” [“Some Makhnovist Proclamations”, contained in Peter Arshinov, *The History of the Makhnovist Movement*, p. 273]

To ensure this end, the Makhnovists refused to set up governments in the towns and cities they liberated, instead urging the creation of free soviets so that the working people could govern themselves. Taking the example of Aleksandrovsk, once they had liberated the city the Makhnovists “immediately invited the working population to participate in a general conference … it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations … The first conference was followed by a second. The problems of organising life according to principles of self-management by workers were examined and discussed with animation by the masses of workers, who all welcomed this ideas with the greatest enthusiasm … Railroad workers took the first step … They formed a committee charged with organising the railway network of the region … From this point, the proletariat of Aleksandrovsk began systematically to the problem of creating organs of self-management.” [Op. Cit., p. 149]

They also organised free agricultural communes which “[a]dmittedly .. . were not numerous, and included only a minority of the population .. . But what was most precious was that these communes were formed by the poor peasants themselves. The Makhnovists never exerted any pressure on the peasants, confining

Instead of seeing socialism as a product of free association, of working class self-organisation from the bottom up by self-managed organisations, Trotsky saw it as a centralised, top-down system. Of course, being a democrat of sorts he saw the Bolshevik Government as being elected by the mass of the population (or, more correctly, he saw it being elected by the national congress of soviets). However, his vision of centralisation of power provided the rationale for destroying functional democracy in the grassroots — and without healthy roots, any plant will wither and die. Little wonder, then, that the Bolshevik experiment proved such a disaster — yes, the civil war did not help but the logic of Bolshevism has started to undermine working class self-management before is started.

Thus Trotsky’s argument that the democratic nature of a workers’ army or militia is irrelevant because a “workers’ state” exists is flawed on many different levels. And the experience of Trotsky in power indicates well the poverty of Trotskyism and Morrow’s criticism of the CNT — his suggestion for a self-managed militia is pure anarchism with nothing to do with Leninism and the experience of Bolshevism in power.

12. What is ironic about Morrow’s vision of revolution?

Equally ironic as Morrow’s comments concerning democratic militias (see last section) is his argument that the revolution needed to “give the factory committees, militia committees, peasant committees, a democratic character, by having them elected by all workers in each unit; to bring together these elected delegates in village, city, regional councils … [and] a national congress.” [Op. Cit., p. 100]

Such a position is correct, such developments were required to ensure the success of the revolution. However, it is somewhat
ironic that a Trotskyist would present them as somehow being opposed to anarchism when, in fact, they are pure anarchism. Indeed, anarchists were arguing in favour of workers’ councils more than five decades before Lenin discovered the importance of the Russian Soviets in 1917. Moreover, as we will indicate, what is even more ironic is the fact that Trotskyism does not actually see these organs as an expression of working class self-management and power but rather as a means of the party to take power. In addition, we must also note that it was Lenin and Trotsky who helped undermine the Russian workers’ factory committees, militia committees and so on in favour of party rule. We will discuss each of these ironies in turn.

Firstly, as noted, such Morrow’s stated position is exactly what Bakunin and the anarchist movement had been arguing since the 1860s. To quote Bakunin:

“the federative alliance of all working men’s associations ... constitute the Commune ... all provinces, communes and associations ... by first reorganising on revolutionary lines ... [will] constitute the federation of insurgent associations, communes and provinces ... [and] organise a revolutionary force capable defeating reaction ... [and for] self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation... “ [Michael Bakunin: Selected Writings, p. 170–2]

“The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.” [Op. Cit., p. 206]

class self-management. Indeed, in a letter written in 1937, Trotsky clarified what he meant: “Because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.” [our emphasis, Writings 1936–7, p. 514]

Hence the usual Trotskyist lament concerning the CNT is that the anarchist leaders did not seize power themselves and create the so-called “dictatorship of the proletariat” (i.e. the dictatorship of those claiming to represent the proletariat). A strange definition of “workers’ power,” we must admit. The “leaders” of the CNT and FAI quite rightly rejected such a position — unfortunately they also rejected the anarchist position at the same time, as we will see.

Trotsky states that the “leaders of the CNT ... explained their open betrayal of the theory of anarchism by the pressure of ‘exceptional circumstances’ ... Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ Every serious revolutionary organisation, however, prepares precisely for ‘exceptional circumstances.’” [“Stalinism and Bolshevism”, Op. Cit., pp. 423–4]

Trotsky is, for once, correct. We will ignore the obvious fact that his own (and every other Leninist) account of the degeneration of the Russian Revolution into Stalinism is a variation of the “exceptional circumstances” excuse and turn to his essential point. In order to evaluate anarchism and the actions of the CNT we have to evaluate all the revolutionary situations it found itself in, not just July, 1936 in Catalonia. This is something Trotsky and his followers seldom do — for reasons that will become clear.

Obviously space considerations does not allow us to discuss every revolutionary situation anarchism faced. We will, therefore, concentrate on the Russian Revolution and the activities of the CNT in Spain in the 1930s. These examples will indicate that rather than signifying the failure of anarchism, the actions of the CNT during the Civil War indicate the failure of anarchists to apply anarchist theory and so signifies a betrayal of anarchism. In other words, that anarchism is a valid form of revolutionary politics.
Two points, Mujeres Libres was a nation wide organisation which aimed to end sexism by collective action inside and outside the anarchist movement by organising women to achieve their own liberation (see Martha Ackelsberg’s, *Free Women of Spain* for more details). Thus its aims and mode of struggle was “class-wide” — as anyone familiar with that organisation and its activities would know. Secondly, why is equality between men and women important? Because inequality reduces the freedom of women to control their own lives, in a word, it hinders they autonomy. Any campaign against sexism is based on the banner of autonomy — that Green decides to forget this suggests a lot about his politics.

Thus Green gets it wrong again and again. Such is the quality of most Leninist accounts of the Spanish revolution.

20. Does the experience of the Spanish Revolution indicate the failure of anarchism or the failure of anarchists?

Marxists usually point to the events in Catalonia after July 19th, 1936, as evidence that anarchism is a flawed theory. They bemoan the fact that, when given the chance, the anarchists did not “seize power” and create a “dictatorship of the proletariat.” To re-quote Trotsky:

“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.” [*Stalinism and Bolshevism,* *Writings 1936–7*, p. 424]

However, as we argued in section 12, the Trotskyist “definition” of ‘workers’ power’ and “proletarian dictatorship” is, in fact, party power, party dictatorship and party sovereignty — not working

Here is Kropotkin presenting the same vision:

“what means can the State provide to abolish this [class] monopoly that the working class could not find in its own strength and groups? ... what advantages could the State provide for abolishing these same privileges? Could its governmental machine, developed for the creation and upholding of these privileges, now be used to abolish them? Would not the new function require new organs? And these new organs would they not have to be created by the workers themselves, in their unions, their federations, completely outside the State? ... independent Communes for the territorial groupings, and vast federations of trade unions for groupings by functions — the two interwoven and providing support to each to meet the needs of society — ... groupings by personal affinities ... allow the satisfaction of all social needs: consumption, production and exchange, communications, sanitary arrangements, education, mutual protection against aggression, mutual aid, territorial defence” [*Modern Science and Anarchy*, pp. 164–5]

“the complete independence of the Communes, the Federation of free communes and the social revolution in the communes, that is to say the formation of associated productive groups in place of the state organisation.” [quoted by Camillo Berneri, “Peter Kropotkin: His Federalist Ideas”, *The Raven*, Vol. 8, No. 2, p. 275]

Bakunin also mentions that those defending the revolution would have a say in the revolutionary structure — the “Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Council composed of ... delegates
from each barricade . . . vested with plenary but accountable and removable mandates.” [Op. Cit., p. 171] This obviously parallels the democratic nature of the CNT militias.

Interestingly enough, Marx commented that “odd barricades, these barricades of the Alliance [Bakunin’s anarchist organisation], where instead of fighting they spend their time writing mandates.” [Marx, Engels and Lenin, Anarchism and Anarchosyndicalism, p. 111] Obviously the importance of militia self-management was as lost on him as it was on Lenin and Trotsky — under Marx’s state would its defenders just be cannon-fodder, obeying their government and officers without the ability to help determine the revolution they were fighting for? Apparently so. Moreover, Marx quotes Bakunin’s support for “responsible and recallable delegates, vested with their imperative mandates” without commenting on the fact Bakunin predicts those features of the Paris Commune Marx praised in his Civil War in France by a number of years. Looks like Morrow is not the first Marxist to appropriate anarchist ideas without crediting their source.

As can be seen, Morrow’s suggestion on how to push the Spanish Revolution forward just repeats the ideas of anarchism. Any one familiar with anarchist theory would not be surprised by this as they would know that we have seen a free federation of workplace and communal associations as the basis of a revolution and, therefore, a free society since the time of Proudhon. Thus Morrow’s “Trotskyist” vision of a federation of workers’ council actually reproduces basic anarchist ideas, ideas which pre-date Lenin’s support for soviets as the basis of his “workers’ state” by over half a century (we will indicate the fundamental difference between the anarchist vision and the Trotskyist in due course).

As an aside, and as we noted in section H.1.4, these quotes by Bakunin and Kropotkin make a mockery of Lenin’s assertion that anarchists do not analysis "what to put in the place of what has been destroyed [i.e. the old state machine] and how" [Essential Works of Lenin, p. 362] Anarchists have always suggested a clear surprising that this International doesn’t even seem to be been missed by current-day anarchists.” [Op. Cit.]

Actually, the anarchist International came out of the First International and was made up of the libertarian wing of that association. Moreover, in 1936 the CNT was a member of the International Workers’ Association founded in 1922 in Berlin. The IWA was small, but this was due to state and Fascist repression. For example, the German FAUD, the Italian USI and the FORA in Argentina had all been destroyed by fascist governments. However, those sections which did exist (such as the Swedish SAC and French CGTSR) did send aid to Spain and spread CNT and FAI news and appeals (as did anarchist groups across the world). The IWA still exists today, with sections in over a dozen countries (including the CNT in Spain). In addition, the International Anarchist Federation also exists, having done so for a number of decades, and also has sections in numerous countries. In other words, Green either knows nothing about anarchist history and theory or he does and is lying.

He attacks the lack of CNT support for Moroccan independence during the war and states “[t]hey just didn’t seem that concerned with the issue during the Civil War.” Actually, many anarchists did raise this important issue. Just one example, Camillo Berneri argued that “we must intensify our propaganda in favour of Morocco autonomy.” [What can we do?, Cienfuegos Press Anarchist Review, no. 4, p. 51] Thus to state “the anarchists … didn’t seem that concerned” is simply false. Many anarchists were and publicly argued for it. Trapped as a minority force in the government, the CNT could not push through this position.

Green also points out that inequality existed between men and woman. He even quotes the anarchist women’s organisation Mujeres Libres to prove his point. He then notes what the Bolsheviks did to combat sexism, "[a]mong the methods of influence was mobilising the local population around social measures promulgated throughout the country. The banner of the struggle was not auton-
Also, as noted above, we are well aware that a revolution is a process ("By revolution we do not mean just the insurrectionary act" [Malatesta, Errico Malatesta: His Life and Ideas, p. 156]) which will take some time to fully develop once the state has been destroyed and capital expropriated. Green’s assertion that the Spanish Revolution refutes anarchist theory is clearly a false one.

Green argues that a “vast organisational task faces the oppressed masses who are rising up to eliminate the old exploiting system, but anarchist theory just brushes aside this problem — co-ordination between collective would supposedly be easily accomplished by ‘mutual aid’ or ‘voluntary co-operation’ or, if absolutely need be, by the weakest possible federation.” [Op. Cit.] As can be seen from our discussion, such a claim is a false one. Anarchists are well aware of difficulties involved in a revolution. That is why we stress that revolution must come from below, by the actions of the oppressed themselves — it is far too complex to left to a few party leaders to decree the abolition of capitalism. Moreover, as proven above anarchist theory and practice is well aware of the need for organisation, co-operation and co-ordination. We obviously do not “brush it aside.” This can be seen from Green’s reference to “the weakest possible federation.” This obviously is a cover just in case the reader is familiar with anarchist theory and history and knows that anarchists support the federation of workers’ associations and communes as the organisational framework of a revolution and of the free society.

This distorted vision of anarchism even extents to other aspects of the revolution. Green decides to attack the relative lack of international links the Spanish anarchist movement had in 1936. He blames this on anarchist theory and states “again the localist anarchist outlook would go against such preparations. True, the anarchists had had their own International association in the 1870s, separate from the original First International and the Marxists. It had flopped so badly that the anarchists never tried to resuscitate it and seem to prefer to forget about it. Given anarchist localism, it is not answer to what we should “replace” the state with — namely free federations of working class organisations created in the struggle against capital and state. To state otherwise is to either be ignorant of anarchist theory or seek to deceive.

Some anarchists like Bakunin and the anarcho-syndicalists and collectivists saw these organisations being based primarily on libertarian labour unions complemented by whatever organisations were created in the process of revolution ("The future society must be nothing else than the universalisation of the organisation that the International has formed for itself” — “The Sonvillier Circular” echoing Bakunin, quoted by Brian Morris, Bakunin: The Philosophy of Freedom, p. 61] Others like Kropotkin and anarcho-communists saw it as a free federation of organisations created by the process of revolution itself. While anarchists did not present a blueprint of what would occur after the revolution (and rightly so) they did provide a general outline in terms of a decentralised, free federation of self-managed workers’ associations as well as linking these future forms of working class self-government with the forms generated in the current class struggle in the here and now.

Similarly, Lenin’s other assertion that anarchists do not study “the concrete lessons of previous proletarian revolutions” [Ibid.] is equally baseless, as any one reading, say, Kropotkin’s work would soon realise (for example, The Great French Revolution, Modern Science and Anarchy or his pamphlet Revolutionary Government). Starting with Bakunin, anarchists analysed the experiences of the Paris Commune and the class struggle itself to generalise political conclusions from them (for example, the vision of a free society as a federation of workers’ associations is clearly a product of analysing the class struggle and looking at the failures of the Commune). Given that Lenin states in the same work that “anarchists had tried to claim the Paris Commune as their ‘own’” [p. 350] suggests that anarchists had studied the Paris Commune and he was aware of that fact. Of course, Lenin states that we had “failed to give ... a true solution” to its lessons — given that the so-
olution anarchists proposed was a federation of workers councils to smash the state and defend the revolution. His comments seem strange as this, according to *The State and Revolution*, is the “Marxist” solution as well (in fact, as we will soon see, Lenin played lip service to this and instead saw the solution as government by his party rather than the masses as a whole).

Thus, Morrow’s vision of what was required for a successful revolution parallels that of anarchism. We shall now discuss where and how they differ.

The essential difference between the anarchist and Trotskyist vision of workers’ councils as the basis of a revolution is what role these councils should play. For anarchists, these federations of self-managed assemblies is the actual framework of the revolution (and the free society it is trying to create). As Murray Bookchin puts it:

“There can be no separation of the revolutionary process from the revolutionary goal. A society based on self-administration must be achieved by means of self-administration ... Assembly and community must arise from within the revolutionary process itself; indeed, the revolutionary process must be the formation of assembly and community, and with it, the destruction of power. Assembly and community must become ‘fighting words,’ not distinct panaceas. They must be created as modes of struggle against the existing society, not as theoretical or programmatic abstractions... The factory committees ... must be managed directly by workers’ assemblies in the factories... neighbourhood committees, councils and boards must be rooted completely in the neighbourhood assemble. They must be answerable at every point to the assembly, they and their work must be under continual review by the assembly; and finally, their members must be subject to immediate recall by the assembly. The specific gravity success of the federation cannot be evaluated using Green’s source. Thus Green uses data which is, frankly, a joke to dismiss anarchism. This says a lot about the quality of his critique.

As far as the Castille federation goes, Robert Alexander notes “Another feature of the work of regional federation was that of aiding the less fortunate collectives. Thus, within a year, it spent 2 000 000 pesetas on providing chemical fertilisers and machines to poorer collectives, the money from this being provided by the sale of products of the wealthier ones.” [*The Anarchists in the Spanish Civil War*, vol. 1, p. 438] He also quotes an article from an anarchist paper which states “there does not yet exist sufficient solidarity” between rich and poor collectives and that notes “the difficulties which the State has put in the way of the development of the collectives.” [Op. Cit., p. 439] Thus the CNT was open about the difficulties it was experiencing in the collectives and the problems facing it.

Secondly, the collectives may have been in existence for about one year before the Stalinists attacked but their federations had not. The Castille federation was born in April, 1937 (the general secretary stated in July of that year “we have fought terrible battles with the Communists” [Op. Cit., p. 446]). The Aragon federation was created in February 1937 (the Council of Aragon was created in October 1936) and the Communists under Lister attacked in August 1937. The Levante federation was formed a few weeks after the start of the war and the attacks against them started in March 1937. The longest period of free development, therefore, was only seven months and not a year. Thus the federations of collectives — the means seen by anarchist theory to co-ordinate economic and social activities and promote equality — existed for only a few months before they were physically attacked by the state. Green expects miracles if he thinks history can be nullified in half a year.

Thirdly, anarchists do not think communist-anarchism, in all its many aspects, is possible overnight. Anarchists are well aware, to quote Kropotkin, the “revolution may assume a variety of characters and differing degrees of intensity among different peoples.” [No
or a conscious lie. We quoted numerous Spanish anarchist documents that stated the exact opposite to Green’s assertions. The Spanish anarchists were well aware of the need for self-managed communities to federate. Indeed, the federation of collectives fits exactly pre-war CNT policy and anarchist theory (see sections 15 and 18 for details). To re-quote a Spanish Anarchist pamphlet, the village commune “will federate with its counterparts in other localities and with the national industrial federations.”[Issac Puente, Libertarian Communism, p. 26] Thus what Green asserts the CNT and FAI did not see the need of, they in fact did see the need for and argued for their creation before the Civil War and actually created during it! Green’s comments indicate a certain amount of “doublethink” — he maintains that the anarchists rejected federations while acknowledging they did federate.

However, historical differences are the product of centuries and so it will take some time to overcome them, particularly when such changes are not imposed by a central government. In addition, the collectives were not allowed to operate freely and were soon being hindered (if not physically attacked) by the state within a year. Green dismisses this recognition of reality by arguing “one could argue that the collectives didn’t have much time to develop, being in existence for only two and a half years at most, with the anarchists only having one year of reasonably unhindered work, but one could certainly not argue that this experience confirmed anarchist theory.” However, his argument is deeply flawed for many reasons.

Firstly, we have to point out that Green quotes Miller who is using data from collectives in Castille. Green, however, was apparently discussing the collectives of Aragon and the Levante and their respective federations (as was Miller). To state the obvious, it is hard to evaluate the activities of the Aragon or Levante federation using data from collectives in the Castille federation. Moreover, in order to evaluate the redistributive activities of the federations you need to look at the differentials before and after the federation was created. The data Miller uses does not do that and so the lack of of society, in short, must be shifted to its base — the armed people in permanent assembly.”[Post-Scarcity Anarchism, pp. 167–9]

Thus the anarchist social revolution sees workers’ councils as organs of working class self-management, the means by which they control their own lives and create a new society based on their needs, visions, dreams and hopes. They are not seen as means by which others, the revolutionary party, seized power on behalf of the people as Trotskyists do.

Harsh words? No, as can be seen from Morrow who is quite clear on the role of working class organisation — it is seen purely as the means by which the party can take power. As he argues, there is “no magic in the soviet form: it is merely the most accurate, most quickly reflecting and responsively changing form of political representation of the masses. . . It would provide the arena in which the revolutionary party can win the support of the working class.”[Op. Cit., p. 136]

He states that initially the “reformist majority in the executive committee would decline the assumption of state power. But the workers could still find in the soviets their natural organs of struggle until the genuinely revolutionary elements in the various parties banded together to win a revolutionary majority in the congress and establish a workers’ state.” In other words, the “workers’ state, the dictatorship of the proletariat … can only be brought into existence by the direct, political intervention of the masses, through the factory and village councils (soviets) at that point where a majority in the soviets is wielded by the workers’ party or parties which are determined to overthrow the bourgeois state. Such was the basic theoretical contribution of Lenin.”[Op. Cit., p. 100 and p. 113]

From an anarchist perspective, this indicates well the fundamental difference between anarchism and Trotskyism. For anarchists, the existence of an “executive committee” indicates that the workers’ council do not, in fact, have power in society — rather it is
the minority in the executive committee who have been delegated power. Rather than govern themselves and society directly, workers are turned into voters implementing the decisions their leaders have made on their behalf. If revolutionary bodies like workers’ councils did create a “workers’ state” (as Morrow recommends) then their power would be transferred and centralised into the hands of a so-called “revolutionary” government. In this, Morrow follows his guru Trotsky:

“the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.

“In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard.” [Trotsky, “Stalinism and Bolshevism,” Writings 1936–37, p. 426]

Thus, rather than the working class as a whole “seizing power”, it is the vanguard which takes power — “a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society.” [Op. Cit., p. 424] He mocks the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Trotsky, Op. Cit., p. 430]
of collective agreements. To confuse this with centralisation is a mistake common to Marxists, but it is still a confusion.

To summarise, what Morrow claims is an “abandonment” of anarchism is, in fact, an expression of anarchist ideas. The Council of Aragon and the Aragon Federation of Collectives were following the CNT’s vision of libertarian communism and not abandoning it, as Morrow claims. As anyone with even a basic understanding of anarchism would know.

19. Did the experience of the rural collectives refute anarchism?

Some Leninists attack the rural collectives on similar lines as they attack the urban ones (as being independent identities and without co-ordination — see section 15 for details). They argue that “anarchist theory” resulted in them considering themselves as being independent bodies and so they ignored wider social issues and organisation. This meant that anarchist goals could not be achieved:

“Let’s evaluate the Spanish collectives according to one of the basic goals set by the anarchists themselves. This was to ensure equality among the toilers. They believed that the autonomous collectives would rapidly equalise conditions among themselves through ‘mutual aid’ and solidarity. This did not happen … conditions varied greatly among the Spanish collectives, with peasants at some agricultural collectives making three times that of peasants at other collectives.” [Joseph Green, Op. Cit.]

Of course, Green fails to mention that in the presumably “centralised” system created by the Bolsheviks, the official rationing system had a differentiation of eight to one under the class ration of May 1918. By 1921, this, apparently, had fallen to around four to one (which is still higher than the rural collectives) but, in fact, remained at eight to one due to workers in selected defence-industry

In this he followed comments made when he was in power. In 1920 he argued that “[w]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the … party … [that] the Soviets … [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class these is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Terrorism and Communism, p. 109] Any claims that Trotsky’s infamously authoritarian (indeed dictatorial) politics were a temporary aberration caused by the necessities of the Russian Civil War are refuted by these quotes — 17 years later he was still arguing the same point.

He had the same vision of party dictatorship being the basis of a revolution in 1924. Commenting on the Bolshevik Party conference of April 1917, he states that “whole of … Conference was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? … Lenin’s position was this: … the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through the soviets.” Note, through the soviets not by the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers’ delegates. Moreover, he states that “to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us.” He continued by noting that it was “one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets.” The Soviet Congress just provided “the legal cover” for the Bolshevik plans rather than
a desire to see the Soviets actually start managing society. [The Lessons of October, p. 134, p. 158 and p. 161]

We are not denying that Trotskyists do aim to gain a majority within working class conferences. That is clear. Anarchists also seek to gain the support of the mass of the population. It is what they do next that counts. Trotskyists seek to create a government above these organisations and dominate the executive committees that requires. Thus power in society shifts to the top, to the leaders of the centralised party in charge of the centralised state. The workers’ become mere electors rather than actual controllers of the revolution. Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace, community and militia assemblies and their councils and conferences.

Trotskyists, therefore, advocate workers councils because they see them as the means the vanguard party can take power. Rather than seeing socialism or “workers’ power” as a society in which everyone would directly control their own affairs, Trotskyists see it in terms of working class people delegating their power into the hands of a government. Needless to say, the two things are not identical and, in practice, the government soon turns from being the people’s servant into its master.

It is clear that Morrow always discusses workers councils in terms of the strategy and program of the party, not the value that workers councils have as organs of direct workers control of society. He clearly advocates workers councils because he sees them as the best way for the vanguard party to rally workers around its leadership and organise the seizure of state power. At no time does he see them as means by which working class people can govern themselves directly — quite the reverse.

The danger of such an approach is obvious. The government will soon become isolated from the mass of the population and, due to the centralised nature of the state, difficult to hold accountable. Moreover, given the dominant role of the party in the new state running of the association would be autonomous. There would be little or no need for the federation to interfere with the mundane decisions a group has to make day in, day out. As the Saragossa resolution makes clear:

“[The] commune ... will undertake to adhere to whatever general norms may be agreed by majority vote after free debate ... The inhabitants of a commune are to debate among themselves their internal problems ... Federations are to deliberate over major problems affecting a country or province and all communes are to be represented at their reunions and assemblies, thereby enabling their delegates to convey the democratic viewpoint of their respective communes ... every commune which is implicated will have its right to have its say ... On matters of a regional nature, it is the duty of the regional federation to implement agreements ... So the starting point is the individual, moving on through the commune, to the federation and right on up finally to the confederation.” [quoted by Jose Peirats, Op. Cit., pp. 106–7]

Since the Council of Aragon and the Federation of Collectives were based on a federal structure, regular meetings of mandated delegates and decision-making from the bottom up, it would be wrong to call them a “centralising agency” or an “abandonment” of the principle of “autonomy.” Rather, they were expressions of that autonomy based around a federal and not centralised organisation. The autonomy of the collective, of its mass assembly, was not restricted by the federation nor did the federation interfere with the day to day running of the collectives which made it up. The structure was a federation of autonomous collectives. The role of the Council was to co-ordinate the decisions of the federation delegate meetings — in other words, purely administrative implementation
by conviction and understanding, not by coercion and a mindless, unquestioning obedience to orders from above.” [Post-Scarcity Anarchism, p. 215]

Therefore, anarchist support for “the autonomy of economic administration” does not imply the lack of co-operation and co-ordination, of joint agreements and federal structures which may, to the uninformed like Morrow, seem to imply the “abandonment” of autonomy. As Kropotkin argued, the commune “cannot any longer acknowledge any superior: that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with other Communes.” [No Gods, No Masters, vol. 1, p. 259] This vision was stressed in the CNT’s Saragossa resolution on Libertarian Communism made in May, 1936, which stated that the “the foundation of this administration will be the commune. These communes are to be autonomous and will be federated at regional and national levels to achieve their general goals. The right to autonomy does not preclude the duty to implement agreements regarding collective benefits.” [quoted by Jose Peirats, The CNT in the Spanish Revolution, p. 106] Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory.

The reason for this is simple. To exercise your autonomy by joining self-managing organisations and, therefore, agreeing to abide by the decisions you help make is not a denial of that autonomy (unlike joining a hierarchical structure, we must stress). That is why anarchists have always stressed the importance of the nature of the associations people join as well as their voluntary nature — as Kropotkin argued, the "communes of the next revolution will not only break down the state and substitute free federation for parliamentary rule; they will part with parliamentary rule within the commune itself... They will be anarchist within the commune as they will be anarchist outside it.” [“The Commune of Paris”. Selective Writings on Anarchism and Revolution, p. 132] Moreover, within the federal structures anarchists envision, the actual day-to-day and the perspective that it is the workers’ vanguard, it becomes increasingly likely that it will place its power before that of those it claims to represent.

Certainly Trotsky’s role in the Russian revolution tells us that the power of the party was more important to him than democratic control by workers through mass bodies. When the workers and sailors of the Kronstadt navy base rebelled in 1921, in solidarity with striking workers in Petrograd, they were demanding freedom of the press for socialist and anarchist groups and new elections to the soviets. But the reaction of the Bolshevik leadership was to crush the Kronstadt dissent in blood. Trotsky’s attitude towards workers democracy was clearly expressed at the time:

“They [the dissent Bolsheviks of the Workers’ Opposition] have placed the workers’ right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the worker’s democracy!”

He spoke of the “revolutionary historic birthright of the Party” and that it “is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every given moment on the formal principle of a workers’ democracy.” [quoted by M. Brinton, Op. Cit., p. 78]

This perspective naturally follows from Trotsky’s vanguardist politics. For Leninists, the party is the bearer of “socialist consciousness” and, according to Lenin in What is to be Done?, workers, by their own efforts, can only achieve a “trade union” consciousness and, indeed, “there can be no talk of an independent ideology being developed by the masses of workers in the process of their struggle” and so “the only choice is: either bourgeois or socialist ideology” (the later being developed not by workers but by the “bourgeois intelligentsia”). [Essential Works of Lenin, p. 82 and p. 74] To
weaken or question the party means to weaken or question the socialist nature of the revolution and so weaken the “dictatorship of the proletariat.” Thus we have the paradoxical situation of the “proletarian dictatorship” repressing workers, eliminating democracy and maintaining itself against the “passing moods” of the workers (which means rejecting what democracy is all about). Hence Lenin’s comment at a conference of the Cheka (his political police) in 1920:

“Wealth or revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves.” [Collected Works, vol. 42, p. 170]

Significantly, of the 17,000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40,913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, The Cheka: Lenin’s Political Police, p. 178] Needless to say, Lenin failed to mention this aspect of his system in The State and Revolution (a failure shared by Morrow and later Trotskyists — see section H.1.7).

It is hard to combine these facts and Lenin’s and Trotsky’s comments with the claim that the “workers’ state” is an instrument of class rule — after all, Lenin is acknowledging that coercion will be exercised against members of the working class as well. The question of course arises — who decides what a “wavering” or “unstable” element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice represent the abandonment of their autonomy. Rather, it is an expression of their freedom. If we took Morrow’s comment seriously then anarchists would be against all forms of organisation and association as they would mean the “abandonment of autonomy” (of course some Marxists do make that claim, but such a position indicates an essentially negative viewpoint of liberty, a position they normally reject). In reality, of course, anarchists are aware that freedom is impossible outside of association. Within an association absolute “autonomy” cannot exist, but such “autonomy” would restrict freedom to such a degree that it would be so self-defeating as to make a mockery of the concept of autonomy and no sane person would seek it.

Of course anarchists are aware that even the best association could turn into a bureaucracy that does restrict freedom. Any organisation could transform from being an expression of liberty into a bureaucratic structure which restricts liberty because power concentrates at the top, into the hands of an elite. That is why we propose specific forms of organisation, ones based on self-management, decentralisation and federalism which promote decision-making from the bottom-up and ensure that the organisation remains in the hands of its members and its policies are agreements between them rather than ones imposed upon them. For this reason the basic building block of the federation is the autonomous group assembly. It is this body which decides on its own issues and mandates delegates to reach agreements within the federal structure, leaving to itself the power to countermand the agreements its delegates make. In this way autonomy is combined with co-ordination in an organisation that is structured to accurately reflect the needs and interests of its members by leaving power in their hands. In the words of Murray Bookchin, anarchists “do not deny the need for co-ordination between groups, for discipline, for meticulous planning, and for unity in action. But [we] believe that co-ordination, discipline, planning, and unity in action must be achieved voluntarily, by means of self-discipline nourished
praises — such as “proletarian methods of production,” democratic militias, workers’ councils and so on. Needless to say, the irony of Morrow’s work is lost on most of the Trotskyists who read it.

18. Were the federations of collectives an “abandonment” of anarchist ideas?

From our discussion in section 15, it is clear that anarchism does not deny the need for co-ordination and joint activity, for federations of self-managed workplaces, industries and rural collectives at all levels of society. Far from it. As proven in sections 12 and 15, such federations are a basic idea of anarchism. In anarchy co-ordination flows from below and not imposed by a few from above. Unfortunately Marxists cannot tell the difference between solidarity from below and unity imposed from above. Morrow, for example, argues that “the anarchist majority in the Council of Aragon led in practice to the abandonment of the anarchist theory of the autonomy of economic administration. The Council acted as a centralising agency.” [Op. Cit., pp. 205–6]

Of course it does nothing of the kind. Yes, anarchists are in favour of autonomy — including the autonomy of economic administration. We are also in favour of federalism to co-ordinate joint activity and promote co-operation on a wide-scale (what Morrow would, inaccuracy, call “centralism” or “centralisation”). Rather than seeing such agreements of joint activity as the “abandonment” of autonomy, we see it as an expression of that autonomy. It would be a strange form of “freedom” that suggested making arrangements and agreements with others meant a restriction of your liberty. For example, no one would argue that to arrange to meet your friend at a certain place and time meant the elimination of your autonomy even though it obviously reduces your “liberty” to be somewhere else at the same time.

Similarly, when an individual joins a group and takes part in its collective decisions and abides by their decisions, this does not whoever rejects the government’s decisions (for example, strikers, local soviets who reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin’s comment is simply a justification for state repression of its enemies (including elements within or even the whole working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons (we will ignore the question of the interests of the bureaucratic machine which will inevitably surround a centralised body — see section H.3.9 for further discussion).

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country must, at the same time, recall their delegates and organise a national congress of soviets (which, we stress, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to “carry out all orders of the respective higher organs of the soviet power”). Any independence on their part would be considered “wavering” or an expression of “unstable” natures and so subject to “revolutionary coercion”. In a highly centralised system, the means of accountability is reduced to the usual bourgeois level — vote in the general election every few years (which, in any case, can be annulled by the government to ensure that the soviets do not go back into the “mud” via the “passing moods” caused by the “insufficient cultural level of the masses”). In other words, the soviet form may be the “most accurate, most quickly reflecting and responsively changing form of political representation of the masses” (to use Morrow’s words) but only before they become transformed into state organs.

Secondly, “revolutionary coercion” against “wavering” elements does not happen in isolation. It will encourage critical workers to
keep quiet in case they, too, are deemed “unstable” and become subject to “revolutionary” coercion. As a government policy it can have no other effect than deterring democracy.

Thus Trotskyist politics provides the rationale for eliminating even the limited role of soviets for electing representatives they hold in that ideology. Morrow argues that “[o]ne must never forget… that soviets do not begin as organs of state power” rather they start as “organs defending the workers’ daily interests” and include “powerful strike committees.” [Op. Cit., p. 136] That is true, initially workers’ councils are expressions of working class power and are organs of working class self-management and self-activity. They are subject to direct control from below and unite from the bottom up. However, once they are turned into “organs of state power” their role (to re-quote the Soviet constitution of 1918) becomes that of “carry[ing] out all orders of the respective higher organs of the soviet power.” Soviet power is replaced by party power and they become a shell of their former selves — essentially rubber-stamps for the decisions of the party central committee.

Ironically, Morrow quotes the main theoretician of the Spanish Socialist Party as stating “the organ of the proletarian dictatorship will be the Socialist Party” and states that they “were saying precisely what the anarchist leaders had been accusing both communists and revolutionary socialists of meaning by the proletarian dictatorship.” [Op. Cit., p. 99 and p. 100] This is hardly surprising, as this was what the likes of Lenin and Trotsky had been arguing. As well as the quotes we have provided above, we may add Trotsky’s comment that the “fundamental instrument of proletarian revolution is the party.” [Lessons of October, p. 118] And the resolution of the Second World Congress of the Communist International which stated that “[e]very class struggle is a political struggle. The goal of this struggle … is the conquest of political power. Political power cannot be seized, organised and operated except through a political

In other words, Trotsky both in theory and in practice opposed “proletarian methods of production” — and if the regime introduced by Trotsky and Lenin in Russia was not based on “proletarian methods of production” then what methods was it based on? One-man management with “the appointment of individuals, dictators with unlimited powers” by the government and “the people unquestioningly obey[ing] the single will of the leaders of labour.” [“The Immediate Tasks of the Soviet Government”, Collected Works, vol. 27, pp. 267–9] In other words, the usual bourgeois methods of production with the workers’ doing what the boss tells them. As discussed in section H.3.14, at no time did the Bolsheviks support the kind of workers’ self-management introduced by the anarchist influenced workers of Spain — indeed they hindered it and replaced it with one-man management at the first opportunity (see Maurice Brinton’s classic The Bolsheviks and Workers’ Control for further details).

To point out the obvious, bourgeois methods of production means bourgeois social relations and relations of production. In other words, Morrow comments allows us to see that Lenin and Trotsky’s regime was not proletarian at the point of production. How ironic. And if it was not proletarian at the point of production (i.e. at the source of economic power) how could it remain proletarian at the political level? Unsurprisingly, it did not — party power soon replaced workers’ power and the state bureaucracy replaced the party.

Yet again Morrow’s book exposes the anti-revolutionary politics of Trotskyism by allowing anarchists to show the divergence between the rhetoric of that movement and what it did when it was in power. Morrow, faced with a workers’ movement influenced by anarchism, inadvertently indicates the poverty of Trotskyism when he praises the accomplishments of that movement. The reality of Leninism in power was that it eliminated the very things Morrow
Thus the actual experience of the collectives and their development, rather than refuting anarchism, indicates well that it is the only real form of socialism. Attempts to nationalise the means of production inevitably disempower workers and eliminate meaningful workers’ self-management or control. It does not eliminate wage labour but rather changes the name of the boss. Socialism can only be built from below. If it is not, as the Russian experience indicated, then state capitalism will be the inevitable outcome.

17. Why is Morrow’s support for “proletarian methods of production” ironic?

Morrow states “[i]n the midst of civil war the factory committees are demonstrating the superiority of proletarian methods of production.” [Op. Cit., p. 53] This is ironic as the Bolsheviks in power fought against the factory committees and their attempts to introduce the kind of workers’ self-management Morrow praises in Spain (see Maurice Brinton’s The Bolsheviks and Workers’ Control for details). Moreover, rather than seeing workers’ self-management as “proletarian methods of production” Lenin and Trotsky thought that how a workplace was managed was irrelevant under socialism. Trotsky argued that “[i]t would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered.” Indeed, “I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and

party.” [cited by Duncan Hallas, The Comintern, p. 35] In addition, we may quote Lenin’s opinion that:

“The very presentation of the question — ‘dictatorship of the Party or dictatorship of the class, dictatorship (Party) of the leaders or dictatorship (Party) of the masses?’ — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties... “

And:

“To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.”

[Left-wing Communism: An Infantile Disorder, pp. 25–6 and p. 27]

As Lenin and Trotsky constantly argued, proletarian dictatorship was impossible without the political party of the workers (whatever its name). Indeed, to even discuss any difference between the dictatorship of the class and that of the party just indicated a confused mind. Hence Morrow’s comments are incredulous, particularly as he himself stresses that the soviet form is useful purely as a means of gaining support for the revolutionary party which would take over the executive of the workers’ councils. He clearly is aware that the party is the essential organ of proletarian rule from a Leninist perspective — without the dictatorship of the party, Trotsky argues, the soviets fall back into the mud. Trotsky, indeed, stressed this need for the dictatorship of the party rather than of the proletariat in a letter written in 1937:

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject:
It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history... The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution... Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [Trotsky, Writings 1936–37, pp. 513–4]

The net result of Bolshevik politics in Russia was that Lenin and Trotsky undermined the self-management of working class bodies during the Russian Revolution and before the Civil War started in May 1918. We have already chronicled Trotsky’s elimination of democracy and equality in the Red Army (see section 11). A similar fate befell the factory committees (see section 17) and soviet democracy (as noted above). The logic of Bolshevism is such that at no point did Lenin describe the suppression of soviet democracy and workers’ control as a defeat (indeed, as far as workers’ control went Lenin quickly moved to a position favouring one-man management). We discuss the Russian Revolution in more detail in section H.6 and so will not do so here.

All in all, while Morrow’s rhetoric on the nature of the social revolution may sound anarchist, there are important differences between the two visions. While Trotskyists support workers’ coun-

concept of the interests of the working class, even against the working class itself.

Rather than indicate some kind of failure of anarchist theory, the experience of workers’ self-management in both Spain and Russia indicate the authoritarian core of Trotskyist ideology. If workers do not practice mutual aid or federation then a state claiming to represent them, to be simply their tool, cannot force them to do so without exposing itself as being an alien body with power over the workers.

For these reasons Bakunin was correct to argue that anarchists have “no faith except in freedom. Both [Marxists and anarchists], equally supporters of science which is to destroy superstition and replace belief, differ in the former wishing to impose it, and the latter striving to propagate it; so human groups, convinced of its truth, may organise and federate spontaneously, freely, from the bottom up, by their own momentum according to their real interests, but never according to any plan laid down in advance and imposed upon the ignorant masses by some superior intellects.” Anarchists, he continues, “think that there is much more practical and intellectual common sense in the instinctive aspirations and in the real needs of the mass of the people than in the profound intelligence of all these doctors and teachers of mankind who, after so many fruitless attempts to make humanity happy, still aspire to add their own efforts.” [Michael Bakunin: Selected Writings, p. 198]

In summary, the problem of “localism” and any other problems faced by a social revolution will be solved in the interests of the working class only if working class people solve them themselves. For this to happen it requires working class people to manage their own affairs directly and that implies self-managed organising from the bottom up (i.e. anarchism) rather than delegating power to a minority at the top, to a “revolutionary” party or government. This applies economically, socially and politically. As Bakunin argued, the “revolution should not only be made for the people’s sake;
exploitation by the few” (to use Joseph Green’s words) is refuted by their assertion that this state will also bring the economy under centralised control and by the actions of the Bolsheviks themselves.

Why is this? Simply because if the mass of collectives are not interested in equality and mutual aid in society as a whole then how can the government actually be the “tool” of the majority when it imposes such “mutual aid” and “equality” upon the collectives? In other words, the interests of the government replace those of the majority. After all, if workers did favour mutual aid and equality then they would federate themselves to achieve it. (which the collectives were actually doing all across Spain, we must note). If they do not do this then how can the “workers’ state” be said to be simply their tool when it has to impose the appropriate economic structure upon them? The government is elected by the whole people, so it will be claimed, and so must be their tool. This is obviously flawed — “if,” argued Malatesta, “you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?” [Malatesta, Anarchy, p. 53]

What does all this mean? Simply that Trotskyists recognise, implicitly at least, that the workers’ state is not, in fact, the simple tool of the workers. Rather, it is the means by which “socialism” will be imposed upon the workers by the party. If workers do not practice mutual aid and federation in their day-to-day running of their lives, then how can the state impose it if it is simply their tool? It suggests what is desired “by all of the working people as a whole” (nearly always a euphemism for the party in Trotskyist ideology) is different that what they actually want (as expressed by their actions). In other words, a conflict exists between the workers’ and the so-called “workers’ state” – in Russia, the party imposed its
cils on purely instrumentalist grounds as the best means of gaining support for their party’s assumption of governmental power, anarchists see workers’ councils as the means by which people can revolutionise society and themselves by practising self-management in all aspects of their lives. The difference is important and its ramifications signify why the Russian Revolution became the “dictatorship over the proletariat” Bakunin predicted. His words still ring true:

"[b]y popular government they [the Marxists] mean government of the people by a small under of representatives elected by the people... [That is,] government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of former workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers’ world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people.” [Statism and Anarchy, p. 178]

It was for this reason that he argued the anarchists do “not accept, even in the process of revolutionary transition, either constituent assemblies, provisional governments or so-called revolutionary dictatorships; because we are convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.” [Michael Bakunin: Selected Writings, p. 237] The history of the Russian Revolution proved him right. Hence anarchist support for popular assemblies and federations of workers’ councils as the framework of the social revolution rather than as a means to elect a “revolutionary” government.

One last point. We must point out that Morrow’s follows Lenin in favouring executive committees associated with workers’ coun-
cils. In this he actually ignores Marx’s (and Lenin’s, in State and Revolution) comments that the Paris Commune was “to be a working, not a parliamentary, body, executive and legislative at the same time.” [Selected Writings, p. 287] The existence of executive committees was coded into the Soviet Union’s 1918 Constitution. This suggests two things. Firstly, Leninism and Trotskyism differ on fundamental points with Marx and so the claim that Leninism equals Marxism is difficult to support (the existence of libertarian Marxists like Anton Pannekoek and other council communists also disprove such claims). Secondly, it indicates that Lenin’s claims in State and Revolution were ignored once the Bolsheviks took power so indicating that use of that work to prove the democratic nature of Bolshevism is flawed).

Moreover, Marx’s support of the fusion of executive and legislative powers is not as revolutionary as some imagine. For anarchists, as Bookchin argues, “[i]n point of fact, the consolidation of ‘executive and legislative’ functions in a single body was regressive. It simply identified the process of policy-making, a function that rightly should belong to the people in assembly, with the technical execution of these policies, a function that should be left to strictly administrative bodies subject to rotation, recall, limitations of tenure ... Accordingly, the melding of policy formation with administration placed the institutional emphasis of classical [Marxist] socialism on centralised bodies, indeed, by an ironical twist of historical events, bestowing the privilege of formulating policy on the ‘higher bodies’ of socialist hierarchies and their execution precisely on the more popular ‘revolutionary committees’ below.” [Toward an Ecological Society, pp. 215–6]

13. Why do anarchists reject the Marxist “workers’ state”?

Morrow asserts two “fundamental” tenets of “anarchism” in his book [Op. Cit., pp. 101–2]. Unfortunately for him, his claims are somewhat at odds with reality. Anarchism, as we will prove “pointed out the necessity of recognising the dictatorial authority of single individuals for the pursue of carrying out the Soviet idea” and even claimed that at that stage “there were no disputes in connection with the question” of one-man management. [quoted by Brinton, Op. Cit., p. 65] While the first claim is true (Lenin argued for one-man management appointed from above before the start of the Civil War in May 1918) the latter one is not true (excluding anarchists and anarcho-syndicalists, there were also the dissent Left-Communists in the Bolshevik party itself).

Thirdly, a centralised body effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. This can be seen from the example of Lenin’s Russia. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre. In other words the government’s attempts to centralise actually led to localism (as well as economic mismanagement)! Perhaps this was what Green means when he argues for a “new centralism” which would be “compatible with and requiring the initiative of the workers at the base” [Green Op. Cit.]— that is, the initiative of the workers to ignore the central bodies and keep the economy going in spite of the “new centralism”?

The simple fact is, a socialist society must be created from below, by the working class itself. If the workers do not know how to create the necessary conditions for a socialist organisation of labour, no one else can do it for them or compel them to do it. If the state is used to combat “localism” and such things then it obviously cannot be in the hands of the workers’ themselves. Socialism can only be created by workers’ own actions and organisations otherwise it will not be set up at all — something else will be, namely state capitalism.

Thus, a close look at Lenin’s “solution” indicates that Trotskyist claim that their state is the “tool of the majority in their fight against
general production directions and decisions of the centre.” He continued by explicitly arguing that “[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the given industry . . . would be regional anarcho-syndicalism, and not communism.” [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 292]

We expect that Morrow would subscribe to this “solution” to the problems of a social revolution generates. However, such a system has its own problems.

First is the basic fallacy that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin’s power was derived from the state bureaucracy which ran the economy in its own interests. Not that it suddenly arose with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, “in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies” and he points to the “not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People’s Commissars of the Northern Region, the Vologda Council of People’s Commissars, and the Petrograd Food Commissariat.” [Op. Cit., p. 73] In other words, centralised bodies are not immune to viewing resources as their own property (and compared to an individual workplace, the state’s power to enforce its viewpoint against the rest of society is considerably stronger).

Secondly, to eliminate the dangers of workers’ self-management generating “propertarian” notions, the workers’ have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates bourgeois social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had in section 14, does not hold one of the positions Morrow states it does. The first “tenet” of anarchism he fails to discuss at all and so the reader cannot understand why anarchists think as they do. We discuss this “tenet” here.

The first tenet is that anarchism “has consistently refused to recognise the distinction between a bourgeois and a workers’ state. Even in the days of Lenin and Trotsky, anarchism denounced the Soviet Union as an exploiters’ regime.” [Op. Cit., p. 101] It is due to this, he argues, the CNT co-operated with the bourgeois state:

“The false anarchist teachings on the nature of the state ... should logically have led them [the CNT] to refuse governmental participation in any event ... the anarchists were in the intolerable position of objecting to the necessary administrative co-ordination and centralisation of the work they had already begun. Their anti-statism ‘as such’ had to be thrown off. What did remain, to wreck disaster in the end, was their failure to recognise the distinction between a workers’ and a bourgeois state.” [Op. Cit., p. 101]

Needless to say, Morrow does not bother to explain why anarchists consider the bourgeois and workers’ state to be similar. If he did then perhaps his readers would agree with the anarchists on this matter. However, before discussing that we have to address a misrepresentation of Morrow’s. Rather than the expression of anarchist politics, the actions of the CNT were in direct opposition to them. As we showed in the section 12, anarchists see a social revolution in terms of creating federations of workers associations (i.e. workers’ councils). It was this vision that had created the structure of the CNT (as Bakunin had argued, “the organisation of the trade sections and their representation in the Chambers of Labour ... bear in themselves the living seeds of the new society which is to replace the old one. They are creating not only the ideas, but also the facts of the future itself” [Bakunin on Anarchism, p. 255]).
Thus, the social revolution would see the workers’ organisation (be they labour unions or spontaneously created organs) “taking the revolution into its own hands … an earnest international organisation of workers’ associations … [would] replace” this departing political world of States and bourgeoisie.” [The Basic Bakunin, p. 110] This is precisely what the CNT did not do — rather it decided against following anarchist theory and instead decided to co-operate with other parties and unions in the “Central Committee of Anti-Fascist Militias” (at least temporarily until the CNT stronghold in Saragossa was liberated by CNT militias). In effect, it created a UGT-like “Alliance” with other anti-fascist parties and unions and rejected its pre-war policy of “unity from below.”

The CNT and FAI leadership decided not to talk of libertarian communism but only of the fight against fascism. A greater mistake they could not have made.

An anarchist approach in the aftermath of the fascist uprising would have meant replacing the Generalitat with a federal assembly of delegates from workplace and local community assemblies (a Defence Council, to use a CNT expression). Only popular assemblies (not political parties) would be represented (parties would have an influence only in proportion to their influence in the basic assemblies). All the CNT would have had do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates to create the framework of this system. This, we must stress, was not done. We will discuss why in section 20 and so will refrain from doing so here. However, because the CNT in effect “postponed” the political aspects of the social revolution (namely, to quote Kropotkin, to “smash the State and replace it with the Federation of Communes”) [No Gods, No Masters, vol. 1, p. 259]) the natural result would be exactly as Morrow explains:

“But isn’t it a far cry from the failure to create the organs to overthrow the bourgeoisie, to the acceptance of

by the intervention of the State … will develop and perfect itself through free experimentation as fully as one can reasonably expect in our times.

“With the abolition of the State, the spontaneous self-organisation of popular life … will revert to the communes. The development of each commune will take its point of departure the actual condition of its civilisation …” [Bakunin on Anarchism, p. 207]

To impose an “ideal” solution would destroy a revolution — the actions and decisions (including what others may consider mistakes) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). As Bakunin argued, “Collectivism could be imposed only on slaves, and this kind of collectivism would then be the negation of humanity. In a free community, collectivism can come about only through the pressure of circumstances, not by imposition from above but by a free spontaneous movement from below.” [Op. Cit., p. 200] Thus socialisation must proceed from below, reflecting the real development and desires of those involved. To “speed-up” the process via centralisation can only result in replacing socialisation with nationalisation and the elimination of workers’ self-management with hierarchical management. Workers’ again would be reduced to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Lenin argued that “Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the
Thus the collectives, rather than expressing the economic vision of communist-anarchism or anarcho-syndicalism, came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and co-ordinating councils to establish common ownership and society wide self-management. To assert that the collectives were an exact reflection of anarchist or anarcho-syndicalist theory is, therefore, incorrect. Rather, they reflected certain aspects of that theory (such as workers’ self-management in the workplace) while others (industrial federations to co-ordinate economic activity, for example) were only partially meet. This, we must stress, is to be expected as a revolution is a process and not an event. As Kropotkin argued:

“It is a whole insurrectionary period of three, four, perhaps five years that we must traverse to accomplish our revolution in the property system and in social organisation.” [Words of a Rebel, p. 72]

Thus the divergence of the actual revolution from the program of the CNT was to be expected and so did not represent a failure or a feature of anarchist or anarcho-syndicalist theory as Morrow and other Marxists assert. Rather, it expresses the nature of a social revolution, a movement from below which, by its very nature, reflects real needs and problems and subject to change via discussion and debate. Bakunin’s comments stress this aspect of the revolution:

“I do not say that the peasants [and workers], freely organised from the bottom up, will miraculously create an ideal organisation, confirming in all respects to our dreams. But I am convinced that what they construct will be living and vibrant, a thousand times better and more just than any existing organisation. Moreover, this organisation, being on the one hand open to revolutionary propaganda … and on the other, not petrified the role of class collaboration with the bourgeoisie? Not at all … Without developing soviets — workers’ councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie.” [Op. Cit., pp. 88–9]

As Kropotkin predicted, “there can be no half-way house: either the Commune is to be absolutely free to endow itself with whatever institutions it wishes and introduce all reforms and revolutions it may deem necessary, or else it will remain … a mere subsidiary of the State, chained in its every movement.” [Op. Cit., p. 259] Without an alternative means of co-ordinating the struggle, the CNT would, as Morrow argued, have little choice but to collaborate with the state. However, rather than being a product of anarchist theory, as Morrow states, this came about by ignoring that theory (see section 20).

This can be seen from the false alternative used to justify the CNT’s and FAI’s actions — namely, “either libertarian communism, which means anarchist dictatorship, or democracy, which means collaboration.” The creation of libertarian communism is done from below by those subject to capitalist and statist hierarchy overthrowing those with power over them by smashing the state machine and replacing it with self-managed organisations as well as expropriating capital and placing it under workers’ self-management. As Murray Bookchin argues:

“Underlying all [the] errors [of the CNT], at least in theoretical terms, was the CNT-FAI’s absurd notion that if it assumed power in the areas it controlled, it was establishing a ‘State’. As long as the institutions of power consisted of armed workers and peasants as distinguished from a professional bureaucracy, police force, army, and cabal of politicians and judges, they were not[1] a State … These institutions, in fact comprised a revolutionary people in arms … not a professional apparatus that could
be regarded as a State in any meaningful sense of the term... That the ‘taking of power’ by an armed people in militias, libertarian unions and federations, peasant communes and industrial collectives could be viewed as an ‘anarchist dictatorship’ reveals the incredible confusion that filled the minds of the ‘influential militants.”

This perspective explains why anarchists do not see any fundamental difference between a so-called “workers’ state” and the existing state. For anarchists, the state is based fundamentally on hierarchical power — the delegation of power into the hands of a few, of a government, of an “executive” committee. Unlike Lenin, who stressed the “bodies of armed men” aspect of the state, anarchists consider the real question as one of who will tell these “bodies of armed men” what to do. Will it be the people as a whole (as expressed through their self-managed organisations) or will be it a government (perhaps elected by representative organisations)?

If it was simply a question of consolidating a revolution and its self-defence then there would be no argument:

“But perhaps the truth is simply this: ... [some] take the expression ‘dictatorship of the proletariat’ to mean simply the revolutionary action of the workers in taking possession of the land and the instruments of labour, and trying to build a society and organise a way of life in which there will be no place for a class that exploits and oppresses the producers.

“Thus constructed, the ‘dictatorship of the proletariat’ would be the effective power of all workers trying to bring down capitalist society and would thus turn into Anarchy as soon as resistance from reactionaries would have ceased and no one can any longer seek to compel above. Both the Spanish and the Russian revolution were marked by “localism” — when the workers in a factory consider it their own property and ignore wider issues and organisation.

Lenin and the Bolsheviks “solved” the problem of localism by eliminating workers’ self-management in favour of one-man management appointed from above. Attempts by the workers and factory committees themselves to combat localism were stopped by the Bolshevik dominated trade unions which “prevented the convocation of a planned All-Russian Congress of Factory Committees” in November 1917 when “called upon” by the Bolsheviks “to render a special serve to the nascent Soviet State and to discipline the Factory Committees.” [I. Deutscher, quoted by Maurice Brinton, The Bolsheviks and Workers’ Control, p. 19] Instead, the Bolsheviks built from the top-down their system of “unified administration” based on converting the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, Op. Cit., p. 36] The CNT, in comparison, tried to solve the problem of localism by a process of discussion and debate from below. Both were aware of the fact the revolution was progressing in ways different from their desired goal but their solution reflected their different politics — libertarian in the case of the CNT, authoritarian in the case of Bolshevism.

Therefore, the actual economic aspects of the Spanish revolution reflected the various degrees of political development in each workplace and industry. Some industries socialised according to the CNT’s pre-war vision of libertarian communism, others remained at the level of self-managed workplaces in spite of the theories of the union and anarchists. This was the case with other aspects of the collectives. As Vernon Richards points out, “[i]n some factories ... the profits or income were shared out among the workers ... As a result, wages fluctuated in different factories and even within the same industry ... But fortunately ... the injustice of this form of collectivisation was recognised and combated by the CNT syndicates from the beginning.” [Lessons of the Spanish Revolution, pp. 106–7]
tives were in accord with pre-war CNT policy and anarchist theory, other aspects of them were in contradiction to them. This was seen by the militants of the CNT and FAI who worked to transform these spontaneously created organs of economic self-management into parts of a socialised economy as required for libertarian communism. Such a transformation flowed from below and was not imposed from above, as would be expected in a libertarian social revolution.

As can be seen, the standard Marxist account of the collectives and its relationship to anarchist theory and CNT policy is simply wrong.

16. How does the development of the collectives indicate the differences between Bolshevism and anarchism?

As argued in the last section, the collectives formed during the Spanish Revolution reflected certain aspects of anarchist theory but not others. They were a compromise solution brought upon by the development of the revolution and did not, as such, reflect CNT or anarchist theory or vision but being self-managed by their workers. The militants of the CNT and FAI tried to convince their members to federate together and truly socialise the economy, with various degrees of success. A similar process occurred during the Russian Revolution of 1917. There workers created factory committees which tried to introduce workers’ self-management of production. The differences in outcome in these two experiences and the actions of the Bolsheviks and anarchists indicate well the fundamental differences between the two philosophies. In this section we discuss the contrasting solutions pursued by the CNT and the Bolsheviks in their respective revolutions.

The simple fact is that revolutions are complex and dynamic processes which involve many contradictory developments. The question is how do you push them forward — either from below or from the masses by violence to obey and work for him. In which case, the discrepancy between us would be nothing more than a question of semantics. Dictatorship of the proletariat would signify the dictatorship of everyone, which is to say, it would be a dictatorship no longer, just as government by everybody is no longer a government in the authoritarian, historical and practical sense of the word.

“But the real supporters of ‘dictatorship of the proletariat’ do not take that line, as they are making quite plain in Russia. Of course, the proletariat has a hand in this, just as the people has a part to play in democratic regimes, that is to say, to conceal the reality of things. In reality, what we have is the dictatorship of one party, or rather, of one’ party’s leaders: a genuine dictatorship, with its decrees, its penal sanctions, its henchmen and above all its armed forces, which are at present [1919] also deployed in the defence of the revolution against its external enemies, but which will tomorrow be used to impose the dictator’s will upon the workers, to apply a break on revolution, to consolidate the new interests in the process of emerging and protect a new privileged class against the masses.” [Malatesta, No Gods, No Masters, vol. 2, pp. 38–9]

Maurice Brinton sums up the issue well when he argued that “workers’ power” “cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks ... What ‘taking power’ really implies is that the vast majority of the working class at last realises its ability to manage both production and society — and organises to this end.” [The Bolsheviks and Workers’ Control, p. xiv]

The question is, therefore, one of who “seizes power” — will it be the mass of the population or will it be a party claiming to
represent the mass of the population. The difference is vital — and anyone who confuses the issue (like Lenin) does so either out of stupidity or vested interests.

If it is the mass of people then they have to express themselves and their power (i.e. the power to manage their own affairs). That requires that individuals — no matter where they are, be it in the workplace, community or on the front line — are part of self-managed organisations. Only by self-management in functional groups can working class people be said to controlling their own lives and determining their own fate. Such a system of popular assemblies and their means of defence would not be a state in the anarchist sense of the word.

As we argued in section 12, the Trotskyist vision of revolution, while seeming in some ways similar to that of anarchists, differ on this question. For Trotskyists, the party takes power, not the mass of the population directly. Only if you view “proletarian” seizure of power in terms of electing a political party to government could you see the elimination of functional democracy in the armed forces and the workplaces as no threat to working class power. Given Trotsky’s actual elimination of democracy in the Red Army and Navy plus his comments on one-man management (and their justifications — see sections 11 and 17) it is clear that Trotskyists consider the workers’ state in terms of party government, not self-management, not functional direct democracy.

Yes, the Trotskyists do claim that it is the workers, via their soviets, who will elect the government and hold it accountable but such a position fails to realise that a social revolution can only be created from below, by the direct action of the mass of the population. By delegating power into the hands of a few, the revolution is distorted. The initiative and power no longer rests in the hands of the mass of the population and so they can no longer take part in the constructive work of the revolution and so it will not reflect their interests and needs. As power flows from the top-down, bureaucratic distortions are inevitable.

4270

state” is simply a tool of the workers to defeat capitalist oppression).

The actual process in Spain towards industrial federations and so socialisation was dependent on the wishes of the workers involved — as would be expected in a true social revolution. For example, the department stores were collectivised and an attempt to federate the stores failed. The works councils opposed it, considering the enterprises as their own and were unwilling to join a federation — the general assemblies of the collectives agreed. Joan Ferrer, the secretary of the CNT commercial union, considered it natural as "only a few months before, the traditional relationship between employer and worker had been overthrown. Now the workers were being asked to make a new leap – to the concept of collective ownership. It was asking a lot to expect the latter to happen overnight.” [quoted by Fraser, Op. Cit., p. 220]

However, before Leninists like Green rush in and assert that this proves that “anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there” we should point out two things. Firstly, it was the “ordinary anarchists” who were trying to organise socialisation (i.e. CNT members and militants). Secondly, the Russian Revolution also saw workers taking over their workplaces and treating them as their own property. Leninists like Green would have a fit if we took these examples to “prove” that Leninism “led to the ordinary Bolshevik worker considering each factory as owned simply by the workers that laboured there” (which was what the Mensheviks did argue in 1917 when Martov “blamed the Bolsheviks for creating the local, particularistic attitudes prevailing among the masses.” [Samuel Farber, Before Stalinism, p. 72]). In other words, such events are a natural part of the process of a revolution and are to be expected regardless of the dominant theory in that revolution.

To summarise.

The Spanish revolution does confirm anarchist theory and in no way contradicts it. While many of the aspects of the collec-
nomic Council, credit …” he strangely fails to mention the socialisation attempts made by many CNT industrial unions during the revolution, attempts which reflected pre-war CNT policy. But such facts would get in the way of a political diatribe and so are ignored. [Green, Op. Cit.]

Green continues his inaccurate diatribe by arguing that:

“The problem is that, saddled with their false theory, they could not understand the real nature of the economic steps taken in the collectives, and thus they could not deal with the economic relations that arose among the collectives.” [Op. Cit.]

However, the only thing false about this is the false assertions concerning anarchist theory. As is crystal clear from our comments above, the Spanish anarchists (like all anarchists) were well aware of the need for economic relations between collectives (self-managed workplaces) before the revolution and acted to create them during it. These were the industrial federations and federations of rural communities/collectives predicted in anarchist and CNT theory and actually created, in part at least, during the revolution itself.

Thus Green’s “critique” of anarchism is, in fact, exactly what anarchist theory actually argues and what the Spanish anarchists themselves argued and tried to implement in all industries. Of course, there are fundamental differences between the anarchist vision of socialisation and the Leninist vision of Nationalisation but this does not mean that anarchism is blind to the necessity of integrating workplaces and communities into a coherent system of federations of workers’ councils (as proven above). However, such federation has two sources — it is either imposed from above or agreed to from below. Anarchists choose the former as the latter negates any claim that a revolution is a popular, mass movement from below (and, incidentally, the Leninist claim that the “workers’

Moreover, the government will inevitably clash with its subjects and Trotskyist theory provides the justification for the government imposing its wishes and negating workers’ democracy (see section 12 for evidence for this claim). Moreover, in the centralised state desired by Trotskyists democratic accountability will inevitably suffer as power flows to the top:

“The power of the local soviets passed into the hands of the [National] Executive Committee, the power of the Executive Committee passed into the hands of the Council of People’s Commissars, and finally, the power of the Council of People’s Commissars passed into the hands of the Political Bureau of the Communist Party.” [Murray Bookchin, Post-Scarcity Anarchism, p. 152]

Little wonder, then, these CNT aphorisms:

“power corrupts both those who exercise it and those over whom it is exercised; those who think they can conquer the State in order to destroy it are unaware that the State overcomes all its conquerors… dictatorship of the proletariat is dictatorship without the proletariat and against them.” [Peter Marshall, Demanding the Impossible, p. 456]

That, in a nut shell, why anarchists consider the workers’ state as no real change from the bourgeois state. Rather than creating a system in which working class people directly manage their own affairs, the workers’ state, like any other state, involves the delegation of that power into the hands of a few. Given that state institutions generate specific social relations, specific relations of authority (namely those order giver and order taker) they cannot help becoming separated from society, becoming a new class based on the state’s bureaucratic machine. Any state structure (particularly
a highly centralised one, as desired by Leninists) has a certain independence from society and so serves the interests of those within the State institutions rather than the people as a whole.

Perhaps a Leninist will point to *The State and Revolution* as evidence that Lenin desired a state based round the soviets — workers’ council — and so our comments are unjustified. However, as Marx said, judge people by what they do, not what they say. The first act of the October Revolution was to form an executive power over the soviets (although, of course, in theory accountable to their national congress). In *The State and Revolution* Lenin praised Marx’s comment that the Paris Commune was both administrative and executive. The “workers’ state” created by Lenin did not follow that model (as Russian anarcho-syndicalists argued in August 1918, “the Soviet of People’s Commissars [i]s an organ which does not stem from the soviet structure but only interferes with its work” [*The Anarchists in the Russian Revolution*, p. 118]).

Thus the Bolshevik state was not based around soviet self-management nor the fusion of executive and administrative in their hands but rather the use of the soviets to elect a government (a separate executive) which had the real power. The issue is quite simple — either “All power to the Soviets” means just that or it means “All power to the government elected by the Soviets”. The two are not the same as the first, for the obvious reason that in the second the soviets become simply ratification machines for the government and not organs in which the working masses can run their own affairs. We must also point out that the other promises made in Lenin’s book went the same way as his support for the combining administration and executive tasks in the Paris Commune — and, we stress, all before the Civil War started in May 1918 (the usual Trotskyist defence of such betrayals is blame the Civil War which is hard to do as it had not started yet).

So it is unsurprising that Morrow does not explain why anarchists reject the “dictatorship of the proletariat” — to do so would be to show that Trotskyism is not the revolutionary movement for...
to describe this solution. This concept of “collectivisation” was suggested by Joan Fabregas, a Catalan nationalist of middle class origin who had joined the CNT after July of 1936. As one CNT militant recalled:

“Up to that moment, I had never heard of collectivisation as a solution for industry — the department stores were being run by the union. What the new system meant was that each collectivised firm would retain its individual character, but with the ultimate objective of federating all enterprises within the same industry.” [quoted by Ronald Fraser, Blood of Spain, p. 212]

However, a number of unions went beyond “collectivisation” and took over all the facilities in their industries, eliminating competition between separate firms. The many small barber and beauty shops in Barcelona were shut down and replaced with large neighbourhood haircutting centres, run through the assemblies of the CNT barbers’ union. The CNT bakers union did something similar. The CNT Wood Industry Union shut down the many small cabinet-making shops, where conditions were often dangerous and unhealthy. They were replaced with two large factories, which included new facilities for the benefit of the workforce, such as a large swimming pool.

The union ran the entire industry, from the felling of timber in the Val d’Aran to the furniture showrooms in Barcelona. The railway, maritime shipping and water, gas and electric industry unions also pursued this strategy of industrial unification, as did the textile union in the industrial town of Badalona, outside Barcelona. This was considered to be a step in the direction of eventual socialisation.

At the Catalan union plenary of September, 1936, “the bigger, more powerful unions, like the woodworkers, the transport workers, the public entertainment union, all of which had already socialised workers’ liberty it likes to claim it is. Moreover, it would involve giving an objective account of anarchist theory and admitting that the CNT did not follow its teachings.

14. What is wrong with Morrow’s “fundamental tenet” of anarchism?

According to Morrow the “second fundamental tenet in anarchist teaching” is, apparently, the following:

“Since Bakunin, the anarchists had accused Marxists of over-estimating the importance of state power, and had characterised this as merely the reflection of the petty-bourgeois intellectuals’ preoccupation with lucrative administrative posts. Anarchism calls upon workers to turn their backs on the state and seek control of the factories as the real source of power. The ultimate sources of power (property relations) being secured, the state power will collapse, never to be replaced.”

He then sums up by stating the Spanish anarchists “thus failed to understand that it was only the collapse of state power ... which had enabled them to seize the factories.” [Op. Cit., p. 102]

It would be interesting to discover in what work of Bakunin, or any anarchist, such a position could be found. Morrow gives us no references to help us in our quest — hardly surprising as no anarchist (Spanish or otherwise) ever argued this point before July 1936. However, in September 1936, we discover the CNT arguing that the “withering away of the State is socialism’s ultimate objective. Facts have demonstrated that in practice it is achieved by liquidation of the bourgeois State, brought to a state of asphyxiation by economic expropriation.” [No Gods, No Masters, vol. 2, p. 261]

This, we must note, was the same month the CNT decided to join the Catalan Government! So much for the state having withered away.
However, will soon be made clear, such comments were a revision of anarchist theory brought about by the apparent victory of the CNT on July 19th, 1936 (just as other revisions occurred to justify CNT participation in the state). In other words, Morrow’s “second fundamental tenet” does not exist in anarchist theory. To prove this, we will quote Bakunin and a few other famous anarchists as well as giving an overview of some of the insurrections organised by the CNT before 1936. We start with Bakunin, Kropotkin and Malatesta.

Given that Bakunin thought that it was the “power of the State” which “sustains the privileged classes” against the “legitimate indignation of the masses of the people” it is hard to know what Morrow is talking about. [The Political Philosophy of Bakunin, p. 196] Given this perspective, it naturally follows that to abolish capitalism, to allow the seizure of factories by the workers, the state had to be abolished (or “destroyed”). Equally clear is that the “natural and necessary consequence of this destruction will be … [among others, the] dissolution of army, magistracy, bureaucracy, police and priesthood… confiscation of all productive capital and means of production on behalf of workers’ associations, who are to put them to use … the federative Alliance of all working men’s associations … will constitute the Commune.” [Michael Bakunin: Selected Writings p. 253 and p. 170]

Thus, the state has to be abolished in order to ensure that workers’ can take over the means of production, so abolishing capitalism. This is the direct opposite of Morrow’s claim that “[s]ince Bakunin” anarchism had “called[ed] upon the workers to turn their backs to the state and seek control of the factories as the real source of power.” While control of the economy by workers is an important, indeed a key, aspect of a social revolution it is not a sufficient one for anarchists. It must be combined with the destruction of the state (as Bakunin argued, “[n]o revolution could succeed … today unless it was simultaneously a political and a social revolution” [No Gods, No Masters, vol. 1, p. 141]). As the power of the state

Leval, Collectives in the Spanish Revolution, p. 227–8] Leval in fact terms it “a form of workers neo-capitalism” but such a description is inaccurate (and unfortunate) simply because wage labour had been abolished and so it was not a form of capitalism — rather it was a form of mutualism, of workers’ co-operatives exchanging the product of their labour on the market.

However, Leval basic argument was correct — due to the fact the political aspect of the revolution (the abolition of the state) had been “postponed” until after the defeat of fascism, the economic aspects of the revolution would also remain incomplete. The unions that had seized workplaces were confronted with a dilemma. They had control of their individual workplaces, but the original libertarian plan for economic co-ordination was precluded by the continued existence of the State. It was in this context of a partial revolution, under attack by the counter-revolution, that the idea of “collectives” was first put forward to solve some of the problems facing the workers and their self-managed workplaces. Unfortunately, this very “solution” caused problems of its own. For example, Gaston Leval indicates that the collectivisation decree of October 1936 “legalising collectivisation”, “distorted everything right from the start” [Op. Cit., p. 227] and did not allow the collectives to develop beyond a mutualist condition into full libertarian communism. It basically legalised the existing situation while hindering its development towards libertarian communism by undermining union control.

This dilemma of self-managed individual workplaces and lack of federations to co-ordinate them was debated at a CNT union plenary in September of 1936. The idea of converting the worker-managed workplaces into co-operatives, operating in a market economy, had never been advocated by the Spanish anarchists before the Civil War, but was now seen by some as a temporary stop-gap that would solve the immediate question of what to do with the workplaces that had been seized by the workers. It was at this meeting that the term “collective” was first adopted
over the management of industries as soon as the street-fighting had died down. The initiative for this did not come from the higher bodies — the regional and national committees — but from the rank-and-file activists in the local unions. In some cases this happened because the top management of the enterprise had fled and it was necessary for the workers to take over if production was to continue. But in many cases the local union militants decided to take advantage of the situation to end wage labour by creating self-managed workplaces.

As to be expected of a real movement, mistakes were made by those involved and the development of the movement reflected the real problems the workers faced and their general level of consciousness and what they wanted. This is natural and to denounce such developments in favour of ideal solutions means to misunderstand the dynamic of a revolutionary situation. In the words of Malatesta:

“To organise a [libertarian] communist society on a large scale it would be necessary to transform all economic life radically, such as methods of production, of exchange and consumption; and all this could not be achieved other than gradually, as the objective circumstances permitted and to the extent that the masses understood what advantages could be gained and were able to act for themselves.” [Errico Malatesta: His Life and Ideas, p. 36]

This was the situation in revolutionary Spain. Moreover, the situation was complicated by the continued existence of the bourgeois state. As Gaston Leval, in his justly famous study of the collectives, states “it was not ... true socialisation, but ... a self-management straddling capitalism and socialism, which we maintain would not have occurred had the Revolution been able to extend itself fully under the direction of our syndicates.” [Gaston

“sustains” the capitalists it clearly follows that the capitalist only has his property because the state protects his property claims — without the state, workers’ would seize the means of production. Which means, contra Morrow, Bakunin was aware that in order for workers’ to take over their workplaces the state had to be destroyed as it was by means of the state that capitalist property rights are enforced.

And, just to stress the obvious, you cannot “turn your backs on the state” while dissolving the state bureaucracy, the army, police and so on. This is clear for Bakunin. He argued that “[l]iberty can only be created by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward.” And the nature of this workers’ organisation? Workers’ councils — the “proletariat ... must enter the International [Workers’ Association] en masse, form[ing] factory, artisan, and agrarian sections, and unite them into local federations.” [Statism and Anarchy, p. 179 and p. 49]

Similarly, we discover Kropotkin arguing that “expropriation” would occur at the same time as “the capitalists’ power to resist [had] been smashed” and that “the authorities” will be “overthrown.” He also recognised the need for self-defence, arguing that the revolution must “withstand both the attempts to form a government that would seek to strangle it and any onslaughts which may emanate from without.” He argued the Commune “must smash the State and replace it with the Federation and it will act accordingly.” [No Gods, No Masters, vol. 1, pp. 232–3 and p. 259]

You cannot do all this by “turning your backs” on the state. To smash the state you need to face it and fight it — there is no other way.

Elsewhere he argued that the commune of the future would base itself on “the principles of anarchist communism”, meaning they would have “entirely abolished property, government, and the state.” They will “proclaim and establish their independence by direct socialist revolutionary action, abolishing private property” when “gov-
ernments are swept away by the people ... the insurgent people will not wait until some new government decrees, in its marvellous wisdom, a few economic reforms.” Rather, they “will take possession on the spot and establish their rights by utilising it without delay. They will organise themselves in the workshops to continue the work, but what they will produce will be what is wanted by the masses, not what gives the highest profit to employers... they will organise themselves to turn to immediate use the wealth stored up in the towns; they will take possession of it as if it had never been stolen from them by the middle class.” [“The Commune of Paris”, Selected Writings on Anarchism and Revolution, pp. 127–9] Note that Kropotkin explicitly states that only “after “governments are swept away” would the “insurgent people . .. organise themselves in the workshops.”

As Malatesta noted, the anarchist principles formulated in 1872 at the Congress of St Imier (under the influence of Bakunin, obviously) stated that “[d]estruction of all political power is the first duty of the proletariat” who must “establish solidarity in revolutionary action outside the framework of bourgeois politics.” He adds, “[n]eedless to say, for the delegates of St. Imier as for us and for all anarchists, the abolition of political power is not possible without the simultaneous destruction of economic privilege.” [Errico Malatesta: His Life and Ideas, pp. 157–8]

Malatesta himself always stressed that revolution required “the insurrectionary act which sweeps away the material obstacles, the armed forces of the government.” He argued that “[o]nce the government has been overthrown ... it will be the task of the people ... to provide for the satisfaction of immediate needs and to prepare for the future by destroying privileges and harmful institutions.” [Op. Cit., p. 163 and p. 161] In other words, the revolution needs to smash the state and at the same time abolish capitalism by expropriation by the workers.

Thus anarchism is clear on that you need to destroy the state in order to expropriate capital. Morrow’s assertions on this are clearly false. Rather than urging “workers to turn their backs on the
A few quotes will be needed to show that this was, in fact, the position of the Spanish Anarchists. According to Issac Puente, the "national federations will hold as common property all the roads, railways, buildings, equipment, machinery and workshops." The village commune "will federate with its counterparts in other localities and with the national industrial federations." [Libertarian Communism, p. 29 and p. 26] In D. A. de Santillan’s vision, libertarian communism would see workers’ councils overseeing 18 industrial sectors. There would also be "councils of the economy" for local, regional and national levels (ultimately, international as well). [Op. Cit., pp. 50–1 and pp. 80–7] These councils would be "constitute[d] by delegations or through assemblies" and "receives [their] orientation from below and operates in accordance with the resolutions" of their appropriate "assemblies." [Op. Cit., p. 83 and p. 86]

The CNT’s national conference in Saragossa during May 1936 stressed this vision. Its resolution declared that the revolution would abolish "private property, the State, the principle of authority, and ... classes." It argued that "the economic plan of organisation, throughout national production, will adjust to the strictest principles of social economy, directly administered by the producers through their various organs of production, designated in general assemblies of the various organisations, and always controlled by them." In urban areas, "the workshop or factory council" would make "pacts with other labour centres" via "Councils of Statistics and Production" which are the "organ of relations of Union to Union (association of producers)", in other words, workers’ councils. These would "federate among themselves, forming a network of constant and close relations among all the producers of the Iberian Confederation." In rural areas, "the producers of the Commune" would create a "Council of Cultivation" which would "establish the same network of relations as the Workshop, Factory Councils and those of Production and Statistics, complementing the free federation represented by the Commune.”

state and seek control of the factories as the real source of power" anarchism calls upon workers to “overthrow,” “smash,” “sweep away,” “destroy,” “dissolve” the state and its bureaucratic machinery via an “insurrectionary act” and expropriate capital at the same time — in other words, a popular uprising probably combined with a general strike (“an excellent means for starting the social revolution,” in Malatesta’s words, but not in itself enough to make “armed insurrection unnecessary” [Errico Malatesta, The Anarchist Reader, pp. 224–5]).

That, in itself, indicates that Morrow’s “fundamental tenet” of anarchism does not, in fact, actually exist. In addition, if we look at the history of the CNT during the 1930s we discover that the union organised numerous insurrections which did not, in fact, involve workers “turning their backs on the state” but rather attacking the state. For example, in the spontaneous revolt of CNT miners in January 1932, the workers “seized town halls, raised the black-and-red flags of the CNT, and declared communismo libertario.” In Tarassa, the same year, the workers again “seiz[ed] town halls” and the town “swept by street fighting.” The revolt in January 1933 began with “assaults by Anarchist action groups ... on Barcelona’s military barracks ... Serious fighting occurred in working-class barrios and the outlying areas of Barcelona ... Uprising occurred in Tarassa, Sardanola-Ripollet, Lerida, in several pueblos in Valencia province, and in Andalusia.” In Casas Viejas, as we discussed in section 1, the CNT members surrounded and attacked the barracks of the Civil Guard. In December 1933, the workers “reared barricades, attacked public buildings, and engaged in heavy street fighting ... many villages declared libertarian communism.” [Murray Bookchin, The Spanish Anarchists, p. 225, p. 226, p. 227 and p. 238]

Moreover, “[w]herever possible ... insurrections had carried out industrial and agrarian take-overs and established committees for workers’ and peasant’s control, libertarian systems of logistics and distribution — in short, a miniature society ‘organised on the lines set down by Kropotkin.’” [Bookchin, Op. Cit., p. 239]
Now, does all that really sound like workers turning their backs on the state and only seizing control of their factories?

Perhaps it will be argued that Morrow is referring to after the insurrection (although he clearly is not). What about the defence of the revolution? Anarchists have always been clear on this too — the revolution would be defended by the people in arms. We have discussed this issue above (in sections 1 and 8 in particular) so we do not need to discuss it in much detail here. We will just provide another quote by Bakunin (although written in 1865, Bakunin made the same points over and over again until his death in 1876):

“While it [the revolution] will be carried out locally everywhere, the revolution will of necessity take a federalist format. Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines ... In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation. So it will be necessary for each of them to radiate outwards, to raise all its neighbouring communes in revolt ... and to federate with them for common defence.” [No Gods, No Masters, vol. 1, p. 142]

This was essentially the position agreed by the CNT in May 1936:

“The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces ... Each Commune should have its arms and elements of defence.” [quoted by Robert Alexander, The Anarchists in the Spanish Civil War, vol. 1, p. 64]

Like the CNT with its “Defence Committees” the defence of the revolution would rest with the commune and its federation. Thus the planning of common activities between the self-managed workplaces. In other words, the idea of self-managed workplaces was seen as one step in a process of socialisation, the basic building block of a federal structure of workers’ councils. They were not seen as an end in themselves no matter how important they were as the base of a socialised economy.

Thus the CNT had never proposed that factories or other facilities would be owned by the people who happened to work there. The CNT’s program called for the construction of “libertarian communism.” This was the CNT’s agreed goal, recognising it must be freely created from below. In addition, the Spanish Anarchists argued for “free experimentation, free show of initiative and suggestions, as well as the freedom of organisation,” recognising that “[i]n each locality the degree of [libertarian] communism, collectivism or mutualism will depend on conditions prevailing. Why dictate rules? We who make freedom our banner, cannot deny it in economy.” [D. A. de Santillan, After the Revolution, p. 97] In other words, the CNT recognised that libertarian communism would not be created overnight and different areas will develop at different speeds and in different directions depending on the material circumstances they faced and what their population desired.

However, libertarian communism was the CNTs declared goal. This meant that the CNT aimed for a situation where the economy as a whole would be socialised and not an mutualist economy consisting independent co-operatives owned and controlled by their workers (with the producers operating totally independently of each other on the basis of market exchange). Instead, workers would manage their workplace directly, but would not own it — rather ownership would rest with society as a whole but the day-to-day management of the means of production would be delegated to those who did the actual work. Councils of workers’ delegates, mandated by and accountable to workplace assemblies, would be created to co-ordinate activity at all levels of the economy.
of the country which had not immediately fallen under fascist control seized the opportunity to turn anarchist ideal into reality.” [“Anarchism and the Spanish ‘Revolution’”, Subversion, no. 18]

Trotskyist Felix Morrow also presents a similar analysis when he states that the POUM “recorded the tendency of CNT unions to treat collectivised property as their own. It never attacked the anarcho-syndicalist theories which created the tendency.” [Op. Cit., p. 104]

However, the truth of the matter is somewhat different.

Firstly, as will soon become clear, CNT policy and anarchist theory was not in favour of workers’ owning their individual workplaces. Instead both argued for socialisation of the means of life by a system of federations of workers’ assemblies. Individual workplaces would be managed by their workers but they would not exist in isolation or independently of the others — they would be members of various federations (minimally an industrial one and one which united all workplaces regardless of industry in a geographical area). These would facilitate co-ordination and co-operation between self-managed workplaces. The workplace would, indeed, be autonomous but such autonomy did not negate the need for federal organs of co-ordination nor did federation negate that autonomy (as we will discuss later in section 18, autonomy means the ability to make agreements with others and so joining a federation is an expression of autonomy and not necessarily its abandonment, it depends on the nature of the federation).

Secondly, rather than being the product of “more than 50 years” of anarchist propaganda or of “anarcho-syndicalist theories”, the “collectives” instituted during the Civil War were seen by the CNT as merely a temporary stop-gap. They had not been advocated in the CNT’s pre-Civil War program, but came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and federal councils to establish co-ordination and aid Morrow’s “fundamental tenet” of anarchism does not exist. We have never urged the ignoring of the state nor the idea that seizing economic power will eliminate political power by itself. Nor is anarchism against the defence of a revolution. The position of the CNT in May 1936 was identical to that of Bakunin in 1865. The question is, of course, how do you organise a revolution and its defence — is it by the whole people or is it by a party representing that people. Anarchists argue for the former, Trotskyists the latter. Needless to say, a state structure (i.e. a centralised, hierarchical structure based on the delegation of power) is required only when a revolution is seen as rule by a party — little wonder anarchists reject the concept of a “workers’ state” as a contradiction in terms.

The question of July 1936 however rears its head. If anarchism does stand for insurrection, workers councils and so on, then why did the CNT ignore the state? Surely that suggests anarchism is, as Morrow claims, flawed? No, it does not — as we argue in some detail in section 20 this confuses mistakes by anarchists with errors in anarchist theory. The CNT-FAI did not pursue anarchist theory and so July 1936 does not invalidate anarchism. As Bakunin argued, “[n]o revolution could succeed … unless it was simultaneously a political and a social revolution.” [No Gods, No Masters, vol. 1, p. 141]

The revolution of July 1936 was a social revolution (it expropriated capital and revolutionised social relationships across society) but it was not a political revolution — in other words, it did not destroy the state. The CNT refused to do this because of the danger of fascism and fear of isolation (see section 20). Little wonder the social revolution was defeated — the CNT did not apply basic anarchist theory. To dismiss anarchist ideas because they were not applied seems somewhat strange.

To finish this section we must indicate that Morrow’s statement concerning anarchists “turning our backs” to the state and concentrating on property actually contradicts both Engels and Lenin.

As Lenin notes in The State and Revolution, “Marx agreed with Proudhon on the necessity of ‘smashing’ the present state machine...
[there is] similarity between Marxism and anarchism (Proudhon and Bakunin) ... on this point” and that anarchists advocate “the destruction of the state machine.” [Essential Works of Lenin, p. 310 and p. 358] You can hardly smash the state or destroy the state machine by “turning your back” to it. Similarly, Engels argued (although distorting his thought somewhat) that Bakunin saw “the state as the main evil to be abolished ... [and] maintains that it is the state which has created capital, that the capitalist has his capital only by the grace of the state ... [Hence] it is above all the state which must be done away with ... organise, and when ALL workers are won over ... abolish the state and replace it with the organisation of the International.” [The Marx-Engels Reader, pp. 728–9] You cannot “abolish” and “replace” the state by ignoring it (“turning your back to it”). We must also stress that Engels comments disprove Lenin’s assertion that anarchists “have absolutely no clear idea of what the proletariat will put in its [the states] place.” [Op. Cit., p. 358] We have always been clear, namely a federation of workers’ associations (this was the organisation of the First International). In other, more modern, words, a system of workers’ councils — a position Marxists only embraced six decades later when Lenin advocated them as the basis of his “workers’ state.”

Thus Morrow’s comments against anarchism are in contradiction to usual Marxist claims against anarchism (namely, that we seek to smash the state but do not understand that the workers’ state is necessary to abolish capitalism). Indeed, Engels attributed the opposite idea to Bakunin that Morrow implies anarchists think with regards to property — namely the idea that the capitalist has his property because of the state. Morrow’s “fundamental tenet” of anarchism not only does not exist in anarchist theory, it does not even exist in the Marxist critique of that theory! It is impressive enough to assign a false doctrine to your enemies, it takes real ability to make a claim which contradicts your own theory’s assertions!

15. Did Spanish Anarchism aim for the creation of “collectives” before the revolution?

The formation of the worker-managed enterprises called “collectives” in the Spanish revolution of 1936 has sometimes led people (particularly Marxists) to misconceptions about anarcho-syndicalist and communist-anarchist theory. These comments by a Marxist-Leninist are typical:

“Spanish anarchists believed that a system of autonomous collectives, with the weakest possible connections between them, was the alternative to capitalism and also to the Marxist view of society running the entire economy as one whole.”

And:

“The anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there, and not by the working class as a whole.” [Joseph Green, “Reply to the Open Letter of the Black Autonomy Collective”, Communist Voice, no. 10]

This assertion is sometimes voiced by Libertarian Marxists of the council communist tendency (who should know better):

“At the time of the Civil War, a popular idea amongst the Spanish working class and peasants was that each factory, area of land, etc., should be owned collectively by its workers, and that these ‘collectives’ should be linked with each other on a ‘federal’ basis — that is, without any superior central authority.

“This basic idea had been propagated by anarchists in Spain for more than 50 years. When the Civil War began, peasants and working class people in those parts
Under the shadow of an irrelevant parliament we were planting the seeds of a society where ordinary people are in control of their land, their resources, their food and their decision making. The garden symbolised an urge to be self-reliant rather than dependent on capitalism.”

Firstly, we should point out that having access to land is a key way for workers to be independent of capitalism. Perhaps Mitchinson forgets Marx’s discussion of the colonies in chapter 33 of *Capital*? In it Marx discusses how access to land allowed immigrants to America and Australia to reject wage labour (i.e. capitalism) by providing them with the means to survive without selling themselves on the labour market to survive. The state had to be used to enforce the laws of supply and demand by restricting access to the land. Or, perhaps, he had forgotten Marx’s discussion in chapter 27 of *Capital* of the role of enclosures in creating a dispossessed mass of people who were forced, by necessity, to become the first generation of wage slaves? Either way, access to the land was (and still is, in many countries) a means of being independent of capitalism — and one which the state acts to destroy.

Secondly, the garden was a symbol of a communist society, not an expression of the type of society RTS and other anarchists desire. So, as a symbol of an anti-capitalist vision, the garden is a good one given the history of state violence used to separate working people from the land and propel them into the labour market. However, it is only a symbol and not, obviously, to be taken as an example of the future society RTS or other anarchists desire. Only someone lacking in imagination could confuse a symbol with a vision — as the press release states it “celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition.”

Thirdly, as their press release states, “Guerrilla Gardening is not a protest; by its very nature it is a creative peaceful celebration of the...
Arriving in a village, the militia committees sponsor the election of a village anti-fascist committee ... [which] organises production on a new basis” and “[e]very village wrested from the fascists was transformed into a forest of revolution.” Its “municipal councils were elected directly by the communities. The Council of Aragon was at first largely anarchist.” He notes that “[l]ibertarian principles were attempted in the field of money and wages” yet he fails to mention the obvious application of libertarian principles in the field of politics with the state abolished and replaced by a federation of workers’ associations. To do so would be to invalidate his basic thesis against anarchism and so it goes unmentioned, hoping the reader will not notice this confirmation of anarchist politics in practice. [Op. Cit., p. 53, p. 204 and p. 205]

So, from the experience of the Ukraine, the previous revolts in 1932, 1933 and 1934 and the example of the Council of Aragon it appears clear that rather than exposing anarchist theory (as Marxists claim), the example of July 1936 in Catalonia is an aberration. Anarchist politics had been confirmed as a valid revolutionary theory many times before and, indeed, shown themselves as the only one to ensure a free society. However, why did this aberration occur?

Most opponents of anarchism provide a rather (in)famous quote from FAI militant Juan Garcia Oliver, describing the crucial decision made in Catalonia in July of ’36 to co-operate with Company’s government to explain the failure of the CNT to “seize power”:

“The CNT and FAI decided on collaboration and democracy, eschewing revolutionary totalitarianism ... by the anarchist and Confederal dictatorship.” [quoted by Stuart Christie, We, the Anarchists!, p. 105]

In this statement Garcia Oliver describes the capitalist state as “democracy” and refers to the alternative of the directly democratic CNT unions taking power as “totalitarianism” and “dictatorship.” Marxists tend to think this statement tells us something about the did. That in itself indicates the weakness of Mitchinson’s claims. It would also be useful to point out that Trotskyists have little support amongst organised workers as well.

Moreover, anarchists do not seek to become part of the trade union bureaucracy and so their influence cannot be easily gauged.

After asserting these dubious “facts” about anarchist influence, he continues:

“Some radicalised youth however are attracted to their ‘direct action’ stance. There is a vacuum left by the absence of a mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students. With no lead being given by the tops of the unions, and Labour in government attacking young people, that vacuum can be temporarily and partly filled by groups like Reclaim the Streets.”

Needless to say, Mitchinson does not pose the question why the Labour government is attacking “young people” (and numerous other sections of the working class). Why has the Labour Party, a mass workers party which uses elections to gain reforms, been attacking (as it has always done, we must note) its support? If its because the leaders are “right-wing” then why have the membership supported them? Why have the “right-wing” gained such influence? Also, why is there no “mass Labour youth organisation”? And why should “young people” join an organisation which is part of the party which is attacking them? Because they hate direct action and radical workers as much as the bosses?

Mitchinson’s “analysis” is question begging in the extreme. He continues:

“What action do they propose though? In their press statement (2/5/00) they explain, ‘We were not protesting.
18. How do anarchists struggle for reforms under capitalism?

Mitchinson continues his distortion of anarchism by arguing:

“Marxists fight for every reform, whilst at the same time explaining that while capitalism continues none of these advances are safe. Only socialism can really solve the problems of society.”

As noted above, anarchists also fight for every reform possible — but by direct action, by the strength of working people in their “natural organisations” and “social power” (to use Bakunin’s words). We also argue that reforms are always in danger — that is why we need to have strong, direct action based organisations and self-reliance. If we leave it to leaders to protect (never mind win reforms) we would not have them for long. Given that Labour governments have whittled previous reforms just as much as Conservative ones, anarchists feel our strategy is the relevant one.

Mitchinson continues:

“Our modern day anarchists, Reclaim the Streets and others, have no support in Britain amongst the organised workers.”

Which is not true, as RTS and other anarchists do seek influence with the organised workers (and the unorganised ones, and the unemployed, etc.). They have invited rank-and-file trade union activists to their demonstrations to speak, trade unionists are members of anarchist organisations, etc. Anarchists are at the forefront of supporting strikers, particularly when their union betrays their struggle and does not support them. For example, during the Liverpool dockers strike RTS and the dockers formed a common front, organised common demonstrations and so on. The trade unions did nothing to support the dockers, RTS and other anarchist groups

CNT’s original program in the period leading up to the crisis of July 1936. As proven above, any such assertion would be false (see also section 8). In fact this statement was made in December of 1937, many months after Garcia Oliver and other influential CNT activists had embarked upon collaboration in the government ministries and Republican army command. The quote is taken from a report by the CNT leadership, presented by Garcia Oliver and Mariano Vazquez (CNT National Secretary in 1937) at the congress of the International Workers Association (IWA). The CNT was aware that government participation was in violation of the principles of the IWA and the report was intended to provide a rationalisation. That report is an indication of just how far Garcia Oliver and other influential CNT radicals had been corrupted by the experience of government collaboration.

Garcia Oliver’s position in July of 1936 had been entirely different. He had been one of the militants to argue in favour of overthrowing the Company’s government in Catalonia in the crucial union assemblies of July 20–21. As Juan Gomez Casas argues:

“The position supported by Juan Garcia Oliver [in July of ’36] has been described as ‘anarchist dictatorship’. Actually, though, Oliver was advocating application of the goals of the Saragossa Congress in Barcelona and Catalonia at a time in history when, in his opinion, libertarian communism was a real possibility. It would always signify dissolution of the old parties dedicated to the idea of [state] power, or at least make it impossible for them to pursue their politics aimed at seizure of power. There will always be pockets of opposition to new experiences and therefore resistance to joining ‘the spontaneity of the popular masses.’ In addition, the masses would have complete freedom of expression in the unions and in the economic organisations of the revolution as
Those libertarians who defended government participation in Spain argued that a non-hierarchical re-organisation of society in Catalonia in July of '36 could only have been imposed by force, against the opposition of the parties and sectors of society that have a vested interest in existing inequalities. They argued that this would have been a "dictatorship," no better than the alternative of government collaboration.

If this argument were valid, then it logically means that anarchism itself would be impossible, for there will always be sectors of society – bosses, judges, politicians, etc. – who will oppose social re-organisation on a libertarian basis. As Malatesta once argued, some people "seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!" [Anarchy, p. 41] It is doubtful he would have predicted that certain anarchists would be included in such believers!

Neither anarchism nor the CNT program called for suppressing other viewpoints. The various viewpoints that existed among the workforce and population would be reflected in the deliberations and debates of the workplace and community assemblies as well as in the various local and regional congresses and conference and on their co-ordinating Councils. The various political groups would be free to organise, publish their periodicals and seek influence in the various self-managed assemblies and structures that existed. The CNT would be dominant because it had overwhelming support among the workers of Catalonia (and would have remained dominant as long as that continued).

What is essential to a state is that its authority and armed power be top-down, separate and distinct from the population. Otherwise

Similarly, the practical experiences of a socialist elected into Parliament would be easy to predict — they would be swamped by bourgeois politics, issues and activities. Anarchism gained such socialists elected to parliament as Johann Most and Ferdinand Nieuwenhuis who soon released the correctness of the anarchist analysis. Thus actual experience confirmed the soundness of anarchist politics. Mitchinson, on the other hand, has to deny history — indeed, he fails to mention the history of Social Democracy at all in his article.

Thus the claim that we should use “every field open to us” is idealistic nonsense, at total odds with any claim to use scientific techniques of analysis (i.e. to being a scientific socialist) or a supporter of materialist philosophy. It means the rejection of historical analysis and the embrace of ahistoric wishful thinking.

Moreover, why do the workers need to “transform” their own organisations in the first place? Perhaps because they are bureaucratic organisations in which power is centralised at the top, in a few hands? Why did this happen, if fighting for reforms by any suitable means (including electioneering) was their rationale? Perhaps because the wrong people are in positions of power? But why are they the wrong people? Because they are right-wing, have reformist ideas, etc. Why do they have reformist ideas? Here Mitchinson must fall silent, because obviously they have reformist ideas because the organisations and activities they are part of are reformist through and through. The tactics (using elections) and organisational structure (centralisation of power) bred such ideas — as Bakunin and other anarchists predicted. Mitchinson’s politics cannot explain why this occurs, which explains why Lenin was so surprised when German Social Democracy supported its ruling class during the First World War.
“Of course not, we must advocate the struggle for every
gain no matter how minor, and use any and every field
open to us. Only the dilettante can reject better wages or
a health care system. Precisely through these struggles,
and the struggles to transform the workers organisations
the unions and the parties, we learn and become more
powerful and bring closer the day when it will be possible
to transform society for good.”

As noted, anarchists do not reject reforms. Only a dilettante
misrepresents the position of his enemies. And, as can be seen
from the above quotes by Bakunin and Kropotkin, anarchists agree
with Mitchinson’s comments. Anarchists agree on the need to win
reforms by direct action, which necessitates the creation of new
forms of working class organisation based on firm libertarian prin-
ciples and tactics — organisations like workers’ councils, factory
committees, community assemblies and so on.

However, when looking at the fields of struggle open to us, we
evaluate them based on a materialist basis — looking at the implica-
tions of the tactics in theory and how they actually worked out in practice. Mitchinson obviously refuses to do this. Anarchists,
on the other hand, base their politics on such an evaluation. For ex-
ample, Bakunin would have been aware of Proudhon’s experiences
in the French National Assembly during the 1848 revolution:

“As soon as I set foot in the parliamentary Sinai, I ceased
to be in touch with the masses; because I was absorbed by
my legislative work, I entirely lost sight of current events...
One must have lived in that isolator which is called
the National Assembly to realise how the men who are
most completely ignorant of the state of the country are
almost always those who represent it... fear of the people
is the sickness of all those who belong to authority; the
people, for those in power, are the enemy.” [Proudhon,
4396]

it could not function to protect the power of a boss class. When
a population in society directly and democratically controls the
armed force (in fact, effectively is the armed force as in the case of
the CNT militias), directly manages its own fairs in decentralised,
federal organisations based on self-management from the bottom
upwards and manages the economy, this is not a “state” in the
historical sense. Thus the CNT would not in any real sense had “seized
power” in Catalonia, rather it would have allowed the mass of peo-
ple, previously disempowered by the state, to take control of their
own lives — both individually and collectively — by smashing the
state and replacing it by a free federation of workers’ associations.

What this means is that a non-hierarchical society must be im-
posed by the working class against the opposition of those who
would lose power. In building the new world we must destroy
the old one. Revolutions are authoritarian by their very nature,
but only in respect to structures and social relations which pro-
mote injustice, hierarchy and inequality. It is not “authoritarian”
to destroy authority, in other words! Revolutions, above all else,
must be libertarian in respect to the oppressed (indeed, they are
acts of liberation in which the oppressed end their oppression by
their own direct action). That is, they must develop structures that
involve the great majority of the population, who have previously
been excluded from decision making about social and economic
issues.

So the dilemma of “anarchist dictatorship” or “collaboration”
was a false one and fundamentally wrong. It was never a case
of banning parties, etc. under an anarchist system, far from it.
Full rights of free speech, organisation and so on should have
existed for all but the parties would only have as much influence
as they exerted in union, workplace, community, militia (and so
on) assemblies, as should be the case! “Collaboration” yes, but
within the rank and file and within organisations organised in a
libertarian manner. Anarchism does not respect the “freedom” to
be a capitalist, boss or politician.
Instead of this “collaboration” from the bottom up, the CNT and FAI committees favoured “collaboration” from the top down. In this they followed the example of the UGT and its “Workers’ Alliances” rather than their own activities previous to the military revolt. Why? Why did the CNT and FAI in Catalonia reject their previous political perspective and reject the basis ideas of anarchism? As shown above, the CNT and FAI has successfully applied their ideas in many insurrections before hand. Why the change of direction? There were two main reasons.

Firstly, while a majority in Catalonia and certain other parts of Spain, the CNT and FAI were a minority in such areas as Castille and Asturias. To combat fascism required the combined forces of all parties and unions and by collaborating with a UGT-like “Anti-Fascist Alliance” in Catalonia, it was believed that such alliances could be formed elsewhere, with equality for the CNT ensured by the Catalan CNT’s decision of equal representation for minority organisations in the Catalan Anti-Fascist Committee. This would, hopefully, also ensure aid to CNT militias via the government’s vast gold reserves and stop foreign intervention by Britain and other countries to protect their interests if libertarian communism was declared.

However, as Vernon Richards argues:

“This argument contains ... two fundamental mistakes, which many of the leaders of the CNT-FAI have since recognised, but for which there can be no excuse, since they were not mistakes of judgement but the deliberate abandonment of the principles of the CNT. Firstly, that an armed struggle against fascism or any other form of reaction could be waged more successfully within the framework of the State and subordinating all else, including the transformation of the economic and social structure of the country, to winning the war. Secondly, that it was essential, and possible, to collaborate with

It is ironic that Mitchinson mentions Blair. He is, after all, the leader of the Labour Party — as mass workers party formed from the trade unions to use political action to gain reforms within capitalism. The current state of Labour indicates well the comment that “in proportion as the socialists become a power in the present bourgeois society and State, their socialism must die out.” [Kropotkin, 

Kropotkin’s Revolutionary Pamphlets, p. 189] It is as if the history of Social Democracy (or even the German Greens) does not exist for Mitchinson — he points to Blair to refute anarchist analysis that Parliamentary politics corrupts the parties that use it! How strange, to ignore the results of socialists actually using “political activity” (and we must stress that anarchists traditionally use the term “political action” to refer to electioneering, i.e. bourgeois politics, only). Obviously reality is something which can be ignored when creating a political theory.

Needless to say, as noted above, anarchists do not “reject all reforms.” We have quoted Bakunin, now we quote Kropotkin — “the Anarchists have always advised taking an active part in those workers’ organisations which carry on the direct struggle of Labour against Capital and its protector, the State.” He continued by arguing that such struggle, “better than any other indirect means, permits the worker to obtain some temporary improvements in the present conditions of work, while it opens his eyes to the evil done by Capitalism and the State that supports it, and wakes up his thoughts concerning the possibility of organising consumption, production, and exchange without the intervention of the capitalist and the State.”

[Evolution and Environment, pp. 82–3]

Thus we do not think that political action (electioneering) equates to reforms nor even is the best means of winning reforms in the first place. Anarchists argue that by direct action we can win reforms.

Mitchinson continues his diatribe:
“Instead of begging the State for a law compelling employers to make them work only so many hours, the trade associations directly impose this reform on the employers; in this way, instead of a legal text which remains a dead letter, a real economic change is effected by the direct initiative of the workers ... if the workers devoted all their activity and energy to the organisation of their trades into societies of resistance, trade federations, local and regional, if, by meetings, lectures, study circles, papers and pamphlets, they kept up a permanent socialist and revolutionary agitation; if by linking practice to theory, they realised directly, without any bourgeois and governmental intervention, all immediately possible reforms, reforms advantageous not to a few workers but to the labouring mass — certainly then the cause of labour would be better served than ... legal agitation.” [quoted by Caroline Cahm, *Kropotkin and the Rise of Revolutionary Anarchism*, p. 226]

So much for Bakunin or the libertarian wing of the First International being against reforms or the struggle for reforms. Anarchists have not changed their minds on this issue.

**17. Why do anarchists reject political activity?**

After spreading falsehoods against Bakunin, Mitchinson states that:

“Marxism fights for the conquest of political power by the working class and the building of a socialist society, under which the state will wither away.

“Until then should workers refrain from political activity? Should they reject all reforms that might improve their existence? Nothing would please Blair or the bosses more.”

political parties — that is politicians — honestly and sincerely, and at a time when power was in the hands of the two workers organisations...

“All the initiative ... was in the hands of the workers. The politicians were like generals without armies floundering in a desert of futility. Collaboration with them could not, by any stretch of the imagination, strengthen resistance to Franco. On the contrary, it was clear that collaboration with political parties meant the recreation of governmental institutions and the transferring of initiative from the armed workers to a central body with executive powers. By removing the initiative from the workers, the responsibility for the conduct of the struggle and its objectives were also transferred to a governing hierarchy, and this could not have other than an adverse effect on the morale of the revolutionary fighters.” [Lessons of the Spanish Revolution, p. 42]

In addition, in failing to take the initiative to unite the working class independently of the Republican state at the crucial moment, in July of ’36, the CNT of Catalonia was in effect abandoning the only feasible alternative to the Popular Front strategy. Without a libertarian system of popular self-management, the CNT and FAI had no alternative but to join the bourgeois state. For a revolution to be successful, as Bakunin and Kropotkin argued, it needs to create libertarian organisations (such as workers’ associations, free communes and their federations) which can effectively replace the state and the market, that is to create a widespread libertarian organisation for social and economic decision making through which working class people can start to set their own agendas. Only by going this can the state and capitalism be effectively smashed. If this is not done and the state is ignored rather than smashed, it continue and get stronger as it will be the only medium that exists for wide scale decision making. This will result in revolutionaries hav-
The failure to smash the state, this first betrayal of anarchist principles, led to all the rest, and so the defeat of the revolution. Not destroying the state meant that the revolution could never be fully successful economically as politics and economics are bound together so closely. Only under the political conditions of anarchism can its economic conditions flourish and vice versa.

The CNT had never considered a “strategy” of collaboration with the Popular Front prior to July of ’36. In the months leading up to the July explosion, the CNT had consistently criticised the Popular Front strategy as a fake unity of leaders over the workers, a strategy that would subordinate the working class to capitalist legality. However, in July of ’36, the CNT conferences in Catalonia had not seen clearly that their “temporary” participation in the Anti-Fascist Militia Committee would drag them inexorably into a practice of collaboration with the Popular Front. As Christie argues, “the Mili­tias Committee was a compromise, an artificial political solution … It … drew the CNT-FAI leadership inexorably into the State apparatus, until them its principle enemy, and led to the steady erosion of anarchist influence and credibility.” [Op. Cit., p. 105]

Secondly, the fear of fascism played a key role. After all, this was 1936. The CNT and FAI had seen their comrades in Italy and Germany being crushed by fascist dictatorships, sent to concentration camps and so on. In Spain, Franco’s forces were slaughtering union and political militants and members by the tens of thousands (soon to reach hundreds of thousands by the end of the war and beyond). The insurrection had not been initiated by the people themselves (as had the previous revolts in the 1930s) and this also had a psychological impact on the decision making process. The anarchists were, therefore, in a position of being caught between two evils — fascism and the bourgeois state, elements of which had fought with them on the streets. To pursue anarchist politics at such a time, it was argued, could have resulted in the CNT fighting on two fronts:

“What policy should the International [Workers’ Association] follow during th[es]e somewhat extended time period that separates us from this terrible social revolution … the International will give labour unrest in all countries an essentially economic character, with the aim of reducing working hours and increasing salary, by means of the association of the working masses … It will [also] propagandise its principles …” [Op. Cit., p. 109]

“And indeed, as soon as a worker believes that the economic state of affairs can be radically transformed in the near future, he begins to fight, in association with his comrades, for the reduction of his working hours and for an increase in his salary… through practice and action … the progressive expansion and development of the economic struggle will bring him more and more to recognise his true enemies: the privileged classes, including the clergy, the bourgeois, and the nobility; and the State, which exists only to safeguard all the privileges of those classes.” [Op. Cit., p. 103]

This argument for reforms by direct action and workers’ associations was a basic point of agreement in those sections of the First International which supported Bakunin’s ideas. In the words of an anarchist member of the Jura Federation writing in 1875:
grouping which permits the direct struggle to be maintained against capital without falling into parliamentism.” [quoted by Caroline Cahm, *Kropotkin and the Rise of Revolutionary Anarchism*, p. 269]

So much for anarchism being against trade unions (as Mitchinson implies). As for mass workers parties, well, history proved Bakunin right — such parties became corrupted, bureaucratic and reformist. For Mitchinson the last 130 years have not existed.

He goes on to argue that “Bakunin and co. denounced participation in parliament, or the fight for reforms as a betrayal of the revolution, they 'rejected all political action not having as its immediate and direct objective the triumph of the workers over capitalism, and as a consequence, the abolition of the state.'”

We must first note that the Bakunin quote presented does not support Mitchinson’s assertions — unless you think that reforms can only be won via participation in parliament (something anarchists reject). The reason why Bakunin rejected “all political action” (i.e. bourgeois politics — electioneering in other words) is not explained. We will now do so.

Bakunin did denounce participation in parliament. History proved him right. Participation in parliament ensured the corruption of the Social Democratic Parties, the Greens and a host of other radical and socialist organisations. Mitchinson seems to have forgotten the fights against reformism that continually occurred in the Social Democratic Parties at end of the nineteenth and start of the twentieth centuries, a fight which ended with the defeat of the revolutionary wing and the decision to support the nation state. The actual experience of using parliament confirmed Bakunin’s prediction that when “the workers … send common workers … to Legislative Assemblies … The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois … For men do — against the fascists and also against the Republican government. Such a situation would have been unbearable and so it was better to accept collaboration than aid Fascism by dividing the forces of the anti-fascist camp.

However, such a perspective failed to appreciate the depth of hatred the politicians and bourgeois had for the CNT. Indeed, by their actions it would appear they preferred fascism to the social revolution. So, in the name of “anti-fascist” unity, the CNT worked with parties and classes which hated both them and the revolution. In the words of Sam Dolgoff “both before and after July 19th, an unwavering determination to crush the revolutionary movement was the leitmotif behind the policies of the Republican government; irrespective of the party in power.” [The Anarchist Collectives, p. 40]

Rather than eliminate a civil war developing within the civil war, the policy of the CNT just postponed it — until such time as the state was stronger than the working class. The Republican government was quite happy to attack the gains of the revolution, physically attacking rural and urban collectives, union halls, assassinating CNT and FAI members of so on. The difference was the CNT’s act only postponed such conflict until the balance of power had shifted back towards the status quo.

Moreover, the fact that the bourgeois republic was fighting fascism could have meant that it would have tolerated the CNT social revolution rather than fight it (and so weakening its own fight against Franco). However, such an argument remains moot.

It is clear that anti-fascism destroyed the revolution, not fascism. As a Scottish anarchist in Barcelona during the revolution argued, “Fascism is not something new, some new force of evil opposed to society, but is only the old enemy, Capitalism, under a new and fearful sounding name … Anti-Fascism is the new slogan by which the working class is being betrayed.” [Ethal McDonald, *Workers Free Press*, Oct. 1937] This was also argued by the Friends of Durruti who stated that “[d]emocracy defeated the Spanish people, not Fascism.”
The majority at the July 20–21 conferences went along with proposal of postponing the social revolution, of starting the work of creating libertarian communism, and smashing the state and replacing it with a federation of workers’ assemblies. Most of the CNT militants there saw it as a temporary expedient, until the rest of Spain was freed from Franco’s forces (in particular, Aragon and Saragossa). Companys’ (the head of the Catalan government) had proposed the creation of a body containing representatives of all anti-fascist parties and unions called the “Central Committee of Anti-Fascist Militias,” sponsored by his government. The CNT meeting agreed to this proposal, though only on condition that the CNT be given the majority on it. A sizeable minority of delegates were apparently disgusted by this decision. The delegation from Bajo Llobregat County (an industrial area south of Barcelona) walked out saying they would never go along with government collaboration.

Therefore, the decision to postpone the revolution and so to ignore the state rather than smashing was a product of isolation and the fear of a fascist victory. However, while “isolation” may explain the Catalan militants’ fears and so decisions, it does not justify their decision. If the CNT of Catalonia had given Companys the boot and set up a federation of workplace and community assemblies in Catalonia, uniting the rank-and-file of the other unions with the CNT, this would have strengthened the resolve of workers in other parts of Spain, and it might have also inspired workers in nearby countries to move in a similar direction.

Isolation, the uneven support for a libertarian revolution across Spain and the dangers of fascism were real problems, but they do not excuse the libertarian movement for its mistakes. On the contrary, in following the course of action advised by leaders like Horacio Prieto and Abad Diego de Santillan, the CNT only weakened the revolution and helped to discredit libertarian socialism. After all, as Mitchinson now decides to “expose” anarchism:

“In its early days, this modern anarchism found a certain support amongst the workers. However, through the course of struggle workers learned the need for organisation in the shape of the trade unions, and also for political organisation which led to the building of the mass workers parties.”

To see the total nonsense of this claim we need only to turn to Marx. In his words, Bakunin thought that the “working class ... must only organise themselves by trades-unions.” [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 48] Bakunin himself argued “the natural organisation of the masses ... is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association.” [The Basic Bakunin, p. 139] Kropotkin argued that the “union [syndicat] is absolutely necessary. It is the only form of workers’
an important one. Trotskyists often point out that anarchist and libertarian Marxist critiques of Bolshevism sound similar to bourgeois ones and that anarchist accounts of Bolshevik crimes against the revolution and working class give ammunition to the defenders of the status quo. However, this seems more like an attempt to stop critical analysis of the Russian Revolution than a serious political position. Yes, the bourgeois do argue that Stalinism was inherent in Bolshevism — however they do so to discredit all forms of socialism and radical social change. Anarchists, on the other hand, analyse the revolution, see how the Bolsheviks acted and draw conclusions from the facts in order to push forward revolutionary thought, tactics and ideas. Just because the conclusions are similar does not mean that they are invalid — to label criticism of Bolshevism as "bourgeois slander" is nothing less than attempt to put people off investigating the Russian Revolution.

There is are course essential differences between the "bourgeois slanders" against the Bolsheviks and the anarchist critique. The bourgeois slander is based on an opposition to the revolution as such while the anarchist critique affirms it. The bourgeois slanders are not the result of the experiences of the working masses and revolutionaries subject to the Bolshevik regime as the anarchist is. Similarly, the bourgeois slanders ignore the nature of capitalist society while the anarchist critique points out that the degeneration of the Bolshevik state and party were a result of it not breaking with bourgeois ideas and organisational structures. Ultimately, it is not a case of "bourgeois slanders" but rather an honest evaluation of the events of the Russian Revolution from a working class perspective.

To use an analogy, it is common place for the bourgeois press and ideologists to attack trade unions as being bureaucratic and unresponsive to the needs of their members. It is also common place for members of those same trade unions to think exactly the same. Indeed, it is a common refrain of Trotskyists that the trade unions are bureaucratic and need to be reformed in a more demo-
“But what the CNT-FAI leaders failed to grasp was that
the decision whether or not to implement Libertarian
Communism was not theirs to make. Anarchism was
not something which could be transformed from theory
to practice by organisational decree…

“What the CNT-FAI leadership had failed to take on
board was the fact that the spontaneous defensive move-
ment of 19 July had developed a political direction of its
own. On their own initiative, without any intervention
by the leadership of the unions or political parties, the
rank and file militants of the CNT, representing the
dominant force within the Barcelona working class,
together with other union militants had, with the
collapse of State power, … been welded … into genuinely
popular non-partisan revolutionary committees … in
their respective neighbourhoods. They were the natural
organisms of the revolution itself and direct expression

In other words, the bulk of the CNT-FAI membership acted in
an anarchist way while the higher committees compromised their
politics and achievements in the name of anti-fascist unity. In this
the membership followed years of anarchist practice and theory.
It was fear of fascism which made many of the leading militants
of the CNT abandon anarchist politics and instead embrace “anti-
fascist unity” and compromise with the bourgeois republic. To
claim that July 1936 indicated the failure of anarchism means to
ignore the constructive work of millions of CNT members in their
workplaces, communities and militias and instead concentrate on
a few militants who made the terrible mistake of ignoring their po-
itical ideas in an extremely difficult situation. As we said above,
this may explain the decision but it does not justify it.

Therefore, it is clear that the experiences of the CNT and FAI in
1936 indicate a failure of anarchists to apply their politics rather
than their principles. The question of whether it is a “bourgeois slander” to argue (with supporting evidence) that “Stalinism was inherent in Bolshevism” is
"We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population... One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabethgrad... We could cite a whole series of similar facts, but we do not find it necessary... and will content ourselves with mentioning briefly the following essential facts:

1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.
2. Several members of the Education and Propaganda Commission were Jewish.
3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.
4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.
5. In general the Jewish population... took an active part in all the activities of the movement. The Jewish agricultural colonies... participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council..." [The Unknown Revolution, pp. 967–8]

Voline also quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-
Fascist Militias” was the second mistake as at no time could it be considered as the embryo of a new workers’ power. It was, rather, an organisation like the pre-war UGT “Workers’ Alliances” — an attempt to create links between the top-level of other unions and parties. Such an organisation, as the CNT recognised before the war (see section 5), could not be a means of creating a revolutionary federation of workers’ associations and communes and, in fact, a hindrance to such a development, if not its chief impediment.

Given that the CNT had rejected the call for revolution in favour of anti-fascist unity on July 20th, such a development does not reflect the CNT’s pre-war program. Rather it was a reversion to Felix Morrow’s Trotskyist position of joining the UGT’s “Workers’ Alliance” in spite of its non-revolutionary nature (see section 5).

The CNT did not carry out its program (and so apply anarchist politics) and so did not replace the Generalitat (Catalan State) with a Defence Council in which only union/workplace assemblies (not political parties) were represented. To start the process of creating libertarian communism all the CNT would have had to do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates. It could also have invited the various neighbourhood and village defence committees that had either sprung up spontaneously or were already organised before the war as part of the CNT. Unlike the other revolts it took part in the 1930s, the CNT did not apply anarchist politics. However, to judge anarchism by this single failure means to ignore the whole history of anarchism and its successful applications elsewhere, including by the CNT and FAI during numerous revolts in Spain during the 1930s and in Aragon in 1936.

Ironically enough, Kropotkin had attacked the official CNT line of not mentioning Libertarian Communism “until such time as we had captured that part of Spain that was in the hands of the rebels.” In analysing the Paris Commune Kropotkin had lambasted those who had argued “Let us first make sure of victory, and then see what can be done.” His comments are worth quoting at length:

If the Civil War did solely produce the degeneration of the Russian Revolution then all we can hope for is that in the next social revolution, the civil war Lenin argued was inevitable is not as destructive as the Russian one. Hope is not much of a basis to build a “scientific” socialism — but then again, neither is “fate” much of a basis to explain the degeneration of the Russian Revolution but that is what Trotskyists do argue.

We discuss the Russian Revolution in more detail in the appendix on “What happened during the Russian Revolution?” of the FAQ and will not do so here. However, we can point out the experience of the anarchist Makhnovist movement in the Ukraine during the Russian Revolution. Facing exactly the same objective conditions they encouraged soviet democracy, held regular congresses of workers and peasants (the Bolsheviks tried to ban two of them), defended freedom of the press and of association and so on. If objective conditions determined Bolshevik policies, why did they not also determine the policies of the Makhnovists? This practical example indicates that the usual Trotskyist explanation of the degeneration of the Revolution is false.

Perhaps it is because of this, that it showed an alternative to Bolshevik politics existed and worked, that Trotskyists slander it? Trotsky himself asserted that the Makhnovists were simply “kulaks” on horseback and that Makhno’s “followers … [expressed] a militant anti-Semitism.” [Lenin and Trotsky, Kronstadt, p. 80] We discuss the Makhnovist movement in the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?” of the FAQ and there we refute claims that the Makhnovist movement was a kulak (rich peasant) one. However, the charge of "militant anti-Semitism" is a serious one and so we will expose its falsehood here and well as in section 9 of the specified appendix.

The best source to refute claims of anti-Semitism is to quote the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:
power. Moreover, he never acknowledged how his own policies (such as the elimination of soldiers democracy, the militarisation of labour, etc.) played a key role in the rise of the bureaucracy and Stalin.

Ultimately, every explanation of the degeneration of the Russian revolution by Trotskyists ends up as an appeal to “exceptional circumstances” — they blame the rise of Stalinism on the Civil War, to the “exceptional circumstances” created by that war. This can be faulted for two reasons.

Firstly, as Trotsky himself argued (with respect to the Spanish Anarchists) “did not the leaders of German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ … we do severely blame the anarchist theory, which seemed wholly suitable for times of peace, but had to be dropped rapidly as soon as the ‘exceptional circumstance’ of the … revolution had begun.” [Stalinism and Bolshevism] Needless to say, he did not apply his critique to his own politics, which were also a form of the “exceptional circumstances” excuse. Given how quickly Bolshevik “principles” (as expressed in The State and Revolution) were dropped, we can only assume that Bolshevik ideas are also suitable purely for “times of peace” as well.

Secondly, this “explanation” basically argues that, if the bourgeois did not defend their power in 1917, then Leninism would have worked out fine. As Mitchinson himself noted above, belief that the bourgeoisie will just go away without a fight is “an infantile flight of fancy.” As Lenin argued, “revolution ..., in its development, would give rise to exceptionally complicated circumstances” and “[r]evolution is the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances.”

“Make sure of victory! As if there were any way of forming a free commune without laying hands upon property! As if there were any way of conquering the foe while the great mass of the people is not directly interested in the triumph of the revolution, by seeing that it will bring material, moral and intellectual well-being to everybody! They tried to consolidate the Commune first and defer the social revolution until afterward, whereas the only way to go about it was to consolidate the Commune by means of the social revolution.

“The same thing happened with regard to the principle of government. By proclaiming the free Commune, the people of Paris proclaimed an essential anarchist principle, which was the breakdown of the state... .

“And yet, if we admit that a central government to regulate the relations of communes between themselves is quite needless, why should we admit its necessity to regulate the mutual relations of the groups which make up each commune? ... There is no more reason for a government inside the commune than for a government outside.” [“The Commune of Paris”, Selected Writings on Anarchism and Revolution, pp. 126–7]

Kropotkin’s argument was sound, as the CNT discovered. By waiting until victory in the war they were defeated. Kropotkin also indicated the inevitable effects of the CNT’s actions in co-operating with the state and joining representative bodies. In his words:

“Paris sent her devoted sons to the town hall. There, shelved in the midst of files of old papers, obliged to rule when their instincts prompted them to be and to act among the people, obliged to discuss when it was needful to act, to compromise when no compromise was the best policy, and, finally, losing the inspiration which
only comes from continual contact with the masses, they saw themselves reduced to impotence. Being paralysed by their separation from the people — the revolutionary centre of light and heat — they themselves paralysed the popular initiative.” [Op. Cit., p. 127]

Which, in a nutshell, was what happened to the leading militants of the CNT who collaborated with the state. As anarchist turned Minister admitted after the war, ‘[w]e were in the government, but the streets were slipping away from us. We had lost the workers’ trust and the movement’s unity had been whittled away.’ [No Gods, No Masters, vol. 2, p. 274] The actions of the CNT-FAI higher committees and Ministers helped paralyse and defeat the May Days revolt of 1937. The CNT committees and leaders become increasingly isolated from the people, they compromised again and again and, ultimately, became an impotent force. Kropotkin was proved correct. Which means that far from refuting anarchist politics or analysis, the experience of the CNT-FAI in the Spanish Revolution confirms it.

In summary, therefore, the Spanish Revolution of 1936 indicates the failure of anarchists rather than the failure of anarchism.

One last point, it could be argued that anarchist theory allowed the leadership of the CNT and FAI to paint their collaboration with the state as a libertarian policy. That is, of course, correct. Anarchism is against the so-called “dictatorship of the proletariat” just as much as it is against the actual dictatorship of the bourgeoisie (i.e. the existing system and its off-shoots such as fascism). This allowed the CNT and FAI leaders to argue that they were following anarchist theory by not destroying the state completely in July 1936. Of course, such a position cannot be used to discredit anarchism simply because such a revision meant that it can never be libertarian to abolish government and the state. In other words, the use made of anarchist theory by the leaders of the CNT and FAI in

In relation to industrial policy there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practice of Stalinism. We know that many on the revolutionary left will find this statement hard to swallow. We are convinced however that any honest reading of the facts cannot but lead to this conclusion. The more one unearths about this period [1917–21], the more difficult it becomes to define — or even see — the ‘gulf’ allegedly separating what happened in Lenin’s time from what happened later. Real knowledge of the facts also makes it impossible to accept … that the whole course of events was ‘historically inevitable’ and ‘objectively determined.’ Bolshevik ideology and practice were themselves important and sometimes decisive factors in the equation, at every critical stage of this critical period.” [Op. Cit., p. 84]

We should also point out that far from “Leon Trotsky and Marxism” explaining the degeneration of the Russian revolution, Trotsky could not understand that a “totalitarian dictatorship” could be an expression of a new minority class and presented a decidedly false analysis of the Soviet Union as a “degenerated workers’ state.” That analysis led numerous Trotskyists to support these dictatorships and oppose workers’ revolts against them. In addition, Trotsky’s own reservations were only really voiced after he had lost
view, which would be alien to someone subject to egalitarian social relations.

So, obviously the “ideas in people’s heads” matter, particularly during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. In other words, political ideas do matter in society. Nor do anarchists leave our analysis at this obvious fact — as noted, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a decentralised, egalitarian system. That Mitchinson denies this obvious fact suggests he knows nothing of materialist philosophy.

Moreover, anarchists are aware of the problems facing the revolution. After all, anarchists were involved in that revolution and wrote some of the best works on that revolution (for example, Voline’s The Unknown Revolution, Arshinov’s The History of the Makhnovist Movement and Maximov’s The Guillotine at Work). However, they point to the obvious fact that the politics of the Bolsheviks played a key role in how the revolution developed. While the terrible objective conditions may have shaped certain aspects of the actions of the Bolsheviks it cannot be denied that the impulse for them were rooted in Bolshevik theory. After all, anarchist theory could not justify the suppression of the functional democracy associated with the factory committees or the soldiers election of officers in the Red Army. Bolshevik theory could, and did.

Indeed, Trotsky was still claiming in 1937 that the “Bolshevik party achieved in the civil war the correct combination of military

this case presents nothing else than a betrayal of that theory rather than its legitimate use.

Also, and more importantly, while anarchist theory was corrupted to justify working with other parties and unions in a democratic state, Marxist theory was used to justify the brutal one-party dictatorship of the Bolsheviks, first under Lenin and the Stalin. That, we feel, sums up the difference between anarchism and Leninism quite well.

Reply to errors and distortions in Phil Mitchinson’s Marxism and direct action

Phil Mitchinson essay Marxism and direct action attempts to provide a “Marxist” (i.e. Leninist/Trotskyist) critique of the current “Direct Action” based groups which came to notice at various demonstrations across the world — most famously in Seattle, November 1999. He, correctly, links these groups and currents with anarchism. However, his “critique” is nothing but a self-contradictory collection of false assertions, lies and nonsense, as we shall prove (indeed, his “critique” seems more the product of envy at anarchist influence in these movements than the product of scholarship or objectivity). That is why we have decided to reply to his article — it gives us an ideal possibility to indicate the depths to which some Marxists will swoop to distort anarchist politics and movements.

1. How does Mitchinson impoverish the politics of the direct action groups?

He begins by noting that the “recent anti-capitalist demonstrations have brought together many different groups protesting against the destruction of the environment, racism, the exploitation of the third world, and also many ordinary young people protesting at the state
of things in general. They have certainly shattered the myth that everyone is happy and that the capitalist system is accepted as the only possible form of society.” Of course, this is correct. What he fails to mention is that these demonstrations and groups managed to do this without the “guidance” of any Lenineist party — indeed, the vanguard parties are noticeable by their absence and their frantic efforts to catch up with these movements. This, of course, is not the first time this has happened. Looking at every revolution we discover the “revolutionary” parties either playing no role in their early stages or a distinctly counter-productive role.

He states that “all around us we see the misery this system causes. Famine, war, unemployment, homelessness and despair, these are the violent acts that the system perpetrates against millions every day.” However, as much as these aspects of capitalism are terrible, the anti-capitalist revolt expressed by many within the direct action groups is much wider than this (standard) leftist list. The movements, or at least parts of them, have a much more radical critique of the evils of capitalism — one that bases it self on abolishing alienation, domination, wage slavery, oppression, exploitation, the spiritual as well as material poverty of everyday life, by means of self-management, autonomy, self-organisation and direct action. They raise the possibility of playful, meaningful, empowering and productive self-activity to replace “tedious, over-tiring jobs” as well as the vision of a libertarian communist (i.e. moneyless, stateless) society. Mitchinson’s account of the movements he is trying to critique is as poverty stricken intellectually as the capitalist system these movements are challenging. Leninists like Mitchinson, instead of a swallowing a dose of humility and learning from the very different ways this new wave of protest is being framed, are trying to squeeze the protest into their own particular one-dimensional model of revolution. Being unable to understand the movements he is referring to, he pushes their vision into the narrow confines of his ideology and distorts it.

Or, as the Bakunin influenced Jura Federation of the First International put it in 1874, “the dictatorship that we want is one which the insurgent masses exercise directly, without intermediary of any committee or government.” [quoted by Peter Marshall, Demanding the Impossible, p. 631] In other words, a situation in which the working masses defend their freedom, their control over their own lives, from those who seek to replace it with minority rule.

15. What caused the degeneration of the Russian Revolution?

Mitchinson argues that:

“Anarchists see in the degeneration of the Soviet Union into a totalitarian dictatorship proof that Bakunin was right. In reality, only Leon Trotsky and Marxism have been able to explain the causes of that degeneration, finding its roots not in men’s heads or personalities, but in the real life conditions of civil war, armies of foreign intervention, and the defeat of revolution in Europe.”

Needless to say, anarchism explains the causes of the degeneration in a far more rich way than Mitchinson claims. The underlying assumption of his “critique” of anarchism is that the politics of the Bolsheviks had no influence on the outcome of the revolution — it was a product purely of objective forces. He also subscribes to the contradictory idea that Bolshevik politics were essential for the success of that revolution. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold — they will not occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone placed into a position of power over others will act in certain ways, have a certain world
taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under domination. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.

“The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification, a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to conceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.

“Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary.” [Anarchism and Sovietism]

He goes on to state that "[w]itnessing and experiencing this destruction and chaos, young people everywhere are driven to protest.” Of course, anyone who is part of these movements will tell you that a wide cross-section of age groups are involved, not just “young people.” However, Mitchinson’s comments on age are not surprising — ever since Lenin, Bolshevik inspired Marxists have attributed other, more radical, political theories, analyses and visions to the alleged youth of those who hold these opinions (in spite of the facts). In other words, these ideas, they claim, are the produce of immaturity, inexperience and youth and will, hopefully, be grown out of. Just as many parents mutter to themselves that their anarchist (or socialist, homosexual, whatever) children will “grow out of it”, Lenin and his followers like Mitchinson consider themselves as the wiser, older relations (perhaps a friendly Uncle or a Big Brother?) of these “young” rebels and hope they will “grow out of” their infantile politics.

The word patronising does not do Mitchinson justice!

2. Does anarchism “juxtapose” theory and action?

Now Mitchinson launches into his first strawman of his essay. He asserts:

“However, the idea of getting involved in a political organisation is a turn off for many, who understandably want to do something, and do something now. In reality, the attempt to juxtapose organisation, discussion, and debate with ‘direct action’ is pure sophistry.”

We are not aware of any anarchist or direct action group which does not discuss and debate their actions, the rationale of their actions and the aims of their actions. These demonstrations that “young people” apparently turn up at are, in fact, organised by groups who have meetings, discuss their ideas, their objectives,
their politics, and so on. That much should be obvious. In reality, it is Mitchinson who expresses “pure sophistry,” not the “many” who he claims act without thinking. And, of course, he fails to mention the two days of meetings, discussion and debate which took place the Saturday/Sunday before the May Day actions in London. To mention the May Day 2000 conference would confuse the reader with facts and so goes unmentioned.

He then asserts that the “ideas of Marxism are not the subject of academic study, they are precisely a guide to action.” Of course, we have to point out here that the Marxist Parties Mitchinson urges us to build did not take part in organising the actions he praises (a few members of these parties did come along, on some of them, to sell papers, of course, but this is hardly a “vanguard” role). In general, the vanguard parties were noticeable by their absence or, at best, their lack of numbers and involvement. If we judge people by what they do, rather than what they say (as Marx urged), then we must draw the conclusion that the Marxism of Mitchinson is a guide to inaction rather than action.

Mitchinson continues by stating Marxists “are all in favour of action, but it must be clearly thought out, with definite aims and objectives if it is to succeed. Otherwise we end up with directionless action.” It would be impolite to point out that no anarchist or member of a direct action organisation would disagree with this statement. Every anti-capitalist demonstration has had a definite aim and objective, was clearly thought out and organised. It did not “just happen.” Mitchinson presents us with a strawman so fragile that even a breeze of reality would make it disintegrate.

The question is, of course, what kind of organisation do we create, how do we determine our aims and objectives. That is the key question, one that Mitchinson hides behind the strawman of organisation versus non-organisation, planned action versus “directionless action.” To state it bluntly, the question is actually one of do we organise in an authoritarian manner or a libertarian manner, not whether or not we organise. Mitchinson may not see the

The essence of every revolution consisted and consists in putting a new class in power, thus enabling it to realise its own programme in life. It is impossible to wage war and to reject victory. It is impossible to lead the masses towards insurrection without preparing for the conquest of power.”

For anarchists the question immediately is, “power to who”? As is clear from the writings of Lenin and Trotsky they see the “conquest of power” not in terms of “putting a new class in power” but, in fact, the representatives of that class, the vanguard party, into power. Anarchists, in contrast, argue that organs of working class self-management are the means of creating and defending a social revolution as it is the only means that the mass of people can actually run their own lives and any power over and above these organs means dictatorship over the working class, a new form of state and class power.

As Rudolf Rocker argues:

“Let no one object that the ‘dictatorship of the proletariat’ cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the ‘people’…”

“We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers
"In the Marxists’ theory this dilemma is resolved in a simple fashion. By popular government they mean government of the people by a small number of representatives elected by the people. So-called popular representatives and rulers of the state elected by the entire nation on the basis of universal suffrage — the last word of the Marxists, as well as the democratic school — is a lie behind which the despotism of a ruling minority is concealed, a lie all the more dangerous in that it represents itself as the expression of a sham popular will.

“So … it always comes down to the same dismal result: government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of former workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers’ world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people.” [Statism and Anarchy, p. 178]

Thus anarchists reject the notion of the dictatorship of the proletariat for two reasons. Firstly, because it excluded the bulk of the working masses when it was first used by Marx and Engels. Secondly, because in practice it would mean the dictatorship of the party over the proletariat. Needless to say, Mitchinson does not mention these points.

Mitchinson argues that "[a]lthough this sounds radical enough it nonetheless amounts to a recipe for inaction and disaster." And quotes Trotsky to explain why:

“To renounce the conquest of power is voluntarily to leave the power with those who wield it, the exploiters.

difference (in which case he thinks all organisation is “authoritarian”) but for anarchists and members of direct action groups the difference is vital.

He goes on to state:

“Furthermore without political organisation who decides what action is to be taken, when and where? There can be no greater direct action than the seizing of control over our own lives by the vast majority of society. In that act lies the essence of revolution. Not just an aimless ‘direct action’ but mass, democratic and conscious action, the struggle not just against capitalism, but for a new form of society, socialism.”

Again Mitchinson presents us with the strawman of “conscious” action verses “aimless” action. As noted above, the anti-capitalist demonstrations were organised — non-hierarchical groups decided collectively what action was to be organised, when and where. The real question is not organisation versus non-organisation but rather authoritarian versus libertarian organisation. Either decision making from the bottom up or decision making from the top-down. As for there bring “no greater direct action” than revolution, well, anarchists have been saying that for over one hundred years — we don’t need a Marxist to tell us our own ideas!

3. How does Mitchinson distort the London May Day demo?

He then gets to the crux of the issue — “So, what comes next?” He goes on to assert:

“The organisers of the demo tell us this was not a protest in order to secure changes, reforms apparently are a waste of time. No, simply by participating in what
they call the ‘carnival’ we become better people, and eventually more and more people will participate, until a critical mass is reached and we all ignore capitalism, don’t pay our bills, until they go away. What an infantile flight of fancy!”

Yes, indeed, what an infantile flight of fancy! However, the flight is purely Mitchinson’s. No one in RTS (or any other anarchist) makes such a claim. Yes, RTS urged people to take part in a carnival — as they argue, “[m]any of the great moments of revolutionary history were carnivalesque … But we are not waiting for these moments of carnivalesque revolution, we are trying to merge them into every moment of everyday life. We cannot live on one-off days, a letting of stream, safety values for society enabling life to return to normal the next day or for hierarchical domination to return, as did in so many historical revolutions. Revolution is not an act but a process and carnival can prepare us for this process.” [Maybe, p. 9] Thus “carnival” is not seen as an end to itself (as Mitchinson asserts) but rather an aid to the creation of a revolutionary movement. Mitchinson confuses a celebration of May Day with an insurrection! In the words of Maybe:

“And although Mayday is just one day, it seeks to incite continuous creativity and action towards a radical remaking of everyday life. Steeped in a history of daily struggle, of ‘day in day out’ organising for social change, but pulsating with the celebration of renewal and fresh hope that returns with the coming of summer. Mayday will always be a pivotal moment.” [Maybe, p. 5]

Maybe is clear — we need to organise the daily struggle and enjoy ourselves while we are at it. Mitchinson’ distortion of that message is pitiful.

tariat can have no other aim than the creation of an absolutely free economic organisation and federation based on work and equality and wholly independent of any political government, and such an organisation can only come into being through the spontaneous action of the proletariat itself…no political organisation can be anything but the organisation of rule in the interests of a class and to the detriment of the masses…the proletariat, should it seize power, would become a ruling, and exploiting, class…”

To understand this passage it is necessary to place it in historical context. In 1872, the proletariat was a minority class within all nations bar the UK. In almost all nations, the majority of the working class were either artisans or peasants (hence the reference to “the masses”). To urge that the proletariat seize power meant to advocate the class rule of a minority of the working masses. Minority rule could be nothing else but the dictatorship of a minority over the majority (a dictatorship in the usual sense of the word), and dictatorships always become exploitative of the general population.

Thus Mitchinson’s “analysis” is ahistoric and, fundamentally, unscientific and a mockery of materialism.

Moreover, anarchists like Bakunin also made clear that the Marxist notion of “proletarian dictatorship” did not even mean that the proletariat as a whole would exercise power. In his words:

“What does it mean, ‘the proletariat raised to a governing class?’ Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the government? The entire nation will rule, but no one would be ruled. Then there will be no government, there will be no state; but if there is a state, there will also be those who are ruled, there will be slaves.
Luigi Fabbri sums up the difference well:

“The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists ... as the foes of all organisation and all co-ordinated struggle. We, on the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders.” [“Anarchy and ‘Scientific’ Communism”, in The Poverty of Statism, pp. 13–49, Albert Meltzer (ed.), p. 27]

Mitchinson moves on to the usual Marxist slander that as “a modern philosophy anarchism developed in the 19th century alongside the explosive growth of capitalism and its state machine. It represented a rebellion by a section of the petty bourgeoisie at the loss of their position in society, driven to the wall by the growth of monopoly.” We have refuted this assertion in another appendix (Reply to errors and distortions in David McNally’s pamphlet “Socialism from Below”) and so will not do so here.

14. Why do anarchists reject the Marxist notion of “conquest of power”?

Mitchinson now decides to quote some anarchists to back up his spurious argument:

“Their case was argued by Mikhail Bakunin and his supporters in the First International. At an anarchist conference in 1872 they argued ‘The aspirations of the prole-

4. Do anarchists really think “the bosses will do nothing to defend their system”?

He continues:

“The genuine intentions of those protesting is not open to question. However, the way to hell is paved with many such good intentions. Are we really to believe that whilst we all ‘place ourselves outside of capitalism’, the bosses will do nothing to defend their system? This ostrich like tactic of burying our heads in the sand until they go away is not serious. Nor is it action. In reality, it is irresponsible, indirect inaction.”

The comment about “indirect inaction” is somewhat funny coming from a political tendency which did not produce a movement of the importance of Seattle 1999 and is now trying to recruit from it. But it would be interesting to discover in which anarchist work comes the notion that we do not think the bosses will not defend their system. Yes, Lenin did claim that anarchists would “lay down their arms” after a revolution, but as Murray Bookchin notes, anarchists are “not so naive as to believe anarchism could be established overnight. In imputing this notion to Bakunin, Marx and Engels wilfully distorted the Russian anarchist’s views. Nor did the anarchists ... believe that the abolition of the state involved ‘laying down arms’ immediately after the revolution...” [Post-Scarcity Anarchism, p. 213] Bakunin, for example, thought the “Commune would be organised by the standing federation of the Barricades” and that “the federation of insurgent associations, communes and provinces ... would organise a revolutionary force capable of defeating reaction ... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Michael Bakunin: Selected Writings, p. 170 and p. 171]
Moreover, RTS actions have continually came into conflict with the state and its forces of defence. Mitchinson seems to think that the participants of RTS and its demonstrations are incapable of actually understanding and learning from their experiences — they have seen and felt the capitalist system defending itself. Anyone on the J18, N30, A16 or M1 demos or just watching them on TV would have seen the capitalist system defending itself with vigour — and the protestors fighting back. Rather than acknowledge the obvious, Mitchinson asserts nonsense. The only person burying their head in the sand is Mitchinson if he ignores the experiences of his own senses (and the basic principles of materialism) in favour of an ideological diatribe with no basis in reality.

What is “irresponsible” is misrepresenting the viewpoints of your enemies and expecting them not to point our your errors.

5. How does Mitchinson misrepresent anarchist organisation?

Mitchinson now moves onto the real enemy, anarchism. He asserts that:

“Anarchist organisations have always hidden behind a facade of ‘self-organisation’. They claim to have no leaders, no policy etc. Yet who decides?”

Yes, anarchist groups claim to have no leaders but they do not claim to be without policies. Anyone with any comprehension of anarchist theory and history would know this (just one example, Bakunin argued that we needed to establish “a genuine workers’ program — the policy of the International [Workers Association]” ["The Policy of the International", The Basic Bakunin, p. 100]).

Mitchinson asks the question, if we do not have leaders, “who decides?” That in itself exposes the authoritarian nature of his politics and the Bolshevik style party. He obviously cannot comprehend that, without leaders deciding things for us, we manage our relationships it just changes who is telling the workers what to do.

The important point to note is that Trotsky argued that the proletariat could be a ruling class when it had no political influence, never mind democracy, when subject to a one-party state and bureaucratic dictatorship and when the social relations of the society were obviously capitalistic. No wonder he found it impossible to recognise that dictatorship by the party did not equal dictatorship by the proletariat.

Therefore, the claim that Trotskyists see the “dictatorship of the proletariat” as “the rule of one class over another” is, as can be seen, a joke. Rather they see it as the rule of the party over the rest of society, including the working class. Even when that party had become a bureaucratic nightmare, murdering millions and sending hundreds of thousands to forced labour camps, Trotsky still argued that the “working class” was still the “ruling class.” Not only that, his political perspective allowed him to justify the suppression of workers’ democracy in the name of the “rule” of the workers. For this reason, anarchists feel that the real utopians are the Leninists who believe that party rule equals class rule and that centralised, hierarchical power in the hands of the few will not become a new form of class rule. History, we think, supports our politics on this issue (as in so many others).

Mitchinson argues that “Anarchism’s utopian calls to abolish the state overnight demonstrates neither the understanding of what the state is, nor the programme of action necessary to achieve the goal it sets itself.” However, as made clear, it is Marxism which is utopian, believing that rule by a party equals rule by a class and that a state machine can be utilised by the majority of the population. As Kropotkin argued, Anarchists “maintain that the State organisation, having been the force to which minorities resorted for establishing and organising their power over the masses, cannot be the force which will serve to destroy these privileges.” [Kropotkin’s Revolutionary Pamphlets, p. 170]
Bolshevism] However, social relations are just that, social and so between individuals and classes — ownership of property cannot tell the whole story. What social relations did Bolshevism bring about?

As far as the wage labour social relationship goes (and do not forget that is the defining feature of capitalism), the Bolsheviks opposed workers’ self-management in favour of, first, “control” over the capitalists and then one-man management. No change in social relationships there. Property relations did change in the sense that the state became the owner of capital rather than individual capitalists, but the social relationship workers experienced during the working day and within society was identical. The state bureaucrat replaced the capitalist.

As for politics, the Bolshevik revolution replaced government with government. Initially, it was an elected government and so it had the typical social relationships of representative government. Later, it became a one party dictatorship — a situation that did not change under Stalin. Thus the social relationships there, again, did not change. The Bolshevik Party became the head of the government. That is all. This event also saw the reconstruction of Soviet Society in the interest of a privileged minority — it is well known that the Communists gave themselves the best rations, best premises and so on.

Thus the Bolshevik revolution did not change the social relations people faced and so Trotsky’s comments are wishful thinking. The “interests of the masses” could not, and were not, defended by the Bolshevik revolution as it did not change the relations of authority in a society — the social relationships people experienced remain unchanged. Perhaps that is why Lenin argued that the proletarian nature of the Russian regime was ensured by the nature of the ruling party? There could be no other basis for saying the Bolshevik state was a workers’ state. After all, nationalised property without workers’ self-management does not change social

own affairs – we decide the policy of our organisations collectively, by the direct democracy of the membership. Forgetting his early comment of that there is “no greater direct action than the seizing of control over our own lives by the vast majority of society,” he now asks how the vast majority of society can seize control over our own lives without leaders to tell us what to do!

Anarchists reject the idea of leaders — instead we argue for the “leadership of ideas.” As we discuss this concept in section J.3.6 and so will not do so here. However, the key concept is that anarchists seek to spread their ideas by discussing their politics as equals in popular organisations and convincing the mass assemblies of these bodies by argument. Rather than using these bodies to be elected to positions of power (i.e. leadership as it is traditionally understood) anarchists consider it essential that power remains in the hands of the base of an organisation and argue that the policies of the organisation be decided by the member directly in assemblies and co-ordinated by conferences of mandated, recallable delegates (see section A.2.9 for more discussion).

This is to be expected, of course, as anarchists believe that a free society can only be created by organisations which reflect the principles of that society. Hence we see policies being made by those affected by them and oppose attempts to turn self-managed organisations into little more than vehicles to elect “leaders.” A free society is a self-managed one and can only be created by self-management in the class struggle or revolutionary process. All that revolutionaries should do is try and influence the decisions these organisations make by discussing our ideas with their membership — simply as any other member could in the mass assemblies the organisation is built upon. Any attempt by revolutionaries to seize power upon behalf of these organisations means destroying their revolutionary potential and the revolution itself by replacing the participation of all with the power of a few (the party).

Thus anarchist theory and practice is very clear on the question “who decides” — it is those who are affected by the question
via group assemblies and conferences of mandated, recallable delegates. Rather than have “no policy,” policy in an anarchist organisation is decided directly by the membership. Without “leaders” — without power delegated into the hands of a few — who else could make the decisions and policy? That Mitchinson cannot comprehend this implies that he cannot envision a society without a few telling the many what to do.

He continues:

“If there was no leadership and no policy then there could be no action of any kind. The recent demonstrations have been highly organised and co-ordinated on an international scale. Good, so it should be. However, without organisation and democracy no-one, except a clique at the top, has any say in why, where and when. Such a movement will never bring international capital trembling to its knees.”

Firstly, we must point out that these demonstrations which have spread like wild-fire across the world have, most definitely, made international capital nervous. Secondly, we must point out that no Leninist vanguards were involved in organising them (a few members turned up to sell papers later, once their significance had registered with the party leadership). Thirdly, we must point out that no Leninist vanguard has made “international capital” tremble in the knees for quite a few decades — since 1917, only Stalinist vanguard has had any effect (and, of course, “international capital” soon realised they could work with the Bolsheviks and other “Communist” leaders as one ruling elite with another). It seems somewhat ironic that a Leninist, whose movement was noticeable in its absence, mocks the first movement to scare the ruling class for nearly 30 years.

Secondly, we must note that the policy decided upon by the multitude of groups across the world was decided upon by the dictatorship of the proletariat becomes the dictatorship over the proletariat as Bakunin predicted. With the elimination of functional democracy and self-management, indirect democracy would not be able to survive for long in the face of centralised, top-down decision making by the ruling party.

So hopeless was Trotsky’s understanding of socialism and the nature of a working class social revolution that he even considered the Stalinist dictatorship to be an expression of the “dictatorship of the proletariat.” He argued that the “bureaucracy has expropriated the proletariat politically in order to guard its social conquests with its own methods. The anatomy of society is determined by its economic relations. So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class.” [The Class Nature of the Soviet State]

Just to stress the point, according to Trotsky, under Stalinism the proletariat was the ruling class and that Stalin’s dictatorship eliminated what remained (and it was not much) of working class political influence in order “to guard its social conquests”? What social conquests could remain if the proletariat was under the heel of a totalitarian dictatorship? Just one, state ownership of property — precisely the means by which the (state) bureaucracy enforced its control over production and so the source of its economic power (and privileges). To state the obvious, if the working class does not control the property it is claimed to own then someone else does. The economic relationship thus generated is a hierarchical one, in which the working class is an oppressed class. Thus Trotsky identified the source of the bureaucracy’s economic power with “socialism” — no wonder his analysis of Stalinism (and vision of socialism) proved so disastrous.

Trotsky argues that the “liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repressions, meant an upheaval of social relations in the interests of the masses, whereas Stalin’s Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority.” [Stalinism and
This point is reiterated in his essay, “Bolshevism and Stalinism” (written in 1937) when he argued that:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Trotsky, Op. Cit., p. 18]

And, obviously, without party dictatorship the Soviets would return to the “mud.” In other words, the Soviets are only important to attain party rule and if the two come into conflict then Trotskyism provides the rule of the party with an ideological justification to eliminate Soviet democracy. Lenin’s and Trotsky’s politics allowed them to argue that if you let the proletariat have a say then the dictatorship of the proletariat could be in danger.

Thus, for Trotsky, the “dictatorship of the proletariat” is independent of allowing the proletariat to manage their own affairs directly. However, without the means of manage their own affairs directly, control their own lives, the proletariat are placed into the position of passive electors, who vote for parties who rule for and over them, in their own name. Moreover, they face the constant danger of the “vanguard” nullifying even these decisions as “temporary vacillations.” A fine liberation indeed.

Also, as libertarian socialist Maurice Brinton argues, none of the Bolshevik leaders “saw the proletarian nature of the Russian regime as primarily and crucially dependent on the exercise of workers’ power at the point of production (i.e. workers’ management of production). It should have been obvious to them as Marxists that if the working class did not hold economic power, its ‘political’ power would at best be insecure and would in fact degenerate.” [Op. Cit., p. 42]

With direct working class sovereignty eroded by the Bolsheviks in the name of indirect, i.e. party, sovereignty it is hardly surprising members of those groups. They practised organisation and direct democracy to make their policy decisions and implement them. Given that Mitchinson wonders how people can make decisions without leaders, his comments about rule by “a clique at the top” are somewhat ironic. As the history of the Russian Revolution indicates, a highly centralised state system (which mimics the highly centralised party) soon results in rule by the top party officials, not by the mass of people.

Mitchinson again decides to flog his fallacy of organisation versus non-organisation:

“One of the best known anarchist groups in Britain, Reclaim the Streets, save the game away in their spoof Mayday publication, ‘Maybe’. Incidentally, who wrote these articles, who decided what went in and what didn’t, who edited it, where did the money come from? Our intention here is not to accuse them of dodgy financing — simply to point out that this ‘no leaders’ stuff is a self-organised myth.”

It states who put together MayDay on page 5 of the paper. It was “an organic group of ‘guerrilla gardeners’” — in other words, members of Reclaim the Streets who desired to produce the paper for that event. These people would have joined the group producing it via the weekly RTS open meetings and would have been held accountable to that same open meeting. No great mystery there — if you have even the slightest vision of how a non-hierarchical organisation works. Rather than being a “myth”, RTS shows that we do not need to follow leaders — instead we can manage our own organisations directly and freely participate in projects organised via the main open meeting. Writing articles, editing, and so on are not the work of “leaders” — rather they are simply tasks that need doing. They do not imply a leadership role — if they did then every hack journalist is a “leader.”
He continues to attack what he cannot understand:

"On page 20 they announce ‘Reclaim the streets is non-hierarchical, spontaneous and self-organised. We have no leaders, no committee, no board of directors, no spokes people. There is no centralised unit for decision making, strategic planning and production of ideology. There is no membership and no formalised commitment. There is no master plan and no pre-defined agenda.’

"There are two problems here. Firstly who is ‘we’, who made the above statement, and who decided it. Secondly, if it were true, it would not be something of which to be proud. Whether you like it or not, there is no way the capitalist system will ever be overthrown by such a haphazard and slipshod method."

Taking the first issue, “who is ‘we,’ who made the above statement, and who decided it.” Why, it is the membership of RTS — decided via their weekly open meeting (as mentioned on that page). That Mitchinson cannot comprehend this says a lot about his politics and vision. He cannot comprehend self-management, direct democracy. He seems not to be able to understand that groups can make decisions collectively, without having to elect leaders to make any decisions for them.

Taking the second issue, it is clear that Mitchinson fails to understand the role of RTS (and other anarchist groups). Anarchists do not try to overthrow capitalism on behalf of others — they urge them to overthrow it themselves, by their own direct action. The aim of groups like RTS is to encourage people to take direct action, to fight the powers that be and, in the process, create their own organs of self-management and resistance. Such a process of working class self-activity and self-organisation in struggle is the starting process of every revolution. People in struggle create their vanguard has taken power — which is exactly what Trotsky argued.

With regards to the Red Army and its elected officers, he stated in March 1918 that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree” because the Bolshevik Party held power or, as he put it, “political power is in the hands of the same working class from whose ranks the Army is recruited.” Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the appointment of members of the commanding staff by the organs of the Soviet Power.” [Work, Discipline, Order]

He made the same comments with regard the factory committees:

“It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered.” [quoted by Maurice Brinton, Op. Cit., p. 66]
their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.

"In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard." [Stalinism and Bolshevism]

Thus, rather than the working class as a whole seizing power, it is the "vanguard" which takes power — "a revolutionary party, even after seizing power ... is still by no means the sovereign ruler of society." [Ibid.] That is, of course, true — they are still organs of working class self-management (such as factory committees, workers councils, trade unions, soldier committees) through which working people can still exercise their sovereignty. Little wonder Trotsky abolished independent unions, decreed the end of soldier committees and urged one-man management and the militarisation of labour when in power. Such working class organs do conflict with the sovereign rule of the party and so have to be abolished.

After being in power four years, Trotsky was arguing that the "Party is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every moment on the formal principle of a workers' democracy." [quoted by Brinton, The Bolsheviks and Workers' Control, p. 78]

This position follows naturally from Trotsky's comments that the party "crystallises" the "aspirations" of the masses. If the masses reject the party then, obviously, their "cultural level" has fallen and so the party has the right, nay the duty, to impose its dictatorship over them. Similarly, the destruction of organs of working class self-management can be justified because the own organisations — such as soviets (workers' councils), factory committees, community assemblies — through which they start to manage their own affairs and, hopefully, overthrow the state and abolish capitalism. It is not the task of RTS to overthrow capitalism, it is the task of the whole population.

Moreover, many anarchists do see the need for a specific anarchist organisation — three national federations exist in the UK, for example. RTS does not need to organise in this fashion simply because such groups already exist. It is not its role — its role is a means to encourage self-activity and direct action as well as raising libertarian ideas in a popular manner. For more "serious" political organisation, people can and do turn to other anarchist groups and federations.

The street carnival principle of RTS is precisely the type of organising anarchists excel at — namely fun organising that catches the fun and excitement of popular direct action and, most importantly, gets people out on the streets — something Marxists have failed to do very well (if at all). It's a small step from organising a street carnival to further, "more serious" organising. Anarchist revolution is about bringing joy back into human lives, not endless (and often dishonest) polemics on the ideas of long dead philosophers. Rather, it is about creating a philosophy which, while inspired by past thinkers, is not subservient to them and aims to base itself on current struggles and needs rather than past ones. It is also about building a new political culture, one that is popular, active, street-based (versus ivory-tower elitist), and above all, fun. Only this way can we catch the imagination of everyday people and move them from resigned apathy to active resistance. The Marxists have tried their approach, and it has been a resounding failure — everyday people consider Marxism at best irrelevant, and at worst, inhuman and lifeless. Fortunately, anarchists are not following the Marxist model of organising, having learned from history

Thus Mitchinson fails to understand the role of RTS or its position in the UK anarchist movement.
He then asserts:

“There is no theory, no coherent analysis of society, no alternative programme. To brag of a lack of direction, a lack of purpose and a lack of coherence, in the face of such a highly organised and brutal enemy as international capital, is surely the height of irresponsibility.”

Firstly, anyone reading *Maybe* or other RTS publications will quickly see there is theory, coherent analysis and an alternative vision. As Mitchinson has obviously read *Maybe* we can only assume his claim is a conscious lie. Secondly, RTS in the quoted passage clearly do not “brag of a lack of direction, a lack of purpose and a lack of coherence.” They do state there is no “centralised unit for decision-making” — which is true, they have a decentralised unit for decision-making (direct democracy in open meetings). There is “no master-plan,” etc. as any plans are decided upon by these open meetings. There is no pre-defined agenda because, as a democratic organisation, it is up to the open meeting to define their own agenda.

It is only Mitchinson’s assumption that only centralised parties, with leaders making the decisions, can have “direction,” “purpose” and “coherence.” As can be seen by their actions that RTS does have direction, purpose and coherence. Needless to say, while other anarchists may be critical about RTS and its actions, we do not deny that it has been an effective organisation, involving a great many people in its actions who would probably not be involved in political activities. Rather than being “irresponsible,” RTS shows the validity of libertarian organisation and its effectiveness. No Marxist Party has remotely approached RTS’s successes in terms of involving people in political actions. This is hardly a surprise.

13. Is the Marxist “worker’s state” really the rule of one class over another?

Mitchinson argues that the “task of this state would be to develop the economy to eradicate want. Less need, means less need to govern society, less need for a state. Class society and the state will begin to wither away as the government of people, the rule of one class over another, is replaced by the administration of things, the planned use of resources to meet society’s needs.”

As Malatesta makes clear, this is pure sophistry:

“Whoever has power over things has power over men; whoever governs production also governs the producers; who determines consumption is master over the consumer.

“This is the question; either things are administered on the basis of free agreement of the interested parties, and this is anarchy; or they are administered according to laws made by administrators and this is government, it is the State, and inevitably it turns out to be tyrannical.

“It is not a question of the good intentions or the good will of this or that man, but of the inevitability of the situation, and of the tendencies which man generally develops in given circumstances.” [Life and Ideas, p. 145]

Moreover, it is debatable whether Trotskyists really desire the rule of one class over another in the sense of working class over capitalist class. To quote Trotsky:

“the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and
chical and elitist nature — all it can do is represent the interests of the party in power, its own bureaucratic needs and privileges and slowly, but surely, remove itself from popular control. Hence the movement away from popular control — it is the nature of centralised power to remove itself from control from below, control by the masses, particularly when all other focal points of working class self-management have been abolished as being no longer required as we have a “semi-state.”

Mitchinson seems to want us to look purely at Bolshevik theory and not its practice. It is exactly what supporters of capitalism desire us to do — in theory, capitalism is based on free agreement and free exchange between autonomous individuals but in practice it is a system of inequality which violates the autonomy of individuals and makes a mockery of free agreement.

In a way, The State and Revolution laid out the foundations and sketched out the essential features of an alternative to Bolshevik power — as noted, that system would be essentially libertarian. Only the pro-Leninist tradition has used Lenin’s work, almost to quiet their conscience, because Lenin, once in power, ignored it totally. Such is the nature of the state — as Kropotkin and all other anarchists have argued, there can be no such thing as a “revolutionary government.” Conflict will inevitably arise between the party which aims to control the revolution and the actions of the masses themselves. To resolve the conflict the state must eliminate the organs of workers self-activity which the revolution creates otherwise the party cannot impose its decisions — and this is what the Bolshevik state did, aided of course by the horrors of the civil war.

To state the obvious, to quote theory and not relate it to the practice of those who claim to follow that theory is a joke. It is little more than sophistry. If you look at the actions of the Bolsheviks before and after the Russian Revolution you cannot help draw the conclusion that Lenin’s State and Revolution has nothing to do with Bolshevik policy and presents a false image of what Trotskyists desire.

6. How does Mitchinson define anarchism wrongly?

Mitchinson states:

“In reality the leaders of these movements are not devoid of ideology, they are anarchists. Anarchism is not simply a term of abuse, it comes from the Greek word ‘anarchos’ meaning ‘without government’. To anarchists the state — the institutions of government, the army, police, courts etc. — is the root cause of all that is wrong in the world. It must be destroyed and replaced not with any new form of government, but the immediate introduction of a stateless society.”

Firstly, “anarchos” actually means “without authority,” or “contrary to authority” (as Kropotkin put it). It does not mean “without government” as such (although it commonly is used that way). This means that anarchism does not consider the state as “the root of all that is wrong with the world” — we consider it, like capitalism (wage slavery), patriarchy, hierarchy in general, etc., as a symptom of a deeper problem, namely authority (or, more precisely, authoritative social relations, hierarchical power — of which class power is a subset). Therefore anarchist theory is concerned with more than just the state — it is against capitalism just as much as it is against the state, for example.

Thus, to state the obvious, as anyone familiar with anarchist theory could tell you, anarchists do not think that “the state” is the root of all that is wrong in the world. Marxists have asserted this for years — unfortunately for them, repetition does not make something true! Rather, anarchists see the state as one of the causes of evil in the world and the main protector of all the rest. We also stress that in order to combat all the evils, we need to destroy the state so that we are in a position to abolish the other evils by being in control of our own lives. For example, in order to abolish capitalism — i.e. for workers’ to seize the means of life — the state, which
protects property rights, must be destroyed. Without doing so, the police and army will come and take back that which the workers' have taken. However, we do not claim that the state causes all of our problems — we do claim that getting rid of the state is an essential act, on which many others are dependent.

As Brian Morris argues:

“Another criticism of anarchism is that it has a narrow view of politics: that it sees the state as the fount of all evil, ignoring other aspects of social and economic life. This is a misrepresentation of anarchism. It partly derives from the way anarchism has been defined, and partly because Marxist historians have tried to exclude anarchism from the broader socialist movement. But when one examines the writings of classical anarchists... as well as the character of anarchist movements... it is clearly evident that it has never had this limited vision. It has always challenged all forms of authority and exploitation, and has been equally critical of capitalism and religion as it has been of the state.” [“Anthropology and Anarchism,” Anarchy: A Journal of Desire Armed, no. 45, p. 40]

As can be seen, Mitchinson repeats into the usual Marxist straw man.

7. Does anarchism reject fighting for reforms?

After asserting the usual Marxist falsehoods about anarchism, he moves on:

“This opposition to the state and authority leads to a rejection of participation in any form of parliamentary activity, belonging to a political party or fighting for any reforms, that is political change through the state.”

son’s claim that “there should be no special armed force standing apart from the people” — it did not last three months (the Cheka was founded two months into the revolution, the Red Army was created in early 1918 and elections set aside by March of that year).

Lastly, the Bolsheviks banned newspapers from the start — including other socialist papers. In addition, they did not allow other political tendencies to organise freely. The repression started before the Civil War with the attack, by the Cheka, in April 1918 on the anarchist movements in Petrograd and Moscow. While repression obviously existed during the Civil War, it is significant that it, in fact, started before it began. During the Civil War, the Bolsheviks repressed all political parties, including the Mensheviks even though they “consistently pursued a policy of peaceable opposition to the Bolshevik regime, a policy conducted by strictly legitimate means” and “[i]ndividual Mensheviks who joined organisations aiming at the overthrow of the Soviet Government were expelled from the Menshevik Party.” [George Leggett, The Cheka: Lenin’s Political Police, pp. 318–9 and p. 332] In fact, repression increased after the end of the Civil War — a strange fact if it was that war which necessitated repression in the first place.

Moreover, Mitchinson fails to mention Lenin’s argument that, like the Paris Commune, the workers’ state would be based on a fusion of executive and administrative functions in the hands of the workers’ delegates. This is hardly surprising, as Lenin created an executive body (the Council of People’s Commissars) immediately after the October Revolution. This division of executive and administrative powers was written into the Soviet Constitution. So much for The State and Revolution — its promises did not last a night.

Thus, his claims that the “semi-state” would not be like any other state are contradicted by the actual experience of Bolshevism in power. For anarchists, this comes as no surprise as they are well aware that the state machine does not (indeed, cannot) represent the interests of the working classes due to its centralised, hierar-
obedience at that, during work to the one-man decisions of Soviet di-
rectors, of the dictators elected or appointed by Soviet institutions,
vested with dictatorial powers.” [Six Theses on the Immediate
Tasks of the Soviet Government, p. 44 – our emphasis] Moreover,
the Soviet Constitution stated that “[e]very commissar [of the
Council of People’s Commissars — i.e. the Soviet government] has
a collegium (committee) of which he is the president, and the mem-
bers of which are appointed by the Council of People’s Commissars.”
Appointment was the rule at the very heights of the state. The
“election of all officers” (“without exception” [Lenin, The State and
Revolution, p. 302]) had ended by month six of the revolution
even in Lenin’s own writings — and before the start of the Civil
War.

Lenin also argued in mid-April 1918 that the “socialist character
of Soviet, i.e. proletarian, democracy” lies, in part, in “the people
themselves determining the order and time of elections.” [The Im-
mediate Tasks of the Soviet Government, pp. 36–7] Given that
“the government [had] continually postponed the new general elec-
tions to the Petrograd Soviet, the term of which had ended in March
1918” because it “feared that the opposition parties would show gains”
Lenin’s comments seem hypocritical in the extreme. [Samuel Far-
ber, Before Stalinism, p. 22]

Moreover, the Bolsheviks did not stay true to Lenin’s claim in
The State and Revolution that “since the majority of the people
itself suppresses its oppressors, a ‘special force’ is no longer neces-
sary” as so “in place of a special repressive force, the whole pop-
ulation itself came on the scene.” In this way the “state machine”
would be “the armed masses of workers who become transformed
347] Instead they created a political police force (the Cheka) and
a standing army (in which elections were a set aside by decree).
These were special, professional, armed forces standing apart from
the people and unaccountable to them. Indeed, they were used
to repress strikes and working class unrest. So much for Mitchin-

Again Mitchinson smuggles in a falsehood into his “analysis.”
Anarchists do not reject “fighting for any reforms” — far from it.
We do reject parliamentary activity, that is true, but we think that
reforms can and must be won. We see such reforms coming via the
direct action of those who desire them — for example, by workers
striking for better working conditions, more wages and so. Anyone
with even a passing awareness of anarchist thought would know
this. Indeed, that is what direct action means — it was coined by
French anarcho-syndicalists to describe the struggle for reforms
within capitalism!

As for rejecting parliamentary activity, yes, anarchists do reject
this form of “action.” However, we do so for reasons Mitchinson
fails to mention. Section J.2 of the FAQ discusses the reasons why
anarchists support direct action and oppose electioneering as a
means of both reform and for revolution.

Similarly, anarchists reject political parties but we do not reject
political organisations — i.e. specific anarchist groups. The differ-
ence is that political parties are generally organised in a hierarchi-
fashion and anarchist federations are not — we try and create
the new world when we organise rather than reproducing the traits
of the current, bourgeois, one.

Needless to say, Mitchinson seeks to recruit the people he is slan-
dering and so holds out an olive-branch by stating that “[o]f course,
Marxism is opposed to the brutal domination of the capitalist state
too. Marx saw a future society without a state but instead ‘an asso-
ciation in which the free development of each is the condition for the
free development of all.’ That is a self-governing people. The question
however is how can this be achieved?”

Yes, as Bakunin argued, Marxists do not reject our programme
out of hand. They claim to also seek a free society and so Mitchin-
son is correct — the question is how can this be achieved. An-
archists argue that a self-governing people can only be achieved
by self-governing means — “Bakunin ... advocated socialist (i.e., lib-
ertarian) means in order to achieve a socialist (i.e., libertarian) so-
Thus means and ends must be consistent — revolutionary movements must be organised in a way that reflects the society we want to create. Thus a self-governing society can only be created by self-governing organisations and a self-governing movement. If the revolutionary movement reflects bourgeois society — for example, is hierarchical — then it cannot create a free society. That is the rationale for the way anarchist groups organise, including RTS. Marxists, as we will see, disagree and consider how a revolutionary movement organises itself as irrelevant.

Also, we must note that earlier Mitchinson denied that a self-governing organisation could exist when he was discussing RTS. He asserted that "[i]f there was no leadership and no policy then there could be no action of any kind." Now he claims that it is possible, but only after the revolution. We will note the obvious contradiction — how do people become capable of self-government post-revolution if they do not practice it pre-revolution and, obviously, during the revolution?

8. Does anarchism see the state as the root of all problems?

Mitchinson moves on to assert that:

"Since anarchism sees in the state the root of all problems, it therefore believes these problems will be resolved by the destruction of the state."

As noted above, anarchists do not see in the state the root of all problems. We do urge the destruction of the state but that is because the state is the protector of existing society and in order to transform that society we need get rid of it. Kropotkin, for example, was well aware of "the evil done by Capitalism and the State that supports it." [Evolution and Environment, p. 83] Rather than seeing the fullest participation of the formerly oppressed masses in the management of their own affairs. In the context of the rest of The State and Revolution it could be argued it is the proletariat. However, this cannot be squared with Lenin’s (or Trotsky’s) post-October arguments and practices or the resolution of the Second World Congress of the Communist International which stated that "[e]very class struggle is a political struggle. The goal of this struggle ... is the conquest of political power. Political power cannot be seized, organised and operated except through a political party."

It is obvious that if the party rules, the working class does not. A socialist society cannot be built without the participation, self-activity and self-management of the working class. Thus the question of who makes decisions and how they do so is essential — if it is not the masses then the slide into bureaucracy is inevitable.

Thus to quote The State and Revolution proves nothing for anarchists — it does not discuss the key question of the party and so fails to present a clear picture of Leninist politics and their immediate aims. As soon becomes clear if you look at Leninism in power — i.e. what it actually did when it had the chance, to which we now turn.

Thirdly, we point to what he actually did in power. In this we follow Marx, who argued that we should judge people by what they do rather than what they say. We will concentrate on the pre-Civil War (October 1917 to May 1918) period to indicate that this breaking of promises started before the horrors of Civil War can be claimed to have forced these decisions onto the Bolsheviks.

Before the out-break of Civil War, the Bolsheviks had replaced election of "all officials" by appointment from above in many areas of life — for example, they abolished the election of officers in the Red Army and replaced workers’ self-management in production with one-man management, both forms of democracy being substituted by appointed from above. In addition, by the end of April, 1918, Lenin himself was arguing "[o]bedience, and unquestioning
1848 argued for “universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.” [No Gods, No Masters, vol. 1, p. 63] As can be seen, Lenin’s recommendations were first proposed by anarchists.

Thus the positive aspects of Lenin’s work are libertarian in nature, not Marxist as such. Indeed given how much time is spent on the Paris Commune (an essentially libertarian revolt obviously inspired by Proudhon’s ideas) his work is more libertarian than Marxist, as Bookchin makes clear. It is the non-libertarian aspects which helped to undermine the anarchist elements of the work.

Secondly, Lenin does not mention, never mind discuss, the role of the Bolshevik Party would have in the new “semi-state.” Indeed, the party is mentioned only in passing. That in itself indicates the weakness of using The State and Revolution as a guide book to Leninist theory or practice. Given the importance of the role of the party in Lenin’s previous and latter works, it suggests that to quote The State and Revolution as proof of Leninism’s democratic heart leaves much to be desired. And even The State and Revolution, in its one serious reference to the Party, is ambiguous in the extreme:

“By educating the workers’ party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of leading the whole people to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie.” [The Essential Lenin, p. 288]

Is it the vanguard or the proletariat which is “capable of assuming power”? The answer is important as a social revolution re-

the State as the root of all evil, anarchists are well aware that evil is caused by many things — particularly capitalism — and that the state, as well as causing its own evils, supports and protects others. Thus anarchists are aware that the state is a tool for minority rule and only one source of evil.

Mitchinson, after misrepresenting anarchist thought, states:

“Marxism, meanwhile, sees the division of society into classes, a minority who own the means of producing wealth, and the majority of us whose labour is the source of that wealth, as the crux of the matter. It is this class division of society which gives rise to the state — because the minority need a special force to maintain their rule over the majority — which has evolved over thousands of years into the complicated structures we see today.”

Anarchists would agree, as far as this goes. Bakunin argued that the State “is authority, domination, and forced, organised by the property-owning and so-called enlightened classes against the masses.” He saw the social revolution as destroying capitalism and the state at the same time, that is “to overturn the State’s domination, and that of the privileged classes whom it solely represents.” [The Basic Bakunin, p. 140] The idea that the state is a means to ensure class rule is one anarchists, as can be seen, would agree with.

However, anarchists do not reduce their understanding of the state to this simplistic Marxist analysis. While being well aware that the state is the means of ensuring the domination of an economic elite, anarchists recognise that the state machine also has interests of its own. The state, for anarchists, is the delegation of power into the hands of a few. This creates, by its very nature, a privileged position for those at the top of the hierarchy:

“A government, that is a group of people entrusted with making the laws and empowered to use the collective
force to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of.” [Malatesta, Anarchy, p. 34]

Thus, while it is true that the state (particularly under capitalism) acts as the agent of the capitalist class, it does not mean that it does not have interests of its own. The State has developed as a means of imposing minority rule — that much anarchists and Marxists can agree upon. To do so it has developed certain features, notably delegation of power into the hands of a few. This feature of the state is a product of its function. However, function and feature are inseparable — retain the feature and the function will be re-established. In other words, maintain the state and minority rule will be re-established.

The simplistic class analysis of the state has always caused Marxists problems, particularly Trotskyists who used it to deny the obvious class nature of Stalinist Russia. Rather than see the USSR as a class society in which the State bureaucracy exploited and oppressed the working class for its own benefits, Trotskyists argued it was an autocratic, privileged bureaucracy in a classless society. As anarchist Camillo Berneri argued:

“....

However, what is truly stupid is confusing the rule by a minority with that of the majority managing their own affairs. The two things are different, they generate different social relationships and to confuse the two is to lay the groundwork for the rule by a bureaucratic elite, a dictatorship of state officials over the working class.

Now we come to the usual Leninist claims about Bolshevik theory:

“To ensure that the workers maintain control over this state, Lenin argued for the election of all officials who should be held accountable and subject to recall, and paid no more than the wage of a skilled worker. All bureaucratic tasks should be rotated. There should be no special armed force standing apart from the people, and we would add, all political parties except fascists should be allowed to organise.”

This is what Lenin, essentially, said he desired in The State and Revolution (Mitchinson misses out one key aspect, to which we will return later). Anarchists reply in three ways.

Firstly, we note that “much that passes for ‘Marxism’ in State and Revolution is pure anarchism — for example, the substitution of revolutionary militias for professional armed bodies and the substitution of organs of self-management for parliamentary bodies. What is authentically Marxist in Lenin’s pamphlet is the demand for ‘strict centralism,’ the acceptance of a ‘new’ bureaucracy, and the identification of soviets with a state.” [Murray Bookchin, Post-Scarcity Anarchism, p. 213] As an example, let us look at the recall of “officials” (inspired by the Paris Commune). We find this in Bakunin’s and Proudhon’s work before it was applied by the Communards and praised by Marx. Bakunin in 1868 argued for a “Revolutionary Communal Council” composed of “delegates ... vested with plenary but accountable and removable mandates.” [Michael Bakunin: Selected Writings, pp. 170–1] Proudhon’s election manifesto of
The so-called “semi-state” is nothing of the kind — it is a centralised power in which a few govern the many. Therefore, the “workers’ state” would be “workers” in name only.

Mitchinson continues:

“The task of all previous revolutions was to seize state power. From the experience of the Paris Commune of 1871 Marx and Engels concluded that it would not be possible for the workers to simply use the old state apparatus, they would instead have to replace it with an entirely new one, to serve the interests of the majority and lay the basis for a socialist society.”

Needless to say, he forgets the key question — who is to seize power. Is it the majority, directly, or a minority (the leaders of a party) who claim to represent the majority. Leninists are clear, it is to be the party, not the working class as a whole. They confuse party power with class power. In the words of Lenin:

“The very presentation of the question — ‘dictatorship of the Party or dictatorship of the class, dictatorship (Party) of the leaders or dictatorship (Party) of the masses?’ — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties... “

And:

“To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.”

[Left-wing Communism: An Infantile Disorder, pp. 25–6 and p. 27]

The weakness (or incompleteness) of the Marxist understanding of the state can best be seen by Trotsky’s and his followers lack of understanding of Stalinism. As the state owned all the land and means of production, there could be no classes and so the Soviet Union must be a classless society. However, the obvious privileges of the bureaucracy could not be denied (as Trotsky was once a leading bureaucrat, he saw and experienced them at first hand). But as the state bureaucracy could not be a class and have class interests (by definition), Trotsky could not see the wood for the trees. The actual practice of Leninism in power is enough to expose its own theoretical weaknesses.

9. Why is Mitchinson wrong about the “Abolition [i.e. Abolition] of the state”?

Mitchinson moves on to argue that the “modern capitalist state can wear many guises, monarchy, republic, dictatorship, but in the end its purpose remains the same, to maintain the minority rule of the capitalist class. Marxism’s goal therefore is not simply to abolish the state, but to put an end to class society.” Needless to say, that is also anarchism’s goal. As Bakunin argued, “political transformation .. . and economic transformation ... must be accomplished together and simultaneously.” [The Basic Bakunin, p. 106] So, as can be seen, anarchism’s goal is not simply abolishing the state, but to put an end to class society. That anarchists have always argued the state and capitalism must be destroyed at the same time is easily discovered from reading their works.

Continuing this theme he argues that the state “was born with the split of society into classes to defend private property. So long as there are classes there will be a state. So, how can class society
be ended? Not by its denial, but only by the victory of one of the contending classes. Triumph for capitalism spells ruin for millions.”

Of course, we could point out here that many anthropologists disagree with the claim that the state is a product of class society. As Michael Taylor summarises, the “evidence does not give this proposition a great deal of support. Much of the evidence which has been offered in support of it shows only that the primary states, not long after their emergence, were economically stratified. But this is of course consistent also with the simultaneous rise ... of political and economic stratification, or with the prior development of the state — i.e. of political stratification — and the creation of economic stratification by the ruling class.” [Community, Anarchy and Liberty, p. 132]

Also, of course, as should be obvious from what we have said previously, anarchists do not think class society can be ended by “denial.” As is clear from even a quick reading of any anarchist thinker, anarchists seek to end class society as well as the state. However, we reject as simplistic the Marxist notion that the state exists purely to defend classes. The state has certain properties because it is a state and one of these is that it creates a bureaucratic class around it due to its centralised, hierarchical nature. Within capitalism, the state bureaucracy is part of the ruling class and (generally) under the control of the capitalist class. However, to generalise from this specific case is wrong as the state bureaucracy is a class in itself — and so trying to abolish classes without abolishing the state is doomed to failure.

10. Why is Mitchinson’s comment that we face either “socialism or barbarism” actually undermine his case?

Mitchinson continues:

“As Marx once explained the choice before us is not socialism or the status quo, but socialism or barbarism.”

Marxists are statist only to the extent that one cannot achieve the liquidation of the state simply by ignoring it.” [Trotsky]

Of course, quoting Lenin or Trotsky when they make a false assertion does not turn lies into truth. As proven above, anarchists are well aware of the necessity of overthrowing the state by revolution and defending that revolution against attempts to defeat it. To state otherwise is to misrepresent anarchist theory on this subject. Moreover, despite Trotsky’s claims, anarchists are aware that you do not destroy something by ignoring it. The real question is thus not whether to defend a revolution or whether to shatter the state machine. The questions are, how do you shatter the state, what do you replace existing society with and how do you defend a revolution. To state otherwise is to build a strawman — unfortunately much of Lenin’s “masterpiece” The State and Revolution is based on destroying this self-created strawman.

12. Would the “workers’ state” really be different, as Mitchinson claims?

Mitchinson argues that from “the very beginning this would be like no previous state machine. From day one it would be in effect a semi-state.” The question is, for anarchists, whether this “semi-state” is marked by the delegation of power into the hands of a government. If so, then the “semi-state” is no such thing — it is a state like any other and so an instrument of minority rule. Yes, this minority may state it represents the majority but in practice it can only represent itself and claim that is what the majority desires.

Hence, for anarchists, “the essence of the state ... [is] centralised power or to put it another way the coercive authority of which the state enjoys the monopoly, in that organisation of violence know as ‘government’; in the hierarchical despotism, juridical, police and military despotism that imposes laws on everyone.” [Luigi Fabbri,
because of a respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!” [Anarchy, pp. 40–1]

Not only do we have this theoretical position, we can also point to concrete historical examples — the Makhnovist movement in the Russian Revolution and the CNT militias during the Spanish Revolution, among others — that prove that anarchists do recognise the need and importance of defending a successful revolution.

Therefore, statements asserting that anarchists are against defending a revolution are either spreading a conscious lie or a product of deep ignorance.

Thus the question is not one of defending or not defending a revolution. The question is how do we defend it (and, another key question, what kind of revolution do we aim for). Marxists urge us to "create a new state, for the first time to defend the rule of the majority over the minority." Anarchists reply that every state is based on the delegation of power into the hands of a minority and so cannot be used to defend the rule of the majority over the minority. Rather, it would be the rule of those who claim to represent the majority. The confusion between people power and party power is at the root of why Leninism is not revolutionary.

Mitchinson then quotes Lenin and Trotsky to defend his assertion:

“The proletariat needs the state only temporarily. We do not at all disagree with the anarchists on the question of the abolition of the state as the aim. We maintain that, to achieve this aim, we must temporarily make use of the instruments, resources and methods of state power against the exploiters.” [Lenin]

“Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state.

We should point out that it Rosa Luxemburg who is usually associated with this quote. She made her famous comment during the First World War. The start of this war saw the Marxist German Social Democratic Party (and a host of others) vote for war credits in Parliament. This party was a mass workers’ party which aimed to used every means, including elections, to gain reforms for the working class. The net end result of this strategy was the voting for war credits and the support of their state and ruling class in the war — that is, the betrayal of the fundamental principles of socialism.

This event did not happen out of the blue. It was the end result of years of working within the bourgeois political system, of using elections ("political activity") as a means of struggle. The Social Democratic Parties had already been plagued with reformist elements for years. These elements, again, did not come from nowhere but were rather the response to what the party was actually doing. They desired to reform the party to bring its rhetoric in-line with its practice. As one of the most distinguished historians of this period put it, the “distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action.” [C. Schorske, German Social Democracy, p. 38] The debacle of 1914 was a logical result of the means chosen, the evidence was already there for all to see (except, apparently, Lenin who praised the “fundamentals of parliamentary tactics” of the German and International Social Democracy and how they were “at the same time implacable on questions of principle and always directed to the accomplishment of the final aim” in his obituary of August Bebel in 1913! [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, p. 248])

Needless to say, this result had been predicted by Bakunin over 40 years previously. And Mitchinson wants us to repeat this strategy? As Marx said, history repeats itself — first it is tragedy, second time it is farce.
11. Why is Mitchinson wrong to assert anarchists do not believe in defending a revolution?

Mitchinson argues that the “victory of the working class can only mean the destruction of the capitalist state. Will the capitalists take defeat like sporting ladies and gentlemen, retiring quietly to the pavilion? No, all history suggests that they would not. The workers would need to create a new state, for the first time to defend the rule of the majority over the minority.”

Yes, indeed, all history does show that a ruling class will not retire quietly and a revolution will need to defend itself. If anarchists did believe that they would retire peacefully then Marxists would be correct to attack us. However, Marxist assertions are false. Indeed, they must think anarchists are morons if they genuinely do think we do not believe in defending a revolution. A few quotes should suffice to expose these Marxist claims as lies:

“Commune will be organised by the standing federation of the Barricades... [T]he federation of insurgent associations, communes and provinces... [would] organise a revolutionary force capable of defeating reaction... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Michael Bakunin: Selected Writings, pp. 170–1]

“[L]et us suppose... it is Paris that starts the revolution... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and quartiers, they will form the revolutionary federation of all the quartiers, the federative commune... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services... and to organise common defence against the enemies of the Revolution.” [Op. Cit., p. 178–9]

Bakunin was well aware that revolution implied “civil war” — i.e. attempts by the ruling class to maintain its power (see, for example, his “Letters to a Frenchman” in Bakunin on Anarchism). As can be seen, Bakunin was well aware of the needs to defend a revolution after destroying the state and abolishing capitalism. Similarly we discover Malatesta arguing that we should “[a]rm all the population,” and the “creation of a voluntary militia, without powers to interfere as militia in the life of the community, but only to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution.” [Life and Ideas, p. 170 and p. 166] In Malatesta’s words:

“But, by all means, let us admit that the governments of the still emancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear... [Some people] seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again,
ers, the state bureaucracy and governments act in a concerted way to protect the system.”

Very true. However, the SWP fail to analyse why the state is centralised. Simply put, the state is centralised to facilitate minority rule by excluding the mass of people from taking part in the decision making processes within society. This is to be expected as social structures do not evolve by chance — rather they develop to meet specific needs and requirements. The specific need of the ruling class is to rule and that means marginalising the bulk of the population. Its requirement is for minority power and this is transformed into the structure of the state and capitalist company. The SWP assume that centralisation is simply a tool without content. Rather, it is a tool that has been fashioned to do a specific job, namely to exclude the bulk of the population from the decision making process. It is designed that way and can have no other result. For that reason anarchists reject centralisation. As the justly famous Sonvillier Circular argued: “How could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible.” [quoted by Brian Morris, Bakunin: The Philosophy of Freedom, p. 61]

Thus Rudolf Rocker:

“For the state centralisation is the appropriate form of organisation, since it aims at the greatest possible uniformity in social life for the maintenance of political and social equilibrium. But for a movement whose very existence depends on prompt action at any favourable moment and on the independent thought and action of its supporters, centralism could but be a curse by weakening its power of decision and systematically repressing all immediate action. If, for example, as was the case in Germany, every local strike had first to be approved by the Central, which was often hundreds of miles away and growing global anticapitalist movement.” Mitchinson attacks the action for being something it was never intended to be.

He “analyses” the RTS press release:

“The fact that parliament appears powerless to prevent job losses or the destruction of the environment, only demonstrates that it serves the interests of capitalism.”

Very true, as Kropotkin argued the “State is there to protect exploitation, speculation and private property; it is itself the by-product of the rapine of the people. The proletariat must rely on his own hands; he can expect nothing of the State. It is nothing more than an organisation devised to hinder emancipation at all costs.” [Words of a Rebel, p. 27] He argues elsewhere that “small groups of men [and women] were imbued with the ... spirit of revolt. They also rebelled – sometimes with the hope of partial success; for example winning a strike and of obtaining bread for their children ... Without the menace contained in such revolts, no serious concession has ever been wrung by the people from governing classes.” [Evolution and Environment, p. 103]

Mitchinson seems to agree:

“However, under pressure from below it is possible to introduce reforms through parliament that are in the interests of ordinary people.”

Thus reforms are possible, but only if we rely on ourselves, organise pressure from below and use direct action to force parliament to act (if that is required). Which is what anarchists have always argued. Without anti-parliamentary action, parliament will ignore the population. That is what anarchists have always argued — we have to reply on our own organisations, solidarity and direct action to change things for the better. Faced with such a movement, parliament would introduce reforms regardless of who was a member of it. Without such a movement, you end up with Tony Blair.
Thus Mitchinson is confused — by his own logic, the anarchists are correct, we have to work outside parliament and electioneering in order to be effective.

He continues:

“It is no use declaring parliament to be irrelevant, and turning your back on it when the majority do not agree, and still look to government to make their lives better. This is the mirror image of the sects attitude to the Labour Party. Any and every avenue which can be used to improve our lives must be used.”

How do you change the opinion of the majority? By changing your position to match theirs? Of course not. You change their position by argument and proving that direct action is more effective in making their lives better than looking to government. Mitchinson would have a fit if someone argued “it is no use declaring capitalism to be wrong and fighting against it when the majority do not agree and still look to it to make their lives better.” If the majority do not agree with you, then you try and change their opinion — you do not accept that opinion and hope it goes away by itself!

Mitchinson seems to be following Lenin when he argued “[y]ou must not sink to the level of the masses ... You must tell them the bitter truth. You are duty bound to call their bourgeois-democratic and parliamentary prejudices what they are — prejudices. But at the same time you must soberly follow the actual state of the class-consciousness ... of all the toiling masses.” [Left-wing Communism: An Infantile Disorder, p. 41] Obviously, you cannot tell workers the bitter truth and at the same time follow their prejudices. In practice, if you follow their prejudices you cannot help but encourage faith in parliament, social democratic parties, leaders and so on. Progress is achieved by discussing issues with people, not ducking the question of political issues in favour of saying what the majority want to hear (which is what the capitalist media subject to “revolutionary” coercion. As a government policy it can have no other effect than deterring democracy.

Thus Leninist politics provides the rationale for eliminating even the limited role of soviets for electing the government they hold in that ideology. The Leninist conception of workers’ councils is purely instrumental. In 1907, Lenin argued that:

“the Party ... has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers’ Deputies ... to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement ... the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets ... for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous.” [Marx, Engels and Lenin, Anarchism and Anarcho-Syndicalism, pp. 209–10]

As can be seen from the experiences of Russia under Lenin, this perspective did not fundamentally change — given a conflict between the councils and the party, the party always came first and soviets simply superfluous.

15. Why is the SWP’s support for centralisation anti-socialist?

The SWP continue:

“Centralism is needed above all because the capitalist state is centralised. The police, media moguls, employ-
against members of the working class as well. The question of course arises — who decides what a “wavering” or “unstable” element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice whoever rejects the government’s decisions (for example, strikers, local soviets which reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin’s comment is simply a justification for state repression of its enemies (including elements within, or even the whole of, the working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons.

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country must, at the same time, recall their delegates and organise a national congress of soviets (which, we note, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to “carry out all orders of the respective higher organs of the soviet power”). Any independence on their part would be considered “wavering” or an expression of “unstable” natures and so subject to “revolutionary coercion”. In a highly centralised system, the means of accountability is reduced to the usual bourgeois level — vote in the general election every few years (which, in any case, can be annulled by the government if its dislikes the “passing moods” expressed by them). As can be seen above, the Bolsheviks did disband soviets when they considered the wrong (i.e. “wavering” or “unstable”) elements had been elected to them and so a highly centralised state system cannot be responsive to real control from below.

Secondly, “revolutionary coercion” against “wavering” elements does not happen in isolation. It will encourage critical workers to keep quiet in case they, too, are deemed “unstable” and become

19. How does Mitchinson distorts the use of the term “Self-reliance”?

Mitchinson argues that:

“In any case this ‘self-reliance’ is no alternative. Self-reliance won’t get electricity into your house, educate your children or treat you when you are ill.”

No anarchist and no one in RTS ever claimed it would. We use the term “self-reliance” in a totally different way — as anyone familiar with anarchist or RTS theory would know. We use it to describe individuals who think for themselves, question authority, act for themselves and do not follow leaders. No anarchist uses the term to describe some sort of peasant life-style. But then why let facts get in the way of a nice diatribe?

He continues:

“We have the resources to cater for all of society’s needs, the only problem is that we do not own them.”

Actually, the real problem is that we do not control them. The examples of Nationalised industries and the Soviet Union should
make this clear. In theory, they were both owned by their populations but, in practice, they were effectively owned by those who managed them — state bureaucrats and managers. They were not used to cater for our needs, but rather the needs of those who controlled them. For this reason anarchists argue that common ownership without workers’ self-management in the workplace and community would be little more than state capitalism (wage labour would still exist, but the state would replace the boss).

He continues with his distortion of the concept of “self-reliance”:

“Individualism (self-reliance) cannot be an alternative to socialism, where all the resources of society are at all of our disposal, and equally we all contribute what we can to society.”

Firstly, anarchists are socialists and mostly seek a (libertarian) communist society where the resources of the world are at our disposal.

Secondly, self-reliance has little to do with “individualism” — it has a lot to do with individuality, however. The difference is important.

Thirdly, in a part of the press release strangely unquoted by Mitchinson, RTS argue that their action “celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition.” RTS are well aware that self-reliance does not equal individualism and they are very clear that oppose individualism and desire co-operation. Given that Mitchinson quotes from their press release, he must know this and yet he asserts the opposite.

Mitchinson seems to equate self-reliance with “individualism” and so, presumably, capitalism. However, capitalists do not want self-reliant workers, they want order takers, people who will not question their authority. As David Noble points out, after an experiment in workers’ control General Electric replaces it with a the
Brinton’s *The Bolsheviks and Workers Control* or section 17 of the appendix “Marxism and Spanish Anarchism” for details). All this before the start of the Russian Civil War. Similarly, Lenin and Trotsky happily replaced the democratically elected leaders of trade unions with their followers when it suited them.

As Trotsky argued in 1921, you cannot place “the workers’ right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers’ democracy!” He continued by stating the “Party is obliged to maintain its dictatorship ... regardless of temporary vacillations even in the working class ... The dictatorship does not base itself at every moment on the formal principle of a workers’ democracy.” [quoted by M. Brinton, *The Bolsheviks and Workers’ Control*, p. 78]

Of course, such a position follows naturally from Lenin’s theory from *What is to be Done?* that “the working class, exclusively by their own effort, is able to develop only trade union consciousness ... The theory of socialism [i.e. Marxism], however, grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals ... the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.” This meant that “Social Democratic [i.e. socialist] consciousness ... could only be brought to them from without.” [*Essential Lenin*, pp. 74–5]

For Leninists, if the workers’ act in ways opposed to by the party, then the party has the right to ignore, even repress, the workers — they simply do not (indeed, cannot) understand what is required of them. They cannot reach “socialist consciousness” by their own efforts — indeed, their opinions can be dismissed as “there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement the only choice is: either bourgeois or socialist ideology ... to belittle socialist ideology in any regime that was “designed to ‘break’ the pilots of their new found ‘habits’ of self-reliance, self-discipline, and self-respect.” [*Forces of Production*, p. 307]

Capitalists know the danger of self-reliant people. Self-reliant people question authority, think for themselves, do not follow leaders and bring these abilities into any groups they join. Thus self-reliance is not purely an individual thing, it also refers to groups and classes. Anarchists desire to see a self-reliant working class — a class which makes its own decisions and does not follow leaders. Thus, for anarchists, self-reliance refers to both individuals and groups (just as self-management and self-liberation does). Needless to say, for those in authority or those seeking authority self-reliance is an evil thing which must be combated. Hence Mitchinson’s diatribe — it is the cry of the would-be leader who is afraid his followers will not respect his authority.

20. Is anarchism an example of “Philosophical idealism”?

He turns to the May Day demonstration:

“Guerrilla gardening and its related varieties that have sprung up in various places, is nothing more than an offshoot of the old utopian idea of changing society by example.”

Actually, it was a specific demonstration to encourage people to get involved in collective action, to have a good time and challenge authority and the status quo. It was an attempt to change society by example only in the sense that it would encourage others to act, to challenge the status quo and get involved in collective action. If Mitchinson was consistent he would have to oppose every demonstration that occurred before the final insurrection that created the “workers’ state” — a demonstration is, by its very nature,
an example to others of what is possible, an example of our collective strength and our desire for change. You may be critical of the nature of the guerrilla gardening action (and many anarchists are), but you cannot misrepresent its nature as Mitchinson does and be expected to be taken seriously.

He continues:

“The roots of this scheme lie in idealist philosophy. Philosophical idealism refers to the notion that people’s actions are a consequence of their thoughts, that ideas and not our conditions of life determine our outlook. When, through a long process of accumulation, we change people’s minds, then they will live differently, capitalism will simply be redundant. The capitalist class themselves will presumably sit idly by and watch their system fall apart.”

Given that the “anti-capitalist” demonstrations have met extensive state violence, it is clear that those involved are well aware that capitalist class will not just watch its power disappear.

Also, calling RTS’s action “idealist philosophy” is quite ironic for someone who seems intent in ignoring the history of Social Democracy and dismisses attempts to analyse the Bolsheviks in power as “bourgeois slanders.” However, Mitchinson in his diatribe forgets one of the basic arguments of materialism — namely that ideas themselves are part of the material world and so influence society and how it develops. He rejects the notion that peoples thoughts and ideas determine their actions. He obviously thinks that people operate on auto-pilot, not thinking about their actions. However, in reality, what people do is dependent on their thoughts — they think about their actions and what motivates them influences their activity. If thoughts did not determine people’s actions then Mitchinson would not have spent so much time writing this article!

Thus Mitchinson is well aware of the importance of ideas in social change, at least implicitly. Indeed, he argues for the need for a
solidarity. They ignored the liberty of others by violating their agreements with them, they violated their equality by acting as if the other groups ideas and decisions did not matter and they violated solidarity by ignoring the needs of the common struggle and so placing their fellow demonstrators in danger. While anarchists do respect the rights of minorities to act as they see fit, we also recognise the importance of solidarity with our fellow workers and protestors. The SWP by failing to consider the needs of the common struggle sabotaged the demonstration and should be condemned not only as hypocrites but also as elitists — the party is not subject to the same rules as other demonstrators, whose wishes are irrelevant when they conflict with the party. The implications for the SWP’s proclaimed support for democracy is clear.

So it appears that minorities can and should ignore agreements — as long as the minority in question are the leaders of the SWP and its sister parties. They have exposed themselves as being hypocrites. Like their heroes, Lenin and Trotsky, they will ignore democratic decisions when it suits them (see next section). This is sickening for numerous reasons — it placed the rest of the demonstrators in danger, it weakened the demonstration itself and it shows that the SWP say one thing and do the exact opposite. They, and the political tradition they are part of, clearly are not to be trusted. The bulk of the membership went along with this betrayal like sheep. Hardly a good example of revolutionary consciousness. In fact it shows that the “revolutionary” discipline of the SWP is like that of the cops or army) and that SWP’s centralised system is based on typically bourgeois notions. In other words, the organisational structure desired by the SWP does not encourage the autonomy, initiative or critical thinking of its members (as anarchists have long argued).

Prague shows that their arguments for “centralisation” as necessary for “democracy” are hypocrisy and amount to little more than a call for domination by the SWP’s leadership over the anticapitalist movement — a call hidden begin the rhetoric of “democ-

“mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students.” To state the obvious, a socialist programme is a means to “change people’s minds” and present the possibility of creating a new society. Does he seriously think a socialist revolution is possible without changing people’s minds, getting them to desire a socialist society?

Moreover, if he had read Bakunin he would be aware that anarchists consider the class struggle as the way to change people’s ideas. As Bakunin argued:

“the germs of [socialist thought] ... [are to] be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants, to un-jam within him a stream of thought corresponding to his instinct ... What impedes the swifter development of this salutary though among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? ... they are insufficient ... [and] who will conduct this propaganda? ... [The] workers’ world ... is left with but a single path, that of emancipation through practical action ... It means workers’ solidarity in their struggle against the bosses. It means trade-unions, organisation ... To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses ... As soon as he begins to take an active part in this wholly material struggle, ... Socialism replaces religion in his mind... through practice and collective experience ... the progressive and development of
the economic struggle will bring him more and more to recognise his true enemies ... The workers thus enlisted in the struggle will necessarily ... recognise himself to be a revolutionary socialist, and he will act as one.” [The Basic Bakunin, pp. 102–3]

Thus anarchists are aware that experience determines thought but we are also aware that thought is essential for action. We recognise the importance of ideas in the class struggle but we also realise that the ideas people have change as a result of that struggle. To state otherwise is to misrepresent anarchist thought.

21. How is Mitchinson’s critique self-contradictory?

He continues his distortion:

“Whilst believing in a revolutionary struggle to overthrow capitalism, anarchists argue that it must be replaced by...nothing.”

This is ironic for quite a few reasons. Firstly, above Mitchinson claimed that anarchists did not aim to overthrow capitalism, just the state. Now he is claiming we do believe in overthrowing capitalism. Secondly, he quoted Trotsky saying that anarchists just ignore the state. Now Mitchinson states we aim to overthrow the capitalism via revolutionary struggle. How do you overthrow something via revolutionary struggle by ignoring it? His critique is not even internally consistent.

Moreover, he is well aware what anarchists want to replace capitalism with, after all he quotes an anarchist conference which stated that they aimed for “the creation of an absolutely free economic organisation and federation based on work and equality”! Bakunin was always arguing that the International Workers Association should become “an earnest organisation of workers associations from all countries, capable of replacing this departing centrally decided to have one big march (regardless of what the others thought or the majority wished or agreed to) the decision was made with clearly no idea of the local geography otherwise they would have known that the front at the bridge would have been small. The net result of the “efficient” centralisation of the SWP? A mass of protestors stuck doing nothing due to a lack of understanding of local geography and the plan to blockade the conference seriously weakened. A federal organisation, on the other hand, would have had information from the local activists who would have been organising the protests and made their plans accordingly.

Therefore, to summarise. Ten days after denouncing anarchism for refusing to accept majority decisions and for being against “centralisation” (i.e. making and keeping agreements), the SWP ignore majority decisions, break agreements and do their own thing. Not only that, they weaken the demonstration and place their fellow protestors in difficulties simply so they could do nothing someplace else as, unsurprisingly enough, their way was blocked by riot cops. An amazing example of “democratic centralism” in practice and sure to inspire us all to follow the path of Marxism-Leninism!

The hypocrisy of their actions and arguments are clear. The question now arises, what do anarchists think of their action. As we argued in the last section, while anarchists favour direct democracy (self-management) when making decisions we also accept that minorities can and should ignore a majority decision if that decision is considered to be truly disastrous. However, any such decision must be made based on evaluating the damage caused by so making it and whether it would be a violation of solidarity to do so. This is what the SWP clearly failed to do. Their decision not only made a mockery of their own argument, it failed to take into account solidarity with the rest of the demonstration.

From an anarchist perspective, therefore, the SWP’s decision and actions cannot be justified. They violated the basic principles of a revolutionary movement, the principles of liberty, equality and
In the Blue sector, where the anarchists were concentrated, this meant that at the height of a battle with hundreds of riot police, a water cannon and two Armoured Personnel Carriers they were forced to send 300 people on a 2 km hike to attempt to close this gate. Shortly after they left a police charge broke the Blue Block lines leading to arrests and injuries.

Thus, by ignoring the plan and doing their own thing, they not only made a mockery of their own arguments and the decision making process of the demonstration, weakened the protest and placed others in danger.

And the net effect of their defection? As the Weekly Worker pathetically comments:

“Of course, it was blocked by ranks of riot police …”

As the bridge was a very narrow front this resulted in a huge amount of people stuck behind “Ya Basta!” with nothing to do except sit around. So the “International Socialists” and other Leninists who undertook the act of sabotage with them were stuck doing nothing behind “Ya Basta” at the bottom of the bridge (as would be expected — indeed, this exposes another failing of centralism, its inability to know local circumstances, adapt to them and plan taking them into account). The tiny number of anarchists who marched around to cover their gate on the other hand, took the police by surprise and broke through to the conference centre until driven back by hundreds of riot police. Worse, there were some problems in the “Yellow Block” as the Leninists were pushing from behind and it took some serious explaining to get them to understand that they should stop it because otherwise people in the front line could be crushed to death. Moreover, they demanded to be allowed up alongside “Ya Basta” at the front, next to the riot cops, but when “Ya Basta” did pull out and invited the SWP to take their place in the front they refused to do so.

Moreover, the actual result of the SWP’s disgraceful actions in Prague also indicates the weakness of centralism. Having world of States and bourgeoisie.” [The Basic Bakunin, p. 110] In other words, the “future social organisation must be made solely from the bottom upwards, by the free association of workers, first in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.” [Michael Bakunin: Selected Writings, p. 206] Even Engels acknowledged that the anarchists aimed to “dispose all the authorities, abolish the state and replace it with the organisation of the International.” [Marx, Engels and Lenin, Op. Cit., p. 72] Anyone with even a basic knowledge of anarchist theory would know this. And given that Mitchinson stated that “Marx saw a future society without a state” as well and that he quotes Trotsky as arguing “Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state” we can only assume that Marxists also aim at replacing it, eventually, when the state “withers away,” with “nothing.”

This sentence, more than any other, shows the level which some Marxists will sink to when discussing anarchism. It shows that the standard Marxist critique of anarchism is little more than an inconsistent collection of lies, distortion and misrepresentation. Mitchinson not only contradicts his ideological gurus, he even contradicts himself! That is truly impressive.

22. How did Trotsky make the trains run on time?

Mitchinson asks:

“Yet with no central apparatus, no organisation, how would the trains run on time, how could organ transplants be organised, how could the world’s resources be channelled into permanently overcoming famine.”

Firstly, we must note the usual fallacy — being opposed to a “central apparatus” does not imply “no organisation.” Instead of
centralised organisation, anarchists propose **federal** organisations in which co-ordination is achieved by collective decision making from the bottom up. In other words, rather than delegate power into the hands of “leaders”, an anarchist organisation leaves power at the bottom and co-ordination results from collective agreements that reflect the needs of those directly affected by them. Thus a federal organisation co-ordinates activities but in a bottom-up fashion rather than top-down, as in a centralised body.

Secondly, needless to say, anarchists are quite clear on who would make the trains run on time — the railway workers. Anarchists are firm supporters of workers’ self-management. Anyone with even a basic understanding of anarchist theory would know that. Moreover, the experience of workers’ self-management of the railways by the anarchist union the CNT during the Spanish Revolution indicates that such anarchism can, and does, ensure that the trains run on time. In contrast, the experience of Russia — when the Bolsheviks did create a “central apparatus” — proved a total failure. It is quite appropriate that Mitchinson uses the “trains running on time” example, after all it is what apologists for Italian fascism praised Mussolini for! This is because Trotsky (when he ran the railways) did so in a way that Mussolini would have been proud of — he subjected the railway workers to military discipline:

> “Due to the Civil War — and to other factors less often mentioned, such as the attitude of the railway workers to the ‘new’ regime — the Russian railways had virtually ceased to function. Trotsky, Commissar for Transport, was granted wide emergency powers [in August 1920] to try out his theories of ‘militarisation of labour’. He started out placing the railwaymen and the personnel of the repair workshops under martial law. When the railwaymen’s trade union objected, he summarily ousted its leaders and, with the full support and endorsement

Prague’s Libensky Bridge, serves as an information and strategy clearinghouse for the protesters. A ‘spokes council’ made up of representatives of dozens of groups makes decisions by consensus for this international ad-hoc coalition that has never worked together before. They have an elaborate system of hand signals to indicate their views as they discuss the details of the protests. Given the logistical obstacles, things seem to be running remarkably smoothly.”

Obviously “proper democracy” and a council of group spokespeople discussing the protests were not good enough for the SWP and other Leninist groups. Nor, of course, making an agreement and sticking to it.

The **Weekly Worker** complements the SWP’s decision:

> “Come the march itself, the damage was partially repaired by the decision of a majority of the ‘pink’ contingent (with the SWP and its international sections to the fore) to simply veer off the agreed route. This pink section then partially merged with the yellow to advance on the conference.”

We must point out that the International Socialists appear to have lied about the numbers they were bringing to Prague. The day before the demonstration they claimed they would contribute 2,500 to the Pink section — since then their own press has reported 1,000 in their delegation (Socialist Worker no. 1716 stated that the “day began when over 1,000 marched from the Florenc bus station led by supporters of Socialist Worker and its sister papers elsewhere in Europe”). This would have left the Pink block seriously under strength even if they had not unilaterally left their block.

Their defection from the agreed plan had very serious repercussions on the day — one gate in the Pink sector was never covered.
given the paucity of information about the debates and
differences on this self-appointed body.’

The splitting of the march into three, as a matter of fact, was a great success. It allowed the demonstrators to encircle the conference centre. The marches splitting off from the back working beautifully, catching the police and media by surprise who were clustered at the front of the march (indeed, the police later admitted that they had been caught off guard by the splitting of the march). From the splitting points to the centre the marches were unaccompanied by both police and media. A clear victory. Indeed, what would have been “truly stupid” was doing what the police had expected (and SWP wanted) — to have one big march.

How was the demonstration’s organised? According to eyewitness Katharine Viner (writing in The Guardian on Friday September 29, 2000):

“In the run-up to Tuesday’s demonstration I attended the convergence centre, where ‘spokes council’ meetings took place, and found the sense of community and organisation there astonishing and moving. Every ‘affinity group’ — NGO or group of friends — sent a spokesperson to meetings to make decisions and work out strategy. It sounds impossible to contain, and it was laborious, but it worked and consensus was found. It felt like proper democracy in a way that the ballot box does not.”

Julie Light, of Corporate Watch, indicates the same process at work in her account entitled Spirits, Tensions Run High in Prague (dated September 25, 2000):

“the activist coalition called the Initiative Against Economic Globalisation (INPEG) is training hundreds of people in civil disobedience at the Convergence Centre. The Centre, a converted warehouse space located under

of the Party leadership, ‘appointed others willing to do his bidding. He repeated the procedure in other unions of transport workers.’” [Maurice Brinton, The Bolsheviks and Workers’ Control, p. 67]

He ruled the “central apparatus” he created, called the Tsektran, “along strict military and bureaucratic lines.” [Ibid.] The trains did start moving again, of course. The question is — do workers manage their own activity or does some other group. Trotsky and Lenin in power decided for the latter — and built the “centralised apparatus” required to ensure that result. Needless to say, Trotsky did not justify his militarisation of work in terms of necessary evils resulting from appalling objective conditions. Rather he saw it as a matter of “principle”:

“The working class cannot be left wandering all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers.”

“The very principle of compulsory labour is for the Communist quite unquestionable ... the only solution to economic difficulties from the point of view of both principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power ... and to introduce strict order into the work of its registration, mobilisation and utilisation.”

“The introduction of compulsory labour service is unthinkable without the application ... of the methods of militarisation of labour.” [quoted by M. Brinton, Op. Cit., p. 61 and p. 66]

Why “principle”? Perhaps because Marx and Engels had stated in The Communist Manifesto that one of the measures required during the revolution was the "[e]stablishment of industrial armies”? [Selected Writings, p. 53]
Moreover, the experience of “central apparatus” in Bolshevik Russia helped create famine — the vast bureaucracy spawned by the “workers’ state” could not handle the information a centralised distribution system required. Food rotted in trains waiting for bureaucrats to “channel” resources (and, needless to say, the bureaucrats never went hungry).

23. Can centralised planning meet the needs of the whole of society?

Our Marxist friend then quotes Maybe:

“The radical social movements that are increasingly coming together don’t want to seize power but to dissolve it. They are dreaming up many autonomous alternative forms of social organisation, forms that are directly linked to the specific needs of locality. What might be an alternative to capitalism for people living currently in a housing estate in Croydon is completely different to what might be suitable for the inhabitants of the slums of Delhi.”

He comments on these very sensible words:

“It cannot be of no concern to us what form a new society will take in different countries or even different regions. The economic power we have created over centuries can and must be used in a planned, rational way to eradicate hunger, disease and illiteracy. It must be used in the interests of the whole of society.”

Obviously, the needs of actual people, what sort of society they want, is irrelevant to Marxism. Also ignored is the fact that different cultures will have different visions of what a free society will be like. Thus, for Mitchinson, everyone, everywhere, will be shut the conference down). They failed to win this argument and so had betrayed the rest of the protesters on the day by simply marching directly onto the bridge themselves (in the yellow sector) instead of continuing into the Pink sector as they were supposed to.

Why did the SWP do what they did? Presumably they put themselves down for the Pink section because it was at the front of the march and so offered the best media coverage for their placards and banners. Similarly, they joined the Yellow Section because it was marching directly to the conference centre and not, like Pink, going round to the rear and so, again, offered the best media coverage. In other words, they “did their own thing”, ignored the agreements they made and weakened the protests simply to look the dominant group in the press. Ironically, the Czech media made sure that the Leninist parties got onto their front pages simply because many of them chose to march in Prague with red flags emblazoned with hammer and sickles. Flags associated with the Soviet occupation and the old regime are hardly “popular” and so useful to smear the protests.

The decision of the SWP to ignore the agreed plan was applauded by other Leninists. According to the post-Prague issue of the Communist Party of Great Britain’s paper Weekly Worker:

“Farcically, the organisers had decided to split the march into three, each with its own route and composition — blue (anarchist), pink (trade unions and left organisations) and yellow (NGOs and Jubilee 2000). Ostensibly, this started as a tactic designed to facilitate forming a human chain around the conference centre, although by the day of the action this aim had, apparently, been abandoned. Whether these truly stupid arrangements had been accepted beforehand by all on the INPEG (Initiative Against Economic Globalisation) remains hazy,
13. How does the Battle of Prague expose the SWP as hypocrites?
